Plumbing, Furnace-work, Roofing, Eavetrouting, Repairing, etc. done by a Practical Mechanic.

**J. M. Anderson**  
GLENCOE Plumber

**J. B. COUCH & SON**  
Furniture Dealers  
Funeral Directors  
MAIN STREET - GLENCOE  
Phone day 28, night 100

## CENTRAL GARAGE

### "FORD"

#### Your Profits?

IT'S ASTOUNDING how some folks'll let a habit run away with their profits. Take right now, for instance, when produce is cheap and every nickel counts, you keep on hauling in the most expensive way. You've got into the habit of doing it with horses, when a Ford One-Ton Truck would do it at half the cost, or less.

Maybe you feel that you can't afford to pay spot cash for a Ford Truck. You don't have to when you do business with us. You'll be in town on Saturday. Come in and let us talk it over.

## SNELGROVE & FAULDS

Ford Dealers Glencoe and Rodney

## Chestnut Coal

We have a large stock of D. L. & W. Scranton Coal, clean, bright and well prepared. Indications point to an advance this Fall. Order now, or draw it home \$16 per ton.

## McPHERSON & CLARKE

LUMBER YARD and PLANING MILL  
Glencoe, Ont.

# MILLINERY PARLORS

AND READY-TO-WEAR DEPARTMENT

EVERYTHING IN THE VERY LATEST

# MRS. W. A. CURRIE

### Driving your car this winter?

TOO many car owners are only getting about two-thirds efficiency from their batteries. Come in and let us tell you what to do, in order to get 100% battery service this winter.

If you intend to lay up your car for the winter, DON'T let your battery run down and freeze. Store it with us. For a nominal fee we will care for any make of battery during the winter, give it a monthly freshening charge and return it fully charged and ready for use in the Spring.

When your battery needs replacement, remember Prest-O-Lite is the best cold weather battery.

W. B. MULLIGAN

### DISTRICT AND GENERAL

Absence from church was a punishable offence in the 15th century. Municipal tax rates throughout Ontario are generally higher than last year.

The British museum contains 2,700 complete Bibles, written in all languages.

James Gosnell, clerk of Kent county, died at his home in Chatham on Saturday.

Montreal is the third French-speaking city of the world, being surpassed only by Paris and Marseilles.

It is stated that 250 of the largest industrial corporations in the United States are about to enter Canada and establish industries.

Andrew McCallum has purchased the 50-acre farm of Arthur Ford, being part of lot 21, 5 N. of A. in the township of Dunwich.

A coin-in-a-slot machine has been invented by an Englishman to enable a passenger to learn at what speed he is travelling on a train.

Father P. J. Howard, professor at the Assumption College, Sandwich, sneezed violently for an hour and suffered a fractured rib in consequence.

Chatham customs receipts for the month of September show a rapid decline from the returns of the previous month and also of September last year.

Sheriff D. M. Cameron of Middlesex has been asked to resign by the Provincial authorities as a result of the publication of prison's report on the county jail.

Ten men from Toronto and a number of local men are building a new culvert at the Fleming ravine five miles west of Wardsville on the Provincial highway.

As the result of a local meat war, the price of a side of beef has advanced to 20c and roasts to 15c at Tilbury last week. The country can stand lots of this kind of war.

Experiments have shown that a good yet cheap newspaper paper can be made from saw grass, which grows abundantly along the swamps of the Atlantic coast.

Western Ontario apple growers are receiving \$5.50 a barrel for No. 1 quality and \$5 for No. 2 from buyers who are shipping the fruit to points in Canada, the United States and Great Britain.

Public notice one week in advance of all marriages—such is one of the reforms that the executive of the social service council of the Church of England wants to effect in the Canadian marriage laws.

Mrs. Margaret McMurphy, a lifelong resident of Dunwich, died last week, aged 79 years. Her husband, the late Alexander McMurphy, died 13 years ago. She leaves a family of four daughters and one son.

Efforts to have the teaching of the Bible and religious education made general throughout the public schools of Canada will be made by the general board of religious education of the Church of England in Canada.

The M. C. R. station of Rodney was the scene of an unusual spill when 17 boxes of fish owned by George Gray were struck by a freight train and scattered in every direction. The fish were being unloaded from a truck.

An honorary degree is to be conferred upon Bliss Carman by McGill University at the convocation to be held on October 13. The honor will be the first official recognition of the kind bestowed upon the poet in his native land.

A few days ago Wm. Gawn of Zone township sold to a confectioner ten boxes of ripe red raspberries, picked from the bushes that morning. The lot was retained at 40 cents per box. The size and quality was the same as June or July fruit.

At the annual meeting of the Kent County Motor League a resolution was passed to petition the Postmaster-General to have the names of post offices placed upon the Government buildings, throughout the country as an aid to motorists in general.

Comparison of wholesale fresh meat prices for the week beginning Sept. 19th of this year with those which ruled in the corresponding week of 1920 show that a marked drop has taken place. It runs from 23 to 53 per cent. on the year's figures.

Revised census figures given out at Washington show the population of the United States to be 105,710,820, January 1, 1920, being the date of the enumeration. Nearly 35,000,000 are whites, over 10,000,000 are negroes, and Indians, Japanese and Chinese together number over 400,000.

A magazine agent, Wm. Dunn, of Toronto, was fined \$100 at Ingersoll for obtaining money under false pretences. Evidence was given to the effect that Dunn had been given a subscription for a certain magazine which he claimed to represent, but the subscriber received another.

Angus McCallum, one of the oldest residents of the community, died at the home of his sister, Mrs. Jessie Sutley, Dutton on October 1st, aged 87 years. Mr. McCallum was born at Fingal and moved to Dunwich when quite young. He was unmarried and is survived by three sisters and one brother. At the funeral six nephews acted as pallbearers, as follows:—Daniel McCallum of Appin, George McCallum of Yarmouth, Dugald McCallum of Ekrid, George McCallum of Metcalfe, Neil McCallum of Ripley and Donald McCallum of Cowal.

### MCGILLIVRAY MAN NOMINATED

Strathroy, Oct. 10.—John Drummond of McGillivray was nominated Saturday by a U. F. O. convention as Federal candidate for West Middlesex. Despite the wet weather the convention was one of the largest ever held in the riding. The auditorium and gallery of the Lyceum were filled to overflowing.

Six names were placed in nomination, the runner-up being Harold Curry, U. F. O. director for the district. Nomination was offered by J. Morrison, who addressed the convention, but the U. F. O. secretary firmly declined. Mr. Drummond's nomination was a decided surprise to the southern portion of the riding.

The chair was taken by Walter Bolton, and the speaker of the day was Mr. Morrison, Toronto, who spoke at some length, outlining the policy of the party, and made an able defence of the principles for which it stood. He claimed that the U. F. O. did not stand nearly so much for class legislation as did either of the other parties, and he stoutly upheld the principles of the recall.

Short addresses were given by J. G. Lethbridge, M.P.P. for West Middlesex, and George Brown, M.P.P. for North Middlesex.

The six men nominated were: Harold Curry, Adelaide; T. G. Turnbull, Komoka; D. A. Graham, Carleton Place; John Campbell, Lobo; John Drummond, McGillivray, and J. Weaks, Parkhill. The vote narrowed down to Drummond and Curry, and the former went out on a final vote.

On motion of Taylor and Hawken, Robert Denning was appointed collector at a salary of \$75 per month and stationery.

Orders were issued for the payment of a number of accounts, and several by-laws were read and passed.

Council adjourned to meet on Monday, Nov. 14th, at 1 p.m.

### METCALFE COUNCIL

A meeting of the Metcalfe council was held on October 3rd. Members all present.

Alex. Blain was awarded the contract for the Metcalfe drain.

On motion of Taylor and Hawken, Robert Denning was appointed collector at a salary of \$75 per month and stationery.

Orders were issued for the payment of a number of accounts, and several by-laws were read and passed.

Council adjourned to meet on Monday, Nov. 14th, at 1 p.m.

### GARDINER-SNYDER

A quiet wedding took place at St. Peter's, Bloor Street West, Toronto, of Emilie Adele, younger daughter of Mr. and Mrs. S. Snyder, to James Leonard Gardiner of Detroit, youngest son of Mr. and Mrs. Peter Gardiner of Glencoe. Father Ryder officiated. The bride looked charming wearing a brown duvetyl suit trimmed with beaver, and a corsage bouquet of orchids. Miss Alice Snyder assisted the bride and Louis Snyder acted as best man. A reception was held at the home of the bride's parents at 26 Ulster street. The happy couple left for Buffalo and points west. They will reside in Detroit.

### MAY ABOLISH SHERIFF

It is rumored that a successor to Sheriff D. M. Cameron of Middlesex is not likely to be appointed, and that the Ontario Government is contemplating carrying out the recommendation of the commission which recently reported on the administration of justice in the Province. The commission advised that the office of Sheriff be abolished, and that the duties of Sheriff, high constable and justice be combined in the one office. In the event of the plan being carried out, Deputy Sheriff Ben Watterworth, who is also high constable, is said to be likely to be appointed to the new position.

Tanlac is made of roots, herbs and barks and contains no minerals or opiates.—P. E. Lumley.

### POPULAR MELBOURNE FAIR

This Year's Show More Attractive Than Ever—Thousands Attend

The reputation of Melbourne's annual fair, held last Wednesday, was more than maintained this year, with three good races, a first-class lot of exhibits in all the classes, and plenty of band music and numerous attractions on the midway. An attendance of some four thousand, consisted its financial success. Many of the crowds were from long distances, an evidence that this popular fair has more than local renown.

The exhibits in the hall were of a uniformly high order. Entries were noticeably heavy in the dairy produce section, there being forty entries in butter alone. The ladies' fancy and domestic work classes, and grain and fruit were also well represented. The vegetables and roots were displayed in the open air owing to lack of space in the hall. Cooking and baking were assigned to a tent all to themselves and this was thronged all day with a crowd which certainly voiced approval. In this section the lunch and dinner entries to the number of nine were extremely tempting displays of food. The special award for the best dinner got up by a farmer's wife was well earned by Mrs. Henry Mullins of Ekrid, with a beautifully prepared meal consisting of soup, roast turkey and sausage, stuffed potatoes, jelly, sauce potatoes, carrots, ketchup, pickles, bread and butter, cookies, pickled pears, plum pudding, pies, fancy cakes, cheese, celery, salted almonds, fruits and coffee.

The home baking sections comprised a big entry. There were about forty pies and around thirty loaves of bread, together with a goodly display of other products of the oven and pastry board.

Entries in light and heavy horses and cattle constituted almost record. Sheep and hogs also were well up to the standard of past years, both as to quality and numbers. The following were the principal prize winners:

Light horses—Carriage—Peter Campbell, Lawrence Station; Donald McMillan, Dutton; D. McIntyre and son, Dutton; Dan Campbell, Komoka; N. McGugan, Strathroy, and J. A. Hill and sons, Strathroy.

Roadsters—C. E. Moore, Sheddin; S. Clarke, Melbourne; D. Munroe, Glencoe; D. McIntyre and son, Dutton; D. A. Coulthard, Glencoe; Dan Campbell, Komoka; Archibald McPhail, Dutton; John Coveny, Muncy, and Peter Campbell, Lawrence Station.

Chief awards in cattle—A. E. Perry, Appin; Thos. Hardy, Melbourne; Wm. McTaggart, Melbourne; Gilbert Hyndman, Melbourne; Albert Whittle, Melbourne; M. McGugan, Melbourne; Joseph Long, Melbourne, and J. B. Cornell, Melbourne.

Winners in sheep—Bridie Bros., Muncy; D. A. Campbell, Appin; Wm. McTaggart, Appin and Johnson, Wm. Appin.

Chief poultry awards—Gordon Angus, Lambeth; E. J. Wright, Strathroy; F. B. Martin, Delaware; H. Childs, Glencoe; G. W. Spontenburg, Melbourne, and Wm. Gould, Glencoe.

Prizes in grain, roots and vegetables—R. J. Maines, Delaware; Stanley Trot, Mount Brydges; W. McCutcheon, Glencoe; Geo. Fisher, Melbourne; R. J. Maier, Melbourne; Wm. Gould, Glencoe; Chas. Mullins, Ekrid; Clarence Maier, Delaware.

Two specials for bread were won by Mrs. James Near of Melbourne. A special for the best 10-lb. roll of butter went to Mrs. Samuel Carruthers, Mount Brydges.

Ladies' work—Miss A. Black, Mrs. Campbell, Miss Mather, Mrs. McCutcheon, Miss Fisher, Miss Leach, Miss Hardy.

Lady drivers—D. A. Campbell, John Coveny, N. McGugan.

All three races were productive of some ding-dong battles, with the issues often in doubt until the judge's wire was passed. Those in charge of the racing were: Archie McWilliam of Dutton, starter; Ed. Douglas of Ilderton and John Bridle of Mt. Brydges, judges. Results were as follows:

	Free-for-all
Tony Direct, (T. Hedley) Denfield	1 1 1
Midnight, (C. McKoen) Strathroy	2 2 3
May Go, (C. Sifton) Walkers	3 3 2

	250 Trot or Pace
Jimmy McDonnell, (Barnes)	5 1 1 1
Alsa Craig	1 3 3 3
Charlie Chaplin, (J. H. Harris) Lambeth	1 3 3 3
Lady Angelina, (F. McDonnell) Strathroy	2 4 4 2
Zozetta, (H. Walker) Dutton	2 4 4 4
Victory Bond, (P. Campbell)	5 5 x x
Lawrence	6 5 x x
Bell Go, (T. Hedley) Denfield	3 x x x

Green Race

Nellie Gray, (E. Langford)	1 3 1 1
London	2 1 2 2
Rocky Bars, (F. Smith) Glencoe	3 2 4 4
Rexall, (P. Case) Longwood	3 2 4 4
Nellie B., (J. Walker) Lambeth	5 5 5 5

The efficient way in which the afternoon's program was carried through showed a genius for organization, much of which can be attributed to the genial secretary, Frank McLean, backed up by a first-class assistant in the person of Miss Annie McDougall.

Splendid meals were served to the hungry at reasonable prices in two large tents conducted by the Melbourne Presbyterian and Methodist Ladies' Aids.

A fine concert by the Brunswick

Trio of London, including the comedian, Jock Ballantyne, followed by an old-fashioned barn dance, provided a fitting conclusion to one of the most successful days in the history of the town.

**SALE OF OIL INTERESTS**  
F. J. Carman has disposed of his interests in the Moss oil field to the Dominion Oil Company and has left to make his home permanently in New York. Mr. Carman has been an oil operator for many years, principally in California, and was the first to develop the Moss field to any extent.

The Dominion Oil Company is a promotion by Pittsburgh capitalists for operating in Ontario. The transfer to them was made on Tuesday and new wells will be drilled immediately.

**CONGRATULATIONS**  
We cheerfully extend our most hearty congratulations to Mr. and Mrs. C. O. Smith, whose marriage ceremony was solemnized at Windsor on Oct. 8th. Both parties are well and favorably known in this community and we sincerely wish them a long and happy life among us.

**ACTION FOR ALLEGED LIBEL**  
A writ has been issued against George and Charles Webster of Strathroy and James Whitlock and Nathaniel Currie, who charge the defendants with libel. The alleged offense took place in a letter written to Premier Drury last January, but the nature of the libel is not made public. Elliott & Moss are acting for the plaintiffs.

**DRIVER AT MELBOURNE FAIR RACES INJURED**  
J. T. Harris of Lambeth, a driver in the horse races at Melbourne fair, was removed from the track in the third heat of the 250 trot, suffering from a broken leg and other injuries as a result of an accident that occurred when his horse collided with one driven by McDonald of Christina. Harris was thrown in the track, and in the mix-up that ensued one of the horses stepped on his chest, causing internal injuries, and breaking his leg and several ribs. The other driver and both horses escaped uninjured.

The accident was the second that occurred in the 250 trot. In the second heat of the race, Peter Campbell of Lawrence, who was driving Victory Bond, collided with Walker of Dutton, and was thrown from his cart. Outside of a severe shaking up Mr. Campbell did not sustain any serious injuries.

The Ladies' Guild of St. John's church will hold a talent tea and sale of home cooking on Saturday, Oct. 15, from 3 to 5, in the basement of the church. A cup of tea and cake served, ten cents.

**FLETCHER-MCALPINE NUPTIALS**  
The immediate relatives, to the number of about thirty-five, were the guests at a quiet, pretty wedding solemnized at the home of Alexander McAlpine, Glencoe, on Wednesday, Sept. 21, when his youngest daughter, Minnie Elizabeth, was given in marriage to Archibald Dunlop Fletcher, son of Mr. and Mrs. Malcolm Fletcher of Poplar Hill. The Rev. Mr. Paton of Glencoe officiating. Gowned becomingly in French ivory shawl and carrying a corsage bouquet of Ophelia roses, the bride, leaning on the arm of her father, entered the drawing-room at 2.30 p.m. to the strains of the Bridal Chorus from Lohengrin, played by Theodore Gray. Miss Hazel J. Doble of Detroit, a very intimate friend of the bride, wearing a daintily embroidered gown of apricot canton crepe and carrying a bouquet of sweetheart roses, acted as bridesmaid, while the groom was assisted by his brother, Mack C. Fletcher. Little Evelyn M. Henderson, niece of the groom, wearing a frilly frock of pink organdy, carried a basket of roses and shell-pink asters, in the midst of which was concealed the wedding ring. During the signing of the register Mrs. W. G. McCallum sang very sweetly "Love of Mine."

Following the ceremony the guests repaired to the dining-room, where a sumptuous wedding dinner awaited them.

The groom's gift to the bride was a gold wrist watch, to the bridesmaid a brooch set with pearls, to the groomsmen a pair of gold cuff links, to the ring-bearer a gold bracelet and to the pianist gold cuff links.

The array of costly gifts of the happy couple were the recipients amply testified to the esteem in which they are held.

Mr. and Mrs. Fletcher left, mid a copious shower of confetti and good wishes, on a short honeymoon trip to Toronto, Montreal and Ottawa.

On their return they will reside on the groom's fine farm at Poplar Hill.

On Monday evening prior to the wedding the bride-elect was presented with a silver tea set by members of the Presbyterian church, Glencoe.

Good, reliable household remedies are necessary to good health. For Asthma, RAZ-M-A-H is the best known remedy. For Rheumatism, etc. Templeton's Rheumatic Capsules are standard. Sold locally by H. I. Johnston.

Some men are outright thieves, while others borrow umbrellas.

# Soils and Crops

Address communications to Agronomist, 77 Adelaide St. West, Toronto

## Selecting Seed Potatoes

I find that I get far better results by selecting my seed potatoes from the hills as they are dug. I have never experimented with this on a big scale, for I am not a big potato grower, but it pays me on a small scale, and perhaps would pay even better on a bigger one.

In selecting the big nice tubers from the pile of potatoes in the spring of the year, you do not know that you will get a good yield of big nice potatoes even with a very favorable season. You may be getting diseased tubers from hills infected with scab, dry rot, and the like, even though the individual tubers may not show it to any marked degree. Whenever possible, I like to dig my seed potatoes by hand with an ordinary potato fork. This takes little extra work when only a few bushels of seed are needed, and by turning out each hill to one side, you are sure of getting no bad potatoes mixed with the desirable ones as they are mixed up.

When I come across a hill of nice, stable tubers, free from scab and other diseases and with a generous yield, I know I am getting strong, vigorous stock that should produce well the following season. For such a hill could not have been infected with disease, and it is vastly superior to seed that from a puny neighbor. A good-looking potato may come from a bad hill, but the disease germs will get in their deadly work after sowing. By selecting your seed at digging time, you can store these best-looking tubers separately, and thus keep your seed stock in first-class condition.

Good tubers stored in a bin with decaying spots will become weakened in vitality, and be less able to produce a good crop. I know from experience that it pays to select and store seed tubers separately, especially for late potatoes. I have helped plant fine-sprouting spuds from a bin where the potatoes were from one-hill to one-half decayed, and I have never known such to make a stand. The heat from the diseased tubers often destroys the eyes of those remaining. Such tubers may look all right, but they will not sprout and produce.

For best results it will pay you to select your seed potatoes in the fall, and to store them in small well-ventilated compartments; this will hold good whether you expect to

grow potatoes successfully on either a small or a large scale.

## Fall Work in the Orchard

The practice of plant sanitation to prevent parasitic diseases and rotting of farm produce, if heeded in time will save many of the trees and keep vegetables from rotting.

The raspberry patch should be "canceled" to remove all dead and badly diseased stalks. This is more or less of a sanitary measure and it gives the ground a chance.

In fall pruning of apple orchards the farmer has a chance to rid the trees of cankered limbs. In deciding what cuts are to be made, the vigor and freedom from disease of a limb should be borne in mind.

Any pruning cut exposes the heartwood of the tree and opens the way for heart rot fungi. As soon as the cut surfaces are dry they should be painted with a white lead paste (not lead paint). Common lime paint or ready-mixed house paint has small protecting value for pruned surfaces. The pruning cut should be made flush with the main branch. The heading of wounds comes about from a "callus" growth from the cambium. If stumps are left the projecting parts prevent the healing.

Hold-over cankers of fire blight can be located by the blighted twigs on which the leaves have withered and dried. The canker is at the base of the twig. These should be located and removed. Thorough winter eradication coupled with vigilance in the early part of the growing season will control fire-blight.

Ventilation is necessary in the storage cellar if disastrous rotting of the produce is to be avoided. Vegetable pits should be provided with a straw floor and a straw or crate chimney. Black heart of potatoes and black speckling of cabbage are due to lack of oxygen in the storage room.

A cleanup of all trash from the preceding crop should take place promptly in the garden. Many fungi survive the winter in such trash. Sanitation is the gardener's greatest protection.

In the field sanitation is obtained by crop rotation. Those who followed corn with corn, beets with beets, or beans with beans, have this year found that disease has been one important factor in their farming. Aside from its relations to soil fertility, crop rotation is necessary to avoid disease intensification.

## THE CHILDREN'S HOUR

Into the lives of two Scotch Boy Scouts there has come Adventure with a capital "A." They have started a voyage of 50,000 miles, through uncharted Antarctic seas, upon a little schooner scarcely bigger than an oyster boat. And, what is as important to them, they are serving Sir Ernest Shackleton, the explorer, as cabin boys.

A few weeks ago it became known that the little Quest was to put into London for her finishing touches before starting on her long voyage of exploration in the South Polar regions. And then Sir Ernest Shackleton casually announced that he would probably lead a cabin boy to go along, and that he thought a Boy Scout would fill the bill best.

One thousand Boy Scouts promptly applied for the job. If the others had heard of it in time, they probably also would have begged to be taken along. The spirit that sends the Englishman out to the ends of the earth in his wanderings still is pretty much in evidence, despite what the pessimists say about the decline of the empire. (That is not to mention the spirit which would prompt any normal boy of any Anglo-Saxon country to volunteer for a little jaunt such as the Quest's.)

The 1,000 applicants were narrowed down to ten by the Boy Scout headquarters at London, and these ten boys were called to London to interview Sir Ernest, in order that he might choose one of them.

The choice narrowed down to two, both of whom seemed equally good. Sir Ernest solved his dilemma by accepting both of them. If there were two prouder boys in the British Isles at the moment when the explorer made known his decision, persons who watched the faces of the two chosen Scouts would like to meet them; they simply stood and beamed as Sir Ernest, standing before a big chart, outlined to them the route which the Quest would follow.

Both of the Quest's cabin boys are from the north of Scotland. They are: Patrol Leader N. E. Mooney, aged seventeen, Kirkwall, Orkney.

Patrol Leader J. W. F. Marr, aged eighteen, Aberdeen.

Young Mooney, before he knew he had been chosen, gave the following reasons for wishing to go with the expedition: The pleasure of serving a British

hero, whether in difficult or ordinary tasks, and willingness to undertake and try to perform well whatever he commands. A Scout's training makes me generally useful.

I have some knowledge of photography, microscopy, electricity and trigonometry.

I was born and bred in a cold and stormy climate, and have never lived out of sight of the sea.

The Orkneys are associated with Arctic expeditions and Viking traditions.

Mooney is the slighter and also the more reserved of the two boys. Until he left his native Orkneys for the first time, to come to London, he had never seen a train or a large city.

Marr, of a more conventional Scotch type, with blue eyes and lean jaws, is a student at Aberdeen University. He has played Rugby football and tennis for many years. Two years ago he saved a young girl at Banff from drowning, and immediately afterward made a gallant but ineffectual effort to save another boy and girl who were also in danger. He has won several Scout decorations.

"I was going to be a farmer, like my father, but I don't think I shall now," he said after his choice as one of the Quest's crew had been communicated to him. "I shall go on expeditions with Sir Ernest Shackleton, if he will let me, the next time as well. I have always waited for this."

"I have had to go to the Far North to get boys for the Far South," was Sir Ernest Shackleton's only comment, but it was obvious that he was highly pleased with the result of his appeal.

## Wintering Bees

There are three important points to be observed in keeping bees safely in the winter. One of these is a strong populous colony consisting mainly of young bees; another is an abundant supply of wholesome stores in the combs, and the third is adequate protection from the cold.

The late Dominion Apiarist, Mr. E. W. L. Shaden, who recently met his death by drowning, in a bulletin published recently, says that, as the winters are more consistent in Canada, if these points are observed, bees winter better in this country than in England or in the Southern States. When cold weather sets in the bees gather in a cluster, from which warmth emanates to all. Colonies that are not strong in the fall should be put together so that each hive contains enough bees to crowd over at least eight combs of Langstroth size before the weather is cold enough for clustering closely.

## Seed Cleaning

Importance. In view of the decreasing prices of farm products generally, it is of increasing importance to the grower that his farm returns be maintained by increased yields per acre.

The value per bushel may decrease, but if more bushels are grown to the acre, the total returns from the crop do not decrease in the same proportion, and this points to the necessity, during a period of deflation of prices, of paying particular attention to the quality of the seed sown. In spite of the fact that the use of better seed in increasing yields per acre is self-evident, for a large proportion of the acreage sown to grain crops in the province, seed cleaned with the hand fanning mill only is used. This is largely due to the fact that seed cleaned with suitable seed cleaning machinery is not easily available, and the fact that heretofore commercial quantities of registered seed have not been produced in the province.

Two Circumstances. First—Assistance is given by the Ontario Department of Agriculture toward the establishment of seed cleaning centres. This assistance takes the form of loans to co-operative associations which undertake to install and operate suitable seed cleaning machinery and if necessary market the cleaned seed.

To any co-operative association or co-operative company the Government loans up to fifty per cent. of the value of the property upon which the loan is based, but no loan to any one association to exceed \$3,000. The loan is without interest for two years and at six per cent. thereafter. It is repayable one-half in five years, and one-half in a further period of five years with the privilege of repaying at any time. This loan is also available toward the establishment of potato grading and marketing associations.

Second—Some fifty or more agricultural societies in the province are, for the first time this year, holding a combined Field Crop and Threshed Grain Competition. In each of these competitions, fifteen contestants are growing a total of 75 acres of grain crops, and all competitors with but one kind of grain of Registered Seed. Fifty societies with 75 acres each, total 3,750 acres for the province. If the yields from this acreage pass the field and bin inspection for Registered Seed, there will be available for the first time, Registered Seed in commercial quantities.

But—it is important that this Registered Seed should be properly cleaned before sale; only large pure seed, as well as pure seed, should be included in registered stock. The hand fanning mill is not suitable for the purpose. The agricultural societies conducting these competitions should, therefore, inquire as to the necessary steps to be taken to pro-

perly care for and market the seed produced in these competitions, so that the benefits of such competitions be not curtailed.

Organization. The agricultural society, instead of handling the proposition itself, might properly encourage the competitors to organize an association of their own for cleaning and marketing their Registered Seed. Where the local elevator is owned by a farmers' co-operative association, or where there is a co-operative association in existence, the seed cleaning and marketing might advantageously be added to such business. The Department will assist in forming such organizations.

Costs. If seed cleaning machinery only is needed the cost is nominal. A power cleaner can be purchased for about \$500 and upwards. A small gasoline engine will run the machine. Added to this is the cost of purchasing or renting a small building, and, of course, engaging a competent operator. If a more ambitious plan is decided upon by the Department is prepared to furnish outlines of plans of building suitable for elevating and binning, and for cleaning and handling grain and grass seeds. The costs of such plants, of course, vary with the size of the plant and the local conditions.

Demonstrated. The beneficial results from the installation of a power cleaner have already been demonstrated. At Cottam, in Essex County, such a plant is in operation in connection with a farmer-owned elevator, and the members state that the purchase of the cleaning machine has proven to be the best and wisest act in connection with their business. At Lynden, a private individual purchased a cleaner, and this spring cleaned the grain for seeding 75 farms in the district. At other points in the province power cleaners have been installed or are being installed and in all instances the increased yield per acre alone, from the use of better seed, has justified the small expenditure of money.

Need. Five and a quarter million acres in Ontario are sown to grain every year. Registered Seed on these five and a quarter-million acres would materially increase the wealth of the individual farmers and of the province. The opportunity afforded to the agricultural societies and to seed producing districts should not be neglected until the seed is ready to harvest, but preparations should be made now to handle and market to the best advantage.

The Co-operation and Markets Branch of the Department of Agriculture, Parliament Buildings, Toronto, will be glad to give assistance to any society or district in establishing seed cleaning plants.

FIND OUT ABOUT THIS. IT IS IMPORTANT.

## The Kind of Farmer Who is Always Successful

BY L. E. COLLINS

Within the past year we have heard many times this statement: "Marketing, and not production, is the big knot to untie in the agricultural puzzle today." I do not underestimate the importance of marketing, but I am firmly convinced that as much study should be given to the matter of economical production during this period of readjustment as to better systems of marketing.

Certainly, marketing systems can be improved, and much can be done in this country to provide better markets for many products.

The individual farmer's greatest opportunity, however, lies in more efficient production on his own farm. Farming, like every other business, is competitive. The price obtained for farm products in the long run is determined by the average cost of producing them. If you produce your crops at less cost than the average, you make money, while those that produce at greater expense than the average lose money. When margins of profit are small, it requires hard work and intelligent direction on your part to keep the balance of the right side of the ledger. It is then that efficient production counts; that any unnecessary work that increases expenses without increasing production must be eliminated; it is then that you need to study production methods you never studied before.

## Crop Production Costs

Within the last five years some very careful studies have been made of the production costs on the farms of this country. These studies have shown two things:

First, that efficient production is usually associated with high yields, and,

Second, that efficient production is associated with diversity of farm business.

We have heard so much of late to the effect that big crops produce low prices, that many of us have lost sight of the fact that profitable crops are very seldom produced with low acre yields.

The most successful farmers that I know are men who produce large acre yields of crops on their farms. They always have a little better crop than the average for their communities. This is not because they use expensive tools in handling their crops, or buy the latest make of implement that is on the market, or necessarily do more work upon their land than the "other fellow," but it is because they have good land. They have long ago learned that it pays to keep soil in a high state of fertility, and it is that way because they do the right job on the farm at the right time.

Fortunately, many of the things most worth while in the production of good crops do not come at great expense. They are the result of care and intelligent direction in farming. Good seed, carefully planned rotations, and timely work are three of the most important factors necessary for high acre crop yields, and none of them is very expensive from the standpoint of money invested. This is a good time to remember these facts.

It is not necessary that a man be a jack of all trades to be a diversified farmer. It is advisable for most everybody to have some specialty on the farm to which to devote the major portion of his attention. It may be the production of alfalfa or corn or wheat. It may be the growing of cattle, hogs, sheep, or chickens. Whatever it be, it is a good policy to have some line of business for a specialty that can be studied, and in which line one can become an efficient producer. If it is cattle, stick to them; if hogs,

stick to them; or if chickens, keep in the name.

## Stick to Your Special Line

Very few farmers have ever been successful who changed their specialty with each change of the wind. Take up a line and stick. Stay with it through the ups and downs. If you don't, you will usually go in on the ups and out on the downs. Changing frequently from one type of farming to another has prevented many a man from making a success of his business. If you are in dairying, sheep-raising, poultry-growing, or what not, stay with it. Study the business. Try to become the most efficient producer in your line. If conditions are bad, remember that there will be better days ahead.

When you take up a specialty, don't forget that safe farming comes in having your eggs in more than one basket. If you are a dairyman, don't forget that a few pigs can often be used to advantage, and that a few chickens help to buy the groceries and provide food for the table, and that a good garden not only furnishes the cheapest kind of food, but that green vegetables are needed by your family, especially if you have growing children, to supply the proper nourishment to keep them strong and healthy.

A few hogs and a flock of chickens can be grown on your farms without much expense; there is always waste food from the table that hogs will consume, pasture can be provided at little cost during a large portion of the year, and poultry, if kept in not too large numbers, will pick up a large share of their living from insects and waste grain on the farm. The crops will be better because of the poultry.

Many a wheat grower in the Wheat Belt has found a flock of turkeys the best type of grasshopper exterminator. They more than paid their way as destroyers of insects, besides providing a neat little sum at Thanksgiving time with which to pay the fall taxes. There are many crops that have been called mortgage lifters, but I doubt if there are any surer taxpayers on the farm than the flocks of chickens and turkeys.

Safe Type of Farmer

This is the proper type of diversified farming, and it is during times of adversity like the present that safe systems of farming such as this show up to advantage. It is types of farming of this kind that we should all follow, because they are the types of farming that eventually win.

There is no family on earth so independent and so nearly self-supporting as the family on a diversified farm, provided they take advantage of their opportunity to live off their own products. A much larger share of the living can easily be secured from such farms than is now generally done. The automobile, which furnishes quick transportation to town, and the parcel posts, which delivers packages to our doors, have made it easy to depend upon the other fellow for many things that we could well prepare at home.

Now is a good time to revive some of the good old customs on the farm. We have been becoming too dependent for our living on the other fellow. The art of curing meat and canning on the farm should come back. The pressure cooker and the girls' and boys' canning clubs are helping with this problem, but not enough has yet been done. We should not be satisfied until the back yard of every farm home is cleared of tin cans, and until every farm family has its own supply of canned or cured meat for both winter and summer use. It is practices of this kind, when adopted by all families, that will do the most to pull us safely through this readjustment period.

The most satisfactory, seems to be the type constructed of some class of masonry, either stone, concrete, or tile, or combinations of these materials. The structure is then banked up on the ends and sides, or even built up with earth, since a layer of earth is a cheap means of maintaining an even temperature.

The essentials of a good storage cellar are drainage, ventilation, insulation, and a proper amount of moisture. A cellar I saw the other day is constructed of native field stone built up in arch form and covered with earth. The entrance doorway is toward the north, and forms a vestibule or air lock. Ventilating flues are carried down a few steps below the surrounding grade, a drain is provided to carry off seepage water that might find its way in during wet seasons. The earth floor holds moisture, and insures the vegetables against shriveling.

The bin floors are raised a few inches off the dirt floor, and the bin walls are also independent of the side walls. This secures better ventilation for the stored products, and is an additional precaution against frost.

Hollow tile and concrete storage cellars have been built with success. These materials may be handled easier than stone, and may be used in a greater variety of construction work than stone, owing to their adaptability of steel reinforcement.

The Essential Halves of the Livestock Industry: 1.—Production and marketing of farm animals. 2.—Manufacture and marketing of meat.

## Three Points to Remember When You Advertise

1. Be thorough. If you are going to advertise at all, do it thoroughly. A farm can never get too much desirable publicity. First, make your farm and farm instruments look clean. One can't advertise cattle for sale, and when buyers come show the cattle standing in a dirty barn with filth up to their knees, and expect to sell them. Have your place kept up well, and choose a nice name for it. Paint this name and what it stands for on your farm wagons. At the entrance to your farm, or along the high road, set up a good-looking sign advertising your farm and telling what you have to sell. These things can be done in spare moments. Then get a neat-looking letterhead and a type-writer. These will mean an expense, but they are worth while.

2. Expand methodically. Having gone thus far, a firm foundation is laid for building up sales. When you have something to dispose of, calculate what the sale should amount to, and spend three cents for every dollar of it in advertising. In your advertisements emphasize the selling points and get the right appeal. Place your ads correctly. For instance, if you have cattle to sell, place your ad in your breed paper or in a farm paper having a large circulation among cattle breeders. If you wish to sell apples, put your ad in the paper that reaches the nearest consumers. Keep records of results so that you can concentrate on the product that sells easiest and most profitably.

3. Grasp Opportunities. If anything of news interest happens on your farm, send it to your local paper. Pictures are great interest getters. Exhibition of products at fairs is a fine advertisement. Neat containers for butter, eggs, apples, etc., mean a great deal in building up goodwill. An energetic interest in agricultural activities marks you as a man worth listening to while you advertise your farm and your products. Don't wait for buyers to come. Go and get them before the other fellow does.

## Poultry Record of Performance

The third series of egg laying contests conducted by the Central Experimental Farm, Ottawa, and carried on at the Dominion Experimental farms and stations at Charlottetown, P.E.I., Nappan, N.S., Fredericton, N.B., Cap Rouge, Que., Ottawa, Ont., Brandon, Man., Innes Head, Sask., Lethbridge, Alta., and Agassiz, B.C., that is, one point in each province, will commence on November 1 and continue for 52 weeks, or until October 31, 1922. A Canadian contest open to every poultry breeder in the country is conducted at the Central Experimental Farm, but the provincial competitions are open only to entries from breeders within the province in which the contest is held. There are two classes for which certificates embodying the records of the birds are given. One, known as Class A, is confined to birds that lay 150 eggs averaging 24 ounces to the dozen, within the year, and the other, styled Class AA, to the birds that lay 225 eggs in the 52 weeks and comply with the same conditions. For the latter an advanced record of performance certificate is given. During the contest the birds will be under the close supervision of officers at the different farms and stations.

## How I Save My New Trees.

Some of us farmers are apt to blame the nurseryman if we set out an apple tree and it dies. Sometimes it is the fault of the nursery, but usually the trouble lies with the man who handles the tree.

One of the best plans to prevent tree loss is pulling the roots in a clay mud. I have used this frequently, and it often makes a tree live which otherwise would die.

Some years ago I took the contract of supplying 50 evergreen trees for a local park. This park was located on a very stony sand ridge. It was a job to get any trees to live. But by making a clay mud, and sticking the roots of the evergreens in it before planting, I was able to get almost every tree to grow.

I can't explain just why this method proves effective in so many cases, but the fact remains that it does. If gives protection to the roots, which seems to give them more time to adapt themselves to the new soil. Dip the whole root system in the clay mud, and also the trunk a little past where the tree set in the nursery. It is wise to prune the roots off as wanted, before dipping.

A bee can carry three times its own weight of honey when flying.

Have the furrows open and the drains in working order in the fall wheat field.

Shoes and clothes have been put in order, but are the children themselves ready for school days again? Are their teeth in good shape? Are their eyes ready for the strain? Has a good physician examined their throats, lungs and hearts? A minimum of correction now may save a real breakdown later.

## BELGIUM BUILDS A STRANGE RAILWAY

FOR RIVER BOAT PORTAGE IN THE CONGO.

Main Feature of the Scheme is a Vessel That Will Travel by Either Water or Land.

The most inaccessible of the earth's wildernesses are easily accessible as far as their rivers are navigable. If the rivers were continuously navigable, the remotest depths of these wildernesses would be readily reached. But in all such territories the rivers are of a very unaccommodating nature, being interrupted at intervals by waterfalls, rapids, shallows, and other obstacles that make continuous navigation impossible.

It is obvious, therefore, that any means of making the journey along such rivers uninterrupted in the same vessel would make transportation very much more rapid and economical. Such a means has been developed experimentally in Belgium for use in the Belgian Congo, that African colony that is 83 times the size of Belgium itself. The products of this vast undeveloped territory all have to be transported from the interior to the coast for export, and it is now proposed to adopt methods on the great river Congo that will make possible uninterrupted transportation. The work has been done under the direction of the Belgian government, and several schemes were tried out on the canal near Antwerp. The main feature of the favored scheme is a vessel that will travel by either water or land. Thus, where the river is easily navigable it runs along, propelled like any other ordinary steamboat, and when it reaches any such obstacle to navigation as a waterfall, a rapid, or a shallow, it leaves the water and traverses the obstacle on a permanent single-track railroad.

### Dual Purpose Boat.

The vessel is composed of twin hulls, connected with overhead plate-irder brackets that retain the hulls rigidly and permanently parallel to each other, with a space between them of about half the width of each hull. When afloat, each hull is propelled by its own power plant, each having a propeller and a rudder. In the space between the hulls, and supported by the plate-irder brackets that connect them, are toothed wheels that, by means of a train of gears, can be switched into driving connection with the power plants, which are thrown out of connection with the propellers. These toothed wheels are for running on a rail in the form of a rack, the teeth of which fit those of the wheel. This rail is the means of converting the twin boat into what might be called a twin coach balanced on either side of a monorail so as to make it somewhat like the coach of a monorail road, of which many are in use in various places. In the same manner this monorail road is in the form of a trestle, suitably spaced and constructed to support the rail at a grade and in a direction that enables the boat to leave the water at the beginning of any obstacle, and enter it again at the end of it. These tracks will be permanently installed at every obstacle to navigation, and thus the river Congo will be as easily traversed as if it were one of Belgium's many home canals.

### Lifted Up.

A little child in tears comes by: You lift her chin and look into her eye. And speak soft words of comfort and of cheer, Until she smiles—and you have come so near.

The lifting up and bringing to the sun The pitiful heartache of a little one!

When I go up to meet the judgment word I hope that I'll be able to reply To every question that mine ears have heard "I lifted up some heart that life made cry!"

For I would rather have done that in life Than won the glorious triumphs of the strife.

The sad are many and the gay are few, And there is little ease that we can do That counts so much as lifting, day by day, The hearts that wander in the shadows gray.

Keeping clean service in our lives the goal Of every manly, forthright, stalwart soul.

### Airplane Used to Combat Insect Pests.

Another experiment in the adaptation of the airplane to peace-time activities was recently made near Dayton, Ohio. A six-acre grove of young catalpa trees had been attacked by insects and was in danger of being destroyed. An airplane soared directly over the grove and sifted powdered arsenate of lead onto the trees. Only a few minutes were required to accomplish this work, which would otherwise have demanded the services of a large number of men and sprays for several days, and, moreover, it was done more effectively by the plane.

A handful of hay put into a pailful of water will obviate the smell of paint in a room.

## WELL SATISFIED WITH BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. Experience teaches her that the Tablets are the very best medicine she can give her baby. They are a gentle laxative; mild but thorough in action and never fail to banish constipation, colic, eczema or any other of the many minor ailments of childhood. Concerning them Mrs. J. H. Charest, St. Leon, Que., writes:—"My baby cried continually and nothing seemed to help her till I began using Baby's Own Tablets. These Tablets soon set her right and now I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Bible City Found.

What is regarded by many scholars as the most valuable discovery which has yet been made by the archaeologist in Palestine is the location of the site of the city of Capernaum. Among its ruins have been found the remains of a synagogue believed to be the very one wherein our Saviour preached. For over nineteen hundred years the very site of such an important Bible city as Capernaum has been in dispute. It was thought that it stood at the northern end of the Sea of Galilee at a place called Tell Hum, where there are extensive ruins.

A systematic examination of these, and the discovery of ancient documents, now make it clear that this, indeed, was ancient Capernaum. The ruins of a Jewish synagogue have been brought to light. Explorers say this temple stood there in the days of Christ, and is the very building referred to in the Gospels. The position of the stones would indicate that it was destroyed by an earthquake. It is the belief of the excavators that the whole edifice can be reconstructed.

Ask for Minard's and take no other.

## Surnames and Their Origin

**LESTER**  
Variations—Leicester.  
Racial Origin—English.  
Source—A locality.

In virtually every country, with the exception of Ireland, a very large proportion of the family names have been developed from the names of places. Sometimes these were the names of the places over which the family ruled, but more often, for the bulk of the population naturally fell within the classification of the ruled rather than the rulers, the names were first used merely to indicate the locality from which the persons bearing them had come.

Such names, too, it should be noted, were used only when the persons bearing them actually had left the localities and had settled or were traveling in other parts. It would constitute no differentiation to give a man the name of a place in which he was still living, together with hundreds, or probably thousands, of others. The form Leicester gives a better idea of the source of this family name than Lester, though the latter is by far the more common name. The place, however, is still known as Leicester. It is a borough in England. The Anglo-Saxons, upon their invasion and settlement of England, found the place known simply as "Castrum," a Roman camp. To distinguish it from other places of similar name, they called it "Leageceaster," or "meadowcamp." In the early use as a family name the custom was to pre-

## To Cure Blindness by Engrafting Dogs' Eyes

Dr. Koppanyi, of Vienna, who has successfully cured blindness in animals by transplanting eyes, believes that it is possible to restore human sight in the same manner.

He believes that by engrafting the eye of an animal, preferably a dog, sight may be restored to blinded humans. He declares that the transplanted eye will rapidly take on the appearance of a human eye and will function normally in all respects. He is asking for volunteers.

### A Quick Turf.

A new method of making turf for golf courses with almost miraculous quickness consists in stripping off good sod to a depth of an inch and a half and running it through a feeder, so arranged as to slit the sod into ribbons. The latter are then shredded by hand, leaving a mass of grass roots, which are sown broadcast over ground previously prepared by plowing and harrowing. This accomplished, the ground is rolled, and within three or four weeks the golf course is covered with a fine, thick carpet of grass, without waiting for seed to grow.

### Qualified.

Oswald—"My love for you is like the deep, blue sea."  
Clarissa (for such was her name)—"And I take it with the corresponding amount of salt."

In some French rural districts eighty per cent. of the inhabitants own their own houses.

Americans own about one-half of all the diamonds in the world.

## GOOD HEALTH AND GOOD SPIRITS

Depend Upon the Condition of the Blood—Keep it Rich, Red and Pure.

When a doctor tells you that you are anemic, he simply means, in plain English, that your blood is weak and watery. But this condition is one that may easily pass into a hopeless decline if prompt steps are not taken to enrich the blood. Poor blood, weak, watery blood is the cause of headaches and backaches, loss of appetite, poor digestion, rheumatism, neuralgia, nervous irritability and many other troubles. To poor blood is due the pimples and blotches, the muddy complexion that disfigures so many faces. To have good health, a good complexion and a cheerful manner, the blood must be kept rich, red and pure. This is easily done through the use of a blood enriching tonic like Dr. Williams' Pink Pills. The whole mission of this medicine is to help enrich the blood, which reaches every nerve and every organ in the body, bringing with it health, strength and new activity. That is why people who occasionally use Dr. Williams' Pink Pills always feel bright, active and strong.

Mrs. E. E. Cook, Sillace, Ont., gives strong testimony to the value of Dr. Williams' Pink Pills when the blood is in an anemic condition. She says: "I have been a sufferer for some years from a run down condition of the system. I suffered from pains in the back, twitching of the nerves and muscles, my appetite was poor, I had indigestion and would get drowsy after eating. My hands and feet were almost always cold, and though I was constantly doctoring, the medicine I took did not help me. I had practically given up hope of good health, until a friend from Hamilton came to visit me, and urged me to try Dr. Williams' Pink Pills. It took some persuasion, but finally I consented to try them. I have reason to be grateful that I did, for after using seven boxes I felt like a new person. I have gained in weight, have a better color and my work is now a pleasure. For this condition my thanks are due to Dr. Williams' Pink Pills, and I cannot praise them too highly."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

### A Combing Mill Needed.

The woolen industry of Canada is a basic industry and should be a dominant factor in the production of wealth for our Canadian people. Sheep raising, when properly encouraged, will be one of the most profitable departments of our agricultural life. The bulk of wool produced in Canada during the past year, through lack of a combing mill, been exported to foreign countries where, after being combed, it has been shipped back to our worsted mills at a greatly increased value. Something like twenty-four million (24,000,000) pounds of wool was grown in Canada last year. This quantity is sufficient to provide for something like eight million (8,000,000) suits of clothes, which would sell for in the neighborhood of Four hundred Million Dollars (\$400,000,000). If the various processes of manufacture were completed in Canada this large sum would be set circulating in Canada through thousands of people employed in the combing and spinning of the wool, the weaving of the cloth and the tailoring and selling of the finished product.

The establishment in Canada of a whole combing mill would prove a tremendous benefit to the country as a whole and would undoubtedly receive the whole-hearted support of the Dominion and Provincial governments, textile manufacturers and breeders of sheep.

### The Proper Course.

Mrs. McIntyre was calling upon Mrs. Cassidy, whose husband was in afflictive circumstances and whose daughter had, therefore, been sent away to college.

"By the way," said Mrs. McIntyre, when the two had been gossiping for a while, "where is Clara? I haven't seen her for an age."

"Clara is a college," proudly responded the fond mother, and then added: "And I am so worried about her. I haven't had a letter from her for nearly two weeks."

"There is where you made a mistake," was the prompt rejoinder of Mrs. McIntyre. "Instead of letting her go to college, why didn't you send her to one of those correspondence schools?"

### Pertinent Inquiry.

The newest member of Miss Jones' Sunday-school class was a lad whose frankness was equal to his curiosity in many matters.

On one occasion Miss Jones made a few remarks touching untruthfulness and earnestly endeavored to impress her charges with the necessity of being truthful at all times and under all circumstances.

Now the new pupil appeared to be intensely interested in Miss Jones' remarks, and, after due reflection, put this query to her:

"What I'd like to know, ma'am," he said, "is it a lie nobody ever knows?"

Scotland's population is now 4,822,157.

Men with grey or blue eyes make the best marksmen.

## GOOD HEALTH AND GOOD SPIRITS

Depend Upon the Condition of the Blood—Keep it Rich, Red and Pure.

When a doctor tells you that you are anemic, he simply means, in plain English, that your blood is weak and watery. But this condition is one that may easily pass into a hopeless decline if prompt steps are not taken to enrich the blood. Poor blood, weak, watery blood is the cause of headaches and backaches, loss of appetite, poor digestion, rheumatism, neuralgia, nervous irritability and many other troubles. To poor blood is due the pimples and blotches, the muddy complexion that disfigures so many faces. To have good health, a good complexion and a cheerful manner, the blood must be kept rich, red and pure. This is easily done through the use of a blood enriching tonic like Dr. Williams' Pink Pills. The whole mission of this medicine is to help enrich the blood, which reaches every nerve and every organ in the body, bringing with it health, strength and new activity. That is why people who occasionally use Dr. Williams' Pink Pills always feel bright, active and strong.

Mrs. E. E. Cook, Sillace, Ont., gives strong testimony to the value of Dr. Williams' Pink Pills when the blood is in an anemic condition. ### The Proper Course.

Mrs. McIntyre was calling upon Mrs. Cassidy, whose husband was in afflictive circumstances and whose daughter had, therefore, been sent away to college.

"By the way," said Mrs. McIntyre, when the two had been gossiping for a while, "where is Clara? I haven't seen her for an age."

"Clara is a college," proudly responded the fond mother, and then added: "And I am so worried about her. I haven't had a letter from her for nearly two weeks."

"There is where you made a mistake," was the prompt rejoinder of Mrs. McIntyre. "Instead of letting her go to college, why didn't you send her to one of those correspondence schools?"

### Pertinent Inquiry.

The newest member of Miss Jones' Sunday-school class was a lad whose frankness was equal to his curiosity in many matters.

On one occasion Miss Jones made a few remarks touching untruthfulness and earnestly endeavored to impress her charges with the necessity of being truthful at all times and under all circumstances.

Now the new pupil appeared to be intensely interested in Miss Jones' remarks, and, after due reflection, put this query to her:

"What I'd like to know, ma'am," he said, "is it a lie nobody ever knows?"

Scotland's population is now 4,822,157.

Men with grey or blue eyes make the best marksmen.

## BITS OF HUMOR FROM HERE & THERE

War Talk.

"Shall I go over the top?" asked the talkative barber, posing his scissors.

"Yes, as soon as your gas attack is over," answered the weary customer.

### Wisdom Defined.

Teacher—"Now, Edgar, can you tell me what wisdom is?"

Small Edgar—"Yes, ma'am. It's information on the brain."

### Our Wise Tot.

Navel and yet very reasonable was Marjory's excuse for her baby sister who had pulled some books off the table. "She's so little," said Marjory, "her know-better hasn't grown yet."

### Tight Money.

Neighbor—"Got much money in your bank, Tommy?"

Tommy—"Oh, no. The depositors have fallen off since sister got engaged."

### An Obstinate Child.

There was a dear little baby on the train, and an elderly man stopped to peep at it.

"A fine youngster," he said to its demure mother. "I hope you will bring him up to be an upright, conscientious man."

"Yes," smiled the young mother, "but I'm afraid it will be a bit difficult."

"Pshaw!" said he. "As the twig is bent so is the tree inclined."

"I know it," agreed the mother, "but the trouble is, this twig is bent on being a girl."

### The Reason Why.

Charlie—"But I asked you, dearest, to keep our engagement a secret for the present."

Claire—"I couldn't help it. That hateful Ella Sharpe said the reason I wasn't married was because no fool had proposed to me, so I told her you had."

### Father Knew Better.

"Well, dad, here we are," said the young man who had persuaded his father to attend a boxing match "till warrant you'll get more excitement for your \$2 than you ever got in your life before."

"Huh! I doubt that," grunted the old man. "Two tollars was all I paid for my marriage license."

### His Hearing Restored.

The invisible ear drum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York City. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated, or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth Avenue, New York City, will be given a prompt reply.

### That Man Is Happy—

Who values honor and a good name above riches.

Who can enjoy the landscape without owning the land.

Who can face poverty and misfortune with cheerfulness and courage.

Who has a hearty appreciation of the beautiful in human life as well as in nature.

Who has a contented mind liberally stored with the knowledge that makes life interesting.

Who has a harmonious happy home.

Who has learned how to neutralize fear thoughts and worry thoughts by their antidotes.

### Abbreviated Verse.

A woman of 12 st. 5 cts.  
Wears dear little bells on her flops;  
Most sweet is the sound as she waltzes around;  
But what must it be when she booz!

Of Algeria's 7,500,000 acres of forests 1,112,000 are covered with cork trees.

## ASPIRIN

Only "Bayer" is Genuine

Warning! Take no chances with substitutes for genuine "Bayer" Tablets of Aspirin. Unless you see the name "Bayer" on package or on tablets you are not getting Aspirin at all. In every Bayer package are directions for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Made in Canada. Aspirin is the trade mark, (registered in Canada), of Bayer Manufacturing of Monocetateester of Salicylic acid.

## SAYS HER RECOVERY IS ALMOST LIKE A MIRACLE

From Helpless Invalid to Complete Restoration of Health, Strength and Happiness Is Wonderful Change Mrs. Root Experienced in Three Weeks—Statement One of Most Remarkable On Record.

"Just a week before I started taking Tanlac I was down in bed so crippled up with rheumatism I could not move without pain. My son had taken Tanlac, and it had done him a world of good, so one day he brought home a bottle and said, 'Mother, I want you to take this.' When I had finished that bottle, I felt like a different woman, and by the time I had finished my second bottle, I was out in the garden hoeing.

"Tanlac has simply done wonders for me; it almost seems like a miracle." This is the remarkable statement made recently by Mrs. Jennie Root, residing at 1409 Powers St., Portland, Oregon, and is only one of tens of thousands from well-known men and women who are daily testifying to the powers of Tanlac.

Continuing her wonderful statement, Mrs. Root said, "For years I suffered terribly with rheumatism, and would often be down in bed for days at a time. In the last five years there was not a time that I didn't feel those rheumatic pains all through my body. About two months ago I got very much worse and my arms and legs were so bad I was almost helpless and couldn't even hold a pen to sign my name. I was so weak I could not do any housework. I couldn't even sleep, and had no rest day or night. Even to walk a few steps would tire me out completely. When I tried to walk a little way and sat down I could not get up without some one helping me. I had no appetite and hardly ate enough to keep me alive. I could not stoop over far enough to get my shoes on.

"I never knew what a night's sleep was, and would lie awake for hours. At times it would get very cold and would have to get up and sit by the fire all huddled up, and my daughters would put hot water bottles all around me. I was treated by four doctors,

and took all kinds of medicine. Nothing ever did me any good. I am just like a different person now. All those terrible aches and pains have left me, and only the other day I was able to walk up four flights of stairs in an office building when the elevator was out of order.

"My appetite is just splendid now, and just today for the first time in years, I felt so hungry that I had to eat a piece of pie between meals. In fact, I can't remember the time that I have felt as well as I do now. I have not only regained my health and strength, but I have gained fourteen pounds in weight. To tell you the truth, I wouldn't exchange the benefit I have received from Tanlac for the best ranch in Oregon, and I will praise it as long as I live."

Tanlac is sold by leading druggists everywhere.

### Little Niles.

Teacher (to class)—"Which is the largest river in Africa?"

Small Boy—"The Nile, sir."

Teacher—"And what are its tributaries called?"

Boy—"Juvencils, sir."

### Minard's Liniment—Lumberman's Friend

The apple yield of the Arrowsp Valley this year is estimated at 2,000,000 barrels, or the largest in the history of that famous section.

## BABY COVERED WITH ECZEMA

When 4 Days Old, Cross and Cried. Cuticura Heals.

"My baby brother had eczema which began when he was about four days old. It came in little pimples and then a rash, and he was covered with it. He was so cross that he could not sleep, and he cried."

"This lasted about two months before we used Cuticura. It helped him, so we bought more, and he was all healed after we had used two cakes of Soap and two boxes of Ointment." (Signed) Miles Almada Williams, Youngs Cove, N. E., May 22, 1916.

Use Cuticura Soap, Ointment and Talcum for all toilet purposes.

Soap 25c, Ointment 35c and 50c. Sold throughout the Dominion. Canadian Depot: Crossin, Limited, St. Paul, Minn., U.S.A.

Use Cuticura Soap shaved without soap.

### Municipal Politics.

The Strathroy Age sketches the following picture of a session of the Strathroy Town Council: "Black storm clouds gathered and threatened to break during the lengthy discussion; sharp and caustic remarks flew across the table from one to another, but the mayor, after being repeatedly requested and urged to say he would sign the checks due the commission, finally brought about a calm by signifying his intention to do so. Quite a number of interested spectators were present, the majority of them departing after the board had settled down again to solid, sober business."

The Strathroy people who attended that session probably knew in advance that there was going to be some excitement. They suspected some of the members would have something pointed to say, and so they went. Very good, but once the excitement was over and the council settled down to transaction of business, the crowd signified their interest in municipal affairs by departing.

It was not interest that brought them to the council meeting—it was curiosity and the love of novel entertainment.

Strathroy is not alone in this respect—not for one minute. Any municipality in the country can furnish a parallel case.

Let some spectacular issue be brought to the front—let it be made more or less certain that brick-heaving is going to be indulged in, and the ratepayers become interested in municipal politics.

But let the council settle down to an intelligent discussion of civic business concerning matters where the good money of the ratepayers is at stake, where the fixing of their streets, the management of their debentures and sinking funds is considered—at once there is a gradual but increasing shuffling of feet, and the procession starts for the nearest and most convenient exit.

The following day, if there is any mention on the street of what took place at council, the emphasis is placed on the excitement of the

personalities that took place. There is no mention at all of honest work of some committee, composed of faithful aldermen or councillors who seek, week in and week out, to do the best possible thing for the ratepayers.

The situation is not new, but it is none the less regrettable. A healthy, sustained interest in municipal politics is as scarce as it is desirable.—London Advertiser.

### INSPECTOR NEGLIGENT, TOO?

(Woodstock Sentinel-Review)  
Inspector Dunlop would make a clean sweep of almost everybody connected with London jail, as a result of the investigation of the escape of the Murrells. He recommends that the sheriff be retired, that the deputy-sheriff be reprimanded, that the resignation of the governor be accepted, and that there be a complete reorganization of the staff of turnkeys and watchmen.

### Funeral of the Late Mrs. Gould

The funeral of the late Mrs. John Gould took place from the family residence, Longwoods Road, Mossa, on Monday, Oct. 11, at Oakland cemetery, and was very largely attended. Rev. D. G. Paton, B.A., pastor of Glencoe Presbyterian church, conducted the funeral service, assisted by Rev. George Weir of Ridgeway, a former pastor. Pallbearers were George Webster, George Weekes, Charles Ferris, Edward Currie, Isaac Watterworth and Charles Cameron. During the service a solo, "Beautiful Land," was rendered by Savil Simpson. There were many beautiful floral offerings, including:—"Gates Ajar," from brothers and sisters; wreaths from Farmers' Club, Glencoe; Farmers' Club, No. 1, No. 3 Sunday School; nurses of Victoria Hospital; and a number of sprays from nieces and aunts. Among those present were friends from Komoka, Mount Brydges, Alvinston, London, Windsor, Blenheim, Essex and Chicago. The late Mrs. Gould leaves her husband, one son and four daughters, all at home. She also leaves three brothers and four sisters, as follows:—Alex. Stewart, La. Flat, Sask.; Angus Stewart, Minneapolis; Duncan Stewart, Glencoe; Mrs. Newby, Chicago; Mrs. Schmidt, Chicago; Mrs. Isaac Simpson, Elfrid, and Mrs. Robert Dobson, Crinan.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

John Wanamaker, the well-known merchant, was interviewed in New York newspapers on Wednesday last and he expressed his opinion that good business was in hand for those who were willing to go after it. Among other things, he said: "We are not cutting down our advertising—we are going to enlarge it."

Honesty is a prevailing virtue among most Chinese. Some of them in their native towns and cities leave their places of business unguarded while they go off for half an hour or more. Should customers arrive in the meantime they find the prices of goods plainly marked, select what they wish and leave the money for them.

### SELLING FARM PRODUCE

Standardization Is Necessary for the Best Results.

Graded Fruits or Vegetables Attract White Mixed Grades—The Satisfied Consumer Will Come Again—Quality Counts.

(Contributed by Ontario Department of Agriculture, Toronto.)

Will the consumer pay for quality? Yes, and liberally if he understands what standardization means. Criticism is frequently directed at the farmer producer for the lack of attention given to grading and packing of the product of his farm. Fruits in different stages of ripeness, different sizes, shapes and colors are frequently seen in the same package. Chickens of various breeds, sizes, types and degree of plumpness are jumbled together in the same crate and form a marked contrast when placed beside a crate containing birds of the same sex, size, plumpness and color. To the well ordered mind uniformity always appeals, while mixtures and jumbles repel as so much junk. If a child goes into a candy store it will soon learn that mixtures are sold at a lower figure than standard confections. And so it goes through life—a mental attitude is developed by the great majority of consumers regarding the products that are not standardized as being less attractive and having a lower value. The percentage of particular consumers has increased much faster than the percentage of agricultural producers who standardize their produce. In the old days the wormy apple, the misshapen potato and the old hen may not have lost their attractiveness, but times have changed, more people have more money to spend on foods that ever before. With the increase of the family income or wealth during the past twenty years the attitude of the younger generation towards the foods that they eat has changed very considerably. If we refer to the good old days when oatmeal was the standard breakfast food and citrus fruits were only seen at Christmas time, we will realize what present day attitude toward quality in food means when compared with the past. With this advance in tastes for foods which may be largely flavor and of little value when considered from the standpoint of nourishment, the demands for foods that appeal to the eye and to the sense of taste have increased very greatly during the past few years.

### SHEPHERD

Russell Gray and Harold Dobbyn attended Bridgeton fair. Wm. Bolton and family spent Sunday in Newbury at James Whittington's.

Miss Margaret Ward of Newbury spent the week-end with Shetland friends. Miss Ila Bolton has returned home from Oakdale.

New York salesmen report largely increased sales of corn cob pipes. Somebody must have seen a movie star or a social leader smoking one on the street.

The Many-purpose Oil—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

### SHIELDS SIDING

The Widdowdale Club U.F.O. have organized their social evenings for the winter months. The first meeting, "A Night With Burns," was held on Sept. 23rd. The program, which was both interesting and educating, consisted of the following:—Life of Burns, songs and ballads, Isabella McAlpine; solo, Sarah McLachlan. The meeting was brought to a close by singing Auld Lang Syne. The next meeting, which will take the form of a debate, will be held on Oct. 21st. Those having charge of the meeting are Mrs. John Graham and A. J. Purcell.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

### Sale of Assets

Rockwood Oil and Gas Company, Limited  
TOWNSHIP OF MOSSA, COUNTY OF MIDDLESEX

Sealed Tenders will be received addressed to N. L. Martin, Liquidator, 73 King Street, West, Toronto, Ontario, marked "Tenders, in the matter of Rockwood Oil and Gas Company, Limited," up to the hour of twelve o'clock noon on Wednesday, the 19th day of October, 1921, for the purchase of the following assets of the said Company:—

Parcel No. 1. All of the Company's right, title and interest in two oil leases of 22 and 78 acres respectively, being part of Lot No. 6 of the Seventh Concession, Township of Mossa, in the County of Middlesex, upon which the Company has drilled eight oil wells.

Parcel No. 2. In seasons of food shortage mixed and lower grades of food products will usually sell and show a margin of profit, but when food products are abundant the more attractive grades sell most readily and create a want for more high-class produce, which demand frequently must be filled from the lower grade. This substitution of a low grade for a high or standard product kills the incentive to buy. Stung once, the particular purchaser consumes to wit: buying. They look, but do not buy.

Buying Best for Perishable Foods. The amount of perishable food in the fruit, vegetable and poultry product classes that is now consumed, while very large, is not as great as it would be under standardization. Experiences with mixed grades, poor quality and poor packing leave an impression on the mind of the average purchaser that will take some time to erase. When the perishable food product of Ontario is standardized and marketed in a way that will command the confidence of the consuming public an increased demand is bound to follow.

The Satisfied Consumer is an Asset. If all the food produce offered for sale could be standardized and marketed in such a way as to develop the market for future crops, much benefit would result. Satisfied consumers of this year's product will look to the same source again next year. Consumers know or should know what they want, and if given a standardized packet of food product in exchange for their money will, if aided, go on patronizing standard products. Salesmanship has been too frequently used to sell a consumer something that he did not want, material sold with the idea of getting rid of it and no thought of the future.

If the farm end of the food products industry is to develop to the fullest it merits all produce grown for sale will have to be marketed through co-operative marketing organizations. Standard, honest prepared, packed and delivered produce is the only course to pursue in developing a worthwhile market for farm produce in our Canadian cities or abroad. Any food producing community that is without a co-operative marketing organization should consider the establishment of such. These districts that have such should consider expansion by amalgamating with similar organizations. Standardized products, common honesty, any industry will make for success in producing and disposing of farm products.—L. Stevenson, Secretary, Department of Agriculture, Toronto.

As a specimen of the brick bouquet the prize goes to the following handed out by the Walkerton Herald and Times in a recent issue: "That auto load of young men and ladies which cruised up and down Durham street on Monday night belowing out 'Old Black Joe' may thank their stars that no lineal descendant of that old colored gentleman was hereabouts, or he would have heaved a whole brickyard at them for butchering a song solemnly dedicated to his ancestor. The male voices, as the late Sir James Whitney would say, sounded

like a logging chain being drawn over a hog-trough, while the female talent evaporated melody that might be mistaken for a squeaky beer sign flapping itself to death in a wind storm. Talk about the increase in crime, but if murdering a song is any offence, we know of some who should be arrested on suspicion."

Public school was closed on Thursday and Friday to allow the teachers to attend the annual meeting of the West Middlesex Teachers' Association at Stratford.

We are assured by all those who are in close touch with financial affairs that the peak of the depression is past and that better prices for farm products will soon prevail.

The Ladies' Guild of St. John's church will hold a talent tea and sale of home cooking on Saturday, Oct. 15, from 3 to 5, in the basement of the church. A cup of tea and cake served, ten cents.

Besides the two usual services next Sunday in St. John's church there will be a special children's service at 3 p.m. Children and their parents and all others welcome. Address by the rector.

The various branches of the Royal Bank have been appointed collection agents for the Bell Telephone Company. This does not interfere with present collection methods, but rather supplants the same.

A new time table came into effect on the London-Windsor division of the C. P. last week. The only change affecting Glencoe is in train No. 672, eastbound, which is now due to leave at 4.17 p.m. instead of 4.47.

Mrs. Smith, widow of the late Donald Smith of Wardsville, was taken ill with a stroke on Monday and is not expected to recover. Mrs. Smith is the oldest person residing in Wardsville, being about 90 years of age.

According to daily newspaper reports the Murrell brothers are spending the winter vacation from London jail in nightly joy riding on the sidewalks around Glencoe and taking an occasional day trip between here and Chatham on freight bumpers.

Mrs. Blackburn celebrated the 90th anniversary of her birthday on Tuesday, when members of the family and relatives from London spent a social time with her at her home. Mrs. Blackburn is enjoying the best of health. Congratulations and good wishes are extended.

A suspicious stranger, who it was thought might be one of the Murrell brothers, was arrested at Thamesville last week on information telegraphed from Glencoe. The man was stealing a ride on a C. P. R. freight train. He was held until his identity was established and then released.

A correspondent writes:—There was an error in last week's issue of the paper in connection with the school fair. The prize for the school collection of eight sewing articles was awarded to Glencoe public school. The prize should have been awarded to the pupils of S. S. No. 7, Ekfrid.

The Tilbury Times says: Large quantities of sugar beets are coming in for shipment, about 10 per cent. of which are composed of mangolds, but which are drawing the same prices as beets, owing to the fact of the company in mistake distributing a large quantity of mangold seed for sugar beet seed in the spring.

## THE HORRORS OF INDIGESTION

Relieved by "Fruit-a-lives" the Fruit Medicine

Indigestion, Weak Digestion or partial digestion of food, is one of the most serious of present-day complaints—because it is responsible for many serious troubles.

Those who suffer with Indigestion, almost invariably are troubled with Rheumatism, Palpitation of the Heart, Sleeplessness and excessive Nervousness. "Fruit-a-lives" will always relieve Indigestion because these tablets strengthen the stomach muscles, increase the flow of the digestive juices and correct constipation, which usually accompanies Indigestion.

50c a box, 6 for \$2.50, trial size 25c. At dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

Found—a purse containing small amount of money, which appears to have been dropped into a grain sack at Glencoe or Melbourne fair.—Transcript office.

Bargains in socks at Lamont's special sale. All wool English socks, 50c pair; heavy all wool farmers' socks, 50c pair; 4 pairs good medium-weight socks for \$1.

For sale—Art Garland No. 45 base-burner coal stove, also one Royal Oak heater, burns wood or coal. These stoves are good as new. No further use for them as have a furnace.—C. E. Davidson, Jeweler.

On Monday evening, the thirty-first of October, at eight o'clock sharp, the ghosts, witches and spooks are holding high carnival in the basement of the Methodist church for all who wish to have shivers up and down their spinal column. If you want to have a spooky evening come along and bring some cash.

Come to the town hall Friday evening, Oct. 14th, to see the best play of the season, "The Minister of Hardscrabble" presented by the Thamesville dramatic club under the auspices of the Ross Mission Band. Special attractions between the acts, including vocal solos and a male quartette. Admission 50 cents. Plan at Johnston's drug store.

### G. H. S. FIELD DAY

Hurrah for the G. H. S. field day! Come to the field day to be held on the fair grounds, Glencoe, Wednesday, Oct. 19, if you want to see good, clean, "peppy" sport. Come one, come all, and revive that never-to-be-forgotten school day spirit. "Ah," someone sighs. "Those were the happy days. When the pupils approach you to buy a tag, do so, and do it gladly. Don't be interested in something in a shop window you have seen hundreds of times before. Buy the tag for the G. H. S., a boost, and leave the rest to them. The G. H. S. is a school with a yell. It can make more noise any time, any place, any where."

### PRIZE LIST, GLENCOE FAIR

(Continued from last week) Lincoln Sheep In this class Angus McLean was awarded 3 firsts, 1 second and 1 third; D. A. Campbell, 3 firsts, 3 seconds and 2 thirds; Bryden Glasgow, 1 second and 2 thirds.

Shropshire Sheep Johnston Bros. were the only exhibitors in this class. They were awarded 6 firsts, 4 seconds and 3 thirds.

Oxford Down Sheep Angus McLean was the only exhibitor in this class. He was awarded 7 firsts, 4 seconds and 2 thirds, and the special for the best pen.

Chester White Hogs George Coad and sons were the only exhibitors in this class. They were awarded 3 firsts, 2 seconds and 2 thirds.

Improved Yorkshire Hogs Angus McLean made two entries in this class and was awarded first prize on each.

D. C. Graham's special for best sow, any breed, with litter of pigs by her side, was won by Henry Childs.

Poultry—Old Fowl Pair Light Brahmas—Henry Childs. Pair Dark Brahmas—Henry Childs. Pair White Wyandottes—Roy Palmer.

Pair Duck Wing Games—Wm. Gould. Pair Indian Games—Chas. Gould. Pair S.C. Rhode Island Reds—John Gould.

Pair R.C. Rhode Island Reds—John Gould. F. & J. Diamond. Pair S.C. Black Minorcas—Chas. Gould 1 and 2.

Pair Minorcas, a.o.k.—Chas. Gould. Pair Black Anconas—F. & J. Diamond, Matthew Knox.

Pair White Leghorns—Henry Childs, Matthew Knox. Pair S.C. Brown Leghorns—F. & J. Diamond, A. E. Perry.

Pair Black Orpingtons—F. & J. Diamond 1 and 2. Pair S.G. Dorkings—F. & J. Diamond. Pair Silver Spangled Hamburgs—F. & J. Diamond.

Poultry—Young Fowl Pair Light Brahmas—George Hurley 1 and 2. Pair Partridge Cochins—F. & J. Diamond 1 and 2.

Pair Barred Plymouth Rocks—Walter Hallstone 1 and 2. Pair White Wyandottes—Roy Palmer.

Pair Duck Wing Games—Wm. Gould. Pair Black Langshans—Chas. Gould 1 and 2. Pair R.C. Rhode Island Reds—John Gould, J. H. Walker.

## Children Cry for Fletcher's

# CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

## What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulence, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

### PERSONAL AND SOCIAL

Miss Howson of London is visiting in Glencoe and vicinity.

Mrs. McKinley of Wingham was the guest of her brother, Dr. McLachlan, last week.

Miss Gertrude Ebert of London spent the week-end with her aunt, Mrs. George Mills, Appin.

Mr. and Mrs. W. H. Smith of London, Mrs. Wells (nee Blanche Fleming) of Vancouver, Mrs. Badgley, daughter and grandson of Muskog, Mich., and Mrs. Vail of Rochester, N. Y., motored from London and spent a day last week at Andrew Fleming's.

### MAKING MICE WORK

Some remarkable discoveries about mice were made by Mr. David Hutton, of Dunfermline, Scotland, who died some time ago. He proved that an ordinary mouse averages a run of ten feet in a half mile a day. He had one mouse which ran the remarkable distance of eighteen miles in that time. A half-pennyworth of oatmeal was sufficient for its food for thirty-five days, during which time it ran 365 miles.

For more than a year he kept two mice constantly engaged in the making of sewing thread. The thread-mill was so constructed that the mouse was able to twist, twine, and reel from 10 to 20 threads per day. On the half-pennyworth of oatmeal, which lasted for five weeks, one of these mice made 3,350 threads, each 25 inches long. As a penny was paid to women for every hank made in the ordinary way, the mouse at that rate earned ninepence every six weeks. Allowing for board and for machinery, there was a clear yearly profit from each mouse of six shillings.

Mr. Hutton intended to apply for the loan of Dunfermline Cathedral, which was empty, where he planned to set up 10,000 mouse mills. Unfortunately, this extraordinary project was never carried out, owing to the inventor's sudden death.

### Thermostatic Metal.

A new metal that bends when it is heated has just been announced as a British invention. It is called thermostatic metal. It is prepared by permanently uniting throughout their length, strips of the two metals having widely different coefficients of expansion with heat so that under a change of temperature the combined strip bends one way or the other. The reaction is stated to be always the same, in a strip of given length and thickness, for a given temperature change and thus to provide a reliable basis for temperature indication, control or compensation in even thermostat, electric heaters, ice machines and scientific instruments of high precision.

### RECIPE FOR HOME BREW

Chase a bull frog three miles and gather up the hops. To the hops add the following: Ten gallons of bed-bug poison, one quart axle-grease, one bar homemade soap. Boil mixture for thirty-six hours, then strain through an I. W. W. sock to keep it from working, and add one grass-hopper to each pint to give it the kick.—(Author still at large.)

Old straw hats, covered with flowered chints, make novel geranium pots.

# The Woman Seller

PART I.

"Nonsense!" I said a trifle warmly. "A good salesman can sell anything." "Even Dekkar Eight's?" asked Doggett. "Don't you hate a man who chuckles when he says something he believes to be funny?" "Anything," I replied coldly. "Except, of course, Brimfield pianos. They need a hypnotist."

"Oh, is that so?" said Doggett. "Whenever Doggett corners me aboard the 527 Stamford local I know that I am in for an argument on salesmanship. He once had his picture in a magazine, looking very serious and efficient over a caption that read: He Turns Music Notes Into Bank Notes—How Edgar Doggett Sells \$500,000 Worth of Pianos a Year."

Poor Doggett has never been the same man since. He has become a fanatic; he pontificates endlessly on what he calls "the art-science of salesmanship," and I love to contradict him. Like old Dr. Johnson, I wait until he has stated his case before I make up my mind which side to take. At bottom, Doggett and I respect each other's selling ability. He has sold me a Brimfield Grand, and I have sold him a Dekkar Eight. Incidentally, if you are looking for a light-weight car that will give you 23 miles to the gallon and will stand up under any kind of punishment, the Dekkar Eight at \$2,675 is—but I digress.

We argued furiously until Doggett got off the train at Mamoroneck, where he lives, and as is usual in the case of such arguments, I remember only what I said. My logic may have made little impression on Doggett, but I succeeded in convincing myself that a good salesman can sell anything. "What are the steps in a sale?" I remember demanding. "First the good salesman sees the man on the general idea. Second, he sells him on the specific product. Third, he clinches the sale."

I forgot what Doggett said. When I reached my home in Cos Cob I recalled my wife and young son, over our evening meal, with some of the snappy things I said in the course of the argument. All my wife said was:

"Phil, dear, you look flushed and tired. You are giving too much energy to those wretched old automobiles." "But don't you think," I persisted, "that a good salesman can sell anything?" "I'm sure you can, Phil," she said. "You better go to bed early to-night."

When I woke up next morning my three feet as if I had swallowed a raspberry. Usually in the bathroom I sing "God Save the King." "Stand We Gather at the River?" I do this partly to assure myself that my selling voice is in shape for the day, and partly to signal my wife to start the coffee reboiler percolating. But I could not go further than "Stand We Gather at the River."

There I stuck. My voice sounded like a sea lion's just before they throw in the fish. In the bath I discovered that my chest was buzzing a bright straw-berry hue. I mentioned these facts to my wife over our grapefruit. They appeared to alarm her. "Phil, you go right straight back to bed," she said firmly. "Nonsense, Helen. It's only a sore throat. A few gargles and it will be all right." I objected somewhat rancorously. "I've got to go to town to-day; there's a man coming in at ten who is just trembling on the brink of a Dekkar with a custom built body. I'll push him over to-day sure."

"You'll do nothing of the kind," said my wife. "You'll go to bed!" "One reason our marriage life has been so happy is that I know when to argue with Helen and when not to. This was one of the latter times. I was secretly hoping to be sent to bed. I felt queer. There was a buzzing of bees in my head. Dr. Keck arrived presently. He has

read somewhere that a great physician is taciturn and blunt. "Tongue!" he greeted me. "I stuck it out. "Ah, ha," he said in a pleased voice. "Say ahhhh!" he said, peering into my mouth. "I tried, but the best I could do was 'Wurruggg.' "Lemmoseyourchest," he said. "I unved it. "Ah, ha," he said, "a pretty case!" "Of what?" I gasped. "Scarlet Fever," he said. "Then he turned to my wife. "Must go to contagion hospital. Minimum of three weeks. It's the law. Light case. No cause for worry. G'day."

Half an hour later, swathed in blankets like a papoose, I was being carried in an ambulance over the Ontario hills to the remote and lonely contagion hospital. They stowed me in a private cubicle, the only patient in the scarlet-fever ward for 8,149,763 Dekkar Eight's. A seven-foot partition divided me from the next cubicle. I ascertained that there were twenty-nine boards in it, counting from left to right, and twenty-nine counting from right to left. The bees in my head increased, multiplied, and swarmed. I fell asleep, and dreamed that I was selling Dekkar Eight's to the King of Siam. "Phil," said the king to me, as we sat in his luxurious private office, "you're some salesman. I take off my crown to you. Say no more. I'm 100 per cent sold. The Dekkar Eight is hereafter the official car of Siam. Wait a sec."

He picked up a gold telephone set with rubies. "Give me the royal high chancellor," he said, "and make it snappy." An instant later I heard him say: "Hello, that you Jake? This is the king. Say, Jake, I've picked the Dekkar Eight. Yes, I'll pay for 'em. Do you get that? All right, Jake. So long. He spun around in his ivory chair and faced me. "There are 8,149,763 people in Siam," he said. "I want to place an order for 8,149,763 Dekkar Eight's. When can you deliver them?" "Next week," I said promptly. "How much are they?" "Twenty-six hundred and seventy-five dollars each, f.o.b. Toronto. "O.K. I'll pay cash, of course. Gold," said the king. He picked up a diamond-studded fountain pen. "Let's see now," he said. "How much are 8,149,763 cars at \$2,675 each. Three times five are fifteen, put down your five and carry your one—"

"Here's your gargle, Mr. Winship. I heard a voice say; and I opened my eyes to find a white-capped, smiling nurse bending over me. "You're the Queen of Siam, are you?" I asked. "Not exactly," she said, with a laugh. "I've had such a vivid dream." "It's the fever," she said. "Fever patients always dream about Siam, or Yucatan, or something outlandish. I liked her voice. It was low, sweet without being sentimental, good-natured, and with a ring of capability in it. She was a plain, round-faced woman, probably five years past thirty. Somehow she had that matronly look. Had you seen her in street clothes, you would have thought her the sort of woman who is always hoping that the children at home are behaving themselves, who is always just a little worried whether Jimmy and Susie and little Joe are stuffing beans up their juvenile noses. Her name was Miss Quest.

It developed that my part in the scarlet fever drama was a thinking one. I hadn't a thing to do but lie flat on my back for three weeks and wait until I had desquamated, which, Miss Quest explained to me, meant until I had shed my skin like a snake. My sore throat gave up the unequal struggle against the rhinoceros gargle and disappeared after the third day, and my temperature, after lawing a bull movement, to 103, went below par and was firm and steady at 98.6. I explained this Stock Exchange humor to Miss Quest, who appeared to appreciate it. Anyway, she laughed. "I like anyone who laughs at my jokes—don't you?" "Miss Quest," I said one morning, "I can't remember a thing about the temperature. I don't know much about hospitals. Aren't nurses supposed to marry doctors or rich patients?" "I was sorry a second later that I had asked the question. "In the story books, they do," she said without her usual smile. "In this hospital there is just one doctor, and he is sixty and married. As for rich patients, nearly all the patients here are kids with measles."

She looked away from me, out toward the brightening trees of spring. "I've been nursing other people's children for fifteen years," she said. "That's splendid service," I said. "I know I sounded like a preacher, but I wanted to say something to let her know that one man at least sincerely appreciated her work. I blamed myself for starting the subject. "I know, I know," she said in a low voice. "But even nurses in contagion hospitals are human."

She stood gazing out of the window. "You don't realize, I suppose, that we are pariahs, outcasts," she said. "I have no friends I can visit near here. People are afraid I carry germs. I don't of course. A nurse is more careful about that than ordinary people. But they think so. Even if a nurse here did want to marry, where could she meet the right sort of men? Where could she entertain them?" "There was nothing I could say. She went out of the room without looking at me. On Sunday they let my wife come to see me. They wrapped her in a

## Within the Law

Canadian Cream of Malt Extract is made from Pure Malted Barley and the very best Hops. If used as directed, will make a finer home brew than you can make with any other malt, ale, or any brew that you can buy in bottles or kegs. You do not make an imitation or substitute with Cream of Malt Extract, but a better beer than you ever tasted. Pure and sparkling, with a rich creamy foam. This home brew has a snap and lasting flavor that makes it the favorite and healthful beverage for the whole family. The Man, the Wife and the Children all enjoy it. You brew it at home. It is most interesting work and very easy. No special kegs or tubs are needed. If you make this brew as per our directions, you will have no more Beer or Drug stores. On sale at all leading Grocery and Drug stores. Agents wanted in all territories. **CANADIAN MALT EXTRACT CO., 18 Pearl Street, Toronto**

white robe that made her look like a lady barber, and permitted her to talk to me from the doorway, where no lurking germ could possibly leap on her. The scarlet-fever wing is cut from the rest of the hospital by doors so we could converse in privacy. "I was talking to your nurse before I came in," said Helen. "She's a dear. Don't you like her?" "Miss Quest is a corker," I said emphatically. "It almost negates my fear of having this fever and missing all the Dekkar sales to see someone who understands her job and does it as well as Miss Quest. I never thought I myself could give me a bath and make me like it."

"Don't you go falling in love with her," warned Helen. "No fear, dear," I laughed. "But I wonder why somebody hasn't long since. She's a beauty and a mother."

Tommy and the Soup. Tommy Budd was taking home a can of soup. The statement, although true in essentials, is not exact in detail. The verb is hard to find that accurately describes the method by which Tommy was conveying—or conveying—the soup. The can was on the sidewalk when it was not in the street, and Tommy's foot served as motive power and, when acutely necessary, as rudder. Two of Tommy's neighbors who were on their way to market stopped to watch the exciting progress of the soup. It was crossing the street at the moment and dodging street cars and automobiles. "Look at Tommy Budd!" one of the neighbors cried. "What will that boy do next?" "I am afraid I envy Tommy Budd. He has a gift of creating adventure." "You don't mean," her companion cried in astonishment, "that you think Tommy ought to be allowed to do such things?" "I suppose not. In fact, if the thing were of common occurrence, I suppose I should feel compelled to arouse public sentiment to demand a law forbidding small boys to roll canned goods through the streets. But what thrills he is getting out of what ordinarily would be a very stupid errand! It's that g-g-g which I envy the Budds."

"How do you mean?" Mrs. Groves asked curiously. "I don't know the Budds." "I recommend that you make their acquaintance at once. Tommy comes honestly by his gift. When the baby had scarlet fever Mrs. Budd ran the household from her quarantine. She was an exiled queen, or something, and the family had to manage her kingdom for her. Every day they lined up outside her window and reported. I don't think it occurred to any one of them—unless it were Katie, the oldest—that there was any danger. They thought it was a thrilling game." "And Katie?" "Oh, Katie has the gift no less than the others. In that case she was old enough to be anxious for the baby. But I've seen Katie attack the week's meeting in the same spirit. I don't remember exactly what her game was, but I know she made a game of it. And if you can think of anything less like play than darning the stockings of three active boys, I can't. I told Mrs. Budd the other day that, if she'd give lessons on 'Making an Adventure of Drudgery,' I'd be her first pupil."

"I imagine her first assignment would be to make us work out our own plans." "Probably it would," the neighbor agreed with a sigh. "Which would leave us exactly where we are now, wouldn't it?"

"It is one of the great tragedies of the world," she said, "that so many born wives and mothers never become either. And it's all because you wretched men care so much about a pretty face. You leave a spoiled woman like Miss Quest to do her wivling and mothering vicariously, by caring for meekly kids and fat old automobile salesmen with the pip, all because she hasn't dimples and a baby stare."

"Don't jump on me, dear," I protested. "After all, I've done all I can. I've married one woman. I've often wished that there were a million of me, so that I could make a good husband to all the fine women like Miss Quest."

"You're an old Turk," said Helen, "and I love you. I know what you mean. But since there is only one of you, what are you going to do about it?" "I've been thinking about the question," I replied. "I'm getting lots of chance to think these days. I've decided that it's all a question of salesmanship. 'Thank God, you're yourself again,' explained Helen. "When you begin to talk about salesmanship, that shows you're getting back to normal. What do you mean, Phil?" "Just this. Women like Miss Quest don't know how to sell themselves. They have the goods, all right. There isn't a question in the world that they'd make wonderful wives. But they haven't the salesmanship necessary to get the idea into the thick heads of the men who fall, as you say, for an inferior article with such superficial selling points as dimples and a baby stare."

(To be continued.)

Tommy and the Soup. Tommy Budd was taking home a can of soup. The statement, although true in essentials, is not exact in detail. The verb is hard to find that accurately describes the method by which Tommy was conveying—or conveying—the soup. The can was on the sidewalk when it was not in the street, and Tommy's foot served as motive power and, when acutely necessary, as rudder. Two of Tommy's neighbors who were on their way to market stopped to watch the exciting progress of the soup. It was crossing the street at the moment and dodging street cars and automobiles. "Look at Tommy Budd!" one of the neighbors cried. "What will that boy do next?" "I am afraid I envy Tommy Budd. He has a gift of creating adventure." "You don't mean," her companion cried in astonishment, "that you think Tommy ought to be allowed to do such things?" "I suppose not. In fact, if the thing were of common occurrence, I suppose I should feel compelled to arouse public sentiment to demand a law forbidding small boys to roll canned goods through the streets. I told Mrs. Budd the other day that, if she'd give lessons on 'Making an Adventure of Drudgery,' I'd be her first pupil."

"I imagine her first assignment would be to make us work out our own plans." "Probably it would," the neighbor agreed with a sigh. "Which would leave us exactly where we are now, wouldn't it?"

The Empress of Canada. The new C.P.R. liner, the oil burning Empress of Canada, is built especially for the Pacific service. The appointments will be the finest and most luxurious possible to-day, with particular regard to the C.P.R. standard of "Safety, Speed, Comfort." She has an overall length of 653 feet, is 87 feet 9 inches in breadth and 53 1/2 feet in depth to the bridge deck; she has a straight stem and cruiser stern, three funnels and two pole masts. There is a continuous shelter deck with bridge, promenade and boat decks over, the former extending for the full length of the ship; two complete between decks and a lower and orlop between decks at the fore and aft ends. The "Empress of Canada" has a gross tonnage of 22,000 tons, and is arranged to carry about 490 first class, 196 second class, 238 third class and 922 Asiatic steerage passengers, and crew of 547. Of the cargo spaces, a large portion has been fitted for the carriage of silk and refrigerated cargo. Her speed is about 21 knots. She is built to the highest class of Lloyd's Register full Board of Trade requirements. The first class accommodation is arranged on the shelter deck and in addition to the single, double and family rooms, there are several rooms and private suites, which comprise bedrooms, sitting rooms and bathrooms. The staterooms are fitted with the very latest type of washbasin, with a supply of hot and cold water. The

public lavatories and bath rooms have the most modern improvements in sanitary equipment. A complete system of telephones is connected with a central exchange to the rooms and offices. The dining saloon is on the upper deck and will accommodate 325 persons. A large reception room is situated forward of the dining saloon; the passenger elevator is at the fore end. On the upper deck is also a large swimming pool, 30 ft. by 15 ft., with adjoining gymnasium and dressing rooms similar to the best clubs. The other public rooms are arranged on the promenade deck with special view to convenience and comfort. The large lounge will provide ample room for concerts and moving picture performances, with complete moving picture operating room. There is a long gallery, specially designed room for children, Drawing Room, Writing Room, Smoke Room and Verandah Cafe, and all are luxurious and attractive in every way. Long promenades and recreation spaces for games, dancing and sports are reserved for the use of passengers. The second class accommodation is situated on the shelter deck at a range in two and four berth rooms. These staterooms are fitted similar to the first class. The Dining Saloon is on the upper deck and will accommodate 100 persons. The Lounge is on the bridge deck at.

Needle Travel. I sit at home and sew, I ply my needle and thread, But the trip around the garments' hem Is not the path I tread; My stitches nest, With their rhythmic beat, Keep time to very different feet, On a different journey sped.

Bare brown feet on the dusty road, Unbound body free of its load, Limbs that need no stinging goad Step, step out on the dusty road, Friends to greet on the jolly road, Loping rabbit and squatting toad, Beetle, trundling along with your load;

Hey, little friends, Good-day, good-tomorrow, You see me to-day, You forget me to-morrow.

Bare, brown feet in the shelving pool, Limbs lying bare and beautiful, Hey, green pool, Good-day, good-tomorrow, You hold me to-day, You forget me to-morrow.

Time to float in you, rapt and cool, Swim in the rapids above you, pool, Dive in your waters bountiful, Hey, sweet friend, Good-day.

I sit at home and sew, I ply my needle and thread, But the trip around the garments' hem Is not the path I tread; Margaret French Patton.

The Longshoreman. He aids the freight dispatch to lands afar, Coasts that he'll never see except in dreams, To hies a swoon beneath a tropic star, Or cities washed by fabled golden streams. His life is rimmed by wharves where hulls converge, With flags of all the world on truck or stern; Fresh from the southern coasts where trade winds urge, Or icy ports, where northern fires burn. His lips with river mist are ever wet, His ears are drummed by hoisting engines' strain; And in his dreams the ships he can't forget, Wave up the channel from the misty main. —T. J. Murray.

Minard's Liniment used by Physicians.

The First Quarrel. This bickering that stings and smart— I think it has not touched our hearts! To-morrow we shall laugh at this And heal the trouble with a kiss.

To-morrow, ah, why not to-day? To-morrow is a day away! Come, hold me close and still my fears And with your kisses dry my tears. Oh, kiss me now and laugh at sorrow. Let these should never be to-morrow!

Dyed Her Stockings and Skirt to Match. Every "Diamond Dyes" package tells how to dye or tint any worn, faded garment or drapery a new rich color that will not streak, spot, fade or run. Perfect home dyeing is guaranteed with Diamond Dyes even if you have never dyed before. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. For fifty-one years millions of women have been using "Diamond Dyes" to add years of wear to their old, shabby waists, skirts, dresses, coats, sweaters, stockings, draperies, hangings, everything!

The United States contains more people of British origin than do the British Isles themselves. Keep Minard's Liniment in the house. Between South Africa and Australia are a number of islands seldom visited by ships; on many of those stores of food are placed for the use of shipwrecked sailors.

\$15 lb. for Wool. That's what you pay for it when you buy a suit. What do you get a pound for it when you sell the wool? Canadian wool has to be sent out of Canada to be prepared for the spinner. A pound of wool, bought from the farmer is sold from one commission merchant to another, stored, shipped by train and boat, stored in England, sold and reshipped until eventually it gets back to the mills in Canada at many times the price you got for it. There is no place in Canada to prepare wool for the worsted spinner. Isn't it a shame? A mill is now under consideration, in Toronto, to convert raw wool for the spinner. When wool can be sent direct to the mill for combing and sold direct to the spinner, then the farmer will get the full price.

If this is of interest to you, Mr. Wool Grower, write Dominion Development Corporation, Limited, 709 Continental Life Bldg., Toronto, and get the full plan.

Have it always in the house. WISE mothers keep a jar or a tube of "Vaseline" White Petroleum Jelly in the house for many childish ills, such as bumps, bruises, chafed skin, cradle cap. It is soothing, healing and grateful to the most irritated skin. Be prepared for winter colds, too. "Vaseline" Capsicum Jelly rubbed on the chest, and "Vaseline" Eucalyptol Jelly snuffed into the nostrils will check them quickly. GRESEBROUGH MFG. COMPANY (Consolidated) 1889 Chabot Ave., Montreal, P.Q.

Vaseline White PETROLEUM JELLY

DYEING. YOU will be astonished at the results we get by our modern system of dyeing and cleaning. Fabrics that are shabby, dirty or spotted are made like new. We can restore the most delicate articles. Send one article or a parcel of goods by post or express. We will pay carriage one way, and our charges are most reasonable. When you think of cleaning and dyeing, think of PARKER'S.

## NOVA SCOTIA IS A BIG GAME COUNTRY

ECLIPSED ONLY BY NEW BRUNSWICK.

Diversified Natural Wealth Includes Fisheries, Fruit, Coal, Forests and Fur.

The Maritime province of Nova Scotia, one of the earliest settled regions of the Dominion and long past the worry attendant upon the development of more recently explored and youthful areas, offers nevertheless a peculiar combination of the calm, cultivated mien and leisurely progress of the old world with the primitive untamed wilderness where wild life follows out its existence for the greater part unmolested by the advent of man and where conditions are as unchanged and natural as when the first discoverers arrived at the Atlantic shores. Whilst these wilds have attracted the trapper, the hunter and the sportsman as well as hosts of tourists, to the serious menace of extinction of the province's wild life, vigorous precautionary measures and methods of conservation have been adopted to ensure their preservation. This has resulted in a maintenance of numerical status in practically all species and in the case of certain species occasioning considerable increases, despite the heavy annual toll taken.

As a big game country Nova Scotia is eclipsed only by its sister, New Brunswick, and each year sportsmen from all over the continent are attracted to its woods in large numbers. Receipts from the sale of licenses in 1920 amounted to \$1842, practically all of which were non-resident, indicating the wide favor of the hunting grounds of the province. The moose reported killed in the 1920 season numbered 1,361, an increase of 95 over the previous year and of 120 over the kill of 1918. Deer killed in 1920 numbered 125, a decrease from the previous year's record of 198, which was, however, abnormally high, as can be seen from a comparison with 1918's tag of only 69. No trace of caribou were reported last year except in the extreme north of the province, and it may be assumed, according to the game wardens, that they are practically extinct further south.

Domestic Ranching Increasing. Any diminution of the fur supply is adequately guarded against in Nova Scotia by the establishment of domestic ranching, which is ever assuming greater proportions. It may not be generally known that this has become a thriving industry; and in the matter of silver-black foxes ranking only second to its neighbor, Prince Edward Island, the home of this branch of the industry in Canada. At the end of 1920 licensed fox farms totalled 102. There were in addition 12 mink farms, 8 muskrat ranches and one each beaver and skunk farm. The total number of animals reported by farmers for 1920 was 1,484, showing an increase of 483 over the figures of 1919. The number of silver-black foxes in captivity at the end of the year was 570, an increase of 308 over the number reported for the previous year. Despite the war-time decline in the industry there are now three times as many silver-black foxes in captivity in the province as were reported for any year before the outbreak of hostilities.

The total revenue accruing to the province from licenses, fines, and the sale of permits in 1920 was \$8,415, whilst about \$600,000 would be realized at the prices prevailing last year from fur skins exported during the twelve months, which, allowing for those shipped or carried out of the province and not reported, would augment this amount considerably. Among the more important skins exported were 11,348 weasels, 28,626 muskrats, 2,353 red fox, 2,626 mink, 231 cross fox, 46 silver-black fox, 1,220 raccoon, 46 bear, 66 lynx, 1,288 skunk and 125 otter.

With her important fishing industry, with the annual wealth of the fruit orchards of the Annapolis Valley, with the extensive coal production of the Sydney field, and the increasing value of its allied steel industry, Nova Scotia is extensively developing her very diversified natural wealth. Not least among these natural assets must be reckoned her woods and forests preserved in all the wildness and beauty of their primitive state, and their tributaries, the domestic fur ranches. The one maintains one of the finest hunting grounds on the American continent and the other supplements the efforts of conservation in insuring against any possible diminution of the province's supply of wild furs.

The First Frost. The dabbles with its gay rosettes Still musters on parade, The sun is still so hot at noon That workmen seek the shade, And green as in the summer hue The maple towering high Extends its thickly foliaged boughs Toward the asphodel tree.

But lo! its emerald glory now Is destined to be brief, For on its verdant top appears A single crimson leaf. Jack Frost came down from icy lands Across the polar sea Last night and left his fatal kiss Upon the maple tree.

**ROYAL YEAST CAKES**  
RICH IN VITAMINES  
MADE IN CANADA  
The importance of Vitamins in food is being recognized at the present time to a greater extent than ever before. It has been conclusively demonstrated that yeast is rich in this all important element. Many people have received great benefit physically simply by taking one, two or three Royal Yeast Cakes a day. Send name and address for free copy "Royal Yeast Cakes for Better Health."

## Canada From Coast to Coast

Dawson, Y.T.—The gold yield in the Yukon Valley, including Canadian and the United States territory, for the season of 1921, aggregated approximately \$4,000,000, according to V. Richards, superintendent of the Northern Commercial posts of Alaska. Of this amount \$2,675,000 came from Interior Alaska, 11,250,000 from the Yukon Territory, and \$75,000 from Atlin, B.C. Hydraulic operations around Dawson are shutting down for the season's general clean-up.

Victoria, B.C.—The first modern device for directing steamers by wireless on this coast has been erected at Tatoosh, and is now in operation. It is claimed that this contrivance will direct steamers in a fog as easily as they could find their way in broad daylight. All shipping masters are invited to make full use of the apparatus.

Edmonton, Alta.—A large tract of above its junction with Great Slave Lake, has been taken up under oil lease on behalf of an Anglo-American syndicate. Geologists who accompanied the exploring party feel positive that oil will be found in the district.

Peace River, Alta.—The Northland's bid for fame is not based on oil alone. The grain yield this year is exceptional. Tomatoes and cucumbers have grown in profusion and to excessive proportions. Cabbages four and a half feet in circumference are not uncommon and potatoes twenty inches long and weighing more than two pounds encountered.

Regina, Sask.—On a seeded acreage of 10,363,000 acres, the wheat yield of Saskatchewan this year is estimated by A. E. Wilson, Dominion Grain Commissioner, to be fourteen bushels to the acre, making 145,082,000 bushels. Following an investigation of the crops in Alberta made within the past two weeks at the request of the government Mr. Wilson placed the aggregate wheat yield for that province at 45,000,000 bushels.

Winnipeg, Man.—The Province of Manitoba will be represented at the Royal Agricultural and Dairy Show, to be held in London, England, during October. Entries have been made for butter exhibits from Sheol Lake and Crescent creameries. The Canadian Pacific Railway will look after the transportation and display of the provincial shipments, and at conclusion of the show will exhibit at their London office.

Ottawa, Ont.—Over twenty million dollars worth of pelts were taken during 1919-20, showing that the fur-bearing animal is one of the most important of Canada's re-

sources. The number of pelts of fur-bearing animals taken in Canada in the season 1919-20 was 3,000,000. Fur markets have been established at Winnipeg and Montreal. The last fur sale held in Montreal, during the early part of September, was a complete success, more than one million dollars worth of furs being sold, and buyers from all parts of the globe attending.

Toronto, Ont.—The creation of a regular four year course in journalism proceeding to the Bachelor's Degree is regarded as a practical certainty in Toronto University circles, as a result of the success which has attended the short experimental course of one week which concluded recently. The new course would involve the foundation of a chair of journalism, but apart from the addition of this one professor, it is not believed that any considerable staff would be required.

Quebec, Que.—No less than three hundred French-Canadian families have in the past nine months returned from the New England States to the Province of Quebec, according to the Provincial Department of Colonization, which has circulated active propaganda to this end. Speaking of colonization in Quebec the Minister states that this had been the greatest year in the history of the province. Farm lands in the province are now actually sold by the Department.

Halifax, N.S.—Preparations are being made for the resumption of their evaporating and canning factories in the Annapolis Valley by the Graham's Limited, Belleville, Ont., and operations are expected to commence very shortly. They propose, in addition to evaporating apples, to make at Annapolis Royal and Windsor, apple syrup, apple butter, apple cider, and apple jelly, in addition to their canning operations at Berwick.

Charlottetown, P.E.I.—Although the smallest province in Canada, Prince Edward Island, with one school to every 4.6 square miles, has probably more schools in relation to its size than any other province in the Dominion. The island is covered with small villages, in each of which is found a school with two or more rooms. At the last survey, conducted by the educational statistics branch of the Dominion Bureau of Statistics, the number of schools on the island was 476, with 593 departments, or 1.25 schools to the square mile.

St. John's, Nfld.—Lord Northcliffe, the English publisher, has bought three hundred acres of choice timberlands in the Conception Bay district of Newfoundland, from Joseph Seward of Glace Bay, N.S. The purchase price was \$50,000. Lord Northcliffe requires the timber for wood pulp for his paper mills at Grand Falls.

## BALFOUR TO HEAD BRITISH DELEGATION

### Premier Finds it Impossible to Attend Arms Conference at Washington.

A despatch from London says:—Mr. Lloyd George stated definitely that it would be impossible for him to attend the Washington conference, in a telegram he sent to the Ambassador at Washington, which is quoted by the Melbourne (Australia) correspondent of the London Times as having been read by Premier Hughes in the House of Representatives. The Prime Minister's view, as further set forth in the telegram, was that the British delegation should consist of Mr. Balfour and two others.

The correspondent adds that Premier Hughes said one of the others was the First Lord of the Admiralty, but the third man had not been named because he had not yet consented to go.

According to the Prime Minister's telegram to the Ambassador, says the correspondent, it was arranged at the recent Imperial Conference that His Majesty's Government should represent the whole Empire at the Washington conference, but the Government now would prefer to include the dominion point of view. Mr. Lloyd George added: "It will be impossible for me to attend, as the conference is sure to be prolonged, and so many matters demand my attention in England."

Hon. John Storey, Premier of New South Wales since April, 1920, is dead. He was for many years Labor leader in Australia.

New Postmaster General Hon. I. G. Bouley, K.C., of Quebec, who is the Postmaster General in the new Meighen Cabinet.

## Demand for Canadian Cattle Abroad

A despatch from London says:—A shipment of 105 fat cattle direct from Ontario feeders have just been offered for sale at Markland's Wharf, Glasgow. The best steers sold at from \$40 to \$44, an advance of \$3 to \$4 per head over last week's quotations. Smaller steers brought from \$30 to \$38 per head. The bidding showed an upward tendency as the sale advanced. Bulls fetched \$25 to \$37, and cows sold up to \$27.

Skating with bones tied to the feet is mentioned as far back as the twelfth century.

A SEQUEL TO THE BELFAST RIOTS  
The funeral of Mrs. Blair, who was shot during the recent Belfast riots. Note the armoured cars in the procession.

## TWENTY THOUSAND CHEER SINN FEIN DELEGATES TO LONDON CONFERENCE

### Experts to Put Cause for Irish in Legal Shape—Question of Breaches of Truce Will Probably be First Subject Considered.

London, Oct. 9.—Twenty thousand joy-crashed, frantically cheering, London Irish men and women, packed for blocks around Euston Station, welcomed the Sinn Fein plenipotentiaries to the Irish conference in London, when they arrived from Dublin last night.

The men and women fought to kiss the hands and touch the garments of the leaders of the "Republisc," who motored to their headquarters through streets lined with crowds.

The delegation is headed by Arthur Griffiths, and includes R. C. Barton, E. J. Duggan and Gavan Duffy. Michael Collins, who is a delegate, is detained in Dublin, "due to family reasons." He will arrive here on Monday. De Valera will not accompany the delegates and will not be a member of the delegation, though it is understood his may come to London unexpectantly later in order to be near the conference and confer with the delegates.

The arrival at Euston station was the scene of a remarkable demonstration. It was three weeks ago that thousands of clamoring unemployed waved the Red Flag as bands played the "Internationale" when the London Labor Mayors departed for Gairloch. Last night this same hollow square inside Euston station buildings was jammed again with thousands of people who in the dim twilight sang the "soldiers' song" of the Irish Republican army as kilt-clad bagpipers played the shrill war pipes.

The cordons of police surrounding shoved back the crowd, blandly ignoring the hordes of harp and green ribbon vendors.

The Irish peace delegates spent a quiet Sunday in London, the delegates and the Secretaries dividing their time between the various churches. A third Secretary has been added to the delegation. He is John Chartres, and his appointment has evoked much speculation. His name is unknown in Irish politics, and he is the only one connected with the delegation who is not a member of the Dail Eireann or any other representative body. He is the grandson of Richard Chartres of Dublin, his father being the late Sergeant-Major Chartres of the 8th Hussars. He married the Italian poetess, Annie Vivanti.

His accession to the Irish delegation is taken as indicating that the Sinn Fein is engaging an expert adviser in several branches of law and has served in the intelligence section of the British War Office.

Others invited to assist the delegation, although not Sinn Feiners, are Dr. George O'Brien, historian and economist, and George Russell of the Irish Homestead, and a former official of the British Local Government Board, to handle the intricate questions of local government.

The chief risk to a settlement now is believed to be in Ireland, rather than in the conference chamber. Both sides allege that breaches of the truce have recently multiplied. Dublin Castle claims to have a list of 600 such breaches, while Sinn Fein liaison officers have issued numerous instances of alleged aggression by police, auxiliaries and soldiers.

Higher standards result in a better type of student and, as this year's experience would indicate, in a greater number of students. The prestige of the degrees of Ontario's Provincial University is absolutely unexcelled on this continent.

Poppy Day on November 11th  
A despatch from London says:—Col. John McCrae's poem, "In Flanders Fields," suggested to Lord Haig the organization of Poppy Day on November 11th, in aid of various schemes for the benefit of ex-service men of all ranks. Lord Haig is President of the British Legion, which helps both officers and men, and he used the Canadian poet's words as a message of inspiration to all the workers in the vast scheme to be launched next month and will be signalled by the placing of a gigantic wreath of poppies at the foot of the cenotaph in Whitehall.

Mrs. Jean Baptist Pover dies, at the age of 103 at Sherbrooke, Que.

## EXTEND RURAL CREDIT TILL FALL OF 1922

### Manitoba Farmers' Notes Tallying Million Dollars to be Held.

A despatch from Winnipeg says:—Rural credit societies of Manitoba will be forced to extend time for payment of \$1,000,000 of farmers' notes until next fall, according to information obtained here. Total outstanding loans of the societies amount to \$2,600,000.

It is expected \$1,500,000 of the loans will be collected this fall, and new notes payable in 1922 will be accepted for the balance.

Excessive rains, which held up the threshing operations and lowered prices of grains and live stock, are the reasons the societies are unable to make full collections this fall.

Bathing in the snow is a common custom in Russia.

Toto, the largest African elephant in the Zoological Gardens at Rome, killed Dr. Canazza while he was lancing an abscess on its body.

## TWENTY-FIVE LIVES LOST NEAR CLYDE

### Glasgow-Dublin Night Passenger Ship Rammed by an American Freighter.

Glasgow, Oct. 9.—The American freighter, West Comak, bound with a cargo from San Francisco for Glasgow, rammed the Laird liner Rowan, a Glasgow-Dublin night passenger boat, shortly after midnight. Saturday night in a thick fog off Corsewall Point, Scotland, near the mouth of the River Clyde.

While the Comak was lowering boats to aid the stricken ship a third steamer, a Clan liner, the Clan Malcolm, from Glasgow for Natal, South Africa, sped out of the fog and crashed amidships into the Rowan, which sank a minute later.

The latest death list gives 25 dead or missing. Seventy-five were rescued from the Rowan.

At midnight the Comak, inbound, and the Rowan, outbound from Glasgow, were both proceeding at slow speed in the fog, when the Comak suddenly struck a glancing blow near the stern of the Rowan. There was no panic, though the Rowan's passengers stood by the boats. While the Comak was lowering boats the Clan Malcolm's whistle was heard. A moment later the liner boomed out of the fog, striking the passenger ship and cutting it in two like a knife. The Rowan sank immediately, dragging down passengers with her.

The report says that the Clan Malcolm had heard the calls for assistance and was hurrying to the rescue when she herself made matters worse, owing to the fog.

Captain Donald Brown of the Rowan was lost, but the majority of the passengers struggled on the surface, grabbing wreckage. At the moment of sinking, however, the Rowan's radio operator had sent the S.O.S. broadcast, which was picked up by the British destroyer Wrestler, 18 miles distant, which dashed toward the scene.

The first woman president in the world is Lady Surma Mrs. Simcoe, an Assyrian, with a Western Education, who has been chosen by her fellow-countrymen as the leader of the Assyrian nation. The Assyrians are Christians and are among the most advanced of Orientals, women having a great voice in their councils.

## TWO CROWNS AND SIX RINGS AT WEDDING

### Princess Xenia Married to William Leeds in U.S. and Greek Churches.

Paris, Oct. 9.—It required two crowns and six wedding rings to marry William Leeds and Princess Xenia of Russia this afternoon. Grand Duke Dimitri, stepfather of Prince Charles Roger, held the massive jeweled studded gold crowns over the heads of the bride and groom for half an hour while the Orthodox Greek priest recited an impressive wedding ceremony.

The Mayor slipped the rings on young Leeds' and Princess Xenia's fingers yesterday, the rector of the United States Church placed two more rings there to-day, and then the Greek priest added a final pair of rings. Mr. Leeds will wear one, but the bride will wear all three.

A big mob jammed the Russian and the Rowan, outbound from Glasgow, were both proceeding at slow speed in the fog, when the Comak suddenly struck a glancing blow near the stern of the Rowan. There was no panic, though the Rowan's passengers stood by the boats. While the Comak was lowering boats the Clan Malcolm's whistle was heard. A moment later the liner boomed out of the fog, striking the passenger ship and cutting it in two like a knife. The Rowan sank immediately, dragging down passengers with her.

The couple left for the Isle of Wight to-night, where they will honeymoon on a houseboat, accompanied only by Mr. Leeds' valet, Wang, who will cook, and Princess Xenia's maid.

## Canada to Receive Refund on Assessment

A despatch from London says:—On the last day of the Assembly of the League of Nations it was agreed to alter the article relating to contributions from the different States toward the expenses of the League, the result being that the Canadian contribution will be substantially reduced next year. The question of repayment of part of this year's contribution to Canada and other nations which appear to have been over-assessed was also considered, and it was recommended that reimbursement be made when the League obtains a surplus.

## Continued Rise in British Wholesale Prices

A despatch from London says:—Wholesale prices, according to The Economist, continued to rise last month, and there was an increase of 105 points in the newspaper's index number, the total being 4,024, practically the same as at the end of April. The whole of the rise is due to movements in the textile group, cotton being chiefly responsible, and the group being higher than at any time this year.

All other groups show an appreciable decline, especially cereals and meat.

## Severe Storm Sweeps Over Ancient Colony

A despatch from St. John's, Nfld., says:—The severest storm in many years swept the island on Thursday night, causing great damage on land, and destroying much fishery property along the coast. A heavy toll among the fishing vessels on the seaboard and the Labrador coast was feared. One woman was electrocuted here by falling light wires, and three other persons were seriously injured.

## September Busy Month in Grain Market

A despatch from Winnipeg says:—Fifty per cent. more of the Western Canadian grain crop was marketed this year during September than in 1920, according to figures issued by the Canadian Pacific Railway. During September 20,775 cars of grain were inspected in Winnipeg, compared with 13,092 in September, 1920.

## General Elections Date December 6th

A despatch from Ottawa says:—Tuesday, December 6, has been officially announced as voting day for the general elections. Nominations will be made on November 22, and Parliament is being summoned to meet January 17.

## Thirty-five Volunteer For Blood Transfusion

A despatch from Ottawa says:—A story of "greater love" was told at a meeting here of the management of the Home for Friendless Women. One of those living in the home became seriously ill and was sent to a local hospital. The only hope for her recovery was by transfusion of blood. Every one of the 35 women living in the home volunteered, and the first transfusion has been made.

## Towed Vessel 1,200 Miles in Rough Seas

A despatch from Boston says:—What shipping men call was the longest tow on record came to an end here late on Thursday when the steamer Monroe brought to port the steamer Oskaloosa, after a voyage of 1,200 miles, marked by many days of rough weather. Both are United States Shipping Board vessels and have been a month at sea.

## REGULAR FELLERS—By Gene Byrnes

Mayhew & Co.

Glencoe's Leading Store

Smartly tailored Skirts for dressy women. Prices range from \$6.95 to \$15.

WE ARE REALLY BUSY

At the Mayhew store we have thrown ourselves with real enthusiasm into the work of speeding up the outflow of merchandise and you may drop into this big store at nearly any hour of the day and find that we are really busy. Of course, we couldn't keep our business growing in a time like this if we exacted profits that were all that the traffic would bear. These are not war years, and the merchant who wants to keep busy must offer a great deal better value than usual. People today are shopping and in consequence our values are being discovered. Of course, our immense purchasing power and the fact that manufacturer know that we always pay cash is helping. Indeed, many a bargain comes our way from manufacturers sorely pressed for funds. We are always striving to help our friends to lower-priced merchandise.—E. A. MAYHEW.

The Transcript.

THURSDAY, OCTOBER 13, 1921

WARDSVILLE

Miss Verna Husser has returned to Detroit after a month's visit at her home here.

The death of Mrs. Mary O'Hara occurred at the home of her daughter, Mrs. O'Leary, at Port Lambton. She was in her 88th year. The funeral service was held at Port Lambton, with burial in the family lot in the R. C. cemetery here on Thursday. A family of sons and daughters survive, A. B. O'Hara being one of the sons.

Mrs. Donald Smith suffered a stroke and is very ill at her home here.

Mr. and Mrs. T. R. Faulds and family are moving to Rodney. We are sorry to lose such good people from the town.

A number of friends and neighbors gathered at R. J. Petch's for the purpose of a barn-raising one day last week.

Word has been received from Boston, Mass., of the death and burial there of James Hutchison, formerly of Wardsville. Mr. Hutchison had been in failing health for a long time. He leaves to mourn his loss his wife, who was formerly Miss Purcell, also two sons and one daughter.

Mrs. Joe Winger underwent an operation in St. Joseph's Hospital last week. She is doing well.

Mrs. Henry Archer is visiting in London.

Mrs. Jack Sloan and son Victor have returned home after a two weeks' holiday.

James Dykes spent a couple of days in Bridgeton.

Mr. Nichols and Thos. Weer spent Monday in London.

WOODGREEN

Miss Beatrice Schellenberg of Sebringville is visiting Mr. and Mrs. Daum.

A number from here attended Melbourne fair last week.

Mrs. T. J. Elliott and son Myers of Florence spent a day last week with Mr. and Mrs. Thos. Simpson.

Miss Peters attended the teachers' convention in Strathroy last week.

Miss Margaret Watterworth spent a few days with relatives in London last week.

Mr. and Mrs. Harry Harvey spent Sunday with Mr. and Mrs. Lawrence Harvey, Wardsville.

Mr. and Mrs. Thos. Simpson, son Lee and daughter Florence spent Saturday in London.

Miss Jean Russell, who was visiting with Mr. and Mrs. Isaac Watterworth, has returned to Toronto.

Several from here attended the U. F. O. convention in Strathroy Saturday.

Mrs. Joe Winger underwent an operation in London Saturday morning.

Blank oil leases may now be had in any quantity at the Transcript office.

APPIN

We are pleased to welcome to Appin Mrs. (Rev.) Parr who has been in poor health lately, and we trust she will continue to improve and recuperate here.

The recent rains have spoiled the roads, and local beet growers are hoping for a spell of dry weather so they may harvest their crop readily.

Misses Marion and Margaret Macfie of Alma College spent the weekend at their home here.

Miss Jeanetta Lotan of Victoria Hospital, London, made a short visit to her parents on Saturday last.

The wedding bells are keeping up a constant pealing these days. Mr. E. and Miss E. McIntyre are the latest victims to Cupid's darts. We wish them all happiness.

Frank Pole has moved into the house he purchased from Geo. Scates. John Clarke has built himself a residence on the Appin road.

Alex. Leith and family have moved into John Cramp's house.

Cods are the order of the day here.

MIDDLEMISS

Bruce England of Aylmer has returned home after spending a week with friends here.

Arthur Wrightman has built several new chimneys in town.

Mr. and Mrs. John Graham will start housekeeping shortly.

Chicken stealing is in full swing again. The suspects are being closely watched.

A number of teamsters from here have gone to Appin to haul sugar beets.

E. W. McDonnell intends building a new house next spring.

The potato crop is almost a failure in this district.

Miss Mary McDonald, accompanied by Dottie Fletcher, has arrived from Detroit.

Wm. Graham captured several first and second prizes with his general purpose team at Wallace town fair.

Our prospects say it will be an open winter. South wind when the sun crossed the line, no nuts for the squirrels, light husk on the corn, late thunder, no money—these are a few of the signs.

The approaching election is causing some interest as to who will represent this riding.

Rev. C. C. Couzens will preach his farewell sermon in the Methodist church here at 7.30 p. m. on Sunday, Oct. 16. Mr. Couzens is one of the ablest speakers who has ever filled the pulpit here and the congregation will miss him as a spiritual helper both in and out of the church. We wish him success.

Every careful and observant mother knows when her child suffers from worms. She also knows that if any remedy be not speedily applied much harm will result to the infant.

An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

EUPHEMIA

Isn't this "some" fall? Auction sales in this township are few and far between.

The wave of sickness that has swept over this country has been professionally attributed to the "summer flu," but we believe a more proper diagnosis would lay the blame as a type of dysentery resulting from the rotten prices on farm produce.

People out this way are discovering that the rain didn't spoil the little "laters" after all.

Some of our acquaintances along the back concessions have "a little still," others "a little." We are always striving to help our friends to lower-priced merchandise.—E. A. MAYHEW.

We are wondering if the fellow who conceived the idea of "fining" our roads with splintered stone ain't got some few thousand shares in the stock of the Dominion Goodyear or Duplex Fire Companies.

The U. F. O. boys had a great day in Alvington Monday.

A farmer who takes chances on an auction sale this year is about as optimistic as Bob Ingersoll, who went about preaching "no heresities."

We worked all the summer are gone. For rest and relax—

An' now comes the taxes. Who said "Life's a beautiful song."

KNAPDALE

Mr. and Mrs. Alexander of London spent the weekend at Alex. Stewart's.

Mrs. Blackhall is on the sicklist. Thomas Duffey is suffering from a stroke.

Miss Nora Stewart is spending a few days with London friends.

Dan McNaughton is weighing sugar beets at North Glencoe.

Owing to the teachers' convention there was no school on Thursday and Friday.

Miss E. Duckworth spent the weekend at her home near Cashmere.

Miss Jessie Fletcher, Mrs. Dan Hillman, John Leitch and Peter Mitchell were delegates from the Knapsdale club to the U. F. O. convention held in Strathroy on Saturday.

Alex. McBrayne has moved to his old home at Blenheim. Mr. Pethick, who intends working the farm on shares, has already taken possession.

EKFRID STATION

There will be a meeting in the school house of S. S. No. 4, Ekfrid, on Saturday, Oct. 15th, at 2 o'clock sharp, to consider the advisability of organizing a Women's Institute or whatever the ladies may decide upon. A large attendance of the ladies is requested.

Mr. and Mrs. Alex. McKinnon of Kingston are visiting the former's parents here.

Mrs. Alex. McEachern and daughter Madge have returned to their home in British Columbia.

Mr. and Mrs. Alex. Webster have returned to their home at Jeanette's Creek.

KILMARTIN

Mr. and Mrs. John Dewar and Mr. Mrs. Tyrell of Detroit spent the weekend at Alex. Dewar's.

Rev. Mr. Bonpas returned missionary from China, occupied the pulpit in Burns' church last Sunday morning.

Mr. R. E. McAlpine is visiting Rev. Dr. and Mrs. Smith, Blenheim.

Glad to report that Miss Heli McIntyre, who has been a patient in Victoria Hospital, London, for some time, is making a favorable recovery.

Mrs. Crawford, Detroit, is spending some time at the home of her brother, M. A. McIntyre.

CASHMERE

Mr. and Mrs. R. E. Johnston of Windsor spent Monday with the former's cousin, Mrs. Calvin Sitter.

We are sorry to learn that Russell Morrison's arm and leg are not improving as well as expected.

Sunday was Rally Day at this church.

Mr. and Mrs. Calvin Sitter and son spent Sunday with her parents, Mr. and Mrs. B. F. Jeffery, Newbury.

Miss Ethel Thompson left last week for Toronto Normal.

Mr. and Mrs. Earle Tunks and sons Glen and Walter spent Tuesday with her parents, Mr. and Mrs. Allen Sitter, Bothwell.

Mr. and Mrs. Wed. Dark and son attended Thamesville fair.

Mr. and Mrs. Earle Linden of Aldborough spent Sunday at her home here.

Mr. and Mrs. Wm. Saylor and Miss Merle, Lloyd and Clement spent a few days recently with relatives in London and St. Thomas.

FLORENCE

The fair which was to have been held on Friday was held on Monday, owing to the rain on the previous day. The exhibits were fine and a good crowd was in attendance.

Mr. Saw was buried on Saturday in the Butler cemetery. The funeral was quite large. Rev. Mr. Streeter preached. Mr. Saw was about 83 years of age and had been ill several weeks before death.

Mrs. Munroe and Lucille of Cairo are guests of Mrs. Lindsay.

Miss Leapha Annett, Miss McGilivray and Miss V. Badgley attended the teachers' convention held in Petrolia Thursday and Friday.

Mr. Coleman, the local stock buyer, was in the vicinity buying this week.

W. P. Forsbee and Myres Elliott attended the U. F. O. convention in Alvington.

NEWBURY

Mr. and Mrs. Hugh Boyle have arrived from Cleveland and taken up their residence in the home purchased from Mrs. Dixon. Mr. Boyle is George Harcourt is moving from St. Thomas and will occupy E. Leech's house on Queen street.

Rev. Mr. Bonpas and wife, returned missionaries from Homb, China, addressed the Y. Y. S. in Knox church on Friday evening, using lantern slides to illustrate.

Born—on 6th inst., to Mr. and Mrs. George Miller, a daughter, Mrs. D. Archer, Windsor was in town on Wednesday.

Miss Nessie Archer of Tilbury was home for the week-end.

The death of Mrs. Mary Ann Davis occurred on Wednesday afternoon at the age of 86 years and 7 months, at the home of her daughter, Mrs. Wm. Connelly, with whom she had resided for several years. Deceased was of a kindly, quiet disposition. The funeral services were held on Friday afternoon, conducted by Rev. C. D. Farquharson. Interment was made at Cashmere. Besides Mrs. Connelly are three daughters, Mrs. Ward, (West Lorne); Mrs. Milner, Michigan; Mrs. Saylor, Cashmere, and one son, Arthur, of Windsor. Sympathy is extended. The floral offerings were very beautiful.

E. V. Squires of Highgate and J. Stephenson of Tilbury were callers in town Sunday.

Mrs. Vanduzer and Miss Mamie Fennell attended the teachers' convention in Strathroy on Thursday and Friday.

Sunday, 16th, being Children's Day in the Church of England, the service will be of a special nature.

Miss Margaret G. Bayne was in St. Thomas last week attending the teachers' convention.

Among those from a distance who attended the funeral of the late Mrs. Davis on Friday were all the members of her family and granddaughters, Ann J. and Mabel Connelly, of Detroit.

We hear lots of mushroom talk these days but Monday Wm. Bayne brought in from the Gilett farm the most wonderful in the shape of a puffball. It resembled a huge white cone in full bloom and would measure about 20 inches across. It was an exhibition in the store window and caused lots of comment, very few realizing that it was a growth. Some thought it was made of plaster of paris. It surely was a beautiful piece of nature's handiwork.

The Women's Missionary Society held their regular monthly meeting at the manse, with 17 members and 7 visitors present. The meeting opened in the usual way. Thank offering leaflets prepared for the Scripture lesson, Mrs. Farquharson gave an excellent paper on the Bible.

Mrs. Forbes of Chatham, who spent four years in China doing missionary work with her son at Homan, gave a very interesting talk on the country and the condition of the people and how anxious some are to hear the true Gospel. Mrs. Forbes, though over 70 years, learned the Chinese language while there. The meeting closed in the usual way. A dainty lunch was served by the hostesses.

ELLIOTT GRAY.—At 2 p. m. on October 5 Miss Mary C. Gray, of the second concession of Euphemia township, was united in marriage to Chas. S. Elliott, of the same township, by Rev. P. H. Streeter, pastor of St. Matthew's church, Florence. The bride was attended by Miss Florence Dixon. She is a granddaughter of Mrs. Thomas Dixon and well known here.

MOSA

Mrs. Andrew Watson left last week on an extended trip to Ottawa and Smith's Falls and points east. Mrs. James Watson, sr., Pratt's Siding, accompanied her to Sharbot Lake, intending to visit her daughter at Onipah, Ont.
