petition with the untaxed products of the Dominion. It cannot fail to be satisfactory to you to know that some of the most intelligent persons whom I have met in the West Indies warmly advocate, not only a commercial, but also a close political Union with Canada. Such an union, it is clear, would raise us from our position of a fourth to that of a third maritime power, and would give us a nationality of which we might well be proud." It is well known that we have taken away a good deal of the South American trade, in lumber, formerly done by the United States. Our trade connections with the West Indies might be immensely increased, and with great profit to all parties; we should like to see special efforts made to follow up the information obtained by the West Indian Commissioners, some years ago, with something practical. There are no real difficulties, but a want of enterprize and the adoption of a far seeing policy, in the way of securing for the Dominion an immense trade with those fertile islands, which want so many of our products, and can give in exchange a number of important articles which we cannot get so well or so cheaply elsewhere.

SOMETIME ago the decision of the chief judge in bankruptcy in England, in the case of Pullen ex parte Williams was noticed in these columns. It will be remembered that it was an action for debt and was contested on the ground that. the defendant held a discharge from the Bankrupt Court, and was, therefore, not liable. Evidence was adduced to show that while the defendant had compounded with his creditors at three shillings in the pound, his estate would have yielded seven shillings and the Judge ruled that his discharge was not valid and gave judgment for the whole amount. The defendant in this case had received his discharge several years previous. This is a precedent worth remembering. A large number of discharges in Insolvency here have been without doubt similarly obtained; and if the ruling of this English judge can be quoted as a precedent these are absolutely worthless. This, after all, seems only a reasonable conclusion. It could hardly have been contemplated that if an estate will pay ten the minority of creditors should be compelled to accept five shillings. This is clearly forcing people to give away their property.

Some most glaring pieces of wrong-doing have been perpetrated in the way of compounding with debtors. A case which occurred in Montreal has been freely talked of, in which a leading wholesale firm induced a number of creditors to execute a deed of composition, and it afterwards came out that a private arrangement had been come to, between the firm and the debtor, to have his custom in future, in consideration of helping him through with his little game. Another case has been mentioned to us, wherein the debtor's own statement showed a surplus of several thousand dollars over the amount for which he had compounded. It has been always considered that the minority were at the mercy of the majority, in cases of this kind, but this new ruling is at vari-ance with that idea, and strikes at the root of what has become a considerable evil.

Cases like this often arise; a business-man-Mr. Wide-Awake-seems flourishing, has been prompt, and reports a large surplus, but some fine morning his creditors meet with a disagreeable surprise, in theshape of a circular containing the stereotyped story that dull trade, recent unexpected heavy losses, and difficulty of collection, has rendered it impossible for him to meet his engagements. Meantime his particular friends are assured by expressive winks and nods, that they are in no danger, providing they keep mum. A meeting is called ; a cooked statement presented, and a composition accepted, by the power of a majority, for 20, 40 or 60c. in the dollar, while Mr. W. A. is perfectly able, as no one knows so well as himself, to pay dollar for dollar.

A most pernicious system has been grafted on our trade through the ill-use of the bankrupt act. Even where it is known a composition has been obtained by fraudulent representations, the desire to retain a customer whose position has been improved thereby, is so great as to cast the moral question out of sight altogether. The trade, wholesale and retail, ought to combine to stamp out these perhicious practices. Retailers should refuse to purchase from houses that consent to such compositions ; and wholesale men should oppose in every way a bankrupts discharge under suspicious circumstances. By adopting such a course all would be great gainers in the end.

#### TORONTO STOCK MARKET.

Reported by Pellatt & Osler, Brokers.

The Stock market has been very inactive for the past week; all kinds of Government Securities are heavy, and close with a downward tendency.

Banks .- Sales of Montreal to a moderate extent have been made at 169, and 1694, closing in demand at 1693. No British on market, would command 1064. The transactions in Ontario have been limited, sales have been made at 103 and 1034, still offering at latter rate. Toronto, a dividend of 4 p.c. for 5 months has been declared, buyers freely offer 135, but there are no sellers. Very limited sales of Royal Canadian during the week at 63, at which rate the stock is offering, with no buyers over 60. Commerce sold at 114, at which rate the stock is procurable. Sales of Merchants' at 1104, 111, and 1114, closing firm; with buyers at latter rate, but with no sellers under 112. No sales of Quebec, nominal at 1041 to 105<sup>1</sup>/<sub>2</sub>. Last sales of Molson's at 95. Buyers of City at 89, and sellers at 91. Du Peuple sold at 103<sup>3</sup>/<sub>4</sub> and 104. Buyers of Jacques Cartier at 109<sup>4</sup>/<sub>4</sub> and selfers at 110. Union nominal at 106<sup>4</sup>/<sub>2</sub> 1094 and selfers at 110. to 1071.

Debentures.—Canada are heavy at quotations; sterling "Fives" sold at 944, and Dominion Stock at 1084. Sales of Toronto at 91, and still procurable at this rate. County are in good demand, 102 has been paid for some favourite Counties. Townships offer in limited amounts at 95.

Sundries.—City Gas is asked for at outside uotations. British America Assurance offered quotations. at 74 without finding buyers. Western Assurance No Canada Life Assurance is procurable at 80. on market. Small sales of Canada Permanent Building Society at 132 and 1321, very little on Western Canada Building Society sold market. during the week at 123, none now on market boxes and 21,000 hhds. The present crop is re-under 1234. Freehold Building Society is in ported at fully 15 per cent. less than the former under 1234. active demand at 123, at which rate sales have one.

been made. Huron and Erie Savings Loan Society is asked for at outside quotations, none on market. Union Permanent Building Society is offered at 112, no quyers over 111. Buyers offer 150 for Montreal Telegraph, none on market. 94 would be paid for a round lot of Canada Landed Credit, mortgages are readily taken at 'S per ceut.

#### MONTREAL STOCK MARKET.

#### Reported by Robert Moat, Broker.

MONTREAL, April 26, 1870.

There has been a further advance in nearly all bank stocks which has brought out sellers and the amounts placed were larger than for a long time previous. Government securities are still weak at a deeline on last week's quotations. Money has been in rather more demand but the supply is still abundant.

Hanks.—The principal transactions were in Merchants' which advanced nearly five per cent. during the week, with very large sales at all prices from 1101 to 115 closing firm at the latter price. Montreal sold at 1691, 170, 1701 and 171, closing with buyers at 171 sellers asking 1724. City is now held for 914 the latest sales being at Ontario was largely dealt in at from 103 to Commerce is asked for at 1131 with sellers 9032 Royal Canadian has declined three per at 1143. cent. closing dull at 60. Molson's advanced two and one-half per cent. holders now asking 100. Quebec is firm at 105. No Toronto nor British in market. People's and Jacques Cartier are firm but unchanged in price.

Bonds .- Governments are again weak and lower with sellers of fives sterling at 94 and sixes at 105. Dominion stock sold as low as 107 but higher prices are now asked. Montreal securities

have been largely dealt in at 99, Sundrics.—The only change is an advance in Richelieu now held for 140 and City Passenger for which 1121 would be paid.

Exchange .- Classes firm but in limited demand at 91 for Bank and 8 to 81 for private bills.

NEW YORK MONEY MARKET.-April 22. Business is excessively dull, and money on call is so easy, that lenders have difficulty in finding emloyment for their balances at over five per cent. ployment for their balances at first-class paper is Discounts are very easy, and first-class paper is eagerly enquired for at 61 to 71 per cent., and sin-gle names at 7 to 12 per cent., Gold is heavy, and gle names at 7 to 12 per cent. Gold is heavy, and the speculation for the moment is certainly against

-- The agency of the Bank of Montreal in London, England, will be under the direction of Sir John Rose, Sir John Lubbock, and Mr. Robert dillespie.

-The Cobourg papers state that the deposits of the Northumberland and Durham Savings Bank from the 1st Dec. to the 31st March were over \$100,000.

HOOSAC TUNNEL .- This work the construction of which is in the hands of Mr. Walter Shanly, is advancing at the rate of 7 feet per day. The regularity of its advance is marked upon its roof by rows of drill holes, left at a gentle slant, forward and upward, by the pneumatic borers, one on each track. The engineer in charge says that he can keep six out of ten of his drills always going, while the other 4 are being mended or sharpened. The central shaft is down, and the sist and west headings just starting. The whole work will cost ten million dollars, and occupy four ears longer.

-Direct reports from Havana, up to April 9th, -Direct reports from Havana, of sugar, of ow an export of 53,000 boxes of sugar, of which 10,000 were for the United States. house stock, at Havana and Matanzas, 441;000 boxes and 21,000 hhds. The present crop is re-

TORONTO, FRIDAY, APRIL 29, 1870.

#### THE USURY FALLACY.

The very absurd position in which the bill regulating the rate of interest now stands will surely convince our legislators of the desirableness of avoiding any further tinkering on the subject. . It would, perhaps, be vain to attempt to convince those whose habits of thinking have been moulded on the idea that the rate of interest ought to be regulated by law, and with whom a certain religious element of opposition to usury adds force to previous prejudice ; but, surely, any one who will think for five minutes on the subject must see that the value of a loan of money is greater when money is scarce than when it is plentiful, and that the risk of loaning is greater to one man than to another, and should be charged for accordingly. These two elements enter into the consideration of every loan. It is not merely a question of supply and demand ; that is only half of it. The other half, and equally im-

lending to one man and to another. To say that the quantity of money and the demand for it is constantly changing, is only to express the general changeableness of human affairs ; and to say that some men are perfectly trustworthy, and that others are utterly dishonest, and that there is all manner of degrees between the two, is to express what is matter of universal experience. The money market is as changeable as the wheat market, and there are more varieties in the quality of loans than there are in the quality of grain. When, therefore, it is proposed to fix a uniform rate as the value of loans, we do somewhat wonder that the principle is not extended so as to include a uniform rate as the value of wheat-all qualities of wheat, of course, to be alike. The same reasons will apply in both cases. Does not wheat sometimes bring so high a price as to bear very hard upon the poor ? and are not farmers and speculators sometimes very hardhearted in refusing to sell except at prices which will cause that suffering. Would it not be well for the bulk of the people if flour could always be bought for \$4 per barrel ? Would it not be a great protection against the rapacity of greedy speculators to forbid wheat being sold at more than seventy-five cents per bushel? These surely are obvious considerations, and they all point to the desirableness of our legislators taking the matter in hand for the benefit of the poor and the weak. And, in fact, while they were about it, they might as well include meat as as bread, and enact a uniform rate of five cents per pound for fresh meat, and fifteen dollars per barrel for pork. And since clothand fuel are necessaries of life, and the poor find it very hard to get them at times, the act would of course include them, and fix a low tariff rate at which staple cottons and woollens should be sold, and also coal and firewood.

In the view of a benevolent legislator, in fact nothing would be forgotten, and a general tariff for everything might be framed for the purpose of ensuring cheap houses, cheap clothing, cheap food, cheap fuel, and even cheap travelling, and recreation. The business of buying and selling would then be delightfully simple. The unwary would be protexted from imposition; the rich would have no advantage over the poor ; there would be an end to that miserable bargaining which consumes so much time, and leads to so much heart-burning; buyers would have no need to study the weather, the crops, and the dealings of their neighbors ; and sellers would be saved all the anxiety of selling well, for all sellers and buyers, and all goods, would be placed on the same footing of perfect and

quite carried away with the delightful prospect. Persons of small and moderate income would almost think, with such legislation, that the millennium was at hand ; and sure we are, that any member of parliament who went to the country upon this platform, would be counted a hero. Some might think that human nature would be too strong for such legislation; but such people evidently knew little of the power of Parliament. Parliament can enact anything. Parliament is omnipotent. 'It can decree, if it so please, that the Falls of Niagara shall be abolished, after six months notice to that effect. And who is so bold as to say it would not come to pass?

Seriously, it is time this nonsense about fixing a uniform rate of interest was dropped. It is simply legislating that Niagara Falls shall be abolished, to enact that all distinctions between one time and another, and one security and another shall be done away with: and all loans, to whomsoever made, shall be at a uniform rate. To loan money, is, strictly speaking, to buy the right of receiving it back at a given period. Five people come to the office of a money-lender, all wanting to sell the obligation to pay a \$100 this time next year. No. 1 is plodding and cautious, strictly honorable, money-making and money-saving, never failed to pay to the day, his word as good as his bond ! He offers a security which can at once be made available on default. His obligation commands a high price-say 95 cents, for men like him are in request. No. 2 is the same style of man, but not so well known, besides, his security would take longer to realize, though the ultimate safety is undoubted. This would not fetch so high aprice as the other, it might go perhaps for 92. No. 3 is an honorable man, but somewhat speculative, consequently is at times "hard up," and not punctual; his friends, too, shake their heads now and then, when they hear of some particularly bold operation he is engaged in. The security is fair. This obligation is obviously more risky than the others, and would certainly not realize more than 90. No. 4 is industrious and painstaking, but sadly deficient in management. He cannot calculate, is always undertaking what he cannot perform, has had to get time from his creditors more than once, and once made a compromise. The security is very much like himself. There is a rapid descent from the value of the previous obligations to this, and if he sells his at 80, he will think himself very well off. Finally we come to No. 5, who is a mystery to everybody. How he got into trade at all no one can tell. He is so utterly unscrupulous in promising that people have long ceased to believe a word he portant, is the difference between the risk of constant uniformity. The mind, in fact, is says. He is familiar with all the rogueries

580

33-1y

and trickeries of his line of business, and has duped and decived everybody that has had to do with him. Still he maintains an air of the most virtuous nonchalance, and can go and offer his obligation, with as cool an air as if it was that of the richest merchant in town. When he walks into the office of the money-lender, he will probably tell him his note, secured as it is, is worth as much as that of either No. 1, 2 or 3. The money lender knows better-does not want to bid at all-but being pressed, and taking the security into consideration, may offer about 40, and under no amount of influence will give more than 50. If the bargain is concluded, he will put away that note with the security which he has bought at 50 per cent. discount, with far more misgiving than that of No. 1, which he has taken at 95.

Thus do the qualities and values of loans vary, even as the qualities and values of wheat, flour, and pork, and to attempt to legislate for uniformity against these obvious facts, is to legislate that water shall run up hill, or that Niagara Falls shall be abolished. The instances given are, of course, simply in illustration of the principle. The actual application of it in business is as various as the changing circumstances of life.

#### MONTREAL ASSURANCE COMPANY.

This company, which has had its day of trial, as most companies and individuals have, at some period of their career, may be said to have attained its full manhood, being thirty years organized. A very explicit statement of the investments is given in another column, which any one may check for themselves, and become satisfied of its correctness. It will be noticed that large amounts of the favorite bank and other stocks have been secured, giving a fine return on the money invested. The company may be recommended with the utmost confidence to merchants and others, requiring marine insurance, as thoroughly sound and reliable. With such a large accumulated fund, and small paid-in capital, it is but natural that the shares should command a very high premium.

#### CANCELLING BILL STAMPS.

A very important decision has been given in the Court of Common Pleas, on a point of considerable interest to the mercantile community, and which adds another illustration of the necessity of an exact compliance with the law in making a Bill of Exchange in any form, and the care which all parties to it should take to see that the document is strictly regular. It appears that the defendant, Hall, gave a promissory note for \$2,976.56, dated 1st January, 1868, to one Downs, who desirable that every possible protection should pect was a sound one. Now the disposition

was dishonored, and an action took place to precaution taken against the escape of a party, recover the amount. The case was tried at justly liable, from payment through a techthe Cayuga Assizes. It was pleaded, that the nicality. It is quite clear from the case above note was not sufficiently stamped, the only visible stamp, which was duly cancelled, being for 90c. instead of 96c. It was found, however, on removing this stamp, that under it were two others, one for 3c. and one 9c., which, though entirely hidden by the larger stamp, were left uncancelled. It was ruled, that under provisions of Stat. 29 Vic., ch. 4, sec. 3, this non-cancellation of the stamps for 3c. and 9c. rendered the note invalid and of no effect. Leave was given by the judge (Wilson) to move to enter a verdict for plaintiff, if the Court should be of opinion that he was entitled to recover. The case was argued before Judge Galt, who decided, that the statute makes no distinction between notes insufficiently stamped and notes without any stamp, and that as the statute declares, that the affixing of stamps, without cancellation, shall be of no avail; it is, in effect, saying that the non-cancellation shall be treated as if no stamps had been affixed. The plaintiff, therefore, loses, over \$3,000, simply for the lack of a mark upon two stamps, which would have cost not a second of time to affix. The presumption is, that he was ignorant of the law, and very naturally supposed, that having pasted the stamps one over the other, and defaced the uppermost, that the whole were cancelled. It is quite clear that there was no intention either to violate the law by affixing insufficient stamps or by the use of old ones, as might have been suspected from their being concealed. The judgment therefore bears very severely upon an innocent man, and marks strongly the breach which often exists between law and justice. The conduct of the maker of the note deserves the severest reprobation ; that a person in a position to give his note for so large a sum as \$2,900, should seek to evade payment of it on a mere technicality, is a grave scandal, and we trust he will purge himself from all suspicion of fraud by discharging the note or stating publicly on what ground such an obligation is unfulfilled.

This case strikingly illustrates the disadvantages of using adhesive stamps on bills. Had the note in question been drawn upon stamped paper, no such plea could have been set up, and it is a very common accident for some portion of the stamps on a bill to become loose and fall off, so that a suit for their recovery on non-payment could not be sustained. As the use of Bills of Exchange is of such enormous value in commerce, and as they are likely to become here, as in England, repentance ; but circumstances have proven a supplementary paper circulation, it is most that his view of the situation and the pros-

endorsed it to the plaintiff, Lowe. The note be given to the bond fide holder, and every named, that considerable danger arises from the stamps either being insufficient in value or incompletely defaced, and we hope that the use of stamped forms will become general, so as to obviate this risk, and give a more seemly and business-like appearance to our bills. In the meantime, business men will see how necessary it is to carefully affix and promptly deface the required stamps on all bills they make, and to see that the law is strictly complied with in regard to any which they receive. Justice Byles has declared, that whoever receives a bill, unduly stamped, loses all claim to remedy, as he is "a particeps criminis." We commend this dictum to the consideration of all who have any dealings with Bills of Exchange.

#### ONTARIO FIRE INSURACE COMPANY

Elsewhere we publish the second annual report of the Ontario Mutual Fire Insurance Company, the Head Office of which is in London, Ontario. We note a continued steady business; the average of the risks is very low, being only \$459 each. The Capital account stands at \$21,500. Losses have been few and small, a circumstance which is probably due to the exercise of great care on the part of the management. The company's affairs seem to be administered with prudence and remarkable economy.

#### PROGRESS OF TORONTO - NEW WHOLE. SALE WAREHOUSES.

There are numerous unmistakable evidences of rapid growth in the importing trade of Toronto, and of an equally rapid accumulation of wealth by those engaged in it. The first of these facts is apparent from the increased warehouse accommodation that most of the leading merchants have found to be a necessity of their business ; and the second is shown by the ability to expend the large sums that it takes to erect any one of the many first-class warehouses which have been built, or are now under construction by the leading firms. Any one who will take the trouble to walk along Front street will see that a change has been wrought such as the most imaginative would not have thought of five years ago. The opinion of some, at least, when Mr. John Macdonald erected his " dry goods palace," several years since, was that he had taken an extravagant step, for which he might have to climb the stool of

possible, outstrip Mr. Macdonald's, the belief being that the trade of Toronto is expanding with such rapidity that those who have the best facilities for doing business are likely to get the lion's share of it.

As an evidence of the progress being made, we shall refer to two or three large establishments which the builders are now working at, leaving out of the account those completed, and also those that are merely in prospect.

It is, perhaps, a little singular that a spot of ground which was utterly neglected two or three years ago should have come into such sudden demand ; we mean the lots on Front street from Yonge to the Queen's Hotel. This frontage, it now seems, is to be the site of the finest tier of warehouses west of Montreal.

At the corner of Front and Bay streets, Messrs. Gordon' & McKay are erecting a large brick block, 127 feet on Bay street by 110 feet on Front street, which is now under way, and is to be completed by the first of September next. It will embrace three warehouses, the one on the corner being reserved for their own accommodation; the others will be rented. The building will be of white brick, with cut-stone facings. It is designed in the Italian style of architecture, and with Mansard roof fronting on both streets. The height is five stories, including the basement, or about seventy feet from the level of the street to the top of the roof. All the windows have circular tops, with cutstone arches, and will be of plate glass. The ground floor is elevated five feet above Front street, giving a light, airy, and capacious basement. All the supports throughout the building are of iron ; the roof is of slates, in various colors, and surmounted with an ornamental wrought-iron railing, adding greatly to the effect. Messrs. Gordon & McKay's; store on the corner will have a frontage of 127 feet on Bay street and 42 feet on Front. giving them the use of five capacious floors. each the full size of the warehouse. The offices are in the rear, and front on Bay street, and are approached by a flight of steps six feet in height from the ground floor, forming an intersole between the ground floor and the first flat. Immediately under the offices is the packing room, 30 by 42 feet, under which again is the furnace room, for the accommodation of the heating apparatus. It is expected that steam will be employed as the heating agent. It will be seen from the above outline that Messrs. G. & M.'s warehouse will be one of the most commodious and perhaps the most stylish in Ontario. appearance, and must become a decided orna- abandon the idea for the present season.

is to erect structures that will rival, and, if ment to that part of the city. The 62 feet unoccupied by Messrs. G. & M. will be divided into two stores, each 31 by 90 feet. affording ample accommodation and a good site for the business of two other firms. The total cost of the structure may be set down at \$50,000.

> Mr. Thomas Lailey, a wholesale clothing house, has bought the lot and building immediately west of the Harbor Master's Office, and adjoining the large new warehouse of Messrs. Thomson & Burns. The frontage of the lot is 341 feet by 180 feet. The building on the premises, which was of white brick, and had been a wholesale store, is being used in the erection, on the same site, of a firstclass warehouse, extending 11 feet further towards the street ; also across a lane or gateway next to Messrs. Thomson & Burns, and 35 feet further in the rear, making in all a building 105 feet deep and the entire width of the lot. The height will be four stories. It will be divided into two stores. The front will be of red brick with stone and white brick facings ; the first two tiers of windows have circular tops. A Mansard roof will give the whole a stylish appearance. The work is now far advanced, and a few weeks should put Mr. Lailey in occupation of what will be elegant and altogether suitable premises for the conduct of his line of business. The total cost of the property is stated at \$15,000.

Mr. Myles is erecting, on a lot next to the new warehouse of Messrs. James Campbell & Son, on Front Street, a four story brick building, in size 200 feet by 70 feet. This structure is now in progress, and is to be ready by the 1st of August. It will be occupied by Messrs. Sessions, Turner & Co., manufacturers of boots and shoes, under an eight years' lease. The four immense flats will give accommodation for a most extensive manufacturing business, which we believe it is the intention of the firm to carry on in the premises. It is said that they will give employment to as many as six hundred hands. The style of the building is plain ; will be principally of red brick, but the front will be relieved with white brick and stone facings, making altogether a very good business-like appearance. Cost about twentythousand dollars.

We ought to mention that Messrs. Mcaster & Bros. contemplated an extension of their premises from the rear of the preent warehouse, behind the Bank of Monfreal, through to Front street, thus occupying a lot, purchased at a cost of \$16,000 but unavoidable delays in the negotiations The whole building will have an imposing have compelled the firm quite recently to

#### TORONTO CAR WHEEL COMPANY.

A company has been formed, under a Royal Charter, for the manufacture of car wheels and railway machinery, in Toronto. The organization was completed at a meeting of the shareholders a few days since. Mr. G. D. Ferguson, of Fergus, was elected President; and Mr. J. B. Cook, of Toronto, Vice-Presi-We understand that arrangements dent. have been completed for the immediate com-Mr. Gartshore, mencement of business. well-known in connection with his Dundas foundry, has taken the management of the company's works. The Directors have purchased the works of J. & N. C. Scoville, on the Esplanade, and are prepared to execute orders. We believe that arrangements have already been made with the Grand Trunk, the Northern, and Great Western Railways, to supply car wheels to these companies. We hope this enterprise will receive due encouragement and prove a complete success,

#### SUN INSURANCE COMPANY.

An Act (28 Vic., cap. 43) incorporating the "Sun Insurance Company of Montreal" has been extended by the House of Commons this session. The authorized capital is \$1,000,000, with power to increase in sums of not less than a million dellars to \$4,000,000. Power is given to transact the business of life and accident insurance, to sell and purchase annuities, to grant endowments, to receive investments of money, for accumulation, and generally to transact the business usually entered into by life or accident insurance companies; also, to do fire, marine and guarantee insurance. The capital shall be applied solely to the life branch, the business being divided into a "life branch" and a "general branch," the accounts of which are to be kept separate, and the failure of one branch not to work a suspension of the other. Directors may be elected so soon as five thousand shares have been subscribed and \$50,000 paid in, and life and accident business commenced. The business of the "general branch," may be undertaken on the subscription of another five thousand shares, and the payment of a further \$50,000. The company shall not hold real estate for the conduct of its business to a value exceeding \$30,000. The Provisional Directors are :- Geo. Stephen, Geo. Winks, Thos. Gordon, H. Mullholland, J. H. Frothingham, A. W. Ogilvie, A. F. Gault, Jas. Hutton, and M. H. Gault. A wide field of operations is given the company by the act; we shall see what use they will make of the powers granted.

-Sir Francis Hincks has introduced a bill providing for the transfer to the Government of the powers now vested in the Trustees of the Bank of Upper Canada.

-One or two communications, also our Petrolia letter, have been crowded out.

#### PORK PACKING IN 1869-70.

#### REVIEW OF THE SEASON'S OPERATIONS.

The steadily increasing importance of the packing trade in Ontario, renders this branch worthy of prominent notice.

Various circumstances thus far have tended to make this season very unsatisfactory to the majority of our packers. The extreme price of 67s. for bacon in England and \$29 for mess pork in Chicago, made our market for dressed hogs open in the month of October at the very high figure of \$9 25. Working by faith, and almost against conviction, many of the leading houses commenced operations, and continued steadily on, despite the frequent fluctuations. Taken from November 1st to March 1st, the market declined from \$93. its highest point, to \$71, its lowest.

We had the usual number of short-crop theorists, but the total would seem to indicate a larger crop than any previous year. This is no doubt attributable to the heavy crop of coarse grains, together with the increasing value of hog products which induced farmers to feed more freely. A noticeable feature has been the improvement in quality and weight, as compared with previous years. The farmers are now thoroughly aroused to the fact that hog-raising is a profitable branch and we look for increased supplies each succeeding vear.

The establishment of Ice Curing Houses introduces a new feature into the trade, and one that is likely to have beneficial effects, as it gives the farmer a market through the whole year.

The quantity of Mess Pork manufactured this year has been unusually large, owing to the abundance of heavy hogs. At one time it almost seemed as if this article would become a drug, but fortunately the requirements of the government have absorbed a great deal, so that, as it turns out, the balance will net the holders considerable profit. The lowest price at which sales were made, was \$22 50 ; the highest to date, \$25. Extra Prime has fallen somewhat into disfavor both with consumers and packers, and consequently little has been put up. The profit on shoulders, boxed or loose, has far exceeded that which has been packed in barrels as extra prime. It is only a few years since this quality was first introduced into Canada, and it seems already to be falling into disfavor. The price of extra prime has ranged from \$22, the highest point reached, down to \$18. Prime Mess-A fair business has been done by a few houses, and we learn that Canada manufactured is taking high rank in London, (England.) We quote no price, as only very few sales have been made for ship's use in in Montreal and Quebec. Bacon-Cumberland cut is still the leading article in the trade, it being believed that fully one-third of the hog product taken in this market is put up in that shape.

The constantly unexpected recessons of the Liverpool market made English buyers chary about investing, but still several large orders were placed. The lowest price was 10c. the highest 11c. At neither of these figures did it show much profit to either buyer or seller.

Lard, sympathizing with butter, has ruled high throughout the season. The opening price was 13c, afterwards advancing to 141c, then a steady decline to its present value, about 121c. The bulk has been run into pails or tennets. The quality has been, as a rule, most excellent, the quantity of stearine being unusually large.

By the kindness of the Manager of the B. & O. R. R. and O. & St. L. R. we have been furnished with figures that enable us to form some estimate of the mess pork consumed in the Ottawa Valley. From the 1st October to the 15th March, these two railways forwarded 13,500 bbls. If to this we add, what probably finds its way there during the summer months, we have the respectable number of 16 or 17,000 brls. for the season, A good share of this is imported from Chicago. After consultation with consumers it is fair to estimate the total consumption of the Province at 21,000 bbls. At our present rate of progression we may reasonably hope, in the course of a few years, to become independent of Chicago for our supplies.

Messes. Davison, Scott & Co., a new Toronto provision firm, we deduce the following interesting totals of the trade throughout Ontario:

Total number of hogs packed in Ont.,

in 1869–70	125,000
Estimated total weight, lbs	25,000,000
Average weight of hogs, Ibs	198
Total cost of crop to packers	\$2,250,000

STATE AID TO RAILWAYS .- Railroad building is very active on the other side of the lakes. This is partly in consequence of the liberal aid these enterprises are receiving from the public. At one sitting of the Albany legislature, the 11th April, five railway bills were passed to a third reading. Among these five roads about one million dollars of public money are to be distributed. Bills were previously sanctioned, giving sums footing up to about \$5,000,000. One railway has had its bonds exemped from taxation so long as they are held in the counties where the road is. The sum of half a million has been appropriated for tunnelling the Catskill Mountains. Besides all this, a general railroad bill has been passed to a third reading, granting \$5,000 per mile to railroads in every part of New York State where there are not other roads running parallel within five miles of their route. The expenditure of moderate sums of public money for the encouragement of productive works that open up the country, and stimulate industry, is undoubtedly a wise policy; such expenditures, wisely made, usually repay themselves directly and indirectly many times over.

HAMILTON WAREHOUSING COMPANY .- A meeting was held, recently in Hamilton, with reference to the organization of a Company with the above name. The following gentlemen were appointed to draft a prospectus for the Hamilton Warehousing Company-capital \$10,000, and to procure subscriptions of stock ; and that as soon as \$5,000 of stock had been subscribed, to call a meeting of the shareholders for the appointment of Provisional Directors and other matters.

#### BUSINESS MATTERS IN MONTREAL

#### (From our own Correspondent.) MONTREAL, April 25th, 1870.

At this time in 1869 we had a foot of snot cabs and street cars on runners, and were just viz., from the middle of November till the middle of April. Then came the inundation. This year we have escaped a flood : and to rion. emerging from five months of constant sleigh we have escaped a flood; and to give you an idea of the weather now, I may tell you that on Good Friday, or the day before, butchers' and bakers' men were loading carts and drays and waggons at the level of the street with blocks of ice, floated up by the high water to so convenient a height ; while, on the Sunday, a restless crowd of newsboys were refreshing themselves with ice-cream at a penny per egg-cup-full, at the cart of the vendor, near the Post\*office corner. "So Winter linger'd in the lap of Spring." Other anachronism#strike one, too; for instance, that we should have our double-sashes up, as most of us have, while a fleet of twenty-five sail—several ocean vessels among them-came majestically up the river. have no record of so early an arrival from sea as that of the *Melpomene*, Capt. Ruthen, from Bar-celona March 5th, in ballast, which reached Quepipes. From figures which have been collected by land. In 1831 or '32 a vessel arrived in Quebec on April 16th, one day later than the above, but from then till now we have had no such early arrivals. Fifteen vessels left Marseilles, Shields, and Liverpool for Montreal, and we may soon ex-

peet to see a busy harbor. The beautiful iron clipper Abeona, of growing fame, belonging to Allan's line, was the first ves-sel to reach Montreal this spring, beating the Gleniffer, the leader of last spring's fleet. She will shortly be discharged and loaded outwards, She and it is confidently expected that she will make four round trips this season, as one or two others did in 1869. What an improvement upon the did in 1869. What an improvement upon the movements of the ponderous, bluff, and leisurely wooden packets of twenty years ago, which would arrive here about the beginning of June, and after reaching home, strike top-masts, and go into "summer quarters" for a rest, before attempting the remarkable feat of two round trips a year. Then, ten years ago, or thereabout, the Shandon, and her sister ship the Rosenanth, astonished the goers down to the sea in ships by making three round trips in the season ; and the former vessel was first in port for eight or nine ons in succession.

The numerous lines of Atlantic steamers expect an enormous emigration from all parts of Europe this summer, and are making preparations accord-ingly. The Guion Line are adding two steamers; ingly. The Guion Line are adding two steamers; the National Line from Copenhagen, four ; the Inman and Cunard Lines are enlarging some of their boats ; and the Allan Line, which is behind none, have lately launched the "Scandinavian," and are increasing their already large and admir-able fleet. Out of all this anticipated stream of human life and energy, it is to be hoped that we will secure a good share, and that we may so settle our Red River troubles, that no political obstacle may prevent the rapid settlement of the rich prairie lands of our "fertile belt."

A distinguished writer who journeyed years ago across the North West Territory, says, "What Canada wants is prairie land, and this is supplied by the broad expanse of territory which stretches from the Red River to the Rocky Mountains. Let Canada get possession of this land, then light taxation will give her a decided advantage over the United States, whose wonderful western territories are no whit more fertile than ours."

Our shippers are looking forward to an unusually brisk time in the coming summer. Arrange-ments have been made whereby the staunch and fast little propellors of the Northern Transporta-tion Co. will form a line between Chicago and Montreal for the carriage of grain down and mer-

chandize back. Immediately upon the opening of the canals Norris & Neelons' and H. W. Ireland's boats will leave, well freighted with goods for western ports, say the 3rd or 5th of Mays About the same date the passenger steamers will resume their trips, some of them sheathed with wood, to prevent a repetition of such disasters as that to the "Grecian," and all in the trim and comfortable order, so grateful to any who have water travelling to do. The Gulf Port S. S. Co. have the "Secret," the "Gaspe," and the "City have the "Secret," the "Gaspe, and the "City of Quebee" in apple-pie order for their usual line from Quebec to Picton. There is another line, consisting of the steam screws "Flamboro," "Ouse" and "Bolivar," to ply direct between Montreal and Gulf Ports, Charlottetown and Pictou, so that we shall have no lack of commu-cienting with a start have no lack of communication with our maritime friends.

Some of the discrepancies and objectionable features of our new and unpopular tariff, were very clearly put before the Quebee Board of Trade, y their president, the other day. For instance, French, Spanish and Portuguese salt, which is ladly needed by our packers here, is subjected now to a duty of 100 per cent. This, he claims, will destroy our salt trade with France, as it is will destroy our sait trade with France, as it is the only article French loading ships can bring out thence as ballast. The destruction or Jessen-ing of incoming freights, he contends, means in-creased outward freights; for vessels which can cet no in freight or profitable but get no in-freight, or no profitable ballast even, must, of course, charge heavier rates outward. Then he points out that the duty imposed upon Scotch coal amounts to about 30 percent, of its cost, while it is but half that rate as American, for the latter costs \$3.50 per ton against \$1.75 for the former-the specific duty being the same as both; and the duty of 15% per cent. on dry goods I ackages is decried here as a nuisance and a manifest discrepancy: the most unworthy of expedients to obtain a revenue.

## THE EQUITY OF INSURANCE.

#### The Editor of the Monetary Times.

SIR, -Will you permit me to trespass upon your space with a few observations on the difficulties, which, in event of loss, and for want of a proper foresight and discretion, often arise between insurer and insured.

I am not by any means an advocate of a hasty settlement of insurance losses. I believe that the practice too often pursued by some offices hitherto, of paying claims made upon them before the ashes were cold, has been prolific of evil results, and in many cases a direct incentive to crime. It is an indisputable right of the insurerthat he should be made thoroughly acquainted with all the circumstances connected with a loss, and, as far as possible be satisfied that the claim made upon him is legitimate ; and the ignorance or cupidity of agents or others should not be permitted to interpose between him and his right to demand the fulfilment of the assured's part of the contract. I have no sympathy with the reprehensible practice of paying losses for effect, i.e., to build up a business, or to subserve the interests of agents, who, in their anxiety to secure large commissions, are seldom as careful as they would be in their enquiries into the character and extent of losses, were self-interest not a subject of primary consideration.

In estimating rates for insurance, good faith is the basis of the proposed contract ; over-valuation, misrepresentation and other dishonest means by which many have sought to enrich or relieve themselves from embarrassment, are not calculated on. When, therefore, to the ordinary has to be added the moral hazard, it will be seen that the chances are altogether against the insurer ; on the

ance companies have no right to be rigidly exact-Very many who take out a policy of insur-hardly ever trouble themselves to read the ing. an conditions and stipulations attached thereto, and some, if they did, would perhaps hardly compre-head them. If then, there has been no wilful hend them. violation of such stipulations, the assured may depend upon a very favorable legal interpretation.

The business of insurance is, as I think will be conceded, now looked on more as an ordinary commercial transaction than it was in years bygone, a fact of which many engaged therein seem se sight, judging from the course adopted when losses occur ; time and again has the writer listened to animadversions on this point, of no complimentary character to insurance companies from some of our ablest judges on the bench, when attempting to escape from liability through some technical loophole of the nature to which I refer. Allow me to illustrate: A country merchant effects insurance on his stock for a specified amount, which is accepted and for which a policy is granted. In course of time a fire occurs, the company is notified of the loss, and forthwith, an inspector or other official is on the spot to investigate the same ; now it is a well known fact that a large majority of our country merchants know little or nothing of the science of book-keepingin its various branches as practised by those thoroughly conversant with mercantile pursuits. The idea of double entry, or of an invoice or ac count sales book never enters their heads, they seldom take stock or have any satisfactory data which, in event of loss, they can substantiate their claim for indemnification. Hence, possibly, arises a tedious and vexatious law-suit, or the sufferer by fire is compelled to accept less than what he believes himself to be entitled to. to obtain a settlement. Who then, I would ask, is most to blame in such a case? I contend it is the insurer. He knows what proofs he will require in event of loss, and in assuming the risk, he bught to see that such books are kept and such inventories of stock regularly made as will secure for all parties, a prompt and satisfactory adjustment of a claim, should it happen to arise. Again, cases have not unfrequently come under my notice where no such difficulty has presented itself, where the assured's loss was far in excess of his insurance, and the justness of his claim has been established beyond a doubt, yet he has been worried by requests for proof of loss and owner-ship, and other little matters of detail stipulated for in the policy, which could serve no purpose, beyond gratifying some officious individual, anxious to make a display of his ability, and of his tact in raising objections and which were moreover beneath the dignity of a respectable company to demand.

I regard insurance as a merchantable commodity, a security against loss sold for a consideration, and if, by misfortune and without fraud I sustain loss by any of the perils insured against. I have a right to fair and honorable treatment at the hands of my insurer, instead of being looked on with suspicion and as claiming that to which I have no right.

#### Truly yours,

NEMO.

### Toronto, April 27, 1870.

THE NATIONAL LIFE INSURANCE COMPANY OF THE UNITED STATES, passed during the last week a noticeable milestone in its growth and progress. In the short space of twenty months since its organization, it has issued 10,000 policies, with an insurance of \$25,337,369. Such success is a far more unqualified and emphatic endorsement of this Company by the public than has ever been awarded in this country or abroad to new organization. The policy numbered 10,anv chances are altogether against the insurer; on the other hand, so long as good faith has been observ-ed, even supposing that all the conditions in the policy have not been strictly adhered to, insur-wisdom to patronizo it. — Insurance Jour.

#### Insurance.

FIRE RECORD.-East Oxford Township, April -Barn of Geo. Lindley with two horses were burned; also a barn belonging to Mr. Hyde, near Eastwood.

Greenock Township, April 7th .- The barn of

Jas. Martin with contents, no insurance. Middleton, N.S.—April.—The dwelling house, store, and outbuildings of Nelson Pierce, Middle-ton, Annapolis County, were destroyed by fire. It is said the buildings were worth about \$14,000, of which \$1,000 was insured.

In reference to the late fire in Peterboro' which originated in the premises of Dr. McCulloch a correspondence sends us the following:-This gentleman's property has been peculiarly liable to fire during the last few years. He resided at Enniskillen, County of Lambton, before the American war. While there he had reason to claim compensation from the " Provincial," for a fire loss, which being paid, it was not a very long time before he required indemnity for a second loss from the same company. Subsequently he re-ceived payment of a loss, from the "Western." A fourth time his enemy brought him with a small account of \$1,400 to the British America, but the claim being resisted, a law-suit was the result. On the case being called, and the jury sworn, the Doctor offered to take \$400 in full, of his claim and pay his own costs; the compromise was agreed Dr. McCulloch has not been long in Peterto. boro' but his old enemy fire, seems to have at-tacked him again. I think it but right to give these facts as they may be of some interest. surance companies have been a great boon to this unfortunate (?) medico.

#### ONTARIO MUTUAL FIRE INSURANCE COMPANY.

The annual meeting of this company was held in London, Ont., on the 14th ult., the following Report was presented.

In meeting the members at this the Second Annual Meeting, the Directors feel that they can again congratulate you at the continued success which has attended the Company. The cash account and statements, annexed, will show, first: that the expenses have been kept at the lowest possible figure, consistent with a strict supervision of the business of the Company, while a steady progress has been made; and the small amount of losses clearly shows that the Directors have kept to their first determination of insuring non-haz ardous property only.

Since our last annual meeting, applications for Insurance have been received at this office, to the ... 1,136

number of.... Of this number the Directors rejected, on account of being hazardous or from

other causes.....

34

1102

Leaving yet to issue for the year. .... 100 

1.102

The total number of policies issued by the Company, are 2,028, of which 86 have been can-celled, leaving 1,942 in force, at the beginning of the month; insuring \$871,805, and averaging \$459 each. The capital account as detailed, shows \$21,514.85 available; an amount ample to reinsure is deemed necessary. The Directors, how-ever, feel convinced that only a portion of the amount available will be necessary; proving that a saving can, and has been made, by insuring on the Mutual principle, and establishing the idea

entertained at the inception of the Company. During the year, a Mutual Insurance Convention was held, at which the Company was repre-sented. The object was to assimilate and simplify the Acts on the statute book. A Bill was pre-pared and came before the Ontario Legislature at the last session, but from some cause was not

meeting of Parliament.

At the solicitation of members of the Company your Directors have made a Tariff for Rural risks. and also availed themselves of the general insur-ance act, by issuing one year policies on the cash system. A few risks have been taken on each of these principles, although entered upon only a few weeks ago. The Directors regret to have to allude to the neglect of members in not paying up their due bills and assessments. In many cases the Secretary has sent three notices.

A resolution was put on the miuute book some months ago, authorizing the Secretary to sue defaulters. He has refrained from doing so, in hope that payments would be made without the expense of Court being added. The continued complaint of non-receipt of policies cannot be accounted for. They are all regularly posted, but yet got astray. All that can be done by the Company to rectify this, is to issue duplicates when notified of their non-arrival. Three claims for losses have been sent in since the books closed. One has been paid; one is under consideration; one not yet reported upon.

Your Directors, in resigning office to their successors, feel satisfied that the operation of the Company since its formation, has been quite as successful as could have been anticipated; and that by economical management in the future, by zeal and energy on the part of Agents, and care in passing risks offered, the members may confidently expect a successful future.

A list of fire losses shows the number to have been seven, and the amount, \$1,332.50.

James Johnson, Sec. & Tres.; Saml. McBride, President. Examined and compared with the books and vouchers, and found correct. Wm.

McBride, T. R. Westcott, Arditors. After the report and statements had been read,

and the President had stated he would be glad to answer any questions, and to explain further if required, Mr. Pope asked if more than one assess- | point at 14%c.

passed, but no doubt will become law at the next ment had been called for on any Premium Note ? The President replied no; they had not called for more than one Assessment on any Policy, and hoped not to require to do so; thus saving to members the expense of more than one collection in the term of 3 years. Mr. William Pope then moved the adoption of the report, which was seconded by Mr. A. S. Emery, and carried unanimously.

On motion, Messrs, N. English, F. St. George Thomson, and J. Mahon, were appointed scrutineers, and the election of directors was proceeded with. Mr. D. C. McDonald moved. seconded by Mr. John Peters, that a vote of thanks be tendered the retiring directors for their past services. Mr. McDonald complimented the directors on the very sound state of the company's business, and the caution displayed by them in effecting risks. The motion was carried un-animously, and the president replied, and stated he was glad the directors had so acted as to secure the approval of such an experienced and success-ful insurance man as Mr. McDonald.

Votes of thanks were also passed to Messrs. James Johnson, Secretary, and E. Teale, the general agent of the company, and acknowledged The following motion was then subby them. mitted: That it is the opinion of this meeting that the company should apply at the next session of the Provincial Legislature for a special act to ameliorate certain difficulties which the company is laboring under, and against which the general insurance act does not provide.-Carried.

The scrutineers reported the following directors elected : Messrs. S. McBride, J. McBeth, J. Brown (city chamberlain), C. F. Goodhue, W. Starr, A. S. Emery, S. Peters, T. N. Greene and J. Peters. The meeting then adjourned.

Election of Officers .- At/a subsequent meeting of the Board of Directors, the following officers were elected : President-Ald. S. McBride ; Vice-President-John Brown (city chamberlain).

Commercial.

#### Toronto Market.

Navigation is now fairly open, and the season promises well.

DRY GOODS .- Business was a great deal more active this than last week, and sales continue good though the rush of the season is over. The demand has run very evenly on all kinds of goods, so that the assortment is not at all broken. Stocks are being replenished by the weekly steamers, orders constantly going forward in \$5,287 06 anticipation of the demand which so far has exceeded the expectations entertained at the opening of the season. In straw goods, hats and caps, &c., a good trade is reported and payments pretty satisfactory.

> PRODUCE.-The market seems to have received some stimulus by the opening of navigation. good business has been done in wheat, a cargo of 15,000 bush., midge proof, sold at 92c in store; cars of spring sold at 86c. to 89c. and fall at as high as 96c. Barley has been decidedly active; high as 96c. 2,500 bush. changed hands at 54c.; 8 cars at 53c.; 6 cars at 55c; 4 cars at 59c, f.o.b.; 3,000 bush, at 53c. and 1,200 bush. at 55c. Peas-more active, 1,000 bush. choice sold at 65c.; ordinary in ear loads sold at 60c. to 62c. f.o.b. Oats.-Sales of dar loads at 34c. to 36c. Rye-nominal at 56c. to 57c.

> FLOUR-Is firm and tending upwards; No. 1 super. sold from \$3.874 to \$3.93, and spring wheat, extra, at \$3.95 to \$4.00; nothing doing in other grades.

PROVISIONS .- Butter-Store is very dull and fair, ordinary is not saleable over 121c, choice scarce. Pork-A lot of 100 lbs. mess sold at \$24.50, held at \$25.00. Bacon-A large lot of hams and bacon sold at 10ge, and another lot at 11c. Cheese-A sale of 100 boxes at an outside

LEATHER.-Business is active with a good demand for all descriptions of stock, at our quotations

HIDES AND SKINS .- There is very little enquiry, and the market is quiet without any accumulation of stock.

GROCERIES. -Sugars are steady at our quotations which are the lowest wholesale prices. Advices from New York report the arrival of a large fleet of sugar laden vessels, which caused the previously brisk demand to fall off, and the market to close heavy.

LUMBER. -The lumber trade of this season may be said to be fairly commenced. Logging is all over, and the woods entirely clear of snow. The most of the mills are cutting, and those who manufactured during winter, are now shipping the lumber to the other side, of which two million feet have left Toronio for Oswego and other American ports during the last two weeks. The prices as yet remain unaltered, and will probably be so for the next month. The docks at Albany and Troy are flooded, owing to a very heavy freshet there, and will consequently not be able to receive consignments at those places for some time. Prices same as last week.

FREIGHTS .- Three charters to Kingston are reported, peas paying 2c. and wheat 24c.; barley to Oswego pays 24c. to 3c.; to Chicago 4c. U. S. cur.; 2 cargoes of pig iron to Cleveland pay \$1.00 gold per ton. The Grand Trunk through rates to per ton. The Grand Trunk through rates to Liverpool or Glasgow, are: Butter per gross ton 70s; cheese per do. 70s; lard per do. 70s; bacon and hams per do. 65s; beef per tierce, 13s; pork per brl., 9s. 6d, flour per brl., 5s. 6d; grain, 10s. 6d per quarter. Grain taken only in ships' bags. The following are the spring rates of the Grand Trunk Railway: to Halifax 95c. for flour and 48c. for grain; to St. John 90c. flour, 45c. grain. The rates to railway stations are. Flour to Kingston. rates to railway stations are-Flour to Kingston, 25c.; grain, 13c.; flour to Prescott, 30c.; grain, 15c.; flour to Montreal, 35c.; grain, 18c.; flour to St. John, Quebec, 45c.; grain, 23c.; flour to Point Levi, 55c., grain, 28c.; flour to Portland, 75c., grain, 38c.; flour to New York 75c.; grain 38c.; flour to Boston 80c., grain 40c. gold.

The total stock of raw cotton in sight, in Europe, in the United States, and afloat, from India, was, on the 16th April, 1,550,576 bales, against 1,349,670 bales at same date last year.

-It is thought that vessels drawing twelve feet of water may get through the Sault St. Marie canal during this season, it having been deepened

The Scottish Provincial Assurance Company,

A. DAVIDSON PARKER, Manager,

#### Benefit of Life Assurance.

IN illustration of the benefits which have accrued to par-ticipating Policies of Life Assurance, the following ex-amples may be quoted, taken from the books of the Cana-dian Branch of the Scottish Provincial Assurance Com-

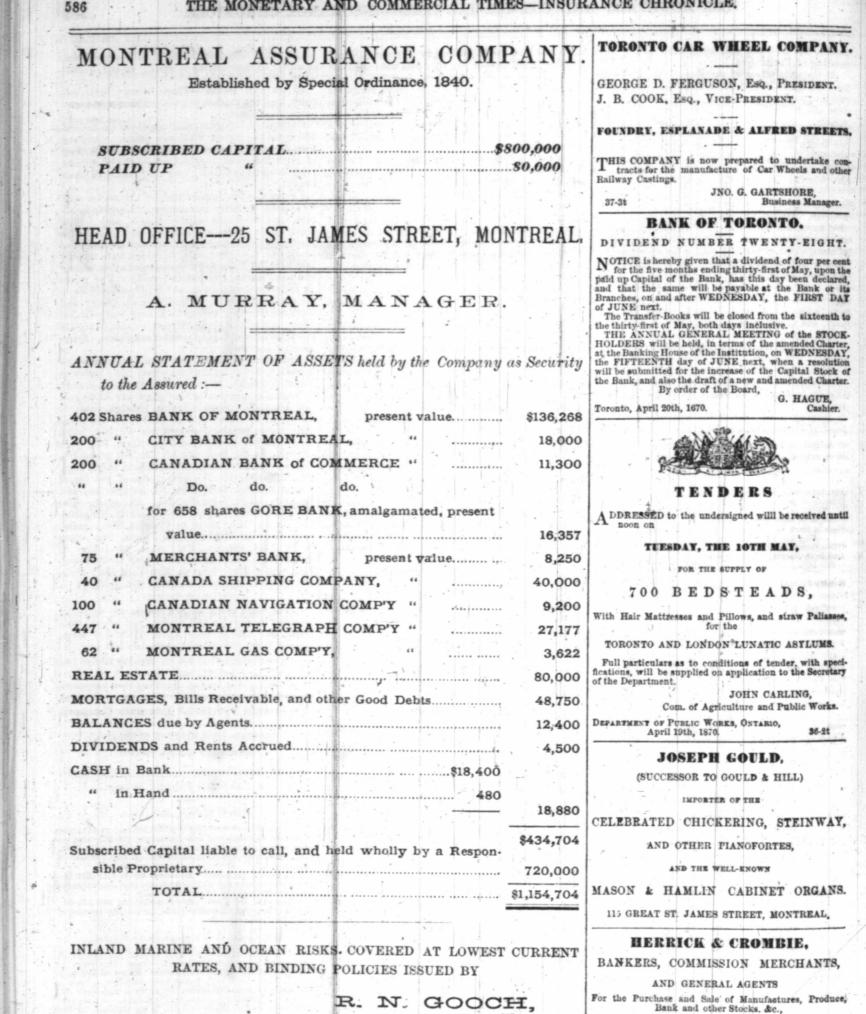

Policy 5313, for £1000. Additions amount to £82 104 Policy 5313, for £1000. Additions amount to £82 10s Total premiums paid, £112—the bonus thus amounting to seventy-five per cent. of premiums paid. Policy 4236, for £500. Bonus additions, £61 17s. 6d. or nearly seventy per cent. of £91 2s. 6d., the amount of premiums paid.

#### REGULATION AS TO SURRENDER OF POLICIES

For surrender of Policies for the term of life, effected at For surrender of Policies for the term of life, effected at uniform premiums, and which have been three years in force, a return of 40 per cent. on the amount of ordinary premiums received, will, at any time, be allowed, besides the value of vested Bonuses, where such have been de-clared. An objection, often urged against Life Assurance, that there is no certainty of value being obtained, in the event of surrender, is completely obviated.

Intercolonial Railway

THE Commissioners appointed to construct the Intercolonial Railway give Public Notice that having annulled the Contracts for Sections Nos. 5, 6 and 7, they are prepared to receive Tenders for re-letting the same.

Section No. 5 is in the Province of Quebec, and extends from the Easterly end of Section No. 2, forty miles east of Riviere du Loup, to the Sixty-sixth mile post, near Rimouski, a distance of about 26 miles.

Section No. 6 is in the Province of New Brunswick, and extends from the Easterly end of Section No. 3, opposite Dalhousie, to the west-side of the main Post Road, near the forty-eighth mile post, Easterly from Jacquet River, a distance of about 21 miles.

Section No 7 is in the Province of Nova Scotia, and extends from the Southerly end of Section No. 4, near River Philip, to Station O. (formerly Station Fifty,) at Folly Lake, a distance of about 24 miles.

The Contracts for the above Sections to be completely finished and ready for laying the track by the 1st of July, 1871

The Commissioners also give public notice, that they are prepared to receive Tenders for four further sections of the line.

Section No. 17, will be in the Province of Quebec, and will extend from the Easterly end of Section No. 14, down the Matapedia Valley, to Station No. 685, about one mile above the boundary line between the Counties of Rimouski and Bonaventure, a distance of about 20 miles.

Section No. 18, will be in the Province of Quebec, and will extend from the Easterly end of Section No. 17, down the Matapedia Valley to Station No. 380, near Clark's Brook, a distance of about 20 miles.

Section No. 19, will extend from the Easterly end of Section No. 18, in the Province of Quebec, down the Matapedia Valley to its mouth, and thence across the River Restigouche to Station No. 370, at the Westerly end of Section No. 3, in the Province of New Brunswick, a distance of about 91 miles, including the bridge over the River Restigouche.

Section No. 20, will be in the Province of New Brunswick, and will extend from the Easterly end of Section No. 10, in the Town of Newcastle, on the Chaplin Island road, thence crossing the North-west and South-west branches of the River Miramichi, and terminating at Station No. 320, about one mile and three quarters South of the South-west branch, a distance of about six miles, ineluding the bridges over the branches of the River Miramichi.

The Contracts for Sections Nos. 17, 18, 19 and 20, to be completely finished and ready for laying the track by the first day of July, 1872.

Plans and Profiles, with Specifications and terms of conract for Section No. 7, will be exhibited at the office of the Chief Engineer in Ottawa, and at the offices of the Commissioners in Toronto, Quebec, Rimouski, Dalhousie, Neweastle, St. John and Halifax, on and after Monday, the 11th day of April next; for Sections Nos. 5 and 6 at the same offices, on and after Wednesday, the 20th April next, and and for Sections Nos. 17, 18, 19 and 20, at the same offices on and after Tuesday, the 10th day of May next.

Sealed tenders for Sections 5, 6 and 7 addressed to the Commissioners of the Intercolonial Railway, and marked "Tenders," will be received at their office in Ottaws, up to 7 o'clock p. m., on Saturday the 7th day of May next; and for Sections Nos. 17, 18, 19 and 20, up to 7 o'clock p. m., on Wednesday the 25th day of May next.

Sureties for the completion of the contract will be required to sign the Tender.

#### Insurance.

#### THE CONNECTICUT

Mutual Life Insurance Company,

OF HARTFORD, CONNECTICUT.

Assets	27,566,479	26
	9,671,875	
fotal Death Claims paid to date	8,978,751 9,566,987	
fotal Surplus Premiun's returned to the	1	

Assured, to date ..... 6,785,680 00

DIVIDEND PAYABLE IN 1870, \$2,300,000 !

TOTAL AMOUNT INSURED, OVER \$177,000,000 11

This Company is PURELY MUTUAL, there being no Stockholders to absorb any portion of its funds, its surplus belonging wholly to its members, and being equitably ap-portioned among them in annual dividends or returns of surplus premiums. In comparison with other American Life Companies, the CONNECTICUT MUTUAL has conducted its business at a lower average rate of expenses; its claims by death have averaged less, in proportion, than those of any other Com-pany having a sufficient extent of business to test the law of mortality; and

pany naving a summer extent of business to test the law of mortality; and Its Assets have been uniformly invested at a net rate of interest exceeding that realized by any similar institution. The necessary result of this economy in management, careful selection of lives, and highly productive invest-ments, has been that the CONNECTICUT MUTUAL has afforded insurance to its members at a LESS AVERAGE COST, then only other Component

than any other Company. Ratio of Expenses of Management to Total Receipts 1899, 8.89 per cent.

1869, 8.89 per cent. Its investments are scurely and profitably made, and contain no Commuted Commissions, Fancy Stocks, Personal Securities, nor any imaginary or Unrealized Assets. Beyond doubt, the CONNECTICUT MUTUAL is the Strongest Life Insurance Company in the world: its ratio of Assets to Liabilities, as measured by the New York Legal Standard, is \$155.50 per \$100; and it grants all de-sirable forms of Iusurance upon Strictly Equitable Terms, and at the CHEAPEST ATTAINABLE RATES OF COST.

Z.	PRESTON,	W.	S.	OLMSTED,
	Vice-President,			Secretary.

EDWIN W. BRYANT, Actuary.
