SWEET REMEMBRANCES

ET Fate do her worst; there are relics of joy, Bright dreams of the past, which she cannot destroy :

Which come in the night-time of sorrow and care. And bring back the features that joy used

to wear : Long, long be my heart with such mem-

ories filled; Like the vase in which roses have once been distilled.

You may break, you may shatter the vase, if you will, round it still.

THOMAS MOORE

AT SIXTY-TWO

UST sixty-two? Then train thy light, And get thy jewels all reset; 'Tis past meridian, but still bright, And lacks some hours of sunset yet. At sixty-two-

Be strong and true, Scour off thy rust and shine anew.

Tis yet high day, thy staff resume, And fight fresh battles for the truth; For what is age but youth's full bloom, A riper, more transcendent youth. A wedge of gold

Is never old; Streams broader grow as downward rolled.

At sixty-two life is begun, At seventy-three begin once more: Fly swiftly as you near the sun, And brighter shine at eighty one. At ninety-five

Should you arrive, Still wait on God, and work, and thrive.

Keep thy locks wet with morning dew, And freely let thy graces flow; For life well spent is ever new, And years anointed younger grow So work away,

Be young for aye, From sunset, breaking unto day, Anonymous

PEAKIN' aboot dogs as mascots," said the Corporal-drummer, "we had a fair clinker in oor battalion at hame. She belongit till the Sairgeant-Major. A great big brute she wis, mair like a Shetland pony than a dog, wi' as muckle illnatur' and pride tae the square inch as a Prooshian Junk. But for a' that she was a bonny beast an' wis a fair ornament tae the rigiment, especially on Church parades, which, bein' a female, she attendit wi' the utmost regularity.

"Noo Maggie-that's the dog-had peculwere richt as rain; even if ye wore troosers ye wad pass as long as ye had on the glengairry. But Heaven help ye if ye wore a flat kep; ye were fair fur it.

At this time we had an auld Brigadier, a terrible haun' fur stalkin' roon' aboot the camp efter lichts oot, seekin' whit he micht devoor. Oor tent wis awa at the fit o' the lines; an' the auld man used tae come past oor way, which meant us daein' some quick-change acts wi' the candle

'Ae nicht we heard him an' his Brigade-Major come up an' then stop.

"Whit's yon? said the Brigadier. " 'A dog,' said the Brigade-Major. "He wis richt. Maggie had gotten aff

her chain an' wis on the randan.

'Grr,' says she.

"'Guid dog,' says the Brigadier. " Grr,' says Maggie, no likin' their flat keps nane

Weel, matters had got tae whit the papers ca' a deéplomatic impasse when wee Geordie Barr, the drummer, wha could imitate the Sairgeant-Major tae the life, whispered, 'See 'em aff, Maggie.'

"Efter that it wis jist like the picturs. Roond the tents went the twa o' them, wi' the Second. Maggie ahint them, growlin' tae fair pit the wind up ye; then across the parade geon-Probationer critically. grun' slap bang intae the officers' mess.

Of course whit happened then we couldna see, but yin o' the Mess waiters hurts himself." tell't us next day that the Brigadier and his Brigade-Major had tae stand on the ly. Mess table wi' the battalion officers Major cam' across tae call her off.

Needless tae say Maggie's popularity rose tae unprecedented hichts, for moon-licht raids by the Staff wis at a discoont for some time tae come. The band a to get quite excited about it. said that mair than half the glory belongit tae wee Geordie Barr for his prompt an' soldier-like action; but Geordie himsel' to happen to me." didna seem sae anxious tae claim it.

A fortnicht efter there wis a Brigade Church parade tae be held in the open- the most?" air. Of course Maggie wis present,

glancin' around an' pullin' at the lead, jist bung fu' o' pride an' vanity.

"Efter we were drawn up the Brigadier entered wi' the customary flourish o'

"A' at yince he saw Maggie standin' in front o' the battalion wi' her tongue oot, lauchin' like.

The auld man edged roond ahint the drums an' took up a strateegic poseetion aside the Padre. "'Kindly have that dog removed,' says

he tae oor Colonel in his best orderly-room "Weel, d'ye ken, as sune's he spoke

Maggie stopped lauchin' and looked at pectiously. Then aff the parade her tail atween her legs as if she wis ashamed o' a' the folk seein' her doonfa' "A week efter she wis found deid Some o' the lads blamet the Doctor for pisenin' her, him bein' aye in the danger

zone so tae speak, through wearin' a flat kep. But maist o' us is sure tae this day that she perished o' a broken hert. "Ay, an' there's a moral tae that story Niver fecht the heid vins in the Airmy yersel'; get some ither body tae dae't in stead."-Punch.

WITH THE AUXILIARY PATROL

THE SURGEON-PROBATIONER

THE Surgeon-Probationer was very young indeed, and our trawler was his first ship; but if he lacked the sagacity of experience he fully made up for it by his great enthusiasm. He had an eager

"I don't like it," said the Second Engineer. "I'd feel ever so much happier if that case o' knives and forks he makes such a fuss about was washed overboard some night. I should sleep easier."

It so chanced that just at this time there was an unprecedented epidemic of good wind fighting, made his diagnosis. It was health among the trawler crews in our area. In the course of a fortnight we had only one call for medical assistance-a company ashore, but a timely application of insecticide prevented any further spread THE MASCOT'S DOWNFALL of infection. It almost seemed as though people refrained from going sick on pur-

All this was a bitter disappointment to the Surgeon-Probationer. He would scan our faces anxiously each morning, but we couldn't summon up a sympton between us. When the third hand hit his thumb with a handspike the Lieutenant and the Skipper had to exercise considerable tact to prevent the S.-P. from amputating it on the spot; but Joe was let off finally with an antiseptic bandage and a stiff dose

NEWS OF THE SEA

-Halifax, N. S., Dec. 22-With one of her crew dead from exposure, and all the others badly frost-bitten, the vawlrigged French schooner Quo Vadis, from Martinique for St. Pierre, Miq., with salt, was picked up on Brown's Bank yesterday by the Gloucester schooner Catharine. Captain Arch, McLeod, and towed into Liverpool, N. S. For days the schooner battled with gales off the coast and the crew were rendered helpless by the cold. the men having no warm wearing apparel. Charles Luce, aged seventeen years, died on December 18, atter intense suffer-

When the Catharine sighted the helpless craft all the sails were down, and when Captain McLeod boarded her he found all the men in their bunks with no means of keeping themselves alive. Four days ago they had given up all hopes of being rescued. The distressed seamen are being well cared for.

During the trip to Liverpool, William Barnes, one of the crew of the Catharine, had his leg broken.

The Quo Vadis was built three years ago at St. Malo, France.

-New York, Dec. 30.-The British schooner Pauline Martin, leaking and rudderless, floundered for weeks in terriffic gales in the mid-Atlantic before her crew was rescued, according to the story of her skipper, Captain Wayte, and his six seamen, who arrived here to-day aboard the Swedish steamship Elizabeth. The Pauline Martin sailed from Cadiz, Spain, for St. John's, Nfld., Nov. 8, with a cargo of salt. Encountering heavy weather the ship was soon reduced to helplessness and her company was about ready to take to the boats when the

Elizabeth hove in sight.

Captain Wayte burned his vessel, a craft of 298 tons, to prevent her becoming

with this plan.

The issue of this affair was after all, no a pleasant one. The Admiralty, with indecorous haste, ordered the brave old ship to be dismantled and reduced to the state of an unsightly hulk. This was a bit of paltry economy, which assorted ill with extravagance in other matters. It was injudicious in many ways; for the old ship would have formed a memento of Arctic expeditions; it would have afforded testimony concerning the currents and drift-ice of those regions; it would have been a pleasant object for Englishmen to visit, side by side with Nelson's famous ship in Portsmouth harbor; and it would England, to see that the liberality of their government had been appreciated.-Chambers' Book of Days.

The gift of the adventurous old ship by complimentry salutes to the American America to England was gracefully flag. Many banquets were given to Cap- Minard's Liniment Cures Garget in Countries.

> Christmas Day passed very quietly in the St. Croix towns. There were the usual services held in the Anglican Churches, which were decorated very prettily with evergreen. There were numerous pleesant dinner parties, and everybody enjoyed the happiness of receiving and making gifts. The merchants report a most splended Christmas trade in spite of the unfavorable weather of the past week.

ARMY LAUNCH BIG DRIVE FOR ONE MILLION

The Salvation Army is about to launch a campaign to raise One Million Dollars for war and demobilization purposes. The money-getting campaign will be from January 19 to 25.

The Duke of Devonshire, Governor General of Canada; Sir Robert Borden, Sir William Hearst, Sir Wilfred Laurier, and many other prominent citizens have endorsed the scheme, and strong committees have been formed for the purpose of

The Salvation Army intends to use the money for three purposes:—
(1) To establish hostels for returned soldiers who are discharged and in need untill they are absorbed into industrial

(2) To provide emergency receiving and maternity homes for soldiers' wiyes, widows, and dependent children in need. (3) To continue during demobilization in England and France the equipments of Mrs. Thos. Hill on Tuesday, Dec. 17, in Salvation Army for the Canadian soldiers

S. liner Corinthian, which was where I think the Baron is also remember. wrecked on the northwest ledge off Brier ed.-W. B. Island on Saturday, Dec. 14, had permitted indifferent navigation was the verdict of Capt. L. A. Demers, dominion wreck commissioner, this morning. He pointed out that the circumstances freed the Bay of Fundy from any stigma or criticism, and in fixing the blame of the disaster he suspended the certificate of the master, David T. Tannock, for three months, and the first officer, B. B. Simpson, for six months. In a supplementary statement, Captain Demers said that he had heard rumors about the city that liquor had been responsible for the disaster, but wished to dispel that. He had carefully inquired into this during the proceedings and found that everything had been per fectly satisfactory. He fixed the loss of the vessel as a result of indifferent navi

THE FISHERIES

A Canadian whaling company on the Pacific coast reports a catch of 999 whales, or 126 more than in the preceeding year. As compared with this, Norweigan whalers caught during the year ending August last 736 whales, the oil from which is valued at \$1,800,000. As a result of the de- and right at the head of Ferry Wharf, so mand for whale meat a cannery has been for out-of town customers in a hurry it is established in British Columbia, from the nearest place. About three and a half million pounds of flat fiish other than halibut from the Pacific coast have been sold in Canada since the Food Board first arranged for the sale of this class of fish in March 1918. Men's Heavy Work Shoes, \$2.50 up. The public has apparently developed an altogether unexpected appetite for such fish, thus providing a market for what was discarded by the fishermen as useless prior to the action of the Food Board

SUBMARINE "STRAFING" AT 74

Mr. Justice Hill and Mr. Justice Roche, aitting in different Courts for the trial of Admiralty actions last week, had before Coughey, Francis Odell, Pearl Larson, them as witnesses two master mariners who have won distinction by courageous action against German U boats.

In the first case the witness was Captain Angus Keith, who was awarded the D.S.C. for ramming a submarine, and the O.B.E. for war services as commanding officer of a transport. The second witness was Captain W. S. Lobb, aged 75,

who on his 74th birthday successfully beat off an enemy submarine and was awarded the D.S.C. He also holds the O.B.E. for other war services.—The Times. London

. In December 1901 I sailed from Liverpool to the West Coast of Africa. calling at Las Palmas, Grand Canary Islands, in the Elder-Dampster steamer Biafra, commanded by Captain W. S. Lobb who is referred to in the above item from The Times. The Captain's present age is given as 75, so in 1910 he was 58, but he looked younger. He was a rough old skipper of the kind one meets (or used to meet) in the West African trade, and the voyage I made with him gave me an opportunity of studying a pronounced character of the old sea-dog type. Some day I may tell the story of that voyage and my stay of five months in West Africa which followed it, which constitutes one of the most interesting of my reminiscences. may mention that of Norton Griffiths was a fellow-passenger on the voyage, and I then first became acquainted with him, though we had both been in Rhodesia for several years before, but had never happened to meet there. He was, and is a pushful fellow who never hides his light under a bushel. He is now a Knight, a war-honor, I think, lightly earned; but St. John, N. B., Dec. 20.—That the Max Aitken, was made a Baron! Sir John

Nine o'cleck! And the grand march at the subscription ball was to start romptly at 8." And Gus had looked forward to this evening for over a

It is doubtful if, even now, he could ell much about his trip from the capin's room to the Baker cottage. He most of the way. Over and over cain he reproached himself for his lowestfulness. Gus had called him

***** neglectful and selfish once before What would she say now? He scarce ly dared knock on the dining room

> But whatever he may have expected to hear when that door opened, what he did hear was certainly a distinct surprise. Grandmother Baker, her head enveloped in a shawl, peeped out and said

"Gus said if you called to say that she didn't wish to interfere with anything so important as your business matters. You see, Sam Hammond stopped here about ha'f past eight and said he'd seen you and Cap'n Ezry go into the Traveler's Rest together, So Gus went to the ball with him." The subscription ball was nearly half

over when Bradley came up the stairs of the town hall. He tossed his ticket in at the window and absentmindedly checked his overcoat and hat. Then he stood in the doorway looking at the evening came with no very pleasant dancers. For almost an hour he had been walking up and down the sidewalk opposite the hall, remorsefully hating himself one minute and fiercely nursing his injured pride the next. Twice he turned to go home, and each time he turned back again.

first shipment of tar, and, as it was The waltz quadrille was the particular dance then going on. Bradley glanced over the crowded floor. He caught sight of Sam Hammond dancing with one of the Rogers girls. Opposite them in the set, he noted vaguely, were Captain Titcomb and Clara Hopkins.

He spoke with Captain Titcomb but once. That was during an interval between dances, when the captain, redhot but smiling, came strolling toward him "Hello, Brad!" he exclaimed. "Got here, didn't you?" Then, glancing at the young man's face, he added: "Havin' a good time? Hope our stoppin' to talk didn't make any diff'rence?"

The answer was noncommittal. The subscription ball, extras and all, came to an end at 3 o'clock. By this time Bradley was once more repentant and humble. When Gus came out of the cloakroom he went to meet her, resolved to abase himself and plead for forgiveness.

"Gus," he stammered. "Gus-I-Imayn't I walk home with you? You know I"-

But as Bradley's anger had cooled, his flancee's had arisen. "Thank you," she answered, and

very word was crusted with ice. "Mr. Hammond was gentleman enough to escort me here, and I presume he will see me home."

Bradley accompanied Miss Rogers to the parental gate. It wasn't a hilarious walk. The young lady said to her older sister later on:

"Julia, I honestly believe he didn't speak one word from the time he left the hall till he said good night. I had to talk for two, or I should have gone to sleep on the way. He may be good looking enough, but Gus Baker can have him for all me. I'd as soon come home with a wooden Indian."

"I don't know," he replied. "Do you And Bradley, in his own chamber, in Gus' room and vowed that he would not get down on his knees to that young lady again; let her have her New York gentleman if she wanted him. Then he thought of that other dance and how happy he had been because she had given him the waltz that Sam asked for. And he went to bed utterly miserable.

CHAPTER XIV.

HE next morning he was more miserable erill time to think it oven. But he resolved that no one should guess his feelings from his appearance. Therefore he was, at the breakfast table, outwardly calm, although a little more quiet than usual.

Bradley had little appetite. He drank his coffee, and then, with an excuse that he was in a hurry, left the table and, putting on his cap, went out. He was, to all appearances, in high spirits when he reached the wharf. He' dreaded meeting Captain Titcomb and Hammond, but he made up his mind they shouldn't know it. So he chatted with Barney and Peleg, laughed loudly at the flimsiest jokes and whistled

as he stood at the Lizzie's wheel and

steered her out of the harbor. They worked at getting out the tar until 3 o'clock, when, at Captain Titcomb's suggestion, they quit for the day, and the Lizzie came back to her moorings. Then the crew went ashore, and the partners shut themselves in the cabin to once more discuss the project of buying the Diving Belle. The photographs and sketches were exhibited, the captain argued and enthused, and Bradley did his best to forget Gus and to be interested. He

succeeded partially. The junior partner agreed that the Vineyard Haven schooner was a won derful bargain, but he disliked the idea of going in debt for a part of her, as

it seemed that they must do. "You see, Cap'n Ez," he said, "we've got altogether less than \$4,000 between us if we put up every cent we've made. We shall have to borrow at least another thousand, and I hate to. - In a year, if things go as well as they have. we ought to be able to build a new vessel and pay for every stick of her. And yet," he added, "it seems a shame to let this chance go by."

The captain glanced at his companion and drummed with his fingers on the table. When he spoke there was a hesitancy in his manner.

"We can't let it go by," he said. 'We'd never git another like it. Now, Brad-now, Brad"- He stopped and drummed again. Then he went on without looking up. "I don't know's I mentioned this afore, but all my money ain't been put into this wreckin' deal yit. You see, I own some shares in that big cranb'ry bog of the Ostable folks. Must be about \$1,500 wuth al"Well, no, you haven't," answered the astonished Bradley dryly.

"No. I presume likely it-er-mus have slipped my mind. Well, I'll sell the bog shares and put up what's needed to finish buyin' the Divin' Belle. You can pay off your part as we earn it, Is it a go?"

"All right." Bradley said finally; "I'll agree, of course. If you're willing to risk it. I ought to be."

"Good! We'll take a day off tomorer and go up to the Haven and look her over." The partners started for Vineyard

tain talked most of the way, for which shoal. Bradley was thankful. He didn't feel "Crimustee!" exclaimed the captain. like talking. They found the Diving "Won't she be a job! Brad, Brad, if Belle lying at the wharf, and Captain Titcomb watched his companion's face as they stood on the stringpiece looking down at her.

They bought the schooner. It remained only to bring over the check and take away the schooner, and this Captain Titcomb had performed another miracle. He had hunted up a man who had expressed a desire to purbargaining, during which time the captain had twice pretended to give it up and return to Orham, had sold him the old schooner for \$750; also he sold his shares in the cranberry bog.

There was a good sized crowd of townspeople on the Orham wharf when the Diving Belle slid smoothly past the harbor mouth and up to her moorings. There was a splendid breeze, but they wouldn't have used the sails for any consideration. The sight of the moving pistons in that wonderful sixteen horsepower engine, the enchanting smell of the gasoline, the muffled drumming of the propeller under the sternthese were brand new, unadulterated joys of proprietorship that no mere item like the saving of unnecessary expense could induce them to forfeit.

Captain Ezra put in the most of his spare time "improving" the new.purchase. Bradley told him it seemed like the Thomas Doane days to smell paint and trip over a bucket of water and a swab every little while.

Orham was just then in the throes of a burglar scare. Two houses in the village had been broken into, and the dignation meeting for the purpose of lived and slept there before. By buildexpressing their opinion of the selecta summer resident, which lay housed over for winter in the harbor, was boarded and ransacked.

It was on the day following this robbery that Captain Titcomb began tinand the sliding hatch above it had been to go because Cook knew him, but the fastened with a padlock. The captain's junior partner didn't agree. first move was to block the hatch so "You go, Cap'n Ez," he said, with away at the door.

here! S'pose one of them mean sneak thieves tries to bust into that cabin. He can pry the staple off that padlock easy, can't he? Yes, but the way that hatch is now 'twon't open fur enough for him to climb down; he's got to open be opened without the key, and no ten cent whistle down the barrel key eledgin' on it. You hear me! And I've took off the knob on the inside of the lock so it can't be worked that way. Now, when we want to go home we haul to the hatch and lock it with the padlock. Then we jest slam the door. Click! There you are! A spring lock. How's that for high? Thunderation!

I've left the key inside!" Luckily the key was lying on the top step of the cabin stairs, and they were able to reach it with a fishhook on the

end of a stick. Getting up the tar with the aid of the patent windlass and the engine was simply fun. They took out all they could bring up through the hatchway and then began blowing out the side of the hull with dynamite. The explosive was stored in the Diving Belle's hold forward behind a bulkhead with only one small manhole in it and was carefully boxed in to prevent accident

Bradley's whole interest in life now centered in his work. Gus he had not spoken with since the night of the dance; had, in fact, only seen her at a distance. Sam, while on board the schooner, was pleasant and, to all appearances, as friendly as Bradley would let him be, but from Captain Jabez and from other considerate and gossip loving souls the junior partner learned that Hammond was now a regular caller at the Baker cottage.

CHAPTER XV. CTOBER had been a month of exceptionally pleasant weather, but in the night of Nov. 1 Bradley woke to feel the old house trembling and to hear the rain thundering on the roof overhead

and rattling against the windows. While he was dressing he heard voices in the road below and, opening the window, saw Jim Rogers, the fish peddler, sitting in his wagon with the rain sluicing from the peak of his sou'wester and carrying on a shouted conversation with Mrs. Baker.

"What did you say 'twas, Mr. Rogers?" screamed the old lady, speaking through the closed blinds of her chamber window.

"The Freedom-big six masted coal barge. She's high and dry on the Razorback. Hawser parted. The tug's tryin' to git her off now, but Cap'n Knowles telephoned Sam Hardy that

Bradley didn't hear the last part of the conversation. He struggled into his clothes, and then, putting on his together. I cal'late maybe I ain't oilskins, ran out of the house and down spoke of this to you afore, have I?"

and learn the particulars, but Captain Titcomb was there before him. They met at the door. The captain's eyes were shining.

"Come on, Brad!" he said. "I was jest goin' to send for you. I know all

He told the story as they walked to the wharf in the pouring rain. It was as Rogers had said. The great barge, twin sister of the Liberty, was on her way from Boston to New York under tow. The storm had come up unexpectedly, and the hawser had parted. Haven in the early morning. The cap- Now she was fast on the Razorback

> you and me could only have the chance!"

Alvin Bearse, who boarded nowadays at the house of a relative in Orham. was already on board the Diving Belle when the partners reached her.

"She's hard and fast for sure," mutthey did a week later. Meanwhile tered Captain Titcomb when they reached the hulk, "Five thousand tons of coal inside of her and this no'theaster drivin' her farther on chase the Lizzie and after two days of every minute. I swan to man, Brad, she's there for awhile! No tug-nor three tugs, fur's that goes-can haul her off. 'Member what I said when the Liberty come so near landin' where she is? It's an anchor and cable job, and we can do that as well as anybody and cheaper than the big fellers. If they'll only let us try! By crimustee, they've got to!"

That evening the train brought representatives of three large wrecking companies to Orham. The younger Mr. Cook came also. The partners saw him, but he would give them no satisfaction. "You must come to Boston tomorrow if you want to bid," he said. "But I tell you frankly, price isn't the only thing-we must be satisfied that the job can be carried through." It was evident that he didn't believe they could handle it.

But Bradley and the captain were certain they could handle it if the chance was given them. Seventy men. at least, would be needed, and to house and feed them was the problem. The Boston Salvage company had lighters and barges for this purpose and they had not. But there was the big shanty at the Point, the one in which the picnatives were talking of calling an in- nic had been held. Thirty men had ing new bunks and slinging hammocks men. Then a steam yacht belonging to twice that number at least could find room. The rest must occupy other shanties or come up to Orham at night. The partners schemed and figured until nearly 4 o'clock in the morning.

One of them must go to Boston that kering with the cabin door. This door day. The captain said Bradley ought

that it would slide back but a little decision. "You're a better bargainer way. Then he sawed and hammered than I am, and it'll take a good talker "There!" he cried in triumph after the face of the competition. Go, and good luck be with you!

So the captain went on the first train. He promised to telegraph as soon as a decision was reached.

But no telegram came that day. All the next forenoon Bradley hung about the station waiting. The noon train that door. And that door's got on it arrived; no captain, and still no word. a three dollar patent lock that can't He determined to wait until the evening train arrived, and then, if the captain didn't come, to telegraph. But the ther. The key that'll open that has lace first man off the train was Captain Tit-

"Didn't get it, hey?" asked Bradley. "Oh, I got it! Yes, I got it! Now. don't ask any more questions here. Come on down to my room."

He was silent all the way to the Traveler's Rest and, for a man who had just secured the greatest contract of his business life, seemed strangely downcast. When they reached the room he locked the door and threw his overcoat and hat on the sofa.

'Well," he said slowly, "I made Boston all right and stood for Cook & Sons' under full canvas. I hailed the young squirt with the hay on his upper lip and asked him if the old man was 'What do you want to see him for?' says he. 'Son,' says I, 'you trot along like a good little boy and tell the old man that the feller that's goin' to git the Freedom off Orham shoal is out here.' 'That kind of fetched him over with a slat, and he went in and told Cook. In a minute out he comes and pilots me into the skipper's state-

"I cal'late Cook was expectin' to see another feller. 'Are you from the Salvage company? says he. 'No,' says I, way of puttin' it made him laugh, and if we make good-whew!" he told me to go ahead and spin my yarn, only be quick. I spun it, but I ain't sartin that I was quick. I never talked so afore in my life, though I've beat it once sence. When I hove anchor fin'lly he says, 'Cap'n, there's nothin' the matter with your nerve, is there?' I told him no, I hadn't had to take physic for it. 'Well,' says he, 'I'd like to give you the job, but you ain't big enough. This ain't anchor draggin'.

"Then I got after him again, told him about the new schooner, drew a diagram of the shoal and made it plain jest how she'd got to be got off If 'twas done at all and that we could do it as well as anybody else in the world and a whole lot cheaper. At last he told me to come in and see him again late that afternoon.

"I was round on time, you bet! The hay lip chap told me the old man had gone for the day, but that he'd left big enough for the job. Says I to had the contract. hay lip, 'Where's the old man live?'

Bradley's objective point was the himself and went out to paw over the figured there was sugar enough in the postoffice. He wanted to see Hardy directory. Inside of an hour I was to drop a lump in friend Obed's team on an electric car bound for Brook line and Cook's home.

"Pretty soon down comes Cook in a swallertail coat. He looked mad. 'Is it you? he says. "Didn't you git my message? I told him I'd got it, but that 'twouldn't be fair to him to let that end it. Pretty soon young Cook

some in, and he listened too. "Fin'lly the old man says, 'Well, Titcomb. what's your figger?' I told him what you and me had agreed on. He seemed surprised, I thought. Then he and his son went into the next room and talked. When they come back he says, 'Titcomb, you've got the perseverance of the devil or that partner of vours.' Put you in good company, hey, Brad? 'Your price, I don't mind tellin you,' he goes on, 'is lower than any one else has given. If you were a bigger concern I guess I'd give the job to you. Anyway, you come in and see me tomorrer?

Well, this mornin' I was at his office when the doors opened. And there I set until after 2 this afternoon. A feller from the Salvage company come in while I was there, and so did one from the South Boston tug people They went into Cook's room and come out again. Fin'lly the old man sent for me. He and his son were there together. 'Titcomb,' says he. 'I'm a fool, and I know it, but I'm goin' to let you try to git the Freedom clear.' That wan't all he said. He went on to

What do you want to see him for?

tell me that in givin' us the job he was riskin' a brand new vessel worth \$80.-000. 'Mind,' he says, 'I b'lieve you can do it if anybody can, but I won't risk another cent. I won't pay by the day. I'll give you \$15,000 when she's off the shoal and towed to Boston, but I won't pay a red until she is. It's got to be a contract job, payment on delivery of the goods."

Bradley's face fell. "Of course that settled it," he said. "You couldn't accept, such an idiotic offer as that." Captain Ezra took his cigar from his mouth. "Well, Brad," he answered soberly, "that's what I did; I accepted

'Now, Cap'n Ez, look here! You and I have put almost our last copper into the new schooner. We've got practically no ready money. We must hire from seventy to a hundred men at \$3 a day and pay them every week. We must feed 'em. We must spend money fitting up the shanty to lodge 'em in. It'll take, maybe, a month before we get her clear-if we do clear her. We may have to spend five or six thousand before then. Where's the money coming from?"

"I know all that, We'll mortgage the Diving Belle and raise the cash." "Are you out of your head? We've been lucky so far and haven't had a failure. But failures are bound to come. Suppose we work on this barge for a month and then a heavy gale strikes."

"But, Brad, think of what it means

to us if we make good." "Cap'n Ez, we got that job because nobody else would take it that way. We can do it if anybody can, but nobody else would be fool enough to gamble against the Lord Almighty's weather. We'd be called fools from here to Provincetown."

The captain drew a long breath. "All right," he said gloomily. "Maybe you're right, Brad. It is a crazy gamble, I s'pose, and I was afraid you'd see it that way. Only you must make up your mind to this—if we give up takin' a chair; 'my name's Titcomb. this chance we must settle back and I'm from Orham. My partner's a be nothin' but anchor draggers the rest Obed and close that insurance deal. It young feller name of Nickerson. He's of our lives. We've flunked once, and, the one you picked out to lift the no matter how good the reason is, no Liberty's anchor that time.' Well, that more big jobs 'll come our way. But

Now it was Bradley's turn to hesi tate. There was some sense in what. his partner said, but it was playing against odds and with the last dollar on the table.

Suddenly Bradley spoke. "Oh, hang it, what's the odds?" he exclaimed recklessly. "Go ahead, cap'n! I'll sink or swim with you!"

Captain Ezra grasped his hand. swore you would," he cried. "Son, this job's goin' to make us!" Bradley's laugh was short and rather

"Yes," he said, "make—or break."

CHAPTER XVI.

T was close to daybreak the partners separated. They estimated, and each now knew what his part in the great fight was to be. As he was leaving Bradley asked the captain how, in his opinion word that 'twas no use; our firm wan't Obed Nickerson had learned that they

"Phoned the Salvage company," re-He didn't know, bein' a good liar. I plied Captain Ezra decidedly. "I'll bet asked him in an interested sort of way on it. You see, Brad, this job's a big if he was dead sure where he lived one, and the salvage folks might have

directory. Inside of an hour I was to drop a lump in friend Obed's teacup providin' he stirred up their spoon. Well, good night, or good mernin', rather. It's double or quits with us this time, son, for sartin, but if Titcomb & Nickerson do go under it'll be with colors flyin'."

Within the week Setuckit Point, from a lonely, gull haunted sand pit, inhabited only by the life saving crew and the lighthouse keeper and his family, became a small town, the population of which left each morning for the Rasorback shoal and returned at night to eat and sleep in the big shanty and those surrounding it. Captain Titcomb saw the people at

the Wellmouth bank and placed a mortgage on the Diving Beile. As the partners owned her free and clear, he was able to get her cost price, \$5,000. Placards announcing that men were wanted at once and at \$3 a day and

board were hung in the postoffices and railway stations in Orham, South Orham, West Harniss, Harniss Center, Wellmouth and other towns; also an advertisement appeared in the Item. The response was immediate. Work at good wages was scarce in the winter months, and men came from twenty miles away to obtain it.

The Diving Belle carried them down to the Point. There, under Barney Small's supervision, some set to work building extra bunks in the big shanty, slinging hammocks, putting up stoves -the partners bought five secondhand ranges-and making three neighboring abandoned fishing huts inhabitable. The rest worked over the stranded coal barge, getting out the anchors, stripping her of all unnecessary ironwork and rigging and preparing to bring the coal from her hold and dump it overboard.

Seventy men were hired altogether. and to feed them it was necessary to buy large quantities of provisions. Captain Titcomb managed this part of the business, and the bargains be made with Caleb Weeks and other storekeepers were wonderful and in some cases not too profitable for the sellers. As Mr. Weeks said: "Ez Titcomb spent ha'f the forenoon with me today, and afore he got through talkin' he'd tangled me up so with figgers that I don't know whether I sold him salt at a cent pound or cornmeal at a dollar a barrel. I'll have to put in the rest of the day cal'latin' and addin' up, so's to know whether I've made money or lost it."

Soon the work on the Freedom was in full swing, and the great hull hammed like a beehive. Men were standing by the hatches and by the derricks. Men were working by the rail transferring ropes and ironwork to the Diving Belle. Down in the hold gangs of men with faces sooty black except where the sweat streaked them with pallid channels were shoveling the coni into the big iron buckets that the creaking derricks lifted and swung ver the side The donkey puffed and whistled the chains rattled and ton after ton of good hard coal roared from the opening buckets and splashed into the tumbling waves of the channel.

The captain and Bradley, together for a moment, stood in the bows, where the heavy cable led, taut and rigid, from the windlass out to the submerged anchors. The Freedom had moved slightly in the last few days, and the

partners were encouraged. "By crimus, Brad," exclaimed Captain Titcomb, pointing, with a grin on his grimy face, to the stout little Diving Belle just then shooting off to the Point with a load of strippings from the Freedom, "that's the little critter that has made it possible for us to handle this job. I don't know what we'd 'a' done if we hadn't had her. See bee go, will you? Flies round like a flea in a fryin' pan, don't she? You never put your money into anything better for the size than her, and don't you let that fact slip your mem'ry."

The new schooner had proved her worth twice over. Equipped, as she was, with the engine, she performed the part of a steam launch, a tug and a ferryboat. She had carried out and dropped the anchors in the channel; she took her owners and a few of the hands to and from Orham every night and morning; she was always ready and always useful. In fact, as the captain said, they could scarcely have handled the job without her. Bradley, dirty and bareheaded, look-

ed at the little vessel. "I shan't feel easy until we pay off that mortgage," he said. "And, anworries me to think she is not protected at all."

"That's so. Fact is, I've been so verlastin' busy lately that I'd forgit to eat if I hadn't got in the habit of it. But I must settle that right off. The only thing that's kept it from goin' through afore is on account of that dynamite in the hold. The papers are ready, only Obed won't dicker until we take that stuff off; his comp'ny won't insure against explosives."

A little of the dynamite that they had been using in blowing up the hulk containing the tar was still stored in the Diving Belle's hold. Captain Titcomb had promised to see that it was taken ashore, but he always forgot it. Bradley would himself have attended to the matter, but the captain seemed to take the offer as a personal reflection on his own management. It was the same with the insurance. Anything that the captain undertook to do he hated to give up to another.

THE PROGRESS OF PEACE

ARIS during the past week has bee the centre of the negotiations and discussions preliminary to the assembling of the Peace Conference, which it is now stated will not assemble till early in February. Many of the delegates to the Conference are already in Paris, and others are on their way. President Wilson left Paris at midnight on 24th for Chaumont in the Haute Marne district, where he dined with the American soldiers on Christmas Day. On the 26th he arrived in London, where he was met by King George, whose guest he was at Buckingham Palace. This is the first time a President of the United States has ever been in England during his term of office, and the event is being fittingly celebrated.

The funeral was held on Friday.

E. M. ALLen

North Head. Dec. 20-The death of El of the sea and decided to become a farmer. M. Allen took place at North Head, Grand He first started in Waweig, but a little Manan, N. B., on the morning of the formerly owned by his maternal grand- He was a native of Spencer's Island, remainder of his life was spent; here he here several years ago and married and and his wife, formerly Augusta Grant, to settled here. His wife was formerly whom he was married on January 12, Miss Pearl Whelpley, of North Head. 1864, watched their large family of five Mr. Allen had been ailing for a year or hood and manhood. But sadly he saw last few months he was confined to his two daughters and one son, and, a few bed. He leaves, besides his sorrowing months ago, his wife pass out of this wife, a young daughter one year old, also two brothers and two sisters.

Interment was made here on Sunday he found his chief happiness in seeing the 15th., Rev. H. C. Mullen officating. -Telegraph.

WALTER HINES PAGE

Pinehurst, N. C., Dec. 23.—Waltes Hines Page, former Ambassador to Great Britain, died here Saturday night after an illness of many weeks. Mr. Page's health began or cherished an unkind thought of man, to fail nnarly a year ago, and he gave up woman, or child of his acquuintance; and his post as American representative at the court of St. Jame's late in the summer.

Dr. Page returned to the United States Though he has passed his eightieth on October 12, and he was moved directly birthday, he was still young in heart; a from the steamer to a hospital in New improvement, but late in November he suffered a relapse. Early this month he rallied, and ten days ago was brought to Pinehurst, For a while he seemed to grow stronger, but suffered a second relapse last Thursday. Most of the mem- 2 bers of Dr. Page's family were with him when death came. Arrangements for the funeral have not yet been completed, but it was announced that services will be held Tuesday morning at 11 o'clock at the Page Memorial Church, at Aberdeen, North Carolina.

Quiet, unassuming, with a dread of publi-

her. The funeral was conducted from city, Dr. Page as Ambassador to the Maritime Province Fish Canning Associathe fsmily lot in the cemetery at Richard- American friendship, he and Balfour, much alike in taste and trait, becoming almost cronies.

The late Ambassador was a Southerner of the soft-spoken, gracious, tactful to social conditions. He was born on August 15, 1855, in the village of Carey, a suburb of Raleigh, North Carolina. He graduated in the spring of 1876, and later pursued post-graduate courses at Johns Hopkins, Baltimore. He was one of the first twenty Fellows of the Baltimore Institution, having won a Greek scholar-

Mr. Page was the author of "The Rebuilding of Old Commonwealths." He was a member of the University and National Arts Club. His home was in Garden City, in New York. In 1880 he married Miss Alice Wilson, daughter of 1838, and was the second son of Captain with services by Rev. Father Holland in Dr. William Wilson, of Ann Arbor, Mich. They had several children.

RESEARCH COUNCIL ASSISTS MARITIME CANNERS' GUILD

Ottawa, Ont., Dec. 23.—The council for scientific and industrial research has taken prompt steps to co-operate with the new guild for research formed by the

The research council is also arranging to publish, in co-operation with the department of mines, a concise and hands reference bulletin on Canadian building stone giving information as to their wear ing and weathering qualities, comparative economic values, sources of supply, etc At present there is no easily available or compact reference work for Canadian builders on this fundamental phase of m construction.

A further step by the research council towards facilitating the practical application of science to industry has been the appointment of a committee consisting of Dr. R. P. Ruttan, of McGill University, Dr. A. S. MacKenzie, of Dalhousie University, and Dr. A. B. MacCullum, adminis trative chairman of the research council, to devise ways and means of aiding scientific journals in Canada and of securing the publication and dissemination of scientific papers.

NEW PENSIONS IN EFFECT

JANUARY 1

Ottawa, Dec.—New pension regulations

come into force on New Year's Day,

They will follow, in the main, recom-

mendations made by the special commit-

tee of the House of Commons, whose

findings were published some months ago.

But the recommendations have been sup

plemented in three important particulars:

lations is fixed for January 1st., 1919.

of exceptional hardship.

1. The coming into force of the regu-

2. All existing cases may be reviewed by the board of pension commissioners in the light of the present regulations.

3. Special provision is made for cases

"In special cases of hardship," the new

egulations read, "which are not covered

by the pension regulations and in cases

in which special relief should be given, the commissioners shall have exclusive

authority upon such recommendations toward a pension or to afford relief.

In other words, where a case of except-

ional hardship merits it, the board of

pension commissioners may recommend

recommendatios after hearing consider-

able evidence. They were announced in

SAVING STILL NEEDED

It is a mistake to conclude that, because

the war is over, it is no longer necessary

to bother much about saving money.

Fighting has ceased, but the war has left

a legacy of debt and taxation. Our liber-

ties have been preserved but we must pay

Before the war Canada made rapid pro-

The poisoning of cattle in the west has occurred from eating the seed-pods of larkspur dried with the hay; loss might easily have been avoided by picking out the coarse stalks with the three parted pointed pods. The leaves of the larkspurs resemble those of the buttercups. and are very toxic in a fresh green state. But with maturity they lose their toxicity, which then becomes concentrated in the statement, plain to grasp at a glance, is- has long been combined with that of ledge, or rather want of knowledge, it is seeds. Thus a very small quantity of sued by the Canada Food Board. Increas- agriculture. This is rather like an attempt impossible to make any statement on the pods and seeds will cause death.

pods and seeds are the most poisonous can be done. portions of the plant, and these are often cut with the hay in the western provinces. The action of the poison is not cumulative and hence animals may feed upon the 203,000,000 fowl. plant without much harm unless the toxic limit is reached. The toxic dose for sheep of the seeds alone is from $\frac{1}{4}$ to $\frac{1}{2}$ lb. and that of the seeds together with the pods is about 1½ lbs. The pods are about an inch long, more or less hairy, and arranged at intervals along the stem.

A few moments spent each day in looking over the hay will well repay even the portunity busiest owner of stock.

MINERAL REQUIREMENTS OF

(Experimental Farms Note)

mineral matter is consumed by them, aside from that actually contained in the food eaten, and known technically as the ash content. While a general statement as to the mineral or earthy requirements of the hog may be made, certain abnormalities may appear at various stages of feeding is required.

In general, pigs under summer or outdoor conditions supply their own wants in the foregoing connexions, consuming earth, slate, weathered stones, ashes, Russia, Austria-Hungary, and the Balkwood, etc. If they are pen-fed, some two or three of these easily available materials may be supplied. Even under outdoor conditions, however, many large feeders provide supplemental mineral and corrective feed. Of these, charcoal in various forms, ground rock phosphate, ground limestone, slaked lime, bone meal, wood ashes, salt, etc., are the most important. A readily accessible supply of a mixture of the above is advised as a general corrective of possible deficiencies in the mineral constituent as supplied by

GENERAL RECOMMENDATIONS: For Breeding Stock in Winter: Sods, is nearly ten times the total live stock earth, and ashes are easily supplied. population of Canada, counting only those Charcoal may be purchased in various leading countries from which figures are with unexampled gallantry. Fishing really excellent food to the people who from charred corn-cobs, or wood. Aside Britain's imports as based on normal from the value of its mineral constituent, figures, are: charcoal is an excellent tonic and corrective. Where the spring litters lack evidence of strong, bony structure, a mineral deficiency of the dam's ration during gestation is often responsible, where other probable causes are difficult to ascribe. Hairless pigs at birth, a phenomenon difficult to explain definitely, would seem to have as one of the several probable causative conditions, some mineral lack in the blood-flow of the dam. Feeding the pregnant sow a mixture containing charcoal, ground rock-phosphate, ducts during the re-construction period slaked lime, wood ashes, and salt will of Europe will be as great as, or greater frequently prevent the condition. These than, the demand during the war, accord

planned. And laughing Ceres reassume the land." Now, it is hardly an exaggeration to say that if the fisheries were developed as regards the value of fish in feeding the they could be we could fill the margin nation, an interesting paragraph from the live stock necessary to make us a self-feeding population. Even if there were not unanswerour fishermen all the help we could possibly give them. They have been for all torpedo, and gunfire while on the fishing-grounds, for more than four years they have suffered their "bout o' passive strife" the filed half shops are the organization which more than all others is equipped to overcome the food crisis in the big cities. They are 'National Kitchens,' old established, run by experts, and providing fleets have been largely manned by old most need it. £8,000 a week are spent in Bradford, £20,000 a week in Sheffield, in

Navy and the transport services. The history of British fisheries as summarized in the Memorandum is very curious. In the early and middle ages fresh meat was hard to come by, especially in winter, as winter fodder was scarce, and stock was generally slaughtered in the autumn and salted down. At the same time fast days were observed, and there was a heavy demand for fish on the meatless days. Harvest laborers, even far inland, were fed on fresh herrings, and armies, fortresses, and ships were much less strictly observed and Canada's war debt inside ten years by of steam-power to fishing. From 1889 to 1899 the annual British catch averaged

twelve million hundredweights. In 1913 has been largely built up and will expand he catch was nearly twenty-five million aundredweights Quite apart from re-"The feed situation in Canada is now storing and expanding the steam fleets of excellent," declared an official of the the fisheries, which have suffered both Those who find the pungent smell of the Feed Division of the Live Stock Branch destruction and depreciation from the burnt fats or oils which salutes the at Ottawa. Follow Nature's Plan Paint in the Fall

October is a good month in which to paint. All the pests of summer, such as flies, spiders, and dust have gone, and the mild heat of the sun in the autumn gives the paint time to properly cure on the sides of your house. Besides it's the natural thing to put on a protecting coat to turn the winter weather. But to paint right you must use the right paint.

G. V. PAINT

is what its name stands for-Good Value. It is a good quality paint at a reasonable price, and is used with satisfaction on all classes of buildings. It is the paint to use on your buildings.

CONSISTENT PUTTER HAS ADVANTAGE IN GOLF

A. LTHOUGH the long driver in golf is a-soul-inspiring fellow, and the man who pays up to the hole with deadly precision excites admiration, neither of these is the opponent who puts one out. Speaking generally, the man who makes another nervous is the adept at putting. There is not much doubt about it, the big half of any well-contested match is, fought on the putting green. Every one lost on the tricky last yard, or, what is equally to the point, failure to get dead in the run-up on the green.

It is this part of his game which enables Charles Evans, jr., national amateur and open champion, to get head and shoulders above the crowd. Looking at the subject from the æsthetic point of view - for putting in a golfing sense may not be inaptly termed a fine art—one is tempted to ask the question: "What are the points of the putter?" One might lay down hard and fast rules, but he must not forget that what the golfer wants he will have and that in spite of anything. His particular ideal is the club that he thinks he can play best with. All his shots come off with it, so he says; if they don't, well, it's the fault of some outside agency. To come back to the question, however, in the market there is an endless variety of choice, and, leaving out of view the detergent practice, and the first element is to earn to strike the ball fairly and truly.

What golfer has not known the day when everything was holed: when his putting was a marvel even to himself, not to speak of an astonishment to his friends? But, unfortunately, there is another side, more frequently met with. Who has not had days when his eye, was out; when he was not striking the ball fair in the face of his putter, and when the ball with persistent regularity found this or that side of the hole? A mistake players often fall into is that of taking the ground in the act of striking the ball when making the putt. It must be quite obvious that this interferes with the purpose of bitting the ball truly.

There is also the follow through, but if the player has made up his mind and acts on the principle of striking the ball farrly, "The devil you have!" the Marshal said he attains follow-through as a matter of course. The next important consider- And again she shook her flaxen head ation relates to the functions of the eye. Keep your eye on the ball," seems simple. enough—in theory—bul the golfer knows better, specially in the full shots; but even when putting he has his own experience of the times he has found himself looking elsewhere than at the ball when making

The pertinent question of "How to put?" (though this does not guarontee the holing of the ball in a winning number of strokes), is answered thus by an authority: Carefully survey the road to the hole, make up your mind on exactly what is to be attempted, take up your stance, judge your distance, thereafter concentrate your whole attention on the ON MR CAUDLE'S SHIRT BUTTONS ball and its striking, and especially don't THERE, Mr. Caudle, I hope you're in cruelty, Mr. Caudle. PEDIGREED SEED

(Experimental Farms Note.)

When seed grain is advertised as pedigreed seed, it should mean two things: first, that the record of that particular strain is known from its orgin; second ings Plan depends upon the ease and that it is rich in the qualities that make convenience with which the public may it superior to other selections of the same

> In order that the term pedigreed may have the proper significance to those who wish to purchase seed grain of high quality, the following outline is given of the essential methods in the primary selection work of pedigreed varieties or strains of grain. Before seed grain can be termed pedigreed it must be descended from a single plant; that particular plant must have been a superior plant to others of its kind, and must have had the ability to transmit the high yield and the desirable characters for which it has been selected. This superiority can only be determined by careful observation at the time of the first selection, and by a careful test under other standard varieties. Also, this selected strain must be watched closely during the multiplication period for the appearance of false heads or the breaking up of the variety. This is the essential work in the propagation of pedigreed seed, and unless it has been selected in accordance with the above methods, the word pedigreed should not be used.

Apart from those who are associated with the experiment stations there are but few men in Canada who have the facilities and the knowledge essential to perform the primary selection work in the production of petigreed grain. Any observant person can, however, obtain pedigreed seed, and by the maintenance of a seed plot and the careful rogueing out of false heads and chance impurties, preserve the purity and quality of his seed grain that it may continue to rank as. pedigreed strains and varieties is practically confined to the various Dominion and Provincial Experiment Stations, any so called pedigreed seed that does not trace back to these sources, or is not registered in the Canadian Seed Grower's Association, should not be purchased as such without careful inquiry into its origin

Pedigreed seed bears the same relation to the grain-growing industry, and its use is necessary if a grower desires to mainment is confident that they will do their tain the yield, purity, and quality of his

BRANDES'S "CAESAR"

By Julius Moritzen

ROM the European literary point of view, la book by George Brandes always is an event of no mean importance. The "Goothe" and "Voltaire" by this famous Danish writer, although published while the world was still at war, nevertheless arrested public attention as few volumes issued abroad, apart from 'those How much more, therefore, might be expected when the announcement comes that Brandes's "Julius Cæsar" had been voluminous work is available to the Scandinavian reading public. Since Plushed any new light on the personality of is as great as it is beyond measure. the Roman Dictator was scarcely to be expected. And while only the first half has been published, the author, with his accustomed regard for the reader's comfort, contributes an introduction so complete that it carries one along as if the whole were placed succinctly before the mind's eye. Here lies the secret of Brandes's craftsmanship: his unquestioned Color and close attention to detail never obscure the major theme. The great Cæsar stands before us in the full majesty of his office, and if other scholars have endeavored to show that Shakespeare presented a caricature for the benefit of Brutus, Brandes unequivocally pronounces sentence on anything that aims at lowering the standard of him whose services redounded to the advantage of gener ations to come after. It might suit the purpsse of Shakespeare's Marcus Antonius to eulogize Brutus as the "nobles Roman of them all." With Froude. Brandes brushes aside whatever good traits the conspirator possessed, because he lost all claims to consideration after he delivered the fatal thrust which robbed the world of Julius Cæsar.

"That murder," writes Brandes, "committed during the forenoon of the 15th of March, 44 B.C., by sixty conspirators, with the aid of twenty-three dagger thursts, is perhaps the most conspicuous monument that the history of the world contains touching human stupidity in the form of so-called idealism: of human meanness, ingratitude, rapacity, and rawness masmankind's incomprehensible stupidity. Brutus is placed alongside Cæsar, ves. is estimated as even greater and more worthy than he."

It is only two years since Brandes published his "Voltaire." It seems as if his pass. To plan a book like his "Julius orderliness in recital, an immense, complicated, and eventful world-period made living down to the veriest detail. The present reviewer, long familiar with Brandes's career, has never found the Danish author more interesting, more entitled to stand as a model where literary construction and absolute fearlessness in expression are concered. Like Ralph Connor's books, we have a scene, Froude. Brandes must have drawn freely painfully dramatic, in which that sweeton Appian, Plutarch, Suetonius, and est little lyric ever sung, the twenty-third Dion Cassius. Of course, Cæsar's own psalm, is introduced. As the Sky Pilot writings, the speeches and letters of and his two companions approached the Cicero, the "Commentaries," Hirtius's low log shack in the little poplar bluff of history of the Alexandrian war, must the Canadian foothills, where a young fiction, tells us much about Glenoro have furnished many important data. As Scotchman who had enjoyed the advanta Latinist, few European scholars equal ages of a university education and who Brandes.

peare's "Julius Cæsar" Brandes took pains from the whiskey he had drunk, they to point out in his monumental work on heard a rifle shot and then the sound of on the English poet. In that book he the drunken man shouting at the top of the large Toronto churches a gentleman fore-shadowed what he now presents in his voice; so much detail. He explains why Shake- "The Lord's my Shepherd, I'll not want speare characterized Cæsar as he did: Having so arranged his drama that In pastures green, He leadeth me Brutus should be its tragic hero," he "had to concentrate his art on placing him in the foreground, and making him fill the an awesome whisper, 'Come out here you scene." Butus had to be the centre and little devils! and bang would go his rifle pivot of everything," and therefore Cæsar at the stove pipe, which was riddled with was diminished and belittled to such a holes," Then once more he would sing degree, unfortunately, that this matchless in a loud voice a verse of the psalm which genius in war and statesmanship has be- he had learned in childhood, and which come a miserable caricature." Brandes even in his drunken revels he could not cleaves close to his earlier conception of forget. Cæsar. "Generation after generation," he now writes, "has been educated to see in Cæsar the representative of lust of charms us no longer with his artistic and power, in Brutus the hero of liberty. It illuminating interpretations of life, is an was not Pompey who through the course other Canadian writer who has woven of time rivalled Cæsar in the admiration into his stories with deft skill the sweetof the nations. That honor fell to the ly sacred songs we sing. When the lad weakest head among those who surrounded Cæsar. • To the masses Cæsar became the tyrant, Brutus the hero of freedom."

The English reading world, familiar as it is with Brandes's leading works, including his "William Shakespeare," has yet to know his "Goethe" and "Voltaire" in language that it can understand. It is the one drawback to the fullest possible appreciation of this Danish writer that his orignal audience is narrowed down to those familiar with the languages of Denability to make his canvas complete, mark, Sweden, and Norway. It is to be hoped that when the complete "Julius Cæsar" appears, this if not all of Brandes's writings during the war will be first avail- New Song," in Robert E. Knowles' "St. able to English readers in America.-The | Cuthbert's," we have a good illustration New York Evening Post:

HYMNS IN CANADIAN FICTION

Fliterature is a transcription of life, a holding of the mirror up to nature, it is no wonder that hymns have been made use of so largely by some of the world's most posular writers of fiction in developing their stories. Hymns have exercised in a beautiful way a sweet and saving influence over home life, and have been from the very beginning one of the great inspirational forces in all the helpful activities of the Christian Church, Our soldiers at the front, while they sing at times with gusto their nonsense songs. love best of all the grand old hymns, endeared to them by all the happiest associations of home, sweet home.

querading as the love of liberty. A band satisfyingly hymns have entered into the conceiving in a beautiful way. The old 25-tf. of jealous wretches, lusting for power, deepest experiences of human life, we lacerated with their long knives the most need not wonder that novelists have made both deeply moved by the mingled memgenial man of Roman antiquity. And it a generous use of sacred songs in develop- ories of the past, and by the wonderful is a crowning disgrace that during the ing their stories. This is true of our love divine which would not let them go. following two thousand years, because of most popular Canadian writers of fiction.

At a critical time in the missionary's fight with the saloons, in Ralph Connor's 'Black Rock," it was Mrs. Mavor, the miners' guardian angel, and one of the most beautiful characters in the literature ability to work increases as the years of to-day, who saved the situation by the hymns she sang. As she sang "Jesus, Cæsar" would appear to have necessitated 'Lover of my soul," her face was lifted up the labor of many years: yet we see as if some vision of the great Lovers of humans had come to her heart which her gloriously appealing voice was interpreting in such a way as to make the saloons "which care no more for a man's soul than they do for a sour tin can which is cast into the garbage pail or tossed into the back yard," something to be abhorred.

In "The Sky Pilot," the most popular of Heart that planned through all had loved ones in Scotland who lived for The fundamental defect in Shake him, lay wounded and wildly delirious

He makes me down to lie

The quiet waters by." "Now and then he would stop to say

Norman Duncan, whose facile pen Davy Roth, in that exquisite love-idyll, "Doctor Luke of the Labrador." reaches home after a tempestuous trip in Skipper In a chapter which is conspicuous for Tommy's little punt, and is being rocked plished and what his genius had planned Saviour, pilot me." In long after years "Now, boys and girls, an' grown-ups, too." Davy said. "The feeling of harbor-of cried the superintendent," sing up fine do. He writes:

He solved a problem that the centuries escape and of shelter and brooding peace and 'earty. This is a lapppy land we live

money men. He gave independence to rage of the sea by night or day, but my entire countries by presenting them with heart has felt again the peace of that Latin citizenship, sometimes Roman. He quiet hour, and I have heard my mother

completed by Cæsar, is a masterpiece in book in which Norman Duncan let him, one of Watts' hymns. The countess in ten. There is not the slightest doubt that scene where poor old Nicholas Top, who the senator the name of his favorite poet. Cæsar is the creator of the latter-day thinks that he has sinned away his day of This was a most embarrassing question, praver:

> "Jesus, tender Shepherd, hear me; Bless Thy little lamb to-night: Through the darkness be Thou near me;

Keep me safe till morning light,"

is one which for spiritual insight and literary, artistry has few equals in literature. Dannie was no longer a child, but he had not outgrown his need of praying the prayer of this beautiful hymn. Tiplady, in "The Soul of the Soldier," tells how at the close of one of the services at the Front he gave out a children's hymn, saving as he did so that it was for the boy. within us who never grows up and never dies. It was a touching scene, for as they sang they were all children again and the blessed memories of childhood were fresh

In the chapter, "The Old Precentor's of how psalms and hymns can be worked up into literature in a most interesting way. The Old Precentor was very ill. He began to realize as he lay dying that he had been "ower hard on human hymes." Perhaps after all they were inspired in some way as well as David's Palms. He suggested that "Jesus, Lover of my soul," might be sung at his funeral. although he was sure some people would

think it strange. At the funeral of that great lovable man of God, Principal Pollok, of the Presbyterian College, Halifax, a distinguished soloist sang the other dar. "The Land o' the Leal." In the early days of Dr. Pollok's ministry he would probably himself have thought this a strange selection for a funeral, but the old order Wylie Mahon, in Onward. changeth, giving place to new, lest one good custom should corrupt the world

gives us a tenderly touching scene, which When we remember how sweetly and his great sympathetic soul was capable of sat side by side and enjoyed the vision of 21-6wp love which come to them as they partook of the precious symbols at the Holy Communion. The closing hymn was, "The sands of time are sinking," from which this book gets its name. It was when they came to the soul's great boast-

> "With mercy and with judgment My web of time He wove.'

that Harvey turned his eves towards David, and his heart melted as he saw the tears rolling down the withered cheeks. David's head was bowed, for it hurt him sore that men should see. But there had come about him 'such a tide of feeling-all his chequered life rising before him-that his soul dissolved in gratitude to the Hand that guided and the labyrinth of years."

IV In "Duncan Polite" Marion Keith, who enjoys the distinction of having created in the hero of this story one of the most unforgettable characters in Canadian for situation, but severely plain and unattractive in every other way, where the village blacksmith, who had a powerful voice, used to raise the tunes. After listening to a boisterous anthem in one of present who has not yet developed a love for church music of this kind said to his mpanion, "Is God deaf?" None but, a totally deaf person could fail to hear the blacksmith as he led the praise service of FOR SALE, Eleven room dwelling Glenoro Church, as he shouted out:

"Ye gates lift up your heads on high: Ye doors that last for aye, Be lifted up, that so the King Of glory enter may."

In Marian Keith's "Lisbeth of the which the author has given an innocent touch of humor the introduction of one of the hymns sung. Noah Clegg, the superintendent, a good little man, with a round, cheery face, and squeaky Sunday boots, and cockney accent, having sent Wully Johnstone's Johnny to look up and down the road to see if there was anyone coming, and Johnny having returned and reported that there was no one but Silas Pratt's brindled cow, began the service by reading the first two lines of the hymn. There is a Appy Land,

Far, far away." He gave relief to the provinces, staggering since made harbor-never since come of Lord'll give us 'appy 'earts," Then the

There are few scenes in literature more amusing than that which James DeMille who is the Admirable Crichton of Canadian literature one of the most versatile geniuses that Canada has produced, gives us in "The Dodge Club,", where an American senator who is travelling in Europe of the period. The conquest of Gaul, as In "The Cruise of the Shining Light," a teaches an Italian countess a verse from accomplishment that can never be forgot- self go as in none of his other stories, the the course of their conversation asked French nation. Without him the Gauls would perhaps a second time, have thrown themselves over Italy and destroyed the loves his own soul, may make a better he thought of Isaac Watts. The countess high civilization of the ancient world. It voyage of life than he himself had done was amazed that she had never heard of Dec. was Cæsar's victory that caused the Gauls sits on the edge of the boy's bed at night this great English poet, whom the senator 29 Sun dealing with the gigantic struggle itself. to embrace Roman culture. These feat-Shakespeare or Milton or Byron. She 31 Tue 8:12 4:50 10:20 10:48 4:27 4:57 asked him to quote some beautiful lines Jan. from his favorite author. The only thing he could think of was this verse

My willing soul would stay In such a frame as this, And sit and sing herself away To everlasting bliss."

"Stop one moment," said the countess "I weesh to learn it from you," and she looked fondly and tenderly up, but in stantly dropped her eyes. "Ma willing sol wood sta-"

"In such a frame as this," prompted the senator.

"'Een socha frames zees.'" Wait-Ma willing sol wood sta in socha frames zees.' Ah, appropriat! but could I hope zat you were true to zose lines, my senator? Well?"

"And sit and sing herself away," said the senator in a faltering voice, and Thos. R Wrer fear of committing himself by such uncommonly strong language.

Before the countess had succeeded in committing these words to memory the senator began to fear that he, with a wife at home, had been somewhat indiscreet in quoting such words to an impressionable Italian countess. The whole scene is inimitable, irresistible, and cannot easily be surpassed for the richness of its humor. No wonder Mrs. Scott-Siddons selected this passage for her recitals during one of her Canadian tours.

Some exception may be taken to the use of hymns for humorous effects, but Marian Keith and Professor De Mille have done so without shocking in any way the most sensitive of souls.—Rev. A.
