MR. AND MRS. A. L. MURRAY.

EMBRO, Nov. 10 .- An event of unusual interest to Zorra and the \mathbf{L} surrounding district took place in Embro on October 31, when there was celebrated the diamond wedding of Mr. and Mrs. A. L. Murray. Mr. Murray is one of the few surviving pioneers of the noted township of Zorra, and in his day figured largely in public and religious affairs, representing the township as reeve and in many other public offices.

In the early days he led the Gaelic singing in the historical Presbyterian congregation of Embro, and was an active member and elder of this church, much of his success and popularity in life being due to his wife, Annie McKay.

Mr. Murray is the only surviving member of his family, but a brother and sister of Mrs. Murray are still living. The former is Rev. R. P. McKay, D.D., ex-moderator of the general assembly of the Presbyterian Church, and Mrs. (Dr.) Andrew McKay of Woodstock is the sister

Many friends and relatives are extending their congratulations. Three children are happy to do honor to such loving parents-two daughters and one son, Dr. A. J. Murray of 866 Wellington street, London. There are 15 grandchildren and five great-grandchildren.

Mrs. Housewife At Home:

Dear Madam:-

Your Christmas shopping should be very much in mind right now. The weather has been so bright, there is a tendency to put it off. Mr. Merchant has been preparing for months, and stores are now ready to serve you.

The early shopper has many advantages, a complete stock from which to choose and leisure to shop. Prepare your list early as you can and shop early.

The merchants who are best prepared are now telling you every day in the columns of The London Advertiser about articles that will make ideal gifts.

Make it a rule, and you'll find it a profitable one, to read the merchants' advertisements.

With the season's greetings to every householder.

Yours to spread cheer,

Appoints Cardinals From Various Centers as Occasion Arises-New York First.

Rome, Nov. 11.—Decision of Pope Pius XI. to appoint as cardinals Archbishops Mundelern, Chicago, and Hayes, New York, at next year's consistory, will carry out the policy of the late Pope Benedict. Benedict's plan was to select car-

dinals from various American cities in their turn. The vatican, after honoring New York, Baltimore, Phila-delphia and Boston, decided that Chicago and then St. Louis should be honored. New York alone is regarded as entitled to a permanent cardinal. Hence the elevation of

Hayes. Pope Pius XI. has decided to hold a private consistory Dec. 11 and a public one Dec. 15, to promote sev-eral nunzios, including Archbishop Bonsano, Washington, to the car-dinalcy. It was announced today.

THE LONDON ADVERTISER, LONDON, ONTARIO, SATURDAY, NOVEMBER 11, 1922.

To the Electors of London:

At the request of thousands of citizens and taxpayers in general, including people in all walks of life, which includes working men and women, professional men, merchants, manufacturers, business men, fin ancial men, from the humblest citizen up, I have definitely decided to stand as a candid ate for the Mayor's chair for 1923, and I think it is only fair to you that I make this announcement far enough in advance (and not wait until the 11th hour), so it will give you plenty of time to look up by record, my reputation and my qualifications, and satisfy yourself that I will be able to carry out my platform and plan.

Building a City

is not different from building a house, or building a business-all that is necessary is to have a definite plan and then work to the plan.

I have been asked what my platform will be, and I can assure you that it has not changed from last year—no influences or special favors have or will change my views—and this platform and plan will positively be carried out—IF YOU SAY SO!

1-Commission Form of Government

An immediate move to secure a commission form of government, with a City Manager, a Finance Director, and a Purchasing Agent, who will be responsible for all city purchases-together with a small board of directors elected by the people, who will, in turn, be responsible for the appointments they make. The Ontario Municipal A ct permits this, and you have already voted in favor of it.

2-Service In All Civic Departments

This will be insisted upon, and 100 per cent courtesy and efficiency will have to be given by all employees. A complaint department will be opened, where EVERY citizen will be invited to make just complaints, or suggestions, and where they will receive attention promptly.

3-Civic Work

All jobs must be given on competitive basis, and the engineer will be com-pelled to tender along with others and made to do the work within his tender. And any contract let out will have the FAIR or MINIMUM wage clause inserted.

4—London Citizens

only will be employed in the works department-no importations, as it is not necessary; we have plenty of men here to do all our work.

5-No Reduction In Wages

but an increase where it is found necessary.

6-City Hall Salary Reductions

(Yes) Some of them

and a more equitable adjustment of salaries where required.

7—A Show-Down from the Street Railway Company

And no purchase of the company at the present time. We will wait. There will be a more favorable time shortly to buy the outfit, if we decide to buy at all. But we will insist that the company live up to Bylaw No. 916, which is a contract they made with the city. Every street intersection where the company has held up work will be paved, and if the company does not pave it voluntarily we will do it, and charge it to them, and then collect it. (Paving accounts have been collected before from them when some of the wise ones said it couldn't be done.)

8—City of London Bill

will be used only for the purpose for which it was intended—EMERGENCY CASES—and not used in putting things over on the citizens against their

9-A Pay-As-You-Go Policy

will be adhered to, the amount of work to be undertaken MUST be within our income. No unnecessary de bentures will be issued. Our debt must be reduced, and this will reduce ta xes.

10—Large Expenditures of Money must be voted on by the people.

Mr. Justice Lennox, in passing sen-tence, stated that there might be a chance of executive elemency in the case. He declared that, in ad-dressing the jury, he had hinted at manslaughter verdict being pos-sible, and that he probably would not have censured the jury had such a verdict been brought in, but he declared they had been justified in bringing in the verdict rendered. would move at once in an attempt to have the sentence reduced to a prison term. Bianchi sat through the court ses-sion this morning with eyes lowered, while several other prisoners, con-victed earlier in the court session, were sentenced. When the judge began to address him, however, he fixed his eyes on the bench and held them there, without wavering, even when the fatal sentence was pro-nounced. It is doubtful if he gleaned nounced. It is doubtful if he gleaned the full purpose of the judge's ad-dress, however, due to his limited command of the English language. At first the judge asked him to stand up, but noting his weakened condition, he told him that he might remain seated. Justice Lennox did not don the black cap in pronouncing

sentence, that practice having now been made optional. The judge's voice faltered and almost broke when he came to the fateful words which condemned Bianchi to pay with his life for the crime which he had committed.

This liability will be turned into an asset.

Now, fellow citizens, you are going to ask this question: How can the Mayor carry out this plan and platform without a Council in favor of it, even if it is the wish of the citizens? The answer is: If this proposition is in accordance with your wishes, then elect only the aldermen in your respective wards who will sign this plan and platform, and thereby give you their assurance and definite promise to carry out your wishes, the same as I have done. And then watch their action throughout the year.

I assure you that, should you elect me to the Mayor's chair, you will have a positive chance to know which way each and everay alderman votes on each and every item that comes before the Council, as the YEAS and NAYS will be insisted upon, and not merely a show of hands, as has been the habit in the past, and the same will be printed in the daily press after each meeting.

Unknown Persons Sought For by Lesser Officials of Organization.

London, Nov. 10.-Sir William Horwood, chief of Scotland Yard, and commissioner of metropolitan police, is suffering from the effects of an insidious attempt on his life, it became known today. Last night he was seized with what was thought to be a heart attack, but today it became definitely established that he was the victim of malicious administration of poison, the origin of which is unknown. All the subordinate officials of

Scotland Yard have been called to headquarters to assist in the investi-

gation. It appears that the chief had luncheon at a club yesterday, and in the afternoon was attacked with a severe vomiting speel, which brought on a heart attack. This caused com-plete collapse. Only drastic remedies, including the administration of oxygen, enabled him to survive the night. This morning he was remov-ed to a hospital, where he still reed to a hospital, where he still re-mains in a critical condition.

The duties of the railroad in regard to fires in the territory through which the T. N. O. is laid formed the theme for the examination of Mr. Clement and W. A. Griffin, superintendent. These two officials inclined to the opinion that the responsibility of the railroad lay only in preventing fires on its right-of-way and station properties. There was considerable dis-cussion on the value of cleared areas as fire guards, and at one point Mr. Heaton reminded witnesses that there was even a menace in clearings. DODGE BROTHERS MOTOR CAR

AND THE REAL

The evenness of performance so often remarked in Dodge Brothers Motor Cars is due, in no small part, to the thoroughness with which each unit is inspected during the process of manufacture and assembly.

A trained staff of 800 experts is employed in this work alone, and approximately 5285 individual inspections are made on each car.

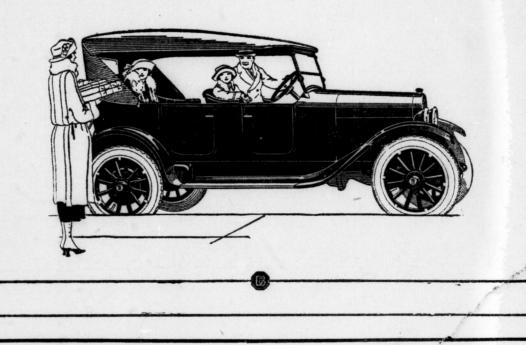

So exacting and rigid are the standards applied to these inspections that the slightest variation either in workmanship or material is instantly discovered and rejected.

Dodge Brothers are almost over-scrupulous in their constant aim to make each car as sound and perfect as is humanly possible.

A CUSTOMER comes into your store where two similar articles are for sale at the same price. One of them is a nationally advertised article, the other is not. Which does he buy? The National Retailers' Association found the answer to be:

> 87.6 times he buys the advertised goods. 3.6 times he buys the unadvertised goods. 8.8 times he does not have a preference.

When the unadvertised article is the lower priced of the two, which does the customer buy? On the same authority the answer is:

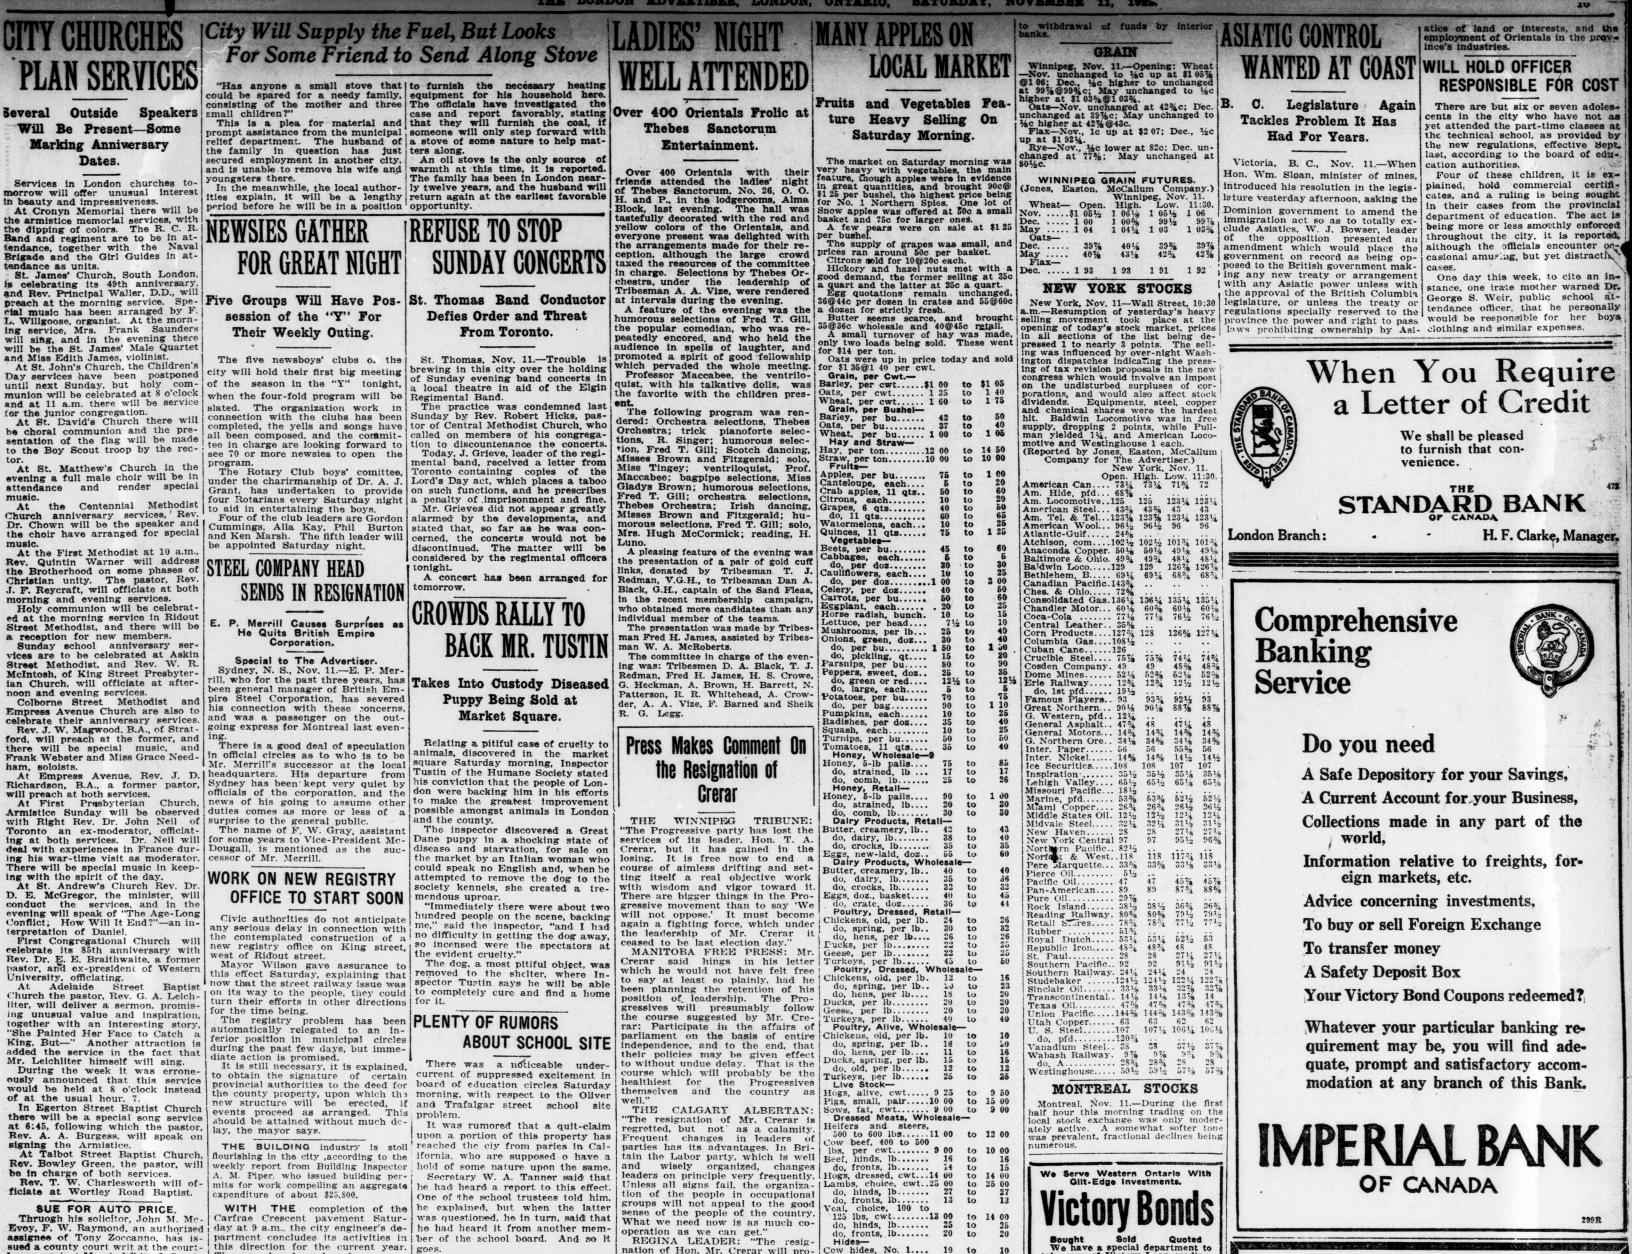

> 60.6 times he buys the advertised goods. 24.2 times he buys unadvertised goods. 15.2 times he does not have a preference.

Branded and trade-marked, goods nationally advertised in the columns of your Daily Newspaper, are most quickly turned over and most profitable. That is because manufacturing prestige has been tied up to local friendship and reputation for honest merchandizing:

The young Fox, who was Farmer Brown's Boy's prisoner, had a new interest in life. He spent most of his time watching the two geese which Farmer Brown's Boy had brought home. For several days they were kept in the henyard. All day long the young Fox would watch them and dream dreams of catching one of them. How he did wish that Farmer Brown's Boy would let those geese out!

At last he did. It happened on afternoon. Farmer Brown's Boy opened the henyard gate, and out came all the hens for exercise. Finally the two geese came out. The young Fox hid in his house as he had done so many times before when the hens were out. He no longer was interested in the hens. All his in-

terest was in those two geese, and not once did he take his eyes from where he could keep watch of the hens. He had done this whenever Nearer and nearer they waddle couldn't wait. Brockville, Nov. 11.—As a com-mentary upon the immigration situ-ation in this country, it is interesting to note that this year up to the present 185 settlers from Canada have entered the United States at the port of Morristown opposite here, exceeding by 34 the record for the entire year of 1921. The port of Morristown has led the St. Lawrence immigration district this year in the number of settlers entering. Many are farmers who have disposed of their properties in Eastern Ontario their properties in Eastern Ontario to resume farming in New York State, while others have been attracted by industrial opp over the border.

In the ability of the Petrolea wings in getting down under Misselebrook's punts proved the locals' undoing, while the spectacular running of Karn, Gray and Perry for Sarnia played an im-tory. For Petrolea Misselebrook was the outstanding star, scoring all three points by his kicking, coupled with fine end runs by Gallivan of the locals. The superior bucking of Scharfe, White and Currie kept the visitors' margin low. McPhedian, the star centre half of the Sarnia juniors, played a fine game for the cleanest ever staged between the tesms, although much crabbing was feree's decision a great deal. Referee Reid is to be congratulated on the way for the locals, both teams ployies. Life and Character Reading. NOVEMBER 13. The woman born on this date is a regular scold and nag, and she will do well to notice the effect of such conduct upon those about her. Vivid memories of the war, and the searing experiences undergone by men of Canada and the Empire at men of Canada and the Empire at that time, were recalled in the ser-mon delivered at First Presbyterian Church, Sunday, in commemoration of the signing of the armistice, by Right Rev. Dr. John Neil, ex-moder-ator of the Presbyterian Church of Canada. Dr. Neil, during his term of office as moderator, in 1917, visited the bat-tlefields of France, and was an eye-witness of what men endured for freedom during the trying years of the great war. Thus his sermon was most graphic and inspiring, bringing home, as it

Thus his sermon was most graphic and inspiring, bringing home, as it did, the inspiration and experience so dearly bought by Canadian soldiers. Dr. Neil paid particular tribute to the chaplains, and the nurses and doctors, who steaffastly backed the armies of the Empire. "And." he added, "there was not a chaplain in France who worked

And, he added, there was not a chaplain in France who worked harder or accomplished more than your own minister, Dr. Beattie." Of the soldiers themselves he said: "I never came into contact with more courageous or optimistic men. They ware obsolutely confident of violatory were absolutely confident of victory Now that they are back, he would not forget how much they did for us." It was Dr. Neil's opinion that the world should strive for peace, but he believed that peace was not pos-sible until the safety of humanity sible until the safety of humanity was secured. Speaking with refer-ence to the Turkish question, he de-clared that war was a necessity un-less by some other means they were stopped from their brutal massacres. "Let us pray for peace and see that the gospel of Jesus Christ rules in the land," he concluded.

resonant richness of contralto and bass.

The same experience has discovered the best record composition to do full justice to these master recordings.

When Emile Berliner invented the Gramophone in 1887, music was truly immortalized.

The steady, consistent development of "His Master's Voice"—Victor recordings to their present state of perfection is one of the most romantic stories of our time. Starting as pioneers with the first disc record and recording apparatus, they have brought forth practically every outstanding improvement; every innovation, that has widened the field of the gramophone and carried the music of the world's greatest artists and orchestras to the farthest corners of the earth.

When Eldridge R. Johnson, head of the Victor Talking Machine Company, replaced the etching method of recording with the wax engraving process; introduced the first spring motor Victor was the first to record the voices of the great artists; first to record the operatic arias; the great violinists and pianists. And to-day the greatest of these artists record exclusively for Victor.

From the earliest pioneer days of the industry "His Master's Voice" has assumed the leadership in practically every advancement and improvement in recording and reproducing and today "His Master's Voice"—Victor Records and Victrolas are acknowledged supreme in every part of the world.

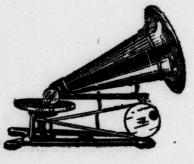

Every secret learned in 35 years' experience has developed a method of recording so perfect that it catches every delicate sound wave of violin and 'cello; of piano and harp tones and the beautiful overtones of tenor and soprano, as well as the And you will also find that dealers in "His Master's Voice" — Victor products enjoy the best standing in your community, completing the chain of quality from the maker to the buyer. THE EMBROIDERED BLOUSE.

(Copyright, 1922, by W. Werner.) WHEN Anna Hess went to Mrs. Cronin's little shop for her weekly allowance of work Mrs. Cronin said to her: "Now, all this work I'm giving you today is for one person, and you must be very par-ticular about it. Especially about the blouse. You see what fine material it is. I've stamped it with a forget-me-not design. That makes very close work, and I would not trust it to any one but you, Anna."

Anna Hess smiled faintly. When bread and butter, fire and shelter, and an occasional garment is the direct sequence of being able to please an employer one needs act gratefully when handed a parcel of work, even though that work be so fine that it taxes eyesight, nerves, and strength to the utmost.

One could imagine no greater conetween two women than there was between Anna Hees and Mrs. Cronin. Mrs. Cronin was big and sandy. When her husband died and left her without a penny she made the most of her one little gift—a critical taste for embroidery. Hence the embroidery shop. And because Anna Hess lived next door she had hired and developed Anna until there was no piece of needlework too intricate for the girl to do. Looking at her one wondered how a structure so frail as her body could have such powers of endurance. Anna was slight and pale, with blue eyes and fine, fair hair. More sunshine and outdoor air, more joy, better food, and an interest in life outside her

work would have made her pretty. As the girl turned to go, Mrs. Cro-nin stopped her. "By the way, Anna." she said, "haven't I heard somewhere that you are related to Audrey Andover?" Anna flushed. "You need not tell me if you don't want to." added Mrs. Cronin, with some asperity

she hurried toward home she thought sadly that the pride was all hers. It was to shield Audrey from the opprobrium of being related to her that she never mentioned it. In Anna's eyes Audrey was the most wonderful person in the world. Money had come to Audrey from her mother who had married successfully, and she lived with an old friend of her mother's, Mrs. Vance, at the Hill House, the showplace of the town. For three years now-indeed, ever since Audrey finished at college, Mrs. Vance had not been well and Audrey had companioned her in long visits to California, Florida, and Bermuda. Succeeds Mrs. John Stevely at Annual Meeting in the Utilities Building.

Mrs. George T. Brown is president of the ladies' auxiliary to the London Health Association, succeeding Mrs. John Stevely, who tendered her resignation at the annual meeting held Tuesday forenoon in the public utilities building. Pressure of other responsibilities has made it necessary for Mrs. Stevely to give up the office which she has filled successfully since the death a year ago of Lady Beck, president from the time of the organization of the auxiliary, eleven or twelve years previous. Mrs. B. C. McCann, who took office

as treasurer at the same time that Mrs. Stevely assumed the presidency, resigned for a similar reason. Mrs. Gerald Pearson was elected to take her place. Mrs. C. H. Ziegler, secretary since the beginning of the work, was prevailed upon to carry on the duties of her office for a thirteenth term.

Mrs. Stevely was named honorary president, and Mrs. H. E. Gates and Mrs. J. Judd elected first and second vice-presidents, respectively. An important item of business was

shaping up of plans for Christmas cheer for the civilian patients in the sanatorium, and the children in the preventorium. Mesdames Harley Brown, Joseph Judd and C. H. Ziegler will be responsible for looking after the adult patients, and the

(IT WAS was down at the grocery store today, and Mr. Williams told me he is selling eggs according to grade now."

"What does that mean? According to size, or age, or what."

"Well, it means both. The Government has established standard Canadian grades for eggs, and upto-date stores sell eggs marked 'specials,' 'extras,' 'firsts' or 'seconds.' The largest, freshest, nicest eggs are the 'specials,' the next are the 'extras,' and so on down."

"I think that's a splendid idea. Why, when you buy a dozen eggs now, you'll know what you are really getting. Many a time I have bought so-called fresh eggs, and thrown out about half of them."

"So have I, Mrs. Smith. But now, Mr. Williams says, all his

eggs are graded. They have a way of holding them up in front of an electric light, which makes the interior of the egg visible. You can tell exactly the quality of the egg and the grade to which it belongs."

"Oh, I think that will be a wonderful improvement! Think of getting eggs of the quality you pay for."

"Yes, you can buy 'specials' or 'extras' for boiling, and 'firsts' or 'seconds' for other cooking purposes. You won't have to pay as much for the cooking eggs, of course, and you'll be sure the boiling eggs are every one of good quality.'

"Isn't that splendid! I'm going to ask our grocer for graded eggs after this. We'll use eggs more freely now."

At its new low price of \$1795 the Studebaker Special Six Touring Car maintains Studebakerideals of quality and performance, with added features that make it even a greater value than before.

It is known for its striking beauty just as it is for its thorough dependability. Luxurious comfort is assured by the nineinch seat cushions of genuine leather and the long semi-elliptic springs, front and rear.

Power, flexibility and ease of handling are combined to make the Special-Six the most highly regarded five-passenger car on the market.

By manufacturing complete motors, transmissions, bodies, tops, castings, forgings and stampings, middlemen's profits on ninated and one profit only is included in Studebaker prices. Highest standards of workmanship are maintained and materials are the finest the market affords. There are 9,500 inspections in the course of manufacture before cars are passed for delivery.

How Tire and Rubber sales are increased by Long Distance

Some quotations from recent reports:

"We have increased our use of Long Distance 33-1/3% for the first six months of 1922."

"When travellers come in they leave a list of customers they will be unable to call on the following week, and these are called by Long Distance from the Branch Office."

"At each Branch we have one man who does nothing but sell over the telephone."

"One of our staff is allotted to take Long Distance orders at his home after business hours, so as to secure the reduced rate for night service."

"We often call up customers by Long Distance between salesmen's visits."

> We can tell you how to apply Long Distance to almost any business

was not the young Fox's idea of hap-piness. He never could quite forget for even a single little minute that he was a prisoner. Sometimes when there was no one around he would lie for hours looking out across the Green Meadows, over to the Green Forest and the Old Pasture, with such longing in his eyes that I am sure Farmer Brown's Boy would have taken pity on him had he seen him. Then very early one morning, before anyone was astir in Farmer Brown's house, the young Fox made a discovery. The staple which held the chain by which he was fastened the chain by which he was fastened to a post had become loose. The young Fox tugged at the chain and it seemed to give a little. He kept tug-ging and tugging and tugging. At last that staple pulled out. It pulled, out so suddenly that the young Fox fell right over on his back. When he got to his feet he discovered that he was free. Yes, sir, he was free. To be sure, that chain was still fast to be sure, that chain was still fast to his collar, but it was no longer fast to that post.

The New-Day Dentifrice

Now advised by leading dentists the world over

Have you noted how most pictures now show pretty teeth? And how countless peo-ple, wherever you look, show beautiful teeth when they smile nowadays?

Those are results of this new way of teeth cleaning, which millions now employ. Now we urge you to try it at our cost, and to start

Try combating film

Until late years, nearly all teeth were kept clouded by a film. And 49 in 50 people suf-fered from film attacks.

Film is that viscous coat you feel. It clings to teeth, gets between the teeth and stays. It forms the basic of dingy coats, in-cluding tartar, unless you constantly combat it. Stains are absorbed by that film.

It also holds food substance which fer-ments and forms acid. It holds the acid in contact with the teeth to cause decay. Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea.

Old ways ineffective

No ordinary tooth paste effectively fights film. In fact, tooth pastes based on soap and chalk even make the film more clinging.

So dental science has for years been seek-ing film combatants. Two effective methods have been found. Able authorities proved them by many careful tests. And now leadtists almost the world over advise their daily use.

A new-type tooth paste has been created, based on modern research. The name is Pepsodent. In that tooth paste are embodied those two film combatants - one to curdle the film, one to remove it.

Careful people of fifty nations are now using this new method, largely by dental advice. To millions of homes it is bringing a new dental era.

Two other new effects

Pepsodent brings two other effects which dental science has now proved essential.

It multiplies the starch digestant in the saliva. That is there to digest starch deposits on teeth which may otherwise ferment and form acids.

It multiplies the alkalinity of the saliva. That is there to neutralize the acids which cause decay.

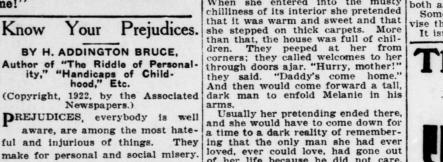

The ordinary tooth paste brings just opposite effects. It decreases these two great tooth-protecting agents which Nature has provided. Pepsodent, with every use, gives them manifold effect.

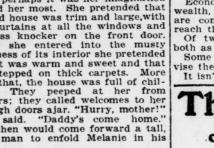

Thus to millions of people in every clime Pepsodent has brought new beauty, new pro-tection. The benefits will be life-lasting. Tooth conditions among whole races are being altered by this method.

Brings Added Charms and Quickly Mon will see the Pepsodent ef- fects, amazing and delightful, after very little use. Thesent the coupon for a 10-Day fuel. Note how clean the teeth feel after using. At night she came home to the tiny old run-down house which her mother had left her, and there perhaps it was her imagination helped her most. She pretended that the old house was trim and large, with fine curtains at all the windows and a brass knocker on the front door. When she entered into the musty chilliness of its interior she pretended that it was warm and sweet and that she stepped on thick carpets. More than that, the house was full of children.
