

The Weekly Monitor.

BRIDGETOWN, JANUARY 8, 1879. A CORRESPONDENT.

A communication, covering several sheets of foolscap, headed "Retrenchment," has been sent to us for publication in the Monitor. It is signed "Homespun," and very properly, for his style and knowledge of the matter of which he treats, indicates that he is a homegrown type of man to inform and enlighten the public through the medium of a newspaper. The vision through which he views things, pertaining to the country's general interests, is microscopically narrow, and his knowledge of governmental duties and responsibilities are exceedingly meagre. He has, we admit, more common sense than erudition—more patriotism than information—more zeal than ability to do so. His language is coarse, his style clumsy, and his sentences wretchedly ungrammatical. He lacks the necessary mental training and thorough acquaintance with public questions and matters, which are indispensable in addressing the reading world through the Press.

But where Homespun's communication wholly fails in other respects, its prolixity would preclude its insertion in the Monitor. He attempts to discuss subjects with which better informed minds and practiced pens would be loath to grapple.

Notwithstanding his obvious ignorance of many things which he daringly presumes to discuss, some of his homely remarks are not altogether unobjectionable. Unacquainted as he is with the first principles of political economy and with the workings of the country's civil service, he ventures to insist upon great retrenchment in every office, and in the salary of every officer, principal or subordinate, in Nova Scotia. He says, in substance, that the salary per year of the Lieutenant Governor should not exceed three thousand dollars—that the head of a department should be more than one thousand dollars—that no clerk should receive more than six hundred dollars—and that several of the clerks are unnecessary, and should be dispensed with. He complains, perhaps properly, that the legislative expenses of the country are out of all proportion to our financial means, and to the business required and labors performed. He insists upon the immediate abolition of the Legislative Council. He says that the Speaker of the Assembly should not receive more than five hundred dollars yearly—that there is no necessity for a second clerk in the Assembly—that the salary of the first clerk should not be more than four hundred dollars—that the members' pay should be reduced to five hundred dollars each—that each member should do his own printing, and thereby save the expense of a Chaplain—and that the office of sergeant-at-arms is a mere sinecure to reward the out-door services of some zealous political partisan. He expresses an opinion respecting the construction (loosely considered) of the Executive Council. He thinks that the members of administration residing in remote parts of the Province should not be called to the Capital during the legislative recess, and get pay for what he calls "journeys of pleasure."

We have very meagrely outlined what Homespun, at tedious length, recommends as a system of governmental retrenchment. While we agree with some of his views, we would remind him that our ablest and best men should have the management of our provincial affairs, and should be adequately paid for their services. Homespun, we think somewhat presumptuously, offers to fill "any office in the Province for four hundred dollars." He is gravely deluded by an over-estimate of his abilities; for judging by the manuscript before us, he is incompetent to discharge the duties of the humblest clerkship under the Government.

THE ENTERTAINMENT at Victoria Hall, on New Year's night, was, we are glad to say, a great success in every respect, where all performed the parts assigned to them so well that it would be invidious to particularize; but certainly the thanks of all who attended are due to Miss Hatch for the very active and efficient part she took in getting up the entertainment; indeed, without her assistance it could not have been undertaken, and it is but justice to say that the success of the entertainment was mainly owing to the artistic taste and skill displayed by this young lady in the selection and arrangement of programme. Our space will not permit us to give anything like a description of the various pieces, which to be appreciated need to be seen. The exhibition of *Statuary*, which we are informed was arranged together by Miss Hatch, has elicited unbounded admiration from all who had the pleasure of seeing it. Mr. Carter Troop, now an established favorite with Bridgetown audiences, displayed his usual amount of veracity and comical talent. Several of his character songs were repeatedly encored. Selections of music of a popular character were performed during the evening, which were not only pleasing in themselves, but also served to fill up the delay between scenes, unavoidably attend-

ing all amateur performances. The thanks of the managers are due to Mr. J. B. Reed, for the organ so kindly loaned on this occasion. We have to thank the company for a most pleasant entertainment, and beg to express our hope that some of our dull winter evenings may be enlivened by a few more such innocent pastimes. The amount realized was about \$28,000.

THE LATE BURNING CASE.—When this sad calamity occurred at Lawrencetown, we felt inclined to give as little publicity to the details connected with the same as it was possible to do, feeling that for the sake of the community in which it happened that this was the best course to take. The first communication, sent the "Morning Herald" of Halifax, in reference to the calamity, was sent under an assumed name, and the statements made therein were not true. The next communication was an attempt to bolster up the first one after we had stated that they were not in accordance with the facts of the case. The second communication to the "Herald" was signed by J. W. James, Esq. We therefore infer that he was the writer of both, and a sorry mess he made of it. His reference to the "Monitor," in the first communication, was very much out of place. In it the proprietors of this paper were censured for not giving a detailed account of the affair. What right has Mr. James to dictate to us how we shall place before our readers any notices of accidents, &c? Would it not have been more gentlemanly in Mr. James to have dropped us a line, giving us all the reliable statements of the sad calamity? rather than to rush into print in a daily paper in Halifax. Possibly the reason he did not see fit to do so was that it might lower his dignity too much to write for a country paper. If so, we can assure Mr. J. W. J. that whoever buys him at his own valuation and sells him at the estimate of those who know him best, will find a great shrinkage on first sale.

HALIFAX, (By Shore).—Another fisherman is to be added to the already large fleet now on here. She will be about forty tons, and is being built by Mr. Thomas Sibbins and son, and will be launched in May or June. Mr. George Gask is erecting a fine new house with all the modern improvements. We had rather a novel marriage the other day, an old gentleman, five-and-sixty years of age, thought he wanted a young wife, and took one 13 years of age. This will decrease the county grant for this year at least. The fishermen on the coast are now handling things within themselves, making all their own boats, nets, barrels, etc. We have the "boss" tea-pots over here yet heard from. Mrs. Gilbert Chute has one which has been in constant use for over 3 years, and Mrs. George Gask all one which for 14 years has been in active service. We want a good blacksmith here, none for 12 miles; a good workman would do well.—Com.

THAT BELL.—Our Annapolis contemporary is distressed to know where the bell recently placed in the Baptist Church here, was manufactured, and goes on to say that it was ordered from New York that it be built up that City, and left our own artisans languishing for something to do. He further informs us that "Spence & Co., of Bay View Island, Annapolis, could have made as good a bell, of as good material and as rich a tone."

All very well, friend Banks, but Spence & Co. did not have their capabilities for executing such work prominently before the public, in the shape of an ad. in the Monitor, consequently our Baptist friends wrote to parties who do advertise such things. "Yun, yum!"

A subscriber writing us from Orange, Los Angeles, Cal., says:— Please find enclosed two dollars, which you will please place to my credit. The Monitor has come every week but one for the year '78, and it is only those far away from homes that know how to value the paper of their native country. This has been a very beautiful year for this country, but the railroad monopoly takes all the prosperity from the farmers. We have had no rain as yet this winter, and we fear another dry year. The oranges have been very much damaged by the high winds that have prevailed lately. The frost has destroyed all the winter crop of potatoes in this valley, and there are more poor people here than in almost any part of Nova Scotia. I hope to see you and others of my old friends in Bridgetown before we pass in our checks. J. H. P.

FORTUNE.—Some time ago we inserted in the Monitor an extract from a California paper, giving a description of the funeral of Mr. Pinney, a native of this county, who moved to California some years ago. Mr. Pinney left two brothers in this county, who at his death received word that a large amount of money was willed to them by the deceased. A considerable portion of the money has been forwarded, and we learn that still there is more to follow.

TRAIN ALTERATIONS.—The W. & A. Railway announce the following alterations in their train service:—On and after Monday, 6th January, and until further notice, the Express Trains on Mondays will be discontinued, and accommodations trains will be run instead, leaving Windsor at 11.30 a.m., and Annapolis at 7.15 a.m. See time table.

S. S. CONYER.—The Sunday School concert given by the children of the Baptist Sunday school on Sabbath evening was of more than ordinary interest. The subjects were the "cup," the "cross," and the "crown," and the answers given in reference to each of the subjects, by the different classes, were very appropriate and to the point. This school is certainly far in advance of what it was a few years ago, showing more than an ordinary degree of pains-taking on the part of teachers and scholars.

QUICK PASSAGES.—Two of our Annapolis Co., vessels have made very quick passages across the Atlantic during the past month. The barque "Cyrus," built here and launched last August, made the run from New York to Glasgow, on her last voyage in 22 days. The barquentine "G. E. Corbit" left Annapolis about the same time and arrived at Glasgow in 22 days. She was loaded at Annapolis with apples, sundry shippers, and is owned by A. W. Corbitt & Son.

—In another part of this issue under the head of correspondence, a valued friend takes us to task for admitting into our column poetry, which, he contends, is faulty in every respect. The lines referred to were laid aside as being received, and were not placed in the hands of the printer for insertion, but by some means they got mixed with other copy, and thereby inserted. We fully agree with our correspondent in most of his remarks.

PORT GEORGE.—A correspondent from Port George says the light recently erected on the Isle of Haute was lighted on the 2nd inst., for the first time. It is a revolving light and very brilliant. It will not be lighted permanently until the 15th inst. The young men of this place have organized a Young Men's Christian Association, which, to all appearance, is doing a good work. A great change, certainly.

LAWRENCETOWN.—An entertainment was held in the Methodist Church, on Monday evening, by the Sabbath School children. The Rev. Mr. Gee conducted the concert with his usual ability. The recitations by the scholars were well received by the large audience. Mr. Fred Hall presided at the organ and led the singing. The proceeds are to be appropriated to the use of the school.

MINISTERIAL CONFERENCE.—The next meeting of the Annapolis County Ministerial Conference, on Tuesday, Jan. 11th, at 10 o'clock, a.m. All the ministers in the county are cordially invited to be present.

DYING.—The subscriber is agent for Gilbert's Lane Eye Sore Ointment. Mr. Fred Hall presided at the organ and led the singing. The proceeds are to be appropriated to the use of the school.

MEETING OF THE ANNAPOULIS COUNTY DEGREE LODGE.—The twelfth and regular meeting of the Annapolis County Degree Lodge, L. O. G. T. was held at the residence of Mr. J. H. P. on Friday, 27th inst. The morning of the 27th broke clear and beautiful, everything in nature seemed to rejoice at the appearance of the beautiful sun, which does not less us with his lucid presence every day at this season of the year.

The day preceding the 27th had been visited by a light snow storm which, to certain parts had made good sleighing, and Mr. J. H. P. had a good deal of sleighing. The beauty of the day, the good sleighing, the merry Christmas time, made the meeting our best and most enjoyable yet, perhaps more than usual. The morning session began at ten o'clock and closed at twelve. The afternoon session began at two o'clock and closed at five. The time was spent in hearing reports and conferring degrees, and it was a session of interest and profit to all the brethren present. A resolution was formed and unanimously passed in connection with the suppression of the liquor traffic in our County, which we see the order in our County is progressing slowly. We will have a few statistics:—

No. of Lodges in the County..... 20
Admitted during the quarter..... 21
Lost and expelled..... 42
Present membership..... 150
Parliamentary reports..... 150
Clergymen..... 9
Public Meetings held..... 2
Average attendance of Members..... 40

May the cause prosper more rapidly in this County, year by year.

cause of Temperance. The music provided by the members of "Enterprise Lodge" added much to the interest of the evening, and reflected much credit upon the singers. A vote of thanks was proposed and tendered to "Enterprise Lodge," and the friends of Temperance, for the kindness and hospitality extended to the delegates and visitors, also a vote of thanks was proposed and tendered to the choir, and a request rendered. The choir then sang the "Sweet by-and-by," accompanied by the organ and bass-viol, which was indeed a treat to the Rev. O. Parker offered, and prayer and benediction. This ended the County Degree Meeting, with profit to all concerned, and to the subscribers.

CENTRAL BOARD OF AGRICULTURE.—The Executive Committee will meet at Halifax, on Tuesday, 7th January, and continue in session for a few days. The work at this session is extensive, embracing an examination of the reports, accounts, attended to, and returns of Agricultural societies throughout the Province. The nominations for the formation of a new Board have been received, preparatory to submission to the Government. Applications for the Provincial Exhibition of 1879 have been received from Truro, Kentville, and Halifax city. The consideration of this subject, which is the chief of local interest, will be taken up on Wednesday morning, 8th January. It is also intended to check over for the publication of the *Scott's Herd Book*, by subjecting the registers of live stock to a thorough revision. It is accordingly required that registered animals be transmitted without delay to the gentlemen who have been requested by the Board to undertake the collection of material.

For Jerseys and Guernseys—Colonel Lewis, Oakfield.
For Devon—Major Longworth, Truro.
For Ayrshires—David Matheson, Esq., Pictou.
For short Horn Durhams—W. E. Starratt, Esq., Paradise, Annapolis Co.—Herald, 30th ult.

Correspondence.—We do not hold ourselves responsible for the opinions of our correspondents. [To the Editors of the WEEKLY MONITOR.] GENTLEMEN,—With the literature of your paper, both original and selected, I have far more to do with of contemporary. In your editorial department, your pens are used with scrupulous taste, and your opinions are given in pure English phraseology. You avoid that stony, slipshod style which too often deforms the columns of newspaper literature, and sets at defiance the simplest rules of grammar. In mere prose a common-place style may be allowable, but in poetry, the thoughts should be fashionably elegant. It is not enough in poetry that the language is unobjectionable, but the measure accurate, and the utterances of genuine Bards, with which few poets of this age are endowed. The metrical mechanism of poetry may be taught, or acquired by study; but its spirit is a natural gift. An ancient critic has said a natural gift of song "is born with the elements of poetry burning in his soul." In other words poets are born, not made. The most distinguished philosopher or the most eminent scientist that ever lived, without the spirit of poetry, in his intellectual organization, will be but a dullard. It could be re-created, with all the appliances of preserving study, could never be re-created in a poet, half so original, so charming as Burns' address "to a daisy." The lines are few and simple, yet exquisitely beautiful. They are the spontaneous outpouring of a poet's soul. In your selections for your poetical department, generally speaking, you have exhibited care and taste. But as I am desirous that you should sustain the literary character and *status* of the Monitor, and not lose its reputation which, in this respect, it now enjoys, I beg leave to warn you against the admittance of verses, by no means so good as those which you have so often published. Poetry, to be readable by people of taste, should not only be fairly good, but very good. And those who conduct newspapers, are unwilling to damp the ardor and ambition of aspiring poets to acquire, by their efforts in the line of poetry, it is a real *redoubt* to such presumptuous intruders into their literary domain, to let them know that they are attempting to fly where they have not vigor of wing to sustain their feathered attempts at flight. In prose, inaccuracy, and a common-place style; are bad; but in verse-making they are intolerable.

In the Monitor of the 25th ult., under the head of "Poetry," there are lines on the death of an Infant, in which there is a great deal of the true spirit of verse-making ability; and, grammatically considered, it is grossly faulty, as respects several of its constituent parts. It is my present purpose to point out some of the more glaring of these defects. As regards the first, the fifth stanza, the following line is seen:—"You who guide so discreet." To be grammatically accurate, the verb to agree with its nominative, should be *guidest*. In the same stanza the word "discreet"; which is an adjective, is used as an adverb. In the next stanza, the following line is seen:—"You see not so many sorrows." The verb in this line should be *are* seen.

In the first stanza death is made to rhyme with rest; and in the fifth, weak with discreet. These rhetorical defects are wretchedly obvious.—In the second stanza there is this line:—"Ah! white as chivalled marble." There is needed an unaccented syllable between the words *ah* and *white*, to make the poetical measure correspond with the rest of the lines. This attempt at poetry is probably the effort of a daring school-boy, whose poetical reading extends little farther than the nursery song, entitled "Old Mother Hubbard." If you continue to keep up your reputation for literary taste, you must denounce the publication of sorry attempts at verse-making of those which I have been reviewing.

Yours etc., AN OUTRAGED FRIEND. Middleton, Jan. 2nd, '79.

DEAR MESSRS EDITORS, I deem it but justice to myself to say, frankly, that the marriage with which my name stands connected in the Monitor of the 27th inst., was contracted whilst I was in entire ignorance of certain facts which have since come to my knowledge. More facts are requested to make immediate payment to JULIA M. LEONARD, Executrix. Paradise, Dec. 19th, 1878. 3m149

NOTICE! ALL persons having any legal demands against the estate of William L. Leonard, late of Paradise, in the County of Annapolis, deceased, are requested to render the same, fully attested, within eighteen months from this date; and all persons indebted to said estate, are requested to make immediate payment to JULIA M. LEONARD, Executrix. Paradise, Dec. 19th, 1878. 3m149

NOTICE! THE Co-Partnership heretofore existing between the Subscribers under the name of BALCOM & BROWN, terminated on the 15th day of October last past, by effluxion of time. The business will be continued under the SAME NAME, by W. J. H. BALCOM, who assumes all liabilities of the late Firm, and to whom all debts must be paid. Wm. J. H. BALCOM, ALFRED D. BROWN. Nictaux, January 3rd, 1879.

Miscellaneous.

John, a stone-mason, was murdered at Quebec on Sunday night by two brothers named Clavert, against whom a verdict of murder has been found by the coroner's jury.

Colonel Henry T. Foster, of Burkeville, Va., aged 72 years, was on Saturday married to Miss Amanda Cummings, aged 69 years. They have been engaged since youth, but the lady had demanded that the Colonel should give her \$20,000 on his wedding day. She finally relented.

The recent sudden thaw caused numerous floods in England and Scotland. At Nottingham the flood is the greatest known for 14 years. The country around Darlington and Lexington is flooded for miles, and much damage is reported at Berwick and Aberdeen.

Five human skeletons have been discovered by some workmen at Dambriest, near Dunfermline. They were only 18 inches beneath the surface of the ground. The spot where they were found was the scene of the murder of the Earl of Moray by the Earl of Huntly, in the year 1591.

An English bridegroom residing at Plymouth had a very eventful honeymoon. He quarrelled with and thrashed his wife the second hour after marriage, thrashed her again at night, after clubbing the wedding guests out of the house, and on the second day sold all his clothes, except his trousers, for rum, and wound up in jail on the third day.

The business failures officially announced in Great Britain and Ireland during 1878 have been 15,000, of which 2543 were in financial and wholesale and manufacturing branches of trade, and 12,457 in retail trades, professional pursuits, builders, publicans, working classes, etc., against 2172 and 8859 under the respective headings in 1877, showing an increase of 5037 failures last year over the preceding year.

On Tuesday, Dec. 31st, a lat about 14 years of age, son of Mr. Hall, resident Manager of the Spring Hill coal mines met with a very painful accident by having his mittens caught in the cog gear of the rotary screen. In his hand and arm were drawn between the cog wheels and literally chopped to bits. At length his face and side came in contact with the wheels and the bones of his shoulder were sufficient to stop the machinery. He was promptly relieved from his awful position and his wounds carefully dressed, the hanging shreds of flesh being amputated. Very slight hopes of his recovery are entertained.—Chronicle.

When the late Mr. McNab, curator of the Edinburgh Botanic Garden, was taken to see Dabufe's picture of "Adam and Eve," he pointed out that the first woman was depicted as a first man with a pippin of a variety that was not known until the middle of the present century. Next to the first man's picture was similarly condemned, because none of the pigs feeding in the farm-yard had their feet in the trough, and the artist remedied the omission, precisely as David corrected a battle-piece where a coachman pointed out that a horse was in a ladder of steam, though with a bit to clamp ahead. One statue of Nelson was regarded as perfect till an old sailor discovered that the rope, which was an accessory, was coiled the wrong way.

DIPHTHERIA COMMUNICATED BY KISSING.—The London (Globe) correspondent of the Toronto Globe says:—The sanitary state of the Palace at Darmstadt is reported to be perfect. The building has recently undergone thorough repair, and particular attention was paid to the drainage. The distinguished German physicians in attendance have issued a report upon the cause of the diphtheria epidemic in the Grand Ducal family, and they arrive at a very singular conclusion. The whole of the ducal family, with the exception of one princess, suffer from the same disease. "When no one else in the Palace has been attacked, the physicians have arrived at the conclusion that the infection has been communicated by kissing."

10,000 SWEDES COMING.—Among the passengers by the mail steamer Polytechnic, which arrived on Sunday, was a gentleman from Sweden with his family, who left for Ottawa yesterday afternoon, to negotiate with the government for a great tract of land—probably in Manitoba or Keewatin. Should he succeed in obtaining suitable land, he will go back to Sweden and bring out 10,000 of his fellow countrymen. He says times were never known to be so bad in the history of the country, as they are in Sweden at the present. He is a well educated, noble looking man, six feet four and half inches high, and measures 58 inches round the chest. If he is a specimen of those who desire to come out, they will certainly be a most desirable acquisition to the population of this country.—Herald.

A BROKER'S THEFT.—Field & James, brokers, of New York, report that they have been robbed of bonds worth \$30,000 by J. W. Hull, a curbstone broker, who was known to one of the firm. Hull, they say, on Thursday arranged with them to buy for him \$30,000 worth of United States 4 1/2 coupon bonds. Being known, he was not asked to deposit any money, and when he called to receive the bonds, the cashier handed them to him with out hesitation. He counted them over, and when he was in his pocket, and left with the remark that he would stop round for the moment at his bank, but he never returned with the check, and no one saw him since he left his office. The bonds, with their coupons, are as negotiable as gold, despite the fact that their numbers are known. The firm has offered a reward of \$5,000 for the apprehension of the thief and recovery of the bonds. Hull has gone south.

Telegraphic News.

EUROPE.

London, Dec. 31.—The Mayor of Manchester writes that £1,500 have been collected for relief fund. About 6,500 persons are receiving relief.

Two thousand men in South Staffordshire have been discharged from the workshops and great destitution results.

The report that one of the ships of the Swedish Polar expedition is blocked in the ice off East Cape, Arctic Ocean, has led to a projected relief expedition to reach there next summer.

The Times Glasgow correspondent telegraphs that the City of Glasgow Bank liquidators have only realized £800,000 out of first instalment of the call upon the shareholders due on the 30th, instead of £2,000,000 nominally due.

Moscow, Jan. 2.—A grand national exhibition is to be held here in 1880 and will be the 25th anniversary of the Emperor's accession.

London, Jan. 3.—The following telegram has been received from Admiral Hornby, commanding the British fleet in the Sea of Marmora:—One of the thirty-eight guns of the turret ship Thunderbolt burst on the morning of January 2nd, killing Lieut. Colker and Daniel, two petty officers, four seamen, and a marine. The gun burst just in front of the turret, the muzzle blowing overboard. The turret was disabled, but the ship is otherwise uninjured.

News from cable today gives information that 300 Cotswolds and Leicester sheep and 2,000 Durham cattle were sold at Southfield Market, London, for the Toronto Export Company. The cattle realized £132 (7) per head, the average live weight being 4,400 pounds. The sheep weighed 150 pounds each, live weight, in England, and sold for an equally good sum.

London, Jan. 4.—A despatch from Plymouth states that the Cornish Bank will cause terrible distress among the trades of West Cornwall. The immediate cause of suspension was a run on the bank during the last fortnight, resulting from rumors that the late Sir Frederick Williams was largely indebted to the bank, and that a large portion of its capital was locked up in mines and in advances on tin, neither of which securities were considered distantly reliable. The further stoppage of the Cornish mines is inevitable, and the failure of many private firms must follow.

London, Jan. 4.—Jan Moncasi, who attempted to assassinate the King of Spain, in Madrid on the 25th Oct., was executed at 8.35 this morning.

UNITED STATES.

Boston, R. I., Dec. 30.—The barque Breeze put into Newport, R. I., this morning looking badly, having been ashore, and was lying for 12 hours with her pumps constantly going to keep her free. She was on a voyage from New York for Queens town. The Breeze is a fine barque of 522 tons, built at Margareville in 1874, hailed from Annapolis, and is owned by S. Harris & Co.

Terrible Railway Collision.—The New York Central Road Atlantic Express started out of Rochester, on Friday afternoon, drawn by nine locomotives and followed by 120 passenger cars, which kept some distance ahead. The plow reached the famous sand bar out of Fairport, where the passenger tracks are raised upon the embankment ten feet above the old tracks, now used for freight traffic, when it left the rails and stopped the train. The train following close behind dashed down upon it. A terrible collision ensued. Six engines were wrecked and derailed, and derailed, while the passenger coaches were wrecked upon the rails. The engineer of the train was killed and the conductor was seriously injured. The road master sustained a broken leg and other injuries. Two firemen and five passengers were seriously injured. Two were removed to neighboring farm houses. On Friday night a wrecking train drawn by eight engines was detached from Rochester to the scene of the calamity, and was wrecked by the engines all leaving the track. Since that time an immense pile of rolling stock has blocked the road, it being impossible to reach the wreck from the west. Master mechanic Walkley, on Sunday, took out a wrecking train from Syracuse, which reached Fairport on Sunday night.

St. Louis, Jan. 4.—About 800 men have been thrown out of employment by the burning of the beef-canning building total, \$125,000.

WINNIPEG.

Winnipeg, Jan. 4.—The thermometer was 29 degrees below zero here yesterday, 35 degrees below zero at Fort Pelly, and below zero at Battleford. The severe frost has prostrated the telegraph wires.

PRINCE EDWARD ISLAND.

Charlottetown, Dec. 30.—A vote was taken on the Temperance Act in Prince George on Saturday. Both sides of the question were warmly discussed, and both parties went into the fight with great enthusiasm. The returns from the outlying districts are not all in, but so far as heard from a large majority favor the Temperance Act, and no doubt it will be vigorously enforced.

NEW BRUNSWICK.

St. John, N. B., Dec. 30.—The Permissive Prohibitory bill was carried in York by a 1,012 majority.

A Fish and Game Protection Society was organized to-day. Sheriff Harding, President. It aims at doing what for some time has been accomplished in Nova Scotia.

SHIPPING OF ST. JOHN.

There are registered at St. John 27 vessels, with a tonnage of 16,444. At the end of last year there were 35 vessels, with a tonnage of 23,682.

PAINTED ACCIDENT.—A painful accident happened Mr. Wm. Turnbull, son of Capt. W. F. Turnbull, on Friday last, while engaged in sawing out some dimension stave at his place of business, Lee's Valley, by his arm being caught in the circular saw. The cut is several inches in length and an inch in depth. One of the cords, leading from the attachment of the hand to the saw, struck the finger entirely useless. Dr. Smyth was called.—Daily Courier.

A NEW CANADA PORT OF EXPORT.

A project which, it may be remembered, was advocated by Prof. Hind some time ago namely, the running of grain-laden steamers between Hudson's Bay and Liverpool for at least three months of the year, is revived by Col. Dennis. The Ottawa correspondent of the New York World calls the affair "a stupendous scheme for the colonization of the Northwest," etc. The correspondent thus recites the report of Col. Dennis:

York Factory, the chief port on Hudson's Bay, is nearer Liverpool than New York, the distance being as follows:—York Factory to Liverpool via Hudson's Strait and Cape Farewell, the southern point of Greenland, 2,900 miles; New York to Liverpool via Cape Race and Tory Island, 2,987 miles; via Cape Race and Cape Cod, 3,023 miles. If York Factory is at the mouth of the Nelson River, and it is proposed to build a railroad there, the distance to Liverpool would be 2,000 miles. This would bring the Hudson's Bay Company's sailing ships into direct communication with the Atlantic coast of Europe, and would save 900,000 acres of 400 miles. This would bring the Hudson's Bay Company's sailing ships into direct communication with the Atlantic coast of Europe, and would save 900,000 acres of 400 miles.

London, Jan. 3.—The following telegram has been received from Admiral Hornby, commanding the British fleet in the Sea of Marmora:—One of the thirty-eight guns of the turret ship Thunderbolt burst on the morning of January 2nd, killing Lieut. Colker and Daniel, two petty officers, four seamen, and a marine. The gun burst just in front of the turret, the muzzle blowing overboard. SHIPPING OF YARMOUTH.

From the Yarmouth Herald.]

We publish to-day our customary annual exhibit of the shipping belonging to Yarmouth on the 1st of January, with an enumeration of vessels lost and sold during the past year, a statement of vessels (with their tonnage) now in course of construction or contracted for, &c. The list comprises 11 vessels, with a tonnage of 5,883 tons, and 2,941 tons making together 21 vessels, 8,824 tons. Striking those off our list, it will be seen that the Yarmouth fleet numbers 207, and the general commercial depression, and this exhibit is very gratifying, and affords the best evidence of the undiminished enterprise and energy of our shipowners.

We annex a comparative statement of the shipping of Yarmouth Jan. 1, 1878, and Jan. 1, 1879:—

Table with 3 columns: 1878, 1879, Tons. Rows include Steamers, Sailing, and other vessel types.

The great fortune left to the heirs of John Jacob Astor was at the time of his death estimated at \$40,000,000, and he was the sixth in the list of the rich men of the world. Baron de Rothschild, the Duke of Devonshire, Sir John Lubbock, and Louis Philippe were said to have greater fortunes than Astor. In 1878 the Astor estate was estimated to be worth \$20,000,000, and he was the sixth in the list of the rich men of the world.

Read This Twice.—Five to thirty drops of Thomas' Electric Oil, will cure common Sore Throat. It never fails in Croup, whooping Cough, or Croup, in twenty to thirty days. One bottle has cured Bronchitis of eight years standing; recent cases are cured in three days. It has restored the voice where the person has not spoken above a whisper for five years. As an outward application in all cases of pain or lameness, nothing like it has ever been known. One bottle will cure any case of Lame Back or Crick in the neck. It is the best remedy for Rheumatism or any other pain, the first application affording relief. It is the best medicine ever used for the cure of the best of all coughs, and nothing like it to do you good. It is composed of five of the best oils known, and nothing like it to do you good. It is composed of five of the best oils known, and nothing like it to do you good.

VEGETINE Purifies the Blood, Renovates and Invigorates the Whole System. ITS MEDICAL PROPERTIES ARE Alterative, Tonic, Solvent and Diuretic.

VEGETINE is made exclusively from the juice of carefully-selected herbs, roots and berries, and is purely vegetable in its nature. It is a powerful and effective purifier of the system, and is especially adapted for the treatment of all diseases of the blood, such as Scarcity of Blood, Chlorosis, Anemia, Leucorrhoea, Catarrhs of the Uterus, Menstrual Disorders, Rheumatism, Gout, Gravel, Dropsy, and all diseases of the skin, such as Eczema, Psoriasis, and all diseases of the head, such as Headache, Neuralgia, and all diseases of the chest, such as Bronchitis, Asthma, and all diseases of the lungs, such as Consumption, and all diseases of the stomach, such as Indigestion, and all diseases of the bowels, such as Constipation, and all diseases of the bladder, such as Catarrh, and all diseases of the kidneys, such as Gravel, and all diseases of the urinary system, such as Hematuria, and all diseases of the reproductive system, such as Gonorrhoea, and all diseases of the female system, such as Leucorrhoea, and all diseases of the female system, such as Menstrual Disorders, and all diseases of the female system, such as Uterine Disorders, and all diseases of the female system, such as Ovarian Disorders, and all diseases of the female system, such as Pelvic Disorders, and all diseases of the female system, such as Vaginal Disorders, and all diseases of the female system, such as Cervical Disorders, and all diseases of the female system, such as Perineal Disorders, and all diseases of the female system, such as Anal Disorders, and all diseases of the female system, such as Rectal Disorders, and all diseases of the female system, such as Prostatic Disorders, and all diseases of the female system, such as Vesical Disorders, and all diseases of the female system, such as Urethral Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders, and all diseases of the female system, such as Epididymal Disorders, and all diseases of the female system, such as Scrotal Disorders, and all diseases of the female system, such as Penile Disorders, and all diseases of the female system, such as Testicular Disorders
