The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Explanation of the Articles of the Calendar.

These pages are calculated for Toronto and Quebec, and for ordinary purposes will serve with sufficient accuracy for every city in Canada.

MOON'S PHASES.—This Table gives the times for the two meridians when the moon passes the geocentric longitudes of 0°, 90°, 180° and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this table are given the times at which twilight begins in the morning and ends in the evening, *i. e.*, the times when the sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following table.

Degrees of Latitude.....	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees.....	- 5' 58"	- 4' 5"	- 2' 5"	0' 0"	+ 2' 12"	+ 4' 32"	+ 6' 59"	+ 9' 31"	+ 12' 18"
2nd Correction for each minute of latitude.....	+ 1.9"	+ 2.0"	+ 2.1"	+ 2.2"	+ 2.3"	+ 2.5"	+ 2.6"	+ 2.7"	

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar, or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

Thus for latitude 43° 20'... 1st correction = - 4' 5"	2nd correction + 2.0 × 20 = + 40"
“ “ 47° 40'... “ “ = + 4' 32"	“ “ + 2.5 × 40 = + 1' 40"
“ “ 45° 10'... “ “ = 0' 0"	“ “ + 2.2 × 10 = + 0' 22"

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of Toronto.

When the planetary day is shorter than the mean solar day, and commences soon after the midnight of the preceding day, the planet will sometimes arrive a second time on the meridian before the expiration of the actual civil day. From analogous causes a planet will sometimes rise twice or set twice in the same civil day. When two culminations occur in the same day, or two risings or settings, the times of both are registered.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction both for Toronto and Quebec.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto and Quebec.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for Toronto. They are not corrected for parallax or refraction.

The column SUN ON MERIDIAN gives the time that a watch should shew when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the moon's centre passes the meridian of Toronto, when in the column headed Moon's rising or setting or Moon on meridian the letters A.M. occur, unaccompanied by any number; they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The column, UPPER TRANSIT, gives the time at which the moon's centre passes the meridian of Toronto, when in the column headed Moon's rising or setting or Moon on meridian the letters A.M. occur, unaccompanied by any number; they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The four last columns give the times at which the moon's centre passes the meridian of Toronto, when in the column headed Moon's rising or setting or Moon on meridian the letters A.M. occur, unaccompanied by any number; they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The time at which the moon's centre passes the meridian of Toronto, when in the column headed Moon's rising or setting or Moon on meridian the letters A.M. occur, unaccompanied by any number; they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

To ascertain whether the moon is in the morning or in the afternoon, subtract the time at which the moon's centre passes the meridian of Toronto, when in the column headed Moon's rising or setting or Moon on meridian the letters A.M. occur, unaccompanied by any number; they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

N A C,

The column, UPPER TRANSIT OF POLE STAR shows for every day the mean time at which the Pole Star makes its upper transit across the meridian of Toronto. It passes in the morning from April 9 to October 9, and in the afternoon for the rest of the year. On October 9 there will be a second transit, occurring at 11h. 57m. 4s. p.m.

The four last columns, although computed for Toronto, will serve with sufficient accuracy for the whole of Canada.

The time at which the lower transit of the Pole Star occurs may be found by adding 11 h. 58 m. 2 s. to the time of its preceding upper transit.

From the time of the upper transit of the pole star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following table, the times of elongation, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude. To ascertain when any star found in the following table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a Star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

 { Last contact, 51° towards the east, }

At Toronto, latitude 43° 39.4' N. and longitude 5h 17m 33s W. no eclipse will be visible. The nearest approach of the centres of the Sun and Moon will occur at 10h 52m 7s a.m., Toronto mean civil time, when a space of two seconds of arc (2'') will intervene between the limbs of the two bodies. Winter Month

Pole Star.

JANUARY.

MARCH.

JANUARY, worn and gray. Like an old pilgrim by the way, Watches the snow, and shivering sighs, As the wild curlew round him flies; Or huddled underneath a thorn, Sits praying for the lingering morn.

Rough MARCH comes blustering down the road, In his wrath-hound the ocean's god; Or, with a rough and angry haste, Scatters the seed o'er the dark waste.

From his right hand as from a cup.

His old heart warm, well clothed his sides,

The mean temperature of the year 1864 was 44° 70, or 0° 163 in excess of the average of 25 years. The deviation of the monthly means above or below their respective averages, and irrespective of sign, had an average amplitude of 1° 33; thus indicating a year of unusually equable temperature, the average amplitude in twenty five years being 2° 33. The highest temperature was observed on August 8th, when the thermometer marked 94° Fah., and the lowest on 17th February, when -15° was recorded, giving a range of 109°.

The warmest day of the year was June 25th, having a mean temperature of 81° 77, and the coldest day February 17th, with a mean temperature of -4° 62.

The mean deviations of temperature in the four seasons, with their proper signs, were: -0° 33 in Winter; +0° 79 in Spring; +1° 27 in Summer; and -0° 60 in Autumn.

The yearly range of the Barometer was 1.656, or 0.124 below the average of the past nine years. The yearly mean pressure was the lowest recorded during the past eighteen years, and was under the average .6637. The highest pressure, 30.327, was noted at 10 a.m. on 9th December—the lowest, 28.671, at 2 p.m. on 4th November.

As regards rain and snow, there was, on the whole year, an excess amounting to 0.636 inches of water. An excess occurred in Winter, Spring, and Autumn—the total precipitation exceeding the average by 1.136 inches in Winter, 1.788 inches in Spring, and 0.186 inches in Autumn. In Summer, the rain was deficient as compared with the average by 2.465 inches. This deficiency was not much greater than that of the summer of 1863; but the distribution among the three summer months was very different in the two years, for while in the summer of 1863 there was a moderate deficiency in each month, the rain in June, 1864, was less than one-fifth, and in July little over one-third of the average fall; that of August being above the average in the ratio of 5 to 3 nearly.

The number of nights possible to Aurora during the year was 188, as follows:—In January, 11; February, 11; March, 15; April, 10; May, 12; June, 24; July, 19; August, 12; September, 14; October, 11; November, 9; and December, 10. Number of Auroras observed 34—distributed over the year as follows:—In January, 0; February, 4; March, 2; April, 4; May, 3; June, 5; July, 3; August, 6; September, 4; October, 2; November 1; December, 0.

Mean elasticity of aqueous vapour was, in January: .110; February, .119; March, .133; April, .154; May, .183; June, .230; July, .273; August, .316; September, .347; October, .248; November, .182; December, .121. Mean for the year being .263. Average for the past seven years being .260.

In the following summary several of the results for year 1864 are compared with the averages derived for a series of years as well as with extreme values of analogous results given by the same series.

The average lowest monthly mean of cloudiness in column (2) is the least of the twelve monthly means derived from each from twelve years, and does not include the least months in each year, as these fall differently in recent years. This explains why the highest minimum column (4) should be less than the average minimum. The average value of the greatest as well as of the least monthly means of the several elements, and given in column (2), are similarly obtained, and therefore do not necessarily lie between the numbers in columns (3) and (4). The case of the warmest days, or the highest temperatures in each year, and other analogous quantities, the averages in column (2) are derived from the corresponding averages in each year, independently of the time of their occurrence, and must of necessity lie between the numbers in columns (3) and (4).

PROGRESS OF POPULATION IN CANADA.

Quebec, in 1622, fourteen years after its commencement, is said to have contained only 70 persons, exclusive of those attached to the military and religious establishments.

In 1640, the Governor states the non-military population of the whole Province was about 700.

In 1660, the number in the Province was 3,418 souls, of whom 1,344 were capable of bearing arms.

Census of 1667 and 1668.

Number of families.....	1607,	740	1668,	1,130

Artisanable men.....	"	84	"	97
Girls over 15.....	"	55	"	74
Infants.....	"	126	"	157

In addition to the above there were about 700 persons scattered through the Province, and in 1670 the Governor placed the whole population at 9,180.

In 1679, when the population was 9,400, the births were 64, or 1 in 23, and the deaths 85, or 1 in 110; there were 6 marriages (132), or 1 in 71 married.

Between 1675 and 1685, the quantity of beaver sent to France was 895,381 lbs.; about as much more found its way through the British colonies. In the trade returns of these years are mentioned two articles now unknown to our commerce, capillare and ginseng.

1684.—There was a grand review at Fort Frontenac, at which were assembled nearly 1,000 Indian warriors, from the immediate neighbourhood. At the same time there were said to be 1,000 Indians, 6 Frenchmen and 2 Jesuits in the Indian castle of Cognawaga, and a large number of Canac Sadagh (Lake of Two Mountains). There were no encampments at La Galette (Prescott), Oun' dakoni (Sanoque), Gannlons (Napinee), Gannersaki (mouth of the Trent), and Ganalchesklagon (Port Hope).

1685.—M. Dongan (Intendant) rated the population at 12,000. In this he is evidently wrong, as the census of 1686, under M. de Nonville, made it only 12,373.

1687.—The population amounted to less than 10,000. In the spring of this year an immense herd of walrus came up the river St. Lawrence, and a large number were taken near Quebec.

1688.—Mr. Cox, of Carolina, endeavoured to form an English settlement in Canada, but failed, as did also his son, who made a similar attempt in 1725. In this year were enrolled in the militia 2,730 men-at-arms, of whom Quebec furnished 300.

1706.—M. Randot estimates the population at 20,000.

1714.—M. de Pouchetrain reports that there were 4,484 men capable of bearing arms.

We have no returns from 1714 till 1719, when a census was taken, as also in 1720, 1721 and 1734.

The following is a comparison of their results:

1735.—The Governor reports 10,000 fighting men in the Province, including 32 companies of regulars.

1740.—A few years before this date the King of France given license to a company to work the mines at Three Rivers, had loaned them £20,000 for twenty years without interest, and, still further to encourage them, had undertaken to build two ships of war annually at Quebec.

1743.—The French had two vessels of 60 tons each on the Ontario.

1744.—Census taken. Population return never reached again, and of course is not in the documents.

1745.—Population very nearly 50,000.

1750.—There were at this period 58 well peopled parishes between Quebec and Montreal, viz., 20 on the north and a like number on the south shore of the St. Lawrence. The population was thought to have reached 53,000.

It was either in this or the preceding year that M. M. De La Jonquière proposed to build a fort at Toronto, which he proposed to call Ronville, after his friend the minister of marine. This fort was intended to counteract the influence of the British fort at Chouagnon (Oswego). M. De La Jonquière also proposed that a small number of galley slaves should be annually sent to Canada.

1754.—A general census was taken this year, with the following results:

City of Quebec and parish.....	8,000
Montreal and Island.....	4,000
Three Rivers.....	800
Rural parishes.....	42,500

Total..... 55,300

The Quebec list contained 274 officials, priests and nuns; 100 first-class merchants, 200 master tradesmen, 400 less wealthy traders, 600 carters, 1,200 women, and 5,320 children and servants.

In 1754, no snow fell in Canada after the 20th January, and a great death raged towards the end of the year: the price of provisions rose to an enormous pitch.

Immediately before the English invasion, M. De Montcalm, in a letter to Paris, states the whole population of Canada was less than 82,000. This is evidently an error, unless he included all the military and Indians. The English, deriving their information from spies, rated the population at 60,000. This agrees pretty nearly with the report of M. Bouchette, who made it 65,000. It is a matter of regret that no record has been kept of the population at the time of the capitulation; neither was there of those who, under sanction of the treaty, went to France. We have of course the military return, which gives the number who left in the English fleet, viz.: officers, 230; soldiers, 2,425; women and servants, 507. Immediately after the capitulation, more than 500 deserted.

1763.—An attempt was made to rouse the Canadians to rebellion, but the letters and papers were intercepted. On Saturday, July 2nd, the Chevallier Chaussegros De Levy was presented to the King (George III.), in full court, at St. James', being the first of His Majesty's new subjects who had that honour.

1769.—The trade of Canada with England employed 34 ships, with 408 men. The gross amount of imports and exports was upwards of £220,000 sterling.

1778.—The Count Estaing published a proclamation, imploring the Canadians to shake off their allegiance to England. From 1763 to this date, upwards of 7000 persons were supposed to have emigrated from Canada.

1783.—Population estimated at 113,000, 10,000 of whom were in what is now Upper Canada. This year the immigration of the U. E. Loyalists commenced.

1784.—This year a census was taken of the three Governments of Quebec, Montreal and Three Rivers. The following was the result:

Houses.....	18,904
Married men.....	20,131
Married women.....	19,254
Mailes { above 15.....	9,281
{ under 15.....	24,552
Absent.....	601
Females { above 15.....	8,802
{ under 15.....	22,515
Slaves.....	304
Servants.....	6,491
Infirm.....	833
Total.....	113,014

Of the above the parish and city of Quebec gave 6,472. This census is valuable as it gives the following Agricultural items, of which it is the first we have:—Bushels of grain sown in the spring, 383,349; horses, 30,096; oxen, 22,094; cows, 44,201; young cattle, 32,200; sheep, 84,066 hogs, 70,460; fowls, 10,836.

1780.—In this year the mercantile population increased very much. The imports amounted to £325,116 sterling, and the exports to £343,263. Amongst the latter were 103,324 minots of wheat, 10,476 bbls. of flour, £187 worth

of spruce, £211 worth of spruce, and £1,200 worth of glassing, the price of the last being £50 per hid.

There was taken a valuation of the property in Canada, in the compilation of which great care appears to have been taken:

Table with 2 columns: Description and Value. Includes items like 'Merchandise of Montreal', 'Circulating Capital Lower Country', 'Goods and effects', etc.

Total £1,386,023 6 8

In 1792, immediately after the separation of the Provinces, the Lower was divided into 21 counties, with subdivisions as counties:

Table showing population by county in 1792. Includes counties like 'Miselesqui and Rouville', 'Duchegnon', 'Yamaska', etc.

Total 423,630

The figures are those given by the census of 1825; if, then, we set down 230,000 as the number of inhabitants in 1792, the increase between the two periods will be about 84 per cent., or rather more than 2 1/2 per cent. annually.

In 1820, it was proposed to subdivide the Province into 38 electoral divisions. No measure was carried into effect till 1831, when the 40 counties above given were formed, which division remained in force till the union, in 1841, when the number was reduced to 40, or rather 38. On the increase of the representation from 42 to 65 members for each section, the Lower Canada counties were extended to 60. These frequent subdivisions make comparison of local increase a very difficult matter.

1831.—Mr. Bouchette, taking the census of 1827, 471,876, adds, for natural increase, 59,575, or about 3 to 100; for immigration, 23,000; for outposts, 1,600, in all, 561,060. A census being taken, however, gave only 511,922.

1836.—The estimate for this year is founded on a return laid before Parliament by the Roman Catholic Bishop of Quebec, which showed that the Roman Catholics numbered 501,224; and as the proportions of the denominations had been well fixed, the formula taken to express the population was 501,224 + 8 = 572,827, being pretty near the average rate of increase, 2.38 per annum.

1844.—The rate of increase between these two periods is very high, under the circumstances. The outbreak in the district of Montreal must have very materially thinned the population, and certainly the transfer of the Government departments from the Upper to the Lower Province scarcely balanced the loss.

* The number of British-born subjects then in the Province was about 15,000.

1848.—The estimate of this year is worthy of notice, showing how near the truth those acquainted with fundamental laws of increase, when, as in Lower Canada not acted upon by exterior circumstances, as I who have knowledge of the people under consideration, can see Lower Canada having neglected to take a census in 1848 and as no little interest was felt in the relative population of the two sections, it became necessary for the Board of Registration and Statistics, with the sanction of the Government, to endeavour to arrive at some approximate calculation. For this purpose the aid of two gentlemen, well acquainted with the subject, and whose judgment could be relied on (the Hon. E. P. Tache and J. Cauchon), was sought, and most kindly afforded, as was also that of Mr. Tache. These three gentlemen determined to adopt a different basis of calculation, with the following result:

- 1. Dr. Tache's, founded on per centage
2. Dr. Tache's, founded on returns
3. Col. Tache's
4. Mr. Cauchon's

Tables, showing the progressive increase of both sections of Lower Canada.

UPPER CANADA.

Table showing population increase in Upper Canada from 1821 to 1861. Columns include Year, Population, Increase, and Per Cent.

Lower Canada, taking the several periods, gives the following averages:

1825 to 1827, 5.60 per annum; 1827 to 1831, 2.12; to 1836, 2.38; 1836 to 1844, 2.57; 1844 to 1848, 2.86; to 1852, 3.91; 1852 to 1861, 2.70. If we take the number for 1825 to be correct (423,630), we have an increase between that and 1851 of 687,030, being 162.39 per cent, which will represent an increasing ratio of something under 4 per cent., or, allowing for uncertain increases in the periods, of 3.13, being little below the average of the United States.

In Upper Canada the increase has been very irregular. Its highest averages were from 1822 to 1835; it rose immediately after the rebellion, in 1836. Our late average, say from 1856 to 1865, have been small.

For the sake of comparison, we give the progress of a few other countries:

FLAX CULTURE IN CANADA.

This new branch of Canadian Industry strongly recommends itself to the notice of the agriculturalists of Western Canada, and may now be justly ranked among the staple crops of this country—there being not less than 100,000 acres under crop this year, yielding a handsome return to the grower.

Chambers are held each day in Common Law and Chancery by one of the judges of the said courts, for such business relating to suits therein as may be transacted by a single judge out of court. Clerk, Common Law—Wm. B. Heward. Clerk, Chancery—Thomas Black.

HEIRS AND DEVISEE COURT.—Commissioners, the Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Sitings at Toronto, first Monday in January and July in each year. Clerk of Commissioners, W. B. Heward.

COUNTY COURTS.—Presided over by a resident Judge in each county. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed £50; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to £100; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, criminal, or seduction. An appeal lies to either of the Superior

Courts of Law. These Courts also possess equity powers, to the amount of £50, subject to an appeal to Chancery.

SURROGATE COURTS.—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effects in Upper Canada, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery. RECORDERS' COURTS.—In the Cities of Toronto, Hamilton, London, Kingston, and Ottawa, the Recorders' Court takes the place of the County Sessions, the Justices for Counties having no jurisdiction in the Cities—the care of which is confided to the Recorder, Mayor, Aldermen and Police Magistrate of each. Sessions held first Monday in March, June and September, and third Monday in December. Recorders — George Duggan, Toronto; James O'Reilly, Kingston; John E. Start, Hamilton; William Horton, London; J. B. Lewis, Ottawa.

INSOLVENT DEBTORS' COURTS. — By the "Insolvent Act of 1864," 27 & 28 Victoria, cap. 57, passed on the 30th June, 1864, provision is made "for the settlement of the estates of insolvent debtors, for giving effect to arrangements between them and their creditors, and for the punishment of fraud." In Lower Canada, this enactment applies to traders only. In Upper Canada, to all persons whether traders or non-traders. In these courts, the county court judge in each county presides—the only appointments made in pursuance of this statute being those of "official assignees," who are to be nominated "by the Board of Trade at any place, or the council thereof, within the county or district in which such Board of Trade exists, or in any county or district adjacent thereto in which there is no Board of Trade." This important statute is proving a great boon to the community, in enabling parties who from unavoidable circumstances find themselves paralyzed by hopeless liability to obtain relief, and recommence business.

DIVISION COURTS.—For the summary disposal of cases by a Judge; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract amounting to £25; injuries or torts to personal chattels amounting to £10; but not to actions for gambling debts, liquors drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, or libel, seduction or breach of promise, or actions against a J. LETTER RATES.

Letters posted in Canada addressed to any place within the Province pass, if prepaid, for 5 cents per 1/2 oz., but if posted unpaid such letters are charged 7 cents per 1/2 oz.

On Letters to Nova Scotia, New Brunswick, and Prince Edward's Island, the rate is 5 cents per 1/2 oz., with optional prepayment.

The rate on Letters to the United Kingdom is, by Canadian Packet, not exceeding 1/2 oz. - - - - - 12 1/2 cts. Exceeding " and not exceeding 1 oz. - - - - - 25 " Exceeding " 1 oz. and not " 2 oz. - - - - - 60 " and so on, increasing two rates of postage for each additional ounce.

and by Cunard Packet, 17 cents per 1/2 oz., &c. Letters for the United Kingdom must be prepaid, or they will be charged a fine of 6d. sterling on delivery.

Letters for British Colonies and Possessions beyond Sea, and Foreign Countries, via England, must be prepaid. The rate on Letters for the U. States, is 10 cents per 1/2 oz. " to Cuba - - - - - 20 cents per 1/2 oz.

There is a further charge on delivery of Letters addressed to British Columbia. Letters - - - - - 10 cents per 1/2 oz. Newspapers - - - - - 2 cents each.

MAILS FOR CANADA FROM ENGLAND.

Two Ocean Steamers carrying mails for Canada leave Liverpool in each week, viz.: a Canadian Packet on every Tuesday, via Derry on Friday, sailing to Quebec in summer and Portland in Winter, by which the Postage rate 6d. stg. per 1/2 oz.; and a Cunard Packet every Saturday, via Cork on Sunday, bringing Mails for Canada, alternately to Boston and New York, by which the Postage rate to Canada is 8d. stg. per 1/2 oz.

The British Post Office forwards letters to Canada by the next packet sailing after the letter is posted, unless the letters bear a special direction—"By Canadian Packet" or "By British Packet"—and in that case they are kept over for the Packet designated. "By Canadian Mail" is not a distinct superscription; for any Mail for Canada is a Canadian Mail," by whatever Packet forwarded.

REGISTRATION OF LETTERS.

Persons posting Letters containing value, should be obliged to require them to be registered, and to obtain from the Post Master a Certificate of receipt for Registration.

The charge for Registration, in addition to the Postage, is as follows, viz.:

Letters to any other place in Canada, or British North America - - - - - 2 cents. Letters for the United States - - - - - 5 " Letters for the United Kingdom - - - - - 12 1/2 " Letters for British Colonies or Possessions, sent via England - - - - - 25 "

Letters for France and other Foreign Countries, via France, an amount equal to the postage rate. Both the postage charge and registration fee must in all cases be prepaid.

Registration is not an absolute guarantee against the scurrage or loss of a Letter; but a Registered Letter to be traced when an Unregistered Letter cannot, and the stamp and delivery or non-delivery can be proven. A Registered Letter is thus secured against many of the

casualties which, from incorrect address, forgetfulness of the receiver, or other error, may affect an Unregistered Letter.

MISCELLANEOUS CHARGES.

The charge on Parcels by the Parcel Post, which is limited to places within the Province, is 25 cts. per lb. (with 3 cts. additional if Registered.)

One cent per oz., payable in advance by Postage stamp, is the rate on Printed Circulars (Printed Circulars, if sent in envelopes, whether sealed or unsealed, are liable to printed postage), Prices Current, Hand Bills and other Printed Matter of a like character, and on Books, bound or unbound, when posted at a Canadian Post Office addressed to any place in Canada, British North America generally, or the United States.

The postage upon Prices Current addressed to the United Kingdom is two cents each, which must be prepaid by postage stamps, or they will be sent to the Dead Letter Office to be returned to the sender.

LOOK POST RATES BETWEEN CANADA, GREAT BRITAIN, FRANCE, ITALY, AND GERMAN STATES.

Table with 7 columns: COUNTRY, Not excedg. 2 o z., 2 oz. to 4 oz., 4 oz. to 8 oz., 8 oz. to 1 lb., 1 lb. to 1 1/2 lb., 1 1/2 lb. to 2 lb. Rows include Great Britain, France, Italy, German States.

These rates must invariably be prepaid on transmission from Canada. Photographs, provided they are not upon glass or in cases containing glass, may be forwarded to Great Britain, &c., at the Book rate of postage. Book Packets addressed to the United Kingdom may be registered on payment of the ordinary registration fee, viz., 12 1/2 cents in addition to the postage.

NEWSPAPERS AND PERIODICALS.

Newspapers published in Canada may be sent by Post from the office of publication, addressed to any place in Canada, at the following rates, if paid quarterly in advance by either the publisher at the post office where the papers are posted, or by the subscriber at the delivering post office:

For a paper published 6 times a week, 40 cents per quarter. " " 3 " " 20 " " " " 2 " " 13 " " " " 1 " " 6 1/2 " " "

When the above rates are not paid in advance by either publisher or subscriber, such Papers are charged one cent each on delivery.

TRANSIENT NEWSPAPERS.

Transient Newspapers—that is to say, Canadian Newspapers posted otherwise than from the office of publication, and American or British papers posted or re-posted in Canada, must be prepaid 1 cent each, by postage stamp, or they cannot be forwarded—except only British Newspapers distributed to regular subscribers by Canadian Booksellers or News Agents—such papers pass free as they would do if received in the Canadian Packet Mails.

NEWSPAPERS BY MAIL FROM ENGLAND OR UNITED STATES.

Newspapers received from England by the Canadian Packet Mails are delivered free.

Newspapers from England by the Cunard Packet Mails are charged 2 cents each on delivery. (This is the American transit charge.)

 sent of the Legislative Council and Assembly of Canada,

 insurance is for the benefit of the wife and children gener-
 ally, or of the children generally without specifying their
 names, then the word "children" shall be held to mean
 all the children of the person whose life is insured, living

 the benefit of his wife, or of his wife and children, or of
 his wife or some or one of his children, or of his children

The present income of the Society from its members, amounting to \$35,000 per month, being applicable to loans, money can always be obtained without delay. The Society's terms with respect to conveyancing charges, rate of interest, mode of repayment, &c. have been materially reduced and simplified, and are now more than ordinarily favorable to borrowers.

Applications for advances may be made to the undersigned, or to any of the Society's Appraisers, from whom Circulars exhibiting terms may be obtained.

ANILINE DYES.—“I shall commence my observations on Dyeing, by referring especially to the remarkable and beautiful colours derived from Coal Tar, the introduction of which into this art, may be said to constitute the chief distinction as far as Dyeing is concerned, both at the present and the former Exhibition, creating in fact, a new era in the tinctorial art. These tar colours deserve attention for their power, as well as for the facility with which they may be applied, for one grain will deeply tint half a gallon of water, and little or no skill is required for their application.”—*vide* Report by GRACE CALVERT, Esq., F.R.S., Ph.
