Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image/ Les pages totalement ou partiallement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmóes à nouveau de façon à obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanka to the generoslty of:

The last recorded frame on each microfiche shr" contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the aymbol $\nabla$ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those toc large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosit' de:

La bibliothéque des Archives publiques du Canada

Les images suivantes ont 6 té reproduites avec le plus grand soin, compte tenu de la condition at de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papler est imprimée sont fllmés en commençant par le premier plat et en tarminant soit par la derniere page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres axemplaires originaux sont filmés en commençant par la premíere page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle ampreinta.

Un des symboles suivants apparaîtra sur la derniàre image de chaque microfiche, selon le cas: le symbole $\rightarrow$ signifie "A SUIVñ"', le symbole $\nabla$ signifie "FIN".

Les cartes, planches, tablaaux, etc., peuvent être filmés à des taux de réduction différerits. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé á partir de l'angle supérieur gauche, de gauche à droite. et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes sulvants lllustrent la méthode.

## S K E T C H, $\wp^{\circ} c . \bigodot^{\circ} c$.

TO thofe who open the volume of hiftory with a view to improve their underftanding; who are competent to carry their refearches beyond the external appearance of events, and to fpeculate on the concealed caufes which produce the elevation, or accelerate the decline of empires, there is not, perhaps, in the annals of time a period more pregnant with political matter, than the one which has elapfed between the year 1780 and the prefent time. In that fhort interval, we have feen the Britifh Empire, which had embraced both hemifpheres, and to which India and America were only proB vinces;
vinces; which had fuccefsfully oppofed, under the aufpices of the late Earl of Chatham, the combined force of the Houfe of Bourbon, and, after giving laws to Europe, had difpenfed peace to mankind: we have feen this empire fhaken to its bafis, convulfed at home, and affailed on every fide; vainly invoking the aid of that perfidious Princefs, whofe fleets we had conducted into feas unknown to her barbarous fubjects, and whofe victorious banner we had taught to fly on the fhore of Greece and of Afia Minor. It was from her ungrateful hand that England, already bending beneath the complicated calamities of domeftic divifion and of foreign war, was deftined to receive the final blow, which unnerved our arm, and compelled us, reluctantly, to affemble our diftant legions for the protection of the capital, and the prefervation of our exiftence. It is unneceffary to fay, that I allude to the " Armed Neutrality;" a meafure which originated from the cabinet of Catherine the Second, although it was followed

## ( 3 )

followed by all the Baltic Powers; and the retribution due to which, however long delayed, is now probably near its accomplifhment. But we have not only feen the Britifh monarchy, in common with other ftates and kingdoms, oppreffed by enemies, and finking under the weight of adverfe fortune, or pufillanimous and feeble counfels: we have feen this expiring and diminifhed empire (unlike to every other, and in this diffimilarity laying the ftrongeft claim to the admiration of mankind), within the tranfitory period of only ten years, rife from a fate of humiliation and depreffion, readjuft her fcattered infignia, refume her ancient luftre, and wing a fublimer flight than the had ever held acrofs the political expanfe. It is in vain that the moft laborious refearch would endeavour to parallel this extraordinary renovation in the hiftory of modern Europe. It is only in the Athenian or Roman Annals; it is only at the fatal periods of Marathon, and of Camn, that we fee any example of a B 2 republic
republic fuddenly and rapidly emerging from the loweft point of ruin and calamity, into greater power and grandeur than the had previoully enjoyed.
The Auftrian Eagle, which, under Charles the Eilith and Ferdinand the Sccond, had foared fo high, and which had even nearly extinguifhed all the Germanic liberties ; ftripped of its plumage by Guftavus Adolphus, and chained to the earrh by the manacles which were impofed on it at the Treaty of Weftphalia, long flumbered in peaceful bondage, 'till Marlborough releafed the Imperial captive, and once again reftored it to freedom, though not to its former greatnefs.

Spain, which under Philip the Second had menaced Europe, and feemed almoft in poffeflion of her inordinate projects of ambition ; which fitted out her invincible Armada for the fubjection of England, while She prepared to place an Infanta on the throne of France: Exhaufted by her own perpetual cfforts, and having drained the treafures of the new world, in vainly attempting

## ( 5 )

to reduce a revolted province, funk at once into impotent infignificance; and now, after the lapfe of two hundread years, appears to be only flowly emerging from poverty and weaknefs.

Sweden, which like a torrent everran Poland, Saxony, and Denmark, at the commencement of the prefent century ; and which, conducted by the frantic valour of Charles the Twelfth, appeared ready to plant her triumphant ftandards on the walls of Mofcow, was hurled in a fingle day from the zenith of power and glory. All her laurels withered at Pultowa; and fince that memorable æra, her melancholy and fteril annals contain nothing which can awaken curiofity, or intereft mankind, though more than feventy years have elapfed fince Charles expiated his wild and deftructive projects of ambition under the walls of Frederickfhall. At the moment when I am writing, a Prince, emulous of the fame of Guftavus Adolphus, and adorned with qualities which, in a more fortunate period, might

## ( 6 )

have reftored the drooping genius of Sweden, and re-inftated her in thofe provinces which the has loft, is endeavouring to fupply the inherent deficiencies arifing from the impoverifhed and depopulated ftate of his dominions, by perfonal fortitude and ability. He has even made an effort not inglorious, to check the Ruffian progrefs, and $t o$ affert the ancient pre-eminence of his fceptre in the Baltic. Thefe, howcver, are feeble attempts, and ferve rather to remind us of what Sweden once was, than to awaken any well-grounded expectation that the can again refume her former fituation in Europe.

Even France, the favoured country of nature; bleffed with a happy diverfity of climates; enriched with the choiceft and moft delicate productions of a luxuriant foil; embracing the Atlantic and the Mediteranean feas; formed for empire, for dominion, and for fuperiority among the European kingdoms; uniting in herfelf every natural advantage which induftry can beftow, or commerce can procure; inured

## ( 7 )

inured to habits of obedience and loyalty, as well as trained to conqueft and to war : France herfelf, after the fevere chaftifement which Louis the Fourteenth, towards the conclufion of his reign, received from Eugene and Marlborough, remained almoft fupine and torpid during thirty years which fucceeded the Treaty of Utrecht ; content to cultivate the peaceful olive, and oppreffed under the load of public debt, which the infatiable and ruinous ambition of her fovereign had incurred. It was not 'till Marechal Saxe awoke her dormant genius, and revived in his perfon the fublime talents which have equalled him with Condè and Turenne, that France, in any meafure, refumed her afcendant, or feemed again to occupy her natural pre-eminence among the flates of Europe.

It cannot be more curious to enquire, than it muft be inftructive to afcertain, whence has arifen this characteriftic, and peculiar principal of refufcitation, if I may be allowed the expreffion, which, in
a fhort fpace of time, has raifed England from her depreffion ; and has enabled her, unlike the other furrounding monarchies, to profit of her very misfortunes, and to engraft fplendor and power upon her loffes and defeats.

Where are we to fearch for this vivifying fource of renovation? Is it in her fpirit of commercial enterprize; in her undiminifhed induftry; in her numerous and ingenious manufactures, which have penetrated into almoft every province of the civilized world? Doubtlefs, thefe caufes have contributed much to extricate and to reftore the nation; but, efficacious and falutary as their tendency and operation are, they cannot be confidered as adequate to fo great a work.

It was requifite that Providence fhould extend its tutelary care, to prolong the life and reign of a Prince, inexpreffibly dear and neceffary to his people; whofe experience, matured by years and chaftened by adverfity, might, and could alone be equal to the arduous tafk of felecting from
among

## ( 9 )

among his fubjects, thofe who from capacity and virtue were competent to heal the wounds, and reftore the energy of the commonwealth. It was requifite that a minifter fhould arife, who, to incorruptible integrity, and unblemifhed manners, fhould unite ftrength of mind, fevere œconomy, vigilance which never fleeps, eloquence to captivate, and vigour to fubdue. Rare, and almoft unexampled combination of endowments, conferred by Heaven on thofe, and on thofe only, whom, in her wife difpenfations, fhe deftines to fuftain, and reftore a finking monarchy! Yet fuch a minifter, may it be afferted without flattery, has this age and country feen. Such an adminiftration have we already enjoyed during near feven years; and to it may be juftly afcribed thofe aufpicious and happy events, which the prefent age regards with mingled wonder and admiration, and which will be long commemorated by a grateful poflerity.
${ }^{6}$ To trace the gradual progreffion from the darknefs of 1780 , to the bright funC fhine

## ( 10 )

Shine of t.ce prefent moment: to pourtray fome of the leading characters and events, which have fucceffively marked and diftinguifhed the intermediate time: to defcribe that ftormy and tempeftuous period, which, during two years, flook the cabinet, the palace, and the throne, till in 1784 , the prefent minifter, after a long and painful ftruggle, advanced into open day, and commenced his brilliant career: to mark the principal and moft difcriminating features of his domeftic government, and foreign policy : to take a general and rapid furvey of the caufes which have involved the monarchy of France in anarchy, and which feem to threaten that beautiful portion of Europe with all the horrors of civil war, of bloodfhed, and of bankruptcy: finally, to deduce this interefting feries of events from the period at which I have commenced, to the time when I thall lay before the public the picture which I am now defigning: thefe are the objects of the prefent attempt. I am fenfible of all its difficulty and deli-

## ( 11 )

cacy. I know how dangerous it is to hold up even truths to the eye of prejudice, or of party; and how reluctantly we allow the veil to be withdrawn from before the political fanctuary, when we are interefted in its concealment or its defence. J feel how invidious is the talk of appreciating the motives and actions of our cotemporaries, our friends, and our fellow citizens. I am not infenfible, above all, of my own incapacity to treat of matters yet recent, and obfcured by the paffions and interefts of the great actors themfelves. But, great as thefe impediments are, they cannot induce me to relinquifh my defign. What narrative can be fo inftructive, or fo interefting to the prefent age, as the hiftory of the prefent age? " Veteris populi " Romani, profpera, vel adverfa, claris " fcriptoribus memorata funt:" Of the laft ten $n_{1}$ years, no fketch has yet been offered to the public, It will be my province, " fine ira et ftudio, quorum caufas procul " habeo ;" with as much impartiality as the fubject itfelf, and the infirmities of
$\mathrm{C}_{2}$
our nature will admit, to delineate the events which have paffed in fucceffion bebefore us, fince the difaftrous period where the prefent memoirs commence.

The Britifh empire, which only a few years preceding that æra had appeared to be fo elevated and durable, then exhibited a melancholy and inftructive leffon of the mutability of human greatnefs. Civil war, which had commenced its deftruction, was aided by a combination of the firft European powers to compleat its fall. Her fleets and armies, accuftomed to conqueft, retreated before the navies of France and Spain. Her fhores, fo long unufed to hoftile invafion, were threatened and infulted. Her finances groaning beneath new and annual loans, conducted upon injudicious or ruinous principles, feemed to approach that point, beyond which public credit cannot exift or furvive. Difcord raifed her flaming brand in the capital, the fenate, and the cabinet. London, fcarcely efcaped from conflagration and pillage, looked forward to a general fufpenfion of commerce,

## ( 13 )

merce, and to national infolvency, as imminent and almoft inevitable. Clamour and difcontent filled the kingdom, and characterifed the affemblies of the people in the different counties. Ireland, difda n ing all further appeal except to the fword, and treading in the traces of America, armed her fubjects, not fo much for defence and protection, as for the purpofes of emancipation from the yoke of England. In the Britifh Channel, once facred from foreign intrufion, the iflands of Jerfey were repeatedly attacked. Spain, which had already re-united Minorca to her crown, held Gibraltar befieged, and meditated the conqueft of the Floridas. Every month brought accounts of the diminution of the Weft India Iflands, which fucceffively fell into the hands of France; while Jamaica, left almoft to her own internal capacities of defence, expected with trembling folicitude the long meditated invafion by the united fleets of the Houfe of Bourbon.

In India, Hyder Ally, the fcourge of the

## ( 14 )

the Britith nation, aided by the arms of France, was on the point of exterminating and expelling us from our moft ancient poffeffions. Madras was menaced by famine, as well as by war ; while Bengal itfelf fcarcely fuftained the preffure of the Mahrattas; and the vaft fabric which Clive had .emented with a profufion of European and Afiatic blood, was ready to crumble with as much rapidity as it had been originally conftructed.

In America, the names of Clinton and Cornwallis had fucceeded to thofe of Howe. New armies had occupied the pofts of their victorious, but departed predeceffors. The war which had long blazed in the midland provinces, was then principally transferred to thofe of Carolina and Virginia. Ufelefs trophies and barren laurels appeared to be the only advantages, which we were deftined to derive or acquire. Impenetrable woods and impaffible mor-fles, in the ceritre of which freedom had difplayed her banner, perpetually baffled all the exertions of valour,

## ( 15 )

lour, military fkill, and perfeverance. England began to awake from her dream of fubjugating the Thirteen Colonies, and already meditated the dereliction of that ruinous and expenfive undertaking ; while her pricie, her honour, and her indignation ftill propelled her forward, and amufed her with hopes of fuccefs, which conftantly vanifhed at a nearer view. Like the Roman empire under Gallienus, that of Britain feemed to approach the period of all its glories, and to be menaced with impending and total fubverfion.

From this gloomy and dejecting picture of foreign affairs, it may be judicious to pafs to a more animated, if not a more exhilerating fcene; that which was exhibited at home in the two houfes of Parliament. The principal figure which here prefented itfelf, was the firft minifter, Lord North, ftruggling againft a hoft of enemies, and flowly retreating before them, while they preffed forward with loud and repeated clamours. A thoufand javelins hung upon his
his political buckler, the points of which were continually broken and turned afide by his urbanity, his ready and pleafant wit, or his able and ingenious reafonings, when fufficiently ftung by the reproaches which were heaped on him, to awaken and to roufe his torpid parts. Inur'd to the habits of parliamentary debate, mafter of all the fcience of minifterial evafion or defence: though deftitute of energy and coercion of character, yet eloquent, mild, perfuafive, and bleffed with an almoft infuperable tranquillity of temper, he patiently faw the ftorm exhauft itfelf; and looked round, ferenc and placid, to that powerful phalanx, which, long accuftomed to obey, ftill clofely adhered to him under every circumftance of public diftrefs, and never abandoned him in the hour of neceffity. Even the lethargic and foporific qualities of his body, as they frequently prevented him from either hearing or feeling the invectives of oppofition, in fome meafure difarmed and blunted their edge; while flumbers, which
fo often fly the couch of princes, not unufually vifited Lord North amidft all the din and tumult of the Treafury Bench. Near him fat the American Secretary, Lord George Germain ; whofe more irritable nerves, and more communicative or unguarded character, afforded materials and foope for continual attack. Gifted with extraordinary natural endowments, though little cultivated by polite letters, or adorned by fcience; active, perfevering, decifive, and capable of conducting the greateft affairs of ftate, he was yet purfued by the fame fatality which had blafted his early profpects of greatnefs. Unfuccefsful in age upon the plains of America, as he had been unfortunate in youth upon thofe of Germany, he vainly invoked an exhaufted nation, and a difcontented Parliament, to continue a war, which, however juft and neceffary in its origin, had become odious and ungrateful, from a long feries of ill fuccefs. Loyal to his Sovereign, pertinacious in his favourite meafure of fubjecting America,

D and
and conceiving his own political fituation infeparably connected with the final fuccefs of that attempt, he adhered inflexibly to it, and regarded its profecution as a facred principle, from which no obftacles could induce him to recede.

Mr. Ellis, who for near half a century, fince the times of Walpole and Pelham, had occupied a place under Government, continued to retain his ancient corner on the Treafury Bench ; while Mr. Dundas, whofe pliant and verfatile talents have adapted themfelves to almoft cvery Adminiftration, and whofe abilities are calculated to ftrengthen and fupport any, was feated nearer to the centre of action, and boldly prefented himfelf aic the poft of danger, whenever the enemy attempted to ftorm the outworks. His friend and companion Mr. Rigby, ftill enjoyed the ample revenue of the Pay Office, without a partner; and in the exceffes of a voluptuous table, of wine and conviviality, drowned the recollection of tirefome debates, and more difgraceful defeats.

The two great luminaries of lege? knowledge, Thurlow and Wedderburne, wio had long occupied and adorned their feats on the fame fide of the houfe, had been fucceffively raifed to the honours of the pecrage ; and their empty places were filled by others far inferior in energy, dignity and capacity. Such was the afpect of miniftry at the period to which I allude. On the other fide of the houfe, Mr. Fox led on the bands of oppofition in clofe and well conducted files, while Mr. Burke charged at the head of his irregular fquadrons, and carried terror into the ranks of adminiftration. Dunning, in defiance of nature, deftitute almoft of organs of articulation, monotonous and difgufting in his tones, ungraceful in his figure, poffeffing no external advantages, and unadorned by any factitious circumftances of birth and alliance ; yct, under all thefe impediments, arrefted the judgment, charmed the ear, and captivated the imagination, by the ftream of his eloquence : though it fometimes flowed through the channels of

D 2
law,
law, it was always bright, clear, and lucid. Keppel, Conway, Howe, and Barrè occupied their refpective ftations in this formidable and augmenting body, and aided the general attack upon the feeble and difmayed adherents of the minifter.

Suftain'd by the purity and integrity of his intentions; repofing on the efteem and affections of his people; and bent on the profecution of a war, which, however unfortunate in its' conduct, was founded in the juft rights of his throne, no f mptom of change or alarm was to be traced in the fovereign. At no period of his reign were his fortitude and magnanimity put to fo fevere a teft, and at none were they more unfhaken. Equanimity, ferenity, and dignity appeared in his features, and pervaded his mamers, even in moments of the moft acute perfonal fuffering. That piety, and that refignation to the difpenfations of Providence, which has always formed fo diftinguifhing a part of his character, eminently gilded the gloom of this melancholy portion of his reign, preceded
and

## ( 21 )

and followed by fcenes of profperity and glory. Such was the fublime and affecting fpectacle which George the Third exhibited to mankind, amidft the convulfions of every kind which menaced his domeftic tranquillity, diminifhed his empire, and attacked him with augmenting violence.

To the limited and erring eye of man, incapableof pervading futurity, and of removing the darknefs which furrounds it, Louis the Sixteenth then prefented a very different and a much more enviable figure. Fortunate in having fucceeded to a prince, who was funk in andute pleafures, and loft to all public exertion before his reign expired, he afcended the throne of Henry the Fourth, under every flattering circumftance of youth and of profperity. His want of any eminent talents feemed to be amply compenfated by œconomy, application, decorum of manners, and, above all, by a felection of wife and able minifters. A fuccefsful war, which eclipfed and obliterated the difgraces and defeats, fuftained
tained by France in her laft rupture with England, endeared him to a loyal and affectionate nation, characterifed for ages by its predilection and attachment to its monarchs. A Queen, diftinguifhed by endowments of mind, of manners, and of perfon, not lefs than by her high rank and imperial defcent, had formed the bond of connexion between the Houfes of Bourbon and of Auftria, while fhe rendered Verfailles the refidence of pleafure, gaiety, and magnificencc. France appeared to re-afcend in the fcale of Europe, in the fame proportion as Great Britain declined; and flattery, if not reafon, already predicted the revival of the proud age of Lewis the Fourteenth. But, to confound the fpeculations of policy, and to evince the hafty tranfitions of human greatnefs, it was precifely at this very juncture that the feeds were fown, which we have fince feen matured; which have already overturned the very elements of order and government, fained the palace of Verfailles with blood, and menace the extinction of

## ( 23 )

property, perfonal fecurity, and every thing dear to mankind. The troops who were fent as auxiliaries to the rebellious provinces of Great Britain beyond the Atlantic, fpeedily imbibed that fpirit of freedom, whirh they were commanded to defend; and did not relinquifh thefe fentiments fo incompatible with abfolute monarchy, when they returned to their native country. On the other hand, the anticipation of the public revenue, which was neceffarily produced by a war, however glorious and fucceffful, added to the immoderate expences of a diffipated and luxurious court, foon reduced the King to adopt a meafure, which though difinterefted and even patriotic, opened the way to fhake his throne. Louis the Sixteenth was perfuaded to break the 1, yal houfehold, to difmifs about four hundred officers holding pofts immediately about his perfon, and to content himfelf with a lefs expenfive and fplendid eftabliflment. Perhaps no advice more replete with calamity, could have been conceived or followed.
lowed. The pomp and external paraphernalia of majefty being once withdrawn ; and the numbers of nobility attached to the fovercign by intereft, vanity, or affection, being once difbanded, the throne was left naked, unprotected, and expofed to infult. Experience has evinced its deftructive tendency ; and has fhewn that only a limited monarch, who reigns in the affections of his fubjects, and whofe interefts are intimately blended with thofe of his people, can remain an object of refpect and homage, divefted of the fplendor and protection of a royal court, and numerous houfehold.

The Emprefs Queen, Maria Therefa, clofed at this period a reign of forty years, marked by the moft ftriking viciffitudes of profperous and of adverfefortune. During the exiftence of the powerful combination which fhook her throne in the commencement of her life, the exhibited the moft undaunted magnanimity, the greateft refources of mind, and a cowige fuperior to her fex. Driven from Vienna in 1741,
while

$$
(25)
$$

while Bohemia and Auftria were over-run by the French and Bavariaus, fhe found protection and fuccours in the loyalty of her Hungarian fubjects, who at fight of her beauty, youth, and misfortunes, forgot their hereditary enmity and jealoufy of the Imperial hrafe from which the fprung. The afternoon and evening of her rcign, though frequently difturbed by foreign wars, were paffed by her in the difcharge of every duty due from a fovereign to her people. Mild, clement, humane, munificent, and ever extending the proofs of her parental tendernefs to her wide extended dominions, the was idolized by the Hungarians, beloved by the Flemings, and dear to every order of citizens. That piety and fortitude which had characterized her life, accompanied and brightened her dying moments. Her crowns defcended to her fon Jofeph ; a Prince who had given premature expectations of genius and capacity, and whofe emulation of the King of Pruffia promifed to render him worthy of fo great an antagonift. But EuE
rope was foon undeceived in this favorable anticipation of the talents of Jofeph the Second. Agitated with perpetual and varying fchemes of conqueft : reftlefs, and incapable of repofe : planning innovations in religion, in manners, and in civil life, which were no fooner executed than revoked: oppreffive and defpotic, without the art either of concealing thefe qualities, or of rendering their effects palatable to his fubjects: menacing at the fame moment the juft franchifes of the Netherlands, and the antient liberties of Hungary : dreaded in the empire, and detefted in his own capital : anxious to enlarge the limits of his dominions, even at the expence of faith and juftice : rapacious of ecclefiaftical property, and profufe only of the blood of his people; Jofeph foon alienated the affections of every rank, and clofed a tempeftuous reign, unregretted, and unlamented; leaving the Houfe of Auftria in embarrafsments, produced by his violence and ambition, fcarcely inferior to thofe which had fo nearly overturned and extinguifhed
it, at the death of his grandfather Charles the Sixth.

Two illuftrious and extraordinary Princes then filled the thrones of Mufcovy and of Pruffia. A woman was ftill deftined to fway the fceptre of the Czars, and to govern the immenfe regions extending from the Frozen to the Cafpian Sea. Unequalled in magnificence, and unconquerable in war, Catherine the Second had enlarged the limits of her vaft dominions, covered the Black Sea with Ruffian fleets, and threatened the entire fubverfion of the Ottoman power. Protectrefs of the fciences and liberal arts, fhe cultivated the friendfhip of d'Alembert, courted the correfpondence and the praifes of Voltaire, and, like Louis XIV., extended her munificence to men of letters throughout every kingdom of Europe. Intoxicated with fuccefs, and elevated to the fummit of human grandeur and felicity, fhe forgot the friendly hand which had aided her arms, and taught them the way to victory; while dreaded and admired in every quarE 2 ter
ter of the globe, fhe feemed to have chained the inconitancy of fortune, and to defy the changes and clouds which fo frequently darken the conclufion of a femaic reign.

Frederic, covered with laurels, and retired from Berlin to the folitary magnificence of Potzdam ; in the bofom of literary repcfe, and finking under the preffure of augmenting infirmities, advanced towards the termination of his memorable life and reign. Alienated from, or indifferent to the misfortunes of England, he regarded with a philofophic and averted eye her prefent unequal conteft againft fo many powers ; and extended no relief, nor made any exertion in favour of his antient ally.

Portugal alone, among fo many neutral, or hoftile ftates, ventured at this diffrefsful moment, to give fome affirmative marks of friendihip to the crown of Great Britain.

While Europe exhibited this afpect, fo little calculated to awaken hope, frefh loffes
loffes and defeats awaited the arms of England beyond the Atlantic. The capture of the Ifland of St. Euftatius, which, on its firft promulgation, had diffufed a general joy throughout the nation, produced in the event only obloquy to the captors, and a fufpenfion the moft untimely and injurious in our naval and military exertions; while the troops, which thould have acted with vigour againft the enemy, were funk in inactivity, or occupied in plunder.

As the year advanced, new iflands were loft, and new dıfgraces incurred ; 'till the climax of national calamity attained its ultimate point, bv the furrender of an army of feven thoufand men, who laid down their arms before Wafhington and Rochambeau, on the fhore of the Chefapeake. After fix years of mutual flaughter and alternate fuccefs, the genius of America triumphed, and this laft unexampled victory for ever confirmed her independence. The intelligence, when it was received in England, fhook the already tottering Adminiftration, and precipitated its fall.

Difmay,

Difmay and terror pervaded the cabinet, and agitated the counfels. The Oppofition, confcious of the augmenting diftrefs and fluctuating irrefolution of the firft minifter, called aloud for an explicit avowal of his renunciation of any further efforts to fubjugate the revolted colonies. The expreffive filence of Lord North to thefe peremptory demands, left no room to doubt either of his fentiments or his wifhes; and the Secretary for America, retiring from a fituation no longer tenable, after a rude attack from Lord Carmarthen, was received into the quiet bofom of the Houfe of Lords. The enemy rufhed into the breach which this difunion had occafioned, and already beheld the prize within their grafp. The Adminiftration, however, ftill lingered, though deftitute of animation or energy ; a feeble and ineffectual effort was even made to prolong their exiftence, by the fubftitution of Mr. Ellis in the place of Lord George Germain ; but this ftep ferved only to accelerate their diffolution, Oppofition, eager to feize the prey, and ac-
quiring
quiring force as they advanced, pufhed on towards the citadel ; 'till Lord North, on the 20th of March, 1782, exhibited the fingular and humiliating fpectacle of a Firft Minifter divefting himfelf of all the infignia of office, before a crowded Houfe of Commons; and announcing his refignation to an aftonifhed audience, who fcarcely credited the faç of which they were witneffes. The novelty and effect of this extraordinary furrender of power, were encreafed by its being equally fudden and unexpected. Neither his friends nor his enemies were aware of the blow; and even his fovereign did not fufpect, 'till almoft the very inftant in which he executed his purpofe, that any fuch was meditated or intended. It is nugatory and unneceffary here to enquire, whether it was principally produced by timidity, fatigue, or difguft. Probably, by a combination of all thefe emotions; and unqueftionably by a very unforefeen and hafty determination.

In this difarmed and unprepared fituation, without either time or ability for

## ( 32 )

framing a new miniftry, the King could only furrender at difcretion. He did fo; and the royal garrifon, entered by form, was plundered by the conquerors. Three garters were found among the fpoils, and which ferved to decorate the principal chieftains. Offices and pofts were diftributed at their arbitrary pleafure ; and a new Adminiftration foon appeared, compofed of motley materials, and evincing in its very formation and component parts, the principles of fpeedy diffolution. The feeble genius of Lord Rockingham prefided over it, but could infpire no heat or energy into the heterogencous mafs. Ill calculated for fo arduous and delicate a ftation, he wanted talents to guide, and animate the complicated machine of which he was only the oftenfible leader. Mr. Fox and the Earl of Shelburne occupied the two Secretaryfhips of State; while Keppel, raifed to the peerage for his fervices on the 27 th of July, 1778 , fucceeded to the prefidency of the vacant Board of Admiralty.

It is not my intention minutely to delineate
neate or depicture the meafures of this tranfitory Adminiftration, juft fhewn to the Britifh, as Marcellus was to the Roman people ; and fnatched away by an extinction as hafty, but not as much lamented. I have ever regarded the thort period of its duration, as the laft and loweft point of national and royal depreffion. Though illuminated by a victory, which has fhed an unexanipled luftre over the annals of England, no ray of it reflected upon the Miniftry : they had vilified and perfecuted the great naval commander who obtained it, previous to his departure for his ftation : they recalled him in the very moment of his conquefts. The annals of that period, circumfcribed within three months, are marked by the humiliating and fruitlefs attempts of the Government to obtain peace from Holland; though illufory promifes and affurances of fuccefs had been held out to parliament, and to the country, by Mr. Fox, before his entry upon office. The peerage, in the almolt only inftance where it was conferred, was

## ( 34 )

extorted from the fovereign, without even the decencies of refpect, or of requeft; and the extraordinary fpectacle of a ne:wly-created Peer kiffing the King's hand in the Queen's drawing room, in violation of all form or ufage, was referved for the Rockingham Adminiftration to exhibit, in the perfon of Sir Fletcher N urton.

A bill, which without materially conducing to national œconomy, or public bencfit, diminifhed on one hand the dignity which ufed to wait upon the perfon of the fovereign ; and on the other, difarmed every fucceeding minifter, by leaving him fcarcely any objects with which to ftimulate activity, or reward merit and adherence. A bill, which by compelling every Adminiftration, from want of offices, to multiply the peerage, as the only thing left in their power to beftow; and which, if not redreffed and repealed, may eventually deftroy the balance of the conftitution. A bill, well known, and as
well characterized by the name of its eloquent, but theoretical and vifionary author, was introduced, and rapidly carried through the unrefifting Houfes of Parliament; while the King was compelled to lend his name and aid to the completion of a law, which difbanded his houfhold, and difarmed his authority.
' 1 his unwife and impolitic attack upon the majefty of the throne, was properly accompanied and fucceeded by fimilar invafions of the hereditary franchifes of the people. Under the feccious allegation of extinguifhing the corrupt influence of the Crown, a great and induftrious body of men, the officers of the cuftoms, were deprived of their juit and unalienable right to vote in elections for their reprefentatives in Parliament; and the natural reward of merit or fervices was converted by the Legiflature, into an inftrument of punihment and privation.

But, happly for the monarch and for the nation, a Miniftry, in which hypocritical profeffion was fubftituted for action; F 2
whofe
whofe conquefts were limited to St , Jaines's, and whofe trophies were only obtained over clerks of the Green Cloth and houfekeepers, now drew near its extinction. The natural deceafe of the Marquis of Rockingham, which took place upon the ift of July, 1782, can fcarcely be faid to have preceded, or anticipated his political difmiffion. He expired in the vicinity of London; regretted only by his immediate friends and adherents ; efteemed as a virtuous and ow ${ }^{?}$ ? intentioned, though an inadequate Mimiter. His elevation to the firft poft in the Adminiftration was injurious to his character as a man of talents; and he was 1.wice deftined in the prefent reign, to fee the political fabrick which he had reared, moulder within a few months, and fink under its own preffure. Like Galba, " Major privato vifus, dum privatus fuit ; " et omnium confenfu, capax imperii, " nifi imperaffet."

Releafed by this interpofition of fortune, from a bondage equally fevere and humiliating,

## ( $3^{8}$ )

maturity and experience of more advanced life.

Some fubordinate alterations in other departments of fate completed the new Adminiffration ; which, at its commencement was favoured by the advanced period of the year and feffion, and the proregation of Parliament which naturally followed. The adherents of Lord Rockingham filled the Lower Houfe with loud $\because \quad \therefore u r s$ and pointed infiniations, againft the iuppofed motives and authors of a change fo inimical, as they afferted, to the beft interefts of the monarchy. Mr. Fox in a manly and magnanimous, Mr. Burke, in a querulous and reluctant manner, refpectively refigned their fituations. The impaffioned exclamations of the latter were only interrupted and extinguifhed by the arrival of the Black Rod, and the fummons to attend the Chancellor at the bar of the Houfe of Lords. . The feffion clofed; and oblivion already drew her veil acrofs the departed Adminiftration, while new convulfions, and new feenes of political confufion

## ( 39 )

confufion were filently, but rapidly, generating in the womb of time.

Peace, which for fo many years had fled, now prepared to return. Inactivity, and a premature fufpenfion of hoftility beyond the Atlantic, gradually opened the paffage to univerfal tranquillity in Europe. Imerica, already declared independent by the Legiflature, no longer occupied the arms or efforts of Great Britain. Holland, divided by the Orange and the Republican factions, feebly fuftained her portion of the common attack. France, arrefted in the midft of all her conquefts by the arm of Rodney, faw her boafted navy fcattered over the Weftern world; happy to efcape the purfuit of a victorious fleet, and to fink undifturbed, in the havens of Martinico, or of Bofton. It only remained to humble the arrogance of Spain; who, infolent with unaccuftomed fuccefs, and elated with the trophies acquired at Mi norca, and in Florida, had affembled her forces of every kind round the rock of Gibraltar, and already anticipated the re-
union of that proud fortrefs to her dominions. 'To indulge at once the gratification of national vanity, as well as the acquifition of glory, a Prince of the Blood Royal of France was invited to quit the effeminate pleafures of Verfailles, and to become a fpectatorof its reduction from the Spanifh camp. Preparations only infe iorto thofe of Philip the Sccond againf Elizabeth, were made to accelerate and fecure fo favourite an object of the court of Madrid; while all Europe might be faid, in common with the Count d'Artois, to have fixed their eyes upon this animating fpectacle. \& need not relate the event ; infcribed in characters which muft laft as long as military fame and valour are re. vered among men. The formidable armaments of Charles the Third perifhed under the fuperior fire of the garrifon; and the miferable victims who efcaped from the conflagration, were indebted for their lives to the exertions of that very enemy, for whofe deftruction they had been affembled.

## ( 41 )

Unider this fingular blaze of glory and fuccefs was terminated a war, which had been marked during its progrefs with every circumftance adverfe to England, and which, at many periods, had menaced its very exiftence: Negociations, prolonged throughout the autumn, produced a general pacification at the beginning of 1783 ; the terms of which, however widely different they were from thofe which $G$ eat Britain dictated at the treaties of Utrecht and of Fontainbleau, feemed neither ignominious nor difadvantageous, in the enfeebled flate of the finances and refources of the country. France reftored almoft all her acquifitions, while Spain retained her conquefts; and Holland, which had tardily and reluctantly been forced from her pacific fyftem, was abandoned by her alhies, and left to expiate by conceffions, the departure from her ancient policy and connexions.
But the waves of party, which had been fo long and fo violer.tly agitated, could not immediately fubfide with the G
extinction
extinction of hoftilities. The two powerful factions, who had fucceffively poffeffed, and been deprived of the government, however adverfe they were to each other, yet united in their common oppofition to the new intruders. The character of the Firft Lord of the Treafury, though diftinguifhed by many impofing qualities of mind, by ingratiating and popular manners, and by an enlarged acquaintance with the foreign interefts of England; yet wanted that ftamp of probity and principle, without which a great nation never: confers efteem and confidence. Infincerity and duplicity were afcribed to him by his enemies. Accufations and fufpicions were circulated, poffibly originating only in calumny, which arraigned his purity of conduct as a Minifter, and infinuated his acquifition of perfonal wealth by the abufe of his high fituation, during the progrefs of the late negociations, to the fordid purpofes of private gain. Doubts of this complexion, however unauthenticated or unjuft they may be fuppofed, yet,

## ( 43 )

by operating on the public, equally indifpofed them towards the peace, and towards its author.

To thefe obvious and oftenfible caufes of his difmiffion, may be added the extraordinary and almoft inexplicable indifference which marked his conduct, towards preferving a fituation, which it had been the leading and predominant object of his life to acquire. Parliament met, and after long and violent debates, renewed at various times, expreffed its difapprobation of the peace recently concluded, though by a very fmall majority. It is even highly probable that this mark of their diffatisfaction would not have been attended or followed by any fuch affirmative proofs of national refentment, as to have compelled a Minifter of firmnefs and rectitude to retire from his public fituation. Whether any confcioufnefs of a deficiency in either of thefe qualities, or whether motives more concealed and unafcertainable actuated the Earl of Shelburne; it is certain that he did not hefitate to take the warning

G 2
which
which had been given him, and to lay down his office without delay.

But though he had embraced this pufilla ${ }_{4}$ nimous and precipitate part, the Chancellor of the Exchequer, animated by feelings of integrity, loyalty, and duty to his Prince and to his country, generoufly refufed to abandon them to the refentments and difcretionary mandates of two factions, who had agreed to a mutual facrifice of principle, and even of decency, in order to gratify their thirft of power. After a manly and magñaniniuus, but ineffectual ftruggle, he was however compelled to yield to fo unequal a force. The Sovereign, who had vainly endeayoured to compofe a new Adminiftration, and who had been befieged in his own palace during fix weeks, found the lines of circumvallation too ftrong to force, and furrendered a fecond time prifoner of whar. The two victorious chieftains, who had agreed to bury all paft caufes of refentment in oblivion, entered the breach in triumph, bound their captive, pofted their centinels; and invcfied themfelves

## ( 45 )

 nate office, and refigned the painful preeminetice of ftate into hands of greater energy or ambition.A paufe fucceeded to this extraordinary and eventful transfer of power; as the monarch

## ( $4^{6}$ )

monarch and the nation were equally incapable of inftantly exerting any effort for their emancipation. The "Coalition" impofed their fetters upon both; and little attentive to acquire the affection, were fatisfied with the fubmiffion of their prifoners. Relying on their own united ftrength to retain the conquefts which they had made, they only began already to project the "teans of perpetuating and extending the term of their duration. To atchieve this object, it was indifpenfably neceffary to reconftruct the edifice which their injudicious firit of reform had $1 a^{\prime}$ 'y overthrown; and to fubetitute othus charges and offices in the place of thofe, which had been annihilated in the houfchold of the Sovereign. Thefe pleafing anticipations and reveries formed a grateful occupation during the recefs of Parliament; and the fucceeding winter was deftined to fee the chains, which an unprincipled ambition had fabricated, impofed with all the folemnity of legiflation upon an unrefifting people.

There

## ( 47 )

There is however a limit prefcribed to violence, which it has ever been found impracticable to pafs; and the "Coalition" was deftined to be taught by it's own experience, that no combination of talents, power, or ability can fuftain a Government, where all opinion of principle, or refpect for character hav- ceafed to exift, on the part of the nation towards its tyrants. Even the forms of the conftitution and the fanctity of law will not prevent a generous and an enlightened country, from difcerning the abufe of that authority, which while it extinguifhes prerogative, militates equally againft freedom. Time alonc was requifite to mature thefe reflections; and the Adminiftration opened the way to their own deftruction, by the very means which they had concerted for placing their greatnefs beyond the reach of accident.

Mr. Fox introduced his celebrated "Eaft India Bill," with all that fplendor of parts, and difplay of ability, which has rendered him fo diftinguifhed in the hif-
tory of the prefent age Though India was not in that department of public bufinefs, over which as Secretary of State, he perfonally prefided, yet the fuperion energy of his character, and the convenient facility of his new colleague, allowed him to affume this arduous and dangerous pre-eminence. Mr. Burke's ample and inexhauftible ftock of materials and documents, fupplied any deficiencies of memory or local information; while the "Intitutes of Timur," and the wifoft regulations of European policy, were newmodelled by this generous legillator. The oppreffions and calamities under which India had fo long fuffered ; the peculations, committed by the fervants of the Company, as well as the wanton and unprincipled wars in which they had engaged, were highly painted, and ftrcurgly reprobated. The remedy to thefe numerous evils was prefented ; and all palliatives were deprecated, as unequal to the extermination of $\mathbf{a}$ difeafe which had pervaded the whole fyftem, which demanded a meafure of more than

## ( 49 )

thatin ordinary vigour in the Legiflature: 'The Houfe of Commono yielded to thefe convincing and minifterial arguments, fo calculated to operate on their paffions as well as their judgments. The ineffectual oppofition which was made to i: by Mr. Pitt, and a few perfons who adhered to him, neither retarded nor impeded the rapid progrefs of the bill. It was carried through one Houfe of Parliament by prodigious fuperiority of numbers ; and it was not apprehended that the fubfervient underderftandings of the other Houfe, generally difpofed to fec all meafures of all Adminiftrations with a favourable eye, would reject the prefent, or canvafs it with unufual feverity. The "Coalition" appeared already to touch the fhore, and to be near the a compliniment of their moft fanguine projects of greatnefs.

The magnanimity and penetration of the Sovereign, awakened and directed by the timely exhortation of thofe who collected found the throne in this critical and dangerous conjincture, fratched the country
from the impending misfortune. The great incorporated bodies in various parts of the kingdom, flowly roufed to a comprehenfion of the evil, and alarmed at the violation of the chartered rights of the firft commercial company in the nation, appeared ready to reclaim and to defend their own threatened immunities, or properties. London led the way in thefe fymptoms of confternation, and was followed by the principal cities and provinces. Addreffes ${ }_{x}$ remonftrances, and petitions, arrived from every part of Great Britain. Satire and ridicule, fo powerful in their operation upon the minds of men, united with reafon and argament to overturn a Miniftry, who had attempted to conftruct their own grandeur, equally on the ruin of the Prerogative, and the deftruction of the Conftitution. Two caricature drawings, conceived with exquifite humour, and whofeeffect can perhaps be compared with nothing in our hiftory,- sept the fong of " Lillabullero" under James the Second, were circulated in every compairy. In one of thefe, the

Secretary of State who had introduced the bill, was depictured carrying, like Atlas, the whole Eaft-India Houfe upon his Shoulders ; while the affrighted Directors, looking out of the windows, appeared vainky to invoke affiftance againf the violence. The other reprefented his triumphal entry into Dehli, the capital of his newly conquered dominions. Mr. Fox was habited in the fplendid Afiatic drefs of Shaw Allum ; while his obedient colleague in office Lord North, degraded to the inferior nature of the trained and managed elephant, fupported the victor on his back. Mr. Burke, as a trumpeter, accompanied the proceffion, proclaiming the virtues and trophies of this fucceffor Tamerlane and Aurungzebe.

The form of national indignation, though long and tardy in forming, had now collected, and prepared to burft with the utmoft violence. The Houfe of Peers led the way, by throwing out the EaftIndia Bill ; and on the fubfequent night, at a late hour, his Majefty fent to de$\mathrm{H}_{2}$ mand
mand the feals of office from the two $\mathrm{Se}-$ cretaries of State. An Adminiftration, at the head of which was Mr. Pitt, and of which he may be faid to have formed the vital principle, was inftantly compofed. So fecure, however, were the late Minifters of their afcendancy in the Houfe of Commons, and in fuch contempt were thefe efforts of the Crown to liberate itfelf held by them, that when the writ was moved for Appleby, in confequence of the new Firft Lord of the Treafury having vacated his feat, it was received with loud, and almoft general laughter. Even thofe whofe judgment and experience in Parliamentary matters were moft refpected, ventured to predict that a few weeks would fee the termination of this fugitive Government, either by a gradual or a violent death. For the firft time fince the acceffion of the houfe of Brunfwick; perhaps it may be faid fince the exiftence of the monarchy, the fovereign and the people were united in oppofition to the reprefentatives of the people. The patient and paffive

## ( 53 )

paffive fortitude of Mr. Pitt "uftained him, even more than his talents or integrity, during near three months that this fiege continued; nordid headvife his Sovereign to have recourfe to the laft conftitutional meafure left him, that of diffolution, till above a hundred and twenty addreffes, couched in terms of loyalty, and of reprobation againft the attempt to overturn the prerogative, left no room to hefitate on its popularity, or on the general joy with which it would be received. The elections for the new Parliament, which at no period of the prefent century were ever fo incorrupt, and fo free from all minifterial interference, evinced beyond difpute, how odious to the nation were the principles and conduct of the late Adminiftration. The Firft Minifter emerged at length, from a ftate of the moft painful exertion and depreffion, into political day; and the reins of Government, fo long and fo violently retained by the "Coalition," fell from their hands. It is from this æra that we may date the flow, but progreffive elevation of the Bri-

## ( 54 )

tifh empire ; which, fhaken and convulfed during the calamitous period of the American war, had not been lefs agitated by internal fruggles of faction, fince its termination. But, before we arrive at that exhilerating fcene, it may be a not lefs inftructive, though it is a lefs pleafing tafk, to furvey the picture of the empire at the moment when the prefent Minifter commenced his Adminiffration.

Exhaufted in herfinances, and deprived of vigour frem the rapid fucceffion of fo many Governments, debility, languor, and decay characterifed every internal department of the State. The public funds feemed to have funk below the point of depreffion, to which even the misfortunes of the war had reduced them; and the confifcation which had menaced the Eaft India Company while Mr. Fox's bill impended over their property, had operated to fink their ftock below any former precedent. The revenue was diminifhed and invaded by the bold inroads of contraband commerce, which loudly called on
the Legiflature for effectual interpofition and redrefs. No foreign alliance, or connexion with any of the great powers on the Continent, offered the profpect of fupport in a future war. Holland was completely governed by the Republican fac* tion, who, under Van Berkel in the prefent, as under the De Witts in the laft century, had entered into the clofeft connexions with the Court of Verfailles; while the Prince of Orange, retaining little more than the name of Stadtholder, was reduced to a flate of paffive' infignificance. Denmark, whofe fovereigns had been connected by alliances of blood and policy with the Crown of England for near half a century ; and whofe natural interefts, in oppofition to thofe of Sweden, tended to confirm thefe tyes; had departed from her ancient principles, and no longer cultivated the friendhip of a kingdom, incapable of extending protection, or rendering itfelf refpectable in the Baltic. From the Court of Stockholm, attached for ages to France, no demonftrations of

## ( $5^{6}$ )

amity could be expected. 'The Emperor', occupied in fyftems of reformation, or projects of aggrandizement ; planning the exchange of the Netherlands with the Elector Palatine, while he wantonly attacked the Republic of Holland, whofe troops, in defiance of the moft facred treaties, he had ejected by force from the barrier towns of Flanders: Jofeph, engaged in thefe ambitious enterprizes; and already connected with the Court of Peterfburgh, might be regarded as inimical rather than friendly to Great Britain. Ruffia continued in a ftate of fullen alienation, and Pruffia betrayed no marks of returning friendihip; while France, fill conducted by the fplendid and impofing counfels of Vergennes, appeared to extend, to cement, and to confirm her greatnefs.

The firft years of the prefent Adminiftration were principally characterifed by thofe beneficial regulations of commerce, and by thofe falutary meafures of finance, fo indifpenfably requifite in the fallen and impoverifhed condition of the country. An

## ( 57 )

" Eaft India bill," mild and temperate in its genius, and widely different frum the rapacious and arbirrary principles which had rendered the former fo univerfilly odious, was introduced, and paffed into a law. The moft vigorous and efficacious meafures were adopted for the fuppreffion of fmuggling. The royal woods and forefts, from whence fo great a fupport to the navy ought naturally to be derived, but which had been completely abandoned, as an object of national protection, for half a century, did not efcape the vigilant attention of a Minifter, anxious to avail himfelf of every public refource. Provifion was made for the flow, but certain diminution of the national debt, by the appropriation of a million fterling annually, vefted in the hands of commiffioners for the purchafe of ftock.

The confolidation of the Cuftoms and Excife, a meafure of incredible labour and detail, as well as of infinite advantage to commerce, by facilitating and fimplifying the intricacies attendant on mercan-
tile tranfactions, and the payment of duties; a regulation which in itfelf might immortalize any Adminiftration, was fully and permanently effected. It had failed under the inert and feeble efforts of Lord North ; and its completion, fo evidently productive of national benefit, drew applaufes even from the enemies and oppofers of the Minifter. This long lift of enlightened and patriotic meafures was clofed by the accomplifhment of one of the greateft, but moft delicate and arduous attempts, which have diftinguifhed the prefent century; I mean the "Commercial Treaty with France." An enlarged and liberal policy; the greateft incitements to general induftry; the extenfion of commerce, and the extinction of thofe mutual jealoufies and antipathies, which have for fo many ages actuated the rival monarchies of France and England: thefe were the characteriftics and principles of a treaty, which, notwithftanding the fpacious objections urged againft it in Parliament, excited univerfal approbation, and extort-
ed involuntary eulogiums. The genius of Great Britain, long obfcured and fettered, began to affert its antient energy ; and, liberated from domeftic anarchy, prepared to re-appear on the theatre of Europe, from whence fhe had been banifhed by internal calamities and diftrefs. The fignature of the " Germanic League," at Berlin, whofe object was the prefervation of the liberties of the Empire againft the ambition of Jofeph the Second, was the firft fymptom exhibited of returning attention to the concerns of the Continent; and though this confederation was only acceded to by his Britannic Majefty in his capacity of Elector of Hanover, yet its effect unqueftionably extended beyond its oftenfible object, and recalled the Englifh nation again to geneal view and confideration.

While under a wife, vigorous, and œconomical Government, we were thus refuming our ancient eminence and dignity among the European States, the clouds of difcontent and civil commotion were ra-
pidly collecting over the monarchy of France. The finances, involved fince the ceffation of the late war in augmenting cmbarraffments and inextricable difficulties, might have been found beyond the probity of a Sully, or the capacity of a Colbert, to re-eftabliih: in the hands of Calonne, raifed to the fuperintendance, they appeared to prefent a profpect of public infolvency as imminent and unavoidable. Though the Court of Verfailles was much diminifhed in majefty and fplendor by the numerous reforms which had fucceffively taken place, yet the miniftry had not fubstituted any judicious fyitem of frugality, nor adopted any meafures of energy and wifdom, either for the alleviation of the national burthens, and liquidation of the enormous debt contract, ed under the late and prefent King; nor (which feemed to be ftill more neceffary for their perfonal fafety) to guard againft the gathering ftorm of public violence and indignation.

Louis the Sixteenth had already, in a

## (61 )

confiderable degree, furvived the refpect, though he continued to enjoy the affection of his people. The firft years of his reign, conducted by Maurepas and Vergennes, had been diftinguifhed by the moft brilliant fuccefs; which, while it dazzled and flattered the national vanity, had, in a great meafure, concealed from view the ruin which it occafioned in the finances. The King poffeffed none of thofe qualities, either corporal or mental, calculated to fafcinate, and to fupply the place of more folid endowments. His figure was deftitute of dignity, and his addrefs awkward and embarraffed. He neither knew how to affume the open and winning manners of Henry the Fourth, nor how to adopt the majeftic condefcenfion of Louis the Fourteenth. Attached to the Queen from motives rather fenfual than intellectual, and reftrained by religious fcruples from forming any connexions of gallantry with other women, he never, in any inftance, violated his nuptial fidelity, though furrounded by courtiers anxious to anticipate, and eager

## ( 62 )

to adminifter to his defires on the firt intimation. Addicted to the pleafures of the table, and fometimes induced to pafs the limits of temperance and fobricty, he yielded in thofe moments of facility to the demands which the profufion of the Queen, and of his brother the Court d'Artois, made it neceflary for them continually to rencw. His own expences were moderate, and his pleafures few. The former were chiefly confined to the conftruction of the Caftle of Compiegne, and the repairs of the palace of Verfailles. The latter confifted principally in the amufement of the chace. Though much neglected in his education during the life of Louis the Fifteenth, his mind was not uninformed; and he had attained fince his acceffion to the throne, a very confiderable degree of acquaintance with polite letters, hiftory, and geography, by his own private application and folitary fudy, unaffifted by any aid. In the art of reigning, he had unfortunately made little progrefs or proficiency, Unambi-

## ( 63 )

tious and moderate in his character, he formed no views of conqueft. He even difapproved, though oniy paffively, of the alliance with America, i to which his minifters had led him in the commencement of his reign ; and fuffered himfelf, with fome degree of averfion and reluctance, to be made an acceffary to the independence of the Thirteen Colonies.

His parts, however fluggifh, inert, and limited, yet were not inadequate to the comprehenfion and difcharge of the high duties annexed to his ftation. He unqueftionably loved his people, and paffionately defired, at the price of every perfonal renunciation and facrifice, to render his reign dear to France. Averfe to cruelty, and of a nature acceffible to the impreffions of pity and humanity, he threw open the gates of the caftle of Vincennes, which for ages had been one of the principal prifons of ftate; and mitigated, in numerous inftances, the rigour of arbitrary power, which his grandfather had ftrengthened and abufed.

## ( 64 )

His behaviour on the night of the 5 th of October, 1789, has evinced, notwithftanding the doubts which have been entertained upon that point, that he did not want perfonal refolution or fortitude. But the quality in which he has been eminently deficient, and to the want of which may be principally aferibed all the late cilamities of his life, is Political courage and decifion. In times of tranquillity and repofe, this defect might not have been perceived; or, if difcovered, might have yet been limited in its effects : in tempeftuous periods, and popular infurrections, it has convulfed the monarchy, and menaced the exiftence of the thronc itfelf.

The character of the Queen, though ftrongly contrafted with that of Louis the Sixtecnth, was perhaps ftill more calculated to alienate the affections and excite the clamours of the nation. Of a figure favoured by nature, and adorned by gracious and infinuating manners, fhe was formed to attach mankind. The fhort period which elapfed, fubfequent to her marriage

## ( $6_{5}$ )

marriage with the Dauphin, in 1770, and previous to her afcending the throne, was marked by the moft general partiality, and by all the flattering prognoffics of poetry and genius, who anticipated the future glories and felicity of her reign*. Her education in the court of Vienna, under the fevere infeection of Maria Therefa, a Princefs

[^0]eminent for chaftity and piety, feemed in fome meafure to guarantee the exiftence of thefe qualities in her daughter. But, Marie Antoinette appears to have inherited fcarce any of the characteriftic virtues or vices of the Auftrian family, except her attachment to the Houfe from whence fhe fprung. The fond predictions of adulation, offered to the Dauphinefs, were not realized by the Queen. Her levity of manners ; her expenfive prodigality ; her diffipations; her attachments; her retirements ; perhaps, more than all thefe defects, her fuppofed abufe of the afcendant which the had acquired and preferved over her hufband, gradually eftranged every order of the people; and eventually, as the public embarraffinents augmented, rendered her generally odious. Her actions were examined with the moft fevere and unjuft fpirit of national enquiry. Her political connections with the Imperial ambaffador were as loudly arraigned on one hand, as her perfonal intimacy with the Comte d'Artois was ftrongly cenfured on

## ( 67 )

the other. Inputations the moft injurious to her fame as a woman and a wife, were fuperadded to accufations of her difpofition to facrifice the intereft, and fquander the treafures of the kingdom over which the reigned, in order to aggrandize her brother the Emperor. She was accufed of miniftering to the weakneffes, and even ftimulating the appetites of the King, with a view to avail herfelf of his fondnefs, or temporary privation of reflexion.

The continual vifits, and long interviews which fheaccorded to Madamoifelle Bertin, excited fentiments of difapprobation in thofe, who thought the leifure of the firft Queen in Europe indecently thrown away in difquifitions upon a cap, or confultations upon a handkerchief. Her purchafe of the palace of St. Cloud, in the midft of general pecuniary diftrefs, was taxed with equal imprudence and profufion. Her frequent retirements to Trianon were ftigmatized, as exhibiting fcenes unfit for the public eye. The myfterious and inexplicable tranfaction relative to the famous neck$\mathrm{K}_{2}$ lace,

## ( 68 )

lace, afferted to have been purchafed by her; although the Cardinal de Rohan and the Comteffe de la Motte were the victims of it, yet had left impreffions difadvantageous to her honour in the minds of a nation, difpofed to fee all her actions through an unfavourable medium. Her predilection for, and attachment to the Duchefs de Polignac, fuffered the moft malignant comments of fatyrical prejudice; and the liberal donations, or high employments, with which that family was diftinguifhed, neceffarily added to the load of public execration. Thefe accumulated topics of popular invective and animadverfion, were circulated with rapidity, and received with equal avidity, by an ignorant and credulous multitude, who filled the arcades of the " Palais Royal,". and who imbibed the mof inveterate deteftation of their Queen, as conceiving her the author of the public diftrefs. They had already, in fome degree, marked her out as a victim to the general indignation; and anxioully waited for the favourable occafion,
occafion, which fhou:ld liberate the Sovereign and the nation from the pretended evils of her influence, and leave Louis the Sixteenth to the impulfe of his natural beneficence and affection for his people.

The Count de Provence, the eldeft of the King's two brothers, acted a very inferior and fubordinate part upon this great theatre. Either deftitute of talents to excite public attention, or repreffing them from motives of prudence and fituation, he appeared only in the back ground; and formed a contraft to the impofing qualities which diftinguirhed the Count d'Artois. Of a figure much more graceful and elegant than either of his brothers, this Prince was likewife adorned with more dignified, if not more courteous manners. Attached to the Qiieen from fimilarity of tafte and character, he even exceeded her in profufion, expence, and diffipation. After having paffed the morning on the " Plaine de Sablons," in the drefs and occupations of a jockey, he only retired from thefe fatigues, to repofe in the
arms of Madamoifelle Contat. His little palace of "Bagatelle," in the "Bois de Boulogne," was at once the fcene of the moft refined and voluptuous debauch, and of the moft profligate pleafures which luxury could devife or affemble. 'Two fons, already advancing faft towards manhood, and whofe conftitutions feemed to promife a vigorous health, attracted the eyes of the nation, and gave him a manifeft fuperiority to the Count de Provence, whofe marriage had not been fruitful. The feeble and debilitated itate of the Dauphin, whofe infirmities already appeared to menace a premature end, left only the Duke de Normandie between him and the eventual fucceffion to the Crown. Though not endowed with any eminent talents, yet, as being of a character more decided, and affirmative than either the King or the Count de Provence, he came more forward to public view; and by his adherence to the Queen, influenced very confiderably on affairs of itate,

## [ 71 ]

At a greater diftance from the throne, but decorated with the title of Firt Prince of the Blood, was feen the Duke of Orleans. Poffeffed of an immenfe revenue, and having in reverfion all the domains of his father-in-law, the Duke de Penthievre, he might be efteemed the richeft fubject in Europe. His reputation for generofity and munificence, bore, however, no proportion to his ample poffeffions: on the contrary, though profufe in the gratification of his appetites, he was accufed by the popular voice of an attention to the arts of œconomy, unworthy of his high birth and fplendid fortune. Emulous of being thought to refemble Henry the Fourth, and the Regent Duke of Orleans, from both of which Princes he derived his defcent, he had no fimilarity to either, except in the foibles which fhaded the character of the former, and in the vices which difgraced the conduct of the latter. The beneficence, the heroic valour, and clemency of mind, which characterifed the King of Navarre, were not to be traced
in his degenerate grandfon. The fublime talents, the military genius, and the various endowments of a ftatefman and a general, which combined in the Regent, were as vainly fought in the Duke of Orleans.

Abandoned to pleafures of every defcription, he yet had no elevation nor refinement in his amufements. His perfonal courage, which had fuftained fome injury, and excited fome farcaftic comments, from his behaviour under d'Orvilliers in 1778 , ha not been retrieved by his unpropitious attempt to fignalize himfelf, by accompanying Charles and Robert into the air. The malignant reflexions formerly thrown out upon his intrepidity as $\boldsymbol{a}$ naval officer, were followed by pafquinades upon his fuppofed apprehenfions in the balloon; and he was faid to have been as unfortunate in the park of Meudon, where he alighted from his aerial excurfion, as he had been at an earlier period of his life, in the vicinity of the iflands of Ufhant. Notwithftand-
ing thefe afperfions and defects, he yet poffeffed qualities; which if conducted by' judgment; might have redeemed him from the load of obloquy und $r$ which he was oppreffed. His talents were certainly above mediocrity ; his mind enlarged, his manners condefcending and popular, and his underftanding cultivated by letters, and an extenfive acquaintance with mankind.

He was the only Prince of the Houfe of Bourbon who had ever vifited England in perfon; the Duke d'Alençon, brother to Henry the Third of France, having been the laft, who in the profecution of his defign to marry Elizabeth, had paffed over into thefe kingdoms. The diforders in the finances, and the defperate, or arbitrary meafures to which the Court was neceffitated perpetually to have recourfe, in order to raife new loans and obtain fupplies, had given the Duke of Orleans an occafion, of which he gladly availed himfelf, to regain his long loft popularity. To this public and oftenfible caufe of his alienation from the Court, were added L fome
fome private mifunderftandirgs, which had their origin in the interference of the Queen to prevent an alliance, which was projected between the eldeft fon of the Count d'Artois, and the daughter of the Duke of Orleans: a marriage which it was more than poffible might eventually clevate the young Princefs to the Throne of France. Animated and ftimulated by thefe motives, he feemed to awake from the diffolute pleafures in which he had been plunged, and to affume the more dignified and ingratiating character of an oppofer of defpotifm, and a protector of the people. This change of conduct foon produced its full effect ; and he paffcd with the moft rapid tranfition, from the contempt and reprobation of the inhabitants of Paris, to the heighth of favour and general attachment.

Such was the afpect which the Court of Verfailles prefented at the commencement of the year 1787 , and fuch were the principal characters and perfonages of which it was compofed. The fources of difcontent,

## ( 75 )

and even of revolt and infurrection, were numerous and augmenting. The ordinary channels of revenue were either dried up, or had become inadequate to the exigencies of the Government. Recourfe was therefore reluctantly had to other modes of ettaining fupplies; and the convocation of the "Notables" was propofed by Calonne to the King, and adopted immediately, as the only remaining expedient.

In thefe critical circumftances of perplexity and diftrefs, Vergennes, whofe high reputation and fuperior talents had hitherto diffufed a luftre over the councils of France, and alone fuftained the tottering load of public credit and national grandeur: this celebrated Minifter, the fucceffor of Maurepas, and who, fince his death, had during eight years held the firft place in the Adminiftration, was removed by death from a fcene, to which all his abilities would probably have been found unequal. Fortunate in his alliances, in his wars, in his negociations, in his acquifiL 2 tion
tion of fame, in the enjoyment of the foyal favour and the popular opinion, he was yet more happy in not furviving thefe frail and uncertain poffeffions. Unlike to Louvois and to Fleury, he neither forfeited the affection of his Sovereign, nor outlived his own talents and capacity. Admired, regretted, and lamented, his death feemed to be the fignal which unloofed the jarring elements of civil commotion, and which marked the æra of the extinction of tranquillity and obedience.

The difmiffion of Calonne followed in a few weeks; and the clevation of an ecclefiaftic, the Archbihop of Touloufe, to the fupreme controul of the finances, whatever expectations it might at firft qwaken of alleviation and redrefs, only tended in the event to aggravate the national calamities, and to encreafe the popular difcontent. New fyftems, equally unproductive as the preceding, and only calculated for temporary relief, afforded ncither a remelly to the preffing neceflities of the court, nor to the clamorous griev-

## ( 77 )

ances of the people. The "Notables" were found to be equally incompetent and averfe, to adduce any cure for thife multipled diftempers of the ftate. They were therefore diffolved; and the nation already began to demand an affembly of the " States General," as the laft and only meafure competent to extricate and retrieve them from the danger of impending bankruptcy and ruin.

But the troubles and internal feuds of the Dutch commonwealth, which had been long nourifhed and fed by the political liberality of the cabinet of Verfailles; which had grown up under the foftering hand of Vergennes, and which a feries of deep and artful negociations had inflamed and augmented, now approached rapidly to their crifis. Never could they have attained to their maturity at a more inaufpicious moment for France; and never was the triumph of fortune over the machinations of policy more confpicuoufly exemplified.

William the Fifth, Prince of Orange, poffeffed the Stadtholderate of the United Provinces. Allied by name rather than by blood, to the great Houfe of Nafferu, fo fertile in heroes and in legiflators, few traces of the fublime qualities which have rendered that family immortal, were to be difeovered in their fucceffor. But, in the Prircefs his wife, fprung from the union of the houfes of Brandenburgh and Naffau, the characteriftic energy of both was vinible. Driven out of the Province of Holland by the indignities and infults with which the republican faction had treated the Prince, whom they had compelled to retire to Nimeguen, the had the courage to fet out for the Hague, and, unattended by any guards, to traverfe a hoftile country, in the hope of adjufting by her prefence, addrefs, and flexibility, the points in difpute between her hufband and the States. In this arduous and delicate attempt the was fruftrated, and even her perion laid under an arreft, by the brutality of one of the military officers
in the fervice of the Republic. Obliged to abandon her project, and to return to Nimeguen, fhe invoked the protection and affiftance of the King of Pruffia, to re-inftate the exiled Stadtholder in the hereditary dignities and offices, of which he had been fo unjuftly and unconftitutionally deprived. It was not to her uncle that the addreffed thefe entreaties. The great Frederick was no more: he had paid the common tribute to mortality, and had expired at Potzdam under the accumulating weight of age and difeafes. But, though he no longer animated in perfon the councils of Berlin, the vigour of his genius furvived: it feemed even to have attained new force in the hands of a Sovereign, whofe more active period of life led him to adopt meafures of decifion, and whofe near relationfhip to the Princefs of Orange ftimulated him to warmer exertions in her behalf.

The juncture was favourable to the Pruflian interpofition; and England, under the aufpices of a Minifter prompt to

## ( 80 )

feize the occafion of again re-appearing with dignity and effect on the Continent; avowedly joined and aided the attack upors the enemies of the houfe of Orange. Ant army of about fifteen thoufand men, commanded by the firft military genius int Europe, the Duke of Brunfwick, entered the territories of the States General, in September, 1787 , and over-ran with the fame rapidity that Louis the Fourteenth haci done in laft century, the province of Holland. Amfterdam itfelf, the centre of difaffection, and the laft afylum of the French and republican factions, after a fhort and ineffectual ftruggle, capitulated, and received the conqueror. A complete, but almoft bloodlefs revolution was effected; and the Hague, fo long a prey to difcord and to animofity, faw the Stadtholder return, and occupy his high ftation, with every expreffion of loyalty and attachment.

France, embarraffed, and incapable from her domeftic misfortunes, of interfering either with honour to herfelf, or efficacy to

## ( 8i )

her friends, though fle appeared to make a feeble effort in their favour, yet ultimately gave way to the ftorm, and confented to difarm; nay more, publicly to deny her having ever intended to fuftain that party, in whofe fupport fhe had expended her treafures, and for whom, in more aufpicious æras, fhe would have involved Europe in blood and hoftility. The high reputation which fo fignal a fuccefs reflected on the councils of Great Britain, was contrafted and rendered more fplendid, by a comparifon with the fallen ftate of her ancient rival, who, only a few years preceding thefe events, in conjunction with America, had feemed to give laws in every quarter of tr? globe. The energy and wife precaution the Minifter did not, however, remit its vigilance, or content itfelf with having liberated the Dutch Republic, and reinftated the Stadtholder. Attentive to profit of this fortunate and propitious moment, and to avail himfelf of the gratitude with which the affiftance extended to Holland had equally M impreffed

## ( 82 )

impreffed the Government and the people, he cemented thofe fentiments by immediately framing, and eventually concluding a defenfive treaty with the United Provinces. It was figned in April, 1788, and was evidently built on the model of that, which had been terminated under the aufpices of Vergennes, between France and Holland, towards the clofe of the year 1785 . Reciprocal fuccours, naval and military, were ftipulated; and the bands of political union were drawn as clofe, as human wifdom and mutual intereft could devife.

This alliance, fo much approved, and fo highly beneficial to England, was fucceeded by a fecond, fimilar in its tenor, nature, and tendency, between the Courts of St. James's and Berlin, which was ratified in the month of Auguft of the fame year. They had been preceded by a fulmfidiary treaty between England and the Landgrave of Heffe, which enabled the former power, on the payment of a certain annual fum, to demand from the

## ( 83 )

latter, at a very fhort notice, a body of twelve thoufand troops.

Thus, in the fpace of only four years which might be faid to have elapfed fince the complete triumph of the Sovereign and the nation over the " Coalition," had Great Britain, under the conduct of a Minifter who had not yet attained his thirtieth year, rifen from a fate of unexampled depreffion, to her antient fuperiority among the European kingdoms. The financ shad been re-eftablifhed by a fyftem of unremitting and fevere æconomy. Commerce, aided and emancipated by the wife regulations of an enlarged policy, opened new fources, and navigated feas hitherto unknown or unexplored, in the profecution of its objects. Public credit attained a point of elevation and permanence, unparelleled fince the commencement of the unfortunate war with America. The councils of England, conducted on principles, not of a crooked duplicity, but of rectitude and magnanimity, excited refpect and approbation in the furrounding M 2
ftates,
flates, while they diffufed profperity and felicity over every part of the ifland.

Political alliances and connections on the Continent, added the profpect of ftability to every meafure which was calculated for internal fecurity or commercial advantage. The calamities of LordNorth'sAdminiftration, and the anarchy which fucceeded that unfortunate period : the defalcation of thirteen provinces, and of both the Floridas from the empire : the difgraces of Saratoga, and of the Chefapeake: the tumults, and conflagration of London : in a word, the varied and accumulated misfortunes, which for a long feries of years oppreffed, and had almoft overwhelmed the commônwealth, were already erafed from the recollection. A mild and happy calm had finoothed thefe troubled waves. The Sovercign was defervedly dear to every rank and order of his fubjects, who united in regarding him as their father and benefactor. The Government, beloved at home, was refpected abroad; and the people, happy beyond the example of former

## ( 85 )

Former times, looked up with equal affection and veneration towards the fource of thefe multiplied benefits.
But in the midft of this flattering afpect of affairs, an unexpected and difaftrous change was preparing to manifeft itfelf, which no human prudence could have forefeen, or precautions delayed. We were deftined to experience in its fulleft extent, the mutability of fortune, and the fragility of greatnefs; to hold out a memorable leffon to our own, and to future times, that the fplendor and felicity of man, however folid the foundations on which they may feem to repofe, are in the hands of a fuperior Being, who confers, or withdraws them in an inftant. I am arrived at that awful and affecting period, when the feelings of all thofe who fhall perufe thefe fheets, will anticipate my own; and which, from a variety of motives, I fhould wifh to cover under a veil of oblivion, if the publicity of the great leading facts, and ftill more, if the inftruction conveyed by the narration itfelf,

## ( 86 )

as one of the moft interefting portions of modern annals, did not fupercede my perfonal inclinations. It is not, however, either in my plan or my intention, to relate the private hiftory of that extraordinary period; or to drag into daylight facts and anecdotes, which, curious and entertaining as they muft appear to pofterity, are, in every fenfe, unfit for the perufal of the prefent age. Sentiments of duty, delicacy, and refpect towards a Prince inexpreffibly dear to his people : towards a Queen, who during near thirty years, and in every relation of domettic life, has been blamelefs and exemplary : towards thofe illuftrious perfons, on whom the fceptre of George the Third muft, in the ordinary progrefs of events, at fome future, and as we truft, far diftant period, devolve : even motives of prudence, decorum, and propriety, arreft my pen; and prevent me from fhading a picture, the outline only of which it is either wife or neceffary ta hold up to the public eye, placed as we are fo near the object.

The very nature of the fubject is, indeed,

## ( 87 )

fuch as to add peculiar embarraffments to thofe general ones, which prefent themfelves in the way of every man who thall venture to relate the tranfactions of the time in which he lives, and of which he forms himfelf, though an imperceptible, yet a real and efficient part. Nor is it even a fufficient juftification or inducement to undertake fuch a tafk, that the mild genius of the century in which we write, or the freedom which enables us to dictate without apprehenfion, appear to liberate us from every reftraint. There are feelings in a generous mind, anterior to all written law, and far fuperior in their operation to thofe regulations which are impofed by Courts of Judicature, or legiflative bodies. It is to thefe refrictions that I hall fubject my pen, while the great chain of events may yet be prefented to the Englifh people, and the fidelity of hiftorical truth be preferved inviolate. "Ut, non modo cafus, eventufque rerum, qui plerumque fortuiti funt, fed ratio etiam, cauffeque nofcantur." Like the fublime writer whom I have juft cite 1 , and who flourifhed under the golden reign

## IMAGE EVALUATION TEST TARGET (MT-3)

23 WEST MAIN STREET
WEP STER, N.Y. 14580 (:'16) 872.4503
reign of Trajan, we too, " rara tempö rum felicitate, ubi fentire quæ velis, et quæ fentias dicere licet," may, unawed by power, affix the fentiment of approbation and of cenfure, in conformity to our own conviction. Such is equally my defign and my determination. But it is only for thofe who can elevate their minds above the little partialities and prejudices of the day, that it belongs to appreciate the performance of this promife ; and to decide how far the prefent work may venture to lay claim to any portion of Roman energy and freedom, or how far the immortal writings of antiquity would be fullicd and degraded by a comparifon with this production.

It is not eafy to imagine or to parallel in the hiftory of the prefent century, a period of more perfect ferenity than that which England prefented in the autumn of 1788. The King, accompanied by the Queen, and furrounded by his family, after having tried the effects of a relaxation from public bufinefs, and of the medi-
cinal
cinal waters of Cheltenham, had returned to Windfor ; not, indeed, in a ftate of vigorous health, but by no means in any fuch declining ftate of indifpofition, as to excite alarm among his fubjects. The Prince of Wales, as ufual, paffed the fummer at his Marine Pavillion at Brighthelmftone. Mr. Pitt, occupied in the functions of his ftation, was detained in the vicinity of the capital; while Mr. Fox, whofe faculties of body and mind had been not a little exercifed and exhaufted, by a toilfome attendance in Covent Garden during theextreme heats of Auguft, which was thought requifite to fecure the election of Lord John Townfend as member for Weftminfter ; indulged a degree of neceffary repofe, and withdrew for a fhort time from the hurry of political life. He quitted England, and repaired to Switzerland and Italy, as a fcene calculated to amufe and entertain, while it reftored and invigorated a conftitution, impaired by conftant exertion. The great leaders of Miniftry and Oppofition, having laid
afide their political animofitics, were difperfed in peaceful inactivity over every part of the kingdom. From this fate of public recreation and felicity, the nation was rudely and fuddenly awoke, by the reports of his Majefty being attacked with an unexpected and dangerous illnefs. The precife nature of it was for feveral days unafcertained and unexplained, even to thofe whofe refidence near the court fhould have enabled them to obtain early and authentic information. Meanwhile, fame augmented the evil, and the death of the Sovereign was believed to have either already taken place, or to be imminent and inevitable.

The grief and diftraction which were manifefted in every part of the ifland, on the publication of this calamitous event, can be only compared with that of the Roman people, on the news of Germanicus being feized with mortal fymptoms at Antioch; as the diftrefsful fituation of the Queen bore fome refemblance to that of Agrippina. " Paffim

## ( 91 )

* Paffim filentia et gemitus, nihil compofitum in oftentationem; et quanquam neque infignibus lugentium abftinerent, altius animis mœrebant." 'Time, however, gradually divulged the truth, and changed the apprehenfions of the nation for the fituation of the King. His diforder was underftood to have fallen upon the brain, and to have produced, as might be expected, a temporary privation of reafon. As the caufe of this alienation of mind was extraneous and violent, it might be hoped that it could only be of fhort duration : but the iffue was uncertain, while the fufpenfion of all government, and of every function attached to the kingly dignity, was immediate and indifputable. A fpecies of interregnum in fact took place; though unaccompanied by any of thofe circumftances, which ufually characterize and accompany that unfortunate ftate. The kingdom, anxious, and with eyes directed towards their Sovereign, betrayed no fymptoms of confufion, anarchy, or civil commotion. The Firft Minifter continued to exer-
cife, by ageneral fubmiffion and confent, the powers delegated to him before the King's indifpofition; and the political machine, well conitructed, and properly organized, fuftained no derangement or injury whatfoever from this fhock, except thofe infeparably connected with delay in the tranfactions or negociations pending with foreign courts.

Meanwhile, the Heir to the monarchy had quitted Brighthelmfione on the firft irformation of his father's malady, and repaired to Windfor, whither he was fol lowed by the Duke of York. Phyficians were called in, though in offectually ; and as the nature of the diftemper and of its final termination opened a wide field to conjecture, change and alteration, an exprefs was fent to overtake Mr. Fox in whatever part of the Continent he might be found ; and to intreat that he would return without delay to England.

The two Houfes of Parliament, in confequence of the preceding prorogation, met in a few days fubfequent to thefe extraordinary:
traordirary events. The general agitation and curiofity, even if they had not been aided by other emotions of hope and fear, of ambition, and of public duty, would alone have produced a numerous attendance. Mr. Pitt opened the fubject of their meeting in a very concife and pathetic manner; lamented the occafion, expreffed his hope that the caure would fpeedily be removed, and in purfuance of that idea, advifed an immediate adjournment of a fortnight. The propofition was received in deep filence by the oppofite fide of the Houfe, and affented to in mute acquiefcence. Their leader was not yet arrived; and confequently time was wanted to adjuft and determine on their plan of action, under circumftances fo delicate and unprecedented. In the interval which took place, his Majefty was removed to the palace of Kew. The Prince of Wales returned to Carlton Houfe ; and Mr. Fox, impatiently expected, after a journey which he performed with incredible expedition from Bologna, in a very infirm
and difordered ftate of health, arrived in London, and affumed his juft pre-eminence in the counfels of his party.

Thofe counfels evinced their nature and object, as foon as the late adjournment was at an end; and Mr. Fox, generoufly, though perhaps injudicioully ftepping forward in the fenate, rather laid claim to the vacant fceptre in the name and on the behalf of the Heir Apparent, as belonging and devolving to him of right ; than preferred his pretenfions with modefty and fubmiffion, at the bar of the affembled nation. Perhaps a feep more injurious to the great perfonage whom it was intended to ferve, or more pregnant with confequences to be deprecated, of every kind, could not have been devifed or executed. Perhaps, too, when time fhall have withdrawn that curtain which is ftill ftretched acrofs thefe recent and interefting events, we may difcover, that in advancing fo unqualified a demand of the regency, he did not precifely follow the dictates of his own elevanted mind, and illuminated judgment.

## ( 95 )

It wakened a jealous fpirit of enquiry into the fuppofed origin and foundation of that affertedright, in the breafts even of the moft liberal and unprejudiced. It compelled Adminiftration to probe that problematical and obfcure part of the Britilh Conftitution. It reminded thofe, to whom the writings of Shakefpear were familiar, of that affecting and pathetic fcene, where Henry the Fourth, under a temporary privation of his faculties, finds on his recovery, that his eldeft fon has carried away the infignia of his royal dignity, which, had he only waited a few hours, would have been his by devolution.
The difcernment of Mr. Pitt faw, andinflantly enabled him to profit of this error in his antagonift. He demanded the difcuffion and decifion of fo great and leading a principle, which led to conclufions unlimited and undefined, as well as fubverfive of the tenure on which a King of England had originally received his crown ; previous to any ulterior difpofition and diftribution of offices. He was joined
by the majority of the Houfe in this re* quiftion, and thus commenced his refiftance under aufpices and circumftances peculiarly fortunate. It was in vain that the Prince of Wales, already rendered fenfible of the injury which his caufe had fuftained, equally in Parliament and among the people, by Mr. Fox's unqualificd claim of right, endeavoured to wave and prevent all further difcuffion of fo invidious a fubject. It was in vain that the Duke of York, in his brother's name, and by his authority, renounced any fuch affumption of power, and made this public declaration in the Houfe of Lords. Nor was Mr. Fox's attempt to qualify his firt affertion, and to give it a more mitigated fenfe, received with better fuccefs in the other Houre. Parliament, roufed to a fenfe of the neceffity of declaring itfelf folely competent to fill the vacant throne, proceeded to that great act without circumlocution or delay; and having pronounced upon this important preliminary, then decided that the Prince of Wales
flould be invited and requefted to accept the Regency, under certain limitations. The month of December elapfed in thefe contefts, and the year 1789 commenced under the moft gloomy prefages. Mutual afperity and reproach embittered every debate. No appearances of convalefcence or recovery, fo ardently anticipated by the nation, had yet manifefted themfelves in the malady of the King. In addition to the keeneft fenfations of private difttefs as a mother and a wife, the Queen faw herfelf on the point of being placed in the moft painful, though indifpenfably neceffary fituation ; that of being entrufted with the care of the Royal Perfon, and of fanding in a fort of rivality and competition to her eldeff fon. The Prince, who afpired toa Regency, unfettered by any reftrictions, betrayed in his reply to a letter which the Firt Minifter addreffed to him, and in which the great features of that intended delegation of the Royal power were delineated, his warm refentment and diffatifa faction at many of thofe defalcations. o

He concluded, however, by reluctantly and coldly confenting to receive it, curtailed and degraded as it might be by Minifterial or Parliamentary diftruft.

A fecond examination of the phyficians who had attended his Majefty during the courfe of his diforder, which took place before a Committee of the Houfe of Commons, and which was certainly not conducted on the part of Oppofition with eitherdelicacy or judgment, tended to throw very little light on the great object of public enquiry; the probableduration and period of this afflicting malady. Mr. Pitt conftantly and warmly maintained the probability of its happy termination ; and regarding it as neither diftant nor hopelefs, made the refumption of the Royal power by the Sovereign with facility and celerity, as foon as he fhould be enabled to wield the fceptre, the firft and leading principle of all his meafures and propofitions. The adherents of the Prince of Wales faw the profpect of his father's recovery through a very different medium, and conceived of it not only as improbable,
ble, but as hourly augmenting in that improbability. They were fuftained in this opinion by Warren, as the Minifter was confirmed in his oppofite fentiment by ${ }^{*}$ Willis; two phyficians, on whofe contradictory prognoftics and apprehenfions each party implicitly relied. The former, at the fummit of his profeffion, and unqueftionably poffeffed of great medical fkill, was yet accufed by the public voice of leaning in his inclination towards the party of the Prince. The latter, brought from a diftant province to attend the Sovereign under his fevere diforder, and having been peculiarly converfant in that fipecies of difeafe, boldly and early afferted that he entertained fcarcely any doubts of the King's perfect re-eftablifhment at no remote period, The event fully juftified his prediction.

Meanwhile the introduction of the propofitions upon which the Regency Bill was meant to be founded, and the reftrictions intended to be impofed upon the power of the future Regent, which were

$$
\mathrm{O}_{2} \quad \text { brought }
$$

brought forward by the Firft Minifter in the Houfe of Commons, carried the rage and virulence of party to its utmoft height. The negation of the power of creating Peers: the nomination of a council to affit the Queen : and the complete refervation of the Royal roufehold, were all arraigned and condemned in the warmeft terms by Mr. Fox, as dictated only by ambition, and not originating in fate neceffity, or even in regard to the fituation of the Monarch. The hiftory of France under the unhappy reign of Charles the Sixth, was cited, as bearing a manifeft refemblance to the prefent difaftrous period ; and a Qu:en, equally venerated and beloved by the nation, was compared to the unnatural Ifabella of Bavaria; as her fon the Dauphin's abandonec' and perfecuted ftate was afferted to be fimilar to that of the Prince of Wales. Unmoved by thefe invectives, and fuftained by confcious rectitule of intention, the Minifter fteadily purfued his way: nor was he, in this critical and diftreffing moment, deferted

## ( 101 )

deferted by aither Houfe of Parliament. The Chancellor, who, at the commencement of the King's illnefs, had been fuppofed to have liftened to propofals for forming a part of a new Adminiftration; anxious to evince the falfehood of fo unjuft an afperfion, and to give the moft unequivocal proofs of loyalty and of adherence to his Sovereign under the prefent circumftances, collected all the energy of his mind in the various appeals, which he fuccefsfully made to the honour and patriotifm of the Houfe of Lords.

In this ftage of the public bufinefs, at a moment when the King's fituation appeared moft to exclude hope, and while the Houfe of Commons were fully occupied in framing the principal component parts of the act which was to eftablifh the Regency, Mr. Fox withdrew from the fcene, and quitting London, retired to Bath. His difordered ftate of health was affigned as a pretext for this feceffion at fo extraordinary and critical a juncture; but the public conceived the motives of it to originate in very
different
different caufes. Diffention and jealoufy had already pervaded the counfels of Carlton Houfe. The diftribution of offices under the approaching Regency had produced alienation among the chiefs. An interior Cabinet, different in its views, and oppofite in its objects to the great oftenfible leaders of the party attached to the Prince of Wales, had fet up a feparate ftandard, and formed a diftinct intereft. Difference of opinion had manifetted itfelf upon fome very delicate, and perfonal points. Cabal and intrigue had penetrated into the clofet. His Royal Highnefs was generally fuppofed to have experienced difficulties, if not peremptory refufals of gratifying his wifhes, on the part of the Duke of Portland ; and that, in relation to perfons and things peculiarly near his heart. Thefe numerous fources of dif, union were ftill however, in fome meafure concealed from view, by their very nature, and the mutual intereft or honour of the parties themfelves. The great acts of parliamentary legiflation proceeded,
and were nearly approaching to their termination. A very thort period, probably not exceeding three days, muft have completed the bill, which was to declare the incapacity of the Sovereign to conduct the national affairs, and to transfer the fceptre, though with diminifhed influence, to his fon. The members of Adminiftration were on the point of refigning their charges, and the new Miniftry, already fettled, prepared to enter on office: while the Englifh people, fondly attached by every fenfe of loyalty and affection to their Monarch, as well as from gratitude and efteem to the Firft Minifter, in dejection and filence looked on, and faw the Government transferred to others, who, whatever abilities they might collectively poffefs, certainly neither merited nor enjoyed the general approbation and confidence.

But the term of interregnum and miffortune was now arrived; and the impending calamity which had menaced England with all the evils of a Regency, far
far more to be deprecated and dreaded thans thofe from which the country had efcaped in 1784 , was fuddenly and unexpectedly diffipated. The diforder, under which the King had fuffered during three months, and whofe violence had hitherto appeared to baffle all medical fkill and exertion, gradually, but rapidly fubfided.' Sanity of mind and reafon refumed their feat, and left no trace of their temporary fubverfion. Time confirmed the cure, and reftored to his fubjects a Prince, rendered fupremely and peculiarly dear to them by the recent profpect and apprehenfion of his lofs. The vifion of a Regency faded and difappeared, as the Sovereign came forward to public view, and was totally extinguifhed by his refumption of all the regal functions. The demonftrations of national joy far exceeded any recorded in the Englifh annals, and were probably more real and unfeigned than ever were offered on fimilar occafions. It was not only that a King, beloved and refpected, was recovered from the moft afflicting of

## ( 105 )

all fituations incident to humanity, and enabled to re-afcend the throne. Sentiments of difapprobation and of general condemnation, affixed to the meafures and conduct of the oppofite party, heightened the emotions of pleafure, by a comparifon with that ftate from which the kingdom had been fo fortunately delivered. No efforts of defpotifm, or mandates of abfolute power could have produced the illuminations, which the capital exhibited in teftimony of its loyalty ; and thefe proofs of attachment were renewed, and even augmented, on the occafion of his Majefty's firft appearance in public, and his folemn proceffion to St. Paul's, to return thanks to Heaven for his recovery. Serenity and tranquillity, fo long banifhed, refumed their place, and foon effaced the recollection of a calamity, not more awful and alarming in its appearance and progrefs, than fpeedily and happily extinguifhed.

The attention of Europe, which had been fo powerfully attracted towards England during the continuance of the fevereindifpo-

## ( 106 )

fition of George the Third, was now to be directed to another object fcarcely lefs productive of change, and big with the moft important confequences. France, folong inured to fervitude, and only tracing the exiftence of her liberties in the page of forgotten hiftorians, or antiquaries: whofe fetters, originally impofed by Richlieu, and ftrengthened by Mazarin, had been rivetted by the lapfe of near two centuries; by the proud tyranny of Louis the Fourteenth, and by the profligate defpotifm of his fucceffor: France, ftimulated by the writings of genius and philofophy, which in defiance of arbitrary power, have illuminated and dignified the prefent age, afpired to freedom. The weaknefs of the Sovereign; the incapacity or timidity of his Minifters ; the exhaufted ftate of the treafury and finances; the unexampled and pertinacious oppofition of the Parliament of Paris to regifter, or fanction the Royal edicts for the impolition of new taxes; the failure of the harvefts, and confequent augmentation in the price of bread; all thefe

## ( 107 )

thefe concurring circumftances contributed to produce and accelerate a revolution.

The various Parliaments of the kingdom, in terms of energy and firmnefs to which they had been long difufed, clamoroully demanded the immediate convocation of the "" States General," as the only conftitutional, or adequate remedy to the diftempers of the ftate. They adhered to this requifition, not only in defiance of the difpleafure of the Crown, which was manifefted by the banifhment of the Parliament of Paris to Troyes in Champagne; but in oppofition to their own effential interefts, and even eventual exiftence. The nobility, attached by fo many ties to the Sovereign, and the natural fupporters of his prerogative; irritated at the attempt made by Calonne, and perfifted in by the Archbifhop of Touloufe, to deprive them of their exemption from the projected land tax, or " impot territorial," joined the courts of judicature in their refufal to regifter the meafures propofed, and forfook their hereditary maxims of policy, to adopt P 2
the
the popular party. The irrefolute conduct of the Firft Minifter under thefe delicate and trying circumftances, invigorated and emboldened the enemies of Government ; and the fpirit of remonftrance, complaint, and menace, deffeminated with induftry, became daily more $g$ reral and alarming.

The Archbifhop, after many inefficient or unfuccefsful plans for the re-eftablifhment of the finances, and fome ill-conceived exertions of feverity and power againft his opponents, felt himfelf unequal to combat the gathering ftorm of national indignation; and retiring from a fituation of danger and eminence, abandoned his mafter to the mercy of events. He even quitted France, and paffed the Alps into Italy ; as Calonne, under fimilar expreffions of general refentment, had done in the preceding year; when finding the Royal protection withdrawn, and already impeached by the Prrliament of Paris, he retreated firft into Holland, and from thence croffed the fea to England. In this perplexed fituation, Louis the Six-

## ( 109 )

teenth, compelled to difmifs one Minifter, and forfaken by another ; furrounded with embarraffiments, and having only a choice of evils; confcious that the very foundations of the throneand monarchy were crumbling under his feet; endowed with no talents or great qualities which might enable him to fuftain his own dignity, coerce his fubjects, or reftore order and energy in the public affairs : alarmed and terrified at the demonftrations of difcontent which appeared in the capital, and the provinces : under the preffure of thefe various confiderations and apprehenfions, he embraced the refolution of meeting the wighes of the nation; and if driven to the laft neceffity, of laying the diftreffes of the Crown before the reprefentatives of the people.

Neckar, who had conducted the finances during the profecution of the late war with England, and who had attained a very unmerited degree of popularity fince his difmiffion from office, was reinftated in his employment of Comptroller General. The avowed enemy of Calonne, whom

## ( 110 )

he accufed of peculation and malverfation, he had appealed to the public by various controverfial writings, defamatory of that Minifter, and tending to criminate him as a dcfaulter in the eyes of France and of all Europe. The famous "Compte rendu au Roi" in 178 I , in which he laid open to his own Sovereign, and to all mankind, the expenditure, revenue, and refources of his country, may be regarded not only as an unprecedented difclofure of the hitherto facred and unrevealed arcana of the French monarchy; but as having operated much beyond the immediate and qitenfible pretext of his own juftification, by awakening, and directing the reflexions of every clafs of men towards the profufe diftribution of the public treafure Simpleinhis exterior, andidecent in his manners; Neckar attained the fame of difintereftednefs and probity. Equally republican in birth and in principles, he flattered by thefe circumftances, the prevailing fpirit and genius of the times. Avowedly odious to the party of the Queen, and
of the Count d'Artois, he could hardly be fuppofed to poffefs the real confidence or attachment of the King, who had only been driven by his own diftrefs, and the current of popular favor, to have recourfe to his affiftance and fervices. Deficient in all the effential qualities of a great Minifter, and ignorant of thofe enlarged principles of taxation and revenue, which were alone competent to the extrication of fo vaft a monarchy as France, he fupplied thefe defects by little arts and narrow projects, adapted tothe exigencies of the day. In the Canton of Bern his talents might have entitled him to refpect, and they would have been in their proper fphere. An able arithmetician, but a feeble ftatefman, he only appeared in the firft ftation of finance, to evince how inadequate were his abilities to that dangerous elevation; and after vainly attempting to fuftain an ill-founded reputation, he has now retired to oblivion, unlamented, and almoft unnoticed by that nation, among whom he was fo lately idolized.

Although

Although the recall and nomination of Neckar appeared to give general fatisfaction, and awakened the hopes of his numerous and fanguine admirers, yet thefe fymptoms of approbation gradually fubfided. The temporary effect of his name in rajfing the public credit, produced no permanent or beneficial confequence. Languor and debility characterized every operation of finance; and Government became lefs competent to refift the encroachments of the people, in proportion as its embarraffment multiplied. Paris, rendered clamorous by the high price of grain, and attributing this fearcity more to the arts of monopoly, and even to the indirect interference of the Court in permitting the exportation of corn, than to any deficiency in the productions of the earth, proceeded to acts of violence, bordering on infurrection. The introduction of a body of military forces into the capital, quelled, not without a confiderable effufion of blood, thefe firt fymptoms of revolt, and reftored a degree of tranquillity
and fubmiffion. Notwithflanding this apparent check to the fpirit of popular inr.ovation, every circumftance tended to evince, that the numerous fubjects of complainton the fide of the People could not be extinguifhed, by any expedient hort of unconditional fubmiffion on the part of the Crown ; or of an appeal to the fword, if the former meafure fhould be thought too degrading for a Prince born in the purple, and accuftomed to regard his power as unlimited and irrefiftible. The naked and unprotected Majefty of the throne, no longer environed, as under Louis the Fourteenth, by a fplendid houfehold and the pomp of royalty, formed a very inefficient barrier againft a nation, enthufiaftic in their demands of a conftitution ; and who feemed to be determined to feize the favourable moment, for curtailing the odious prerogative of iffuing " Lettres de Cachet," and raifing tupplies by arbitrary mandate. The levities and profufion of the Queen; the haughty tone which was affumed by the Count d'Artois on feveral occafions; and Q. the
the fuppofed fubfervience of the King to his wife and brother, encreafed the frenzy for reformation, and added to the general effervefcence. Yielding with ungracious reluctance to thefe manifeftations of the approaching ftorm, the King confented to adopt the humiliating and unwelcome advice offered by his Miniter, of convoking the States General at Verfailles: but, at the fame time, ftimulated to refiftance by his own feelings, as well as by the exhortations of thofe who were continually near his perfon, he began to prepare for extremities, and to affemble forces.

The Duke of Orleans, who, at an early period of the prefent troubles, had been ordered to retire to his feat at Reinfy, on account of the active part which he had taken in oppofition to the Government, had obtained, from the lenity or indulgence of the Court, permiffion to revifit Paris. Lefs fenfible to this mark of favour, than irritated by the act of feverity which preceded it, he determined on revenge, and embraced with ardor the popular caufe. His high quality and near alliance to

## ( 115 )

the Sovereign; his immenfe revenues; his central fituation at the "Palais Royal," in the heart of the metropolis; his numerous connexions, and extenfive influence: this combination of circumftances enabled him to become a very dangerous and formidable opponent to the Crown, in its prefent fallen and debilitated ftate. He probably did no apprehend the extremities to whiclfhis own intrigues might conduct a tumultuous affembly; or he might conceive that he fhould always be able to direct its operations, and to fuperintend its movements. It is even poffible, as his enemies affer ${ }^{\text {r }}$, that the flattering profpect of the Regency, which already opened itfelf to his ambition as neither a remote nor improbable event, conduced to determine his line of action, and to prevent him from feeing the precipices with which fuch a purfuit vas furrounded. He was elected a member of the States General for Crepy in Valois, and took his feat in the Affembly. This extraordinary convocation of all the orders of the kingdom, which had

$$
Q_{2} \text { not }
$$

not been fummoned fince the Regency of Mary of Medicis, and whofe very exiftence feemed to have been annihilated by three long reigns of arbitrary power, was opened with the utmoft folemnity by Louis the Sixteenth, affifted by the Princes of the Blood, and accompanied with all the external fplendor becoming fo auguft 2 ceremony. Many fources of internal difcord and confufion, almoft inêvitable from the competition and oppofite pretenfions or intereft of the Nobility, Clergy, and Third Eftate ; the facility of introducing corruption among fo vaft and mixed a body of men; above all, the loyalty and adherence naturally to be expected from the two firft claffes of the ftates: thefe inherent vices in their formation infpired the Court with a confidence, that no unanimity or exertion of vigour would ever characterize fo heterogeneous a mafs. The firf proceedings of the Affembly juftified thefe expectations. Much time elapfed in difputes arifing from the incompatibility of the refpective demands of thedifferent orders; and though
thefe were at laft happily terminated by the Nobility and Clergy renouncing, or acquiefcing in the claims of the delegates of the people; yet the Sovereign ftill poffeffed great refources, and various means of protracting or averting any act militating vitally againft his prerogatives.

Had Louis the Sixteenth been left to the impulfe and direction of his own character, it is probable that he would have continued to yield to the encroachments of the democratical fpirit, which had already produced fo many involuntary conceffions on the part of the Crown; and which, encreafing in vigour as it proceeded, avowedly aimed at giving birth to a free conftitution, and a limited monarchy. He wanted all that energy, elevation, and couin re requifite to fuftain him in a ftruggle againft his people, and to enable him to reprefs their attempts at emancipation. But in the Queen and the Count d'Artois, refentment at the inroads of a nation whom they had long regarded only as formed for fervitude; and the habitual exercife of arbitrary power,

## (118)

warmly impelled to every exertion for its prefervation; while it dictated the mort decided meafures for repreffing and chaftizing a mutinous and difcontented capital.

They united their efforts, to fuftain the irrefolution of the King, and fucceeded. It was determined in the cabinet of Verfailles, to adopt the moft vigorous principles; to diffolve the National Affemoly ; to difmifs the Comptroller-General ; and to punifh the infolence of the metropolis. Prudence and addrefs were, however, requifite to mature thefe counfels, and to facilitate their execution. A great body of forces, principally confifting of the Swifs and German regiments in the fervice of France, was gradually collecied from different provinces. The Marechal de Broglio, ain officer of high military reputation, and of known attachment to the Crown, was named to the fupreme command. Every neceffary preparation for maintaining the Royal authority, if neceffary, by the moft fpirited and fevere acts of punifhment, was made, without even

## (119)

affectation of difguife or concealment. The capital, incapable of refiftance, and unconfcious even of its own capacities of defence; deftitute of leaders, of arms, and of troops, waited patiently the chaftizement which impended.

Paris, involved in circumftances more diftrefsful even than thofe in which it ftood, when invefted by Henry the Third in 1589 , and under an equal neceffity of fubmitting to the conditions which an incenfed monarch might have dictated, was fnatched from pillage by a revolution not lefs fudden and unexpected, than that which, two centuries preceding, had deprived Henry the Third of his life. The frantic and fanguinary zeal of a Monk affected this deliverance in one inftance : in the other, the Parifians were indebted to the timidity, delays, and want of decifion in the Court. During the firt days of July, the metropolis, though turbulent and riotous, made no exertions to oppofe the army by which it was encircled and furrounded. The partizans and fupporters of the Royal power were numerous, and
ready to evince their zeal and loyalty. The "Prevot des Marchands," who is the firft municipal magiftrate, was in the interefts of the Crown. The Battile awed one part of the capital, as the " Ho tel des Invalides" did the other. Paris, taken in the toils of arbitrary power, might have been difarmed, and deprived of the means to excite future commotion. The imprudence, pufillanimity, and impatience of the Court rendered thefe advantages of no avail, and precipitated the unfortunate Prince upon meafures which terminated in irremediable difgrace and ruin.

Miftaking, or neglecting the moft obvious principles of policy and wife precaution, which dictated to commence the plan of operations by fubjecting Paris, from whence alone any danger was to be apprehended ; the King was induced to difmifs Neckar with expreffions of indignation, which were ac-umpanied by menaces and infult on the part of his brother, the Count d'Artois. This ftep, which evinced 2 total change of refolutions, and which,

## ( 121 )

from the popularity of the Minifter, was likely to produce a violent fermentation in every order of men, was followed by others equally injudicious. The States General were driven into the "Salle des Etats" where they held their meetings, by detachments of the Guards ; who furrounded them, and who waited only the orders of the Court, to proceed to greater extremities againft the obnoxious reprefentatives of the nation.

Had thefe manifeftations of vigour been only fuftained by inftantly attacking and entering Paris, it is not to be doubted that, unprepared as it ftill was, and unwilling to expofe to the licence of an incenfed foldiery the lives and properties of its citizens, the capital would have been without difficulty reduced to obedience. But, an ill-timed and fatal delay, equally injurious with the preceding precipitation, gave the inhabitants time to recover from their firft emotions of furprize and apprehenfion. They faw the timidity and imbecility of the Government, who having founded the R charge,
charge, dared not advance to the attack. They profited by this want of exertion ; and paffing from one extreme rapidly to another, they almoft unanimoufly took up arms againft their rulers and oppreffors. Joined by the French Guards, who, from a long refidence in the capital, had been peculiarly expofed to feduction, and who at this decifive moment abandoned theirSovereign, the Parifians broke through every obftacle by which they hed hitherto been reftrained. The fupplies of arms and ammunition which had been provided for their fubjugation, were turned againft the Crown; and the "Hotel des Invalides," the great repofitory of military fores, after a faint refiftance, furrendered.

The Prince de Lambefc, who alone, of all the officers commandingthe Royal troops in the vicinity of Paris, attempted to carry into execution the plan for difarming the capital, was repulfed in a premature and injudicious attack, which he made at the head of his dragoons, near the entrance of the garden of the Tuilleries. Already the
"Prevot des Marchands," Monfieur de Fleffelles, convicted of entertaining a correfpondence with the Court, and detected in fending private intelligence to Monfieur de Launay, Governor of the Battile, had been feized by the people, and fallen the firft victim to the general indignation. His head, borne on a lance, exhibited an alarming example of the danger to which adherence to the Sovereign muft expofe, in a time of anarchy and infurrection.

The Baftile alone remained ; and while it continued in the power of the Crown, Paris could not be regarded as free, or even as fecure from the fevereft chaftifement. It was inftantly invefted by a mixed multitude, compofed of citizens and foldiers who had joined the popular banner. De Launay, who commanded in the caftle, by an act of perfidy unjuftifiable under any circumftances, and which rendered his fate lefs regretted, rather accelerated, than delayed the capture of this important fortrefs. He difplayed a flag of truce, and demanded a parley ; but abufing the conR 2 fidence
dence which thefe fignals infpired, he difcharged a heavy fire from the cannon and mufquetry of the place upon the befiegers, and made a confiderable carnage. Far from intimidating, he only augmented, by fo treacherous a breach of faith, the rage of an incenfed populace. They renewed their exertions with a valour raifed to frenzy, and were crowned with fuccefs. The Baftile, that awful engine of defpotifm, whofe name alone diffufed terror, and which for many ages had been facred to filence and defpair, was entered by the victorious affailants. De Launay, feized and dragged to the "Place de Greve," was inftantly difpatched, and his head carried in triumph through the freets of Paris,

Few captives, either of inferior or of eminent rank, were found in the apartments of the Baftile. The Count de Lorges, at a very advanced period of life, difcovered in one of the dungeons of the "Tour de la Bertaudiere," was liberated, and exhibited to the public curiofity in the "Palais Royal." His fqualid appearance, his

$$
(125)
$$

his beard which defcended to his waift, and above all, his imbecility, refulting probably from the effect of an imprifonment of thirty-two years, were objects highly calculated to operate upon the fenfes and paffions of every beholder. It is indeed impoffible, however we may lament or condemn the ferocious fpirit which has characterized and difgraced the French revolution, not to participate in the exultation, which a capital and a country fo highly illuminated, and fo long oppreffed, muft have experienced, at the extinction of this deteftable and juftly dreaded prifon of ftate. Nor does the rapidity with which it was captured excite lefs admiration, when its powers of refiftance are confidered, and the fpeedy relief which might have been afforded to it by the numerous bodies of regulax forces, with which Paris was furrounded on every fide.

With the Baftile, expired the royal authority and confideration. The defpotifm of the French Princes, which long prefcription,
prefcription, fubmiffion, and military ftrength feemed to render equally facred and unaffailable: which neither the calamities of the clofe of Louis the Fourteenth's reign, the profligacy and enormities of the fucceeding Regency, nor the fate of degradation into which the monarchy funk under Louis the Fifteenth, had ever fhaken : that power, which appeared to derive its fupport almoft as much from the loyalty and veneration, as from the dread and terrors of the fubject, fell proftrate in the duft, and never betrayed any fymptom of returning life.

Paris, liberated from all reftraint, or even wholefome police, appeared to riot in the intoxication of freedom; and ftained its acquifition by fcenes of violence and blood, unworthy the firf capital in Europe. Every trace of obedience difappeared; and even the promoters of the late infurrection were not fecure from the capricious fury of a frantic and favage populace, who filled the " Place de Greve" with clamours, and frequently tore the victim
whom their indignation had felected, from the hands of juftice.

But, at Verfailles, confternation and alarm filled the court on the arrival of this extraordinary intelligence. Yielding at once to the united impulfe of his terrors and his natural inclinations, the King, without even preferving the forms of Majefty however fallen, repaired to the National Affembly, rather as a fuppliant than a monarch. Difordered in his drefs, and unaccompanied by his guards or ufual attendants, he betrayed his agitation in the fpeech which he addreffed to the States. Only two days preceding this melancholy exhibition of degraded dignity, he had replied to a remonftrance which they prefented to him, in terms of determination mixed with menace. He now adopted the language of diftrefs, invoked their affiftance, difowned his intention to employ force for the fubjection of the capital, affured them that he had already fent orders to withdraw the troops which had invefted Paris and Verfailles ; and profeffed
feffed his defire to give the moft unequivocal proofs of his deference to the wihes of his fubjects. He concluded by imploring them to make known thefe his paternal difpofitions, to the inhabitants of the diftracted metropolis.

The Affembiy, which trembled a few hours before for its own fafety, and had expected to be offered up as victims to the vengeance of an irritated Sovereign, replied with expreffions of loyalty and affection to thefe gracious declarations, although evidently extorted by fear. It was however far otherwife at Paris, where the populace, deeming their triumph incomplcte while the King remained apparently tranquil in his palace; not only exacter his perfonal and immediate prefence among them, to fanction their outrages on his authority; but accompanied this demand with menaces, if refufed, of fetting fire to Verfailles, and at once extinguifhing the obnoxious Princes of the Houfe of Bourbon in the flames. Perhaps a monarch endowed with quali-
ties fuch as Louis the Fourteenth poffeffed, would perhaps have refufed compliance with thishumiliating requifition; and while his army was yet entire, and the royal dignity not totally degraded, have embraced the generous refolution of meeting the ftorm, of trying the fortune of war, and at leaft devolving to his fucceffor the prerogative", which at his acceffion he had received and exercifed. But Louis the Sixteenth poffeffed no abilities competent to fo magnanimous and unequal a ftruggle. He had already abardoned his attempts to maintain the Royal power in its original vigour ; and he had now fcarcely any option between the lofs of his throne, and a complete fubmiffion to the arbitrary pleafure of a populace, thirfting for blood, inflamed by fuccefs, and daily offering up victims to its revenge.

Under thefe melancholy circumftances, He did not hefitate to yield obedience to the mandate, which it was no longer fafe to refufe. After fuch a night as Charles
the
the Firft may be fuppofed to have paffed, previous to his afcending the fcaffold; but unattended with that ferenity and fortitude, which eminently diftinguifhed the Englifh Monarch in the laft act of life, he fet out for Paris. Confcious however, of the peril attendant on his appearance in the metropolis of his dominions, and doubtful of efcaping from the rage of the multitude to whom he was to be prefented, he prepared for death, as at leaft, a poffible event. He received the facrament, made fome private difpofitions of affairs, and gave various orders in confequence. Though defirous to fee and embrace his fon and daughter before his departure, he yet had firmnefs fufficient to refufe himfelf this indulgence, as fearing that it might too deeply affect, and difqualify him for the part which he was to perform. " J'en aurai plus de plaifir," faid he, "fi je reviens." A gentleman who was near his perfon on this occafion, encouraging him, and venturing to anfwer
for his fafety, the King replied, "Henry Quatre valoit mieux que moi; et cependant on l'a affaffiné."

Though he quitted Verfailles at an early hour, it was late before he entered Paris, from the immenfe multitudes whoaffembled to fee him pafs, and who teftified no fentiments of loyalty in their acclamations. When arrived at the " Place de Greve," and conducted to the " Hotel de Ville," the new Mayor, Monfieur Bailli, who had been elected to fupply the late unfortunate firft magiftrate, infultedthe fallen Prince by a mock furrender of the keys of his capital; which he accompanied with a farcaftic and infolent reflexion on the different fituation in which Henry the Fourth ftood, when he received a fimilar teftimony of its fubmiffion and allegiance. The cries of the people, whoinfifted that the King fhould thew himfelf on the balcony, compelled him to give this laft proof of his deference to their wifhes ; and to add to the condefcenfion, he accepted from the hands of the Mayor, the National cockade, which

$$
\text { S } 2 \quad \text { he }
$$

he firft carried to his lips, and then placed in his hat. After having been detained and exhibited as a captive to his own fubjects during the greater part of the day, without fuftenance or refrefhment of any kind, he was at length permitted to return to Verfailles, and to conceal his emotions in the privacy of his own apartments.

While this humiliating feene was acting befo: loe eyes of all France, which were turne. towards fo unufual and attractive a fight, the adherents to the late meafures, terrified at the menaces thrown out againft them, and dreading the moft fatal confequences of popular fury, profited of the King's abfence and vifit to his capital, to effect their own efcape.

The Count d'Artois, regarding himfelf as peculiarly marked out for profcription and impeachment; and apprehenfive that even his proximity of blood to the Sovereign might prove an infufficient protection to his life, fled among the firft, carrying with him his fons, the Dukes d'Angouleme
gouleme and de Berri; two youths who were fucceffively prefumptive heirs to the Crown, in cafe of the demife of the Dauphin. In the hurry of a precipitate retreat, it was found extremely difficult to furnifh a few hundred louis d'ors to a Prince, for whofe expenilive gratifications, only fome days before, the treafures of the monarchy were infufficient. He took the road to Flanders; and was already far advanced towards the frontiers, beforehis departure was known or fufpected at Paris. When fo diftinguifhed a perfonage, and one fo nearly allied to the throne, deemed himfelf no longer fafe even in the Royal refidence, it cannot excite wonder that thofe of a lefs elevated condition, and who were equally obnoxious to an enraged populace, fhould confult their fafety by inftant flight. The principal roads were covered with illuftrious fugitives, under every poffible difguife and concealment. The Prince of Condé quitted Chantilly, followed by his fon and grandfon, the Dukes of Bourbon and Enghien. The Prince of Conti, the
laft in fucceffion of the Blood Royal, after undergoing many extremities of hunger and fatigue, arrived at Luxembourg ; to which place likewife the Marechal de Broglio, abandoning his army, repaired without delay.

The Duchefs of Polignac, fo long unrival'd in the affections of the Queen, and round whom all the pleafures of the Court of Verfailles were ufed to affemble; tearing herfelf from this fcene of diffipation, attain'd with difficulty the city of Bale in Switzerland; after having encountered numerous dangers, and been preferved from the laft degree of violence as the paffed through Sens, by the happy prefence of mind which diftinguifhed an Abbé, by whom fhe was accompanied. At Bale, by one of thofe fingular accidents which evince the power of fortune, fhe found in the inn at which fhe alighted, the late Minilter, Neckar; who having paffed through Swabia after his difmiffion, on his way to Geneva, heie firf received from his enemies, the intel-

## $\left[\begin{array}{ll}\text { [ } & 35\end{array}\right]$

intelligence of the revolution. The Baron de Breteuil, purfued by the moft marked deteftation of his countrymen, evaded, as well as the Prince de Lambefc, the fnares prepared to intercept them: the former reaching Bern in fafety, as the latter did Turin. Monfieur de Befenval, lefs fortunate, was feized at Brie Comte Robert; and even the folicitations of Neckar himfelf, who endeavoured to interpofe in his behalf, were infufficient to obtain his enlargement.

In this general confternation, the Queen, abandoned by all her deareft connexions, remained with her two children, friendlefs, and almoft alone, in the palace of Verfailles. No Prince of the Royal Family ventured to abide the ftorm, except the Count de Provence; who during the continuance of all thefe diforders, had enjoyed a diftinguifhed fhare, at leaft of negative approbation ; and whofe conduct throughout the critical circumftances which preceded the fedition of Paris, had been fuch
as to conciliate, in fome degree, the popue lar favour.

The Duke of Orleans, to whofe in?riçues, or oppofition to the Crown, may be greatly afcribed the rapid progrefs of the general difcontent, and the exceffes of the pcople; viewed from the " Palais Royal" with fecret pleafure, the effects of his machinations, and enjoyed his triumph over the vanquifhed court. The military command of the National troops, and of the capital, were conferred by almoft unanimous delegation on the Marquis de la Fayette; as the fupreme civil and municipal jurifdiction devolved on Bailli, Mayor of Paris. The union of both thefe powers, was however frequently found unequal to impofing proper reftraints upon the ungoverned paffions and favage violence of a populace, new to freedom, and who fained its acquifi-- tion by daily acts of vengeance and cruelty. The heads of Foulon and Berthier, one of whom had occupied a high fituation in the
late miniftry, and the other had been intendant of Paris, were carried through the ftreets; and the circumftances with which the death of thefe eminent perfons were accompanied, are only to be compared in horror and atrocity with thofe attendant on the maffacre of St. Bartholomew, or the affaffination of the Marechal d'Ancre under Louis the Thirteenth.

Meanwhile, at the inftigation and requeft of the National Affembly, Neckar was recalled, and invited by letters of the moft flattering, and even penitential tenor, from the King himfelf, to refume the fuperintendance of the finances. He yielded, though with apparent reluctance, to thefe entreaties; and repaired to Court, loaded with expreffions of general attachment and veneration in every place through which he paffed : while the credulous and deluded multitude expected from his prefence, a fpeedy redrefs of all their grievances, the revival of public credit, and a remedy to the fcarcity of grain, which had excited the clamours of the capital and

## ( 138 )

the kingdom. To the admiration and aftonifhment of mankind, in an abfolute monarchy fo ftrongly cemented as that of France appeared to have been, and in which loyalty was antiently efteemed to be characteriftic of every clafs of citizens, no efforts were made to fupport the Royal power. An enthufiaftic paffion for liberty pervaded all the provinces; and the revolution, commenced on the banks of the Seine, fpread with equal rapidity and unanimity; to the foot of the Alps and Pyrences; to the Rhine and the Mediterranean.
No permanent calm fucceeded tothisform of popularindignation. Elated with the poffeflion of freedom, and exercifing in many inftances, a tyranny more oppreffive and fevere than that from which they had juft efcaped; the people meditated new and. greater invafions on the dignity, as well as - the prerogatives of the Crown. The prefs, freed even from that wholefome and neceffary reftriction, which Governments the moft relaxed impofe upon the publication of opinions, compenfated for the fetters which
it had fo long worn, by giving birth to every fpecies of licentious production and infolent attack upon perfons of the higheft rank. The Queen was peculiarly the object of thefelibellous invectives; and every accufation private or political, which malignity could invent, to alienate the affections and irritate the paffions of mankind againft her, was circulated, and publicly expofed to fale. Although all the pomp and majefty, which inbetter times had furrounded and concealed the Sovereign, was now entirelywithdrawn: though only guarded by the burgeffes of Verfailles, and deftitute of any military protection againft infult and outrage, Louis the Sixteenth food expofed to every enterprize which a mutinous capital might undertake or execute ; yet fome veftiges of perfonal liberty he flill retained. He was free to enjoy the diverfion of the chace; and the National Affembly, convoked at Verfailles, continued to hold its meetings there, under his immediate fuperintendance and infpection. It was even thought decent and neceffary, on the part of the new tribunes
T2 of
of the people, to march fome regimente, in the month of September, on whofe adherence they conceived that they could fafely rely, to perform the ordinary functions of ftate ; at the fame time that they prevented any eftape, if fuch was intended by the King.

But, where fo many inflammable materials were coilected, it was not poffible that any confiderable time could elapfe before they burft into a conflagration. After one cs two attempts, which the vigilance and activity of La Fayette prevented from being carried into full execution, the populace of Paris, excited by various arts, and incenfed at the Queen for having brought the Dauphin, and prefented him to the officers of the regular troops after a public entertainment, rofe as by univerfal confent, and determined to march to Verfailles. By what motives, or with what intentions, the conductors of this armed mob were actuated, it is perhaps impoffible at prefent pofitively to affert. The deepeft and blackeft defigns have, by popular malignity, been attributed to the

Duke of Orleans; no lefs than the attainment of the Regency, at whatever price, and by every mode, however treafonable or flagitious. Many of the circumftances which diftinguifhed that extraordinary fcene, unqueftionably evince 2 plan not more artful than nefarious; and which feemed calculated, by operating on the fears of the Sovereign, in induce him to abandon the throne, and feek his fafety in flight; while the Queen, who was more an object of national obloquy and averfion, might be inftantly offered up as a victim to the frantic multitude.

It is difficult to do juftice to the horrors of a night, fimilar only to thofe which are furnifhed by the annals of Charles the Ninth, and which reminds us of the times of Catherine of Medicis. Pofterity will fcarcely credit, that at the conclufion of the eighteenth century, and in a country eminently diftinguifhed by all the fofter virtues of humanity, act.s of blood and ferocity more favage than the Janizaries of Conftantinople ufually exercife

## 142 )

againft their defpots, were performed with impunity. The fingularity and incredibility of the recital will be augmented by recollesting, that many of the moft violent among thefe ruffians, were women ; or, at leaft habited in a female drefs. Armed with every deftructive weapon, they affaulted the guards who were ftationed at the door of the Queen's a partments, burft into them, murdered thofe who oppofed tieir progrels, and penetrated to the chamber in which fhe flept. The efforts which were made to retard their fury, and the cries of "Sauvez la Rcine," which echoed through the palace, gave heran inftant in which to efcape. The firf Queen in Europe was faved from $\boldsymbol{x}$ death the moft ignominious, by the interval of almoft a lingle moment. Undreffed, and nearly naked, fhe gained a private ftaircafe, which conveyed her to the King, who received her in his arms, where fhe fell fenfelefs with terror. The materials of the bed from which fhe had juft rifen, after undergoing the fricteft fearch, in hopes of difcovering the unhappy object of their purfuit,

## ( 143 )

fuit, were fcattered over the roum, as fome gratification totheirdifappointedvengeance.

Louis the Sixteenth himfelf, appearing on the balcony of his apariment, in the language and attitude of fupplication, vainly implored the populace to fpare his gaards, whom he faw maffacred a: his feet, without the power of extending to them any relief, He as vainly befought the Queen to yield to the neceffity of the time, and to retire to Rambouillet, where her perfon would at leaft be fecure. Exerting a courage fuperior to her fex, and clevated above a fenfe of the danger to which the was fo confpicuoufly expofed, fhe firmly perfified in her refufal to fly; and declared her determination to accompany the $\operatorname{Kin}_{3}$, and at leaft to expire as The had lived, : Quecn of France. Yet, confcious of the probability of her falling a facrifice to the popular rage, the armed herfclf with a poniard, as a laft refource againf the degradation of plebeian violence and brutality.

It isimpoffible, how much foever we may condemn
condemn certain parts of her conduct and character, not to admire the heroifm and magnanimity of this deportment, in which we feem to recognize the blood of fo many Emperors from whom fhe defcended. The weaknefs of the woman was notwithftanding, mingled with the fortitude of the Sovereign; and when rhe entered the coach which was to convey herfelf and the cap.. tive King from Verfailles to Paris, terrified at the cries of a furious multitude who feemed to demand her forfeit life, She threw herfelf into the arms of La Fayette, who offered her his hand at the door of the carriage ; and whofe protection the invoked to preferve herfrom outrage and death. Placing the Dauphin in her lap, and feated by her hufband, the cavalcade moved flowly towards the capital; while the heads of the murdered " Gardes du Corps," borne on poles, and held ap to her view, prefented a melancholy profpect of her own probable deftiny. They at length reached he palace of the Thuilleries, thus accompanied, and took poffeffion of
that part of it deftined for their reception and refidence: while cannon, mounted at the principal avenues, under pretence of fafety and defence, fecured them from refcue, and rendered efcape impracticable.

Perhaps no day fo ignominious to the Royal dignity had been beheld, fince the elevation of the Capetian Princes to the throne of France. The capture and imprifonment of Louis the Ninth at Damietta, of King John at Poictiers, and of Francis the Firft at the battle of Pavia, however unfortunate and humiliating, yet were at laft foftened by many confiderations. Thofe Monarchs were all taken in arms, after exerting the moft heroic acts of valour againft their conqurrors, and owed their misfortunes only to the chance of war. Even Henry the Third, when he fled from his capital, purfued by the Guifes, yet retained his perfonal independence, and foon returned to befiege and to chaftife his rebellious fubjects. Louis the Sixteenth, funk below efteem or commiferation, and not having exerted either abi-
lity or courage in the defence of his invaded prerogatives, only held a precarious life at the mercy of a feditious and infolent populace, who having already imprifoned, might in any moment of refentment, terminate the reign of their fallen and degraded King. The palace in which he was confined, having been in a great meafure neglected for more than a century, during which time Paris had rarely feen any Sovereign refident in the metropolis, was totally unfit for the reception of a Court; and even the apartments which were occupied by the King himfelf, were in fo ruinous or decayed a condition, as not altogether to exclude the inclemency of the weather. To this fituation was a Monarch reduced, who only a few months before, might be regarded as at the fummit of human greatnefs; and the foundations of whofe throne, ftrengthened by long poffeffion and by habits of obedience, feemed to bid defiance to all the ordinary convulfions whichoverturn empires, and deftroy the firmeftfabrics of human powerand wifdom. While

While thefe fcenes of outrage and violence were exhibiting in France, it is difficult to imagine a picture of more complete ferenity than England prefented; and this internal repofe was accompanied with every circumftance of external profperity, and augmenting national confideration. The year which immediately fucceeded the malady of George the Third, may be ranked among the happieft of his reign, whether it be confidered as perfonally affecting himfelf, or as productive of felicity to his people. The recent danger from which he had efcaped, rendered his health and fafety peculiarly precious to his fubjects; as the animated expreffions of their attachment and loyalty muft have deeply touched the heart of a Prince, infinitely fenfible to thefe genuine marks of affection. The character of the Sovereign was not more formed to produce, than that of his Adminiftration was to perpetuate the general tranquillity. The conduct of Mr. Pitt during the whole progrefs of the late commotions in France, may be held up
as a model of political honor and rectitude; perhaps, equally fo of wifdom. Unlike to Richlieu, who fomented the caufes of difcord between Charles the Firft, and his Parliament : unlike to Vergennes, who ftimulated the Americans to refiftance; and after a feries of indirect and infidious arts, violated the moft folemn treaties in order to affure their final independence: the Englifh Minifter fteadily and fyftematically adhered to the moft exact neutrality. The native elevation of his mind, and the magnanimity which has ever characterifed his meafures, rendered him incapable of defcending to the little artifices of crooked and vulgar ftatefmen. The probity of his private life pervaded and marked his public line of action; nor did fo uncommon and dignified a mode of proceeding, under circumftances which might feem to juftify and authorize a more relaxed conduct, fail to produce its full effect on the two nations who were peculiarly affected by it, as well as on the other ftates of Europe. Some approbation, if not admiration, is indeed due
due to a Government, who have been able to unite vigour, energy, and protection, with the moft religious adherence to the national faith, and to every principle of found and generous policy.

The period which is comprifed between the months of May 1789 and 1790 , like the reign of Antoninus Pius, affords few materials for hifto-y, drawn from the interior events of the time. England, at peace with all the world, in the bofom of repofe, faw her commerce and manufactures expand, her credit augment, and her name excite refpect among the moft diftant nations; while many of the great furrounding European kingdoms were either involved in $\mathrm{F}-\mathrm{-}$ reign war, or defolated by domeftic troubles. This tranquillity was not however allied to an ignominious and enervate floth; but, on the contrary, was fecured by vigilance, activity, and exertion. In conjunction with Pruffia and Holland, Great Britain indirectly extended her attention and fuccour to Guftavus the Third, finking under an unequal conteft with the vaft empire of Ruffia.

Ruffia. She reftrained and arrefted Denmark, even after that power, as an auxiliary of the Court of Peterfburgh, had already taken up arms, and committed hoftilities againftSweden. She fignified to Leopold, who had recently fucceeded to the thrones of Hungary and Bohemia, her defire that he would recall his troops from the Banks of the Danube; and fhe fuftained by her negociations the firmnefs of the Ottoman counfels, while fhe filently, but not lefs decidedly, impofed limits on the ambition of their great enemy Catherine the Second, by prohibiting her fleet from prefuming to quit the Baltic, and to complete the deftruction of the Turks in the Archipelago.

In this exalted fituation, to which perhaps no parallel in our annals can be adduced, fince the termination of the fhort, but fplendid protectorate of Cromwell, a ftorm unexpectedly and fuddenly arofe from a quarter, where it would feem, that no forefight or precautions could have anticipated the danger. Among the new and unexplored paths of commerce, which the
fpirit of a difcerning and adventurous people had attempted to open fince the peace of 1783 , were particularly two, which appeared to promife the moft beneficial returns. The firft was a whale fifiery, fimilar to that which had been carried on for ages near the coafts of Greenland; but transferred to the Southern hemifphere, near the extremity of Patagonia, and in the formy feas which furround Cape Horn ; as well as in the Pacific Ocean. In the courfe of a few years, this branch of trade had augmented rapidly, and was found on trial to afford very important advantages; nor had it received any impediment from the vague pretenfions of the Spanifh Crown to the fovereignty of the fhores wafhed by that ocean, which was the fcene of their exertions.
The fecond of thefeenterprizes, originalin its own nature, aile in its conception, bold in its execution, and having no precedent for its guidance, was directed to countries and to objects almoft as much unknown to geographical, as to commercial knowledge

## $15^{2}$ )

ledge or experience. It demanded many qualities rarely and difficultly combined : a confiderable capital; minifterial approbation; faithful and capable conductors ; dextrous navigators; and above all, much time and perfeverance to ripen, and ultimately recompenfe the perfons engaging in fo eccentric and expenfive an expedition. This extraordinary union of talents and circumftances was, however, found in men of no fuperior defeription among the mercantile inhabitants of London; and it will remain a friking monument to future ages, of the energy, capacity, and nautical ability, which diftinguifh the prefent century and the Britifh nation, above the moft enlightened periods of any antient or modern people.

The North Weft coaft of America, the part of the earth to which this embarkation was deftined, was not only fo remote, but fo undefined, if I may be allowed the expreffion, that its very exiftence remained unknown or doubtful, before the difcoveries of the reign of George the Third.

At the commencement of the prefent century, it was thought to be almoft as much wyond the ordinary bounds of navigation, as the iflands of the Hefperides appeared to the Greeks; and Swift himfelf, only eighty years ago, when he compofed the entertaining voyages of Lemuel Gulliver, efteeming it the proper region of fable and romance, felected it for the pofition of his imaginary Brobdignag. The immenfe tract of land, extending northward from California and New Albion to the Frozen Sea, had, indeed, in a more recent period, been partly explored, and faintly traced by Cook; though much remained for future enterprize and induftry to accomplifh, before this difcovery could beconverted to any purpofe of publicutility. He had, however, afcertained the exiftence of the continent ; and he had received from the barbarous natives, with whom he eftablifhed a fpecies of barter, fome valuable fpecimens of furs, in exchange for European commodities of a far inferior nature.

The hope of procuring a confiderable number of thefe rare and coftly fkins, for the fale of which a veryadvantageous market prefented itfelf at Canton in China, was the leading inducement to the adventurers, who engaged in the expedition. But, in the purfuit of private emolument, objects of general and national confequence were neceffarily implicated and interwoven. Behind this coaft, to the eaftward, lay the vaft continent of America ; opening a field to commercial activity and refearch, in which the imagination itfelf was loft. The difcovery of a communication through this unexplored country, and which may ultimately connect it, to a certain degree, with our fettlements in Hudfon's Bay, appears from their account, not to be totally vifionary, though it was regarded as fuch by Cook himfelf.

Conceptions and enterprizes more calculated to enlarge the fphere of induftry ; to connect the moft remote parts of the planet of the earth by the bands of amity and commerce; to extend the limits
of the human mind ; and to immortalize, while they enriched the nation which originated them, have perhaps fcarcely ever been imagined or executed. They were not inferior to the moft fublime and daring expeditions of antient Greece, and feemed to partake of the fpirit of Columbus: though the prefent age, familiarized to naval fkill and enterprize, no longer fees with the fame admiration, or confers the fame eulogiums on modern candidates for fame; who are feldom regarded through any other medium than that of utility, or pecuniary advantage.

Animated by thefe views, and having received the moft affirmative marks of the protection of Government previous to their departure, five fhips were fitted out from London in 1785 , and the two fucceeding years. Four of thefe veffels, after doubling Cape Horn, arrived fafely on the North Weft coaft of America. The fanguine expectations which had been entertained, of effecting a lucrative X 2 exchange
exchange of commodities with the natives, were fully and fpeedily realized. Cargoes of the fineft furs were procured, and fold to the Chinefe, even under great commercial difcouragements and pecuniary impofitions, at fo high a price, as amply to reimburfe and enrich the adventurers. Other attempts, of a fimilar nature, were made from Bengal ; and two veffels were fucceffively difpatched from the Ganges to the fame soaft, in the year 1786 . A factory was eftablifhed at Nootka Scund, a port fituated in the fiftieth degree of northernlatitude, on the fhore of America. Poffeffion of it was folemnly taken in the name of the Sovereign and Crown of England: amicable treaties were concluded with the chiefs of the neighbouring diftricts; and a tract of land was purchafed from one of them, on which the new proprietors proceeded to form a fettlement, and to conftruct ftorehoufes. Every thing bore the appearance of a rifing colony, and each year opened new fources of commerce and advantage.

Although

Although individuals, occuped in exertions of this private nature, could not be expected to extend their views or efforts to objects of public utility, yet fome further information was collaterally and incidentally acquired, refpecting the contineat of America, in the courfe of their voyages. It is even pretended that a floop, named the " Wafhington," navigated for fome hundred miles along a vaft number of iflands, fcattered in a fea, which interfects that continent in a north-eaft direction; and though the accounts hitherto received or tranfmitted, of this extraordinai $y$ and interefting fact, are not either fo minute, or fo accurate, as by any means to entitle them to be implicitly received, yet they appear to be not totally deftitute of foundation, or probability. Every profpect, either of national advantage, or of private emolument, which the commerce of thefe coafts feemed to promife to Great Britain, was, however, deftined to experience a fudden and unexpected fufpenfion.

On the 6th of May, 1789 , two Spanifh fhips of war entered Nootka Sound ; the commanding officer of which, after making every profeffion of amity during feveral days, feized on the Englifh veffels, in the name of his Sovereign, as they fucceffively arrived from various parts of the coaft, imprifoned the crews, confifcated or plundered the cargoes, and ultimately carried them as lawful prizes to St. Blas, in Mexico. Violations fo unprovoked, not only of the peace fubfifting between the two Monarchies, but of all the laws eftablifhed between civilized nations, were accompanied and aggravated by every circumftance of duplicity, infolence, and cruclty; while they were contrafted with the moff friendly affiftance and attentions, fhewn to the captains of two American fhips, the "Wafhington" and the " Columbia," who had been brought by the fame commercial inducements to the port of Nootia. Thefe teftimonies of protection and regard were even carried fo far by the Spaniards, as to compel the crew of one of the captured

Englifh

Englifh veffels to affift in navigating the "Columbia" to Canton ; through which channel, the firft regular and authentic account of thefe acts of hoftility, was officially tranfmitted to the EnglifhAdminiftration, though they had been preceded by fome vague and indiftinct intimations of the fame nature, made by the Spanifh embaffador at the Court of London.

The conduct of the Firft Minifter on receiving this intelligence, evinced no lefs the magnanimity than the decifion of his character. Without defcending to the tedious and humiliating forms of requeft with the Court of Spain, which might elude and protract, if not ultimately refufe, according to its ufual policy, any reparation for thefe outrages; he, in the firft inftance, by a meffage from the King, informed the two Houfes of Parliament of the whole feries of tranfactions. He clearly evinced the nullity and injuftice of anygeneral pretenfions on the part of the Spanifh Crown, to a territory; difcovered, planted, and occupied by the Englifh; but in particular, to the Port of Nootka, fituated
fituated at a diftance from any known fettlement belonging to that nation. He profeffed his anxious defire to terminite by amicable explanation and treaty, the prefent caufe of difpute. He at the fame time declared his determined intention, not only to exact from the Court of Madrid an adequate fatisfaction and compenfation for the injuries recently fuftained ; but to compel Spain to renounce decidedly and formally, any indefinite claim which fhe might have fet up, either to the exclufive navigation of the Pacific ocean, or to the fovereignty of the whole North Weft coaft of America. He called on the loyalty, dignity, and honour of the Houfe of Commons for fupport, in maintaining thefe invaded rights by force of arms, if Spain fhould be infenfible to the language of reafon.

The approbation which fo manly an appeal to the nation excited, was general and animated. The leaders of Oppofition joined in that fentiment, and expreffed their conviction of the wifdom as well as
neceffity of fuftaining by every military and naval exertion, the effect of negotiation. The celerity with which thefe refolutions were followed, in the equipment of a powerful armament, was calculated to augment the high reputation of the Miniftry throughout Europe, while it called into action all the refources of the kingdom. A diffolution of Parliament, unqueftionably judicious under the circumftance of a probably impending war, followed thefe demonftrations of refentment, and demands of reparation.

If we compare the energy and decifion of fo vigorous a line of conduct, with that which was adopted by Sir Robert Walpole or Lord North, in fimilar fituations, the contraft muft be highly flattering to the prefent Adminiftration. The fluggifh and reluctant difinclination of the former, to perceive or to refent the depredations committed by the Spaniards upon the Englifh trade, during along feries of years; while it emboldened the

## ( 162 )

enemy, depreffed the genius of England: until Parliament, roufed by fuch a continuation of infults and indignities, at length vindicated the national honour, and drove the Minifter from the fuperintendance of affairs.

The temporifing and pufillanimous counfels of Lord North, in the difpute refpecting the Falkland iflands; and the ultimatc termination of it, which left the right undecided, and even afferted by the Court of Madrid, at the farne moment that from motives of political convenience, Spain thought proper to cede the contefted territory to England : thefe humiliating meafures, expofed and reprobated by the pen of Junius, ftand in need of no comment, and are fufficiently appreciated by a juft and difcerning people.

Spain was no longer governed by Charles the Third, at the time when thefe interefting events took place. That Prince, after a reign of above twenty years as Sovereign of Naples, had
had afcended the Spanifh throne on the death of his brother Ferdinand the Sixth, in 1759; and expired at a very advanced period of life, in December, 1788 . His unconcealed diflike of the Englifh nation, from whom in his youth he had received fome fignal benefits, as well as fome painful and perfonal humiliations, had probably induced him, even more than the ties of blood, or connexions of policy with the Court of France, to join that kingdom in two fucceffive wars which fhe carried on againft Great Britain.

To the counfels of his reign, and probably to a fyftematic plan in concert with the Cabinet of Verfailles, for attacking the commerce, and fetting limits to the enterprizes of England on the North Weft coaft of America, we may without injuftice attribute the acts of violence, committed by Don Martinez in the Port of Nootka. The fhort period, comprifing fcarcely five months, which elapfed between the death of Charles the Third, and thofe infractions of the peace previoully fubfifting between
the two Crowns; leave no room to doubt that the original orders were iffued during the life of the late Sovereign.

Charles the Fourth fucceeded to the Spanifh monarchy under thefe circumftances. Though of a mature age, his character was little known or underftood beyond the limits of his own dominions. In the early part of his life he had appeared to evince fentiments more Caftilian, than any of the defcendants of Philip the Fifth had hitherto difcovered ; and to promife a reign, in which the feelings of a common origin and defcent would influence lefs on affairs of ftate, than a wife confideration of the true policy and interefts, becoming a genuine King of Spain. It may however be queftioned, whether this anticipation of his maxims and fuppofed line of conduct, will be confirmed by experience; and whether he will emancipate himfelf from the partialities, naturally connected with his near affinity to Louis the Sixteenth. The fame Minifters feem to govern, and the fame principles to ani-
mate the Court of Madrid, which have uniformly characterized it fince the extinction of the Spanifh branch of the Houfe of Auftria : and the time is probably ftill diftant, when the pernicious effects of the treaty of Utrecht in uniting two monarchies, which for ages anterior to that event had never acted in conjunction againft Great Britain, will have finally ceafed to operate.

Meanwhile, the efforts of the Firf Minifter to terminate the prefent difpute by negotiation, kept equal pace with the exertions made to equip a formidable naval force. At the fame time that a fleet, the command of which was deftined to Lord Howe, affembled at Portfmouth, Mr. Fitzherbert was difpatched as ambaffador to Madrid, in order to try the effect of remonftrance and expoftulation. The Englifh people, unanimous in their approbation of the meafures purfued, and in their demand of repafation for the injuries fuftained, loudly called for inftant war, or for the moft unequivocal and fatisfactory conceffions.

The

The convulfions and embarraffed ftate of the French monarchy, together with the perfonal fituation of the King of France, appeared to render an adherence to, or completion of the family compact impracticable, however well inclined the Court of Verfailles might be fuppofed, to affift and fupport her ally.

Spain doubtlefs felt and regretted this incapacity, which compelled her to commence a war againft England, unaffifted by any European power; and the eventof which, inthe prefent circumftances, might be fatal to her grand or or commerce in every part of the world. She feemed to yield to thefe obvious confiderations; and the Spanifh Miniftry towards the clofe of July, agreed to make a compenfation for the loffes, fuftained by the Englifh adventurers plundered at Nootka, as a bafis or preliminary to a final and amicable arrangement. Notwithftanding, however, this apparent defire of adjufting the points in difpute, and of avoiding the ultimate appeal to the fword, every exertion was notonly made

## ( 167 )

in the ports of Cadiz and Ferrol, to fitout a numerous fquadron ; but the Spanifh ambaffador at the Court of France, expended the treafures of his mafter, in endeavours to induce the National Affembly to adopt the quarrels of Charles the Fourth, and to fulfil in its whole extent the obligations of the family compact. His labours, though not equally fuccefsful, as, under more propitious circumftances they might have proved, yet produced a vote favourable to the views and wifhes of the Crown of Spain. A general profeffion on the part of the National Affembly, of adherence to the ftipulations formed between the two nations; and a refolution inftantly to arm a confiderable naval force at Breft, were procured and publifhed. The hopes of a fpeedy and permanent accommodation between the Courts of London and Madrid, which the firft conceffion on the part of the latter power had excited, gradually grew more uncertain and problematical. Autumn advanced, without any certainty or decifion on this great point ; and though
the flect of England, which had cruized in the Bay of Bifcay during near fix weeks, returned again to Spithead, without having feen an enemy, yet the expectation of an eventual rupture was rather augmented than diminifhed.

While thefe negociations and armaments detained the Weft of Europe in fufpenfe, the moft important and unexpected events had taken place among the. Princes of the Germanic empire, in confequence of the death of the late Emperor Jofeph the Second. That reftlefs and turbulent Prince, exhaufted in body, and agitated in mind, expired at Vienna in the commencement of the prefent year. His vaft, but divided and revolted provinces, devolved to his brother Leopold, Great Duke of Tufcany. Few Sovereigns have ever acceded to a throne under more critical and alarming circumftances. Though Laudohn had clofed his brilliant career of military glory, and even fhed a luftre over the laft yours of Jofeph, by the capture of Belgrade : though the Turks had been driven
beyond the Danube, and the Imperial troops had at length penetrated into Servia and Moldavia; yet thefe advantages, bought with three campaigns, and preceded by defeats and difafters, offered a very inadequate compenfation for the calamities, which menaced or aftlicted every other part of the dominions of the Houfe of Auftria. Hungary, fo renownec! for its enthufiaftic loyalty and attachment to Maria Therefa, when that Princefs was involved in the deepeft diftrefs, had been alienated by her fucceffor; who infulted their moft facred prejudices, while he invaded their moft valuable immunities. Pofterity will fcarcely believe that chis injudicious and infatuated Prince, foon after his acceffion, from refentment to the Hungarians, not only removed the crown and regalia of that monarchy from Buda, the antient capital, to Vienna : but, as a mark of fcorn and contempt, caufed thefe venerable infignia of the kingly dignity, inexpreffibly precious in the eftimation of the people, to be conveyed from one (a) $\mathrm{a}_{1}$ -
tal to the other, in the common flage waggon.

The King of Pruffia hung over Bohemia, with a prodigious army, ready to enter that kingdom. The German Princes were almoft univerfally difaffected to the late Emperor, and had reprobated his infidious projects for an exchange of territory with the Elector Palatine. The Netherlands, irritated by a long feries of oppreffion, confifcation, and violation of all their antient liberties, had renounced any allegiance to a Prince, whom they regarded not as a protector, but a tyrant. Philip the Second, when he recalled the fanguinary Duke of Alva, was fcarcely more detefted, and had not more completely loft the low countries, than Jofeph the Second had done. Dalton, though at the head of a regular and formidable body of forces, had been compelled precipitately to evacuate Bruffels, and to feck his fafety in a diforderly and igneminious retreat. Lisxembourg alone remained, of all the ten provinces, when Leopold fucceeded
fucceeded to his brother ; and Flanders no longer even liftened to the propofitions of accommodation, which Jofuph in his dying moments offered to his revolted fubjects.

In this fituation, furrounded with difficulties occafioned by the ambition and defpotifm of his predeceffor, the new King of Hungary, after fome months of delay and irrefolution, wifely yielded to the neceflity, impofed on him by the diftracted condition of his affairs. The Courts of Berlin and of London, acting in concert, and fuftained by a Pruffian army, gave law to the Houfe of Auftria. Leopold confented to abandon the aliiance of the Emprefs of Ruffia; to reftore to Turkey the territories lately acquired ; and to receive his Flemifh fubjects into favour, after conceding and confirming, in the moft extended degree, all their libertics and privileges. This vigorous and fuccefsful interpofition was inftantly followed by a peremptory requifition, on the part of the fame Powers to Catherine the Second, by which that haughty and enterprizing Z 2 Princess

Princefs was required to follow the example exhibited by the King of Hungary ; and to grant an equitable peace to the Ottoman Porte, as well as to conclude the war which fhe carried on againft Sweden.

From fo humiliating a neceffity, the Emprefs extricated herfelf by one of the moft rapid, unforefeen, and perhaps mafterly ftrokes of policy, which is to be found in the ammals of the prefent centery. She made a peace with that King of Sweden, againft whom the had not fcrupled, a few years fince, to excite his own foldiers and fubjects to revolt: who had farcely efcaped from captivity at Wybourg, by forcing a paffage through the Ruffian fleet, with which he was furrounded : and who had not only committed hoftilities and waged war upon her empire; but was fuppofed to have drawn his pen againft her reputation, and to have ..ccufed her to Europe, and to future times, as an ufurper, infatiable in her thirft of power, and deftitute of faith or honour. Only a few days intervened between the moft
rancorous difplay of perfonal enmity, and the folemn exchange of the ratifications of peace: while Catherine, liberated by this fuccefsful excrtion from an enemy who detained her fleet in the Baltic, and who might prefent himfelf at the very gates of her capital, affumed new vigour, difdained to fubmit to the mandates of Pruffia, and continued her military operations againft the 'rurks.

She did not flop here; but, irritated by the attempt to fetter her arms and limit her conquefts, fhe preffed Guitavus the Third to enter into a confederacy againft thofe powers, with whom he had been fo lately in ftrict alliance; and to whofe timely interference or good offices, he had been in a great meafure indebted for his prefervation. She negociated anew with the Prince Regent and Cabinet of Denmark, whom the interpofition of England had hitherto reluctantly retained in neutrality. She corrupted, or perfuaded the Polifh Diet to exprefs fentiments hoftile to Pruffia; and encouraged Spain to
refufe compliance with the demands of the Britih Government.

Under thefe circumftances and appearances, hoftile or inaufpicious to the repofe of Europe, the month of October commenced. During its progrefs, the hopes and fears of the nation were painfully fufpended, by the uncertainty of the final event. Theimpatience and anxiety, natural to, and infeparable from fuch a fituation, were infinitely augmented by the fecrecy and filence, which furrounded and concealed the operations of the cabinet. The powers and energies of Government, concentered round the Firft Minifter, and vefted in his perfon, exhibited to the Englifh nation, all the vigor, celerity, and decifion of a defpotifm, unaccompanied with its characteriftic and concomitant evils. Though the fineft and moft numerous fleet which Great Britain had ever equipped, lay at Spithead, ready to ftand out into the Atlantic upon the fhorteft notice: though Admiral Cornifh, at the head of cight hips of the line, had already fet
fail; and, favored by an eafterly wind, was clear of the Channel : though a detachment of the Guards, to the number of above two thoufand men, were under orders to march to Portfmouth; and every preparation was made to facilitate their prompt embarkation: though the blow which impended over the Spanifh monarchy, hung by a fingle thread, and might every inftant fall; yet, not a whifper tranfpired, to gratify the curiofity of an eager capital, and an expecting country.

Univerfal ignorance, or fanciful conjecture prevailed, refpecting the deftination of thefe powerful naval and military armaments; while the magnitude and fcattered pofition of : Spanifh dominions, from the mouth of the Miffiffippi to that of the river Plate, left an ample field for the imagination, and afforded. fcope for unbounded affertion. To thofe who recollected the delays, the publicity, and the timidity which degraded the counfels, and fruftrated the meafures
or exertions of England, during the Adminiffration which conducted the American war, the prefent contraft was matter of equal wonder and admiration. The nation, confcious that its honour and its interefts were committed to a a depofitary of tranfcendent integrity and firmnefs, patiently waited the winding up of the cataftrophe, with eyes fixed on its conductor. Opinion fluctuated rapidly and capricioully from war to peace, as the moft trifling events appeared to indicate the one or the other; and October expired as it had begun, in uncertainty and fufpence.

During the three firft days of the fucceeding month, as every hour might be fuppofed to decide on this momentous queftion, expectation feemed to have attained its higheft point ; while the rapid approach of that period, when Parliament was fummoned to meet for the difpatch of public bufinefs, ated the advanced feafon of the year, fuperadded to the length of time which had already elapfed fince
the commencement of the negotiation, appeared to preclude the poffibility of any further delay. It was not till the fourth of November, a day already rendered memorable and aufpicious in the annals of Great Britain, that the meffenger fo long expected, arrived with pacific intelligence. Spain, after a refiftance proportioned to the magnitude and importance of the objects contefted, and after peremptory and reiterated refufals to concede upon points, equally affecting her pride and her interefts; relaxed at once from this tone, complied with the demands of England, and figned a " Convention," which terminated every paft or prefent caufe of difpute between the two Crowns.

To the wifdom and moderation of the Spanifh Firft Minifter, the Count de Florida Blanca, this timely and temperate refolution, which arrefted the fword already unfheathed, was attributed, by an opinion, not only general, but unqueftionably fuftained on high authority and
evidence. If the hiftorian was permitted to fpeculate upon the events of futurity ; or if, from afcertained and exifting facts or circumftances, we might be allowed to predict refpecting thofe which would have taken place; it is more than merely probable, that Spain muft have fuftained very deep and lafting injury from that war, which was thus unexpectedly and fuddenly averted.

The naval power of England, which at no period of paft time, had ever been fo expeditioufly or vigoroufly called into action : the fpirit and unanimity which prevailed throughout the kingdom: the acknowledged energy and capacity of the Adminiftration : the very nature of the war in which we were ready to engage, which muft have been not only offenfive, but directed to parts of the globe peculiarly calculated to inflame the ardor of the affailants, by profpects of wealth and plunder : the defencelefs and unprotected ftate of many of the Spanifh colonies in both hemifpheres : the anarchy, and confequent incapacity
of France, to extend any prompt and effectual fupport to the Crown of Spain : even the lefs important, but diftrefsful and perplexing embarraffinents, refulting from the earthquake which demolifhed the fortrefs of Oran upon the coalt of Africa, almoft precifely at the fame time when the Emperor of Morocco commenced hoftilities againft the Catholic King : this combination of caufes or events, in which there appears to be no exaggeration, may perhaps, without the imputation of national partiality, juftify an opinion, that the Spanifl monarchy was finatched by the wife and yielding policy of its Minifter, from evils and calamities of no common defcription.

While, however, I anticipate thefe advantages, which might probably have refulted from war, under the circumftances already enumerated; it is unqueftionable, that to a country fo deeply involved in debt, no feries of conquefts which the wildeft imagination can fuppofe, had they even been realized, could have compen-

$$
\text { A a } 2 \quad \text { fated }
$$

fated for the misfortunes infeparably connected with hoftilities. Peace, even though only obtained upon the moft moderate, and barely equitable terms, muft, to every reflecting mind, have been far preferable to the acquifition of all the provinces, which Cortez ever conquered, or Pizarro fubducd. But the "Convention" recently figned, while on one hand it made ample reparation and reftitution to the injured Crown, and plundered fubjects of Great Britain ; on the other, opened new and unexplored fources of wealth and commerce. After having been fubmitted to the infpection and inveftigation of the people of England, during many weeks : after having received the moft authentic atteftations of public gratitude and fatisfaction, in addreffes to the Throne, from the great corporate bodies of London, Edinburgh, and Briftol ; neceffarily compofed of perfons highly fenfible to, and highly enlightened upon, the commercial interefts of the country: after having been finally dif-
cuffed with all the feverity of political criticifm, in the two Houfes of Parliament, and attained the fanction of decided approbation in both : having undergone thefe rigorous difquifitions upon its merits, the "Convention" may be examined, like any other fact in the Englifh annals, with the candour, impartiality, and temper of hiftory.

That Great Britain has obtained by it points and objects, hitherto referved or refufed by the Court of Madrid, in every treaty fince the termmation of the reign of Philip the Fourth, is inconteftible. 'Time alone can completely afcertain the value and intrinfic worth of thefe conceffions, which are, in a great degree, dependant on the induftry and enterprize exerted, in converting them to national advantage. That jealous and tenacious power, which originally difcovered and conquered the New World, over which fhe has always endeavoured to draw the deepeft veil, while fhe excluded every European fate from any participation in her

## IMAGE EVALUATION TEST TARGET (MT-3)

Photographic Sciences
Corporation
vaft acquifitions; has, for the firf time, receded from her high and exclufive pretenfions. The pretended donation of the See of Rome, and all the antiquated claims which long prefcription had rendered venerable, have been for ever relinquifhed and abandoned by the prefent Convention. The navigation of the Pacific Ocean is, in effect, declared to be as free as that of the Atlantic. The right, claimed by England, of purfuing the fifhery on thofe parts of the coaft of South America, unoccupied and uncolonized by Spain, is not only avowed: but a vaft tract of the Magellanic regions, on either fide of Cape Horn, comprizing the whole coaft below the moft fouthern fettlement already made by the Spaniards, is declared to be free to both countries, for every purpofe of temporary accommodation; while the two Crowns are equally interdicted and reftrained, from forming future permanent eftablifhments on that inhofpitable fhore. In return for this liberal and ample conceffion, England fubmits to the equita-
ble demand, of not permitting her veffels to approach within ten leagues of the coafts and countries, actially occupied by Spain upon the Pacific Ocean,

On the Nortn Weft Coaft of America, the original difcovery, occupancy, and fovereignty of which, appear to furnifh matter of infinite doubt and difcuffion, ftill greater advantages are fecured by the Convention. Without recapitulating the primary ground of difpute, upon which clear and immediate fatisfaction is ftipulated: the whole continent, north of the fettlements already poffeffed by Spain, is left open to both nations; with only a reciprocal right of entry for purpofes of trade, into the ports or places which either may occupy.
'The fame general and equal principle is laid down as the bafis of accommodation, in the fouthern and northern hemifphere, and forms the predominant feature of the treaty. It was not denied by the Minifter, and it was juftly afferted by his opponents, when the Convention was agitated in the Houfe of Commons, that to
render

$$
(184)
$$

render it perfect, and exempt from future poffible mifinterpretation, a precife limit fhould have been drawn, both on the coaft of North and South America. But the evils infeparable from a pr longation of the difpute, muft have fo greatly outweighed the benefit to be derived from any line of demarcation which could have been inftantly fettled, that no poffible cenfure can be affixed on that account; fince its expediency was not more obvious, than its immediate execution was difficult and impracticable. Nor can it be reafonably doubted, that where fo clear a principle is by mutual confent eftablifhed, no effential obftacle can arife, in the courfe of future negotiations between the two Courts, for the final fettlement of their refpective boundaries.

To complete this great act of public bencfit and national glory, it only remained to meet the expence occafioned by it, with promptitude and alacrity. The Minifter, fo far from avoiding or protracting that neceffary, but painful and arduous tafk, followed the Convention, with the immediate

$$
(185)
$$

diate production of the accounts refpecting the naval and military armaments, and the pecuniary impolitions which he meant to propofe for their fpeedy liquidation. Not more diftinguifhed by the magnitude and energy of his preparations to humble the monarchy of Spain, when war appeared inevitable; than charactarifed by the moit falutary and fevere œconomy, when that neceffity no longer exifted ; his enlarged and active mind overcame the difficulties, by which common ftatefmen are impeded. He propofed to raife, not merely the intereft of the debt recently incurred; but to extinguifh the principal itfelf, in the fpace of four years, though amounting to above three millions fterling. The effect of fo judicious and provident a meafure, which mult equally evince the magnanimity of the Minifter from whom it originated, and the refources of the country which adopted it, will be felt through every kingdom of Europe: It is not exceeded by any of the acts of wifdom, found in the annals of ElizaB b beth,
beth, when the counfels of England were directed by the forefight and policy of a Burleigh. It is without precedent fince the begin:ling of the prefent century, and is calculated to excite the admiration and incredulity of future times.

The day, upon which Mr. Pitt fubmitted to Parliament a fyftem, fo calculated for general advantage, was diftinguifhed by another act, which might have rendered illuftrious a perfon, lefs confpicuoufly eminent above his fellow citizens. The garter, which was conferred by the Sovereign upon Lord Chatham, evinced the indifference or fuperiority of the Minifter to the higheft external decoration and diftinction; as powerfully, as his renunciation of a lucrative office in favour of Colonel Barré, at a much earlier period of his adminiftration, had proved his difintereftednefs and contempt of emolument.

As it feems hardly poffible to have made greater facrifices, fo perhaps, it is difficult to felect any example in modern times, of fo early an acquifition of that

## [ 187 ]

glory, which isthe juft ieward of rectitude and talents. Whether the names of Clarendon, of Godolphin, or of Pelham, can be placed in any degree of comparifon or competition with that of Pitt, it may be left to pofterity to determine. But it is competent to the hiftorian of the prefent age, to affert and to prove, that at no period fince the reftoration of monarchy in the perfon of Charles the Second, has this country permanently attained to fo high a point of folid greatnefs and importance, as fhe enjoys at the prefent moment. We hould fearch in vain for any traces of national confideration or honor, in the profligate annals of that diffolute and dependent Prince, whom I have juft named; or in the bigotted and tranfitory reign of his lefs criminal, but more unfortunate fucceffor. Shall we difcover greater fubject for pride and exultation, even under the temperate and elective government of William the Third?

Whatever obligations we may owe to the Prince of Orange, as our deliverer Bb 2
from
from civil and fpiritual tyranny, his arms were conftantly reftrained by the Generals, as his meafures were uniformly defeated by the policy and power, of Louis the Fourteenth.

After a perpetual and unequal ftruggle, in which her commerce was almoft annihilated, and in which the folitary laurels of the Boyne and of La Hogue, were contrafted with the annual defeats received on the Continent, and in the Channel, Great Britain nearly funk under the exertion. Though the peace of Ryfwick produced a fhort and delufive calm, yet the Crown of Spain, in violation of the moft folemn renunciations, was quietly transferred, in the year i 700 , on the extinction of the Spanifh branch of the Houfe of Auftria, to a Prince of France: while the laft hours of William were occupied by ineffectual efforts, to prevent the fatal confequences of an act, inconteftably injurious to, or fubverfive of the fecurity, interefts, and greatnefs of England.

It muft be admitted, that the female

## ( 189 )

reign which fucceeded, fo long as it was conducted by the counfels of Godolphin, and the genius of Marlborough, prefents a ftriking picture of military glory, and fucceffive triumphs. The Court of Verfailles, accuftomed to confer, condefcended to folicit for peace ; and Torcy, at Gertruydenburg, in 1709 , exhibited the humiliating fight of a Minifter of Louis the Fourteenth, proftrate before England and Holland. But the imprudence or prefumption of an Adminiftration, intoxicated with profperity, and unmindful of the changes of human affairs, allowed the moment to clapfe, in which the fafety and interefts of their country might have been for ever fecured, on the moft durable foundations. The horizon foon became darkened, and the profpect obfcured by clouds.

Villars refcued France from her ftate of danger and diftrefs, while Oxford and Bolingbroke difgraced the government, and accelerated the death of their feeble miftrefs, by meafures of pufillanimity, and breaches of national faith. The trophies
trophies of Blenheim and of $\mathrm{M}^{\mathrm{a}}$ lplaquet were obliterated by the defeat of Denain, and the peace of Utrecht: the Houfe of Auftria was betrayed in that difhonourable treaty ; and the evening of a reign, fo diftinguifhed and fo fplendid, clofed in weaknefs, and is only recollected with regret.

If the annals of the laft Princefs of the Stuart line afford fo little matter for hiftoric praife, it is not in the labyrinth of Continental Politics and alliances, which characterifed and compofed thofe of George the Firft, that we can look for topics of eulogium, or fubjects for admiration. The naval victory, obtained by Byng in 1718, over the Spanifh fleet in the Faro of Meffina, however brilliant and decifive ; fo far from being productive of any advantage to the nation, counteracted every principle of wife and judicious policy. It ftands contrafted with the fatal bankruptcy of the South Sea year; with the melancholy facrifice of Hofier's devoted fquadron, under the walls of Porto Bello; with a dereliction of the in-

## ( 191)

terefts and honour of the Crown of England, rendered fubfervient to injurious predilections, and forcign acquifitions.

The commencement of the reign of George the Second, conducted, as the greater part of that of his father had been, by the counfels of Walpole, difclofes fcarcely a more exhilarating profpect. It was, indeed, pacific: but this peace was the ignominious and fupine infecurity of James; not the dignified and martial trinquillity of Elizabeth. I am at a lofs to find, in the prefent century, any portion of time lefs diftinguifhed by wifdom and vigor; or during which, Great Britain was fallen into more complete infignificance, than in that interval which elapfed frem the death of George the Firft in 1727 , to the clofe, of Sir Robert Walpole's adminifiration, in 1742. Though the fubfervient fleet of this country efcorted the younger fon of Philip the Fifth, from Barcelona into Italy : though we facilitated and advanced the grandeur of the Houfe of Bourbon: though we tamely fubmitted to
the acts of violence, exercifed by Spain againft our commerce in all the American feas: though we abandoned the Emperor Charles the Sixth, to the united force of France, Spain, and Sardinia, who difmembered Naples and Sicily from the dominions of the Houfe of Auftria, in fo unequala conteft : though, in order that the meafure of incapacity and mifconduct fhould be complete, we even permitted Louis the Fifteenth, by incorporating the Dutchy of Lorrain with his hereditary poffeffions, to cement and perfect the French greatnefs ; yet thefe mighty and numerous conceffions did not conciliate affection, or procure refpect. Verfed in the arts of Parliamentary addrefs, and the fcience of domeftic venality, but confcious of his incapacity to conduct the veffel through the ftorm which impended; Walpole, when he had exhaufted every endeavour, to detain his Sovereign and his country in difgraceful neutrality, reluctantly refigned the reigns of power, which he had held too long for the honor of his mafter, or the glory and advantage of England.

Pelham,

## (193)

Pelham, after a hort interval, fucseeded. His Adminiftration, though neither fortunate and furceffful in war, nor fecure and undifturbed in peace, yet was rendered refpectable, by the luftre of his private and perfonal virtues. The ingerious campaigns of Fontenoy, and of La Feldt: the defeats of the allied army in Flanders, followed by the capture of Bergen-op-Zoom, and the fiege of Maeftricht: the peace of Ais la Chapelle, humiliating and injurious to Great Britain : the ravages, or hoftilities, continued to be exercifed by France againft our colonoes in America and the Eat Indies, even fubfequent to that treaty: there fubjects of general complaint and diffatisfaction, which clouded the Ministry of Melham, confoled the nation for his loft, when removed by death in 1754, from the fuperintendance of public affairs.

The fort remainder of the reign of George the Second, was equally calamitous and difgraceful, 'till that memorable and brilliant, but tranfitory æra, preceding Cc

## ( 194 )

its final termination, when the genius of Pitt renewed the glories and fucceffes fo long forgotten. The lofs of Minorca, and the ignominious convention of Clofter-feven, were erafed by the fucceffive conquefts of Martinico,Canada. Plaffey, Beflifle, and the Havanna. But, the demife of the Sovereign, in ${ }_{1} 760$, and the transfer of minifterial authority which fucceeded, prevented the beneficial confequences, naturally to have been expected from this chain of victories. A peace, which never can be fufficiently raprobated, and in which the ignorance of the interefts of the nation, was only exceeded by the dereliction of the honor of the Crown, reftored to the two branches of the Houfe of Bourbon, thofe provinces and poffeffions, of which they had been deprived by the Earl of Chatham.

I haall not enumerate the fleeting phantoms of Adminiftration, which annually appeared and vanifhed; nor attempt to defcribe that period which elapfed, from the refignation of Lord Bute, to the year $1_{770}$, when the reins of power were delegated

## ( 195 )

to Lord North. There are certainly few events, included within that portion of time, which can induce us to lament that it was not of longer duration. With ftill greater reafon, I wifh to draw a veil acrofs the feries of errors, incapacity, and mifconduct, which preceded and produced that fatal war, terminated by the emancipation of America; and which ftill blazed in every quarter of the globe, at the rara when thefe memoirs commence.

From the elevation on which we are placed, it affords a fort of melancholy pleafure, to look down upon the anarchy and calamity, which endear the prefent Government, by a comparifon with that ftate from which we have efcaped. The actual fituation of this country realizes the warmeft wifh of a Minifter, or a Sovereign, to whom the profperity and glory of England are fupremely dear. That object which William vainly fought to attain; which Godolphin and Miarlt rough ailowed to efcape; and which the Earl of Chatham was not permitted to accomplifh; has Cc2 been

## ( 196 )

been referved for the prefent age to behold. The monarchies of France and Spain have been fucceffively humbled and reftrained, without the neceffity of having recourfe to the fword. Great Britain, at the conclufion of 1790 , is become by general confent, theacknowledged Arbitrefs of Europe ; and to her poffeffion of external confideration and refpect, unites every internal fource of wealth and felicity.
From the furvey of fo auguft and animating a fcene, it is natural to turn our eyes towards the picture exhibited by France, at the prefent moment. The convulfions which have agitated that diffracted country fince the month of October 1789 , though fometimes apparently fufpended or extinguifhed, yet may poffibly revive with augmented violence. The laft fourtecn months feem to have been alternately diftinguifhed, by acts of feftivity and of flaughter; by the pageant of a Foederation, in the "Champ de Mars" at Paris, where the national freedom was folemnly recognized by a captive and degraded Sovereign;
reign; and by the memorable carnage of Nancy, which fo quickly followed. It is perhaps impoffible for the wifeft ftatefman to predict the eventual confequence of thefe conflicting caufes; or to hazard a decided opinion on the final refult, as yet concealed in futurity, and obfcured by fo many contradictory appearances. The depreffion and humiliation of the clergy; the fale of the ecclefiaftical property ; the annihilation of the orders of nobility, which were almoft coeval with the times of Clovis and of Pharamond; the abolition of the peerage; the renewal of the dangerous experiments of Law, and the creation of a paper currency, nearly as deftitute of folid fupport, as was the fyftem of that celebrated minifter: Thefe extraordinary operations, or meafures of government, in a great degree without precedent in the hiftory of modern European nations, have not yet fufficiently unfolded and developed their full effect, to enable the philofopher and the hiftorian to confer on them his cenfure, or his admiration.

It has not even hitherto been afcertained or exemplified, fince the extinction of the Roman freedom by Marius and Sylla, that a people whofe numbers exceed twenty millions, are capable of being permanently governed under a free conftitution. Nor has mankind yet feen any inftance of a capital, and a country, habituated for ages to defpotifm, funk in pleafures, loft to public principle, deftitute even of the forms of external refpect for the national religion, and only intoxicated with the fpeculations of a diftempered and vifionary philofophy; which ever afpired or attained to a wellregulated and wifely-cemented Liberty.

It was not in fuch a fate of morals or of fociety, that the Athenians broke the fetters of arbitrary power, when roufed by Harmodius and Ariftogiton. The elder Brutus bore no fimilarity either to Mirabeau, or to La Fayette. Rome vainly affaffinated her Dictator, when public virtue was no longer to be found in the fenate, or among the people. The Mountaineers of Switzerland, who threw off the

## ( 199 )

the yoke of the Houfe of Auftria; and the oppreffed peafants of the Low Countries, who revolted from the tyranny of Philip the Second, were poor, hardy, and martial. The Englifh Parliament, which oppofed, and ultimately vanquithed Charles the Firf, called upon a nation, which however inflamed by fanaticifm, was unfubdued by luxury, and uncorrupted by venality. Times of effeminacy and refinement have not hitherto been found to produce a plant, of fo hardy and vigorous a nature, as Freedom; and if we are deftined to fee in the hiftory of France, an example of this extraordinary contradiction to the refult of all experience, it will be a ftriking leffon of the infufficiency and fallibility, of human wildom or obfervation.

The time which has elapfed fince the Revolution of July, 1789 , has not been fufficient, to afcertain all its confequences, or to ripen and mature the many caufes, which may ftill thake the freedom of France, before it attains to folidity. The yielding and

## ( 200 )

and paffive conduct of the King, which has fo powerfully operated to produce fubmiffion in the two orders of the nobility and clergy, may be overborne by events, or may be affected by the advice and counfels of thofe who approach his perfon. The natural levity, and characteriftic inconftancy of the nation, may conduce to make them weary of a poffeffion, which however ineftimable in its nature, is neither to be attained, nor preferved, without unremitting vigilance and exertion. The ceffation or ruin of many branches of trade, neceffarily refulting from thelate convulfions: the feverity of the taxes, which a free Government is compelled to exact, in common with the moft defpotic Monarch : the long habits of unconditional fubmiffion, fo forcible in their operation upon the mind and character: All thefe principles may ferment, and ultimately burft into action.
To the internal fources of change and commotion, external ones mayunite. Of the feven fugitive Princes of the Blood, who pre-
cipitately abandoned their country at the commencement of the national troubles, only one, the Prince of Conti, has yet ventured to revifit Paris, or fubmitted to take the Civic Oath, impofed by the new conftitution. The malcontents, affembled at Turin round the perfon of the Count d'Artois, aided by the capacity and refources of Calonne, and ready to be led on by Maillebois, menace the duration of the National Affembly. Even though thefe ftorms were diffipated, yet the Courts of Vienna and Madrid cannot be fuppofed to look with pleafure, or approbation, on the fallen condition of Louis the Sixteenth; and would, probably, aid with more than wifhes, any effectual ftruggles which might be made for the reftoration of his antient prerogatives. Thefe reflections and confiderations may infpire fome reafonable doubt, refpecting the final iffue of the fubverfion of the Royal Power, and the permanency of a free conflitution in France.

Whatever may be the refult, and though liberty fhould even ultimately triumph, D d
its attainnent has beenaccompanied with, at leaft, a temporary diminution, approaching to total fufpenfion, of the political ftrength, importance, and confideration of the kingdom, as a European flate. The energy and activity of the Crown have been withdrak"; and a fpirit of licentioufnefs, the moft fatal to every national and public effort, has prevailed throughout all the naval and military departments. The French colonies in the Weft Indies, are engaged in civil war, or become a prey to infurrection and anarchy. The frontiers, towards Germany, Savoy, and Spain, are either expofed to infult and invafion; or protected by troops, upon whofe fteady attachment and fidelity, after the late defection from their Prince, no fecure reliance, can be placed. That powerful monarchy, which for near 2 century and a half has infpired terror, and whofe reflefs ambition has been fo dangerous to every fur vunding country : which has twice, during that time, nearly fubjected Holland; which placed Philip the Fifth on the Spanifh throne in 1700 ,
and raifed an Elector of Bavaria to the Imperial dignity, at a fill more recent period: that power, occupied in elidlefs metaphyfical difquifitions upon the rights of men, or employed in defperate projects of revenue and finance, appears not only to be incapable of invading the repofe of her neighbours, but even of providing for her own internal fafety and tranquillity.

Such is the ftriking contraft, which the two monarchies of France and England actually prefent. The one, ftruggling through difficulties, to complete a fyftem of liberty; and attempting to renovate her difordered finances, plunged into almoft irremediable confufion. The other, enjoying all the advantages of eftablifhed order; conducted by a Government equal'y vigorous and popular; meeting every pecuniary embarraffment or impofition, with new and unexampled refources; ftrengthening her credit, and extending her commerce, while fhe covers the ocean with her navy, and fpreads the glory of her name over every quarter of the earth.

I am arrived at that period, where the prefent work muft neceffarily terminate. I am confcious that it is only an outline; but the events of which I have treated, are not fufficiently removed, to admit of minute enquiry, or profound inveftigation. Yet, this imperfect production may perhaps ferve to light the fteps of fome future Hume or Gibbon, to whom genius fhall delegate the fublime tafk, of recording and perpetuating the Englifh annals. My object has been only to commemorate the facts and characters, which have made the deepeft impreffion on my memory and underftanding, while a fpectator of their full effect ; and to ftamp them with the genuine fentiment which they excited, of approbation or cenfure. "Statui res geftas " Populi Romani,". fays Salluft, "carp" tim, ut quæque memoria digna vide.. - bantur, perfcribere; eo magis, quod " mihi a Spe, Metu, partibus Reipublicæ, " animus liber erat."

Whether I may be efteemed altogether exempt from the emotions, difclaimed by

## (205)

the Roman writer, I muft leave to thofe who fhall perufe this work, to determine. It is difficult to divert ourfelves of the predilections, which almoft neceffarily arife in our minds, when engaged in the recital or defcription of fcenes, acted in ages and countries the moft remote. It would rather imply a degree of apathy, and defect of feeling, than any fuperiority to common and vulgar prejudice, if I could furvey with the fame tranquillity, the calamities, which only a few years fince, threatened the deftruction of England, and the prefent elevated ftate of fecurity which we enjoy : or if in relating them, I fhould allow no portion of enthufiafm to mix with the veneration, always due to hitoric truth. Gratitude is naturally excited in every generous breaft, by private benefits: but the Sovereign, or the Minifter, who are the benefactors of nations, kindle, even in the hiftorian who tranfmits to future times the events of their government, a venial partiality; nor can the reign

## ( 206 )

reign of Trajan and Aurelius be written with the fame indifference, as we feel in defcribing the gluttony of Vitellius, or the crimes of Caracalla.

FIN I S.
$\square$

[^0]:    * It was during this brilliant and tranfitory portion of her life, that the was feen by the author of a production, which has recently made its appearance in this country; and which, from the celebrity of the writer, as well as from the intereft excited by the fubject itfelf, has been read with umiverfal avidity. It is not my intention to criticife, or to appreciate the merits of a performance, which embraces fo many objects, and ranges over fo raft a field, as the late Revolution in France opens to a creative imagination. With fome errors and fome blemifhes, if appears to me to be a moft extraordinary exhibition of genius, fancy, and in many parts, of deep, able, and judicious reafoning. Its author is entitled to fomething more than the mere approbation of every man who refpects kingly power, or eftablifhed Government; and who deprecates the violence of popular innovation. Perhaps the portrait of the Dauphinefs may be too highly coloured; but it is the colouring of Titian, and not of a common artif. Indeed, thofe who remember the prefent Queen before the death of Louis the Fifteenth, muft admit that fhe was then calculated to excite fentiments of perfonal admiration and delight, in no ordinary degree.
