GERMANS CALLED TO GIVING WAY

Germans Forced by Advancing Canadians, British and French to Retire From Strong Positions West of Armentieres--Villages Captured, Heavy Casualties Inflicted and Prisoners Taken--French Only a Few Hundred Yards From Roye.

ATTACK BY CANADIANS STRAIGHTENS OUT LINE

Splendidly Executed Operation Results in Capture of Villages Northwest of Roye--French Follow up Success of Dominion Troops With Traditional Dash, Eliminating All Salients in Front.

With the Canadian Forces in France, Noon, Aug. 16, via London, Aug. 18.--A splendidly-organized and executed combined operation by the Canadian troops has resulted in the complete straightening out of their line on the right, northwest of Roye, by the capture of the strongly-held villages of Parvillers and Damery. The latter place fell into Canadian hands yesterday afternoon.

Witnessing the Canadian success, the French immediately south of them gave a fine example of their traditional elan and dash and made a brilliant attack. They carried the Wood of Damery, Villers-les-Roye and Scuarin. They thus brought their line up parallel to the Canadians, as a result of a week's fighting in which the originally-selected field of assault was extended by the French many miles south and east.

Heavy guns he could not extricate, because of the suddenness and violence of their onslaught which carried them each day to the very crest of their wave of penetration, the Canadians did brilliantly. Two divisional headquarters were captured intact, as well as several brigade and battalion headquarters. Boche regulation field glasses may be bought in the Canadian ranks for a song or traded for a supply of that much scarcer commodity, cigars. The market for iron crosses has had a terrible slump.

FRENCH GAIN ON AVRE RIVER BRITISH MAKE TWO ADVANCES

More Than 1,600 Prisoners Taken by French, Who Occupy Village and Strong German Positions on a Wide Flanders Front.

Sir Douglas Haig Decorated

Paris, Aug. 18.--Field Marshal Sir Douglas Haig was decorated by Premier Clemenceau with the French Military Medal at headquarters in the field today. The award was made on the recommendation of Marshal Foch.

FIVE BATTALIONS FAIL TO DISLodge CANADIANS

Attempt to Retake Damery Fails With Heavy Losses--Allies Gradually Enclosing Roye

London, Aug. 18.--Reuter's correspondent at British headquarters, telegraphing under today's date, reports that severe patrol fighting between Chauines and Roye has occurred during the past 24 hours, the allies gradually enclosing Roye. The French are within a few hundred yards of the railway station south of the town. The Germans have made heavy counter-attacks since Thursday, and the diminution of their heavy artillery fire suggests that they are withdrawing their heavy guns.

FIFTEEN MILE GAIN IN SIX DAYS' BATTLE

Canadian Spearhead Encounters Stiffening German Resistance--Dominion Cavalry Take German Troop Train With Five Hundred Men.

Ottawa, Aug. 18.--The following despatch from overseas was received here tonight: The sixth day of the battle finds the Canadians penetrating into the German lines to a depth of 15 miles from their starting point, with brisker fighting in progress and the enemy resistance stiffening. The entire situation is encouraging, the Canadians are nullifying the counter-attacks and pressing ahead. Prisoners unanimously admit the marvelous success of the surprise on the front of the whole Canadian operation.

FRENCH AIRMAN DOWNS THIRTIETH AIRPLANE

Eight German Aircraft Are Put Out of Action in Aerial Fighting. Paris, Aug. 18.--A French official communication issued tonight says: "Aviation, Aug. 17: Eight enemy airplanes have been downed or put out of action, and three captive balloons set adrift. Our bombing machines in the night of Aug. 17-18 dropped seven tons of explosives on the railroad stations at Bazancourt and Amagne. It is confirmed that on Aug. 8, Second Lieutenant Boyau downed his thirtieth enemy plane."

BONDED CARS ROBBED ONLY WHISKEY TAKEN

Eight Men Arrested in Windsor and Farmers Now Won't Dig so Much. Windsor, Aug. 18.--Eight men are now under arrest here in connection with the plan to rob by wholesale bonded cars passing thru Windsor on the Michigan Central Railroad. James Pelouquin, who is a switchman, is said to have made a full confession to the police of how the cars were backed up on a side track in the yards to a convenient spot where they were looted by the gang who carried away only liquor. The waybills showed cars in which liquor was being shipped and it was these cars that were side-tracked and robbed, according to Pelouquin, who is a switchman. After being removed from the cars the whiskey was "cached" in different parts of the country, and farmers in certain localities are said to be showing unusual energy in turning up the earth on the farms where they lie close to the railroad tracks. Fully half a carload of whiskey is buried, the police believe.

NOT ONE GERMAN WOULD GO ON RAID

Offered Money, Leave, and Iron Crosses, But None Volunteered. With the British Armies in France, Aug. 18.--German deserters who came over to the British lines say that just before they left their line volunteers to go on a raid for the purpose of obtaining identifications were called for. They were offered 150 marks, fourteen days' leave and iron crosses, but not a single man volunteered, the deserters assert. From other sources it is learned that an order has gone the rounds in the rear of the German lines that railway fire in the region of the Vardar, Guevghel and the Cerna Bend, British aviators downed an enemy machine north of Guevghel.

SIBERIAN PLAINS CONTAIN WEALTH

Similar to Canada in Latitude, Natural Resources and Occupations.

THRU CONNECTIONS

Great Siberian Railroad Has Been Double-Track to Petrograd.

BY V. C. RATCLIFFE. "Isn't it silly, Harry, the way the newspapers are saying that the boys are eager to enlist for the Siberian contingent?" she asked, as she scanned the columns of The World.

"Oh, I don't know; why?" asked the man, whose head was in the morning story by Ida.

"The idea of our men really wanting to go to Siberia! Why it's all ice and snow and lull of convicts working in mines and exile—'and things," she added lamely.

"Oh, now, you know Siberia really isn't what you say it at. He waxed enthusiastic over his superior knowledge. 'Siberia is very much like our own west in many ways. Get down the encyclopedia and we'll see.'"

degrees, and Edmonton over 53 degrees. The climate of Siberia in winter is severe, but in summer it goes up to a mean temperature of 67 degrees, so the crops ripen well. In winter the thermometer drops low so the rivers are frozen over solid, and the harbor at Vladivostok is closed for more than three months.

Navigation being closed, so long would make transportation a difficult matter were it not for the Trans-Siberian railroad. This road extends from Cheliabinsk to Vladivostok, a distance of 4073 miles and connects with the Russian railway thru to Petrograd. The first sod was turned in 1891 by the late Czar Nicholas II, and the road was completed in 1905 at a cost of \$500,000,000. It was taxed to capacity during the Russian-Japanese war and has since been double tracked.

Agriculture is the main occupation of the people. Cattle and horse ranching is also engaged in to a large extent. The great level tracts of land in Western Siberia are some of the greatest wheat producing fields in the world. Besides farming and ranching, there is mining to be considered. Gold, iron, lead, silver and platinum are found in paying quantities. Coal is also present in abundance, and along with the huge forest tracts the residents of Siberia should find no difficulty with the fuel problem. The government mines were worked by convicts from the Russian prisons until the recent revolutions. Years ago Siberia was the place where political exiles were sent, but that has not been the case since 1896.

The Orthodox church is the main religious organization of the country, although dissenters are allowed perfect freedom to practice their own form of worship. Omak and Irkutsk are the two principal cities. There is a university at Tomsk, although only about two per cent. of the population have any education to speak about.

Passage From Canada. There was a project on foot some years ago to build an Alaskan-Siberian railroad, tunneling under the Bering Strait to connect at Kanak and be linked up with the Canadian Pacific Railway system.

Who knows, when the war is over the project may be carried out and instead of the Russians saying "Let us emigrate to Canada,—the land of freedom," young Canadians will be

saying: "What do you say to going on that C.P.R. excursion to Siberia? I tell you it's the land of possibilities. We could take up a homestead there and become millionaires in quick time."

KEYNOTE IS STRUCK AT LABOR MEETING

Final Meeting in Interests of William Varley Held Saturday Night. James T. Gunn on Saturday night at Winchester Hall struck the keynote of the labor movement when addressing the meeting held on behalf of William Varley, soldier-labor candidate for Northeast Toronto. "The labor party is here to stay," he said. "It is no longer an infant. It is the exponent of those who are desirous of seeing a Dominion, graded with a strong, virile race, clear in its ideals and ever ready to carry them out in practice. A clear vision of the future not far distant is the need of the day. What shall be the course of this country when 300,000 soldiers return from the British and Flanders fronts and the era of war industries is at an end? This is the problem which the Independent Labor Party intends to deal with. The problem of industrial reconstruction is the most far-reaching, the most pressing of the questions of the day. Labor in Britain has proved itself calm, sane and practical in its outlook, and its efforts have been directed toward the general welfare of the country. The same ideals will dominate Canadian labor men."

Major MacBride of Brantford emphasized the need of considering the principle behind the present election, that of labor representation.

T. A. Stevenson ridiculed the claim of the provincial government that that government had been responsible for the passage of the bill granting women the right to vote. Long ago the labor movement had urged upon the government the need of enacting just such a measure.

Comrades MacLeod and W. J. Carmichael of the G.W.V.A. both pointed out that they were present to vote for a comrade who was both a soldier and a labor enthusiast.

Other speakers who championed the cause of the soldier-labor candidate were Walter Holo and George Fester of Hamilton. The former is the president of the Independent Labor Party.

Mrs. W. R. Singer, vice-president of the women's auxiliary of the Toronto Machinists' Union, also spoke. James Beattie, who championed the candidate because he was flying the colors of labor, Corporal McGuigan, another member of the G.W.V.A., was present. Every other speaker testified to the splendid record of the candidate not only as a soldier but also as a labor leader.

James Marks, editor of The Industrial Banner, presided.

CANADA BRIGHTEST STAR IN CORONET

Speaking on the "opportunities and possibilities of Canadian citizens" in the Metropolitan Church last evening, Rev. C. L. McIrvine of Hamilton described Canada as "the brightest star in the coronet of the empire." He stated that the building of a nation that goes in but with the consent of the individual, who is his own architect. We are not responsible for the manner in which we come into this world, but we are responsible for our conduct while we are here.

The preacher said that the very contentment of the architect, and it is somewhat similar in the building of an individual life, for there is no trait that goes in but with the consent of the individual, who is his own architect. We are not responsible for the manner in which we come into this world, but we are responsible for our conduct while we are here.

The preacher said that the very contentment of the architect, and it is somewhat similar in the building of an individual life, for there is no trait that goes in but with the consent of the individual, who is his own architect. We are not responsible for the manner in which we come into this world, but we are responsible for our conduct while we are here.

Canada, or in any other country, that comes to us without labor." In conclusion he stated that Canada had had a period of evolution, and the world was just beginning to understand the vastness of this great land.

PAINTERS AND DECORATORS.

The Toronto painters and decorators who are unorganized held an open meeting at the Labor Temple, Sunday afternoon, and were addressed by John Hopkins, business agent of Local 151, of the International Union of Painters and Decorators.

Mr. Hopkins told a reporter that the international could claim a membership of a hundred thousand, and was practically the largest in the world. A large number of returned men attended the meeting, and the future of the Toronto organization is very promising.

IS OLDEST MEMBER. Corp. Thomas Webb, vice-captain of the Base Hospital baseball team, is the oldest member of the base unit in point of service. He enlisted in May, 1915, with the C. A. M. C. at Exhibition Camp. Owing to a serious attack of pneumonia he was unable to get over to France.

WARD ASSESSMENTS SHOW BIG INCREASE

Population Has Also Grown in Districts for Which Figures Have Been Tabulated. According to figures made public by the assessment department on Saturday, the total assessment for the five wards for which totals have so far been compiled show an increase of \$12,728,874 over the figures for 1915.

The assessment of the various wards for which the assessment has been made, as compared with that for this year, is as follows:

Table with 3 columns: Ward, 1915, 1918. Ward One: 66,907,905; 82,698,249. Ward Two: 73,922,290; 71,368,402. Ward Five: 56,302,291; 54,801,442. Ward Six: 80,411,644; 77,482,251. Ward Seven: 25,100,568; 23,568,416.

Total: 3302,645,739; 3289,918,765. The increase of population in the wards for which the census has been taken is 12,290. The count in wards three and four has yet to be made, and it is not expected that the increases there, owing to their being well built up, will be as great as in the other wards. It is estimated that the population increase for the whole city will be about 16,000. The figures for the different wards are as follows:

Table with 3 columns: Ward, 1915, 1918. Ward One: 84,064; 90,570. Ward Two: 66,292; 64,297. Ward Five: 75,830; 77,989. Ward Six: 101,791; 98,810. Ward Seven: 30,166; 28,267.

Total: 372,123; 369,833.

SCRUTINEERS APPOINTED.

The Greater Toronto Labor Party on Sunday afternoon at its business meeting appointed the large number of scrutineers necessary to the conduct of the election today. Everyone at the Labor Temple expressed full confidence in the victory of the soldier-labor candidate at the polls.

### GENERAL MANAGER MOVES TO GROUNDS

Exhibition Staff Still Buried in Piles of Entries for Fair.

### 'ALL CLASSES INCREASE American Breeders from Ohio Have Entered Herd of Shorthorns.

In order to put the finishing touches to what promises to be one of the most successful years in the history of the big fair, General Manager Kent and his staff will move to the King street offices until after the close of the Exhibition.

The large staff of extra clerks have been working on the sheets for some time past they are still buried deep under piles of entries, which are much larger than a year ago in every department, with the probable exception of the horse section, where, owing to the encroachments of the auto, the list has been dwindling for some years past.

For the first time in years American breeders will be represented in the Shorthorn department, one herd of 32 from Ohio being amongst the entries. Two of the large breeders from the Canadian west will also be here with the cattle that carried off championships at Brandon and other summer fairs.

One outstanding feature of the live stock section will be the number of new exhibitors. Small breeders in many cases who have brought their flocks and herds to the point of perfection where they are ready to try conditions with the more experienced ones.

There will be approximately 6,000 poultry entries, the largest number ever recorded.

The boom in the rabbit industry is reflected in an entry of well over 200 by far the greatest display ever made here. In the majority of cases the entries are made by city men who are raising rabbits to supplement the meat supply. Wonderful prizes are being paid for some of the breeds, \$20 a pair for little ones, and \$100 for a pair of mature specimens of Black Siberians, a breed which will be well represented in the entry, the popular breeds in this district, the entry list, are Belgians and Flemish.

Increases in the number of entries in the women's and other competitive sections are most on a par with those in poultry.

### SYRIAN GREEK-MELKITE MASS SAID IN TORONTO

What was probably the first occasion in Toronto on which the Syrian Greek-Melkite mass was said in a church that is accustomed to the Latin rite, was celebrated yesterday when Rev. Paul K. Malouf, pastor of the Syrian Catholics of Toronto, on the invitation of Rev. W. A. McCready, rector of the Church of St. Francis, Grace street, a large congregation assisted. The rite with its elaborate symbolism, Oriental costumes and the processional cross to which was attached the crimson cross flag, symbolizing the Precious Blood shed on Calvary, together with many strange, but wonderfully attractive harmonies of the unaccompanied music, were all very impressive. Father Malouf also presided, speaking in English. The choir was directed by A. Nasr.

### NEWCOMERS TO CANADA ARE LIABLE TO DRAFT

Men who became residents of Canada since the Militia Act became effective are liable for service under the act with the same class they would have been in if they had resided in Canada at the time of proclamation. This new ruling was announced on Saturday afternoon. It is further ruled that men who became residents of Canada, who would have been liable under the act if in Canada at the time of the proclamation's date, shall within ten days of becoming residents, report to the registrar of the province or part of the province of which they are residents. To be exempt from the act, they must be the result of failure to comply with this new regulation.

### MAJOR EATON IMPROVING.

Major W. F. Eaton, who is in the Toronto General Hospital, where he underwent an operation a few days ago, was reported last night to be still improving, and to have had a very comfortable day.

### BYNG INLET CITIZENS SHOW GOOD EXAMPLE

S. B. McCready of the staff of the organization of resources committee, reporting on a recent visit to Byng Inlet, tells of remarkably good results secured thru a lively organization of a branch of the resources committee.

Byng Inlet, located five miles up from the mouth of the Maganetawan River, does not at first sight show much sign of the possibilities of food production. Out-croppings of rock everywhere are noticeable. Soil of any kind has to be hunted for in pockets amongst deep crevices of the rock. In these, however, splendid work is being done in gardening. The crop chiefly grown naturally is potatoes, but all sorts of other vegetables are represented as well. Secures of people, too, keep pigs, many have increased their holdings in poultry, and not a few have cows.

### HIGH PARK SCENE OF MANY PICNICS

Lodge Members and Families Throng Large Grounds Saturday.

The weather was favorable Saturday for the many picnics which dotted High Park, several of them being the annual outings of various lodges, with their families and friends. Among them were three west end camps of the Canadian Order of the Woodmen of the World, numbering about 200, not counting women and children, who were decidedly in the majority, and for whom the men in every instance declared the picnics were given; the men, too, however, appeared to be enjoying themselves. The Woodmen were addressed by Sovereign William Meen, head manager, and Sovereign Hugh Macdonell, lodge head manager. Sixteen racing events were on the program with three prizes for each.

A message received from Major W. C. Mitchell, formerly principal of the Riverdale Collegiate Institute, reads: "Everything O.K. Lie was wounded by a bullet in the chest on the 19th of August, 1918, while serving in the 19th Battalion in France. He is now in the Royal Free Hospital, London."

John D. Seton has been gassed on the battlefield of France, and is now in a hospital at Abbeville. His mother resides at 91 Silver Birch avenue. ### CANADIAN NICKEL ON GERMAN BULLETS

Wm. Varley Declares Mines Should Have Been Taken Over.

"If the government had only taken over the nickel mines of Canada, we would have been absolutely sure that the bullets which are shooting down our brothers in France tonight were not tipped with the nickel from the Sudbury district," declared Wm. Varley, the soldier-labor candidate for N.E. Toronto, speaking at a well-attended meeting in St. Paul's Hall, Yorkville, Saturday evening. His remarks were greeted with loud cheers, and continuing, Mr. Varley pointed out that a few years ago a certain trust owned the nickel mines, and there was now a suspicion that that company had been a menace to the country. "We have never received any guarantee that the nickel is not reaching Germany," he said.

In outlining his platform, the candidate laid particular emphasis on the alien question, and stated that his platform called for all allied aliens to be amenable to the M.O.A., and if many labor was found to be necessary to the well-being of the country, they should be taxed as follows: Bachelors, twenty per cent, on all incomes from \$750 to \$1,000; 50 per cent, on all incomes from \$1,000 to \$2,000, and 70 per cent, on all incomes above \$2,000. "It is the same kind of argument that the Kaiser used to Belgium," he said, "and the same kind of thing has been transplanted from Belgium to Ontario. I have been told that Dr. Cody is an excellent man in the church. Then I want to tell Dr. Cody that at no time in the history of Canada has an excellent man wanted in the church as at the present time, and you are injuring Dr. Cody if he is taken away from the church."

### REV. BYRON STAUFFER SPEAKS IN TORONTO

Bond Street Congregational Church was packed to the doors Sunday to hear the former pastor, Rev. Byron Stauffer of San Francisco, who took the services in the absence of the regular minister.

Dr. Stauffer took as his text at the evening service, "I have others." This was said about Jesus in a sneering way, said the preacher, by those who hated him. To have some men hate you was a great compliment, and to have the words of the text as an epithet would be a high honor, said Dr. Stauffer. The majority of the great geniuses of the world had paid tribute to Peter who said, "He went about doing good."

### DOROTHY DIX'S TALKS

THE TWO POINTS OF VIEW

BY DOROTHY DIX  
The World's Highest Paid Woman Writer.

Perhaps there never has been a time when youth and age looked at the problems of life from the same standpoint. Certainly they do not now, when such generation makes for itself a new world with a new outlook, and this is particularly true as regards the feminine sex and all that pertains thereto.  
The girl of today is no more like the girl that her mother was than if she were an inhabitant of the planet Mars, who had accidentally been dropped down on New York or Boston or Squeabunk. The things that mother thought so thrillingly interesting in her daughter's life, she finds uninteresting and wants to do and is determined to do wild horses couldn't have dragged mother into doing who would be wiser than that. In consequence of all of which mother and daughter cannot understand each other and are a mutual disappointment.  
In talking of her daughter the other day, a woman said:  
"I don't know what the young girls are coming to. It used to be one thing that one worried over. You felt so safe with your girls, for you knew just exactly how to bring them up and how they would turn out and all the rest of it."  
"You would be blue ribbons on their curls when they were little tots, and when they got bigger you would send them to a nice school where they would meet the right sort of girls, and when they graduated you would give them a big coming out tea, and you would have lots of lovely trousseaus and have a big church wedding and hand them over to a husband, and pretty soon you would begin the same round over again with a little granddaughter."  
"I know that is the way I planned life out with my daughter, and I had expected to renew my youth in hers in gadding about in society with her fully counted on being just as much interested in her beaux and love affairs as I used to be in my own. I never suspected that when she left school we would enjoy the most perfect companionship together, and I never had any more idea that I would find an insoluble problem in Ellen than I did that she would develop into a two-headed lady or sprout a beard."  
"But that is what she is. A problem. A conundrum. And I can't guess the answer. She doesn't care a rap for clothes. She hates parties. She doesn't yearn for beaux and hasn't the rudiment of an idea of how to make herself attractive to men. And she frankly says that the idea of marriage does not appeal to her."  
"She wants to go to work." She says that she considers it as disgraceful for a woman to be a loafer, an idler and a spendthrift for a man to be one, and that she simply cannot look herself in the face unless she is engaged in some productive labor that is of use to the world, and she is begging her father to let her take a course at a commercial college and go into his office as an office girl—and she would take on any other girl—and especially on the same plane that he would take his son into his business."  
"What do you say to that?" And all these years I have been so thankful to think that we would be able to give our little girl ease and luxury and protect her from the hardships of life! Why, I have never seen a girl standing behind a counter or bending over a typewriter that I didn't have a little tremor of gladness that my Ellen would be safe from that, and now that is

we are notorious hunters if we get jobs as stenographers or clerks, but because we don't need money is no indication that we don't need something that money can't buy. And one of these things that money can't purchase is—real, vital interest in life. We have to find that thru our own efforts—by work.  
"I am sorry yesterday. I wish I could go back and get her point of view, that woman in a parlor ornament instead of a cog in the machine. But I belong to my day and she belongs to hers, and there is a gulf of thirty years between us, that neither of us can cross. That is all there is to it."

RESCUED FROM BOATS.  
Life-Saving Crew Bring in People Who Were Stranded.  
With the exception of two runs made by the life-saving crew, the week-end passed quietly along the waterfront. The cooler weather has reduced the number of pleasure craft on the bay.  
At noon Sunday, the lookout at the station reported a launch on fire about a mile off the Eastern Gap. The crew immediately set out, and was successful in getting the flames under control, after the deck and part of the hull of the boat had been burned away. Two men and two women were brought in, none that were for their experience. The hull of the burned boat was towed in by the crew.  
About 9:30 Sunday morning, a telephone message was received from the New Toronto pumping station, to the effect that a sailboat was seen in distress out in the lake. The crew put out, and after a lengthy run succeeded in locating a yawl belonging to the Queen City Yacht Club, which had been overturned in the flames under control, after the deck and part of the hull of the boat had been burned away. Two men and two women were brought in, none that were for their experience. The hull of the burned boat was towed in by the crew.

## IRON MAN PETE WON BOTH SUNDAY GAMES

Brochons Hit Him Hard in First, But He Blanked Them in Second.

HANDLE UMPIRE ROUGHLY  
Arthur Irwin Angry and Says He Will Lodge Complaint With Farrell.

Special to The Toronto World.  
Rochester, Aug. 18.—It was a wild day at the local ball park. As starting pitcher Toronto troubled off both ends of a double-header, the scores being 6 to 4 and 3 to 0.  
In the first game, including Manager Howley, were chased from the ground by Umpire O'Brien, and Contreras, struggled in an effort to attack O'Brien, struggled like a madman, with both Leas and Hurlers, and finally was almost carried off the field in a frenzy. Topping it all off, Fischer Brogan threw the ball straight at the umpire's head, a few minutes later, and then jumped into him, smashing him hard several times in the face. Players separated the two and Brogan was dragged to the clubhouse by his mates. Meantime the crowd swarmed out on the field and the police were helpless for a few minutes. Manager Irwin threatened O'Brien, and there was a fine chance for a genuine Donnybrook. Then the police got busy and hustled the fans back into the stands. A few pop bottles were next tossed at the umpire, but no harm was done. Oh, boy! It was a great afternoon.  
There were four hours and thirty minutes of ball playing. In the first game twelve and whiffed nine. Only six hits were made off him, and as many runs, but they came in clusters of two in three separate innings. The umpire's awful work was to blame for the bases. In the second game, Howley was chased in this game for disputing a base decision which looked raw for the Leafs. On the bases O'Brien's work was maddening to players of both sides, but on balls and strikes he was sacred the Rochester pitcher.  
Peterson was punched for ten good healthy hits and didn't deserve to win. He came back in the second game to do a man's job and he tried to do it. In the sixth inning stunt was called out on strikes. He tried to hit the umpire with his bat and then tried to get at him with his fists. In the seventh, after giving Peterson a base on balls, O'Brien called a clear strike a ball, and Brogan lost his head. That was where the fun began. Until then only five hits had been made off Brogan. Hagen was a soft mark for the Leafs, who batted him at pleasure. Peterson blanked the Brochons, who were unable to get more than one hit off him in any one inning. Neither team scored for the first five innings. Toronto got nine in the last out, six being off Hagen, who was batted for as many hits. Neither game was featured by snappy playing.  
Irwin is likely to take some action with President Farrell regarding Umpire O'Brien. The umpiring on Saturday was as bad as yesterday and Irwin was in a frenzy Saturday night. The near riot today may have an effect on future Sunday games here. A crowd of 500 witnessed the games.

New York, Aug. 18.—With a speed that shattered five world records, Ralph De Palma, the famous Italian automobile driver, Saturday won the international sweepstakes at the Sheepshead Bay track by capturing all five events and rolling up 86 points to the 22 scored by his nearest competitor, Ralph Mulford, the American.  
Dan Resta, England's representative, took third place with a point score of 19. Arthur Duray, the Belgian driver, and Louis Chevrolet, the French racer, were both forced to drop out of the competition when their machines were disabled by the breaking of the crank shafts. Ira Vail, another American, did not start in several events, and failed to finish in those he entered.  
In the first race, the two-mile event,

De Palma finished in 1 minute 56.10 seconds, shaving the mark set by Resta. In the ten-mile event he clipped one second from the old record of 5 minutes 48.10 seconds, while in the thirty-mile heat he reduced the old record of 18 minutes 56.1-10 seconds to 18 minutes 31.1-5 seconds. The time of the fifth race, which was fifty miles, was 27 minutes 42.10 seconds, while the old record, set by Resta on the same track last year, was 28 minutes 42.10 seconds.  
Altho De Palma failed to equal in the 25-mile event the record of 10 minutes 50.1-0 seconds which he set in Chicago last July, he finished in the remarkable time of ten minutes 51.1-0 seconds. He erased the last two miles of the ten-mile event in 1 minute 2.2-10 seconds, the fastest time for the distance ever made in competition.

**LIGHT TRADING IN TORONTO MARKET**

**Sale of Mexican Power is Novely—Black Lake Issues Quieter.**

Steel of Canada was the only issue to display any sign of animation on Saturday morning, and even in the issue, dealings were restricted to 400 shares, with the closing sale at 49 1/2, a decline of 1/2. Porto Rico held its price at 57. The first sale of Mexican Light and Power was made at 10 1/2, and small lots of Dominion and Union Bank shares were traded in the afternoon.

The war loans were quiet and slightly higher, the 1918 issue selling 1/4 off at 100, and the 1917 issue 1/4 off at 93 1/2. In the unlisted department Black Lake showed a weakening letter, and the income bonds closed a point higher at 25, and the preferred stock unchanged at 25.

The morning's transactions in listed stocks amounted to 330 shares and \$4300 in the war loans.

**DIVIDENDS COMING ON ROCKWOOD OIL**

**Profits Are Accumulating in Treasury and Disbursement is Warranted.**

Hamilton B. Wills, in his weekly market letter, says: While the Rockwood Oil and Gas market has been somewhat quiet, in line with other issues, during the past week, the company continues to ship its high-grade product and, I am advised, the bounty coming from the Dominion Government for last month's production amounts to about \$2,500, which, added to the selling price of this product, places the company's treasury upon a solid basis and directly in line where dividends are now available.

It was intended to have the directors meet Thursday last, but as a full board was not possible until the first part of next week, action on the initial dividend was necessarily deferred. So confident are the directors in the future, I am advised, that it is intended to distribute a portion of the profits of the company as earned amongst the shareholders, instead of piling up a large treasury. These gentlemen are foremost in mercantile circles and are thoroughly capable of handling these affairs in a most efficient manner and in the best interests of all concerned.

Rockwood Oil and Gas is a well managed corporation, and its holdings of over 5,000 acres are situated in the most likely places in western Ontario, where oil may confidently be looked for, inasmuch as General Manager Slater first examined this section in company with government geologists before taking up any of the leases. Within a month after starting drilling operations, the pumping wells were brought in, each of a capacity of about 100 barrels per day, as a direct result of which the company may now be considered not only self-supporting, but regular monthly dividends are likely to begin almost immediately.

The original leases of this company are situated adjacent to Rockwood and met with its Glencoe property, the drilling of deep wells to the Trenton formation was started. A depth of 1,900 feet has already been reached, and a few days ago the necessary 2,200 feet so that it is likely, within the next month, a well of large volume will be brought in. The fact that Manager Slater has yet to drill a dry hole for the company shows that he is a thoroughly experienced oil man, as well as a geologist. I might further state that Mr. Slater has implicit confidence in the properties around Rockwood and looks for prolific wells to be brought in at the lower sands.

**LIBERTY BONDS AT BEST PRICE KNOWN**

**Stocks Overshadowed in New York Market—C. P. R. Has Setback.**

New York, Aug. 17.—Trading in stocks for the greater part of the short week-end session was overshadowed by steady buying of Liberty 3 1/2's, which sold at the highest quotation in their history, closing at 100.50, against the previous maximum of 100.30.

Dealings in this issue were relatively more extensive than in the 4's and 4 1/2's, which were barely steady. After the market's close 100.50 was bid for the 3 1/2's, with 101 asked.

Important stocks continued to move with contracted prices, and the investment issues showing variable reactions at the close.

Other volatile stocks were less active, presumably as a result of restrictions imposed by the exchange, but General Motors retained much of its 2 1/2 point advance.

Shipments were represented by Marine common and preferred, both closing at gains, but coppers, tobacco, oils and was accessories were hesitant, showing the deficit trend on their respective offerings.

C. P. R. Set Back Lower.

Canadian Pacific was the marked feature of the railway division, declining 1/4, but Ontario and Quebec were inclined to yield fractions, amounts to 100 shares.

The heavy expansion of actual output and the decline in the cost of loans was offset by a decrease of \$11,333,000, member banks losing almost \$11,000,000, and the local federal reserve bank. Another decrease of \$11,000,000 reduced the total of the item to less than \$20,000,000.

Bonds as a whole were irregular on nominal trading. Total sales (par value) aggregated \$2,875,000.

Old United States bonds were unaltered on call during the week.

**SILVER STOCKS IN IMPROVED DEMAND**

**Timiskaming and Other Issues Firmer—Dome at Better Level.**

Silver stocks were in somewhat better demand on Saturday's trading market, apparently in belated recognition of the fact that the price of silver in the United States has been set slightly above the dollar mark. Timiskaming led in activity, and moved up half a point to 30 1/2. McKinley-Darragh retained its point at 4 1/2. Adams sold 1/4 higher at 7 1/2. Rockwood Oil was unchanged at 39 1/2.

Dome and Lake Superior featured the gold market. The former opened strong at \$8.75, but declined to \$8.50. Lake Superior was nevertheless able to show an advance of 3/4 share over Friday. Lake Shore was 1/2 higher at 16 1/2. Adams was 1/4 higher at 16 1/2. Adams was 1/4 higher at 16 1/2.

Large volume advanced in activity, but regular monthly dividends are likely to begin almost immediately.

The original leases of this company are situated adjacent to Rockwood and met with its Glencoe property, the drilling of deep wells to the Trenton formation was started. A depth of 1,900 feet has already been reached, and a few days ago the necessary 2,200 feet so that it is likely, within the next month, a well of large volume will be brought in. The fact that Manager Slater has yet to drill a dry hole for the company shows that he is a thoroughly experienced oil man, as well as a geologist. I might further state that Mr. Slater has implicit confidence in the properties around Rockwood and looks for prolific wells to be brought in at the lower sands.

**MUCH SILVER-SHIPPED THRU CANADIAN PORTS**

**Impression Has Been Created That Canada is a Buyer.**

Considerable discussion has arisen as a result of the announcement on Thursday last that the price of silver in the United States had been fixed at \$1.01 1/2 per ounce, and that exports would be limited to 500,000 ounces. According to a New York despatch, this action has been taken owing to the fact that Canada has been making heavy purchases of silver in the United States above the quoted price, but local dealers in silver contend that a misunderstanding has arisen. While it is being shipped from the United States into Canada, it is stated that the ultimate destination of such shipments is London, as shippers find it cheaper to route the silver via the Atlantic ports in Canada, because United States steamship lines demand prohibitive rates for transporting the bullion to Britain.

**MUCH PROMISE GIVEN BY GLENCOE OIL FIELD**

**Prospect of One Hundred Producing Wells in That District Alone.**

Leblat, Plant and Company, in their weekly market letter say: "The Rockwood Oil and Gas market has been somewhat quiet, in line with other issues, during the past week, the company continues to ship its high-grade product and, I am advised, the bounty coming from the Dominion Government for last month's production amounts to about \$2,500, which, added to the selling price of this product, places the company's treasury upon a solid basis and directly in line where dividends are now available."

It was intended to have the directors meet Thursday last, but as a full board was not possible until the first part of next week, action on the initial dividend was necessarily deferred. So confident are the directors in the future, I am advised, that it is intended to distribute a portion of the profits of the company as earned amongst the shareholders, instead of piling up a large treasury. These gentlemen are foremost in mercantile circles and are thoroughly capable of handling these affairs in a most efficient manner and in the best interests of all concerned.

Rockwood Oil and Gas is a well managed corporation, and its holdings of over 5,000 acres are situated in the most likely places in western Ontario, where oil may confidently be looked for, inasmuch as General Manager Slater first examined this section in company with government geologists before taking up any of the leases. Within a month after starting drilling operations, the pumping wells were brought in, each of a capacity of about 100 barrels per day, as a direct result of which the company may now be considered not only self-supporting, but regular monthly dividends are likely to begin almost immediately.

The original leases of this company are situated adjacent to Rockwood and met with its Glencoe property, the drilling of deep wells to the Trenton formation was started. A depth of 1,900 feet has already been reached, and a few days ago the necessary 2,200 feet so that it is likely, within the next month, a well of large volume will be brought in. The fact that Manager Slater has yet to drill a dry hole for the company shows that he is a thoroughly experienced oil man, as well as a geologist. I might further state that Mr. Slater has implicit confidence in the properties around Rockwood and looks for prolific wells to be brought in at the lower sands.

**FOUNDRIES' SHARP RISE FEATURE AT MONTREAL**

**Stock Advances More Than Eight Points—Steel of Canada Active.**

Montreal, Aug. 17.—Canadian Foundries' and Steel of Canada were the feature of the local stock market on Saturday, furnishing nearly a third of the total volume of shares traded. The former advanced 8 1/2 points, with the close only 1/4 point off from the high of the day. More stock was wanted at 20 1/2 at the close, with 20 1/2 asked.

Elsewhere the list was quiet, with three exceptions. Steel of Canada furnished 848 shares to the total trading for this issue also, but the price movement was narrow, ranging between 68 1/2 and 69 1/2. The former figure, a net gain for the day of 1/2 point. Brompton, also continued to advance, with the close at 58 1/2, with the close at the latter, unchanged from that of the previous day. In other issues, the market was quiet, with the close at 100 1/2.

Total sales for the day, as compared with the corresponding day a year ago:

**KAISER SENDS SYMPATHY TO FRANKFORT-ON-MAINE**

Amsterdam, Aug. 18.—The Cologne Gazette prints a telegram sent by the direction of the emperor to the representatives of Frankfurt, stating that the emperor "deeply sympathizes in the misfortune which has befallen the open town of Frankfurt, as a result of an enemy attack which was contrary to international law, and claimed many victims."

The telegram requests that the burgomaster convey to the victims relatives the "sympathy of the all-highness."

**SPEDDY SUCCOR ASKED BY CZECHO-SLOVAKS**

Vladivostok, Aug. 18.—General Dietrichs, commander of the Czecho-Slovak forces in Siberia, has presented a memorandum to the allied representatives here, setting forth the urgent need of speedy assistance on a large scale and that an advance on Irkutsk should be ordered. He points out that if the allied forces do not reach Irkutsk within six weeks the delay will be tantamount to the loss of all western Siberia by the Czecho-Slovaks.

General Dietrichs says that this would leave Russia entirely at the mercy of the Germans.
