PROBS.—FAIR

PRICE TWO CENTS

FOURTEEN NOW DEAD IN ELECTRIC CRASH

Also Estimated to be 150 Persons More or Less Seriously Injured.

OFFICIALS TELL DIFFERENT TALES.

Los Angeles Accident One of Worst in History of Electric Roads — Motorman Says Brakes Failed When He Tried to Stop.

Los Angeles, July 14.—Fourteen persons are dead as a result of the wreck at Vineyard Station last night, when two Pacific electric trains collided. The number of injured was said to be eight to exceed one hundred and fifty. Several of these are in a precarious condition. Two bodies, those of a man and a woman, have not been identified. The revised list of the dead follows:

Edna Altar, secretary Associated Charities, Pasadena, Calif.
Ollie W. Axley, Bakerfield, Cal.
Jacob Marmon, Los Angeles.
F. Gonniguchi, Japanese, Los Angeles.
Sidney Johnston, Youngstown, Ohio.
Miss Veronica Miller, Los Angeles.
Edward Murray, Toronto, Canada.
J. Carl Murray, Los Angeles.
Mrs. C. C. Norman, Los Angeles.
Irwin Platts, Los Angeles.
William Taylor, Pasadena.
Unidentified man, about 35 years old.
Unidentified woman, about 22 years old.

Among the injured are:

S. B. Craig, Detroit, Mich., internal injuries.
Mrs. Irene Craig, Detroit, Mich., body crushed.
Nellie Murray, Toronto, Canada, some internal injuries.
Officials of the Pacific Electric Road assert that the blame for the disaster lies between engineer Joseph Bartholomew, of the standing train, and motorman Joseph Forrester, of the one that crashed into it. The conductor insists that he waved a red lantern in front of Forrester's train in plenty of time for the latter to have stopped had he heeded the signal. Forrester, who was found today at his home, only slightly injured, declared he did not see the lantern until within five hundred feet of the standing train.

This distance, he declared, was too short and his brakes failed to stop the train. Before the State Railway Commission, officials of the road stopped a train of cars the same type within 500 feet. A coroner's inquest will begin tomorrow.

MINISTER COULD NOT TAKE A HAND IN MINE STRIKE

Difficulty Involving Coal Miners on Vancouver Island Not Improving—Minister of Labor Could Not Act.

Vancouver, July 4.—Hon. T. W. Crothers, Canada's Minister of Labor, has returned from Nanaimo, having been unsuccessful in assisting a settlement of the coal miners' strike on Vancouver Island. He intimated today that he could not officially interfere as the only question at issue is the recognition of the United Mine Workers of America. The situation of Vancouver Island, from the union standpoint, is getting worse instead of better.

At Cumberland the Canadian collieries have 75 per cent. of the normal force working on the payroll filled with non-union men. What to do with these workmen in case of a settlement with the union is one of the difficulties in the way of any settlement.

THE CHICAGO-DETROIT EARTH AND AIR RACE

Charles, July 14.—Beckwith Havens, with J. R. Yerliack as passenger was the first of the aviators in the Chicago to Detroit hydro-aeroplane cruise to reach Charles, landing at 4:25 o'clock this afternoon. The trip from Peawat, from which place the start was made at 2:45 p. m., was successful. Only one stop was made, a shortage of gasoline making necessary a landing at Frankfort.

DIVORCE FOR BASEBALL MANAGER'S WIFE.

Chicago, July 14.—Mrs. Rosalie Chivington, wife of Thomas McK. Chivington, president of the American Association of Baseball Clubs, won a decree of divorce in court here today. She will receive five thousand dollars alimony, one thousand dollars of it immediately, and the remainder in semi-annual installments of five hundred dollars.

MUTUAL EXHAUSTION WILL FORCE PEACE ON BALKANS

British Foreign Secretary Now Says This Seems Only Solution.

POWERS WILL NOT RESORT TO FORCE.

Servia and Greece Will Assent Only to Drumhead Peace—Unless Bulgarians Agree Soon Attack on Sofia Will be Ordered.—Little Fighting.

London, July 14.—That the Balkan struggle will end by a process of mutual exhaustion seems the only hope that Sir Edward Grey, the British foreign secretary, has held out. In a statement in the House of Commons tonight he said that mere words were not likely to affect the situation and it would be most difficult for the European powers to resort to force to impose peace.

Neither Servia nor Greece has paid any attention to Russia's proposal that they cease hostilities. They appear determined to negotiate peace with Bulgaria only on the field, without intervention by any third party, and unless Bulgaria proves amenable it is believed that an advance will be made upon Sofia to enforce acceptance of the Servo-Grecian terms.

Servia's fighting for the time being is suspended but the advance of the Turkish and Roumanian troops continues without opposition. A Belgrade report says that the Servians on Sunday captured an important position eight miles west of Kustendil.

According to the Athens correspondent of the Daily Mail, Greece and Servia signed a secret treaty last May, binding them to prosecute the war to the bitter end, with Bulgaria, until the Bulgars acquiesced in the territorial arrangements laid down in the treaty.

By these arrangements the eastern boundaries of Greece would be extended to the Mesta river, considerably to the east of Drama, and Servia would have access to the Aegean Sea at two points.

CONSERVATIVE WINNER IN NORTH GRAY

Colin Cameron Chosen to Represent Constituency in Ontario Legislature—Party Leaders Express Opinions.

Owen Sound, July 14.—By a majority of 378 North Gray today elected Colin S. Cameron to represent it in the legislature. It was the vote in the town of Owen Sound that defeated John McQuaker, the Liberal candidate as the town gave Mr. Cameron a majority of 230, while in the rural parts Mr. McQuaker had a majority of 12.

Toronto, July 14.—On hearing the returns from North Gray tonight Sir James Whitney said:

"It is a magnificent victory and a very far-reaching one, indeed."

Hon. W. J. Hanna, (over the long distance telephone from his home in Saratoga), said:

"The electors of North Gray did what anyone would have expected. They were fully acquainted with the issues and the work of the government and the hypocrisy of the leaders of the Liberal party, who went into North Gray to actuate the electors. There was no mistaking from the time the electors got busy what they were going to do."

Mr. N. W. Rowell made this statement on the result:

"My information convinces me that the result in North Gray was due to the open combination between the Whitney government and the Liberal interests, with unlimited financial resources at their disposal. For the sake of Mr. McQuaker, the Liberal candidate, who was an exceptionally fine type of candidate and the workers who stood so valiantly by him, I regret the result. The loss of the seat, however, will have its compensations if it helps to awaken the people of the province to the undoubted fact of an offensive and defensive alliance between the Whitney government and the Liberal interests. When the people realize that this combination exists, I don't believe they will stand for it."

WILL SHOOT IN MONTCN.

Monte Carlo, July 14.—At the annual meeting of the Montenegro Rifle Range Association held here tonight it was decided to hold the annual shoot on the Monte Carlo Rifle Range on Saturday, July 20th.

MONTREAL'S FRENCH RESIDENTS CELEBRATE FALL OF BASTILLE

Presence of French Cruiser "Descartes" Lends Zest to Fete Which Will Occupy Three Days—Religious and "Convivial" Events on Programme.

Montreal, July 14.—The French colony in Montreal today celebrated the 144th anniversary of the storming and destruction of the Bastille in Paris. In Paris the national fete is always kept up for three days, and in this city this year the program has been followed, largely owing to the presence of the cruiser "Descartes" in the port.

The arrangements for the fete were made by L'Union Nationale Francaise, and they comprised religious, social and convivial events. In the chapel of the Sacred Heart in Notre-Dame church a special mass was celebrated by Archbishop Bruchet. The sermon delivered by Father Coste recalled how inseparable true patriotism is from religion and how the great names in French history have been bound up with the church. When Malouineuve founded Montreal he did so by celebrating a mass.

For French-speaking Protestants there was also a service conducted in the St. Jean Presbyterian church, at the corner of St. Catherine and Cadieux streets, at which Rev. H. Joliat was the preacher.

At noon the Consul General, Monsieur Bouth, with Madame Bouth, also Vice-Consul Raymond, and Commandant Puget-Conti, of the "Descartes," and Major Staff held a levee in the rooms of the consular building. The gathering was attended by representatives of the various societies and bodies of French-speaking Montreal, and there were several brief speeches of a complimentary style.

The fact that the day is not observed as a holiday, except by courtesy of certain business houses, made the attendance at Dominion Park in the afternoon rather meagre. At four o'clock the fete in the well-known resort was opened by a champagne d'honneur offered by the consular general.

The commandant officers and a detachment of men from the "Descartes" were there, and glasses handed round to everybody with the sparkling drink very raised by cries of "vive la Republique," "vive la Marine."

Later in the evening there was a "punch d'honneur" offered to the non-commissioned officers and men by the society of army and navy veterans. There was a full musical program, an excellent concert being given under the direction of M. Van Der Meer, and the park band.

HOME RULE BILL IN HOUSE OF LORDS, SECOND READING

Marquis of Crege Introduces It While Marquis of Lansdowne Has Amendment Advocating Submission of Question to People.

London, July 14.—The Home Rule for Ireland Bill came up today before the House of Lords for second reading, for the second time under the provisions of the Parliament Act which permits the passage of bills over the heads of the peers within a specified period.

The main interest in the re-appearance of the bill in the House of Lords was the possible development of Lord Lansdowne's motion which says "that this house declines to assent to the Home Rule Bill until it has been submitted to the judgment of the country. The Marquis of Crege, secretary of state for India and Liberal leader in the House of Lords in moving the second reading remarked that the government regarded the opposition motion as a demonstration against the Parliament Act rather than as one against home rule.

"Lord Lansdowne, in presenting his motion, remarked that if the House read the bill a second time it would be tantamount to accepting the principle of the Parliament Act, and he is an acquiescence in the treatment which has been meted out to this house." In his opinion this could not be done without loss of self-respect.

"Ulster must not forget that revolution breeds revolution," said a leading Irish parliamentarian to me today.

REBELLION IN CHINESE PRVINCE

Young China Party Forces Issue and President Sends Troops to Quell Disturbance—Cabinet Impeached.

Peking, July 14.—President Yuan Shi Kai has ordered reinforcements despatched to the province of Kiang-Si, where the cashed governor and general, Hwang-Hing, are leading rebellious troops. Heavy fighting has been going on at Kiu-Kiang, where the insurgent forces number nine thousand.

The blowing up of a fort and other anti-government acts, indicate that the "Young China" party is determined to force the issue.

The house of representatives today passed the first reading of bills impeaching the minister of war, Yuan Chai-Jui, who is the acting premier, and the ministers of finance and the navy, Chow Hsueh-Hai and Liu-Kai-Kang respectively.

PRESIDENT WILSON SETTLES BIG STRIKE

Cloud Burst Sweeps Over Central Ohio

NINE FEET IN NIGHT

Great Damage by Washouts and Landslides—Connection Between Columbus and the East Cut Off.

MUSKINGUM ROSE

Washington, July 14.—Representatives of the 8,000 conductors and trainmen of eastern railroads, who have voted to strike for higher wages, and agreed at the White House today to submit their differences to arbitration under the provisions of the Newlands-Clayton Act, which President Wilson and Congressional leaders promise to make law by tomorrow night.

This victory for arbitration over the strike was the result of a two-hour conference at the White House between President Wilson and congressional leaders, both Republicans and Democrats, the presidents and managers of the railroads, and representatives of the brotherhoods of trainmen and conductors.

The agreement not only averted, temporarily at least, the strike which threatened to tie up railroad traffic generally in the east, but smoothed out differences of opinion that had arisen in both houses as to the composition of the board of mediation and provided a permanent commission to deal with railroad disputes.

The pathway was cleared for prompt action in both houses. Senator Kern telephoning from the White House today to announce that he would move to take from the Speaker's table the bill, to which amendments in conformity with the Newlands bill in the senate would be attached.

The President later announced that he would sign a measure such as agreed upon.

The perfected bill will create the United States board of mediation and conciliation, to be composed of a commissioner of mediation and conciliation, appointed by the President with the consent of the senate, with a salary of \$7,500 and a tenure of seven years and not more than two other officials of the government already appointed by the President with the consent of the senate, who shall be designated by him as the two other members of the board.

There also would be an assistant commissioner with a salary of \$5,000 authorized to act in the commissioner's absence. For the settlement of controversies, as they might arise, the measure would provide for boards of arbitration of six or three to be selected with the help of boards of mediation and conciliation wherever necessary. The latter board would pass upon any disagreement among the arbitrators. Awards made by the board would be executed by the federal courts, with which appeals could be filed.

The president said he would name the new commission as quickly as the contending parties had assured him that they would agree to abide by it.

TEN MILLION ACRES SOWN WITH WHEAT

Fifty-seven Thousand More Than For The Year 1912.

CENSUS SHOWS LESS HAY AND CLOVER GROWN

Crop Average for June Very Favorable—Outlook for the Year is Very Encouraging—Live Stock Reports.

Ottawa, July 14.—Reports received from receipts at the end of June enable the census and statistics office to issue finally revised estimates of the acres sown to spring crops this year. The area in spring wheat is 8,990,000 acres, or 13,100 acres more than in 1912, and the area to be harvested of fall wheat remaining at 838,000 acres. Oats are estimated to occupy 9,646,400 acres, an increase of 15,600 acres, from 12,200 acres, a decrease of 910 acres and hay and clover 7,621,600 acres, a decrease of 15,000 acres.

The acreages under the later sown cereals and hood crops are estimated to be as follows:

Buckwheat, 363,600; flaxseed, 1,288,600; corn for husking, 290,800; beans, 38,800; potatoes, 467,800; turnips, etc., 215,900; sugar beets, 12,250; and corn for fodder, 277,990. These are increases in the case of potatoes, turnips, etc., sugar beets and corn for fodder, but decreases in the case of the other crops. For the three north-west provinces of Manitoba, Saskatchewan and Alberta the total wheat area is finally estimated at 9,013,800 acres, as compared with 8,961,800 acres last year, that of barley at 357,700 acres, compared with 491,900 acres and that of oats at 5,305,200 acres, compared with 4,912,900 acres and that of hay at 357,700 acres, compared with 809,900 acres—these differences representing increases of 52,000 acres for wheat, 331,900 acres for oats.

Representatives of 8,000 Railway Men Meet Him in Conference.

COMMISSION TO DEAL WITH FUTURE DISPUTES

Board of Mediation and Conciliation to be Established to Regulate Industrial Questions—President Will Name Commission at Once.

Washington, July 14.—Representatives of the 8,000 conductors and trainmen of eastern railroads, who have voted to strike for higher wages, and agreed at the White House today to submit their differences to arbitration under the provisions of the Newlands-Clayton Act, which President Wilson and Congressional leaders promise to make law by tomorrow night.

This victory for arbitration over the strike was the result of a two-hour conference at the White House between President Wilson and congressional leaders, both Republicans and Democrats, the presidents and managers of the railroads, and representatives of the brotherhoods of trainmen and conductors.

The agreement not only averted, temporarily at least, the strike which threatened to tie up railroad traffic generally in the east, but smoothed out differences of opinion that had arisen in both houses as to the composition of the board of mediation and provided a permanent commission to deal with railroad disputes.

The pathway was cleared for prompt action in both houses. Senator Kern telephoning from the White House today to announce that he would move to take from the Speaker's table the bill, to which amendments in conformity with the Newlands bill in the senate would be attached.

The President later announced that he would sign a measure such as agreed upon.

The perfected bill will create the United States board of mediation and conciliation, to be composed of a commissioner of mediation and conciliation, appointed by the President with the consent of the senate, with a salary of \$7,500 and a tenure of seven years and not more than two other officials of the government already appointed by the President with the consent of the senate, who shall be designated by him as the two other members of the board.

There also would be an assistant commissioner with a salary of \$5,000 authorized to act in the commissioner's absence. For the settlement of controversies, as they might arise, the measure would provide for boards of arbitration of six or three to be selected with the help of boards of mediation and conciliation wherever necessary. The latter board would pass upon any disagreement among the arbitrators. Awards made by the board would be executed by the federal courts, with which appeals could be filed.

The president said he would name the new commission as quickly as the contending parties had assured him that they would agree to abide by it.

FOUND ALL KINDS OF GARBAGE IN A WELL

Body of Calf, Old Clothes and Other Articles Discovered When Man Was Poisoned After Drinking Water.

Woodstock, Ont., July 14.—A serious case of well poisoning was reported here today. A man, who had been drinking water from a well, was found to be poisoned. The well was found to contain a body of a calf, old clothes and other articles.

Provincial Detective Miller and others are working on the case.

UNION OFFICIAL DEAD

Cedar Rapids, Iowa, July 14.—W. J. Maxwell, grand secretary and treasurer of the Order of Railway Conductors, died at his home here today after an illness of several weeks. He was 54 years old, and had occupied his position with the conductors' order for fifteen years.

GREAT RAILWAY STRIKE NOW SEEMS INEVITABLE

ELISHA LEE

Making a general railroad strike seem inevitable within a short time, the representatives of the forty-two railroads east of Chicago broke off all further negotiations with the representatives of the conductors and trainmen. The latter sent out a call for the general committee of the Eastern railroads to meet Saturday to vote on the date of the strike to begin. The vote by all the men involved, which was announced, showed that 76,683 had voted for a strike and only 4,210 against a strike.

When Elisha Lee, chairman of the Managers' Committee, refused to consider uniform increases of wages the 150 representatives of the conductors and trainmen's locals withdrew to prepare for a strike.

Rescue in port, lumber laden, bound south, St. John.

MANOEUVRE AREA DECIDED UPON FOR PRINCE EDWARD ISLAND

GEORGE P. BAER

Minister of Militia will Keep Promise to Provide Place for Troops to Train Within Province. Negotiations are on foot for an area in Nova Scotia. It is regarded as probable that the new drill hall at Sydney will be located at Victoria Park.

MANY ENJOYED THE OPEN AIR CONCERT

A very large crowd of people on the King Square last evening heard the City Cornet Band discourse a programme of music. The programme was as follows:

March, "Triumphal," Morgan. Overture, "Lustspiel," Keler Bela. Grand Contest Fantasia, "The Champion," Dr. Hartman.

Waltz, "Edinboro," (Scottish airs). American Fantasia, "Darkies." Dreamland, "Birdood." Highland Patrol, "Wee McGregor," Somers.

God Save the King.

HON. MR. HAZEN'S TRIBUTE TO LATE SENATOR ELLIS

Ottawa, July 12.—Hon. J. D. Hazen, the Minister of Marine and Fisheries, pays a willing tribute to the memory of the late Senator Ellis, as follows:

"The news of Senator Ellis' death will be heard with deep regret throughout the Dominion and more particularly in the city and province in which the greater part of his life has been spent. In many respects he was St. John's leading citizen, and was always ready to render public service and to assist and encourage any worthy cause. As a member of the House of Assembly of New Brunswick and of the Parliament of Canada he was most painstaking and industrious and left the impress of his mind upon the enactments of these bodies, for no member took a keener or more intelligent interest in perfecting legislation that came before them. As a member of the Senate he easily occupied a foremost place in the esteem of the country and of his fellow members, by whom his mature judgment, his wide and varied experience, his independence of thought and his great abilities were highly and deservedly appreciated. As a Senator he never allowed party considerations to interfere with his conscientious discharge of his duty, and in this respect he was a striking exception in a body which is in theory independent of all party considerations, but in fact is often a mere arena for party strife. He was a staunch upholder of the Liberal party and rendered it an actual service in St. John and New Brunswick than any other man of his generation. He founded and created the St. John Globe and made it a journalistic power in New Brunswick. Personally, I was associated with him in connection with the work of the University of New Brunswick, and in other ways, and always found him a delightful and interesting companion and sincerely desirous of promoting the public welfare. His death will be deeply deplored, and of him it may be truly said that he was faithful in all things and a large hearted and large minded Christian gentleman."

SEASICKNESS TRANSSICKNESS Prevented—Stopped

MOTHERSILL'S, after thorough and practical trial of the Great Lakes and the St. Lawrence, is now offering a running south, and many Transatlantic lines.

Four years ago Mr. Mothersill gave a personal product, 60 cents per bottle, on the English Channel, Irish Sea, and in the North Atlantic. It is a most effective remedy for seasickness, and is now being used by Lord Northcliffe, Lord Bessborough, Lord Northcliffe, and other prominent men. MANOEUVRE AREA DECIDED UPON FOR PRINCE EDWARD ISLAND

Minister of Militia will Keep Promise to Provide Place for Troops to Train Within Province. Negotiations are on foot for an area in Nova Scotia. It is regarded as probable that the new drill hall at Sydney will be located at Victoria Park.

MANY ENJOYED THE OPEN AIR CONCERT

A very large crowd of people on the King Square last evening heard the City Cornet Band discourse a programme of music. The programme was as follows:

March, "Triumphal," Morgan. Overture, "Lustspiel," Keler Bela. Grand Contest Fantasia, "The Champion," Dr. Hartman.

Waltz, "Edinboro," (Scottish airs). American Fantasia, "Darkies." Dreamland, "Birdood." Highland Patrol, "Wee McGregor," Somers.

God Save the King.

HON. MR. HAZEN'S TRIBUTE TO LATE SENATOR ELLIS

Ottawa, July 12.—Hon. J. D. Hazen, the Minister of Marine and Fisheries, pays a willing tribute to the memory of the late Senator Ellis, as follows:

"The news of Senator Ellis' death will be heard with deep regret throughout the Dominion and more particularly in the city and province in which the greater part of his life has been spent. In many respects he was St. John's leading citizen, and was always ready to render public service and to assist and encourage any worthy cause. As a member of the House of Assembly of New Brunswick and of the Parliament of Canada he was most painstaking and industrious and left the impress of his mind upon the enactments of these bodies, for no member took a keener or more intelligent interest in perfecting legislation that came before them. As a member of the Senate he easily occupied a foremost place in the esteem of the country and of his fellow members, by whom his mature judgment, his wide and varied experience, his independence of thought and his great abilities were highly and deservedly appreciated. As a Senator he never allowed party considerations to interfere with his conscientious discharge of his duty, and in this respect he was a striking exception in a body which is in theory independent of all party considerations, but in fact is often a mere arena for party strife. He was a staunch upholder of the Liberal party and rendered it an actual service in St. John and New Brunswick than any other man of his generation. He founded and created the St. John Globe and made it a journalistic power in New Brunswick. Personally, I was associated with him in connection with the work of the University of New Brunswick, and in other ways, and always found him a delightful and interesting companion and sincerely desirous of promoting the public welfare. His death will be deeply deplored, and of him it may be truly said that he was faithful in all things and a large hearted and large minded Christian gentleman."

LAURIER'S NAVAL RECORD.

For some time past Liberal speakers have been telling Canadians about the Australian Navy. In part they declare that Canada should do likewise; in part they insinuate that the Laurier Government followed the same policy as Australia. The idea that the Laurier Government did anything to be compared with the performances of Australia needs only a moment's examination to be dissipated into thin air.

In 1909, at the Defence Conference, the British Admiralty came to the Ministers of the several Dominions with a definite plan for the establishment of an Imperial Pacific Fleet. It was to consist of four battle-cruisers, a dozen cruisers, and a torpedo fleet. To the Canadian Ministers in particular they said in effect: "Put all your force upon the Pacific Ocean. We are quite able to look after your Atlantic shores, but we are uneasy about your British Columbia coast. Go in with Australia, New Zealand and with us in starting this Imperial Pacific Fleet." Their plan was that Canada and Australia should each provide one fleet unit, that Great Britain and New Zealand should join in providing a third fleet unit, New Zealand paying for the battle-cruisers, and that Great Britain should provide a fourth fleet unit. Each fleet unit was to comprise one battle-cruiser, three light cruisers, six destroyers, and three submarines. United they would furnish a formidable squadron of four Dreadnoughts, supported by twelve cruisers suitable for scouting and commerce protection, and a torpedo fleet of 24 destroyers and twelve submarines.

Australia and New Zealand accepted this proposition. Canada refused it. Instead, Canada proposed to provide no Dreadnoughts at all, though the Dreadnought was the essential part of the fleet unit, and only four light cruisers, with some destroyers. Two cruisers only were to be on the Pacific Coast. Thus at the outset the Laurier Government failed to keep pace with the Australians and New Zealanders accepted the Admiralty's proposal they ordered the ships. The Australians ordered their destroyers in the autumn of 1909; their battle-cruiser, the "Australia," was begun in June, 1910; the light cruiser, "Sydney," was begun in February 1911, and the light cruiser, "Melbourne," in April, 1911. The Australian Naval Act was passed in November, 1910, and in the ensuing month two destroyers were actually in their harbors. That is, the Australians did not wait to pass the act before ordering the ships, and part of their fleet unit was sailing from England, where it was built, before the act was assented to.

The Laurier Government did nothing in the way of preparation, beyond engaging some naval officers, buying two training ships, etc. Until the act was passed, early in 1910; they then took a full year to screw up their minds to the point of calling for tenders for the four cruisers and six destroyers. The hammers were ringing on two Australian light cruisers, and the battle cruiser "Australia" was nearly ready to launch, when the tenders for the very first ships lay on Mr. Broder's desk. Though the tenders were available by May 1, 1911, and the Government did not decide to dissolve until the end of July, the tenders were not let. Mr. Pugsley has recently explained that this was because they were afraid of Quebec.

One excuse put forward for not awarding the tenders is that Sir Wilfrid Laurier had to attend the Imperial Conference of 1911. It need only be observed that the Australians did not allow such considerations to hold their hands. They ordered ships in 1909, 1910 and 1911 whether their Ministers were in or out of Australia. Neither should it be forgotten that the Laurier Government recruited 349 young men for the Navy. In a slightly longer time the Australians with a smaller population recruited 1,400 men.

So much for the impudent suggestion that the Laurier Government while in power did anything approaching what the Australians did. They refused to go into the big programme that the Australians undertook and with their poor, little, half-hearted programme they dilly-dallied. The Australians ordered ships in October, 1909, and the Laurier Government went out of office two years later without one ship ordered.

A BOY SCOUTS' EXHIBITION.

An exhibition of Boy Scouts' industries in which all the products were made by boys and the whole administration was in the hands of boys, was held early this month at Birmingham in England. Nothing so elaborate had been attempted before in the history of the movement and it was noteworthy as showing the extent to which this great organization has been encouraged and developed in the Old Country. Prince and Princess Alice, under the patronage of the exhibition,

which was opened by the Princess. It is almost unnecessary to add that Lieut. General Sir Robert Baden-Powell, the chief scout, and his wife, were among those present. In the arena all kinds of gymnastic displays, exhibitions of strength, boxing and jumping were given which demonstrated the advantages of physical culture. A section of the exhibition was devoted to aerial interests in which models of aeroplanes were made and model pontoons and bridges were constructed. Among the industries in which Boy Scouts were engaged and gave demonstrations of their excellent training were basket work, blacksmith's work, cooking, bee-keeping, carpentering, cycling, dairy-work, electrical and other engineering, farmer's work, poultry-keeping, and plumbing. During the exhibition about 6,000 boys were under canvas and some 30,000 attended and took part in the review. A daily newspaper was published by the Scouts in which there was a comprehensive record of the doings of all the Boy Scouts in Birmingham.

The impression has been created, by those who have not given the subject much thought, that the Boy Scout movement has a military tendency. This view is entirely erroneous and it is instructive to quote some remarks by the Chief Scout, made at the exhibition on this question. "The whole aim of the movement," he said, "is to make good citizens, and one misconception which this exhibition is particularly designed to remove is that it is a military organization. It has nothing more to do with soldiering than with any other form of activity in life. Its aims are divided under four heads—first, character; second, handicraft; third, public service; and fourth, physical, development and health." As to character, the boys are taught backwoodsmanhood, because of the resourcefulness, the self-reliance, the sense of duty, which the backwoodsman is bound to develop, and which are harder to find in town populations. With regard to handicraft, the training appeals as much to the slum boy as to the better-class boy. In reference to public service and the duty of helping others, Sir R. Baden-Powell mentioned that, although every case of lifesaving reported to headquarters is carefully inquired into, some 700 boys have already been decorated for gallantry, and the average number of recommendations for lifesaving, or assisting in saving life, is about one a day. "The Scout system of educating," he added, "is not to 'thumb' knowledge into a boy, but to help him to get it for himself."

The practical side of the movement is shown by the demand for Boy Scouts among employers in the Old Country. There are now over 25,000 in London, and no difficulty is experienced in finding them good situations. The association also has a farm in the country at which the boys are doing exceedingly well. The Sea Scouts, it is predicted, are going to be a valuable asset in getting men for the navy and mercantile marine. There are now something like 180,000 Boy Scouts in Great Britain. The Boy Scout movement owes its origin to the genius of Sir Robert Baden-Powell who, for the benefit of the boyhood of England, founded this voluntary organization to discipline their lives and elevate their character. Scarcely had he set the movement on foot before it was taken up with enthusiasm all over the United Kingdom; while with very brief delay other countries followed England's lead. In Canada there are about 30,000 Boy Scouts and there is now scarcely a country in the world which has not a more or less flourishing organization. The Scout's code of duty teaches him to help his neighbor, not to hate his enemy, actual or potential. The movement is therefore in the best sense international as well as national. It appeals to the finer instincts of boy nature all the world over.

CURRENT COMMENT

A Bank's Activities. (Montreal Gazette). That a bank should confine its activities to banking seems hardly one of the lessons of the failure in Pittsburgh of the First-Second National, swayed by men in control of its affairs who followed England's lead. In Canada there are about 30,000 Boy Scouts and there is now scarcely a country in the world which has not a more or less flourishing organization. The Scout's code of duty teaches him to help his neighbor, not to hate his enemy, actual or potential. The movement is therefore in the best sense international as well as national. It appeals to the finer instincts of boy nature all the world over.

DIARY OF EVENTS

HISTORIC DAYS IN CANADA

MANITOBA, A PROVINCE.

Manitoba was duly constituted a province of Canada by royal and parliamentary enactment forty-three years ago today. Adams G. Archibald, afterward knighted, was named as the first lieutenant-governor. The Northwest had been acquired from the Hudson's Bay Company by the Dominion in 1870. Following this arrangement and before the actual transfer of the country, there was a period of trouble. Real head-on, rebellion of half-breeds, and early in 1870 set up a provisional government. The diplomacy of Donald A. Smith, the future Lord Strathcona, and the military of Col. Voleisey, afterward Viscount Voleisey, to Fort Garry, put an end to the uprising. In the following September the first ministry of the Province was organized, with the Hon. M. A. Girard as premier.

TRINITY UNIVERSITY.

Trinity University, Toronto, was founded under the provisions of a royal charter dated sixty-one years ago today. The Rev. Bishop Strachan was the leader in the movement for the establishment in Canada of a great Anglican institution of learning. From its inception Trinity received many generous benefactions.

A RAILROAD WRECK.

St. Thomas, Ont., was the scene of a terrible railroad wreck twenty-six years ago today. A freight train ran into an excursion train and the latter, which was crowded with passengers, caught fire. Nineteen people were killed, most of them being burned to death, while forty others were seriously injured.

FIRST THINGS

FIRST AUCTION SALE.

The first auction sale in England was held 213 years ago today by Elisha Tale, who had been governor of Madras, and who adopted that plan for selling the East Indian wares he had brought home. The sale attracted wide attention, and so successful that others immediately adopted the plan. Before the close of the eighteenth century English began to place a value on auction sales, and in these times duties have ranged as high as five per cent. In 1846 the tax was repealed, but a charge was imposed on the license to be taken out by all auctioneers.

The abuses at auctions, caused by combinations of bidders to bid up the offerings, led to the adoption of stringent regulations. In the United States the practice of a certain class have adopted the license to be taken out by all auctioneers. The abuses at auctions, caused by combinations of bidders to bid up the offerings, led to the adoption of stringent regulations. In the United States the practice of a certain class have adopted the license to be taken out by all auctioneers.

THE HUMAN PROCESSION

FRANKLIN KNIGHT LANE.

Washington statesmen "view with alarm" the rising flood of emigration to Canada, but they should be reminded that the movement is only reciprocity. Once the tide flowed from British America to the States, it bore with it James J. Hill, E. V. Rieu, and many other notable names. The least of which is Franklin Knight Lane, now Secretary of the Interior and honorary chief of the Black-foot Indians.

LORD NORTHCLEIFFE.

Starting his newspaper career with the "Northcliffe" and no "pull," Lord Northcliffe will celebrate his forty-fifth birthday today as chief proprietor of the London Mail, which has a daily circulation of nearly 600,000, the largest in the English-speaking world; the London Times, the greatest tradition in British journalism; the "Mirror," which prints 750,000 copies daily; the Evening News, with a circulation of half a million; the weekly Dispatch, Answers, Comic Cuts, and other newspapers and periodicals.

Altogether the presses of Lord Northcliffe turn out eight million papers a week, and the Amalgamated Press, which is the corporate title of his publishing company, paid profits last year of \$1,816,415. Alfred Williams Harnsworth, now Lord Northcliffe, first Baron of Isle of Thanet, was born in Dublin, the son of a comparatively poor barrister, and in many respects his rise to wealth and power has been the most remarkable in the history of journalism.

DR. BENJAMIN WHEELER.

Dr. Benjamin Ide Wheeler, president of the University of California, and author of "The Greek Nouns," is author of a brilliant work for light summer reading, begins his 60th year today. He was born at Randolph, Mass., and educated at Brown University and Harvard. Dr. Wheeler recently visited Germany and paid a friendly call on Emperor William.

OPHELIA'S SLATE

IN LIGHTER VEIN

The Eternal Question.

A teacher was trying to explain the dangers of overwork to one of the smaller pupils. "Now, Tommy," she pursued, "if your father were busy all day and said he would have to go back to the office at night, what would he be doing?" "That's what ma wants to know."

A Keen Stab.

This is the fashion in which the Toronto Mail and Empire jabs holes in the atmosphere of municipal headquarters. "An insane man was found wandering about the city hall. It is remarkable that anything peculiar was noted about his behavior."—Cleveland Plain Dealer.

Hers.

"Every woman should have a hobby," asserted the Blue-stocking. "I agree with you," said the Bride. "What's your hobby?" questioned the Blue-stocking. "My hubby," answered the Bride.—Judge.

She Objected.

Customer (complaining to ice company manager)—"Your teamster does not give full measure." Madam—"If he doesn't, madam, he is at fault." Customer—"Well, he mustn't say the fault is on my door."

Family Pride.

Prisoner (to jailer)—"Put me in cell 38." "What for?" "It's the one father used to have."

Good Sense.

Willie—Pa, when has a man horse sense? Pa—When he can say "Nay" my son.

The Best Quality at a Reasonable Price

Engagement Rings.

Every girl wants a solitaire diamond engagement ring. She may tell you she doesn't, but her objection will be purely for economical reasons. Did you ever see a girl who owned a diamond engagement ring and wasn't extremely proud of it? Since time immemorial the diamond has been the one precious stone used for engagement rings.

We have an excellent assortment of Diamond Rings for you to select from. The stones are all of the finer grades and the prices most reasonable. Come in and see them.

Will Grow in East.

"In many cases in the East where alfalfa has never been tried the opinion prevails that alfalfa is purely a Western crop—this is being dispelled daily in many of the Eastern sections of the United States and Canada where alfalfa is proving a marked success under proper study and supervision. Then again a few of those who have tried it may tell you, 'Yes! I have tried it, but failed.' Well, never, when this happens you may depend upon it there is a reason for doing so, for alfalfa being a crop that grows on all soils, from the pure sand in Florida to the stiff clays in the North—it does best on deep, fertile, well-drained soil rich in lime, and reasonably free from weeds—the lack of any of these essentials may cause failure. Alfalfa will succeed in wet soil on weedy land and does not do well on acid soil. Acidity may be determined by spreading a moist ball of earth taken from the field and placing in it a slip of litmus paper (which any druggist can supply) if the paper turns red or pink the soil must have lime.

An Essential Start.

"Inoculation is most important in the starting of alfalfa. Our alfalfa seed is inoculated with a sufficient number of virulent, non-toxic, nitrogen-fixing bacteria, peculiar to the alfalfa plant, and it is therefore essential to inoculate alfalfa seed which has never grown alfalfa or sweet clover, with the soil secured from old alfalfa or sweet clover pasture, if such is not available, inoculant may be applied in the form of a special culture, such as nitrogen, bacteria, etc."

"It has been proven beyond doubt in localities where at least average crop can be secured, when all three methods are employed in the culture of alfalfa, namely, manure, lime and bacterial inoculation of the seed, that the alfalfa are bound to follow, providing a that clean, hardy acclimated strain of seed are sown (Mild climatic seed will germinate in a more severe climate but do not stand the necessity after tests). Climatisation of seed is a pronounced necessity.

Take Care in Buying.

"It is a deplorable fact that many commercial alfalfa seed in a great many instances is nothing less than a lottery, and as above mentioned seed that will produce and endure in more southern climates, is valuable to winterkill in our climate. Account of the thawing and freezing during our winters, whereas, strictly northern grown seed, raised in western Canada, Montana, Northern Turkey, and other northwestern sections is not liable to winterkill to a notable extent. At the present time serious fraud is being perpetrated in the sale of alfalfa seed, namely the substituting of inferior seed, especially Turkish alfalfa and posing of same to the farmer as an American grown seed, also some grown seed labelled as northern produced and southern grown seed may be purchased at very low prices in comparison with the true northern grown alfalfa. Seed from northern Turkey has proven very hardy and acceptable, however, as Turkey seed, as a general rule, produces a very poor crop. Seed from northern grown American seed has been found to be hardy and acceptable. It is difficult for the farmer

EXERCISE ADVISES FOR NEWBORN

Harold G. Sears, Crop Expert Tells Advantages of Fodder and Hay Plants

Harold G. Sears, of Postmaster Edward Sears, is visiting here after an absence of twelve years. Mr. Sears has been actively engaged during that time as crop expert and buyer of agricultural seeds for large seed interests throughout the producing sections of the West, and in that capacity has made a thorough study of agricultural products and especially the culture of alfalfa—very truly called the "Queen of Crops" throughout the West.

In an interview with Mr. Sears yesterday he impressed the fact that alfalfa—the premier legume—is the most valuable, as well as the most profitable forage and hay plant that the world has yet produced, for it will furnish more green fodder, more pasture, and more dry hay matter per acre than any other forage, and pound for pound it will equal or exceed, when bran in producing pork, milk, mutton and beef, and many dairymen of repute have proved conclusively that alfalfa is fully 20 per cent. more nutritious than any other hay, and increases the flow of milk accordingly.

Alfalfa on Every Farm.

"In order to have a prosperous city the adjacent country districts must be productive and prosperous, and if the farmers of New Brunswick can be interested in the culture of alfalfa through the spreading of the tidings of 'alfalfa on every farm,' which is now the slogan of the International Harvester Co. of America, through their extension department, Chicago, Ill., who are spending thousands of dollars this year through the middle and Eastern States, sending out literature and alfalfa experts into the various large and small farming communities—free of charge, to help the farmer how to prepare his seed bed, the proper time for seeding, irrigation, and many other important factors which are necessary for the farmer to know. For in the successful culture of this 'Wonder crop of the World,' the key to the solution of cheap and valuable feed, and more valuable and prosperous farms will be found.

"The Breeder's Gazette, of Chicago, Ill., which is recognized as an authority, classes any land that will produce alfalfa as worth not less than one hundred dollars per acre, and alfalfa is the average crop and a reasonable location should qualify such statements as conservative.

Will Grow in East.

"In many cases in the East where alfalfa has never been tried the opinion prevails that alfalfa is purely a Western crop—this is being dispelled daily in many of the Eastern sections of the United States and Canada where alfalfa is proving a marked success under proper study and supervision. Then again a few of those who have tried it may tell you, 'Yes! I have tried it, but failed.' An Essential Start.

"Inoculation is most important in the starting of alfalfa. Our alfalfa seed is inoculated with a sufficient number of virulent, non-toxic, nitrogen-fixing bacteria, peculiar to the alfalfa plant, and it is therefore essential to inoculate alfalfa seed which has never grown alfalfa or sweet clover, with the soil secured from old alfalfa or sweet clover pasture, if such is not available, inoculant may be applied in the form of a special culture, such as nitrogen, bacteria, etc."

"It has been proven beyond doubt in localities where at least average crop can be secured, when all three methods are employed in the culture of alfalfa, namely, manure, lime and bacterial inoculation of the seed, that the alfalfa are bound to follow, providing a that clean, hardy acclimated strain of seed are sown (Mild climatic seed will germinate in a more severe climate but do not stand the necessity after tests). Climatisation of seed is a pronounced necessity.

Take Care in Buying.

"It is a deplorable fact that many commercial alfalfa seed in a great many instances is nothing less than a lottery, and as above mentioned seed that will produce and endure in more southern climates, is valuable to winterkill in our climate. Account of the thawing and freezing during our winters, whereas, strictly northern grown seed, raised in western Canada, Montana, Northern Turkey, and other northwestern sections is not liable to winterkill to a notable extent. At the present time serious fraud is being perpetrated in the sale of alfalfa seed, namely the substituting of inferior seed, especially Turkish alfalfa and posing of same to the farmer as an American grown seed, also some grown seed labelled as northern produced and southern grown seed may be purchased at very low prices in comparison with the true northern grown alfalfa. Seed from northern Turkey has proven very hardy and acceptable, however, as Turkey seed, as a general rule, produces a very poor crop. Seed from northern grown American seed has been found to be hardy and acceptable. It is difficult for the farmer

EXPERT ADVISES DEALER FOR NEW BRUNSWICK FARMERS

Harold G. Sears, Crop Expert, Son of Postmaster Sears, Tells of Advantages of Alfalfa as Most Profitable Fodder and Hay Plant.

Harold G. Sears, son of Postmaster Edward Sears, is visiting here after an absence of twelve years. Mr. Sears has been actively engaged during that time as crop expert and buyer of agricultural seeds for large seed interests throughout the producing sections of the West, and in that capacity has made a thorough study of agricultural products and especially the culture of alfalfa—very truly called the "Queen of Crops" throughout the West.

In an interview with Mr. Sears yesterday he impressed the fact that alfalfa—the premier legume—is the most valuable, as well as the most profitable fodder and hay plant that the world has yet produced, for it will furnish more green fodder, more pasture, and more dry hay matter per acre than any other fodder, and pound for pound it will equal or exceed, wheat bran in producing pork, milk, mutton and beef, and many dairymen of repute have proved conclusively that alfalfa is fully 40 per cent. more nutritious than any other hay, and increases the flow of milk accordingly.

Alfalfa on Every Farm.

"In order to have a prosperous city the adjacent country districts must be productive and prosperous, and if the farmers of New Brunswick can be interested in the culture of alfalfa through the spreading of the tidings of 'alfalfa on every farm,' which is now the slogan of the International Harvester Co. of America, through their extension department, Chicago, Ill., who are spending thousands of dollars this year through the middle and Eastern States, sending out literature and alfalfa experts into the various large and small farming communities—free of charge—instructing the farmer how to prepare his soil, the proper time for seeding, irrigation, and many other important factors which are necessary for the farmer to know. For in the successful culture of this 'Wonder crop of the World,' the key to the solution of cheap and valuable feed, and more valuable and prosperous farms will be found.

"The Breeder's Gazette, of Chicago, Ill., which is recognized as an authority, classes alfalfa as worth not less than one hundred dollars per acre, and undoubtedly an average crop and a reasonable location should qualify such statement as conservative.

Will Grow in East.

"In many cases in the East where alfalfa has never been tried the opinion prevails that alfalfa is purely a Western crop, and is being distributed daily in many of the Eastern sections of the United States and Canada, where alfalfa is proving a marked success under proper study and supervision. Then again a few of those who have tried it may tell you, 'Yes, we have tried it, but it killed out, however, when this happens you may depend upon it there is a reason for it doing so, for alfalfa is being successfully grown on all soils, from almost pure sand in Florida to the stiffest clays in the North—it does best on deep, fertile, well drained soil rich in lime, and reasonably free from weeds—the lack of any of these essentials may cause failure. Alfalfa will not succeed in wet soil, or on weedy land, and does not do well on acid soil. Acidity may be determined by splitting a moist ball of earth taken from the field and dropping it in a slip of litmus paper (which any druggist can supply) if the paper turns red or pink the soil must have lime.

An Essential Start.

"Inoculation is most important and essential in the starting of alfalfa on our soils, due to the abundance in the soil of a sufficient number of virulent nodule-forming bacteria, peculiar to the alfalfa plant, and it is therefore essential to inoculate a field which has never grown alfalfa or sweet clover, with the seed secured from an alfalfa or sweet clover seed dealer, if such is not available, inoculation may be applied in the form of artificial cultures, such as nitrogen, farm-organisms, etc.

"It has been proven beyond all doubt in localities where at least an average crop can be secured, that when all three methods are employed in the culture of alfalfa, namely, manure, lime and bacterial inoculation, the soil, that is necessary for the alfalfa to follow, providing also that clean, hardy climatic strains of seed are sown (Mild climatic seeds will germinate in a more severe climate but do not stand the necessary after tests). Climaticization of seeds is a pronounced necessity.

Take Care in Buying.

"It is a deplorable fact that buying commercial alfalfa seed in a great many instances is nothing less than a lottery, and as above mentioned seed that will produce and endure well in more southerly climates, is very liable to winterkill in our climate on account of the thawing and freezing during our winters, whereas, strictly northern grown seed, raised in western Canada, Montana, Northern Turkistan, and other northwestern sections is not liable to winterkill to a noticeable extent. At the present time a serious fraud is being perpetrated in the sale of alfalfa seed, namely, the substituting of inferior seed, especially Turkish alfalfa, and disposing of same to the farmer as American grown seed, also southerly grown seed, labeled as northern grown. Imported and southerly grown seed may be purchased at very low prices in comparison with our native northern grown strains. Seed from northern Turkistan has proven very hardy, and acceptable, however, as Turkish alfalfa seed, as a general rule, produces an experiment station records about one thousand pounds less forage per acre than the American alfalfa, even at the lower cost the farmer can hardly afford to invest in same when hardy, northern grown American seed can be had.

Those Sweet Girls.

"So you are engaged to Tom."

"My dear, I congratulate you. Tom is the nicest fella I ever had."

What N. B. Requires.

"It is difficult for the farmer and

small seed jobber to distinguish by the appearance of alfalfa seed where it is grown, thus the unscrupulous dealer is today reaping a harvest by buying and selling inferior and southern grown seed under the label American, Montana, Grimm, or northern grown seed, and this phase of the subject, in one which our agricultural and federal authorities should be deeply interested in, for the production of the hardy northern grown strains of seed are essential for successful alfalfa growing in New Brunswick.

We have come to the partings of the ways. We have reached a critical point in the history of our agricultural development. If we evade keeping going forward it will be necessary for us to secure larger yields from the fields now under cultivation. That is to say, our great problem is not so much how to increase the population in our rural communities as it is to increase the producing capacity of the farms, and to make it possible for the people of New Brunswick to raise, clothe and feed future generations. We must change our system of agriculture and help to make two blades of grass grow where only one grew before. Alfalfa possesses inherent soil-making qualities, its capacity for extracting nitrogen from the air assists in building plant tissue, and as a foundation for crop rotation, it has merit equal to clover. It is a great fertilizer. Mr. Valentine, a prominent and successful farmer of Waukesha, Wis., informed me that he had raised corn on alfalfa land (which he rotated) that yielded 120 bushels per acre whereas the corn he grew on his ordinary land yielded only 60 bushels, crop 1912.

Urges Alfalfa Clubs.

"I would urge that each farming community throughout this province, form an alfalfa club securing all of the available information regarding the culture of alfalfa, and in reference to this, speaking from my own experience, the proper information may be readily obtained upon request from the Agricultural Experimental Stations of Wisconsin, Minnesota, Michigan, Utah and Montana. The Department of Agriculture Bureau of Plant Industry, Washington, D. C., the International Harvester Co., Chicago, Ill., and the Department of Agriculture, Ottawa, and as well, from the Provincial Board of Agriculture of New Brunswick. I would also draw your attention to the publications on alfalfa that have been recently distributed and are very practical. Bulletin 185, by Prof. C. J. Brand and L. R. Wallon, of the U. S. Dept. of Agriculture, and 'Extension Bulletin on the Alfalfa Facts,' published by the Albert Dickinson Co., Chicago, Ill., also a book entitled, 'Alfalfa,' published by the C. and N. W. Railway, Chicago, Ill.

"When this industry is thoroughly established it will not be long before the farmers will be surprised at the results obtained, and wonder why alfalfa has not been raised on every farm in New Brunswick long ago."

CLEWS FOUND IN \$300,000 GEM ROBBERIES.

Clews have been found to the \$300,000 gem robberies in Newport last year. Obtaining possession of a gold mesh bag, valued at \$700, Raymond Burns, who has charge of the New York office of the William J. Burns Detective Agency, announced that all of the articles of jewelry, worth \$50,000, stolen from the residence of Harry L. Haas, at Long Branch, N. J., last Wednesday, had been recovered.

It was through a Miss Wells' quick ears, which caught the clews in conversation between two men, that caused their arrest in the \$300,000 case. Reginald Rhind, one of the prisoners, was deserted by his bride on account of the Japanese woman whose picture here appears.

James McIntyre, who is concerned with several large jewel robberies in Newport last year, has said he was implicated in the total loss in robberies at Newport amounting to about \$300,000. McIntyre has said, as participated in several of these, and while we obtain all of the information which he has to give us we expect important developments.

CAN'T GET CAPABLE MEN FOR THE FARMS

Manitoba Wheat Growers Appeal to British Columbia for Aid in Harvest—Idle Men in Cities.

Winnipeg, July 14.—British Columbia is being requested to send men east to help in the Manitoba harvest operation this year and a formal application to this end has been made upon the British Columbia government by the Manitoba department of agriculture and immigration. There is a prospect of a shortage of farm hands at the present time, and hundreds of workers from farmers have been recruited within the last couple of weeks, and it is not because there are no idle men in the city, but because men capable of doing farm work are not to be had.

CITY PAYS TRIBUTE TO SENATOR ELLIS

Mayor Makes Feeling Reference to City's Loss in Mr. Ellis' Death—Commissioners by Vote Concur.

At the meeting of the city council yesterday, Mayor Frink paid a tribute to the memory of Senator Ellis, and the other commissioners endorsed his sentiments by a standing vote of concurrence.

Senator Ellis had long occupied a prominent place in the life of the City of St. John, said Mayor Frink. The press of the city and province have made feeling and suitable reference to his life and work. As an editor his powers of mind made him a man of great influence, and in no place more so than in the affairs of the City of St. John. In all matters of vital importance, his views were eagerly sought and greatly respected, and even while there might be differences of opinion, he was always recognized as the objective was the interest of all the people.

His attitude towards the expenditure of large sums of money in the city was always conservative. In this he was, no doubt, influenced by the experience of the great fire of 1871, and his other characteristics which made him cautious and induced him to advise care in the making of unusual expenditures.

It is, perhaps, in some measure, due to his influence that the City of St. John occupies the unique position financially it does today, in comparison with other cities its debt is small, and that is a source of satisfaction.

In the death of Senator Ellis, St. John has lost a very valuable citizen, a man who has been of much assistance in shaping the affairs of the corporation."

OLD SOLDIER KILLED BY A HORSE'S KICK

Major Cockburn Won V. C. in South African War Only to Meet Death on His Alberta Farm.

Maple Creek, July 14.—Major Churchill Cockburn, V. C., was killed on Saturday afternoon on his farm at Oranburg, Alberta, twenty miles southwest of here, being kicked by the stomach by a horse. It appears that he and his man were haltering a horse and had an extra vicious one which kicked him into the chute. His man went to the barn to get a rope, telling the Major not to go near the horse.

At this instant the tired man's brother rode up and the two went to the barn. The Major must have disregarded the man's instructions and went up behind the horse which kicked with both hind feet, killing him instantly. Major Cockburn was a son of the late R. R. Lockburn, at one time principal of Upper Canada College. The Major won the Victoria Cross for conspicuous bravery in South Africa.

WEATHER IS AGAINST THE WINNIPEG FAIR

Copious Rains Reported all Through Western Country—Hits Winnipeg's Big Expo.

Winnipeg July 14.—After several days' rain or near rain, Manitoba yesterday enjoyed a full day's sunshine and today's conditions are fair, giving the Winnipeg Industrial Exhibition a belated chance to pick up out of the slough in which continuous wet weather has plunged it.

Throughout Saskatchewan and Alberta, copious rains have fallen during the past twenty-four hours, so much so that two inches being recorded at Broadview, over one inch and a quarter at Yorkton and almost one and a half inches at Battleford, Edmonton and district also came in for a fine precipitation.

OBITUARY.

William A. Barnes.

William Andrew Barnes, a well known and highly esteemed resident of the city, died yesterday morning shortly after 11 o'clock, at his residence, 35 Broad street, after an illness of two weeks. The deceased was a son of the late Milton Barnes. He was a printer by trade and was employed with Barnes and Company. Formerly he was superintendent of the Marine Hospital, which was situated at the present site of the Home for Incurables. The deceased is survived by his wife and one daughter, Miss Bertha W. Barnes, and three half-brothers, Gordon H. of Waterville, Mass., James H. of Lahave, N. S., and Ellis B. of Richmond, Kentucky. The deceased, who was an active member of the Coburg Street Christian Church, is survived by a wide circle of friends, who will regret to lose of his death.

Disconsolate Farmer—"We've had dreadful misfortune with our beasts this year. First we had swine fever; then we lost a calf, and now we've been fined for watering the milk."

Muzzled.

"Brown is a man of few words."

"Yes, so is Jones; he's married, too."

COL. HUGHES WINS VICTORY FOR GEN. MITTON AT BANQUET

Old Soldier Tells the Minister of Militia He Served Under Him when in "The Black Watch."

Special to The Standard.

Ottawa, Ont., July 14.—Colonel the Hon. Sam Hughes has come back from his tour with a good story at his own expense.

The Canadian Pacific Railway Company has at all the stations along the line, the honorably discharged British soldiers on duty as station policemen. These were very distinguished looking men and wore their medals, ribbons with great pride. In each case General Sir Ian Hamilton was most particular to address these veterans. As Schreiber, the policeman approached him, saluted, and said: "I had the honor, General Hamilton, of serving under you in South Africa."

The general with his customary kindness of heart greeted his old comrade with some kindly words. "I also served under you, sir," the Colonel sprang up, smiled and said: "Yes, in what corps?" The soldier remarked: "The Black Watch." Whereupon the Colonel said: "No, it must be a mistake, I had not the Black Watch under me. He said: "Oh, yes, I served under you, you are General Hughson, aren't you?"

FUNERALS.

Harry G. Campbell.

From the residence of his parents, 144 Winslow street, Carleton, the funeral of Harry G. Campbell took place yesterday afternoon at 4 o'clock. Burial services were conducted by Rev. H. E. Thomas, after which interment took place in Cedar Hill cemetery.

Feet Tired—So Tired?

TIZ Makes Sick Feet Well No Matter What Ails Them.

Send at Once for Free Trial Package.

TIZ acts at once and makes tired, aching, swollen feet remarkably fresh and sore proof.

It's the sure remedy, you know, for everything that gets the matter with your feet. It's for sore feet and for sweaty, bad-smelling feet, and for corns, calluses and bunions, too.

"For years I have been troubled with sore and tender feet; suffered intense pains. Have had the assistance of physicians without relief. I bought a box of TIZ, which worked a perfect cure, as it has with a great many of my friends. I would not be without it."—A. F. Dreyer, Chicago.

TIZ is not a powder. Powders and other foot remedies clog up the pores. TIZ draws out all poisonous exudations which bring on soreness of the feet, and is the only remedy that does.

You'll never limp again or draw up your face in pain, and you'll forget about your corns, bunions and calluses. There are two kinds of people in the world—those that get what they want and those that get what somebody else wants to give them. Be firm—when you ask for TIZ get it and laugh at the substitute.

TIZ is for sale at all drug stores, department and general stores at 25 cents per box. If you wish, money back if TIZ doesn't do all we say. For a free trial package write today to Walter Luther Dodice & Co., Chicago, Ill.

Police Court News.

In the police court yesterday the case of assault charged against William Morrell by his wife did not come up as the complainant was not present and could not be located. In a case of assault brought before the court against Mrs. Annie Foley by Mrs. Alice Frieze the defendant was dismissed.

New Curate Appointed.

The Rev. Alphe Gaudet has been appointed curate by His Lordship Bishop LeBlanc at St. John's Baptist church, Broad street, with the Very Rev. Mon. Chapman, V. G. The new Levite was ordained to the priesthood on June 11 at Aboujagane, Westmorland county.

FINANCIAL AND COMMERCIAL NEWS AND COMMENT

CLOSING LETTER ON MONREAL EXCHANGE

(F. B. McCURDY & CO.)

Montreal, July 14.—The market gave a good account of itself today, all things considered. News developments over the week-end were unfavorable, the Balkan situation having taken a turn for the worst, and a good deal of uneasiness having been caused by the impending strike of eastern trainmen. The London market, however, showed little enough change although trading was dull.

Wall Street opened with an appearance of cheerfulness and made a good showing throughout the day. In the local market although a number of declines were recorded the variations were as a rule fractional.

Braslian Traction was the most active issue on the local list, opening at 85 1/2, as against 84 1/2, at the close on Saturday and 85 1/2, the prevailing price on Friday. Braslian Traction is one of the best supported of the so-called international stocks. Its price holds firm even in a period of depression. The company continues to show encouraging increases in earnings and interests close to the directors are convinced that it has a great future. The company operates in the centre of an unusually rich and productive territory and it is probable that as the system expands many valuable rights will accrue to shareholders from time to time. In well-informed circles the opinion is held that the record of Braslian Traction will, in this respect resemble that of the C. P. R.

There was considerable demand for Laurentide rights at 15 nearly 400 shares being purchased. The value of these rights, based on the price of the stock at the time of the issue was 2 1/2, the price of the stock being then around 187. The stock, however, turned a little weaker after the announcement of the new issue. On Saturday it began selling around 182 and was up to 183. This morning it was at 175 and this afternoon it sold to 173 1/2.

Apparently it is the opinion of 18 which is pulling down the price of the old stock. This is pretty good evidence of the continuance of tight money.

Ottawa Power rights were steady throughout the day at 18 1/2, but towards the close of the afternoon session the price fell to 18 and was up to 18 1/2. This morning it was at 17 1/2 and this afternoon it sold to 17 1/2.

There was very little inactivity in the unlisted department this morning. Everything considered, James Holden seems to be attracting most attention. The preferred stock sold again today at 70, which gives 10 per cent return to investors. A few shares of Western Canada Power were traded in at 50 1/2 and 52, 500 bonds at 75.

PRODUCE PRICES IN CANADIAN CENTRES
Montreal, July 14.—CORN—American No. 2 yellow, 68 to 69.
OATS—Canadian western No. 2, 41 1/2; No. 3, 40; extra No. 1 feed, 41.

POTATOES—Per bag, car lots, 50c to 75c.

BASEBALL SANTA CLAUS.
The baseball fan frequently wonders what becomes of the old uniforms, bats and gloves discarded by big league clubs. Much of their paraphernalia is used until it is so worn or damaged as to be of no further value, but every club manager has on file applications for cuttings no longer suitable for the major circuits.

Just at present the Indian team of St. Mary's Mission School at Orono, Wash., is proudly playing in uniforms formerly worn by the Athletics when they held the title of world's champions.

Manager Connie Mack was appealed to for some discarded suits early this spring, and in answer to the request forwarded not only uniforms but gloves, bats and balls as well.

Perhaps Connie reasoned that in the role of baseball Santa Claus he would have first call on any St. Mary's player who threatened to develop into a Bender or a Meyers.

KID WESTON HERE.
Among the visitors in the city yesterday was a boxer who is well known to the ring followers in this city. His name is Kid Weston. Kid Weston is the ring name for Frank McMullin, who was a former St. John boy and who climbed the pugilistic ladder in the states. New York now being his home. Some years ago the Kid came to St. John with Billy Smith and while here was seen to advance in a couple of bouts. He intends returning to New York in a few days and is being welcomed back by many of his friends.

How He Missed It.
"Atkins," said the Sergeant angrily, "why haven't you shaved this morning?"
"An't I shaved?" asked Atkins, in apparent surprise.
"No, you're not," insisted the sergeant, "and I want to know why."
"Well, you see, sergeant," replied the soldier, "there was a dozen of us using the same mirror, and I must have shaved some other man."

NEWS SUMMARY AFFECTING MARKET

(F. B. McCURDY & CO.)

New York, July 14.—Foreign advice indicates more cheerful tone. Liquidation in the stock markets of London and Berlin appears to be ended for the present. The belief is prevalent that the Balkan situation is fast approaching a settlement. Our bank statement Saturday was favorable. The reserve surplus is about twice as large as at this time last year. The Democratic governor of Massachusetts will remove his large factory to Canada to avoid the effects of tariff legislation. Information channels are in a waiting attitude pending news development. Improving tendencies may be seen in the general list today. The situation in industrial quarters shows considerable betterment as a result of the liquidated conditions of the market, and of the sustained volume of general business in the face of many adverse elements which tend gradually to be eliminated from the situation. We would look for buying opportunities in the Standards and active issues.

Union Pacific, Reading, Amalgamated Copper and U. S. Steel had buyings of accumulative quality. Investors are inclined to advance bids for Great Northern, N. P., St. Atch. and Penna. A shortage is reported in New Haven. C. P. R. reflects foreign sentiment closely. Good buying is seen in R. I. Mop, L. Y. Cab. and Utah Special. Liquidation is thought to unduly depress C. O. Good absorption is seen in N. Y. Cen. R. O. and Erie. Long pull buying is considered to be warranted in S. R. K. T. G. W. and the low priced Coppers. Conservative interests are reported to feel somewhat feeeling abroad with regard to such stocks as Union Pacific, R. G. A. C. P., U. S. Steel and the low priced Rails. A well known commission house is said to expect an active market within a short time, and it is noted that with good conditions August is often a bull month. Clear gossip is understood to indicate that there is a good investment demand for high grade rails like G. & N. P. and Pa. on all trading recessions.

N. Y. F. B.
Twin City—Fourth week June increase \$14,559; month June increase \$66,225; from January last increase \$213,877.

FOX PRICES HAVE STEADILY ADVANCED
To the Editor of The Standard.
Sir,—Referring to a report published in the Financial Times of Montreal, July 5, that there had been a heavy drop in the price of foxes, I have made careful inquiries among the exchanges and persons prominent in the fox industry here and believe the following to be entirely reliable. The prices of pups of good Island stock spring, 1913, for September delivery, was \$10,000 per pair in January and down to the middle of February last.

From the middle of February to the end of March prices were \$12,500 per pair, since which prices have steadily advanced and have never declined or receded, and the present demand exceeds the supply. Prices are now at least six thousand dollars per pair higher than in January last.

Yours truly,
J. E. B. MCCREADY,
Publicity Agent for P. E. Island, Charlottetown, July 11, 1913.

TRAVERS MAY TRY AGAIN.
New York, July 14.—The fine showing of Heinrich Schmidt at St. Andrews is likely to stimulate interest in the British amateur championship among the leading golfers here. Jerome D. Travers, the National champion, who was abroad a year or two ago, is contemplating another attack upon the foreign titles next year and there is reason to believe that he will not be allowed to go across alone.

The great obstacle in the way of Mr. Travers has been the ban on the centre shafted putter by the Royal and Ancient Golf Club of St. Andrews, the ruling body in golf affairs abroad. In case he decides to enter for the next British championship, Mr. Travers will have to accustom himself to the use of a putter of a pattern legalized on Scottish and English links.

Mr. Travers is a firm advocate and brilliant exponent of the mallet-headed type, but he believes he will be able to make the change without greatly impairing his effectiveness on the greens.

RECORD BY McDUGALL.
New York, July 14.—Donald McDougall of the New York A. C. made a new world's amateur record in the race and was disqualified in another at the Newark Velodrome today. The record was 5 minutes 56.35 seconds in the three mile open race displacing Percy Lawrence's record of 6 minutes 7 seconds, made in August, 1908, at Salt Lake City. McDougall was disqualified for cutting down on the pole in the amateur handicap, in which he finished second.

Frank Ovanagh won the French point race. He disposed of Joe Fogler in one heat. In the final he outdrove Goulet, Fogler and Verri. He then, one after another when they tried to take the lead away from him in the last two laps.

Ernest Cedrine of France, a reputed relative of the aviator, took the professional handicap. A sudden rain storm prevented the running of the five-mile professional championship event.

DISCIPLINE MUST BE MAINTAINED EVEN IN THE TALKING MOVIES

CLASSIFICATION OF CROWN TIMBER RATES

Approved by His Honor The Lieut-Governor-New Schedule to go into Effect on First of August.

Special to The Standard.
Fredericton, July 14.—The Lieutenant Governor in Council has approved the classification of crown timber lands and the fixing of bonuses to be paid by the licensees under the new Crown Timber Lands Act, passed at the last session of the legislature. A new scale of stumpage was approved. The stumpage rates are still below private ones and the increase will probably net the province about \$750,000 per year. The new classifications and rates will become effective on Aug. 1st. Premier Flemming in an interview in Woodstock, stated that he did not believe in the cut which had been above the lands revenue would be affected, but he was of the opinion that a more careful method of cutting would result. If the annual cut remained constant, the revenue would increase, but the Premier looked for a decrease in the cut which had been above the growth during the past few years.

The following statement shows receipts from sales of applications for timber licenses from the year 1893 to 1912, both inclusive:

Year	Sq. Miles	Amount
1893	5,714 1/2	\$89,330.00
1894	4,852 1/2	6,122.32
1895	652	13,886.25
1896	289 1/2	5,179.75
1897	497 1/2	16,981.22
1898	418 1/2	8,062.27
1899	1,628	31,121.15
1900	249 1/2	2,950.50
1901	489	24,535.63
1902	211	7,192.13
1903	145	7,702.85
1904	25 1/2	675.75
1905	81 1/2	1,630.00
1906	47	1,559.00
1907	59	2,386.50
1908	67	5,448.00
1909	58 1/2	1,618.50
1910	112 1/2	4,238.75
1911	51 1/2	2,176.00
1912	75 1/2	3,145.00

Average price per acre for 20 years, \$21.95.
The upset price was increased in 1903 from \$8 to \$20 per acre. (Taking effect in 1904).
There are 10,657 square miles of crown timber land under license in New Brunswick at the present time and it has been classified under the

Four Crown Scotch

Distinguished from other brands because of its extra quality and absolute purity.
FOSTER & CO., St. John, Agents for New Brunswick.

CLOSING COTTON LETTER FROM JUDSON & CO.

(J. C. MACKINTOSH & CO.)

New York, July 14.—Today's cotton market was quiet at best with no striking features, but it looked as if all of the bearish factors in the situation had been well threshed out and that the market was in better position to respond to any definitely bullish developments. Prospective bulls, however, were restrained partially by uncertainty as to the outcome of pending legislation at Washington and by the fear that timely showers in the south-west would so accelerate crop developments as to make up for the late start. The Times Democrat is typical of the private reports now coming to hand from the belt at large. It stated that the condition of the crop as a whole was excellent with possibilities of a bumper yield in the event of seasonable weather over the next fortnight, but that there was also a possibility of sensational deterioration should the hot spell prove to be of abnormal duration possibility, together with the lateness of the crop and the rapid decrease in local stocks are causing some very shrewd operators to watch closely for an opportunity to buy contracts.

JUDSON & CO.
THEATRICAL CELEBRITIES.
Theatrical celebrities born on this date include William Winter, long the dean of American dramatic critics, and Miss Marie Tempest. Mr. Winter was born in Gloucester, Mass., seventy-seven years ago today, the son of a sea captain. Marie Etherton first saw the light in London—must we tell?—July 15, 1862. She was a convent girl when she married a poor pianist, and, as Marie Tempest, took to the stage to earn a living.

LORD COWDRAY.
Lord Cowdray, "Britain's greatest contractor," tunnel builder, Mexican magnate and capitalist, was born 57

CITIZENS WILL VOTE ON THE BUILDING BY-LAW AUG. 26

Commissioner Agar Compares St. John to Mount Vesuvius in the Ever Present Danger from a Big Conflagration—Many Matters of Interest at Yesterday's Council Meeting—Commissioner McLellan Declares Against Engineer Murdoch.

Libreing wooden dwellings of St. John to Mount Vesuvius, and its citizens to the Italians who learn nothing from repeated eruptions. Com. Agar at the council meeting made an impassioned appeal for the obliteration of wooden buildings, and the great danger of fire which now constantly menaces the people.

Routine Matters. On motion of Com. Schofield it was decided to construct the proposed tramway on the coal shed on Quin's wharf by day's labor under the supervision of the engineer. Tenders for this work were called for, but there were no bids.

Water Extension in Lancaster. Com. Wigmore recommended that an 8-inch water main be laid along a new street in Lancaster known as Beaconville avenue, from Sea street to Bay Shore road, extending the pipe along the Bay Shore road to the corner of Church avenue, providing the property owners guaranteed 10 per cent. on the investment.

Regarding Financial Statements. The mayor said that there had been anonymous letters in the papers saying that under the commission monthly financial statements had been promised. He was ready to give a detailed financial statement to the papers every month if they wanted it.

Another New Street. An order was passed authorizing the laying of water and sewer pipes on a new street known as Brunswick place off Douglas avenue, under the usual 10 p. c. guarantee, the work not to be undertaken till the street grades are established.

The Building By-Law. The matter of the petition against three-story wooden buildings was then taken up. Com. McLellan said the matter was of such importance to the future of the city that it should not be decided by a mere vote of the voters.

In Foolish Security. Com. Agar seconded the motion. He thought it a matter of sincere regret that with all the sad experiences through which St. John has passed its citizens had not learned wisdom or common sense.

The Easiest Way To Remove Fuss (Boudoir Secrets.) No longer is it necessary for women troubled with hair on face or arms to submit to the torturous electro-needs, or experiment with injurious preparations, for powdered talc, mixed with water to form a paste and spread on the hairy surface, will quickly remove every trace of hair or fuzz.

"I AM SATISFIED I COULD NOT LIVE If it Were Not for 'Fruit-Active', the Wonderful Fruit Medicine.

Fenaghvale, Ont., Jan. 29th, 1910. "For thirty-five years (and I am not a man over seventy, I have been a terrible sufferer from Constipation. No matter what remedy or physician I employed, the result was always the same—impossible to get a cure. Two years ago, I read the testimonial of Hon. John Costigan regarding 'Fruit-Active' and I decided to give them a trial. I have used 'Fruit-Active' ever since. They are the first and only medicine that suited my case. If it were not for 'Fruit-Active' I am satisfied I could not live."

AROUND THE CITY

A. O. M. Excursion.
 Tonight is the night of the A. O. M. moonlight excursion. Steamer D. J. Purdy leaves Indian town at 8:15 o'clock.

An Automobile Ditched.
 While coming to the city on Sunday night, D. F. Pidgeon's automobile met with an accident near Belyea's Point. The machine was dived and carried some distance from the road. None of the occupants received serious injury. Jarvis Purdy's car arrived along the road in time to render assistance to the disabled machine.

The Champlain Ashore.
 On her way down river yesterday the steamer Champlain was carried by the heavy wind and driven on the beach near Carter's Point where considerable difficulty was found in pulling her off the sandy shore. The steamer Majestic came to the rescue and after about a half hour's hard tugging the Champlain was finally towed off the beach. A fairly large passenger list was on the boat bound for the city and it was late in the afternoon before the arrival at the Indian town wharf was made.

The Century Mark Reached.
 The sending in of an alarm from box 144 last night totalled the one hundredth alarm that the East Side firemen have responded to since January 1st. This does not include a great many still alarms that the department has responded to and in the alarms reaching the century mark a number of times it was found necessary to send in second alarms owing to the fires being big ones. The firemen are certainly having plenty of work out for them this year.

A Pleasant Evening.
 A very pleasant time was spent at the home of Mr. and Mrs. George Breen at Brookville, last evening when about seventy of the members of the Sunday school of the Edmund street Methodist church under the charge of Rev. Robert Crisp, enjoyed a thorough good time. The party was held during the afternoon, and when Brookville was reached, a beautiful supper was served on Mr. Breen's lawn. The return was made to the city on the nine-thirty train, with all of the opinion that the affair had been most successful.

Boy Injured by Revolver.
 Kenneth Morehouse, the young son of Captain John B. Morehouse who resides at 106 Queen street on Sunday morning met with a painful accident which fortunately did not prove so serious as it might have. When he was left alone in the house, his parents being at church, the boy was handling a loaded revolver when in some manner it was discharged. The bullet lodged in the left hand tearing away a portion of the flesh. The injured hand was dressed and aside from the mangle of the flesh no serious injury was received.

HON. MR. HAZEN ON VISIT TO THE COAST

Special to The Standard.
 Ottawa, July 14.—It is believed here that W. H. Thorne, of St. John, N. B., will be selected to succeed the late Hon. John V. Ellis in the senate. Mr. Thorne is accompanying Hon. J. D. Hazen on his trip to the coast. He is a lifelong friend of the Minister of Marine, and is one of the active heads of the Conservative party in New Brunswick and a prominent wholesale merchant. The appointment will probably not be made until the fall.
 Mr. Hazen left today for Vancouver to welcome the battleship New Zealand. Afterwards he will visit the Queen Charlotte Islands to enquire into a fishery problem there and will go north to Prince Rupert. The party may possibly go to Dawson City but plans as to that are not definite. Accompanying the Minister are Mrs. and Miss Hazen, Mr. Thorne and Mr. Heidman, private secretary.

DIED.
 DARNES—In this city on the 14th inst., William Andrew Darnes, leaving a wife and one daughter to mourn their irreparable loss. Funeral on Wednesday from his late residence, 35 Broad street. Service begins at 2:30 o'clock.

WILL PROBE THE FREEDOM OF FIRE BUGS

Insurance Underwriters to Ask Investigation in Morash Case
CONFESSED TO SETTING FIRES
 Taken from Jail and Fined for Wandering, but no Mention of Incendiary Charge Made—Then Freedom.

When James Morash, a self-confessed incendiary, was discharged from custody by the Police Magistrate, in the police court on Friday afternoon last, the action caused much comment about the city.

At a meeting of the Board of Fire Underwriters yesterday it was brought up for discussion and in view of the number of incendiary fires, and the great desire to stamp out the danger, some surprise was expressed among the members when it was learned that Morash had been discharged from custody, and a resolution was adopted urging the importance of having the matter cleared up. Accordingly a committee of three, Messrs. G. O. D. City, F. J. G. Knowlton, and W. M. Jarvis were appointed to meet with the commissioners on Wednesday at noon when an effort will be made to secure an investigation of the matter.

It was stated yesterday that the underwriters have taken this action feeling that the public interests are endangered by the activities of the fire bugs.

An evening paper said that it was rumored about the city that Morash was not discharged in the police court, but was given his liberty by private members of the police force.

Confessed to Fires.
 It was on June 13th that Morash was arrested by Sergt. Smith and Patrolman Totten wandering about Mill street and not giving a satisfactory account of himself, and when taken into custody he had no hesitancy in telling the officers that he had set a number of fires, and also told one policeman that after setting fire to one building in particular he had a hard time in getting out of the building and came very near being burned up in the fire. When taken before Magistrate Ritchie the prisoner was remanded to jail.

On Friday afternoon last Morash was taken from the county jail to the police court and Magistrate Ritchie fined him eight dollars on the charge of wandering about the streets without giving a satisfactory account of himself and then allowed the fine to stand. Before allowing Morash to go the magistrate told him that he must keep off the streets at night and not be out after nine o'clock. There was nothing said in the court at this time about the fires which Morash had previously told the officers he was guilty of setting.

It is further stated that there was no charge against Morash in the police court except that of wandering about, and that Magistrate Ritchie tried the prisoner on nothing more.

Police Did Not Do It.
 Magistrate Ritchie could not be seen in the city last evening regarding the matter, but regarding the rumor that appeared in an evening paper that the prisoner was not discharged from the police court but that private members of the police force gave him his liberty, Chief Clark was seen last evening. The chief said that he did not care to discuss the question, but would say that no officer on the police force had the power to give Morash his liberty. "The first I knew that Morash was liberated was when I heard that he was on the street again." As far as can be learned there was no evidence given in the court for or against Morash and the first that Deputy Chief Jenkins and Detective Killen knew of his liberation was when they read it in the papers and met the man on the Market Square some few hours after he had been discharged from court.

During the past couple of months a number of alleged "firebugs" have been taken into custody and all with the exception of one have been discharged from custody, the one in question having been sent to the Hospital for Nervous Diseases.

In one case a woman admitted a theft and stated that it was while looking for money that she accidentally set fire to a room on St. Andrew street. It is not known what the outcome of an investigation will be, but the fire underwriters are bound to have the matter fully cleared up.

Artillery Inspection.
 The annual inspection of the Canadian Regiment of Garrison Artillery was held at the drill hall, Barrack Square, last evening. The regiment turned out at full strength and presented an excellent appearance. The different movements were carried out successfully and the inspecting officer was much pleased with the showing made.

Only 55 cents reads the display ticket on a large pile of colored cotton undershirts at F. A. Dykeman & Co's. They are the regular 90 cents quality, so the sale price is pretty near the half-price mark. They are made with nice wide flounce of good American percale in neat pattern. American gingham undershirts at 79 cents. They are the regular \$1.00 quality, made especially for the new style of sunlight fitting outside skirts. They have also a big lot of Paddy Green and cerise satens skirts to be sold at \$1.00 each. These are scarce goods but they are there in generous quantities at the right price, made. Apply Royal Hotel.

THE FIREBUG STILL ELUDES AUTHORITIES

Was Busy in the North End Again Last Night.
EMPTY OIL BOTTLE FOUND ON PREMISES
 Man Seen Entering and Leaving Building Few Minutes Before Discovery of Fire.

The earnest efforts of every citizen, who has the interest of the city at heart, in searching out and bringing to justice those responsible for the recent incendiary fires seem to have little effect on the daring fire bug who still continues in their nefarious work and continue to elude detection.

Last evening about 10:45 o'clock a fire was discovered in a house at the corner of Murray and Main street owned by Captain Henry Hawks, which gives absolute proof of being intentionally set, and the circumstances surrounding the same are such that no doubt is left in the minds of those living in the immediate vicinity that a man who well understood his work was responsible for the blaze.

A man with coat collar turned up and in a crouching position was seen to sneak around the building and enter through a rear window shortly before the blaze was discovered.

When the firemen first arrived on the scene the place smelt strongly of oil and an empty bottle which had contained oil was found lying near the seat of the fire.

When the fire was first discovered smoke was breaking out of the building on all sides, and it appeared as though a large fire would be unavoidable. An alarm was rung in from box 144 and the North End department quickly responded. A second alarm was rung in, bringing more apparatus and fire-fighters to the scene. Had the blaze been allowed to continue a few minutes longer a serious fire would have resulted, but had just been checked in time and fortunately very slight damage resulted.

The fire had started in a barrel containing shavings and old rubbish which was saturated with oil, situated in the cellar of the rear portion of the building. Those living in the neighborhood say they smelt a strong odor of oil while at work fighting the fire. District Engineer Brown found an empty oil bottle and brought it to the North End police station.

Mr. Hines who lives in the vicinity, was able last evening to relate a story which explicated and may explain as to the origin of the fire. He declared that before the alarm rung in he saw a man marked in dark clothes sneak around the rear of the building, with his coat collar turned up, in an attempt to disguise, and enter the building through a window in the rear. Later he made his exit through the same window and walked towards Main street where he disappeared.

Smoke was soon issuing from all sides of the dwelling and the alarm was rung in.

The cunning of the firebug to carry on his work seems to puzzle the shrewdest thinkers as no matter what measures are taken it is impossible to catch him at work.

STARKEY CASE IS UP TODAY

Preliminary Hearing of Man Arrested in Connection with Wife's Death to be Held at Waterborough
 The preliminary hearing in the case of Elijah Starkey, who is charged with aggravated assault causing the death of his wife, will be commenced at Waterborough, Queens county, this morning, and is expected to occupy the entire day.

The details of this case which were published last evening in The Standard yesterday morning, have excited much interest throughout the province, and the trial will be closely followed by the public at large.

AFTERNOON CASES IN POLICE COURT

In the police court yesterday a prominent merchant appeared to answer the charge of violating the street traffic law. He stated to the court that he was not on the street at the time the officer stated the law had been violated. The officer said that he had been informed by another citizen that the man reported was the guilty person, but as his informant had not come to court to identify the citizen it was, perhaps, a case of mistaken identity. Nothing further was done in the case and the citizen was discharged.

A case where James Hogan, a saloon proprietor, was reported for allowing an intoxicated person in his saloon, John Rossin, bartender, gave evidence and stated that the man in question was not intoxicated while in the saloon. In answer to George A. Henderson, who was conducting the case for the crown, the witness said that after he had announced the hour as being ten o'clock he and others were put out of the store and the door locked, the man in question was standing at the bar with a glass of ale in front of him. The Magistrate reserved judgment.

PERSONAL.
 Rev. E. C. and Mrs. Hennigar left yesterday at noon for Sackville.
 Captain Walsh, marine superintendent of the C. P. R., was in the city yesterday, on his way to Digby where he will spend a holiday. Captain Walsh has but lately returned from England.
 A. H. Sears of the staff of the Bank of Montreal, Winnipeg is in the city visiting his parents Mr. and Mrs. Edward Sears.

DIG TORBNER FOR DAIRY ROUTE

The Prince George Expected Here within Next Week.
SUPT. MacGREGOR HERE YESTERDAY
 Tells of Great Improvements in St. John-Digby Service to be Inaugurated in Near Future.

A vastly improved steamship service between St. John and Digby will be inaugurated in the near future was the statement made last evening by Alexander MacGregor of Yarmouth, the marine superintendent of the Dominion Atlantic Railway Co.

In conversation with The Standard Mr. MacGregor said that the new steamer Prince George, which was recently purchased in England by this company for the St. John-Digby service had left its country on her trans-Atlantic trip and was expected here within the next week.

The Prince George is a high speed modern vessel and is up to date in every particular. Equipped with turbine engines of enormous horse power she has a standard speed of 23 knots an hour, and will be able to cross the Bay of Fundy in approximately one hour and fifty-seven minutes. The accommodations are of the best and the new steamer will in every way be superior to the Yarmouth or the Prince Rupert.

Although Mr. MacGregor would not say, it is understood that the purchase of this steamer is the first step toward the first line between Montreal and Halifax, which is expected will cut the time by several hours, and save the traveller the long trip through New Brunswick and Nova Scotia via the I. C. R.

It is understood that fast trains will run between St. John and Montreal and Digby and Halifax with the steamer Prince George connecting the two seaports. The passengers from Montreal will be taken immediately to the boat and at Digby will be placed on the Dominion Atlantic flyer.

Mr. MacGregor, who was staying at the Royal, left last evening for Halifax.

TWO MOONLIGHTS ON RIVER LAST NIGHT

With little signs of being able to enjoy a pleasant moonlight evening all on account of the wind and weather, large numbers left Indian town last evening about 8:30 o'clock on the steamer Victoria and May Queen, which sailed on a short cruise up the St. John river, carrying with them many gaily attired excursionists.

Although early in the evening a threatening storm overhung the city, it cleared away and the moonlight shined brightly on the water, and the optimistic ones who had ventured on the Journey were able to share the enjoyment of the bright moonlight evening.

The Victoria sailing was under the auspices of C. H. Mackenzie, who brought along with them the piped Scotch band, which furnished some splendid music on the water trip. The sail, considering the prospects in the early evening, was well attended and the enjoyment was made after all had spent a most delightful few hours.

At the party sailing on the steamer May Queen was the Temple of Honor band, which was heard in several selections during the evening. A good attendance made this excursion a very successful one, and a thoroughly enjoyable evening was passed on the river.
