FRIDAY MORNING, DEC. 26, 1881, University Consolidation From a Meth

dist Point of View. III.

One of the most frequently heard object tions to university consolidation is that one university is not enough for this prov-The most obvious reply to this objection is that Victoria was not established forty years ago because one university was not enough, but because the provincial fund set apart for higher education was appropriated to the anglican church and devoted to the foundation of a strictly anglican university. Had such a misappropriation of the fund never taken place Victoria college might have been founded as a purely theological institution, but it would certainly never have taken its present form. To the establishment of Queen's and Victoria more than to any other cause we owe the secu larization of King's college, and having served a useful purpose ever since the latter can plead for consideration on its merits But the question is not of abolishing Victoria. It is a question of changing its held by the world, and if not yet of much character to suit the altered conditions of the present day. And what are these altered conditions ?

In the first place, as we have already pointed out, there has set in on this continent an era of univer developement entirely unprece dented in the educational history of any country, and if we are to keep fambitious young men and women at home, we must furnish them with educational oppor tunities equal to the best. In the second place the standard of university education has been greatly raised, so that the work required for an honor degree in all the universities a generation ago was insignifi Cant compared with the work now required.

Perhaps the most extraordinary success tha has been achieved in modern science has been ressible conflict to a focus, and it is about Britain from Sweden and Norway at half.

The English undertaking interest is preatened by a grave danger. According the New York Sun's correspondent

In the third place un and appliances have become far more costly than they once were. This remark applies alike to the salaries of lecturers, the equipment of laboratories, and the extension of libraries,

If - we are to have a great university under these conditions-and we should certainly have one-it seems clear that we cannot have more. The endowments of the leading American universities run up into the millions. The endowment of Torouto university and college is about one million. The endowment of Vic toria is less, we believe, than the fifth part of a million. From the point of view of endowment, equipment and revenue, therefore, we believe that one institution of the highest class is all that this province is able to maintain.

How is it with the number of students? There are at present in attendance at University college, Toronto, about 400 students, many of them not matriculated and taking only special courses with a view of gentlemen attain notoriety and they are entering one of the learned professions. Assuming that Victoria has an average of Hector. 100, is there anything objectionable in an

attendance of 500 in a single college with an ample staff, plenty of lecture rooms, and a flexible system of optional courses The fact that in Edinburg and other universities there are more than double this number of arts students furnishes a complete answer.

So far as Victoria is concerned, her supporters and patrons need have no fear of amalgamation. Her students can be accommodated in the provincial university with ease. But there is no reason why, under a proper system of optional equivalents, Victoria or the colleges should not do work suitable for an arts course. It would be inexpedient for a secular college to take up extensively

the subject of apologetics, dealing not merely with natural theology, but with the evidences of christianity, the canon of scripture and kindred topics. It would be hardly less expedient for it to teach new testament Greek or christian ethics, and does not follow. The children of Israel yet these subjects may legitimately be are a long suffering race, whose resistance these and cognate subjects, including Oriental languages, and confine the teaching in the provincial college to those subjects to which no objection can be urged from any sectarian point of view. In this way the resources and energies of Victoria, beyond what is expended on the maintenance of a purely theological course, could find ample scope, and the higher educational system of the country be all the better for it.

There is no reason why we should have one stereotyped university curriculum or the mystifications of European diplomacy, one stereotyped form of college teaching. and that is that Bismarck is endeavoring to If Victori comes into the provincial sys- play off France and England against one tem no restriction can be placed on her another, reserving to himself the right to activities, and her patrons must be allowed finally mark time with whichever power to spend their money as they please. Some Advice to Advertisers.

-The World is the only paper in Toronto that does not appear periodically as a "blanket sheet." Thousands of dollars are thrown away by advertisers by inserting their notices in the unfathomable recesses of these eight, twelve, sixteen and twenty-page sheets. Every line that ap-pears in The World is seen by everyone that reads the paper. The World is com-pact, easily handled, well-read and you get the value for your money every time. Some Wedding Superstitions. In Sweden, a bride must carry bread in

up will gain riches. The Manxmen put salt in their pockets, and the Italians "blessed" charms. The Romans were very superstitious about marrying in May or February: they avoided all celebration days, and the Calenda, Nones and Ides of every month. The day of the week on which May 14 fell, was considered very unlucky in many parts of "merry old Eng-land," and in Orkney islands a bride selects her wedding day so that its evening may have a growing moon and a flowing tide. In Scotland the last day of the year is thought to be lucky, and if the moon should happen to be full at any time when a wedding takes place, the bride's cup of happiness is expected to be always full. It is an error to suppose that the law. makers have nothing more to do than attend the ordinary sessions of the senate or house and draw their pay. Some of them are models of industry-going to the capitol early in the morning, holding committee meetings for an hour or two, darting off to an excentive department for information, taking part in the debates of E the respective houses, writing letters to constituents and transacting infinite odds and ends of business until dusk. And when they go home in the evening they are not always allowed to rest. They are when they go home in the evening they are not always allowed to rest. They are bothered by dissatisfied constituents; they are beseiged by strangers and friends, one wanting this done, another that, a third omething else, until wearied and exhausted
