Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- ☐ Coloured covers/ Couverture de couleur
- ☐ Covers damaged/ Couverture endommagée
- ☐ Covers restored and/or laminated/ Couverture restaurée et/ou pelliculée
- ☐ Cover title missing/ Le titre de couverture manque
- ☐ Coloured maps/ Cartes géographiques en couleur
- ☐ Coloured ink (i.e. other than blue or black)/ Encre de couleur (i.e. autre que bleue ou noire)
- ☐ Coloured plates and/or illustrations/ Planches et/ou illustrations en couleur
- ☐ Bound with other material/ Relié avec d'autres documents
- ☐ Tight binding may cause shadows or distortion along interior margin/ La reliure serrée peut causer de l'ombre ou de la distortion le long de la marge intérieure
- ☐ Blank leaves added during restoration may appear within the text. Whenever possible, these have been omitted from filming/ Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.

- ☐ Coloured pages/ Pages de couleur
- ☐ Pages damaged/ Pages endommagées
- ☐ Pages restored and/or laminated/ Pages restaurées et/ou pelliculées
- ☒ Pages discoloured, stained or foxed/ Pages décolorées, tachetées ou piquées
- ☐ Pages detached/ Pages détachées
- ☒ Showthrough/ Transparence
- ☐ Quality of print varies/ Qualité inégale de l'impression
- ☐ Includes supplementary material/ Comprend du matériel supplémentaire
- ☐ Only edition available/ Seule édition disponible
- ☒ Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image/ Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.

☐ Additional comments:/ Commentaires supplémentaires:

Irregular pagination: 1-120, 113-114,115-116, 117-118, 119-120, 121-122,123-162, 163-176, 177-178, 179-264, 301-484, 465-524, 501-502, 503-638, 339-340, 341-342, 643-805, 807-808,809-854, 855-856, 857-858, 865-866, 867-896, 897-903, 899-900, 901-902, 898-904, 905-928, 1-28, 33-34, 35-56, 12p.

This item is filmed at the reduction ratio checked below/

VOL. II. LIB. I.

CHAP. I.

The Ambassadors from the Duke of Holstein's *Travels into* Muscovy.

1633. FRederick, Duke of *Sleswick* and *Holstein*, &c. being resolved, after the building of the City of *Frederickstadt*, to settle the Silk-Trade there; which being to be brought thither by Land from *Persia*, by the Way of *Muscovy*, he appointed in the Year 1633. *Philip Crusius*, a Civilian, and his Privy-Counsellor, and *Otto Brueyman*, a Merchant of *Hamborough*, his Ambassadors to the *Sophy* and the *Czar*; who accordingly, *Octob.* 22. departed from *Gottorp* (the Duke's Residence) for *Hamborough*. They left this Place with a Retinue of 34 Persons the 6th of *November*, came the 7th to *Lubeck*, and the 8th to *Travemund*; where having taken into their Service one *Michael Cordes*, an experienced Seaman, to conduct them through the *Caspian* Sea, and received in their Train *Wendelin Sibelist*, (who was going to *Muscovy* in the Quality of the Great Duke's Chief Physician) they imbark'd the 9th aboard a Ship, call'd the *Fortune*, *John Muller* Commander, and about 9 at night set Sail, and made 20 Leagues that night. The next day the Secretary of the Embassy was appointed *Fiscal*, with whom were join'd *Sibelist*, and *Hartman Grammaus* our Physician, to prevent any disorders in our Family, in which they behaved themselves with so much exactness, that at the end of our Voyage (tho' but of 5 days) the Fines amounted to 22 Crowns, which were given to the Poor. The same day we pass'd within a League of *Bornholm*, an Isle of about 3 Leagues long, and as many broad, where is the Palace of *Hammershausen*, belonging to the King of *Denmark*. On the North-side of it are the Rocks, call'd *Erndem*. The 11th we were under 56 Degrees, and about night were overtaken by a violent Storm from the S. W. which proving for us carried us however 15 Leagues that night; tho' what with the stink of the corrupted salt Water in the Sink of the Ship, and the violent agitation of the Ship, most of us that were not used to the Sea, were very sick, and some vomited Blood. The 12th in the morning being becalmed, we diverted our selves with our Musick; and about noon the Wind veering about to the S. W. came to the Cape of *Damesnes*, on the Coast of *Courland*, where having continued at Anchor all night, we doubled the Cape the 13th, and came the 14th before the Fort of *Dunamond* (so call'd from its Situation near the Mouth of the River *Dwina*) within 2 Leagues of the City of *Riga*. It being a foggy Day, we gave notice of our Arrival by the Sound of a Trumpet to the Governor of the Fort, who, after the Custom-house Officers had search'd our Ship, sent us a Pilot, who conducted us the same night before the City. The 21st the Ambassadors were presented by the Magistrates with an Ox, some Sheep and Poultry, Hares, Partridges, and other Wild Fowl, Wheaten and Rye-Bread, and half a Tun of Rhenish-wine, who entertained *Andrew Ericson*, the Governor of *Riga*, and the Magistrates, on the 24th at Dinner; where were also present some of the Officers of the Garrison, and the *Lutheran* Superintendant, who supply'd the Office of a Bishop here.

The two Ambassadors set out on their Journey.

Set Sail from Travemund.

Bornholm.

Come to Riga.

Some will have the City of *Riga* to have been built 1196. by *Albert* III. Bishop of *Livonia*; others 1189. by *Bertold*, Successor to *Menard* in the Bishoprick of *Livonia*, the Seat whereof he settled in this City. It was rais'd to an Archbishoprick 1215, and made Metropolitan of *Livonia*, *Prussia*, and *Courland*. In ancient Times there were no small Contests betwixt these Archbishops, and the Knights of the *Espadon*, and afterwards the Master of the *Teutonick* Order of *Prussia*, concerning the Jurisdiction in this City, till their Authority was suppres'd by the Reformation. In the Year 1561. it was forced to implore the Protection of the Crown of *Poland*, by reason of a powerful Invasion of the *Muscovites*. After *Charles*, Duke of *Sudermannia*, Uncle to *Sigismund* King of *Poland*, had got into the Possession of the Kingdom of *Sweden*, he laid twice Siege to this City, *viz.* 1605, and 1609. but in vain, till *Gustavus Adolphus*, the *Swedish* King took it 1621. since which time it has provisionally remain'd in their Hands, pursuant to the Truce made betwixt them and the *Poles* 1625. tho' by the Care they took to strengthen and encrease its Fortifications whilst we were there (which was near 5 Weeks) it seem'd, as if they had no Inclination to part with it upon easie Terms, being fortified on the Land-side with 6 regular Bastions, as many Half-moons, and a Pallisado and Counterscarp. It is situate upon the River *Dwina* or *Dune*, in a large and pleasant Plain, the River being thereabouts near a Mile broad. It is very populous, by reason of its great Commerce with the *English*, *Dutch*, and *Hanseatick* Boors, by the way of the *Baltick* Sea in Summer, and in Winter with the *Muscovites*. Provisions are nevertheless very cheap here, a good Ox being to be bought for 3 Crowns, a Hog for one, and Fowl and Venison at a very low rate, the Peasants having a Privilege here (the only one they enjoy) of Hunting. Since it has been under the *Swedish* Jurisdiction, no other Religion but the *Lutheran* is so much as tolerated, which is the Established Religion here: Most of the Inhabitants speak and understand, besides the *High Dutch*, the *Sclavonian* and *Courland* Languages; but the first is made use of in all their Publick Acts and Sermons, except that two Churches are allowed to preach in the *Sclavonian* and *Courland* Languages.

1633.

Submits to Poland.

Taken by the Swedes.

Its Commerce.

Dec. the 15th we left *Riga*, came the 18th to *Wolmar*, a small Town, 18 Leagues from *Riga*, miserably ruin'd in the late Wars: The 20th we reach'd the Castle of *Ermes*, belonging to Col. *de la Barre*, who entertain'd us with a great deal of Magnificence. The 21st we travell'd 4 Leagues to the Castle of *Hallmai*, where we saw a young Elk higher than a Horse: The 22d we advanced 4 Leagues further to the Castle of *Ringen*, and from thence 6 Leagues more to *Dorpt*, or *Dorpat* the 23d. It is situate upon the River *Embec*, betwixt the two Lakes of *Worzero* and *Peipis*. The *Muscovites* who call it *Juriogorod*, were Masters of it till 1230. It was taken from them by the Master of the *Teutonick* Order, who rais'd it to a Bishoprick. In the Year 1558. the famous *Russian* Tyrant, *Juan Basilowitz* retook it, but restor'd it to the *Polish* K. *Stephen Batori*, by virtue of a Peace concluded betwixt them 1582. In the Year 1625. the *Swedish* General *James de la Guardie* took it from the *Polanders*, since which time, pursuant to the before-mentioned Truce made 1635. they remain'd in possession of it. *Gustavus Adolphus* King of *Sweden* founded an University here 1632. but is not much frequented, except by a few *Swedes* and *Finlanders*.

The Ambassadors leave Riga.

Come to Dorpt.

An Episcopal City.

In various Revolutions.

1634. We left *Dorpat* the 29th of *January*, and arrived the 3d of *January* following at *Narva*, where we stay'd 6

Come to Narva.

A Description of Riga.

Made an Archbishoprick.

1634. Months for the *Swediſh* Ambaſſadors, that were to go along with us to the *Czar*'s Court. We diverted our ſelves with Feaſting, Muſick, Walking, and Hunting, to drive away the Tedioufneſs of our ſtay, as well as we could; notwithſtanding which, what with the Inconveniencies we lay under of getting Proviſions, the daily Quarrels that happen'd betwixt ſome of our Retinue and the Garriſon, and the long ſtay of the *Swediſh* Ambaſſadors, we were quite tir'd out.

Mr. *Fleming* was ſent the 18th of *February* with part of the Train and Baggage in Sledges to *Novogorod*, whilſt our Ambaſſadors went with a Retinue of 12 Perſons to *Revel*, where they were received under the Diſcharge of the great Cannon of the City, and ſplendidly entertain'd both by the Governor and Magiſtrates, during their ſtay, which was near 6 weeks. Of the two Cities of *Narva* and *Revel*, and the reſt of *Livonia*, we ſhall have occaſion to ſay more hereafter.

And to Revil.

Philip Sheiding, then Governor of *Revel*, being appointed Chief of the beforementioned *Swediſh* Embaſſy, received Intelligence the 10th of *May*, that his Collegues were come to *Narva*, whereupon we left *Revel* the 15th; and the 18th were met by Col. *Henry Fleming*, *Frick Guldenſtern*, and *Andrew Burans*, deſign'd for that Embaſſy, about a League from *Narva*, where we were welcomed (as the firſt time) with the Diſcharge of their Great Artillery.

Return to Narva.

The Ambaſſadors reſolving the next day to go to *Novogorod*, by the way of *Carelia* by Sea, or the Lake of *Ladoga*, they ſent word of it to the Governor of *Novogorod*; it being a received Cuſtom both in *Muſcovy* and *Perſia*, to receive Foreign Ambaſſadors on the Frontiers, and to appoint certain Perſons (call'd *Priſtaffs* by the *Muſcovites*, and *Mehemanders* by the *Perſians*) to conduct them to Court, and defray them both as to their Proviſions and Carriages. The *Swediſh* Ambaſſadors having left *Narva* the 22d of *May*, we ſtay'd there for ſome few days longer.

Anniverſary Ceremonies of the Muſcovits.

May the 24th, being *Whitſun*-Eve, I had the Curioſity to go over to the Suburbs, call'd *Ruſſian Narva*, to ſee their Anniverſary-Devotions, obſerved by the *Muſcovites* towards their deceaſed Kindred. I ſaw the Church-yard full of *Muſcovite*-Women, who had ſpread their Handkerchiefs fring'd with Silk over the Graves of their Friends, upon which they had ſet Diſhes of Fiſh, Cuſtards, Cakes, and painted Eggs; ſome were kneeling, others ſtanding, and bewailing their Loſs, whilſt the Prieſt (who perform'd his ſhare of the Ceremony with a great deal of Careleſsneſs) walk'd up and down among them, with a Cenſer in his hand, into which he caſt little Pieces of Wax to cleanſe the Sepulchres; and had a ſmall piece of Copper from each Woman for his Pains, beſides that the Clark took care to ſecure the Proviſions for his uſe.

The Ambaſſadors leave Narva.

The 26th having ſent away our Baggage by Water, we follow'd the 28th being conducted by Col. *Port*, the Governor of *Narva*, as far as *Gam*, a Fort in the Province of *Ingermanland*, about 3 Leagues from *Narva* upon a ſmall Torrent, call'd *Gam*: It was fortified with a ſtrong Stone-wall, and 5 Baſtions, the adjacent Village being inhabited by *Muſcovites*, ſubject to the Crown of *Sweden*.

Here we were provided with freſh Horſes, which brought us the 29th to *Kapurga* 6 Leagues from *Gam*; where being very ſplendidly entertain'd that night and the next day at Dinner by *Burgiſtaus Roſe*, the Governor, we continued our Journey the 30th, and travell'd all night till 3 the next morning, when we were nobly received by a certain *Muſcovite* Lord or *Boyar*, call'd *Baſilowitz*, a very handſome Perſon, and of an excellent Humour, who having ſerv'd in the Wars of *Germany*, and at the Battle of *Leipſick* 1631. entertain'd us at Dinner; and, to honour us the more, cauſed his Wife and Daughter, who were very handſome and richly accoutred, to come into the room where we were, and to drink each of them a Cup of *Aqua Vitæ* to each of the Ambaſſadors: This being look'd upon among the *Muſcovites* as the greateſt piece of Civility they can ſhew to Strangers, unleſs it be to ſuffer them to be ſaluted, which is the higheſt degree known to them.

We parted from thence the ſame day about One-a-clock, and travell'd 4 Leagues further to *Johanneſtat* (St. *John*'s Valley) ſo call'd from its Founder *John Skytte*; where having received Intelligence that the *Swediſh* Ambaſſadors ſtay'd for us at *Nyſhantz*, we ſet out early in the morning the 1ſt of *June* towards the ſaid Fort, ſituate upon a Navigable River about 2 Leagues and a half from *Johanneſtat*; which riſing from the Lake of *Ladoga*, diſcharges it ſelf into the Gulph of *Finland*, and ſerves as a common Boundary betwixt the Provinces of *Carelia* and *Ingermanland*.

1634.

The *Swediſh* Ambaſſadors, after a Conference of two hours with ours, continued their Journey to *Noteburgh*, whither we follow'd them the 2d of *June*, and were forced to ſtay near 6 weeks, expecting the Orders of the *Muſcovite* Court for Reception on the Frontiers. The *Swediſh* Ambaſſadors kept open Houſes at *Noteburgh*, and ſent every day their Steward, with ſome Gentlemen of their Train, to conduct the *Holſtein* Ambaſſadors to their Table.

Come to Noteburgh.

June the 17th Mr. *Spiring*, who was join'd with the other four *Swediſh* Ambaſſadors in Commiſſion for their Embaſſy into *Muſcovy*, arrived at *Noteburgh*; and thus having received Intelligence the 25th of *June*, that the *Muſcovite Priſtaff* was come to the Frontiers to receive them, they departed the 26th for *Laba* (I having obtained leave to go along with them, to ſee the Ceremonies of their Reception) and came the 27th to the River; which being not above 40 Paces broad thereabouts, is the Boundary betwixt *Sweden* and *Muſcovy* on that ſide.

The Ambaſſadors no ſooner underſtood that the *Muſcovite Priſtaff* had 17 Boats ready on the other ſide, but they ſent their Interpreter, to deſire the *Priſtaff* to ſend over ſome of them to fetch their Baggage firſt: Unto which the *Priſtaff* reply'd, that the *Czar* did not value the Expence of one days Entertainment; and that therefore he muſt begin with the Reception of the Ambaſſadors: And about noon ſent his Interpreter with 4 Muſqueteers (of which he had 30 for his Guard) to give them to underſtand, that he was ready to receive them. One of the Ambaſſadors told him, that they having ſtaid 5 weeks on the Frontiers, he hoped the *Priſtaff* would not take it ill, if they made him ſtay one day; and that his Collegues being aſleep at this time, they ſhould have notice given them, after they were awake, when it would be convenient to receive them. Accordingly they ſent word about 4 in the afternoon, and with their Interpreter went into one Boat, and I with ſome of their Gentlemen into another. The *Priſtaff* at the ſame time got with 15 of his *Strelitzes* into another Boat; and his drift being to let the Ambaſſador come to the middle of the River before him, he ordered the Watermen to row ſlowly, which one of the *Swediſh* Ambaſſadors, *Philip Sheiding*, perceiving, order'd his Boat-men to do the ſame; and cry'd out to the *Priſtaff*, that this piece of Pride was unſeaſonable: So that at laſt all the Boats meeting in the middle, the *Priſtaff* began to read his Commiſſion, containing, *That the Great Duke and Czar, Michael Federowitz, &c.* had order'd him to receive the *Swediſh* Ambaſſadors, and to provide them, and their Retinue, with Proviſions, Carriages, and all other Neceſſaries, as far as the City of *Muſco*; and ſo carried them aſhore to a certain *Simboyar's* Houſe, not far from the River-ſide, where we were conducted into a Room with a Stove; which, notwithſtanding the heat of the Seaſon being heated, we paſs'd our time but very indifferently, betwixt the Incommodities of the Smoak and Smother, Inconveniencies of our Entertainment, which was ſome Gingerbread, ſome *Aqua Vitæ*, and two ſorts of very bad Mead; which the Ambaſſadors only touch'd with their Lips: And the laſt giving the Cup to me, gave it this Encomium; *Addatur purum Sulphuris, & fiat potio infernalis.* After this Collation was over, I return'd to *Noteburgh*, where we ſtaid 3 weeks longer, becauſe the Carriages and Horſes appointed to conduct the *Swediſh* Ambaſſadors, were (as the *Priſtaff* told us) to come back to fetch us.

The *Swediſh* Ambaſſadors Reception on the Frontiers.

The Country about Noteburgh.

The Country about *Noteburgh* (call'd *Oſinea* by the *Muſcovites*) is very pleaſantly ſituated, eſpecially for Hunting; but not extraordinary healthy, by reaſon of the many Lakes and Fenns that lie about it. At a Miles diſtance from thence are two Iſles well ſtor'd with Wood, and an incredible number of Wild Fowl; and the Lake *Ladoga* affords vaſt numbers of Sea-dogs. It lies under 63 degr. 30 min. upon a ſmall Iſle, which is formed by the Lake of *Ladoga*, juſt at its Entrance in the ſhape of a Well, which has given the name to the Place. The *Muſcovites* have taken particular care to fortifie it with a ſtrong Wall 2 Fathom and an half thick; neither could the *Swedes* make themſelves Maſters of it, till by a long Siege, and a contageous Diſtemper, the *Muſcovite* Garriſon was reduc'd to two Men, who notwithſtanding all this capitulated upon Honourable Terms.

July the 16th, Notice being given us that *Simon Andrew Kureckſhin*, who was appointed our *Priſtaff*, was come

1634. come to the Frontiers we prepared every thing for our departure, and came the 20th to *Laba*, whither the *Priſtaff* ſent immediately his Interpreter with a Muſqueteer, to know whether the Ambaſſadors deſired to be received; and being ask'd again, whether he would receive us on this ſide, or the middle of the River; he anſwer'd, That we might paſs the River: Theſe Ceremonies being only obſerved with the *Swedes*, by reaſon of the Conteſts on foot betwixt them concerning the Frontiers.

The Ambaſſadors of *Muſcovy* reception.

Having paſs'd the River, the *Priſtaff* who was clad in a red Coat of Damask, came up towards the Ambaſſadors uncovered, till ſuch time he began to read his Commiſſion, when pulling off his Cap he ſaid,

His Majeſty the Czar, Michael Federowitz, *has ſent me hither to receive thee* Philip Cruſius, *and thee* Otto Bruyman, *Ambaſſadors from the Duke of* Holſtein, *and commanded me to accommodate you and your Train with Proviſions, Carriages, Horſes, and all other Neceſſaries, till you come to the City of* Muſco.

This done, he conducted the Ambaſſadors (unto whom he gave the upper hand) to their Inn, through a Party of 12 *Strelitze*'s, who giving us a Volley, the Secretary of the *Swediſh* Reſident was ſhot through his Buff-coat. After a Collation of Cherries, Gingerbread and *Aqua vitæ*, we paſs'd the Lake of *Ladoga* in 7 Boats, it being 12 Leagues over there.

They proſecute their Voyage.

At our landing near a Monaſtery call'd *Navolkus Konſky*, we were preſented by a Monk with ſome Bread and dry'd Salmon; and our *Priſtaff* having left it to our choice, whether we would accept of the Money allow'd for our Entertainment, and make uſe of our own Cooks; we readily accepted of his Offer, our daily Allowance amounting to 2 *Roubles* and 5 *Copees*, or 4 Crowns and 5 Pence; which in ſo cheap a Country as this, found us very good Fare.

Come to *Ladoga*.

From hence we came to a River which brought us to *Ladoga*, 17 Leagues from *Laba*; here we ſaw great numbers of Children run about, to offer Gooſeberries and other Fruits to ſell, at a very ſmall Price; their Dreſs being ſuch (which were only Shirts reaching to their Ankles) as that the Boys could not be diſtinguiſhed from the Girls. As we were ready to embark after Dinner upon the River *Wolgda*, we obſerved our *Strelitzes* to beg the Benediction of a Monk, it being their Cuſtom to ask the Bleſſing of all Monks or Churches they meet with, or at leaſt to pay their Reverences to the Croſſes and Images, and to ſay, *Hoſpodi Buchniſto*, that is, *Lord have mercy upon me:* We made uſe of our Sail, which had almoſt proved fatal to one of our *Strelitzes*, who by the negligence of the *Muſcovite* Boatmen, was ſtruck down dead by the fall of it, but at laſt by the help of a good Goblet of *Aqua vitæ* was brought to life again.

The River *Wolgda*.

The River *Wolgda* is as broad as the *Elbe*, but runs more ſlowly. Its riſe is near *Novogorod Veliki*, out of the Lake of *Ilmen*, and exonerates it ſelf into the Lake *Ladoga*; 7 Verſts (5 of which make a *German* League) from hence there is a moſt ſtrange Cataract, or Water-fall, and about 7 or 8 Verſts higher another, where the Current runs with ſuch violence betwixt the Rocks, that 100 Men are ſcarce ſufficient to draw a wooden Boat up the River. We ſaw all our Boats paſs ſafely except one, which being drawn up almoſt to the higheſt point the Rope broke, ſo that it would infallibly have ſplit againſt the Rocks, had not one end of the Rope, by good fortune, twiſted it ſelf about one of the Rocks: The other Cataract we paſs'd without any danger, and came to a Convent call'd *Nicolai Nepoſtiza*, where we ſtay'd the next Day. There were no more than 4 Monks in this Monaſtery, one of which welcom'd us with a Preſent of Turneps, pickl'd Cucumers, ſome green Peaſe, and 2 Wax-candles; we rewarded him with a Crown piece, which had ſuch an influence upon the good old Man, that he ſhew'd us the Church (contrary to the Cuſtom of *Muſcovy*) in his Sacerdotal Veſtments: He told us alſo, That the *Germans* and other Nations might be ſaved, provided they had a *Muſcovite* Soul, and led a Juſt Life. He alſo read to us the firſt Chapter of the Goſpel of St. *John*, which we found altogether the ſame with our Text. We made him a Preſent of another Crown, which ſo pleaſed him, that he bow'd his Head to the Ground, and would have ſhewn us every thing belonging to the Church, had not the *Strelitzes* grumbled at it; ſo that he took his leave of us, and the Wind turning fair about the ſame time, told us at parting, That St. *Nicholas* had ſent us this Wind, as a Reward for the kindneſs we had beſtow'd upon him.

Its two Cataracts.

We continued our Voyage the ſame Afternoon, and came the ſame Night to a Village call'd *Corodiza*, 4 Leagues from thence, but had our Supper dreſs'd on the Banks of the River; and about Midnight ſet forward for *Soliza*, 4 Leagues farther. 1634. Come to *Corodiza*.

The next Day we travel'd 6 Leagues, to a Village call'd *Grunza*, which being forſaken by the Inhabitants, we made a great Fire in a fair Meadow near a Pool, where we diverted our ſelves all Night with telling of Stories, having ſlept all the Day before; we ſaw above 300 Cranes in the Pool. To *Soliza* and *Grunza*.

The next Day, *July* 26. we embark'd again in the Morning, and by Noon had made 4 Leagues to *Wiſoko*. Our *Priſtaff* hearing us pronounce the Name of *Jeſus*, croſs'd himſelf ſeveral times, and deſired to have the Grace we ſaid before Dinner in writing, telling us farther, That he had not believed the *Germans* were ſo good Chriſtians and juſt Men. To *Wiſoko*.

We travel'd the 27th all Day and the Night following till break of Day, when we found our ſelves at the Village of *Kriſeviza* within 2 Leagues of *Novogorod*, from whence we ſent notice to the Governor of that City, of our arrival: Within 600 Paces of this Village is a very fair Convent, call'd by ſome *Nachatem*, but generally call'd *Kriſeviza Chutina Spaſiſ Monaſtir*, very well built and ſituated: It maintains 60 Monks under the Government of an Abbot, and has 400 Peaſants belonging to it, to cultivate their Grounds, but they are obliged to maintain 100 Soldiers of the Garriſon of *Novogorod*, where we arrived the 29th, being met by thoſe of our Retinue that were ſent before, and were extreamly rejoyced at the ſight of us. To *Kriſeviza*. Come to *Novogorod*.

The Governor regal'd us with a Tun of Beer, another of *Hydromel*, and a Barrel of *Aqua vitæ*, in lieu of which, we ſent him a Silver Cup Vermilion gilt: We ſtay'd here till the 13th of *July*, when we ſet forward for *Brunitz* 4 Leagues from hence, and ſo put an end to our Voyage by Water. To *Brunitz*.

Whilſt our Baggage was diſembarking *Auguſt* 10. we ſaw a *Muſcovite* Proceſſion to bleſs the River: In the Front march'd 2 Men abreaſt, 1 whereof carried a Croſs with the 4 Evangeliſts on the 4 Corners, the other an old printed Image covered with a white Linen Cloath. Theſe were follow'd by a Prieſt in his Pontifical Veſtments, with a wooden Croſs near half a Foot wide in his Hands, ſinging in Conſort, with a little Boy carrying a Book after him. After them came the People, Men, Women and Children, each with a Wax-candle, except the Children; and in the Rear one who ſeem'd to be the Clerk of the Pariſh, with 10 lighted Tapers faſtned together. Being come to the River, the Prieſt ſpent half an Hour in ſinging and reading, and then taking the lighted Tapers from the Clerk extinguiſh'd them in the Water, the People doing the like with theirs. This done, the Prieſt dipp'd his Croſs three times in the Water, and at taking it out, let it drop into a Baſin deſign'd for the preſervation of this Holy Water; and then the Women came running to plunge their Children over Head and Ears into the Waters, whilſt others brought their Horſes to have their ſhare of this conſecrated River. At laſt they return'd in the ſame manner as they came, to the Church, where they were diſmiſs'd with a Benediction from the Prieſt. A *Muſcovite* Proceſſion.

Our Baggage being diſpoſed into 50 Waggons, we got on Horſeback the ſame Afternoon, and came to the Village of *Coaſmiſtansky*, 5 Leagues from *Brunitz*.

The 2d of *Auguſt* we made 8 Leagues to *Gam Chreſta*, (*Gam* ſignifying as much among the *Muſcovites*, as a place where Travellers take freſh Horſes.)

The 3d we travell'd to *Jazebiza*, which being forſaken by the Inhabitants, and our Cook gone 2 Leagues before, we were forc'd to paſs the Night without Victuals or Sleep.

The 4th coming to *Semnogora* we met with Colonel *Fox*; and the 6th at *Wolſock* with Colonel *Charles*, which occaſioning divers Entertainments, our Trumpeter mortally wounded one of our *Strelitzes*. Come to *Wolſock*.

In a Village call'd *Coramna*, through which we paſs'd the 5th, we ſaw many great Blue Stones, which that famous *Ruſſian* Tyrant *Joan Baſilowitz* had cauſed to be removed from the Sepulchres of *Revel*, after the taking of that City, with a deſign to carry them to *Muſco*; but News being come of his Death, they were unloaden, and left here ever ſince.

The 7th, coming to the Village of *Budena*, our Horſes began to wince and to beat the Ground with their Feet, to that degree that we could not imagine what ſhould be the matter, till alighting we found them all

1634. over covered with Bees, which obliged us to take up our Quarters in an adjacent Field; and the next day we were told that thoſe Bees had been incenſed on purpoſe to prevent our Lodging in the Village.

To *Torſock.* The 8th we chang'd our Horſes, and towards night came to *Torſock*, a ſmall Fortified Town, built upon the Aſcent of a Hill; we ſtopp'd without the Place in huts of Boughs of Trees.

To *Twere.* The 9th after we had croſs'd two ſmall Rivers, we came at night to the City of *Twere*, built in the ſame manner as *Tarfrek*, on the ſide of a Hill, but ſomewhat bigger; each of theſe two has its own Governor; the laſt having borrow'd its name from the River, which bears the ſame name, and runs by it, as well as the *Wolga*, which continuing its courſe from hence for 600 *German* Leagues (making near 1500 *French*) thro' *Muſcovy*, exonerates it ſelf into the *Caſpian* Sea: We paſs'd this River in a Ferry-Boat, and took up our Quarters in the Suburbs.

The River *Wolga.*

The 13th we arrived within 2 Leagues from *Muſco*, to a Village call'd *Nichola Nachinski*; and the 14th our *Priſtaff* took his leave of the Ambaſſadors, who preſented him with a Silver Cup Vermilion gilt, and about 12 Crowns among his Followers. The ſame day, the Meſſenger ſent by our *Priſtaff* to *Muſco* to give notice of our Arrival, returning, brought us word to prepare immediately for our Entrance, which we made the ſame day: (1.) The *Strelitzes* who had conducted us hither. (2.) *Jacob Schova*, our Harbinger, *Michael Cordes*, our Ships Captain, and *John Algveyer*, Clerk of the Kitchin, all three a-breaſt. (3.) Three Led-Horſes, one Black, the other two dappled Greys, to be preſented to the Great Duke. (4.) Our Trumpeter. (5.) Our Steward. (6.) Three of our Gentlemen a-breaſt. (7.) Three more of our Gentlemen. (8.) The Secretary, Phyſician, and Comptroler. (9.) The two Ambaſſadors, attended each by four Guards *du Corps*, with their Carabines, with the *Priſtaff* who had conducted them, at ſome little diſtance on their right hand. (10.) The ſix Pages in two Ranks. (11.) A Coach with four Grey Horſes. 12. The Maſter of the Waggons, with 8 others, three in a Rank. (13.) The Preſents deſign'd for the *Czar*, in 5 Litters, covered with *Turkey* Tapeſtry. (14.) An open Waggon, wherein one Mr. *Simon Friſius* lay ſick. (15.) Forty ſix Waggons with our Baggage. (16.) Three Servants.

In this order we march'd on very ſlowly, till coming within half a League of *Muſco*, we ſaw two *Muſcovites* coming one after another, to tell the *Priſtaff* at what Place we were to be received by thoſe who were appointed for that purpoſe, with order ſometimes to advance ſlower, ſometimes with more haſte, according as they judged it moſt proper for us to meet at the ſame time at the Place deſign'd for our Reception. In the mean while we ſaw ſeveral *Muſcovites* ſumptuouſly accoutred, who paſs'd only at a diſtance to view us. About an *Engliſh* Mile from the City, we paſs'd through about 4000 *Muſcovites*, well mounted and accoutred; and not long after two *Priſtaffs* mounted on two fine White Horſes, and clad in Coats of Purple Satin, advanced towards us, the Chains (inſtead of Bridles) of their Horſes being compoſed of Links near two Inches broad, but ſcarce thicker than the back of a Knife, the holes being ſo big, that a Man might thruſt ones Fiſt into them, which made a ſtrange noiſe, as they moved along. They were follow'd by the *Czar*'s Maſter of the Horſe, with 20 White Led-Horſes, and a good number of Attendants.

The Ambaſſadors Reception at *Muſco.*

The Ambaſſadors and *Priſtaffs* being alighted, one of the two uncovering himſelf, ſaid; *The Grand Seignior, Czar, and Great Duke, Michael Federowitz, Conſervator*, (and ſo enumerating all his Titles) *receives you the great Ambaſſadors from the Duke of* Sleſwick, Holſtein, Stormar, *and* Ditmarſen, *Count of* Oldenburgh *and* Delmenhurſt, *and grants you and the Gentlemen of your Train, the Favour to make your Entry upon his own Horſes; having appointed us* Priſtaffs *to furniſh you with all Neceſſaries, during your Abode at* Muſco.

After the Ambaſſador *Cruſius* had return'd the Complement, two very ſtately White Horſes, with ſtately Saddles after the *German* Faſhion, and ſumptuous Harneſſes were brought for the Ambaſſadors to mount on, and ten other White Horſes, with *Muſcovite* Saddles, cover'd with Cloth of Gold, and Purple Satin, for the Gentlemen of our Retinue. The *Priſtaff* and *Strelitzes*, that had conducted us to *Muſco* being drawn off, the *Priſtaffs* placed themſelves on both ſides of the two Ambaſſadors, who were in the midſt, ſo that he that was on the right took the upper hand of them, he that has his right hand free, being always reputed to be in the moſt honourable Place among the *Muſcovites*. They were follow'd by a good number of the Grooms of the *Czar*'s Stables, the Coverings of their Saddles, being of Leopard-skins, Cloth of Gold, and Scarlet. Part of the Horſe through which we had paſs'd coming towards the City, made all the haſte they could through the Gates, to conduct the Ambaſſadors to their Lodgings, which were two Citizens Houſes built of Wood, in that part of the Town call'd *Czarskigorod*, *i. e.* the *Czar's* Town, the *Priſtaff* made us an Excuſe from the Great Duke, that a Fire having lately conſumed not only the ordinary Houſe for the Entertainment of Ambaſſadors, but alſo another appointed for their Lodging they hoped they would accept of this Accommodation; we were no ſooner come to our Lodgings, but we ſaw 32 *Muſcovites* marching all in a File, and carrying the Preſents ſent us from the Great Duke's Kitchin; *viz.* 8 Sheep, 30 Capons and Pullets, good ſtore of White and Brown Bread, and 22 ſorts of Liquors, Wine, Beer, Mead, and *Aqua Vitæ*. Then they lock'd the doors of our Lodgings, and put a Guard of 12 *Strelitzes*, partly to prevent our Correſpondence with the Inhabitants, partly to give us Attendance, and to buy our Proviſions: For which reaſon alſo an Interpreter, a Native of *Muſcovy*, but who had learnt the *German* Tongue at *Leipzig*, was left with us; and the *Priſtaffs* would come daily once a day to viſit us, and to ask whether we ſtood in need of their Service. The 17th was deſign'd for our Audience; but the Great Duke being gone without the City, we ſpent that day in Devotions for our ſafe Arrival here. Mr. *Balthaſor Moucheron*, the *Swediſh* Commiſſary at *Muſco*, having got leave to be preſent at the Sermon our Miniſter preached upon this occaſion, and at the Dinner that follow'd it, He told us, that they liked our Entrance exceeding well, and were ſurprized that a *Knez*, or Prince of *Germany* (for ſo they ſtile all Dukes, tho' their *Knez* have ſcarce 800 or 1000 Pounds *per Annum*, unleſs they are in ſome conſiderable Poſt at Court) ſhould be able to ſend ſo ſplendid an Embaſſy.

1634.

The *Priſtaff* takes the upper hand of the Ambaſſadors.

Refreſhments ſent to them from the *Czar.*

The 18th 2 *Priſtaffs* came to acquaint us, that the next day was appointed for our Publick Audience, deſiring at the ſame time a Catalogue of the Preſents deſign'd for the *Czar*.

The 19th in the Morning they came again, and finding us ready to go, they return'd immediately to Court, and brought us the ſame White Horſes we had made uſe of at our Entry. We got on Horſe-back with our Cockſon, but left our Swords behind; knowing that no body is permitted to appear in the *Czar*'s Preſence with them; and ſo advanced towards the Caſtle in the following Order.

36 *Strelitzes* led the Van; after them our Steward. (3.) Three Gentlemen of our Train. (4.) Three Gentlemen more. (5.) The Commiſſary, Secretary and Phyſician. Then the Preſents led and carried by *Muſcovites*, *viz.* (6.) one Coal-black Horſe. (7.) One Dapple-grey. (8.) Another Dapple-grey. (9.) Harneſs for one Horſe enriched with Silver, *Turkey*-ſtones, Rubies, and other Precious Stones, carried by two *Muſcovites*. (10.) A Croſs of Chryſolyte enchas'd in Gold, of half a Foot long, laid in a Baſon. (11.) An Ebony Cabinet, garniſh'd with Gold in the Form of a ſmall Apothecary's Shop, with its proper Boxes and Phials of Gold, enrich'd with precious Stones, fill'd with ſeveral excellent Chymical Preparations, carried by two *Muſcovites*. (12.) A ſmall Veſſel of Rock-Chryſtal, garniſh'd with Gold and ſet with Rubies. (13.) A great Looking-glaſs of an Ell and a quarter high, and half an Ell broad, with an Ebony-Frame, with Silver Flowers wrought thereon, carried by two *Muſcovites*. (14.) A Clock on which was painted the Parable of the Prodigal Son. (15.) A walking Staff, Vermilion-gilt, with a Perſpective within it. (16.) A large Ebony-Clock in an Ebony-Caſe, laid in with Silver. (17.) Two Gentlemen of the Chamber carrying two Credential Letters aloft, one for the *Czar*, the other for *Philaretes Nikidits*, the Patriarch, his *Czariſh* Majeſty's Father, who dy'd ſince our departure from *Holſtein*. (18.) The two Ambaſſadors between the two *Priſtaffs*, with their Interpreters before them, their Pages behind them, and 4 Lacqueys on each ſide.

The Preſents deſign'd for the *Czar.*

We march'd along in very good order through a Guard of 2000 *Strelitzes*, which were rank'd on both ſides of the Streets, the Windows of the Houſes being fill'd with Spectators; ſeveral Meſſengers met us,

1634. as we paſt along, who coming full ſpeed from the Court, gave us notice from time to time how to order our March, ſo as to come to the Hall of Audience at the ſame time the *Czar* had taken his place on the Throne. We were conducted through the Caſtle-Court, cloſe by the Chancellor's Office for foreign Affairs, where every one alighting and taking his place, the Steward before the Preſents and the reſt of the Gentlemen next before the Ambaſſadors, we were carried towards the Hall of Audience, which is on the right Hand, through a vaulted Gallery on the left, (whereas the *Turky*, *Perſian*, and *Tartarian* Ambaſſadors are conducted up a ſtone pair of Stairs on the right) into a great vaulted Apartment, where we ſaw among a great Multitude of other People, many Ancient Men with grey Beards, clad in ſtrip'd Satin Robes and Caps of Martins-skins; theſe they told us, were the *Czar*'s *Goſes* or Factors, who are obliged to attend at theſe Solemnities in thoſe Gowns, taken out of the *Czar*'s Wardrobe, which are there laid by for the ſame uſe again, after the Ceremony is over.

The Ambaſſadors admitted to Audience.

At the Door of the Antichamber the Ambaſſadors were Complemented by 21 *Boyars* in Robes of purple Satin embroidered with Pearls, who told them, That his *Czariſh* Majeſty did them and the Gentlemen of his Retinue, the favour of admitting them into his preſence.

The Preſents being ordered to remain in the Antichamber, the Ambaſſadors, Gentlemen, and Pages, were conducted into the Hall of Audience; *John Hermes*, the *Czar*'s Interpreter being at the head of them, who, as ſoon as he entred, ſaluted his Majeſty with a loud voice, and acquainted him, That the Ambaſſadors were come to do the ſame. It was a ſquare Hall, vaulted, the Floor and Sides of which were covered with Tapeſtry, the Roof being gilt, with ſome Paintings repreſenting ſome ſacred Stories.

The Great Duke himſelf was ſeated on a Chair directly oppoſite to the Door, being rais'd about 3 Steps cloſe to the Wall, with 4 Pillars on the 4 Corners of about 3 Inches thick, being Vermilion gilt, and an Ell and a half high, with the Imperial Eagle upon the ſaid Pillars, beſides which the ſaid Chair was adorned with 4 Turrets or Pyramids Vermilion gilt, with Eagles on the top, after the ſame manner.

They told us, That one *Iſaiah Zinekgraf*, a Native of *Nurenbergh*, was then making another Chair of State for the *Czar*, which was to coſt 25000 Crowns, 1600 Ounces of Silver, and 120 Ounces of Ducat Gold being allow'd for the gilding of it. The *Czar*'s Robe was embroider'd with Pearls, and beſet with precious Stones of all ſorts. On his Head he had a Cap of Martins-skin, and over it a Crown of Gold, ſet with large Diamonds; and in his Hand a very weighty Golden Scepter, likewiſe covered with Diamonds. He was attended on both ſides of his Chair by certain young *Boyars*, very remarkable for their large Stature and Dreſs, which were long Coats of White Damask, their Caps of Lynx-skins, with Gold Chains croſs their Breaſts, and reaching to their Hips, and each of them a Silver Battleaxe upon his Shoulders, whereunto they had put their Hands as if they were ready to ſtrike. On the right ſide, the Imperial Apple of maſſie Gold of the bigneſs of a Cannon-bullet of 48 Pounds, reſted upon a Pyramid of Silver curiouſly wrought, and at the ſame ſide at a ſmall diſtance from thence, a Baſon, an Ewer and Napkin, to waſh and wipe the *Czar*'s Hands after the Ambaſſadors and the Gentlemen had kiſs'd them. All along on one ſide of the Wall, and oppoſite to the *Czar* were placed about 50 *Boyars* on Benches richly clad, with Caps of black Fox Fur of a good quarter of an Ell high, the Chancellor ſtanding on the right ſide about 5 Paces from the *Czar*'s Chair.

The Ceremonies of the Audience.

The Ambaſſadors after having made a deep Reverence at their Entrance into the Audience-Hall, were placed in the midſt juſt oppoſite to the *Czar*, at about 10 Paces diſtance from the Chair; the 2 Gentlemen who carried the Credentials being on the right, and the *Czar*'s Interpreter on the left, the Gentlemen of their Retinue behind them. The *Czar* having made a Sign to the Chancellor, that he would admit the Ambaſſadors to kiſs his Hands, they went one after another to kiſs his Hand, which he reach'd to them with a ſmiling Countenance, holding his Scepter the mean while in his left; this being a Favour allow'd only to the Ambaſſadors of Chriſtian Princes.

This done, the Chancellor came to tell them, That if they had any thing to propoſe, they might do it; whereupon *Cruſius*, one of the Ambaſſadors, Complemented the *Czar* in the Duke our Maſter's Name, and Condoled him on account of the Death of the late Patriarch his Father; adding, That his Highneſs, in hopes we ſhould find him alive, had given them Credential Letters along with thoſe he had ſent to his Majeſty: And ſo taking both the Letters from thoſe that held them, he was going to deliver them to the Great Duke, who commanding the Chancellor to take them, whiſper'd him in the Ear afterwards what Anſwer he was to make. The Chancellor was no ſooner return'd to his former Station, but he began thus:

1634.

The Grand Signior, Czar *and* Great Duke, *tells thee* Philip Cruſius *and* Otto Bruyman, *Ambaſſadors from the Duke of* Holſtein, *That he had received his Highneſſes Letters, that he will order them to be tranſlated, that he will acquaint you with his Intention by Commiſſioners, and that he will give his Anſwer thereto.*

The Chancellor and all the *Boyars* remaining all this while covered, except when the Name of the *Czar*, and of his Highneſs of *Holſtein* were mentioned. The Ambaſſadors then being ſeated on a Bench covered with Tapeſtry, the Gentlemen belonging to their Train were admitted to kiſs his *Czariſh* Majeſty's Hands, who afterwards raiſing himſelf a little in his Chair, ask'd the Ambaſſadors, *Is Duke* Frederick *in good Health?* Whereto Anſwer was given, That he was well at our Departure, *God grant a long and good Life, and all Happineſs to his Majeſty and his Highneſs.*

After this the Preſents were placed before the *Czar*, and after a while order'd by the Chancellor to be removed into another Room: The Ambaſſadors being alſo told by the Chancellor, That they had leave to ſpeak concerning their Buſineſs; unto which they reply'd, That, in reſpect of the Treaty made betwixt the Crown of *Sweden* and his Highneſs, on the account of the Commerce of *Perſia*, they deſired they might treat of this Matter at a private Audience together, which was readily granted.

Then the *Czar* cauſed them to be ask'd, Whether they were in good Health? Whether they wanted any thing? And word was ſent them, That they were to be Treated with Meat from his own Table.

Accordingly we were conducted back to the Antichamber by the ſame *Boyars* who had received us there before; and mounting our Horſes in the ſame place where we alighted before, were re-conducted by our *Priſtaffs* to our Lodgings, in the ſame manner as we came to the Caſtle. We were follow'd immediately by a certain *Knez* of the *Czar*'s Chamber, a Perſon of a goodly Aſpect, and well attended, who as ſoon as he came in, ordered the Cloath to be laid, on which were ſet a Saltſeller, and 2 Vinegar Diſhes of Silver, ſeveral Cups, 2 of Silver, and 3 of Gold, being above a Foot in diameter. Having ſeated himſelf at the end of the Table, he deſired the Ambaſſadors to ſit down by him, the Gentlemen being order'd to ſtand before them; 38 Diſhes of roaſted and boiled Meats, with ſome Paſtry, were ſerved up on Plates, and 3 great Cups full of Sack, Rheniſh-wine and Mead, ſet before the Ambaſſadors. The *Knez* then ariſing firſt, and cauſing the Ambaſſadors to do the ſame, told them, That he hoped they were well pleaſed with the *Czar*'s Entertainment, and ſo took the great Cup full of excellent Mead made with Rasberry-juice, and begun his Majeſty's Health; the ſame quantity being given to the Ambaſſadors and the Gentlemen of their Train, they all drank the ſame Health at once. Some of the Gentlemen would have reach'd for their Cups croſs the Table, which the *Knez* would not allow of, but obliged them to come round about, alledging, That the Table repreſented the Great Duke's. Then he drank the Duke our Maſter's Health to the Ambaſſadors, ſaying, *God grant Health and Proſperity to his Highneſs, and make him long to continue in Amity and a good Correſpondency with his Majeſty.* The next Health was that of the *Czar*'s Son, and ſo they concluded the Feaſt with drinking ſome Goblets of Mulberry and Cherry Wines; the *Knez* being ſo well ſatisfied with a Silver Cup Vermilion gilt, weighing 3 Marks and a half, of which the Ambaſſadors made a Preſent to him at parting, that he order'd it to be carried before him, as he was returning to the Caſtle.

The Ambaſſadors are entertain'd by the *Czar*.

Auguſt 20. Our *Priſtaff* brought word that the *Czar* had been pleaſed to give us leave to go abroad in the City, and to converſe with the *Swediſh* Ambaſſadors, offring his own Horſes for that purpoſe as often as we ſhould have occaſion for them; and in effect 2 Days 6 Horſes were ſent us out of the *Czar*'s Stables, to conduct

Have liberty given them to go abroad

1634. duct us to the *Swedish* Ambassador's Lodgings, with whom we kept a constant Correspondency afterwards. This was look'd upon as a peculiar Favour among the *Muscovites*, who used not to allow even the Servants of foreign Ambassadors to walk about the City without a *Strelitze*: Tho' the 23d of *August*, Dr. *Wendelin* and some others being invited to Dinner by our Ambassadors, were forbidden to see us till after 3 Days; the reason of which we afterwards found to be, because the Cabinet with the Chymical Preparations presented to the *Czar* had not been valued, nor could be without them.

The 24th News being brought, that Mr. *Spiring*, one of the *Swedish* Ambassadors appointed for the management of the Treaty of Commerce in concert with ours, was arrived near *Musco*, the *Muscovites*, who knew him a Person well versed in these Matters, would fain have found out a pretence not to admit him in that Country; but the other *Swedish* Ambassadors insisting upon it, could not avoid sending a *Pristaff* to receive him.

The *Muscovites* New Years Day.

September 1. Was the *Muscovites* New-Years Day; for as they know no other Epact but that of the Creation of the World, which, according to their Opinion, was created in *Autumn*, they begin their Year with this Month. The Procession made on this occasion, consisted of 20000 Persons, who being admitted into the outward Court of the Castle, the Patriarch accompanied with near 400 Priests carrying Banners, Images and Books, came out of the Church on the right hand of the second Court, whilst the *Czar* with his *Boyars* appear'd on the left; and meeting the Patriarch with his Cap in his Hand, they kiss'd, the Patriarch at the same time offering to the Great Duke a Cross beset with Diamonds to kiss, which done, he gave his Benediction to the People, wishing them a happy New Year. Soon after we saw the People lifting up their Petitions, and afterwards to throw them at the *Czar*'s Feet, from whence they were taken up, in order to be answered.

September 3. Mr. *Guldenstern*, *Burans* and *Spiring*, the 3 *Swedish* Ambassadors who were to be joyn'd with us in the Treaty concerning the Passage into *Persia*, had their Publick Audience, and desiring that Commissioners might be appointed to treat with in concert with us, the same was granted. Mr. *Philip Scheiding*, and Colonel *Henry Fleming*, the other 2 Ambassadors were in the mean while treating concerning the Differences about the Limits.

The *Swedish* and *Holstein* Ambassadors admitted jointly to a Conference.

Accordingly the *Swedish*, as well as our Ambassadors, were call'd *September* 5. to the Castle, and conducted into a Hall, where they found the 4 Commissioners of the *Czar* sitting at a Table; they were 2 *Boyars*, and 2 Chancellors, or Secretaries of State. They were very sumptuously clad in strip'd Satin, beset with great Pearls and precious Stones, with Golden Chains cross their Breasts. The 2 first wore a kind of Calots embroider'd with Pearls, having a Jewel of Diamonds and other precious Stones in the midst; the other 2 had theirs of black Fox Fur, made after the common fashion. They entreated the Ambassadors to sit down by them, but had taken care to get into the best Places before them; who being seated, a Bench was brought in for the 2 Secretaries of State, which was placed opposite to the others; besides which, only 2 Secretaries of the *Swedish* Embassy and ours, 2 Interpreters, and a *Muscovite* Clerk, were admitted into the Room. Every one having taken his place, one of the *Boyars* ask'd the Ambassadors, Whether they wanted any thing? And it being answered, That they did not; but returned their Thanks to his *Czarish* Majesty for the care he took of them, they all rise up, and the other *Boyar* began.

The Grand Seignior, Czar, *&c.* (and after a long recital of his Titles, all being sat down again, proceeded) *gives you Lords Ambassadors from the Crown of* Sweden, *and the Duke of* Holstein, *to understand, that he has caused your Letters to be translated, and has hearkened to the Propositions made at your publick Audience.*

Then they all arose again, and the other *Boyar* taking off his Calot, began: *The* Grand Seignior, Czar, *&c.* (and so enumerating the Titles went on) *wishes the Queen of* Sweden, *and Duke of* Holstein, *all Prosperity and Victory over their Enemies, and lets you know, that he has read their Letters, and well understands their Intention.*

The third Commissioner then arising said; *The* Grand Seignior, *&c. has seen the Letters you brought him, and is satisfy'd that all Credence ought to be given in what you propose, and shall be done so accordingly.* 1634.

The fourth added only, That the *Czar* had appointed them Commissioners to receive their Propositions, and thereupon read the Names of the Commissioners: 1. *Knez Boris Michaelowitz Likow Bolenscow*, Governor of *Twere*. 2. *Knez Basili Jeanowitz Stresnow*, Governor of *Tarsock*. 3, 4. The 2 Secretaries of State, call'd by them *Dumnoi Diaken*, were *Joan Tarascowitz Grammatin*, Lord Keeper or Chancellor, and *Joan Offonassvesin Gavaurenow* Vice-chancellor.

Then they all arise, and Mr. *Eric Guldenstern*, one of the *Swedish* Ambassadors, after having return'd the *Czar* thanks in her Majesty of *Sweden*'s Name, read to the Commissioners their Propositions in the *German* Tongue; but ours being very large, we thought it sufficient to deliver the same with the *Swedish* Propositions: The Commissioners carried them up immediately to the Great Duke's Chamber; who, after half an Hour sent us word by the Vice-chancellor, That His Majesty would have them translated, and let us know his Resolution thereupon, with the soonest.

The 10th, the 2 *Swedish* Ambassadors, who managed the Affairs of the Limits, had their last private Audience.

A Cavalcade of *Tartars*.

The 12th, 3 Ambassadors sent by the *Tartarian* Prince of *Casan*, one of the *Czar*'s Vassals, with a Train of 16 Persons, had their Publick Audience: They were clad only in course red Cloth Cassocks, with Bows and Arrows in their Hands; but at their return they appear'd in Satin and other Silk Vestments, which the *Czar* had bestow'd upon them; this, and a Present of some Furs, being their chief Errand, for which they send once a Year such an Embassy to *Musco*.

The 15th, our *Pristaff* brought us the News of the Great Dutchesses being delivered the Day before, which was Christned *Sophia*, according to the Custom of *Muscovy*, where they Baptize their Children immediately without any further Ceremony: We had double Allowance given us upon this occasion.

A *Turkish* Ambassador makes his Entry.

The 17th, we saw a *Turkish* Ambassador making his Entry into *Musco*: He was receiv'd without the Gates by a Body of 16000 Horse, who had only 6 Colours, many Trimbals and Hautboys, but only 6 Trumpets; besides which, there appear'd a great number of *Boyars*, and other Officers, most magnificently equipp'd, and excellently well mounted, and about 20 led Horses out of the *Czar*'s Stables, with Silver Chains instead of Bridles. The Gentlemen of the *Swedish* Ambassadors, and our Retinue, made up a Body of 50 Horse, and went about a League out of Town to meet the *Ottoman*, who perceiving us, look'd very earnestly upon us, we keeping along with him for a considerable time, to take a view of his Equipage and Cavalcade, which was ordered thus. (1.) 46 *Strelitzes* armed with Bows and Arrows instead of Firelocks, and Scimeters on their Sides. (2.) The *Pristaff* in a Brocado'd Robe, follow'd by 11 *Grecian* Ecclesiasticks, and *Greek* and *Turkish* Merchants in Gowns made of red flower'd Velvet. (3.) The Ambassador's Steward alone, with a Guard of 4 Bowmen behind him. (4.) 2 Horsemen richly accoutred. (5.) The Ambassador alone: He was of a middle Stature, much tann'd in the Face, with a long black Beard and a white Turbant on his Head, as had all the rest of his Train. His Vest was of white flower'd Satin, and his upper Garment of Satin with Gold Fringes, lined with Martins-skin. The Waggon he was in, was only of Wood, but covered with very rich Tapestry. He was follow'd by about 40 Baggage Waggons, managed by 1 or 2 Boys each. Being come within a quarter of a League of the Gates, where he supposed they were ready to receive him, he mounted on a very fine *Arabian* Horse, and was immediately after met by the 2 *Pristaffs*, who continued on Horseback till the Ambassador had alighted, and he on the other hand kept on his Turbant, tho' the *Pristaffs* pull'd off their Caps, as often as they mention'd the *Czar*'s Name. After the Complements were over, the Ambassador did what he could to get on Horseback first, but they having brought him a tall skittish Horse, with a high *Muscovite* Saddle, the *Pristaffs* got up before him, and placing themselves on both sides conducted him to the House appointed for the reception of Ambassadors, which was rebuilt since our Arrival at *Musco*.

The 19th we had a second Conference at the Castle joyntly with the *Swedish* Ambassadors: And the 23d the *Turkish* Ambassador was conducted to his first Pub-

1634. lick Audience in the following manner: Firſt of all rid 20 *Coſſacks* on White Horſes; theſe were follow'd by the *Turkiſh* and *Greek* Merchants, and theſe by the *Muſcovites* that carried the Preſents. (1.) 20 Pieces of Satin ſtrip'd with Gold carried by 20 *Muſcovites*, marching all in a File. (2.) A Golden Croſs of about a Finger's length, ſet with Diamonds, carried by a *Muſcovite* in a Baſon. (3.) A Veſſel of Rock-Cryſtal, adorn'd with Gold and precious Stones. (4.) A Belt for a Scymeter enrich'd with Gold and precious Stones. (5.) A very large Pearl laid on a Piece of watered Taffata in a Baſon. (6.) Harneſs for 2 Horſes, embroider'd with Gold and Pearls. (7.) A very fair Diamond-ring in a Baſon. (8.) A Ruby as broad as a Crown-piece of Silver enchac'd in Gold, carry'd in a Baſon. (9.) A very fine Battle-Ax, ſhap'd like a Scepter. After theſe march'd 8 *Turks*, two a-breaſt: Theſe were follow'd by 2 young proper Fellows, who carried upon a great piece of Silk the Credentials, which tho' folded were at leaſt half an Ell broad. The *Greek* Eccleſiaſticks were conducted to their Audience not till the 28th, being accompany'd by a great number of *Muſcovite* Prieſts: They were dreſs'd in Violet-Chamlet, and had a Croſs carried before them; their Preſents conſiſted in ſome Pieces of Satin and Taby's with Gold-flowers, a Prieſt's Cope, and ſome Relicks of Bones.

The Turkiſh Ambaſſador admitted to Audience.

Our Ambaſſadors having about this time received Letters from the Elector of *Saxony* to the *Czar*, they were conducted the 29th of *September* to a Publick Audience, as before, the Letters being carried upon black and yellow Taffata: The *Czar* enquir'd after the Elector's Health, and order'd us to be furniſh'd with Meat from his own Table, which was ſent us, but not ready dreſs'd.

Octob. the 1ſt, the *Muſcovites* celebrated one of their Annual Feſtivals in their Church of the *Bleſſed Trinity*; or, as the *Germans* call it, of *Jeruſalem*. The Patriarch preſented the *Czar* in the outward Court with an Image painted upon Paſt-board, unto which he made a low Reverence, and afterwards kiſs'd the Golden Croſs, wherewith the Patriarch alſo touch'd his Forehead and Temples, and ſo went to Church, where they concluded the Service. The *Greeks* that came along with the *Ottoman* Ambaſſador were admitted into the Church, a thing not at all allow'd in *Muſcovy* to any other Chriſtians.

A Muſcovite Feſtival.

Octob. 8. We had a third Conferencee in Conjunction with the *Swediſh* Ambaſſadors with the *Czar*'s Commiſſioners, which laſted 2 hours.

The 12th of *October* we ſaw the Great Duke go on Pilgrimage to a Church not far from the City, being accompany'd by above 1000 *Knez* and *Boyars* on Horſe-back, 10-a-breaſt. The Great Dutcheſs, with the Prince Royal and the Princeſs, follow'd in a large Chariot drawn by 16 White Horſes; and after her came 22 other Chariots full of Ladies of Quality, being guarded on both ſides by 100 *Strelitzes*, to keep the People from thronging up to the Chariot in which the Great Dutcheſs was, the Curtains of which, as well as of all the other Ladies, were drawn cloſe; but the Wind having blown thoſe of the Great Dutcheſſes a little on one ſide, I had the good Fortune to ſee her, ſhe being very handſome, and moſt ſumptuouſly attired.

The Great Duke's Pilgrimage.

The 23d, the *Swediſh* Ambaſſadors and ours, had a fourth Conference with the *Czar*'s Commiſſioners, in which we put an end to our Negotiation. The *Swediſh* Ambaſſadors after their Audience of leave the 28th of *October*, departed from *Muſco* the 7th of *November*; ſome for *Livonia*, the reſt directly for *Sweden*.

Nov. the 19th. In our 5th and laſt Conference, we were aſſured that the *Czar* had granted to the Duke of *Holſtein* (what had been deny'd to many others) a free Paſſage through *Muſcovy* into *Perſia*; but that before his Ambaſſadors went thither, they muſt return to *Holſtein*, in order to bring back the Ratification of the Treaty concluded betwixt them.

The Czar grants the Demands of the Holſtein Ambaſſadors.

After we had thus happily finiſh'd our Negotiations, we diverted our ſelves with Feaſting amongſt ſome of our Friends; and the 22d ſaw a ſolemn Proceſſion, at which the Great Duke and Patriarch being preſent, a boarded Paſſage was made from the Caſtle to the Church, which was built in a Place where the Image of our Lady was found.

A Muſcovite Proceſſion.

Firſt of all went a Man with an Ewer and a Napkin. (2.) Three Men with Banners, half red, half white. (3.) 61 Prieſts in their Copes. (4.) Four Cherubins carried upon long Poles. (5.) A Man with a Lanthorn faſten'd to a long Pole. (6.) 40 Prieſts. (7.) 8 Prieſts carrying a great Croſs faſten'd in a great Piece of Timber, double-croſs'd. (8.) 100 Monks and Prieſts, every one with a painted Image in his hands. (9.) Two Men carrying a great Image covered. (10.) 40 Prieſts. (11.) Three Men holding a large Image, adorn'd with precious Stones. (12.) Another leſſer Image. (13.) Four Prieſts ſinging. (14.) Another Image. (15.) A Croſs of Diamonds carried in a Baſon. (16.) Two Men carrying each a lighted Taper. (17.) The Patriarch in his Potificalibus under a Blue Canopy, leaning upon the Arms of two Men, ſurrounded by about 50 Prieſts. (18.) The *Czar* under a red Canopy, ſupported by two Lords, and attended by a great number of *Boyars*. (19.) The Great Duke's Chair of State carried by two Men. (20.) The Great Duke's Horſe. (21.) His Sledge drawn by 2 White Horſes. 1634.

Dec. 12. We had another ſight of a *Crim Tartar* Embaſſy, who were to the number of 32 conducted to Publick Audience. Being come into the Audience-Hall, ſome ſate, others lay down, on the Ground, where they were regaled each with a Goblet of Mead. The two Heads of the Embaſſy had a Preſent of Brocade Garments made them; the others of Scarlet, and thoſe of the moſt inferiour Rank, with ordinary Stuffs, ſome Furs and Caps of Martin-skins; the Great Dukes of *Muſcovy* being always willing to court the Friendſhip of theſe barbarous Neighbours by ſuch like Trifles, rather than to expoſe their Frontiers to the South to their Inſolencies.

An Embaſſy of Crim Tartars.

The 16th being the day appointed for our Audience of leave, we were conducted to the Caſtle with the ſame Pomp as at our firſt Audience, except that, by reaſon of the Snow, we had inſtead of Horſes, two ſumptuous Sledges, one being lin'd with Crimſon Satin, the other with Damask of the ſame Colour, with White Bear-skins, and rich Tapeſtry-hangings over the Backs: the Harneſſes, which were adorn'd with Fox-tails hanging down, being ſuitable to the reſt: The *Priſtaffs*, each in his Sledge, went on the right hand of the Ambaſſadors. As ſoon as they came into the Great Duke's Preſence, they being deſired to ſit down upon a Seat prepared for that purpoſe, the Chancellor ſaid, *The* Grand Signior, Czar, *&c. tells you, the Lords Ambaſſadors, that His Highneſs, Duke* Frederick *of* Holſtein, *having ſent you to his Czariſh Majeſty with the Letters he has received, he has upon your Entreaty cauſed your Propoſitions to be communicated unto, and examined by his* Boyars *and Counſellors,* Knez Boris, *&c. upon which all ſides have agreed to the Treaty you have aſſigned. His Majeſty has alſo received the Letters you brought from* John George, *Elector of* Saxony, *the Contents whereof he has alſo conſidered: You ſhall immediately receive his Majeſty's Anſwer, both to the Duke* Frederick *of* Holſtein, *and to thoſe of the Elector* John George.

The Ambaſſadors Audience of Leave.

Whereupon he having delivered them the Letters, which the Ambaſſadors received with a low Reverence, the great Duke ſaid, *When the Ambaſſadors ſhall be arrived at the Court of the moſt ſerene* John George, *Elector of* Saxony, *and His Highneſs Duke* Frederick *of* Holſtein, *they will ſalute them from me.*

After which the Gentlemen of their Retinue being admitted to kiſs the *Czar*'s Hand; and the Ambaſſadors having given their moſt humble Thanks to His Majeſty for all the Favours they had received at his Hands, took their leaves; and being reconducted in the uſual manner to their Lodgings, were entertained with 46 Diſhes of Fiſh, boil'd, broil'd, and fry'd in Oil (it being their Faſt) Knez *Iwan Wolf* being preſent at the Entertainment, who as well as the Groom of the *Czar*'s Stables, and the Butler, had each a Cup of Vermilion gilt preſented them by the Ambaſſadors, and the reſt of the Attendants, being 16 in number 32 *Rubles*, amounting to about 64 *French* Crowns.

The next day our *Priſtaffs*, with their Interpreters, came to ask us how many Horſes we ſhould ſtand in need of for our Journey; and having been told that we ſhould want 80, each of them received a Preſent of a large Drinking-Cup, Vermilion-gilt; the like was ſent to the Head-Secretary of the Chancery, and ſome *Boyars*.

The next day a new *Priſtaff*, named *Bogidan Fzergewitz Gomodef*, was preſented to us, who was to conduct us to the Frontiers.

The 22d, The Lord Treaſurer's Secretary brought the Preſents deſign'd for the Ambaſſadors, and their Retinue, from the *Czar*, they were carried by 12 *Muſcovites*. Eleven *Zimners* (each of which contains 20 Pair) of the beſt kind were for the Ambaſſadors;

1635. The Officers, Gentlemen, Pages, Harbinger, the Clerk of the Kitchin, and the Master of the Waggons, had each a Zimmer of Martin-skins for their share; the rest had some two, some but one pair allotted them. The Secretary had a Cup Vermilion-gilt for his Pains, and the Bearers 30 Crowns. The *Czar* also did us the Favour to desire us to stay till after *Christmas*, which we excused, being desirous to lose no time in order to our return into *Germany*; but considering that we were hereafter to travel into *Persia*, *Michael Cordes* was sent with 6 more to *Nisa*, with Orders to build such Ships as we should stand in need of upon the *Wolga*, and the *Caspian* Sea.

The Czar's Presents to the Ambassadors.

They leave Musco. *December* the 24th, being the day appointed for our departure from *Musco*, our two *Pristaffs* came with the same Sledges we had made use of at our last Audience, and some *Strelitzes* to conduct us a little way out of Town. We travell'd that day, and the next following night 90 Versts (18 *German* Leagues) to a Village call'd *Klin*, where we had a Sermon, it being *Christmas*-day: In the Afternoon, we prosecuted our Journey, and travelling all night, arrived the 26th at *Twere*, and the next day to *Turfock*, and the 31st to *Novogorod*, being 120 *German* Leagues from *Musco*, which we travell'd in 7 days; the *Muscovite* Horse being used frequently to travel in the Winter-Season, when the Roads are very plain, 12 *German* Miles without drawing Bit.

Come to Klin.

Twere, Turfock, Novogorod.

1635. The 1st of *January*, we set out from *Novogorod* for *Mokriza*, 36 *Versts* (7 *German* Leagues.)

Mokriza.

Twerin. The 2d we came to *Twerin*, 6 Leagues and an half.

Orlin. The 3d we travell'd 6 Leagues to *Orlin*.

Lilienhagen. The 4th we travell'd day and night 12 Leagues, 8 to *Sariza*, and 4 to *Lilienhagen*.

Narva. The next day we got 7 Leagues farther to *Narva*.

Revel. The 7th the Ambassadors set out from *Narva* (having sent their Baggage before) for *Revel*, where we arrived the 10th, and staid there for 3 Weeks; but the *Baltick* Sea continuing unnavigable, it was resolved to prosecute our Journey by Land, through *Prussia*, *Pomerania*, and *Mecklenburgh*.

Accordingly the Ambassadors having bestowed most of their Train to board with Mr. *Henry Kosen*, left *Revel* the 30th of *January*, and came the 2d of *February* to *Pernau*, a small Place, but strengthned by a good Castle, fortified after the *Muscovite* Fashion. It lies upon a River of the same Name; which arising out of a great Forest near the Castle of *Weissenstein*, exonerates it self into the *Baltick*, not far from this Place. It is numbred among the *Hanseatick* Towns.

Pernau.

The *Swedes* took it from the *Poles* 1562. who recovered it 1565. The *Muscovites* made themselves Masters of it 1575. but were forced to surrender it to the *Poles*, with the rest of *Livonia*, 1617. The *Swedes* took it, and remain'd in Possession of it ever since. We met here with the Countess Dowager *de la Tour*, of the Family of *Hardeck* in *Austria*, who did us all imaginable Honour, and gave us Letters for Count *Matthew de la Tour* her Father-in-Law.

To Riga. The 6th we made our Entry into *Riga*, where we were feasted by the Governor, and several others of our Friends.

To Mittau. The 13th we set forward from *Riga* towards *Mittau* in *Courland*, where we arrived the 14th about noon, in Company of a certain Ambassador of *France*; who being sent by the *French* King, *Lewis* the 13th, into *Muscovy*, his Collegue, *James Rousel*, had found means by the ill Offices he did him with the Patriarch, to get him banish'd into *Siberia*, from whence he was now returning into his own Country, being not above 36 years of Age.

Courland. The small City of *Mittau* is situate in *Semigallia*, a Province of *Courland*, being the Residence of the Dukes, within 6 Leagues of *Riga*. This Dutchy was anciently part of *Livonia*, from which it is separated by the River *Dune* or *Dwina*; but when the Master of the *Teutonick* Order was forc'd to submit to the Protection of the Crown of *Poland*, *Godard Kettle*, of *Nassalrath*, the last Master of the *Teutonick* Order in *Livonia*, was made Duke of *Courland* while it was a Fief of that Crown, whose Posterity enjoy it to this day.

We travell'd the same Night 3 Leagues farther to a Village, call'd *Dobben*, where we were forced to sup upon hard Cheese, brown Bread, and sour Beer.

Come to Badvo in Poland. The 15th we made 7 Leagues to *Badvo*, on the Frontiers of *Poland*, where we were very splendidly entertain'd by an ancient Gentleman, whose Name was *John Amdod*, both that night and the next day till Afternoon; so that we could go no farther that day than to *Hasshof*, 4 Leagues from thence, where we were fain to go to Rest without a Supper. 1635.

The 17th we travel'd 6 Leagues further to *Waltzan*.

On the 18th 6 Leagues to *Memel*, a pleasant little City at the very Mouth of the Lake of *Courland*, called *Courisshef*. Its Harbour is very commodious, and the Castle strongly fortified, being surrounded by the River *Tange*, which falls here into the Lake. It was built 1250, and by the Fryars of the Order of *Livonia*, sold to the Master of the Order of *Prussia*; and with that Dutchy since come into the possession of the Electors of *Brandenburgh*, by vertue of the Truce concluded 1635. betwixt *Sweden* and *Poland*. *Memel.*

The 20th we came to *Bulcapen*, 5 Leagues from *Memel*; and the 21st travell'd 8 Leagues to *Coningsberg*. This City, which is the Capital of the Ducal *Prussia*, formerly under the Jurisdiction of *Poland*, is situate upon the River *Pregel*. It was built by the Knights of the *Teutonick* Order in the 13th Century, and by them call'd *Coningsberg*, (i. e. *Mount Royal*) in honour of *Ottacurus* King of *Bohemia*, who had sent them considerable Supplies against the neighbouring *Pagans*, in the Year 1300. That part of the City which is call'd *Lebekiah's*, was added to it, and 1380 the *Kniphof*; each of which has its peculiar Magistrates and Jurisdiction. The Castle, or Ducal Palace, was built in the last Age, by *George Frederick* of *Brandenburgh*, then Duke of *Prussia*: Here is to be seen a Hall most artificially built, without Pillars, being 274 foot long, and 59 broad. The Library, which contains many most excellent Books, and among the rest certain Manuscripts of *Albert* of *Brandenburgh* first Duke of *Prussia*, who also founded an University here. The River *Pregel* rises in *Lithuania*, and disemboguing about a League below the City into a Gulph call'd *Frishaf*, draws a considerable Commerce to this City, and consequently makes it very populous; abundance of Oak, Soap-ashes, Wax, Honey, Mead, Leather, Furs, Wheat, Rye, Flax and Hemp, being brought hither from *Poland* and *Lithuania*: In exchange of which, the *English* and *Dutch* bring either Iron, Lead, Tin, Cloath, Wine, Salt, Butter or Cheese. The *German* is the general Language here, tho' most of the Inhabitants understand also the *Polish*, *Lithuanian*, or *Courland* Tongues. *Bulcapen.* *Coningsberg.*

We went from *Coningsberg* the 24th, and came the next Day to *Elbing*, a City situate upon a River of the same Name, in the Royal *Prussia*. It was considerably strengthned in its Fortifications by the *Swedes* whilst they were in possession of it, of the Fort of *Pilau*, belonging to the Elector of *Brandenburgh*, at the entrance of the Gulph of *Frishaf*, were also in the possession of the *Poles*, this place might be considerably improved in its Traffick. *Elbing.*

The 27th. we arrived at *Dantzick*, where during our stay of 17 Days, we were well entertain'd both by the Magistrates and several of the Inhabitants. Its origin, tho' not of a very ancient Date, is uncertain; some attributing it to the *Danes*, others to the Dukes of *Pomerania*. Certain it is that it was for a considerable time in the possession of the last, afterwards by the *Poles*, and then by the Masters of the *Teutonick* Order in *Prussia*, from whom this City having redeem'd it self 1454, submitted to *Casimir* King of *Poland*, with a Reserve however of many Privileges; for they have their Seat and Suffrage in the Diet of that Kingdom, are govern'd by their own Magistrates, who finally determine all Criminal Causes without Appeal, and all Civil, not exceeding 1000 Livres; and with the Approbation of the Council of 100, impose necessary Taxes upon the Inhabitants. It is situate upon the *Vistula* and *Rodauna*, and tho' the River is so shallow, that no Ships of any Burthen can come up to the City, it is computed, that one year with another 730000 Tuns (2 of which make one Last) of Wheat, are exported from thence. It is one of the 4 Cities that have the Superintendency in the *Hanseatick* League. *Dantzick.*

March 16. we departed from *Dantzick*, and came the 25th to *Stettin*, the Capital City of *Pomerania*, situate upon a Descent of a Hill under 53 Degrees 27 Minutes Latitude, and 38 Degrees 45 Minutes Longitude. The River *Oder* hereabouts emits 4 Branches, one of which keeping its Name, runs by this City; the other 3 dispersing themselves through the Country, are joyn'd by 60 several Bridges, which put together are 996 *German* Ells long, and 24 foot broad, with a fair paved Causey betwixt them, guarded by a Royal Fort. *John Frederick* Duke of *Pomerania* laid the first Foundation of the Palace, a noble Structure, and famous *Stettin.*

1635. mous before the Wars for its Library and other Rarities. 'Tis one of the *Hanſeatick* Towns, and formerly enjoy'd great Privileges, moſt of which are loſt ſince the *Swedes* became Maſters of it, who however have much ſtrengthened its Fortifications.

Roſtock. *March* 29. we came to *Roſtock*. This City is ſituate upon the River *Warne* in the Dutchy of *Mecklenburgh*, but becauſe the Ships are forced to unload at the mouth of the River, call'd *Warnimunde*, it is not very fit for Traffick. It was built 1160 out of the Ruins of *Keſſin*, deſtroyed by *Henry*, ſirnamed the *Lyon*, Duke of *Saxony*. Its Univerſity is one of the moſt ancient in *Germany*, being founded 1419. The *Swedes* took it 1631. from the *Imperialiſts*, who about 2 Years before had made themſelves Maſters of it, and the whole Dutchy of *Mecklenburgh*.

Wiſmar. The next following Day we travell'd from *Roſtock* to *Wiſmar*, being 7 Leagues. It owes its Origin to *Henry* of *Jeruſalem* Duke of *Mecklenburgh*, who made it a City 1266. Both its Port and Situation are exceeding commodious, being ſeated upon the *Baltick*, amongſt the Fens, its Citadel being fortified with 5 regular Baſtions. *Adolphus Frederick* Duke of *Mecklenburg*, took it from the *Imperialiſts* 1632. with the aſſiſtance of the *Swedes*, who ever ſince remain in poſſeſſion of it.

The laſt of *March* we came to the Caſtle of *Schonberg*, belonging to the Duke of *Mecklenburgh*, from *Lubeck.* whence the Ambaſſadors went *April* 1. to *Lubeck*.

This City is ſituate betwixt the Rivers of *Trave* and *Wagenitz*, under 28 Degrees 20 Minutes Longitude, and 54 Degrees 48 Minutes Latitude, about 2 Leagues from the Sea ſide. It lies in that part of *Holſtein* which is call'd *Wagria*, and has the firſt Rank in the Supergiſters of which are kept in this City. Its place in the Diet of the Empire, is alternatively with the City of *Worms*, its Contributions it is to pay to the Empire, towards the Charges of the Journey to *Rome*, amounting to 1980 Livres *per Month*. We went the ſame Afternoon from hence to *Arnsbeck*, the Reſi- *Arnsbeck.* dence of *Joachim Erneſt* Duke of *Holſtein Sunderburgh*, who having Married our Princes Siſter, a Coach with 6 Horſes was ſent to fetch the Ambaſſadors to the Caſtle, where they Supp'd at the Duke's Table, and lay all Night.

The next Day after Breakfaſt we continued our Journey to *Pretz*, a place famous for a rich and ſump- *Pretz.* tuous Convent of young *Proteſtant* Ladies of Noble Families, who are maintain'd here, till they are Married.

The 6th of *April* towards Noon we came to *Kiel*, ſi- *Kiel.* tuate upon the *Baltick* Sea, famous for its Fair held there about *Twelfthide*; and arrived the ſame Night ſafely at *Gottorp*, where the Ambaſſadors gave the next *Gottorp.* Day a full account of their Tranſactions, to the Duke our Maſter.

CHAP. II.

The Ambaſſadors of the Duke of Holſtein's *Travels into* Muſcovy.

HIS Highneſs having underſtood the good Succeſs of this Embaſſy, in relation to their Paſſage through *Muſcovy* into *Perſia*, he ordered all the neceſſary Preparations to be made for the ſecond Embaſſy, and the Retinue to be conſiderably augmented, which was to conſiſt of a Steward, a Secretary of the Embaſſy, 4 Gentlemen of the Chamber, 8 other Gentlemen, among whom were the Miniſter and Interpreter; 4 Pa- The Ambaſſadors Train for the Second Voyage. ges of the Chamber, 4 other Pages, 4 Grooms of the Chamber, 4 Muſicians, a Controuler, a Harbinger, 2 Sumpter-men, an Overſeer of the Servants, 2 Trumpeters, 2 Watchmakers, 8 Halberdiers, who were of ſeveral Trades, 10 Footmen, a Clark of the Kitchin, 2 Head and 1 Under-Cook, a Maſter of the Waggons and his Servant, 10 Servants for the Gentlemen, 3 Interpreters, for the *Muſcovian*, *Perſian*, and *Turkiſh* Languages; 12 Seamen, 30 Soldiers, and 3 *Muſcovite* Officers with their Servants to be taken into our Service in *Muſcovy*.

All Summer and part of Autumn being ſpent in providing what was thought neceſſary for ſo long a Voyage, and ſo great an Embaſſy, we ſet out from *Hamborough*, *October* 21. 1635. and came the 24th to *Lubeck*; where having ſpent 2 Days in embarking our Baggage and 12 Horſes at *Travemund*, we went aboard a new Ship the 27th, and ſet Sail with a fair Wind the 28th, but heightned by Noon, and turn'd to a Tem- They Embark. peſt by Night, which forced us upon the *Daniſh* Coaſt by the 29th, which our Maſter miſtaking for the Iſle of *Bornholm*, we had been infallibly loſt, if by Break of Day we had not diſcovered Land.

Having altered our Courſe, we came in ſight of the Iſle of *Bornholm* by 9 of the Clock in the Morning, and thus continued our Courſe with a brisk Gale and all the Sail we could make, till 10 a Clock at Night, when every Body diſpoſing himſelf to Reſt, as thinking themſelves out of danger, the Ship ſtruck on a ſudden upon a Rock, which was covered with Water, with ſuch violence, that every Body thought we had Are in danger of being Shipwrecked. been at the end both of our Lives and Voyage. The Darkneſs of the Night was no ſmall addition to our Affliction, we put out our Lanthorn, and gave Signs of Diſtreſs by the Diſcharge of ſeveral Muſquets, but in vain, the Ship ſoon after beginning to lie on one ſide; ſo that all the Night long there was nothing to be heard among us, but moſt dreadful Outcries and Lamentations, the Maſter of the Ship himſelf being reduced to Deſpair, weeping bitterly among the reſt.

About One in the Morning we diſcovered a Fire, which made the Ambaſſadors order the Boat to be caſt out; but before they could get into it, it was ſo full of water, that they were forced to continue in this diſmal poſture till Break of Day, when the Wind being ſomewhat abated, and finding our ſelves near the Iſle of *Oeland*, 2 Fiſhermen came on board us, who, for a good Reward, landed the Ambaſſadors firſt, and ſome of their Retinue afterwards.

About Noon the People of the Iſland came with their Boats to get off the Ship, and whilſt they were buſie in accompliſhing it, the Wind turning to the N. W. raiſed the Waters to that degree, that we might paſs without much danger into the Sea, whither we were no ſooner gotten, but the Wind veering about to the S. W. carried us fairly through the Streights of *Cal-* Come to *Calmar.* *mar*, a Paſſage very dangerous even in the midſt of the Summer, by reaſon of the many Sand-banks thereabouts.

Here we ſtay'd for the Ambaſſadors coming; who having travell'd by Land, ſince they left the Ship, reimbark'd *November* 1. on board us, near an old ruin'd Fort, call'd *Ferſtat*. So ſoon as we came to *Calmar*, one of our Pages was diſpatch'd to *Gottorp* to get new Credential Letters, the others having been quite ſpoiled by the Sea water. Some Debates there were alſo here, whether we ſhould continue our Voyage by Land or by Sea; and the laſt being reſolved on, we provided our ſelves with 2 Pilots, who conducted us through the Sands into the open Sea.

The 3d we paſs'd within ſight of the Rock call'd, *The Swediſh Lady*, 8 Leagues from *Calmar*; and about Noon diſcovered the Caſtle of *Bornholm*, in the Iſle of *Oeland*. Towards Night, when we had ſcarce doubled the Point of the Iſle, there aroſe ſuch a Tempeſt from the N. E. that our Ship was almoſt full of Water, and to our great Misfortune, were forced to ſupply the defect of our Pump, which was out of order, with our Kettles and other Veſſels, to empty it. It continued till the next Day about Noon, when to our good fortune, it began to change, and carried us by Night in ſight of *Gothland*. This Iſle, which compre- *To Gothland.* hends 18 *German* Leagues in length, and near 4 in breadth, lies juſt oppoſite to the Province of *Schonen*, at 58 degrees Latitude: It is full of Rocks, Juniper, and Fir-trees, and has on the Eaſtſide *Oſtergaar*, *Sle-*

1635. *daf*, *Sandnig*, *Narvig*, and *Heiligoholm*, all very good Harbours. *Ostergaar* is a small Isle at an equal distance from the 2 Points of the great one, having a convenient Harbour after you are pass'd the Sands, which reach a good way into the Sea. *Sleid.af* lies to the Mouth of *Ostergaar*; here the Ships lie safe against all the Winds, being sheltred by 4 Sand-hills, which break the violence of the Waves. This Island has but one Town, call'd *Wisby*, but above 500 Farms; the Churches being built at a Leagues distance off one another, (like as in the Isle of *Oeland*) the Steeples of which, are sure Guides to the Ships at Sea. The Inhabitants are of *Danish* Offspring, tho' now subject to the *Swedes*, unto whom they pay yearly 50 Tuns of Pitch. Their chief Commodities are Cattle, Wood, and especially Deal-boards. I had a mind to take a view of the Town of *Wisby*, which being built upon the descent of a Hill near the Seaside, and fortified with some Bastions, together with the Ruines of 14 Churches, Houses, Gates and Walls of Freestone and Marble, shew it to have been much larger and more considerable than it now is; it being generally reported, that some time after the 8th Century, when its first Foundation was laid; it contained above 12000 Inhabitants, most Merchants, besides Foreigners, who flock'd thither in great numbers from all the Northern parts to Traffick. The first Regulation of the Maritime Affairs relating to the *Hanseatick* League, being said to be made here; but the Port is now quite lost.

The 5th the Wind began to increase, which made us choose the main Sea towards Night.

Tegeroort. The 6th meeting with a *Dutch* Vessel, she bid us steer our Course towards the Isle of *Tageroort*, which we reach'd before Night, but were forced back to Sea again.

The 7th by Noon, we were again come to the Point of *Tageroort*, but the Master of the Vessel mistaking it for *Oergensholm*, engaged us imprudently in a very dangerous Passage, call'd the *Hondesshuig*, out of which we had enough to do to escape by Night, when he perceived his Error by the Church-Steeple. All that Afternoon we kept within sight of *Livonia*, and came towards Night within sight of *Narga*: *Narga.* At the Entrance of the Harbour, our Master and Mate could not be perswaded either to go into, or come to an Anchor before *Tageroort*, but notwithstanding the Tempestuous Weather, would keep the main Sea; so that we had the misfortune to see both our Main-mast and the Mizen, and soon after part of the Forecastle taken away by the Winds.

The worst of all was, that on the 8th we found we had pass'd the Harbour of *Revel*, and the Tempest encreas'd to that degree, that Heaven and Earth seem'd to be in danger of being turn'd topsie-turvy; we must infallibly have been lost then, had not one of our Seamen in the Afternoon discovered *Hogland*, where we cast Anchor about 7 at Night at 19 Fathom Water. The Ambassadors going on shoar to take a view of the Country, who whilst they were debating whether they should go forward by Sea to *Narva*, or return towards *Revel*, comes the Master of the Ship about 9 a Clock and tells the Ambassadors, that the Wind being turn'd East, they were in the greatest danger that could be of being forc'd on shoar, unless they weigh'd Anchor immediately, and steer'd their Course for *Revel*; the Ambassadors having given him for Answer, That he might do what he thought best; and running immediately on board, they began to weigh Anchor, but in less than half an Hour the Wind rise again with such violence, that the Master changes his Mind, and resolved to cast Anchor again, but to no great purpose, it being impossible to fix our Anchors time enough to avoid Ship-wreck; so that nothing was left us in this Extremity, but to have recourse to our Boat, in which the Ambassadors, with some of their Retinue, were carried on shoar; the Ship striking not long after several times against a Rock, split and sunk; however, all our Men, the greatest part of our Goods, and 7 Horses were saved, whereof 2 died the next Day. *Are Ship-wrec'd.*

We sheltred our selves in some miserable Cottages inhabited by *Livonians*, where we dry'd our Cloaths.

The 10th we bestow'd in getting out some more of our Goods, especially in the Afternoon, when the Tempest being somewhat allay'd, we laid our Cloaths, Books, and other Goods, to dry in the Air. Our greatest Loss was a Clock valued at 1000 *l.* Sterling, which was broken to pieces by the Horses, struggling to get loose. Our next Misfortune was the want of Necessaries, for our Provisions being either lost or spoil'd by the Sea water, we were in great fear of being reduc'd to the extremity of feeding upon Barks of Trees, as had happened to some that were forced to Winter in this Island. We supply'd our present Necessities with what little Bisket we had saved, which being soak'd in Salt-water, we boil'd in fresh with Fennel and Cummin-seed, which we made into a Pottage. One Day we had the good fortune to catch as many Fish in a little Brook, as furnish'd us with two good Meals. 1635.

The Isle of *Hogland* (so named from its height) is to be seen at a great distance at Sea, being about 3 Leagues in length, and one in breadth, covered all over with Rocks, Fir-trees, and Thorns. We saw indeed some Hares, but our Dogs could not overtake them through the Thorny Woods, and cross the Rocks. *The Isle of Hogland.*

The 17th the Ambassadors having got 2 Fisherboats to transport them to the Continent, embark'd each with a Retinue of 5 Persons; but it being 12 Leagues over, we were in no less danger than before, the Boats being very old, and the Sails ragged, and so order'd that they were useless unless with a fair Wind; for scarce had we sail'd thus above 5 Leagues when the Wind turning against us, the Fishermen would have return'd from whence we came, had we not by fair Promises prevail'd upon them to row us to an Island which was within half a League of us, which we reach'd before Night, and stay'd there till next Day, being forced to be contented to Sup upon a piece of *Milan* Cheese without Bread.

The Wind turning fair again the next Day, we sail'd about 2 Leagues without any Obstacle, till a sudden Blast from the North turn'd the Vessel in which I was with the Ambassador *Brugman*, upon one side, so that it took Water, the Fishermen having enough to do to save it, by letting down the Sails, and running to the other side of the Boat; we had at least 3 of them in 2 Hours, which put us to no small danger, our Boat having besides 8 Persons all our Plate, and abundance of Luggage in it; but, what is most surprizing of all, is, that the other Boat, in which the Ambassador *Crusius* was, tho' within a Pistol-shot of us, felt nothing of all this. Thus, being come within half a League of the Continent, the Wind veer'd about to the South, so that our Boatsmen were ready to turn back again, had not the promise of 3 Pints of *Aqua vitæ* enlivened them to betake themselves to their Oars, which they did with so much alacrity, that in a little time they row'd us ashoar, where we landed the 18th at Night in the Province of *Esthonia*, after we had for 22 Days together been exposed to the mercy of the merciless Element of the *Baltick* Sea. *A dangerous Passage.* *Land in Livonia.*

The 22d two Barks being to our good fortune forc'd into *Hogland* by stress of Weather, those we had left there took this opportunity to transport themselves and the remaining Baggage and Horses to the Continent, where they safely arrived the 24th, and after some Days stay to refresh our selves, we went from hence to *Revel*, whither we came *December* 2. *Come to Revel.*

Our whole Train being now got together, the Ambassadors thought fit to publish his Highness's Order, which they had brought seal'd along with them, for the regulating of our Family, notwithstanding which frequent Quarrels happen'd betwixt them and the Apprentices of the City, in the Night time, in one of which, *Isaac Mercier* a *French* Man, who waited on the Ambassador *Brugman* in his Chamber, was kill'd *February* 11. with an Iron-bar, as he was coming to the relief of some of our Domesticks that were engaged with the Apprentices. 1636. *One of the Ambassadors Domesticks kill'd.*

Revel is the Capital City of the Province of *Esthonia* in *Livonia*, under 50 Degrees 25 Minutes Latitude, and 48 Degrees 30 Minutes Longitude, upon the *Baltick Sea*. It acknowledges for its Founder *Wolmar* II. King of *Denmark*, 1230. And *Wolmar* III. sold it to the Master of the Order in *Livonia*, 1347. About 100 Years since, being hardly press'd by the *Muscovites*, it surrendred to *Eric* of *Sweden*, and endured 2 memorable Sieges, 1570. and 1577. against the *Muscovites*, who were forced to retreat from thence with shame.

The Castle is built upon a Rock steepy on all sides, except towards the City, and is regularly fortified: It has been a Member of the *Hanseatick* League above 300 Years, and for some time had the Superintendency of the College of *Novogorod*, in conjunction with the City of *Lubeck*: till having broken with the *Hanseatick* Towns, 1550. and the *Muscovites* made themselves *A Description of Revel.*

1635. ſelves Maſters of *Narva*, about the ſame time they tranſplanted their Trade to that place. Many Priviledges were granted to this place by the Maſters of the *Livonian* Order; which, tho' confirm'd to them by ſeveral of the enſuing Treaties, have been conſiderably clipt by the *Swedes*.

The Inhabitants profeſs the *Lutheran* Religion, their Eccleſiaſtical Affairs being managed by a Conſiſtory and Superintendent. Their Political Conſtitution is *Democratical*, the Magiſtrate being obliged to take the Adviſe of the Chief Men of all the Corporations and Profeſſions, in Matters of moment.

1636. About the beginning of the 15th Century, a certain Merchant of this City built a fair Monaſtery (the Ruines of which are to be ſeen to this Day) not far from the Sea ſide, dedicated to St. *Bridget*, conſiſting both of Religious Men and Women; I ſaw the Book of the Foundation of this Convent, which tells you, That the Fryars and Nuns had found out a method of expreſſing their Intentions to one another by certain Signs, of which there is a ſmall Dictionary annexed to it.

Mark-Language.

Livonia borders to the Eaſt upon *Muſcovy*, to the South upon *Samogitia*, *Lithuania* and *Pruſſia*, on the North it has a Gulph of the *Baltick Sea*, by which it is ſeparated from *Sweden* and *Finland*; and to the Weſt the *Baltick Sea*. Its length is 120 *German* Leagues, and its breadth 40. It is divided into 3 Provinces, *Eſthonia*, *Lettia*, and *Courland*; the firſt being ſubdivided into 5 Diſtricts, call'd *Harric*, *Wirland*, *Allentaken*, *Jerwe* and *Wiecks*; its Capital City is *Revel*, *Riga* of *Lettia*, and *Goldingen* of *Courland*. *Livonia* was in former Ages ſubject to the *German* Empire upon a double account. Firſt, Becauſe the Maſters of that Order, ever ſince they conquered it from the Infidels, were Subjects of *Germany*: And Secondly, Becauſe the Archbiſhop of *Riga*, with his Suffragans, and the Maſter of the Order, after they had freed themſelves from the Subjection of the Maſter of the *Pruſſian* Order, were 1513. received among the Princes of the Empire; but that famous *Ruſſian* Tyrant *Joan Baſilowitz*, making a powerful irruption 1550. into *Livonia*, they ſollicited for Succours from the Empire; but none being to be expected, they made their Applications to the King of *Denmark*, and upon his refuſal, to *Eric* of *Sweden*, who promiſing them aſſiſtance againſt the *Muſcovites*, provided they would ſubmit themſelves under his Juriſdiction, the City of *Revel*, with the neighbouring Nobility, (who were moſt expoſed to danger) ſeparated themſelves from the Maſter of the Order, and put themſelves 1560. under the *Swediſh* Protection.

A Deſcription of *Livonia*.

The Year before the Archbiſhop of *Riga*, with the Coadjutor of the Order, were enter'd into a League with the *Poles*: But *Sigiſmund Auguſtus*, their King, ſeeing that *Revel* had ſubmitted to the *Swedes*, refus'd to execute the ſaid Treaty, unleſs the Archbiſhop, and Maſter of the Order, would acknowledge the Sovereignty of *Poland*; which they were forced to conſent to, and accordingly 1561. put all the Acts and Privileges they had obtained from the Empire and Pope into the Hands of Prince *Radzivil*, the *Poliſh* Commiſſioner, unto whom they likewiſe took the Oath of Fidelity. *Godard Ketler*, the then Maſter of the Order, had *Courland*, with the Title of a Dutchy beſtow'd upon him, and his Poſterity, to hold it in Fief of the Crown of *Poland*, 1562. By the enſuing Treaty between the *Poles* and *Muſcovites* 1582. the firſt had all *Livonia* granted them by the laſt, except what was in the poſſeſſion of the *Swedes*, who ſince that time are got into the poſſeſſion of all except *Courland*.

Livonia.

Its Fertility.

Livonia is a Country abounding in all ſorts of Grain, but eſpecially in Wheat, the Grounds having been much improved, and fitted for Tillage of late Years, by ſetting the great Foreſts on Fire, the Aſhes ſerving inſtead of Dung, which has been obſerv'd to produce very good Dung for three or four Years after. They have likewiſe abundance of Cattle and Fowl, every thing of that kind being much cheaper here than in *Germany*; for we uſed frequently to buy a Hare for Four-pence, and a Heath-Cock for Six-pence, and other things proportionable.

Inhabitants.

The Inhabitants of *Livonia* were involved in the Darkneſs of *Paganiſm* till the 12th Century, when the Knowledge of the Goſpel was firſt introduced there, by certain Merchants of *Bremen*. For about the Year 1158. one of their Ships being by ſtreſs of Weather forced into the Gulph of *Riga*, the Merchants aboard her approving of the Situation of the Place, reſolved to eſtabliſh both their Commerce, and the Chriſtian Religion here. *Meinard*, a Monk of *Sigeberg*, was the 1636. firſt Biſhop of *Livonia* 1170. He was ſucceeded by *Bertold*, who endeavouring to propagate Chriſtianity by Force of Arms, was kill'd 1186. with more Chriſtians.

Albert his Succeſſor, a Canon of *Bremen*, laid the firſt Foundation of the City, and *Riga*, and the *Livonian* Order, call'd the *Friars of the Short Sword*. They obſerv'd the ſame Rules as the *Templers*, and were call'd the *Friars*, or, *Knights of the Short Sword*, becauſe they wore on their White Cleaks, a *Red*, *Short Sword*, with a Star of the ſame Colour, which afterwards they chang'd into Two *Short Swords*, Saltarwiſe. They had, by Authority from Pope *Innocent* the 3d, a Third Part allow'd them of what they ſhould conquer from the Infidels; but finding it a hard Task to cope with them alone, they join'd with the Order of St. *Mary* of *Jeruſalem* in *Pruſſia* 1239. ſince which time the Maſter of *Livonia* had a dependance on the Grand Maſter of *Pruſſia*.

The *Livonian* Knights.

The greateſt part of the Two Provinces of *Eſthonia* and *Lettia*, is inhabited by the Poſterity of the Native Barbarians, who are Slaves to the Nobility and Chief Inhabitants of the Cities; which is the reaſon they call them *Unteuſthe*, *i. e.* no *Germans*, becauſe they were of a different Off-ſpring from the *Germans* their Conquerors. The ordinary Women of *Eſthonia* wear their Petticoats without any Pleats like Seams, and on their Backs little braſs Chains, with Counters of the ſame Metal hanging at the ends. Thoſe who would be thought better than the reſt, have a Necklace of Plates of Silver, of the bigneſs of a Crown or half Crown, but no thicker than the Back of a Knife, hanging down from their Necks, and upon their Breaſts, one as big as a Trencher. Both Men and Women are clad either in coarſe Woollen Stuff, or Linen; their Shooes being either of the Bark of Trees, or raw Leather. Maids wear nothing on their Head, but let their Hair hang careleſly like the Men.

The Marriage-Ceremonies in *Livonia*.

Their Ceremonies of Marriage are peculiar to themſelves: For, if a Country-fellow marries one of another Town, or Village, he goes thither on Horſe-back, ſets her behind him, and makes her embrace him with the right hand: He holds a Stick cleft at the end with a braſs Piece of Money in it in his hand, which he gives to him that opens the Wicket through which he is to paſs. Before him rides a Bagpipe-Player, and two of his Friends with naked Swords, who give two ſtrokes therewith croſs the door of the Houſe where the Marriage is to be conſummated; and as ſoon as the Bridegroom is ſeated, they put one of the Swords in a Beam over his Head, to prevent Charms, as they ſay; for which reaſon alſo the Bride ſcatters many little Pieces of red Stuffs on the Road, eſpecially on the Croſs-ways, and upon the Graves of Children, that died without Baptiſm, and are commonly buried on the High Way. The Bride ſits at Table with a Veil over her Face; but ſo ſoon as the Gueſts are well ſeated, they both riſe and go to Bed, and return in two hours after, and ſit down with the reſt: The Feaſt is concluded with Dancing, and Drinking, till they drop down among one another upon the Floor.

They are ſcarce Chriſtians.

Tho' the Chriſtian Religion was introduced here in the 12th Century, moſt of the *Livonians* are ſtill ſo addicted to their *Pagan* Superſtitions, as ſcarce to deſerve the Name of Chriſtians. 'Tis true they call themſelves Chriſtians, and moſt Villages are provided with Churches and Miniſters; yet if you except Baptiſm, they're quite ignorant of what elſe belongs to true Chriſtianity; for they rarely frequent Sermons, and ſcarce ever communicate, unleſs it be by Force, or for ſome End. 'Tis true, the Negligence and Ignorance of their Clergy has not a little contributed to the Obduration of theſe poor Wretches; but, of late Years, the Kings of *Sweden* have been more careful to have them inſtructed in the Tenets of the Chriſtian Religion than before; but their Slavery, which is almoſt inſupportable, ſeems to render them quite negligent in any thing relating to a future Life, of which they have beſides this but a very odd Notion.

Their Opinion of a future Life.

This puts me in mind of a *Livonian* Woman, who putting a Needle and Thread into her Husband's Grave, told the Standers by, *That ſhe ſhould be unwilling to let her Husband appear in rent Cloaths in the other World*. This makes them prefer the Neceſſaries of this Life before all the reſt; ſo that when they are to take an Oath at Law, for the deciding of any differences, inſtead of intereſting their Salvation, they have no other reſpect but to their Temporal Advantages; and, conſequently, take the following Oath:

1636.

Their Oath in Law Suits.

I, N. N. *am here present before Thee, since thou, O Judge, desirest to know, and askest me, Whether this Land on which I now am, is God's and mine, with a just Title? I swear to God, and his Saints; and accordingly God judge me at the last day, That this Land belongs to me of Right; That it is God's and mine, and, That my Father had been possess'd of it, and had enjoy'd it a long time: And, if the Oath I take prove false, I consent that the Curse of God fall upon my Body and Soul, upon my Children, and whatsoever appertains to me, even to the Ninth Generation.*

About *Riga*, when the Peasants are to take an Oath, they lay a Turf upon their Heads, with a white Stick in their Hands, expressing thereby, That if they swear falsly, their Children and Cattle may become as dry as the Turf and Stick. Of late Years, as I told you before, the Ministers have been very industrious to root out these Weeds of Idolatry among them; for which purpose the Catechism, Epistles, and Gospels, with their Explications, have been translated into their Native Tongue; but they are so deeply entangled in their Superstitions, that they still continue to do their Devotions upon some Hill or Tree chosen for that purpose: In the last they make Incisions, which they bind up again with red Stuff, and so pay their Devotions, which tend to nothing else but Temporal Blessings. Betwixt *Revel* and *Narva*, 2 Leagues from *Kunda*, there is an old ruin'd Chapel, whither these Peasants go on Pilgrimage upon the Day of our Ladies Visitation. It has a great Stone in the middle, round which some dance, others kneel, after they have put by their Cloaths: This done they produce their Offerings of Fruits and Flesh, and recommend themselves and their Cattle to its Protection. The whole Ceremony is concluded with Eating and Drinking, and commonly with Quarrelling.

Their Superstitions.

Sorcery.

Sorcery is a thing so generally received among 'em, that it is transplanted by the Parents to their Children, which they think absolutely necessary for the Preservation of their Cattle: For which reason it is, that to elude the Effects of it, they never kill a Beast, but a piece of it is cast away; they never brew, but somewhat of it is spill'd, that the Sorcery may fall upon it: They have also a Custom of rebaptizing their Children, if within 6 Weeks after they are troubled with any Distempers, which they attribute to its having received an improper Name; but this they are obliged to keep concealed for fear of the Magistrates, being otherwise as stubborn in the Observation of their old Customs, as they are in their Superstitions: Of which I had an Instance related to me, of an old Fellow, who being condemned to a Corporal Punishment, it was, in consideration of his Age, chang'd into a pecuniary Mulct, not exceeding 15 or 16 pence; but he told them, that rather than recede from the Customs of his Ancestors, he would undergo the Punishment, which he did accordingly, by putting off his Cloaths, lying himself upon the Ground, and receiving the Blows according to his Condemnation. This is the ordinary Chastisement inflicted upon the Peasants in *Livonia*; who, as they are not allow'd to purchase any Lands, besides the Allotments given them for their Subsistance; so they will often venture to cut down Trees in the Forests, and sow Wheat in the Ground, which they sell under-hand. If they are catch'd in this, or any other Fault, they are sure of such a Strapado, and are commonly whip'd with a Holly-wand till the Blood follows on all sides. They are no less restrain'd from having any Money; and if it be known they have any, certain Officers are appointed to take it from them. Of this I heard a sad Example related here: A Peasant being press'd by such an Officer to produce a certain Summ he had not, strangled his Wife and Children, and afterwards hung himself. This Severity the Gentmen excuse with the incorrigible Temper of the Peasants, who without it would become insupportable.

Stubbornness.

The Nobility of *Livonia*.

The Nobility of *Livonia*, but especially those of *Esthonia*, are in consideration of the Services done by their Ancestors against the Infidels and *Muscovites*, exempted from all Taxes. The first who confer'd on them Mannors to be held by Fealty, was *Wolmar* the 2d, King of *Denmark*, which were confirm'd by *Eric* the 7th, and by the Masters of the Order of *Livonia*, and the Grand Masters of *Prussia*.

Once every Year a Review is made of the Nobility of *Livonia*, which is look'd upon as the best Nursery of Officers the *Swedish* Kings have in their Dominions; who, when they submitted to their Protection, promised to preserve them in their Ancient Privileges: From whence it is, that the Government is still managed by the Nobility, who chuse twelve of their own Body, who are the Supreme Council of the Country, in which the Governor of *Livonia*, for the time being, is President. They keep their Publick Court once a year in *January*, when they decide all differences between Parties, who proceed only by way of Declaration and Answer. They chuse also every three Years a certain Gentleman, whom they stile the Captain of the Province, whose Business is to represent to the Council the Grievances of the People. Certain Judges are also appointed in each Province, for the regulating of the Limits of Lands belonging to private Persons, which have been brought in much confusion during the Wars with the *Muscovites*: These are likewise never continued for above three Years, and an Appeal lies from them to the Council. They have also their particular Surveyors of the High Ways.

1634.

The Government of *Livonia*.

But it is time to return to our Voyage: By this time our Page we had sent from *Colmar* to *Gottorp* for new Credentials, and our Interpreter, who had been sent to *Musco* to give an account of our Shipwrack, being return'd, and our Baggage sent before from *Revel* the 24th of *February* in 31 Sledges, we follow'd the 2d of March, and lay the same Night at *Kolka*, a Seat belonging to Count *de la Guardie*, 7 Lgs from *Revel*.

The continuation of the Voyage.

The 3d we came to *Kunda*; and the 4th to a Seat of Mr. *John Focks*, about 5 Leagues from the Count *de la Guardie*'s House.

The 5th we travell'd 5 Lgs farther to *Narva*. This City, which is not very big, is situate in the District of *Allentaken*, upon the River *Narva*, at 60 Dgs Lat. This River rises out of the Lake *Peipus*, and 2 Lgs below the Town, falls into the Gulph of *Finland*. About half a Lg above it is a Cataract, where the Waters break with such Violence upon the Rocks, that rising up high into the Air, it affords in a Sun-shiny Day a very agreeable Sight not unlike a Rain-bow.

They come to *Narva*.

Wolmar the 2d, King of *Denmark*, is supposed to be the Founder of this City 1213. It was taken 1558. by *Ivan Basilowitz*, the famous *Russian* Tyrant, from whom the *Swedes* recovered it 1581. and ever since remain'd in possession of it. It was anciently a Member of the *Hanseatick* Towns, but its Commerce has been quite ruin'd by the Wars with the *Muscovites*; great part of its Traffick being transferr'd to *Archangel*. The Castle which is very strong, is on that side of the River; as that of *Ivanogorod* built on a steep Rock by the *Muscovites*, resembling a *Peninsula* made by the River, stands on the other side: This Castle was not taken by the *Swedes* till 1617.

Ivanogrod.

At the foot of the Castle is the Suburb call'd *Muscovite-Narva*, being inhabited by *Muscovites*, but subject to the *Swedes*. Betwixt *Revel* and *Narva*, are abundance of Bears and Wolves, which do great mischief in the Country, when the Grounds are covered with Snow; of this we had several dreadful Stories told us; as for instance of a Wolf, 1634. who set upon 12 *Muscovite* Peasants, of whom he kill'd 4, and sorely hurt 2 more, the other 6 scarce being able to kill him at last; the Skin of this Creature is preserved at *Narva*. We were told such another of a Bear, which finding a Barrel of Herrings standing at an Alehouse Door, eat the Herrings; but going into the Stables, was pursu'd by several Peasants, he wounded some of them, and made the rest fly: This done he went into the Brewhouse, where he fell a drinking so much strong Liquor, that he reel'd as he came out, which the Peasants perceiving, follow'd him at a distance, till they saw him drop down asleep, where they kill'd him.

Remarkable Stories of a Wolf and a Bear.

Another Bear, 1634. digg'd up 13 Dead Carcasses in a Church-yard not far from *Narva*, and carried them away in Coffins.

They told us several other Stories of this Nature, as for instance, of a Womans being kept 15 Days by a Bear in his Den; and how she was deliver'd by a Peasant, who was likewise carried by a Bear towards the Den, but escaped by the help of his Dog, of which we will forbear to rehearse the Particulars for brevity sake.

We left *Narva March* 7. and travell'd 7 Leagues, as far as *Lilienhagen*, where we lodg'd that Night.

The Ambassadors proceed on their Journey from *Narva*.

The 8th we went 6 Leagues further to *Sarits*: And the 9th 4 Leagues more to *Orlin*.

Here having received the News, that the *Muscovite Pristaff* waited for us on the Frontiers, we parted forthwith

1634. with to meet him: We found him in a Wood, about a League from *Orlin*, attended by 24 *Strelitzes*, and 90 Sledges. His Name was *Conſtantino Juanowitz Arbuſou*, who no ſooner eſpy'd the Ambaſſadors alighting, but he alſo came out of his Sledge, being clad in a Veſt of Flower'd Velvet, with a Gold Chain croſs his Breaſt, his upper Garment being lined with Sables. They advanced towards one another with ſlow pace, till coming up together, the Ambaſſadors having pull'd off their Hats, the *Priſtaff* notwithſtanding this ſaid, *Ambaſſadors be uncovered*; and being told, That he ſaw they were ſo, he began to read his Paper.

Are received by the *Muſcovite Priſtaff* on the Frontiers.

Knez Peter Alexiowitz Repuin, *Waywod of* Novogorod, *has ſent me by Order from the* Grand Seignior, Czar, *and* Great Duke, *&c. to receive the Ambaſſadors* Philip Cruſius, *and* Otto Brugman, *and to accommodate you with Horſes, Carriages, Proviſions, and all other Neceſſaries for the continuation of your Voyage to* Novogorod, *and thence to* Muſco.

After we had returned him thanks, he gave the Ambaſſadors the precedency, and one travell'd along with us 6 Leagues that Day, to a Village call'd *Tzuerin*.

March 10. We came about Noon to *Deſun*, and at Night to *Mokriza*, 8 Leagues from *Tzuerin*.

Come to *Novogorod*.

The 11th we arrived at *Novogorod*, (40 *German* Leagues from *Narva*) where at our Entrance the *Priſtaff* took the precedency of the Ambaſſadors, for which however he ſent them an Excuſe, immediately after, alledging, That he had done it by expreſs Orders of the Waywod of *Novogorod*; who, if he had fail'd therein, would have done him ſome ill Office or other at Court.

The City of *Novogorod Veliki* is ſituate at 58 Deg. 23 Min. elev. according to my own Obſervations, which agrees very near with *Bureus* (ſome time *Swediſh* Ambaſſador in *Muſcovy*) his Calculation, who makes it above 58 Deg. 13. Min. tho' *Lundorp* puts it under 62, and *Jovius* under 64 Deg. It is ſeated in a ſpacious Plain, upon the River *Wolgda*, which ariſing out of the Lake *Ilmen*, half a League above this City, and croſſing the Lake of *Ladoga*, is augmented by the River *Niova*, near *Notcburg*, and exonerates itſelf by the Gulph of *Finland* into the *Baltick Sea*. It abounds in Fiſh of all ſorts, but eſpecially in *Breme*; it was formerly govern'd by its own Prince, who was independent from the *Czar* of *Muſcovy*; the *Hanſeatick* Towns had their Office here; for the River being navigable from its Sourſe, and the Country round about abounding in Honey, Flax, Hemp, Wheat, Wax and *Ruſſia* Leather (which is better dreſs'd at *Novogorod*, than any other place of *Muſcovy*) they uſed to drive a great Trade in this City, which once was accounted the chief trading City of all the North, it being a Proverb in thoſe Days, *Who can oppoſe God, and the Great City of* Novogorod? And the number of its Steeples, together with the Ruines of the Walls, which appear to have been of a much greater extent than it now is, ſufficiently ſhew, that it had deſervedly obtained the Name of *Novogorod Veliki*, or *Novogorod the Great*. But notwithſtanding its Greatneſs *Vithold* Great Duke of *Lithuania*, forced this City 1427. to pay a conſiderable Annual Tribute, *viz.* 200000 Crowns.

The Tyrant *John Baſili Grotſdin*, after he had defeated an Army rais'd by this City, forc'd them in *November* 1477. to receive a Governor from him; but not thinking himſelf ſecure of a place of ſuch Importance, went thither in Perſon, pillag'd the Town of all the Gold, Silver, Jewels, rich Stuff, and other precious Moveables he could meet with, which he loaded upon 300 Waggons, and carried them, together with its chief Inhabitants to *Muſco*, inſtead of whom he ſent a Colony of *Muſcovites* thither. But the Tyrant *John Baſilowitz* was he who laid this noble City almoſt deſolate. For upon a ſuſpicion of a Revolt he had conceived of the Inhabitants, he cauſed a vaſt number of them to be drowned in the River, and trampled under the Horſes Feet; which ſtopping the Current of the Rivers, a great Famine inſued, which being the forerunner of a moſt dreadful Plague, which conſumed the greateſt part of the Inhabitants, the reſt of which were afterwards Sacrificed by the Sword to the Tyrant's Fury.

Cruelties exerciſed at *Novogorod*.

The Archbiſhop, who hitherto had eſcap'd his Hands, had, to appeaſe his Wrath, invited him to a Feaſt, but whilſt they were at Dinner, he ſent ſome of his Attendants to pillage the Church of *Sophia*, and all the other Churches both of their Ornaments, and the other Riches that were carried thither by the Inhabitants: After Dinner having ſerved the Archbiſhop's Palace in the ſame manner, he told him, That as the caſe now ſtood, there was no further occaſion of him at *Novogorod*, that therefore he would diſcharge him of his Prelacy, and preſent him with a Bagpipe and a Bear, to get his Livelihood: And he was no worſe than his word; for at his departure from thence he cauſed him to be put upon an old White Mare, with his Feet ty'd under her Belly, with Pipes, a Fiddle, and Timbrels hanging about his Neck. The other Abbots and Monks fared not ſo well, being all either cut to pieces, or forced into the River; the ſame fate underwent one *Theodore Sircon* a rich Merchant, who being unwilling to diſcover his Treaſure, he cauſed him to be drag'd through the River with a Rope about his Waſte; and that not ſucceeding, had his Feet put in boiling Oyl, till having diſcovered what the Tyrant wanted, he commanded him and his Brother to be cut to pieces.

The Baron *de Herberſtein*, who reſided in the Quality of a Publick Miniſter at *Muſco*, from the Emperor *Maximilian*, mentions a certain Idol, call'd *Perun*, or the God of Fire, with a Thunderbolt in his Hand, a conſtant Fire of Oak being kept to him, which the Inhabitants of *Novogorod*, after they were Converted to the Chriſtian Faith, caſt into the Water; but driving up againſt the Stream, ſtop'd at the Bridge of the City, and caſting a Stick among the Inhabitants, bid them keep it for his ſake. He further adds, That on a certain Day in the Year the Voice of *Perun* was heard, even in his time, and that the Inhabitants uſed to fall upon one another with Cudgels, with ſo much eagerneſs, that the Governor was forced to make uſe of his Authority to part them. But with all the Inquiry I could make, I could hear nothing of this, except that they ſhew'd me a Convent call'd *Perumski Monaſtir*, which they told me was built in the place where the Idol *Perun* ſtood before.

The Idol *Perun*.

The Caſtle is on the other ſide of the River fortified with a Stone Wall, the Reſidence of the Governor, and the Metropolitan of the Province, and is joyn'd to the City by a fair Bridge. Juſt oppoſite to the Caſtle, on the other ſide of the River, is the Monaſtery of St. *Anthony*; who, as the *Muſcovites* ſay, came from *Rome*, down the *Tiber*, and ſo croſſing the Seas upon a Milſtone, came up the River *Wolgda*, to *Novogorod*. They tell you further, That meeting in the River with ſome Fiſhermen, he bought the firſt Draught of them, which proving a Cheſt full of Prieſts Veſtments, Books and Money, he beſtow'd the laſt in building a Chappel, in which he lies interr'd, and where many Miracles are wrought by his Body. They ſhew'd us a Milſtone, which they ſay is the ſame upon which he croſs'd the Seas: The Pilgrims have been ſo liberal in their Gifts to this Chappel, that a fair Monaſtery has been erected near it.

St. *Anthony's* Convent.

After our ſtay of 5 Days we left *Novogorod*, where the Governor and *Bogdan Federowitz Obobiron*, ſent us ſeveral Preſents of Meats and other Refreſhments, in lieu of which the Ambaſſadors preſented the firſt with a Coach.

They leave *Novogorod*.

March 16. we travel'd 4 Leagues to *Brunitz*, and the next Day over *Miedna* to *Kreſſa* 12 Leagues and a half.

Come to *Brunitz*.

The 18th we paſs'd through *Faſelbitza* to *Simnagora*, 12 Leagues.

The 19th 9 Leagues to *Colimna*. And

The 20th 5 to *Wiſnawolloka*, where we ſaw a Married young Man of 12 Years of Age, as afterwards we met with a Married Woman of 11 Years at *Twere*, a thing ordinary in *Muſcovy* as well as *Finland*. We travel'd the ſame Day 7 Leagues farther, to *Windra Pusk*, where being no more than 3 Houſes, we had but very indifferent Entertainment.

The 21ſt we made 7 Leagues as far as *Toiſock*. *Toiſock*.

The 22d 6 to *Troitska Miedna*. *Twere*.

And the 23d 6 more to *Twere*: The Snow beginning to melt by this time, we left our Sledges and travell'd 6 Leagues upon the *Wolgda* (which was ſtill frozen) to *Gorodna*.

The 24th the Ice now giving way, we continued our Journey by Land through *Sawidona* to *Saulkſpas*, 7 Leagues, we paſs'd that Day ſeveral Brooks, not without great danger, the Ice being looſe; as we did the 25th the Brook *Siſtrea*, near the great Village of *Klin*, and lodged the next following Night at *Beschick*, 7 Leagues from thence.

The 27th after we had paſs'd 2 other Brooks, we came to *Zerkizoito* 6 Leagues from thence:

And

1636. And the next Day travell'd but 3 Leagues to *Nicola Darebna* (*Nichola Nachinski*) within 2 Leagues of *Musco*, where we received the *Czar*'s Orders for our Entry, which we made the next Day in the following Order.

Nicola Darebna.

Their Entrance into Musco.

In the Front march'd 24 *Cossacks*, who had been our Guard hitherto. 2. Our Steward alone. 3. Our Officers and Gentlemen 3 a breast, those of the best Quality first. 4 Three Trumpeters with Silver Trumpets. 5. Six Carabineers immediately preceeding the Ambassadors 2 Sledges, having 6 with Partisans on both sides: Their Sledges were follow'd by the Pages, and those by the rest of our Train on Horseback, and the Baggage. The *Pristaff* took the upper-hand of the Ambassadors.

Being come within half a League of the City, we met several small Troops of *Muscovites*, *Tartars* and *Germans*, who having taken a view of us, returned to the City. Soon after several Troops of *Muscovite* Horse encompass'd us on all sides, and so conducted us to *Musco*.

About an *English* Mile from the Gates, we were met by 2 other *Pristaffs* with the same Attendance and Equipage they had at our first Entry, in our late Embassy.

They were no sooner come within 20 Paces of the Ambassadors, but they sent them word, That they should alight and come to them; neither did they move out of their Sledges, nor uncovered themselves, till the Ambassadors had done both; the *Pristaffs* being under a strict Tye to observe these Punctilio's; which, if they neglect, they are sure to be turn'd out of their Places, and have a good Whipping or Cudgeling in to the Bargain.

Our Reception was perform'd in the same manner as at first; one of the *Pristaffs* telling us, That he was commanded by the *Czar*, &c. to receive us; the other repeating the same Titles, declaring, That his Colleague *Juan Juanosin Salmosin*, and himself, *Andrew Juanowitz Zaboroi* were to be our *Pristaffs* during our stay in *Muscovy*.

After them the Master of the *Czar*'s Horse presenting 2 very fine White Horses for the Ambassadors, and 12 more for the Chief of their Train, we were conducted through a double File of *Strelitzes* to a Stone-house in that part of the City call'd *Cataigorod*, not far from the Castle. We were no sooner entred our Lodgings, but all sorts of Meats and Drinks were brought us from the *Czar*'s Kitchen and Cellar; and afterwards our daily Allowance was, 62 Loaves, a quarter of Beef, 4 Sheep, 12 Pullets, 2 Geese, 1 Hare, and 1 Heath-cock alternatively; 50 Eggs, 10 Pence towards Candles, and 5 Pence for small things in the Kitchen; 1 Pot of Sack, 8 of Mead, 3 of Beer, and 3 small Pots of Strong-water. For a common Stock we had allow'd us a Tun of Beer, a lesser one of Mead, and a Barrel of Strong-water. For Extraordinaries we had 40 Pound of Butter a Week, as much Salt, 3 Pails of Vinegar, 2 Muttons and 1 Goose.

Their Allowance.

The first Day of our Arrival, upon *Palm-Sunday*, *Easter-day*, and the Young Prince's Birthday, the same was doubled, and all was dress'd by our own Cooks. The Doors of our House were guarded by a Corporal and 9 *Strelitzes*, till after our first Audience, but the *Pristaff* came every Day to visit us.

Their first Audience.

The 3d of *April* we were conducted to our first Publick Audience, with the same Order and Ceremony as in our former Embassy, through a Body of *Strelitzes*, who had made a Lane from our Lodging to the Castle. The Audience it self consisted only in some Compliments of Thanks to the *Czar*, for the favour he had been pleased to bestow upon them, in granting them a free Passage through *Muscovy* into *Persia*.

After our return to our Lodgings, *Knez Simon Petrowitz Luon*, one of the *Czar*'s Carvers came thither, with about 40 Dishes of Fish fry'd and broil'd (it being their *Lent*) and 12 sorts of Liquors for our drinking: His chief Business was to present to the Ambassadors, and each of their Retinue, a large Goblet of *Aqua vitæ* to the Great Duke's, the Young Prince's, and his Highness's Health, which he obliged them all to pledge. He had a piece of gilt Plate presented him for his Pains, and the Bearers of the Meat, each 2 Crowns; but they had put such a vast quantity of Garlick and Onions in their Sawces, that few of us cared for touching of it, but made up the defect we found in our Provisions with the excellent Wines the *Czar* had sent us.

April 5. we had the first Conference with the same Commissioners, we had in our former Negotiation, except *Juan Tarassowitz Grammatin*, who by reason of his great Age being excused from this Employment, his Place was supply'd by *Fedor Fedorousin Lichozou*: The same Day one of our Footmen, who some Days before was hurt by being overturned in a Sledge, died, and was buried in the *Germans* Church-yard; the *Czar* sending a *Pristaff* and 15 Horses out of his Stables to assist at the Funeral. 1636.

The 9th we had a second Conference.

The 10th, being *Palm-Sunday*, and we having express'd our desire of being Spectators of that Annual Procession, in which the *Muscovites* represent the Entrance of our Saviour into *Jerusalem*, Horses were sent to the Ambassadors and their Retinue from the *Czar*, to conduct them to a certain place near the Castle-Gate, where 2 small Theatres were erected for that purpose, one for us, the other for the *Persian* Ambassadors, who sat behind us.

The Muscovite Procession on Palm-Sunday.

After the Service perform'd in our Lady's Church, the *Czar* and Patriarch came from thence out of the Castle in the following order.

First of all we saw a boarded Chariot, very large, but low, drawing after it a Tree, on which hung many Apples, Figs and Grapes; within it being placed 4 little Boys with Surplices, singing the *Hosannah*. Then came a good number of Priests, in their Surplices and Copes, with Banners, Crosses, and Images fasten'd to long Poles, some Singing, others casting Incense among the People. They were follow'd by the *Czar*'s *Goses*, or Factors; and these by the *Diaken*, Clerks, Secretaries, *Knez* and *Boyars*, with Palm-twigs in their Hands. After these came the Great Duke, most sumptuously attired, with a Crown on his Head, supported by *Knez Juan Borissowitz Cyrkaski*, and *Knez Alekey Michaelowitz Wou*, his 2 principal Councellors of State; and leading the Patriarch's Horse (which was covered with a Cloath, and dress'd up like an Ass) by the Bridle. The Patriarch had a white round Satin-cap, beset with Pearls, on his Head, and about it a very rich Cornet: In his right Hand he carried a Cross, richly set with Diamonds, wherewith he gave his Benediction to the Spectators, who received it with a most profound Reverence. He was surrounded by some Metropolitans and Bishops, and follow'd by a great number of Priests, with Books and Censors in their Hands. Fifty Boys were seen to scatter their red Cassocks on the Ground, whilst others spread pieces of Cloath of an Ell square along the way where they pass'd.

The *Czar* being come over against our Theatre, made a Halt, and sent his Interpreter to enquire after our health, and stay'd till our Answer was brought him. They went to the Church, where after a stay of half an hour, they return'd, and the *Czar* stopp'd again to send us word, that we should be treated with Meat from his own Table, which was not done, but instead of it, we had a double Allowance sent us. The Patriarch is obliged to present the Great Duke, for the Honour he does him in leading the Horse on which he rides, with a Purse of 400 Crowns; and this Ceremony is observed on the same Day throughout all *Muscovy*, the Governors of the Provinces, and the Metropolitans supplying the Places of the *Czar* and Patriarch.

April 17. we saw them celebrate their *Easter-day*, with a great deal of rejoycing, which consists chiefly in Feasting and Debauches, the Publick-houses being fill'd that Day as well as the Streets at Night, with Drunken People of all sorts, both Ecclesiasticks and Laicks, Men and Women. This Day you see all along the Streets many who sell painted Eggs, which the *Muscovites* for 14 Days after send as Presents to their Friends; and if, during this time, they happen to meet one another, they Kiss, with this Salutation; *Christos wos Chreft*, i. e. *Christ is risen*; unto which the others answer, *Wostin wos Chreft*, i. e. *Truly he is risen*; and so he that kisses first, presents an Egg to the other, which (as well as the Kiss) no Body, of what Sex, Age, or Quality soever, dares to refuse. The *Czar* himself presents such Eggs to his principal Lords.

The Muscovite Easter-Day.

On *Easter-day* also, before he goes to Church, he visits the Prisons, and orders an Egg and some Sheep-skin Furr to be given to each of the Prisoners; telling them, That this is a Day of Rejoycing, since Christ, who dy'd for their Sins, is now risen again.

April 29. Mr. *Brugman*, one of our Ambassadors, desired and had a private Conference with the Commissioners without his Colleague, in the Exchequer, which lasted about 2 Hours, but what his Negotiation

The Ambassador Brugman has a separate Audience.

was,

1636. was, was not known till after our Return home, by the Charge exhibited againſt him.

May 6. both the Ambaſſadors had a third Conference with the Commiſſioners.

The 17th the fourth: And

The 27th the fifth and laſt.

May 30. The Governor went abroad (by the *Czar*'s permiſſion) a Hawking with ſome of our Gentlemen, who were entertain'd afterwards with Strong-water, Mead, Spiced-Gingerbread, and preſerved Cherries.

June 1. being the Prince's Birth-day, we had a double Allowance of Proviſions.

The 3d the Ambaſſador *Brugman* had a ſecond ſeparate Conference with the Commiſſioners.

The 4th, being *Whitſun-Eve*, the *Czar* gave Publick Audience to ſuch Ambaſſadors, as were ready to depart: We ſaw the *Perſian* Ambaſſador (a *Cupzin* or Merchant) return from thence, having a Garment of Crimſon Satin lined with the beſt kind of Sables over his *Perſian* Cloaths, the firſt being preſented him by the *Czar*. He was follow'd by a good number of *Greeks*, *Armenians*, and *Tartars*; who cauſed the Preſents they had received to be carried before them.

The 12th our Comptroller arrived from *Dantzick*, but was ſtay'd 3 Days without the City, by reaſon of the *Czar*'s Abſence.

The 15th the Great Duke and Dutcheſs returned with a great Attendance of Lords and Ladies to *Muſco*; 36 Maids of Honour appear'd on Horſeback aſtride, clad in red with white Hats on their Heads, and Scarfs of the ſame colour about their Necks, their Faces being very groſly painted.

The 17th I having ſome Matters to diſpatch with the Chancellor, and he being willing to do me all poſſible Honour, ordered a *Priſtaff* to conduct me, who being out of the way, made me ſtay 2 Hours in the Antichamber, but the kind reception I met with from the Chancellor and Vice-chancellor, and the ſudden diſpatch of my Buſineſs, made me ſome amends for this delay: The Room they were in was but meanly furniſh'd.

The 20th notice was given us by our *Priſtaff*, that we were at liberty to continue our Journey into *Perſia* when we pleaſed, and that at our Return, we ſhould have the Honour to kiſs his Majeſty's Hands, and to receive an Anſwer to our Credentials, it being not fit to be done before our laſt Publick Audience, at our returning into our own Country.

Accordingly we made all neceſſary Preparations for our Departure, provided our ſelves with Boats to carry us to *Niſa*, and with the *Czar*'s permiſſion, took 3 Lieutenants, 4 Serjeants, and 23 common Soldiers, *Scots* and *Germans*, out of his Guards, into our Service; to ſerve us as a Guard againſt the *Tartars*, upon the *Wolga*, beſides ſome *Muſcovites* for ordinary Services.

The 24th and 25th we beſtow'd in packing up our Baggage, and ſending part of it before to *Niſa*.

The Entrance of a *Poliſh* Ambaſſador.

The 26th being appointed for the reception of a *Poliſh* Ambaſſador, we went out of the City to ſee it; they no ſooner perceived us, but ſaluted us very courteouſly, but behaved themſelves very diſreſpectfully to the *Muſcovites*, not ſo much as uncovering themſelves, and obliging their *Priſtaffs* to alight and uncover firſt; nay, one of the Ambaſſadors told them roundly, That they were come there, not to give to them, but to receive Reſpect from them.

The fierceneſs of another *Poliſh* Ambaſſador.

Another *Poliſh* Ambaſſador, who not long before (immediately after the Defeat of the *Muſcovites* before *Smolensko*) was come to *Muſco*, had carried Matters to a much higher pitch: For, he not only delivered his Propoſition ſitting before the *Czar*, but alſo as often as he pronounced the Name of the King his Maſter, perceiving that the *Boyars* did not put off their Caps, he ſtop'd till ſuch time the *Czar* commanded them ſo to do. He having brought no Preſents from the King, preſented the *Czar* with a Coach upon his own account; in lieu of which, a Preſent of fine Sables being ſent him from the Great Duke, he refuſed them; who thereupon ſending back his Coach, the Ambaſſador threw the *Priſtaff* down a very high pair of Stairs: At which the *Czar* being highly exaſperated, ſent him word, That if what had been done, was according to the King his Maſters Orders, he muſt bear it with patience, till a more happy Conjuncture might put him in a Capacity to give himſelf Satisfaction for ſuch an Affront; but, if the ſame proceeded from his own Paſſion, without any Order, Complaint ſhould be made about it to the King his Maſter.

The 26th the *Czar*'s Paſs was brought us by a *Priſtaff*, of which we will give you the Tranſlation out of the *Muſcovite* Language. 1636.

The CZAR's Paſs.

FRom the Grand Seignior and Great Duke of all the Ruſſes, Michael Federowitz; *We enjoyn all our* Bojars, Weywods *and* Diaken, *and all our Commanders from the City of* Muſco *to* Columna, *and thence to* Pereſtaf, Reſansky, *and* Kaſimoua, *to* Murama, *and* Niſe-Novogorod, *to* Caſſan, *and* Aſtracan, *to let paſs* Philip Cruſius, *and* Otton Brugman, *Ambaſſadors and Counſellors from* Frederick, *Duke of* Holſtein, *whom we have permitted to go from* Muſco *into* Perſia, *to* Schach Sofi *of* Perſia: *By vertue of a Treaty made for the Paſſage and Commerce of the Merchants of* Holſtein. *We have alſo permitted them to take along with them their* Germans *of* Holſtein, *to the number of* 85 *Perſons, and for their convoy* 30 *Soldiers, choſen, with our conſent, out of the* Germans, *who ſerve in* Muſcovy, *which number they may augment, for the ſafety of their Voyage into* Perſia, *at* Niſa, Caſſan, *or* Aſtracan, *by* 11 *Men,* Germans *or* Muſcovites, *Volunteers. We alſo permit them, at* Niſa, *to hire two Pilots, who are acquainted with the courſe of the* Wolga. *We conſent, and in like manner permit the ſaid Ambaſſadors of* Holſtein, *if, at their return from* Perſia, *they ſtand in need of a Convoy, or other People for Buſineſs, to take at* Caſſan, *or* Aſtracan, *or any where elſe they ſhall think fit,* 40 *Men, or ſuch other number as they ſhall think requiſite for the proſecution of their Voyage: Provided, that thoſe of our People who ſhall hire themſelves to the ſaid Ambaſſadors, give in their Names to the* Bojars, Weywods, *and* Diaken, *of the place of their Abode, as well at their departure thence, as at their return thither, that there may be a Regiſter kept thereof. And if they return from* Perſia *in the Winter, it ſhall be lawful for them, for their Money, to take into their Service ſuch a number of Men, and Sledges, as they ſhall think requiſite for the continuation of their Voyage.*

We have alſo appointed Rodivon Gabato, *Gentleman of* Aſtracan, *to conduct the ſaid Ambaſſadors from* Muſco *to* Aſtracan: *Wherefore we command you, our* Boiars, Weywods, Diaken, *and Commanders, to let paſs the ſaid* Rodivon, *with the Ambaſſadors of* Holſtein, *without any let. And if after their Voyage of* Perſia, *at their return thence, they are deſirous to repaſs through the Countries in our Obedience, you ſhall permit them to take into their Service, for Labour, or for Convoy upon the* Wolga, 40 *Men, or ſuch other number as they ſhall ſtand in need of, which they ſhall take by vertue of this preſent Paſs-port, at* Aſtracan, Caſſan, *or any other place they ſhall think fit. And our ſaid Subjects ſhall be oblig'd to cauſe their Names to be enroll'd, as well at their departure, as at their return, to the end notice may be taken, that no Robbers,* Golops, *or fugitive Slaves get in among them. In like manner at the return of their Voyage, if they paſs through* Muſcovy *in the Winter time, it ſhall be lawful for them, at their own Charge, to hire ſuch a number of Sledges, as they ſhall think fit, ſo as that they be not hindred in the proſecution of their Voyage, either in Cities or in the Country. Enjoyning further, That all Reſpect be given to the Ambaſſadors of* Holſtein, *and all Civility done their People, both going and coming, not permitting that they ſhould ſuffer any Violence, or be Robbed: Obliging them alſo, for their part, not to take any Proviſions by force of any whatſoever; but it ſhall be lawful for them, to buy, for their Money, of thoſe that ſhall be willing to ſell to them, both going and coming.*

Writ at Muſco, *in the Year* 7144. June 20. *and Signed,* The Czar and Great Duke of all the Ruſſes, Michael Federowitz.

And lower, Deak Maxim Matuskin; *and Sealed with the Great Seal.*

After we had received our Paſsport, *June* 30. being appointed for our Departure, Horſes were brought us out of the Great Duke's Stables by our *Priſtaff*, who in Company of ſeveral Perſons of Quality, accompany'd us 3 Leagues out of the Town, to the Monaſtery of *Simana*, where we were to take Boat for the proſecution of our Voyage. They leave *Muſco*.

But before we leave *Muſco*, it will be abſolutely requiſite, we ſhould give you a Deſcription of this great and famous City; which, as it gives the Name to the whole Empire, ſo it has borrow'd its own from the A Deſcription of this City.

River

1636. River *Mosca*; which arising in the Province of *Twere*, dividing the Suburb call'd *Strelitza Slavoda* from the City it self, joyns with the River *Occa* near *Columna*; which about half a League thence falls into the *Wolga*. It lies under 55 Deg. 36 Min. Lat. and 66 Deg. Long. in the very Heart of *Muscovy*, about 120 *German* Leagues from the Frontiers. Its Circuit was then of 3 *German* Leagues, but if we may rely upon *Matthew de Michou*, a Canon of *Cracaw*, who flourished at the beginning of the 16th Century: He says, That in his time it was twice as big as the City of *Prague*. The *Crim Tartars* laid it in Ashes 1571, and the *Poles* burnt it 1611. and left nothing but the Castle. It contains about 40000 Houses; which, except some Houses belonging to the great Lords and rich Merchants, are made of Wood, and Beams and cross pieces of Fur laid one upon another. They commonly are covered with Bark of Trees, upon which sometimes are laid Turfs: This makes them very subject to Fires; so that there scarce passes a Month, but whole Streets art reduced to Ashes. To prevent its Progress, the *Strelitzes* as well that are upon the Guard, as the ordinary Watchmen, are provided in the Night time with Pole-axes, wherewith they break down the next adjoyning Houses, to stop the Progress of the Fire. The best conveniency is, that they may buy new ones at an easie rate, ready built, at a certain Market without the *White Wall*, which they transport from thence where they please.

Its Houses of Wood.

The Streets of this City are very broad, and handsom enough, but very dirty after the least Rain, that they would scarce be passable, were it not for the great Beams, which being laid together, make a kind of a Bridge, not unlike that of the *Rhine* near *Strasburgh*. The whole Body of this great City is divided into 4 distinct Quarters: The first whereof is called *Catay-gorod*, as lying in the midst of the rest, being divided from them by a Brick Wall, call'd by the *Muscovites*, *Crasne stenna*, *i. e.* a red Stone.

Cataygorod.

The River *Mosca* passes on the South side of it, as the River *Neglina*, which joyns with the other behind the Castle, does to the North.

Kremelena.

The Great Duke's Palace, call'd *Cremelena*, which for its bigness resembles a goodly City, takes up one half of it; it is fortify'd with 3 several Walls, and a good Ditch, well provided with Cannon. All the Steeples within the Castle, are covered with Copper gilt; amongst which 2 stand just in the midst, one of which, call'd *Juan Veliki*, i. e. *Great John*, is remarkable for its height, the other for its Bell, weighing 33600 Pounds, which is never Toll'd but upon extraordinary occasions, 24 Men being always employ'd to pull the Rope below in the Court, besides several others above, who help to thrust it: The Royal Palace, with the Patriarchs, and some others belonging to the Chief *Boyars* stand at the further end of the Castle: Besides which we saw a very fine piece of Architecture of Stone, built after the *Italian* manner, for the young Prince, but the *Czar* continues in his Wooden Palace, as being judged the most healthy.

The Exchequer, Magazine of Powder, and Storehouse for Provisions, and several other Publick Structures, are likewise within the compass of the Castle, and 2 fair Monasteries for Men, the other for Women; besides 30 Churches and Chappels built of Stone, those of the Blessed *Trinity*, of St. *Mary*, St. *Nicholas*, and St. *Michael* are remarkable before all the rest; in the last of which are the Tombs of the Great Dukes.

On the South side of the Castle-Gate, without the Walls, is a Church dedicated to the Blessed *Trinity*, and by some call'd *Jerusalem*, built by the famous *Russian* Tyrant *John Basilowitz*, who caused the Architects Eyes to be put out, to prevent his undertaking any thing like it for the future.

The chief Market of the City is before the Castle, where you see a great Concourse of all sorts of People, and abundance of Ships, as well as in all the Streets leading to it: It is observable, that every Trade has its particular Station, there being not the least intermixture betwixt the Mercers and Goldsmiths, or the Linen and Woollen-drapers, and so with other Trades and Professions, which carries this conveniency along with it, that at once you have the opportunity of viewing and choosing what you like best in its kind. A peculiar Street is allotted for the selling of the Images of their Saints; those who keep these Shops have an advantage above all the rest, for as much as the *Muscovites* looking upon it as a Crime to say they *bought* a Saint, but rather that they *exchanged* him; they give what is demanded without any Abatement. 1636.

The Sempstresses Shops, which are in the midst of the great Market-place, are commonly ply'd with a kind of Women Tenders, who under pretence of selling Rings with Rubies and Turquoises, take this opportunity of disposing of their hidden Commodities.

In this quarter there is another spacious place, call'd the *Hair-Market*, where most of the Inhabitants are shaved, which makes the Ground to be so covered with Hair, that you tread as soft upon them as walking upon Feathers. In this quarter of the City most of the *Czar*'s Factors, and some of the Chief Lords and *Boyars* have their Habitations. The second surrounds the former in form of a Half-Moon; it is call'd *Czargorod*, or the *City Royal*, being encompass'd by a Wall call'd *Bicla stenna*, i.e. *The White Wall*: Here is the Arsenal, and the place where the *Czar*'s great Guns are cast, which Art being first practis'd there in this *Czar*'s Reign by one *John Valk*, a Native of *Nurenberg*, the *Muscovites* are since grown as expert in the Art of Founding, as any of the Foreigners. Some Lords and *Simbojars* Houses are in this quarter, the rest is fill'd up with Country Traders, Bakers, Butchers, Cornchandlers, Meal-Shops, the Great Duke's Stables, and abundance of Tipling-Houses, who sell Beer, Mead, and Strong-waters. The third quarter, which encompasses the last mentioned from the East along the North to the West, is call'd *Skoradom*; and if we may believe the *Muscovites*, was before 1571. (when it was laid in Ashes by the *Crim Tartars*) 5 *German* Leagues in circumference. The River *Jaguza*, which joyns in its way with the *Mosca*, passes through this quarter, where among other things, is the chief Market for Wooden Houses, which, as I told you before, are taken into pieces, and transplanted from hence to any other part of the Town; the Beams which are laid one upon another, being til'd up only with Moss. The fourth quarter which lies to the South, on the opposite side of the River *Mosca*, is fortified with Wooden Ramparts and Bastions. This quarter had for its Founder *Basili Juanowitz*, Father to the famous *Basilowitz*, who built it for the conveniency of his Foreign Soldiers, from whence it was call'd *Naeilki*, or the quarter of *Drunkards*; but, since that time being appointed for the Habitations of the *Czar*'s Guards or *Strelitzes* (besides some of the poorer sort of People) it was from thence call'd *Strelitza Slavoda*, or the Suburb of the *Strelitzes*.

Czargorod.

Skoradom.

Strelitza Slavoda.

In the former Impression of these Travels we told you, that the Number of Churches and Chappels in these 4 quarters, amounted to 1500; which being by Mr. *John Lewis Godefrey* alledged as improbable; I do positively affirm, That there are above 2000: There being no Body who is acquainted with this City, but what will confirm the truth of it, there being scarce a Street but what has many Chappels, because there is no Lord but what keeps one for his private use; tho' it must at the same time be confess'd, That most of them are scarce above 15 foot square, and formerly were all of Wood, till the Patriarch ordered them to be built of Stone.

Churches and Chappels.

1636. 1633.

CHAP. III.

The Ambassadors from the Duke of Holstein's *Travels into* Muscovy.

Description of *Muscovy.*

THE City of *Musco*, as we told you before, has imparted its Name not only to the Province of *Muscovy*, but also to the whole *Muscovite* Empire, known before by that of *Russia*, or rather *White Russia*. Its extent being to the North, as far as the Frozen Sea, beyond the Artick Circle, and to the East, as far as the River *Oby*; and being to the South bounded by the *Crim Tartars*, and those of *Precop*; as to the West, its Borders extend as far as *Poland*, *Livonia*, and *Sweden*: Its whole length amounts to near 30 Deg. or 450 *German* Leagues, and its breadth to 16 Deg. or 240 *German* Leagues; which proves it to be the greatest Empire, for its extent, in *Europe*.

The Province of *Wolodomir*.

This vast Empire is divided into many Provinces, as may be gathered from the *Czar*'s Titles: In former Ages, the Province of *Wolodomir* or *Uladimer* claim'd the chiefest rank: Its Capital City, from whence it had borrow'd its Name, and was the Residence of the ancient Great Duke, till it was translated from thence to *Musco*, by Prince *Danilow Michaelowitz*, was built 928. by Prince *Wolodomir* 36 Leagues from *Musco* Eastward, between the Rivers of *Occa* and *Wolga*, in so fertile a Soil, that a Bushel of Wheat is said to yield 25 or 30. The River *Clesma*, which passes by, joyns with the *Occa*, near the City of *Murom*.

Of *Smolensko.*

The next Province bordering upon that of *Muscovy* to the East, is *Smolensko*, extending to the South as far as *Lithuania*, and to the West to *Livonia*, and the North to *Siberia*. Its chief City bearing the same Name, is situate upon the River *Nieper*, (or the ancient *Boristhenes*) having on the River side, a well fortify'd Cittadel. It was taken from the *Poles* by the *Muscovites*, 1514. and retaken by the first 1611. The *Muscovites* laid Siege to it again, 1633. but were obliged by the *Poles* to raise it, as we shall see anon: It was surrendred to the *Muscovites* by composition 1654. who remain in possession of it ever since. The other Cities of note in this Province, are *Prohobus* upon the *Nieper*, *Wesma* upon a River of the same Name, and *Mosaisko*.

Of *Rhesan.*

The Province of *Rhesan* is enclosed betwixt the Rivers, *Don*, *Occa* and *Aka*, being by the last divided from the Province of *Muscovy* to the West. Its Capital City is situated upon the *Occa* (being the same Name with the Province) in the most fertile part of *Muscovy*, abounding in Wheat, Honey, Fish, and all sorts of Venison and Fowl. Besides which, it has the Cities of *Corsira* and *Tulla*.

Of *Permic.*

The Province of *Permie*, one of the largest Provinces of all *Muscovy*, near 300 *German* Leagues distant from *Musco* to the North-East. Its Capital City, which has given the Name to the Province, is situate upon the River *Vishora*, which 15 Leagues from thence falls into the River *Kam*: It borders to the East upon the *Tartars* of *Tumen*, and the Inhabitants have a peculiar Language, use Herbs instead of Bread, and pay their Tribute in Horses and Furs.

Of *Jugaria.*

The Province of *Jugarie*, is according to *Herberstein*, the same from whence the *Hungarians*, who afterwards settled along the *Danube*, deduce their Origin.

Of *Wiatka.*

The Province of *Wiathka* lies beyond the River *Kam*: It has borrow'd its Name from the River *Wiathka*, which joyning with the *Kam*, fall together into the *Wolga*, not far below *Casan*.

This Province, which is 150 Leagues distance from *Musco*, is very Woody and Barren, and exposed to the frequent Inroads of the *Czircassian Tartars*, their old Masters, from whom the Great Duke *Basili* conquered it by the Sword.

Bielks. Rschevie. Twere.

The Principalities of *Bielks*, *Rschovie* and *Twere* derive their Names from their three respective Capital Cities: The first being *Biela*, the second *Rschova*, and the third of the same Name with its Province.

Plescow.

Plescow, the Dutchy and City of which also bare the same Name, was in former Ages under the Jurisdiction of its own Princes, till the Year 1509. when *John Basilowitz*, Great Duke of *Muscovy*, united it with the *Muscovian* Empire. It is call'd *Pskow* by the *Muscovites*, from a Lake on which the chief City lies, and out of which rises a River of the same Name which passes through it.

Siberia.

The Province of *Siberia*, which was likewise govern'd by its own Princes, that were Tributaries to *Lithuania*, and consequently to the King of *Poland*, is of a vast extent: At last having withdrawn themselves from the Jurisdiction of the *Poles*, they submitted themselves to the *Muscovites*, who under the Reign of *Basili* ejected their Duke and incorporated the whole Province with the *Russian* Crown. Their chief City is *Novogorod Sibersky*, or *Novogorod* of *Siberia*, to distinguish it from others of the same Name; besides which, it has the Cities of *Starodub*, *Petivola*, *Czernigou* and *Branskoa*.

Jeroslaf. Rosthow. Susdal.

The 3 Dutchies of *Jeroslaf*, *Rosthow* and *Susdal*, were antiently Allotments for the younger Brothers of *Muscovy*; till *John Basilowitz* reunited them with the *Muscovian* Empire 1565.

Dwina.

The Province of *Dwina*, which formerly belonged to the Dukes of *Novogorod Veliki*, is the greatest and most Northern of all *Muscovy*; having received its Name from the River *Dwina*, which falls into the Sea near *Archangel*; and having 100 Leagues in length. Not many Years ago, this Province had but one City, but since the Trade has been translated from *Narva* to *Archangel*, it is one of the most populous Provinces of all *Muscovy*.

Archangel.

The City of *Archangel*, (so called from the Arch-Angel St. *Michael*) situate at the Mouth of the River *Dwina*, upon the Isle *Podesenski*, is a place of great Commerce, whither Foreigners from all parts transport their Commodities, which they exchange for the Products of *Muscovy*, notwithstanding the Customs are very heavy here upon all Commodities.

In the Gulph near the Mouth of the River *Dwina*, are 3 Islands, call'd *Solofka*, *Anger* and *Colova*: In the first of which was the Sepulchre of a famous *Muscovite* Saint, which about 3 or 4 Years since was translated to *Musco*.

Ustingha.

The Province of *Ustingha*, bordering upon the Province of *Dwina* to the South, was likewise under the Jurisdiction of the Dukes of *Novogorod*. Its chief City which bears the same Name, derived its Name from its Situation, at the Confluence of the 2 Rivers *Fugh* and *Suchana*, from whence it is now half a Leagues distance. The Inhabitants live upon Venison and dry'd Fish instead of Bread, the best Black Foxes Skins are brought from hence.

Vologda.

The Province of *Vologda*, with its Capital City of the same Name, has taken its own from the River *Vologda*, which joyning with the *Dwina*, falls into the *White Sea*. It also belonged to the Dukes of *Novogorod*, but now is under the Subjection of the *Muscovites*. Its Capital City is the only one in *Muscovy*, which hath a Stone Wall about it; the Great Dukes being wont in time of War, to transfer their Treasures hither.

Bielejezero.

The Dutchy of *Bielejezoro*, one of the most Northern Provinces of *Muscovy*, is unaccessible, except in the Winter, by reason of the many Fenns and Woods.

Petzora.

The great Province of *Petzora*, which owes its Name to the River of *Petzora*, extends towards the East and North along the *Frozen Sea*: The River exonerates it self into the Sea, below the City of *Pustio Ziero*, by 6 several Channels, near the Streights of *Weigatz*. The *Riphean* and *Hyperborean* Mountains, (call'd *Zinnopojas*, i. e. *The Girdle of the Earth*, by the *Muscovites*) which afford the best Sables and Hawks, lie on both sides of it. The Rivers are generally Frozen here from *August* till *May*; their next Neighbours being the *Samojedes*, of whom we shall say more hereafter.

Obdorie.

The Province of *Obdorie*, extends along the River *Oby* (from whence it has got its Name) which rising out of the great Lake of *Kataisko*, and continuing its Course from the East to the North, exonerates it self into the *Frozen Sea*. They say that it is so broad at the

1636. Entrance, that a Ship with full Sails, can scarce cross it in 2 Days.

The Source and extent of the River *Wolga.*

The *Tartarian* Provinces we shall have occasion to speak of anon in our Travels along the *Wolga*; the Sourse of which is the Lake of *Wolga*, which being augmented by certain Rivers arising from the Lake of *Fronowo*, in the great Forest of *Wolkomskiles* of the Province of *Rschovie*, 2 Leagues from its Capital City; afterwards retains the Name of the Lake from whence it arises. This River (the *Rha* of *Ptolemy*) call'd *Edel* by the *Tartars*, is beyond all question the greatest in *Europe*, being (according to our own Computation, from the City of *Nise-Novogorod*, near which we went into it out of the River *Occa*, to the *Caspian Sea* above 500 *German* Leagues, not counting 100 more from its Source, to the place where the *Occa* falls into it.

The River *Boristhenes.*

The River *Boristhenes* (the *Dnieper*) the common boundary of *Lithuania* and *Muscovy*, owes its rise to the same Province, 10 Leagues from the Lake of *Fronowo*, near the Village of *Dniepersko*; from whence continuing its Course to the South, near *Wiesma*, it runs thence to the East, and passing by the Cities of *Progobus*, *Smolensko*, *Orsha Du Crowna* and *Mohilouw*, it takes its Course again to the South, and continuing its Current by *Kiovie*, near the *Circassian Tartars*, and from thence toward *Otzakow*, a City of the *Precopian Tartars*, dismbogues into the *Euxine Sea*.

The 2 Rivers of *Divina.*

Muscovy has 2 Rivers call'd *Dwina*; One owes its rise to the Lake of *Dwina*, 10 Leagues from the Lake of *Fronowo*, and as many from the Source of the *Dnieper*, and 2 Leagues below *Riga* exonerates it self into the *Baltick Sea*.

The other has its first Spring near the Confluence of the Rivers of *Jagel* and *Sacharka*, falls into the *White Sea* near *Archangel*.

The 2 Rivers of *Mosca* and *Occa* ought also not to be pass'd by in silence, but loose their Names with a great many others, in one or other of the before mentioned large Rivers.

The Air wholsome about *Musco.*

It is easie to imagine, that in Provinces so distant, there must be a considerable difference in the qualifications both of the Air and Earth. Thus the Air about *Musco* is very healthy, so that they scarce know what the Plague or other Epidemical Diseases are; which was the reason, that when in 1654. the Plague raged at *Musco*, they look'd upon it as a thing Supernatural, and block'd up all the Avenues of that great City.

Very cold in the Winter.

The Cold is so excessive here, that many feel the effects of it, with the loss of their Noses, Hands, or Feet: In the Year 1634. we saw in the Market-place before the Castle of *Musco*, the Earth open above 20 Fathoms in length, and a Foot broad, by the extremity of the Weather; and I my self have been an Eye Witness, that the Spittle and Water froze before they came to the Ground. Notwithstanding this, I observed the Spring not much more backwards than in *Germany*, the Snow which covers the Ground, being very instrumental in promoting Vegetation, by fomenting its natural heat. The Ice and the Snow render the Ways so smooth and easie for Passage, that they travel in their Sledges with a great deal of conveniency, which being well covered with course Cloth, and those within them with good Furs, they are rather inclined to Sweat, than feel the Cold even in the midst of the Winter. Their Horses are very fit for this Exercise, for tho' they are low, they are swift and hardy, and will travel 8 or 10, nay 12 Leagues, without making a Halt; so that a Country Fellow will carry you 50 Leagues for 3 or 4 Crowns.

Very hot in Summer.

The Heat in the Summer is as troublesome, as the Cold in the Winter; which proceeds not so much from the Rays of the Sun, which is here in a manner always above the Horizon, and makes the Days 18 Hours long) as it is occasioned by the vast Multitudes of Flies and Gnats, which are its Products among the Fenns, renders the Summer Season very incommodious, especially for Travellers. But notwithstanding this vast number of Fenns, which are all over *Muscovy*, the Grounds are extreamly fertile; for, except it be about *Musco*, where it is Gravelly, the Country produces more Wheat and Pasture, than the Inhabitants are able to consume; which is evident from hence, that in those Parts where they are destitute of Rivers, they seldom Manure more Ground, than will suffice for their Subsistance for a Year; yet there is scarce ever any such thing as Dearth to be heard of in *Muscovy*; tho' abundance of most excellent Ground lies Fallow, which produces only Hay, of which they Mow no more than they stand in present need of for their Cattle. 1636.

Exceeds *Livonia.*

It is very observable, that tho' the District of *Allen-taken* in *Livonia*, and the *Muscovite* Territories on that side, are divided only by the River *Narva*, the difference of the Soil is plainly perceivable, as soon as one passes the River. In *Muscovy*, as well as in *Ingermanland*, *Carelia*, and the Northern Parts of *Livonia*, they don't Sow till about 3 Weeks before Midsummer, because the Cold which has penetrated deep into the Earth, must have leisure to thaw; notwithstanding which, their Harvest is over in *August*; the Sun which remains so long in the Summer Season above the Horizon, soon putting forth, and ripening their Corn. But whereas the *Livonians* are forc'd to dry theirs by help of Ovens in the Barns after it is brought in, which is subject to many Inconveniences, and makes it unfit for Seed; the *Muscovites* carry theirs in dry, and ready to be Thrash'd.

Their Harvest.

What the Commentator upon the *Atlas* tells us, after *Herberstein* and *Guaguin* of *Muscovy*, *viz.* That it produces neither Apples, nor any other Fruit worth sending up to the Table, must be understood of some of the most Northern Provinces of *Muscovy*; it being beyond all dispute, that the rest, especially about *Musco*, afford excellent Fruits, as Apples, Cherries, Plumbs, and Gooseberries; tho' it be certain, that this Fruit being not brought to perfection by a just degree of heat, they will not keep so well as in *Germany*, and in some other more Southern Countries. They abound also in all manner of Pulse, Pot-herbs, Asparagus, Onions, Garlick, Roots, Cucumers, Gourds and Melons; the last of which are in great plenty, and excellent good here, and so big that in 1643. a Friend of mine presented me with a Melon that weighed 40 Pound.

Their Fruits.

Melons.

The *Muscovites* are very curious in managing their Melon-beds, which they make of Horsedung immediately after it is carried out of the Stable, this they lay 6 foot deep, and cover it with the richest Mould, in which they make flat Trenches of a foot and a half broad. The Seed, after they have steep'd it in Cows-Milk, or in an Infusion of fair Water, and Sheeps-dung, for 48 Hours, they put pretty deep into the Bed, and cover them in the Night, and sometimes in the Day time with Glass Bells, or Talk. They never transplant them, but only remove what is superfluous from about them. We were credibly inform'd, that about the City of *Samara*, betwixt the *Don* and the *Wolga*, grows a certain kind of Gourds resembling a Lamb in all its Members, fastned to the Ground with a Stalk, which represents the Navelstring; it changes place in growing, as far as the Stalk will reach, and where ever it turns, the Grass withers; which the *Muscovites* call feeding: They further say, that when it ripens the Stalk withers; and the outward Rind is covered with a kind of Hair, which they use instead of Fur. They shew'd us some of these Skins, which were covered with a soft frizling Wooll, not unlike that of a Lamb newly yean'd or taken out of the Sheeps Belly, and swore that they came from that Fruit; for which reason they call it *Boranez*, i. e. *A Lamb.*

How they order them in *Muscovy.*

Barmez.

Julius Scaliger speaks of them, and says, that they grow till the Grass fails them, and that they die for want of Nourishment. He also says, That the Wolf is the only Beast that will feed upon it, and that it is used as a Bait to catch him, which agrees with what the *Muscovites* affirm'd to us. *Exerc.* 134.

It was not till under the Reign of the Great Duke *Michael Federowitz*, who was a great lover of Gardening, that Flowers and Sweet Herbs were transplanted into *Muscovy*: And it is but a few Years ago, since the first *Provence* Roses were brought thither by *Peter Marcellis*, the *Danish* Commissary.

Flowers.

Asparagus.

Some of the *Germans* and *Dutch* have but lately shew'd them the way of managing the *Asparagus Beds*, with such success, that they grow as thick as 2 Thumbs. The *Muscovites* were a considerable time averse to Lettuce and other Sallad Herbs, but are of late pretty well reconciled to them.

Its fertility.

Hasle-trees and Vines are not to be found in *Muscovy*, except what is at *Astracan*; the defect of which is supply'd by the Foreign Merchants.

Honey and Wax is the main product of *Muscovy*, even the Woods abounding in them to such a degree, that besides the vast quantities that are consumed in Wax-candles, and Mead, they export Yearly above 20000 Quintals (or hundred weight) of Wax.

The

1636. The great Foreſts furniſh them with vaſt ſtore of Heathcocks, Pheaſants, Partridges, Wild Geeſe and Ducks: Herons and Swans are not much look'd upon here; and as for Thruſhes, Feldefares, Quails, Larks and other ſmall Birds, they don't think them worth their taking: Storks are not to be ſeen either in *Muſcovy* or *Livonia*, but divers ſorts of Birds of Prey; as Faulcons, Taſſels, *&c.* which in the more Northern Provinces are White.

Fowl.

Veniſon. No Deer. They have alſo all ſorts of Veniſon except Deer; eſpecially Elks and Wild Boars: Their Hares are generally Grey, but turn White in ſome Provinces in the Winter, as they do in *Livonia*; tho' in *Courland*, which is divided from it only by the River *Dwina*, the Hares never change their colour.

Bears, Wolves, Links, Tigers, Foxes, Martins and Sables, they have in ſuch plenty, that their Skins make up the moſt conſiderable part of the Traffick of the Country, ſo that it is computed, that the Foreign Merchants export Yearly the value of a Million of Gold in Furs of Black Foxes, Sables, Caſtors, White Bears, Ermins and Squirrils, beſides what is conſumed in the Country, and what is reſerved for the *Czar*'s own uſe. The Bears and Wolves are very dangerous and miſchievous here, as well as in *Livonia*, of which having given you ſome account before, we will not add any more here. The *Muſcovites* frequently take the Bears Whelps, and after they have taught them to Dance, and do ſome other Tricks, ſhew them about the Country.

All ſorts of Fiſh. The Lakes and Ponds of *Muſcovy*, are no leſs beneficial to them, than their Foreſts, affording them an incredible number of all ſorts of very good Fiſh, except Carps, which are not to be found in *Muſcovy* or *Livonia*, unleſs it be about *Aſtracan*, but are not well taſted.

No Carps.

Not many Years ago an Iron Mine was found out near *Tula*, on the Frontiers of *Tartary*, 120 Leagues from *Muſco*, which furniſh'd the *Czar* with a certain quantity of Iron-bars every Year; and about 15 Years ago information was brought to the *Czar Michael Federowitz*, of a certain Gold Mine, but the Undertaker of it having conſumed all his Subſtance in ſearch of it; and ſeveral others having met with the ſame Fate, the *Muſcovites* have ſince that time given but little credit to theſe ſorts of Projects.

But it is time to take a view alſo of the moſt Northern Province of *Muſcovy*, to wit, that of the *Samojedes*, ſince I had 1643. the opportunity of diſcourſing with 2 of their Deputies, who underſtood the *Muſcovite* Language, in the *Czar*'s Anti-chamber, by whom I was informed of ſeveral particulars relating to this Country.

The *Samojedes*. Theſe People were, without queſtion, comprehended formerly under the general Name of the ancient *Scythæ* and *Sarmates*, the Name *Samojedes* (which ſignifies as much as *Antropophagi*) being given them by the *Muſcovites*, ſince they came under their Juriſdiction, becauſe they uſed to mix the Fleſh of their deceaſed Friends among their Veniſon. As its Situation, which is on both ſides of the River *Oby*, upon the *Tartarian* Sea towards the Streights of *Weigatz*, ſhews it to be a far different Province from *Samogitia*, a Province of *Poland*, betwixt *Lithuania* and *Livonia*, ſo their Habitations, which are Huts, built Vaultwiſe half under Ground, with a hole on the top, which ſerves both for a Door and Chimney, ſufficiently convince us, that the *Abri*, mentioned by *Quintus Curtius*, who ſent their Ambaſſadors to *Alexander*, were not theſe living on the River *Oby*, but rather the *Tartars*, near the River *Don*, or *Tanais*, who living in Woods and Deſerts without any ſettled Habitations, *Alexander* did, as they expreſs it, fight with impenetrable Foreſts, Rivers, Ice and Snow. Their Huts have certain Walks under Ground, by which they converſe with

Their Habitations. one another, during the Winter, when the Sun leaving them in continual Darkneſs for 6 Months, and the Grounds being covered with Snow almoſt to the top of their Huts, they cannot ſtir abroad, but by means of theſe Subterranean Walks. The want of Light they ſupply with their Lamps, which are maintain'd by the Oyl of a certain Fiſh they gather in the Summer, which begins with them, as ſoon as the Sun enters the Septentrional Signs of the Zodiack, and brings them a Day as long as their Night had been before, which has given occaſion to thoſe fabulous Relations of People that ſleep 6 Months in the Winter, and

Their Food. riſe again in the Spring. As they neither cultivate the Ground, nor have any Cattle, ſo they feed inſtead of Bread upon dry'd Fiſh, and Honey and Veniſon, and cloath themſelves with the Skins of the Rein-Deer.

They are low of Stature, with broad flat Faces, little Eyes, and ſhort Legs, wearing their Hair long, not unlike the *Greenlanders*. 1636.

Their Stature.

The Rein-deer, as it is called by the *Laplanders*, a Beaſt well known in moſt of the Northern Parts, is ſomewhat bigger than a Stag, of a greyiſh White Colour, with a high Breaſt, long, rough Hair, and a cloven Hoof: Its Horns are higher than the Elks, and broader than the Stags, with two Brow-antlers on his Forehead. It is a ſociable and ſerviceable Creature, being uſed before little Sledges, which they draw with ſuch Swiftneſs, that they will run above 30 *German* Lgs in 24 hours. The *Samojedes* wear large Caps made of Furs, or Pieces of Cloth of divers Colours, which fall down about their Shoulders. Their Shirts are made of the tender Skins of the young Rein-deer, under which they wear their Drawers, and over their Shirts certain Caſſocks, reaching down to their mid-Leg, and open only at the Neck, with the Furs on the outſide. Theſe Caſſocks they put in very cold Weather over their Heads; the Face appearing only through the Cleft at the Neck, which has occaſion'd ſome of the ancient Hiſtorians to impoſe, People without Heads, and Faces on their Breaſts, upon the World. The *Samojedes*, as well as the *Laplanders* and *Finlanders*, wear a kind of Pattins upon the Snow, of an Ell and an half long, made of the Barks of Trees; the *Laplanders* and *Finlanders* make them as long towards the Heel, as the Toes; but the *Samojedes* have them only turn'd forwards.

The Rein-deer.

Their Cloathing.

The Error of ſome Hiſtorians.

Col. *Porter*, Governor of *Narva*, gave us the diverſion of ſeeing two *Finlanders*, belonging to the Garriſon, running down a Hill with theſe Pattins; which they did with ſo much Swiftneſs, that a Horſe in a Gallop could ſcarce overtake them.

The Nerves and Veins of this Beaſt they uſe inſtead of Thread, and the Shavings of the ſide of the Bark of Beach ſerves for a Handkerchief. I had the Curioſity to ask one of theſe *Samojedes*, what he thought of *Muſcovy*. He reply'd, That tho' *Muſcovy* was a Country pleaſant enough, yet he was confident, That if the Great Duke was ſenſible of the Security and Quiet of their Life, he would chuſe their Retirement before all his Grandeur. They were all Pagans, till within theſe few Years they were converted by a *Muſcovite* Biſhop of *Uladimar*.

Since the Author of theſe Travels has exſpatiated as far as *Samojede*, he thinks it may not be quite beyond the purpoſe, tho' not within the compaſs of his Travels, to give an Account of what he had occaſion to learn of the Condition of *Greenland*, from certain Perſons, who 1654. being ſent from *Copenhagen* to *Greenland*, brought a Man, two Women, and a Girl from thence, and the Plague raging at that time in *Denmark*, which had obliged the King of *Denmark* to retire to *Flensburgh* in *Holſtein*, they were brought thither, and from thence carried to the Duke my Maſter to *Gottorp*, where they were lodged ſeveral Days in my Houſe. They were low, but ſtrong, and well ſet, their Faces ſomewhat broad, with ſmall, lively, black Eyes; their Head and Feet ſhort, not unlike the *Samojedes*, or *Nagaian Tartars*, except that they were much more black, theſe being of an Olive Colour; tho' the youngeſt of the two Women was not ſo black as the other two, had larger Eyes, and diſcovered more Subtilty than the reſt. The Averſion ſhe ſhew'd for Fleſh, which the others did not, and to unclean Beaſts, made us gueſs that ſhe might be of the Poſterity of thoſe ancient Chriſtians, who lived in *Greenland*. Their Hair was as black as Jet, which they roll'd up, and ty'd together on their Gowns. When their Maids become Marriageable, they mark them like the *Americans*, with blew ſtrokes from the Lip to the Chin, or from the upper end of the Noſe between the two Eyes, and ſometimes over the Eye-brows to the Temples. They make them with a ſmall Thread, ſteep'd in train Oil. They ſhew'd me the holes in their Ears, and that they had worn Pendants in them; their Breaſts were very ugly ſhaped flagging down upon their Bellies, with very black Nipples.

A Deſcription of *Greenland*.

Of the Inhabitants.

Several Perſons, who for a conſiderable time did obſerve them, have aſſured me, that they have no Hair in any other Part of their Bodies, but on their Heads, and that they are not troubled with the Womens Monthly Diſeaſe. They ſpoke very faſt, and from the Throat, pronouncing the G very roughly, like the *Tartars*. They want the R in their Language, inſtead of which they uſe the L. Some few *Daniſh* Words are to be met with in their Language; the reſt of their Words (except perhaps two or three, which

Their Language.

1636. seem to be derived from the *Latin*) have not the least Congruity with any Language used in *Europe*: for the better confirmation of which, we will mention some few here used commonly in Conversation; *Keiling*, Heaven; *Ubleisin*, a Star; *Igne*, Fire; *Agakwangoo*, Yesterday; *Petting*, a Man; *Kajoictuinas*, Young; *Ekiken*, Deformed; *Niakau*, the Head; *Siutu*, an Ear; *Ukang*, the Tongue; *Tikagga*, a Finger; *Nasekka*, the Belly; *Ennowan*, a Wastcoat; *Kaksua*, an Arrow; *Kalipsi*, a Pot; *Uglessin*, a Bird; *Itaguptan*, to-morrow; *Kona*, a Woman; *Pannien*, a Child; *Kannoctuina*, Old; *Pinallu*, Fair; *Ubia*, Father; *Nulia*, Mother; *Isiken*, an Eye; *Keinga*, the Nose; *Kanekua*, the Mouth; *Kiguting*, a Tooth; *Pimikuin*, the Beard; *Aksceita*, the Hand; *Kablan*, the Thumb; *Kuggie*, a Nail; *Kana*, a Leg; *Sikadin*, a Foot, *&c.*

Their Cloathing. Their Cloaths are made of the Skins of Sea-dogs, Sea-calves, and of the Rein-deer, like the *Samojedes*, except that they have under them Wastcoats made of the Skins of Birds, such as Swans, Geese, Wild Ducks, *&c.* turning the Feathers inward or outward, according to the difference of Season. Their Sex is not easily distinguish'd, except that the Women wear a Piece of Skin hanging down before and behind half way to the Leg, and have a Capuche on their Wastcoats, like the *Recollects*; whereas that of the Men is not so broad, and not unlike those of the *Franciscans*. The Mens Breeches come below their Knees, but those of the Women not to above half the Thigh.

Their ordinary Employments. Fishing and Hunting are their daily Employments, in which they make use of Bows and Arrows only, which are also their Arms; tho' they also fish with a kind of a Hook, made of the tooth of the Fish *Tawak*: Of this they make also their Instrument, wherewith they kill the Whale, which they perform after a different manner from other Nations. They cut a very long Thong out of a Whale-skin, to one End of which they fasten the Instrument, and to the other a Sea-calf or Dog's-skin blown up; then they dart the Instrument at the Whale, the blown Skin floating upon the Water, and shewing the Track of the Whale, till her strength failing they kill and draw her ashore. The Fat and Oil of the Whale is accounted a great Dainty with them, the last of which they drink, which the Women that were with us, preferr'd before our Wines, Bread, or Sauces; which they refused, but instead of them were contented with common Water, their ordinary Drink in *Greenland*. They don't eat their Meat raw, as it is commonly reported, but either boil or roast it; their common Food being Sea-dogs, Sea-calves, Rein-deer, Foxes, House-dogs, and dry'd Fish.

Are Savages. As they are a People without Civility, Vertue or Shame, they may very well be numbred among the Savages; they always have a sour Countenance, are distrustful, stubborn and incorrigible; tho' it must be confess'd that, according to the Relations of those who have been on that Coast, those towards the S. W. are not so savage as those towards the North. So our three Women, who had been taken at the Entrance of *Davis*-streight, were pretty docile, and would imitate those Things Women are commonly employed about: They danc'd (tho' after a strange manner) with so much Exactness, as to Time and Cadence, that every Body was surprized thereat, when they saw them dance at a Ball before the King of *Denmark* at *Flensburgh*. However they would never take to any other Language but their own, tho' they could pronounce some *Danish* and *German* Words very distinctly.

They despise Gold and Silver. As they were unacquainted with the Value of Gold and Silver, so they prefer a Hatchet before a Piece of Gold, and a Nail before a Crown-piece; which is the reason that they are so fond of Knives, Sciffars, Needles, and such like other Toys of Iron or Steel, for which they exchange the Fat and Oil of Whales, Skins of Land-dogs and Sea-calves, the Teeth of the Fish *Towak*, whereof Mr. *Perreire* has given us an exact Description.

Treatise of *Greenland*. The Duke of *Holstein* has one of these Teeth, which is 8 Foot 2 Inches long, and weighs 18 Pound. The King of *Denmark* has one 6 Inches longer. *Greenland* produces also Talk and Marble of all Colours. And some Oar, as it is reported, was found here under the Reign of *Frederick* the 2d, King of *Denmark*, an hundred weight of which yielded 26 Ounces of *Silver*.

Are Pagans. We are ignorant hitherto as to what concerns their Religion, but I am apt to imagine they are Pagans, because I have a wooden Idol by me, which being brought out of *Davis*-Streight, our Women knew it at first sight, and call'd it *Nalim-qui-sang*, giving me to understand, that the Children used to dance about it. It was of a Foot and an half high, very roughly made, covered with Feathers and an hairy Skin, with Sea-dogs Teeth about the Neck. I observed also, that our Women would prostrate themselves, and weep at Sun-rising, which seems to imply that they adore the Sun. Mr. *Zeiler* makes the *Greenlanders* Sorcerers, and that they sell Winds like the *Laplanders*, tho' no such thing has been observed by the *Danes*. It was indeed taken notice of among those that were with us, That when one of them happen'd to fall sick, one of their Comrades used to lye by her upon her back; and the sick Person bound a Stick, with a Cloth, on the Forehead of her that ail'd nothing, muttering certain Words by it; which done, she that had her Head thus bound up, leaned it down very heavy at first, afterwards more easily, the sick Person continuing all this while her Prayers; the Mystery of which Ceremony no body was able to discover. 1636. Itinerar.

They live in a State of Equality among one another, without any Magistrates or Superiors: He that has the most Children, most Bows and Arrows, and Wild Fowl, is the richest amongst them. Their Colour, which is swarthy, contradicts what *Pliny* asserts, that the Heat of the Sun burns the Skin, and the Cold whitens it, if Experience had not sufficiently convinced us to the contrary; it being evident, That those living near the Streights of *Magellan*, are white, tho' as near the Sun as the Negroes of *Africk*. Thus the Inhabitants near the *Cape of Good Hope*, are Black, whereas the *Spaniards*, *Italians*, and *Persians*, living under the same degree, are White; and the same difference may be observed among the *Ethiopians*, and the *Malabars*, tho' at the same distance from the Line. L. 2. c. 72. They are swarthy.

But after so large a Digression, it is time to return to *Muscovy*, and give you an Account first of their Habit and Stature, and next, of their Temper and Manner of Living. They are, for the most part, very corpulent and well-set, their Complexion like the rest of the *Europeans*: Great Beards, with the Mustacho's hanging over their Lips, are in great Veneration among them; and I remember particularly that the *Czar*'s Factors, who attended at our Audience, were all chosen Men for Beards and Paunches. Persons of Quality shave their Heads close, those of an inferior degree only cut their Hair: The Clergy wear them hanging down round their Shoulders half ways their Backs; and so do the *Bojars*, if they are in disgrace at Court, as a Testimony of their Affliction. The Women are well proportion'd both in their Limbs and Features, notwithstanding which they paint their Faces, and that so grossly, as if it had been laid on with a Brush; which Custom has taken so deep Root in *Muscovy*, that among the Presents which the Bridegroom makes to his Bride, he always sends some Paint; and I remember, that when *Knez Juan Borissawitz Cirkaski* his Lady, who was one of the handsomest in all *Muscovy*, was unwilling to spoil her Beauty with such course Plaister-work, the rest of the Ladies at Court obliged her to comply with that preposterous Custom. The Stature of the *Muscovites*. Their Women.

Married Women thrust their Hair up under their Coifs, but the Maids wear it in two Tresses, hanging down behind with a Crimson Riband ty'd to the end. Children of both Sexes, under 10 years of Age, have their Hair cut, except two Locks over the Temples, their Sex being discovered only by a Brass or Silver Ring, the Girls wear in their Ears. Their Habit.

Their Habit is not unlike that of the ancient *Greeks*: They have wide and short Shirts scarce reaching to their Knees, without any Gatherings in the Neck, but are lin'd with a triangular Piece from the Shoulders down to the Reins, which is commonly sow'd down with Crimson Silk; and some have in the Seams and under the Arm-pits Fringes of the same Colour. The Neck-piece is about an Inch broad, which together with the end of the Sleeves, and on the Breast, the richer sort have embroider'd with Silk, or Gold, or precious Stones, and fasten the Neck-band with two great Pearls, or Gold and Silver Buttons before. Their Breeches are very large, and may be made either wider or streighter, like our Drawers; over which they wear a Wast-coat, call'd *Kaftan*, reaching down to their Knees, the Sleeves of which are so long, that they lay them in many Pleats: The Colour of this Wast-coat being above half a quarter of an Ell high, covers part of the Head behind, and is commonly lined with Plush or Sattin. Over this they wear a close-bodied

1636. bodied Coat, call'd *Feres*, coming down below the mid-leg; both theſe are generally made of Callicoe, Taffeta, Damask, or Sattin, according to the Quality of thoſe that wear them. Whenever they go abroad, they wear over theſe a kind of a Robe reaching down to their Heels, of a Violet or dark green Cloth; tho' the *Knez* and *Bojars* have them of Damask, Sattin, and other rich Silks. Of this kind are the Robes which they appear in at Court upon any Solemn Occaſion, which are taken out of the *Czar*'s Wardrobe.

The cloſe-bodied Coats have a kind of a broad Cape falling down upon the Shoulders, on which the richer ſort have Gold and Silver Loop-buttons, as well behind as before and on the ſides. The Sleeves are of the ſame length with the Coat, but narrow, and hanging by.

Inſtead of Hats, the *Muſcovites* were Caps: Perſons of Quality have theirs of Sables, or black Foxes Furs, half an Ell high, when they are to make their Appearance upon any Publick Occaſion; but thoſe they uſe at home, or in common Converſation, are of Velvet, lined with the ſaid Furs, with narrow Brims, trimm'd with Gold and Silver Loops, or embroider'd with Pearls. The Common People are contented with ſuch a Cap made of Stuff, in the Summer, and in the Winter, with Cloth ones lined with Sheep-skins. Their Boots are made of *Ruſſia* Leather, or *Perſian* Goat-skins, not unlike thoſe of the *Polanders*, ſhort and piked towards the Toe. The Womens Shooes-heels are a quarter high, ſo that they can ſcarce walk in them.

The Habit of the *Muſcovite* Women differs only in the largeneſs of their Coats, which are wider than thoſe of the Men; and the richer ſort have them trimm'd with rich Gold, Silver, and Silk Laces, or Button-loops: Their Sleeves are made ſo, as that they may either put them on, or let them hang by: They wear no *Kaſtans*, nor none of thoſe high Collars the Men are ſo proud of: Their Smock-ſleeves are 4 or 5 Ells long, folded upon their Arms: Their Caps or Coifs are generally of Damask, plain or flower'd Sattin; ſometimes embroider'd with Gold or Silver, and lined with Caſtors, the Hair whereof cover a great part of their Foreheads. The Maids have their Caps commonly lined with Fox-skin.

Not many Years ago all Foreigners in *Muſcovy* uſed to appear abroad in *Muſcovite* Habits, till the preſent Patriarch having obſerved ſome *Germans*, at a Proceſſion, ſhew an Irreverence as he was giving the Benediction to the People, was ſo exaſperated thereat, that he made his Application to the *Czar*, unto whom he repreſented that thoſe Foreigners of another Religion, being unworthy of the Benediction he imparted to the Faithful, it was abſolutely requiſite they ſhould appear in their own Country-dreſs, to diſtinguiſh them from the reſt, deſiring him, That he would be pleaſed to iſſue out his Ordinance for that purpoſe. The Great Duke having accordingly put forth his Proclamation, the Foreigners were forced to obey; but the Time appointed for the changing of their Dreſs being ſhort, and no Taylors being to be had in *Muſcovy* who could make any after the Foreign Mode, it was a pleaſant Spectacle to ſee thoſe, who had Places at Court, appear there in their Antick Dreſſes; moſt of them having belonged to their Grand, or Great Grandfather, who had, perhaps brought them out of *Livonia*, when they were forced by the Tyrant *Juan Baſilowitz*, to change their Native Habitations for thoſe of *Muſco*. Ever ſince, each Foreign Nation are clad after their own Modes.

The *Muſcovites* as they are very tenacious of their Cuſtoms, ſo they never change their Faſhion, it being ſeldom to be ſeen that any of them imitate a Foreign Dreſs. I knew but one in our Time, who being a Perſon of Quality, call'd *Knez Mikita Juanouitz Romanou*, would ſometimes appear according to the *Poliſh* or *French* Modes, at which the Patriarch was highly diſpleaſed. As for the Peaſantry of *Muſcovy*, they wear ſcarce any thing but courſe Canvaſs, and Shooes of Barks of Trees, wrought like our Basket-work, which they make themſelves; ſo, that what the Elector of *Brandenburgh* ſaid of a certain *Bayliwick* in *Pruſſia*, *viz. That there were above* 15000 *Shooemakers in it*, may be apply'd to *Muſcovy*, where as well as in that *Bayliwick* each Peaſant is his own Shooe-maker.

Their way of Living.

If due Reflection be made upon the manner of Living of the *Muſcovites*, it muſt be confeſs'd, That ſcarce any thing can be more barbarous than they are. They would fain perſwade the World, that they are deſcended from the Ancient *Greeks*, when at the ſame time they are ſo much involved in Barbariſm, that they deſpiſe all Arts and Sciences, and look upon a Mathematician no otherwiſe than a Sorcerer; which I found to be true, by my own Experience, when 1643. I ſhew'd them ſome Pieces in Opticks, and the *Czar* would have entertain'd me in his Service, in the Quality of his Aſtronomer and Mathematician; and of which I cannot forbear to give you another Inſtance, in a certain *Dutch* Chirurgeon living in *Muſco*, who playing one Night upon the Lute in a Room where a Skeleton hung againſt the Wall, certain *Strelitzes* paſſing by that way, and peeping through a Chink, ſaw the *Skeleton* moving by the Wind that came through the Window, they were ſo frighten'd thereat, that they run ſtraitways to Court, and inform'd the *Czar*, that they had ſeen the Skeleton dance; which being confirmed by others, who were ſent on purpoſe to diſcover the Truth, the poor Chirurgeon was condemned for a Sorcerer by the Council; and had certainly ſuffered as ſuch, had not *Knez Juan Boriſſowitz Cirkaski*, who was his Patron, interceeded with the Great Duke in his behalf, by remonſtrating to his Majeſty, that the Chirurgeons made uſe of theſe Skeletons, to find out the Compoſure and Juncture of the Bones. Notwithſtanding which, he was forced to leave the Country, and the Skeleton was drag'd about the Streets and burnt: An evident Sign that tho' they eſteem Phyſicians, they have an Averſion to that Science. 1636.

A *German* Painter, who had a dead Man's Skull in his Houſe, was in danger of undergoing the ſame Fate. But with all their Barbarity, it muſt be confeſs'd they are naturally ingenious, but ſeldom apply their Wit to any Vertuous or Honourable Action; which verifies the Character given them by a certain *Daniſh* Gentleman, who was ſent Ambaſſador thither by *Frederick* the 2d, King of *Denmark*: To wit; *That they are ſubtil, over-reaching, humourous, ſelf-will'd, obſtinate, inſolent and impudent, that Intereſt is the Guide of their Reaſon, and that they have bid farewel to all Vertues, to embrace all manner of Vice.*

They are very crafty.

This may eaſily be diſcovered in their way of Dealing; for, tho' they make it a Piece of Conſcience to retain any thing that is paid them more than their due, they don't look upon it as a Crime to over-reach a Buyer in a Bargain, be it never ſo unreaſonable, alledging, that a Merchant is not fit for Traffick, unleſs he have a good Talent, and knows how to make uſe of it, in ſurprizing thoſe he deals with: And I remember, that when ſome *Muſcovite* Merchants had been ſhrewdly over-reach'd by a certain *Dutchman*, they were ſo far from blaming him for it, that they deſired to be admitted his Partners, to be perfected in the way of Cheating. This makes them very miſtruſtful, and to look upon Lying and Calumnies as very neceſſary Qualifications: The laſt of which had got ſuch an Aſcendant in the Court of *Muſcovy* in former Times, eſpecially under the Reign of the Tyrant *Juan Baſilowitz*, that a great number of Perſons of the firſt Rank felt the direful Effects of it.

Liars.

And I had a very good Story of this kind told me at *Narva* by Mr. *Martin Baar*, who liv'd in *Muſcovy* under the Reign of the Great Duke *Boris Goudenou*. The ſaid Great Duke being very ill of the Gout, a certain *Bojar*'s Wife, who was but indifferently treated by her Husband, to revenge herſelf, inform'd the Court, that he had a moſt Sovereign Remedy againſt the Gout, but would not apply it to his Majeſty. The *Bojar* being ſent for immediately, and charged with the Thing, made all the Excuſes he could, but in vain; for all being attributed to his Malice, he was whipp'd twice moſt cruelly, and at laſt commanded to prepare himſelf for Death, unleſs he would apply the deſired Remedy. The poor Fellow being reduced to Deſpair, at laſt deſired 15 Days to prepare it; telling them, that not being ſure of its Certainty, he durſt not attempt to make Trial of it upon his Majeſty; which being granted to him, he ſent for a whole Waggon full of Herbs, good or bad, ſuch as they could meet with, wherewith he prepared a Bath for the Great Duke; who finding himſelf ſomewhat at eaſe, and being thereby confirmed in the Opinion he had conceived before, that the *Bojar* had refuſed to apply this Remedy out of Malice, order'd him a Third Whipping more ſevere than the Two former; and, at laſt, gave him a Reward of 400 Crowns, with 18 Peaſants for his Slaves, with a ſtrict Charge not to entertain any Animoſities againſt his Wife.

Of late Years, it muſt be confeſs'd, they have proceeded with more Caution; and, to ſtifle this Vice of Calumny, a Law has been made for the Accuſer to endure

1636. dure the Torture, before the Person accused can be condemned to it; notwithstanding which we saw an Example of this kind in another Woman, the Great Duke's Farrier's Wife, who willing to be rid of her Husband, accused him that he intended to poison the *Czar*'s Horses, and the Great Duke himself, if he could; Upon which being put to the Torture, and persisting in her Accusation, the Husband was banished into *Liberia*.

I thought my self obliged to mention these Instances of Treachery to one another, from whence a reasonable Inference may be made, what Strangers may expect at their Hands; it being certain, that as their Education never extends beyond Reading and Writing, so they, like Beasts, act meerly by Instinct, and act in the whole course of their Life, either according to their unbridled Passions, or Prospect of Interest.

Gross and insolent. Hence it is, that they want that Allay of Generosity, which is observable in most of the fiercest Nations; whereas they being on the contrary overcome with a sottish Pride and Conceit, especially of the Greatness, Power, and Wealth of their Monarch, before all others, they treat even the Ambassadors of the most potent Princes with a great deal of Insolence.

Uncivil. Private Persons don't treat one another with more Civility, nothing being more common among them, than to affront one another.

Whilst we were at *Nisa-novogorod*, the Chancellor's Steward, who came to see us, happen'd to quarrel with our *Pristaff* about Precedency, which in an instant rise to such an heighth, that in the Ambassadors Presence they call'd one another Son of a Whore, and Dog; but being desired to lay aside their Difference till a more convenient Time and Place, where they were invited to be merry, and not to quarrel, they drank so cordially together, as if there had not been the least Contest betwixt them.

Quarrelsome. They are extremely quarrelsome, and will make such a Noise at one another, that a Stranger cannot imagine, that they would ever part without Bloodshed; but this happens very seldom, unless it be by the means of a Switch, or Fists; the utmost piece they venture at, being a good Kick or two in or about the Belly. 'Tis true, if a Quarrel happens betwixt some *Knez* or *Bojars*, they decide it on Horse-back, but not with Sword and Pistol, the highest Piece of their Gallantry arising no higher than to fight it out with a good Whip. It must be confess'd, that in their Quarrels they seldom curse, or blaspheme; but, on the other hand, they rail at one another in such reviling Terms, and in such horrid Expressions, as ought not to be mention'd; the worst is, that these pass reciprocally betwixt Parents and Children, and from the vulgar sort to Persons of Quality; to refrain which Insolences, the same were forbidden under Pain of Whipping; but this proving insufficient, a Fine was injoin'd to be paid by the Offenders, according to the Quality of the injur'd Person.

They are so brutish in their Conversation, that they are not in the least asham'd to belch their Exhalations of Onions and Garlick, wherewith all their Meats are dress'd, into other Peoples Faces, without any distinction of Quality, unless in the Great Duke's Presence.

Are shameless. They are as much Foreigners to Arts and Sciences, as they are to the Knowledge of other Countries, which makes their Conversation run generally upon nothing but Brutalities; nay, such enormous Vices, as are not fit to be named, which they frequently commit in their Drink: The Postures of their Dancing, especially of their Women, are unquestionable Demonstrations of their Impudence. I have been an Eye-witness, my self, when both Men and Women came out of the Brothel-House stark Naked, and incited some of our Retinue to Lasciviousness by their Filthy Expressions. Our Interpreter related to me a remarkable Instance of this kind, at *Novogorod*, where a Woman, being among other Pilgrims, come thither to assist at an Anniversary Devotion, took so large a Morning Draught, that, as she came out of the Tipling-Place, she drop'd down quite uncovered in the Street: A drunken *Muscovite* happening not long after to come that way, lay down by her, made use of her, and before he had quite done, fell asleep in sight of a great many Standers by, who made a Ring about them, till an old Man passing by covered them with his Garments.

Drunkards. Drunkenness is a Vice so Currant in *Muscovy*, that scarce any Body is exempted from it: They have a Custom of taking a good Cup of *Aqua Vitæ* before, at, and after Meals, which introduces them into greater Debauches afterwards; nay, the vulgar sort are so much addicted to this Vice, that we used frequently to see them come out of a Tipling-house without their Cloths, nay, without their Shirts and Drawers, and appear in the Streets without the least Shame, like *Adamites*, covering their Privy Parts only with an handful of Herbs; and among the rest, I saw once a Priest at *Novogorod*, whilst he was going to give the Benediction to our Centinel at the Door, tumble head-long in the Dirt, without any sense or motion, which were suppressed by the Vapours of the strong Liquor he had drunk at a Neighbouring Tipling-house. The *Czar Michael Federowitz*, who was a professed Enemy to Drunkenness, endeavoured to moderate these Excesses, by suppressing a great number of these Tipling-Houses, and prescribing certain Rules and Measures to the rest; but this had no other effect, than that instead of meeting at the Publick Houses, they used to get drunk with one another at home. 1636.

So are the Women. The Women are no less addicted to it, than the Men, nothing being more common among them, than to see them come after their Husbands to the Tipling-house, where they will be sure to make the Cup go merrily round, and, after their Husbands are fal'n asleep upon the Floor, sit upon them, and continue drinking till they tumble down drunk among them, of which I saw an Example my self at *Narva*.

Tabaco forbidden. *Tabaco* was formerly so common in *Muscovy*, that they took it in great Quantities both in Snuff and Smoak, the poorer sort spending all to the last Peny upon that Weed; besides, that, by their negligence, many Houses were set on Fire, and they used to appear with their stinking Breaths before their Images, the Patriarch prevail'd with the *Czar*, 1634. to forbid the Importation, Sale, and Use of Tabaco, under severe Penalties.

Their Slavery. The base Disposition of the *Muscovites*, the Meanness of their Education, and that continuation of Slavery, unto which the highest from the lowest are born, makes them insensible of any thing else but Force, nothing but the Cudgel and the Whip being able to bring them to Reason, of which Slavish Chastisement even the greatest *Bojars* are not exempted. The poorer sort are so insensible of that Liberty, which other Nations value at so high a rate, that for a small Matter they will sell themselves and their whole Family; and if they happen to be delivered from Slavery, by some Accident or other, they will make the same Bargain a second time.

The utmost Reverence they pay to their Superiors, by bowing their Heads to the Ground, and prostrating themselves, after they have received a good Cudgelling, are infallible demonstrations of the lowness of their Spirits: The greatest Men themselves don't think it below their Stations to confess, nay, to brag, That they are the *Czar*'s Slaves; and, as a Sign of their Humility, never speak or write to him, but express their Names in the diminutive; as for Instance, *Petruske twoy Golop, I, Petrillo, your Slave*, instead of *I, Peter*. The worst of all is, that even such Foreigners as enter into the *Czar*'s-Service, must be subject to the same Treatment; especially the Physicians in former times, because the *Muscovites* used to look upon that Art as infallible.

When 1602. *John* Duke of *Holstein*, who had married the Daughter of the Great Duke *Boris Gondenou*, fell sick, the *Czar* sent word to his Physicians, that if he recovered not, their Heads should answer for it; and he happening to die not long after, the Physicians kept out of the way, till the Great Duke himself being seized with the Gout, he sent for one of them, in order to administer some proper Remedies to him; the poor Physician imagining no otherwise than that he was call'd to Execution, put on a tatter'd Garment, and advancing in a prostrate Posture to the *Czar*'s Bed, ask'd his Pardon; upon which one of the *Knez* there present, intending to divert the *Czar*, call'd him Dog, and kick'd him: But the Physician perceiving the *Czar* to look with a favourable Eye upon him, said to him with a certain Confidence:

Great Prince, I am sensible I am your Slave; but give me leave to tell you, that I am only Yours. I know I have deserved Death, and should think my self happy to receive it from your Hands; but it troubles me to be thus affronted by this Knez, my Fellow-slave; and I think it is not your Desire, that any other should have Power over me.

These Words, together with the Occasion the Great Duke had of his Assistance, procured him and his Fellow-

1636. low-Phyſicians a Pardon, beſides a Preſent of 1000 Crowns for himſelf, and the *Bojar* had a good Cudgelling for his Pains.

The Lords keep many Slaves.

As the Lords are abſolute Slaves to the *Czar*, ſo they keep great numbers of Slaves of their own in their Country-Houſes and Farms; beſides thoſe they keep for their Service in the City, who being kept at very ſmall Board-wages, this is the chief Cauſe of the many Diſorders that are committed in the Night-time in the Streets of *Muſco*: Thus our Maſter-Cook was kill'd one Night as he was coming home, and the *Swediſh* Ambaſſador's Steward underwent the ſame Fate. The Lieutenant who commanded our Muſqueteers in our Voyage into *Pruſſia*, was alſo killed one Night coming from a Wedding homewards; nay, I ſaw the Great Duke's Phyſician ſtruck from his Horſe, in the Day-time in the Streets; and they would have cut off his Finger, on which he had a Gold Ring, had he not been reſcu'd by ſome Servants of a *Knez* of his Acquaintance who lived hard by: And I remember that on St. *Martin*'s Eve, we counted once 15 dead Bodies in the Place, where they are expoſed to Publick View, that their Friends may take Care of their Burials.

But of late Years Watches have been appointed, who examine all ſuch as they find walking without Lanthorns, and commit them to the Guard Houſe of the *Strelitzes*.

Make the Streets and the Roads about *Muſco* very unſafe.

Theſe Slaves alſo make the Roads about *Muſco* very unſafe for Travellers, whom they rob and kill without any remorſe, if they are not very well provided againſt them. Theſe Slaves are ſold by their Maſters, like as we do our Horſes or Cows; nay, a Father may diſpoſe of his Son for his own advantage, which however they ſeldom do, unleſs it be to ſatisfie their Creditors, in which caſe they engage the Boys at 10 Crowns, and the Girls at 8 Crowns a Year, the Children in *Muſcovy* being obliged no leſs than their Parents, to give ſatisfaction to the Creditor, and to undergo the Puniſhment appointed for deſperate Debtors.

Are good Soldiers in the defence of a Place.

Notwithſtanding the *Muſcovites* are born Slaves (who were not allow'd to be liſted into the *Roman Legions*) their groſs Food, and the Hardſhips they are inured to from their Infancy, makes them very fit for Soldiery, eſpecially in the defence of Places, of which we have an inſtance 1579. in the Siege of *Noteburgh*, where they made an honourable Capitulation with the *Swedes*, after there were but 2 Men left. They ſhew'd no leſs Bravery in the defence of the Abby of *Padis* in *Livonia*, and the Caſtle of *Smikols*; the laſt of which was Beſieged by the *Poles*.

But not in the Field.

In the Field, it muſt be confeſs'd, they have rarely been able to act with any ſucceſs againſt the *Poles* or *Swedes*, but that muſt in a great meaſure be attributed to the ill management of their Officers, and eſpecially of their Generals, as it happened 1633. at the Siege of *Smolensko*, where the *Muſcovite* Army conſiſted of 100000 Men; among whom were 6000 *Germans*, under the Command of one *Herman Schein*, a *Poliſh* Renegade.

The diſgrace before *Smolensko*.

The Fortifications of the City being but in a very indifferent condition, the *Germans* had made a large Breach on their ſide, and attack'd it with ſo much Bravery, that they were in a manner Maſters of it, when the General, either out of Perfidiouſneſs or Envy, cauſed his great Guns to be turn'd againſt them, and forc'd them to give over the Aſſault. In the mean while the *Poles* having gathered a Body of 5000 choſen Men, poſſeſt themſelves of an advantageous Poſt, from whence they might cut off their Convoy of Proviſions, which reduced the *Muſcovite* Army in a little time to ſuch a diſtreſs, that they were forced to ſurrender themſelves and the whole Artillery at diſcretion, and to agree to a vaſt Ranſom for the Officers, which was paid afterwards by the Great Duke. The General return'd notwithſtanding this, to *Muſco*, truſting to the Patriarch's favour, and ſome of the Great ones, who had a Finger in the Treaſon, who in effect were ſo powerful, as to protect him againſt the Charge brought againſt him by the *German* Officers, but the People having got the ſcent of his Treachery, began to murmur ſo loudly, that they were forced to bring him to condign Puniſhment, his Head being ſever'd from his Body in *June* 1634. and his Kindred baniſh'd into *Siberia*.

Their Houſe keeping.

The *Muſcovites*, as well thoſe of a higher, as a lower degree, are very thrifty in their Houſe-keeping, the laſt live only in wretched Wooden Houſes; and it is not above 30 Years, ſince their Lords and rich Merchants have built Houſes of Stone. 1636.

Their ordinary Houſhold-ſtuff ſeldom exceeds 3 or 4 Pots, and as many Wooden or Earthen Diſhes; ſome few of the better ſort have Pewter, but ſcarce any Silver except ſome drinking Cups, and thoſe ſo ill kept, that the Great Duke's Plate looks like our Tavern Pots, being clean'd but once a Year, and that after a very ſlovingly manner. They alſo ſometimes hang their Rooms with Mats, and adorn them with a few Images miſerably painted. Some Perſons of Quality uſe Feather-beds, the reſt uſe Quilts, and the common People Chaff or Straw; for want of which, they make uſe of their Cloaths, which they lay upon a Bench or Table in the Summer, and upon their Stoves, which are flat, in the Winter; the whole Family being ſqueezed together in the ſame Room; nay, in the Country the Poultry and Pigs are quartered in the ſame place with the Maſter and Family belonging to the Houſe.

Their Food.

They are Strangers to ſuch Delicacies, as are in vogue among us; their common Food being courſe Meat, Turneps, Coleworts, and Cucumers, both freſh and pickled. Their chief Dainty is Salt Fiſh, which being not well Salted, ſmells very ſtrong. They are ſufficiently ſtock'd with Mutton and Beef, and their Foreſts furniſh them with very fat Swine, but as the better part of their Year is taken up with Faſts, ſo they are ſo much accuſtom'd to Fiſh and Pulſe, that they neglect Fleſh; which is the reaſon they dreſs their Fiſh, Herbs and Pulſe much better than the reſt; and, I remember that the *Czar* ſent us once 40 Diſhes, moſt Herbs and Pulſe: Of the Spawn of Fiſh, eſpecially that of Sturgeon, they make a kind of Ragout thus: After they have taken off the Skin, they keep it in Salt 8 or 10 Days, and then reduce it to a Paſte, which they cut in pieces, mix Onions and Pepper with it, and eat it with Oyl and Vinegar; inſtead of which, you may make uſe of the Juice of Citron. The *Muſcovites* call it *Icars*, and the *Italians Covajar*, which they eat in *Lent* time inſtead of Butter. The beſt is made near *Aſtracan*, upon the *Wolga*; whence it is tranſported beyond the Seas in Tuns of 700 or 800 weight. The *Czar* ingroſſes the Traffick of this Commodity to himſelf. After hard Drinking, the *Muſcovites* mince roaſted Veal, with ſome pickled Cucumers, and mix Pepper, Vinegar, and the Liquor of pickled Cucumers with them, which they eat for their Breakfaſt the next Morning. *Covajar.*

Their Drink.

Their ordinary Drink is a kind of ſmall Mead, they call *Quaz*, beſides which they never fail to take a Dram of *Aqua Vitæ* both before and after their Meals. But the better ſort are provided with Sack, alſo other ſorts of Wines, and Strong Beer, which they brew in *March*, and keep all the Summer in their Snow Houſes; they make a Bed of Ice and Snow mixt together, and then a Lay of Barrels; upon thoſe another Bed of Ice, and ſo another row of Barrels, which they cover with Straw and Blanks, which ſerve inſtead of a Vault, their Cellars being not covered.

How they keep their Strong Beer.

French and *Rhéniſh* Wines being too weak for a *Muſcovite* Stomach, they rather admire a ſort of ſtrong Hydromel, which they order with Cherries, Strawberries, Mulberries, or Rasberries; the laſt of which is the moſt pleaſant of all. They put the Rasberries in fair Water for 2 or 3 Nights, till it has extracted all the Taſte and Colour: Into this Infuſion they put ſome of the fineſt Honey, to each Pound 3 or 4 of Water, according as they would have it ſtronger or ſmaller: To make it Work, they put into it a Toaſt dipp'd in the Dregs of Beer, which they take out again as ſoon as it begins to ferment, for fear it ſhould give it an ill taſte; if they intend to keep it a good while a Working, they keep it in a warm place, if they would have it only for preſent uſe, they put it in a cool Room: To give it a good Flavour, they put in ſometimes a little Bag with Cinnamon, Grains of Paradiſe, and a few Cloves; ſome make an Infuſion of the Rasberries with *Aqua Vitæ*, inſtead of Water.

How they make Methegline.

Their common Mead.

Their ſmall Mead they make of Honey-combs, theſe they beat only in warm Water, ſtirring it frequently for 7 or 8 Hours; then they cleauſe it through a Sieve, boil and ſcum it, and ſo uſe it.

The greateſt Pride of Perſons of Quality in *Muſcovy*, conſiſts in their Retinues, which however puts them to no great Expence; for tho' they keep ſometimes 50 or 60 Slaves about them, maintain a good number of Horſes and have plenty of Proviſions, Beer, Mead, and other good Liquors at their Tables, yet are they furniſh'd with all theſe things from their Farms, which

The Expences of the Muſcovite Lords.

are

1636. are cultivated and look'd after by Slaves, who stand them in very little ready Money. Besides that most of the Entertainments of the *Bojars*, and the Governors of Places are made with no other intent, than to invite those who stand in need of their favour, who are obliged to return it by very considerable Presents. 1636.

At these Entertainments, when they intend to shew a more than ordinary respect to their Friends, they permit them to see their Wives, and after these have presented a Cup of *Aqua Vitæ* to the Guests, to let them kiss her. I remember, that when 1643. I Dined with Count *Leo Alexander de Slakow*, he introduced me into another Room, where his Lady was richly attired in her Wedding Garments, and a Gentlewoman with a Strongwater Bottle attending her. She bid her fill a Silver Cup, which she having put to her Lips, desired me to drink it off, which I having done thrice, the Count desired me to kiss her, which I did; after which she presented me with a Handkerchief, embroidered round the Edges with Gold, Silver and Silk, with a deep Fringe.

The *Knez* and *Boiars* have for the most part great Pensions, or Yearly Allowances besides their own real Estates, and the Merchants and Tradesmen live by Traffick and Trade. Those who have liberty to Traffick into Foreign Countries, carry thither such Commodities as are of the Product of *Muscovy*, *viz.* Sables and other Furs, Flax, Hemp, *Russia* Leather and Wax. All manner of Provisions being very cheap here, the Tradesmen not only provide with a great deal of ease for their Families, but also grow Rich: They are very dextrous at imitating any thing they see done, tho' they are not very well fitted for Inventions, as may be seen in their Carvers and Founders, who make carved Works, and cast as well as any Foreign Artists.

They Sleep after Dinner. There is scarce a *Muscovite*, what Quality soever he be of, but what will have his Afternoons Sleep; which is the reason the Shops are always shut up after Dinner; this is so natural to the *Muscovites*, that thereby, and his aversion to Baths, they first discovered the Imposture of the false *Demetrius*.

Their Baths. Their Baths are the only thing that have any resemblance of what we call Gentile, in *Muscovy*, tho' the Publick ones are but very indifferently fitted for that use. At *Astracan* I went *incognito* into one of them, which was only parted from another Room by a few Deal Boards, which being not well joyn'd, you might with ease see all what pass'd there; besides that there was but one Door for Men and Women to go out or in, some of both Sexes, who were pretty modest, hiding their Privy Parts with a handful of Leaves soak'd in Water, the rest appearing stark naked; nay, some of the Women came in that posture to speak with their Husbands in our Room, without the least sign of Bashfulness.

It is a most surprising thing to see them come out of such an intense degree of heat all on a sudden, and run into the cold Water, or have it poured upon them; or in the Winter wallow themselves in the Snow, and so return into the Stoves again; which we have also observed several times in the *Finlanders*, who live in *Livonia*, no other reason being to be assign'd for it, than a Custom, which being turn'd into a Habit, they are not sensible of these opposite Qualifications of Heat and Cold as other People are; for we made this Observation at *Narva*, That the *Muscovite* Boys of 8, 9, or 10 Years of Age would stand for half an Hour together bare-footed upon the Ice, without ever complaining of Cold. The *Germans* who dwell in *Muscovy* and *Livonia*, are very nice in their Stoves; they strew Pine Leaves powder'd, and all sorts of Herbs and Flowers upon the Floor; which, together with the Lye make a very agreeable Scent. The Seats or Benches which are along the Walls placed one above the other, that one may take what degree of Heat one pleases, are covered with clean Sheets and Pillows filled with Hay; upon those you lie down to Sweat, every one having a Servant Maid, who only in her Smock, Rubs, Washes and Wipes you. As soon as she comes in, she presents you with some Radish and Salt; and if you be a particular Friend, the Mistress of the the House, or her Daughter, brings you a composition of Wine and Beer, with some crum'd Bread, Limon Slices, Sugar and grated Nutmeg.

Are of a strong Constitution. The *Muscovites* in general, are of a very healthy Constitution, and long liv'd; if they happen to be ill, which is very rarely, they have recourse to Garlick and *Aqua Vitæ*, tho' it be in a high Fever. Persons of Quality make use of Physicians, and have a great esteem for that Profession. Tho' Fornication is a familiar Vice among them, they allow no Publick Stews, no more than Polygamy; Marriage being consider'd here as very honourable, in which they observe the degrees of Consanguinity; neither do they permit 2 Brothers to Marry 2 Sisters; nay, Godfathers and Godmothers to the same Child are forbidden to intermarry. A Widower or Widow may Marry twice or thrice, but the fourth time is not allow'd of.

Their Marriage Ceremonies. Their Marriage Ceremonies are performed in the following manner: When those who have Marriageable Children, especially Daughters, have pitch'd upon a Person they like (for the young Couple are not permitted to see, much less to discourse with one another) they address themselves to his Parents; if they approve of the Match, and the young Woman be handsome, leave is given for some other Woman of the Kindred to see her, if not it is perhaps denied: Every thing being agreed on betwixt the Parents, if they be of Quality, a certain Woman whom they call *Swacha*, is appointed on the Bridegrooms side, and another by the Brides Friends to take care joyntly of the Nuptials.

That on the Brides part is to take peculiar care of the Nuptial Bed, and to provide every thing which is fit for the Chamber where the new Married Couple are to lie: The Bed it self being made upon 40 Sheaves of Rye laid in good order, and encompass'd with several Barrels of Wheat, Barley and Oats.

The Nuptial Bed. Every thing being prepared for the Wedding Day, the Bridegroom goes late in the Evening from his House, in Company of his Kindred, the Priest who is to Marry him, leading the Van on Horseback. They are received at the Bride's Door by her Kindred, and invited to come in and sit down at a Table, where only 3 Dishes of Meat are served up, which are not touch'd by any body there present. A Place is left at the upper end of it for the Bridegroom, which is taken up by a young Lad appointed for that purpose, whilst the Bridegroom is talking with the Brides Friends; who having prevail'd, by the means of some Presents, with him who sits in his place to resign it to him, he takes his Seat, and the Bride richly attired, but with a Veil over her Face, is brought in and placed next to the Bridegroom, 2 Lads at the same time holding a piece of Taffata between them to prevent their seeing one another: This done the *Swacha* comes in and paints her, ties up her Hair in 2 Knots, puts a Cornet on her Head, and puts on all the other Attirements belonging to a Married Woman. The Crown is of Leaf-Gold, or Silver gilt lined with Silk, having on both sides near the Ears 5 or 6 rows of Pearls hanging down in Strings on her Breast. The upper Garment which has Sleves of an Ell and a half wide, is embroidered at the edges with Gold and Silver, especially about the Neck, where it is 3 Inches broad, and as stiff with Embroidery, as if it were a Dogs Collar; they sometimes bestow 1000 Crowns upon such a Robe. Then the Bridegroom's *Swacha* paints the Bridegroom, whilst the Women there present stand singing upon the Benches.

After this 2 young Men well attired, bring into the Room a large Cheese laid upon a Bier, with some Loaves, several Martin-skins hanging down from the Bier. The same being done on the Brides side, a great Silver Bason is set upon the Table fill'd with small pieces of Satin, little pieces of Silver, Hops, Barley and Oats mixt together; which as soon as the Brides Face is covered again, is thrown by handfuls by the Bride's *Swacha* among the Company, who gather them up from the Ground, and having received the Priests Benediction, go to Church, the Floor of which is covered with a piece of Taffata, where the young Couple are to stand, with a Canopy of the same Stuff over their Heads.

The Ceremonies in the Church. Here after they have made the usual Offrings of Fish, fry'd Meats and Pastry, the Priest gives them his Benediction, by holding Images over their Heads, and taking the Man by the right, and the Woman by the left Hand, at the same time asks them 3 several times, Whether it is both their Wills to be Married, and to love one another as they ought to do? Unto which both having answered, Yes; the whole Company joyn Hands, and the Priest sings the 128 Psalm, he one Verse and the Company the next, and so continue by turns, Dancing at the same time.

The

1636. The Pſalm ended, he puts a Garland of Rue upon their Heads; and if it be a Widow or Widower, about their Shoulders, ſaying, *Encreaſe and Multiply*; and conſummates the Marriage, by ſaying theſe words, *Whom God hath joined together, let no Man ſeparate.*

Whilſt the Prieſt pronounces theſe words, thoſe who are invited to the Wedding, do light each a Wax-candle, and one of them gives a Glaſs of Wine to the Prieſt, which he takes off, and the Married Couple having pledged the ſame 3 times each, the Bridegroom throws down the Glaſs, which he and the Bride treading under their Feet, ſay: *May they thus fall under our Feet, and be trod to pieces, who ſhall endeavour to ſow Diviſion or Diſcontent between us.*

Then the Women caſt ſome Flax and Hempſeed at the young Couple, wiſhing them much Proſperity, whilſt ſome pull the Bride by the Robe, as if they would take her away from the Bridegroom, unto whom ſhe ſticks ſo cloſe, that ſeemingly, they are not able to remove her.

The whole Marriage Ceremony being ended, the Bride returns in a Sledge, by the light of 6 Torches, or Wax-candles, and the Bridegroom on Horſeback, to the Houſe where the Wedding is kept. They are no ſooner come thither, but the Men ſit down at a Table well fill'd with Meat of all ſorts, whilſt the Women carry the Bride into her Chamber, undreſs, and put her to Bed; which done, they come to the Bridegroom, and force him to riſe from the Table, in order to be conducted to the Bride's Chamber, which is done by 6 or 8 young Men, each with a Torch in his Hand, which they put into the Barrels full of Wheat and Barley, that ſtand round the Bed; each of theſe having two Martins-skins for their pains.

As ſoon as the Bride ſees the Bridegroom come into the Bedchamber, ſhe puts on a Morning Gown lined with Martins-skins, meets him, and ſalutes him with a low inclination of the Head, which is the firſt time he ſees his Brides Face. The firſt thing they do, is to ſit down at a Table, where, among other Meats, they have a roaſted Fowl, which the Bridegroom pulls aſunder, and caſting away over his Shoulder, that part he lights on firſt, they eat the reſt.

This done, to Bed they go, the Gueſts at the Wedding being in the mean while employed about divers Charms they think advantageous to the Married Couple. An old Servant of the Houſe, that attends at the Door, coming after a while asks, Whether the Buſineſs be done? And as ſoon as the Bridegroom anſwers, Yes, the Trumpets and Timbrels upon the Word given, ſound till ſuch time the new Married Couple are conducted to the Stoves, where they Bath themſelves, but apart.

After they have been well waſh'd in the Bath, with Water, Mead and Wine, the Bride ſends the Bridegroom a Shirt richly Embroidered, eſpecially at the Neckband, and a rich Habit. The 2 next Days they ſpend in merry making, when the Women are ſure not to let ſlip a good opportunity whilſt their Husbands are Drunk.

Perſons of an Inferiour Condition, are contented with leſs Ceremonies: For the Night before the Wedding, the Bridegroom ſends ſome Cloaths, Jewels, a Comb and Looking-glaſs to his Bride.

The next Day, the Prieſt is brought in by 2 Lads, carrying Wax-candles lighted: As ſoon as he enters the Houſe, he gives his Benediction firſt to the 2 Lads, and then to the Gueſts. The young Couple being ſat down at the Table, the Lads holding a piece of Taffata betwixt them, the *Suacha* dreſſes the Brides Head; which done, a Looking-glaſs is brought, and the young Couple, joyning their Cheeks, look and ſmile one upon the other, whilſt the 2 *Suacha*'s caſt Hops upon them, and ſo to Church they go, where they are Married with the ſame Ceremonies as we have mentioned before.

The Wedding-day may be ſaid to be the laſt Day of Pleaſure of the *Muſcovite* Women; for after that, they muſt reſolve to live a retired Life, and not to ſtir abroad except upon extraordinary Occaſions. One Comfort they have, that as they are not much brought up to Houſe-keeping by their Parents, ſo they don't much trouble themſelves with it after they are married; their chief Employment being embroidering, ſowing, or making ſome little Purſes, and ſuch like inſignificant Toys: Within Doors their Cloths are very mean, but when they appear in Publick, they are very ſumptuouſly attired, and are ſure to paint their Faces, Necks, and Arms. The Wives of Perſons of Quality ride in Chariots in the Summer-time, attended by a great number of Slaves; the Horſe which draws the Chariot, being adorned with Fox-tails about the Neck and Tail, which they look upon as a great Ornament for Horſes, ſo that even the *Czar* himſelf makes uſe of them; with this difference only, that inſtead of them he uſes Martin-skins. 1636.

How the married Women live.

As the poor *Muſcovite* Women are debarr'd from thoſe Viſits and Converſation moſt other *European* Women enjoy, and ſeldom meddle with Houſewifery, the only Diverſion left them, is to paſs away their time with their Maids. They lay a Plank croſs a Block, and getting up on both ends, toſs one another up and down. Sometimes they ſwing themſelves in Ropes; and in the Country Villages they have a certain ſwinging Engine, in which four may divert themſelves at a time, by balancing one another. Their Diverſions.

The *Muſcovite* Men are not altogether without an Excuſe for the hard Uſage they put upon their Wives, it being certain that they have very lewd Tongues, are much addicted to ſtrong Liquor, and will upon a good Occaſion not deny a good Turn to a Friend: And this is the more tolerable to them, as long as they ſee their Friends and Neighbours treated after the ſame manner; which however does not juſtifie what *Barclay* ſays of the *Muſcovite* Women; *viz. That they don't think their Husbands love them, unleſs they give them now and then reall Proofs of it, by a good Cudgelling*: They being ſenſible of good and bad Uſage, as well as other Women, and have ſometimes ſhew'd their Reſentments againſt their Husbands upon ſuch like Occaſions, as is manifeſt in the *Bojar*'s and Farriers's Wife, we ſpoke of before. Why they are ſo hardly uſed.

Adultery is not ſo frequent in *Muſcovy*, as in ſome other Countreys of *Europe*; becauſe they account nothing Adultery, but when one Man marries anothers Wife, all the reſt being within the compaſs of Fornication; which in married Men, is puniſhed with Whipping, ſome Days Impriſonment, or perhaps, to live a few Days upon Bread and Water. If a married Woman be taken in ſuch a Fault, her Husband is at liberty to have her put into a Monaſtery, a Pretence often made uſe of by the *Muſcovites*, when they have a mind to be rid of their Wives; for when the Razor has touch'd her Head once, ſhe is ſure never to come out again; if they prove barren, they muſt expect the ſame Fate, and their Husbands may marry again in ſix Weeks. What Adultery is in *Muſcovy*.

The Great Dukes take the Privilege of ſending their Spouſes thither without Reprieve, if they bear only Females. And I remember that a *Polander*, who had embrac'd the *Greek* Religion, in order to marry a beautiful Woman he loved, being obliged to leave *Muſcovy* for about a Twelvemonth, his young Spouſe made ſhift to bring forth a Little One, without his Aſſiſtance, and hearing his Wrath, went into a Monaſtery. The Husband being exceedingly fond of his Wife, would, after his Return, fain have got her out of the Monaſtery, but in vain; for tho' ſhe was willing, it was alledged, that ſhe being ſhaved a Nun once, it would be a Sin againſt the Holy Ghoſt to change her Condition.

Another plauſible Pretence of Divorce is, when the Man, under a Religious Pretext, chuſes a Monaſtery before a married Life; which they have leave to do without their Wives Conſent, or making the leaſt Proviſion for their Children; and if their Wives marry again, they are capable of receiving Prieſthood, tho' they were only Mechanicks before.

The *Muſcovites* are much addicted to Venery, yet will they never have to do with a Woman unleſs they have firſt taken off the Croſs, that hangs about her Neck, which is given her at her Baptiſm; and if any Images of their Saints be in the room, they are ſure to cover them; neither will they go to Church, till they have waſh'd themſelves, and put on a clean Shirt. Some will not enter the Church, but remain ſtanding at the Door, which the Women are obliged to do, they being accounted more impure than the Men. Prieſts, after they have waſh'd themſelves about the Navel, may enter the Church, but muſt not approach the Altar. Inſtead of Repentance, they uſe bathing upon this as well as many other Occaſions. They are very Superſtitious.

It is beyond all Diſpute, that the Government of *Muſcovy* is now-a-days not only Monarchical, but alſo deſpotical, the *Czar* having as abſolute a Dominion, even over the greateſt Lords, as a Maſter has over his meaneſt Slaves; which they are ready to confeſs upon all Occaſions, calling themſelves His Majeſty's *Golop*, The Government of *Muſcovy*.

1636. or Slaves, and that their Lives and Estates are in his Disposal; nay, it is not many Years ago, since they were whip'd like Slaves, for very small Faults, which Punishment is now changed into some Days Imprisonment.

From hence it is they give their Sovereign the Title of *Velikii Knez*, or Grand Seignior; which Title indeed he may lay claim to as well as the Great Turk, both in respect of his absolute Power, and the Extent of his Dominions. And since the *Muscovites* were given to understand, That he who bears the first Rank among the Christian Princes, was dignified with the Title *Cæsar*, or *Kaysar*, they have appropriated the Word *Czar* to their Princes; which the Great Dukes Interpreters always explain by the Word *Cæsar*, or Emperor; tho' it be evident, that the Word *Czar* in the *Muscovite* Language, signifies no more than a King, as may be seen in their Bible; where speaking of the Kings of *Judah* and *Israel*, the Successors of *David*, they are called *Czars*.

The Signification of the Word *Czar*.

To back this Pretension they have, in imitation of the *German* Emperors, put a Spread Eagle in the *Czar*'s Arms; but the Wings somewhat less than the Imperial Eagle, having on the Breast in an Escutcheon one on Horseback fighting with a Dragon, representing the Archangel St. *Michael*, or rather St. *George*; above, and between the Eagles Heads, are Three Crowns, signifying *Muscovy*, and the two *Tartarian* Kingdoms of *Casan* and *Astracan*.

The *Czar*'s Arms.

The Famous Tyrant *John Basilowitz* was the first Inventor of these Arms, unto whom the *Muscovites* are chiefly beholding for their Slavish Submission; whose Successors, to keep them in the same lowness of Spirit, have laid this down as one of their chief Maxims of State, that no *Muscovite*, upon Pain of Death, shall go out of the Country without the *Czar*'s special leave. I remember that *John Helmes*, the *Czar*'s Chief Interpreter, obtained Permission for his Son to go into *Germany*, to study Physick; he was so much taken with the sweet Enjoyment of Liberty, and the Climate, that he would never return into *Muscovy*; which was the Reason that when one of the *Czar*'s Envoys, that was sent into *Germany*, beg'd the same Favour for his Son, it was denied him both by the *Czar* and Patriarch, as fearing, not without reason, that he would either follow the others Foot-steps; or, at his Return, imprint into his Fellow-Subjects a true *Idea* of that Liberty other Nations enjoy.

Muscovites Kept in Ignorance.

It must nevertheless be confess'd, that what *Herberstein*, *Paulus Jovius*, and *Guagnin*, relate of the Tyrannical Government of the Great Duke *John Basilowitz*, ought not to be apply'd to our Times, the present Great Duke being a Person of a very mild Disposition, who, in all his Actions, endeavours to make himself rather belov'd than feared by his Subjects, and extends his Goodness even to those banished into *Siberia*, whom he relieves out of his own Purse, and renders their Condition tolerable.

From what has been said, it is easie to conceive, that the *Czar* of *Muscovy* has all the Prerogatives of Sovereignty vested only in himself: It is He that is the sole Author of all the Laws, unto which his Subjects pay a blind Obedience without reserve: He creates and deposes Magistrates, Officers, and Governors at Pleasure, as well as the Judges of the Provinces, who are impower'd by him to give final Judgment in all Causes, without Appeal; all which are changed from three Years to three Years. It is he that makes Peace and War, gives Rewards, and bestows Titles of Honour upon his Subjects, even to the Doctors of Physick and Chirurgeons, who being Strangers, owe their Privileges to his Letters-Patents.

His absolute Power.

The *Muscovite* Money.

His Coin is of Silver only, of an Oval Figure, and very small, so that the biggest Piece, call'd a *Copee* or *Deaning*, is worth no more than a Peny. For tho' the Words *Alkin*, which makes 3 *Copees*, *Grif*, which makes 10, and *Rouble*, which consists of 100 *Copees*, are frequently used by the *Muscovites* in their Accounts, they are no more than bare Names, invented for the Conveniency of Commerce. A *Poluske*, is half a *Copee*, and the *Mustofike*, a fourth part.

This Money is very troublesome, by reason of its Smallness; it is mark'd with the Arms of *Muscovy*, (which formerly only belonged to the Dutchy of *Novogorod*) and has on the other side the *Czar*'s Name then reigning, and the City where it was coined, there being no more than four Cities in all *Muscovy* who enjoy this Privilege; *viz.* *Musco*, *Novogorod*, *Twere*, and *Ploscow*. The Mints are commonly farm'd out to some Merchants of those Places. Rix-dollars of all sorts, as well as the *Joachim Dollars* and *Spanish Reals*, pass currant in *Muscovy*; but the first are generally melted down, because 2 outweigh 100 *Copees* by 2 Drams; and consequently turn to a considerable Advantage to the Farmers of the Mints. 1636.

There is no Gold coin'd in *Muscovy*, unless it be when the Great Duke has some Medals cast of that Metal, upon some extraordinary Occasions. All Taxes and Impositions are likewise disposed according to the *Czar*'s Absolute Pleasure, who taxes 5 *per Cent.* of all Merchandices imported or exported. Those sent abroad with a Publick Character to Foreign Courts, are either *Welikoi Poso*, or Grand Couriers, or *Postanicks*, *i. e.* Envoys.

How Ambassadors are treated here.

Foreign Ambassadors were formerly treated with very little Respect, which Custom now is much altered; yet do they retain much of their ancient barbarous Pride, when they are to treat with Foreign Ministers; tho' their Reception is commonly attended with a great deal of Magnificence. They defray their Charges from the first Day of their Entrance into the *Muscovite* Dominions, to their Departure thence; when they are not dismiss'd without considerable Presents, which always consists in Furs. Neither does the *Czar* ever send any Embassy to any Prince, but it carries very considerable Presents to the Prince it is sent to.

A valuable Present.

Fedor Jwanowitz sent 1595 to the Emperor *Rudolph* the 2d 1300 *Zimmers* (each containing 20 Pair) of Sables, 5019 *Zimmers* of ordinary Martin-skins, 120 black Fox-skins, 337000 ordinary Fox-skins, 3000 Beavers, 1000 Wolf-skins, 64 Elk-skins, valued in all at 100000 *l. Sterling*. Foreign Ambassadors are also provided with necessary Carriages for themselves, and their Baggage; for which purpose certain Peasants are appointed with their Horses at certain Stages, to be ready at Call, for which they have a Yearly Salary of 60 Crowns *per Annum*, besides Land enough for the Subsistance of their Family and Cattle, and some small Matter for every Journey, and are exempted from all manner of Taxes.

It is not many Years since they used to treat Ambassadors in a manner like Prisoners, by putting Sentinels at their Doors, who were to follow them where-ever they went abroad; but this is now continued no longer than till the first Audience is past, and in the mean time they are visited constantly by their *Pristaffs*, who at the same time serve as Spies, and provide them with Necessaries. The Presents brought to the Great Duke by Foreign Ambassadors, are always valued by those that understand their Worth.

After we have given you a Scheme of the Politick Government of *Muscovy*, I suppose it will not be beyond our purpose to give a brief Account also of the most remarkable Occurrences, which have happened in *Muscovy* within these last 200 Years.

A brief Account of the Revolutions in *Muscovy*.

That Famous *Russian* Tyrant *Juan Basilowitz*, Son of the Great Duke *Basili*, came early to the Crown 1540. who's long Reign being nothing else but a Concatenation of Tyrannies, cover'd under the outward Shew of Religion, has been so amply treated of by several Historians, that it would be an Imposition upon the Reader, to make a needless Repetition of it here. We will only mention here, that by 7 lawful Wives he had only 3 Sons; *viz.* by the first, *Juan* and *Fedor*, and by the last, *Demetrius*. The eldest being kill'd by his Father's own Hands, who struck him over the Head with a Staff hoop'd with Iron.

Fedor the Second Brother succeeded his Father *March* the 28th 1584. in the Throne, being then scarce 27 Years of Age. But being a very weak Prince, and unable to bear the Burthen of the Government upon his Shoulders, *Boris Goudenou*, High Steward of *Muscovy*, and Brother-in-Law to the *Czar*, was pitch'd upon as the fittest Person to manage the Publick Affairs of that Great Empire; which he performed with so much Dexterity and Conduct, that it was the general Discourse at *Musco*, that, if the two young Princes should happen to die without Issue, *Boris Goudenou* was the only Person fit to supply their Places.

Fedor Jwanowitz.

Boris encouraged by the good Will of the People; and looking upon *Demetrius* the youngest Prince, as the only Obstacle of his Hopes, (the *Czar* having no Issue) sent a certain Ruffian to *Uglitz*, where *Demetrius* was educated, who kill'd him with his own Hands; but returning to *Musco*, was by *Boris* his Orders, likewise kill'd with all his Accomplices, being unwilling that after so foul a Fact any should survive, who in time might be able to upbraid him with such a Piece of

Villainy,

1636. Villany, he would have conceal'd from the Eyes of the World at any rate; for which reaſon it was, he cauſed the City of *Muſco* to be ſet on Fire in ſeveral places, thereby to divert the People from reflecting upon the Prince's Death, whilſt they had ſufficient reaſon to deplore their own Calamities at home. And the better to palliate the matter, he cauſed the Caſtle of *Uglitz* to be demoliſhed, and the Inhabitants (whom he accuſed to have countenanced the Murther) to be Baniſh'd.

Some few Years after *Fedor Juanowitz* happening to die ſuddenly 1597, after a Reign of 12 Years, without leaving any Iſſue behind him, the whole Empire caſt their Eyes upon *Boris Goudenou*, as the only Perſon qualified for ſo high a Station, which he craftily declined, under pretence of retiring into a Monaſtery, whereby he obtain'd his aim; for the Great ones, edg'd on by his Reluctancy, without any farther conſideration, preſs'd him ſo hard, that with much ado, he was prevail'd upon to accept their Offer.

Boris Goudenou. But he was ſcarce well ſetled in his Throne, but he met with a formidable Rival in the Perſon of a certain *Muſcovite* Monk, Nam'd, *Griska Utropoja*, deſcended from a Noble Family, but not very Rich; and being for his lewd Life thruſt into a Convent, had contracted an intimate Friendſhip with another old Monk of the ſame Monaſtery: This old Monk finding him a Perſon of an extraordinary Wit, and of a handſome Countenance and Deportment, concerted Meaſures with him, to put him upon the *Muſcovite* Throne, under the feign'd Name of the late young Prince *Demetrius*.

The better to compaſs their Deſign, it was agreed, he ſhould enter himſelf into the Service of *Adam Wiſnowitski*, a Perſon of conſiderable Quality in *Lithuania*, into whoſe favour he inſinuated himſelf in a ſhort time, by his Ingenuity, to that degree, that he only waited for an opportunity to begin the Scene he intended to Act, by diſcovering his pretended Quality.

It was not long before one offered it ſelf; for *Wiſnowitski* happening one time in his Paſſion to call him Son of a Whore, he fell a Weeping; and told him, That if he knew who he was, he would not treat him thus: And his Lord being very curious to know the true meaning of his Diſcourſe, he, without any further delay, diſcovered himſelf to be the lawful Son of *Juan Baſilowitz*, whom *Boris Goudenou* would have murthered at *Uglitz*, but that he had eſcaped their Hands, by the means of a Friend, who had ſubſtituted another in his place, ſhewing at the ſame time a Golden Croſs richly beſet with Diamonds; which according to the *Muſcovite* Cuſtom, was hung about his Neck at his Baptiſm. He threw himſelf at his Lords Feet, imploring his Protection, and verifying his feign'd Story with ſo many probable Circumſtances, that *Wiſnowitski*, being perſwaded by theſe Appearances of truth, cauſed a ſplendid Equipage to be prepared for him, and treated him in all other reſpects, according to his pretended Quality.

The noiſe of this Diſcovery having ſoon reach'd *Boris Goudenou*'s Ears, he proffer'd a vaſt Sum of Money to any who ſhould bring this Impoſtor to him, either Dead or Alive, which rather increaſed than diminiſh'd his Credit and Authority, both in *Muſcovy*, and with his Friends in *Lithuania*; who thinking him not ſafe there, ſent him to the Weywode of *Sendomiria* into *Poland*, who promiſed to ſettle him in the Throne, provided he would promiſe to ſettle the *Roman Catholick Religion* in *Muſcovy*, which this pretended *Demetrius* not only promiſed to do, but alſo changed his Religion, and engaged to Marry the *Weywode*'s Daughter.

The *Weywode*, encouraged by theſe hopes, engaged all his Friends in the Quarrel, by whoſe aſſiſtance, they got together a conſiderable Army, wherewith they entred *Muſcovy*, and having declar'd open War againſt *Boris Goudenou*, made themſelves Maſters of ſeveral places, partly by force, partly by corrupting the Governors, with ſuch ſucceſs, that *Boris Goudenou*, dy'd with Grief, the 13th of *April*, 1605.

Notwithſtanding which, the *Knez* and *Boiars* cauſed his Son, *Fedor Boriſſowitz*, tho' very young, to be *Fedor Boriſſowitz.* Crowned *Czar* of *Muſcovy*. But it was not long before the Proſperity of *Demetrius*, made them change their Reſolution, which being back'd by the Cries of the People, *Long live* Demetrius, *the true Heir of the Kingdom*; they ſeized the new Great Duke in the Caſtle, impriſon'd him, and at the ſame time ſent 1636. to intreat *Demetrius* to come and take poſſeſſion of the Throne; aſſuring him of their Fidelity, as a Pledge of which, they offered to deliver the young Great Duke, his Mother and Family, into his Hands.

Upon which, *Demetrius* ſent one of his Secretaries, named *Juan Bogdenow*, who ſtrangled both the Mother and Son, *June* 10. 1605. in the ſecond Month of *Boriſſowitz*'s his Reign, giving it out, that they were Poiſon'd.

Within 6 Days after, *Demetrius* came with his whole Army to *Muſco*, where he made his Entry with great Solemnity, and was Crown'd *July* 21. *The ſuppoſed Demetrius.*

The firſt thing he did was to ſend for the Mother of the true *Demetrius*, from a Monaſtery at a great diſtance from *Muſco*; he went out to meet her with a noble Retinue, Lodged her in the Caſtle, and ſhew'd her all the Reſpects due to a Mother; which the good Lady took all in good part, from her pretended Son, partly out of Revenge againſt the Family of *Boris Goudenou*, partly to enjoy the ſweetneſs of a happy Life, after ſo many Afflictions, tho' ſhe knew her Son *Demetrius* had really been murthered at *Uglitz*. But this Joy was not very laſting; for ſcarce a few Months were paſs'd, when the *Muſcovites* having obſerv'd his manner of Life to be quite different from the Great Dukes his Anceſtors; and finding he was reſolv'd to Marry a *Roman Catholick* Lady, and that he waſted his Treaſure; to make good the Promiſes he had made to the Weywode of *Sendomiria* her Father, they began to be ſenſible of their Error.

One *Baſili Zuski*, a Perſon of the chiefeſt Quality in *Muſcovy*, began firſt to unfold the Riddle, and to remonſtrate to the reſt; unto what danger the State was likely to be expoſed by this Impoſtor, who intended to introduce another Religion with a Foreign Woman, he intended to Eſpouſe; ſo that after ſerious debate, it was agreed he ſhould be diſpatch'd out of the way: But the Conſpiracy being diſcovered, *Zuski* was condemned to Die, but was pardon'd by *Demetrius* upon the point of Execution. *A Conſpiracy againſt him.*

Things continued quiet after this for ſome time, *viz.* till *May* 8. 1606. the Day appointed for the Marriage, when the Bride being arrived with a good number of well appointed *Polanders*, *Zuski* began a ſecond time to repreſent to the Great Men of the Kingdom, the imminent danger they were expos'd to by the arrival of ſuch a number of Strangers, who were ſufficient to make themſelves Maſters of the City, if not prevented in time, offering at the ſame time his utmoſt aſſiſtance for the relief of his Countrey.

The reſt being encouraged by this Reſolution, freely promiſed to be ready to ſecond his good Intentions, the firſt opportunity that ſhould offer; which offer'd not long after: For *May* 17. being the laſt Day of the Nuptial Solemnities, the new Great Duke with his *Poliſh* Friends, being overwhelm'd in Sleep and Drink, the head of the Conſpirators cauſed the Alarum-Bell to be rung, whereupon all the Conſpirators got to their Arms, and taking their way directly to the Caſtle, kill'd the *Poliſh* Guards, and forcing the Gates, made the beſt of their way to the Great Duke's Bed-Chamber, who to avoid falling into the Hands of his Enemies, leap'd out of a Window into the Court, where ſome of the Guards were ſtill in Arms: But *Zuski* having obliged the pretended Mother of this counterfeit *Demetrius*, to ſwear by the Croſs, Whether this *Demetrius* was her Son? Which ſhe deny'd he was, they ſhot him through the Head with a Piſtol, whoſe Body they ſtrip'd, and dragg'd it to the Market-place before the Caſtle, where after it had lain expoſed for 3 *is kill'd.* Days, they buried it; but afterwards digg'd it up again, and burnt it to Aſhes.

The new Great Dutcheſs with her Father and Brother, were impriſon'd, together with the *Poliſh* Ambaſſador: Many Ladies and Gentlewomen were abuſed, and above 1700 *Poles* kill'd.

This done, *Zuski* was choſen Great Duke, and Crown'd *June* 1. 1606. But he was ſcarce aſcended the Throne, when one *Knez Gregory Schacopski*, who at the pillaging of the Caſtle, had ſeized upon the Seals, diſputed the poſſeſſion of it. For which purpoſe being got into *Poland*, he made uſe of the ſame Methods his Predeceſſor had done; taking upon him the Name of *Demetrius*, and that he had eſcap'd the Hands of the Enemies, who had kill'd another in his ſtead. *Zuski* made Great Duke. *A ſecond Impoſtor.*

1636.

A third Impostor.

Not long after, another Person, who had been a Clerk to one of the Secretaries of State, assumed also the Name of *Demetrius*; and having got together a strong Party, seized upon several Cities, and the *Poles* countenancing both these Impostors, this occasioned such Disorders, that *Zuski* was Deposed, Shaved, and put into a Convent.

Vladislaus chosen Great Duke.

The *Poles*, in the mean time, having publickly espoused the second *Demetrius*'s Party, and obliged the Weywode's Daughter to acknowledge him for her Husband, demanded also satisfaction for the Affront put upon them on *May* 17. so that the *Muscovites*, finding themselves in this Perplexity, and not knowing which way to choose to disentangle themselves out of these Domestick Troubles, thought it the best expedient to satisfie the *Poles*, by chooling *Vladislaus*, eldest Son to King *Sigismund*; who having approved of their Choice, *Stanislaus Silkanski*, who was encamped with an Army of *Poles*, near the Gates of *Musco*, received the Homage of the *Muscovites* in his Prince's Name, and was admitted into the Castle with 1000 *Poles*, the rest of the Army staying without the City.

Zuski dies.

Zuski in the mean while was, by vertue of the late Treaty, with some of his Adherents, sent into *Poland*, to King *Sigismund*; who kept him close Prisoner at *Smolensko*, where after a long Imprisonment he died, and was buried in the Highway betwixt *Thorn* and *Warsaw*.

An Insurrection against the *Poles* in *Musco*.

The *Poles* without the City having by this time found means to get by degrees into the Castle, to the number of 6000, began very much to incommode the City, and at last to be unsupportable to them, by committing great Violences, not only upon Women and Maids, but especially upon their Saints; which so enraged the *Muscovites*, that *January* 24. 1611. they met in the great Market-place before the Castle, loudly complaining of the Proceedings of the *Poles*, and that they were no longer able to maintain such a number of Foreign Troops, in the absence of their Great Duke, who not appearing among them, made them suspect there was something more than ordinary in the bottom; for which reason they should be obliged to look unto their own safety, unless their new Great Duke would apply a speedy Remedy to these Disorders by his Presence.

The *Polish* General did all that lay in his power to appease them, by inflicting severe Punishments upon such as had deserved it; but this not satisfying the *Muscovites*, he thought it best to secure himself, and the Castle, by doubling the Guards, and possessing themselves of the Avenues of the principal Streets, to prevent the *Muscovites* assembling in the Market-place. These being highly exasperated at it, rose up in Arms in divers parts of the City, to oblige the *Poles* to divide their Forces, but these play'd them another Game, for having set fire to the City in 4 several places, they set upon the *Muscovites*, whilst they were busied in relieving their Wives and Children from the Calamities of the Fire, ransack'd the Great Duke's Treasury, all the Churches and Monasteries, in which they got incredible Booty, which they sent into *Poland*; besides which, near 200000 Persons perished by the Sword and Flames, which also consumed the whole City, excepting the Castle, the Churches, and some few Stone-houses.

About 15 Days after *Zachary Lipstcnow* the *Muscovite* General besieged the *Poles* in the Castle, and after many Assaults, at last forced them to surrender the Castle, and leave the Kingdom by composition.

Michael Federowitz, chosen Great Duke.

The *Muscovites* having at last, after so many Domestick Calamities, rid their hands of the Foreigners, chose *Michael Federowitz*, the Son of *Fedor Nikitis*, a Kinsman, but far removed, of *Juan Basilowitz*. This Man having forsaken his Wife for God's sake, as they call it in *Muscovy*, and embraced a Monastick Life, was at last made a Patriarch. His Son always shew'd a great respect to his Father, unto whom he used to give the precedency at Publick Audiences and Ceremonies; he died 1633. a few Days before our first Embassy, and his Son, *July* 12. 1645. in the 49th Year of his Age, and the 33d Year of his Reign, being succeeded by his Son *Alexis Michaelowitz*.

A counterfeit *Zuski*.

The Reign of *Michael Federowitz* was very mild and quiet; notwithstanding which, there started up another Impostor, who assumed the Name and Quality of *Basili Ivanowitz Zuzki*, Son to the Great Duke *Juan Basilowitz Zuzki*. He was a Native of *Vologda*, his Name *Timoska Ankudina*, a Linnen-Draper's Son; and having by his Father's care attain'd to Reading and Writing, (the highest degree of Learning in *Muscovy*) and having a good Voice, he was recommended to the Archbishop of that Province, who took him into his Service, and not long after Married him to a Grand-child of his. But after the said Archbishop's Death, being reduced to a low Ebb of Fortune, he came with his Family to *Musco*, where by the Recommendation of his Wifes Relations, he was made a Receiver of the Taxes, paid for the Licenses of Tipling-houses; but having squander'd away some of the Money, so that he fell short 200 Crowns in his Account the very first Year, he went to a Friend of his named *Basili Gregorowitz Spilki*, and told him, That he expected some of his Wifes Relations from *Vologda*, and being willing she should appear in a condition sutable to his Employment, he desired him to lend him some Pearls and Jewels for that purpose; which the other did without the least difficulty; nay, without taking any Note under his Hand, tho' they amounted to the value of 10000 Crowns. 1636.

His Cheats.

Timoska was so far from disposing them, in order to make up his Accounts, that he sold them outright, spent the Money, and when his Friend demanded his Jewels, denied that he had received any from him; and being clapt in Prison, was soon released again, the other having no evidence or any other proof against him.

Not long after some difference arising betwixt *Timoska* and his Wife, she upbraided him with his perfidiousness, and Sodomy; so that fearing on the one hand to be accused by his Wife, and on the other side to be call'd to a severe account for what Money he was in Arrears to the Great Duke; he sent his Son abroad upon some Errands, and in the mean while shutting her up in a Stove, set the House on fire, where she was burnt, and he retir'd so secretly into *Poland*, that it was generally believed he had been burnt in the House.

Burns his Wife, and retires into *Poland*.

He had scarce been 2 Years there, when hearing 1645, that an Ambassador from the *Czar* was coming to *Warsaw*, he thought it his safest way to seek for Protection by *Chimielniski* the General of the *Cossacks*, under pretence that he was prosecuted upon no other account, but because he was a near Kinsman to the Great Duke *Juan Basilowitz Zuski*, which had such an influence upon the said General, that he treated him like a Person of the first Quality.

Craves Protection from the *Cossack* General.

But not long after an Envoy being sent by the *Czar*, to the said General, who knew him; he thought it not safe to tarry any longer in that place, he made shift to get to *Constantinople* 1648. and was circumcised; but fearing to be call'd to an account for some Crimes, he had committed, he retir'd after a little stay to *Italy*, and so to *Rome*, where he embrac'd the *Roman Catholick* Religion, and 1650, went to *Vienna*, and thence into *Transylvania* to Prince *Ragotski*, from whom he obtained Letters of Recommendation to *Christina* Queen of *Sweden*.

Turns *Turk* at *Constantinople*.

And *Roman Catholick* at *Rome*.

This Princess taking compassion of him, allow'd him an honourable Pension, which being soon come to the *Czar*'s Ears, he sent *Koslau*, the same Person who had formerly seen him with the *Cossack* General, as his Envoy to *Sweden*, which *Timoska* having got timely notice of, got away, but was taken at *Revel* in *Livonia*, and committed to Prison; from whence however he made his escape soon after, and found means to get to *Brussels*, and from thence to *Wittenbergh* and *Leipsick*, where he turn'd *Lutheran*, and at last came to *Newstad* in *Holstein*, where he was secured at the request of *Peter Miklas*, who lately had brought the following Letter to his Highness from the *Czar*.

Turns *Lutheran* at *Leipsick*.

The Great Duke's Letters to the Duke of *Holstein*.

IN the Name of Almighty God, who does all in all, and protects all Nations in good Consolations, from Him, who, by the Grace, Providence, Power, Vertue, Operation, and good Pleasure of God, to be magnified in the Blessed Trinity, and glorious in all Eternity, hath been chosen, and holds the Scepter of the true Christian Faith, to govern and preserve, with God's Assistance, in Peace and Quiet, without Troubles, the Great Empire of the Russians, *with all the Provinces thereunto annexed, by Conquest or otherwise. We the* Grand Seignior, Czar, *and* Great Duke, Alexis Michaelowitz, *Conservator of all the* Russes, *&c. to the Most Mighty* Frederick, *Hereditary*

1636. *Hereditary Prince of* Norway, *Duke of* Sleſwick, Holſtein, Stormarie *and* Ditmarſe, *Count of* Oldenbourg, *and* Delmenhorſt, *Health. In the year* 1644. *or, according to the Calculation of* Muſcovy, *in the Year* 7152. *the mentioned* Timoska Ankudina, *and* Koſtka Konichou, *having robbed our Treaſure, to avoid the Death they had deſerved, departed the Countries under our Juriſdiction, to go to* Conſtantinople, *where they profeſſed the* Turkiſh *Religion. There they did ſo great miſchief in a ſhort time, that they were forc'd to fly, and to retreat into* Poland *and* Lithuania, *where they endeavoured to ſow Diviſions between the neighbouring Princes. To that end they went to* Theodat Chimielniski, *General of the* Coſſacks, *whom the King* John Caſimir *of* Poland, *our Brother, commanded to put thoſe Robbers into the hands of* M. Germolitzowi, *Gentleman of his Chamber, who had order to ſend them to* Muſcovy, *under the conduct of* M. Peter Proteſiowi, *a Gentleman of our Retinue, as the ſaid* Chimielniski *had made known to our* Czariſh *Majeſty. But theſe Robbers and Traitors got to* Rome, *where they embraced the* Latin *Religion. Afterwards they paſſed through ſeveral other Provinces of* Europe, *where they changed their Names, ſo as* Timoska, *ſometimes, aſſumed that of* Zuski, *and ſometimes that of* Sinenſis, *while* Koſtka *went under the Name of his Servant, till ſuch time as both having been known at* Stockholm, *by ſome of our Merchants of* Novogorod, *and other places, and thereupon ſecured, one at* Revel, *the other at* Narva, *the Governors of thoſe two Places made ſome difficulty to deliver them up to us, without expreſs order from the Great Queen of* Sweden. *But when we had deſired the ſaid Great Queen of* Sweden, *to put thoſe Traytors into the Hands of the Gentleman whom we had ſent expreſly for that purpoſe, it happened that at his coming to* Revel, *with the Orders of the ſaid Great Queen, the Governor had already ſuffered one of them to make his Eſcape, ſo that he could bring along with him but only the ſaid* Koſtka. *We have underſtood ſince, that the other hath been taken and impriſoned in the Country of* Holſtein, *wherefore we have thought fit to ſend to your Highneſs our* Poſſanick, Baſili Spilki, *accompany'd by ſome of our Subjects, with Letters from our* Czariſh *Majeſty, to intreat you, That you will be pleaſed to deliver up unto them, and to ſend to us thoſe Traytors.*

The Letters were dated the laſt of *October*, 1652. after which the Great Duke ſent another of the 5th of *January*, 1653. to the ſame effect, ſave that at the end of the Letter, were added the Lines following.

SInce that time, there came to us, in the Month of December *laſt*, Peter Micklaf, *of* Novogorod, *who hath informed us, how that, in purſuance of your Orders, the ſaid Traytor had been ſecured in your Ducal City of* Newſtat, *and that upon the Remonſtrance made to you by the ſaid* Micklaf, *you had tranſlated him to* Gottorp, *to be there kept under a good and ſure Guard. Wherefore we ſend back again unto you the ſaid* Micklaf, *with Letters from our* Czariſh *Majeſty, to entreat you, to deliver up the ſaid Traytor to him and* Baſili Spilki, *that he may have no further opportunity to eſcape, and raiſe new Troubles in the World. In acknowledgment whereof, our* Czariſh *Majeſty ſhall ſerve your Highneſs, in ſuch occaſions as ſhall preſent themſelves. This Robber and Traytor to our* Czariſh *Majeſty, named* Timoska, *is of very mean Birth, the Son of a Linen-Draper that dealt only in coarſe Cloaths, named* Demki Ankudina, *of the Suburbs of* Vologda, *his Mother is called* Salmaniska; *and his Son, who is yet living,* Tereska. Timoska *was an under Officer in the* Nova Zetvert, *and he hath robb'd our Treaſury, hath kill'd his Wife, and, with his own Houſe, hath burnt ſeveral other Houſes that were near his, whereby many of our Subjects have been ruined. Wherefore knowing that he could not avoid Death otherwiſe than by flight, he got away in the manner we have mentioned.*

Given at our Czariſh *Reſidence of* Muſco, *the* 3*d of* January, *in the Year of the World's Creation,* 7161. *and of the Birth of our Saviour,* 1653.

After this, he alſo writ a third Letter, of the 17*th of* October *the ſame Year, upon which the Priſoner was delivered up to thoſe, whom the* Great Duke *had appointed to receive him.*

One of the Deputies ſent by the *Czar* to conduct *Timoska* to *Muſco*, was the ſame Perſon named *Spilki*, whom he had formerly cheated of his Jewels: They were confronted together, in hopes by this means to draw the truth out of him: Accordingly being ask'd by *Spilki*, Whether his Name was not *Timoska Ankudina?* Whether he had not cheated the Great Duke's Treaſury, and committed ſeveral other Crimes? Unto which he anſwered, That poſſibly one *Timoska Ankudina* might have been guilty of ſuch things, but that that was no concern of his, his Name being *Johannes Sinenſis*, in the *Poliſh* Language *Zuski:* But being further urg'd by *Spilki*, to remember his paſt Life, he gave him opprobrious Language. 1636.

Another time being at his own requeſt examin'd by his Highneſs's Chancellor, and ſome of his Council; they ask'd him, What Family he was of? Whether he were of Kin to the Great Duke? Why he proſecuted him? And what prejudice he was able to do him? He anſwered, That his Name was *Zuski*, that at his Baptiſm he had been named *Timotheus*, that his Father was *Baſil: Domitian Suiski*, ſo ſirnamed from *Suia*, a City in *Muſcovy*, but that he was Born and Educated in *Poland*, in the Province of *Novogarska Severskhio*, his Father being Hereditary Lord of *Hukagrina Severska*, on the Frontiers of *Muſcovy:* That he was not of Kin to the Great Duke, whoſe Father had been only a Gentleman, whereas his was born a Prince; and that was the reaſon why the Great Duke perſecuted him: That the *Cham* of the *Crim Tartars* had ſollicited him to enter *Muſcovy* with 100000 Men, but that God had diverted him from that deſign.

Not long after, the *Muſcovite* Envoy, who was lately come from *Sweden*, and knew him, having adviſed him to intercede with the Patriarch for his Pardon, he writ a Letter, which he delivered to the ſaid Envoy; in which he declared to the Patriarch, That he was Born a *Muſcovite*, and at his Baptiſm had been named *Timotheus*, of which *Timoska* is the diminutive: That he had once taken a Reſolution to enter *Muſcovy* with 300000 Men, but that he had been diverted from it by the Guardian-Angel of *Muſcovy*; and was come to *Neuſtat*, in order to his Return into *Muſcovy*; being now ready to go along with thoſe the Great Duke had ſent to conduct him thither.

The Envoy having gotten this Letter into his Hands, and not queſtioning but this might prove a means to bring him to a true Confeſſion, opened and read it in his preſence; but he ſoon found himſelf miſtaken in his aim, for *Timoska* confidently denied the Letter; telling the Envoy he was a Cheat, and that the Letter was counterfeited; to prove which, he writ another of a quite different Stile and Character: But notwithſtanding all theſe Evaſions, the conſiſtency of his Depoſitions ſufficiently convinced all thoſe that knew them, that he was an Impoſtor; for ſometimes he declared, that he was the Son of the Great Duke *Baſili Iuanowitz Zuski*; at another, that his Father's Name was *Baſili Domitian*, tho' it was ſufficiently known, that there were but 3 Lords of that Family, and none of them of that Name. He varies in his Depoſitions.

For the reſt he underſtood the *Latin*, *Italian*, *German* and *Turkiſh* Languages; and was ſo great a Maſter at counterfeiting all ſorts of Hands, that it was hard to convince him by what he had writ himſelf, whilſt in his firſt Employment. Whilſt he was on his Journey to *Muſco*, he endeavoured ſeveral times to kill himſelf, but being ſo narrowly watch'd, that it was impoſſible for him to put it in execution, he was brought to *Muſco*, and in the preſence of divers Perſons of Note, put to the Torture, where he conſtantly averr'd, That he was Son to the Great Duke *Baſili Iuanowitz Zuski*, tho' it was proved to his Face, That he was Son of *Demki Ankudina*, a Linnen-draper at *Vologda*; and that both the Great Duke and his 2 Brothers died without any Male Iſſue.

His Mother, and one *Peſcou*, with whom he had left his Son in *Muſco*, being brought in whilſt he endured the Torture, and being exhorted by them to confeſs the truth, he was ſo ſtartled at their Preſence, that he would not ſpeak one word afterwards; and continued this the next Day when he was put to the Torture again, ſo that he was carried ſtreight to the Market-place, where he had firſt his right Arm cut off below the Elbow with an Axe, then the left Leg below the Knee, and afterwards the left Arm and right Leg, and laſt of all the Head. This was done on the ſame Day a *Poliſh* Envoy was to have his Audience; who being conducted through the Market-place, was Is tortured at *Muſco*.

an

1636. an Eye-witneſs of the Tragical *exit* of this Impoſtor, who had in *Poland* been look'd upon as the Son and Heir of *Baſili Iuanowitz Zuski*.

Is executed.

We told you before, that *Michael Federowitz* dying *July* 12. 1645. was ſucceeded by his Son *Alexis Michaelowitz*; who being Born *March* 17. 1630. the *Bojars*, fearing his Enemies might take advantage of his tender Age, haſtned his Coronation, which upon that account was not performed with all the Ceremonies uſual upon that occaſion, which are as followeth.

The Ceremonies of the *Czar*'s Coronation.

All the Metropolitans, Archbiſhops, Biſhops, *Knez* and *Bojars*, as alſo the Chief Merchants throughout the Empire, being ſummon'd to appear at the Day appointed for the Coronation; the Patriarch, attended by the Metropolitans, conduct the Great Duke to a Scaffold about 3 Steps high, covered with rich *Perſian* Tapeſtry, erected in the Church within the Caſtle; on which 3 Brocado'd Chairs are placed at an equal diſtance, *viz.* one for the Great Duke, another for the Patriarch, and upon the third are ſet the Ducal Cap and Robe; the firſt being embroider'd with Pearls and Diamonds, having upon the Crown a Taſſel, on which hangs a little Crown, ſet all over with Diamonds: The Robe is of a rich Broccado, lined with the fineſt Sable.

As they enter the Church, the Clergy ſing their Hymns; which done, the Patriarch prays to God, to St. *Nicholas*, and to all the other Saints, begging their preſence at this Solemnity. Then the chief Miniſter of State taking the *Czar* by the Hand, preſents him to the Patriarch in theſe words.

Since the Knez *and* Bojars *have acknowledged this Prince to be the next of Kin to the late* Great Duke, *and lawful Heir to the Crown, they deſire, that as ſuch; you would immediately Crown him.*

Whereupon the Patriarch leading the new Great Duke to the Scaffold, and having ſeated him in one of the 3 before-mentioned Chairs, touches his Forehead with a little Croſs of Diamonds, and Bleſſes him; whilſt one of the Metropolitans reads the following Prayer.

O Lord our God, King of Kings, who didſt chooſe thy Servant David, *by the Prophet* Samuel, *and who didſt cauſe him to be Anointed King over thy People* Iſrael, *hearken to our Prayers; which, though unworthy, we offer up unto thee. Look down, from the higheſt Heavens, upon this thy faithful Servant, who is here ſeated upon this Chair, and whom thou haſt exalted to be King over thy People, whom thou haſt Redeemed by the Blood of thy Son. Anoint him with the Oyl of Gladneſs; protect him by thy Power; ſet upon his Head a precious Diadem; grant him a long and happy Life; put into his Hand a Royal Scepter, and make him ſit upon the Throne of Juſtice. Make ſubject to him all Barbarous Languages; let his Heart and his Underſtanding always continue in thy fear. In all the courſe of his Life, let him be conſtantly obedient to thy Commandment. Suffer not any Hereſie or Schiſm to come near his Perſon or Government. Teach him to maintain and obſerve whatſoever the Holy* Greek *Church commandeth and ordaineth. Judge thy People in Juſtice, and be Merciful to the Poor; that when they leave this Valley of Tears, they may be received into Eternal Joys.* Which Prayer the Patriarch concludes with theſe words: *For thine is the Kingdom, the Power, and the Glory: God the Father, God the Son, God the Holy Ghoſt be with us, and remain with us.*

After the Prayer is ended, two Metropolitans take up the Ducal Cap and Robe by the Patriarch's command, who cauſes ſome of the *Bojars* to come upon the Scaffold, and to put them on the Great Duke. Then he Bleſſes him a ſecond time, by touching his Forehead with the little Diamond-Croſs. Then he orders them alſo to put the Ducal Cap on his Head, whilſt he gives him his Bleſſing a third time, and ſays; *In the Name of the Father, the Son and the Holy Ghoſt:* Which done, all the Prelates approach, and give the Benediction to the Great Duke, but with their Hand only.

After this, the *Czar* and the Patriarch ſit down, but riſing up immediately again, order the ſinging of the Litany, each Verſe of which ends with the uſual *Goſpodi Domine*, i. e. *Lord have mercy upon us*; frequently mentioning alſo the Great Duke's Name.

After the Litany is ended, they ſit down again; when one of the Metropolitans advances to the Altar ſinging: *God preſerve our* Czar, *and Great Duke of all the* Ruſſes, *whom God has out of his Love beſtow'd on us, in good Health, and grant him a long and happy Life:* Which words being repeated by all preſent in the Church, the *Bojars* advance towards the Great Duke, ſmite their Foreheads before him, and kiſs his Hand: Which done, the Patriarch alone ſtanding before the Great Duke, ſpeaks to him thus. 1636.

Since by God's Providence all the Eſtates of the Kingdom, as well Eccleſiaſtical as Temporal, have Eſtabliſh'd and Crown'd you Great Duke *over all the* Ruſſes, *and have entruſted you with the Government and Conduct of ſuch vaſt conſequence, you ought to apply all your Thoughts to love God, keep his Commandments, adminiſter Juſtice, and protect and maintain the true* Greek *Church.*

He ends theſe words with giving him once more his Benediction, and the whole Aſſembly withdraw from thence to the Church of St. *Michael* the Archangel; juſt oppoſite to this, when having ſung the Litany, they repair alſo to that of St. *Nicholas*, where the Ceremony is concluded by ſinging the Litany once more, and ſo withdraw to the Great Hall of the Caſtle, where they are entertained with a magnificent Dinner.

The Great Duke's Favourite.

Alexis Michaelowitz Moroſou, who had been the young Prince's Governour, changed that Quality immediately after the Coronation, into that of chief Miniſter of State: The better to eſtabliſh himſelf in that Dignity, he beſtow'd conſiderable Employments upon the Friends of the Great Dutcheſs-Mother (for whom he knew the young Prince to have a great Veneration) but ſo, as to remove them at a good diſtance from Court and the *Czar*'s Perſon; where he took care to place his own Creatures, ſuch as he knew to have an abſolute dependance on his Fortune. And to make ſure work, he thought he could pitch upon no better expedient, than to recommend to the young Prince a Spouſe intereſted in the ſame Faction, he brought him acquainted with the Daughter of a certain Gentleman, named *Ilia Danilowits Miloſtanski*, who being an intimate Friend of his, and whoſe ſecond Daughter he intended to Marry, he thereby hoped to engage himſelf with the ſtricteſt Tye of Alliance both to the *Czar*, and his Friends. His Project ſucceeded according to Expectation, for having perſwaded the Great Duke to ſend for his Friends 2 Daughters, under pretence of paying a Viſit to the Princeſſes his Siſters, he was ſo taken with the Beauty of the Eldeſt, that he ſent word immediately to her Father, that he intended to honour him with his Alliance, by Marrying his Eldeſt Daughter; accordingly they were Married on *Shrove-Sunday*, 1647. and 8 Days after, *Moroſou* Marrying the ſecond Siſter, thereby became Brother-in-Law to the Great Duke.

Ilia Danilowitz Miloſtanski, the Great Duke's new Father-in-Law, had no ſooner got a ſhare in the management of Affairs, but he made conſiderable Alterations among the Officers, eſpecially of the Houſhold, removing moſt of the old ones; inſtead of which, he put in his own Kindred, who were as Neceſſitous as himſelf; and conſequently let ſlip no opportunity of advancing their Fortunes.

Among the reſt, he got one *Leponti Steppanowitz Pleſſeou*, to be made chief Judge of *Muſco*, in that Juriſdiction they call *Semskoi Duor*, a Perſon of ſo profligate a Principle, that he would not ſtick at any thing that might turn to his Advantage. To take Preſents from both Parties, was become ſo habitual to him, that he look'd upon it his Due, rather than a Crime; and ſuch as neglected to do ſo, he put to ſo much vexation, by ſuborning falſe Witneſſes, and committing them to Priſon, that they were glad to redeem their Liberty with the beſt part of their Eſtates.

He had a Brother-in-Law, named *Peter Tichonnits Trochanioton*, who being made Surveyor of the Arſenal, play'd the ſame Game with the Cannoneers, Armorers, and the other Mechanicks under him; keeping their Salaries (which was wont to be paid them duly once a Month) ſo long, till out of Neceſſity they were forced to compound, and give a Diſcharge for the whole. Beſides this *Moroſou*, and his Faction, had found means to put new Impoſitions upon the People, by aboliſhing the old Yards, and forcing them to buy new ones of Iron, at the rate of a Crown apiece; and laying an additional Duty upon Salt, which ſo incenſed the *Muſcovites*, who had lived very quietly under the late Great Duke's Reign, that they reſolved to addreſs them-

1636. ſelves to the Great Duke, for the redreſſing of their Grievances.

Their chief aim being againſt *Leponti Steppanowitz Pleſſcon*, the Petitions they preſented by means of the *Bojars*, who favoured *Pleſſcon*, being not anſwered according to their expectation, they reſolved to take the firſt opportunity to declare their mind by word of Mouth to the *Czar* in Perſon. The 6th of *July* 1647. they took the advantage of a Proceſſion the Great Duke made that Day to a Monaſtery in the City of *Stertenskie*, and watching his return in the Market-place before the Caſtle, under pretence of ſeeing him paſs by, as they uſed to do, they broke through thoſe that attended him, and laying hold of his Horſes Bridle, entreated him not to neglect their Complaints they had made ſo often before againſt *Pleſſcon*, deſiring that another might be put into his place, who would act with more Integrity and Juſtice.

The Great Duke, tho' not a little ſtartled at ſo outrageous a proceeding, yet put the beſt Face upon the Matter, and told them, That he could not without trouble hear the juſt Grievances of his Subjects; that he would examine the Matter, and that they ſhould have Satisfaction.

The People appear'd to be well enough ſatisfy'd with this Anſwer, and wou'd queſtionleſs have gone no farther for that time, had not ſome of the *Bojars* there preſent, that were Friends of *Pleſſcon*, given abuſive Language to ſome as they were going away, and ſtruck others with their Whips, which ſo enraged them, that they began to pelt them with Stones, and obliged them to haſte with all the ſpeed they could to the Caſtle, whither they were purſued ſo vigorouſly by the Populace, that the Guards had enough to do to ſtop them, till they were got to the Great Duke's Apartments: But the People being more inflam'd at this reſiſtance, broke at laſt into the Caſtle, threatning to ranſack it, unleſs *Pleſſcon* were put immediately to Death. *Moroſon* appear'd in a Balcony, in hopes to appeaſe them by his Rhetorick, but was glad to withdraw as ſoon as they told him, That they had as much to ſay to him as to the reſt; and to make good their words, went ſtraightways to his Palace, ranſack'd it, threw one of his Servants out of a Window, and told his Lady, That ſhe being the Great Dutcheſs's Siſter, ſhe might be glad to come off with her Life, but took all her Jewels from her, and broke to pieces a very fine Coach, which had Silver inſtead of Iron round the Wheels. From whence they went to *Pleſſcon*'s, *Tichonowits*, the Chancellor's, and ſeveral other Palaces, where they play'd the ſame Game. The Chancellor, whoſe Name was *Nazari Juanowitz Triſton*, being ill a Bed, by reaſon of a fall, and conſequently not in a condition to make his Eſcape, had hid himſelf under a heap of Birch, covered with ſome Flitches of Bacon, where he had certainly ſaved his Life, had not one of his Servants betray'd him, for a Sum of Money; the enraged People dragg'd him out from thence into the Street, where they Cudgel'd him to Death.

An Inſurrection in *Muſco.*

Whilſt the Populace was thus buſied in ranſacking in the City, thoſe in the Caſtle had ſome leiſure to Barricado themſelves againſt the firſt Aſſault; but this being not thought ſufficient, when they found them to return thither, and to continue in Arms all the Night from the 6th to the 7th of *July*, the only Expedient left, was to order the *German* Officers to rendezvous their Troops in ſeveral places of the City, and to march to the relief of the Caſtle. They executed their Orders ſo ſtrictly, that the next Morning they march'd with Drums beating, and Colours flying to the Caſtle, where they took up their Poſts; the People being ſo far from oppoſing them, that they told them, That knowing them to be Gentlemen of Honour, who had no hand in their Oppreſſion, they had no Quarrel againſt them.

The Great Duke relying upon their Courage and Fidelity, ſent *Knez Nikita Juanowitz Romanou*, whom he knew to be in great reſpect with the People, to appeaſe their Rage: He appear'd to them uncovered, deſiring them to be ſatisfied with the Anſwer the Great Duke had given them the Day before: They anſwered, That they were not diſſatisfy'd with the Great Duke, but ſome of his Miniſters, who under the Cover of his Authority, impoſed upon the People; and that they would not ſtir, till they had delivered up to them, *Boris Juanowitz Moroſou*, *Leponti Steppanowitz Pleſſcon*, and *Peter Tichonowitz Trochaniſton Romanon*.

After having return'd them thanks for their kind Expreſſions towards the Great Duke, told them, That he would acquaint him with their Requeſt, and that he did not queſtion, but immediate order would be given for the Execution of them; but that he was ready to take his Oath, That *Moroſou* and *Trochaniſton* had made their Eſcape. 1636.

Romanou was no ſooner return'd to the Great Duke, but word was brought to the People, that *Pleſſcon* was coming forth in order to his Execution; and that the other 2 ſhould ſuffer the ſame Puniſhment as ſoon as they were found. He was accordingly brought out of the Caſtle in a quarter of an Hour after, to have his Head cut off in the Market-place; but the Populace ſaved the Executioner this labour; for they fell upon him with Cudgels, and kill'd him in a moment. *Pleſſcon* put to Death.

Moroſou had indeed made his Eſcape, but by ſome ſecret ways got again into the Caſtle; but *Trochaniſton* being taken near the Monaſtery of *Troitza*, his Head was cut off the 8th by the *Czar*'s Command. *Trochaniſton* executed.

This wrought ſo effectually upon the People, that they withdrew about 11 a Clock in the Morning to their reſpective Homes.

The ſame Afternoon there happened another Diſaſter, which was a moſt furious Fire, which burnt down the whole Quarter of *Zargorod*, and ſpreading it ſelf over the River *Neglina*, got into the Great Duke's Storehouſes of Strong-waters, which burnt with ſuch violence, that the Caſtle was in danger of being conſumed by it; thoſe who were appointed for the quenching of it, being all laid Drunk in the Streets.

About 11 a Clock at Night ſome Foreigners who ſtood at a diſtance to obſerve the Fire, they ſaw a Monk coming along with a great burthen, as they conceived by his blowing, who advancing towards them, deſired them to help him to caſt the dead Body of the villanous *Pleſſcon* into the Flames, as the only means left to ſtop their fury, which they refuſing to do, he left them, yet not without ſome Curſes; and at laſt, by the help of ſome *Muſcovites*, caſt it into the Fire, which began to abate immediately, and ſometime after was quite extinguiſhed.

Within a few Days after, the Great Duke preſented the *Strelitzes* with a good quantity of Strong-waters and Mead, and his Father-in-law ſpent ſeveral Days in Feaſting the Citizens of divers Profeſſions; the Places of the executed Perſons being alſo ſupply'd with Perſons of known Integrity; the Great Duke took the opportunity of the next Proceſſion to ſpeak to the People, in the preſence of *Nikita Juanowitz Romanou*; telling them, That he was ſorry to hear of the violence committed under the pretext of his Authority, and that in their ſtead he had put in others, who he hoped would do Juſtice to all; that he would repeal the additional Impoſition upon Salt, and aboliſh all Monopolies; the People having accepted the *Czar*'s Speech with a moſt profound Reverence, and thank'd him for his favour, he continued his Diſcourſe and ſaid; That it was true, he had promiſed to deliver up *Moroſou* to them; and that he would not in all reſpects juſtifie his Conduct; but that he hoped they would not deny him his firſt Requeſt; which was, to pardon his Brother-in-Law, who could not but be very dear to him; That he would be anſwerable for his future Behaviour, which ſhould be ſuch, as that they ſhould have no reaſon to complain of: The Great Duke accompany'd theſe laſt words with ſome Tears, which ſo mov'd the People, that they cry'd out with one Voice, *Long live our Great Duke, God's and his Will be done.*

The preceeding Account is a convincing Inſtance, that even the moſt ſubmiſſive and ſlaviſh minds may be reduced to ſuch a degree of Deſpair, as to make them courageous enough to break their Chains.

Another inſtance of this nature we had 1658. in *Muſcovy*: For purſuant to a Treaty made the preceding Year, betwixt *Muſcovy* and the Crown of *Sweden*, the firſt were to furniſh the *Swedes* with a certain quantity of *Rye*, in part of payment of a Debt of 390000 Crowns, and one *John de Rhodes* being ſent by the *Swediſh* Court to receive the ſame, Orders were ſent to *Fedor Amanilion*, a Merchant of *Pleſcou*, to provide the ſaid Rye: But he abuſing the *Czar*'s Command, ſeized upon all the Rye he could meet with, which ſo exaſperated the Citizens, that they joyn'd with thoſe of *Novogorod*, reſolving not to let either the Rye, or Money to be given to the *Swedes*, paſs that way, ſeized upon ſome *Swediſh* Merchants, and Impriſon'd their *Weywode* and beat the *Bojars*, who were ſent by the *Czar*, to appeaſe theſe Diſorders; which obliged the An Inſurrection in *Pleſcou*.

Great

1636. Great Duke to send a strong Guard with the *Swedish* Commissary to the Frontiers, and ordered a Body of Troops to reduce those of *Plescou* to Obedience; the Ringleaders of which were either punish'd with Death, or banish'd into *Siberia*.

These Disorders did however produce this good effect; that the other *Knez* and *Boyars* had ever after their share in the management of publick Affairs. In former Ages the chiefest Dignity of the Kingdom was that of Lord High Steward of *Muscovy*, which was suppress'd when *Zuski* came to the Crown.

The principal Officers of the Court, and their Rank.

The next which now bears the first Rank, is that of the *Great Master*, or Steward of the Houshold.

Next to him is the Master of the Horse, who has the oversight of the *Czar*'s Stables, and the Harnesses, and other Ornaments used at Publick Solemnities.

These are the 3 Officers that precede all the other *Bojars*, *Olconitz*, and Secretaries of State.

After them come the *Postilnizki*, who make the *Czar*'s Bed: The Chamberlain, the Carvers, Gentlemen Sewers, Gentlemen of the Privy-Chambers, the ordinary Gentlemen, the Pages, the Secretaries and Clerks.

The *Bojars* obliged to follow the Court.

To prevent the Disorders or Factions which might arise from the Authority the *Knez* and *Bojars* have in their respective Provinces, by reason of their great Estates, they are obliged to attend daily at Court, and to pay their Reverence by bowing down their Heads to the Ground before the *Czar*. Those who have but slender Estates, and no Places at Court, are permitted to live in the Country. They put a great value upon Ancient Nobility, as well among themselves, as with Foreigners, but are very cautious not to match with any of an inferiour Rank.

They esteem Nobility.

Considering the vast extent of the *Czar*'s Dominions, his Revenues must be very great, arising partly from his Dominions, partly from his Factors, and the Duties and Taxes he imposes upon his Subjects; the last of which amount sometimes to the 5th part of their Estates, as 1632. during the War with the *Poles*, sometimes to the 10th.

The *Czar*'s Revenue.

The *Knez*, *Bojars*, and Gentlemen, pay no Taxes, but in lieu thereof, are obliged to maintain a certain number of Horse and Foot, according to their Revenues.

The Custom-house of *Archangel*, brings in alone 60000 Crowns Yearly; and the Tipling-houses produce a vast Sum, there being at *Novogorod*, 3 Taverns who pay Yearly 12009 Crowns to the *Czar*; there being above 1000 such Houses, where the Great Duke has the sole advantage of the Sale of Strong Liquors.

A vast Profit also arises to the *Czar*, from the Furs and *Cavasyar*, and several other Commodities, which are sold only for his use; besides what he gains yearly by his Factors.

His Expences.

His Demesnes he Farms out at a certain Annual Rent, which is employed in maintaining 16000 *Strelitzes* in the City of *Musco*; besides which, he is obliged to maintain 100000 Men constantly to guard his Frontiers: If he happens to be engaged in a War, he is forced to carry it on at a much greater Expence than most other Princes do, by reason of the vast charge he is at in maintaining Foreign Officers and Soldiers at an expensive rate. The defrayments of Foreign Ambassadors and the Presents given to them, are very considerable; and his Table, and the expence of his Court, where above 1000 Persons are provided with Meat every Day, amounts to a great Sum. When the Great Duke is to go to Dinner, a certain Officer comes to the Kitchen, and cries, *The Grand Seignior would be served.* He sits alone at the Table, and if the Patriarch, or any other Person of Quality is to Dine with him, they sit at another Table, at the end of his, and are served with some of the Dishes which have been presented to the Great Duke; for whereas his Table is but one Course of 50 Dishes, the *Czar* makes choice of what he likes; and if no Body Dines with him, those Dishes he has not meddled with, are sent to some Lords in the Town, or to his Physicians, who have considerable Salaries, besides a considerable quantity of Wheat, Barly, Honey, and several other Provisions; besides that, the Great Duke is never Purged or Bled, but the Physician has 100 Crowns, a *Zimmer* of Sables worth as much, and a piece of Satin or Velvet.

The *Muscovite* Court has also Interpreters for all sorts of Languages, especially for the *German*, *Polish*, *Swedish*, *Turkish* and *Persian*. The whole Management of Publick Affairs is divided into 6 Classes or Courts of Chancery, as they term it. 1636.

The six Chambers for Publick Affairs.

The first is for Foreign Affairs.

The second for War.

The third for Crown Lands, and the *Czar*'s Revenues.

The fourth for the Accounts of Factors, and Tavern-keepers.

The fifth for Appeals in Civil Causes. And

The sixth for Criminal Causes.

The *Bojars* are concern'd not only in State Affairs, but also in the Decision of private Affairs; in which Courts they commonly are Presidents. The first Court is call'd *Pololskie Pricas*, where they regulate all Matters relating to Ambassadors, the Posts of the Empire, and the Concerns of Foreign Merchants.

The Courts of Justice.

In the second Chamber, call'd *Roscredai Pricas*, a Register is kept of the Families of the *Bojars*, and all Gentlemen of *Muscovy*, and the Advantages got, or Losses sustained in the Great Duke's Wars.

In the third Chamber, call'd *Pominstnoi Pricas*, a Publick Register is kept of all the Mannors held by Homage, and all Differences concerning the same are adjudged, and the Duties belonging to the Great Duke received.

In the fourth and fifth Chambers, call'd *Casanskoy*, and *Siberskoy Pricas*, all the Differences of the two Provinces of *Casan* and *Siberia* are adjusted, and an account kept of all the Sums brought from thence into the *Czar*'s Treasury.

The *Durovoi Pricas*, takes cognizance of the Differences betwixt the Servants of the *Czar*'s Houshold.

The *Inasemski Pricas*, is appointed for the decision of Differences betwixt Foreign Officers, and where they receive their Orders in time of Peace.

The *Reitarskoi Pricas*, judges the Causes of the *Muscovian* Cavalry, and here in time of Peace they receive their Orders and Pay, *viz.* 60 Crowns *per Annum* for every Horseman; these are commonly Gentlemen of small Estates, which they hold by homage and fealty.

The *Boschoi Pricas*, is appointed to take the Accounts of the Great Duke's Receivers of Taxes once a Year. The President of this Court has also the power of laying a Tax upon Foreign Bread and Wine, has the oversight of Weights and Measures throughout the Empire, and pays such Foreigners as are in the *Czar*'s Service, their Shares.

The *Sudnoy Wolodimirskoy*, and the *Sudnoy Moskauskoy Pricas*, are appointed the first to judge the *Knez* and *Bojars*, the second the Gentlemen and Officers of the Court.

In the *Robosnoy Pricas*, Robberies upon the Highway, Murders, and all Criminal Cases.

The *Puskarskoy Pricas*, is appointed for the decision of the Differences arising betwixt the Founders, Furbishers, Cannoneers, Armourers, Smiths, and such like, belonging to the Arsenal; and here they receive their Wages.

The *Jamskoy Pricas*, is for the regulation of Stages and Post-masters, and the payment of their Salaries, and to give Passes to such as are to have Carriages upon the Great Duke's account.

Thus the Secretaries, Clerks, Captains of the Gates, and Messengers of the *Prica*'s, have their own *Prica*'s, or Courts of Judicature, and so have the Slaves, where they are entred when they are sold, and have a Certificate when they recover their liberty.

The *Selmskoy Pricas*, is for the determination of all Civil Causes for the City of *Musco*: Here are also received the Duties arising from Houses sold, and the Taxes for reparation of Bridges, Gates, Forts, and all other publick Buildings.

The place where an account is kept of all Brocado's, Velvets, Satin, Damask, and other Stuffs, for the use of the Court, is call'd *Bolchikasni Pricas*.

The Causes of the Great Duke's Factors are determined in the Great Duke's Exchequer, where all the Money that remains at the Years end, is laid up.

All Ecclesiastical Persons, who are here subject to the Temporal Jurisdiction, except in some peculiar Cases, are judged in the *Monasterski Pricas*.

Thus the Masons, Carpenters, and other Workmen belonging to the Great Duke, have their Differences decided, and their Wages paid them in a peculiar Court.

The Receivers of the Cities of *Novogorod* and *Nisinovogorod*, give in their Accounts in the *Novorodkoi Pricas*, where also some Causes of the Inhabitants are adjudged,

1636. adjudged, when they remove their Cauſe from thence to *Muſco*, there being otherwiſe no Appeal from the Sentence of the *Weywodes*.

Thus the Provinces of *Gallitz*, and *Volodimir*, have their own Court of Juſtice, upon the ſame account; and the Cities of *Caſtrom* and *Jareſlou* their own, as well as thoſe of *Uſtingha* and *Colmogorod*.

The Taxes and Monies ariſing from the Taverns and other Tipling-houſes, are paid into the *Nova Zetwert*, where alſo thoſe who ſell without Licenſes are puniſhed.

The *Solotoya Almaſnoy Pricas*, is the Jewel-Office, where the Foreign Goldſmiths, Jewellers, and thoſe belonging to the Great Duke's own Armory, have their Differences decided.

Thus the Phyſicians, Chirurgeons, Apothecaries, and Operators, have their Overſeer, unto whom they pay Reverence, and acquaint him with what is wanting for the *Czar*'s uſe in their Profeſſion.

The *Bolſchoi Prichod*, is for taking the Accounts of the Duties of Entrance into the City of *Muſco*; as that of the Tenth Penny towards the War, is in the *Shora dezatti dengi Pricas*.

Beſides theſe there is a General *Pricas*, or Court of Juſtice for all ſuch Matters as fall not under the Juriſdiction of any of the before mentioned *Pricas's*.

The Patriarch alſo has 3 peculiar *Pricas's*: One called *Roſcrad*, where are kept the Regiſters of Church Goods, and their Charters and Rolls: The ſecond called *Sudny*, where he exerciſes his Spiritual Juriſdiction by Eccleſiaſtical Judges: The third called *Caſanoy*, is the Patriarch's Treaſury. Each *Pricas* has, beſides the Preſident (who is commonly a *Bojar*) and his Aſſeſſors, a Secretary, many Clerks and Copiers, who write very neatly, and underſtand Arithmetick, which they manage by Plum-ſtones, as we do with Counters, which they always carry about them in a little Purſe. They dare not take the leaſt Preſents, under pain of Whipping; notwithſtanding which, ſome will run the hazard of it, and offer Copies of Diſpatches themſelves; but they are very deceitful in this point, often ſubſtituting their own Forgeries, inſtead of the thing deſired: Of which we ſaw an inſtance in our time, when one of theſe Clerks ſold a ſuppoſititious Copy of our Tranſactions to a Foreign Miniſter, at a dear rate. They write their Regiſters on Rolls of Papers paſted together, 25 or 30 Ells in length.

Their Law and adminiſtration of Juſtice.

In former times the *Muſcovites* had but few Laws, and thoſe founded chiefly upon Cuſtom; they concern'd only Treaſons againſt the *Czar*, or the State, Adulteries, Theſts, and Debts, the reſt being left to the Judgment of the Judges: For it was not till 1647. that the Great Duke, with the Advice of all the knowing Men of the Kingdom, cauſed a Law-Book to be compiled and publiſhed in Folio, under the Title of *SOBORNA ULOSIENIA*, i. e. *Univerſal Right*, for the direction of the Judges.

Heretofore they proceeded thus: When there were no Evidences to prove the matter of Fact, the Defendant us'd to be ask'd by the Judges, Whether he would clear himſelf by Oath, or refer it to the Plaintiff's Oath? He that was to take the Oath, was admoniſhed three times, once a Week ſucceſſively, to take heed of what he was to ſwear to, the Salvation of his Soul being intereſted therein, and if he perſiſted after that in his Reſolution, the Oath was adminiſtred to him. After he had taken the Oath, tho' he ſpoke nothing but the Truth, he was look'd upon as an Infamous Perſon, and was not admitted to the Communion, till upon the point of Death; of late Years, they perform it with leſs Ceremonies; for they bring him who is to take the Oath, only before an Image, and after they have ask'd him, Whether he be willing to take the Oath? They give him a Crucifix to kiſs, and after that the Image; but they retain this, That he who has taken it, tho' the Oath be good, is not to receive the Communion in 3 Years after, and moſt People are very ſhie of his Company; which is the reaſon the *Muſcovites* are very unwilling to come to it; tho' in their common Converſation and Dealings they ſwear at every word *Po Chriſtum*, i. e. *By Chriſt*. Perjury is puniſh'd with a ſevere Whipping and Baniſhment. Foreigners are allow'd to take the Oaths according to their own Religion.

Their manner of taking the Oath.

Their Tortures by which they extort the truth from People are very cruel; and among theſe the *Strapado*, the worſt of all: They ſuſpend the Malefactor, with his Hands ty'd behind him, in the Air, having a great Beam faſtened croſs his Feet, upon which the Executioner gets ever and anon, to further the Diſlocation of the Joints, whilſt a Fire is made below his Feet, the Smoak of which almoſt ſtifles the poor Wretch. Sometimes they pour cold Water upon the Crown of his Head, which is ſhaved before in to the Bargain, and give him a ſevere Whipping, whilſt he is thus hanging, and lay a hot Iron to the Stripes. 1636.

All ſorts of Murther or Manſlaughter, without a neceſſity of Self-defence is puniſh'd by ſevering the Head from the Body, after the Priſoner has been kept 6 Weeks with Bread and Water. In ordinary Quarrels, he that gives the firſt Blow is caſt. Their Puniſhments.

Thieves they whip from the Caſtle-Gate, through the Market-place (after they have tortur'd them to confeſs their Accomplices) and then cut off an Ear, and the Offender is committed to Priſon for 2 Years. The ſecond time they undergo the ſame Puniſhment, and afterwards are Baniſh'd into *Siberia*: The Concealers and Abettors are puniſh'd with the ſame Severity.

Their ordinary Puniſhments are, ſlitting the Noſtrils, Whipping, and the *Piſtroki*; the laſt is not infamous, being uſed frequently by Maſters of Families, to their Slaves and Children. Their ordinary Puniſhments.

Thoſe who are to be Chaſtiſed, are ſtrip'd to their Shirts, keeping only their Drawers on, and being laid upon the Belly, 2 Men get a-croſs, one upon the Neck, the other upon the Feet; and thus with a little Wand or Switch, beat their Backs, like as the Fellmongers beat their Furs: Thoſe who have taken Tobacco, eſpecially in Snuff, have their Noſtrils ſlit.

Their Whipping is very barbarous; we ſaw 8 Men and 1 Woman Whipt *September* 24. 1634. for ſelling *Aqua Vitæ* and Tobacco. Being ſtrip'd ſtark naked to the Waſte, the Executioner's Man Hors'd them one after another, with their Feet ty'd together, the Cord of which paſſing betwixt the Legs of him that held them, was kept ſo ſtreight by another Fellow, that they were not able to ſtir, the Executioner with a Bulls-pizzle, having 3 Straps of untann'd Elks-skins, and the end lay'd on their Backs with all his Strength, the Blood guſhing out on all ſides at every Laſh. The Men had 25 or 26, and the Woman 16 Lathes, the laſt fell into a Swoon. After this they were ty'd 2 and 2 together, and Whip'd through the City for half a League, and then diſmiſs'd. This Puniſhment is ſo ſevere, that many die of it; to cure their ſliced Backs, they wrap themſelves in the Skin of a Sheep newly kill'd. Their Whipping.

Theſe Puniſhments were formerly not reputed infamous, no more than the Executioners Office, which was purchaſed at a good rate, but ſince the *Muſcovites* have been better inſtructed by the Converſation of Foreigners, this Office muſt continue in one Family, and if that fails, the Butchers are obliged to ſupply his place with one of their Fraternity. But the moſt rigorous of all theſe Puniſhments is inflicted upon Debtors, who, if they don't ſatisfie their Creditors according to the time preſcribed in the Bond, they are committed to a Serjeants Houſe, having in the mean time a certain time allow'd them to make ſatisfaction; which if they fail of, they are committed to Priſon, and from thence brought every Day to a certain place before the Chancery, where the Executioner for an Hour together, beats their Shin-bones with a Wand of the bigneſs of a little Finger; and this is repeated every Day, till the Debt be ſatisfy'd, without the leaſt reſpect of Sex, Quality, or Condition. Sometimes the Executioner is prevail'd upon by a Bribe, not to ſtrike very hard, or connives at their putting a thin Iron-Plate within their Boots: If they have nothing left to pay their Debts, they muſt ſell themſelves, their Wives and Children to the Creditors.

If it were not for Baptiſm, and the external Profeſſion of the Chriſtian Religion, it might perhaps be call'd in queſtion, Whether they were really Chriſtians, tho' they pretend to be the only true Chriſtians in the World, becauſe they are Baptized; whereas others are only ſprinkled, as they call it; for which reaſon they re-baptize all their Proſelytes; they acknowledge the Old and New Teſtament to be the true Rule of their Religion, and uſe the Sacraments; they uſe the Tranſlation of the 70 Interpreters, which has been ſome Years ago Tranſlated and Printed in the *Ruſſian* Language.

The Religion of the *Muſcovites*.

They are permitted to read the whole Bible in their Houſes, but are only to make uſe of the New Teſtament, and certain Verſes, taken out of the Pſalms and Prophets at Church, for fear of prophaning it by ſome immodeſt

1636. immodeſt Paſſages in the Old Teſtament. St. *Cyril*, Biſhop of *Jeruſalem*, who lived under *Theodoſius* (and muſt not be confounded with *Cyril* of *Alexandria*) is in great eſteem among them: Next to him are *John Damaſcene*, St. *Gregory Nazianzene*, St. *John Chryſoſtome*, and *Ephraim* Deacon of the Church of *Edeſſa* in *Syria*; they alſo rely much upon the authority of a certain Doctor named *Nicholas Sudatworitz*, who has writ ſeveral pieces in Divinity: His Memory is in ſuch Veneration with them, that they built a particular Chappel for his Image, and put lighted Wax-candles before it; both which were deſtroy'd by Fire.

They profeſs, according to *Athanaſius* his Creed, *God the Father* to be the Creator of the World; *God the Son*, the Saviour and Redeemer of all Mankind; and the *Holy Ghoſt*, the Sanctifier of all the Faithful.

But their Religion is overwhelmed with groſs Superſtitions, for they conſider the Virgin *Mary*, the *Evangeliſts*, the *Apoſtles*, nay, an innumerable company of Saints, not only as Interceſſors, but alſo as Co-operators, which makes them pay Divine Worſhip to their Images: Nay, the meaner ſort place the chiefeſt part of their Religious Worſhip in the Veneration they pay to theſe Images; and inſtruct their Children in nothing elſe but how to pay their Devotions before their Saints.

The only good Works (which they account meritorious) in vogue among them are, the building of Monaſteries, and Churches, and giving Alms; the reſt are not much valued here. They boaſt themſelves to be the true Progeny of the ancient *Greek* Church.

The Chriſtian Religion when introduced and planted in *Muſcovy*.

According to their Annals, the Chriſtian Religion was firſt planted here by St. *Andrew*, in the Apoſtles time, who leaving *Greece*, embark'd upon the *Boriſthenes*, and by the way of the Lake *Ladoga*, came to *Novogorod Veliki*; but that the ſame being rooted out by the *Tartars*, and other *Pagans*, who conquer'd *Muſcovy*; the ſame was revived by the Great Duke *Volodimir*, who having 989. gain'd many Victories over the neighbouring Infidels, rendred his Name ſo famous throughout the Eaſt, that *Baſilius* and *Conſtantinus Porphyrogennetes*, Emperors of *Conſtantinople*, ſent him a ſolemn Embaſſy, and ſeveral Biſhops and Prieſts along with them, who Inſtructed and Baptized both the Prince, and many of the People, according to the Rites of the *Greek* Religion. 1636.

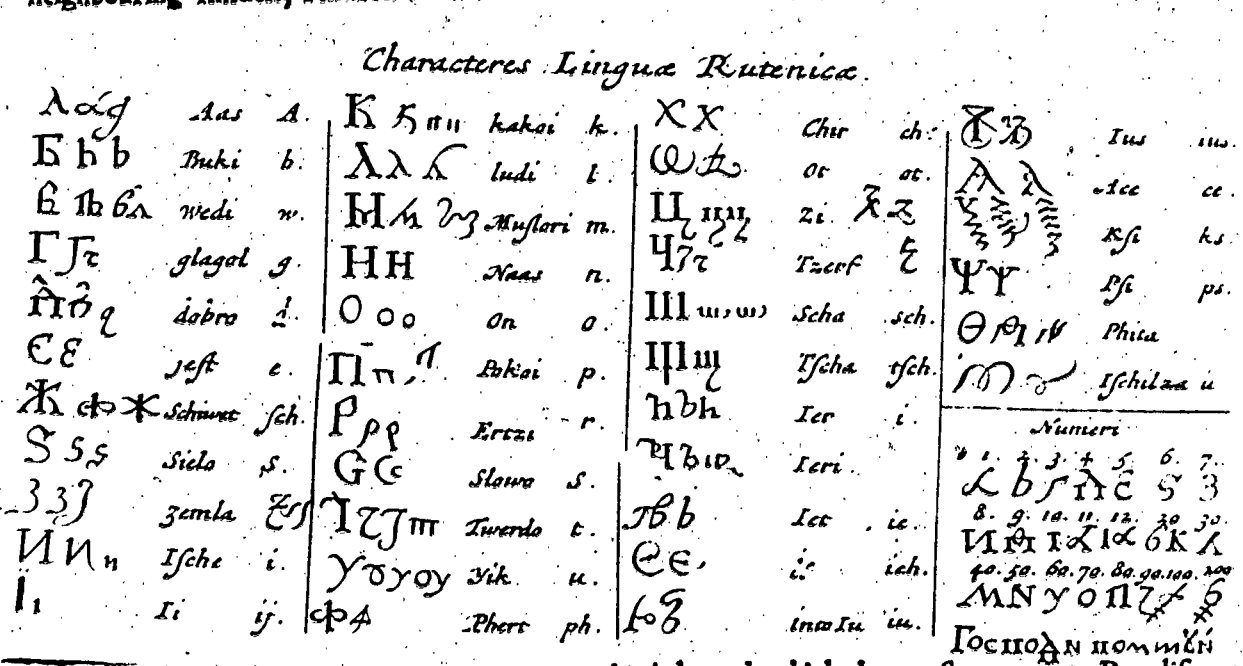
John Curopalates, who writ part of the *Byzantine* Hiſtory, adds, That the *Barbarians* not being able to comprehend the Miracles they ſpoke of, and challenged a Token from one of the Biſhops, he caſt the Bible into a Fire, where it remain'd untouch'd till the Fire was out, and being taken out, *Wolodimir* was ſo moved thereat, that he aboliſh'd Paganiſm in his Territories. This is alſo confirm'd by *Cedrenus* and *Zonaras*.

It is upon this Score, that the *Muſcovites* ſhow ſo much kindneſs to the *Greeks* upon all occaſions; I remember that when 1649. the Patriarch of *Jeruſalem* came to *Muſco*, to preſent the *Czar* with ſome Relicks, he was received with extraordinary reſpect, and had a Preſent of 100000 Ducats beſtow'd upon him, which however was taken from him by ſome *Turkiſh* Robbers in his return home.

The *Muſcovite* Religion being peculiar to that Empire, extends as far as its Dominions, unleſs it be that the *Tartars* inhabiting near the *Wolga*, and the *Caſpian* Sea, profeſs the *Mahometan* and *Pagan* Religion. There are ſcarce any, even among the Clergy, that can give any reaſon of their Belief, becauſe the Word of God is never preach'd among them; for which reaſon it is, that the Patriarch allows them not to enter into a diſpute with Foreigners; and I remember that a certain Monk, who had an Argument with a *Proteſtant* Miniſter at *Niſi-Novogorod*, was likely to have been caſt in Priſon, had he not ſaved himſelf with this excuſe, That the other had diſcovered to him ſome Inclination of embracing the *Muſcovite* Faith.

They have their Characters as well as their Religion from the *Greeks*, but have much altered and augmented them, as may be ſeen by the following Table.

Characteres Linguæ Rutenicæ.



These Characters they uſe both in Writing, and in their Books; their Language has nothing common with the *Greek*, but comes ſo near to the *Sclavonian* and *Poliſh*, that he that knows one, may underſtand the other.

Within theſe few Years a *Latin* and *Greek* School has been erected in *Muſco*; and as the *Muſcovites* don't want ingenuity, ſo, if it be continued, no queſtion, but ſome good may be expected from thence.

One of the Great Duke's Interpreters, a Native of *Denmark*, having tranſlated ſome *Latin* and *French* Books, the ſame were ſo well approved of, that there is no ſmall hopes, but that Perſons of Quality will by degrees apply themſelves to the Study of Foreign Languages.

Their Religious Exerciſes, conſiſting principally in Baptiſm, Reading in the Church, going to Maſs, praying to the Saints, paying their Reverences to the Images, Proceſſions, Pilgrimages, Faſting Days, Confeſſion and Communion, we will treat of each of them in particular.

Their Baptiſm.

As they acknowledge themſelves conceived and born in Sin, and that God has inſtituted Baptiſm for their Regeneration, ſo they look upon it not as the Door through which they muſt enter into Paradiſe, which is the reaſon they Baptize their Children immediately after they are Born, if they be weak, at home, (but not in the ſame Room where the Mother lies) but if well, in the Church. The Child is received at the Church Door by the Prieſt, who ſigning his Forehead with the Sign of the Croſs, ſays, *The Lord preſerve thy coming in, and thy going out*; and next faſtens 9 Wax-candles given him by the Godfathers, round the Font, ready lighted.

After having incenſed the Godfathers, and conſecrated the Water, he makes a Proceſſion with them, having each a Wax-candle in their Hands round the Font, which always ſtands in the midſt of the Church; this they do 3 times ſucceſſively, the Clerk carrying the Image of St. *John* before them, and the Prieſt reading out of a Book. This done, the Prieſt asks the Godfathers the Name of the Child, which they having given him in Writing, he puts it upon an Image which he holds upon the Childs Breaſt, whilſt he mutters out certain Prayers; and asks the Godfathers, Whether the Child believes in God the Father, the Son, and the Holy Ghoſt? Which ſaid, they turn their Backs immediately to the Font, to ſhew their averſion to the three

1636. three next enſuing Queſtions, which the Prieſt asks. *viz.* Whether the Child forſakes the Devil, his Angels, and his Works? And the Godfathers having anſwered to each Queſtion, Yes; and ſpit as often upon the Ground, they turn about again to the Font; where the Prieſt asks them, Whether they promiſe the Child ſhall be brought up in the true *Greek* Religion, and ſo Exorciſes him, laying his Hands upon the Child, ſaying: *Get out of this Child thou Unclean Spirit, and make room for the Holy Ghoſt*; and ſo blows upon the Child three times, croſs wiſe, to drive out the Devil, by whom they are of Opinion, Children are poſſeſs'd before Baptiſm; for which Reaſon alſo, they of late Years, as I have been inform'd, exorciſe the Child at the Church-door, becauſe the Devil, who leaves it, ſhould not prophane the Church. After this he cuts off a little of the Child's Hair, which he puts into a Book; and having ask'd the Godfathers, whether they deſired this Child to be baptized, he takes him ſtark naked into his Arms, and dipping him three times into the Water, with the ordinary Words of the Sacrament, *I baptize thee, in the Name of the Father, and of the Son, and of the Holy Ghoſt*, he puts a Corn of Salt into the Child's Mouth; and making the Sign of the Croſs on his Forehead, upon the Hands, the Breaſt, and the Back, with a certain conſecrated Oil, he puts a clean Shirt about him, ſaying, *Thou art as clean and as clear of thy Original Sin, as this Shirt*; and then hangs a ſmall Croſs of Gold, Silver, or Lead, according to every ones Ability, about his Neck, with a ſtrict Charge to wear it all his Life-time; in which they are ſo nice, that if they find no ſuch Croſs about the Perſon deceaſed, they will not allow Chriſtian Burial to the Carcaſe. He alſo aſſigns a peculiar Saint to the Child, whom he is to reverence hereafter as his Patron; and having kiſs'd the Child, and the Godfathers, exhorts them to mutual Love, but to take heed not to intermarry with one another. If more Children are to be baptized at the ſame time, the Font is empty'd as often as there are Children to be baptized, becauſe they look upon the Water as inquinated with the Original Sin of the preceeding Child. They will never heat this Water by the Fire, but only put it in ſome hot Place to make it a little warm.

Their Proſelytes, who are of Age, are baptized in ſome River or other, and plunged over Head and Ears, be it never ſo cold; and in the ſame manner they do with thoſe they call *Chaldeans*, who from the 18th of *Dec.* till Twelfth-tide, run about the Streets with Fire-works, in remembrance of *Shadrach*, *Meſhech*, and *Abednego*, who were caſt into the Fiery Furnace; who being all this while look'd upon as Pagans, muſt by Baptiſm be reconciled to the Church, which is therefore done on Twelfth-day, when the Vocation of the Gentiles happened. Theſe *Chaldeans* are upon the ſame account ſometimes rebaptized 10 or 12 times. Thoſe who are inclined to change their Religion for that of the *Muſcovites*, after they have received ſufficient Inſtructions for 6 Weeks in ſome Convent or other, are at their Baptiſm to abjure their former Religion, to deteſt it as Heretical; and, as a Sign of their Abhorrence, to ſpit on the Ground as often as it is named. After their Baptiſm, they are preſented from the Great Duke with, and clad in a rich *Muſcovian* Habit, and have a Penſion allow'd them according to their Quality.

This Encouragement makes the City of *Muſco* full of Apoſtates, not only of the vulgar ſort, but alſo of thoſe of better Quality, who for a little Subſiſtence-ſake change their Religion; as it happen'd in our time with the *Baron de Raymond*, Monſieur *Groyn*, a *French* Gentleman, Col. *Alexander Leſley*, and Count *Slakof*. This laſt came into *Holſtein* 1640. and afterwards into *Denmark*, where under Pretence of being deſcended from the ancient Houſe of *Slick* in *Bohemia*, (whereas he was a *Pole* by Birth of mean Parentage) and forced to fly his Native Country for the Proteſtant Religions-ſake, obtained Letters of Recommendation from his *Daniſh* Majeſty to the *Czar* of *Muſcovy*; which produced this good Effect, that the ſaid *Slakof* having inſinuated to the *Czar*, that he was come on purpoſe to ſerve him, and to embrace the *Muſcovite* Religion, he was ſo well received by the Patriarch, and the whole Court, in reſpect of his pretended Quality, that they procured him a Penſion of 200 Crowns *per* Month from the *Czar*, with the Quality of a *Knez*, and the Name of *Leo Alexander Slick*, at his Baptiſm. Col. *Leſley* did not immediately turn to their Religion, but having after his Return from *Sweden* into *Muſcovy*, obtain'd certain Mannors with a certain number of Peaſants belonging to them, near the *Wolga*, from the *Czar*, might have lived with a great deal of Plenty upon them, had not his Wife's niggardly Temper, who did not allow the Peaſants what was fitting, and would make them eat Fleſh on their Faſt-days, drawn the Complaints of her Vaſſals upon her Husband, who being accuſed thereof before the Great Duke, and finding no other way to ſave his Eſtate, than by turning *Muſcovite*, he, his Wife and Children were baptized; which however was not ſufficient to recover his Eſtate; for his Vaſſals preferr'd another Petition, which being back'd by one Monſieur *Groyn*, who had alſo lately abjur'd his Religion, and had a former Grant of theſe Lands, he was forced to be contented with a Penſion of 90 Crowns *per Menſem*, another ſomewhat leſs for his Son, and a Preſent of 6000 Crowns. 1636.

Apoſtates frequent in *Muſcovy*.

The Conſtancy of an *Engliſh* Gentlewoman.

And ſince we are treating of the Apoſtates in *Muſcovy*, the Conſtancy of a certain Gentlewoman, the Daughter of *William Barneſley*, ought not to be paſs'd by in ſilence.

This Gentlewoman who claim'd the Precedency for her Handſomneſs before all the other Strangers in *Muſco*, was married very young to the Baron *de Raymond*, who, as we told you before, changed his Religion. According to the Law of *Muſcovy*, the Wife being in this Point obliged to follow the Example of her Husband, he did all what he could to perſwade her to do it; but all proving ineffectual, he had recourſe to the *Czar*'s Authority, who, as well as the Patriarch, endeavoured to engage her into the ſame Opinions, by vaſt Promiſes; which ſhe was ſo far from hearkening to, that ſhe and her Father threw themſelves at the *Czar*'s Feet, begging that he would rather take away her Life, than force upon her a Religion contrary to her Conſcience. But the Patriarch kick'd the Father aſide, telling him, that ſhe being no more than a Child (for ſhe was but 15 Years old) was not ſenſible of what ſhe did, and that he muſt take Care of her Soul, and ſo order'd her to be dragg'd by ſome Religious Women to the next Brook; where, notwithſtanding all her Proteſtations, they plunged her into the Water, into which ſhe drew one of the Women after her, and ſpit in the Faces of thoſe who would have obliged her to abjure her Religion. She lived afterwards with her Husband at *Swatka* three Years, where he was Governor; who dying ſoon after his Return to *Muſco*, ſhe was forc'd into a Convent about 12 Lgs from *Muſco*, where ſhe was kept 5 Years without hearing any thing from her Friends, and two Sons, that were taken from her, except once, when a Letter was conveyed to her by help of a *German* Tyler that work'd there.

Then the Patriarch happening to die, his Succeſſor relieved her out of the Monaſtery, and allow'd her Liberty of Conſcience in her own Houſe, and to receive Viſits, but not to frequent Proteſtant Sermons. I have viſited this Lady ſeveral times, whilſt ſhe lived in this condition, and have heard that ſhe dy'd two Years ago firm and conſtant in her Religion. Her Father not long ſince died in *England*, being 126 Years of Age, after he had married a ſecond Wife at 100.

Their Feſtivals and Feaſts.

Their Feſtivals and Feaſts are appointed on certain Days. At the time of our firſt Embaſſy, they uſed to open their Shops, and follow their ordinary Employments on the Holy-days in the Afternoon; but the preſent Patriarch has order'd them to be ſo ſtrictly obſerved, that now they muſt ſhut up their Shops on *Wedneſdays* and *Fridays* (being their ordinary Faſt-days) as well as on *Sundays*, and that no ſtrong Liquors ſhall be ſold in Service-time. They have beſides *Sunday* 13 Set-Feſtivals, which according to the beginning of their Year *September* 1ſt, ſtand in the following Order.

(1.) The Nativity of the Bleſſed Mother of God, *September* the 8th.
(2.) The Exaltation of the Croſs, *September* the 14th.
(3.) The Oblation of the Bleſſed Mother of God, *November* the 21ſt.
(4.) The Nativity of our Lord, *December* the 25th.
(5.) The Epiphany, *January* the 6th.
(6.) *Candlemas*-day, *February* the 2d.
(7.) The Annunciation of our Lady, *March* the 25th.
(8.) *Palm*-Sunday.
(9.) *Eaſter*-day.
(10.) The Aſcenſion of Chriſt.
(11.) *Pentecoſt*, or the Sending of the Holy Ghoſt.

1636. (12.) The Manifeſtation of the Glory of *Jeſus Chriſt* upon the Mountain, *Auguſt* the 6th.

(13.) The Aſcenſion, or the Aſſumption of the Mother of God, *Auguſt* the 15th.

The Feaſt of the *Trinity* they celebrate the next Day after *Pentecoſt*, and that of *All Saints* upon the following *Sunday*.

Every Day in the Year is dedicated to ſome peculiar Saint or other, ſometimes to two or three; but theſe are only celebrated by certain Offices, the Eccleſiaſticks ſay on thoſe Days. They have a perpetual Almanack, according to the Old Stile, which ſhews them all the Feaſts both moveable and unmoveable. They go thrice to Church every *Sunday* and Holy-day, in the Morning before Day to the *Matins*, which they call *Saſtarim*, at Noon to the *Obedny*, and in the Evening to the *Wadjuemi* or *Veſpers*.

Their whole Service conſiſts in reading of certain Chapters out of the Bible, Pſalms, and St. *Athanaſius*'s Creed; and ſometimes they read alſo a Homily of St. *Chryſoſtom*, and certain Prayers, which they ſing much after the ſame manner, as the *Antiphona*'s once ſung, repeating frequently the *Goſpodi Pomitui*, *Lord have Mercy upon me*, which the People ſing after them, making the Sign of the Croſs.

After this, the Prieſt goes up to the Altar, attended by the Clerk, where he ſays the Office according to St. *Baſil*'s Liturgy. He pours Wine and Water into the Chalice, with ſome little Bits of Bread, conſecrates them; and after having ſaid certain Prayers over it, he takes the Bread out with a Spoon, which he gives not to any other, unleſs a ſick Child be brought, to whom he gives the Communion. If the Prieſt has known his Wife that Day, he muſt not approach the Altar, but another officiates in his ſtead. The People ſtand all the Service-time, making continually their Reverences to the Images with the uſual *Goſpodi Pomitui*, or *the Lord have Mercy upon me*.

They never make any Explications upon the Text of the Scripture, from whence they ſay, ariſe Schiſms and Hereſies in the Church. I remember that 5 Years ſince the *Protopope* of *Merum* was baniſhed into *Siberia* by the Patriarch, for attempting it. They have however a certain Book, containing ſome Interpretations of the Hiſtories of the Goſpel; but they are intermix'd with ſuch frivolous Relations, and impertinent Circumſtances, that they rather ſerve to encourage, than to ſuppreſs Vice.

The *Daniſh* Ambaſſador, I had occaſion to mention before, gives us a very odd Inſtance of this kind, in his *Priſtaff*, a Man pretty well advanced in Years, who diſcourſing of *Mary Magdalene*, ſaid, that ſhe being a profeſs'd Courtezan, no queſtion but ſhe offended God very often; but meeting one Day with a Man upon the Road, who ask'd her the ſame Kindneſs, ſhe refuſed him, till ſuch time as he deſiring her to grant his Requeſt for God's ſake, ſhe conſented; and that by doing that for God's ſake which ſhe had denied before, this Act became ſo meritorious, as that it not only did expiate all her other Sins, but alſo got her a Place with red Letters in the Book of Saints. In the ſame manner, and with the ſame abominable Circumſtances, they adulterate moſt of the Evangelical Hiſtories.

They all appear bare-headed at Church, not excepting the *Czar* himſelf; yet the Prieſts keep on their Caps, which they receive at their Conſecration. As often as they bow to their Images, they make the Croſs with three Fingers of the right Hand, ſignifying the Trinity; theſe they put firſt to the Forehead, to put them in mind of Chriſt's Aſcenſion; next to the Breaſt, intimating that they ſhould love God with all their Heart; and laſtly from the right Shoulder to the left, to put them in mind of the Day of Judgment, when God will place the Righteous to the right, and the Wicked to the left.

Concerning their Images, they confeſs that they were not uſed, or at leaſt not adored in the Primitive Church, before the Time of *Conſtantine* the Great; but alledge, that in this Point they follow the Opinion of *John Damaſcene*; tho', in all probability, they have them from the *Greek* Church, which as well as theſe don't allow any Carved or Graved Image, becauſe theſe are forbidden in the Decalogue; but have Images painted with Oil upon Wood, wretchedly done, of about 4 Foot broad, and ſomething more in heighth: Theſe muſt be made by one of their own Religion. In former Times they obliged Strangers to keep them in their Houſes for their *Muſcovite* Servants ſake; but this Cuſtom is aboliſhed, becauſe they ſhould not prophane their Saints; and they are now become ſo nice in this Point, that ſome of the Peaſants where we lodged, did purifie them by Incenſe after we were gone. Theſe Images, of which the Walls of their Churches are full, commonly repreſent either our *Saviour*, the Virgin *Mary*, or St. *Nicholas*, the Patron of *Muſcovy*. 1636.

Perſons of Quality adorn the Images in their Houſes with Pearls and precious Stones, before whom they put Wax-Candles, and look ſtedfaſtly upon them as long as they are ſaying their Prayers. For, whenever a *Muſcovite* comes into a Houſe, before he utters one Word, he looks for the Saint; and if he ſees him not, asks, *Where is the God?* When he has found him, he makes his Reverence to him, pronouncing the *Goſpodi Pomitui*, then he goes to the Company. They are ſo much bigotted to their Images, that they don't ſtick to attribute to them the Virtue of performing Miracles.

Of this we ſaw an Example 1643. when an old Image turning ſomewhat red, the Patriarch was upon the Point of iſſuing his Orders for an extraordinary Faſt to be kept throughout the Empire, had not the Painters, who were adviſed in the Matter aſſured them, that the whole Miracle proceeded only from the Paint being worn off of the Wood, which made its natural Colour, which was red, appear. The *Muſcovite* Prieſts have alſo learnt the Art of making their Saints do Miracles, two of which had the Misfortune to be but indifferently rewarded for their Pains at *Archangel*; for having got together a good Summ of Money by their Impoſtures, they fell out about dividing the Spoil, and upbraided one another ſo publickly, that the Magiſtrate took cognizance of the Matter, and ordered them a good Whipping of 30 Laſhes each.

When the *Swedes* had taken *Novogorod*, and finding little worth taking in the *Muſcovites* Houſes, they ſeized upon their Images, which they redeem'd at a very good rate.

I remember, that a certain Woman at *Ladoga* where I lodged, would never give her Child, which could ſcarce ſtand or ſpeak, its Breakfaſt, till it had made nine Bows before the Saint, and as often ſaid the *Goſpodi* as well as it could. There are indeed ſome among the *Muſcovites*, who are not ſo much blinded with Ignorance, as not to diſcover the Vanity of theſe things.

We met with a certain *Ruſſian* at *Narva*, who told us plainly, that he look'd upon theſe Images, as well as the Faſtings, as meer Impoſitions; that he indeed ſuffered Images in his Houſe, in remembrance of their good Actions, as other People did the Pictures of Princes, and other famous Men; but that he did not expect his Salvation from Colours, and that he thought Praying was the beſt Mortification.

Being ask'd by the Ambaſſadors, why he did not inſpire the ſame Sentiments into his Countrymen? His Anſwer was, that it was not his Calling; and that being look'd upon already as a Heretick, he ſhould not prevail; in which Point he was not altogether miſtaken: For a *Protopope* of *Caſanskoy* inveighing in our Time againſt the Idolatrous Worſhip of Images, the Patriarch degraded him, and ſhut him up in a Monaſtery.

When the Images of their Saints begin to rot, they don't caſt them away, but either throw them in a River, or bury them in a Church-yard, or any other Garden. It is not to be imagined, that the *Muſcovite* Saints ſhould be deſtitute of Miracles.

Among the reſt, they have one named *Sudatworitz Philip Metropolite*, famous for the many Remonſtances he made to the Tyrant *Juan Baſilowitz*, who firſt ſhut him up into a Monaſtery; but he not deſiſting, the *Czar* ſent one of his Servants, who ſtruck him with a Knife to the Heart. The Monks of the ſame Convent put him in the Catalogue of the Holy Martyrs, and got his Body to be buried in the Iſland of *Solofka*, near *Archangel*, where they pretend he has done many Miracles: And the preſent Patriarch prevail'd with the *Czar* to have it tranſlated from thence to *Muſco*, where it was placed in the great Church of the Caſtle; and if you will believe the *Muſcovites*, did at firſt cure the Deaf, the Lame, the Blind, *&c.* but of late, by reaſon of the Incredulity of the People, as they ſay, the Vertue has left this Saints Body, which they affirm to be intire to this Day; but at the ſame time it is forbidden to lift up the Cloth that covers it, under Pain of Death.

They alſo celebrate the Memory of another Saint, named *Sergius*, who being a Soldier by Profeſſion, and very debauched in his Youth, turn'd Hermite, and at laſt

1636. laſt got into the Monaſtery of *Troitza*, where being ſoon after made Abbot, he wrought ſuch Miracles, that 1563. he was canonized after his Death. They ſay that his Head remains intire to this Day, and that it forc'd the *Poles* back in an Aſſault they made upon the Place.

The Monaſtery is by the Liberality of the Pilgrims grown ſo rich, that it maintains 300 Monks. The Great Duke, who goes thither on Pilgrimage twice every Year, alights from his Horſe half a Lg from the Convent, and walks the reſt of the way on Foot.

It is not many Years ſince they found an Image of the *Virgin Mary* at *Caſan*; which being ſent from thence to *Muſco*, it was placed in a Church in the Market-Place, built for that purpoſe, and named *The Holy Mother of Caſan*, whither they go on Pilgrimage, as they do likewiſe to the Sepulchre of a certain Saint, call'd *Warlam*, in the Convent of *Chutina*, not far from *Novogorod*.

Their Churches. Thoſe of their Churches which are built of Stone, are round and vaulted, becauſe God's Houſe, ſay they, ought to reſemble the Heavens: They have neither Benches nor Seats, nor any Organs, or other Muſical Inſtruments; and the preſent Patriarch is ſo profeſs'd an Enemy of Muſick, that he has forbidden the Uſe of it even in Private Houſes (thoſe of Strangers excepted) and cauſed five Waggons full of them to be burnt. Each Church has on the top in the midſt of four Turrets, a kind of a Tower form'd like the Knobs we ſet on our Bed-ſteads, with a Triple-Croſs on the top of it; which being, as they ſay, the Badge of Chriſtianity, the Church of Chriſt ought thereby to be diſtinguiſhed from the reſt. If any that are not of their own Communion enter their Churches, they look upon them as prophaned. At the time of our firſt Embaſſy, ſome of our People got into one of them, but they were thruſt out by the *Muſcovites*, who ſwept after them. If a Dog chances to get into a Church, they not only ſweep it, but purifie it with Incenſe; neither will they allow any Body to make Water in their Church-yards.

Their Bells are not hung in the Steeples, but in a certain Engine built for that purpoſe near the Church: They are commonly but ſmall, ſeldom exceeding 150 or 200 Pound. They toll them at the beginning of Service, and the Elevation of the Chalice; which is done but once, becauſe they put the Bread into it, immediately after the Conſecration. The Rope is faſten'd to the Clapper, ſo that one Man may manage 4 Bells at once, if the Ropes be faſten'd to both his Elbows and Hands.

The *Muſcovites* are much taken with this kind of Chiming, which when the Bells are moved together in ſo many Churches, makes a ſtrange confuſed Noiſe.

No Church is ſo ſmall, but it has an Image over the Door; nay, on each Corner of the Street, and the very Gates of the City, are beſet with Images, which the *Muſcovites* reverence as they paſs by, as well as the Croſſes on the Churches; not forgetting to ſay their *Goſpodi*.

The Hierarchy of the *Muſcovite* Church conſiſts firſt of a Patriarch, ſeveral Metropolitans, Archbiſhops, a Biſhop, Arch-Deacons, *Protopopes*, and *Popals*, or Prieſts. The Patriarch has the ſame Authority in the *Muſcovite* Church, as the Pope has in the *Latin*.

The Patriarch of *Conſtantinople* uſed to have the Nomination of him, which in time came only to a Confirmation; and this alſo he has loſt, *Filaretes Nikitis*, the late Great Duke's Father, being the laſt who received the ſaid Confirmation. Since that time he is choſen by the Prelates, who meeting in the Church of the Caſtle, call'd *Saborn*, named two or three Prelates, ſuch as are reputed the beſt qualify'd for ſo high a Station, by their good Life and Learning; theſe they preſent to the Great Duke, who in concert with them proceeds to the Election; but if the Competitors happen to be of ſuch Eminency, that they are at a ſtand who to pitch upon, the Election is decided by Lot; which was done with the laſt Patriarch, who was drawn three times ſucceſſively by Lot. His Name is *Nicon*, he was formerly Metropolitan of *Roſton* and *Jacoſlou*, being much admired for his good Houſe-keeping, and pleaſant Diſpoſition.

Their Eccleſiaſtical Government. The Patriarch of *Muſcovy* may be ſaid to have a Share in the Sovereignty of that Empire: For he is not only the Supreme Judge of all Eccleſiaſtical Cauſes, and what concerns Religion, but alſo has a Power to reform whatever he thinks prejudicial to good Manners, by his own Authority; which the *Czar* always orders to be put in Execution, without the leaſt Conteſtation. 1636.

He has under him 4 Metropolitans, 7 Archbiſhops, and 1 Biſhop. The Metropolitans are thoſe of

Novogodorski and *Wolikoluskoi*, who lives at *Novogorod*.
Of *Roſtoufskoi* and *Jaroſlauskoi*, at *Roſtof*.
Of *Caſanskoi* and *Swiatskoi*, at *Caſan*. And that of *Sarskoi*, and *Pandoskoi*, within the Caſtle of *Muſco*.

The Archbiſhops are, thoſe of

Wolodskoi, and *Weliko Premskoi*, who lives at *Wolodga*.
Of *Reſanskoi*, and *Moromskoi*, at *Raſan*.
Of *Sudalskoi*, and *Torruskoi*, at *Suſdal*.
Of *Twerskoi*, and *Caſſinskoi*, at *Twere*.
Of *Sibirskoi*, and *Tobolskoi*, at *Toboleska*.
Of *Aſtracanskoi*, and *Terskoi*, at *Aſtracan*.
Of *Pleskouskoi*, and *Sborskoi*, at *Pleſcou*.

There is but one Biſhop, *viz.* of *Comenskoi* and *Caſſieskoi*, who reſides at *Columna*. The Patriarch is always attended by an Arch-Deacon, who is his Vicar-General; he has alſo a *Proto Deacon* reſiding in the Caſtle of *Saborn*: The reſt of the Clergy are divided into *Proto-Popes*, *Popes*, or Prieſts and Deacons. Their Monaſteries are govern'd by *Archimandrites*, *Kilari's* and *Igument's*, *i. e.* Abbots, Priors, and Guardians.

The *Muſcovite* Prelates marry not. The Prelates of *Muſcovy* are obliged to make a Vow of Chaſtity whilſt they continue in that Dignity. Neither are they to wear any Rings on their Fingers, or Drawers, or Shirts of Linen-cloth, but they muſt be of Flanel.

The Habits of the Eccleſiaſticks. The Habit of the Prelates as well as of the Monks, is a black Caſſock, over which they wear a kind of a Robe, not unlike thoſe of the other *Muſcovites*, but likewiſe black. Their Hoods are near an Ell and an half Diameter, unto which is faſten'd in the midſt a round Piece of Stuff of the bigneſs of a large Trencher, which hangs down on the hinder part of the Head. When they walk abroad, they wear a Staff forked at the end, which they call a *Poſok*, and ſerves inſtead of a Croſier.

From the number of their Churches at *Muſco*, it may eaſily be conceived what a vaſt reſort of Prieſts there is to that City, the leaſt of theſe Churches having 3 or 4, or more Prieſts belonging to it. They obtain their Prieſthood at a very eaſie rate; for they only addreſs themſelves to the Patriarch, or any one of the Metropolitans, who, after he has examin'd them, whether they can read, write, and ſing in the Church, he beſtows the Holy Orders upon them, and gives them a Certificate for that purpoſe. At their Conſecration, they are habited, as we mention'd before, have the Hair on the Crown of their Heads cut off, and a *Calotte* put over it, the only Character of Prieſthood, which they never take off, but when they cut their Hair; and if any one that fights with a Prieſt ſhould ſtrike off this *Calotte*, he is ſeverely fin'd; for which reaſon he that is engag'd with a Prieſt, muſt take off his *Callot* firſt, and after he has bang'd him ſoundly, put it on again without any great prejudice to himſelf.

Their Prieſts obliged to marry. As the *Protopopes*, and *Popes* or Prieſts, are obliged to marry once, ſo they are abſolutely forbidden to marry a ſecond or third time, unleſs they quit the Holy Orders. This Opinion they found upon the Apoſtle's Words: *A Biſhop ſhall be the Husband of one Wife*; 1 Tim. 3. where they interpret the Word Biſhop, in relation to Prieſt, and that he muſt be the Husband of one Wife; which is one of the main Points in queſtion betwixt them and the *Greeks*, as well as the *Roman* Church, which allow not the Marriages of Prieſts. The *Muſcovites* alledging in their behalf the 4th Canon of the Council of *Gangres* in *Paphlagonia*, not long after that of *Nice*, which anathematizes thoſe who won't receive the Communion from the Hands of a married Prieſt. The *Muſcovites* are ſo nice in this Point, that they always marry before they take Orders; and are of Opinion, it muſt be a Maid, and no Widow, or a Woman of an ill Reputation; and if a Prieſt happen to find himſelf deceived the firſt Night, he muſt either quit his Wife, or the Prieſthood. A Prieſt who has known his Wife, muſt not approach the Altar the next day; and as ſoon as he is a Widower, he may be preſent at the Matins and Veſpers, but not at the Noon-Service, when the Sacrament is to be adminiſtred; neither can they give their Benedictions to Marriages. If they are diſpleaſed with a ſingle Life, they

1636. they may lay by their *Callotte* and Marry again; and if they are too Old for that, they commonly retire to a Monastery, where they end their Days.

Their Monasteries. Of these Monasteries, both for Men and Women, there are great numbers all over *Muscovy*, who generally follow the Rule of Great St. *Basil*. Heretofore those who embraced the Monastick Life of their own accord, made all their Estates over to the Monasteries, which Extravagancy prevail'd so far, that the Monks would soon have been Masters of the best part of the Country, had not a stop been put to it; yet are they now permitted to carry some part of their Estates along with them. They have their set Hours for Prayers, which they say by Beads. They lead a very Austere Life, eating no Flesh or fresh Fish, and drinking no Wine, nor *Aqua Vitæ*, or Mead; but live upon Salt-fish, Honey, Milk, Cheese, Herbs and Pulse; and drink nothing but *Quaz*. However when they are out of the Convent, they don't keep so strict to these Rules, but that they will eat of the best they can get, and drink so plentifully of strong Liquor, that they are glad to be carried home. Their Learning is like that of the other *Muscovites*, never extends beyond Reading and Writing. Few can say the Lord's Prayer, and much fewer the Creed and the Ten Commandments. They have also a kind of *Hermits*, call'd *Anchorites*, who build little Chappels on the Highways, and live upon the Alms given them by Travelers.

How the Monks live.

Their Fasts. Their ordinary Fast-days are *Wednesdays* and *Fridays*, when they abstain not only from all kind of Flesh, but also from Eggs and Milk; nay, some of the more Devout will not use Sugar, because it is refined with Eggs.

Besides these two Days Weekly, and the Eves of great Festivals, they Fast 7 Weeks in *Lent*; being allow'd in the first (which is their *Carnaval*) to eat Butter, Milk and Eggs: The next Week they live upon Honey, Pulse, and Herbs, and drinking nothing but *Quaz*, by way of Expiation for the Debaucheries and Insolencies they have committed in the first. The other 5 Weeks they live temperately, eating nothing but Fish, except on *Sundays*.

Their second *Lent* begins 8 Days after *Whitsuntide*, and lasts till St. *Peter's-Tide*.

The third is from *August* 1st. to the 16th.

And the fourth from *November* the 12th. till *Christmas*.

As most of the *Muscovites* are strict observers of their *Lent*, or Fasting times, so on the other hand, they rarely eat Fish on *Sundays* or Holidays out of *Lent*; in which they follow the Rule of St. *Clement*, mentioned in the Times of the Councils, printed at *Venice*; which says, That an Ecclesiastick who Fasts on *Saturday* or *Sunday*, is to be degraded, and if a Layman, he is to be Excommunicated. They are likewise forbid to abstain from their Wives, during *Lent*.

Their Confession. As soon as a *Muscovite* is come to Years of Discretion, he goes to Confession, which they always do before Communion, which is generally done by extraordinary Preparations and Mortifications, for a whole Week; during which they eat scarce any thing but a kind of Bisket, and drink *Quaz* and fair Water. Their Confession they make standing before an Image, on which they keep their Eyes fixt as long as the Confession lasts, in which they make a particular recital of all their Sins, and having express'd their Remorse, and promised Amendment, the Priest, who gives them the Absolution, enjoyns them certain Penances; as for instance, to say the *Gospodi* so many times, to make a certain number of Bows before the Images, to abstain from Women, standing at the Church Door, and such like: If the Offence be extraordinary, they must use the Holy Water, which being consecrated on *Twelfth-day*, on purpose to cleanse Offenders from their Sins, the Priest sells some for Money.

Their Communion. They commonly receive the Communion upon *Easter-Eve*, and never but upon a Fast-day; for if any one should Communicate on Sunday, he is obliged not to eat Flesh that Day. They receive it in both kinds, their Wine is mixt with Water, into which they put a Morsel of Bread, and taking it out with some Wine, with a Spoon, give it to the Communicant. Their Bread, which is leavened, must be made by a Priests Widow: This Communion-Bread is about the thickness of a Crown-piece, and twice as big, having in the middle a Crucifix.

After it is Consecrated, the Priest takes off that Figure with an Iron like a Launcet, which he puts up in a close Wooden Box; of this they take a little, and pour a few Drops of red Wine and Water upon it, which is administred to Sick Persons with a Spoon; but if they are very weak, they give them only a little consecrated Wine. In the ordinary Administration of the Sacrament; they make use of consecrated Bread of the same form, but not bigger than half a Crown. 1636.

After they have taken off the Crucifix as before, they break it into as many pieces as there are Communicants, put them into some red Wine, mixt with warm Water. They believe Transubstantiation. The Priest at the Administration of the Sacrament, says these Words.

This is the true Body and the true Blood of our Lord Jesus Christ, which hath been given for thee, and for many more, for the Remission of thy Sins, which thou shalt take in remembrance of him.

Some go to Sleep immediately after Communion, that they may not sin again that Day. What remains of the Bread after Consecration, they call *Kutja*, of which the Priest gives a Morsel to each of those who have Communicated the time before.

They give the Sacrament to the youngest Child, that is, if it be Sick; but only in one kind, till it be 7 Years old; when, as they say, it begins to sin Mortally, and therefore Communicate it like the rest.

They don't deny the Communion even to Distracted People, with this difference however, that they only touch their Lips with the Bread, that has lain in Wine.

If a Priest has been at an Interment, or by chance touch'd a dead Corps, he can neither Consecrate nor Administer the Sacrament that Day. Nor must a Childbed Woman Communicate in the same Room where she is brought to Bed, but must be carried into another and washed.

Heretofore they used to send the Consecrated Bread to far distant places, where they had no Priests; nay, they used to give it to Travellers and others, who were to confess to their Saints, and take it upon extraordinary occasions of danger, or otherwise: But this is of late Years abolished in *Muscovy*; tho' the same has been mentioned both by St. *Cyprian* and *Tertullian*.

Such as have taken Oaths in Law Suits, are debarr'd from the use of the Sacrament for 3 Years; and those who are guilty of Murder, or any other hainous Crime, are not admitted to it, but at the point of Death. The last Unction is administred to sick Persons after the Communion; after which, they will not permit them to take any thing either of Medicine or Nourishment, unless there be very apparent Signs of their Recovery. They also commonly give to the Sick before Communion, a little fair Water, or *Aqua Vitæ*, wherein some Relicks have been put.

Some in that Condition, are so devout, as to have themselves shaved, and put on Monks Habit; which if they do, they are obliged to abstain from any thing for the next ensuing 8 Days, and if they recover, to perform their Vow; there being no retracting after the Razor has once pass'd upon their Heads.

Their Burials. Their Burials, as indeed all their other publick Actions, are perform'd with a great deal of Ceremony. For so soon as the Sick Person is departed, the Kindred and Friends are sent for by the Widow, who standing round the Corps, break out into Lamentations, asking the Deceased ever and anon, Why he would Die? Whether he wanted any thing? Whether his Wife were not Young and Handsom enough? Whether she had been Inconstant? Then they go to Washing the Body, and having put a clean Shirt or Shrowd about him, with a new pair of thin Shooes of *Russia* Leather on his Feet, they lay him with the Arms across his Breast in a Coffin, which is made of the Trunk of a Tree, not forgetting in the mean while to send a Present to the Priest to pray for his Soul. The Coffin is covered with a piece of Cloath, or perhaps with a Coat of the Deceased; the richer sort keep their Corps 8 or 10 Days (if the Season will permit it) during which time the Priest comes every Day to purifie it by Incense and sprinkling Holy Water upon it.

Their Interments are perform'd thus: The Priest precedes with the Image of the Patron Saint of the Deceased; he is follow'd by 4 Virgins the next of Kin to the Deceased, who make very mournful Lamentations, beginning and leaving off exactly at a time. Then comes the Body carried by 6 Men upon their Shoulders

1636. ders (if it be a Monk or Nun, thoſe of their own Profeſſion do them this Office) ſurrounded by ſeveral Prieſts who incenſe it, to keep off the Evil Spirits, ſinging Pſalms all this while; after the Corps come the Kindred and Friends with Wax-candles, but without any Order. Being come to the Grave, the Coffin is uncovered, over which the Prieſt holding the Image, he ſays certain Prayers, in which theſe Words are often repeated: *Lord look upon this Soul in Righteouſneſs:* The Widow in the mean while continuing her Lamentations, and asking the ſame Queſtions we mentioned before.

Then the Friends and Kindred take their leave, either kiſſing the Deceaſed or the Coffin, which done the Prieſt puts a piece of Paper betwixt his Fingers, being a kind of Paſs for the other World, which being Sign'd by the Patriarch, or Metropolitan of the place, and the Confeſſor, is ſold for more or leſs according to the Abilities of thoſe who purchaſe them: It runs thus.

WE, whoſe Names are hereunto ſubſcribed, the Patriarch, or Metropolitan, and Prieſt of the City of N. *do make known and Certifie, by theſe Preſents, That the Bearer of theſe our Letters hath always lived among us like a good Chriſtian, profeſſing the* Greek *Religion; and though he hath committed ſome ſins, yet that he hath confeſſed the ſame, and that thereupon he hath received Abſolution, and taken the Communion, for the Remiſſion of his Sins: That he hath honoured God and his Saints: That he hath ſaid his Prayers, and that he hath Faſted on the Hours and Days appointed by the Church, and that he hath carried himſelf ſo well towards me who am his Confeſſor, that I have no reaſon to complain of him, or to deny him the Abſolution of his Sins.*

In Witneſs whereof, we have given him this preſent Teſtimonial, to the end, that upon ſight thereof, St. Peter *may open unto him the Gate of Eternal Bliſs.*

Then the Coffin is ſhut up, and put into the Grave, the Face of the Deceaſed being turn'd to the Eaſt. Thoſe who have accompany'd the Corps thither, after their Devotions paid to the Images, return to the Mourning Houſe, where they drown their Sorrows in good Liquor. 1636.

Their whole time of Mourning laſts 40 Days, in which they make 3 Feaſts for the Kindred, *viz.* the 3d, the 9th, and 20th Day after the Burial. During this time the Prieſt ſays certain Prayers every Morning and Evening over the Grave, which for that purpoſe are cover'd with ſmall Huts of Mats: For tho' the *Muſcovites* don't believe a *Purgatory*, yet they do allow 2 places for the Souls to dwell in till the Day of Judgment; ſome in a pleaſant place among the Company of Angels, the reſt in a dark Valley, having the Converſation of Devils; and that the laſt may be delivered from thence, by the Prayers of Prieſts and Monks; ſuch as are able to give plentiful Alms, during thoſe 40 Days, a thing much uſed among the *Muſcovites*, who inriching themſelves by any means, believe that their Sins may be expiated by Alms.

The *Muſcovites* tolerate all Religions and Nations among them, except the *Roman Catholicks* and *Jews*. There is a great number of *Proteſtants* all over *Muſcovy*, but eſpecially at *Muſco*.

Heretofore thoſe of the Reform'd Religion, and the *Lutherans* had their Churches in the Quarter of *Czaargorod*. The *Lutherans* loſt theirs by a Quarrel that happened betwixt the Wives of the Officers and Merchants, who came to blows in the Church, about precedency; and thoſe of the Reform'd Religion, had theirs taken away, becauſe they had began to build a ſumptuous Edifice of Stone, inſtead of the old one which was of Wood. But ſince that time, the Foreigners having a place aſſign'd them by the *Czar*, without the City, they have built a Suburb of their own, call'd *Nova Inaſemska Slaboda*, where they have built themſelves convenient Houſes and Churches, 2 for the *Lutherans*, and 2 more, one for the *Dutch* and another for the *Engliſh*; wherein they enjoy the ſatisfaction of converſing with one another, without being interrupted by the barbarous ſociety of the *Muſcovites*, or being expoſed to the danger of Fire.

CHAP. IV.

The Ambaſſadors from the Duke of Holſtein's *Travels into* Muſcovy.

They proceed on their Voyage.

WE went from *Muſco* by Land, as far as the Monaſtery of *Simana*, where taking leave of our Friends, we Embark'd with our *Priſtaff*, named *Rodiwon Matſeowitz*, and had ſcarce quitted the Shoar, when the Governor of the young *Knez Boris Juanowitz Moroſou* came in, about to entreat us to come a-ſhoar; but the Ambaſſadors refuſing, he came into our Ship, where he ſtaid all Night, and at parting next Morning, cou'd ſcarce refrain from ſhedding of Tears. He was preſented with a Silver-Bowl, we having in the mean while made 80 *Verſts*, (or 16 *German* Leagues) and by Night made 40 more, to a Village call'd *Mortſchuck*; ſo that in 24 Hours, we had made ſo many *German* Leagues.

The next Day, *July* 2. we met about Noon with ſeveral Boats coming from *Aſtracan* laden with Honey, Salt, and Salt-fiſh; bound for *Muſco*: And at Night reach'd the City of *Columna*; 36 *German* Leagues from thence by Water, and 18 by Land. *Columna.*

The Confluence of the *Moska* and *Occa.* It lies on the right ſide of the River *Moska*, being of a conſiderable bigneſs, and ſurrounded with Stone-Walls and Towers; having its own *Weywode* or Governor. Three *Verſts* above the City, near the Convent of *Kolutin Sergé Monaſtir*, the River *Moska* falls into the *Occa*, which River is much broader and more pleaſant than the former; its Current paſſing from the South, through a very fruitful and well peopl'd Country. Its Banks are well ſtored on both ſides with Oaks, a kind of Rarity in thoſe parts.

We Embark'd again after Dinner, and paſſing by a pretty large Iſland, and ſeveral handſome Villages on the right ſide of the River, we came the 4th of *July* about Noon to the City of *Pereſla*, ſituate likewiſe up- *Pereſlai*
on the right hand of the River *Occa*, 22 Leagues from *Columna*, under 54 deg. 42 min. Elevation. It is likewiſe govern'd by its own *Weywode*.

The 5th we paſs'd by the Town of *Rheſan*, which was formerly a very gallant City, but being deſtroyed together with the circumjacent Country by the *Crim Tartars*, 1568. but the Great Duke in regard of the fertility of the Country along the *Occa*, cauſed Materials to be brought to a place about 8 Leagues from it, which was call'd *Pereſla Rsanski*: The Archbiſhop keeps his Reſidence ſtill in the old Town of *Rheſan*; the Province of which Name lying betwixt the *Don* and *Occa*, does not (as ſom affirm) lie Weſt, but Eaſt from the City of *Muſ*; and the Town of *Rheſan* it ſelf to the South. *Rheſan.*

We paſs'd that Day in ſight of ſeveral Monaſteries and Villages on both ſides of the River. In the Afternoon we made 4 Leagues.

And the 6th more, as far as the Convent of *Tericho*, on the left Hand: And 4 more in the Afternoon to *Kopanor*.

The 7th early in the Morning we left on the right Hand the Iſland *Dobronin Oſtrow*, 6 Leagues from the laſt Village: About 20 *Verſts* from thence, having left ſeveral Villages to the right, we paſs'd by the River *Muſreca*, to the left; and the Villages of *Malcowa*, *Gabiloska*, and *Babino* again to the right, 3 *Verſts* from *Caſſinogorod*, where we arrived at Night. *Caſſinogorod.*

This City, the Capital of the *Tartars* of *Caſſimov*, lies on the right ſide of the River *Occa*, where we met with the firſt *Mahometans*: The young Prince of the Country, lived at that time in an old Caſtle, not far from the City; his Name was *Res Ketzi*, and had a few Years before put himſelf under the *Czar*'s Protec-

tion

1636. ction: We sent him a Present of Tobacco and *Aqua Vitæ*; in lieu of which, he sent us 2 Sheep, a Barrel of Mead, another with Beer, and a third with *Aqua Vitæ*; besides some Ice, Cream, and fresh Butter, which the Princes Mother had taken the Pains to beat, excusing his not having invited the Ambassadors ashoar, for fear of giving occasion of Jealousie to the neighbouring *Muscovite* Governors.

The Night following, and the next Day being the 9th, we pass'd several Villages, Monasteries, and Taverns; and among the rest, the great Village of *Jekatma*, containing above 300 Houses; and from thence 20 *Versts* to the Forest of *Rusbonor*.

The 9th we made 15 *Versts* more to the large Village of *Lechi*, from thence to *Pretziste Resenskou*, and so to *Morumna* on the left hand of the River: Here we discovered a Troop of *Crim Tartars*, who retiring into the Woods, discharged at us, but we answering them with our Muskets, they did not think fit to approach: We came to an Anchor under the Isle of *Zuchtsko Ostrou*, where we set a good Guard for fear of a Surprize.

Morumna. The City of *Morumna*, the Capital of the *Tartars* of *Mordwa*, is inhabited both by *Muscovites* and *Tartars*, but under the Jurisdiction of the first.

The 10th we pass'd by the Town of *Prewospalo*, and on the right the River *Morsna Reka*; and 8 *Versts* from thence, the River *Clesna*, which comes from *Wolodimir*.

From hence, on the right side, the Shoar rises by degrees to such a height, that looking from the Waterside, you see nothing but one ridge of Mountains for 100 *German* Leagues along the River *Wolga*. These Mountains are in the hottest Season not free from Ice and Snow, tho' the Country beyond it for 100 Leagues to the South, is very plain and fertile.

July 11. having pass'd by the Villages of *Isbuilets*, *Troitsa*, *Slowoda*, the Monasteries of *Dudina* and *Nosimki*, we reach'd the City of *Nise*, or *Nisenovogorod* by Night, we found the Ship call'd the *Frederick*, which Captain *Cordes* had caused to be built there by the Ambassadors orders, not quite finish'd, yet the Ambassadors took up their Lodgings in it, being 120 foot long, and 40 broad, with 3 Masts, and so flat bottom'd, that it drew no more than 7 foot Water. It was very conveniently built with many Chambers and Closets, and provided with some Iron and Brass Guns, and 12 Seats for Oars, 2 Oars to every Seat. Besides which, we had a large Challop, to carry Anchors, Cables, and such other Necessaries, and to discover any Banks or Sands.

During our stay here, which was 3 Weeks, we spent most of our time in Feasting, betwixt us and the *Dutch* Merchants, and some other Friends in the City.

Here the *Occa* joyns with the *Wolga*, where the elevation is of 56 deg. 28 min. and the declination of the Needle 9 deg. to the West.

The Great Duke *Basili* caused this City to be built upon the Confluence of the 2 Rivers *Occa* and *Wolga*, *Nisenovogorod.* and gave it the Name of *Nisenovogorod*, from the great number of Inhabitants, which he forced to leave their Habitations at *Novogorod Veliki*, and to settle here. It is surrounded with Stone-Wals and Towers, but the Suburbs are much bigger than the City, being half a League in circumference: It is about 100 *German* Leagues from *Muscovy* by Land, and 150 by Water. It is inhabited by *Tartar*, *Muscovites*, and *Hollanders*, who have a *Protestant* Church here, consisting of 100 Persons. It has its own *Weywode*, or Governor; we bought here a Pullet for 1 Peny, a quartern of Eggs for a Penny, and a Mutton for 12, 15, and 18 Pence.

July 24. The Ambassadors sent Mr. *Mandesio*, and my self, with our *Pristaff*, and the *Muscovian* Interpreter, to thank him for the many civilities he had shewn to our People during their stay there, whilst they were building the Ship, which took up near a Years time, and to regale him with a Present worth about 25 *l.* Sterling.

The Reception he gave us, shew'd him to be a Person much beyond the ordinary Rank of the *Muscovites*: For, he sent 2 of his Gentlemen to receive us at the Gates of his Palace; from whence being conducted through a Gallery, we were at the Entrance of the Palace complemented by 2 others richly clad, who introduced us to the *Weywode*, who was in his Chamber in a Garment of Brocado, attended by a good number of Persons of Quality.

The Room was hung with very rich Tapestry, and a large Cupboard in it with Plate: After he had returned our Complement, and received the Present, he invited us to a Collation, during which, he was very excellent in his Conversation, much beyond what the *Muscovites* generally are; and among the rest ask'd, Whether we were not afraid of meeting with the *Cossacks*, who were sturdy Fellows, as brave as Lions, shewing us at the same time a Picture of *Sampson*'s Engagement with one of these Creatures: Unto which we replying, That we hoped to deal with the *Cossacks*, as *Sampson* did with the Lyon: He pass'd this Complement upon us, That no question the Reputation our Nation had gain'd in the *Czar*'s Service, would be so terrible to the *Cossacks*, as to withhold them from attempting any thing against us. 1636.

The River *Wolga* is at the Confluence of the 2 Rivers 4600 Geometrical feet broad: Its Waters are considerably encreased in the Months of *May* and *June*, by the Thawing of those Rivers that fall into it; which being the reason, why the Ships go from *Musco* to *Astracan*, take the opportunity of this time, to get with ease over the Sands and Shallow Places, which are so frequent in this River; we thought it also time to continue our Voyage before the Waters were fallen too low, therefore we appointed it should be the 30th of *July*.

The River *Wolga*, of which we gave you a general account in the preceding Book, being in my Opinion, one of the greatest and noblest Rivers in the World, I observed all the particulars of it with all possible exactness, with the assistance of a *Dutch* Master's Mate, call'd *Cornelius Nicholas*, a very able Person in that Science, and some *Muscovite* Pilots; according to which, I have drawn a very exact Map, which I here present to the Reader. The River *Wolga*.

Having provided our selves with all Necessaries for our Voyage as far as *Astracan*, we left *Nise* on the appointed Day, but had scarce made 2 *Versts*, 'ere we struck upon the Sands near the Monastery of *Petsora*, which took us up 4 Hours in getting off.

The 31st of *July* our Ship touch'd against another Sand-bank, after we had sail'd but one *Verst*, and by reason of the contrary Winds were forc'd to come to Anchor.

August 1. the Ambassadors gave orders how and what Guards should be kept whilst we were upon the *Wolga*, all that belonged to our Retinue, both Soldiers and Servants, that were able to bear Arms, being divided into 3 Companies, under the Command of the two Ambassadors and the Steward of the Embassy. Mr. *Crusius*, the first Ambassador, had the Master of the Horse for his Lieutenant, and Mr. *Brugman* the other Ambassador, the Secretary of the Embassy, who were to be upon the Guard alternatively, to place the Centinels in the Fore-castle and Stern, and keep their *Corps du Guard* at the Main-Mast.

The Wind continuing contrary, we had recourse to our Oars, but before we had made 500 Paces, struck upon the Sands again; and whilst we were getting off, some of our Gentlemen diverted themselves with Fowling in the high Country betwixt *Nise* and *Casan*, being equally furnish'd with good Pastures and Woods.

The 2d having weigh'd Anchor, after we had scarce advanced a quarter of a League, we were intangled among the Sand-banks near the Isle of *Tletinski*, and not long after among others near the Isle of *Subsinski*, where seeing a Wreck of a Ship that had been lost there not long before, and being 9 Hours a getting off, this I say, with the consideration of the length of our Voyage, (being 558 Leagues to the *Caspian Sea*) and the ignorance of our Pilot, made us almost despair of the Success of our Voyage.

We were however a little revived the 3d, when passing by the Villages of *Stolbiza* and *Stoba*, 3 Leagues from *Nise*, and afterwards the Isle of *Diploi* a League further, near which we met with a very large Vessel laden with Salt-fish, which had aboard 200 Men to assist in towing her up against the Stream, which is done with incredible pains, they scarce advancing 2 Leagues in a Day.

In the Afternoon, we found the elevation to be 56 deg. 21 min. near a Village on the right hand, call'd *Kusmitza*, and passing by the Villages of *Kubotka*, *Tzetschina*, *Targinits*, and *Jurkin*, (the last of which is 9 Leagues from *Nise*) we steer'd our Course betwixt 2 Isles at 21 foot Water.

The Wind being very fair at Night, our Sails stood us in good stead, and continuing thus the next Day, we left the Towns of *Masa* and *Cremenski*, on the right

1636. right hand; and caſt Anchor near the laſt, by reaſon of the ſhallowneſs of the River hereabouts, to avoid running upon the Sands in the Night.

The 5th, early in the Morning we came before the Village of *Pannino*, whence being ſupply'd with ſome Pullets, and other freſh Proviſions at a very cheap rate, we paſs'd betwixt 2 Iſles, and at Night came within ſight of *Baſiligorod*: Here we ſtay'd again all Night, for fear of the Sands.

Baſiligorod. The City of *Baſiligorod* being without Walls, and the Houſes of Wood, is rather a Village than a City, being ſituate at the foot of a Mountain on the right ſide of the River *Wolga*, at 55 deg. 51 min. elevation, at the Conflux of the *Wolga*, and the little River *Sura*, formerly the common boundary betwixt the *Muſcovites* and the *Tartars* of *Caſan*, call'd *Ceremiſſes*. This City was built and fortified by the Great Duke *Baſili*, but has been neglected ſince the *Muſcovites* have extended their Territories further on that ſide.

The Tartars Ceremiſſes.

The 6th having paſs'd the Sands with much difficulty, which made us not come up to the City till Afternoon, which we ſaluted with our great Guns, as we did to all the other Cities upon the River.

The Country inhabited by the *Ceremiſſian Tartars*, extends on both ſides of the River *Wolga* beyond *Caſan*: They live only in Huts, and feed upon Honey and Wild-fowl they take in the Woods, and Milk which their Paſtures furniſh them with: For the reſt, they are very barbarous, treacherous, and cruel, and much addicted to Sorcery and Robbery.

Thoſe living on the right ſide of the *Wolga* in a Mountainous Country, are called *Nagorni*, i. e. *Mountaineers*; but thoſe on the other ſide *Lugowi* or *Lugowizene*, from their plentiful Meadows which ſupply both them and the *Nagorni* with plenty of Hay. *Guagnin* makes them partly *Mahometans*, partly Heathens; but I am certain, that thoſe about *Caſan* are *Pagans*, knowing neither Circumciſion nor Baptiſm, it being their Cuſtom, when they are to give a Child a Name, to appoint a certain Day 6 Months after, and to Name it after the Perſon, they firſt meet with. They do indeed confeſs there is an Immortal Being, who being the Author of all that is good, ought to be reverenced: But their knowledge extends no further, being quite ignorant as to the Mortality of the Soul, and the Reſurrection of the Dead. Neither do they believe any thing of Hell, tho' at the ſame time they acknowledge there are Devils, or Evil Spirits, which afflict People in this Life, which conſequently ought to be appeaſed by Sacrifices.

They pay their Devotions to theſe Evil Spirits at a certain place call'd *Nemda*, among the Fens, about 4 Leagues from *Caſan*, where they never appear empty handed; it being their Opinion, That thoſe that do, ſhall languiſh to Death by ſome lingring Diſeaſe. But above all, one of the moſt principal Reſidences they aſſign to the Devil, is the Torrent of *Schockshem*, 2 Leagues from *Nemda*, which having a very ſwift Current betwixt 2 Mountains, is never frozen, and has imprinted ſuch an Idea of a hidden Myſtery into thoſe poor Wretches, that tho' they ſee the *Muſcovites* paſs it every Day, they think they cannot approach it, without manifeſt danger of their Lives. When they offer their Sacrifices to God, they kill an Oxe, Horſe or Sheep, hang the Skin thereof upon a Pole laid croſs betwixt 2 Trees; and after they have roaſted the Fleſh before a Fire underneath it, they take a ſlice of the Meat, and a Cup of Mead, and throw 'em both in the Fire, offering their Prayers at the ſame time to the Skin, to intercede in their behalf with God; ſometimes to God immediately, for the preſervation and augmentation of their Cattle; or ſome other Conveniencies of this Life. They alſo pay Adoration to the Sun and Moon, and have a peculiar veneration for whatever they Dream of, be it a Horſe, Cow, Fire, Water, or any thing elſe; and told us frankly, that theſe Creatures, which were things Animate, deſerved more Worſhip than the Wooden and Painted Gods of the *Muſcovites*.

Their Sacrifices.

They perform moſt of their Religious Ceremonies near the Torrent, and at the Death of their Friends, feaſt upon the beſt Horſe he left behind. They make uſe of no Prieſts or Books, and their Language has nothing common with the other *Tartars*, tho' ſome among them underſtand alſo the *Muſcovite*.

They not only ſuffer, but alſo incourage Polygamy; nothing being more common, than for a Man here to Marry 2 or 3 Siſters at a time.

Their Women, as well as Maids, are only wrap'd up in a piece of courſe white Cloath, ſcarce any thing being to be ſeen but their Faces; thoſe that are betrothed, have a peculiar Head-dreſs pointed at the end like a Horn, to the end of which is faſtned a Silk Taſſel, on which hangs a ſmall Bell. 1636.

The Men have Breeches under their Upper Garment, which reſembles a great Coat. They all ſhave their Heads, with this diſtinction however, that the Unmarried Men wear a long Treſs of Hair from the Crown, hanging down on their Backs; ſometimes they tie it up in a Knot. They were ſo much affrighted at the ſight of us, that ſome few would only venture to come to the River ſide, to ſee us paſs by; yet at Night when we came to the River of *Welluka*, near the Convent of *Junka*, one of theſe *Tartars* came aboard us, to ſell a Sturgeon, for which we paid him 15 Pence.

Auguſt 7. we arrived before the City of *Kuſmademianski*, 40 *Verſts* from *Baſiligorod*, ſituate at the foot of a Mountain, on the right Hand. Here we obſerved whole Foreſts of very large Elms, out of the Bark of which they make Sledges, and out of the Body of the Trees, cut Cylinderwiſe and hollow'd out, Barrels, Coffins, &c. all of one piece. *The City of Kuſmademianski.*

We came to an Anchor 3 *Verſts* thence, near the Iſle of *Krius*, where we were ſupply'd with freſh Proviſions by the Peaſants, and forced to ſtay all Night by reaſon of a Tempeſt.

The 8th we continued our Voyage with a fair Wind to the Iſle of *Turich*, where we had the misfortune to be forc'd upon a Sand-bank, being under full Sail, and were above 4 Hours before we got off again; in the mean while we ſaw abundance of *Tartars* at ſome diſtance from us, coming from Hay-making.

However by Night we got within ſight of the City of *Sabakzar*, 40 *Verſts* from the laſt, and upon the ſame ſide of the River: Its ſituation is the moſt pleaſant of any in all thoſe parts, but its Buildings are of Wood, like all the reſt. *Sabakzar.*

We ſaw a Boat near the Iſle of *Makrits*, which being ſent to get intelligence, who we were, return'd thither after they had taken a compaſs round our Ship; but having afterwards underſtood our Quality, above 300 Perſons appear'd on the River ſide, to ſee us paſs by.

The 9th we left the Iſle of *Coſin*, and the little City of *Kockſchaga*, both on the left ſide of the *Wolga*, the firſt 12, the ſecond 25 *Verſts* from *Sabakzar*.

The ſhallowneſs of the River put us to no ſmall trouble, and the 11th, the Current forc'd us a-ſhoar, and whilſt they were buſie in getting our Veſſel clear, Mr. *Mandeſlo* and I, had the curioſity to take a view of the Country, for which we were in danger of paying at a dear rate; for our Ship by the help of a fair Gale, was got out of ſight; ſo that after we had been forc'd to Travel a great way along the Banks, we at laſt eſpied a Boat, which was ſent to conduct us to our Veſſel, which we found at Anchor by Night.

The 12th we loſt one of our Anchors, which was faſtened in a Tree that was in the bottom of the River, as we were getting beyond a turning; we were told, That theſe Accidents were ſo frequent, by reaſon of the many Trees which are forc'd along with the Current, whilſt the Banks are overflown, that theſe Anchors, if taken out of the bottom, would purchaſe a Kingdom.

The 13th by Noon, after we had paſs'd by the Village of *Weſoska* on the right, we came before the City of *Suiatski*, ſituate on the left hand, on the aſcent of a Hill: It has a Caſtle, and ſome Churches of Stone, but all the private Buildings, as well as its Fortifications, of Wood. Abundance of People came in Boats to ſee us. *Suiatski.*

At Night we arrived before the City of *Caſan*, 20 *Verſts* from *Suiatski*. We here met with the Caravan of *Perſia* and *Circaſſia*; and a *Perſian Copti*, or Merchant, who was ſent Ambaſſador to *Muſco*. *Caſan.*

We alſo ſaw here a *Tartarian* Prince of *Terki*, call'd *Muſſal*, who had been at *Muſco* lately to do Homage to the *Czar*. *A Tartar Prince.*

The City of *Caſan* is ſituate in a large Plain upon the River *Caſanka*, (which has imparted its Name both to the City and the Province) about 7 *Verſts* from the *Wolga*, under 55 deg. 38 min. elevation. The City is very conſiderable for its bigneſs and ſituation as well as its ſtrength: The Caſtle and its Fortifications being of Stone, well provided with Artillery, and a good Garriſon of *Muſcovites*, the *Tartars* being forbid to enter it upon pain of Death.

1636. For the rest the Houses, Towns, and Ramniers of the City are of Wood only, unto which the River serves instead of a Ditch.

The Castle and City have each their peculiar Governor; the first Commands the Soldiery, the other administers Justice to the *Muscovites* and *Tartars* that live in the City.

The Province of *Casan*. The Province of *Casan* extends on the left side of the River *Wolga*, as far as *Siberia* to the North, and as far as the *Nagaian Tartars* to the East. It was formerly under the Subjection of the *Crim Tartars*, and was capable of bringing 60000 Men into the Field; neither did the *Muscovites* reduce them without much effusion of Blood, as we shall hear by the sequel of the following History.

Conquered by the *Muscovites*. *Basili Juanowitz* Father to the famous *Juan Basilowitz*, having subdued these *Tartars*, he made one *Scheale*, a *Tartar* by Birth, their Chief; but being hated by the *Tartars*, they rebell'd and expell'd him with the assistance of the *Crim Tartars*, who are *Mahometans* as well as they: The last being encouraged by this Success, entred *Muscovy* with a powerful Army, under the Conduct of 2 Brothers, named *Mendligeri* and *Sapgeri*, and having forced the *Muscovites* to retreat from the River *Occa*, where they had posted themselves to oppose their Passage to *Novogorod*, they Besieged, Took and Plundered the City of *Musco*, and reduced the Castle to that extremity, that the *Muscovites* were forced to purchase a Peace from them by very considerable Presents, and under very hard Conditions; one of which was, That the Great Duke and all his Subjects should be Tributaries to them; which *Basili* was forced to confirm by his Letters Patents.

They rebel.

The *Tartars* Masters of *Musco*.

Make the *Muscovites* Tributaries.

The *Tartarian* Princes not contented with this Advantage, unless they left a Monument of their Sovereignty behind them, caused a Statue to be erected in the City of *Musco*, with strict orders, That at the Day when the Tribute should be paid annually, the Great Duke and his Court should bow their Heads to the Ground before it; and *Mendligeri* in his return to the *Crim*, (*Casan* being fallen to the share of *Sapgeri*) laid Siege to the City and Castle of *Rhesan*, summoning the Governor to surrender the place to him, who was now his Sovereign.

The Governor returning for Answer, That a thing of such a nature was so surprising to him, that he could not possibly imagine it, unless he had undeniable proofs of it; *Mendligeri* conceived he could not satisfie him better, than by sending him the Letters-Patents, which the Governor had no sooner received, but being extreamly overjoy'd thereat, sent him word, That he was resolved to keep and defend them as well as the place to the last gasp.

The Bravery of the Governor of *Rexan*.

The *Tartar* highly exasperated thereat, furiously attack'd the place, but was as bravely repulsed; so that finding himself not in condition to take the place, he sent word to the Governor, That he would raise the Siege, provided he would restore the Letters-Patents to him, but he rejecting his Proposals, the *Tartars* were forced to quit their Enterprizes and to return home.

These Letters being sent to *Musco*, were received with great joy there; for the Statue was not only taken down immediately, but *Basili* soon after put himself at the Head of 25000 *Muscovites*, and Besieged the City of *Casan*; which however he was forced to raise afterwards with great loss.

But *Juan Basilowitz* the famous Son and Successor of *Basili*, having resolved to revenge this Affront, laid close Siege to it, and batter'd it most furiously for 2 Months, when being inform'd that the *Crim Tartars* were coming to its relief, he strictly commanded all the Walls to be Undermin'd; which having taken good effect, with the loss of many *Tartars*, the general Assault was given *July* 9. 1552. and the place carried by Storm; notwithstanding the *Tartars* after they saw the Enemy Masters of the Walls, defended themselves bravely from 2 Intrenchments they had made for that purpose, and seeing all desperate at last, fought their way through one of the Gates, over the River *Casanska*.

Casan Besieged and taken by Storm by the *Muscovites*.

Soon after, the whole Province being reduced under his Obedience, he caused the Fortifications to be repair'd, and the whole place to be strengthned with a Castle, which has 4 Bastions of Stone, many Towers, and a good Ditch. He that was Commander in Chief in the place at our Arrival thereabouts, was the Brother of the Governor of *Nise*, he was presented with a noble Ruby, by the Ambassadors, and Mr. *Mandesto* and I went ashoar to take a view of the place, and to buy some Provisions, but we could get nothing that was good, except some Fruits, and especially Melons, as big as our Pumpkins. 1636.

At our coming out of the City, being advertis'd by some *Tartars*, that our Ship was gone, we were forced to hire a Waggon; by the help of which, we were carried along the Shoar, till meeting with the *Pristaffs* Boat, we were carried aboard, and found our Vessel at an Anchor 2 Leagues below *Casan*.

It is to be observed, that the Course of the River *Wolga*, from *Nisenovogorod* to *Casan*, is E. and S. E. but from *Casan* to *Astrachan*, and to the *Caspian Sea*, from N. to S. The Course of the *Wolga*.

The Country is fertile, but almost desolate, by reason of its being so much infested with the *Cossacks*.

August 15. we were carried with a swift Current, occasioned by the narrowness of the River, 26 *Versts* from *Casan*, to the Village of *Klitsischa*, where we had much ado to pass the Sand-banks, and spent the remainder of this and the whole next Day in recovering our Anchors, yet were forced to leave one of our little ones behind us.

Thence we made 6 *Versts* further, to a Tavern call'd, *Kaback Tenkoski*, where we were troubled with another Sand-bank, and half a League beyond this, with another, near a Tavern call'd, *Keshofska*.

The 17th we pass'd over another such Bank, whereabout we saw the Shoar, which was very high, fallen down on one side, which lately had overwhelm'd a Boat with Cherries, whereof there is great store here. We also met with abundance of Ice under the right Shoar, some of which we took along with us, to cool our Drink.

Towards the Evening we pass'd by the place, where the great River *Kama* arising from the N. E. in the Province of *Permia* exonerates it self on the left in the *Wolga*, 60 *Versts* from *Casan*, being of the same breadth at the Mouth, as the River *Weser* in *Germany*, and its Waters blackish. It has 2 Islands at the Mouth of it, the biggest is call'd *Sokol*, having just opposite to it, on the Continent, a very fine Village call'd *Pagantzina*, and 3 *Versts* further another Nam'd *Corotai*, and 7 *Versts* from thence another call'd *Kirieska*, where we stay'd all Night. The River *Kama*.

The 18th with a fair Gale we got by Noon to the place, where the River *Zerdick* disembogues likewise to the left Hand into the *Wolga*, tho' the same is rather a Branch of the River *Kama*, which taking a compass, makes a kind of an Island, and joyns with the *Wolga* 30 *Versts* from the Mouth of the other. The River *Zerdick*.

From hence we could discover to the right of us, the City of *Tetus*, being straggligly built upon a little ascent 120 *Versts* from *Casan*. Betwixt this place and the *Caspian Sea*, there is no Village. The City of *Tetus*.

The same Afternoon we met near the Isle of *Proleikarsa*, with the Governor of *Terki*, a place upon the *Caspian Sea*, who was returning from his Government, being attended by 8 Boats with Musqueteers. At first, not knowing who they were, we made them keep at a distance; but coming nearer they told us, That 3000 *Cossacks* attended our coming upon the River and the *Caspian Sea*, for which purpose they had sent out 70 Horse to discover our coming at a distance; but we were so little frightned with these Stories, that we continued our Course without the least stay, gave them a Gun at parting, and made 70 *Versts* that Day, leaving the River *Utka*, which rises near the City of *Bulgara*, 25 *Versts* from *Tetus* to our left. The River *Utka*.

The Night following, to make tryal of our People, in case of a sudden Attack, a false Alarm was given by the Ambassadors orders, which succeeded to their satisfaction.

The 19th we came to an Island call'd *Staritzo*, which is 15 *Versts* long; I found the elevation 54 deg. 31 min. Behind this Island we found a great quantity of Stones shaped like Limons or Oranges, which being broken in the midst, represented a Star of divers colours, and some of Gold and Silver.

Thence we came within sight of a very pleasant place for its situation, the Ruines of which, shew'd it to have been a *Tartarian* City, call'd *Uneroskora*, and where was yet to be seen the Monument of a certain famous Saint, for which the Inhabitants of those parts shew a more than ordinary Devotion; it is 65 *Versts* from *Tetus*.

The 20th, some Fishermen of this last place, sold us 55 large Breams for 50 Pence. They have a peculiar way A peculiar way of Fishing.

1636. way of Fiſhing: They take a long Cord, unto one end of which they faſten a pretty big Stone which falls to the bottom; and to the other end of it ſeveral pieces of Wood, which ſwim upon the Water. All along the Cord are faſtned many leſſer ones, each with a Hook and a Fiſh for a Bait at the end; by which means they take Fiſhes of 8, 10, or 12 foot long, the Meat of which is very white and delicate.

In our return from *Perſia*, we had ſuch a one brought us, of which we pickled up a whole Barrel full, after thoſe belonging to the Boat in which the Ambaſſador *Cruſius* was, had made a good Meal of it.

When the *Muſcovites* paſs along the Rivers in their Boats, they make uſe of another Invention; they faſten a Hook to one end of a Cord, and to the other end of it a piece of a ſmooth Board of a Hands breadth, Tinn'd over; this they let drag along behind the Ship, or Boat, and the Stream cauſing the Tinn'd Board to turn frequently towards the Sun, makes it appear like Scales of Fiſh; by which means they draw after them, and take as many Fiſhes, and that of the greater ſort, as they have occaſion for; ſo that the *Muſcovites* make ſcarce any other Proviſion upon theſe occaſions, but of a kind of Biskets, being ſo uſed to living upon Fiſh, by reaſon of their many Faſt-days, that they make but little account of Fleſh when they are Abroad.

At this place we cauſed our Boat which had brought our Proviſions from *Niſe*, but was now empty, to be ſet on Fire, for fear it ſhould fall into the Hands of the *Coſſacks*.

About Noon we paſs'd by the Iſle of *Botenska*, which being 3 *Verſts* long, is divided by a narrow Channel from a kind of a ſmall Promontory call'd *Polibno*, behind which we were forc'd to come to an Anchor, near the Mouth of the River *Beitma*; which, as they ſay, is another branch of the River *Kama*.

The River *Beitma*.

The 21ſt we ſaw on the right Hand the Ruines of 2 places, extraordinary pleaſant for their ſituation, which are ſaid to have been 2 Great Cities deſtroy'd by *Tamerlain*, one was call'd *Simberska-Gora*.

The 22d we with much ado, paſs'd over 3 great Sand-banks, near which may be ſeen the Mount *Arbeuchim* on the right Hand, which owes its Name to a great City, the Ruines of which are alſo to be ſeen to this Day.

Hereabouts you may alſo diſcover betwixt 2 little Hills, a great Stone of 20 foot long and as many broad, with the following Inſcription:

Budeſch time dobro tobæ budet:

That is,

If thou raiſe me, thou ſhalt be well rewarded.

We were told, That 50 Paſſengers being forc'd aſhoar there ſome Years before, had the curioſity to lift up the Stone, and found on the other ſide nothing but theſe following Words:

Tſto iſches netſcho poloſchen:

That is,

In vain doſt thou look for what thou hadſt not put here.

At ſome ſmall diſtance from the River, you ſee a very fertile, ſpacious, Champagn Country, being rich Paſture Grounds, but deſtitute of Inhabitants, there remaining nothing to be ſeen now but the Ruines of Cities and great Villages deſtroy'd by *Tamerlain*.

The 23d we were forc'd to come to an Anchor near the River *Adrobe*, where I found the Elevation of 53 deg. 48 min.

The 24th we were driven twice aſhoar by the contrary Winds; and the 2 next following Days being much afflicted with getting over the Sand-banks, this with the ill Diet, moſt of our People were not accuſtomed to, and the frowardneſs of one of the Ambaſſadors, rendred this Voyage almoſt inſupportable.

The 25th we diſcovered to the right a Mountain, from whence the *Muſcovites* draw abundance of Salt; which being prepared in Huts built for that purpoſe, and dry'd in the Sun, is tranſported from hence to *Muſco*.

Oppoſite to it is the Iſle of *Koſtowata*, where the River is very broad, by reaſon of the low Banks on both ſides.

Not far hence you ſee another Mountain, at the foot of which, is the River *Uſſa*, which here falls into the *Wolga*, but is re-united with it 60 *Verſts* below *Samara*. Hereabouts are very good Paſtures, but a high Mountain with thick Woods, which ſerving for a Retreat to the *Coſſacks*, makes them almoſt uſeleſs. From hence to the Mountain *Dimiſagora*, i. e. *The Maids Mountain*, we had 60 foot Water.

1636.

The River *Uſſa*.

This Mountain is divided into many ſteep Hills towards the River ſide, which being of divers Colours, afford a very agreeable Proſpect at a diſtance; and upon each of theſe Hills is a row of Pine-trees ſo regularly planted, that were they not inacceſſible, they would rather be look'd upon as the product of Art than Nature.

At the foot of this Mountain ariſes another, extending 8 Leagues along the River: The Valley betwixt both, is call'd *Jabla-new-quas*, i. e. Apple-drink, from the vaſt number of Apple-trees here, which bear Apples only fit for Cyder.

The ſame Evening having received Advice by Letters from *Muſco*, and *Niſe*, that 4 *Coſſacks* were got into our Retinue, in the quality of Mariners, which made us be the more upon our Guard, eſpecially when after Sun-ſet we perceived 2 great Fires at the Entrance of a Wood on the right hand; but having diſpatch'd 5 or 6 Muſqueteers aſhoar, they diſcover'd them to be *Strelitzes*, who had guarded a *Perſian* Caravan.

The Night betwixt the 26th and 27th we were put in another Fright by 2 Fiſhermen, which paſſing by along our Ship ſide in a Boat, were ſtop'd by our Centinels; but finding them differing in their Relations, and ſuſpecting them to be *Coſſacks*, we ſent them the next Morning to the Governor of *Samara*.

The 27th we ſpy'd a certain Sand-Down in the middle of a ſpacious Plain to the left Hand, call'd *Sariol Kurgan*, of which the *Muſcovites* relate, That a certain *Tartarian* Prince call'd *Momaon*, as he was marching that way to invade *Muſcovy*, happening to die there, was Buried in that place, the Soldiers covering his Body with Sand, which they carried thither in their Head-pieces and Bucklers.

About a League from thence begins the Mountain *Saccobei*, reaching 15 *Verſts* along the River ſide, as far as *Samara*, it is one continued Rock, bare on the top, but otherwiſe covered all over with Trees.

Whilſt we were detain'd here by contrary Winds, 2 great red Snakes, which came from the Shoar, got up by the Cables of our Ship: The *Muſcovites* no ſooner perceived them, but they begg'd us not to kill them, but to give them ſome Food, they being the forerunners of fair Wind, ſent by St. *Nicholas*.

The Superſtition of the *Muſcovites*.

The 28th we came before Day near the City of *Samara*; it lies 2 *Verſts* from the River ſide on the left Hand, and 350 from *Caſan*: It is almoſt ſquare, and the Buildings, except ſome Churches, and 2 or 3 Monaſteries, of Wood.

The City of *Samara*.

Three *Verſts* from hence, the River *Samar* falls into the *Wolga*, but is not rightly united with it till 30 *Verſts* lower.

The Wind turning very fair, we chang'd our purpoſe of making ſome ſtay near this place, and made 115 *Verſts* before Night, when we arrived at the Mountain of the *Coſſacks*, which has got its Name from the frequent Robberies committed thereabouts by theſe Pirates, this being their Aſſembling place, from whence they uſed to diſcover what Ships came that way; but ſince 400 or 500 of them were killed there by the Garriſon of *Samara*, this Mountain has not been infeſted with this Vermin, or at leaſt not in ſuch Numbers.

The Mountain of the *Coſſacks*.

From the City of *Samara*, to the place where the River *Samar* falls into the *Wolga*, is one continued tract of Mountains; and oppoſite to it the River *Aſcula* joyning alſo with the ſaid *Wolga*, makes it near 2 Leagues broad here.

A little further on the right Hand, the Mountain *Peſtcherski* extends for 40 *Verſts* without any interruption all along the River ſide.

About 100 *Verſts* off *Samara*, is the Iſle of *Batrack*, and 10 *Verſts* lower, that of *Lopatin*, being 5 *Verſts* long, juſt oppoſite to the River *Liſran*, where it joyns with the *Wolga* on the right Hand.

Afterwards we paſs'd by a great many ſmall Iſlands, and ſo came at Night to the before mentioned Mountain of the *Coſſacks*. This Mountain, as well as all the reſt, do ſometimes reach a great way into the

1636. Country, ſometimes only ſerve as an edge to the Banks of the River.

Having ſtay'd here all Night, we continued our Voyage the 29th, and paſſing by the River *Pantzina*, which diſembogues into the *Wolga* on the right Hand, we made 45 *Verſts* that Day, and came to an Anchor by Night near the Iſle of *Zagerinsko*. Here we were advertiſed, that 40 *Coſſacks* had been ſeen hovering near the River ſide, and our Beer beginning to fail us, our People were forced to be contented for the future with Water mixt with Vinegar.

Auguſt 30. we paſs'd early in the Morning the Mouth of the River *Zagra*, on the right Hand of us, not far from the Iſle of *Zagerinsko*, and 40 *Verſts* further the Iſle of *Seſnou*.

About Noon we came in ſight of the Mountain of *Tichy*, which jets out ſo deep into the River, that at a diſtance it ſeems to ſtop the paſſage of the Current, which however is ſo ſhallow hereabouts, that it is ſaid to be fordable. Not far from thence, there is a noted Sand-bank, call'd *Owetzabrot*, and a little further ſeveral ſmall Iſles full of Buſhes and Bullruſhes, which ſerve for a Retreat to the *Coſſacks*.

Here we were again alarm'd with the News, that ſome of theſe Robbers laid in wait for us, which made us call 2 Fiſhermen aboard towards Evening, both of which declared, That they had ſeen 40 *Coſſacks* in an adjacent Wood they ſhew'd us, which made us be upon our Guard all that Night, and did not diſmiſs the Fiſhermen till next Day, in which we made 60 *Verſts*; and the 31ſt no leſs than 120.

The firſt thing we ſaw, was the Iſle of *Oſſino*, 100 *Verſts* from *Saratof*: and after we had ſpent much time and pains in paſſing the Sand-banks, where our Ship ſtruck ſeveral times, we came to the Iſle of *Schiſmamago*, 20 *Verſts* thence; and afterwards to that of *Kaltof*, 50 *Verſts* from *Saratof*; hereabouts we had from 16 to 42 Foot Water. Betwixt theſe 2 laſt Iſlands we met with 2 great Barges Mann'd with 400 Mariners each, laden with Proviſions and *Cavayar*: And near the Iſle of *Kaltof*, we met with 4 more coming from *Aſtrachan* with Salt and Salt-fiſh; they told us, That they had met with 200 *Coſſacks* near *Aſtrachan*, who had let them paſs by unmoleſted.

On the right Hand of this Iſle begins the Mountain of *Smiowa*, i. e. *The Mountain of Serpents*, from its winding ſometimes near to, ſometimes at a great diſtance from the Shoar, for 40 *Verſts* in length; from whence you have a full proſpect of what the *Muſcovites* call *Sarok Oſtrowe*, i. e. *Forty Iſles*.

The City of *Saratof*. *September* 1. we met early in the Morning 3 great Boats, and about 9 in the Morning, paſs'd in ſight of *Saratof*, a City ſituate 52 deg. 12 min. in a great Plain upon a Branch of the *Wolga*, 4 *Verſts* from the main River. It is inhabited only by *Muſcovite* Soldiers, who keep Garriſon here to bridle the *Calmouch Tartars*, inhabiting a vaſt Tract of Ground from hence to the *Caſpian Sea*, and the River *Jaika*: They are ſo conſiderable, that ſometimes they make open War againſt the *Czar*. From *Samara* to *Saratof*, are 350 *Verſts*.

September 2. we paſs'd by the Iſles of *Kriuſna* and *Sapuroſka*, and not long after to the Mountain of *Achmats Kigori*, which extends along the Shoar as far as the Iſle, which bears the ſame Name, 50 *Verſts* from *Saratof*: This Mountain makes a very fair Proſpect at a diſtance, becauſe the top of it is covered with moſt pleaſant Verdure, the Aſcent being checquer'd with a Mould of different Colours, and the skirt of it a Bank as even, as if it were made by Art.

Twenty *Verſts* from the beforementioned Iſle, we ſaw that of *Solotoi*, and not long after the Mountain of *Sallottogori*, i. e. *The Golden Mountain*; having gotten this Name from thence, becauſe the *Tartars* did once ſurprize hereabouts a Fleet of *Muſcovite* Veſſels, ſo richly laden, that they divided the Gold and Silver by the Buſhel.

We were ſcarce got out of ſight of this Mountain, but we diſcovered another, call'd *Millobe*, or the *Chalk Mountain*, which reaching 40 *Verſts* along the River, riſes by an eaſie aſcent to the top, which is all upon a level; and at the foot near the River, are planted many Trees Checquer-wiſe.

The next Mountain we came to, we call'd the *Mountain of Pillars*, from the Rocks of divers Colours, which appear like Pillars above the reſt.

Here meeting with another great Barge, we were told by the Pilot, that they had been in ſight of 70 *Coſſacks*, who had let their Veſſel paſs by, but had in the Night time ſtolen their Lighter, for which they made them pay a Ranſome of 500 Crowns. 1636.

We ſaw the ſame Evening 10 *Coſſacks* croſs the River in ſight of us; wherenpon 8 Muſqueteers were commanded by the Ambaſſador *Brugman*, to find them out, and to bring them aboard: But the *Coſſacks* having got time enough to get together with their Boat, into an adjacent Wood, and it being very late before our People return'd, this cauſed ſome Diſpute betwixt the ſaid Ambaſſador, and the Steward of the Embaſſy, the latter alledging, that it was very dangerous to expoſe our Men in the Dark, in an unknown place, where they muſt infallibly periſh for want of timely relief; but he had no other Anſwer but ill Language.

Septemb. 3. We paſs'd in ſight of the River *Ruſtana*, and oppoſite to it on the right, the Mountain of *Urakufs Karul*, 150 *Verſts* from *Saratof*; having its Name, as they ſay, from a certain *Tartar* Prince named *Urak*, that was ſlain there by the *Coſſacks*.

Thence we came to the Mountain of *Kamaſchinka*, and a River of the ſame Name ariſing out of the Torrent of *Iloba*, which falls into the *Don*; ſo that the *Coſſacks* croſs only this River in ſmall Boats, and make their Excurſions as far as the *Wolga*, which renders travelling very dangerous hereabouts, as may be ſeen by the many Croſſes ſet there along the River ſide, in remembrance of the *Muſcovites* ſlain by theſe Robbers.

We no ſooner had paſs'd this place, but finding our ſelves within ſight of the *Caravan* of *Perſia* and *Tartary*, we made all the haſte we could to get up with them, and ſaluted them with 4 pieces of Cannon, and a Volley of Small-ſhot, under the ſound of our Trumpets, which they return'd by a Volley of Small-ſhot.

The chief Perſons belonging to this Caravan, were a *Tartarian* Prince named *Muſſal*, the *Perſian Cuptzi* we mentioned before, a *Muſcovite* Envoy ſent into *Perſia*, a *Crim Tartar* Ambaſſador, and 2 or 3 *Perſian* Merchants, one of which was an Agent of the Chancellor of *Perſia*.

We ſaw immediately after a *Muſcovite* Officer with ſome *Strelitzes* coming in a Boat towards us, and after they had ſaluted us with a Volley of Small-ſhot, the Officer only came aboard to Complement us in the Name of the *Tartarian* Prince: The *Perſian Cuptzi* did the ſame ſoon after by one of his Retinue, and the Ambaſſadors ſent Mr. *Uchterits*, and Mr. *Melleville*, with our *Muſcovite* Interpreter to the Prince, and the Secretary of the Embaſſy, with our *Perſian* Interpreter, to the *Cuptzi*, to repay the Compliment.

The Secretary happening to come to the Lar-board ſide of the Veſſel, the *Cuptzi*'s Servants told him, that their Maſter's Wife being lodged on that ſide, they deſired him to come about to the other ſide of the Ship, which being done accordingly, we were received by ſeveral goodly Perſons, who lifted us up by the Arms into the Ship, and conducted us to the *Cuptzi*'s Chamber, where we found him ſitting upon a Couch cover- The *Perſian Cuptzi*.
ed with the beſt *Perſian* Tapeſtry, reſting his Back againſt a Crimſon-Cuſheon, and having his Legs croſs-wiſe, according to the *Perſian* Cuſtom: He put his Hands to his Breaſt with a low Inclination of the Head, the higheſt piece of Compliment uſed in *Perſia*, and intreating us to ſit down, (which we could not do without ſome trouble in that poſture) he anſwered our Compliment in a very obliging manner; telling us, among other things, That how deſirous ſoever he was of ſeeing his own Country and Houſe, he had conceived a much greater ſatisfaction at the ſight of our Ship. He added, That he hoped, as ſoon as we were entred *Perſia*, we would be ſenſible of the Difference there was betwixt the roughneſs and barbarity of the *Muſcovites*, and the politeneſs and frankneſs of the *Perſians*; and that after his return thither, he would employ all his Intereſt, to be made our *Mehemander*, or Conductor, on purpoſe to put all the Obligations upon us that were in his Power.

Before we left the Ship, he treated us with a Collation, ſerved up in Plate Vermillion-gilt, conſiſting in Fruits, Grapes, and Piſtacho's dry'd and pickl'd.

After we had drank the Ambaſſadors and ſeveral other Healths, he told us as a Secret at parting, That a *Poliſh* Ambaſſador was come by the way of *Conſtantinople* and *Bagdet* into *Perſia*, and that he was now upon his return, in order to go to the *Muſcovite* Court by the way of *Aſtrachan*, but that the Governor of the laſt place intended to ſtop his Paſſage, till he had received further Orders from Court;

and

1636. and ſo we were diſmiſs'd, and parted, each keeping his courſe.

Septemb. 4. ſeveral *Tartars*, whom *Muſſal* the *Tartarian* Prince had ſent to excuſe his not coming to viſit the Ambaſſadors, came aboard us: Theſe were *Circaſſian Tartars*, and he who appear'd to be the chief of them, was pretty Tall, of an Olive colour, with long, greaſie, and Black Hair, and his Beard of the ſame colour. Over his Garment, he had ſome Black Sheep-skin, the Woolly ſide outwards, a Cap cloſe to his Head, with a very frightful Countenance. The reſt were moſt of the ſame Stamp, having black or brown courſe Cloath Coats about them. We ſent them back well loaden with *Aqua Vitæ*.

By Noon we were advanced as far as the River *Bolloclea*, in the midway betwixt *Kamuſchinka* and *Zariza* 90 *Verſts* diſtant from each; and by Night caſt Anchor 16 *Verſts* further, near a great Sand-Bank, call'd *Strehlae*; upon which we were forced.

Septemb. 5. As ſoon as we had weigh'd Anchor, by the violence of the Current, whilſt we were employed in getting off, the Caravan got before us.

About Noon we came to a place, from whence you have not above a Days Journey to the *Don*, (the *Tanais* of the Ancients) which approaches within 7 Leagues of the *Wolga* on that ſide.

The firſt Branch of the Wolga. Somewhat lower the ſaid *Wolga* ſends forth a Branch to the left, which for a *Verſt* runs to the E. N. E. and then reaſſuming the ſame Courſe with the main River to the S. E. diſcharges it ſelf, by a peculiar Channel, into the *Caſpian Sea*. I found here the Elevation 48 deg. 57 min.

In a Plain about 5 *Verſts* from the River, and 7 from *Zariza*, are yet to be ſeen the Ruines of the once famous City of *Zarofgorod*, i. e. *City Royal*, built, as they ſay, by *Tamerlain*.

The Inhabitants of *Aſtrachan*, fetch from thence abundance of Bricks and Stones to build their Walls, Churches, and Monaſteries: Here a Fiſherman alſo ſold us a *Bicluga*, or White-fiſh, for 50 Pence, which he had taken near our Ship, and knock'd it on the Head with a Mallet. It was not unlike a Sturgeon, but had a wider Mouth, and whiter Fleſh, it was 8 foot long and 4 broad.

Septemb. 6. we overtook the Caravan at *Zariza*, where moſt of their Paſſengers were gone aſhoar, but the Wind being fair, we continued our Courſe.

The City of Zariza. The City of *Zariza*, 350 *Verſts* diſtant from *Saratof*, is ſituate at the bottom of a Hill, on the right ſide of the River, being fortified with 5 Baſtions, and as many Wooden Towers: It has no other Inhabitants but the Garriſon, which is kept here to bridle the *Coſſacks* and *Tartars*, and to ſerve for Convoys up and down the River. I found the Elevation 49 deg. 42 min.

All the Country betwixt *Zariza* and *Aſtrachan* being only Barren Grounds; the laſt is ſupply'd with Wheat from *Caſan* in ſuch plenty, that they buy it cheaper there than at *Muſco*.

Not far below *Zariza*, we paſs'd by the Iſle of *Zerpinske*, where the *Coſſacks* not long before, had ſurprized and Raviſh'd the Wives and Daughters of the Soldiers of the Garriſon of *Zariza*, who keep their Cattle there a Grazing, and ſo ſent them back. This Iſle is 12 *Verſts* long.

Behind this Iſle a ſmall River, which has its riſe in the River *Don*, falls into the *Wolga*, but it is ſcarce Navigable but by ſmall Boats. *Iſaac Maſſa* is the only one of all the Geographers, who has taken notice of it in his Map, and gives it the Name of *Kamous*. We found it as hot here in *September*, as we do in *Germany* in the Dog-days; yet the *Muſcovites* did not look upon it as extraordinary.

Septemb. 7. the Weather being very Tempeſtuous, we advanced but ſlowly, which made the Ambaſſador *Brugman* take this opportunity to ſummon all the Servants of the Embaſſy before him, and to charge them with want of Duty and Reſpect towards him; requiring the Muſicians, Guards, and Footmen to take an Oath of Fidelity to his Perſon. Unto which they anſwered, That he had no reaſon to ſuſpect their Fidelity, and that they were ready to ſacrifice their Lives in his Service; deſiring however, That they might be treated with leſs Rigour than they had been hitherto, which he promiſed, but was but indifferently perform'd.

The ſame Day meeting with a large Boat, in great diſtreſs for Proviſions, which had been taken from them 4 Days before by the *Coſſacks*, we ſupply'd them with a Sack full of pieces of Bread: 40 *Verſts* from *Zariza*, we paſs'd by the Iſle of *Naſſonofska*; and oppoſite to it on the right Hand, a great flat Mountain of the ſame Name, near which is a kind of a Grotto, famous for the Slaughter of a great number of *Muſcovites*, which were ſurprized there by the *Coſſacks*, as they were lying in Ambuſh for them. 1636.

In the Evening a Fiſherman brought us a certain Fiſh, call'd *Tziberika* by the *Muſcovites*; it was near 5 Foot long, with a long and broad Snout like the Bill of a Wild-Drake, the Body full of white and black Spots, like a Tygers-skin, except upon the Belly, which was quite white. It had a more luſcious Taſte than a Salmon. He alſo ſold ſome White-fiſh, of which there are abundance hereabouts.

The 8th, the Caravan we left behind at *Zariza*, overtook us near the Cape of *Popowitska-Jurga*, 70 *Verſts* from the ſaid City, and thence to the Mountain of *Kamnagar*, on the right 40 *Verſts* further.

We were much incommoded with the Sand-banks, till we came to the high Iſland of *Weſomi* which is 20 *Verſts* lower, and 4 in length, lying near a River of the ſame Name, which falls into the *Wolga*, on the right Hand: 30 *Verſts* lower we paſs'd cloſe by the Mouth of the River *Wolodinerski Uſga*; and after with much ado, we had diſentangled our ſelves from thence, we paſs'd by the Country of *Stupin*, 30 *Verſts* from the City of *Tzornogar*, the next City we were to come at.

Ten *Verſts* below the ſaid River, the *Wolga* emits a ſecond Branch to the left, call'd *Achtobeniſma Uſga*, which joyns its Channel with the firſt Branch we mentioned before. About 5 *Verſts* further, the whole Fleet came to an Anchor near the Iſle of *Oſſina*, 7 *Verſts* from *Tzornogar*; ſo that we made 135 *Verſts*, or 27 *German* Leagues that Day. A ſecond Branch of the Wolga.

From hence, as far as *Aſtrachan*, the Country on both ſides of the River, abounds in Liquorice, the Stalks being of the thickneſs of a Man's Arms, and near 4 foot high; the Seed, which is much like Vitch, lies in Cods upon the top of the Stalk. The Champagne Country of *Media*, eſpecially near the River *Arexes*, is alſo full of it, but the Juice much ſweeter, and the Root much bigger than thoſe of *Europe*.

Septemb. 9. a violent Wind carried us by Noon within ſight of the little City of *Tzornogar*, where we ſtay'd.

The City of Tzarnogar. This City, which lies 200 *Verſts* from *Zariza*, was then not built above 9 Years, in this place, the former being ſituate on a Shoar, where there was ill Landing, about half a Leag. hence, and was therefore tranſported to the place where it now ſtands, on a high Shoar on the right ſide of the River. Its Fortifications conſiſt of 8 Wooden-Towers, and a Rampier with thick Planks, fitted only for a Garriſon of 400 or 500 *Streletzes* that are kept there, to ſecure the circumjacent Country againſt the Incurſions of the *Coſſacks* and *Kalmuck Tartars*; for which reaſon 4 Watch-houſes, to wit, one on each corner of the City, are erected upon high Poles, from whence the Centinels may overlook a ſpacious Plain, without the leaſt hindrance. Betwixt this place and *Aſtrachan* no Trees are to be ſeen on the River ſide.

The 10th we left *Tzornogar*, but did not advance above 10 *Verſts*.

About Noon ſome Fiſhermen brought us a Carp weighing 30 Pounds, and ſome other Fiſh they call *Sandates*; they refuſed our Money, becauſe they fiſhed for certain Merchants, who have farm'd this part of the River, but were very glad of a Bottle of *Aqua Vitæ* we gave them for a Preſent.

Septemb. 11. we made 120 *Verſts* with a fair Wind: About Noon we paſs'd by the Mountain *Polowon*, lying half way betwixt *Zariza* and *Aſtrachan*, 250 *Verſts* from each of them.

We ſtay'd all Night near the Iſle of *Kyſſar*, where the Ambaſſador *Brugman* being upon the Guard, and perceiving a Boat coming too near our Ship, cauſed a great Gun to be diſcharged at it, which proved to be a Boat in which the Fellow being got Drunk, was deaf at the Call of our Centinels.

Sept. 12. We ſet Sail early in the Morning with a fair Gale, which ſoon carried us to the Third Branch on the left Hand of the *Wolga*, call'd *Bucu Woſtowa*, which falls into the two precedent; and thence to the Iſle of *Coppono*, which imparts its Name to the Country, which lies oppoſite to it on the right Hand of the River, it is call'd *Copponogar*, and lies 150 *Verſts* from *Aſtrachan*. 20 *Verſts* below it, the *Wolga* emits a Fourth The third and fourth Branch of the Wolga.

1636.

Fourth Branch on the left Hand, call'd *Daniloska Uts*, which has no Communication with the former three, but exonerates it self by a peculiar Chanel into the *Caspian Sea*. 15 *Versts* lower is the small, but pleasant River *Katorinski*, not far from whence we saw amongst the Sands the Carcass of a Boat half rotten, which was cast away there some time before. We lay the same Night as far as the Isle of *Piruski*, 80 Leagues from *Astracan*, having made 100 *Versts* that Day.

Sept. 13. Certain Boatsmen from *Astracan*, came and sold us some delicious Melons, Peaches, and Grapes, the Kernels of the last being as big as Nuts; which surprized us the more, because we were then reading at Morning Prayers, among others the 13th Chapter of *Numbers*, where *Moses* speaks of the Excellency of the Grapes of *Canaan* brought thence by the Spies.

The Fifth Branch of the Wolga.

Much about the same time we found our selves within sight of the Fifth Branch, which the *Wolga* sends forth there; it is call'd *Mituska*, and at some small distance from the main River is subdivided into two other Branches or Chanels; one of which joins with the Fourth Branch, and the other some *Versts* lower is reunited with the *Wolga*. We were told that this was one of the most dangerous Places for robbing, which in some measure we found to be true, having discover'd a good number of *Cossacks* betwixt the little Isles, but at the discharge of our great Guns they disappear'd. 5 *Versts* lower is the last Sand-bank, call'd *Kabangameel*. 5 *Versts* thence, the Promontory of *Kabangengar*; and 5 *Versts* lower, the Isle of *Itziburki*, 50 *Versts* from *Astracan*.

Hereabouts, and at *Astracan*, as far as to the *Caspian Sea*, we saw vast Multitudes of very large wild Geese, or rather Cormorants; of which more in the Description of *Nagaia*.

The 14th being detained by contrary Winds at 80 Feet-water, the *Tartarian* Prince sent us a Present of Beer, Mead, and *Aqua Vitæ*, offering us more if we stood in need of it.

Sept. 15. We pursued our Journey by 4 a-Clock in the Morning with a Fair Wind, and pretty early in the Morning reach'd the Isle of *Busan*, 25 *Versts* from *Astrachan*; and not long after, a Sixth Branch of the River *Wolga*, call'd *Baitzick*, within 15 *Versts* of *Astracan*.

Sixth Branch of the Wolga.

The Plain, which reaches from hence to the City, gave us a fair Prospect of it by 8 in the Morning. 3 *Versts* lower, and 12 from the City, the *Wolga* sends forth a Seventh Branch, call'd *Knilusse*, which makes the Island of *Dolgoi*, in which *Astrachan* is seated; and having compass'd the said Isle, falls into the *Caspian Sea* by several Chanels or *Ostia's*. We came by Noon to *Astracan*, and, as the said City lies on the other side of the *Wolga*, which in that Place divides *Europe* and *Asia*, we may say that at this Instant we were going to leave our own Country, and were making the first Step into the other. This made us salute the City from the midst of the River with a Volley both of all our Great Guns and Small Shot, to the no small Surprize of the Inhabitants, who are not much accustomed to the thund'ring Noise of the Great Guns. And in this Place, I think it not beyond our Scope to give an Account of the Situation of *Astracan*, the Qualities of the Country, and manner of Living of the Inhabitants.

They come to *Astracan*.

An Account of that City.

The Ancient Geographers had not the least Knowledge of these *Tartars*, whom they only mention under the general Names of *Scythians* and *Sarmatians*; tho' it be certain that they differ in Names, Languages, and manner of Life. This makes *Matthias de Michou*, a Physician and Canon of *Cracovia* not without Reason reprehend those, who confound them with the *Getæ*, *Scythæ*, and the *Sarmatæ*, forasmuch as since these *Tartars* have not been known till since the 13th Century. For about the Year 1211. certain *Indian* Lords having kill'd their King, *David*, settled themselves first towards the *Euxine Sea*, near the *Palus Mœotis*, where the Ancient *Getæ* lived, from whence they extended their Conquests, first to the *Don*, and afterwards to the *Wolga*. The same Author distinguishes them into Four different Nations; *viz.* the *Zavolhenses*, *Precopenses*, *Cosanenses*, and *Nohacenses*; and says, they are the *Tartars*, who live along the River *Velha* (*Wolga*) those of *Precop*, those of *Casan*, and those of *Nagaia*, of whom we are to treat at present; it being only our Design to give the Reader an Account of what we have seen in our Travels. We call then *Nagaia* that Part of *Tartary*, which is inclosed betwixt the Rivers *Wolga* and *Jaika*, as far as the *Caspian Sea*, of which *Astracan* is the Capital City, acknowledging a certain *Tartarian* Prince, named *Astra-Can* for its Founder. It is situate in the Isle of *Dolgoi* we mention'd before, to be made by Two Branches of the *Wolga*, upon which this City is situate, contrary to what (*a*) *Herberstein* affirms, That it lies some Days Journey from the River.

And Nagaia.

(*a*) Relation of *Moscovy*.

By the most exact Observations I could make, I found the Elevation of the Pole here to be 26 Degr. 22 Minutes, and the Climate so hot, that in *September* and *October*, the Heats were as excessive here as they are in *Germany* in the midst of the Summer; especially when the Wind blew from the *Wolga*-side, E. or N. E. But when the Wind blew from the Sea, *i. e.* from the South, which we found by our Experience at our Return that way, when we were detained there in *June*, *July*, and *August*, yet were the Heats pretty tolerable, because they were moderated by the cool Sea-Air, which the South-wind brought along with it, as well as the Scent of the Sea, which was not a little inconvenient to us. The Winter lasts here no longer than two Months, but is so exceeding cold, that the River is frozen up, and bears Sledges; which, tho' contradicted by others, the Reader may relie upon as an undoubted Truth.

The Isle of *Dolgoi* is all sandy and barren, producing nothing for the Subsistence of humane Life, except what is brought forth by the Industry of the Inhabitants in their Gardens, and some well cultivated Grounds. The Continent on the Right hand is no less barren, but on the left towards the River *Jaika* are very good Pastures. On this side the *Wolga* is a long Heath, extending 70 *German* Lgs to the West to the *Euxin Sea*, and another of 80 Lgs extending to the South to the *Caspian Sea*; the last of which cost us eleven tedious Days Journeys, at our Return from *Persia*.

The Isle of *Dolgoi*.

The only Thing these Deserts produce are certain Salt-Pits, call'd *Mozakofski*, *Kainkowa*, and *Gwostofski*, by the Inhabitants, being 10, 15, and 30 *Versts* from *Astracan*. These Salt Veins the Sun bakes and causes to swim upon the Surface of the Water of the thickness of a Finger, not unlike our Rock-Crystal; and that in such prodigious Quantities, that for an Half-peny you may take up a *Poude*, or 40 Pound-weight, one Crust being no sooner taken off, but another comes up; It smells like that of *France*. And these Salt Veins are questionless the same, which have misled (*a*) *Petreius* into the Error of his imaginary, inexhaustible Salt-Mountains, he calls *Busin*, and puts them 2 Lgs from *Astracan*; as he is no less erroneous in what he further adds, That *Media*, *Persia*, and *Armenia*, are supply'd with Salt from these Mountains, these Countries abounding in Salt-Marshes of their own, as we shall see anon.

Salt Veins.

(*a*) Hist. of *Muscovy*.

The River betwixt *Astracan*, and the *Caspian Sea*, being an Extent of 12 Lgs, so abounds in Fish, that we bought 12 large Carps for Two-pence, and 200 young Sturgeons for Half-a-Crown: Lobsters are here in infinite numbers, because the *Muscovites* and *Tartars* eat not of them.

Plenty of Fish.

The great multitude of Isles which are hereabouts, afford also an incredible number of all sort of Wild Fowl, especially Wild Geese and Wild Ducks; which the *Tartars* hunt with Falcons and Hawks, in the breeding of which Birds the *Tartars* are great Masters. They are also much addicted to the Sport of Hunting the Wild Boar, the Flesh of which they sell to the *Muscovites*, their Religion not permitting them to eat it.

And Wild Fowl.

The Fruits of *Nagaia* don't give way in Goodness or Beauty to those of *Persia*, especially their Apples, Quinces, Nuts, Peaches, and Melons; but, above all, that kind of Melons, or rather Citruls, by the *Muscovites* call'd *Arpus*, by the *Turks* and *Tartars*, *Karpus*, because they are very cooling; and by the *Persians*, *Hinduanes*, because their first Seeds were brought from the *Indies*. They are pleasant both to the Eye and Taste, the Rind being of a lively Green Colour, the Meat of a pale Carnation, and the Seed black; we bought two or three for a Half-peny.

The Fruits of *Nagaia*.

Grapes were but lately introduced here, by the means of some *Persian* Merchants, who brought the first Sets to *Astracan*, and were planted by an old Monk belonging to a Convent in the Suburbs in his Garden. The *Czar* having tasted some of these Grapes, order'd the said Monk 1613. to propagate his Stock with all possible diligence; which he did so effectually, that at the time of our being there, scarce a House in the Town

1636. Town was without its Walks, or Arbors of Vines; which turn'd to such an Advantage to the Owners, that the Master of the House where we lodged, assur'd us, That the Year before, the Vines about his House had yielded no less to him than 100 Crowns; and some Years ago they have planted a Vinyard there, which produced no less than 60 Pipes of excellent Wine in one Year.

The said Monk was still living at our being here: He was a *German* by Birth, out of *Austria*, and being taken Prisoner by the *Turks*, sold into *Muscovy*, where he chang'd his Religion, and turning Monk, was then Superiour of the Convent; and tho' 105 Years old, still remembred some few *German* Words. He was a good humour'd Old Man, and would make us frequent Visits; and, as soon as he had got a Cup or two of *Aqua Vitæ*, would fall a dancing for Mirth.

The *Tartars* of *Nagaia* were formerly govern'd by their own Prince, as well as those of the *Crim* and *Casan*, till they were conquer'd by the *Czar Juan Basilowitz*, who, after the Conquest of *Casan* 1552. also took the City of *Astrachan* by Assault, *Aug.* 1. 1554. and after having forced thence all the *Tartars*, and in their stead settled a Colony of *Muscovites* in the City, which he surrounded with a Stone-wall, and strengthen'd it by other Additional Fortifications, the Great Duke *Michael Federowitz* much enlarged it, by adding that Part, which is call'd *Strelitzagorod*, where the Garrison of *Strelitzes* are quartered. The whole Compass of the City was then 8000 Geometrical Feet; and that side which looks to the River, which there is 2216 Feet broad, affords a goodly Prospect, by reason of the many Turrets and Steeples of Stone, which make a glorious Shew at a distance; but their Houses are generally of Wood, and but indifferently built. We were told that they had an Artillery of 500 Great Brass Pieces of Cannon, besides many Mortars; the Garrison consisted of 9 Regiments of 500 Muskets each, to keep the Neighbouring *Tartars* in awe.

As this City is in a manner the Common Frontier on this side betwixt the two most considerable Parts of the World, not only the *Crim*, *Precopense*, *Bugar*, and *Nagaian Tartars*, but also the *Persians*, *Armenians*, and the *Indians* themselves (who have a peculiar Market assign'd them) drive a considerable Traffick hither, which makes the Customs of this Place, tho' very low, to amount to 25000 Crowns *per Annum*.

The Inhabitants of Nagaia.

The Natives of *Nagaia* are not allow'd to inhabit within the Compass of the City, nor to build any, or to fortifie their Towns and Villages, but are forced to be contented with a Palanka, or Inclosure, with Palisadoes without the City, or else to live in Huts straggling in the open Fields. Their Huts are round, and towards the top like the Chicken-coops in *Germany*, having in the midst a Hole, through which goes out a Stick, having at the End a Piece of coarse Cloth to facilitate the going out of the Smoak, by turning it to the Wind, which they draw in, as soon as the Turf or Cow-dung (their ordinary Fuel) is reduced to a live Coal: They are made either of Bull-Rushes or Canes, and about 12 Feet Diameter. During the cold Season, they cover these Huts with a Covering of coarse Cloth, which keeps the Heat in; and so they pass their time within Doors with their Wives and Children, without scarce ever stirring abroad. In the Summer-time they move from Place to place, according as they meet with the best Pasture for the Feeding of their Cattle; which failing in one Place, they put their Wives and Children, with their Huts and Utensils, upon Carts, Camels, Oxen, and Horses, and so go to another, which is the Reason the *Muscovites* call them *Poloutski*, *i. e.* Vagabonds.

Winter approaching, they all retire about *Astrachan*, where they lodge in Troops at such a distance from one another, that they may be in a condition to assist one another against the *Calmuch Tartars*, otherwise call'd the *Tartars* of *Buchar*, and the *Tartars* near the River *Jaika*; which is also the Reason the *Muscovites* furnish them with Arms in the Winter, which they are obliged to return so soon as the Rivers and Roads are unthaw'd, they being not allow'd to have any Arms either offensive or defensive in the Summer.

These *Tartars*, as well as those of *Dagasthan* (of whom we shall speak anon) are free from all Taxes, but are obliged to serve the *Czar* in his Wars. They have Princes, Commanders, and Judges of their own; but to secure their Allegiance to the *Czar*, some of their Princes are left as Hostages in the Castle of *Astrachan*. 1636.

Their Stature and Clothing.

The *Nagaian*, as well as the *Crim Tartars*, are generally low of Stature inclining to Fat, with large Faces and little Eyes: They are of an Olive-colour, the Men seldom without Wrinkles, like our old Women, little Beards, and the Head shaven. Their Garment is a kind of *Cosaque*, of a coarse, grey Cloth, over which the *Nagaians* commonly wear a kind of a Mantle of black Sheep-skin with the woolly side outward, with a Cap of the same Stuff. Their Women are not unhandsome, and commonly clad in white Linen Cloth, with a kind of a Coif on their Heads, round about which hang a great many *Copees* or *Muscovite* Pence.

They have a Custom of devoting their Children to God, or some *Imam* or Saint; if it be a Girl, she is distinguished from others, by a Ring with a Ruby, Turquoise, or Coral, hanging in her Nostril; if a Boy, he wears it in his right Ear. The same Custom obtains also among the *Persians*. Their Children go all naked, and are Tun-belly'd.

Their Food.

They live upon what their Cattel, their Hunting, and Fishing supplies them with. Their Cattel are very large, like those of *Poland*. Their Sheep, like those of *Persia*, have great fat Tails weighing 20 or 30 Pounds, with hanging Ears, like our Spaniels, and flat Nosed. Their Horses are but small and ill shaped, but strong and hardy. Some Camels they have, but generally with two Bunches on their Backs.

Their ordinary Food is Fish dry'd in the Sun, which they use instead of Bread, tho' they sometimes make Cakes of Meal, Rice, and Millet, and fry them in Oil or Honey. They eat Camels and Horse-Flesh, and their Drink is Water or Milk, but Mares-Milk is in great Esteem among them; with this they treated our Ambassadors.

Their Religion.

They are for the most part *Mahometans* of the *Turkish* Sect: Some also profess the *Muscovite* Religion. They treated us with a great deal of Civility, considering the Constitution of their Country.

Whilst we were busie in providing Necessaries for our Voiage, we were often complemented and presented both by the *Persians* and the *Tartar* Prince; and we no sooner had cast Anchor before the City, but the first sent us all sorts of Fruits, Melons, Apples, Apricocks, Peaches, and Grapes; in lieu of which the Ambassadors regaled them with divers sorts of fine distill'd Waters and Sweat-meats.

The Custom of *Persia* not to come empty handed before Persons of Quality.

The next Day several of the *Persian* Merchants came aboard us, who, according to the Custom of their Country, brought every one a Present of Fruit; and as we were much taken with their frank and civil Behaviour, after we had been so long troubled with Barbarity, we made them so heartily welcome, that some of them fell down drunk upon the Deck, and one was forced to stay with us all night.

The 17th, the *Persian Cupzi* sent us a Present of very fine Rice, and a Vessel of *Garlick* preserv'd after the *Persian* way. Some of his Domesticks who brought the Present, and were Mariners, were surprized at its bigness, and agreed all in this Point, that it would not be fit for the *Caspian Sea*, whereof the high and in a manner contiguous Waves would overwhelm it, unless we took down our Masts. We were not much surprized at their Judgment, considering that their Ships are made like our *European* Bathing Tubs, which scarce take 2 or 3 Foot Water, without Hatches or Pumps, instead of which they use Shovels to cast out the Water. They make use but of one Sail, as well as the *Muscovites*, not knowing what it is to sail with a Side-wind; which is the reason they seldom venture farther than a good Pistol-shot into the Sea. The *Persians* being gone, the Ambassadors sent a large Drinking-Cup, Vermilion gilt, to *Fedor Basilowitz*, the Chief Governor, desiring his Advice concerning our intended Voiage; tho' soon after it was resolved to continue it by Sea.

A Tartar Prince visits the Ambassadors.

Sept. the 19th, we sent our Chaloop a-shore to fetch the *Tartarian* Prince aboard us; he brought besides a Retinue of 40 Persons, another *Tartar* Prince along with him: He was a Person of about 28 Years of Age, of a very good Deportment, fine Countenance, and merry Disposition, being richly clad after the *Muscovite* Fashion. He was received under the Sound of Trumpets, and the Discharge of Three Great Pieces of Ordinance; and, after a stay of two Hours in the Ambassadors Chamber, having taken a view of our Ship, but refused to take any thing of the Collation prepared for him, he was conducted in the same

manner

1636. manner as he came. The *Perſian Cuptzi* having at the Ambaſſadors Invitation promiſed to pay them a Viſit aboard our Veſſel, came accordingly the 21ſt of *September*, in company of a rich *Perſian* Merchant, and a *Priſtaff*. He was received in the ſame manner as the *Tartar* Prince, and treated with a very fine Collation and Muſick; which being ended, they made their Hautboys and Timbrels play ſeveral Tunes. Their Timbrels were made of Earth, the Noiſe of which we could hear, after they were come a good way within the City.

The Cuptzi viſits the Ambaſſadors.

The 22d in the Morning, the Governor having ſent the Ambaſſadors a Preſent of 20 Flitches of Bacon, 12 large Fiſhes dry'd in the Smoak, a Barrel of *Cavayer*, a Tun of Beer, and another of Mead. About Noon, two of the *Poliſh* Ambaſſadors Retinue, the *Cuptzi*, had mentioned to us formerly, came aboard us to complement our Ambaſſadors in the Name of their Maſter, and another Ambaſſador ſent from the *Sophi* of *Perſia* to the King of *Poland*. The *Poliſh* Ambaſſador was a *Jacobin* Friar, named *John de Lucca*; and the *Perſian*, an *Armenian* Biſhop, named *Auguſtinus Baſecius*; and the Perſons ſent to us, two *Capuchins*, one an *Italian*, the other a *Frenchman*.

A Poliſh and Perſian Ambaſſador.

The ſame Day the Ambaſſadors having deſired leave, and ſome Horſes from the Governor, to viſit the *Tartar* Prince, he ſent them very obligingly to the River-ſide the next Day; from whence being conducted to an Apartment prepared for us on purpoſe without the City, and Notice being given to the *Tartar* Prince of the Ambaſſadors Arrival, they walk'd towards his Lodgings, where the Prince received them in the Court, and conducted them into an Apartment richly hung, where they found the *Muſcovite* Envoy *Alexis*, and a *Crim Tartar* Ambaſſador. There was a moſt Noble Collation of Fruits prepared for us, and we had great Plenty of Wine, Beer, Mead, and *Aqua Vitæ*, the Governors Trumpets ſounding all the while. When the *Czar*'s, and his Highneſs our Maſter's Healths were drunk, the Prince preſented the Cup ſtanding, even to our Pages. In the mean time *Alexis*, the *Muſcovite* Envoy, entertain'd us with the Great Qualities of this Prince *Muſſal*, and the extraordinary Rank he bore among the other *Tartar* Princes, as being a Nephew to *Knez Juan Baſilowitz Circaski*, and that his Siſter was to be married to the King of *Perſia*. After the Entertainment, which laſted ſeveral Hours, was over, the Ambaſſadors would have taken a view of the Habitations of the *Tartars* beyond the City; but the *Muſcovite* Guards, according to their wonted Civility, ſhut the Gates againſt them, and ſo obliged us to return aboard our Ship.

The Ambaſſadors viſit the Tartar Prince.

A Piece of Muſcovian Civility.

The 24th, the *Muſcovite* Envoy *Alexis* came to pay the Ambaſſadors a Viſit, and was very magnificently treated at Dinner. This *Muſcovite*, who was about 50 Years of Age, had this Advantage beyond his Countrymen, that he had got ſome Rudiments of the Latin Tongue, and the Mathematicks; which he much improved during our ſtay here, and was arrived to the knowledge of the Uſe of the Aſtrolabe; ſo that when he came to any City, he would take the Elevation of the Pole in the Streets, to the no ſmall ſurprize of his Countrymen.

The 25th, the *Cuptzi* having invited the Ambaſſadors to a Feaſt, he ſent 7 Horſes the 26th, out of which the Ambaſſadors having choſen only two for their own Uſe, and ordered the Gentlemen to walk on foot, they were conducted to a Houſe, which the *Cuptzi* had borrowed from the Governor, for our Entertainment; over againſt which he had hir'd another, where a Scaffold was erected covered with Tapeſtry, for the Conveniency of his Hautboys and Timbrels, who did not ceaſe playing from the time of our coming till our Departure.

The Cuptzi his Feaſt.

The *Cuptzi* met the Ambaſſadors in the Court, from whence he conducted them through two Chambers hung with rich *Turkiſh* and *Perſian* Tapeſtry, into a third hung with Gold and Silver Brocadoe.

In all the Chambers we ſaw Tables and Seats placed according to the *European* Faſhion, purpoſely for our Conveniency; the Tables being loaden with all ſorts of Fruits and Preſerves, ſuch as Grapes, Apples, Melons, Peaches, Apricocks, Almonds, Raiſins of the Sun, Kernels of Nuts, Piſtachoes, and ſeveral *Indian* Fruits, preſerved with Sugar and Honey, covered with Sattin or Taffata.

Soon after, the before-mentioned *Perſian* and *Poliſh* Ambaſſadors came in, having over their own Habits the rich Veſtments preſented to them by the King of *Perſia*, and each a Golden Croſs hanging down upon the Breaſt. As they were well vers'd in the *Latin*, *Spaniſh*, *Italian*, and *French* Languages, ſo their Diſcourſe was very welcome and diverting. 1636.

The Feaſt was according to the Cuſtom of *Perſia*, begun with the Fruits and Preſerves; after two hours, the Meat was brought up in great Silver Diſhes, fill'd with Rice of divers Colours; and upon that, ſeveral ſorts of Meat boil'd and roaſted, as Beef, Mutton, Tame Fowl, Wild Ducks, Fiſh, *&c.* well-order'd, and nicely dreſs'd.

As the *Perſians* make no uſe of Knives at Table, ſo their Cooks always cut their Meat ready for Eating in ſmall Pieces. Each Table has a Carver, whoſe Buſineſs is to take the Meat out of the great Diſhes, in which it is brought up, and to fill ſome leſſer ones, with three or four ſorts of Meat, ſo that each Diſh may ſerve 2 or 3 People. Our Drink was Beer, Mead, and *Aqua Vitæ*, of which however there was not much Drink, till towards the latter end of the Feaſt, when the Cups began to go merrily round, and the whole was concluded with a large Veſſel of Porcelane, full of a certain kind of hot, blackiſh Liquor they call *Kahawa*, of which more hereafter.

It muſt be confeſs'd that we were entertain'd with as much Civility, as poſſibly we could have met with in any part of *Europe*; and having thus taken our leave of all there preſent, we retired under the Sound of Trumpets, Hautboys, and Timbrels.

The 27th, the Ambaſſadors, with ſome of their Retinue, took a Walk round the City, towards the Quarters of the *Tartars*, to view their Habitations. We obſerved by the way that they did not thraſh their Corn here, but tread it out by Oxen and Horſes; neither was there any Hut ſo mean but what had its Hawk or Faulcon. In our Return we met one of their *Myrſes* or Princes, who came from Hawking, with his Hawk on his Fiſt, as had all the reſt of his Retinue: He complemented the Ambaſſadors, declaring how ſorry he was not to have been at home to entertain them.

The Tartars great Hawkers.

The ſame Day, the *Muſcovite* Envoy *Alexis Sawinowitz* ſet out in his Voiage into *Perſia*, by the way of the *Caſpian Sea*.

The 28th, the Ambaſſadors were treated with the ſame Magnificence as before, by a certain rich *Perſian* Merchant, named *Noureddin Mahomet*; and the 29th received a Viſit from the *Tartar* Prince, they had met 2 Days before, who preſented them with ſome wild Geeſe he had taken at the ſame time: He would have been very glad the Ambaſſadors would have gone a ſporting with him the next Day, but that the Governor would not give his Conſent.

Sept. the 30th, the ſaid Governor ſent a Preſent of Ginger-bread, and the Juice of Gooſe-berries made into a Paſte or Rolls, being of a ſharp and pleaſant Taſte: The *Muſcovites* uſe it frequently in their Sawces.

October the 1ſt, the Secretary of the Embaſſy, with two other Gentlemen of the Retinue, being order'd to attend the Governor concerning ſome Buſineſs, he received us very favourably, and made me ſit down by him. But before he would give an Anſwer to what was propoſed to him, he made heavy Complaints againſt the ill Conduct of the Ambaſſador *Brugman*, who had uſed very reviling Language to *Rodivon*, our *Priſtaff*, without the leaſt regard to his Quality, as being the Great Duke's Servant; unto whom if he had committed an Error, Complaint ought to have been made upon that Account, or to thoſe who repreſented his Perſon at *Aſtracan*: He added very obligingly, That tho' it was his Duty to make theſe Remonſtrances he would not impute this Miſcarriage to the whole Retinue, but would give us our Diſpatch, which he did accordingly.

In the mean while having provided our ſelves with good ſtore of Biſket and Beer of our own Baking and Brewing, and with 20 fat Oxen and ſome Barrels of Salt-fiſh for the proſecution of our Voyage, we hired, beſides our *Muſcovian* Pilot, certain *Tartars*, who promiſed to go before us in Boats, and to conduct us over the ſhallow Places at the Mouth of the *Wolga* into the main Sea.

Proviſion for their Voyage.

October 10. we left *Aſtracan*, ſteering our Courſe S. and S. W. but before we got a League, were forced by contrary Winds to the Shoar, where we ſtay'd that Day and the next. Here we were viſited by a certain *Tartar* Prince, a Perſon of a graceful Aſpect, who preſented us with a Mutton, and a Barrel of Milk.

They leave Aſtracan.

We

1636. We obſerved that hereabouts, and all along the *Wolga*, the Earth produces abundance of Simples of an exceſſive bigneſs; the Herb *Eſula* grew as high as a Man, and the *Angelica* Root as big as a Man's Arm.

Simples of a vaſt bigneſs.

The 12th we made but a League.

And the 13th no more, being forc'd to come to an Anchor near a little round Mountain 15 *Verſts* from *Aſtracan*, call'd *Tomakoi-gor* by the *Muſcovites*, we gave it the Name of the *Snaky-Mountain*, by reaſon of the many Serpents we ſaw there.

Serpents.

This Mountain was covered with Caper-Trees, and the Herb *Semper-Vivum* of divers kinds, as Sea Houſe-leek. The adjacent Plain, affords the moſt delightful Proſpect in the World, for ſeveral Leagues together.

The 14th we continued our Voyage with a N. N. E. Wind, and in the Afternoon came to a certain Chappel, call'd *Zuantzuk*, 30 *Verſts* from *Aſtracan*, being the beſt Fiſhing-place, belonging to the Convent of the *Trinity* at *Aſtracan*.

The River *Wolga* is hereabouts divided into many Channels, which make ſo many Iſles, all covered with Buſhes, Canes, and Oziers, as indeed is all the Coaſt of the *Caſpian Sea*, as far as the River *Koiſu*.

Among the reſt there is one Iſle 15 *Verſts* from hence, on which is built a Houſe of a conſiderable height, having on the top a Pole with a Sheeps-skull fixt to the end of it: They aſſur'd us, That this was the Sepulchre of a certain *Tartarian* Saint, and that the Inhabitants, as well as the *Perſians*, that paſs that way, kill a Sheep, part of which ſerves for a Sacrifice, the reſt is conſumed at a Feaſt, and the Head put upon the Pole, where it is left till another be put in the place, or fall off of it ſelf. Hence the *Muſcovites* call this place *Taraski Molobitza*, i. e. *The Tartars Sacrifice*. Behind the Iſle, upon an eaſie Aſcent we diſcovered many Huts.

At Night we came within ſight of another Fiſhing-place, fenc'd in, and guarded by 100 *Strelitzes*, 15 *Verſts* from the Sea. Here we ſaw a great many Dog-fiſhes, or Sea-Hounds, and of that kind of Fowl, call'd *Onocratalus* by *Pliny*, with long Beaks, round and flat at the end, like a Spoon beaten out; having taken its Name from the noiſe it makes like an Aſs, by putting its Beak into the Water.

Large Geeſe or Cormorants.

We alſo diſcovered great Numbers of a kind of large Wild-Geeſe, or rather Cormorants: The *Muſcovites* call them *Babbes*, the *Perſians*, *Kuthum*, and the *Moors* of *Guiny*, *Bombu*.

They reſemble Geeſe in all reſpects, except that they are larger than Swans: Their Bills above a foot and a half long, 2 Fingers broad and forked at the end. They have under their Bills a Bag of Skin, which they can contract or extend to ſuch a bigneſs, that it will contain 3 Gallons of Liquor; and this they uſe as a Reſervatory for the Fiſh they take, till they can ſwallow them.

The Ambaſſador *Cruſius* ſhot one of them upon the *Caſpian Sea* ſide, which was 2 Ells and a half betwixt the 2 Extremities of the Wings; and 7 Foot from the Head to the Feet.

Hiſtory of *Mexico*.

Franciſcus Fernandez ſays, That in *Mexico* there are ſome of this kind, that have Teeth within their Bills.

We alſo ſaw a kind of Wild-Ducks, but bigger than ours, and as black as Crows, with long Necks and forked Bills. The *Muſcovites* call them *Braclan*, they never are ſeen but in the Night time, and their Quills are harder and bigger than Crows Quills.

The 15th we reach'd the Mouth of the *Wolga* 12 Leagues from *Aſtracan*, and full of ſmall Iſles covered with Reeds and Canes, which extend 6 Leagues into the Sea, which is the reaſon, ſome have attributed as many Mouths as there are Iſlands hereabouts, to the *Wolga*, tho' it be certain, that they are within the Sea: The worſt is, that the bottom being all muddy with ſhallow Water, not above 4 or 5 Foot deep, which put us to ſo much trouble, that in 7 Days, we ſcarce advanced 4 Leagues. For,

The 18th we got on a Bank of 5 Foot Water, where after we had ſpent ſeveral Hours in getting off, we came to 6 Foot, but ſoon found it was only a Pit, ſurrounded on all ſides with Sands, at 4 and 4 and a half Foot Water, and the Wind turning to the N. W. the Water fell to 3 Foot, ſo that we found our Ship faſtned in the Mud. We unloaded our Proviſions into the *Tartarian* Boats, and work'd Day and Night to get out, but in vain, there being no hopes of relief till the return of the Water, which could not be expected, without the change of the Wind.

1636.

October 21. perceiving that the Waters were encreaſed to 5 Foot, we began to conceive ſome good hopes, and an enſuing Tempeſt from the S. S. E. brought it up to 9 Foot.

The 22d we might now have got out to Sea, had not the violence of the Winds forced us to continue at Anchor 5 Days longer.

The 23d being a clear Morning, I obſerved the riſing of the Sun, which I found, in reſpect of our Compaſs, to riſe 22 Deg. more to the South, than it ſhould; by which I diſcovered, that in this place, the Needle declined 22 Deg. from the N. towards the W.

The 27th the Tempeſt being allay'd, we hoiſed Sail, but were ſcarce got a League at Sea, before we found our ſelves again in the Mud.

But the 28th ſeeing 13 Sail behind us, coming out of the *Wolga*, which we ſuppoſed to be the *Caravan*, we ſent back our *Tartarian* Boat. But this proved only a Convoy of 500 *Strelitzes*, bound for the Garriſon of *Terki*, with the *Tartarian* Prince, and 2 *Perſian* Merchants.

Finding our *Muſcovite* Pilot very ignorant, and the Maps of the *Caſpian Sea* we had brought along with us, utterly falſe, we thought it our ſafeſt way to addreſs our ſelves to the Colonel of the *Strelitzes*, and to deſire him to furniſh us with an able Pilot to conduct us on the *Caſpian Sea*.

He came aboard us, and being very well treated and merry, he promiſed all the Service he was able to do us, and that he would ſend us a Pilot, we might confide in; but no ſooner was he got into his own Ship, but he ſet Sail, and left us in the lurch. After our Arrival at *Terki*, he had the impudence to viſit the Ambaſſadors aboard our Ship; and being charged with the breach of his Word, he laugh'd at it, and gave us for anſwer, *Ja wi nouat*, a fine matter indeed, to ſpeak of.

A *Muſcovite* Slur.

The only thing we had left upon this occaſion, was to try the Civility of the Maſter of the *Perſian* Ship; who, tho' Owner of all the Goods in the Ship, yet came freely aboard us, and having left the Management of his own Ship to his Servants, he return'd to ours, and being a Perſon pretty well vers'd in the Compaſs, much beyond what the *Perſians* generally are, he cauſed the Anchor to be weigh'd about 11 at Night, he ſteer'd his Courſe to the S. with an E. Wind, with 10 Foot Water, but towards Day we had 18 all along the Coaſt, call'd *Suchator*, to our right, which being a concatenation of 4 ſmall Mountains, jet out into the Sea, and make a great Promontory 100 *Verſts* from *Aſtracan*, and 200 to *Terki*.

The civility of a *Perſian*.

The 29th with a fair Gale, we kept on our Courſe to the S. the Wind S. E. And in the Afternoon, with the ſame Wind to the S. W. at 20 Foot Water, and a Gravelly Bottom, full of little Shells; we found the Declin. of the Needle 20 Deg. from N. to W. We could diſcover no Land all that Day, and came to an Anchor by Night.

October 30. we diſcovered immediately after Sunriſing, the Country of *Circaſſia*, which extending all along this Coaſt from the S. W. to the N. E. makes a ſpacious Bay, in the form of a Creſcent. We did all we could to get beyond the Point of the Gulph, but the Wind veering about to the S. E. had infallibly forc'd us into it, had we not caſt Anchor immediately at the Entrance of the Gulph, and 3 Fathom and a half Water, the Bottom a fat Earth, 6 Leagues from *Terki*.

About 20 Fiſherboats which came from *Terki*, to ſell us ſome Fiſh, put us at firſt into ſome fear, imagining they were *Coſſacks*; but coming nearer we ſoon diſcovered who they were, and bought good ſtore of very large Fiſh at 15 Pence a piece of them; moſt of which, had Lobſters and Crabs in their Bellies.

The remainder of the Day was ſpent in giving God Almighty Thanks for his Deliverance the laſt Year on the ſame Day from the danger we were in among the Rocks of *Oeland*. In the mean time our *Perſian* Pilot went aboard his own Veſſel, that was ſomewhat behind us, to give neceſſary Directions, and not only return'd early the next Morning, but alſo ſent a Boat before us, to ſerve as a Guide.

Octob. the 31ſt a thick Miſt and Calm detain'd us till Noon, when the firſt being diſperſed, and the Wind come to the N. we at laſt got the Point with laveering, where continuing an Anchor till after Midnight, we arrived

1636. *November* the 1st. early in the Morning before the City of *Terki*; and by reason of the Shallowness of the Water, cast Anchor a quarter of a League from the Shoar.

It seems the *Cossacks* had a design to Attack us the Night before near the Point, but missing us in the Dark, happened to light upon the small Fleet, which carried the *Tartarian* Prince, and the *Strelitzes*, but the noise of their Fire-Arms soon having given them to understand, that they were mistaken, and expecting nothing but Blows, they retired, but gave them to understand, that their Business was with the *Germans*.

A Rumor of this Attempt having been spread early in the Morning throughout the City of *Terki*, and the noise of our great Guns having increased their fear, because they knew their Prince *Mussal* to be there, occasioned a great Alarm in the place, which was however soon appeased, when the Prince and his Fleet soon after came into the Road, and after a Salute with their Fire-Arms, invited us to honour him with a Visit at his Mothers.

The City of *Terki*. The City of *Terki* is seated about half a League from the Sea-shoar, upon the small River *Timenski*, a Branch of the great River *Bustro*, and facilitates the Communication betwixt the Sea and the City, which has no other Avenues by Land, being surrounded with Fens for a quarter of a League round. For the rest it lies in a spacious Plain, contrary to what is represented by *Nicholas Jansson Visher*, in his Geographical Map, who mistaking the City of *Turku* in the Province of *Dagestan*, for this of *Terki*, has placed it upon a Mountain: The Elevat. of the Pole is here 43 Dg. 23 Min. 60 Lgs distant from *Astracan* by Sea, and 70 by Land, and the last frontier place of the *Czar* on this side. Its length is 2000 Feet, and breadth 800, the Building even to the Towers and Rampires, being of Wood; tho' of late the Great Duke has caused some Fortifications to be erected of Earth, after the modern way, which are well provided with Cannon. The Garrison consisted then of 20000 Men, 500 whereof were appointed for the *Tartar* Prince's Guards.

The Garrison of *Terki*.

The *Circassian Tartars* inhabit on this side of the River, but of them more at large in our return out of *Persia*.

The next Day the *Cuptzi*, and the other *Persian* Merchants sent the Ambassadors a Present of most excellent Fruit, and let them know at the same time, that if they had a mind to Travel by Land, they might take the conveniency of a great Convoy of 200 Camels, and a great number of *Mules*, which were conducting a *Muscovite* Ambassador to the Frontiers of *Dagesthan*, offering to bear them Company in this Journey, to convince them of the sincerity of their Intentions. As this Proposition was well reliss'd by the Ambassadors, so, (after having obtain'd leave from the Governor) they immediately dispatch'd *Rustan* our *Persian* Interpreter to the Frontiers of *Dagesthan*, 6 Leagues from *Terki*, who upon his Arrival found the Camels and Mules already return'd into *Persia*, the Governor having found means to delay his going by several tergiversations, till he had notice of their return into *Persia*, when he sent word to the Ambassadors, That tho' he had no express Orders upon that account from the *Czar*, yet he would not hinder their Passage by Land.

A Mutiny in the Ship. The Night following, a Mutiny happening in our Ship against *Michael Cordes*, the Captain of which, *Anthony Manson*, a Sail-maker, was found the Ring-leader; he was committed to Prison at *Terki*, till our return out of *Persia*.

November 4. being the Ambassador *Brugman*'s Birth-day, was celebrated in the Morning with a Consort of Musick, and a Discharge of the great Guns: And in the Afternoon a certain *Persian* Lord, an Eunuch, who was sent to carry the *Tartar* Prince's Sister into *Persia*, coming to pay a Visit to the Ambassadors, the Day was concluded with making good Cheer, so that the *Persian*, and his Retinue, were sent home well loaden with good Liquor.

A *Persian* Eunuch visits the Ambassadors.

The 5th Mr. *Mandesio*, the Pastor and Secretary of the Embassy, accompany'd by our *Tartarian* and *Persian* Interpreters, were sent to the Governor, to present him a large Vermilion gilt Cup, and his 2 Secretaries, each with a Ruby.

They present the Governor.

They were also ordered to Complement the *Tartar* Prince's Mother, upon the happy return of her Son. The Governor received and entertained us with great Civility and Magnificence, and among other things, speaking of the *Persians*, told us, That they were very liberal in their Promises, but those that believed above one half of it, would find themselves deceived in their Expectation. 1636.

The Reception of the Ambassadors Envoys by the *Tartar* Prince.

The *Tartarian* Prince *Mussal*, received us in Person at the entrance of his Court, with all imaginable Demonstrations of Friendship, and conducted us into a large and lofty Hall, the Walls whereof being of Earth, were so contrived, that you might see on all sides, at an equal distance, a certain number of Niches vaulted, adorned either with rich Beds, with Silk or Cotton Coverlets, or with many Pieces of *Persian* Tapestry, and Coverlets wrought with Gold and Silk, and great Chests covered with the same: Under the Ceiling hung 2 rows of Wooden and Earthen Dishes, and the Pillars which upheld the Structure, were hung with Cymeters, Quivers, and Arrows of the best kind. The Princes Mother sat in a Chair, wrap'd up in a Black Night-Gown, lin'd with Sables; being a Lady of about 45 Years of Age, of a Noble Stature and good Countenance; her Name was *Bika*. Behind on her Neck, she wore an Oxe-bladder blown up to the utmost, wound about with a rich Scarf embroidered with Gold and Silk; and about her Neck she had another Scarf, both ends whereof hung down about her Shoulders.

The Lady that attended her Person, had also an Oxe-bladder, which we afterwards understood to be the Badge of Widowhood. On her right Hand stood her 3 Sons, the 2 youngest of which could not be distinguish'd in their Habits, from the most inconsiderable Persons of the Country, and behind them several Servants, who in their Faces (being torn with their Nails) bore as yet the Marks of Mourning for the Death of her Eldest Son, who had lately been executed at *Musco*. On the left Hand stood several Aged *Tartars*, who were Officers of the Court.

After the Princess had return'd our Complement, a Collation of Fruit was brought in upon a little Table, and Seats for our conveniency; our Drink was Mead and *Aqua Vitæ*. We urged the Princes to sit down with us, but they excused themselves on account of the Custom of the Country, which did not allow them to sit down in their Mothers Presence. The Collation.

After the Collation, the Princess, and the rest there present, having taken particular notice of our Cloaths, the Princess her self, and the 3 Princes each presented to us a large Cup of *Aqua Vitæ*, extracted out of Millet, as strong as Brandy; the Princes did the same to our Servants.

In the mean time we saw on a sudden a Chamber-door opened behind the Princess; at the entrance of which, appear'd several Ladies, and among the rest, the Princess's Daughter, who was betrothed to the *Sophy* of *Persia*; she was about 16 Years of Age, very handsome and of a clear Complexion, unto which the blackness of her Hair added no small lustre.

The Curiosity of the *Tartar* Ladies. These Ladies were so curious to see our Cloaths, that they push'd one another backwards from the Door, which at the first Wink from the Princess, was shut; but they soon opened it again, to take a full view of us; nay, they would needs call in one of our Servants, were infinitely taken with his Cloaths, and made him draw his Sword, in order to view the Blade; but the *Persian* Eunuch happening to come in, the Door was shut immediately, and we took our leave of the Princess and Princes her Sons, in order to take a view of the City, where we met with several young handsome Women, clad only in a kind of Smocks or Frocks, who would stay us, to view our Cloaths.

Novemb. 6. The *Cuptzi* sent us the Governor of *Derbent*'s Answer to his dated at *Astracan*, *Septemb.* 25. in which he ordered him to bring us along with him by Sea, and *Rustan* our Interpreter returning the 7th from the Frontiers of *Dagesthan*, with Advice, That the beforementioned Convoy of Camels, &c. were return'd into *Persia*, it was resolv'd, that we should continue our Voyage by Sea.

The 8th we received a Present of 2 Sheep, 50 Pullets, and several other Provisions from the *Tartarian* Princess: We had also a Present of Beer, Mead, and a Sheep sent us by the High Chancellor of *Muscovy*.

In the Afternoon, Prince *Mussal* came aboard us, to bid us farewel. He brought along with him another *Tartarian Myrze*, a Brother to the Prince of *Tarku*, in *Dagesthan*; his Habit was the same with the rest of the *Tartars*, having a coarse Cloath Cloak over his old Cloaths, his Countenance sufficiently discovered the fierceness of his Nature, and his Behaviour was in all respects

1636. reſpects anſwerable to it, when he perceived us to pay more reſpect to Prince *Muſſal* than himſelf; for he refuſed to ariſe at the drinking of the *Czar*'s Health, as all the reſt did, and when admoniſh'd by *Muſſal*, to conſider what Country he was in: He anſwered, That he knew not whether he had not as much Right to it as the Great Duke, and began to reproach *Muſſal*, That with all his fine Cloaths, he was no more than a Slave; whereas he in Rags as he was, was nevertheleſs a Sovereign Prince, acknowledging no Superior but God, and abſolutely refuſing to drink the *Czar*'s Health at all, went his ways, and his Servants found means to make a Silver Spoon and a Knife to walk along with them.

The fierceneſs of a Tartarian Myrze.

Prince *Muſſal* ſtaid behind for ſome time, and at parting having ask'd the Enlargement of the Mariner Impriſoned at *Terki*, it was freely granted by the Ambaſſadors.

A good while after Night, juſt as we had diſpatch'd our Buſineſs, a Lacquey came to tell us, That the Wind being turn'd fair, our Ship was ready to ſail; we made all the haſte we could, notwithſtanding which, we found her already under Sail, but the Wind ſoon chopping about, forced her to come to an Anchor.

The Governor in the mean while having ſent us a Preſent of 100 Pieces of Hung-Beef, 4 Tuns of Beer, 1 of Mead, a Cask of Wine, and another of Vinegar, beſides 2 Sheep, ſome Cakes of Gingerbread, and ſome other Bread.

The Ambaſſadors leave Terki.

And the Wind turning to the S. W. we ſet ſail the 10th of *November* with Break of Day, directing our Courſe towards *Derbent*.

About Noon we diſcovered a Bark, which hovering about us at a diſtance, the Ambaſſador *Brugman* ordered a great Gun to be fired, which ſoon brought her near us; ſhe proved a Veſſel laden with Fruits, the Maſter whereof happened to be a Brother of our *Perſian* Pilot, and finding him among a ſort of ſtrange People, broke out into moſt horrid Lamentations, thinking both himſelf and his Brother loſt paſt all Reprieve; neither could he be perſwaded to the contrary, till his Brother gave him a circumſtantial account of the reaſon of our coming here, when he took the courage to come into our Ship with a Preſent of Apples, Pears, Quinces, Nuts, *&c.* and beſides this, ſold good ſtore of very good and large Apples to our People, at the rate of a hundred for 4 Pence.

An Iſle of the Caſpian Sea.

Not long after, we came to the Iſle the *Muſcovites* call *Tzetland*, and the *Perſians Tzenzeni*, 8 Leagues from *Terki*, on the left Hand; we came to an Anchor at 3 Fathom and a half Water, and ſtaid 24 Hours according to the Cuſtom of the *Perſians*. The Ambaſſadors went aſhoar to take a view of the Iſland, but met with nothing worth taking notice of, except 3 long Poles ſet up at the point of the Iſle, and faſtned together at the top, intended for a direction to Mariners, and 2 great Ditches or Holes, wherein lately fire had been made, which in all probability had been done by the *Coſſacks*, who infeſt thoſe Parts.

The whole Iſle, which from N. E. to S. E. is 3 Lgs long, is very Barren and Sandy, ſituate under 43 deg. 5 min. elev. If you look from this Iſle to the S. W. you ſee ſuch high Mountains, as are at firſt ſight ſcarce to be diſtinguiſh'd from the Clouds. The Inhabitants of *Circaſſia*, call it the Mountain *Salato*, and is no other than the *Caucaſus* of the Ancients, in the Province of *Colchis*, now call'd *Mengrelia*, famous for the Fable of *Jaſon*'s Golden-Fleece. The vaſt height of this Mountain has furniſh'd them with the fiction of *Prometheus*, having ſtoln the Fire from the Sun. What *Q. Curtius* affirms, *viz.* That it croſſes all *Aſia*, is not altogether without reaſon, it being certain that the Mountains *Ararat* and *Taurus* approach ſo near to it, that it ſeems but one concatenation of 3 Mountains, which extend through *Aſia*, from *Mengrelia* to the *Indies*. From the *Caſpian Sea* towards the *Euxine Sea* and *Aſia* the leſſer, it is near 50 Lgs in breadth.

Mount Caucaſus in Mengrelia.

Mount Ararat.

Mount *Ararat* upon which *Noah*'s Ark reſted, call'd *Meſſina* by the *Armenians*, *Agri* by the *Perſians*, and *Subeitahn* by the *Arabians*, is diſcovered 15 Lgs into the *Caſpian Sea*, being one vaſt black Rock, without any Verdure, and covered on the top with Snow both Summer and Winter, much exceeding in height Mount *Caucaſus* it ſelf. The *Armenians* and *Perſians* are of opinion, that there are ſtill ſome Remnants there of the ſaid Ark, but petrefied by length of time. We were ſhewn a Croſs of a very black and hard Wood at *Scamachy* in *Media*, which they would perſwade us, to have been made of the Wood of the Ark, notwithſtanding it is inacceſſible, by reaſon of the many Precipices, that encompaſs it on all ſides. 1636.

Theſe high Mountains ſerve for a great direction to thoſe that Sail upon the *Caſpian Sea*, according to the ſeveral Proſpects they afford in different places.

The 11th we continued our Voyage, ſteering our Courſe along the Iſle to the S. At the furthermoſt point of this Iſle is a great Sand-bank, which advancing towards that part of the Continent, from whence a Neck of Land, or Promontory jets out into the Sea, makes a narrow and dangerous Streight here, which made us caſt our Anchor, to avoid the Flats or Shallows: We found at firſt but 2 Fathom Water, but ſoon after 6 or 7, and the Wind turning fair, we ſteer'd our Courſe along the Shoar, and in ſight of it S. S. W. towards *Derbent*. The Wind chopping about, we were forc'd to laveer after Midnight, when ſoon after a Tempeſt ariſing, we were glad to come to an Anchor at 12 Fathom Water, and continued thus the 12th, till 9 at Night, when the Wind turning again to the N. we ſteer'd our Courſe to the S. S. E. By 11 at Night we found betwixt 20 and 30 Fathom Water, and by 12 no Bottom. Soon after the Wind turning to an abſolute Tempeſt, we furl'd up our Sails, and letting the Ship go directly before the Wind, we got thus 2 Leagues in leſs than an Hour.

We had 2 Boats, beſides our Shallop, one of which ſerved for the unloading our Ship, upon an occaſion, the other for the ſounding of the depth of the Water. The 2 Boats were ſoon ſwallow'd up by the Waves, and the Shallop follow'd not long after. Our Ship, which was only of Firr, and bore many a Shock upon the Sand-banks of the *Wolga*, opened ſo on all ſides, that we were forced to be without intermiſſion at the Pump. *A violent Tempeſt.*

Novemb. 13. At Break of Day we found our ſelves ſtill in ſight of Land, and diſcovered the Mountain of *Derbent* about 10 Lgs off, and the violence of the Tempeſt being ſomewhat abated, we hoiſted our Sails, with a reſolution to run the Ship a-ground. But as we had taken our Courſe too high the Night before, and the Wind blew ſtill from the N. W. we were forced beyond the City of *Derbent*, along the *Perſian* Coaſt, which there extends from N. to S. being deſtitute of any Road or Harbours, by reaſon of the Rocks which reach 6 Lgs into the Sea.

We made ſhift however to come to an Anchor about 4 in the Afternoon before the Village of *Niaſabath*, call'd by other Authors *Niſeway*, at 4 Fathom Water, but in a bottom ſo Muddy, and ſo rough a Sea, that it ſtood us in no great ſtead, the Hinges of our Rudder being broken ſoon after, and all Hands employed the whole next following Day and Night in emptying our Veſſel, which was almoſt overwhelmed by the Waves.

Next Morning being *Novemb.* 14. the Tempeſt being ſomewhat abated, we began to think of ſaving our ſelves; but being without a Boat or Shallop, and having given all the Signals of Diſtreſs by Great and Small Guns, without any hopes of Relief, we were endeavouring to make up a kind of Flat-bottom'd-Boat of Deal-Boards, when we ſaw 2 Boats ſent by the *Kaucha*, or Judge of the Village, come very ſeaſonably to our Aſſiſtance. Beſides a Preſent of Apples, they Complemented the Ambaſſadors in the Judges Name, exhorting them to convey into the Boats what was moſt valuable, and to go along with them in Perſon, before the Tempeſt reaſſumed its former Vigour, as they feared it would.

The Ambaſſadors get aſhoar.

The Ambaſſadors took their Advice, and having embark'd in the Boats, what was moſt conſiderable, they follow'd themſelves with part of the Retinue, ſome Soldiers and their Officers, leaving the Sieur *Uchteritz*, the Steward, and the Secretary of the Embaſſy in the Ship, with an intention to ſend the ſame Boats back to fetch them, after they were landed themſelves.

The Judge exepected their coming at the Sea-ſide on Horſeback, and alighted and ſent his Horſe for the more convenient Landing of the Ambaſſadors: But ſcarce had they ſet Foot on the *Perſian* Shoar, but the Fury of the Tempeſt encreaſed more and more, and that to ſuch a degree, that it was abſolutely impoſſible to ſend the Boats back, ſo that in an inſtant, we ſaw our ſelves put to the utmoſt hazard of Shipwreck. The worſt of all was, that by the Trees that ſtood near the Sea-ſide, we obſerv'd that our Anchor was looſe, and that we were forced a quarter of a League

1636. from the Place where the Ambassadors landed; whereupon we cast 2 others, but these as well as our Rudder were lost by 11 at Night. All the Hopes we had left was in our biggest Anchor, which held still; but the Ship drawing Water on all sides, and our Pump being become useless, the Seamen who were quite tired out with Watching and Toil, earnestly intreated the Secretary to consent to the cutting of the Rope, which he however refused for that time, either in hopes of change of Weather, or some speedy Relief from the Ambassadors.

But the Wind, which came about to the E. having also turn'd our Main and Mizen-Masts over-board; and the Day slipping away without any further Prospect of Relief, the Captain, Master, and Master's Mate were consulted, whether we had not best to run the Ship aground. They freely confess'd that the Ship could not hold out many Hours longer in this Condition; but at the same time gave manifest Signs of their Fear, that when the Ship should be lost, they might be look'd upon as useless Persons, and consequently have their full Wages disputed; which making them unwilling to consent to the running aground of the Ship, the Sieur *Uchteritz*, and the Secretary, being overcome with the Outcries of the Seamen, who challenged them to appear before the Tribunal of God, if they consented not, gave the said Captain, the Master, and Master's Mate, a Promise of their full Wages in Writing; which done, the Sieur *Uchteritz*, and the Secretary, gave the first Stroke upon the Cable, whose Example being follow'd by the Seamen, we made strait to the Land, and run the Ship aground near the Place where the Ambassadors, and the rest of our Friends expected as with a great deal of Impatience.

The Ship run aground.

We had no great trouble to justifie our Resolution of running her aground, the Ambassador *Brugman* telling us at first sight, that he with his drawn Sword would have forced some of our People to come to our Relief, or otherwise to order the Captain to do as we had done; but could not prevail with any to undertake that Task.

The *Caspian Sea* changes its Name, according to the Provinces, or the Inhabitants that border upon it: Anciently it was call'd, The Sea of *Chosar*, from the eldest Son of *Togarmah*, who was the Son of *Gomer*, and Grandchild of *Japhet*, third Son of *Noah*.

The *Caspian* Sea.

(a) *Nubius* calls it the Sea of *Travisthan*, and the *Moors*, *Bohar Corsuin*, a Name they also give to the Gulph of *Arabia*. The *Persians* call it *Kulsum*, as they do also the *Red Sea*. By the *Greek* and *Latin* Authors it is stiled the *Hyrcanian Sea*, as also the *Mare Caspium*, and *Caspianum*. The *Persians* have also given it the Name of the Sea of *Baku*, from the City of *Bakuje*, in the Province of *Schirwan*, and the *Muscovites Gualenskoi-Mare*.

(a) Geograph.

Most of the ancient Geographers, as *Dionysius Afer*, *Pomponius Mela*, *Pliny*, *Solinus* and their followers, as *Strabo*, *Martianus*, *Capella*, St. *Basil* the Great, *Macrobius* and others, have endeavour'd to impose upon the World, in affirming this Sea to be only a Gulph of the Great *Indian*, or *Tartarian* Sea, or that it has a Communication with the *Euxine* Sea, or the *Palus Mæotis*, by the River *Tanais*; contrary to what has been asserted by *Herodotus* and *Aristotle*; *viz.* That the *Caspian Sea* is a Sea by it self, having no Communication with any other; which being agreeable to what hath been confirmed to us by the Inhabitants of *Kilan*, who live upon the E. side of that Sea, puts it beyond all Dispute, that as it is encompass'd on all sides with Land, so it may more justly be call'd the *Mediterranean*, than that which generally is known by that Name.

Is a Sea by it self.

But, on the other hand, what is most surprizing, are the great Numbers of Rivers that disembogue into this Sea, without being known what becomes of them; of which we were sufficiently convinced in our Return from *Persia*, when in 20 Days time we cross'd above 80 great and small Rivers. The most considerable we saw in our way were the *Wolga*, *Araxis*, or *Aras*, which joins with the *Cyrus*, now call'd *Kur*, the *Kistosein*, the *Bustrow*, the *Akjai*, and the *Koisu*. To the N. are the Rivers of *Jaika* and *Jems*; and towards the S. and E. the Rivers *Nios*, the *Oxus*, and the *Aroxontes*, call'd *Tanais* by *Q. Curtius*.

What Rivers disembogue into it.

Notwithstanding this vast Accession of Waters, this Sea is not perceived to be any wise encreased, or not known by what Passages these Waters are dispersed. The *Persians* are of Opinion, that betwixt the Provinces of *Tauristan* and *Mesendan*, near *Ferebath*, these Waters are swallow'd up into a bottomless Gulph, and from thence convey'd to the Mountains. But as, according to this Opinion, the said Gulph must be supposed to be as big as the Sea it self, I am rather inclined to side with those, who urge the same Reason for the discharging of the Waters in the *Caspian Sea*, that is alledged for the Ocean's not overflowing the Earth, tho' an infinite number of Rivers fall into it: To wit, That, besides what is consumed by the Mists, the rest is conveyed by Subterranean Chanels to the Sources of the Fountains and Rivers; being by the way cleansed both of its Filth and Salt, by way of Percolation, which makes the Waters of the Rivers be much more sweet near the Springs, than towards the Sea. Those who have given us an Account of the *Caspian Sea*, make its length 15 Days Journey, and its breadth 8; which may not prove much beyond the Scope, if we suppose the Weather to be calm, and they make use only of their Oars. But, upon this occasion, I must not pass by in silence what Observation I have made, contrary to the Opinion of all the Ancient Geographers, concerning the length of the *Caspian Sea*, which is not from E. to W. as it is set down in those Maps, that have been published since the first Impression of this Relation; but reaches from S. to N. as on the contrary its breadth is from W. to E.

1636.

The length and breadth of the *Caspian* Sea.

And this Opinion, besides my own Observation, is consonant in all respects to the Situation of the Maritime Provinces, according to the Tables of Longitude and Latitude, which I had from the *Persians*, and agrees with the Astronomical Fragments of the Learned Mr. *John Graves*; the true length of the *Caspian Sea*, from the Mouth of the River *Wolga* below *Astracan* to *Ferebath*, in the Province of *Mesenderan*, reaching 8 Dgs of the *Æquator*, or 120 *German* Lgs.; and its breadth from the Province of *Chuaresm*, otherwise call'd *Karragan*, to the Mountains of *Circassia*, or to *Schirwan*, being 6 Dgs or 90 *German* Lgs.

What *Q. Curtius* has observed concerning the *Caspian Sea*, *viz.* That its Waters are fresher than that of the Ocean, must also be look'd upon as a vulgar Error of his time, when the *Romans* had not yet passed the *Euphrates*, no more than their Arms; it being certain, that the Water of this Sea is as salt as any other that ever I could taste, unless it be upon the Coast of *Kilan*, or *Hyrcania*, where, by reason of the mixture of the Waters of a great many Rivers, that fall into it on that side, it is brackish, as it is in several Places on the Coast of *Holland*.; and tho' the loss of our Ship and Chaloop disappointed us in our Hopes of making a more ample Discovery of the *Caspian Sea*, yet this we can affirm for Truth, that it likewise neither ebbs nor flows, as having no Correspondence with the Ocean, and that its Waters are not black as Ink, as (a) *Petreius* would perswade us, and that it is full of Islands, the Water of it being of the same Colour as other Sea-water; and as to the Isles he mentions, tho' the *Tartars*, *Persians*, and *Muscovites* seldom venture far into this Sea, yet upon the most exact Enquiry I could make, they all agree in this Point, that there is but one Island in this Sea, wherein there is, I will not say, either Village or City, but not so much as a House, unless it be in the Isle of *Ensil*, near *Ferebath*, where they have erected a few Huts, not so much for their settled Habitations, as for the Conveniencies of their Pastures, which are very good there. Neither has it any safe Harbours. The Haven betwixt the Isle *Tzenzeni* and the Continent near *Terki*, (we spoke of before) and another on the side of the *Grand Tartary*, near the City of *Minkischlack* (wrongly call'd *Mangustave* by (b) *Jenkison*) deserve the Preference before the rest: Those of *Baku*, *Lenkeran*, and *Ferebath*, as they are none of the worst, being on the other side none of the safest.

The Water Salt.

Neither ebbs nor flows.

(a) History of *Muscovy*.

(b) In his Itinerary.

Q. Curtius likewise mentions an infinite Number of Serpents, which are bred in this Sea: But the Inhabitants of *Kilan* assur'd us, that it was a thing never heard of thereabouts, no more than what is related by (c) *Contarin* of a certain great round Fish, without a Head, of an Ell and an half Diameter, from whence the *Persians* draw an Oil to grease their Camels, and to use in their Lamps; but that they were plentifully furnished with such an oleaginous Liquor from the Mountain of *Barmach*, near the City of *Baku*, from whence incredible Quantities are transported all over the Kingdom.

(c) In his Travels.

'Tis true we saw a certain kind of a Fish, which they call *Naka*, *i. e. Glutton*, with a very short Nose, and the Head as it were within the Belly, with a round Tail, being 7 or 8 Foot in breadth, and as many in length.

This

1636. This as well as the white Fish fastens it self with the Tail to the Fishermens Boats; and, if they be not very careful, overturns them. They catch this Fish with a Hook tied to a great Cord, the Bait being the Liver or Flesh of Beef and Mutton; and this Creature is the only one I know of that deserves the name of a Monster, or *Bellua*, as (*d*) *Pomponius Mela* calls it, of which he says there is such an infinite number in the *Caspian Sea*, that thereby it is chiefly rendred unnavigable. Neither do *Contarin* and (*e*) *Bizarrus* deserve better Credit, when they assure us, that the *Caspian Sea* affords no other Fishes, nothing being more certain, than that there are abundance of *Sturgeons*, *Salmons*, and also a certain kind of *Herrings* in this Sea, besides good store of other Fish, which are numbred among the fresh Water Fishes, such as *Breams* and *Barbels*; but the last are insipid, if they are above 2 Foot long. It produces also a kind of *Trouts*, call'd *Suggath*: These they dry in Smoak; and after they have wrapp'd them in a clean Linen Cloth, broil them in hot Ashes, which makes a very good Dish. Pikes and Eels are not known in *Persia*: Their King farms out the Fishing of the *Caspian Sea*, near the Mouths of the Rivers, from *September* till *April*, during which time there is a Fence of Stalks or small Palisado's made round these Places; but all the rest of the Year every one is at liberty to fish in these Places, as well as in the *Caspian Sea*, at all Times. 1636.

(*d*) In his Geography.

(*e*) His Travels into Persia.

CHAP. V.

The Ambassadors from the Duke of Holstein's *Travels into* Persia.

THAT Part of *Persia* where we were Shipwrack'd, is call'd *Muskur*, Part of the Province of *Schirwan*, (the *Media* of the Ancients) under the Government of *Derbent*, which comprehends from that City to the Province of *Kilan* above 200 Villages. But before we proceed to give you a farther Account of our Travels, it will not be amiss to give the Reader a short Account of the Provinces belonging to the *Persian* Empire, considering especially that most of our Modern Authors have confounded the Names of the Cities and Provinces, taken from the *Greek* and *Latin* Histories, with the Modern.

(*a*) Hist. Lib. 7. The Name of *Persia*.

(*a*) *Herodotus* speaking of the Ambassador *Xerxes*, King of *Persia*, sent to the *Greeks*, tells us, That he pretended to be descended from *Perses*, the Son of *Perseus* and *Andromeda*. According to *Ammianus Marcellinus*, the *Persians* derive their Origin from the *Scythians*; who, as *Pliny* says, call them *Chorsari*. They are stiled *Elamites*, in the Scripture, and they give themselves the Name of *Schai*, thereby to be distinguish'd from the *Turks*, who for the same Reason call themselves *Sunni*. As the *Turks* are ambitious to be call'd *Mussulmans*, so the *Persians* affect the Name of *Kisilbachs*, *i. e. Red-Heads*: Of which more hereafter.

As *Parthia* and *Persia* were beyond all Dispute two distinct Kingdoms, and that the Name of *Persia* was not common to both, till the first was incorporated with the last; so we now comprehend under the Name of *Persia*, all the Provinces annexed to it, either by Conquest or otherwise subject to the *Persian* Empire, which reaches from N. to S. W. from the *Caspian Sea*, to the Gulph of *Persia*, and from E. to W. from the River *Euphrates* (call'd *Moratsu* by the *Turks*) to the City of *Candahar*, upon the Frontiers of the *Indies*. When we make the *Caspian Sea* its Frontier on one side, we comprehend therein one half Part of that Sea, extending along the Mountains of *Armenia*, to the W. as far as the River of *Ruth-Kane Kurkahn* (the *Oxus* of the Ancients) the common Boundary betwixt the *Persians* and the *Usbeques*, or the *Tartars* of *Buchar*, who are for the most part Tributaries to the Kings of *Persia*.

(*b*) Politic. Regia.

(*b*) *Bottero* makes the Extent of *Persia* from N. to S. 18 Degr. whereas from the first City of *Persia*, near the *Caspian Sea*, to the *Persian* Gulph, there are scarce 12 Degr. as is evident not only from the Map we here give of it, but also from that of Mr. *Sanson*'s, and that of Mr. *Graves* lately published in *England*, where you will find the City of *Husum*, call'd *Rescht* by the Inhabitants, within 2 Lgs from the *Caspian Sea* under 37 Degr. and the City of *Ormus*, upon the *Persian* Gulph, at 25 Degr. making no more that 12 in all. It cannot be denied but that its length is above 20 Degr. from the *Euphrates* to the *Indies*; but it must also be consider'd, that 1 Degr. of Longitude under the 37th Degr. of Latitude under which *Persia* lies, consists no more than of 50 Minutes.

The Principal Provinces of the Modern *Persia*, are; *Erak*, *Fars*, *Schirwan*, *Adirbeitzan*, *Kilan*, *Tnabristan* or *Mesenderan*, *Iran* or *Karabag*, *Gieraszan*, *Subustan*, *Sitzestan*, *Kirman*, *Guisistan*, and *Tzisire*, or *Diarbeck*.

The Province of *Erak*.

The Name of *Erak*, or *Hierak*, is common to two different Provinces, in one of which is the City of *Bagdat* or *Babylon*, its Metropolis, and is beyond all question the ancient *Assyria*: But of this we are not to treat here. The Province of *Erak* we are now to speak of, which is also call'd *Erak-atzem*, to distinguish it from the other, call'd *Erakain*, lies in the very Centre of *Persia*, adjoining to the Province of *Fars*, the *Parthia* of the Ancients. Besides the City of *Ispahan*, the Metropolis not only of this Province, but also of the whole Empire, it has the Cities of *Caswin*, *Soltanie*, *Senkan*, *Sawa*, *Kom*, *Kaschan*, *Rhey*, *Schaherrisur*, *Ebbeher*, *Hemedan*, *Dorkasin*, *Theheran*, and *Kulpajan*, at which last Place the best Bows in *Persia* are made.

The Province of *Fars*.

The Province of *Fars* is properly the Ancient *Persia*, of which *Persepolis*, burnt by *Alexander* the Great, was the Capital City; out of the Ruines of which the City of *Schiras*, upon the River *Bendemir* (call'd *Arakis* by *Q. Curtius*) was built. Its other Cities are *Kasirun*, *Bintizan*, *Firusabath*, and *Astar*; as also the little Province, and City of *Lahor*.

The Province of *Schirwan*.

The Province of *Schirwan*, commonly call'd *Servan*, is the same the Ancients call'd *Media Atropacia*, the most Northern Part of the Ancient *Media*. The Chief City of this Province is *Scamachie*, besides which there are *Bakuje*, situate upon the Foot of a Mountain near the *Caspian Sea*, which thereabouts is call'd the Sea of *Baku*: That of *Derbent*, call'd *Pilæ Caspiæ* by the Ancients, which owes its Origin to *Alexander* the Great, who gave it the Name of *Alexandria*, from whence it is to this day call'd by the Inhabitants, *Schacher Junan*, *i. e.* the *City of the Greeks*. The City of *Schabran* in the Country of *Muskur*, near which we were Shipwrack'd: There are also to be seen here the Ruins of the City of *Eres*, or *Aras*, upon the River *Arras*, now call'd *Arisbar*.

The Province of *Iran*.

The Province of *Iran*, call'd *Karabag* by the Inhabitants, is inclosed betwixt the two Famous Rivers of *Aras* and *Kur* (the *Araxes* and *Cyrus* of the Ancients) and comprehends Part of *Armenia* and *Georgia*, now call'd *Armenich* and *Gurtz*, by the *Persians*. This is one of the noblest Provinces of all *Persia*, as producing the greatest Quantity of Silk before any other: It is subdivided into the following Provinces; *Kappan*, *Tzulfa*, *Scabus*, *Sisian*, *Kesbetas*, *Sansebil*, *Ervan* or *Iruan*, *Kergbulag*, *Angustama*, *Aberan*, *Scorgel*, *Saschat*, *Intze*, *Thabak-melek*, *Thomanis*, *Aliget*, and *Tzilder*. Its Principal Cities and Forts are, *Berde*, *Bilagan*, *Skemkur*, *Kentze*, *Berkuschat*, *Nachtschuan*, *Ordebad*, *Bajesied*, *Maku*, *Magasburt*, *Tiflis*, and *Tzilder*. As I had the good Fortune to meet with a very accurate Map, together with an exact Description of this large Province, we will endeavour to find an occasion to speak more at large of it hereafter.

The Province of *Adirbeitzan*.

The Province of *Adirbeitzan*, (commonly called *Adirbajon*, or *Adarbigian* by the *Europeans*) is the most Southerly Part of *Media*, call'd *Media Major* by the Ancients. And considering that the Province of *Kurdestan* is the same which the Ancients call'd *Assyria*, this

1636. this Province may in some measure be call'd the most Northern Part of *Assyria*, since they have their Frontiers common, and in a manner confounded on that side. It borders to the E. upon the Province of *Kilan*; is divided from the Province of *Schirwan* by the Desarts of *Mokan*, and from that of *Karabag*, by the River *Aras*. This Province is also subdivided into many lesser ones, such as *Erschee*, *Meschkin*, *Kermeruth*, *Serab*, *Chalchal*, *Tharumat*, *Suldus*, *Utzan*, &c. Its Chief Cities are *Ardebil* and *Tauris*: The first of which is famous for the Birth of *Schich Sefi*, Author of the *Persian* Sect, whose Tomb, as well as those of several *Persian* Kings, are as yet to be seen here. The City of *Tauris* or *Tabris*, which some affirm to be that of *Gabris* mentioned by *Ptolemy*, and some the Ancient *Ecbatana*, formerly the ordinary Residence of the Kings of *Persia*, is still one of the richest and most populous of that Kingdom, being seated at the Foot of the Mountain *Orontes*, 8 Days Journey from the *Caspian* Sea. The other Cities are, *Merragne*, *Salmas*, *Choi*, *Miane*, *Karniarug*, *Thesu*, *Thel*, and *Tzunster*. *Tzors* and *Urumi* are two Places strongly fortified; the latter of which is famous for the Tomb of *Burla*, the Wife of King *Casan*, which is above 40 Feet long.

The Province of *Kilan*. The Province of *Kilan*, which is encompass'd after the manner of a Crescent, with a Mountain covered with Trees, and watered by many small Rivers, is the same with the Ancient *Hyrcania*, and comprehends now several other Provinces; among which some number that of *Thabristan* or *Mesenderan*, whose Inhabitants were call'd *Mardi* in the time of *Alexander* the Great. The rest are, *Kisilagas*, *Deschtenend*, *Maranku*, *Maschican*, *Lengerkuman*, *Astara*, *Buladi*, *Schigkeran*, *Nokeran*, *Kilikeraa*, *Houc*, *Lemur*, *Disckeran*, *Lissar*, *Tzoulandan*, *Rihk*, *Kesker*, *Resche*, *Lahetzan*, and *Astarabath*, containing 40 Cities, besides a great number of Villages. The Chief Cities are *Astarabath*, the Capital of the Province of that Name; and *Firascu*, where you meet with the finest Turquoises of all *Persia*.

Mesenderan. In *Mesenderan* are *Amul*, *Funkabun*, *Nei*, *Saron*, *Nourketzour*, and the noble and pleasant City of *Ferebath*; having taken its Name from the Word *Ferah*, which signifies Pleasant; the Country hereabouts being call'd by the *Persians*, the Garden of the Kingdom.

Lahetzan. The Principal Cities of *Lahetzan* are, *Lenkern*, *Kutsesbar*, and *Amelekende*. This Province is famous for the Goodness of the Silk it produces. The Province

Resets. of *Resche* has, besides the Capital City of the same Name, those of *Kisma*, *Fumen*, *Tullum*, *Scheft*, *Dilum*, and *Massula*; the last being built upon a Mountain, which contains a great Iron-Mine. This Province abounds also in Walnut-Trees, which furnish all *Persia*

Kesker. with Wood for Dishes. In *Kesker* are, the Cities of *Kesker*, *Scaherruth*, *Kurab*, *Hensheli*, *Dulab*, *Schal*; and, towards the N. *Ruesseru*, *Mumscaker*, *Sengueraszara*, *Houc*, *Choschkaderene*, *Henkelan*, and *Kisilagats*. There are only four Passages leading into the Province of *Kilan*, of which more in the last Book of our Travels, as also of the *Caspian* Gates.

The Province of *Chorasan*. The Province of *Chorasan* (the *Bactriana* of the Ancients) borders to the W. upon *Mesenderan*, and among other Provinces into which it is subdivided, comprehends that of *Heri*, the Capital City of which is *Herat*. This Province is one of the most renown'd of all *Persia*, for its Fertility, vast Extent, and Traffick. The City of *Mesched* otherwise call'd *Thus*, is surrounded with a noble Wall adorned with many fair Structures; and, if we may believe *Texeira*, with 300 Towers distant one from another about a Musquet-shot. Here is also the Tomb of *Iman Risa*, one of the 12 *Persian* Saints, of the Family of *Aly*, which in all respects is not inferiour to that of *Ardebil*. In the Country, near the City of *Nisabur*, is a certain Mountain which produces such excellent Turquoises, that the King does not allow any of them to be sold, but to himself. At *Herath*, the Second City of this Province, is made the best *Persian* Tapestry, where the *Indians* drive a great Trade, as lying in the direct road betwixt *Candahar* and *Ispahan*. The Cities of *Thun*, *Thabeskileki*, and *Thabes-Messinan*, are also very considerable for their Silk Manufactories. All the rest of the Cities, as *Sebsevar*, *Turschis*, *Kain*, *Puschentz*, *Badkis*, *Meru*, *Merwend*, *Tzurtzan*, *Fariab*, *Asurkan*, *Belch*, *Bamian*, *Semkan*, *Thalecan*, and *Sus*, are Places of great Traffick, and very populous: This Province produces also the best Manna in the World.

The Province of *Sablusthan*. The Province of *Sablusthan* lying more to the E. is the same whose Inhabitants are by *Q. Curtius* call'd *Paropamisadæ*, from the Mount *Paropamisus*, a Branch of the Mount *Taurus*; where, according to *Goropius Becanus* his Opinion, *Noah*'s Ark rested after the Deluge. The Cities of this Province are, *Beksabath*, *Meimine*, *Asbe*, *Busi*, and *Sarents*. 1636.

Sitzistan. The Province of *Sitzistan*, otherwise called *Segestan*, *Sagestan*, and *Sistan*, lies Southward from the Province of *Sablustthan*: Its Ancient Inhabitants were call'd *Drangæ*, being surrounded on all sides with high Mountains. It is the Country of *Rustan*, the Principal Hero of the *Persian* Histories and Romances: Its Cities are, *Sistan*, *Chalak*, *Ketz*, &c.

The Province of *Kirman*. The Province of *Kirman* is also one of the greatest of *Persia*, lying betwixt those of *Fars* and *Sitzistan*, and extending to the Sea-Shore, near the Isle of *Ormus*. Tho' the Country be very Mountainous, yet do the Valleys afford such vast Quantities of all sorts of odoriferous Flowers, but especially of Roses, that with the Water thereof a considerable Trade is carried on to *Ispahan*, by a certain kind of People call'd *Lurs*, distinguish'd from the other *Persians* by their Head-dress, being a kind of Coiffure, longer and narrower than the ordinary Turbants, with a Tassel hanging down over the back. This Province also produces a certain Drug, which is accounted a Sovereign Antidote against the Worms, and therefore called *Daru Kirman*, the Word *Kirman* signifying a Worm. Its chief Cities are, *Birsir*, *Bermasir*, *Bem*, *Chabis*, *Tzireft*, *Kamron*, and *Ormus*. *Kamron* is a Sea-Port, whence it is called *Bender*, or *Bender Kamron*. *Ormus*, by the *Persians* call'd *Hormous*, is an Island about 3 Lgs from the Continent; of which two last Places a further Account will be given in Mr. *Mandelslo*'s Travels into the *Indies*. This Province is barren to the N. but very fertile near the Sea-side: It comprehends also the Province of *Mekeran*, wherein are the Cities of *Firh*, *Kitz*, and *Chalak*.

The Province of *Chusistan*. The Province of *Chusistan*, (the *Susiana* of the Ancients) call'd *Elam* by the *Hebrews*, lies betwixt the Province of *Fars* and the River *Dilsel*, the Capital City of which was *Susa*, and is now call'd *Desu*. The Palace of *Susa* stood upon the River *Ulai*, famous for the great Feast made here by K. *Ahasuerus*. Its principal Cities are, *Ahawas*, *Ramchormus*, *Scabur*, *Askar*, and *Arhan*. The Heats are so excessive here on the S. side of the Mountains, that the Inhabitants are forced to leave the Cities, and to retire to the other side.

The Province of *Tzisire*. The Province of *Tzisire*, or *Diarbeck* (the Ancient *Mesopotamia*) is inclosed betwixt the Rivers *Euphrates* and *Tygris*, which the *Turks* call *Digel*. This being a Frontier Province, is sometimes under the *Turkish*, sometimes under the *Persian* Jurisdiction, this Province commonly following the Fate of either of those two Princes, which of them is Master of *Bagdat* or *Babylon*, and *Mosul*, which some would have to be the Ancient *Nineve*; tho' indeed *Bagdat* is not properly in the Province of *Diarbeck*, but in that of *Erak* or *Eracain*, which has also the Cities of *Wasith*, *Besre*, *Rusa*, and *Medain*.

As it is beyond all Dispute, that *Bagdat* was built out of the Ruins of the Ancient *Babylon*, so nothing is more certain, than that it stands not in the same Place; this being situate upon the River *Tigris*, which falls into *Euphrates*, a Lg below this City, whereas *Babylon* stood upon the *Euphrates*, which, according to *Strabo*, ran thro' it. The *Persians* are of Opinion that the *Babylonians* had their Summer-Houses about the Place where *Bagdat* now stands, which appears not altogether improbable; the Word *Bag* signifying a *Garden*, and *Bagdat* a *Place full of Gardens*.

But it is time to return to our Travels. The Country where we were cast ashore was all Green at the time of our Arrival, and continued thus till the middle of *December*, the Soil being extraordinary fertile in Rice, Wheat, Barley, and Hay, tho' they make but little of the last, unless it be for the Convenience of Travellers, because they keep the Cattle abroad the whole Year round. This Province, as well as that of *Kilan*, produces great store of Vines, which being planted all along the Hedges, are fasten'd to the Trees, and affords vast Quantities of Wild Fowl, especially Pheasants, as also Hares in abundance. They have in those Parts two kinds of Foxes; one is the same with those of *Europe*, call'd *Tulki* by the Inhabitants; the other, call'd *Shakal*, of the same bigness; but having instead of Hair a certain Wool, and white Bellies, their Ears black, and their Tails not so big as our Foxes. They run in the Night-time in Herds about the Villages, and make a doleful Noise.

The Fertility of the Province of *Schirwan*.

The

1636. The Inhabitants make uſe of Buffiers, inſtead of Horſes, and make them draw Wood, or any other thing, like Horſes: They feed them with *Fenugreek*, which they ſow, as we do with Lentils; they cut it green, Herb and Seed together, and ſo give it them to eat. Their Cows Milk produces a Cream of 2 Fingers thick, of which they make a great ſtore of moſt excellent Butter, but make no Cheeſe, except out of Sheeps-Milk.

Their Houſes. The Village of *Niaſabath* lies under the 41 Dg 15 Min. Elev. having not above 15 or 16 poor Houſes ſcatter'd up and down, built of Clay exactly ſquare, with flat Roofs covered with Turfs, ſo that a Man may conveniently walk upon them; this being the way all over the Eaſt; nothing being more frequent in thoſe Parts, than to eat and ſleep on the flat Tops of their Houſes, under Tents erected for that purpoſe for the Coolneſs of the Air. However theſe Houſes we were at firſt lodged in, were handſome enough within, the Floors being covered with Tapeſtry, and we were very civilly entertain'd; but the Village being too ſmall to contain us all, we pitch'd our Tents near the Ambaſſadors Lodgings. The worſt of all was, that we were forc'd to make ſhift with the mouldieſt Scraps of Bread we could pick up out of the Wrack of our Ship, which furniſh'd us with Fuel; and inſtead of Beer, we were forced to be contented with the muddy Water of an adjacent Torrent.

Nov. the 19th, the *Sulthan*, or Governor of *Derbent*, ſent 2 Perſons very well accoutred to complement the Ambaſſadors upon their Arrival in *Perſia*; and, beſides his Letter, brought a Preſent of 2 Horſes, 2 Oxen, 12 Sheep, 20 Pullets, 3 Pitchers of Wine, 1 Pitcher of Water, 2 Paniers of Apples, and 3 Sacks of Wheat-flour.

The Ambaſſador *Brugman*'s Incivility. But the *Sulthan*'s Letter making mention but of one Horſe, and the Ambaſſador *Brugman* finding his not ſo good as the other, would by no means accept of it, notwithſtanding thoſe that brought them, proteſted ſolemnly, that this Miſtake was occaſioned by the Governor's ſuppoſing there had been but one Ambaſſador; but that they underſtanding by the way, that there were two, had brought the other as good as they could find it, as not queſtioning the *Sulthan*'s Intention, that they ſhould do ſo; but notwithſtanding all their Excuſes, the Ambaſſador perſiſted in his Reſolution, and would needs ſend back theſe 2 Perſons without any Preſents, contrary to the Cuſtom both of *Perſia* and *Muſcovy*: All which was ſo highly reſented by the *Sulthan*, that ever after he did us all the ill Offices he could.

The 22d of *Nov.* the Ambaſſadors ſent one of our Retinue, with a *Perſian* Interpreter to *Scamachie* to the *Chan*, or Governor-General of the Province of *Schirwan*, to give notice of our Arrival, and to deſire him to furniſh us with all Neceſſaries for the continuation of our Journey. But the ſaid Governor, having received Intelligence of our Arrival before, had immediately diſpatch'd a *Mehemander*, or Conductor, (who ſupplies the Office of the *Muſcovite Priſtaffs* in *Perſia*) but our People miſs'd him by the way.

Accordingly the ſaid *Mehemander* arrived the 29th of *November*, being ſumptuouſly cloathed, and excellently well mounted, the Harneſs being embroider'd with Gold and Turquoiſes. He complemented the Ambaſſadors in a very handſome and obliging manner, offering his utmoſt Aſſiſtance as long as we ſhould be under his Conduct, which was to be as far as *Scamachie*. We treated him, and his Retinue, with ſome Fruits and *Aqua Vitæ*, and entertain'd him with our Muſick, and the Diſcharge of ſome of our Great Guns; which he took ſo kindly, that, as ſoon as he was returned to his Lodgings, he ſent us a Preſent of 5 Sheep, 3 Pitchers of Wine, and ſome Pomegranates.

Nov. the laſt, the Meſſenger, and the Interpreter, that had been ſent to *Scamachie*, return'd from thence, with Advice that having met with the *Chan* at ſome diſtance from the City, he had given them a very kind Reception, aſſuring them that he had already diſpatcht a *Mehemander*, to conduct and provide for the Ambaſſadors: He told them further, that he underſtood that their Retinue conſiſted of 300 Perſons; but that, if they had twice the number, they ſhould be very welcome, and that he long'd to ſee them: He enquir'd at the ſame time of the Interpreter, concerning the Quality and Temper of the Ambaſſadors, and our manner of Life.

The firſt Effects we felt of the *Sulthan* of *Derbent*'s Diſſatisfaction, was, that having denied us a ſufficient number of Cattle for the proſecution of our Journey, we were forced to ſend back our *Mehemander* to *Scamachie*, to provide us with ſome from thence, and conſequently to ſtay near a Month at the Village of *Niaſabath*. 1636.

The *Perſian Captzi* comes to *Niaſabath*. Much about the ſame time the *Perſian Captzi* we mentioned before, arrived alſo at *Niaſabath*, after having run no ſmall hazards upon the *Caſpian Sea*.

A ſmall Boat with only 5 Perſons in it, being got in there before, *viz.* the 24th of *Nov.* after they had been ſtrugling for 10 Days together, to get aſhore. In the mean time, as the Humourſomeneſs of the Ambaſſador *Brugman* put ſome of our Company under no ſmall Affliction, we made a kind of a Club, and meeting with a kind of a ſmall Peninſula made by a River about a Quarter of a Lg from the Village, we uſed frequently to divert our ſelves there under the Shadow of the Vines, with a Cup of *Aqua Vitæ* and Sack, and ſome Gamon of Bacon, and Neats Tongues.

A Tartar Prince viſits the Ambaſſadors. *Dec.* the 9th, The ſame *Tartar* Prince of *Tarku*, whom we had ſeen near *Terki*, came to pay a Viſit to the Ambaſſadors, in company of his Brother, and a Retinue of 20 Perſons. The next Day he ſent us a Preſent of an Ox, ſome Sheep, and 2 great Paniers of Apples, in lieu of which the Ambaſſadors preſented him with ſome Ells of Cloth and Sattin, a Veſſel of *Aqua Vitæ*, and a Roll of Tabaco, beſides a Barrel of Gun-powder of 80 Pounds, which he moſt earneſtly deſired. But what rejoiced us moſt, was the ſight of our *Mehemander*, who returning the ſame Day from *Scamachie*, brought us the good News, that within 15 Days we ſhould be provided with Cattle and Carriages ſufficient for the Proſecution of our Journey: And accordingly the 12th, ſome Horſes and Camels came to us, the reſt being kept back by the falling of the Snow; which making the Ways ſlippery, the Camels, whoſe Hoofs are not ſo flat as thoſe of other Beaſts, could not travel without a great deal of Hazard, this obliged us to ſtay 10 Days longer; during which Interval, the Ambaſſador *Brugman* committed a great Piece of Indiſcretion, by cauſing ſome Pieces of Timber, that were by the *Sophy*'s Orders brought to the Sea-ſide for the building of Ships, to be cut in Pieces, to make Carriages thereof for our Artillery, notwithſtanding the Remonſtrances of the *Perſians*; who, to be even with us, took Care afterwards to furniſh us with ſo few Horſes, that we were forced to leave theſe Carriages behind us.

Dec. the 21ſt, Two *Mehemanders*, one from *Scamachie*, the other from *Derbent*, brought 40 Camels, 30 Waggons, drawn by Buffiers, and 80 Horſes: But the Baggage being loaden, and ſent before with part of the Retinue, there were but 60 Horſes left for 94 Perſons. The *Mehemander* laid the Fault thereof upon the Governor of *Derbent*, whom we had diſobliged, ſwearing *by the Head of his King*, (the moſt Sacred Oath among the *Perſians*) that this was the reaſon he could not get any more; but that as ſoon as we ſhould come within Limits of the Government of *Scamachie*, we ſhould not want any thing that was neceſſary.

The Ambaſſadors leave *Niaſabath*. Accordingly we left *Niaſabath* the 22d of *Dec.* ſome of the Footmen and Guards being forced to travel on Foot, we took our way to the S. along the *Caſpian Sea*, croſſing that Day 4 ſmall Rivers. The firſt Place we lodg'd at, was a Village call'd *Mordou*, 4 Lgs from *Niaſabath*. The Houſes here were built of *Ozier* and Canes, and round like thoſe of the *Tartars*; we ſpent the Night very ill, for want of Fuel, this Village lying in the midſt of the Fens, from whence it has derived its Name *Mordou*, ſignifying a Fen. The many Springs which are hereabouts, ſend forth their Waters with ſo much Violence, that they never freeze. They are full of Swans, whoſe Down is gathered for the *Sophy*'s Beds.

The *Padars*. The Inhabitants of this Village are call'd *Padars*, uſing a peculiar Dialect, participating both of the *Turkiſh* and *Perſian* Languages. They are *Mahometans*, but inclining to the *Turkiſh* Sect, accompany'd with certain odd Superſtitions; among others, they never eat their Meat till it be almoſt cold after it is dreſs'd; and if any one happen to breath, or blow upon it, they caſt it away as impure.

The Ambaſſador *Brugman* having made his Complaint to the Bayly of *Niaſabath* concerning the ill Uſage of the *Sulthan* of *Derbent*, in not providing us with ſufficient Carriages, he excuſed the ſame, alledging that the ſaid *Sulthan* did perhaps not imagine we had ſo much Baggage: And the next Day our *Mehemander* brought us 20 Horſes more; ſo that having left part of our uſeleſs Baggage behind, we got all our People on Horſe-back, and travell'd the next Day 3 Lgs to a very handſome

1636. handsome Village, call'd *Tachouſt*. The 24th having travell'd 3 Lgs further, we came to the Mountain of *Barmach*, where we lodged that Night in a *Caravanſera* or Publick Inn, at the Foot of the Mountain. These *Caravanſera*'s are built within a Day's Journey from one another in the Deſarts of *Perſia*, for the Accommodation of Travellers, who muſt be ſure to bring all their Proviſions and Forage along with them, there being nothing to be met with in them, but bare Walls and Chambers, with a Roof on the top to keep them dry.

They lodge in a Caravanſera.

This *Caravanſera* was an ancient Four-ſquare Structure of about 40 Paces, built of Free-ſtone. Over the Gate were 2 Chambers, where we found certain Inſcriptions in *Hebrew* Letters and Character, but no body in the Company knew what to make of them.

The 25th of *Dec.* after our Morning Devotions, ſome of our Retinue being invited thereunto by the many ſurprizing Relations the *Perſians* gave us of this Mountain, had the Curioſity to go and take a View of it.

The Mountain of *Barmach*.

This Mountain, which by reaſon of its vaſt heighth is ſeen at a great diſtance, lies within a Quarter of a Lg from the *Caſpian Sea*. It has got the Name of *Barmach* from a ſteepy ſtreight Rock, which iſſuing out on the top, looks like a Finger ſtretch'd out above the reſt, *Barmagh* ſignifying a Finger.

We found the Graſs, which was very long upon the Mountain, to be covered with white Froſt, whereas the Weather was very mild and fair below near our *Caravanſera*. At the Foot of the ſaid Rock, upon the Edge of the Mountain is a Plain of about 50 Perches ſquare, in the midſt of which is a large Well faced with Stones, and about the Ruines of a very thick Wall, with certain Towers and Bulwarks at the Corners, ſurrounded with 2 good deep Ditches faced with Free-ſtone, which ſhew them to be the Ruines of ſome very ſtrong Fort. Towards the North-ſide of the Mountain we ſaw the Ruines of another Fort, which facilitating our Aſcent which was cut in the Rocks almoſt to the top, we there ſaw a Vault, and another Structure, which ſeem'd to be intended for a retreating Place after the loſs of the two other ſorts.

The Ruines of two Forts.

I am of Opinion that theſe Fortifications were the *Portæ Caſpiæ*, or *Ferreæ*, mentioned by the ancient *Greek* and *Latin* Hiſtorians: But the *Perſians* ſay, they were built by *Iſcander* (*Alexander*) the Great, and demoliſhed by *Tamerlane*. After we had reſted our ſelves here for ſome time, and gathered ſome Figs off the Trees, which grew out of the Clefts of the Rocks, we got down again by the common Path with much leſs danger than we were got up.

What theſe Forts were.

The 26th we left *Barmach*, the Sun caſting at that time a greater Heat than it does with us in *May*. The Baggage took the Way through the Plain towards *Bakue*, but the Ambaſſadors with the reſt on Horſeback thro' the Mountains, where we ſtaid that Night at the Village of *Chuncan*, 5 Lgs from the *Caravanſera* of *Barmach*. We met here abouts with moſt excellent Fruits and Honey; but the Water was muddy and ſtinking.

Dec. the 27th, we travell'd 5 Lgs further to the Village of *Pyrmaraas*, within 3 Lgs of *Scamachie*, famous for the Sepulchre of one of the *Perſian* Saints, named *Seid-Ibrahim*, which is ſurrounded with Walls, and has two Courts like a Caſtle. Our Ambaſſadors would fain have taken a view of it, but were only permitted to enter the firſt Court, which was full of ſquare Stones ſet up on end, being the Tomb-ſtones of private Perſons. The *Perſians* aſſured us, that *Tamerlane* who deſtroyed every thing elſe that lay in his way, had ſo much Veneration for this Place, that he would not deſtroy this Sepulchre.

The Sepulchre of a Perſian Saint.

Having a more than ordinary Curioſity to ſee if poſſible the ſaid Tomb, I got into the firſt Court, from whence, under pretence of taking ſome Inſcriptions in my Table-Book, I made ſhift to get into the ſecond, where finding many other Inſcriptions, in the copying of which I beſtow'd about half an hour; and perceiving that the *Perſians* took no further notice of me, I ventured to withdraw the Wooden Pin wherewith the Door that leads into the Structure was faſten'd, and got in, where I found many arched Apartments, which had no other Light but what came in through the Windows. In the firſt of theſe Apartments I ſaw a Tomb incloſed within an Iron Grate; it was juſt oppoſite to the Door, of about 2 Foot high, with as many ſteps to get up to it. I ſaw a Door on the left hand, which brought me into a great and very lightſome Gallery, the Walls being very white, and the Floor covered

A Deſcription of it.

1636. with rich Tapeſtry. In another Apartment on the right hand, which was vaulted, I ſaw 8 high Tombs, and through this paſs'd into another Vault, where was the Sepulchre of *Seid-Ibrahim*, the Tomb being 2 Foot above ground covered with a Carpet of yellow Damask. At the Head and Feet, as likewiſe on both ſides, were ſeveral Wax-Candles and Lanthorns, upon braſs Candleſticks, and many Lamps hung down from the Roof of the Vault.

About 2 Muſquet-ſhot from the ſame Village on the Eaſt-ſide, is a very ſumptuous Sepulchre in a Rock, belonging to a certain *Perſian* Saint, named *Tiribabba*, who, as they ſay, was Maſter to *Seid-Ibrahim*. Both theſe Places are famous for the many Pilgrimages which are made thither by the *Perſians*, eſpecially ſince this *Tiribabba* had new Garments beſtow'd upon him, and that the Pieces of the old ones are diſtributed among the Pilgrims, of which the Inhabitants relate ſtrange Miracles, which don't deſerve any Place here.

The Sepulchre of another Saint.

At the Entrance of this Sepulchre, we found this Inſcription in *Arabick* Letters, *Alla muſethi hil chuad*, i. e. *O God, open this Door*. Several Chambers, Niches, and Holes, are cut within the Rock in which the Pilgrims are lodged, and perform their Devotions; ſome of which are ſo high, that they can't get up to them without Ladders of 12 or 15 Foot high.

Three of us made ſhift to get up to the top of the Rock, where we found 4 ſpacious Chambers, and ſeveral Niches within cut in the Rock, to ſerve for Beds. But what moſt ſurpriz'd us was, that in a Vault upon the very top of the Rock we found ſuch abundance of Muſſel-ſhells, and in the Places round about it, that it ſeem'd as if the Rock were made up of Sand and Shells. We ſaw ſeveral of theſe Mountains along the *Caſpian Sea* in our Return out of *Perſia*, of which more hereafter.

Shells in Mountains far from the Sea.

The Inhabitants of the Village of *Pyrmaraas* abſtain from drinking of all ſorts of Wine, for fear of defiling the Holy Place. Near the Sepulchre of *Seid-Ibrahim*, is a great Ciſtern of 52 Foot in length and 20 Foot broad, incloſed with a Wall of Free-ſtone, where the Inhabitants keep their Snow and Ice.

The 29th the *Chan* ſent us word, that we might make our Entry into *Scamachie* that Day; but juſt as we were ready to take Horſe, a Meſſenger arrived from the *Chan* to intreat us to ſtay at *Pyrmaraas* till the next Day: And to ſhew that this was not done out of any ſiniſter Deſign, he ſent us a Preſent of 4 great Pitchers, and 2 Leathern Bags full of Wine, good ſtore of Pomegranates, Apples, Pears, Quinces and Cheſtnuts, and to each of the Ambaſſadors a very fine Horſe, with all Accoutrements. We could not at that time gueſs at the meaning of this delay, but were inform'd afterwards, that it proceeded from the *Chan*'s Aſtrologers, who had told him, that it was no fortunate Day to receive Strangers in.

The Superſtition of the *Perſians*.

The 30th of *Dec.* we got on Horſeback by 8 in the Morning, to make our Entrance into *Scamachie*, which was very noble. Within 2 Lgs of the Place a Meſſenger came to us from the *Chan* to bid us welcome, and to tell us, that the *Chan* would come in Perſon to receive us without the City, and afterwards march in the Front of our Cavalcade. Within a Lg of the City we met with 30 Gentlemen, who having taken a view of us, return'd to the City. Soon after we met with 100 more, who open'd on both ſides, and let us paſs through them.

The Entrance of the Ambaſſadors into *Scamachie*.

About 2 Muſquet-ſhot farther, we met with another Troop of Cavaliers, 12 of which had a peculiar Coiffure about their Heads, and their Turbants pointed at the top, which they call *Takia*, to ſignifie that they are of the Poſterity of their Prophet *Haly*. They ſaluted us with a low Inclination of the Head, and bid us welcome. Theſe having kept us Company for half a Lg, we diſcovered to the Right of us a Body of 500 Horſe; and being told, that the *Chan* and his *Calenter*, or Lieutenant, were among them in Perſon, and that the High Road we were then in, was very dirty near the City, and the open Fields more proper for the Ceremonies uſed at the Reception of Ambaſſadors, we were prevail'd upon to take our way ſtreight towards the *Chan*, who expected our coming upon an Eminency, and advanced towards the Ambaſſadors, as ſoon as he perceived them coming up that way. He had a Guard of 6 Men on his Right hand, arm'd with gilt Bows and Arrows, and as many on his Left, with Muſquets, being beſides theſe attended by a numerous Retinue of Gentlemen on Horſeback, all clad in Garments of *Brocado*, and Mantles and Caps embroider'd

Are met by the *Chan* of *Scamachie*.

1636. der'd with Gold and Silver. Being come near the Ambaſſadors, he took them one after the other by the hand, contrary to the Cuſtom of *Perſia*, and ordering Wine to be pour'd into a Silver Veſſel, drunk to the Ambaſſadors, who pledg'd him twice. The *Calenter* and *Muſcovite* Envoy *Alexis Savinowitz*, who were with the *Chan*, alſo bid us a hearty Welcome, by giving us their Hands.

As we march'd along, both ours and their Muſick led the way, conſiſting in Trumpets, Hautboys, Timbrels, Cornets, Tabours, and a certain kind of braſs *Hautboyes*, call'd *Kerrenai*, not unlike ours, but that they are 8 Foot long, and 2 Foot Diameter at the end, all which ſtanding ſometimes in a Circle, made a confuſed noiſe. We had not march'd far, before the *Chan* order'd a Halt to be made, and drunk to the Ambaſſadors; and whilſt they were pledging him, a Jeſter (whom they call *Tazuſch*) diverted the Company with ſinging and playing with Caſtagnets, and making a thouſand awkard Poſtures.

Within a quarter of a Lg of the City we were met by a Body of 2000 *Armenian* Foot, conſiſting of 5 Regiments, and diſtinguiſh'd one from the other by ſo many Colours faſten'd to the top of a long Pole. Their Muſick were Pipes, and certain other Inſtruments, being 2 braſs Baſons which they ſtruck one againſt the other. They bid us welcome with clapping their Hands for Joy, whilſt others threw their Caps into the Air. Here another halt was made, for the Ambaſſadors to drink once more. At the City-Gate we were received by another Set of Muſick, which joining with the reſt made a very loud Noiſe.

The *Chan* having invited the Ambaſſadors to Supper, would needs make them croſs the Court on Horſeback, to the very entrance of the Lodgings; but the reſt of our Retinue were obliged to alight at the outer Court. The Floors of all the Apartments being cover'd with rich Tapeſtry, the *Perſians* took off their Shooes before they went in; but tho' we were in Riding-boots, we were conducted in without pulling them off, thro' 3 very fair Chambers into a ſumptuous and ſpacious Hall, hung on the Walls with excellent Pieces of painted, naked Poſtures. Round the Fountain which was in the midſt of the Hall, ſtood ſeveral Silver Flaggons and Bottles of Wine to cool, and divers Tables were furniſhed with all ſorts of Conſerves; and oppoſite to the Fountain, Seats were made after the *European* Faſhion to oblige the Ambaſſadors, whom the *Chan* cauſed to ſit down at his right hand, and on his left; but upon the ground the *Calenter*, the *Minatſchim*, or Aſtrologer, his Phyſician, and ſeveral other Perſons of Quality. The Gentlemen, and others belonging to our Retinue, were placed on the Floor, on the other ſide of the Hall. The Muſicians ſtood directly oppoſite to the *Chan*, and continued playing as long as the Feaſt laſted, and near the Door attended ſeveral young luſty Fellows, clad in Garments of *Brocado*, with their Bows and Arrows in a ſhooting Poſture. Every one there preſent ſtood with his Back to the Wall, and his Face towards the *Chan* and Company, a Cuſtom conſtantly obſerved in all Aſſemblies in *Perſia*, not to turn their Backs to one another.

Seats made contrary to Cuſtom

Many little Tables full of Fruits and Conſerves, were brought in, each of which was ſerved to 2 at a time, whilſt 2 Pages were employed in filling Wine round to all the Company. After ſome time theſe were removed, and the like Tables covered with fine painted Callicoe put in their ſtead, to ſerve the Meat upon. About an hour after, the Meat being taken away, ſome other Conſerves were ſerved up again; and theſe Tables being ſoon after taken away again, great Pieces of Linen, which were to be inſtead of a Table-cloth, were ſpread on the Floor upon the Tapeſtry. The Carver came in with a great Wooden Diſh full of a certain thin bak'd Paſte, of 3 Foot in length, and as many in breadth, (they call it *Jucha*) one of which he gave to each of the Company, inſtead of a Napkin. Then the Meat was brought in in great Pewter-diſhes, which being ſet in the middle of the Hall, the *Suffretzi*, or Carver, kneeling down cut it to pieces, and diſpoſed it into little Diſhes, whereof one was ſerved to every one of the Company; each of whom had a *Tulſdan*, or Pot, ſtanding by him to ſpit in, and to put the Bones, Parings, and Cores of Fruits in. The Governor's Palace is ſeated upon the Aſcent of a Hill, whence might be ſeen a vaſt number of Lamps, which, purſuant to the *Chan's* Orders, were put up in all the Houſes throughout the City.

The Service of the Feaſt.

A Napkin to each Perſon.

The Neatneſs of the *Perſians*.

The *Chan*, ambitious to let the Ambaſſadors ſee his Dexterity in Shooting, deſired them to obſerve a certain Lamp that ſtood near them, which he ſtruck out twice ſucceſſively with a Muſquet-ſhot. To conclude the Feaſt, he carried the Ambaſſadors into a Room with a Fire in it, where he entertain'd them again with Conſerves, Wine, and *Aqua Vitæ*; of the laſt of which a certain *Perſian* of Quality took ſo much, that the next day he was found dead in Bed. 1636.

The *Chan* a good Marksman.

A Perſian kills himſelf with drinking.

About Midnight being permitted to withdraw, the *Chan* aſſign'd us our Lodgings among the *Armenians*, becauſe they were Chriſtians; but as they had no notice of it, and our Baggage was not arrived, we had but a very ill Nights Lodging after ſo good a Supper.

Dec. the 31ſt, The *Chan* ſent the Ambaſſadors a Preſent of Wine, Wild Fowl, and other Proviſions, and the *Calenter* appointed us a daily Allowance of 17 Sheep, 20 Pullets, 100 Eggs, a certain Quantity of Salt and Bread, 50 Quarts of Wine, and 20 Burthens of Wood, which we punctually received for ſeveral Days; but as our *Mehemander* was forced to get theſe Proviſions for the greateſt part out of the Neighbouring Villages, it was ſometimes 3 or 4 Days before we could get our Allowance, which putting us to no ſmall Inconvenience, the *Chan* ſent us word, that if we would buy our Proviſions our ſelves, we might be aſſur'd all ſhould be re-imburs'd before our Departure thence; for which reaſon he cauſed it to be proclaim'd by Sound of Trumpet, that all Proviſions ſhould be ſold to the *Frenqui* (ſo they call the *European* Chriſtians) at a reaſonable Rate.

During our abode at *Scamachie*, which was 3 months, whilſt we expected farther Orders from Court, the Governor and *Calenter* did all they could to divert us with Hunting, frequent Viſits, and Preſents they made us of Wine, Wild Fowl, and Fruits.

We began the New Year with the Interment of the *Perſian* Gentleman, who had kill'd himſelf with drinking: Of the Ceremonies of their Funerals, we ſhall have occaſion to ſpeak at large hereafter. 1637.

Jan. the 2d, The *Chan* and *Calenter* gave a Viſit to the Ambaſſadors, and brought along with them Conſerves and Wine for a Collation. But the firſt being deſirous to hear our Muſick, he was ſo much pleaſed with it, that he would needs have the Ambaſſadors to ſup with him at the Caſtle, and to carry our Muſick, which conſiſted in a Violin, a Baſe-Viol, a Bandore, and a Voice, along with them. We were entertain'd much in the ſame manner as before, with this difference only, that the *Chan* order'd 27 of his beſt Horſes to be brought out, and caus'd one of the Gentlemen of his Chamber to mount them one after another, and to take ſeveral Turns on them round the Hall, which was covered on the Floor with very rich Tapeſtry.

Jan. the 5th, The *Chan* ſent word to the Ambaſſadors, that if they had an Inclination to ſee the Ceremonies uſed by the *Armenians*, at the Conſecration of the Holy Water, call'd *Chatſcha Schuran*, i. e. the *Baptiſm of the Croſs*, at which he intended to be preſent himſelf, he would order a Place to be kept for them.

The *Armenians* celebrate this Feaſt (and ſo do the *Muſcovites*, and ſome other Chriſtians) upon the 6th of *Jan.* or the Day of *Epiphany*. This was performed without the City, near a Bridge call'd *Puli Amberi*, which began early in the Morning with a Maſs, much with the ſame Ceremonies as the *Roman Catholicks* do in *Europe*. After which, a Sermon was preach'd by their Biſhop, who was come on purpoſe from his Reſidence. The Ambaſſadors Lodgings being near the *Armenian* Chapel, they aſſiſted at both, and were complemented by the Biſhop, who expreſs'd his Joy, at ſeeing *European* Chriſtians of ſuch Eminent Quality in their Aſſembly; adding, that they knew not who he was, but that he would take an Opportunity to acquaint them therewith. He alſo deſired the Ambaſſadors Interceſſion with the Governor, to permit them to finiſh a Monaſtery they had begun, which they promiſed to do.

The *Armenians* bleſs the Water

The Ambaſſadors preſent at this Solemnity.

The *Armenians* having, by Order from the *Chan*, brought us 15 Horſes, we rode to the River-ſide half a Lg from the City, whilſt thoſe poor People, who were flock'd from all Parts thereabouts to the City, went out in Proceſſion with Images, Croſſes, and Banners, under the Guard of a ſtrong Party of Souldiers, to protect them againſt the Inſults of the *Mahometans*. The *Chan* had caus'd a Tent to be pitch'd over againſt the

1637. the Place where the Ceremony was to be performed, very richly furnished, where a sumptuous Collation was order'd to be got ready. On his left hand we found the *Muscovite* Envoy sitting with many other Gentlemen, the right hand being kept for the Ambassadors, and the chiefest of their Retinue. After he had caused us to sit down, he commanded the *Armenians* to begin their Ceremonies, which they did accordingly, by reading at the River-side, whilst 4 Men leap'd in naked, and swum about for some time, to open the Water which was frozen a little. One of our Spaniels happening to leap in after them, this made excellent Sport for the *Persians*, who looking upon a Dog as an unclean Creature, were glad to see their Ceremonies thus defiled, as looking upon those poor People, and their Ceremonies, no better than a Piece of Pageantry; and the *Chan* himself does assist at this Ceremony for no other reason, and affords them his Protection but for the Gain of 1000 Crowns, which he draws yearly by way of Present from their Churches.

The Ceremonies of the Consecration.

After the Bishop had continued reading for an hour, and the Assembly given over singing and playing on the Timbrels, he pour'd a little consecrated Oil into the Water; and after having dip'd in it a Cross, beset with precious Stones, he gave it his Benediction, by holding the Crosier over it. Then you might have seen the *Arminians* running to the River-side, some plunging themselves into it, some to drink, others to sprinkle their Faces; whilst some of the *Chan*'s Domesticks mock'd them, by dashing the Priests and Women, till he commanded them to forbear, tho' at the same time he permitted his Jester and some others to dance, to mock the poor *Armenians*, that danced about their Bishop. The *Chan*'s Physician, an *Arabian* by Birth, a Person of no Religion, had the Impudence to ask the Ambassadors, whether they believed *Jesus Christ* to be the Son of God? Answer was made him, That they believed him to be the True God; but that he acted a very uncivil Part in scoffing at their Religion, concerning which they did not think fit to dispute with him. The Ceremony was concluded by a good Collation, at which the *Chan* drank so plentifully, that finding himself not in a Condition to bear any more, he got on Horseback, and left the Company without bidding them adieu. All the rest of the *Persians* follow'd his Footsteps, which not a little surprized us at that time; but were afterwards inform'd (which we found true by our own Experience) that the *Persians* take this Freedom to go their ways when they have enough, without making the least Excuse to those that have invited them; as on the other hand, those that have invited others, take the same Privilege with their Guests; of which we afterwards saw many Instances, even at the *Schach*'s own Table.

A peculiar Custom of the Persians.

Jan. the 9th, The *Armenian* Bishop, accompany'd by many Priests in their Pontifical Robes, and Wax-Candles in their Hands, came to pay a Visit to the Ambassadors, and brought a Present of 2 Pitchers of Wine, and a Dish of Apples, in the midst of which stood a Wax-Candle lighted. This Visit lasted near 3 hours; and, at parting, they reiterated their former Requests to the Ambassadors, to intercede with the *Chan* for the building of their Church.

The Calenter's Feast.

Jan. the 10th, The *Calenter* having invited the Ambassadors, and all their Retinue to a great Feast, first conducted them through all the Apartments of his Palace, which both in its Buildings and Furnitures much exceeded that of the *Chan*. The Hall where we dined was arched, and done with a certain Plaster-work wrought into Leaves and Branches, from whence there was a very fair Prospect over all the Gardens, which were below it. But what delighted us most, was a Fountain, which issued out of a Gallery on one side of the Hall, and casting it's Water very high into a lower Bason, made a very agreeable noise, being from thence conveyed into another in the midst of the Garden. The *Chan*, with several of his Courtiers, and the Marshal of the *Sophy*'s Court, who was lately come from *Ispahan*, were also present at the Feast, which lasted till night, when we were conducted back to our Lodgings with lighted Torches.

The Ambassadors Presents to the Chan.

Jan. the 18th, Our Steward, Secretary, and Comptroller were sent with the ordinary Presents to the *Chan*; *viz.* 10 Ells of Scarlet, 5 Ells of blue Satin, a Barrel of *Aqua Vitæ*, a Chest with 2 dozen Bottles of all sorts of Spirits, and 2 Pair of Knives with Amber Hafts. As we found him in a very good Humour, we thought this a fit Opportunity to present the Petition of the *Armenians* concerning the building of their Church. He answer'd us very obligingly, that tho' the *Armenians* were never suffer'd to have a Church at *Scamachie* ever since the Establishment of the *Mahometan* Religion there; yet to shew what respect he bore to the Ambassadors, he would not oppose it, and accordingly caused his Orders to be dispatch'd in our Presence. The *Armenians* were so over-joy'd at this good News, that, besides their humble Thanks, they assur'd the Ambassadors that their intended Structure should transmit their Names, and the good Offices they had done them, to Posterity. 1637.

The Chan permits an Armenian Church to be built.

The Express sent by the *Chan* to *Ispahan*, whilst we were yet at *Niasabath*, being return'd, the Ambassadors desired that the Orders of the Court, concerning the Prosecution of their Journey, might be communicated to them. The *Chan* gave for Answer, that he had not received any new Instructions; but that if we desired, we might hear the Letter read, which his Physician, after he had kiss'd it, and put to his Forehead, read accordingly. The Contents of it, as far as he read, were, That the Messenger from the *Sultan* of *Derbent* being arrived before him, who was sent by the *Chan* of *Scamachie*, had brought no other Account but that an Envoy from the *Czar* of *Muscovy* being arrived at *Derbent*, had reported that within a few Days after certain Ambassadors from a Prince of *Germany* were to arrive there: That the *Schach* having received no farther Account of their Arrival, had thought it sufficient to order the Governor of *Derbent* to receive and entertain them kindly, and to furnish them with every thing requisite for the Prosecution of their Journey to *Scamachie*, from whence he expected to hear of their Arrival, upon which he would send his farther Orders. The *Chan* then desired a Catalogue of the Names and Qualities of all our Retinue, and what Professions they were of, especially not to forget to mention our Physician, Chyrurgeon, a Painter, and Musicians; but we thought it sufficient to give them the Names of our People, and what Station they were in, on account of the Embassy; having a shrewd Suspicion that there was something else in the bottom of the Matter. To unfold this Riddle, we got the Express, who had brought this Letter, to our Quarters; and, by the help of a good Cup of Wine, and some small Presents, we drew the Secret out of him, which was this: That the *Chan*'s Brother having been executed lately at *Ispahan*, there was no Body who durst venture to deliver this Letter to the *Sophy*, till after a Months delay one of the Chamberlains having taken the Boldness to lay it at the King's Feet, who had made no answer to it, but order'd another to write, and to let him know, that Orders having been sent already to the *Sultan* of *Derbent*, the Contents thereof we had heard read, there needed no farther Answer to his Letter; but only an express Command to the *Chan*, to cut in pieces all the *Persians* as should offer any Affront to the *Germans*, during their stay in his Government. So that we saw our selves under a necessity of staying till the return of the Messenger the *Chan* was sending to Court.

The Schach's Orders concerning the Ambassadors.

Jan. the 25th, The *Chan*, and the *Muscovite* Envoy, with a great number of Courtiers, gave a Visit to the Ambassadors; but their Lent being begun, they would not participate of the Collation, but after they had heard our Musick they return'd to the Palace.

Jan. the 28th, The *Muscovite* Envoy continu'd his Journey to *Ispahan*, but indifferently satisfy'd with his Entertainment at *Scamachie*; for which he had no other redress, but to revenge himself upon his *Mehemander*, whom he abused upon the least occasion.

The Muscovite Envoy leaves Scamachie.

Feb. the 5th, We went by accident into a great House near the *Bazar*, or Market-place, which by its Structure, and the Nobleness of its Galleries, resembled a College, as we found it afterwards to be one of those Publick Schools, call'd *Mandresa*, of which there are many in *Persia*.

A Persian College.

Whilst we were taking a view of the Buildings, and saw some walking, others sitting with Books in their hands, one of their *Maderis*, or Regents, who read Publick Lectures, coming up with us, and finding upon my Cane engraven these Words in Arabick, *Bismi alla, ruhman rachim*, i. e. *in the Name of the merciful God who sheweth Mercy* (a Sentence the *Persians* generally put at the beginning of their Writings) he desired me to present him with it, promising me a better the next day; which I refusing, he cut out the Word *Alla*, i. e. *God*, in their Language, which he put into a clean Paper, telling me, That the Name of God ought not to be put upon a Walking-stick.

The

1637. The next Day intending to go to the ſame College, I cauſed a very fair Celeſtial Globe to be brought along with me; but by miſtake happen'd to come into another, where I was very civilly receiv'd by the Profeſſors, Regents, and Students, and much admired my Globe, and to find that Aſtronomy and the Mathematicks in general flouriſh'd better in *Europe* than in *Perſia*, where they were ignorant as yet of the uſe of the Globe, but only make uſe of an Aſtrolabe for the Inſtruction of their Students. They could however name all the Signs of the *Zodiack*, and gave me to underſtand, that they were not unacquainted with the Names of moſt of the other Stars.

A Perſian School for Children.

At another time, I had the Curioſity to go into a *Metzid*, or Church, near our Quarters, where they inſtruct their Children. The young Scholars ſate all round againſt the Wall, the *Mollah*, or School-Maſter, with ſome other aged Perſons, ſitting only in the midſt of the Hall, whither they invited me alſo, as ſoon as they ſaw me come in. The *Mollah* permitted me to turn over the *Alcoran* he had in his hands; which done, he took it back, and kiſs'd it, and offered it alſo to me to kiſs it, which I refuſing, and kiſſing another inſtead of it, which I held in my hand, he told me with a Smile I had done very well. I ſaw here among the reſt a certain Aſtrologer near 65 years of Age, named *Chalil*, who reading *Euclid* to his Diſciples, I knew the Book by the Figures, and having made ſome Demonſtrations, as well as I could expreſs my ſelf, the old Man was ſo taken with me, that he pull'd out his braſs Aſtrolabe, and ask'd me, whether ever I had ſeen the like, or knew the uſe of it? I had no ſooner told him, yes, and that I had one at my Lodgings, but he was ſo urgent with me to ſee it, that I went home to fetch it, and brought the Globe along with him. They were much ſurprized to ſee it, and much more, when they underſtood that I had made it my ſelf; and being deſirous to ſee how I could divide the Dgs with ſo much Exactneſs, in regard they have no Inſtruments fit for that purpoſe, I ſhew'd him, how, without much trouble, he might attain thereto. He was ſo well ſatisfy'd therewith, that for ever after he gave me all the poſſible demonſtrations of a real Friendſhip, and frequently viſited me, and gave me the Long. and Lat. of the chief Cities of all *Aſia*, which I compared with my own Obſervations, and found very exact.

The *Mollah*, or Maſter of the School, being a young but very good natur'd Man, would alſo often viſit me, and was very inſtrumental in aſſiſting me in my Study of the *Arabian* Tongue. He alſo brought me acquainted with one *Imanculi*, a Captain of a Troop of Horſe, and theſe two uſed to come every day alternatively, to teach me their Language, and to learn mine; in which they made ſuch Improvements, that in a ſhort time they would have attain'd to the knowledge of it, had it not been for the Malice of certain Perſons of our Retinue, who rend'ring them ſuſpected as if they had a Mind to change their Religion, they were forc'd ever after to make moſt of their Viſits by Night. One Day, *viz. Feb.* the 11th, being at the School to hear a Leſſon in the *Arabian* Tongue, a certain *Perſian* Servant came to tell the Maſter from the *Chan*, that it was his beſt courſe not to ſuffer Chriſtians to come into their Temple. The *Mollah* was at firſt a little ſurprized, but recollecting himſelf, that the *Perſians* were not forbidden the Converſation with Chriſtians, he took the Servant aſide, who ſoon confeſs'd, that he was ſent only by our Interpreter. Not long after, a difference ariſing between the Ambaſſador *Brugman*, and our Interpreter, the laſt acknowledged that it was by his Order, he had ſent the ſaid Servant, to hinder my Study of the Language.

An *Auſtin* Friar viſits the Ambaſſadors.

Feb. the 7th, A certain *Roman Catholick* Monk, named *Ambroſio dos Anios*, a *Portugueſe* by Birth, came to viſit the Ambaſſadors: He told them, that he came from *Teflis* in *Georgia*, 10 Days Journey from *Scamachie*, where he ſaid he was Prior of a Convent of the Order of St. *Auſtin*; where having underſtood, that a Potent Prince of *Germany* was ſending a ſolemn Embaſſy into *Perſia*, he had undertaken this Journey to wait on them, which he hoped would not be unacceptable to them; offering his Service in any thing that lay in his Power, in reſpect of their Negotiation, or otherwiſe, as having been 27 Years in that Kingdom.

We were at firſt ſomewhat ſhy of him; but after ſome Converſation, finding him honeſt in his Dealings, we made no further ſcruple to truſt him; and as, beſides the *Portugueſe*, he underſtood the *Georgian*, *Turkiſh*, and *Perſian* Languages, he did us conſiderable Service, eſpecially to my ſelf, in attaining the laſt of theſe Languages. 1637.

About this time, many of our People who had drunk too greedily of the ſtrong *Perſian* Wines, after they had been forced to be contented with Water for a conſiderable time before, fell ill of a burning Fever; but by the Care of our Phyſician, of 22 that kept their Beds at a time, not one died.

A Feaſt in memory of *Haly*.

The ſame Day, being the 21ſt Day of *Rameſan* of the *Perſians*, they celebrated their *Auſchur*, or Feaſt, in memory of their Great Patron *Haly*, which was perform'd in a Houſe built for that purpoſe without the City. Oppoſite to the Gallery, in which were the *Chan*, the *Calenter*, and other chief Courtiers, an open Chair of 8 Foot high was placed, under a kind of a Linen Canopy, for the *Chatib* or Prelate, who appear'd in a blue Garment, the Mourning Colour of the *Perſians*. He read for 2 whole hours in a Book they call *Machtelnama*, which treats of the Life and memorable Actions of *Haly*, ſinging with a loud and doleful, yet intelligible Voice without intermiſſion, except when he came to ſome extraordinary Paſſage, or Moral Sentence, whereof he ſaid only the firſt Word, the reſt being ſung by the Prieſts, that attended in great numbers about the Chair: One of whom at the end of every ſuch Paſſage, cry'd out, *Luanet Chudai ber kuſchendi Haly bad*, i. e. *God's Curſe on him who kill'd* Haly: Whereto the whole Aſſembly anſwered, *Biſch bad kem bad*, i. e. *rather more than leſs*. When he comes to that Paſſage where *Haly* tells his Children, that he ſhall not live long, and prophecies by whom he is to be kill'd, the *Perſians* begin to weep and ſob, as they alſo do, when he deſcribes to them the manner how he was kill'd in the Temple. So ſoon as the *Chatib* has given over, the *Chan* ſends him a Silk Garment, which he puts on, and then the Proceſſion begins, in which were conducted three Camels, carrying 3 Coffins covered with black Cloth, which repreſent thoſe of *Haly*, and his 2 Sons, *Haſſan* and *Hoſſein*. Theſe were follow'd by 2 Cheſts cover'd with blue Cloth, full of the ſpiritual Treatiſes written by *Haly*. Then came 2 very fine Horſes, having on the Pomels of the Saddles, and upon the Saddles, ſeveral Bows, Arrows, Turbants, and Flags. After theſe you ſee a ſingle Man carrying on the top of a long Pole a kind of a Tower, unto which were faſten'd 4 Cymitars; but ſo cover'd with Ribbons, and other Toys, that they could ſcarce be diſcern'd. In the Rere came many Men with little Boxes on their Heads, covered with Feathers and Flowers, in which the *Alcoran* lay open, dancing and leaping in cadence to a certain doleful Muſick of *Hautboyes*, Timbrels, Flageolets, and Tabers; whilſt on the other ſide many Boys danc'd and ſung together, clapping one another upon the ſhoulders, and crying, *Heder, Heder*, which is the Name of *Haly*, *Haſſan*, and *Hoſſein*, and ſo they march to the City. This Feaſt is celebrated the ſame Day all over *Perſia*; but *Mahomet*, their Great Prophet, has no peculiar Feſtival.

The Dreſs of a Perſian Preſlate.

The Proceſſion.

The 14th of *Feb.* being the New Moon, the Lent of the *Perſians* ended; which began the 16th of *Jan.* their firſt of *Rameſan*; but it happening to be upon a *Friday*, the Eve of their Sabbath, their Eccleſiaſticks thought fit to continue the Faſt till that day. The next day after, the *Chan* made a magnificent Entertainment for all the Court, at which the Ambaſſadors were alſo preſent.

The *Chan* entertains the Ambaſſadors.

The 27th, The Meſſenger ſent the 21ſt to *Iſpahan*, returning with Orders for our Departure; we were ſo rejoiced thereat, that we had a mind to divert our ſelves with Hunting. The *Chan* being prevented by ſome extraordinary buſineſs, could not go along with us, but ſent us his Huntſman, his Hounds, and Hawks, and among the reſt a Leopard, ſo well taught, that he would ſtart and take a Hare as well as a Grey-hound, and was as much at Command as a ſetting Dog, leaping up behind the Perſon who had the Management of him. The *Chan* had in the mean time cauſed a ſumptuous Collation to be got ready for us in his Garden without the City; but the Meſſenger, who was ſent to invite us, miſſing his way, we alſo miſs'd the Entertainment.

Receive Orders to depart.

The 1ſt of *March*, the *Perſians* celebrated another Feaſt, call'd *Chumniehater*, in memory of the Day when *Haly* took poſſeſſion of the Eſtate of his Couſin and Father-in-Law *Mahomet*. The *Chan* treated the Ambaſſadors that Day under a Tent, near the River-ſide: They had the Divertiſement of ſeveral ſorts of Dancing; and, among the reſt, a Youth play'd excellently well upon 2 little Cimbals, and danc'd to them with a great

Another Feaſt.

1637. great deal of Exactness; and an *Arabian* Moor leap'd and danc'd betwixt the Porcelane Dishes, in which the Meat was brought up, with such Nicety, that he did not touch one of them. The *Chan* being also in a humour to shew us a Trial of his Skill at the Bow, caused one of those Rings wherewith the *Persians* bend their Bows, and commonly wear them upon their Thumbs, to be fasten'd to a Horse's Hair, which being held by a Boy at above six Paces distance, he cut it twice one after another with his Arrow. He also shot with a Firelock an Apple, which was cast up into the Air.

After an Entertainment of 6 hours, we return'd to the City, when some of the *Persian* Officers would give us a Trial of the Swiftness of their Horses in a spacious Plain. It must be confess'd that it was most surprizing to me, no *English* Horse being to be compared with them upon this account; but this is all the *Persians* teach them. Tho' in their Engagements on Horseback, of which they gave us the Divertisement at the same time, they shew'd a most surprizing Activity in casting their Switches instead of Javelins, catching them in their hands when they were cast at them, and returning them upon those who pursued them with full speed. The *Chan*'s Master of the Horse carry'd the Bell before all the rest.

Another Festival. The 3d of *March*, the *Persians* celebrated the Feast, call'd *Tzar Schembesur*, *i. e.* the *Fourth sad Sabbath*, being the next *Wednesday* before the Vernal Equinox, by which they begin their Year, and look upon this *Wednesday* as the most unfortunate of the whole Year; which is the reason they don't do any business that Day, they keep their Shops shut, will not swear, no not so much as make a Debauch, but above all the rest are cautious not to pay any Money that day. Some do nothing but tell their Money at home, others go to the River-side, without speaking one word by the way, to fetch Water from thence to sprinkle their Houses; and if they meet with a particular Friend, they wish well to, they cast Water upon them, which they say diverts the Misfortune that is like to befal them. They have many such like Fopperies more, which however end by noon, after which they return to their ordinary Exercises. Some will have this Festival to be celebrated by the *Persians*, in commemoration of St. *John*'s Baptism; and thus much is certain, that the *Persians* have a Veneration for that Saint; and that, even to this day, they go on Pilgrimage to his Sepulchre at *Damas*, which may perhaps have been the first Origin of the Institution of this Feast; but the same is now quite lost.

The Persian New-year's day. *March* the 10th, the 20th according to our Stile, (the Author meaning in all Places the old) they celebrated their *Nauras*, or first day of the Year, with great Solemnity; of which we shall speak more at large hereafter.

The Ambassadors having sent some of us to complement the *Chan* upon this occasion, we found him sitting with his Astrologer at a Table, who rising ever and anon to observe the Sun, at the very moment it came to the *Equator*, caused the beginning thereof to be celebrated by the Discharge of some of the great Guns, both from the Castle and City-Walls, and a Consort of Musick of all sorts of Instruments. Opposite to the *Chan*, sat one of their Orators, or rather a Mimick, who with very awkard Gestures extoll'd the Victories of the *Persian* Kings over the *Turks*, *Usbeques*, and other Enemies. The Day was concluded with a merry Entertainment, at which we that were sent to complement him were present, the *Chan* inviting us to sit down at Table with him: And the next Day, the Ambassadors were invited to another great Feast, where also the *Portuguese* Monk was present.

March the 20th, The *Chan*, in company of the *Calenter*, came to take his leave of the Ambassadors, he being to take a Journey, and not likely to return before our Departure. But his *Hakim*, or Physician, pretending to some Skill in Astrology, having observed the Sky, told him that it was no lucky hour to enter into the Ambassadors Lodgings, they fell a drinking plentifully in the Court. When the *Chan* taking particular notice of one of the Ambassador *Crusius*'s Pages, a very handsome Lad, he ask'd the Physician, whether he were not a very fine Boy, and that he wish'd he were his Son. Upon which the Physician fell to consulting the Heavens again; tho' it was neither Night, nor a clear Sky; and told the *Chan*, that if by viewing the Boy again, he could imprint a stedfast *Idea* of him in his Imagination, and immediately went to enjoy a Woman, he might infallibly get such another handsome Boy. Which he and the Company believing, after he had once more view'd the Boy, he got on Horse-back immediately, and departed. 1637.

There was at that time a certain Slave at *Scamachie*, a *Muscovite* by Birth, but being sold in his Youth into *Persia*, was circumcised; who growing familiar with some of our Retinue that could speak his Native Tongue, inform'd them that our *Persian* Interpreter, whose Name was *George Rustan*, had lately writ unto his Friends at *Ispahan*, that, notwithstanding his long Abode among the *Christians*, he had not abandon'd *Mahometism*; of which he would give them further Proof before long. This *Rustan*, who was a *Persian* by Birth, and coming into *England* had been baptized there, from whence he went into *Muscovy* with the *English* Resident, who was his Godfather; and hearing we were to go into *Persia*, he interceeded with the Resident, to recommend him to us in the Quality of an Interpreter, under pretence that he had some private Affairs to look after in *Persia*. Having by his own hand-writing engaged himself to come back with us, we took him along with us; but he no sooner came to *Ardebil*, but he went to the Sepulchre of their great Saint *Schich-Sefi*, where he did his Devotions as a *Mahometan*; and having got a Certificate for his so doing, went along with us to *Ispahan*, where we secured him; but having made his Escape, he got to a Sanctuary, call'd *Alla-Capi*, and put himself under the King's Protection. Our Persian Interpreter, a Renegado.

March 22. Father *Ambrosio* took leave of the Ambassadors, in order to his Return into *Georgia*.

March the 24th, The *Chan* of *Scamachie* sent away the usual New-year's Gift to the King, *viz.* some very fine Horses richly harness'd, some Camels laden with *Russian* Leather, several rich Stuffs, 30 Bags full of Swans-down, and a great number of handsome Boys and Girls. The *Chan* having taken this Opportunity of going his Journey, under pretence of conducting the Presents out of the Town, our Affairs were left to the management of the *Calenter*, who immediately after sent to our Quarters the Summ of 60 *Tumains*, amounting to 1000 Crowns, as a reimbursement for the Charges we had been at during our stay at *Scamachie*; which not amounting to half the Summ, we ought to expect, the Ambassador *Brugman* sent him word, that he knew not whether the said Summ were sent them from the King, or the *Chan*, but that they would carry it seal'd up as it was to *Ispahan*; and that they could not forbear to complain of the Injury done them, in detaining them so long contrary to the Orders of the Court, desiring that speedy Care might be taken for their Departure. The *Calenter* answered, that the said Summ had been sent by his Majesty's Appointment; That he was much concerned at the delay of their Journey, which was occasion'd by the great number of People, and the Baggage belonging to them, for which they could not get Horses and Waggons enough before, intreating us at the same time to come and dine with him to morrow, which we did. The Ambassadors have their Charges reimbursed.

March the 27th, 60 Waggons, and 120 Saddle-horses were brought for the Prosecution of our Journey.

But before we leave *Scamachie*, it will not be beyond our Scope to give you a short Account of that City. (*a*) Father *Bizarrus* calls it sometimes *Summachia*, sometimes *Sumachia*, or *Samachia*, as does also (*b*) *Joseph Barbaro*; the *Spaniards* write it *Zamachi*. The Geographers don't agree in its true Situation, some placing it above, others below *Derbent*, others in both Places. Its true Name is *Sciamachie*, 40 *German* Lgs, or 6 Days Journey from *Derbent*, provided you take the way through the Mountains; for if you travel on Foot or Horse-back along the *Caspian Sea*, by the way of *Bakuje*, you may travel it in 2 Days. *Scamachie* is the Capital City of that Province, the Ancients have described it to us under the Name of *Media Atropatia*, or *Media Minor*, and now call'd *Schirwan*, tho' some, but by mistake, place this City in *Hyrcania*. It lies in a Valley inclosed betwixt 2 Mountains, at 34 Dgs 40 Min. Long. and 40 Deg. 50 Min. Lat. According to the Report of the *Persians*, it was built by *Schirwan Schach*; and before it was destroy'd by the *Turks*, under the Reign of K. *Abas*, contained above 5000 Houses. The whole City is divided into the S. and N. City: The Walls of the first were pull'd down by *Schach Abas*; the last, which is somewhat bigger than the other, and contains about 900 Houses, has its Walls standing still; but it is so low, and surrounded with so wretched a Ditch, that one may pass into the City at any time. The whole City has 5 Gates; but the

(*a*) Hist. of *Persia*. A Description of *Scamachie*.
(*b*) In his Travels.

1637. the Streets are very narrow, and the Houſes, which are for the moſt part built of Earth, very low. The Inhabitants are chiefly *Armenians* and *Georgians*, who being different in their Language, make uſe of the *Turkiſh*, which is common to both, not only in the Province of *Schirwan*, but alſo all over *Perſia*. Their chief Traffick lies in Silk, Stuffs, and Callicoes. Moſt of their Shops are in the South City, where is the great *Bazar*, or Market-place, into which abutt many Streets, which are all covered for the Conveniency of the Shop-keepers. Near the ſaid Market-place are alſo 2 great Store-houſes, divided into many Galleries and Chambers: One is call'd *Schach Caravanſera*, for the Conveniency of the *Muſcovite* Merchants, who there vent Tin, *Ruſſian* Leather, Copper, Furs, and other Commodities: The other, call'd *Loſgi Caravanſera*, appointed for the *Circaſſian Tartars*, who ſcarce bring any other Commodities, but Horſes, Women, young Lads, and handſome Maids, which they ſteal on the Frontiers of *Muſcovy*. The *Jews* have a part of this *Caravanſera* aſſign'd them for their Merchandizes, which bring hither from *Tabeſſerahn*, the beſt Woollen Tapeſtry, the refuſe of which are only brought into *Europe*; Silk Stuffs, Callicoes, Gold and Silver Brocadoes, as alſo Bows, Arrows, and Cymitars, which are ſold very cheap here.

Its Streets, Houſes, Inhabitants, and Languages.

In our Return from *Perſia*, I remember that the *Muſcovite* Envoy, *Alexis Savinowitz*, went into this Store-houſe of the *Tartars*, and cheap'ning a Boy of 15 or 16 years of Age, the *Tartar* ask'd 100 Crowns. *Alexis* who had no mind to buy, offer'd him no more than 32: At which the *Tartar* ſmiling, clap'd the Boy upon the Buttocks, and told the Envoy, That that Part was worth more than he had bid.

This City has alſo 3 *Hamans*, or Publick Baths, the Uſe of which is as general in *Perſia* as in *Muſcovy*: Two of theſe are common both to Men and Women; for the firſt at Night, and for the laſt in the Day-time. The third, call'd *Haman Schach*, belonging only to the Men. Near it are 2 loſty Trees, which being planted by *Schich Marith*, one of the *Perſian* Saints, who is buried in a Church hard by (of which there are 6 in this City) are in great Veneration among them. The Revenue of this Bath is employed in defraying the Charges belonging to his Sepulchre.

The *Chan* is not only Governor of the City, but alſo of the whole Province, in conjunction with the *Calenter*, who is his Lieutenant. The *Chan* has the Adminiſtration of all Civil and Military Affairs, and out of the Revenue of his Government, is obliged to maintain 1000 Men, and to put himſelf at the Head of them at the firſt warning. In his Abſence, the *Calenter* has the ſole Command all over the Province, who at all other times has the overſight over the Revenue and Crown-Lands, and never goes into the Wars. The *Chan*'s Name was *Areb*, who kept a very noble Court, tho' by his Extraction he was only the Son of a Peaſant, it being the Cuſtom among the *Perſians*, to value a Man rather by his Worth and Courage, than his Birth: And this *Areb* had given ſuch Proofs of his Valour, that *Schach-Sefi* made him Comptroller of his Ordinance at the Siege of *Erivan*, in which Place, and many Encounters he was in, he behaved himſelf ſo well, that *Terruch-Chan*, the late *Chan* of *Scamachie*, being ſlain in the Siege, he put him in his Place. *Areb* uſed to take great delight, to ſhew us the Scars of the Wounds he had received in skirmiſhing with the *Turks*, and to tell us how many *Turks* Heads he had brought to the King. Both the *Chan* and *Calenter* were Perſons of a brave and handſome Deportment, having all the Qualities requiſite for their Station; the worſt thing belonging to them, was, that they were ſuch Lovers of Wine, that they would begin with it early in the Morning; but the *Chan* could not bear ſo much as the other. Among other things I had the Curioſity to find out the Tower mentioned by (a) *John Cartwright*, which he ſays is built with Flint and Free-ſtone, with many dead Men's Skulls thruſt betwixt the Stones, but could neither find, nor hear any News of it. All what I ſaw of this kind, were two Men's Heads cut in Stone in the City-wall, of which no body could tell me the meaning. But what the ſame Author ſays of the Ruines of an old ſtrong Caſtle, not far from the City, I found true by Experience; there being to be ſeen to the North-ſide, upon a high and ſteep Mountain, the remainders of a very ſtrong Fortification. I went alſo to the top of the ſaid Mountain, where near a Well, the deepeſt I ever ſaw in my Life, I found a noble Cellar, all intire, both ſurrounded with the beſt Free-ſtone that could be found. The Inhabitants told us, That this Province had in ancient Times its own Kings; and that one of them, call'd *Schirwan Schach*, had built this Caſtle, which was afterwards deſtroyed by *Alexander the Great*. But I am apt to believe, we need not ſeek ſo far as the Times of *Alexander*, for the Etymology of the Name of this Caſtle; which being call'd *Kale Kuleſtan*, *i. e.* the Valley of Roſes, has queſtionleſs derived its Name from the adjacent Valley; which being water'd by a very pleaſant Brook, brings forth in the Spring an incredible Quantity of Tulips; nothing being more common in *Perſia*, than to give this Name of *Kuleſtan* to any Place, where they would expreſs an extraordinary Pleaſantneſs.

The Chan and Calenter's Charge.

(a) His Travels into *Perſia*.

1637.

Betwixt this Fort of *Kuleſtan* and the City, are alſo to be ſeen upon a Mountain, exceeding the laſt mentioned in height, two Chapels; in the biggeſt of which, built in the Form of a *Parallelogram*, is to be ſeen a very high Sepulchre, hung about with many Pieces of Cloth and other Rags, of divers Colours; as alſo ſeveral Rods of Iron, pointed at the end like the tops of Arrows, ty'd to the Sepulchre with a Silk String. In the other are two Tombs, ſet out much, after the ſame manner, belonging to ſome of their Saints near which the Inhabitants frequently do their Devotions. Out of this laſt Chapel, you go by an eaſie Deſcent into a large Vault, where is the Sepulchre of one of their King's Daughters, named *Amalek Kanum*, who having an Averſion to Marriage, and being betrothed by her Father to a certain *Tartar* Prince, kill'd her ſelf. Mr. *Cartwright* ſays, That the Maids viſit the Sepulchre of this Princeſs once a Year, which whether it was done in his time, I am not able to determine; but certain it is, that it is not Devotion, but the hot Season, which now adays draws the Inhabitants into this Mountain, as well as that of *Kuleſtan*; the Tradeſmen and Shop-keepers of *Scamachie*, ſtaying there only in the Night-time, whereas the *Chan*, and other Perſons of Quality dwell there under Tents, during the 3 hotteſt Months of the Year, and conſequently pay their Devotions more frequently to theſe Saints. During this Season, they alſo feed their Cattel in the Meadows (the beſt of all *Perſia*) near the Mountain of *Elbours*, where there is a more temperate Air than hereabouts. This Mountain is a Branch of the Mount *Caucaſus*, lying on the ſide of the Province of *Tabriſthan* towards *Georgia*; yet may it be eaſily diſcovered from *Kale Kuleſtan*, and the other Neighbouring Mountains of *Scamachie*. It is credibly affirm'd, that the ancient *Perſians* kept and worſhip'd their perpetual Fire upon this Mountain of *Elbours*; but at this time there are not the leaſt Footſteps of it left here, or near *Jeſcht*, notwithſtanding *Texeira*, and his Adherents, endeavour to make us believe the contrary. This Fire ſeems ſince to be tranſplanted to the *Indies*, where certain Religious Men keep a perpetual Fire, with the ſame Veneration and Care, as the ancient *Perſians* did; of which more hereafter, in Mr. *Mandelſlo*'s Travels into the *Indies*.

Sepulchre of Saints.

The perpetual Fire of the ancient Perſians and Modern Indians.

But we muſt return to our Journey. The Baggage being ſent before the 27th, we follow'd the 28th. But the Ambaſſador *Brugman*, being much diſſatisfy'd with the Treatment he had received at *Scamachie*, order'd us to depart 2 hours before Day, which we did accordingly on Foot without any Noiſe, and took Horſe without the Gates. We had ſcarce travell'd 2 Lgs, when we found a *Scotchman* of our Retinue, who was pretty well at our ſetting out, dead in the Waggon, whom we buried at the bottom of a little Hill, covered all over with Hyacinths.

The Ambaſſadors proceed in their Journey

After we had travell'd about half a League further, we came to the Sepulchre of another Saint, call'd by the *Perſians*, *Pyr Mardechan*; where, being againſt Night overtaken by a moſt violent Storm of Lightning, Thunder, Wind, Rain, and Snow, we paſs'd our time but very ill, under the bare Heavens, for want of our Tents.

The next Day, the Ambaſſador *Brugman* finding that ſome of our Cannon had been left behind at *Scamachie*, for want of Camels, broke out into very injurious Language againſt the *Chan* and *Calenter*, in the Preſence of our *Mehemander*; and had it not been for the want of Proviſions and Lodgings, would have obliged us to ſtay there till they were brought up; but it being reſolv'd to go on, we made 2 Lgs to a *Caravanſera*, call'd *Tachtſi*, and, after 2 Lgs Travel more, to the top of the Mountain of *Scamachie*, where we paſsd thro' a Fair and Fertile Plain, which in the Winter and Spring is ſubject to the ſame Sharpneſs of Weather, as moſt

The odd demeanor of one of the Ambaſſadors.

1637. most Parts of *Europe*. But no sooner were we come to the Descent, but we saw the Sun bright, and a serene Sky, and a Plain reaching above 10 Lgs, all covered with Verdure, which after some time discovered to us at a distance the so much celebrated Confluence of the 2 Rivers, *Araxes* and *Cyrus*. After an easie Descent of half a Lg we took up our Lodgings in certain *Tartarian* Huts, which the Shepherds had set up there near their Flocks.

March the 30th, We made 4 Lgs thro' the Plain, to the Village of *Kasilar*. By the way we met with a certain Company of *Tartarian* Cow and Sheep-herds, who had pack'd up their Huts, Houlhold-Goods, Wives, Children, and other Moveables in Waggons, or upon Horses, Cows, and Asses. We had ever after very fair Weather, and a serene Sky, except when we travell'd over the Mountains, we saw it a little overcast in the Morning; but these Clouds were soon after dispell'd by the Sun-beams.

The Nomades.

March the 31st, We pass'd 2 Lgs along the Riverside to the Village of *Tzavat*, upon the right side of the River *Kur* (*Cyrus*) where the Houses were all built of Reeds and Canes, and covered with Earth. About a quarter of a Lg above this Village, is the famous Confluence of this River, with the *Aras* (*Araxes*) at 39 Dgs 54 Min. Elev. the *Kur* coming from the W. N. W. and the *Aras* from the S. W. They are, after their conjunction, 400 Paces broad, the Banks pretty high on both sides, the Channel very deep, and the Water black. The Meadow-grounds along this River are full of Liquorice, the Stalks of which exceed sometimes the thickness of a Man's Arm, and the Juice is incomparably sweeter than that of *Europe*.

The Confluxe of the *Cyrus* and *Araxes*.

The River *Kur* is the common Boundary betwixt the 2 Provinces of *Schirwan* and *Mokan*, being join'd by a Bridge of Boats, near *Tzavat*. We had no sooner pass'd over this Bridge the 2d of *April*, but another *Mehemander*, sent by the Governor of *Ardebil*, brought us 40 fresh Camels, and 300 Horses, because we could not make use so conveniently of Waggons, by reason of the continued Mountains and Valleys. He also furnished us very plentifully with Provisions, our daily Allowance being 10 Sheep, 30 *Bramans* of Wine, and Rice, Butter, Eggs, Almonds, Raisins, Apples, and all other sorts of Fruits, as much as we pleased. Being *Sunday*, we did not set out till after Sermon; and taking our way for a Dg along the River *Aras*, took up our Quarters in Huts, set up there for that purpose, at the entrance of a great Heath, about half a Lg from the River.

The Frontiers of *Schirwan* and *Mokan*.

April the 3d, We travell'd 4 *Persian* Lgs over the Heath, and were lodged at Night in Huts, as the Night before. As we pass'd along, we saw a kind of Deer feeding in Herds, call'd *Tzeiran* by the *Turks*, and *Ahu* by the *Persians*. They resemble our Harts, but are rather Red than Fawn, and their Horns without Brow-antlers, but smooth and turning backwards, like the wild Goats. They are extremely swift, and no where to be met with, except in the Province of *Mokan*, about *Scamachie*, *Karrabath*, and *Merrage*.

Ahu, a kind of Deer.

April the 4th, Being forced to leave the Heath, for want of Water, tho' else much the nearer way, we travell'd a compass of 6 Lgs to the Torrent of *Balharu*. Here we found abundance of Tortoises, who had laid their Eggs in the Sand along the Torrent, exposed to the Mid-day Sun, the better to foment their Eggs. Some of our People having the Curiosity to cross the Current, to see the manner of Life of the Inhabitants on that side, they found their Children stark naked, and the rest covered only with Callicoe Smocks. They received us very civilly, and entertain'd us with some Milk, imagining that we were sent for by the *Schach*, to serve him in his Wars against the *Turks*: They wish'd us all imaginable Success, and that we might drive our Enemies before us as far as *Stampol*, i. e. *Constantinople*.

Tortoises.

The Enemies of the Persians.

April the 5th, We travell'd beyond the Heath of *Mokan* to the Mountain and Country of *Betzirwan*, and in this Days Journey cross'd a little River 12 times by reason of its many Windings, and lodged at the Village of *Schechmurat*, 5 Lgs from the Place where we lay the Night before. Some of the Houses of this Village were built on the Foot of the Mountain, others within the Mountain. But the *Persians* who had pass'd that way not long before, as with the *Chan* of *Scamachie*'s Presents to the *Schach*, having represented us as a barbarous People, the Inhabitants were retired into the Mountain among the Rocks. Some of our Retinue got to the top of the Mountain, where they met with nothing extraordinary, except with a very fair Spring, near which we saw coming out of a Cleft of a Rock a kind of a Crab, or rather Craw-Fish, call'd by the *Latins*, *Cancer*. 1637.

Betzirwan.

April the 6th, Being to travel cross the Mountains and Rocks, we could not make above 2 Lgs; we saw by the way a great many Fig-Trees, which the Earth produced without any Cultivation. Coming at Night to a Village left by its Inhabitants, just as we had almost unloaded our Baggage, word was brought us, that the Plague had made that Place so desolate. The Ambassadors had a Tent pitch'd for their Lodging in the Field; some of our People remained notwithstanding this in one of the Houses, where they made a large Fire and good Cheer, with the Wine they had brought along with them, to put away Melancholy, and the forward Humour of the Ambassadors, who rail'd with that Violence at the Sieur *Uchterits*, because he had stay'd behind in the Village to see the Baggage loaden and carried thence, that he fell into a Fever. The rest of our People, who did not think fit to venture themselves in the Village, were forced to be contented under the bare Sky, till such time, that by the *Mehemander*'s Care certain *Tartarian* Huts loaden upon Oxen were brought us, tho' very late at Night. These Huts are made only of several Pieces of Wood, fasten'd together at the Ends, so that they may easily be set up, and taken down again.

Tartarian Huts.

The 7th we had a very bad Days Journey, being forced to travel 10 Lgs without baiting, and that in a continual Trot, and in very cold, windy, and snowy Weather, by reason that in those Parts there is abundance of a kind of venomous Wormwood, which kills both Men and Beasts that eat of it. By the way we saw at a distance a very noble *Caravansera*, call'd *Agis*; and not long after, met a certain *Persian* very well mounted, and attended by 2 Servants, who was to be our *Mehemander*, and to conduct us to Court.

A venomous Herb.

A new *Mehemander*.

Our Lodgings which we that Night took up in the Village of *Tzanlu*, a Place surrounded with very pleasant Gardens, and great store of Fruit-Trees, made us some amends for the Toil of the Day; but for want of Wood we were forced to burn Cows and Camels-dung.

The 8th, after Breakfast, we got on Horse-back; and after 3 Lgs travelling along the Mountain of *Tzizetlu*, we came to the River *Karasu*, which arises out of the Mountain of *Bakru*, in the Province of *Kilan*. It has a very fair Bridge of 6 Arches, and 38 Fathom in length, in the Village of *Samajan* where we cross'd it; and, after we had made half a Lg more, took up our Quarters in the Village of *Thabedac*, 2 small Lgs from *Ardebil*; Here we were most miserably pester'd with Fleas, Lice, and other Vermine.

The 9th, being *Easter*-Day, we thrice discharged our Great Guns and Fire-Arms early in the Morning; and after Sermon, our new *Mehemander* came to pay us a Visit, and to complement us, upon Occasion of the Festival: His Name was *Netzefbee*, a Person of an excellent good Temper; he brought along with him, a Present of 5 Fishes dry'd in the Sun, some Bread, Pomegranates, Apples, and among the rest a sort of Pears shaped like a Citron, very juicy and well scented, some pickled Cucumbers, preserv'd Garlick, and some *Schiras*-Wine, which is the best that grows in *Persia*.

April the 10th, being *Easter-Munday*, we made our Entrance into *Ardebil*. The first we met with was a Troop of Horsemen, who having saluted and viewed us all round, took their way immediately to the City. *Taleb Chan*, the *Calenter* of *Ardebil*, an aged Person, met us at the Head of a Body of Horse, a little on this side of the Village of *Kelheran* (a Place so noble, by reason of its many Steeples and Towers built of Stone of divers Colours, that we took it for the City it self) who having saluted the Ambassadors, rid on one side of them. Not far beyond the Village we pass'd in a spacious Plain thro' a good number of Horse and Foot, who opened to make us way. Not many Paces thence, we saw the Governor of *Ardebil*, whose Name was *Kelbele Chan*, coming cross the Fields at the Head of a Brigade of 1000 Horse: He was not very tall, but of a goodly Aspect and pleasant Humour; and after the first Complements on both sides, he rode in betwixt the Ambassadors. In the Van march'd 2 young Lads covered with Sheep-skins of divers Colours over their clean Shirts, each of them carrying on the top of a long Pole, made of a Date-Tree, an Orange. They were Sons or Disciples of a certain *Abdalla*, of whom more

The Entrance of the Ambassadors into *Ardebil*.

1637. more anon) and read and sung out of a Book certain Verses in Praise of *Mahomet*, *Haly*, and *Schich-Sefi*. These were follow'd by others, who in a most surprizing manner imitated the singing of Nightingales, and other Birds: The Timbrels and Hautboys playing on both sides; and some of the People were dancing, others singing, others flinging up their Caps for Joy, and to bid us welcome. Not far from the City we saw the Guards placed in 2 Files, with Bows and Arrows in their Hands, and Coats of Mail about their Bodies; their Heads covered with Calotts, call'd *Aratskin*, in which they had abundance of Feathers, the ends whereof some had thrust thro' the Caps into the Skin. Many of them appear'd naked to the Waste; and tho' they had their Arms and Breasts pierced with Daggers, they did not shew the least Sign of any Pain. We saw also a Company of *Indians*, who saluted us with a low Inclination of the Head, and laying their Hands to their Breasts. As we approach'd the City-Gates, we saw such a Conflux of People, that we were forc'd to make our way thro' them with Bulls-pizzels, and within the Gates, the House-tops, Windows, Steeples, and Trees were crowded with such as were come from all Parts to be Spectators of our Entrance.

Are treated by the *Chan*.

We were by the *Chan* himself conducted thro' a spacious Garden into a noble Summer-house, and treated with a most splendid Collation in a very stately Gallery, the *Chan* presenting to each of the Ambassadors, and every one of those that came up with them, a silver Cup of Wine, the rest being entertain'd below in a Tent set up for that purpose. During the Collation, they were diverted with the best sort of Musick *Persia* affords, and a certain Dance or Entry made by Archers with their Bows and Arrows. The Collation ended, the Ambassadors were conducted to very spacious Lodgings, in one of the best Parts of the City, which formerly belonged to *Sara Chutza*, Lord High Chancellor of *Persia*. But this Summer-house being one of the noblest Structures I ever met with, ought not to be pass'd by here without a particular Description. It ow'd its Origin to *Salsagar Chan*, the Predecessor of the present Governor, who having brought the Model of it out of *Turkey*, spared no cost to have it brought to such a Perfection, that not any thing seems left that Art could desire.

A Description of the Summer-house.

Its Figure is *Octogonal*, the whole Structure being 3 Stories high, each of which has its peculiar Fountains, which cast their Waters above any Part of the Structure. All the Walls were covered with a kind of glist'ring Stones of divers Colours, wrought into various Figures, and the Floors were all covered with the best *Persian* Tapestry. A very spacious Gallery of Marble was built all round the House, adorn'd with Paintings of Flowers and Leaf-work. In one of the Corners of the said Gallery stood a Chair of State 4 Foot square, covered with embroider'd Tapestry, and a Quilt wrought with Gold and Silk instead of a Cushion, being surrounded with an Iron Rail, to signifie, that the King as he pass'd one day through *Ardebil*, having rested there, no body must be allow'd to approach it. The King had bestow'd this House upon the present *Chan*, during Life, after his Predecessor had been executed; which was the reason that another Summer-house of his own Building in a great Garden, near a very fair Stone-bridge without the City, lay desolate at that time.

The Veneration of the *Persians* for their Princes.

The next Day, *April* the 11th, was brought to the Ambassadors the *Thaberick*: These are certain Dishes of Meat for 3 Meals, sent to all Persons of Quality that come to *Ardebil*, pursuant to an Institution, obsery'd many Years ago about the Body of *Schich-Sefi*, the Founder of the Religion of the *Persians*; as also that of the late King, whose Sepulchres are at *Ardebil*. They brought us 32 great Dishes, or rather Basons, full of Rice, of all Colours, upon which the boiled and roasted Meat, as also some Omelets and Pastry, were laid according to the *Persian* way. But no Wine is allow'd at this Feast of the *Thaberick*; which tho' it pleased us not, yet we caused our great Guns to be discharged, and would have made a small Present to the Bearers, which they refused out of Devotion.

The Thaberick.

Is forbidden them Wine.

Next Day, the following daily Allowance was settled for our Kitchin, 16 Sheep, 200 Eggs, 4 *Batmans*, (which make 26 Pounds) of Butter, 13 Pounds of Raisins of the Sun, 6 Pounds and an half of Almonds, 100 *Batmans* of Wine, 2 *Batmans* of Syrup, Meal, Honey, and Poultrey in vast Plenty, not reckoning the extraordinary Presents sent us by the *Chan*; so that, during our stay at *Ardebil*, we consumed in Bread, 1960 *Batmans*. In Wine, 6250. In Eggs, 9300. 477 Sheep, and 472 Lambs.

Their allowance at *Ardebil*.

1637.

April the 12th, The *Chan* gave us the first Visit, with all the kind Offers of his Services that could be made, of which he gave us real Demonstrations afterwards. He sent also the same Day an Express to Court, to notifie our Arrival there, who did not return till two Months after.

The Governor's Visit.

April the 21st, The Ambassadors received a Visit from a certain *Armenian* Bishop, lately come from the City of *Ervan*. He was a Person of very good Discourse, and gave us a particular Account of the present State of the Christian Churches in *Asia*. He told us, among other things, That in a certain Convent near *Ervan*, were above 400 Monks; That in the Mountains, betwixt the River *Aras* and *Kur*, the Christians inhabited above 1000 Villages; and that about *Casvin* and *Tauris* lived at least 2000 Families more, which in all made up 500 Churches. He highly extoll'd the *Persians*, in not laying such heavy Taxes upon the Christians under their Jurisdiction, as the *Turks* do, and inviolably preserving their Privileges; desiring the Ambassadors to recommend them, and their Concerns, to the King.

The Visit of an *Armenian* Bishop.

The State of the Christian Churches in *Asia*.

April the 25th, which according to the *Arabian* Computation is the 10th of the Month *Silhotza*, was the great *Bairam*, or Festival, call'd by them *Kurban*, *i. e. Sacrifice*, in remembrance of that Sacrifice *Abraham* was going to make of his Son *Ismael*. They kill a Sheep or Lamb before break of Day, each at his own Door, which they cut to pieces, and give them to the Poor, even not sparing the Skin, according to the Example of *Abraham*, who reserv'd nothing of the Ram he sacrific'd instead of *Ismael*.

Kurban, or Sacrifice of the *Persians*.

It is much about the same time, the *Persians*, as well as the *Turks*, go on Pilgrimage to *Mecca*: And as *Noah* took 72 Persons along with him into the Ark, so say they, the number of Pilgrims at *Mecca* ought to be 72000, neither more nor less; if there be more, the same must be excluded for that Year; but they are very exact to have this number compleat, because the Angels would else be put to the trouble to make up as many as are wanting, which say they would shew want of respect to those Spirits. The Men wear at that time a peculiar kind of a white, woollen Turbant, being forbidden to wear it of any Colour, or of Silk. They call this *Turbant Esthiran*, which they wear only as they go, one part of it falling down on one side, passes under the Chin, and is fasten'd again on the other side. They generally take their way over *Jerusalem*, where having perform'd their first Devotions, they go from thence to the Sepulchre of *Mahomet* at *Medina*; where after they have continued the same for some time, and kiss'd his Tomb with great Veneration, they travel from thence to *Mecca*, or Mount *Arabat*, either quite naked to the Waste, or else covered only with a Shirt, as swift as a Horse can trot, or a Camel gallop, scarce giving themselves leisure to eat, drink, or sleep; because it is their Opinion, that the Sweat produced by this Motion cleanses them from all the Impurities of their Sins. The Women are allow'd to bind up their Breasts with a kind of a Scarf they call *Seamachze*, for the better conveniency of travelling.

The Pilgrimage of the *Turks* and *Persians* to *Mecca*.

The Particulars of this Pilgrimage.

The 10th of the Month *Silhotza*, is chiefly dedicated to their Devotions upon the Mount *Arafat*, the same, according to their Opinion, where *Abraham* was to have sacrificed *Ismael*. After they have spent here all the Night in Prayers, they come down with break of day to the City of *Mecca*, where the *Hetzas*, or High Priest, conducts a Camel intended for the Sacrifice, in Procession thro' the Chief Streets of the City, the Pilgrims at the same time thronging to come near to the Camel, and to get some of his Hair, which they look upon as a most precious Relick. At last, the High Priest leads the Camel to the *Meydan*, or Market-place, where the *Duroga*, or Chief Judge of the City, and some of his Attendants kill him, by giving him many Blows in the Head, Neck, and Breast. Then it is, that the Pilgrims, with Knives in their hands, endeavour to get a piece of his Flesh with so much eagerness, that many of them are thereby kill'd and wounded; the first being placed in their Martyrologies. To conclude the Ceremony, they go in Procession about the *Mosque*, and kiss a certain Stone, which was left after the finishing of that Structure: They take also of the Water, which is conveyed thro' a golden Pipe over the *Mosque*, as a sacred Relick, with a little piece of a certain blackish Wood, they commonly make Toothpicks of. The Pilgrims, after their return from thence, are call'd *Hazi*, and are *Nazarites*,

1637. *Zarites*, being forbidden the Use of Wine for ever after.

Upon the Account of this Sacrifice of *Mecca*, we will touch upon some few Heads only (the rest being too long to be inserted here) of what *Mahomet* says in relation to the Sacrifice of *Abraham*, as it is disguised with fabulous Inventions in all its Circumstances. They say, That *Abraham* being the Son of *Azar*, Graver to *Nimroth* King of *Egypt*, married *Sarah* a beautiful Woman, and growing jealous of her upon the King's Account, carried her into *Arabia*. But finding her barren, begot *Ismael* upon a Slave, named *Hagar*. But she being forced to leave the House by the ill Treatment of *Sarah*, *Abraham* follow'd her, and found her already delivered of a Son, who by setting his Feet upon the ground made a Spring come forth, but with such violence, that *Hagar* could not get any of the Water to quench her Thirst, till *Abraham*, by making a little Bank of Sand, stop'd the Current, and made *Hagar* drink.

Not long after *Ismael*'s Birth, the Angel *Gabriel* commanded *Abraham* from God, to build a House upon the said Torrent; but *Abraham* declining the same for want of Materials, the Angel reply'd, That God would provide; and accordingly Mount *Arafat* forc'd out of its Quarries a vast Quantity of Stones, which roll'd down the Mountain to the little River, where he built the said House, which has since been converted into a *Mosque*, and is the same where the Pilgrims of *Mecca* perform their Devotions. The Stone, which we told you was kiss'd by the Pilgrims, was, say they, the only one that was remaining after the finishing of the Structure, unto which *Abraham* promised, that it should be in great Veneration among the Faithful, and be kiss'd by them; which is turn'd black by so much kissing, whereas it was white before.

They further say, That God intending to try the Affection of *Abraham* to him, sent the Angel *Gabriel* to him again, to command him to sacrifice his Son *Ismael*, which he immediately consenting to, the *Sceithan*, or Devil, presented himself to *Hagar*, representing to her the hainousness of the Fact *Abraham* was going to commit, in sacrificing her Son. She ask'd the Devil, what could move *Abraham* so to do? Unto which the Devil having answered, That it was God's Command, *Hagar* acquiesced in the Will of God; and, to be rid of him, cast a Stone at him. This Effort of the Devil proving unsuccessful, he made his Application to *Abraham*, endeavouring to revive in him the Tenderness of a Father; but he being too well acquainted with his Deceits also sent him away, and cast a Stone after him. His last Attempts were upon *Ismael*, setting before his Eyes the Horror of an unnatural Death, but with no better Success; for he had no other Reception, but a good Stone at his Head. The Father and Son being come to the top of the Mountain *Arafat*, *Ismael* requested Three Things of his Father: First, That he would bind him fast, for fear the Pangs of Death might make him struggle against him. Secondly, That as soon as he had thrust the Knife into his Throat he would shut his Eyes, for fear that the Horror of the Action should take away the use of his Hands, and so make him die a ling'ring Death. The Third was, to remember his Duty to his Mother.

Abraham, according to the Promise made to his Son, having well bound his Son, and after he had put the Knife to his Throat, and shut his eyes, endeavoured to thrust it in with all his might; but finding no Entrance, and opening his Eyes, tried the edge of his Knife upon a Stone, which he cut in pieces; and being astonished at it, ask'd the Knife why it could not cut his Son's Throat as well as the Stone? Unto which the Knife made Answer, It was not God's Will to have it so. Immediately after the Angel *Gabriel* taking *Abraham* by the Hand, said, *Hold, God intended only to try thy Faith; unbind thy Son, and sacrifice this He-Goat*, which he shew'd him upon the Place; and *Abraham* offer'd it to God accordingly for a Burnt-Offering.

They positively affirm, that the three Stones which *Hagar*, *Abraham*, and *Ismael* threw at the Devil, are yet to be seen near the High-way, betwixt *Medina* and *Mecca*; and that 3 great Heaps are made there by the Pilgrims, who bring every one 3 Stones to be cast at the Devil, to prevent his disturbing them in their Devotions.

We saw also the same day above 500 Women going before day to the Graves of their Husbands or Kinsfolks, some eating, some reading certain Passages out of the *Alcoran*. Those of the better sort had Tents erected in the Church-yard, to prevent their being seen. This Devotion is commonly performed in their Lent-time. Prayers for the Dead. 1637.

The Ambassadors were also the same day treated again with the *Thaberick*. The Meat was brought in 6 large Copper Basons tinn'd over, they call them *Lenkeri*, and the Preserves in 9 great Porcelane Vessels.

The next Day they were again magnificently entertain'd by the *Chan* at one of his Summer-houses.

The 27th in the Evening, the *Chan* imparted to the Ambassadors the good News he had received of the Mutiny of the *Janizaries* at *Constantinople*, who had kill'd the *Grand Seignior*, at which great Rejoicing was made by the *Persians*, by Fireworks and Musick. The Ambassadors did the like, by causing their Trumpets to be sounded, and their Drums to beat, with a Discharge of all their Great Guns 6 times successively; which the *Chan* took so kindly, that he sent them two Flaggons of *Schiras* Wine, and a great Glass Vessel full of Candy'd Sugar. Rejoicing in *Persia* at the *Grand Seignior*'s Death.

May the 1st, being the Birth-day of the Ambassador *Crusius*, the same was celebrated with a magnificent Supper, at which our *Mehemander Netzefbeck* was present.

The 4th, The Ambassadors were visited by *Saru-Taggi*, the Son of the Chancellor of *Persia*, who was with some other Persons of Quality come on purpose from *Ispahan*. We entertain'd them with a very fine Collation, and Discharge of our Great Guns. A Visit from the Chancellor of *Persia*'s Son.

May the 14th, The *Persians* celebrated the Feast, called *Ashur*, *i. e. Ten*, because it lasts 10 Days, and begins with the Moon of the Month *Maheram*; which being intended in memory of the Death of *Hossein*, the youngest Son of *Haly*, is peculiar to the *Persian* Sect. A Feast peculiar to the *Persians*.

He was, say they, kill'd in the War against the *Calif Jesid*; and, after he had received 72 Wounds with Arrows, was run thro' the Body with a Sword by *Senan ben aneff*, and kill'd *Schem Sultzausen*. It lasts 10 Days, because he was so long pursu'd by his Enemies, before they overtook him. All this while the *Persians* shew all the Signs of Affliction, appear in Mourning, don't shave themselves, (which otherwise they do every day) drink no Wine, but only Water. There was nothing to be seen but Nunneries, and an awkard sort of Devotion throughout the City of *Ardebil*. You might have seen the Boys running in troops about the Streets with Banners, on the Extremities whereof were Snakes of Past-board, winding to and fro like *Mercury*'s Caduceus; and when they came to the Doors of the *Mosques*, they cry'd, *Ja Hossein; Ja Hossein, i. e. O Hossein.* After Sun-set, especially the 3 last Days, the Men met without the City under Tents, with Lanthorns, and Torches, and Oranges on the top of their Poles, singing and crying out, *Ja Hossein*, for an hour together; which done, they return in Procession with Banners and Torches thro' the chief Streets of the City. The 10th day the Devotion was concluded. In the Morning a Solemn Oration was made in Honour of *Hossein*, in the Court of the *Masar* of *Schich-Sefi*, where, near the Chancery, a Banner was planted, which, they say, was made by the Daughter of *Fatima*, the Daughter of *Mahomet*: And the *Persians* positively affirm, that it shakes as often as the Name of *Hossein* is mentioned in the said Oration; but I must confess I could see no such thing. Odd Devotion. A pretended Miracle.

Accordingly, *May* the 24th, the *Chan* sent word to the Ambassadors, that if they had a mind to be present at the Conclusion of this Feast, they should be very welcome; but that they must excuse him, if he entertain'd them without Wine.

Towards Evening the Ambassadors went to the *Chan*'s Palace, who met them at the Gate next to the Street, and assign'd them a Place on the left hand in the Court, where the Ceremonies were to be performed, Seats being erected there for their better Conveniency, and their Retinue, covered with rich Tapestry; and upon a Cloth before them upon the Ground were set several Vessels of Porcelane, with sugar'd and perfum'd Waters, as also brass Candlesticks 4 Foot high, with great Wax-Candles in them, and Lamps fill'd with Rags dip'd in Suet and Naphtha. The *Chan* sat down upon the Ground on the right side of the Gate. Round the Walls of the Court you might have seen 1000 Lamps, which cast so great a Light, that the whole Palace seem'd to be in a Flame, which was augmented by the Light of many Paper-Lanthorns, fasten'd to certain Cords drawn cross the Court. The Five Professions, or Wards, into which the City of *Ardebil* The Conclusion of the Feast.

1637. *bil* is divided, appear'd each in their reſpective Stations, and preſented the *Chan* with a Serenade compoſed by ſome of their Poets (of which there are a very great number in *Perſia*) in praiſe of *Haly* and *Hoſſein*, in lieu of which he preſented them with ſome Waters ſweeten'd with Sugar; before they went away, they wiſh'd the Ambaſſadors good Succeſs in their Intended Negotiation.

In the mean time ſeven poor Boys, diſguiſed for that purpoſe, by rubbing their naked Bodies with Suet, and Naphte, and ſome with Vermilion, the more lively to repreſent the Blood of *Hoſſein*, were dancing with little Stones in their hands, which they knock'd againſt one another, and ſmote their breaſt with them, to expreſs their Sorrow for the Death of *Hoſſein*.

Perſian Fire-Works.

The Ceremonies being ended, the *Chan* would needs entertain the Ambaſſadors with a Firework excellently well contriv'd, conſiſting of a little Caſtle with Towers, and a vaſt number of Squibs and Crackers. The Caſtle, which was about 3 Foot ſquare, and the Walls of Paper, of all ſorts of Colours, had abundance of lighted Wax-candles round the Moat, which diſcovered the painted Figures of the Paper. It was ſet on Fire firſt, but before the Body took Fire a vaſt multitude of Squibs and Crackers iſſu'd out from thence, for near 2 hours. The next thing that was ſet on Fire, is call'd *Derbende*, made in Form of a *Saucidge*, of 6 Inches thick and 3 Foot long, caſting out at both ends a ſhow'r of Fire, which being follow'd by a vaſt number of Squibs and Serpents, ſet the Peoples Cloths that were moſt of Callicoe on Fire, whilſt ſeveral ſorts of Rockets were thrown up into the Air, which turn'd into Stars and other Figures. Several Boxes full of Fireworks were alſo ſet on Fire. But what moſt diverted the Company, was a certain Engine full of Fireworks of all ſorts; which being faſten'd to the ground with a Chain, caſt out Fire at the mouth with ſo terrible a noiſe, that every body dreaded the Effects of it. They call this kind of Firework, *Kumbara*.

This done, ſome appear'd with Paper-lanthorns upon long Poles, fill'd with Squibs and Serpents, and out of each of thoſe Lanthorns you ſaw a piece of Linen fly out, folded together and ty'd in great Knots, in each of which Knots were ſeveral Squibs and Serpents, which made an admirable ſhew by the windings and turning of theſe Serpents thro' the Fold. Others had in their Aprons certain ſmall Fireworks, into which others as they paſs'd by caſt, as it were by chance, ſome Fire, which made thoſe ſhake their Aprons, and throw the Fireworks upon the ground, which burn there a long time like ſo many Stars.

The *Perſians* uſe abundance of Naphte in their Fireworks, which being a kind of *Petreolum*, the rectify'd Spirit of *Turpentine* may be uſed inſtead of it in *Europe*. We alſo ſaw at a great diſtance in the Air certain Flames, which vaniſhed immediately. I am apt to believe that theſe were procured by a certain Drug,

Bears-foot.

call'd *Dram* by the *Muſcovites*, being a yellow Powder made of an Herb, found in the Foreſts among the Pine and Birch-trees: The *Latins* call it *Acanthus*, the *French*, *Branche Urſine*, and the *Engliſh*, *Bears-foot*, or *Bears-breech*. Each Stalk of this Herb bears 2 Buttons, which being ripe in *Auguſt*, the *Muſcovites* gather and dry them in an Ox-bladder. It is a great drier, when apply'd to Wounds, and is good againſt the Itch. But the chief uſe the *Muſcovites* make of it, is in their Fireworks. They take a Tin Box made in the Form of a Pyramid, into which they thruſt that end of a Torch which is not lighted, and by that means make the Powder, which is very fine, come out and fall into the Flame, ſo that by continual thruſting they make ever and anon a new Flame, which is very lively and that without any Smoak, but it vaniſhes almoſt as ſoon as it appears. It is obſervable, that this Powder will not take Fire any other way, tho' you caſt it upon burning Coals, or thruſt a lighted Candle into it. The Fireworks laſted till Midnight, when we return'd to our Quarters.

The next day before Sun-riſing, the *Perſians* appear'd again in Proceſſion, to repreſent the Interment of *Hoſſein*. Many Banners were carried, and ſeveral excellent Horſes and Camels led, covered with blue Cloth, in which were quilted abundance of Arrows, as if they had been ſhot into it, repreſenting thoſe ſhot by the

The Interment of Hoſſein.

Enemies at *Hoſſein*. Upon the Horſes were mounted certain Boys with empty Coffins before them, covered with a little Hay or Straw; theſe repreſented the Children of *Hoſſein*: Some of theſe Horſes carried Turbants, Cymitars, Bows, and Quivers full of Arrows.

Immediately after Sun-riſing there appear'd in the Baſe-Court a great number of Men and Lads; the firſt let themſelves blood in the Arms, and that in ſuch a quantity, as if ſeveral Oxen had been kill'd. The laſt only ſlaſh'd and cut themſelves above the Elbow, and ſtriking all the Wounds with their hand, made the Blood ſpurt all over their Bodies: Thus they ran thro' the Streets, in commemoration of the Effuſion of the Blood of *Hoſſein*, being fully perſwaded that they thereby expiate their Sins; and if they die during this Feaſt, they are certainly ſaved: They have the ſame Opinion of the Feaſt of *Haly*, and of their Lent. 1637.

A bloody Devotion.

The City of *Ardebil*, call'd *Ardevil* by the *Turks*, and by ſome others *Ardonil*, lies in the Province of *Adirbeitzan*, (the *Media Major* of the Ancients) which beſides this, has the Cities of *Tauris*, *Merrague*, *Natſchan*, *Miane*, *Urumi*, *Choi*, *Salmas*, &c. The City of *Ardebil* challengeth this Prerogative of being one of the moſt ancient and moſt celebrated Cities of the *Perſian* Empire; partly, becauſe it was the uſual Reſidence of ſeveral of their Kings, and partly becauſe *Schich Sefi*, Author of their Sect, lived and died here. Some are of Opinion, that it is the ſame City mention'd by *Q. Curtius* by the name of *Arbela*. It boaſts alſo of the Tombs of the Kings of *Perſia*, and its Traffick renders it one of the moſt conſiderable of all the Eaſt, which makes the *Turkiſh* Language to be more current here than the *Perſian*. I found the Elev. to be 38 dgs, 5 min. and the Long. 82 dgs, 30 min. It is ſituate in the midſt of a very fair and ſpacious Plain, having above 3 Lgs in circumference, which is on all ſides inviron'd with Mountains like an Amphitheatre; the higheſt part whereof, call'd *Sabelhan*, to the W. of the City, is ſcarce ever free from Snow. Towards the S. S. W. lies the Mountain *Bakru* in the Province of *Kilan*. Theſe Mountains occaſion a continual Changeableneſs of Weather, from the Extremity of Heat to a high degree of Cold, which makes this City very ſubject to epidemical Diſtempers, eſpecially in *Auguſt*, when they begin already to be ſenſible here of the Inconveniences of *Autumn*. We alſo bore our ſhare of it; for beſides many Servants that fell ſick, the Ambaſſador *Brugman*, and our Phyſician were ſeized with a violent Fever, the laſt being reduced to that extremity, that his Life was deſpair'd of. We obſerved that every day about Noon, when the Heat is moſt exceſſive, there aroſe a certain Whirlwind which raiſed a great Duſt, but laſted not above an hour; from whence ariſes the *Perſian* Proverb, *Saba Ardebil, Nimrus Kardebil; in the Morning Ardebil, at Noon full of Duſt*.

A Deſcripti. of Ardebil.

The Air changeable.

For the reſt of the Day, and the Nights were generally calm. From hence it is evident, that it is not the Climate, but the Situation of this City, that hinders the Ground thereabouts to produce any Vines, Melons, Citrons, Oranges, and Pomegranates, which are frequent in all the other Parts of *Perſia*; but Apples, Pears, and Peaches they have in great Plenty here. This is to be underſtood no further than the Plain reaches, for the Air is much warmer and more temperate at the Foot of the Mountains; and the Ground produces Fruits, nay, the Trees, which ſcarce ever begin to bug at *Ardebil*, till *April*, were very forward at the Village of *Alaru*, lying at the Foot of the Mountain *Bakru*. However in all other reſpects the Plain tho' not very great, is ſo good, that it maintains above 60 Villages round the City; beſides, that it raiſes the King a conſiderable Revenue in the *Turkiſh* and *Arabian* Shepherds, who feed their Flocks there. One of the Clerks belonging to the Revenue told me, that within 15 Days there had paſſed above 100000 Sheep over the Bridge of *Ardebil*, for each of which they pay two-pence for Paſturage, and as much when they are ſold.

The Fertility of the Soil.

Ardebil is not much bigger than *Scamachie*, but without Walls: Each Houſe in the City having its Garden planted with Fruit-Trees, makes a very pleaſant ſhew at a diſtance; but being deſtitute of Wood for Fuel, they are ſupply'd with it from the Province of *Kilan*, 6 days Journey from thence. At the Village of *Scamashu*, a Lg to the S. of the City, riſes the ſmall River *Balachlu*, which ſoon after dividing it ſelf into 2 Branches, one paſſes through the City, and the other encompaſſes it; and afterwards rejoining again, fall together into the River *Karaſu*. The worſt is, that this River is ſo apt to overflow in the Spring, when the Snows begin to melt upon the circumjacent Mountains, that, if they are not very careful to divert the Current by making Trenches in the Plain, the whole City would be drown'd. As it happen'd in *Schach Abas* his

1637. his time, when the River having broken through the Dikes, did an incredible Mischief there: And I my self was an Eye-witness of such another danger on the 12th of *April*, when above 1000 Men were employ'd day and night in making of Trenches to divert the River.

Its Streets. *Ardebil* has, besides many small ones, 5 Capital Streets, named *Derwan*, *Tabar*, *Niardower*, *Kumbalan*, and *Kasirkuste*, which are planted with Elms and other Trees, which afford a very agreable Shadow against the burning heat of the Season.

The Market-Place. The *Maidan*, or Market-place, is 300 Paces long, and 150 broad, having Shops on all sides, and each Profession its peculiar Quarter. As you go to this Market, you see on the right hand (behind the Sepulchre of *Schich-Sefi*, and the last *Persian* Kings) a *Mosque*, where lies interr'd *Iman Sade*, or one of the Children of their 12 Saints. This serves for a Sanctuary to Criminals for a certain time, from whence they retire to

A Persian Sanctuary. the Tomb of *Schich-Sefi*, their Great Sanctuary. As you come out of the Market-place, you see a very fair Arched square Building, call'd *Kaiserie*, which is appointed for the Sale of all the most precious Commodities, such as Gold and Silver Brocado's, Silk Stuffs, and precious Stones. This Structure has 3 Gates, leading into so many Streets, very well furnished with Shops, and cover'd over head. In these Streets are also several *Caravansera's*, or Store-houses, for the *Turks*, *Tartars*, *Indians*, and other foreign Merchants. We saw there among the rest 2 *Chineses*, who sold *Porcelane* and *Lacque* Work.

This City is also well furnished with Publick Baths, and has many *Metzids* or *Mosques*; the chiefest of which, call'd *Metzid Adine*, being built upon a little Hill in the midst of the City, has a very fair Steeple, and at its Entrance a Fountain, which the late Chancellor of *Persia* had caused to be conveyed thence by Pipes, from a Mountain a Lg distant from the City to the S. W. The *Chan* sent us word on *Whitsun-Monday*, that if we had a mind to see the Sepulchre of *Schich-Sefi*, he would go with us thither, but that we must abstain from Wine all that day, and that our Supper should be provided for us out of *Schich-Sefi*'s Kitchin.

Accordingly the Ambassadors being gone thither with all their Retinue, they were conducted into a spacious Court, pav'd with broad Stones, and furnish'd on both sides with Shops in Vaults; backwards it had

The Ambassadors visit the Tomb of Schich Sefi. a fair Publick Garden. The Gate thro' which we enter'd into this Court was very large, and had above it a great Silver Chain extended from one side to the other, at which hung down another perpendicularly in the middle, being a Present of *Aga Chan*, Governor of *Merrague*.

From hence the Governor conducted us to another Gate, which had just such another Chain, the Gift of *Mahomet Chan*, Governor of *Kentza*. Here we were

Are obliged to surrender their Arms. forc'd to deliver our Arms, in which Point they are so strict, that if a *Persian* should have only a Knife about him, it is Capital. The Threshold of this, as well as of all the following Gates, were round and of white Marble; and we were desired not to touch it with our Feet, because the *Persians* are wont to kiss it, but to step over it with the right Foot foremost. The Court we enter'd into, was as long as the first, but not so broad, pav'd in the same manner, and provided with vaulted Shops on both sides. On the right hand came out of the Wall, by means of a brass Cock, a fair Spring, (conveyed hither at a distance from hence;) and at the upper end of the Court to the right hand we were shew'd a very fine and large Vault, hung within with Tapestry, and pav'd at the Entrance with green and blue Stones. In the midst stood 2 large Brass Candlesticks with Lights in them, and all along the Walls sate several Priests clad in white, singing with a loud Voice, and expressing much Humility in their Devotions, moving without intermission all at once, like one Man from one side to the other, with so much exactness, that one would have believed they were all drawn by one Cord. They call this Place *Thschillachane*, because

Schich-Sefi's Fast of 40 days. *Schich-Sefi* used every year to fast in this Place for 40 days together, eating no more than one Almond a-day. Thence we were conducted thro' a third Gate, with a Silver Chain over it, as those beforementioned, (the Present of *Ali-Chan*, Governor of *Koppan*) into a less Court than the two former, pav'd with small square Stones of divers Colours. The Gate by which we enter'd into the Place, where the Sepulchre was, was built like a great Tower, the Clappers being all cover'd with Silver Plates, and adorn'd with Rings of the same Metal. The Pavement at the Entrance, which led into a large Structure, was all cover'd with Tapestry, and we were injoin'd to pull off our Shooes, which the Ambassadors having not without some Reluctancy consented to, we passed into a very large Gallery, hung and covered every where with Tapestry, and afterwards thro' another Gate covered with Plates of Gold, into another sumptuous Apartment arch'd all about. This Gate was the Gift of *Schach-Abas*, after a signal Victory obtained against the *Usbeque Tartars*. This Vault was 4 Fathom square, being inlight'ned by a great number of Gold and Silver Lamps, some of which were 3 Foot Diameter. On both sides sat 12 Priests, with Books of Parchment before them laid upon Desks, containing in *Arabick* Characters certain Chapters of the *Alchoran*, which they sung as our Monks do their Vespers, but with the same Motion we mentioned before. This Vault was divided from another by Silver Rails only, but raised higher by 3 Silver Steps. The *Chan*, and our Interpreter *Rustan*, having kiss'd these Steps, conducted the Ambassadors into it, who took only 4 of their Retinue along with them. We found this much more rich than any of the rest, and saw at one end of it a Place raised about a Foot higher from the ground, and fenc'd in with Rails of massy Gold. Behind this Partition was the Sepulchre of *Schich-Sefi*, made not of Gold, as some have perswaded the World, but of white Marble, being covered with Crimson Velvet, and raised 3 Foot above the ground: It has 9 Foot in length and 4 in breadth. From the Roof hung several Lamps of Gold and Silver, and on both sides 2 very large Candlesticks of massy Gold, with Wax-Candles lighted in the Night-time.

The Ambassadors would fain have prevail'd so far, as to have the Door of that golden Rail unlock'd, but could not, the *Persians* alledging, that no Laick, not the King himself, was permitted to enter there. We discovered on the left hand of the same Apartment where we were, a particular Vault, in which was the Tomb of *Schach-Ismael*, and that of *Schach-Sefi*'s Wife, as also those of some other Queens of *Persia*, but were not allow'd to look upon them, having only discovered thro' the Meeting of the Curtains, which were drawn at the Entrance, that there was nothing remarkable to be seen there. As we went along, we were follow'd by a grave old Fellow, who with certain Incenses purify'd all the Places thro' which we pass'd.

Laicks not permitted to approach the Sepulchre.

We were reconducted through the same Gallery to the right hand into another Apartment, arch'd all about and gilt, being without any Pillars, tho' it was as spacious as a large Church. This is a *Persian* Library they call *Tzenetsera*, consisting of Manuscripts, some upon Parchment, others upon Paper, most in *Arabick*, the rest in the *Turkish* and *Persian* Languages, all excellently painted, richly bound, and covered with Plates of Gold and Silver, carv'd and branch'd, especially the Historians, whose Books are embellish'd with several Representations in Colours; the worst is, that they are shuffled together in Drawers without any order. In several Niches on the sides, stood above 400 Porcelane Vessels, some of which were big enough to hold 10 Gallons of Liquor: These are never made use of, but upon occasion of the Entertainments, which are brought from the Sepulchre to Persons of great Quality who pass that way, they being not permitted to make use of Vessels of Gold or Silver, because *Schich-Sefi*, as they say, made use only of wooden Dishes.

A Library.

The Kitchin. We were then conducted to the Kitchin, the Doors whereof were likewise covered with Silver Plates, where every thing was disposed in a most admirable order, and the Water conveyed by many Pipes and divers Cocks all over the Kitchin; each Cook having his peculiar Place assign'd him according to his Function.

Out of this Kitchin above a 1000 Persons are provided for every Day, including those belonging to the House; the Poor having 3 times a-day, Pottage, Rice, and Meat distributed among them, *viz.* at 6 and 10 in the Morning, and at 3 in the Afternoon. For the 2 Morning Meals, *Schich-Sefi* himself has left a Foundation of 50 Crowns *per diem*, the rest is upon the King of *Persia*'s Account. Not to mention the Alms that are disposed here by private Persons, which are so excessive, that, besides what is given to the Poor, there is a sufficient Surplus sold to those who are asham'd to beg. Whilst these Distributions are made, they sound 2 Timbrels, which they say were brought by *Schach-Sedredin* from *Medina*, with the Banner of *Fatima*.

The Charity of the Place.

From the Kitchin we pass'd thro' a very fair Garden, which contained the Sepulchres of *Sultan Aider*, *Schach-*

1637. *Schach-Tamas*, and ſeveral other Kings of *Perſia*, without any other Covering but a ſmooth Stone. The other Sepulchres we ſaw, were,

Sepulchres of the Kings of Perſia.

1. *Schich-Sefi*, the Son of *Seid-Tzeibrail*.
2. *Schich-Sedredin*, the Son of *Sefi*.
3. *Schich-Tzinid*, the Son of *Sedredin*, call'd by ſome *European* Authors erroneouſly, *Guined*.
4. *Sulthan Aider*, the Son of *Tzinid*, who was flea'd alive by the *Turks*.
5. *Schich Aider*, the Son of *Sulthan Aider*.
6. *Schach-Iſmael*, the Son of *Schich-Aider*.
7. *Schach-Tamas*, the Son of *Schach-Iſmael*.
8. *Schach-Iſmael* the 2d, the Son of *Schach-Tamas*.
9. *Schach-Mahomet Choddabende*, the Son of *Schach-Iſmael*.
10. *Iſmael Myrſa*, Brother of *Choddabende*.
11. *Hemſa Myrſa*, } Sons of *Choddabende*.
12. *Schach-Abas*, }

This Sepulchre was firſt built by *Schich-Sedredin*, after the Death of his Father. *Schich-Sedredin*, after the Death of his Father; *Schich-Tzinid*, his Son, added thereto the great Court, and augmented it with many other Houſes, ſo that it now repreſents a very noble and large Caſtle, whither there is daily ſuch a Conflux of People, who come thither to diſcourſe or walk, that few Princes Courts exceed it in this reſpect. The vaſt Revenues annexed to it by ſeveral *Perſian* Kings, and the daily Preſents made to it, have ſo encreaſed its Wealth, that the ſame is computed to amount to many Millions of Gold; it being generally ſuppoſed, that it could raiſe more ready Money than the King himſelf, and to be able to maintain a very good Army in caſe of Neceſſity. For not to ſpeak of the Farms that belong to it about *Ardebil*, it has within the City 200 Houſes, 9 Publick Baths, 8 *Caravanſera's*, or Store-houſes, that great Structure call'd *Kaiſerie*, the Market-Place, with its Vaults and Shops, 100 other Shops in the *Bazar*, and the Markets where Cattle, Wheat, Salt and Oil are ſold; there being no Stall or Shop in the open Market, but what pay certain Duties to it. It is poſſeſs'd of 33 Villages and Towns, near *Ardebil*, of 5 Villages in the Province of *Serab*, of 60 Houſes and 100 Shops within the City of *Tauris*, and 2 Villages near it. Of ſeveral *Caravanſera's* and Baths in the City of *Caſuan*, and likewiſe in the Provinces of *Kilan* and *Aſtaran*, beſides certain Taxes of the Provinces of *Mokan*, *Chalchat*, *Kermeruth*, and *Haſchteruth*; not to mention here the many Preſents, Gifts, Donations, and Legacies, appropriated to the uſe of it, either in reſpect of certain Vows, or charitable Inclinations of thoſe of the *Perſian* Sect; which were received and managed by 2 Commiſſioners, call'd *Neſſirtzchan*, (from *Neſir*, *i. e.* a Vow,) who put all the Money, as likewiſe that ariſing from the Sale of the Horſes, Camels, *&c.* that bring theſe Preſents, into a great Cheſt, but cauſe the Oxen and Sheep brought thither to be kill'd for the uſe of the Poor. They are ty'd by a very ſtrict Oath to be faithful to their Truſt, and have a certain Village near the City allotted them for their Revenue.

Commiſſioners for the management of the Revenue.

The Pilgrims, at their departure, are alſo furniſhed with certain Certificates or Teſtimonials, which ſerve to them inſtead of Protections, upon many Occaſions, even to the ſaving of their Lives. Thus our Interpreter *Ruſtan*, as ſoon as he had taken a Reſolution to leave us, provided himſelf with 3 ſuch Teſtimonials, 2 of which being found among his Cloths, are preſerved to this day in his Highneſs of *Holſtein*'s Library at *Gottorp*.

Theſe Certificates, call'd *Sijaretname*, are likewiſe given at the Sepulchre of *Iman Riſa*, at *Meſchet*, which have the ſame effect as thoſe delivered at *Schich-Sefi*'s Sepulchre, in ſaving the Lives of thoſe who have forfeited them. Of this we had an Inſtance given us in *Agaſi-Beg*, which happen'd not long before our Arrival at the *Perſian* Court. This *Agaſi* attending at a certain time in the Quality of a Steward at the King's Table, *Tzirra-Chan*, a Perſon of the firſt Quality who had married lately one of the Ladies of the *Seraglio*, coming in, and being ask'd by the King what made him come ſo late, anſwer'd boldly, that he had been dallying with *Agaſi*'s Wife; at which the King bluſhing for Vexation, *Tzirra* thought fit to withdraw; but was no ſooner gone out of the Room, when the King ordered *Agaſi* to go and fetch his Head. *Agaſi* went accordingly, but inſtead of obeying the King's Orders, ſat down with *Tzirra* to be merry together; which the King being inform'd of, by a Meſſenger ſent for that purpoſe, he cry'd out, *O*, Agaſi, *poor Cuckold*! and ordered *Alieuli-Chan* to go and bring both their Heads to him. But *Agaſi* reflecting in the mean time upon his Neglect, thought fit to leave *Tzirra*; who being found at home, his Head was cut off, and brought to the King; which ſerving as a Warning to *Agaſi*, he undertook a Journey to the Sepulchre of *Iman Riſa*; whence bringing back a Certificate, he threw himſelf at the King's Feet ſometime after, who received him with theſe Words: *I commend thee for thy Wit, thou kind-hearted Cuckold, and pardon thee for* Iman Riſa's *ſake*.

The Inſolence of a Favourite punished.

1637.

The Clerks who have the management of theſe Teſtimonials, will ſometimes ſell them underhand with Blanks, to put in the Names of ſuch as may have occaſion for them: Of ſuch a one, there is a Copy extant in his Highneſs of *Holſtein*'s Library at *Gottorp*.

The Tomb of Schich Sefi's Father.

There is another Tomb in the ſame Village, built in the midſt of a fair Garden, in honour of *Seid-Tzeibrail* the Father of *Schich-Sefi*, who was only a Peaſant. It was round, raiſed 10 Steps high, adorned with Glaſs of divers Colours, and ſurrounded by Iron-grates. In the midſt of its Roof, which was Azure-gilt, and join'd by bowing Pillars, was a great round Tower of blue and green Stones: The Floor was covered with very rich Tapeſtry, and round the Walls were certain ſmall Vaults, where Children were educated and fitted for the Service of the Sepulchre. The Tomb it ſelf was about 6 Foot high, and about 4 in breadth, made of Joiners Work, the Junctures of which were faſten'd together by Copper-Plates: It was covered all over with green Velvet, and over it hung 2 golden, and as many ſilver Lamps, which were lighted every Night: Oppoſite to it ſtood a ſmall Chapel, containing the Tombs of ſeveral other Perſons of the Family of *Schich-Sefi*. The Governor of *Ardebil* is in reſpect of the Holineſs of this Place, and its being remote from the Frontiers, excuſed from the Charge of maintaining a certain number of Soldiers, as moſt of the other Governors are obliged to do: His Retinue and whole courſe of Life was very moderate, being not guilty of any Exceſs except the taking of Tabaco, (which he ſuck'd thro' a Cane put into a Glaſs of Water, according to the Cuſtom of the *Perſians*) and Coffee.

Medicinal Waters.

Near *Ardebil* are ſeveral Sources of hot Waters: That which ſprings forth at the Foot of the Mountain *Sabelan*, is lukewarm, and as clear as the fineſt Spring-water. Out of another part of the ſame Mountain ariſe 3 more very hot Springs, call'd *Meul*, *Daudau*, and *Randau*; they have ſeveral Springs of cold Water near them, which ſerves to qualifie the exceſſive Heat of theſe Springs, which are brought by Pipes into the Publick Baths. That of *Daudau* has this peculiar, that whenever certain Serpents appear in it, the Waters are accounted wholeſome, which are uſeleſs at other times.

Sulphureous Sources.

On the right ſide of the ſaid Mountain, there is a certain ſulphureous Spring, which with its Scent is diſcovered at a conſiderable diſtance: Its chief uſe is againſt the Itch, from whence it is call'd *Abcotour* by the *Perſians*. Within half a Lg of *Ardebil*, is a large Pond covered with great Pieces of Salt Peter, like a Cruſt, which is likewiſe a good Remedy againſt the Itch.

A new Mehmander to conduct the Ambaſſadors.

The 1ſt of *Jan. Abaſculi-Beg* being ſent by the King of *Perſia*, to conduct us to his Reſidence, arrived at *Ardebil*; and tho' he preſs'd our departure, yet 8 days elapſed before we did ſet out on our Journey, becauſe the Ambaſſador *Brugman* would needs carry our Cannon along with him. At laſt, after having preſented our former *Mehemander* 4 Pair of Sables, and ſeveral Ells of Cloth and Sattins, we took our leave from the *Chan*, who preſented the Ambaſſadors with a very fine Horſe each, bridled and ſaddled, beſides 2 Pieces of Sattin, and one of gold and ſilver Brocado, in return of the Preſents made to him by the ſaid Ambaſſadors; which conſiſted in 3 Pair of the fineſt Sables, a Clock, a Cellar with *Res Solis*, and 2 Pictures.

They leave *Ardebil*.

Jan. 11. Our Baggage which was loaden upon 160 Horſes and 12 Camel, was ſent away, and we follow'd the 12th, being at a Lgs diſtance from the City met by the *Chan* or Governor of *Ardebil*, in company of the *Sulthan* of *Tabris*, who conducted us into ſome of the Huts of the *Tartarian* Shepherds; and, after a Collation of cold Meat, Fruits, and Conſerves, took their laſt leave from the Ambaſſadors there, according to the Cuſtom of the *Perſians*, who never conduct thoſe they have entertain'd out of their Houſes. We travell'd all that day over craggy Mountains to the Village of *Buſnar*,

1637. 4 Lgs from *Ardebil*, where we overtook our Baggag and Artillery, but were forced to leave 6 of our largest Pieces behind us, the Carriages being quite spoil'd by the almost unpassable Ways among the Mountains.

Jan. 13. We continued our Journey in the same manner, tho' the Valleys were stor'd with many Villages and plentiful Meadows, as well as with Cattel. We travell'd that Day 5 Lgs to the Village of *Sengoa*, situate at the very entrance of the Province of *Chalcal*.

The 14th, we pass'd over high Mountains for 4 Lgs together, when coming into a pleasant Valley we there stay'd till the next Day about noon. Here I observ'd the Elev. to be 37 Dgs and 20 min. and saw certain Gras-hoppers, that were 3 Inches long, and one and an half in compass.

Large Gras-hoppers.

The 15th, we travell'd thro' a bottom, at the Foot of the Mount *Taurus*, (call'd *Perdelis* by the *Persians*) which lying betwixt 2 Mountains, is a very dangerous Passage for Travellers, by reason of the many Robberies committed here by those, who discover them at a great distance from the Mountains. For the rest, it is a most pleasant Valley, being stock'd with wild Almond-Trees, Cypress, and *Sena*-Trees.

The River *Kisilosein*.

Here it was we cross'd the River *Kisilosein*, over a Bridge of Brick containing 9 Arches. This River, which passes thro' many Precipices and Rocks, disembogues in the *Caspian Sea* in the Province of *Kilan*. We soon after came to the Ascent of the Mount, which was very steep, but winding to the very top, on both sides being nothing to be seen but most dreadful Precipices, which made us lead our Horses; but the worst was, that as soon as we got up the Mountain, we lost our way in the dark, because our *Mehemander* had staid behind, which he excused afterwards, by alledging in his behalf, that he was not able to hear the opprobrious Expressions which fell every foot from the Ambassador *Brugman*; but would take effectual Care we should be supply'd with all Necessaries, which he punctually perform'd.

After having travell'd thus at random for 3 whole hours, we got at last about midnight to a Village, called *Keintze*, where we stay'd all the next Day to refresh both our selves and Horses.

The 17th, we turn'd from the High Road to the Right Hand, and came to the Village of *Hatzimir*, situate amongst inaccessible Rocks, where we were kindly entertain'd with a Collation of Fruits, by the *Melik*, or Receiver-General of the Province.

The 18th taking our way betwixt 2 very steep Hills, we came about Midnight to a Village, call'd *Kamahl*, the Houses of which being scatter'd at a considerable distance from one another, 2 Centries were posted at the entrance of it, to give notice to the Retinue that were coming after us, where they were to be lodged.

The *Persians* attack the Ambassadors Guard.

But the *Persians* of the Village being surprized at our unexpected Arrival, got on Horse-back to the number of 20, and had certainly kill'd these Outguards, had they not been timely relieved by some of our People; whereupon 20 Fire-locks, under the Command of a Lieutenant, were order'd to keep Guard during our stay there, which was till the 20th, when early in the Morning we set out on our Journey again, and having pass'd a vast barren Heath, came about Noon to the City of *Senkan*, 6 Lgs from our last Lodgings, where we were treated with a Collation of Apricocks and Cucumers by the Governor of *Sulthanie*, who happen'd to be there at that time.

The City of Senkan.

Among many others that came to meet us at our entrance into the Suburbs, there was one on Horse-back, who without Hands or Feet managed his Horse as dexterously as the best; he having lost his Limbs as a due Punishment for his Debaucheries, by the *Schach*'s Orders.

A Man's manner of punishing Debauchees.

The City of *Senkan* was formerly very famous both for its Bigness and Traffick, till *Tamerlane*, and afterwards the *Turks*, put a period to its Ancient Glory, it being now without Walls, tho' there are still many goodly Houses to be seen here. The Grounds all about this City are very barren and sandy; and within half a Lg of it you see a Branch of the Mount *Taurus*, called *Peydar Peijamber*, extending from N. to S. towards *Kurdestan*. At the Foot of it is a most delicious Valley, full of very fine Villages.

Jan. 21. We continued our Journey, by the Light of the Moon, over a great Plain of 6 Lgs; at the farther end of which lies the City of *Sulthanie*, where we arrived by Sun-rising. But this proving a very cold Night, this sudden change threw 15 Persons of our Retinue into a burning Fever, with a benumb'dness in their Limbs.

The City of Sulthanie.

This City lies under 84 Dgs, 5 Min. Long. and 36 Dgs, 30 Min. Lat. in a very spacious Plain, which has a high Mountain on its 2 sides, especially on the right; which has mis-led Mr. *Cartwright* to affirm, that it is surrounded with a high Mountain on all sides. Some very magnificent Structures, with a great number of Steeples, the Remainders of its former Glory, shew it to have been one of the noblest Cities of *Persia* in former Ages; being still half a Lg in length, tho' the Marks on the Road to *Hamedan*, together with a certain Tower about half a Lg from the City, (part of the ancient City-Gates) are undeniable Proofs of its vast Extent. It acknowledges for its Founder *Sulthan Mahomet Chodabende*, who after he had extended his Conquests over part of the *Indies*, the *Usbeque Tartars* and *Turks* built it out of the Ruins of the ancient City of *Tigranocerta*; and having made it his Residence, gave it the Name of *Sulthanie*, the *Persian* Kings in those Days having the Name of *Sulthan*, which they have changed since into that of *Schach*. This City having rebell'd against their King *Chorza Reschid*, he destroy'd part of it, but its Ruin was accomplish'd by *Tamerlane*. There are yet to be seen here the noble Ruins of the Royal Palace, or rather a Castle, the Walls of which are built of most excellent Free-stone, strength'ned with a great many quadrangular Towers; but what exceeds all the rest, is the *Mosque*, which contains, the Sepulchre of *Mahomet Chodabende*. Its 3 Gates, which are much higher than those of St. *Mark*'s Church at *Venice*, being of the finest polish'd Steel, and not of Brass, as *Bizarrus* tells us.

1637.

Its Founder.

The *Persians* very confidently affirm, that the largest of these 3 Gates which faces the Market-place, can't be open'd by 20 of the lustiest Men, unless they pronounce these Words *Beask Aly Bukscha*, i. e. *Be open'd for* Haly's *sake*; which one, they say, a Child may open it. The Roof of this *Mosque*, which grows narrow by degrees towards the top, is made of white and blue Stones, with very fine Characters and Figures done upon them. That Part of the *Mosque*, where the Tomb of *Chodabende* is erected, is parted from the rest by brass Rails, within which we saw divers Books above half an Ell square, written in *Arabick* Characters of the length of a Man's Finger, and black and golden Lines alternatively. I got some few Leaves of them which are to be seen in his Highness of *Holstein*'s Library at *Gottorp*, and contain a certain Paraphrase upon the *Alchoran*, call'd *Seratt Elkulab*, i. e. *The Candle of the Heart*.

The Tomb of *Chodabende*.

The Tomb of *Sulthan Mahomet Chodabende*, which stands at that end of the *Mosque* where the Altar stands, is surrounded with a certain Grate of such excellent Workmanship, that nothing like it is to be seen all over *Persia*, being of *Indian* Steel, polish'd and wrought Damask-wise, each Bar being of the bigness of a Man's Arm, and so artificially join'd together, that some affirm to this day, that it is all of a piece. The Tower belonging to this *Mosque* was built in Form of an Octogon, encompass'd with a Gallery containing 8 lesser Towers; the Artillery consisted of 20 brass Guns and a Mortar-piece, besides 4 Cannon fit for Battery. The Balls were all of Marble. At the Entrance of this *Mosque* is a square Fountain, which is supply'd with Water from a Spring out of the Mountain *Keider*. It has also a pleasant Garden and fair Summer-house belonging to it. Another noted *Mosque* of this City is that founded by *Schach Ismael*. Over the great Gate at its Entrance is a round Tower, and within the Court a very noble Pyramid, somewhat endamaged at the top, standing in the midst of 8 fine Marble Pillars. The *Mosque* within is very high and well arched, the Roof being sustained by a great number of fine Pillars, with convenient Galleries, and a rich Pulpit in the midst. The Garden belonging to this *Mosque* has a Tower in the middle, whose Point ends in a Pyramid.

Those noble remainders of Antiquity seem to be so many Instances of what (*a*) *Paulus Jovius*, and *F. Perodin* affirm of *Tamerlane*, that tho' also the most barbarous Conqueror that ever the World beheld, yet always shew'd a general respect for every thing that was accounted Sacred.

(*a*) L. 14. Hist. Basil. Tamerlane.

Near this *Mosque* are also to be seen the Ruins of a Triumphal Arch of Free-stone, resting upon 2 Pillars of 20 Fathom high.

And here my Curiosity leading me to enquire after what has been asserted with so much Confidence by some *European* Travellers, *viz.* that they are forced here-

1637. hereabouts to change their Habitations, by reason of the excessive Cold, the *Persians* were much surprized thereat, this being ordinarily the effect, not of the Cold, but the Heat in *Persia*. Perhaps they have been misled into this Error, because they had understood that in some Places of *Persia*, especially about *Ervan*, where Firing is very scarce, the Inhabitants quit their upper Rooms, and retire into their Vaulted Cellars deep under ground, which in the Winter are to them a Defence against the Cold, as well as in the Summer against the excessive Heat.

The *Persian* Women travel in Chests.

After a stay of 3 Days at *Sulthanie*, we continued our Journey the 25th, our sick and weak Persons being disposed into certain Chests or Pannels, as the *Persian* Women travel in, and are put upon Camels-backs, like Carriers Packs. The stink of the Camels, which preceded that in a direct Line on which our Physician and I were mounted, was almost insupportable to us, during all that Days Journey, in which we made 6 Lgs thro' very fertile Grounds, leaving the Hills, called *Tzikitziki* to the left, where the best Race-Horses and Mares of the *Persian* Kings, are kept for Breed, and dined at the Village of *Chorandah*, i. e. *A Place of Pleasure*, by reason of the many Gardens belonging to it, situate upon a little River.

The 26th and 27th, we travell'd about 10 Lgs, and by Sun-rising came within sight of the City of *Caswin*, or *Cashan*, and stay'd 2 hours at an adjacent Village, till the *Daruga* or Judge, who commanded there in Chief, was ready to receive us; who accordingly came to meet us without the Gates, being accompany'd by 500 or 600 Persons, Horse and Foot. A certain *Indian* Prince also did us the same Honour, being attended by some of his own Country-men on Horse-back, and a considerable number of Pages and Footmen, which followed the Chariot in which he and another Person sat, and was drawn by 2 white Oxen with very short Necks, and a Bunch betwixt their Shoulders. The Charioteer sat before upon the Chariot, which being covered above run upon 2 Wheels, which instead of an Axel-Tree rested and turned upon an Iron Bar, which was crooked in the middle. He managed these Oxen as dexterously as we do our Horses, the Beam or Pole being fasten'd to their Horns, by means of a Cord drawn thro' their Nostrils.

Among the rest that appear'd in the Field to honour our Entry, there were 15 young Ladies mounted on very fine Horses, richly attired and adorned with very valuable Pearl-Necklaces, Pendants, and other Jewels, who as they appear'd bare-faced contrary to the *Persian* Custom, so they soon discovered themselves by their whole Demeanor, to be some of the most eminent Courtezans of the City. They entertain'd us with their Hautboyes, and a kind of Bag-pipes, all the way to our Lodgings, which was quite on the other end of it.

Caswin, the ancient *Arsacia*.

The City of *Caswin*, call'd *Arsacia* by the Ancients, is one of the first rank among the Cities of the Province of *Erak*, (the Ancient *Parthia*) which comprehends all the Cities from *Sulthania* as far as *Ispahan*. I found the Elevation here (which is conformable to the Calculation both of the *Arabians* and *Persians*) at 85 Dgs Log. and 36 Dgs 15 Min. Lat. It is seated in a great sandy Plain, the Mount *Elwend* beginning within half a Days Journey thence to the W. reaching to the S. W. as far as *Babylon*. Its Compass is about a *Germ.* Lg, but without any Fortifications or Garrison, and contains 100000 Inhabitants. They do indeed make

Its Language peculiar.

use here of the *Persian* Language, but their Dialect is as much different from the other *Persians*, as the *Low Dutch* is from the *German*. Their Houses are of Brick, without any Ornaments on the outside, but very well fitted and furnished within. The greatest Defect here is, that the Water is brought into this Place by Pipes as far as the Mountain *Elwend*, and that the Streets are very dusty, because they are not paved. Their Vaults are very convenient for the keeping of the Snow and Ice, and serve them for retiring Places against the Heat of the Summer.

This City was once the Residence of the *Persian* Kings, after *Schach-Tamas* (some say *Schach-Ismael*) transferred it thither from *Tauris*; who was also the

The Royal Palace and Gardens.

Founder of the Royal Palace near the Market-place, with a very fair Garden behind it, adorned with all the Embellishments used amongst the *Persians*. Directly opposite to this Palace is to be seen the most pleasant Garden that can be imagined, being half a Lg in compass, stor'd with vast numbers of Fruit-Trees of all sorts, and many spacious Walks of Cypress and the Trees called *Tzinnar*, which afford a most delightful Prospect. 1637.

It has 2 Market-Places, the biggest of which *Cartwright* calls by a mistake *Atmaidan*, i. e. *The Horse-Market*, instead of *Almaidan*. *al*, being the Article, and *Maidan* the Word, used for a Place where all sorts of things are exposed to Publick Sale. This Market-Place is longer, but not so broad as that of *Ardebil*, and has on the South-side several magnificent Structures, belonging to divers *Chans* and other *Persian* Lords. The other Market, call'd *Senke-Maidan*, lies to the W. both these Markets are full of Shops and Store-houses, where vast Quantities of Merchandizes, and among the rest, Rubies, Granates, and Turquoises are sold at a very cheap rate. I my self bought of that kind of *Turquoises*, they call *Firuse*, and are found near *Nisabur* and *Firuska*, as big as a large Pea, and some as big as a Horse-Bean, at 2 *s.* and 2 *s.* 6 *d.* a-piece.

Its Market-Places.

Turquoises very cheap.

In the Market on the E. side, after Shops are shut up, great numbers of Prostitutes are found sitting in a row, their Faces covered with Veils. The Bawd stands behind them, with a Quilt or Bed at hand, and an unlighted Candle, which she lights as soon as any body appears to cheapen her Ware; if, after they have looked upon several, the Bargain be struck, they follow her to a certain Place to accomplish the Matter.

The *Mosque*, which contains the Tomb of *Schach-Sade Hossein*, one of the Sons of *Hossein* lies also on the East-side of the City. At this, as well as at the Sepulchres of all their other Saints, or their next Kindred, the Oaths in Law-Suits are administred by the *Persians*, which is the reason, that whenever they question the Truth of a thing, they will ask, *Darest thou avouch this upon the Saints Sepulchre, or upon the Alchoran*? It has about 50 more *Mosques*, a great many *Caravansera's*, for the Accommodation of foreign Merchants, and many Publick Baths; among the last of which, that call'd *Haman Charabe*, behind the Royal Gardens, is most celebrated, tho' it be half destroy'd, by reason of a certain Story related by the *Persians* of a certain *Arabian* Physician, named *Lockman*, who living here, did upon his Death-bed deliver to his Son 3 Vials fill'd with certain Liquors, which he said had the Vertue of raising the Dead to Life, provided the Body were not corrupted; so, that upon the pouring of the first Glass upon the Deceased, the Soul would return, and exert some of its Functions: That at the pouring out of the second, the Body would raise it self upright; and at the third, the Body would be restored to a perfect State of Health. His Son, having very carefully observed his Father's Instructions, resolved to keep these Bottles till he might have occasion for them himself; and, pursuant to his Instructions, his Servant having caused his deceased Body to be brought into this Bath, poured upon it the 2 first Glasses one after another; which having the Effect proposed by *Lockman*, he began to raise himself upright, and to cry out to his Servant, *Bris, bris*, i. e. *Pour, pour*, at which the Fellow being sorely frighten'd, let fall the third Bottle, so that his Master for want of farther Relief, was obliged to pursue his former Journey to the other World. The *Persians*, being extremely addicted to such like Fabulous Stories, affirm positively that the Words, *Bris, bris*, are sometimes heard to this day in the Bath; whence it is, that so many Impostors have from time to time been seen among them.

The Tomb of the Son of *Hossein*.

The Fable of *Lockman*.

Such another Impostor was *Risa*, who not many Years before assuming the Name of *Schich*, or Prophet, had in a little time got above 30000 Followers: But *Schach-Abas*, fearing, not without reason, the ill Consequences of this Novelty, sent for him to Court, under pretence that he was desirous to be inform'd concerning his Doctrine. Upon which he being come accordingly, and the King requiring he should confirm it by Miracles, which he was not able to do, he caused him to be put to death.

Risa, an Impostor.

And before we leave *Caswin*, it will not be beyond our Scope to give a short Account of the Occasion which had brought so great an *Indian* Prince, as *Polagi* was by his Descent, into those Parts. This *Polagi* being left very young, after his Father the *Great Mogul*'s Decease, the sole Heir of that vast Empire, the Crown was usurped by *Choram* his Uncle, who was King of *Indosthan*, , or *Great Mogul*, at the time of our abode in *Persia*; and as he sought to establish himself in the Throne by all manner of Cruelties, so he soon lost the Affection of the People, who began to cast their Eyes upon *Polagi*, the Rightful Heir, and then arrived to an Age of Maturity; *Choram* resolved to dispatch *Polagi*;

The History of Prince *Polagi*.

1637. *Iagi*; which he having timely notice of, sought for shelter in *Persia*, and had for some Years past resided at *Ispahan*, where the *Schach* allow'd him 12000 Crowns *per Annum* for his Maintenance; but upon occasion of a late Embassy from his Uncle, sent to the *Persian* Court, to demand him, was sent out of the way to *Casmin*, the *Persians* not being inclined to grant the *Mogul*'s Request. The Ambassadors sent some of their Retinue (it being against the Custom of *Persia* for foreign Ministers to make any Visits in Person, before they have had Audience of the King) to pay a Visit to the said Prince, whom they found sitting upon a Velvet Cushion, and a very rich Piece of Tapestry near the Basin of a Fountain, being attended by a great number of Servants. He received them with extraordinary Demonstrations of Kindness, and entertain'd them with Wine and Fruits. The Kings of *Persia* have for a considerable time ago always look'd upon it as one of their great Maxims of State, to grant their Protection to the distressed *Indian* Princes of *Industhan*, which has often stood them in no small stead, by reason of the Neighbourhood of this potent Empire on the side of *Candahor*. Of this, and the fomenting the intestine Divisions of the *Indosthans*, we have divers Instances in the Reigns of *Schach-Ismael*, and *Schach-Tamas*, especially in that of the last, who upon the same Account afforded his Protection to *Humajun*, the Rightful Heir of that Crown; which being usurped by his Uncle, he was forced to fly into *Persia*: But being demanded by the Usurper, and *Schach-Tamas*, who was then engaged in a War against the *Turks*, and consequently unwilling to disoblige so potent a Prince, caused the said *Humajun* to be hidden in a Cage, which was hung into a Tree, whilst the *Mogul*'s Ambassadors had their Audience; unto whom he solemnly protested, that *Humajun was not upon his Lands*, and so dismiss'd them. but no sooner had he concluded a Peace with the *Turks*, but he put the said *Humajun* at the Head of a gallant Army, who soon forced his Uncle to quit the Throne.

A Visit paid to the said Prince.

Why the *Persians* afford Protection to the *Indosthan* Princes.

July 2. *Damga*, or Chief Judge of the City of *Casmin*, gave to the Ambassadors an Entertainment of Vaulting and Wrestling, under Tents pitch'd for that purpose in the Market-place, which was perform'd with wonderful Activity, and Strength of Body. This was follow'd by a Conflict betwixt 2 Rams, and a Fight betwixt 2 Birds, not much bigger than the common Parrots, who fought with more than ordinary Animosity. This Shew was concluded with the bringing in of 8 very large Wolves, who being fasten'd to Ropes, were several times let out among the common People, that stood in a Circle, but were drawn back without doing any harm. At last a certain Person clad with a thick-quilted Coat, took up to one of the Wolves, and carried him out of the Circle.

Divertisement made for the Ambassadors.

Prince *Polugi* would fain have given the Ambassadors the Divertisement of his Elephant; but he being at Grass, they did not think fit to stay for his coming. However we had sight of this monstrous Beast afterwards, which exceeded in heighth two of the tallest Men, and his Legs were bigger than any Man in the Waste, with his Ears hanging down by the Head half an Ell in length. He was guided by a little Boy, by touching his Forehead with a small, but well-pointed Pole-Axe, by which means he made him do many tricks, and to rise and lie down as he thought fit, which contradicts the fabulous Relations of those who affirm the want of Joints in the Elephants Legs. We told you before, that towards the S. S. W. of *Casmin* was the Mount *Elwend*, (which is a Branch of the Mount *Taurus*.) This Mountain is chiefly famous for its vast Quantity of the noblest white Marble Quarries, wherewith the whole Kingdom is supply'd from hence.

A monstrous Elephant.

They leave *Casmin*.

June 13. We left *Casmin* in the Night-time, and the 14th travelled thro' a Plain of 3 Lgs to the Village of *Alembre*, the Houses of which appear'd at a distance like Ovens, being all vaulted on the top. Here the Ambassador *Crusius* also felt his share of those Distempers, that had afflicted all the rest except Mr. *Maldelsloe*, who had not the least Symptoms of any Disease, during all the time of our Travels. We made 7 Lgs the next following Night; and the 15th, early in the Morning, came to a fair Village, named *Arasenc*, where we refresh'd ourselves with Pomegranates and Almonds. We continued our Journey the same Evening over a smooth Mountain or 6 Lgs, and lodged the 16th in the Morning at a *Caravansera*, named *Choskem*, built of Free-stone, with many Chambers and Vaults round a spacious Court, in the midst whereof was a very fine Well surrounded with Iron Rails. On the Walls many Persons of all Nations had left their Names behind, in remembrance of their Passage that way. 1637.

Having travell'd that Night nine Leagues, we came the 17th before Sun-rising within sight of the City of *Saba*, seated in a spacious Plain within sight of the Mountain of *Elwend*. The *Persians* put this City at 84 Dgs Long. and 35 Dgs Lat. but I found it at 34 Dgs, 50 Min. Lat. The Ruins of the City of *Rhei*, which is a good Days Journey from hence towards the E. is under the same Parallel. The Ground hereabouts being barren, and of a reddish Colour, which the *Persians* attribute to a certain Malediction, on the account of one *Omar*, who being the only Person among all the Captains of *Medina* that would serve against *Hossein*, had the City of *Rhei* with its Territories bestow'd upon him; but *Hossein* being kill'd in the said War, his Death brought upon that Country the Colour and Barrenness of the Ground.

The City of *Saba*.

The City of *Saba* tho' it be of no great Extent, and its Houses be much ruin'd, makes a very fair Show from without, by reason of its many Towers, and some Publick Structures. The Walls are only of Earth; but the most excellent Fruits, especially of Pomegranates and Almonds, which their Gardens produce in great abundance, make an ample amends for these Defects; and at the Foot of the Mountain there grows such a vast Quantity of Cotton and Rice, that the Inhabitants drive a great Trade with them.

Excellent Fruits.

We set out from thence the same Night, and having travell'd above 6 Lgs, came the 18th by Sun-rising to a *Caravansera*, call'd *Schach Ferabath*. The Heat being very excessive, our Tents were order'd to be set up abroad; but the Wind coming upon us like the Blasts of an Oven, about Noon we retired into the *Caravansera*.

The 19th we travell'd 5 Lgs farther, and came in the Morning before the City of *Kom*, where we were received by the *Damga* at the Head of 50 Gentlemen on Horse-back, and under the sound of the Timbrels, Hautboyes, and Fifes, several Tumblers who made use of Stilts, shewing many Tricks of Activity at the same time. The *Persians* place it at 85 Dgs, 40 Min. Long. and at 34 Dgs, 45 Min. Lat. But according to the most exact Observation I could make, I found the 20th of *July* precisely at Noon, that the Sun was 74 Dgs, 8 Min. above the Horizon, and the declination taken upon the same Meridian 18 Dgs, 35 Min. so that the Elevation of the Pole was no more than 34 Dgs, 17 Min. The City of *Kom*, call'd *Gurianx* by *Ptolemy*, is situate in a Place on the right hand of the Mount *Elwend*. The Ruine of its Walls shew it to have been of a much larger Extent, than it now is. A small River, which arising from 2 different Springs out of the same Mountain, and joining its Chanel near this City, passes thro' some part of it, which as it is no small Convenience for their Traffick, so it sometimes does considerable damage, of which an Instance was given us, which happen'd not above 3 years before our Arrival, when the Banks of this River being overflown, by reason of the Snow which the sudden Heat of the Spring had melted, the Current carried away above 1000 Houses. The Gardens, of which there is a vast number, produce, amongst other sorts of Fruits which are most excellent here, a certain kind of Melons, call'd *Scammame*, being of the bigness of an *Orange*, of an admirable Scent, and much more luscious Taste than any other Melons; the Rind is spotted with Spots of divers Colours. We saw some of the same kind at *Ardebil*,; *Grotius* in his (*a*) *Arabick Lexicon* gives a large Account of them. This Place affords also Cucumers of an extraordinary Size, call'd *Canchioner*; they are 2 Foot long, of the thickness of a Man's Arm, and grow crooked in Form of a bended Arm. The *Persians* pickle them with Vinegar only, but they have but an indifferent Taste.

The City of *Kom*.

A certain kind of Melons.

(*a*) P. 1309.

The Grounds hereabouts are very fertile of all sorts of Grain and Cotton; but the chiefest Commodities belonging to this City, are Earthen-pots and Sword-blades; these last made here being accounted the best of all *Persia*, and sold sometimes at the rate of 5 *l.* a-piece. The Mountain of *Demawend*, which is very rich in *Iron* Mines, furnishes them with the Materials for these Blades. Their Earthen Ware, but especially the great Pitchers made in this Place, are in great Esteem all over *Persia*, both for their Workmanship and the Repute they have got of keeping Water fresh and sweet, even in the greatest Heat of the Summer. We found some of the Inhabitants very light finger'd here, and many of our People were seized with the bloody Flux,

In Traffick.

1637. Flux, occaſion'd by the exceſſive Uſe of Melons, and other cooling Fruits.

They leave Kom. *July* 21. We left *Kom* after Sun-ſet, and having travell'd 5 Lgs that Night, ſtay'd the 22d at a great Village, call'd *Kaſmabath*, where we obſerved all the Houſes of a whole Street built in the Nature of one continued Arch or Vault.

The 23d, we made 7 Lgs to the Village of *Senſen*, where we were entertain'd with freſh Proviſions and Fruits brought thither on purpoſe from *Katſchan*, which is 5 Lgs from hence. In this Village dy'd one of our *Perſian* Interpreters, named *Gregory*, being a *Muſcovite* by Birth, but circumciſed in *Perſia*.

The Night following, we loſt alſo 2 *Muſcovian* Servants of our Retinue, and came the 24th early in the Morning to *Katſchan*, which made us halt for ſome time, till the *Damga* could get ready to receive us, which he did accordingly without the City, at the Head of a Company of 50 Gentlemen on Horſeback, with ſeveral ſumptuous led Horſes covered with Lyons-skins; and at the very Entrance into the City we ſaw 2 black *Indian* Oxen of a vaſt bulk, with Bells about their Necks, and Plumes of Feathers on their Heads and Cruppers. This *Damga* had formerly been a Footman to *Schach-Sefi*, when as yet being very young, he was forced to lie concealed for fear of his Grandfather *Schach-Abas*; and being deſtitute of Money, ſold the ſaid Footman for 15 *Tumains* (making about 75 Piſtols) but coming to the Crown, redeem'd him, and gave him the Government of *Katſchan*.

Come to Katſchan.

The City of *Katſchan* lies, according to the Computation of the *Perſians*, at 84 Dgs Long. and 34 of Lat. But by 3 Days ſucceſſive Obſervation, I found it to be at 33 Dgs and 51 Min. Lat. which is 9 Min. leſs. Its Length from E. to W. is above half a *Germ.* Lg. being ſituate in a large fertile Plain, whence may be diſcovered to the Right hand the Mount *Elwend* (*Taurus*) the Walls and Baſtions are of a kind of Potters Clay.

The City of Katſchan.

The King's Garden, which is near this City, has a Summer-Houſe in the midſt of it, which is ſaid to have 1000 Doors and Windows, comprehending thoſe that lead into the Galleries and Balconies. Here the King reſides when he comes to *Katſchan*. This City may be placed among thoſe of the firſt Rank of this Kingdom, being not only very populous, but alſo famous for the Concourſe of foreign Merchants, and eſpecially of the *Indians*, who have their peculiar Quarter aſſign'd them here. Their Private Buildings are generally very well built, and their Publick Structures ſuch as their Store-Houſes, Galleries, and Caravanſera's, beyond what is to be ſeen in moſt other Cities in thoſe Parts. The Silk-weavers work here in open Places: Their circumjacent Fields are ſo fruitful in all manner of Grain, Wine, and Fruits, that, as *Cartwright* has well obſerved, even the pooreſt ſort don't want ſome Delicacies. Their greateſt Want is freſh Water, which they are forced to dig for very deep under ground, and is muddy and ill taſted. Notwithſtanding all this Plenty, there are Beggars in this Place as well as elſewhere, which proceeds from the idle Temper of the *Perſians*, who leave moſt of their Buſineſs to their Slaves, whilſt they walk abroad to take their Pleaſure.

1000 Doors in one House.

The Country about *Katſchan* abounds more in venomous Creatures, than any other Part of *Perſia*, which has given Birth to the *Perſian* Proverb, *Akrab-Katſchan be deſtet ſenet, May the Scorpion of* Katſchan *pinch thee by the hand.* They are very black, of the length and thickneſs of a Man's Finger, not unlike our Crab-Fiſhes, but ſomewhat ſhorter, and walk faſter; with their Tails always ſticking up. The Inhabitants aſſured us, that they ſeldom hurt any Strangers, which I ſuppoſe to proceed from their being more careful of themſelves in this Point; tho' the Natives alſo preſerve themſelves againſt them, by laying their Beds upon Frames at a pretty diſtance from the ground.

Scorpions.

Their Sting proves ſeldom mortal, the preſent Remedy uſed againſt it, being a Piece of Copper Money they call *Puli*, which they put upon the Wound, and after 24 hours take it off again, and apply a Plaiſter of Honey and Vinegar. I had the Misfortune of being ſtung by ſuch a Scorpion at *Scamachie*, in our Return from *Iſpahan*, which occaſioned a Swelling on my Mouth, of a Finger's length, attended with an exceſſive Pain; but by the help of ſome Oil of Scorpions immediately apply'd to the Wound, and a good Doſe of *Venice* Treacle taken inwardly, the Pain was allay'd in 3 hours, and quite remov'd in 2 days after; tho' at certain Intervals I felt certain Remnants of a pricking Pain, eſpecially in *Autumn*, for ſeveral Years after. 1637.

A Remedy against them.

There is alſo another ſort of Inſect, not unlike a Spider, found hereabouts in ſtony Places, under a certain Herb, call'd *Tremne* by the *Perſians*, and *Jauchſchan* by the *Turks*, being much like our Wormwood, but that it has ſomewhat larger Leaves, and a ſtronger Scent. This Inſect, which is about 2 Inches round with many Spots, the *Perſians* call *Enkureck*, being the ſame the *Latins* call *Stellio*, and the *Spaniards* and *Italians*, *Tarantola*. It does not emit its Poiſon by ſtinging or biting, but by letting it fall like a drop of Water, which occaſions an inſupportable Pain in the Part where it faſtens; and communicating its Venom inceſſantly to the Stomach, ſends up from thence ſuch ſtrong Vapours to the Head, that they put the ſick Party into a profound Sleep, from which he is not to be awakened, but by applying one of the ſame Creatures cruſh'd upon the Wound. But if any of the ſame Creatures are not to be found, they take the following Courſe. After they have laid the Patient upon his Back, they pour as much Milk down his Mouth as poſſibly they can: This done, they lay him upon a Bier, faſten'd with Cords on the four Corners to a Beam; then turning the Bier about till the Cords are twiſted, they let it go back on a ſudden, ſo that by the untwiſting of the Ropes, and the violent Agitation occaſion'd thereby in the Head, the Stomach diſcharges it ſelf of the Milk, which appears greeniſh, by reaſon of the Poiſon, as is alſo a certain Matter, which iſſues from his Yard, not without exceſſive Pain. Thoſe that are cured in this manner, feel commonly ſome Remnants of this Pain once a-year at the ſame Seaſon. The Sheep are greedy after this Animal, nay, feed upon it.

Another venomous Creature.

The Remedy against it.

The Inhabitants of *Katſchan* tell an old Story of a certain Miller, call'd *Schutza Adin*, who having kill'd *Omar ben Alchitabi*, the third Succeſſor of *Mahomet*, was rewarded by *Haly*, who was to ſucceed him, with a Letter to the *Caſi* of *Katſchan*; ordering him to give his Daughter in Marriage to the Miller; and to haſten his Journey thither from *Medina*, lent him his Horſe *Duldul*, which carried him from thence in one Night to *Katſchan*, being 200 Lgs, and then vaniſh'd. Hence it is, that *Molla Haſſan Kaſchi*, one of their *Arabian* Interpreters ſays, *I ſerve the King of Kings, whoſe* (*Horſe*) Duldul *in one Night carried the Miller from* Medina *to* Katſchan.

The Story of Haly's Horſe.

The 26th of *July* at Night we left *Katſchan*, and having made 6 Lgs, came the next Morning to the *Caravanſera*, call'd *Chotza Kaſſim*, but pitch'd our Tents in a Garden near a pleaſant Rivulet.

They leave Katſchan.

The next following Night we made above 6 Lgs through barren Grounds, and the 28th, by 4 in the Morning arrived in the little City of *Nateus*, call'd *Nethas* by *Contarine*. Here we were lodged in a very convenient *Caravanſera*; but what we thought eſpecially worth our Obſervation here, were 2 high peaked Mountains on our right hand, upon one of which ſtood a great Tower, built there, as they ſay, by *Schach-Abas*, in memory of one of his Faulcons, who there kill'd an Eagle. Mr. *Mandelſlo* having the Curioſity to take a view of it, found it built of Brick, of an Octogonal Form, and 8 Paces diameter at the bottom, but grew narrower to the top, where it had many Windows to let in the Light on all ſides. It is almoſt ſurpriſing how they ſhould be able to bring the Materials up to the top of ſo high a Mountain, which coſt Mr. *Mandelſlo* 3 hours hard work to get up to, and as many to come down again.

Come to Natus.

The 29th we travell'd 4 Lgs over a great Mountain, and the next following as many more, and lodged in the Village of *Kuk* at the Judge's Houſe. After a ſtay of about 24 hours, we departed thence before Day-break, and after a Journey of 2 Leagues came to one of the King's Houſes, where we were quarter'd in the Royal Gardens.

The 3d of *Aug.* early in the Morning, word being brought us that we ſhould make our Entrance that day into *Iſpahan*, we were within a quarter of a Lg from the City met by one of the Chief Officers of the Court, named *Iſachan-Beg*, at the Head of 300 Horſemen, and ſoon after by 2 conſiderable *Armenian* Lords, who accompany'd the Ambaſſadors to their Lodgings, the Streets, nay even the tops of the Houſes of the Streets thro' which they paſs'd, being crowded with the People, tho' the Duſt that was raiſed by the Horſes was ſo thick, that it was impoſſible to diſcern any thing at any great diſtance.

Make their Entrance into Iſpahan.

We

We pass'd thro' the Market-Place near the Royal Place into the Suburbs, call'd *Tzulisa*, where we were lodged in the Quarter assign'd to the Chief *Armenians*, who are Christians. We were no sooner alighted, but the ordinary Provisions were brought out of the King's Kitchen. The Table-Cloth, which was laid on the Floor in the Ambassadors Room, was of fine Silk, upon which were set 30 Silver Dishes full of divers sorts of liquid and dry Preserves and raw Fruits, as Melons, Citrons, Quinces, Pears, and some others not commonly known in *Europe*. Then the Cloth being taken away, and another put in its room, the second Course was brought in, consisting of 50 Silver Dishes, with Rice of all Colours, boil'd and roasted Mutton, tame Fowl, Fish, Eggs, and Pyes, besides Sallat-dishes.

Are entertain'd out of the King's Kitchen.

Soon after Dinner, the Director for the *Dutch East-India* Company, whose Name was *Nicholas Jacobson Overschle*, and afterwards Governor of *Ceylon*, came to pay the Ambassadors a Visit, he was entertain'd with Plenty of Wine, and was so open-hearted, as to declare that he had received Orders to oppose our Negotiation, but that for the rest we might expect all Personal Civilities from him.

Are visited by the Dutch Director.

Scarce were we become sensible of the Joy we had conceived at our Arrival in the *Persian* Court, but a very sinister Accident interrupted our Satisfaction: For a Quarrel arising betwixt a Servant of our *Mehemander*, and a Domestick of an *Indian* Ambassador, sent thither by the *Great Mogul*, who with a Retinue of 300 Persons lodged not far from us; Matters rise to that heighth, that an *Indian* was kill'd by some of our Fusileers, and the rest pursued to their Quarters. The *Indians* were so exasperated, at it, that a few days after, *viz.* the 7th of *Aug.* when we were removing some of our Baggage, in order to send it to another Lodging which we had provided for us in the City, some of their Retinue set upon a Footman belonging to our Steward, kill'd him, and cut off his Head, and ty'd his Body to a Horse's Tail. The Ambassadors had no sooner notice of it, but they order'd all their Domesticks, that lay scatter'd up and down in the Suburbs, to repair to their Lodgings; but before they could put this in execution, the *Indians* had already possess'd themselves of all the Avenues leading thither; so that our Men were forced to fight their way thro' them, in which Attempt several were mortally wounded; tho' at last they got to the Ambassadors House, which being in the Corner of a narrow Street, we gall'd the *Indians* with our Firelocks; but they retreating behind an adjacent Wall, thro' which they had made holes, they answered us briskly with their Arrows, one of which passing thro' my Hair, stuck into a Post near by me. Their Arrows were very light, being made of Canes, but withal so swift and piercing, that they did as much Execution among our Men, who unwarily exposed themselves, as if they had used Firelocks. One of our Canoneers was thus kill'd, whilst he was levelling a Piece of Canon against them. One *Murraya Scotch* Sergeant being eager to revenge his Death, charged the *Indians* so furiously, that he slew 5 or 6 of them, till an Arrow taking him directly in the Breast he pluck'd it out again, and having kill'd another with his Firelock, fell down dead upon the Spot; which contradicts what *Curtius* says of the *Indian* Arrows: *Binum cubitorum sunt sagittæ, quas exercitus major nisi, quam effectu; quippe telum, cujus in levitate vis omnis est, inhabili pondere oneratur.* The number of the *Indians* increasing, it was thought convenient for our People to retreat into our outward Court; but the *Indians* breaking into the next adjacent House, so severely gall'd them from thence, that they were also forced to get on the top of our House, where they did great Execution among the *Indians*, their Leader being kill'd here among others by a Pistol-shot discharged at him by Mr. *Mandelslo*: But as this loss rather increased than abated their Fury; to the Ambassadors beginning to be doubtful of the Event, order'd some adjoining Walls belonging to the *Armenians* to be broke down, thereby to secure our Retreat, and in case of Necessity to further our Escape. But the *Indians* closely pursuing our Men, and the *Armenians* who were Spectators of the Combat wishing well to us, but not daring to stir in our behalf, we had but a slender Relish of the Pleasantness of these Gardens, which we dreaded would prove our Burial-place. Things being come to this Extremity, we were seasonably relieved by the most welcome Messenger of Peace that ever was seen: For the King having received Notice of this Tumult, had immediately sent this Officer with 100 chosen Men to our Relief, who being join'd by some of the Inhabitants, were no sooner discovered by the *Indians*, but they dispersed immediately; and the King being inform'd of the true occasion of it, which was the Murther of our Steward's Footman, was for having cut the *Indian* Ambassador's hands off, had he not been diverted from this Design by the Chancellor; however, Orders were sent him in a few Days after, to depart the Kingdom. In the mean while they had broken open our Chests, and plunder'd most of our Baggage, the loss of which amounting to 4000 Crowns, the King demanded an Account of it, in order to make it good; which good Design was however disappointed by the Mismanagement of one of the Chiefest Persons of the Embassy. In this Engagement, which lasted 4 hours, we lost 5 Men, and had 10 wounded; the loss of the *Indians* amounted to 24, and many more wounded.

1637.

Is stop'd by the King's Authority.

A bloody Quarrel with some Indians.

E. S. Hist.

This *Indian* Ambassador was a *Myrsa*, or Prince, sent by the *Great Mogul* to demand the *Myrsa Polagi*, (whom we spoke of before) Nephew to the then reigning *Mogul Chroamscha*, who had been forced to quit his Kingdom, and seek for shelter in *Persia*. His Errand being such as was not much approved of by the *Persians*, the Court detain'd him 3 whole Years before he was admitted to Publick Audience, when at last the King of *Persia* gave him for Answer, that it would be a breach of the Laws of Hospitality, to deliver up a Person who had made his Kingdom his Refuge; and that he was obliged to protect his Guest, till he thought fit to withdraw himself. They had however in the mean time treated him with all imaginable Honour, the King of *Persia* giving him 3000 *Tumains* (which make 50000 Crowns) to defray the Expence of his House-keeping, during his stay at *Ispahan*; as on the other hand, the said Ambassador had lived with a great deal of Magnificence, the Presents which he had made to the King of *Persia*, amounting in all above 10000 Crowns.

The Indian Ambassador's abode in Persia.

After his departure from *Ispahan*, the Court of *Persia*, to shew their Dissatisfaction at this late Engagement with our People, order'd *Hassan Chan*, Governor of the Province of *Herath* towards the *Indian* Frontiers, to stop 400 or 500 *Persian* Horses, which the Ambassador had bought up for his own use, the *Indian* Horses being both small and ill-shap'd; which was put in execution accordingly, notwithstanding the Remonstrances and Threats of the said Ambassador, who was forced to sell them upon the Frontiers for what the *Persians* thought fit to give for them. The *Indians* are, for the rest, a good natur'd People; but, on the other hand, when provok'd, never to be appeased without taking Revenge.

His departure.

The next Day after this Tumult, being the 8th of *Aug.* we contrived to change our Lodgings; which being at a considerable distance from one another, the K. of *Persia* not only forbid all the *Indians*, not excepting the Merchants themselves (of which there are 12000 at *Ispahan*) not to appear that Day in the Streets upon Pain of Death, but also order'd some of his Guards for our better Security, and permitted us to fortifie the weakest part of our Quarters against any sudden Attempt.

The Ambassadors change their Lodgings.

Our daily Allowance, during our stay at *Ispahan* by the King's Order, was 160 Sheep, 100 Fowl of all sorts, 200 Eggs, and 100 *Batmans* of Wine, with as much Fruit and Spice as we were able to consume: But great part of it being disposed by the Ambassador *Brugman* for other Uses, and sometimes upon Harlots, our People had sometimes not above one Meal a day, and some Days the Cloth was not laid at all for the Servants.

Their daily Allowance.

Aug. 10. We changed our Habits for the *Muscovian* Habit, ours being not very agreeable to the *Persians*. Some of our People that had been wounded in the last Engagement, dy'd this Day; and among the rest, our Harbinger of the bloody Flux, who were buried in the *Armenian* Church-yard in the Suburbs, call'd *Tzulsa*.

Aug. 16. Being appointed for our Audience, the Ambassadors were also invited to dine with the King, and 40 very fine Horses with rich Saddles and Harnesses, adorn'd with large Plates of Gold, being brought for the Use of the Ambassadors, and the Principal Gentlemen of their Retinue, (the rest being on Foot) they proceeded in the following Order: First, 3 on Horseback, 2 in compleat Armour, richly laid in with Golden Flowers, the other only Breast, Back and Head-pieces,

Their first Audience.

1637. piece. Theſe were follow'd by 40 Perſons, each with a Caſe of the fineſt Piſtols the Low Countries afford, in embroider'd Holſters. Next to theſe, 4 Men carrying 2 very rich Cymetars, the Sheaths being of yellow Amber garniſh'd with Gold, in rich Caſes. After theſe appear'd 2 Men with walking Staves, with fine Amber Heads (Amber being eſteem'd by the *Perſians* above Gold) in rich Caſes. Then came 4 Men, each with a great Candleſtick of Amber, and 2 others carrying a Cabinet of white and yellow Amber: Laſt of all came 4 more, who carried a Cabinet of Ebony laid in with Silver, in which were golden Boxes containing divers Drugs, Eſſences, and other Chymical Preparations; they were on the outſide beſet with fine Stones, intimating what kind of Preparation was contain'd in each of them. The Ambaſſadors Preſents (according to the Cuſtom of the Eaſtern Countries) were: Thoſe of Mr. *Cruſius*, an Arquebuſs ſtock'd with Ebony, which cock'd it ſelf, by letting down the Cock; a Veſſel of Rock Cryſtal, edged with Gold, and adorn'd with Turquois and Rubies; a Cabinet of Amber, and a ſmall ſtriking Clock. Thoſe of Mr. *Brueman*, a braſs gilt Candleſtick with 30 Branches, having a ſtriking Watch within the Body; a Pair of very fine Piſtols gilt with very rich Holſters; a very fair Hour-glaſs, a Watch in a Topaza Caſe; a Bracelet of Diamonds and Rubies, and a Writing by which the two Pieces of Cannon left at *Ardebil* were preſented to the King.

The Preſents.

The Places aſſign'd for our Retinue were as follows:

1. Three Sergeants with Halberds, at the Head of 15 Muſqueteers.

2. The Steward at the Head of the Gentlemen, who march'd three-a-breaſt.

3. Three Trumpeters with ſilver Trumpets, follow'd by the Guards four-a-breaſt, immediately before the Ambaſſadors, who had on both ſides of them 8 Halberdiers, and 2 Interpreters behind them.

Theſe were follow'd by 8 Pages on Horſeback in very rich Liveries, and theſe again by the reſt of our Retinue 24 in number, three-a-breaſt.

But as it is not the Cuſtom of the *Perſians* to be ty'd to any orderly Proceſſion, ſo this Order was but ill obſerved, and our People were obliged to march forward as well as they could, in Company of a great number of *Perſian* Gentlemen on Horſe-back, thro' the Market-Place to the Gates of the King's Palace, where they were received by the Maſter of the Ceremonies, and conducted into the Hall of Juſtice, and deſired to reſt themſelves till the King could be acquainted with their coming.

The Proceſſion.

After a ſtay of half an hour, Word was brought by ſeveral Perſons of Quality, that the King expected us, and we were introduced thro' a large Court, being an oblong ſquare, incloſed on both ſides with a double Wall, one of which being much lower than the other, was at about 6 Paces diſtance from the firſt built cloſe to a row of fair *Tzinnar*-Trees: This lower Wall on both ſides being lined with the Guards, and other Muſqueteers; the firſt being diſtinguiſh'd from the reſt by a certain kind of pointed Coiffure, ſet out with Plumes of divers Colours. At the end of this Court was the Hall appointed for our Audience, being the Place where the King keeps his Court of Juſtice in Perſon, it being not the Cuſtom in *Perſia* (as it is in *Muſcovy*) to have a peculiar Hall for the Audiences of Ambaſſadors, but their Kings have this Ceremony performed in any Place whither either their Buſineſs or Divertiſement call them.

Near to this Hall under the Trees, betwixt the two Walls, we ſaw above 50 fine young Horſes in their embroider'd Houſings, and ſome with rich Saddles and Harneſſes; they were moſt of an Iſabella Colour, and brought thither to be back'd, and were watered out of Pails Vermilion gilt: In this Court were alſo two large Citterns 4 Foot ſquare, for the cooling of Wine. This Hall, which was 8 Fathom broad and 12 long, had a Partition in the Nature of an Alcove, with a red Callicoe Curtain drawn before it; which when drawn up by a ſilk String, reſted upon certain Chapters of wooden Pillars finely carv'd and gilt with Branch-work, as were alſo the Walls, which were alſo adorn'd with ſome *European* Pictures. In the midſt of it was a Fountain, in the Baſin of which you ſaw Flowers, Oranges, Apples, and ſeveral other Fruits ſwimming upon the Water, and round the ſides of it a great number of Flaggons and Bottles of Gold and Silver; the whole Floor of the Hall being covered with Tapeſtry, the Ground-work of which was alſo of Gold and Silver. We found the King, who was about 27 Years of Age, ſitting upon the Ground upon a Satin Cuſhion behind the Fountain, with his back to the Wall: His Aſpect was very graceful, and his Complexion very ſmooth, but ſomewhat hook-noſed, as moſt of the *Perſians* are. His Habit, which was of Brocadoe, had nothing in it above the reſt, except that he had a Set of Plumes of Heron-Feathers on his Head, faſten'd with a very fine Bracelet of Diamonds: Over his upper Garment having 2 Sable Skins down from his Neck; but we ſaw ſome other *Perſian* Lords have the like. The Cymetar he had on his ſide, was alſo richly beſet with precious Stones, but his Bow and Arrows lay behind him upon the Ground: On his right hand attended 20 Pages, the Sons of *Chans* or Governors of Provinces, among whom ſome were Eunuchs; one of the handſomeſt of them was employed in fanning the King, with a certain Fan not unlike a Horſe-Tail, made of a certain Sea-Creature, call'd *Maheri Kutas*. At the Head of theſe Pages ſtood the *Meheter*, or Groom of the Chamber, who was their Governor. Before the King ſtood the *Elſchick Agaſi Baſchi*, or Lord Chamberlain, his Staff being all covered with Gold, with a large Button or Apple of the ſame Metal at the top of it. On his left ſide, about 4 Paces diſtance, ſat the *Ethemad Domlet*, or Chancellor; and next to him, the *Chans*, and the reſt of the Lords.

1637.

At the Entrance of the Hall, on the left hand, were placed an *Arabian* Ambaſſador, and the *Muſcovite* Envoy; and below them, the King's Muſicians. The Ambaſſadors were met at the Door of this Hall by the Prince *Tzani Chan*, *Kurtzi Baſchi*, and by *Aliculi-beck Divanbeki*, who took them under the Arm one after another, and held them ſo faſt that they had not the uſe of them themſelves.

Their Audience

This way of conducting foreign Miniſters thus to the King, which is uſed as well in the *Perſian* as *Ottoman* Court, as it is now look'd upon as a peculiar Honour, ſo it ſeems to be firſt introduced upon the ſcore of ſecuring their Prince's Lives againſt any Attempt, by this Ceremony; which is alſo the Reaſon alledged by ſome, that the King of *Perſia* does not give his Hand to Kiſs to Ambaſſadors, but his Knee, and to his Subjects his Foot only.

As the Ambaſſadors approach'd towards the King, they made a low Reverence, which he returned with a ſmiling Countenance, and a ſmall Inclination of his Head. They were deſired to ſit down upon low Seats, placed near the Lords for that purpoſe. Fifteen of our Retinue were likewiſe placed a little more to the left, but upon the Ground; and the Pages, and the reſt of our Train, entertain'd in a Court below, with 13 Women-Dancers richly adorn'd, being the handſomeſt Courtezans of *Iſpahan*; who, beſides their Annual Tribute, are obliged to attend at Court whenever they are call'd for: We were credibly aſſured, that a Man might have his Choice among them for a *Tumain* a-piece.

After the Ambaſſadors had reſted a little, the Lord Chamberlain ask'd them in the King's Name, by whom they were ſent, and what had occaſion'd their Embaſſy? Upon which they being obliged to riſe, went near to the King to deliver their Credentials, with a ſhort Complement, according to the Cuſtom of the *Perſians*, who being no Admirers of Harangues, would have all that approach their King, to ſhew their Reverence by a few Words.

The Chancellor having received the Credentials, and deſired the Ambaſſadors to take their Seats again, the Secretary of State came to tell them, that the *Schach* intending to have their Credentials tranſlated, would as ſoon as that was done, give them a ſecond Audience. Then the Preſents were brought in, which were carried cloſe by the King into an adjacent Room. In the mean while, a Callicoe Cloth was ſpread all over the Floor, which was covered all over with Baſons of Gold fill'd with Fruits and Preſerves, beſides 300 golden Flaggons more, diſpoſed all over the Hall for Oſtentations ſake. All this Plate was ſmooth, except the Flaggon and Cup out of which the King himſelf drank, which were beſet with Rubies and Turquoiſes. We had alſo vaſt Plenty of the beſt *Schiraz* Wine, and the Divertiſement of a Juggler, who acted the Part of *Legerdemaine* beyond whatever I ſaw in that kind before.

Golden Veſſels.

About an hour after, the Cloth being removed, and another of gold Brocado laid in the place of it, the Meat was brought in by 10 Men in large golden Veſſels, not unlike the Milk-Pots in *France*. The Carver having placed himſelf on the Floor in the midſt of the

1637. Vessels, disposed the Meat into lesser Dishes, with Rice of all sorts of Colours, upon which he put Mutton roast'd and boil'd, tame and wild Fowl, &c. sometimes 5 or 6 sorts in a Dish; the King being served first, then the Ambassadors, the Lords, and all the rest there present. This is done for Convenience's sake; for as they sit all along on one side only, as our Monks do, one Man cannot easily serve himself of divers Dishes. There was a profound Silence during this Feast, tho' at 3 several other Entertainments afterwards, the King was pleased to ask divers Questions of the Ambassadors concerning the State and present War in *Germany*.

Their manner of eating.

Musick and Dancing.

Our chiefest Diversion was the King's Musick, and the dancing of the beforementioned Courtezans, which performed their Part with wonderful Activity, and not without some Exactness of Cadences. It was observable, that whilst we were at Dinner, a certain *Persian*, who understood both the *Portugueze* and *Italian*, was placed near the Ambassadors behind the Hangings, to observe their Discourse concerning their Opinion of the Court. As our Interpreter was a *Portugueze Austin* Friar, call'd Father *Joseph*, who having lived 24 Years in *Persia*, was well acquainted with the Manners and Humours of the *Persians*, the Ambassador *Brugman* had several Discourses with him about the Pictures and Entertainment, which was interpreted much to his Prejudice; but as the Ambassador *Crusius* talk'd with our Interpreter in *Latin*, his Sentiments were not discovered to the *Persian* Spy.

After the Dinner had lasted about an hour and an half, the Cloth was taken away; and Water being brought to wash our hands, the Lord Chamberlain pronounced with a loud Voice this following Prayer: *Sigre baxine, Seahe Doulctine Kasiler Kuwetine, alla Dirim*, i. e. *Make us thankful for this Repast, prosper the King's Undertakings, give to his Soldiers and Servants true Courage; this we pray thee, O God*: Unto which the rest answered, *Alla, alla*; and without speaking a word went out of the room, our *Mehemandar* giving us notice at the same time, that we might withdraw as soon as we pleased; which we did accordingly, after having paid our Reverence to the King.

Immediately after, leave being granted us to converse with what Foreigners we pleased, we had frequent Visits made us by the *French*, *Spaniards*, *Italians*, *English*, and *Dutch*, then residing at *Ispahan*. Mr. *Honywood*, the *English* Factor, in Company of several other Merchants of his own Nation, came to pay us a Visit the 18th of *August*, and made us all possible Offers of his Service, which he actually performed upon all Occasions.

The 22d of *August*, we had a Present of Fruits, and 30 Flaggons of *Schiras* Wine sent us by the King.

The Ambassadors have their first private Audience.

The 24th, the Ambassadors had their first private Audience, concerning their Negotiation, from the King, attended by the Chancellor, and some other Lords of his Council, being conducted into the Apartment thro' a very fine Garden, where the whole Retinue diverted themselves in the mean while, who, as well as the Ambassadors, were afterwards entertain'd at Dinner in the same manner as before.

The 28th, The *Austin* Friars invited the Ambassadors to the Festival of St. *Austin* their Patron; which being to be celebrated the next day, the *Muscovite* Envoy, an *Armenian* Bishop, and several *English* Merchants (who notwithstanding their different Opinions in Religion, live like Brethren among the *Mahometans*) were also to be present there. There were no more than 6 *Monks*, all *Spaniards*, in the whole Monastery; which was a goodly Structure, had a very fair Church with 2 Steeples, with several Cells, and a very fair Garden belonging to it. The Ambassadors having been received at the Out-Gates of the Convent, were conducted by the Friars into the Church, where Mass was begun immediately; and our Musicians, with the Assistance of one of the Monks, who play'd upon the Organ, made very good Musick.

Mass being over, we were conducted into the Garden near a fair Fountain, which stood under a large Tree, whose Branches being full of Leaves, and twisted within one another, afforded a very agreeable Shade. About Noon we were carried into a goodly Hall, where being placed all along the Walls, as the Monks commonly sit in *Europe*, we were entertain'd with Fruits in Porcelane Dishes, and every one had his Dish of Meat set before him according to the *Persian* Fashion. We pass'd the remaining part of the Day under the same Tree.

The 1st of *Sept.* we began to be sensible of the change of the Season, the Nights being very cold. 1637.

Three *Armenian* Lords visit the Ambassadors.

The same day *Seferas-Beg*, Governor of *Armenia*, in company of 2 of his Brothers, came to pay a Visit to the Ambassadors, on purpose to contract an intimate Acquaintance with them. As they were all three Persons of an excellent good Temper, and frank Conversation, which agreed very well with the Ambassador *Brugman*'s Disposition, he presented to each of the two Elder a fine Fowling-piece, and the Younger with a Pair of Pistols.

They give Entertainment to the Ambassadors.

In requital of which they invited the Ambassadors, with their whole Retinue, against the 18th of *Sept.* When we went thither on Horseback, and the Ambassadors being received by *Seferas-Beg*, at the *Armenian* Church in the Suburbs, call'd *Tulfa*, where the Patriarch of the Place in a Cope of Cloth of Silver, with golden Flowers beset with Pearls, and in a Mitre covered all over with fine Pearls, was saying the Service. We saw divers Pictures hanging on the Walls of the Church, and the Floor covered with Tapestry, but their Musick was very indifferent. After Service, we went to *Seferas-beg* his Palace, where being conducted thro' a large and fair Arched Gallery into a Garden, and from thence into an open Hall, (according to the *Persian* Fashion) where the Cloth of Silver and Golden Brocado being laid, we were entertain'd with Fruits and Preserves, and a most delicious Liquor not unlike our *Ros solis*, but incomparably more rich. This Cloth being removed, and another Callicoe one laid in its place, the Meat was served up in Silver Dishes, and among the rest some Pork, and divers other Meats, which the *Persians* abhor.

The Magnificence of the *Armenian* Lord.

We had not long sat at Table, before we were conducted thence thro' a very noble Apartment into another Hall arched all about, which had a very agreeable Prospect into the Garden. The Floor was cover'd with rich Tapestry, on which were laid Cushions of flour'd Satin, the Ground-work being Gold and Silver. Round a Bason of white Marble, belonging to the Fountain in the Center of the Hall, stood a good number of Flaggons and Bottles fill'd with Wine; but what we thought most worth our Observation, were certain Pictures on the Walls, representing the Dresses of Women of most Nations in the World.

Porcelain-Musick.

Whilst we were busie in eating plentifully of the delicious Fruits and Preserves that were brought in, we were also diverted with Musick and Dancing. In the first of which *Elias-Beg*, second Brother to *Seferas-Beg*, excell'd above the rest; for he not only gave us several Tunes upon the *Tamera*, or *Persian* Lute, but also by striking with 2 little Sticks upon 7 Porcelain-Cups full of Water, made them accord with the Lute; *Seferas-Beg* not forgetting in the mean while to make the whole Company pledge the King's Health in Crystal Glasses full of Wine.

Night approaching, the Ambassadors thought it convenient to take leave of the Governor, who under pretence of conducting us to the Gate, brought us unexpectedly into a Gallery on the other side of the Garden, where we found a fresh Entertainment of Meat, Fish-Pyes, Fruits, and Preserves before us; and the Hall, as well as the Garden, illuminated with Lamps and Torches in vast numbers. But as we had been eating almost all the day, so we sat down only out of Complaisance, looking upon this Collation rather as an effect of our Hosts Generosity and Magnificence, than to be done with an Intention to make any Addition to the former Entertainment, which in all respects was one of the most pleasant we ever met with, and exceeded even that of the Kings.

Their second Private Audience.

The 19th of *September*, the Ambassador had a second private Audience of the King, which lasted not above half an hour, after which they dined at Court, as is usual upon such like Occasions: Our Musick, consisting of a Base-Viol, a Tenor, and a Violin, play'd before the King at the same time, according to his Desire for half an hour, when he sent word, that he did not mislike the Musick, but thought his own as good.

Are entertain'd by the *English*.

The 25th of *September*, the Ambassadors, and their whole Retinue, were most magnificently entertain'd by the *English* in the *Base* near the Market-place, being a very large Structure, with a very fine Garden belonging to it. We were first of all treated with Fruits and Preserves, set upon the Floor, according to the *Persian* Fashion, from whence we pass'd into a spacious Hall, where we found a Table well furnished with all sorts of Meats dress'd after the *English* way, and did not forget to drink plentifully the Healths of most

1637. moſt Kings and Princes of *Europe*. Dinner being over we were conducted into another Hall, which had a very fair Proſpect into the Garden, where we not only found another Collation of Fruits and Preſerves before us, but had alſo the Diverſion of 6 *Indian* Dancing-Women; ſome of whom brought their Husbands along with them, who play'd upon the Violin, and ſometimes join'd in dancing with them. Their Complexion was of an Olive-Colour, but had very good Features, a ſoft Skin, and were well ſhap'd. About their Necks they wear Necklaces of Pearls and Gold, and in their Ears Gold and Silver Pendants ſet with precious Stones. Some had alſo Braeelets of Pearls, others of Silver, but they had all Rings on their Fingers, and among the reſt one upon the Thumb, which inſtead of a Seal had a Piece of Steel of the bigneſs of a Crown-piece, ſo excellently well poliſh'd, that it ſerved inſtead of a Looking-glaſs.

Indian Dancing-women.

Are handſome and well-ſhap'd.

Their Habit.

They were all clad in a kind of Stuff, ſo thin that you might ſee any part of their Bodies thro' it, except thoſe Parts, which were covered by Drawers under their Petticoats. Some had Caps, others Tiffany-Dreſſes on their Heads, ſome wore ſilk Scarfs, with gold and ſilver Flowers, which coming round their Shoulders, hung down on both ſides to the ground. Some were bare-footed, others wore Shooes of a very odd Make. They had all juſt above the Inſtep a ſtring with Bells, by which they diſcovered the Exactneſs of their Cadence, as well as by their *Caſtagnets*, which they managed with the utmoſt Dexterity. Their Muſick conſiſted of *Tabors*, Pipes, and *Indian* Timbrels. Theſe laſt are about 2 Foot long, in the Shape of our Barrels, hanging about their Necks; they play upon them with their Fingers. The Actions of theſe *Indian* Women, eſpecially with their Hands and Feet, are moſt ſurprizing; and they will ſometimes with a moſt graceful, careleſs Air, and motion of their Bodies, addreſs themſelves to ſome of the Spectators, they being much more pleaſing in their Entertainments than the *Perſian* Dancing Women. They are all Publick Proſtitutes, and will ſhew their utmoſt Activity in their Poſtures, and what elſe you will, for ready Money. Not long after, the *French* Merchants made alſo a Feaſt for ſome of the chief Perſons of our Retinue.

The Ambaſſadors Feaſt.

The 1ſt of *October*, the Ambaſſadors entertain'd the *Muſcovite* Envoy, the 3 *Armenian* Lords, the principal *Engliſh* and *French* Merchants, the *Spaniſh Auſtin*-Friars, and ſome *Italian Carmelites*, with 40 Diſhes in 3 Courſes after the *German* Faſhion; and, whereas the Governor of *Armenia* was ſo much taken with ſome of our *German* Paſtes, that he ſpoke of them to the King, who ſeeming deſirous to ſee ſome of them, our Cook was order'd to make ſome of them, which being preſented to His Majeſty, he received them very obligingly, and preſented them to the Ladies at Court, who were extremely pleaſed with them. The Feaſt was concluded with the Divertiſement of running at the Ring, at which Mr. *Mandelſloe* got the firſt, and the Ambaſſador *Brugman* the ſecond Prize.

The Debaucheries of ſome of the Embaſſy.

The Prior of the *Auſtin* Friars coming the next day to our Secretary, to repreſent the Debaucheries of ſome of our Retinue, and eſpecially of the Ambaſſador *Brugman*, ſome among us having, after the Example of the *Armenians*, married Women of the Country, to the great Scandal of the Chriſtian Religion among the Infidels, the ſaid Secretary went to the Ambaſſador *Brugman*, to complain of the debauch'd Lives of ſome of our Retinue, deſiring that ſome Reformation might be introduc'd among them; but, as his ill Fortune would have it, he was no ſooner entred the Room, but he found the ſaid Ambaſſador with a certain *Armenian* Woman, named *Tulla*, which he looking upon as done with a Deſign to ſurprize him, he was ſo incenſed thereat, that he ſwore he would be revenged of him. The Secretary, who was not ignorant of his Temper, thought fit to retire to the Convent of the *Auguſtines*, with an Intention to leave the Embaſſy, and to retire by the way of *Babylon* and *Aleppo* into *Italy*, and thence into *Germany*: But the Ambaſſador *Brugman* being informed of his Reſolution, ſent him word, that he would certainly have him kill'd by the way, which as it was no very difficult Matter for him to have effected, ſo the Secretary thought it his ſafeſt way to endeavour his Reconciliation with him, which was at laſt procured by the Mediation of the Prior of the *Auguſtines*.

Marriages of the Armenians.

Some Days after, as I was going to the Suburbs of *Tzulfa*, I ſaw an *Armenian* going to Church, who was to be married there: In the Front march'd their Muſick, and after them a Boy of 12 Years, with a Wax-Candle in his hand. He was follow'd by the Bridegroom on Horſe-back, who had 2 Men riding on each ſides, and 4 behind him in 2 Ranks, all very richly clad. After theſe were carried 2 Diſhes of Meat, 2 Pitchers of Wine, and 2 Diſhes of Apples, all which was ſet before the Bridegroom, and thoſe that attended him, as ſoon as they came into the Church, but the Bridegroom did not touch it; and after the reſt had eat a little, the overplus was ſaved for the Prieſt, except the Wine, which was all drank off; of which the Bridegroom, who eſpy'd me, would have me take my ſhare. By this time the Bride, having on her right hand a young Maid, and on her left a married Woman, with their Faces covered with a Veil of thin Lawn, coming to the Church, the Prieſt brought the young Couple to the Altar, and bleſs'd them by holding a Wooden Croſs over them; whilſt they join'd their Hands and Heads, the Brides Head being laid to the Bridegroom's Breaſt, as a Token of her Submiſſion. After mutual Promiſes made of Fidelity and Loyalty, the Prieſt gave them the Communion, by giving to each of them a Piece of the Conſecrated Hoſt ſteep'd in Wine: The Bread of the Euchariſt among the *Armenians* being not leavened, as in the *Muſcovite*, and other *Greek* Churches, but is a Paſte unleavened of the bigneſs and thickneſs of a Crown-piece. During the Communion, they ſung and play'd on certain great Cymbals, call'd *Hambarzon*, it being a conſtant Practice among the *Armenians* never to communicate without Muſick. After the Communion, they caſt Roſe-water upon the new-married Couple, and all the reſt there preſent, and ty'd a Scarf about the Bride's right Hand, by which the Bridegroom draws her after him to the Church-door, from whence they all go on Horſe-back to the Place where the Wedding-Feaſt is prepared, which laſts 3 Days; and, in the mean while, the new-married Couple are not permitted to cohabit together.

1637.

An Armenian Baptism.

As I paſt along, hearing a Noiſe in another *Armenian* Church, which was made by the ſtriking with a Stick upon a Board, uſed inſtead of Bells, (the Uſe of them not being permitted in *Perſia*) I went in, and found it to be a Chriſtening: I ſaw no body in the Church, but the Prieſt and the Clerk, an aged Woman, who had brought the Child, and a young Man, who was to be God-father. The Prieſt after certain Prayers, and having put divers Queſtions to the God-father, the laſt carry'd the Child to the old Woman to unſwath it; which done, they went into the Sacriſty to the Font, which was placed there within a Wall like a Trough, half an Ell long, and a quarter broad. The Prieſt conſecrated the Water, and put into it ſome conſecrated Oil, and then putting the Child into the Font, baptized him *in the Name of the Father, the Son, and the Holy Ghoſt*, by thrice pouring Water upon his Head, and afterwards all over the Body, making the Sign of the Croſs in the Forehead with conſecrated Oil. It is obſervable, that the *Armenians* do not commonly chriſten their Infants till they are 8 Days old, unleſs they be in danger of dying before, when they do it ſooner, it being their Opinion, that all ſuch Infants as die before Baptiſm, are not to be ſaved, for which reaſon they don't allow them a Burial in the Church-yard, which is alſo denied to all thoſe who die without having communicated once a-year at leaſt.

The tragical Account of a Clock-maker.

The 3d of *October*, there happen'd a very ſad Accident with a certain Clock-maker, a Servant to the *Perſian* King, a Native of *Zurick* in *Switzerland*, whoſe Name was *John Rudolph Stadler*, which proved very tragical in the end. This Man, who was about 38 Years of Age, had married the Siſter of *Tulla*, the Ambaſſador *Brugman*'s Darling, and being willing to return into his own Country, had at laſt obtained leave ſo to do, by the Ambaſſadors Interceſſion. In the mean while a Thief breaking into his Houſe, the Clock-maker catch'd him, and after a ſound banging him, turn'd him out of Doors; but ſoon after repenting that he had uſed him no worſe, run after him, and kill'd him with a Piſtol-ſhot. The Relations of the deceaſed immediately made their Complaint to the *Muſti* of the Murther committed by an Infidel upon one of the Faithful, who thereupon order'd the Clock-maker to be ſeized as he was going the next Morning to Court, and cauſed him to be put into the *Palank* (a wooden Inſtrument, which covers the Neck and Arms.) The Ambaſſadors left no Stone unturn'd to procure his Releaſement; but the Authority and Zeal of the *Muſti*

1637. prevailing, he was condemn'd to die, unless he would deserve the King's Pardon by turning *Mahometan*. Many of the *Persian* Lords, who esteem'd him for his Art, in which he was excellent, endeavoured to perswade him to save his Life, by the hopes of great Advantages; but this proving ineffectual, he was 2 several times brought to the Market-place, to try whether the Terror of Death would not make him alter his Sentiments, but in vain, he positively declaring, that tho' the King had the disposal of his Body, he would resign his Soul to his Creator, whom he intended to glorifie thereby to all the World. The *Austin* and *Carmelite* Friars would also fain have perswaded him to die in the *Roman Catholick* Faith, which he also refused, professing that he would persist to his last Gasp in the same Religion he was educated in, which was the *Reformed* Religion, which he did accordingly; for being delivered up to the Relations of the Deceased, the first who struck at him with his Cymetar miss'd, the second struck into the *Palank*, but the third hit his Neck, and severed the Head from the Body, whilst the other two gave him 3 Cuts more in the Head and Face. The Body lay all day expos'd in the Place of Execution, till in the Evening it was, at the Intercession of the Ambassador *Brugman* brought to our Quarters with an Intention to have it buried the next day: But the King happening to invite the Ambassadors to a Hunting-Match that day, the Interment could not be perform'd till the 22d, when the *Muscovite* Envoy, the Governor of *Armenia*, and several other Christians were present at the Burial.

Is executed.

His Burial.

The Ambassadors invited to the King's Hunting Match.

The 17th, the intended Hunting-Match being to begin, Horses and Camels were brought early in the Morning to our Lodgings by our *Mehemander*, who conducted us to a spacious Plain, where the King soon after appear'd, attended by 300 Persons of Quality mounted on very fine Horses, and richly accoutred, and, at first sight of the Ambassadors, saluted them very civilly. The King himself had that day a silver-brocado'd Vestment on, his Turbant being adorn'd with Herons Feathers; and the 4 Led-horses, which were carried after him, covered with very rich Saddles, Harnesses, and Cloaths embroider'd with Gold and precious Stones. Among the rest of the King's Retinue, who follow'd him very disorderly, was an Astrologer, that kept close to him, and continually made his Observations: This kind of People have a great Influence upon the Court. We rid up and down at least 3 Lgs that Morning, which was spent in Hawking.

An Astrologer.

About Noon we were entertain'd with a Campaign-Dinner by the King, under Tents in an *Armenian* Village: But our *Mehemander* quarter'd us after Dinner in another Village hard by, where we were visited by *Sefer-Beg*, and some other *Persian* Lords, who participated of the excellent Fruits, which were presented to the Ambassadors by the Inhabitants of the Villages, who were *Algerian* Christians transplanted thither from *Erivan* by *Schach-Abas*. But the King understanding that the *Mehemander* had lodg'd us in another Village, he order'd us forthwith to be lodged in a House next adjoining to that where he was himself; which was put in Execution immediately, and our Supper was brought us out of the King's Kitchin in Dishes of Gold.

The 18th, very early in the Morning, the Ambassadors went with the King a-Crane-hunting: A long, secret way was made under ground, at the end of which abundance of Wheat being scatter'd in a Field, vast numbers of Cranes flock'd thither, of which near 600 were taken. The King put some of their Feathers in his Turbant, and presented to each of the Ambassadors 2, who put them in their Hats.

They dined afterwards in the same House where they had dined the day before, the King being in an extraordinary good Humour: For towards Night he, and the Ambassadors, attended only by 6 Persons, went to hunt the Drake and wild Goose; and being arrighted 200 Paces from the Place intended for the Sport, enter'd into a large Hut made of Earth, near which the Nets were spread upon the side of a small Brook. But no Bird appearing, we pass'd away the time in drinking several Bottles of the best Wine with the King, and so returned to our Quarters, whither the King sent us cold Mutton boil'd and roasted, four Sheep's Gutts, Cheese, and divers Vessels full of Citrons, and some other Fruits raw and preserved.

The 19th was the chief Day for Sport; abundance of Hawks and Leopards, bred to Hunting, were brought in; but, after having for some time beaten the Bushes to no purpose, we went to one of the King's Parks, being 2 Lgs in Circumference, (call'd *Hazar Zirib* by the *Persians*) being surrounded on all sides with a high Wall, and distinguish'd by 3 several Partitions; in the first of which were kept Harts, wild Goats, Deer, Hares, and Foxes; in the second, that kind of Deer they call *Ahu's*; and in the third, wild Asses, call'd by them *Kouhrhan*. The Leopards being by the King's Command let in among the *Ahu's*, they soon dispatch'd each of them one. The next Diversion was among the wild Asses, at one of which the Ambassador *Brugman*, pursuant to the King's Pleasure, discharged his Pistol, but missing his Aim, the King, tho' riding at full speed, shot the Beast with the Arrow in the Breast, and another in the forehead, wounding several others, and never failing too in a full Gallop. He also cut another Ass with his Cymetar cross the Back, and with one blow cleft it to the Belly, another he cut with a single Blow almost the Head off; which done, one of the *Chans* wip'd it clean, and put into the Scabbard. Thence we went into a small Enclosure in the midst of the Park, where the King having commanded one of the 2 Huntsmen, who attend him with his Fowling-pieces, to shoot at an Ass, the more ancient of the two looking upon it as a Disgrace, the other should have it before him, shot at it; but missing his aim, was laugh'd at by the Company, which exasperated him to that degree, that he drew his Cymetar upon the other, and cut his Thumb off. The King being inform'd immediately of the Matter, ordered the others Head to be cut off; but at the Intercession of some there present, he had his Ears only cut off. But the Executioner forgetting part of his Duty, cut off but one half of the Ear, which the *Grand Huntsman Mortasculi Chan* perceiving alighted, and with his Knife cut off the remaining part, to our great Astonishment, who were not used to see Persons of his Quality to interfere with the Executioner.

A Persian Lord, an Executioner.

In this Enclosure a small Amphitheatre was erected, where the King entertain'd us with a Collation of Fruits and Preserves, and soon after 32 wild Asses were forced in, at which the King discharged some Shots with his Fowling-pieces, and wounded others with his Arrows; after which the Ambassadors being permitted to do the same as well as the other Lords, these Beasts sides were full of Arrows, which afforded no small Sport to the Spectators, especially when they run so close to one another, as to force the Arrows deeper into their sides, which made them fall a-biting, and running at one another with a great deal of fierceness. At last they were all knock'd down, and 30 more which were let in afterwards, in order to be sent to the King's Kitchen at *Ispahan*; the Flesh of these Beasts being in highest Esteem amongst the *Persians*.

Wild Asses Flesh esteemed in Persia.

By this time Dinner was brought to the same Place, when the Ambassador *Brugman* took the Opportunity to present the King with his Highness of *Holstein*'s Picture in a Box richly beset with Diamonds, as also with a steel Looking-glass polish'd on both sides, and embellish'd with several Figures by that famous Artist *John Dresden*: These Presents were made upon his own Account.

Presents from Brugman to the King.

Dinner being over, we were scarce retired to some Neighbouring Houses to take our mid-day's Repose, when the King sent us 10 *Ahu*'s, and a fine Stag, the Horns of which had 12 Brow-antlers; and word was brought us at the same time, that the King was got on Horse-back again, we did the same, and found him employed a-hawking; but he scarce had got sight of us, when he left that Sport, and with 9 Persons of his Retinue, and 6 of ours, retired to a large Walk, at the end of which was a Decoy for wild Ducks; but instead of employing our selves in that Diversion, we soon fell a-drinking, and became so merry, that the Ducks were sufficiently frighten'd from coming near us. Mr. *Mandelsloe* had the Honour to fill the King a Glass of Wine, and afterwards to kiss his Knee; and the King presenting him at the same time with an Apple, which is look'd upon as an Expression of the King's particular Kindness in that Court, he was afterwards consider'd there as a Person much in his Majesty's Favour. The *Kerek-jerak*, or Deputy-Steward of the Houshold, named *Mahomet Haly-Beg*, who had fill'd the King's Glasses, was got so drunk, that he made so hideous a Noise at the other end of the Walk, that the King sent one to bid him withdraw; and this not succeeding, order'd another to drag him thence, and to set him on Horse-back. But as they were going to

execute

1637. execute the King's Commands, *Haly-Beg* was ſo outrageous, as to abuſe and ſtrike thoſe that were commanded ſo to do; which the King perceiving, went thither to perſwade him, but finding himſelf not much better treated than the reſt, laid his Hand upon his Cymetar, threat'ning to cut off his Head, tho he was otherwiſe one of his beſt Favourites. This put the Steward into ſuch a fright, that the hot Vapours which had ſeized his Head before, were ſoon cooled; and conſidering with himſelf, that there was no jeſting with the King when once provoked, he got on Horſeback as nimbly as if he had not taſted a drop of Wine, which put the King into a laughing Humour, and he came very merrily to us, but retired ſoon after to his, and we to our Lodgings.

The 20th, the King did not go abroad a-hunting, but we dined with him in a Summer-houſe, which ſtood very pleaſantly in the midſt of a Garden, near the Water-ſide. In the Afternoon we took a Turn, and in our way took a white *Heron*.

Pigeon-ing. The 21ſt, being ſent for early in the Morning to go with the King a Pidgeon-hunting, we were carried up to the top of a very high Tower, within which were 1000 Nefts. Being all plac'd without, and our Trumpet commanded to ſound a Charge, the Pidgeons were driven out thro' the holes in vaſt numbers, moſt of which were kill'd by the King and the Company. This put an end to the Hunting for this time; but in our way towards the City, the King carried us into one of his Gardens, call'd *Tzarbach*, one of the fineſt of all *Perſia*; where being entertain'd with another magnificent Treat, we were no ſooner got to our Lodgings, but 12 wild Drakes, and 12 Pidgeons were brought us from the King, which the Ambaſſador *Brugman* kept for himſelf, and his Ladies.

The King hunts with their Ladies. Within a few Days after, Proclamation was made by the Crier of the City, that the King being to go abroad with the Ladies of the Court, no body ſhould preſume to appear in the Streets that Day. Whenever the King's Wives or Concubines go abroad, they are carried in Cheſts covered all over upon Camels; notwithſtanding which, no Perſon is permitted to come abroad in the Streets, or within a Muſquet-ſhot of the Field, where they take their Diverſion, under Pain of Death; becauſe they appear in the Field on Horſeback with Hawks in their hands, and make uſe of Bows and Arrows; which is the reaſon that no Men but the King and the Eunuchs muſt appear among them, the Lords which attend the King (who always goes out of the Town half an hour before the Women) being obliged to hunt at that time at half a Leg's diſtance from thence.

The King did not return from Hunting till the 28th of *November*; and as he was coming to Town, made us halt at the ſame Garden, where he had given us the Entertainment at our Return from the laſt Hunting; where he got ſo drunk with moſt of his Lords, that they were ſcarce able to ſit their Horſes, and ſome who had pleaſed him more than the reſt, had conſiderable Preſents beſtowed upon them; it having been obſerved, that it was his Temper to be profuſe in his Drink, of which he uſed to repent when he was ſober. Of this we had an Inſtance within 8 Days after, when the King being in a Humour of Drinking, and all the Company having left him, except the Chancellor and ſome Eunuchs, he commanded the firſt to drink his Health in a great Cup of Wine; which the Chancellor excuſing, he laid his drawn Cymitar by the Cup, telling him, that he muſt either take one or the other. The Chancellor, who was not able to drink ſo much, was forced to play the Hypocrite; and whilſt he was taking the Cup up to his Lips, finding the King to turn on one ſide, found means to get away. The King, not a little exaſperated at his Eſcape, ſent after him immediately; but being not to be found, play'd the ſame Game with an *Eunuch* there preſent, whom he had certainly kill'd, had not a certain *Mehuter*, or Gentleman of his Chamber, prevented it. At laſt the King finding himſelf left by all, got hold of one of his Pages, the Son of *Alymerdin Chan*, Governor of *Candahar*, asking him whether he ſhould take off the Cup? The young Lad thought beſt to act the Part of the Fox, told the King he would try what he could do; and ſo kneeling down before him, drank as much as poſſibly he could; but finding it impoſſible for him to compaſs the whole, and encouraged by the Wine and the King's engaging Words, roſe up, and throwing his Arms about his Neck, kiſſes him, ſaying, *I pray God grant the King long and happy Life.*

The King in his Debauches.

Which Frankneſs had ſuch a powerful Influence on the King, that he beſtowed upon him a Sword, whereof the Handle, Scabbard, and Belt, were beſet all over with precious Stones; and upon another Page, who had drank his ſhare of the Wine, another very rich Sword and a golden Cup. But his Courtiers finding him in a very ſplenetick Humour the next Day, were fain to get him into a better Temper, by redeeming the beſt Sword, and the golden Cup, with ſome *Tomans*.

The Chancellor treats the Ambaſſadors. The 19th of *Nov.* the *Eahtemad Dowlet*, or Lord Chancellor, made a moſt magnificent Entertainment for the Ambaſſadors in a moſt ſumptuous Hall, at the very Entrance of which was a very fair Fountain, and at the oppoſite part of the Door up to the Roof ſeveral Pictures of Women clad in divers Modes, copy'd after ſome *European* Originals: Below which, the Walls were on all ſides covered with Looking-glaſſes of divers Sizes. We were credibly informed, that there is an Apartment in the King's Palace belonging to his Wives, which was all done round with Looking-glaſſes, but much larger and finer than this. All our Meat was ſerved in Plate; beſides that, we had the King's Muſick, and the Diverſion of the Dancing-women, who not behaving themſelves here with the ſame Reſervedneſs as before the King, ſhew'd us ſeveral things beyond what ever we had ſeen before. Among the reſt, one of them having placed a Porcelane Veſſel in the midſt of the Hall of 2 Foot high, took it up in turning about betwixt her Legs with ſuch ſlight, that no body could perceive ſhe had any thing there, ſhe continuing to dance with the ſame Air, and returning it with the ſame Dexterity into the Place, without making the leaſt falſe ſtep. Theſe Women they call *Kachbchi*, their Employment being to oblige Men in whatever can be deſired of Women.

The Generoſity of the Perſians in treating their Guests. It muſt be confeſs'd of the *Perſians*, that whenever they entertain their Friends, they omit not any thing which they judge may contribute to their Diverſion; and as they are generally exceſſive Lovers of Women, ſo theſe never fail to be one main Ingredient of their Feaſts. Theſe Dancing-women the Maſter of the Feaſt offers to his Gueſts, he who has a mind to one of them, having no more to do than to riſe from the Table, and to conduct her into a private Room, and, ſo ſoon as the buſineſs is over, to return to his Place, there being no body there who takes the leaſt notice of what has been done. But ſuch as are not fram'd to venture, refuſe the Maſter's Civility with a Complement, and no harm done. *Ardebil* is the only Place throughout all *Perſia*, where theſe Dancing-women are not allow'd, *Schach-Abas* having baniſhed them from thence, by reaſon of the Sanctity of the Place.

The Muſick and Dancing-women being order'd to withdraw after Dinner, the Ambaſſadors had a private Conference with the Chancellor in his Garden, concerning their Negotiation over a Collation of Fruit and Preſerves. This Chancellor's Name was *Tagge*, being then about 60 years of Age, and an Eunuch, of which we had this farther Account: That being but young, and a Clerk in the City of *Keintze*, he forced a Boy to comply with his brutiſh Deſires; whereof Complaint being made to the King, he order'd his Privy Parts to be cut off. Others relate the Story in the following manner: That being upon the before-mentioned Account condemned to Death by *Schach Abas*, cut off his Privy Members himſelf; and ſending to the King, begg'd of him, That, ſince he himſelf had puniſh'd that Part of his Body which had committed the Crime, his Majeſty would be pleaſed to ſave his Head, which he hoped might one time or other prove ſerviceable to him; whereupon the King being taken with his Reſolution, made him Secretary of his Chancery; and *Schach-Sefi* having kill'd *Taleb-Chan* (his Predeceſſor) with his own Hands, ſent the Golden Inkhorn to *Tagge*, the Badge of Lord Chancellor of *Perſia*.

The Original of the Chancellor.

The 21ſt of *Nov.* The Ambaſſadors had another Conference with the Chancellor, and were afterwards entertain'd at Dinner, but not ſo magnificently as before.

The 29th, The 2 *Armenian* Lords, *Seferas* and *Elias Beg*, coming to pay a Viſit to the Ambaſſadors, they invited them to ſtay at Dinner; and *Elias* endeavouring to give ſome Proofs of his pleaſant Diſpoſition, the ſame were ſoon found to be check'd by ſome inward Grief, of which the eldeſt Brother gave us the following Account: That his Brother being in more than ordinary Favour with the King, he told him one day as they were together in a merry Vein, that nothing could

1637. could be added to the Accomplishment of his delightful Conversation, or could oblige him more, than if he would embrace *Mahometism.* Unto which *Elias-Beg* replying, That perhaps he might do so one time or other, nothing was spoke of it more for that time. But the Clock-maker's Constancy having put the King in mind of their Discourse, he sent certain Persons to him to desire him to be circumcised; which he endeavouring to evade by several Excuses, they circumcised him by Force. *Elias* afterwards confess'd the whole Truth of the Matter, adding, That notwithstanding this he would live and die a Christian.

8

Dec. 2. Our *Mehemander* brought the following Presents from the King, *viz.* To each of the Ambassadors,

The King's Presents to the Embassy.

1. A Horse, the Saddles and Bridles having large Plates and Buckles of Gold.

2. Two *Persian* Garments, with the Turbant and Girdle of gold Brocado.

3. 205 Pieces of 15 sorts of Silk, Stuffs, Satin, Damask, *Daras*, Taffata, Callico's, *&c.* and 200 *Tomans* in Money (making 1000 Pistols) to be divided betwixt them, towards their Expence in their return home. To the 5 principal Persons of our Retinue, to each a Satin Vestment, and another of Taffata, with gold and silver Flowers; to the rest of the Gentlemen, a Vestment of Taby, with Flowers of Gold to each; the rest had nothing.

Dec. 3. The Ambassadors being invited to dine once more with the King, they, at the Perswasion of our *Mehemander* (who alledged the Custom of the Country on his behalf) put on the best of the Garments the King had bestowed upon them over their own Cloaths. We dined in the *Divan-Chane*, or Justice-Hall, where we were entertain'd the first time, and with the same Ceremonies, except that the Chancellor ordered his Presents he makes usually once or twice a-year to the King (of which more hereafter) consisting in 12 fine Horses richly accoutred, 49 Camels loaden with Tapestry, and other fine Woollen Manufacturies, 15 Mules, 1000 *Tomans*, (50000 Livres) 40 Pieces of gold and silver Brocado's, *&c.* to pass before the King; which took up an hour and a half.

Entertains them the last time.

The Chancellor's Presents to the King.

This done the Lord High Chamberlain conducted the Ambassadors to take their leave of the King. He delivered to them with his own Hands the Answer he had thought fit to make to his Highness of *Holstein*'s Letter, promising that he would return his Courtesie by a most solemn Embassy. Our Ambassadors having return'd his Majesty all imaginable Thanks for the Honour and noble Treatments he had been pleased to bestow upon them, during their Abode in his Kingdom, return'd to their Quarters in the same Order as they went thither.

The Ambassadors take their leave of the King.

Dec. 4. The *Muscovite* Envoy obtain'd his Dismission, in order to return with us into *Muscovy*; and the following Days, such of the *Persian* Lords as had been regaled by the Ambassadors, sent their Presents to them.

Dec. 5. *Chosru Sultan* sent the Ambassadors 2 Horses.

Dec. 6. *Tzanichan*, the *Kurtzi-Bashi*, sent his Presents by our *Persian* Renegade, *Rustan*, which was the reason the Ambassadors sent him word they could not receive them; so, that within 3 days after, he sent by another hand 2 Horses, a Mule, and 18 Pieces of Stuff, which were accepted, and the Bearer rewarded with 5 Pistols.

Presents of the Persian Lords to the Ambassadors.

The 10th of *Dec.* the Lord Chamberlain sent 2 fine Horses, and the Chancellor 2 more, a Mule, and 40 Pieces of Stuffs; some whereof had the Ground-work of Gold. The same Day word being brought us, that the King intended to make a Progress in 8 Days to *Kuschan*; and, that we might take that Conveniency thither, every thing was prepared for our Departure, in order to which we made a great Entertainment the 12th of *Dec.* whereto the same Persons that had been at the first were invited, besides some *Armenians* of the Ambassador *Brugman*'s particular Acquaintance; and in the Afternoon we had another running at the Ring. During which time the Sound of the Trumpets and Timbrels, but especially our Artillery, made so terrible a Noise, that Father *Joseph*, our Interpreter, could not forbear to represent to the Ambassador *Brugman* the Danger he exposed himself, and the whole Retinue to, by thus irritating the King, who could hear every Shot at his Palace: But this was so far from prevailing upon him, that he ordered the Trumpets to sound, and the Great Guns to be discharged as much as ever before. 1637.

Brugman's Impudence and Insolence.

Another Piece of Insolence the said Ambassador committed against the *Persian* Sanctuary: For one *Lion Bernaldi*, a Gentleman of our Retinue, being suspected by him to keep a secret Correspondence with the *Dutch* Agent; but to smother the Jealousie accused of having robb'd the Ambassadors, had taken his Refuge in the Sanctuary, call'd *Alla Capi*, being part of the Royal Palace. The King being intreated by the Ambassadors to deliver up their Domestick, he answered, That if any of the Goods were found, they should be restored, but that it was not in his Power to take his Person out of the Sanctuary, tho' he had offended against his own Person; which Answer put the Ambassador *Brugman* into such a Passion, that he declared he would fetch him out of the King's Arms; and not thus contented, he suborn'd some *Armenians*, who were to cajole him out of the Sanctuary, whilst he sent 20 armed Persons, with Firelocks, who with Match lighted march'd into the Palace-Gate, with expres Orders to kill him as soon as he came out, or else to bring him away by Force, notwithstanding the other Ambassador *Crusius* opposed it with all his Might. The Party sent by *Brugman* were so diligent in executing what they were ordered, nay rather more, that they did not stick to attack the Guards who opposed their Entrance into the Gate of the Sanctuary; so that the King being awakened at the Noise, to prevent further disorder, commanded the Gate to be shut, a thing never known in the memory of Man, the Design of the Foundation being to keep it open at all times, for a certain Refuge for unfortunate Persons.

The King's Patience.

The King was so incensed at it, that he said the next Morning in Council, that it was high time either for him or the *Germans* to leave the City; and these two Actions, as well as another which happen'd soon after, when the said Ambassador sent some of our Retinue to the Assistance of *Seran*, an *Armenian*, to oppose the Searchers, which in the King's Name came to look for some handsome Lasses for the King's Use. All these Extravagancies, I say, made so deep an Impression upon the King's fierce Temper, that he had certainly caused the said Ambassador, and perhaps the whole Retinue to be sacrificed to his Resentments, had not the Lord Chancellor perswaded him not to violate the Laws of Nations, but to leave the Punishment of this Insolence to the Prince his Master.

CHAP.

CHAP. VI.

The Ambaſſadors from the Duke of Holſtein's *Travels into* Perſia.

1637. The City of *Ispahan*.

CONſidering *Iſpahan* as the Metropolis of the whole Kingdom, of which ſcarce any ſatisfactory Account has been given hitherto, it will not be beyond our Scope, to give the Reader an Account of what we found moſt obſervable during our ſtay of 5 Months here. The City of *Iſpahan* is ſuppoſed to be the ſame, that heretofore was call'd *Hecatompolis*, being before *Tamerlane*'s time known by the Name of *Sipahan*, from the vaſt number of its Inhabitants, from the ancient *Perſian* and *Usbeque* Word *Sipe*, and the Plural *Sipehan*, which ſignifies Armies; *Tamerlane* having by tranſpoſing the two initial Letters, changed it into that of *Iſpahan*. *Ahmed ben Arebſcha*, who has writ the Life of *Tamerlane*, calls it *Isbahan*, and the Modern *Perſians* write it always *Isfahan* with an *f*, from an *Arabian* Word, which ſignifies a Batallion; tho' ſometimes they alſo pronounce it *Iſpahan*, which is its current Name now a-days.

It is ſituate in the Province of *Erak*, or *Hierak* (the Ancients *Perſia*) in a very Fair Plain, ſurrounded at about 4 Lgs diſtance from the City with very high Mountains, in the Form of an Amphitheatre, at 32 Dgs 26 Min. Lat. and 68 Dgs 40 Min. Long. the Declination of the Needle from the N. to W. being 7 Dgs. The Mountain of *Demawend* lyes to the S. and S. W. and the Mountain *Jeilak Perjan* to the N. Its whole Extent (including the Suburbs) is about 8 Lgs; it has 12 Gates, 9 whereof are only open, 18000 Houſes, and 500000 Inhabitants. The Fortifications are of Earth, and very inconſiderable, the Baſtions tho' of Brick, being ſo miſerably flank'd, that they are but a ſlender Defence to the Place; beſides, that the Ditch is ſo ruin'd, that at any time of the Year a Man may paſs over it dry-foot. *F. Bizarrus*, and ſome others, make the Walls of Chalk, of which there is not the leaſt Footſtep, except that the Caſtle-Wall appears as if it were whiten'd with Lime.

Its bigneſs.

It is waſh'd on the S. and S. W. ſide by the River *Senderut*, which ariſes out of the Mount *Demawend*; and before it reaches the City, divides it ſelf into two Channels, one whereof falls into the Park, call'd *Hazartzerib*, and the other paſſes by ſeveral artificial Canals under-ground to the Royal Gardens of *Tzarbagh*. It is conveyed into the City by Pipes which ſupply every Houſe with Water, wherewith they fill their Ciſterns, tho' beſides this, they are alſo well ſtor'd with Springs, the Waters whereof don't give way to that of the River. The Stone-bridge upon this River, betwixt the Garden of *Tzarbagh* and the City, which is as broad as the *Thames* at *London*, was built at the Charge of *Allaverdi-Chan*, ſometime Governor of *Schiras*. On the other ſide of the Mount *Demawend* riſes the River of *Abkuren*, which *Schach-Abas* deſigning to join with the *Senderut*, he employed above 1000 Pioneers for 14 Years together, thro' which means they were advanced within 200 Paces of accompliſhing the Work, when the Death of *Schach-Abas* put a Period to this great Deſign, his Succeſſor having not as yet thought fit to go about the finiſhing of the Work.

The River *Senderut*.

The City of *Iſpahan* had the Misfortune to feel twice the Effects of the Fury of that mercileſs Conqueror *Tamerlane*; *viz.* once when he took it from the *Perſian* King, the ſecond time when it revolted from him. *Joſ. Barbar*, who travell'd in *Perſia* 1647. ſays, That *Chotza* (whom he calls *Giaſa*) King of *Perſia*, intending to take a ſevere Revenge of this City for their Rebellion, ordered his Soldiers not to return thence without the Heads of ſome of the Inhabitants of *Iſpahan*; ſo that the Soldiers who could not meet with Men cut off the Womens Heads, and after they had ſhaved them, brought them to *Chotza*. It began firſt to recover under the Reign of *Iſmael* the 2d, but owes its preſent Glory to *Schach-Abas*, who tranſferr'd the Imperial Seat thither from *Caſwin*, and not only adorn'd it with many fair Structures, but alſo ſettled there ſeveral Colonies from divers Provinces of the Kingdom. Its chiefeſt Glory conſiſts at preſent in their *Meſquees*, Market-places, the *Baſar*, Publick Baths, and the Palaces of Perſons of Quality, with their Gardens thereunto belonging.

Twice deſtroy'd by *Tamerlane*.

1637.

It muſt be confeſs'd, that the greateſt Expence the *Perſians* are at in their Houſes, are in their Gardens, tho' they take a quite different courſe in them from what we do in moſt Parts of *Europe*: For as bountiful Nature ſtores their Fields with Tulips, and all manner of other fine Flowers, ſo theſe are not regarded in their Gardens, inſtead of which they apply all their Care to cultivate the moſt excellent Fruit-Trees, that Art and Nature can produce in ſo happy a Climate. They are alſo very curious in their Walks, which are ſet on both ſides with a kind of Plane or Poplar, not known in *Europe*, call'd *Tzinner* by the *Perſians*. They grow up to the heighth of a Pine, their Leaves being broad, and reſembling our Vine-leaves: It bears a Fruit not unlike a Cheſs-nut, but has no Kernel within. The Wood is dark brown, and ſo well ſtrip'd with Veins, that when rubb'd without, it exceeds in Beauty any thing that is made of the Root of the choiceſt Wall-nut Trees. The *Perſians* commonly make their Doors and Window-ſhutters of it.

Their Gardens.

The Fountains are alſo one of the chief Ingredients belonging to their Gardens, which have very large Receptacles, either of Marble or Free ſtone, from whence the Water is conveyed by Channels from one Baſon to another, for the Uſe of the Garden. Moſt of the *Perſian* Lords and rich Merchants, have certain Summer-Houſes, or Galleries, incloſed with a row of Pillars in their Gardens, on the four Corners of which are as many Rooms, where they take the Benefit of the Air, according as the Wind blows from one Corner or other. They are ſo curious in theſe Summer-houſes, that they often exceed both in the Buildings and Furniture their ordinary Dwelling houſes. Upon which Head it is to be obſerved, that tho' Perſons of Quality are very magnificent in the Furniture of their Houſes, yet make they but a ſlender Appearance without, being built only of Earth or Brick, bak'd in the Sun.

Their Fountains.

Their Houſes are generally ſquare, and commonly 4 Stories high, including the Ground-room. The Cellar, and all other Places under-ground, they call *Sirſemin*; the Ground-rooms, *Chane*; the firſt Story, *Kuſchk*; the ſecond, *Tzunſſe*; and the third, *Keſſar*; their open Halls are call'd *Eiwan*. Their Windows being for the moſt part as big as the Doors, they reach up to the Roof, their Rooms being ſeldom very lofty. Inſtead of Glaſs, they cover their Windows, which are made Lettice-wiſe, with oil'd Paper in the Winter.

Their Houſes.

Wood being a ſcarce Commodity in moſt Parts of *Perſia*, they make uſe of Stoves: They make a hole in the midſt of a low Room in the Ground, about the bigneſs of a good Kettle, this they fill with Charcoal, and lay a Plank acroſs it covered with a Carpet. As they always ſit upon the Ground, ſo they thruſt their Feet under the Carpet, drawing the ſame over their Bodies up to the Breaſt; which they look upon as extraordinary wholeſome, their Bodies being kept warm by a natural Heat with a little Fire, without the leaſt Offence to the Brains, the Vapours of the burning Coals being by certain Conduits drawn away by the Air under ground. They call theſe Stoves *Temurs*, and ſome dreſs their Meat with them. There is ſcarce a Houſe in *Iſpahan*, but what has its Court-yard before it.

Their Stoves.

I have heard them ſay, that the Streets of *Iſpahan* were formerly ſo broad, that 20 Horſe might march a-breaſt thro' them: But ſince *Schach-Abas*'s time, they are not ſo profuſe with the Ground, eſpecially in the middle of the City, near the Market-place and the *Baſar*, where now they are very narrow; tho' the Market-place it ſelf exceeds in bigneſs any that ever I ſaw in *Europe*, it being 700 Foot long, and 250 broad. The Houſes round about it are all of Brick, of an equal heighth, and the Shops vaulted. That ſide towards the Royal Palace, contains the Goldſmiths, Lapidaries, and Druggiſts, oppoſite to which are the Woollen-Drapers and Mercers, and thoſe that ſell Callico's, beſides the Taverns, and other Eating and Drinking-houſes. Theſe Houſes are but 2 Stories high, having

The Streets of *Iſpahan*.

The Market-place.

their

1637. their open Halls. All about the Market-place are planted certain Trees, not unlike Box, call'd *Scimscad*, but growing somewhat higher, the Branches always green, and so cut, that the Shops appearing very conveniently between these Trees, it affords a very agreeable Prospect. But one of the chiefest Ornaments, as well as Conveniencies of the Market-place, is the Rivulet, which at the Foot of these Trees is carried through a Chanel of Free-stone rais'd two Foot from the Ground, all about the Market-place, and exonerating it self into two large Basons at the two Corners of it, is from thence conveyed by Pipes to other Places of the City. Most Handy-craft Trades have their Work done by their Apprentices or Slaves, whilst they are employed in selling their Commodities in their vaulted Shops within the Market-places, or the circumjacent Streets; where each Trade has its peculiar Quarter, or perhaps a whole Street assign'd it, which being very nicely observed makes a very glorious Shew. At the end of the great vaulted Gallery, in which most of the Shops are in the Market-place, you see 2 Balconies opposite to one another, and covered over head, where the City-Musick plays every Night at Sun-set, or whenever the King passes thro' the Market-place, a Custom observed in all the Cities of *Persia* where a *Chan* resides, and said to be first introduced by *Tamerlane*.

The Royal Palace.

The Royal Palace, call'd *Dowlet-Chane*, or *Der Chane Schach*, stands upon the Market-place. Just before the Gate you see several Pieces of Canon, being most such as carry 36 and 48 Pound-Bullets, without Carriages. Mr. *Hem*, a *Dutchman*, who travelled into those Parts 1623, and 1624, says, they were brought thither from *Ormus*, for the Security of the Castle; which is not so, they being useless as they now are; besides, that the Palace has no other Fortifications but a single Wall, tho' pretty high; there being

Its Guards.

not above 3 or 4 upon the Guard in the Day-time, and about 15 in the Night, besides 30 Persons which watch within the King's Apartment, being the Sons of Persons of Quality; they have their own Captain, who every Night delivers to the King the Names of such as are then upon the Guard.

Over the outward Gate of this Palace is built a large, square Structure, having very large Windows on all sides. The Chief Apartments belonging to the Palace,

Its best Apartments.

are, The *Tah Chane*, a very large Hall, where the King treats all the Great Men of the Court upon the Day of their *Nauruz*, or New-Years-day: The *Di-wan-Chane*, or Great Hall of Justice, where Appeals be brought to the King, who presides there in Person, and frequently gives Audience to foreign Ambassadors; it having this Conveniency, that, as it adjoins to a spacious Court, the King may shew his best Horses, and their rich Equipages to Foreign Ministers, as we told you he did at our first Audience. In the *Haram-Chane* (being also a spacious Hall) the King's Concubines entertain'd him with their Musick, who are all Eunuchs, and Dancing. The Place of the King's Residence, and of his lawful Wives, is call'd *Deka*. Each of these Halls have many Chambers, Closets, Galleries, and other Apartments belonging to them, fit for the Entertainment of so great a Court, and so numerous a Train of Ladies, who live all in the same Palace; neither is there any considerable Apartment belonging to the Court, but has its peculiar Garden.

A Sanctuary.

At 40 Paces within the outward Gate to the right, you see another Gate leading into a spacious Garden: In the midst of it you see a Chapel, which is the Sanctuary we mentioned before; the *Persians* call it *Alla-Capi*, *i. e. God's Gate*. This Place is a most assured Refuge for all unfortunate Persons, whether Criminals or Debtors, even against the King himself, not excepting Murtherers and Assassins themselves, who may live here undisturbed, till they obtain the King's Pardon, if they have wherewithal to subsist. But Thieves are not permitted to stay long here.

The Citadel.

On the outside of the Royal Palace lies the Citadel, they call *Taberick Kale*, being fortified with a Rampier, and several Bastions of Earth. It is under the Command of a Governor, who has a strong Garrison under him for the Defence of the Place, the King's Treasury, Armory, and Stores of Ammunition, tho' the Artillery consists only in Field-peces.

Another Sanctuary.

Beyond the Market-place in a by-street, there is another Sanctuary, call'd *Tschehil Sutun*, from the 40 Beams which sustain the whole Roof of the *Mosque*, and all rest upon one Pillar, that stands in the midst of it. When *Tamerlane* took this City a second time, on occasion of their Rebellion, all the Inhabitants that 1637. fled to this *Mosque* were spared by the Conqueror; But *Schach-Ismael* made it a Sanctuary.

The great Mosque of Ispahan.

On the South-side of the Market-place, you see that most famous Structure, or *Mosque*, of which *Schach-Abas* laid the Foundation; but being not quite finished before he died, *Schach-Sefi* was about covering the Walls with Marble at the time of our being there, which was brought thither from the Mount *Elwend*. It is dedicated to a certain Saint, call'd *Mehadi*, the 12th of the Posterity of *Haly*, in Honour of whom the said *Schach-Abas* erected several other *Mosques*, tho' less magnificent, at *Tauris*, and other Places. As you come from the Market-place to this *Mosque*, you pass thro' a spacious Court paved with Free-stone, at the upper end of which there is under a Tree a fine Cistern, in which those who are to do their Devotions at the *Mosque* wash themselves.

Behind this Tree you go up a Pair of Stairs into another square Court, but much less than the former, and thence a little further to another *Mosque*, call'd *John de Lact*, the Portal of which is of white Marble, the Door being covered all over with Plates of Silver gilt in several Places. As you are to go to the great *Mosque*, you pass thro' a Door which brings you into a large Court, which has round it a vaulted Gallery, and in the middle a great Cistern of Free-stone, eight square and full of Water. Above this Gallery there is another, but somewhat lower, which upper Gallery has towards the Court a row of fair Marble Pillars, which are gilt in some Places. After you have cross'd this Court, you go into the *Mosque* thro' a Vault of an extraordinary heighth, lined within with blue, and gilt, glazed Tiles. The *Mosque* it self is a vast Structure, having many Niches and Chapels sustained by Marble Pillars. But what is most surprising is, that the Walls as well of the Galleries in the Court as of the *Mosque*, are of the whitest and best polish'd Marble, about 15 or 16 Foot high, each Piece of Marble being 5 or 6 Foot square, and so artificially join'd together, that the Junctures are imperceptible to the Eye. Within the *Mosque* you see the *Cathib* or Pulpit, and the *Meherab* or Altar, the latter of which is of one intire Piece of Marble, having on each side a Marble Pillar, all of one Piece. There are many other *Mosques* sufficiently remarkable for their Magnificence in *Ispahan*, but their vast multitude hinders us from ent'ring upon a particular Description of them.

In the very Centre of the *Maidan*, or Market-place, stands a high Pole, on the top of which they sometimes put a Melon, an *Arpus*, an Apple, or perhaps a Trencher with Money upon it, at which they shoot on Horse-back in a full gallop; the King himself, and sometimes the Lords of the Court assist at this Sport among the Inhabitants, and great Summs are lay'd. What Money falls from the Trencher belongs to the King's Footmen. He that carries the Prize is obliged to give an Entertainment to the whole Company, and the King himself, if he has shot among them.

Exercises of the Inhabitants.

They have another Game, call'd *Kuitskaukan*, which is like our Cricket; at this they play likewise on Horse-back, striking the Bowl, riding in a full Career. They also frequenrly exercise themselves at the Javelin, of which elsewhere. As the *Persians* are extremely curious in their Horses, so they make frequent Matches for Races, which are run from one Pillar to another, which stand at both ends of the Market-place. When the King has an Inclination to be Spectator of this Sport, he places himself in a kind of a wooden Hut, call'd *Seanescin*, which being set on 4 Wheels may be removed at Pleasure.

Taverns.

Opposite to that side where the great *Mosque* stands, are the Taverns, and other Tipling-houses of several kinds. They call those where they sell Wine, *Seire Chanes*, being for the most part infamous Places, where is a constant Conflux of the Scum of the Town, who commit all sorts of Brutalities there.

The best Coffee-houses.

The Places where they drink Thee (of which more hereafter) are of the best Repute at *Ispahan*, as being not frequented by the Inferiour sort. They spend most of their time in these Houses in playing at a kind of *Tick-Tack*, and *Chess*, at which they are very expert, even beyond the *Europeans* themselves. The *Persians* call this last Game, *Sedrentz*, or *Hundred Cares*, from the Care it requires in the Management of it. The Houses, call'd by them *Cahwa Coane*, are frequented most by those who are Lovers of *Tobacco*, and a certain blackish Liquor they call *Cahwa* (Coffee) of which we shall also have occasion to speak more hereafter. These

are

1637. are the conſtant Places, where their Poets and Hiſtorians are to be met with, who commonly ſit in a high Chair in the midſt of the Room, and entertain the Company with their Satyrical Stories, with various Geſtures, not unlike thoſe, who ſhew Tricks of *Leger-de-main* among us. Next adjacent to the Taverns and Tipling-houſes, are the Chirurgeons and Barbers Shops, which are two different Trades in *Perſia*: The firſt, call'd *Tzerrach*, being only for dreſſing and curing of Wounds; the others, called *Dellak*, trim only; tho' they are alſo ſometimes employed about Circumciſion. The Barbers Trade is very good here, there being not a *Perſian* but, as ſoon as the Hair comes out, ſhaves very frequently.

The Baſar. As you turn out of the *Maidan*, or Great Market-place, to the Right, you come to the *Baſar*, or ſecond Market-place, in the midſt of which you ſee the *Kaiſerie*, or open Cloiſter, which contains the principal Shops where they ſell the richeſt Stuffs and Commodities the whole Kingdom affords. A certain *Engliſhman*, named *Feſty*, made a very fine ſtriking Clock under the Reign of *Schach-Tamas*, which was put over the Gate of this Cloiſter; but as the ſaid Clock-maker was cut to pieces by the Relations of a certain Perſon he had kill'd, the Clock has never been in any good Order ſince. This Market-place is divided into ſeveral Streets, which being covered over head, contain a vaſt number of Shops excellently well ſtor'd with all ſorts of Commodities, nothing being ſo rare but what is to be met with here, and that at a very reaſonable rate. Every thing being very cheap at *Iſpahan*, except Fuel and Meat, the Country round about it being deſtitute of Foreſts and Meadows: For I remember that I bought in a Druggiſt's Shop the *China* Root, call'd *Bich Tzini*, and *Rhubarb*, call'd *Rawentzini*, though brought thither from *China* and the *Great Tartary* at a Crown a-pound.

Its Trade. The City of *Iſpahan* may be ſaid to be the chief Trading Place of all *Perſia*, which is frequented by all the *Aſiatick* and *European* Nations, and among the reſt above 12000 *Indians* inhabit there, their Commodities being incomparably more precious than thoſe of the *Perſians*; for not to mention the Musk and Ambergreaſe, they ſell great Quantities of Pearls and Diamonds. Beſides theſe, there are at *Iſpahan* great numbers of *Chuaſſon*, *Chattai*, and *Buchar Tartars*, *Turks*, *Jews*, *Armenians*, *Georgians*, *Engliſh*, *Dutch*, *French*, *Italians*, and *Spaniards*. The Province of *Kirman* ſupplies this City with Sheep and Lambs; that of *Kilan*, with Rice; and thoſe of *Kendeman*, *Taſam*, *Ebarku*, and *Jeſdi*, with Wheat and Barley; *Meſanderan* and *Feilack Perjan*, with Wood and Charcoal, which are ſold here by the Pound; the firſt at a Halfpeny, and the ſecond a Peny *per* Pound.

Perſian Money. The Current Money of *Perſia* is either Silver or Braſs, very little Gold. The *Abas*, the *Garem Abas*, or half *Abas*, call'd commonly *Chodabende*, the *Scahi* and *Biſti* are of Silver. The firſt, ſo call'd from *Schach Abas*, are about 18 *d.* *Sterling*, tho' their intrinſick Value is not above 15 *d.* The half *Abas* got its Name from *Schach Chodabende*; the *Scahi* is the 4th part of an *Abas*, and two *Biſti's* and an half make one *Scahi*. In *Schach-Iſmael's* time was coined a Piece of Money, call'd *Lari*, ſhap'd in the Faſhion of a thick Latin Wire, and flatted in the middle where the Impreſſion was made. *Pul* is the general Name for all braſs Money in *Perſia*, but what they call *Kasbeki* is the 40th Part of an *Abas*. Great Summs are computed by *Tumains*, each making 50 *Abas's*; tho' there be not a Piece of any ſuch Value, a *Tumain* being only a Name like a *Rouble* in *Muſcovy*, for the Conveniency of accounting. Foreigners are obliged to pay for what they buy, in *Rix-Dollars* or *Spaniſh Ryals*, which are generally converted into *Abas's*, becauſe they gain the 4th Part by it; for the Mint of *Perſia* being farm'd to private Perſons, they are always in League with the Bankers, or Money-Changers, who are obliged to bring all the Foreign Coin into the Mint, which they call *Serab-Chane*.

Braſs Money. It is further obſervable, that each City has its peculiar braſs Money, and particular Mark; which as it is not current in any other Place, ſo it is changed and recoined every Year, to the great Advantage of the King; who out of a Pound of Metal, which coſt about 18 *d.* makes 64 *Kasbeki*, beſides that by this means the Country is not eaſily overſtock'd with braſs Money. Their ordinary Mark is a Stag, a Deer, a Goat, a Satyr, a Fiſh, *&c.* Thus at our time the *Kasbeki* of *Iſpahan* were mark'd with a Lion; thoſe of *Scamachie*, with a Devil, at *Kaſchan*, with a Cock, and in *Kilan*, with a Fiſh. For the Conveniency of Trade, many *Caravanſera's*, or four-ſquare Store-houſes, ſurrounded with high Walls, are built at *Iſpahan*. They are commonly 3 Stories high, and, beſides the Vaults below, have all manner of Conveniencies, as Chambers, Halls, Galleries, *&c.* 1637.

Among the reſt of the Publick Structures of this City, the two Convents belonging to the *Spaniſh* and *Italian* Friars ought not to be paſs'd by in ſilence. One is the Convent of the *Auſtin* Friars, we have mentioned before; the other are *Carmelites*, who were no more than 10 in number at our time, notwithſtanding which the Structure might vie with any in *Europe* belonging to that Order. Their Priors's Name was *F. Tinas*, a very obliging Perſon, as were all the reſt, they living with a great deal more Circumſpection here among the Infidels, than they do in *Europe*. We never ſet foot in the Monaſtery, but they would treat us with a Collation: They preſented Mr. *Imhof*, a Patrician of *Nuremburgh*, and one of the Chief Gentlemen belonging to the Embaſſy, with a *Perſian* and *Italian* Lexicon, and afforded me a generous Protection whilſt I was at Variance with the Ambaſſador *Brugman*. Theſe two Monaſteries are in the Northern Quarter of the City, not above 1000 Paces diſtant from one another. *Spaniſh* and *Italian* Monks.

French Capuchins. Three *French Capuchins* were at our time alſo laying the Foundation of a Convent, in a Place they had purchaſed for that purpoſe, not far from the *Auſtin* Monks. They had already finiſhed the Chapel, and were building the Dormitory, which had a Kitchin, Garden, and Vineyard adjoining to it.

The King's Stables. Betwixt this and the Convent of the *Carmelites*, are the King's Stables, where the moſt remarkable thing is a high Tower, built altogether of Earth, and the Horns of *Ahu's* and Stags. The Story goes, that *Schach-Tamas* having in one Hunting kill'd 2000 of them, in memory thereof cauſed this Tower to be erected, and their Horns to be employed in the Building. They call this Tower *Keleminar*.

His Gardens. The King's Garden, call'd *Tzarbagh*, which is adjacent to the City, may challenge any other in the World, being above half a League in an exact Square, and divided by the River *Senderut* (which has ſpacious Walks on both ſides) into a Croſs, which makes four different Gardens. At one end of it to the South, you ſee a little Mountain planted with ſeveral Allys, having on both ſides ſteep Precipices, made by the artificial cutting of the Rocks into ſeveral Chanels, thro' which the River, which is brought up to the top of the Mountain, falls down into certain Baſons made for that purpoſe. Theſe Chanels are about three Foot broad, and ſo ſteep, that the Water being forced down with great Violence into the Baſon, makes a very agreeable Noiſe; beſides, that every Ally had its peculiar Baſon of white Marble, where the Water ſpouted forth in divers Figures; all the Water in the Garden being gathered at laſt into one large Pond in the midſt of it, and caſting up the Waters 40 Foot high. At the four Corners of this Pond were ſo many large Pavilions, the Apartments whereof were carved with Leaf-work, and gilt within; there being a paſſage from one to another by Walks planted with *Tzunar*-Trees, whereof there are Millions, which make a very delightful Shew.

Fruit-Trees. Beſides theſe, there are innumerable Fruit-Trees of all ſorts, which *Schach-Abas* had cauſed to be brought thither, even from *Turky* and the *Indies*. We ſaw here among the reſt a kind of Grapes, call'd by them *Hallague*, as big as a Man's Thumb, without any Stones, the Meat firm, and of a moſt delicious Taſte. Ten Maſter Gardeners are appointed to look after this Garden, each of whom has 10 other Gardeners under him; they are permitted to let any Body come into the Garden for 4 *Kasbeki's*, or 2 Pence a-piece, and to eat what Fruit they pleaſe, but they muſt carry none away.

The Suburbs of *Iſpahan*. The Body of the City of *Iſpahan* is ſurrounded with large Suburbs on all ſides, the chiefeſt and faireſt of which is call'd *Tzulfa*, inhabited by *Armenian* Chriſtians; moſt Merchants, who were tranſplanted thither by *Schach-Abas* out of *Armenia* the Great. Their yearly Tribute amounts to no more than 200 *Tumains*, or 1000 Livres. This Quarter contains 12 Churches, and about 3000 Houſes, which may vie with the beſt in the City. That of *Tzulfa*.

Tabriſabath. The Suburbs of *Tabriſabath* lie on the other ſide of the River *Senderut*; here *Schach-Abas* ſettled a Colony

1637. of People he brought along with him out of the Provinces of *Tauristhan*, which is the reason it is sometimes call'd *Abasabath*.

Hasenabath. The Suburbs of *Hasenabath* are inhabited by the *Tzurtzi*, or *Georgian* Christians, most of them rich Merchants, as well as the *Armenians*. They are much addicted to travelling with their Commodities, especially into the *Indies* and *Europe*; it being certain that those who at *Venice* and in *Holland* go under the Name of *Armenian* Merchants, are generally *Georgians*. Both these inhabit the Suburbs; not but that they, as well as all other Christians, have liberty to live in the City, but because they chuse rather to dwell for better Conveniencies sake among one another. For the *Persians* don't only suffer Christians to inhabit among them, as for instance, in the Quarter of *Nessera* within the City, but have also no small Kindness for them, both on the Account of the Profit they draw from them by their Commerce, and the Tribute they pay, but also on the account of cultivating their Vines, which, as well as the drinking of Wine being forbidden by the *Mahometan* Law, which however the *Persians* are much addicted to, they commit the dressing of their Vines to the *Armenians*, who are expert enough at that thing, but know not how to make or preserve Wine; for they don't keep it in Tuns, but in earthen Pots, or perhaps fill a whole Vault with it, without making use of any other Vessels. The *Persians* have such an Aversion to White-wine, that if, for want of Age, their Wines be not high colour'd enough, they put some Brazil-wood or Saffron into it.

Kebrabath. To the West-end of the City are the Suburbs, called *Kebrabath*, deriving that Name from *Kebber*, which signifies *Infidels*. I much question whether they may be number'd among the *Persians*, having scarce any thing common with them, but the Language; even their Beards which are very big, and their Habit being a Coat or Cassock coming down half way the Leg, open only at the Neck and Shoulders, shewing a manifest difference among them. Neither do their Women cover their Faces, and appear abroad in the streets, and yet are accounted no less chast than the *Persian* Women, who are not allow'd so to do.

The Religion of the Kebbers. All the Account I could get of these *Kebbers* was, that they are *Pagans*, having neither Circumcision nor Baptism, neither Priests nor Churches, or any Books relating to Devotion or Morality among them. Some affirm, that they adore the Fire, in imitation of the ancient *Persians*, but that must be look'd upon as an Error. Some glimpses they seem to have of the Immortality of the Soul, and of Hell and the *Elysian* Fields: For when any one among them happens to die, they let a Cock out of the House of the Deceased; if he is taken by a Fox, they conclude that his Soul is saved. They have also another Experiment, which they look upon as more assured; they put the best Cloaths the Deceased left, upon him, with golden Chains and Jewels about his Neck, and Rings upon his Fingers: This done, they set him upright against the Church-yard Wall, putting a Fork under his Chin to uphold him. If the Crows, or any such like Birds pick out his right Eye, they don't in the least doubt his Salvation, they bury him with a great deal of Ceremony, and lay the Corps very decently in the Grave. But if the said Birds light of the left Eye, they look upon it as an infallible Sign of his Damnation, and cast him headlong into the Grave.

There are near 1460 Villages round about *Ispahan*, the Inhabitants of which live, for the most part, upon silk and woollen Manufacturies. The Fields about this City are very low, without which the Country thereabouts would scarce be habitable, by reason of the excessive Heats; besides which, it affords them this Convenience, that they can make the River *Senderut* overflow them, as soon as the Heat of the Summer has melted the Snow in the Neighbouring Mountains. *Joh. de Persia* says, that this River leaves a Slime behind it, which infects the Air; but erroneously, the Air of *Ispahan* being as healthy as any in all *Persia*, except some few Provinces near the *Caspian Sea*. The Heats its true are excessive here in *June* and *July*; but their vaulted Apartments, and Halls and Galleries, with Windows on all sides, which afford a free passage to the Breezes of the Air, are no small allay to the same; as in the Winter, their Stoves easily defend 'em against the Cold, it seldom freezing so hard here, as that the Ice exceeds the thickness of a Man's Finger, which certainly thaws again in the day-time. Notwithstanding which, I have seen Pieces of Ice of two Foot thick in their Ice-Vaults. When they are to make this, they pitch upon a cool Place facing the North, pav'd with Free-stone or Marble, but uneven, and with an easie Descent. Upon this they pour Water, which as soon as they find congealed, they pour on more, and so continue it all night; in the day-time they cover it, to keep the Sun out, and repeat the same 3 or 4 nights successively, till they have Ice enough, which they afterwards break in pieces, and lay up in their Snow-Vaults; which are so frequent at *Ispahan*, that for 2 or 3 *Kasbeki's* you may have as much Ice as you want for the Summer. 1637.

The Situation of Persia. The Situation of *Persia*, betwixt the 25th and 37th of North Lat. shews it to be under the temperate Zone. It is divided in the middle by Mount *Taurus*, (as *Italy* is by the *Apennine*) which sends forth its Branches into many other Provinces, where they change their Names. Those Provinces where this Mountain lies betwixt them and the N. are excessive hot, whereas those who have it betwixt them and the S. enjoy a much more moderate Air: Which is the reason the Kings of *Persia* used to change their Habitations, according to the different Seasons. *Ecbatane* (now call'd *Tabris*) which has the Mountain betwixt it and the S. W. being always their Summer-residence; as they pass'd the Winter at *Susa* (which has given the Name of *Susistan* to its Province) where the Mountains not only defended them against the North-winds; but also, by the refraction of the Sun-beams upon the Mountains, render'd it so pleasant, that it deserved the Name of *Susa*, *i.e.* a *Lily*. In the *Spring* and *Autumn*, they commonly resided either at *Persepolis* or *Babylon*. The Modern Kings have in this Point not quite left the Footsteps of their Ancestors; for *Schach-Abas* used in the Winter to reside at *Ferahath*, in the Province of *Mesenderan*; and *Schach-Sefi* retires sometimes to *Tabris*, and sometimes to *Ardebil* or *Casvin*. But *Ispahan* is beyond all dispute the most commodiously situated for both Seasons, inasmuch as being seated in a great Plain, at an equal distance, not exceeding 3 Lgs from the Mountains; these send forth continual Breezes from all sides towards the City, which by passing thro' the Rooms cool the Air, without Intermission. We were very sensible of the difference of these Northern Winds, and the South-blasts in our Travels; the first of which, especially in the Night-time, sometimes quite benumb'd our Limbs, as the latter were often ready to choak us.

Distempers. As from hence it is evident, that the Provinces of *Persia* are not all equally healthful, so some are more subject to certain Epidemical Distempers than others. The Provinces of *Schirwan* and *Kilan* are much subject to Fevers, whereas the Goodness of the Air at *Tabris* is such, that scarce any such thing is to be heard of there; nay, that Air is look'd upon as a Sovereign Remedy against them. The Bloody Flux, and the Plague are not so often heard of here, as in some Parts of *Europe*; but the *French* Pox, which they call *Schemet Kaschi*, or the *Disease of Kaschan*, is very rife in that Place. For tho' the Situation of *Kaschan* be very excellent, yet the want of fresh Water makes the Air very unwholesome. As the Dropsie is a common Distemper in the Province of *Kilan*, so the Stone is a Disease rarely known, and the Gout not at all, throughout all *Persia*. They are generally long-lived, it being no extraordinary thing here to see People arrive to 100 years of Age. I my self knew a Judge in the Province of *Serab*, who was 130 years old, and the Father of *Hacwerdy*, who went along with us into *Germany*, was above 120.

The Soil of Persia. The Soil of *Persia*, except the Province of *Kilan*, is sandy and barren, especially in the Plains full of red Stones, Thistles, and Reeds; the last of which supply the defect of Wood in many Places. However the Valleys betwixt the Mountains are tolerably fertile, which is the reason that most of their Villages are there, the Inhabitants of which are very industrious in conveying the Waters, which arise in the Mountains by Chanels or Trenches of 4 Foot broad, into their Gardens and Till'd Grounds; and the better to furnish 'em with moisture their Fields require, (which are about 15 or 20 Fath. square) they make a kind of a Damm or Bank of a Foot high at one end, thro' which they let the Water in, out of their Channels over-night, and let it out again the next morning; when the almost perpendicular Sun-beams working upon the Moisture, render the Grounds fit for the Production of all sorts of Fruits in abundance. They make use of very large Ploughs, especially in *Irwan* and *Armenia*, where the Soil being

1637. being ſtrong, they are of ſo large a ſize, that 24 Buffalers are ſcarce ſtrong enough to draw them, and ſix Drivers are allow'd for each Plough, their Furrows being 1 Foot deep and 2 broad. Rice, Wheat, and Barley are the Grains they commonly deal in, Rye being not valued here, as Oats is not ſo much as known among them. They alſo ſow Millet, Lentils, Peaſe, and Beans, *Ricinus*, or *Palma Chriſti*, call'd by them *Kuntzut*, is alſo in great Requeſt with the *Perſians*; they ſqueeze the Oil, which is very pleaſunt, out of the Grain, and eat it. The Peaſants make a kind of Deſert of the Grain, Ciches and Currens.

Cotton. Cotton may be ſaid to be the ſtaple Commodity of *Perſia*; they call it *Pambeh*, and you may ſee whole Fields covered with it in the Provinces of *Irwan*, *Nachtzuan*, and *Kerabath*, in *Armenia*, *Adirbeitzan*, and in *Choraſan*. It is a Shrub 2 or 3 Foot high, having Leaves not unlike thoſe of the Vines, but ſomewhat leſs. At the end of its Branches ſhoots forth a Bud, of the bigneſs of a Nut, which, as ſoon as it ripens, opens in ſeveral Places, and brings forth the Cotton thro' the Clefts of the Rind. Beſides what is conſumed in Manufacturies of Callico's in the Country, vaſt Quantities of it are exported unwrought. There grows alſo in the Province of *Kilan* a kind of Flax, which makes very good Cloth. Sheep, Goats, Buffalers, Oxen and Cows, Camels, Horſes, Mules and Aſſes. Their ordinary Food for Horſes, is Barley mix'd with Chaff, or Rice, or Rice mix'd with ſhredded Straw. The *Perſians* never Water their Horſes till an hour and a half after their Meat, whereas the *Turks* water theirs immediately after. There is alſo a certain Herb, call'd *Genſcheht*, by the *Perſians*, this they ſow as we do our Clover, once in 7 Years: It ſprouts up near 3 Foot high with blue Flowers. They cut it twice a-year, and Perſons of Quality feed their Horſes with it; for *Perſia* produces very little common Hay, except in the Province of *Irwan*, and in *Armenia*; and in ſome Parts the Graſs is ſo plentiful, all the Year round, that they need not make any Hay. Above all they abound moſt in Sheep, this being their ordinary Food, tho' the Taſte is ſomewhat unpleaſing to thoſe that are not accuſtomed to it. They are a little bigger than they are generally in *Europe*, with ſhort and flat Noſes, and their Ears hanging down like Spaniels. Their Tails, which weigh 10, 20, nay, ſometimes 30 Pound, are very fat, the reſt of the Body being lean; the Fat hangs on them in great Gobbets, the Joints being for the reſt the ſame with our Sheep. In *Kurdiſtan*, they have a way of thruſting up theſe Tails into ſmall Carts with two Wheels, which they faſten with a little ſtick to their Necks. The *Tartarian* Sheep near the *Caſpian Sea*, are in all reſpects like thoſe of *Perſia*, as thoſe of the *Usbeque* and *Buchar Tartars*, are very different from them, being of a greyiſh Colour, with a long Wool curl'd at the Extremities, and turn'd into ſmall white Knots, like Pearls, which makes their Fleece the moſt eſteem'd of any Fur in *Perſia*, next to Sables, and they are very nicely kept by their Maſters, being always fed in the Shade; and if they are forced to oppoſe them to the rough Air, they cover them with Cloths, as we do our Horſes; their Tails are no bigger than thoſe of our Sheep.

Goats. The *Perſians* alſo feed numerous Flocks of Goats, the Fleſh of which they eat, make Candles of the Suet, and of their Skins make what we call *Spaniſh* Leather, which is brought by the way of *Muſcovy* into *Europe*. They Buffers. abound likewiſe in Bufflers, eſpecially near the *Caſpian Sea*, where ſome Peaſants maintain 500 or 600 of them. Both their Milk and Butter made thereof, are ſuppoſed to be very cooling. Neither do they want Oxen; but thoſe of the Province of *Kilan* have a bunch of Fat upon the Neck, like thoſe of the *Indies*. I have been credibly informed, that the Cows will not ſuffer themſelves to be milk'd without a Calf by their ſides; for which reaſon, if a Calf happens to die (for they never kill them to eat) they are forced to fill the Skin with Straw, and whilſt the Cow is licking, by caſting a little Salt upon it they make ſhift to milk her.

The *Perſians* have ſo great an Averſion to Swines-fleſh, that even the Chriſtians living among them breed very few Hogs, except in thoſe Parts where they live ſeparate from them; for which they alledge a certain Story out of the *Alchoran*, which intimates that out of the Elephant's and Neats Dung, that was gathered in *Noah*'s Ark, a Swine was engender'd, which with its Snout removed the ſaid Dung, *&c.* the reſt being too frivolous to be inſerted here. 1637.

Camels. Of Camels they have divers kinds; ſome have two Bunches, and theſe are call'd *Bughur*, and thoſe with one Bunch, *Schutur*. Theſe laſt are again ſubdivided into four ſorts: The firſt in rank they call *Ner*, *i. e.* the Male, being engender'd of a Dromedary, or Camel, with two Bunches, and a Female with one Bunch, call'd *Maje*; theſe are not to be covered by any other kind, as being the moſt eſteem'd of all, and ſometimes ſold at the rate of 100 Crowns a-piece; for they are ſcarce to be tired, and will carry 900 or 1000 weight. When they are over-heated, they foam at the Mouth, and are ſo malicious, that they will ſcarce feed, but bite, ſo that to prevent their doing of Miſchief, they muzzle them. It is obſervable that they ſoon degenerate, for thoſe Camels which come from them are very heavy, and ſeldom ſold for above 30 or 40 Crowns. The third ſort they call *Lohk*, being inferiour to the *Bughurs*, nor foam they at the Mouth like the *Ners*. When they go to rut, they put out under the Teeth a red Bladder, which they draw in with their Breath, lift up their Heads, and ſnort often. They are commonly ſold for 60 Crowns a-piece, being not near ſo ſtrong as the reſt. When the *Perſians* will expreſs a brave Fellow, they call him a *Ner*; but a Sluggard or Coward, they call *Lohk*. The 4th ſort the *Perſians* call *Schuturi baad* and the *Turks*, *Jeldoveſi*, *i. e.* Wind-Camels. They don't approach to the others in Bulk, but are more active and nimble, becauſe they will trot and gallop like Horſes, whereas the others never go beyond a Foot-pace. The King and great Lords keep many Teams of them, each Team conſiſting of 7 coupled together. Theſe ſerve for various Uſes; as to ride the Poſt, to meet Ambaſſadors, when they are ſumptuouſly accoutred with embroider'd Cloaths and Pack-Saddles, and Silver-Bells about their Necks. In the Wars they are extremely ſerviceable for the carrying of the Baggage; for they trot with that violence, that the Boy who rides upon the firſt Camel to guide the reſt, is forced to be tied round the Waſte to the Pummel. When they ſet a galloping, they ſtretch out their Necks forward with open Noſtrils, and run to that degree, that nothing is able to ſtop them. They are alſo very convenient for travelling, both for the Carriage of the Perſons and Baggage, one Man being able to guide a whole Team or more. As the Camels do travel at a conſtant rate, their Stages are without much difficulty appointed either in certain Villages, or *Caravanſera's*, built for the Accommodation of the *Caravans*. Some of theſe *Caravanſera's* Caravans have Hoſts, who provide you with Provender, but in the moſt you meet with nothing but bare Walls.

One good Quality belonging to the Camels is, that they are eaſily kept, feeding commonly upon Thiſtles and Nettles, tho' ſometimes they thruſt down their Throats a Ball or Paſte made of Chaff of Barley, weighing about 3 Pound; ſometimes they mixt ſome Cotton-ſeed with it, which is as big as a Pea. They can alſo live 3 days without Water, a thing very convenient whilſt they are travelling thro' the Deſarts, where there is generally great Scarcity of Water. When they are to receive their Burthens, the Guides only touch the Knees of their fore-legs; and ſo having laid themſelves upon their Bellies, they let any Body handle them as they pleaſe. A Man's Voice, and the ſound of an Inſtrument, enlivens them more than all the beating in the World; for which reaſon the *Perſians* tie ſmall Bells about their Knees, and one large one about their Necks: To the ſame purpoſe the *Arabians* make uſe of *Timbrels*. The greateſt Enemy to the Camels is a kind of Snail, call'd *Mohere*, which lying betwixt the Thiſtles, ſtings their Noſtrils, and proves mortal.

The Camels are ſo mindful of an Injury done them, that the *Camels Anger* is turn'd into a Proverb among the *Perſians*. Of this we had a very remarkable Inſtance related to us: A Camel, which was forgot to be muzzled, bit a Servant in the Arm; whereupon the Servant gave him many blows with a Cudgel about the Neck, being that Part which is the tendereſt about him. But not long after, being got looſe one night, he went among the Servants, which by reaſon of the cold Weather, lay near the Camels, ſingled out the Perſon that had beaten him, and trod him under feet, till he cruſh'd all his Bones to pieces; which ſufficiently contradicts what *Pliny* ſays of them, to wit, that they have no Gall; as Experience does the other Aſſertion of the ſame Author, concerning the Enmity betwixt

1637. the Camels and Horses, nothing being more obvious in *Persia*, than to see Camels, Horses, and Asses stand quietly together in the same Stable.

Their Horses. The *Persians* abound in most excellent Horses, which are very handsome about the Head, Neck, Ears, Crupper, and Legs. *Media* was formerly so famous for its Horses, that they were always preserved for the King's proper Use; nay, they are of a very fine Breed to this day, especially about *Ardebil*; nevertheless they are not to be compared to the Modern *Arabian* Horses, which are in such Esteem, even in *Persia* it self, that the choicest Horses belonging to the King's Stables, are of the *Arabian* Breed, tho' he has very fine breeding Places in *Erscheck*, *Mokan* (where are the best Meadows in *Persia*) *Schirwan*, and many other Provinces. Next to the *Arabian* Horses, the *Turkish* are most esteem'd. As the Strength of the *Persians* consists in their Cavalry, so they take particular care of their Horses; yet they don't litter them with Straw, but Horse-dung dry'd in the Sun, whereof they make Beds a Foot deep, upon which the Horses lie as soft as upon a Quilt; besides that this Litter serves a long time, for they only dry it again in the Sun, and it is as good as before; they cover them with their Cloaths lined with some coarse Cloth. Besides the Halters, they tie one of their Hind-feet to a Stake. The chief Manage they fasten on their Horses is to accustom them to start nimbly at a Race; they call their Race-Horses *Bad-pay*, *i. e. Wind-heel'd*. They have a Custom to colour the Tails, Main, and sometimes also the Legs of their White and Light-grey Horses, with Red or Orange, in which they are follow'd by the *Poles* and *Tartars*.

Their greatest Ostentation lies in the Equipages of their Horses, the Harnesses being sometimes adorn'd with Plates of Gold and Silver, and the Reins, Saddles, and Covering-cloths with Embroideries.

Mules. Besides their Horses, Mules are also in great Request among the *Persians*; nay, even with the King and Persons of Quality themselves, who commonly ride upon them; which is the reason they are as dear as Horses, an indifferent Mule being often sold for 100 Crowns. I was told they have some white Mules, but never saw any.

Asses. Asses are in *Persia* in greater abundance, than in any other part of the East; especially at *Ispahan*, where no Carts are allow'd, tho' they seem to be more slothful here than in other Countries.

The constant fair Weather, and the excessive Heat of the Summer, must needs produce most excellent Fruits in *Persia*. Those used in the Kitchin, are not only produced in greater abundance, but also much better here than in *Europe*: The Onions in the Province of *Tarum* weigh often 3 Pound a-piece; and their Cabbages are of an excellent Taste. As they take great care in cultivating their Melons, so they have very great Quantities of them, and that very excellent ones. They have two sorts; those they call *Kermeck*, are ripe in *June*, and eaten in the Summer, being very yellow, and extremely sweet: The other sort they call *Charbusei pasi*, which don't come to Perfection till *Autumn*, and will keep through the whole Winter; (they are very big, and weigh 30, 40, and sometimes 50 Pound weight) and that so nicely, that to distinguish them from the new ones, you must press the Rind with your Finger, to try whether it will give way. They have also a Method of keeping Grapes, by wrapping them in green Reeds, and hanging them up to the Roof. A third sort of Melons, call'd *Scammame*, is no bigger than an Orange, and not good to eat; but as they have a pleasant Scent, the *Persians* carry them commonly in their hands. They have also a kind of Water-Melons, call'd *Hinduane*, because they were first transplanted hither from the *Indies*; they are very big, but have a small Stalk: We had occasion to say something of them before in the Description of the City of *Astracan*.

Fruits of Persia.

Citruls. Among divers sorts of Citruls, or Citrul-Cucumbers, they have one call'd *Kabach*, known among the Herbalists under the Name of *Cucurbita Lagenaria*, being of the bigness of a large Man's head, and have a long neck; they must be eaten green before they ripen, for then the Rind dries and hardens, and is as tough as Leather, and the Meat consumed. The *Persians* make Flaggons, and Drinking Vessels of them.

Of Padintzar. There is a certain Fruit in *Persia*, call'd *Padintzar*, not known in *Europe*, being not unlike little Melons, or rather Cucumbers. They are green, and inclining to a Violet Colour towards the Stalk, having an oblong, and pretty large Seed. They are somewhat bitter when eaten raw; but boil'd, or fry'd with Butter, make a most delicious Dish. 1637.

Their Vines. As the Climate of *Persia* seems to be made for the Product of good Wine, so there is scarce a Province in the whole Kingdom, but what affords very fine Grapes: But as the Use of Wine is forbidden by the *Mahometan* Law, they commit the cultivating of the Vines to the *Armenians*; who, as we told you before, are however no great Artists at making, and preserving of Wine, which they keep in earthen Pitchers containing about half a Barrel: The *Persians* are however permitted to make a kind of Syrup of sweet Wine, by boiling it to a sixth Part, till it be reduced to the consistency of an Oil. This they call *Duschab*; and when *Dusch.* they use it, they mix it with Water, and a little Vinegar, and so make a very pleasant Drink of it. In the Northern Provinces, where the Wine is not so good, they dissolve it in the Country-wine, which by this means acquires the Taste and Colour of Sack. They sometimes boil this (*Duschab*) to the consistency of a Paste, for the more convenient Carriage, and afterwards dissolve it in Water, as before.

Of this *Duschab* they make a certain Conserve, call'd *Helwa*, by mixing it with beaten Almonds, some *Helwa* Flour, and peal'd Filberds: After they have put this Mixture into a long and narrow Bag, they make it into a Paste by the means of a Press, till it be so hard that you can't cut it without a Hatchet. They make also another kind of Conserve of the same *Duschab*, not *Zutzuch.* unlike a Pudding, this they call *Zutzuch*. Two sorts of Grapes which grow in *Persia*, are remarkable before the rest. The best, and most luscious, grow at *Schiras* and *Tabris*, from whence they are call'd *Tabersch*. It is a long Grape, without a Stone, and will keep all the Winter. The other sort, call'd *Keseki*, grow in *Tarum*, at *Tabris*, and at *Ordebath*; they are yellowish, and exceeding sweet, for which reason they occasion the Bloody Flux, if used immoderately. What we call Currants, are there yellow, and bigger than those of *Zante*: They have, besides these, several other sorts not known in *Europe*; as, for instance, the Grape call'd *Hallague*, being an Inch and an half thick, the Meat hard, without Juice or Stones; they will keep a whole Year. The *Enkuri Aly dereti* is a Grape, the Bunch whereof is above a Foot long, each Grape being of the bigness of a Damascen, of a dark red Colour, very juicy and sweet, but will not keep: They grow only in the Province of *Irwan*, between *Ordebath* and *Choddaseren*.

Fruit-trees. There is scarce any Fruit-tree in *Europe*, but what is to be found in *Persia*, tho' they have many not known in these Parts: As, for instance, near the City of *Ordebath*, grows a Pear about the bigness and colour of a Citron; they have a very sweet scent, are full of juice, but not extraordinary well tasted; they call them *Melletze*. Nature, without the least Addition of Art, furnishes the *Persians* with Pomegranate-trees, Almond-trees, and Fig-trees, in such vast quantities, that you see whole Forests of them in the Province of *Kilan*. Their wild Pomegranates are somewhat sourish, out of which they take the Seed, steep it in Water, and use it in their Sauces, unto which it gives a pleasing Colour and savoury Taste. The Juice of these Pomegranates boil'd, imparts also its Colour and pleasing Taste to the Rice they always make use of at their Feasts; for the *Persians* do delight extremely in sharp Sauces, which is the reason that the Scurvy is a rare Distemper among them. I will not pretend to enlarge my self here upon those Fruits we have in *Europe*, but will only add, that they differ in Goodness, according to the different Provinces which produce them. Thus *Jesche* and *Caswin* afford the best Pomegranates, but the Province of *Karabag* the biggest. Thus as *Ispahan* is celebrated for its Melons, so *Caswin* for Peaches, *Tabris* for its Apricocks, as the Provinces of *Kilan* and *Lahetzan* are for Silk.

Silk. The Mulberry-Tree, unto which the *Persians* owe their vast Products of Silks, ought not to be forgot among the other Fruit-trees: They have black and white Mulberry-trees, which the *Persians* plant close together, rather like Shrubs than Trees, not suffering them to come to the heighth of 6 Foot. As soon as the Mulberry Trees begin to bring forth their Leaves, the *Persians* carry the Spawn or Seed of the Silk-worms in a small Bag under their Arm-pits, till in 7 or 8 days they are hatch'd: Then they put them in wooden Dishes upon the Mulberry-leaves, which must be changed once a-day at least, and great Care is to be taken

they

1637. they get no wet. At the end of five days they sleep three, which time being expired, they dispose them into Rooms fitted for that purpose, Laths being nailed along the Beams to lay the Mulberry Branches with the leaves on for the Worms to feed upon; the Branches they change once or twice, and at last three times a day, according as the Worms encrease in bigness, and cover all the openings of the Room with Nets for fear of the Birds. Before they begin to spin, they sleep eight days, then great care must be taken that no Woman that has her Monthly Distemper come near them: They commonly begin to spin seven weeks after they are hatch'd, which is known by their leaving off eating, and by the Silk Threads that come out of their Mouths. They work twelve days at their Cod, which being expired, they take the Cods, and having preserved the biggest for Seed, throw the rest into a Kettle of boyling water, into which they put ever and anon a Besom made for that purpose, unto this the Silk sticks, which they wind up and cast the rest away. The Cods preserved for Seed, produce in 15 days after a kind of Butterfly, and these they keep for Seed, which must be kept in a moderate heat till the next Spring.

Nefte. Among the Fruits of *Persia* the *Nefte* deserves also its place, which the Sources of *Baku* afford in great plenty; as likewise the Salt wherewith the Salters of *Nachtsuan*, *Kulb*, *Vrum*, *Kemre*, *Hemedan*, *Bisethun*, *Suldus*, and *Kulissim* furnish whole *Persia*.

Salt.

Iron. At *Muasula* and *Keintze* are certain Iron Works, but the pureness of the first, afford the best, being so tractable, that it yields to the Hammer without heating. Some Gold and Silver Mines have been discovered between *Serab* and *Miane*; but by reason of the scarcity of Wood thereabouts, they could not be cultivated.

Between *Pirmaras* and *Schamachie* is a Mountain of *Lapis Specularis*, which in a Sun-shiny day, looks at a distance like a vast lump of Diamonds.

The Stature of the Persians. The *Persians* are but low of Stature, and not bulky; yet strong Limb'd, their Complection inclining to an Olive Colour, with black Hair, and Hawk Nos'd. The Men are shaved at least once a week. Now whereas the ancient *Persians* let their Hair grow, in which they are imitated at present by the *Seid*, who call themselves the Kindred of *Mahomet*. They also wear no Beards, but only Mustacho's, there being only a Religious Sect called *Pybr*, who wear their Hair both upon their Chins and Cheeks. Some there are who never cut their Mustacho's, which they say, they do in imitation of *Haly*, who being got into Paradise, and tasted of the Heavenly Liquor, some drops of it remain'd in his Mustacho's, which was the reason he would never cut them afterwards. Black Hair is that the *Persians* most of all delight in: They can dispense with fair Hair, but abominate red Hair'd People. If their Hair be not sufficently black, they make use of a mixture of the Herb and Seed called *Wesme*, of the Rinds of Pomgranates, Soap and Arsenick, which they boil in Water, and with it rub their Hair, and afterwards wash it with a Lee made of unslack'd Lime. They use also the Water that issues from the Vines in the Spring time for the same purpose. They have one very odd Custom, which is, that they paint their Hands, but without fail their Nails, with a certain Orange colour, resembling that of our Tanners: Some also do the same thing to their Face. This is so general a Custom, and so necessary an Ornament to Waiting-women here, that this paint is presented to all the Guests that are present at a Wedding-Dinner. Such as die Maids, are painted with it all over their Bodies, because they look upon it as a peculiar piece of cleanness. This Colour is made of a certain Herb called *Chinne*, which grows in the Province of *Erak*, its Leaves being like that of Myrtle: This after it is dry'd and beaten as small as Flour, they mix with the Juice of a wild Pomgranate, or of a Cittern, and sometimes only with fair Water: This Colour sticks so close to their Hands, that though they wash them never so often, it will not come off in fifteen days; especially if they rub their Hands with Wallnut-tree Leaves after it, which they often do when they would have the Colour appear more dark than before.

They paint their hands and nails.

Their Habit. Their Garments hang loose like those of the Women, and have something of Effeminacy in their wadling Gate. Those large Coats without question, were deriv'd from their manner of sitting cros leg'd upon the ground, like our Taylors, which makes them weak in the Hamms. *Diodorus Siculus* says that *Semiramis* introduced these Garments. Their Turbants which they call *Mendils*, are made either of fine Callicoes, or Silk Stuffs; which being of several colours, and about eight or nine yards long, come many times about their Heads, the Folds being stitcht together only, sometimes with Gold Thread. Their Princes wear them white, as they do all their Garments. Some have a Tassel hanging from their Turbant down their Backs a quarter of an Ell long. Those who derive their Pedigree from *Mahomet*, use green Silk Turbants. Some *Persians*, and those of the first Quality wear Caps, the inside and outside of which is of the Fur of the *Buchur* Sheep, which is soft as any Silk; they are sold at ten and twelve Crowns a piece. And as these are worn both in Summer and Winter, so it makes their Heads so tender, that they dare not expose them to the least cold, which is the reason that they never uncover themselves, neither in their Mosques, nor in saluting their Friends; nay, with even the King himself, but perform it by a low inclination of the Head, and putting their hand to their Breast. What *Herodotus* relates of the difference betwixt the Skulls of the *Persians* and *Egyptians*, *viz.* that after a Battle fought betwixt them, the Skulls of the first were found so thin, that a Man with ease might thrust his Finger into them, whereas those of the last were so hard, that they could not be broken with Stones, is founded upon the same reason, which agrees with what he himself alledges; for, says he, the *Egyptians* being from their Infancy accustomed to expose their bare Heads to the Sun, were grown hard; whereas the *Persians*, who had always their Heads covered, were tender in their Skulls. *Lib. 3.*

Kisilbasches. There are many among the *Persians* that use red Caps, which makes the *Turks* calls them in derision, *Kisilbaschs*, i. e. *Red Heads*. The several Authors that have writ of *Persia* represent them by different Names. The Origin of the *Kisilbaschs*, is thus: When the *Persians*, by the advice of *Schich Sefi* (the Author of the *Persian* Sect) broke Communion with the *Turks*, held, That the Twelve Successors of *Haly* (of whom more hereafter) were to be put among the number of Saints; and that their Religious Men wore red Caps, with twelve Plaits, in shape not unlike the Bottles used in *Languedoc* and *Provence*, which have flat Bodies and narrow Necks. These Religious Differences having occasioned a bloody War betwixt those two Nations, in which the *Turks* having the better, treated the *Persians*, but especially the Ecclesiasticks, very cruelly, which made them lay aside their Red Caps. At last *Schach Ismael* I. being forced back as far as the Province of *Kilan*, and fearing that in a little time he might be bereaved of the whole Kingdom, resolved to try his utmost, for which purpose he sent some of his Trusty Persons through the Country, to represent to the People the imminent danger they were exposed to, unless they would hazard all for their Lives and Liberty, promising such as would serve him in the Accomplishment of so great a Work, a general Exemption for themselves and their Posterity: This had the desired effect; for having by this means got together an Army of 300000 Men, and having retaken *Ardebil*, and consequently the Holy Sepulchre of *Schich Sefi*, he confirmed to them the beforesaid Privileges, ordering them as a Mark of their rightful Claim, to wear those Red Caps with 12 Plaits, in remembrance of their 12 Saints; which is the reason that the *Persians* are well pleased to be called *Kisilbaschs*, though none but the Posterity of *Haly*, and of those exempted Persons wear those Red Caps, the former for distinction sake, having them covered with Linen Cloth; the others without any thing at all. Their Posterity do still enjoy the benefit of these Exemptions, and out of them are chosen the Guards of the King's Body, as the *Switzers* are in many Courts of *Europe*. Their Habit is a kind of a *Casaque* without Sleeves, of printed Calicoe or Silk of divers Colours, reaching down to the middle Leg; those of Calicoe are commonly quilted: They draw the sides of them together under the left Arm, and about their Middle they wear a Scarf of two Ells long, wrapt several times about their Bodies. The better sort have another *Indian* Scarf over this, which is much more esteemed than the *Persian* Silks, both for the colour and fineness of the Silk. In this Scarf the *Persians* wear their Ponyards, Knives, Hankerchiefs, Money, and some an Ink-horn, Pen-

knife,

1637. knife, Letters, and such like; they serving them instead of Pockets, as the *Muscovites* do with their Boots. The King and Persons of Quality wear over this Coat a kind of Rocket without Skirts, which comes no farther than to the Waste, bordered with Sables; over this when they go abroad, (whether on Foot or Horse-back) they cast a loose Silk Garment of several colours, embroidered with Gold Flowers; this they call *Jakub Chani*, from a King of that Name, who first introduced them into *Persia*. Their Breeches which are of Calicoe, are made like Drawers, and they wear them under their Shirts, which are of red strip'd Calicoe, quite down to their Feet. Their Stockings are of Woollen-Cloath, very ill shap'd, without the least proportion to the Legs, they are generally green, out of an aversion to the *Turks*; for *Mahomet* having worn a green Cap, the *Persians* to dishonour the *Turkish* Religion, wear that colour upon their Feet. Their *Kefs* or Shooes, are picked at the Toes, and so low in the Quarters, that they slip them off and on like Slippers; which they do as often as they come into the King's Anti-Chamber, or come into their own, or their Friends Houses. I remember that one day I as was going to the *Chan* of *Schamachie* at Audience time, I saw more Shooes stand in the Anti-Chamber, than would furnish a substantial Shooe-maker's Shop, and an Attendant standing by them, who with a forked Stick, gave every one his own as they went out.

The Womens Apparel.

The Women in general, wear finer Stuffs than the Men, but without any thing about the Waste; their Drawers and Smocks being the same with the Men. They have scarce any Ornaments about their Heads, their Hair hanging down careless about their Shoulders, ty'd in Tresses; the only Ornament they have, is two or three rows of Pearls set over the Forehead, and coming down along the Cheeks, are fastened under the Chin; unto which seems to relate that passage in the *Canticles*, *Their Cheeks are comely with rows of Jewels.* Their Stockings are commonly of red or green Velvet. Maids wear Rings with precious Stones in them, in the right Nostril, as the *Tartarian* Women do, and on their Fingers, and Bracelets of Silver Plates on their Arms. But the Men are by the *Mahometan Law* forbidden to wear any Golden Rings. I remember that when the Ambassador presented a fine Diamond Ring set in Gold to the Chancellor, he had it put into Silver, and afterwards presented it to the King. When the Women are abroad, they always wear a white Veil, which reaching down below the Knees, they open a little to see their way.

Chap. 1.

The neatness of the *Persians.*

The *Persians* are very nice both in their Habitations and Clothes, not suffering the least spot to be seen, so that the richer sort change their Habits as soon as they find the least spot in them, and the Poor have them wash'd once a week, contrary to that the *Muscovites* do, whose Clothes are always greasie; and they don't keep their Bed-Chambers so clean as the *Persians* do their Stables: The *Persians* are both quick and of a sound Judgment; apply themselves to Study, and are great lovers of Poetry. They are rich in their Inventions, and their Fancies strong and lofty: With all this they are free from Vanity, not slighting any Man, but on the contrary obliging, and engaging in Conversation, civil to every body, but especially to strangers. Their Complements savour so much of Submission, that they exceed any thing of that kind, even in *France* it self. If a *Persian* invites a Friend to his House, and makes a proffer of his Service, he does it in these, or like Terms; *Let me beg of you to make my House noble by your Presence; I sacrifice my self to your Commands; I lie prostrate at your feet to serve you; I wish the Apple of my Eye might help to pave your way*, &c. But these must be considered for the greatest part as Complements. For I remember that a *Persian* who was troubled with a pain in his Side, coming to our Physician for advice, told him, that if he cured him, he would give him his Head; and being answered, that at that rate it would be needless to cure his pain; he replied, that it was only by way of speaking.

Their Ingenuity.

And to confess the truth, the *Persians* are not very Religious upon that point, it being their general Opinion, that those who speak their Sentiments at all times, are none of the wisest; which is the reason they never take it amiss, when you tell them they have spoke an untruth; and the word *Gullaneshi*, or Lyar, is accounted no more than a Jest among them. 1637.

True in their Friendship.

They are nevertheless very Religious in observing the nicest Rules of Friendship, which tie they say ought never to be dissolved but by Death; and preserve it before all the other obligations of Consanguity. It is sufficiently known how Friendships and Fraternities are contracted in *Germany* over their Cups; but these generally vanish as soon as the Vapours of the strong Liquor are evaporated. But the *Persians* have quite a different Sentiment of Friendship, it is their Custom to make once a Year an Entertainment for all their Kindred and Friends, and if it happen that at such a time any Persons out of a mutual affection, are desirous to enter into a more strict Friendship, they pitch upon one of the Company, whom they take by the border of his upper Garment, and having told him, that they have chosen him for their *Babba*, or God-father, (which he is obliged to accept of) they go all three to the *Calif*, lie down upon their Bellies, first the God-father, and then the Brethren at the *Calif*'s feet, who gives each of them a stroak with a Wand upon his back; pronouncing at the first stroak *Alla*, at the second *Mahomet*, and at the third *Haly*; this done, they kiss the Wand and the *Calif*'s hand, and thus the Fraternity is established, which is look'd upon among them, as a thing so sacred, that they are of opinion, that tho' most other sins may be pardoned, the violation of this Friendship is irremissible. If two of these Brethren happen to have any difference, a reconciliation is to be made at the next Feast; which is perform'd, thus; He that has been injur'd goes with his Head stooping down, and his Arms hanging carelesly by his Sides, to the other's door who has offended him, where he stands in that posture till the other has intreated him three times successively to come into his House, whence they go together to the Entertainment, were the Reconciliation is consummated.

As the *Persians* are very good natured, and sensible of any Obligation done them, so they scarce ever forget an Injury. They are also brave and good Soldiers, daring in an Enterprize, though never so dangerous.

Their Modesty.

Notwithstanding this, they are very modest and reserv'd in their outward behaviour, which is the reason, that when they make water, they squat down like Women, and if conveniency serves, are sure to wash themselves afterwards; and if possibly they can, will make water near some Brook, or in a Vessel fill'd with water, whence the *Turks* give them the nick-name of *Cher Scahei*, *i. e. Aly's Asses*, because Asses always piss as they are passing through water; as on the other hand the *Persians* bestow the Title of *Seksumi* on the *Turks*, because they piss against the Wall like Dogs.

It is observable, that most *Persians* of Note among the *Turks*, as well as the *Persians* in general, when they ease Nature, ever turn their Backs or Faces to the South, because they look that way which they say their Prayers.

Are addicted to Venery.

However this enforc'd Modesty of theirs does not hinder them from being much addicted to Venery; which is evident not only from the many Wives and Concubines they maintain, but especially from their publick Brothel-houses, which are allow'd in all great Cities of *Persia*, except *Ardebil*, and pay a certain annual Tribute. And it is upon this score, that, as we told you before, at their Feasts they also entertain their Guests with Women. The King himself entertains a great number of Prostitutes at his own Charge, who divert him with dancing, and making all manner of Postures; these follow him whenever he makes a Progress either into the Country or to the Army, after the example of the ancient *Persian Kings*.

To Sodomy.

Sodomy is look'd upon in *Persia* as a Vice scarce deserving Punishment, of which we had an instance given us in *Schach Sefi* himself, who being much addicted to this Vice, caused 1634. a young Lad, who had killed his Master as he was forcing him to commit this detestable Sin, to be torn in pieces by two *English* Mastiffs.

Polygamy.

As the *Mahometan* Religion puts its chief Beatitude in carnal Enjoyments, so Polygamy is not only permitted, but also encouraged among the *Persians*, whence it is that to provoke Lust, they much delight in the obscene postures of their Men and Women-

1637. Women-dancers, and to revive their Appetites, uſe the leaves and ſeed of Hemp; the firſt they gather before they come to ſeed, and after they have dry'd them in the ſhade, beat them to Power, which they make up with Honey in the nature of a *Bolus* of the bigneſs of a Pidgeons Egg, and take two or three of them at a time. The Seed they uſe fry'd, with a little Salt put to it. The *Perſians* after Copulation with a Woman, never fail either to bath, or waſh themſelves all over with cold water, and thus think themſelves ſufficiently cleanſed.

Their ordinary houſe-keeping.

The ordinary Charges of Houſe-keeping in *Perſia*, are not very great; their Cloathing, which is for the moſt part of Calicoe being very cheap, and their chief Proviſion of the Family nothing but Rice; and as to their Furniture, except a few Tapiſtry on the Floor of their Lodging-rooms, it is but mean. Fleſh is alſo generally cheap all over *Perſia*, except in ſome of the moſt populous Cities, where they have their Proviſions out of the remote Provinces: This defect is in theſe parts in ſome meaſure ſupply'd by their Gardens, which furniſh them with all ſorts of Fruits and Herbs in abundance; and as for their Drink, the common People make uſe of no other but what a Neighbouring Rivulet furniſhes them withal. They are however extreamly neat in their Houſes, ſuffer no Dogs to come into their Lodging-rooms, and at Meals have certain earthen Pots, not unlike our Chamber-Pots, which they put betwixt every two Perſons to ſpit in and caſt the Bones; the uſe of Trenchers being not common among them.

Their Kitchin-furniture.

The ordinary ſort of People dreſs their Meat by their Stoves. Their Kitchin-Furniture conſiſts in Braſs-Pots and Kettles, or of Copper well Tin'd; ſome alſo make uſe of Earthen Pots, which are all faſtened to the Hearth. In thoſe Provinces where Fuel is ſcarce, they burn Cow and Camels Dung dry'd in the Sun. Beſides their Diſhes of Porcelain, they are generally of Copper, but very finely Tin'd over: The Country People are contented with common Earthen Ware; and are generally ſparing enough in their Diet, as are almoſt all the *Perſians*, they ſeldom eating Fleſh above once a day, and being for the reſt contented with Butter, Cheeſe, and Fruits.

Their common Food.

Rice ſoak'd in Water is the moſt ordinary livelihood of the *Perſians*; this they often colour with the Juice of Pomgranates, of Cherries, or Saffron, and ſerve it up under boyl'd Mutton, Capons, broil'd Fiſh, *&c.* of divers Colours in one Diſh. Sorrel, Spinage, and Cabbages white and green are very common among them, but are not very fond of red ones. Small Birds, and all ſorts of Fowl they have in abundance, except Turkeys, which are ſold at a dear rate here; Partridges and Pheaſants are dog-cheap in ſome Provinces. The Rice is uſed in *Perſia* inſtead of Bread, yet do they make ſome of Wheat alſo. Wheat they call *Komatſh*, is three inches thick, and a foot and a half long; the *Reaſekeſſche* are Cakes of half an ell long; the *Sengek* are commonly bak'd over their Ovens, and are uneven by reaſon of the impreſſion made in them by the Pebbles that cover the Oven. The *Jaucha's* are a kind of Cakes as thin as Parchment, half an ell ſquare; theſe are uſed inſtead of Napkins to wipe their Fingers on wherewith they have taken up the Rice, and pull'd the Meat in pieces; for the uſe of Knives is a thing unknown in *Perſia*; at the end of the Meal they tear them to bits and eat them. Their Spoons, not excepting the Kings, are of Wood of an oval figure, the handle very thin, but a foot and a half long.

Their Drink.

Though Wine be ſold in many Provinces of *Perſia* at the rate of three pence a quart, yet the uſe of it being forbidden the *Mahometans*, Water mixt with ſome *Duſchab* and a little Vinegar, is their ordinary Drink; yet at their Feaſts they drink Wine very plentifully; and ſome that are not over ſcrupulous, ſuch as the poor Whores, and other Debauchees ſeldom refuſe it, thinking it ſufficient that they are not concerned in the making of Wine. Immediately after Meat, every one waſhes his hands with warm Water.

Their uſe of *Opium*.

Opium is ſo much in vogue among the *Perſians*, that ſome will take an ounce of it at a time; tho the more moderate ſort content themſelves with taking it only once in two or three days, which makes them giddy-headed, as if they had been overcome with Wine. There is a great quantity of it prepared about *Iſpahan*; they take the Poppy green, cleave the head of it, from whence iſſues a white Liquor, which in the Air is coagulated to a black ſubſtance: This is of ſuch vaſt uſe throughout all the Eaſt, not excepting the *Indians* themſelves, that *Bellon* ſays, he ſaw 50 Camels loaden with it, going from *Natolia* to *Turky*. The *Turks* attributing to it a quality of infuſing Courage into the faint-hearted, uſe it when they are to go upon ſome dangerous Enterprize. The Women ſeldom make uſe of it, except when they have a mind to rid themſelves of the inſupportable ſlavery put upon them by their Husbands, by an eaſie Death, in which caſe they take a good quantity of it, and drink cold water after it. 1637.

Of Tobacco.

Tobacco is a Weed ſo much eſteemed in *Perſia*, that even thoſe of the firſt Quality don't ſtick to take it, even in their *Moſques*: About *Bagdat*, and in *Kurdiſtan* grows abundance of it, but they want the Art of managing it, which is the reaſon that the *Tobacco* brought thither from *Europe*, is in high eſteem in *Perſia*; they having no other way of preparing it, than to let it dry like other common Herbs, the Leaves of it which we ſaw in the Shops at *Iſpahan*, being as ſmall as *Sena*, by reaſon of being ſqueezed up in Bags.

Thoſe that are nice in taking *Tobacco*, ſmoak it through Water, which they put in a Glaſs, or Earthen Bowl, or a Cocoe Shell, or a Veſſel made of the Rind of a certain root of *Citruls*, call'd *Kaback*; into this they put a ſmall Reed, having at the extremity a Bowl in which they put the *Tobacco*, which being lighted, they draw by the help of another Pipe of half an Ell long, the ſmoak through the Water, which is incomparably more pleaſant than our way; but ſuch as want theſe conveniencies, are glad to take it as we do, except that their Pipes, which are much longer than ours, are of Wood, though the Bowls be of Earth.

Of Coffee.

Their common Drink whilſt they are a ſmoaking, is Coffee, call'd by them *Cahwa*, a Fruit brought thither out of *Egypt*, its colour is like our Wheat, its taſte like *Turkiſh* Wheat, of the bigneſs of a ſmall Bean. After they have fry'd it in an Iron Pan, they beat it to Powder, and boil it in fair Water, being of no very pleaſant taſte. However the *Perſians* uſe it in great quantities, out of a Perſuaſion, that it allays the natural heat, and prevents the begetting of Children, unto which they have no ſmall averſion: The *Perſians* tell a very pleaſant Story upon this account concerning one of their Kings named *Sulthan Mahomet Caſtein*, who liv'd before *Tamerlain*, who being quite emaſculated by the exceſſive uſe of Coffee, and his Queen looking one day out of a Window into the Court, where they were gelding a Stone-horſe, and having ask'd the reaſon, was told that it was done in order to check his fiery temper; unto which ſhe anſwer'd, That ſhe thought it great pity, the poor Creature ſhould be uſed thus cruelly, when the uſe of *Coffee* would produce the ſame effect with leſs trouble. They further add, that this King being ſucceeded by his Son *Mahomet*, and having ordered their famous Poet *Hakim Tandauſi* to compoſe certain Verſes, for which he rewarded him ſo ſlenderly, that the Poet being exaſperated at this uſage made another Poem, in which having upbraided the King with his niggardly Temper, he concludes that he could ſcarce be ſuppoſed to be of Royal Extraction, but rather the Off-ſpring of a Baker, or Shop-keeper, who uſed to make ſuch Preſents; the Queen Mother imagined by that, ſomething of this nature might perhaps be come to the Poet's Ears, was ſo nettled thereat, that ſhe freely confeſs'd to her Son, that the King his Father being become impotent by the uſe of Coffee, ſhe had carried on an Intrigue with a certain Baker, who had furniſhed the Kingdom with an Heir; adviſing him at the ſame time to ſtop the Poet's Mouth by a good Preſent, for fear the thing ſhould take vent among the People, which the young King did accordingly.

Of Thee.

Thee is alſo in great requeſt among the *Perſians* as well as the *Chineſes* and *Indians*. It is an Herb brought by the *Usbegue Tartars* from *Chattur*, the leaves of which are an inch in length, and half an inch in breadth; when it is dry'd, it is of a dark grey colour, and ſhriveled up, but as ſoon as it is ſteep'd in hot boiling water, it ſpreads and reaſſumes its former ſhape and colour. The *Perſians* boil it till

the

1637.

the Water be somewhat bitterish, and add Fennil or Anniseed, or Cloves and Sugar: But the *Indians* make only an infusion of it in hot boiling Water. Its quality is astringent, and it disperses the gross vapours which sometimes disturb the Brains; but this Herb being now so well known in *Europe*, we will say nothing further of it.

Their way of living.

The *Persians* do maintain themselves, some by cultivating their Gardens, others by Husbandry, others Traffick, and the most by Trades; Many addict themselves entirely to Soldiery; and not a few get their livelihood by Writing, because Printing is not as yet introduced among them.

The Tradesmen sell their handy-works in their respective Stations in the Market-place, their Working Shops being commonly in another place.

Their most noted Professions are Weavers, Dyers, and Painters; the last of which paint Flowers and other Figures upon Silks and Calicoes so exactly as if they had been done by a good Painter. Their pieces of Stuffs seldom exceed five or six Ells, being as much as is requisite for a Garment according to their Fashion; the best are made at *Fescht* and *Kadschan*.

Their best Stuffs.

They export vast quantities yearly of Raw Silk and Cotton by the way of *Ormus*, which is there exchanged for Tin, Copper, *English* and *Dutch* Cloths, an ordinary Cloth yielding in *Persia*, where they are ignorant in the Woollen Manufactury, five or six pound *per* Yard: For *Persia* being computed to yield yearly 20000 Balls of Silk, *viz.* the Province of *Kilan* 8000, *Schirwan* 3000, *Chorasan* 3000, *Mesanderan* 2000, *Karabath* 2000, (besides what *Georgia* produces) and *Persia* being supposed not to consume above 1000 Balls, the rest is transported to other places. The value of Raw Silk in *Persia* is commonly 2 *s.* 6 *d.* or 2 *s.* 8 *d. per* pound. They weigh by the *Badman*. Wheat at *Tabris* is six pound, in *Kilan* twelve pound, and at *Schamachie* and at *Karabath* sixteen pound. Among all the Merchants of *Persia*, the *Armenians*, who are Christians, exceed the rest in Riches, they being the most industrious of all in travelling into foreign Countries, a thing allowed of in *Persia*, contrary to what it is in *Muscovy*: There is another peculiar conveniency for Traffick in *Persia*, as well as *Turky*, that notwithstanding they are engaged in a War, their Traffick is never obstructed, but the Caravans continue to pass unmolested.

Persia produces yearly 20000 Balls of Silk.

Traffick never obstructed.

If the *Persians* had the advantage of Navigation, in which they are altogether ignorant, it might contend for the Priority with any the greatest Empire of the World.

The *Mahometans* being permitted by the *Alcoran*, the use of as many Wives as they are able to maintain, the *Persians* follow this Rule so closely, that he who is able among them to maintain two or more Wives, will never be contented with one, notwithstanding the domestick Jars that often are the natural consequences of Polygamy in *Persia* as well as in all other places where it is in vogue.

The ill consequences of Polygamy.

Of this we had a notable example related to us concerning *Silfaher*, Chan of *Scamachie*, who having married the Sister of *Scach Chodabende*, Father to *Schach Abas*, she conceived such a Jealousie at his marrying of another young Lady, that having taken a resolution to be revenged of her Husband, she sent word to *Schach Tamas* her Nephew, to have a care of him, as having formed a design against his Life; which wrought so effectually upon the King, that he commanded *Kartschicai Chan* immediately to bring to him *Silfaher*'s Head, which was done accordingly.

Another thing of the same nature happened not long before our coming into *Persia*; A certain Tavern-keeper of *Ardebil*, happening to meet one night a Mule laden with Merchandices, convey'd the same to his House, and after having unladen the Goods, turn'd the Mule loose. Complaint being made of Robbery, no satisfaction could be given, till the Thief could be discovered, which was done at last by this Man's own Wife; having marry'd another Wife, and a Quarrel arising betwixt both about a Child, the first complained in such outragious Terms to her Husband, that nothing but the Cudgel could quiet her, but being resolved to be even with him, she made a discovery of the Robbery to the Governor, who caused her Husband to be hang'd, and both the Wives to be banished the City.

1637.

Incest among the *Persians*.

Incest is a thing not very strange in *Persia*, it often happening that a Man marries his Brother's Widow, however I would never be convinced of what has been asserted by some, that Carnal Copulations are allow'd betwixt Sons and Mothers, or own Brothers and Sisters.

Their Marriage Ceremonies.

Their Marriage Ceremonies are perform'd thus: If a young Man has by Report made to him of a certain Maid, taken a fancy to a Maid, he sends two of his Friends, either his God-fathers at his Circumcision, or two others of his Kindred, to desire her from her Friends or Parents; The first Proposal pursuant to the Custom of the Countrey, is commonly received with much coldness: But the young Man's Friends continue their Addresses till they have a more favourable reception, and then the Dowry (which here is given by the Bridegroom) being agreed upon, the same is either sent a few days before the Marriage to the Bride, or her Parents, according to the Agreement, or perhaps a certain Summ of Money or quantity of Silk promised to the Bride, in case of a Divorce. This Contract being made in the presence of, and signed by the *Kasi* or Ecclesiastical Judge, if it be in or near a City, and by the *Mollah*, if in a large Town, certain Persons are named on both sides, as their Representatives, who by the said *Kasi* or *Mollah* are Married in the Name of *God*, of *Mahomet*, and *Aly*, and have a certificate delivered to them of the said Marriage. This is commonly performed in the Field, or some other private Place, the *Persians* being extreamly afraid of Charms or Witchcraft upon this account; for which reason also, whenever the Marriage Ceremony is celebrated in publick before the *Kasi*, all that are present, are obliged to stretch out their hands to prevent their making use of any Charms under their Garments. The *Persian* who went along with us to *Holstein*, confidently affirm'd to us, that he himself had been rendred impotent by such a Charm, for two Years and a half, till he was delivered of it by a certain Sorcerer, who ordered him to take out a Nail out of a certain Wall, which done, the Charm was dissolved, and he restored to his natural vigour. The Modern *Persians* marry indifferently at all Seasons of the Year, except in the Month of *Ramesan*, which is their *Lent*; and the ten days of the *Schur*, when they Celebrate the Interment of *Hussein*.

The time of the Wedding appoaching, the Bridegroom sends the day before to his future Spouse, Pendants, Bracelets and other such like Ornaments, according to their Qualities, besides several Dishes of Meat, for the Entertainment of those Friends that are to conduct her to his House; but neither the Bride nor Bridegroom are present at this Feast. Towards evening she is brought upon a Mule, Horse, or Camel, covered with a Veil of Crimson Taffata, reaching down to her Knees, accompany'd by her Kindred and Friends, and a Sett of Musick to the Bridegroom's House, where she with her Maids is conducted into a separate Apartment, and the Bridegroom with his Friends into another: After Supper she is led to the Chamber where she is to lie, and the Bridegroom comes in soon after, and then has the first sight of her. If he finds her broken, he has the liberty to send her home without a Nose and Ears, but Persons of Quality seldom go to that extremity, but are satisfied with sending her and her Friends away immediately. But being satisfied that she is a Maid, the Tokens of Virginity are sent by an ancient Woman to her Friends, who then continue their Merry-making for three days successively. After the Bridegroom has tasted the First Fruits of his Bride, he returns to his Company, where he diverts himself for some hours; Their Poets and Men of Learning, appear frequently at these Feasts, who endeavour to draw the Guests into an admiration of their Knowledge by their Discourse, which commonly turns upon some point or other of Morality or speculative Philosophy.

Amongst other Diversions used at their Weddings, they bring in a large wooden Dish fill'd with Fruits, in the midst whereof is placed a little Tree, on each branch of which hangs some Fruit, or dry'd Preserves; if any one of the Company has dexterity enough to take away a piece of it, without being perceived by the Bridegroom, he is obliged to give him a certain Present, but if he be catch'd, he must pay an hundred fold for what he was going about to take. Another Custom they have, that if any of the Guests

happen

1637. happen to come the next day but never ſo little a time after the appointed hour for Dinner, he is faſtened to a Ladder, ſtanding up againſt the Wall with his Head downwards, and whip'd on the Soles of his Feet, with a Handkerchief roll'd together, till he redeems himſelf.

The Men and Women dance in two ſeparate Rooms, the Muſick ſtanding at the Door. The next day after the Wedding, the Bridegroom baths himſelf in the Water, but if in the Summer, he waſhes himſelf in ſome Neighbouring Rivulet; but the Bride baths in the ſame Houſe. Towards Evening two Spoons full of *Chinne* (wherewith they paint their Nails) is preſented upon a Hankerchief to every one there preſent; which done, the Gueſts make their uſual Preſents, and ſo withdraw, unleſs they are ſo loaden with Wine, that they think it beſt to ſtay where they are, for fear of the Watch, who ſuffer no body to paſs at Night without a Lanthorn. For they obſerve ſo ſtrict a Diſcipline in all the Cities of *Perſia*, in the Night-time, that the Watchmen appointed for the Guard, (of which there are 40 at *Ardebil*,) are reſponſible for any Robberies committed; and they are ſo exact in their Duty at *Iſpahan*, that they would bring us home with Torches for half a Lg, without meeting with the leaſt miſchief by the way, though it was ſometimes paſt Mid-night.

Their Watches in the Night.

The new-married Wife is obliged to obſerve ſtrictly another Cuſtom, which is, that if ſhe happen to live in the ſame Houſe with her Husbands Father, ſhe muſt not unveil her Face, or ſpeak to him, till he has engaged her thereto by a certain Preſent; and after all, ſhe is not allowed to appear in his Preſence with her Face uncovered, or her Mouth when ſhe eats, for which reaſon they have a piece of Cloath ty'd to their Ears, which hangs over the Mouth; it being a conſtant Maxim among the *Perſians*, that a Woman who will ſuffer her Face to be ſeen, cannot paſs for honeſt, though it be done to one of her neareſt Relations; whence it comes that they keep them cloſe Priſoners at home; and if neceſſity calls them abroad, they are covered with a white Veil, coming down to half the Leg, if they are on Foot, but if on Horſe-back, they are carried in Cheſts; and ſo muffled, that it is impoſſible for any to ſee them.

Two other ſorts of Marriage.

Beſides this they have two other ſorts of Marriage; the firſt is inſtituted for the conveniency of ſuch as are obliged often to Travel from place to place; theſe take Wives for a certain Term, allowing them a certain Penſion, by Vertue of a Contract made betwixt them, which being expired, they are both at their own diſpoſal, unleſs they immediately agree to renew it for a certain time.

The Third ſort is, when they cohabit with their Slaves, which being for the moſt part ſuch as are by the *Dageſthan Tartars* brought out of *Georgia* and ſold to the *Perſians*, are for the moſt part Chriſtians; their Children, alſo thoſe begotten by the ſecond ſort of Marriage, have their ſhare in their Fathers Eſtate, as well as thoſe lawfully begotten in Marriage; the Father being by the *Perſians* look'd upon as the Principle of Generation.

Superſtition of the *Perſians*.

The *Perſians* are very ſuperſtitious in reſpect of the delivery of their Child-bearing Women; for if the ſame prove difficult, they run ſtraightways to the next School, and by a good Preſent to the Maſter, obtain a Play-day for the Scholars, or a Pardon for ſuch as have deſerved Correction; by which good deed they pretend to procure a ſpeedier delivery to the Woman in labour: Upon the ſame ſcore it is that they buy Birds, and give them their Liberty. The ſame thing is practiſed by them for Perſons in agony of Death. The *Muſcovites* have a Cuſtom to let looſe ſome Birds, when they are going to Confeſſion, believing that as they free thoſe Birds, ſo God will free them from their Treſpaſſes.

Their Jealouſie.

Though the *Perſians* take an abſolute Liberty of indulging themſelves with Women, they will not allow the leaſt ſhare of it to their Wives, who are not permitted as much as to ſee a Man; and they are ſo addicted to extreams in this kind, that they puniſh no Crime with more Severity, or rather Barbarity, than Adultery in a Woman.

Of this we were told a remarkable Example, which happened in the Reign of *Schach Abas*, who being inform'd, that he whoſe buſineſs it was to carry his Bow and Arrows, was impoſed upon by his Wife in that kind, gave him notice of it, adding, that unleſs he purg'd his Houſe, he muſt quit his Employment; the Man being moved, partly by Jealouſie, partly by the danger of loſing his Place, went immediately to his Houſe where he cut his Wife, 2 Sons, 4 Daughters, and five Maids in pieces. By the Law of *Perſia* an Adulterer may be kill'd with the Woman, if they be taken in the Fact; and if any ſuch thing be done, he that kills them has a new Garment beſtowed upon him by the Judge of the Place. 1637.

Bills of Divorce are allowed both to Men and Women in *Perſia*, which is done before the Judge, who examines into the Reaſons of it. Frigidity actually diſſolves the Marriage. Both Parties are left at their liberty to marry again, but the Woman is obliged to ſtay three Months and ten days. Divorces allow'd.

The *Turks* have a certain Cuſtom, that if they have been divorced three times from their Wives, or at the firſt Separation ſay the word *Utzkatala*, i. e. *I renounce thee thrice*, and yet being deſirous to have her again after ſuch a Divorce, they muſt apply themſelves to the *Mollah*, who is to appoint a certain Perſon that is to enjoy her before her Husbands Face, before he can have her again. If the *Mollah* has a mind to be favourable, he perhaps ſends a young Lad, who is not fit for the work, to Bed to her; and ſo by this means removes the Matrimonial Tye.

Of this the *Perſians* relate a certain Story concerning one of their *Sulthans*, before the *Perſian* Sect was eſtabliſhed in this Kingdom; *to wit*, That the *Sulthan* having given the word *Utzkatala* to his Spouſe, ſoon after repented of it, and having conſulted his Eccleſiaſticks whether no means might be found to recover his Wife, but under thoſe hard Conditions: They declared unanimouſly he could not: But being very deſirous to have her again, he apply'd himſelf to a certain *Mollah* call'd *Huſſan Kaſhi*, a Man famous for his Jeſting Temper; who being confronted with the *Turkiſh* Prieſts, told them, That ſince the *Alchoran* it ſelf did not mention any ſuch thing, and that according to the Interpretation of *Sadnek* (*Hanife's* Maſter, whoſe Doctrine the *Turks* follow) a Woman ſhall not leave her Husband, though he beat her, the *Sulthan* might lawfully have his Spouſe again without being ſubject to that brutiſh Cuſtom; which ſo well pleas'd the *Sulthan*, that he immediately imbraced the *Perſian* Religion, and baniſh'd all the *Turkiſh* Prieſts.

They tell us ſuch another Story of *Solyman* the *Turkiſh* Emperor, who having pronounced the word *Utzkatala* to his Queen, and finding himſelf uneaſie till he had her again, as being one of the handſomeſt Women in all *Turkey*, had her (according to the Cuſtom obſerved in that reſpect) married to a *Dervis*, who for their Auſterity of Life are reputed Saints, not queſtioning but that by this means he had ſecured himſelf againſt any thing of that nature; ſo they were ordered to go to Bed, but the *Dervis* ſo far ſet aſide his Sanctity, and pleaſed the Lady ſo well, that they both declared, they would not be divorced, which muſt always be done in this caſe, before the Woman can be reſtored to her former Husband; and it being not in the power of the Law to force them to a Separation, *Solyman* was forced to acquieſce, and they for their better ſecurity retired into *Perſia*. Two pleaſant Stories.

The Education of their Children.

As the multitude of Wives produces a numerous Iſſue of Children; ſo they are commonly put out very young either to ſome Trade or to School to learn to read and to write. Their *Moſques* ſerve alſo for Schools, where the *Mollah* or School-Maſter ſits in the midſt with his Scholars about him all along the Walls. Their firſt beginning is the reading of the *Alchoran*, from whence they proceed to the *Kuluſthan* or the *Roſe-Garden* of *Schich Saadi*, his *Buſtan* or *Orchard*, and ſo further to *Hafis*, who has put *Buſtan* into Rhime, the two firſt of which are much eſteemed for the purity of their Stile, and the Excellency of their Inventions. The Children read very loud, all at once the ſame Text, moving their Bodies with one continual agitation from one ſide to the other, in the ſame manner as Reeds are ſhaken by the Winds.

Their Writing, Paper, and Ink.

As they know not the uſe of Tables, ſo they all write upon their Knees; their Paper is made of the Rags of Silk and Cotton, which being ſomewhat hairy, they ſmooth it with an Oyſter or Muſſel Shell. Their Ink is made of the Rind of Pomgranates, or of Galls and Vitriol, which they thicken with burnt Rice or Barley powdered, and ſo make it up into a Paſte, which they diſſolve in Gum-water. Their Pens are not of Gooſe Quills, but of Reeds, ſomewhat bigger than ours.

The *Perſian* Language participates of the *Arabian*, but The *Perſian* Language.

1637. but has not the least Affinity with the *Turkish*. There are also not a few *German* and *Latin* words found in it, which however does not prove to me, that therefore they owe their Original to them, as some would infer; But certain it is, that the Modern *Persian* Language is very different from the Ancient, if we may believe *Herodotus*, who says, That all their words ended in *s*, yet to this day most of their words have the Accent in the last Syllable. It is not very difficult to be learnt, as having very few irregular words, the guttural pronunciation being the only thing which is hardly attained by Strangers. The *Persians*, especially in those Provinces which have for some time been under the *Turkish* Jurisdiction, teach their Children the *Turkish* Language as well as the *Persian*; that the first is as generally spoken at Court, as the *Sclavonian* in the *Grand Seignior's*, and in the Court of the *Great Mogul* the *Persian*. But in the Province of *Fars* (the ancient *Persian*) and at *Schiras* they speak nothing else but the *Persian*. They are absolute Strangers to *Hebrew*, *Greek*, or *Latin*; the defect of which is supply'd by the *Arabian*, in which the *Alchoran* and all their Books of *Physick* or *Philosophy* being written, it passes as current among them, as the *Latin* in *Europe*; and the *Persians* make use of *Arabian* Characters in their Language.

They learn the *Turkish* Language.

Their Characters.

Though the Sciences are not brought to the same perfection in *Persia* as in *Europe*, yet are they much addicted to Study; and have their Colleges, Universities, and Professors; the last they call *Mederis*, and the first *Medressa*; their learned Men they stile *Filosufs*. Such Colleges are at *Ispahan*, *Schiras*, *Ardebil*, *Mesched*, *Tabris*, *Casvin*, *Kom*, *Jesdcht* and *Schamachie*, which are under the direction of the *Sedder*, or the Supream Head of their Religion, who provides for their Maintainance out of the Revenues of certain Provinces which pay no Taxes to the King; The Sciences most in vogue among the *Persians*, are Arithmetick, Geometry, Eloquence, Poetry, Natural and Moral Philosophy, Astronomy, Astrology, Law and Medicine. *Aristotle's* Philosophy they read in the *Arabian* Language, they call it *Duja piala*, i. e. the *Goblet of the World*; their common saying of it is, that it ought to be used moderately, like strong Liquors, which, if taken too much, will instead of refreshing, intoxicate the Brains. In Arithmetick they commonly use the *Indian* Characters, but the most learned the *Arabian*.

They join Oratory and Poesie under the same Precepts, which are not many, most of their Eloquent Pieces being written in Verse; and it must be confess'd that there are not many Nations in the World that give so much Incouragement to Poetry as the *Persians*: The Great Men of the Kingdom think their Feasts imperfect, unless they have some Poets there to divert the Company with some pleasant Invention or other; and the King himself entertains divers Poets as his Domestick Servants; nay, the Vulgar sort among the *Persians*, will scarce be merry at a Tipling-house without the Company of one that pretends to Poetry.

They admire Poetry.

The Poets are distinguished by their Habit, being the same that is used by their Philosophers, *viz.* a long white Coat, open before with great wide Sleeves; having on their Girdles a Pouch like our Hawking-Bags, in which they carry their Books, Paper and Ink-horn. Their under Garment being without Sleeves, is wrapt about them like a Cloak; instead of Stockings their Breeches come down to their Feet, and they wear Caps instead of Turbants.

Those Poetasters that frequent the Tipling-houses, wear Scarfs of divers colours, a little above the Waste, and passing over the right Shoulder, come a-cross under the left Arm, their chief Subject is to write some scurrilous Satyr against the *Turks* and their Saints.

Persia has this common with *France*, that it has produced very few good Authors of an *Epick Poem*; those of the best Repute among the *Persian* Poets are, *Saadi*, *Hafis*, *Firdausi*, *Enssuli*, *Chagani*, *Eheli*, *Schems*, *Naway*, *Scabidi*, *Ferahsed*, *Deheki*, *Nessimi*, &c. They are very nice in keeping the Rhime, though they are not so exact in keeping to the true number of Syllables: they rather will repeat the same words than in the least strain the Rhime, as for instance in the following Verses;

The noted *Persian* Poets.

Tziri, tziri, Tziragh Jani tze
Adamira demagh Jani tze;
Tziri, tziri, tziragh es teri bud,
Adamira demagh cheri bud.

where the allusion lies betwixt the words *Teri* and *Cheri*, one signifying moist, the other belonging to an Ass; the Sense runs thus: *Why does the Candle go out? Why does Man boast and is full of vain glory? Because the one wants moist Suet, and other is troubled with Asses Fat.* Among all their Authors they give the preference to the *Kulusthan* of *Schich Sandy*, writ in Verse, and imbellished with History and most remarkable Rules of Policy and Morality: There are very few in *Persia* who have not either read or studied this Book, and many have it by heart, and apply its Sentences and Comparisons in most of their Discourses. Neither are they careless in perusing the Histories of their Prophets, *Aly*, and his Son *Hussein*, two pieces written in a noble Stile, becoming the Dignity of a great Historian; besides which they have their Chronicles both Ecclesiastical and Prophane, and the Histories of the Lives and Wars of their Kings, besides those of some Foreign Nations; the most celebrated of which are, *Enecri*, *Zami*, *Walchi*, *Nussegri*, *Mirchond*, and others; the last of which having compiled a History of *Persia*, carries the Bell from all the rest, containing many large Volumes, with are worth in the Country 25 *l. Sterl.* which makes me conclude, they are scarce to be had perfect in *Europe*, though I am sensible that *Golius*, Professor of the Oriental Languages and Mathematicks at *Leyden*, and the famous Mr. *Gaullimin* have the greatest part of it. However no Man ought to imagine that an absolute Credit is to be given to those Relations contained in their Histories, especially in what relates to their Religion and Saints; which have rather a resemblance to our Romances than true History, as may be seen in the Relation they give of *Alexander the Great*, which might well deserve to be recited as a Pattern to judge by of the rest, if it were not too long to be inserted in an Epilogue. 1637.

As their Law is taken out of the *Alchoran*, and of a great extent, the rest being founded upon Custom, so that that Study is soon attained to, Physick being in more request, yet as they know not what Anatomy is, so their Practice is very gross, and founded upon the bare Principle of curing Distempers by contraries, so that in the case of a Fever occasioned by hard drinking, we saw a Moorish Physician apply Ice to the Patients Stomach: Their Physicians are all *Gallenists*, yet are somewhat averse to Phlebotomy. Their Pharmacy consists chiefly in Decoctions and Fomentations; Women and Children commonly consult a Midwife in their Distempers.

Their Law and Physick.

Our Physician, who was well versed in Chymistry, grew so famous at *Ispahan*, that the *Sophi* endeavoured to keep him in his Service by the Promises of great Rewards, which however he did not think fit to accept of.

The *Persians* were already in ancient times famous for the Study of Astronomy, which belonged most peculiarly to the *Magi*, call'd now-a-days *Minatzim*, with this difference however, that these last rather apply themselves to Judiciary Astrology, than the Science of the Motions of the Heavens, and Observation of the Stars, this being more beneficial than the former, because all the Persons of Quality and the King of *Persia* himself are so very Superstitious in this point, that they will not undertake any thing of any moment, without consulting with them; which makes these Astrologers always to carry an Astrolabe in their Bosom.

Astronomy.

For the rest they are so far from knowing the use of, or having any such thing as a Sphere or Globe, that they were much surprised to see me have one; though at the same time they spoke something concerning a very large Globe which they said was lost in their Wars with the *Turks*; but by the description they gave me of it, I conceived it much inferior to that famous Globe which by his Highness the Duke of *Holstein's* Command has been made and is kept at his Residence of *Gottorp*. It is a double Globe, all of Copper 10 Foot and a half diameter, of such a bigness, that 20 Persons can sit within it upon Seats round a Table, all which is fastened to one of the Poles. By the help of an Horizontal Circle within the Globe, you see the Stars and the Sun it self, coming out of its Centre, and moving of it self, through its Ecliptick Degrees; and how it rises and sets regularly, the whole motion of the Globe, being exactly congruous to that of the Heavens, which owes its Origin to certain Wheels driven by the Water, conveyed thither out of an adjacent Mountain, and let in in proportion of what is required more or less for the Motion of the Spheres.

Astrology.

The

1637. The *Persians* make use both of the *Solar* and *Lunar* Years, the last for their Festivals (which are appointed on certain Days of the Month) and for their Religious Ceremonies. Their Months begin and end with the *Moon*, and consequently their Years are shorter than ours by 12. Days: But their *Solar* Year consists of 365 Days, which is of an ancient date, for

Lib. 3. Hist. cap. 7. *Curtius* speaking of *Darius*'s Train, says, That the *Magi* were follow'd by 365 *Luds*, according to the number of the Days of the Year, which consisting of 12 Months, 7 of which had 30 Days, and 5 31 Days apiece, compleated the said number of 365.

Their Lunar and Solar Years. Their Year begins at the time of the *Equinox*, one of the chief Employments of their Astrologers being to make an exact Observation by the *Astrolabe*, of the very minute when the *Sun* coming to the *Equator*, enters into *Aries*. This Day they call *Naurus*, or *Neurus*, i. e. the new Day, and when they are to make any Computation of their Age, they say they have liv'd or compleated so many *Naurus's* or Years. Their *Epoche* begins with the *Hegira* or flight of *Mahomet*, which is coincident to the 10. *Jul.* 622 Years after the Birth of our Saviour.

(a) De emendat. (b) In Ephem. According to (*a*) *Scaliger* and (*b*) *Origanus*, the *Persians* had in ancient times their peculiar Almanack, every Day of the Month having assign'd its peculiar Name in remembrance of their Kings or some of their most famous Heroes; as for instance, *Oromasda*, *Behemer*, *Adarpahaschr*, *Scharias*, &c. but this is absolute now as well as the *Epoche* of *Jesdetzird*, who being the Grand-son of *Cosrhoes*, was kill'd by *Ottoman*, 1632. However this *Epoche* continued till 1079. when *Albu Arsalan* King of *Chorasan*, *Mesopotamia*, and *Persia*, a *Saracen*, with the assistance of 8 of the most famous Astronomers of his time, introduced a new *Epoche*, which begun on the 14th. Day of the Year, and is call'd *Tzelalee*, or *Sulthanee*, and in the *Arabian*, *Tarich Altzelatit*, i. e. the *Era* or *Epoche* of *Augustus*, the word *Tzelaf* implying as much as *Majesty* or *Highness*.

They make use now-a-days of the *Arabian* Kalendar, according to which their 12 Months are named thus: *Maharem*, *Sefar*, *Rebbi Ewel*, *Rebbi Achir*, *Tzemadi Ewel*, *Tzemadi Achir*, *Retzeb*, *Schabahn*, *Schawal*, *Dsilkade*, and *Dsilhatse*. The *Persians* also follow the footsteps of the *Greeks* and *Romans*, in accounting by four Years, as the first did in their *Olympiads*, and the last by their *Lustra*, consisting of 5 Years; but what is observable in this Computation is, that they give the Name of the first Month of the Year, to the first Year, and so the Name of the second, third, and fourth to the rest, with this difference only, that when they speak of their common Months, they add the word *Mah*, which signifies a Month. Their Week they begin on *Saturday*, so that their 7th. Day, which is the *Sabbath*, falls upon *Friday*: The Names of their 7 Days are as follows; Saturday *Scembe*, Sunday *Jekscembe*, Munday *Duschembe*, Tuesday *Seschembe*, Wednesday *Tschaschembe*, Thursday *Denscembe*, and Friday *Adine* or *Tzumeh*, i. e. the Day of Assembly, when they meet to perform their Religious Worship; I told you before, that they are much addicted to Astrology, which they have questionless got from the ancient *Chaldeans*; most Persons of Quality in *Persia* being so Superstitious in this point, as that they will not undertake even an indifferent matter, as for Instance, to go abroad to bath themselves, without having first consulted their Astrologer, their Opinion being founded upon that of the *Arabians*, viz. That the Stars are controuled by Intelligences, who have an absolute Power over all Sublunary things: But besides this, they have certain Women who pretend to foretel the event of things by Lots, in two different ways. The first call'd *Remal*, perform'd by 7 or 8 Dice strung together upon two little Wires, and according to their choice predict future things. The others, call'd *Falkir*, have about 30 or 40 pieces of Board, of an Inch square, thin and smooth, laid upon a Table, mark'd with certain Characters on that side which lies downwards; upon one of which he who comes to enquire after what is to befal him, puts a piece of Money, and so to work goes the *Falkir*, and looks over the Book in which are painted Angels, Devils, Satyrs, Dragons, and such like monstrous Figures, till she comes to the leaf which contains the Character resembling that upon which the Money was laid, and so makes her Predictions accordingly, muttering out certain words all the while she is turning over the leaves.

The Government of *Persia* in its Political Constitution is the same with *Muscovy*, both being Despotick and Arbitrary, each of these Princes commanding both the Lives and the Estates of their Subjects, not excepting those of the first Rank, at pleasure, without any legal proceedure. 1637. Their Political Constitutions.

The Modern Kings of *Persia* are stiled *Schach*, *Paschach*, and *Padischach*, all which signifies as much as a King or Great Lord. However the *Grand Seignior* never bestows the Title of *Schach* upon the *Persian* Kings, but only that of *Schich Ogli*, i. e. Son or Kinsman of the Prophet. Some Authors are positive, that the *Persian* Kings assume the Quality of *Choda* or *God*; but erroneously, the word *Chodabende* being a proper Name and no Title, as *Theodosius* and *Theodore* are among us, though on the other hand it can't be denied but that they are vain glorious enough in their Titles, which admits however of this excuse, that they are as free to bestow the same upon other Princes, as is evident by the Letters, *Schach Sefi* writ to the Duke of *Holstein*.

The Kings of *Persia* of the last Race much affect the Title of *Sophi*, as deriving its Original from *Schich Sofi* or *Sefi*, the Founder of their Sect; which ought to serve as a peculiar Observation to all such as read the *Persian* History, lest they confound the proper Names of their Kings with this additional Title, as for instance in *Ismael Sophi*, *Eider Sophi*, &c. as the King of *France* is stiled *The Most Christian*, the King of *Spain* the *Most Catholick*, and the King of *England* *Defender of the Faith*. The Title of Sophi.

The Crown of *Persia* is not only Hereditary to the Sons of their Kings begotten in Marriage, but also in case of failure of those, to the Sons of their Concubines, who have the preference before their Nephews, or any others of a Collateral Line; because the Children of Concubines (as we told you before) are not accounted illegitimate in *Persia*; but if a *Persian* King happen to die without leaving any Male Issue behind him, then the next of Kin by the Father's side claims the Right of Succession: These being descended from *Sefi*, are the Princes of the Blood Royal, and are call'd *Schich Elvend*, being endow'd with great Immunities, but so inconsiderable an Allowance for their Subsistence, that often times they make hard shift to live. If a Queen of *Persia* happens to be delivered in any other place but the place of Residence, the House where the Child is born, is surrounded with a lofty Wall, and made a Sanctuary. According to *Qu. Curtius*, the ancient *Persians* had for their Arms a Crescent, which is now used by the *Turks*, and the *Persians* instead of it, have the *Sun*, which they put upon the back of a Lion; tho' the Great Seal of the Kingdom has only Characters, it is about the bigness of a half Crown Piece; within the Ring are these words: *To God alone I* Schich Sefi *am a Slave with all my heart.* And in the Circumference; *Aly, let the World say what they please of thee, I will remain thy Friend*; *He who before this Gate looks upon himself otherwise than Dust and Ashes, though he were an Angel, Dust and Ashes be upon his Head.* In all the Letters the *Persian* Kings write to Christian Princes, this Seal is out of Respect set at the very bottom on the other side of the Writing. The Right of Succession in *Persia*, &c. The Arms of Persia.

The Ceremonies of the Coronation of the *Persian* Kings is now-a-days always perform'd at *Ispahan*, without much Pomp; For the King being placed on a Chair of State, with a Table before him, on which are laid many pieces of rich embroidred Carpets or Tapistry, as there have been Kings before him of the same Family, one of the *Chans* presents to the King the Crown which he Kisses three times, *viz.* in the Name of God, of *Mahomet*, and of *Aly*, and having put it to his Forehead, gives it back to the *Lele*, or Lord High Steward of the Kingdom, who puts it on his Head, whilst all there present redouble their Acclamations of *Long live the King, God grant that during his Reign each Year may be multiply'd to a thousand*: Then they kiss his Feet, and after having made their Offerings of the usual Presents; the rest of the Day is spent in Feasting, there being no such thing as a Coronation Oath, or Oath of Allegiance known among them. The Ceremonies of Coronation.

As the Kingdom of *Persia* is of a vast extent, so the remote Provinces are Govern'd by the King's Lieutenants, whom the *Persians* call *Chans*, which word however does not so much denote the Quality of their Employment, as a Dignity belonging to all the great Lords of the Kingdom; of which more hereafter, our intention being upon this occasion to give you now a

1637. short insight into the History of the *Persian* K's, (scarce ever treated of by any Authors) who have Reign'd within these Hundred Years, beginning with *Ismael* I. the Founder of that Family that now sways the *Persian* Scepter.

A short History of the Persian Kings.

It is to be observed, That one *Hassan Padschach*, Sir-named *Ussum Cassan*, i. e. Grand Seignior, by reason of his great Victories, was descended of the Family of the *Asimbels*, and lived about the Year 1501, and as he was Governour of *Armenia*, he had the opportunity of Conquering several Provinces of the *Turks*, and among the rest that of *Persia*, over which he assumed the Title of King.

He had three Sons, the first of which being strangled by his Father's Command, and the second poisoned by *Jacup*, the youngest, he succeeded his Father, but himself being soon after poisoned by his own Wife, *Schich Eider*, Son-in-law to *Ussum Cassan*, Sir-named *Harduellis*, laid claim to the Succession, but whilst *Indlaver*, *Baylinger*, and *Rustan* disputed the same with him, the *Turks* entred *Persia*, and having overthrown him in a Pitch'd Battel, took him Prisoner, and caused him to be flea'd alive. This *Schich Eider*, the first who changed the Name of *Schich* or *Prophet* into that of *Schach*, or *King*, left but one Son named *Ismael*, who being very young, was privately Educated by *Pyr Chalim*, a *Persian* Lord, and near Kinsman of his Father, whilst *Rustan*, *Agmar*, *Carabem*, and *Aluantes* Govern'd the Kingdom successively.

1585. Ismael I.

But *Ismael* was no sooner come to Years of Discretion, but he gave most eminent proofs of his Understanding and Courage. For having sent his Agents to most of the Princes of the Kingdom, to shew his Right to the Crown, and to discover his Intention of delivering them from the *Turkish* Yoak, he first gathered an Army of 20000 Men in the Province of *Kilan*, which by the great Concourse of the faithful *Persians* increasing soon after to 300000, he March'd directly to *Ardebil*, which he took from the *Turks*, as also not long after *Tabris*, *Scamachie*, and *Irwan*, with all the Provinces belonging to the *Persian* Empire; then entring the *Turkish* Dominions, he defeated them by a Set Battel, which was follow'd by the Reduction of *Bagdat*, *Baste*, *Kurdestan*, and many other strong holds upon their Frontiers. Thence he turn'd his Arms against the *Great Mogul*, from whom he took the Province of *Candahor*, and some other places, with the same good Success, that had attended him in his Wars with the *Turks*. When he arriv'd at *Castrin*, after a few Days stay, he March'd towards *Georgia*, and made *Simon Padschach* their King his Tributary; all which Victories raised his Name to such a vast Reputation among the Princes of *Europe*, that most of them made their Addresses to him by their Ambassadors; so that from this time must be dated the first Acquaintance we have got with the Affairs of the Modern *Persians*; and as he was a strict adherer to the Sect of *Aly*, this has induced some Authors to assert, that he was not only the chief Propagator, but the first Institutor of that Sect. He died at *Caswin*, in the 45th. Year of his Age; his Tomb was at *Ardebil*. He is commended among the *Persians* for his Justice, but would drink Wine, and eat Swines Flesh; nay, he used to keep a Hog he call'd *Bajazeth*, in his Court, in derision of the *Turks*.

Schach Tamas.

Schach Ismael was succeeded by his eldest Son *Tamas*, who being a weak Prince, *Sulthan Solyman*, the *Turkish* Emperor, sent a powerful Army into *Persia*, and recovered all what the *Persians* had taken from the *Turks*, except *Bagdat*, and *Wan*: Two Years after *Solyman* entred *Persia* in Person, and having made himself Master of *Tabris*, laid Siege to *Sulthania*, *Schach Tamas* not daring to attempt its Relief; But some few Days before the *Nauris*, or *Vernal Equinox*, there happening to fall a great Rain, which suddenly melting the Snow on the adjacent Mountains, this caused such an Inundation, that *Solyman* was forced to raise the Siege, and retreat towards his own Frontiers, but being engaged by the *Persians* in his March near *Britlis*, was put to the Rout.

Schach Tamas died the 11th. of *May* 1576. in the 68th. Year of his Age, and the 42d. of his Reign, being not much beloved by his Subjects, because he left the Administration of the Publick Affairs to his Ministers. He left eleven Sons, the eldest which he named *Muhomet*, having embraced a Religious Life, by reason of the weakness of his Eyes, was Sir-named *Chodabende*, i. e. *Servant of God*. The second was named *Ismael*, and the third *Eider*, who being in particular favour with his Father, put the Crown upon his Head before *Tamas* was expired, taking advantage of his elder Brother *Ismael*'s absence, who was confin'd in the Castle of *Cahak*: But being slain by *Schamal* a *Georgian*, his Uncle by the Mothers side, *Ismael*, upon the refusal of *Mahomet*, and by the Interest of his Sister *Periaconcona*, ascended the Throne in the 43d. Year of his Age; he began his Reign with the Execution of all such as had adhered to *Eider*'s Interest, or who had been in the least Instrumental in procuring his long Imprisonment; and not contented thus, he caused a rumour of his Death to be spread abroad, to try the Inclinations of the *Chans*, of whom he put to Death as many as he found had shewn the least satisfaction at his Death, which put the rest, but especially his Sister *Periaconcona* into such a fright, that by some means or other, she with some of her Adherents, contrived his Death the 24th of *November* 1577. though it is not known to this Day, by what means or how it was put in Execution. 1637. Ismael II.

Mahomet Chodabende.

The *Persians* were no sooner rid of this Tryant, but they made their Applications to *Mahomet Chodabende* the eldest Son of *Schach Tamas*, who, at their earnest request, accepted the Crown, under condition nevertheless, that *Periaconcona*, who had contrived the Death of his two Brothers, should be put to Death, which being done accordingly, he ascended the Throne, 1578. but shewed so much negligence and effeminacy in the Management of Publick Affairs, that the *Turks* and *Usbeque Tartars* laying hold of this opportunity, got into the Possession of several Provinces of *Persia*: He died 1585. leaving 3 Sons *Emir Hemse*, *Ismael* and *Abas*; the first of which succeeded him in the Kingdom, but was murdered at the instigation of *Ismael* after a Reign of 8 Months; who enjoy'd the Royal Dignity but a few Months also; for *Abas Myrza*, the youngest, then Governor of *Herat*, not questioning but he would play him the same Game, as soon as opportunity should serve, according to the Advice of *Murschiduli* his Governor, came to *Ismael*'s Barber, who cut his Throat in the Presence of several Lords that were privy to the Conspiracy, to justifie themselves, cut the Barber in pieces upon the spot.

Emir Hemse.

Ismael III. kill'd.

Schach Abas, after the Death of his two elder Brothers, ascended the *Persian* Throne with a general applause, and having caused *Murschiduli Chan*, (who had the confidence to upbraid him in open Council with want of Years and Knowledge) to be dispatch'd with all his Friends, and Adherents, he bent all his Thoughts upon the Recovery of those Provinces which were taken by the *Tartars* and *Turks* during his Father's Reign.

Schach Abas.

His War against the Tartars.

Accordingly the first obtained, *Abdalla*, Prince of the *Usbeque Tartars*, whom after some time, he forced to Retreat to *Mesched*, and within three Years after, put him to an entire Rout, taking himself and his three Sons Prisoners, as well as his Brother *Tilem*, who were all put to Death by his Order. After this, he transfer'd the Seat of the Empire to *Ispahan*, which he adorn'd with many Noble Structures, and among the rest founded the *Ala Capi*, or Sanctuary, and the Sumptuous *Mosque Mehedi*.

Against the Turks.

The *Tartarian War* being brought to a happy Conclusion, and having received Intelligence that the *Turks* lived in a profound Security at *Tabris*, he got together a small Body of choice Men, and Marched in 6 Days time (which is commonly 18 Days Travel for the Camels) from *Ispahan* to the Passage of *Saybli*, within 4 Days of *Tabris*, where having surprised, without any noise, those few that kept it, rather to receive the Customs than to defend it, he advanced straighways to *Tabris*, and after having defeated and taken Prisoner *Ale Bassa*, the *Turkish* Governor, soon became Master of the City, and within a Month after of the Citadel also, which he order'd to be demolish'd. Thence Marching to *Nachtzuan* he found it abandon'd by the *Turks*, so advanc'd towards *Irvan*, which he took after a Siege of 9 Months; all the other places possess'd by the *Turks* underwent the same Fate, except the Fortress of *Orumi*, which being built on the point of a Rock, he besieged in vain, for 8 Months together, but at last gain'd it by the assistance of the *Kurdes*, a free People inhabiting those Parts, whom he had brought over to his side by vast Promises; but no sooner had they done them this piece of Service, but *Schach Abas* fearing lest they might upon occasion do the same to the *Turks*, invited all their Chief Leaders to Dinner in his Tent, which having many turnings and windings, they were one after another, as they came in, Massacred by certain

People

1637. People appointed for that purpoſe. Having Conſtituted *Kaban Chan*, Governor of *Orumi*, he Marched to the Rivers *Cyrus* and *Araxis*, and having made himſelf Maſter of *Schamachia*, and the whole Province of *Scirwan*, the Inhabitants of *Derbent* kill'd the *Turkiſh* Garriſon, and acknowledged him their Sovereign. Having alſo Reduc'd thoſe in the Province of *Kilan*, that had Revolted in *Schach Tamas*'s Time, to their former Obedience, he returning Victorious to *Iſpahan*; but had ſcarce been there a whole Year, when word was brought that the *Turks* were preparing to Invade *Perſia* with an Army of 500000 Men; hereupon he March'd with what Forces he could gather, towards *Tabris*, and having ordered all the Inhabitants of the open Country to retire with their Cattle to places of Security; he haraſs'd the *Turks* by daily Skirmiſhes, of whom a great number were kill'd every day by a certain Body of Volunteers, who had a Reward of 50 Crowns for each *Turk*'s Head they brought into the Camp.

At the end of three Months a Battel was fought, betwixt both theſe great Armies, which laſted all Day, with almoſt equal Fortune, till they were ſeparated by the darkneſs of the Night, when the *Turks* thought fit to Retreat, and were purſued by the *Perſian* King as far as the *Mount Schend*, where *Mahomet Chan Kaſak*, *Schacheruch Chan*, *Eſſchar*, *Fiſchan*, and *Kurtzibaſchi* were commanded to be cut to pieces, becauſe they had attempted to poyſon the King, who eſcaped the danger by taking proper Antidotes in time.

Within two Years after the *Turks* beſieged *Irvan* with 300000 Men, but being forced to raiſe the Seige, return'd about two Years after, and after 5 ſeveral Engagements, which proved for the moſt part to the diſadvantage of the *Perſians*, made themſelves Maſters of *Tabris*; but were not able to keep it long, for *Schach Abas* at laſt put them to the Rout, and forced them to quit that City.

Perſia then enjoy'd the Fruits of Peace for 20 Years, after which the *Turks* made another powerful Invaſion under the Command of *Chalil Baſſa*; but being haraſſed, or rather tired with continual Skirmiſhes by the *Perſian* Horſe, they thought fit to Retreat, leaving two *Tartar* Princes, *Omersbeg* and *Schahinkerai Chan*, with the Baſſas of *Egypt* and *Aleppo*, *Erzirum* and *Wan* behind them, who being taken Priſoners by the *Perſians*, where ſent back with Preſents without paying any Ranſom.

He March'd afterwards into *Georgia*, where after he had Routed *Tameras Chan*, who had Made an Incurſion into the Province of *Seggen*, he pay'd his Army 12 Muſters, and having ſtrictly forbidden the uſe of Tobacco in the Camp, commanded a certain Tobacco Merchant, who had ſold ſome to the Soldiers, to be ſet upon his Bags filled with the ſame Commodity, and ſo burnt them to Aſhes.

Extraordinary Severity.

Thence *Abas* went into the Province of *Kilan*, where he commanded his eldeſt Son to be kill'd, after he had put out the Eyes of the two younger with Fire. This eldeſt Son named *Sefi Myrza*, was born of a Chriſtian Slave of *Georgia*, being equally beloved both by his Father and the People; the laſt of which brought him to an untimely Death. For the Cruel Reign of *Schach Abas* being become unſufferable to ſome of the *Chans*, a Note was caſt into *Sefi Myrza*'s Chamber, that in caſe he would procure his own happineſs, they would ſoon ſhew him the way how to aſcend the Throne. But *Sefi* deteſting any deſign againſt his Father, carried the Note immediately to him, proteſting his Sincerity, and an entire Submiſſion to his Father's Pleaſure, which he ſeemingly was well ſatisfied with for that time, but not long after fell into ſuch Frights, as deprived him of all reſt, and made him change his Lodgings twice or thrice a Night. Theſe dreadful apprehenſions made him think of his Son's Death, which being encourag'd by certain Court Paraſites, who heightned his Fears by a falſe alarm of a new Conſpiracy againſt his Life, he poſitively reſolved to rid himſelf of theſe Fears by the Death of *Sefi Myrza*.

Schach Abas puts his eldeſt Son to Death.

The firſt Perſon he apply'd himſelf to, was *Kartzſchuckai Chan*, Conſtable of *Perſia*, an *Armenian* by Deſcent; but the old Gentleman throwing himſelf at the King's Feet, and begging to be excuſed from embrewing his hands in the blood of the Royal Off-ſpring; he made the ſame Propoſition to a certain Gentleman belonging to his Court, named *Bebut-Beg*, who having undertaken the buſineſs, ſurpriſed *Sefi Myrza* as he was coming out of the Bath, attended only by one Page, and ſtopping his Mule, told him it was his Father's pleaſure he ſhould die, and ſo pull'd him down upon the ground, the poor unfortunate Prince with his Eyes lifted up to Heaven crying out, *O good God, What is it I have committed, to deſerve this Diſgrace? Curſe on the Traytor who is the occaſion of it. But ſince it is God's Will, his and the King's Will be done.* 1637.

He had ſcarce ſpoke theſe laſt words, when *Bebut* gave him two ſtabs with his Ponyard, of which he died inſtantly, and ordered his dead Carcaſs into a Fen at a good diſtance thence. The News of this Murther was no ſooner got into the City, but the People crouded about the Palace Gates, threatning to force them, unleſs the Authors were delivered into their hands, which put ſuch a Terror into moſt of the Courtiers, that they ſought for their Safety by a timely Flight. On the other hand, the Mother of *Sefi Myrza* being quite overwhelm'd with Grief, not only upbraided the King with his Tyranny, but even did not ſpare her hands, wherewith ſhe flew into his Face, all which he took very patiently, telling her with Tears in his Eyes; *What is it you would have had me done, when I was inform'd he had form'd a Conſpiracy againſt my Life? It is paſt remedy now, paſt things being not to be recall'd.* Certain it is, that he gave all the marks of a ſincere Repentance, for having been ſo over haſty in a buſineſs of ſuch vaſt conſequence; for the firſt 10 Days he always wore a Handkerchief over his Face, to keep it from the light of the Sun; and for a whole Month eat no more than juſt what was ſufficient to ſuſtain Nature; he went into Mourning for a whole Year, and all his Life his Cloaths had not the leaſt of pride in them; the Place where he was kill'd, he ordered to be incloſed with a high Wall, made it a Sanctuary, and Endow'd it with a certain Revenue for the entertainment of the Poor. And to compleat the Matter, he invited ſuch of the *Perſian* Lords as had been moſt inſtrumental in fomenting his Jealouſie againſt the Prince, to a Feaſt, and having ordered certain Poyſon to be mixt with their Wine, he kept them ſo long there, till he ſaw them all expire before his Face.

Bebut the chief Actor of this Tragedy did not come off much better; for though he had the Charge of *Daruga* of *Caſwin*, and the Dignity of *Chan* beſtowed upon him, yet the King, to be even with him in his own kind, commanded him to cut off with his own Hands his Son's Head, and to bring it to him. *Bebut* being forced to obey, and the King ſeeing him coming into the Room with his Son's Head, ask'd him how he did, unto which *Bebut* returning for Anſwer, that the Grief occaſioned by his having been forced to be the Inſtrument of the Death of his own Son, would infallibly bring him to the Grave; the King Reply'd, That at this time he was beſt in a Condition to judge of his Grief, when he brought him the Tidings of the Murther of his Son by his Hands; and ſaid he, *Comfort thy ſelf in this, that in this thou art equal to the King thy Maſter.*

Neither was it many Years after, before this Murtherer received a due Reward for his Cruelty; for having threatned ſeverely one of his Slaves, he conſpired with ſome of his Fellow Servants, and diſpatch'd him the next Night in his Drink; *Schach Abas* ſhew'd ſo little concern at it, that he would not have proſecuted the Villains, had not the reſt of the *Chans* repreſented to him the dangerous conſequence of ſuch a Connivance. But notwithſtanding all theſe Demonſtrations of Affliction, the Widow of *Sefi Myrza*, being under dreadful apprehenſions for the ſafety of *Sain Myrza*, her only Son, leſt he might participate of his Father's Fate, kept him conceal'd for a conſiderable time, till *Schach Abas* (whoſe two younger Sons being blinded, were incapable of ſwaying the Scepter) having given ſufficient proof of his tenderneſs towards him, and that he intended to make him his Succeſſor, he was brought to Court, and was kept under the Tuition of his Mother; yet ſuch was the Jealouſie of *Schach Abas*, that perceiving in this young Prince a certain vivacity of Spirit, which he feared might revive in the People the Affection they had born to his Father, he ordered a Doſe of Opium of the bigneſs of a Pea to be given him every Day, to ſtupifie his Senſes; inſtead of which his Mother gave him ſome Treacle, a Preſervative againſt any Poyſon that might be given him.

Tameras Chan taking the advantage of the King's abſence, who was then in the Province of *Kilan*, recovered all the Places taken from him before in *Georgia*, againſt whom the King ſent ſeveral *Chans*, but theſe returning

1637. returning without doing any thing, they paid for it with their Heads, and the King entring *Georgia* the next Year in Person, swore, that if he Conqnered the Country, he would sell the *Georgian* Prisoners at an *Abas*, or 15 pence a Head: The King having Vanquished the *Georgians* in a Set Battel, and taken a great number of Prisoners, a Souldier with two *Abas*'s in his Hand came to the King, and putting him in mind of his Promise, desired that two of the handsomest Maids might be sold him at that price, the King granted his Request. About the same time most of the *Georgian Christians* that live at *Ispahan*, were brought out of their own Country, and oblig'd to fix their Habitations there.

Two Georgians sold for half a Crown.

Soon after *Bekirkeha*, Commander in Chief of the *Turkish* Garrison of *Babylon*, upon some disgust given him by the *Turks* offering to Surrender that City to *Schach Abas*, he March'd thither with a good Army, but before he reach'd the Place, *Bekirkeha* being reconciled to the *Ottoman* Court, sent him word that he must expect nothing but Powder and Ball from him; *Schach Abas* being next to the Soul at this Affront, resolv'd to carry it by Force cost him what it would; and accordingly, after a Siege of Six Months, having pass'd the Ditch, he ordered a great Mine (in the Management of which the *Persians* are very expert) to be sprung under the next Bastion, which made such a Breach, that the *Persians* carried the Place by Assault. He commanded *Bekirkeha* to be sow'd up in a raw Ox Hide to be exposed in the open Air, and to be fed daily, till such time that the heat of the Sun-beams having made the Hide shrink together, he ended his Life in great torment; But his Son was pardon'd, and made Governor of *Schiras*.

Babylon carried by Storm by the Persians.

The next following Year, the *Turks* endeavoured the recovery of *Bagdat*, under the Command of *Bassa Hafis Ahmed*, but being forced to raise the Siege, and their Army mouldring away by Sickness, they were glad to retreat to *Constantinople*. After this Expedition, *Schach Abas* laid the Foundation of the City of *Ferabath* in the Province of *Mesanderan*, upon a pleasant River, which not far thence exonerates it self into the *Caspian-Sea*.

Two Years after the *Turks* having once more taken a Resolution to recover *Babylon*, *Chalil* Bassa was sent thither at the Head of an Army of 500000 Men, *Schach Abas* threw himself into the City, ordering *Currzschugai Chan* with a small Body, but of his best Troops, to relieve the Place, which he effected so well, that after having harrassed the *Turks* Army for 6 Months together, he at last Attack'd and Vanquish'd them, and forc'd them to retreat to *Netzed*; The *Persian* King was so overjoy'd at this signal Victory, that he went out of the City to meet his General, and as soon as he came near him, did alight from his own Horse, and having obliged the General to get upon it, he followed him on Foot to the City.

The Conquest of Ormus.

Among the many Victories obtained by *Schach Abas* the Conquest of the City of *Ormus* is none of the least; this he took from the *Portugueze* about 6 Years before his Death; of which more in *Mandelslo*'s Travels into the *Indies*.

Schach Abas dies.

Towards the latter end of the Year 1629. *Schach Abas* finding himself seized with a violent Distemper at *Ferabath*, he summoned 4 of the Chiefest Lords of the Kingdom before him, *to wit*, *Isa Chan*, the *Kurzibaschi*, *Seiul Chan*, the *Tuschmal*, or Chief Councellor of State, *Temerbey*, the *Outwogly*, or Lord High Steward, and *Jusef Aga*, Chief Lord of his Bed-Chamber; who being come to his Bed-side, he told them, That he believing that his Sickness would prove mortal, he did recommend to them, *Sain Myrza*, his Grand-son, for his Successor; charging them to see his Will executed, and to pay him all due Obedience. It was generally believed that he had Poyson given him, and finding such Antidotes as were ordered him, proved ineffectual, he prepared himself for Death, with a more than ordinary composure of Mind, being even careful in ordering the particulars for his Interment; which he would have Celebrated in three several Places, *viz.* at *Ardebil*, *Mesched*, and *Babylon*, at the same time; tho' most are of Opinion, that he was buried at *Kufa*, near the Sepulcre of *Aly*, to keep his Death concealed. The better to secure the Succession to his Grand-son, he ordered that his Body should be set upon a Chair of State in the Publick Hall of Justice, which was so well personated, that his Death was not discovered till 6 weeks after. He died in the 65th. Year of his Age, and the 45th. of his Reign.

The Memory of this Prince is in great Veneration to this Day among the *Persians*: For setting aside some Acts of Cruelty, he was a Prince that had an equal share of Wisdom and Courage, and who signalized himself by many Victories over the *Turks*, *Indians* and *Tartars*. The *Austin Fryars* assured us, that he had no Aversion for the Christian Religion, and would converse very familiarly with them; He was very liberal to the Poor, and neglected nothing that might contribute to their Assistance; he ordered a rich Baker who refused to sell Bread at the set Rate, to be put in a red hot Oven; and a Butcher to be hung with his Back to the Hooks, because his Weight was found too light; and gave several remarkable instances of his Aversion to corrupted Judges. 1637.

His Memory dear to the Persians.

Whilst *Temir Beg*, and *Jusuf Aga*, were employed in exposing the dead Body of *Schach Abas* in the Great Hall of Justice at *Ferabath*, *Seiul Chan* hastened to *Ispahan*, where having imparted the whole Secret to the *Daruga*, *Chosrou Myrza*, they went together to the Apartment of the Mother of *Sain Myrza*, intreating her to put the Prince into their Hands; but she being afraid of the same Fate that attended his Father, was so far from complying with the Request, that she baracaded all the Avenues leading to her Chamber, so that these two Lords after having spent 3 whole Days at her Chamber Door, and fearing lest they should let slip this opportunity of advancing her Son to the Throne, pursuant to his Grandfather's Will, sent her word, that if she refused any longer to hearken to their Persuasions, they should be obliged to force the Doors; she expected the worst, delivered into their Hands the young Prince her Son, with these words; *Go Child, follow thy Father, thy Murtherers are at hand, to send thee after him.* But seeing the two Lords kissing the Princes Feet, she was soon undeceived, and had the happiness to see her Son conducted to the Palace Royal, where he was with the usual Ceremonies Crowned King of *Persia*.

His Grandson succeeds him.

He took the Name of *Sefi*, according to the desire of *Schach Abas*, and at the very beginning of his Reign gave to the *Persians* very bloody instances of his Cruel Inclinations, for he not only ordered his only Brother, tho' born of a Concubine, to have his Eyes put out, but also commanded his two Uncles, who had been bereaved of their Eyes by *Schach Abas*, to be cast down from a Rock, because, as he said, they were useless to the World without their Eye-sight.

His Reign Cruel.

Isa Chan, who had married his Aunt, the Daughter of *Schach Abas*, received no better Treatment at his Hands, for she having jestingly upbraided *Schach Sefi* with the want of Heirs, adding, that one Day, for want of such, the *Persians* might pitch upon one of her three Sons for his Successor; the King was so nettled thereat, that he ordered their Heads to be cut off, which he presented to the Mother at Table, and not long after he commanded also *Isa Chan*'s Head to be brought to him, which was done accordingly; *Seiul Chan*, as we told you before, was one of those who had most contributed towards his Advancement to the Throne, and as he for ever after remain'd stedfast to his Interest; so, when several Lords, dreading the King's Tyrannical Temper, were forming a Conspiracy against him, 1632. whilst he lay encamp'd near the *Turks*, who had besieged *Bagdat*, he gave timely notice thereof to the King, advising him to rid his Hands of those that were his Enemies; *Schach Sefi* told him that he lik'd his Council, and to convince him of it, he would begin with his own Person, as knowing him a Person of great Authority among them: But *Seiul Chan* having found means to appease his Anger, he stop'd the Execution for that time; but finding him discoursing with his Mother, (who had follow'd him in this Expedition) the next Morning, he was so incens'd thereat, that he kill'd him with his own Hands.

This *Seiul Chan* was considered in his time as one of the greatest Men of *Persia*, having signalized himself by many remarkable Actions, during the Reign of *Schach Abas*. His Embassy to the *Great Mogul* deserves our peculiar Observation; For having received a particular Command from the King, to have a strict regard to his Reputation, he acquitted himself so well as to this particular, that he could not be prevail'd upon, either by Threats or great Presents, to render the *Great Mogul* that respect which is usually paid him in that Court; So that the *Indians* finding him resolute in supporting his Master's Grandeur, among all their Attempts, at last invented this Artifice; They made

1637. made directly oppoſite to the *Great Mogul*'s Throne, a Door ſo low, that he could not enter it without ſtooping, but *Seiul Chan* being ſoon convinced of their deſign, entred the ſaid Door backwards, which irreverence ſo exaſperated the *Great Mogul*, that he not only forbore to make him thoſe Preſents uſually given to Ambaſſadors, but alſo would not permit him to be ſupply'd with the ordinary Proviſions, which reduc'd the Ambaſſador to ſuch ſtreights, that he was forc'd to part with all his Plate, nay, to ſell the Gold and Silver belonging to his Equipage, for his preſent Subſiſtence.

Tabub Chan, the Lord Chancellor of *Perſia*, did not long after undergo the ſame Fate; For, whilſt he was entertaining *Ugurlu Chan*, the Lord High Steward, *Haſſan Beg* the Clerk of the King's Cloſet, and a certain Poet, at Supper, the Captain of the Guard came to give notice to *Ugurlu Chan*, that it was time for him to come to the King's Tent, (the *Chans* being oblig'd to be in Perſon in their ſeveral Turns, upon the Guards whilſt the King is in the Field,) the Chancellor, who was unwilling to part with his Gueſts, reply'd, that it was time enough, and that the King being but a Child, would not take notice of his abſence; but the Captain of the Guard urging the Matter further, the Chancellor commanded his Servants to thruſt him out of Doors, which not being done without ſome oppoſition, the Captain was hurt in the Face; who running all bloody as he was, gave him an ample account of the whole matter. The King diſſembled his Reſentment for that time, but the next Day, when the Chancellor came to his Tent, he aſk'd him what Puniſhment was due to a Perſon, who eating his Maſters Bread, and owing every thing to him, ſlighted him? Unto which the Chancellor replying, that he deſerv'd death, the King told him, thou art that Man, who haſt treated me yeſterday like a Child, thou haſt pronounced thy own Sentence, and ſo run him into the Belly with his Cymetar, and ſeeing one of his Pages who ſtood by, to turn away his Face, he commanded his Eyes to be put out; ſaying, they were of no uſe to him.

Urgulu Chan did not long ſurvive the Chancellor, *Aliculi Chan*, Preſident of the Council, being ſent by the King to bring his Head, which he did accordingly. *Haſſan Beg*, who was alſo at the Feaſt, received the ſame Treatment; and the Poet had not long after his Noſe, Ears, Tongue, Feet and Hands, cut off, whereof he died a few Days after.

Whilſt *Schach Sefi* was at *Caſwin*, he ſummoned all the Governors of his Provinces to come to Court, which they all did accordingly, except *Alymerdan Chan*, Governor of *Candahar*, and *Dauh Chan*, Governor of *Kentze*, who each of them ſent one of their Wives, and one of their Children as Pledges of their Fidelity: But the King being not ſatisfied therewith, the firſt revolted and put *Candahar* under the Protection of the *Great Mogul*; the ſecond having amaſs'd all his Wealth, retired with it, firſt into *Georgia*, and thence into *Turky*, where he was much reſpected by *Sulthan Ibrahim*. *Schach Sefi* commanded their Wives to the Houſes of Publick Proſtitutes; the Son of *Dauh Chan* was expoſed to be miſuſed by the Grooms; but the Son of *Alymerdan*, being a very handſom Lad, was kept for the Kings own uſe.

Imanculi Chan, Governor of *Schiras*, Brother to *Dauh Chan* truſting to his Services he had done the King, went among the reſt to *Caſwin*, but was no ſooner come there, ere the King commanded his Head to be cut off, and afterwards ordered the ſame Treatment for 15 of his Sons, the 16th. narrowly eſcaping with his Mother into *Arabia*, where her Father lived at *Helbiſe*.

This *Imanculi Chan* was a Perſon in great eſteem among the *Perſians*, being the Son of *Alla Werdi Chan*, who was one of the moſt famous Captains of his Age, and had at his own Charge built the Bridge of *Iſpahan*.

Theſe reiterated examples of his cruel Diſpoſition, ſtruck ſuch terror into moſt of the *Perſians*, that they reſolved to be rid of him at any rate; to effect which, a certain Doſe of Poyſon was given him, but it being not ſtrong enough, he eſcap'd its effect by a 2 Months Sickneſs. After his Recovery, Information having been given him by a Woman of the *Seraglio*, who was at variance with her Miſtreſs, that the Women had been concern'd in preparing the Poyſon, and that the Widow of *Iſa Chan*, his Aunt, had adminiſtred it to him; he ordered a deep Pit to be dug in the Garden near the *Seraglio*, wherein forty Ladies and their Attendants were buried alive, and a rumour being ſpread on a ſudden at the ſame time, that his own Mother was dead of the Plague, moſt People were of Opinion that ſhe went the ſame way with the reſt. It was obſervable, that when he was in the humour to put in execution any of thoſe Cruelties, he was commonly clad in Scarlet, the ſight of which made the whole Court tremble, no body knowing which way the Storm would fall. 1637.

His Temper.

It muſt be confeſs'd, that at the beginning of his Reign, he was Victorious againſt the *Turks* and other Enemies; but the good Succeſs of theſe Actions muſt rather be attributed to his Generals, than his own Valour; it being certain, that upon ſuch like occaſions, he expreſs'd more Temerity than true Courage; As for inſtance, at the Siege of *Irvan*, which having been beſieged by his Forces for 4 Months, but without much probability of Succeſs, he would needs go in Perſon to ſtorm it, tho' no breach was made; His Lords finding him bent upon ſo deſperate a Reſolution, which would beyond all queſtion, coſt him his Life, made their applications to his Mother, to perſuade him from ſo dangerous an Attempt; but inſtead of a Compliance, he welcom'd her with a good box on the Ear, and dreſſing himſelf in a Common Souldiers Garb with a Pole-ax in his Hand, ſwore he would lead on the reſt to the Aſſault. The *Perſian* Lords ſeeing him thus bent to his own Deſtruction, caſt themſelves at his Feet, intreating him to grant them but 24 hours longer, and that if they did not carry the Place in the mean while, they would not any farther attempt to obſtruct his Reſolutions, which being granted them, they made the whole Army Attack the Place on all ſides, and ſo carry'd it by Storm, but with the loſs of no leſs than 50000 Men.

After he had by his ſeveral Acts of Cruelty bereaved the Kingdom of the Service of ſo many Great Perſons, the effects of it appeared manifeſtly to all the World, in the many ill Succeſſes that attended his Arms, and eſpecially in the loſs of *Babylon*, which the *Turks* regain'd from the *Perſians* after theſe laſt had been Maſters of it 26 Years.

The only commendable thing in his whole Reign, was the ſending back of 7000 Perſons that were brought out of *Georgia*, *Irvan*, *Nachtzuan*, *Chaletz*, and were kept for Slaves at *Ferabath* by *Schach Abas*, tho' not above 300 of them return'd to their Habitations; the reſt having periſh'd through the hardſhips they endured.

A Lover of Wine.

His chief delight was drinking, and he ſhewed a great deal of fondneſs to thoſe who were his Companions in drinking, tho' his ordinary Divertiſements were Women and Hunting, leaving the Adminiſtration of Juſtice and other Publick Affairs to the management of his Miniſters.

His Wives.

He had married three Wives; the firſt was the Daughter of a Colonel, who by Deſcent was no more than a Mule-driver, but at laſt got the Command of 1000 Men; his Daughter being very handſom, *Schach Abas* had her educated at Court, in order to marry her to his Grand-ſon *Sain Myrſa*, (afterward *Schach Sefi*) who married her accordingly. The ſecond was a Chriſtian, the Daughter of *Tameras Chan*, a *Georgian* Prince. The third was Siſter to the *Tartarian* Prince *Muſſal*, and Daughter to *Bika*, of whom we have had occaſion to ſpeak before.

His Concubines.

He had beſides theſe about 300 Concubines, it being the Cuſtom of the *Perſian* Governors to preſent the *Schach* with all the handſom Maids that are brought up in their Houſes, or among their Relations, whereby they either win, or frequently recover his favour; and, as by reaſon of their great numbers, the King lies not above once or twice with ſome of them, he often beſtows them upon his Governors, or Court Favorites.

The *Armenians*, to prevent their Daughters being carried to the *Seraglio*, marry them before they are 12 Years of Age, if they be handſom.

His Death.

Schach Sefi died in the Year 1642. in the 12 Year of his Reign, during which, he had committed ſo many Cruelties, that his Tyranny being become inſupportable, he was taken away, as it is ſuppoſed, by Poyſon. What was moſt obſervable, that he was of a mild Countenance and pleaſing Aſpect; his looks not betraying the leaſt of his cruel Inclinations. He was but low of Stature, but well ſhap'd, and left but one Son behind him named *Abas*, who ſucceeded him immediately, tho' he was but 13 Years of Age.

The

1637. Is Succeeded by his Son *Abas.*

The Provinces and Cities of *Persia*, are Govern'd by *Chans*, *Sulthans*, *Calenters*, *Daruga's*, *Visiers*, and *Kauchas*, which are bestow'd here purely upon account of Merit, without the least respect to Birth or Descent; which is the reason the *Persians* are always well stor'd with a sufficient number of well qualified Persons, Vertue and Merits being the only means to open their way to the highest Dignities and Employments in the Kingdom, which are neither to be bought nor Hereditary in *Persia*; and tho' the King never makes a *Chan*, but at the same time gives him certain Allotments to maintain his Dignity, and that the Child can inherit their Paternal Estates, and are perhaps look'd upon with some respect, yet must they expect their Advancement to any Dignities from nothing else but their own Deserts.

The Provinces are governed by a *Chan*, and a *Calenter*, the first being entrusted with the Administration of Justice; the second with the King's Demesns and the other Revenues of the Province. The Cities have commonly a *Daruga*, and a Village a *Kaucha*, for their Governors; The *Daruga* takes all the care of the Revenue of the Place where he resides, but is unaccountable to the *Chan* of the Province; whereas the *Calenter* delivers up his Account to the Council; the *Chans* and *Sulthans* are frequently employed in Foreign Embassies, which are not very chargeable to the *Schach*, because the Province of which he is Governor bears half the Charge.

The *Chans*, few Provinces excepted, are obliged to maintain a certain number of Souldiers out of the ordinary Revenue of each Province, the extraordinary Taxes being only brought into the King's *Exchequer*; besides which they send Presents of great value, as New-years-gifts, to the King. Those Provinces and Cities which are not under the Jurisdiction of a *Chan*, but under a *Daruga*, as part of *Georgia*, the Cities of *Caswin*, *Ispahan*, *Kastham*, *Theheram*, *Hemedan*, *Mesched*, *Kirman*, *Ormus*, &c. are freed from the maintaining any Souldiers, but in lieu thereof pay certain constant Taxes; so that in a short time the *Chan* can bring together a great Army, which he stands constantly in need of against his Potent Neighbours the *Indians*, *Usbegne Tartars*, and *Turks*.

The *Persian* Army all Horse.

The *Persians* know not what Infantry is, their Armies being only composed of Horse and Dragoons, the last of which being Arm'd with Musquets, do the same Service there as our Foot; their Horse have no other Arms but Darts and Javelins: As the use of Fire-Arms and of Cannon was not introduced into *Persia* till the Reign of *Schach Abas*, so to this Day they use their great Guns chiefly in the defence of Places, their Armies which are very swift in their Marches, not admitting of the encumbrance of heavy Carriages; the *Persians* are accounted very dextrous in the Stratagems of War.

Their Military Officers.

A General of an Army is call'd *Sedar*; a Commander in Chief of 10, or 12000 Horse, *Kurtzibaschi*; a Colonel, who Commands 1000 Men, *Minbaschi*; a Captain of 100 Men, *Jusbaschi*; and a Corporal or Leader of 10 Men, *Ohmbaschi*.

Their Allowance for a Horse-man is 300 Crowns *per Annum*, and for a Dragoon 200.

The Persians are great Enemies to Cowards, and inflict severe Punishments upon such Officers as are wanting in their Duty; but they have but an indifferent Reputation as to the keeping of their Faith in Publick Matters, as may be seen in their breach of Faith in the Capitulation of the Garrison of *Irvan*.

The *Schach's* Revenue.

The *Schach's* Revenues are computed at 8 Millions of Gold; there is no Passage or Bridge throughout all *Persia*, but a certain Tax must be paid there as well by Foreigners as Natives. The Customs also amount to a considerable Summ, the King having 10 Crowns upon every Bail of Silk, of each Horse and Ox that is sold 15 *d.* for each Ass 7 *d.* and each Sheep 3 *d.* Besides that the King lets out the *Caravanseras* built for the lodging of Foreigners and their Merchandices, in all the chief Cities; of these there are 25 at *Ispahan*, the least of which pays 5000 Crowns *per Annum*.

The Fishing of the Rivers, Baths, Stoves, Brothel-houses, and the Springs of *Nefte* are also Farm'd out by the King, as also the Waters wherewith the Fountains of *Ispahan* are supply'd from the River *Senderut*, these yield 16000 Crowns yearly. Each *Armenian* Christian pays an Annual Poll-Tax of 2 Crowns a Head; and there is no Profession or Calling in *Persia*, but what pays a certain Imposition to the King, proportionable to what the Person that exercises it gets by it. Not to mention here the vast Presents the *Chans* make continually to the *Schach*, to make good which, they Fleece the poorer sort, who are sure to be kept under Hatches here. 1637.

Those Golden-Dishes, Flaggons, and other Vessels which we saw at our Audience, and are commonly produced at the Entertainment of Foreign Ambassadors, were made in the Reign of *Schach Abas*, and weigh in all 7200 Marks of Gold.

Their Officers of the Court.

Their Military Officers, as well as those belonging to the Court, are commonly of very mean Extraction; the chiefest are these: *Eatemad Dowlet*, or Lord Chancellor, is at the same time President of the Council, Chief Minister of State, and not unlike the Lord Lieutenant of all *Persia*, being also entrusted with the Superintendency of the King's Revenue.

The Chancellor.

The *Kurtzibaschi* is Commander in Chief of a standing Body of 10000 Horse, appointed to be kept in constant Pay, by *Schach Ismael*. In time of Peace they are permitted to retire to their respective Habitations, notwithstanding which, they have, besides many Indemnities, their full Pay allow'd them.

The *Kurtzibaschi.*

The *Meheter*, or Lord Chamberlain, is the first Lord of the King's Bed-Chamber, who being always near his Person, makes great advantages of the many opportunities he has to speak to him.

The *Meheter.*

The *Wakenhuis*, or Secretary of State, keeps also an account of the King's Revenue, and issues out all Dispatches sent to the Provinces; he has 40 Clerks under him.

The Secretary of State.

The *Divanbeki*, or President of the Council of Justice, presides at the Judgment of Criminal Causes, in conjunction with the *Sedar* and *Kasi*, and the other Secular and Ecclesiastical Judges; them they call *Schehra* and *Oef*; the chief Court of Judicature is kept at the Entrance of the Royal Palace, in a Hall call'd *Diwan-Chane*; the *Diwanbeki* is present at the Execution of Malefactors.

The Chief Judge.

The *Kularagasi* or Chief Commander of the *Kulam* or Slaves, of which 8000 are kept in constant Pay to serve in the Wars, they are permitted to live in time of Peace like the *Kurtzi*, and have the same Stipend, but don't enjoy the same Privileges.

Kularagasi.

The *Eischikagasi-Baschi*, or Lord High Steward, has 40 Under-Stewards, call'd *Eischikagasi*, of whom 4 or 5 are always in waiting at a time, which is by half Years; their Station is at the Door of the King's Apartment; the *Eischikagasi Baschi* himself always carries a Staff they call *Dekenek*, and is always to stand before the King, when he eats in Publick; He is also one of those who introduces Foreign Ambassadors under their Arms, to the Audience of the *Schach*.

Eischikagasi-Baschi.

The *Jesaul Scebet*, or Master of the Ceremonies, carries also a Staff, his chief business is to place Strangers at the King's Table, or at publick Ceremonies.

Jesaul Scebet.

The *Nasir*, or Controller of the Houshold, has also the Quality of *Kerek Jerak*, i. e. Purveyor General.

The *Nasir.*

The *Tuschmal*, or Chief Surveyor of the King's Kitchin.

The *Tuschmal.*

The *Dawatter*, or Secretary of the King's Closet, this word being derived from *Dawat*, i. e. an Ink-horn, his chief Function consisting in presenting the Ink-horn to the King, as often as he is to Sign any thing; but the King carries the Seal himself about his Neck, and Seals or Signs himself by putting the Seal into the Ink, and afterwards pressing it upon the Paper.

The Secretary of the Closet.

The *Aly-baly-bek*, Chief of the Gentlemen of the Stables, or Master of the Horse of *Persia*.

The Master of the Horse.

The *Mirischikar*, or Grand Faulconer. The *Seckbahm Bashi*, or Overseer of the Hunting-Dogs, or Chief Huntsman.

Grand Faulconer. Huntsman.

The *Jesalkor*, or Grand Marshal of the King's Lodgings, is also Judge of the Houshold; his business is to March before the King whenever he stirs abroad, with a Staff in his Hand to make way; he has several Under *Jesauls* under his Jurisdiction, who are like our Harbingers, and are sometimes employed for Messengers to secure such as are to be made Prisoners of State. The other Officers are: The *Suffretzi*, or Carver. The *Abdar*, whose Function is to keep the Water for the King's drinking sealed up in a Jarr, and to present it to him. The *Chazinedal*, or Superintendant of the King's Revenue. The *Ambadar*, or Overseer of the King's Granaries. The *Jesaul Nedar*, whose business it is to keep the King's Shooes, when he puts them off in the Anti-Chamber. The *Mehemanders*, who conduct Ambassadors from one Province to another to Court, and reconduct them to the Frontiers. The Officers of less Note are: The *Kischitzi-baschi*, or

The *Jesalkor.*

Captain

1637. Captain of the Guard. The *Tzabedar*, or Controller of the Artillery. The *Tzartzi*, Proclaims the King's Orders. The *Tzelaudar-baſchi* is the Chief over the Grooms, who conduct the King's led Horſes. The *Kitaddar*, or Library-keeper. The *Meamar*, or Engineer General. The *Seraidar*, or Surveyor of the Buildings. The *Klita*, or Captain of the Gate. The *Scherbedar*, or Keeper of the Preſerves and Spices. The *Cannati*, or Confectioner. The *Omarzdar*, or Governor of the Pages. The *Schirtzi*, or Cup-bearer. The *Eachtzi*, or Keeper of the King's Gold Plate. The *Ashtzi*, or Clerk of the Kitchin. The *Eemektzi*, the King's Baker. The *Farraſh*, kindles, and looks after the Fire. The *Sava* is the Water-bearer. The *Bildar*, are employed to mend the High-ways and make Steps where it is needful, for the better treading of the Camels; they alſo pitch Tents, and dig Pits to get Water when the King is to go any Journey. The *Schatir*, are the Kings Foot-men, and the *Riva* are the King's Body-Guard, Arm'd with Pole-Axes, and ſometimes ſerve for Executioners.

All theſe Officers have their certain Salaries and other Allowances; which are very punctually paid, the ſame being aſſigned either upon certain Demeſns, or upon ſome Branch of the Revenue, which they receive themſelves.

The *Perſians* obſerve conſtantly this Cuſtom, that they ſcarce ever meet about any buſineſs, without ſomething of Entertainment: thus we Din'd with the King at our firſt and laſt Audiences, and never parted without a Collation when we were Treating with the Chancellor.

The King never eats or appears in Publick without his *Hakim*, or Phyſician, who directs him what is beſt for him to eat; the *Seder*, who being choſen by the King and the *Kaſi*, is to explain certain Paſſages in the *Alchoran*, whilſt he is at Table; or without his *Minatzim*, or Aſtrologer, who is to obſerve and to determine the fortunate and unfortunate Hours. The *Seder* is not only adviſed with in Eccleſiaſtical Affairs, but alſo in Criminal Cauſes, and he always gives his Advice ſeal'd up, which the King generally approves with his own Seal, adding theſe words; *This is the Advice of our* Seder, *which we confirm.*

Their Adminiſtration of Juſtice. Moſt Civil Cauſes are decided by the *Oef* or Secular Judges, whoſe Head is the *Diwan-beki*, or Chief Juſtice, they plead generally on *Mondays* and *Thurſdays*; if the Cauſe be of extraordinary Moment, it is reported to the King, who, after having heard the Opinion of the Judges, decides the Matter.

Uſury not allow'd of. Uſury is a thing abſolutely forbidden in *Perſia*, thoſe that uſe it being accounted infamous, and ſeverely puniſhed; though at the ſame time they are allowed to beſtow their Money upon Mortgages of Lands, Gardens and Houſes, which if not redeemed by the prefixed time, are forfeited to the Mortgagees. We ſaw an Example of the puniſhment of an Uſurer whilſt we were at *Ardebil*, who had taken one and a half *per Cent. per Month*; they laid him ſtretch'd upon the ground, and knock'd out his Teeth one after another with a little Mallet.

Their Puniſhments ſevere. It muſt be confeſs'd, that the Puniſhments of the *Perſians* are very ſevere, and ſavouring not a little of Cruelty; it is but a ſmall Crime that deſerves the cutting off the Noſe, Ears, nay ſometimes of the Feet and Hands; a Rape is puniſhed with the amputation of the Member that committed the Crime, no other Witneſs being required than the Womans Oath, repeated 3 times. The two laſt Kings have cauſed ſeveral Malefactors to be ty'd betwixt two Boards, and ſo be ſawn aſunder. *Schach Abas* cut off with his own Hands the Noſe and Ears of one of his Ambaſſadors who had miſuſed his Domeſticks during his Embaſſy into *Spain*, and forced him to eat them immediately, together with a piece of Fleſh he cut out of his Arm. I remember that *Imanculi Chan*, who was ſent Ambaſſador by *Schach Sefi* to his Highneſs the Duke of *Holſtein*, ordered a red-hot Spit to be preſs'd cloſe to the Back of one of his Domeſticks for a very ſlender fault, and anothers Fingers to be broken with the back of a Hatchet.

The Religion of the *Perſians*. Without pretending to entangle our ſelves in the ancient Religion of the *Perſians*, we will in this place content our ſelves to inveſtigate the true difference betwixt them and the *Turks*, they being both *Mahometans*.

The Etymology of the word *Muſſulmans*. Notwithſtanding the conſtant Animoſity and Differences betwixt the *Perſians* and the *Turks*, the firſt as well as the laſt challenge the Name of *Muſſulmans*; a word derived from the *Hebrew* word *Salama*, i.e. delivered or ſaved. For according to the *Alchoran*, all ſuch as refuſed to pronounce theſe words; *There is no other God but one, and* Mahomet *the Apoſtle of God*, being to be ſlain, ſuch as *ſaved* their Lives by this Confeſſion obtained the Name of *Muſſulmans*, or *delivered*; tho' the Modern *Turks* apply this word *ſaved* from eternal Damnation, for which reaſon they don't ſtile their Sons *Muſſulmans* till they are Circumciſed. 1637.

Circumciſion. The *Perſians* agree with the *Turks* in Circumciſion, which among the firſt is not done till they are 7, 8, or 9 Years of age, when, after they have given them a ſtupifying Draught, they cut off the Prepuce. But the main difference in their Religion conſiſts in this, (1.) They don't explain the *Alchoran* in the ſame manner. (2.) They don't acknowledge the ſame Saints. (3.) Nor the ſame Miracles. (4.) Neither have they the ſame *Moſques*, or Ceremonies.

The different Principles of Religion. They are diametrically oppoſite in the very Principles of their Religion; The *Perſians* alledge that *Mahomet* having by his laſt Will appointed *Aly* his Nephew and Son-in-law (for he married his Daughter *Fatima* and was his Brother's Son) to ſucceed him both in Spirituals and Temporals, *Abubeker*, *Omar*, and *Oſman*, all three Fathers-in-law to *Mahomet*, Uſurped the *Califate*, and Political Government, in oppoſition to *Aly* and his Adherents; and, when after their Death *Aly* got into the Poſſeſſion of the *Califate*, the ſame was call'd in Queſtion by the Relations of the 3 laſt *Califfs*: But as *Aly* changed nothing in the *Alchoran*, and ſubmitted to *Mahomet's* words where the Text was clear, explaining only ſome dubious Paſſages; this cauſed no real alteration in the *Mahometan* Religion, till the Year 1363. when a certain learned *Perſian* named *Sefi*, ſet up at *Ardebil*, and deducing his Origin from *Muſai Caſum*, the Son of *Hoſſein*, who was *Aly's* Son, and confirming his Pretenſions by a great Auſterity and outward innocent behaviour, he thereby raiſed himſelf to the Quality of *Schich*, or Prophet, and began to declare publickly both by words and Writing againſt *Abubeker*, *Omar* and *Oſman*, who had ſucceſſively defrauded *Aly* of his Right, and that he was ſent by God to undeceive the World, and to revive the Glory of *Aly*; to confirm which, he put them in mind of ſeveral Miracles, which he ſaid were done by *Aly*, but buried in Oblivion hitherto by the Malice of the Turks; becauſe in the true Explication of the *Alchoran* of *Aly*, which were digeſted into Writing by *Tzafer-ſaduk*, his Succeſſor, ſeveral things were aſſerted oppoſite to the Opinion of *Hanife*, whoſe Opinion the *Turks* had embraced. The *Perſians* being naturally inclined to Novelties, and perhaps willing enough to foment the Animoſities which were firmly rooted betwixt them and the *Turks*, occaſioned by the many Wars that had been betwixt them, about the Diviſion of their Frontiers; they were for maintaining the Reputation of *Aly*, and therefore added to the Creed of the *Turks*, *There is no other God but one, and* Mahomet *the Apoſtle of God*, theſe words; *and* Aly, *Coadjutor, or Lieutenant of God*; nay, they did not ſtop here, for tho' they acknowledged he was no God, yet did they affirm, that he did approach very near to Divinity, and prefer'd him before *Mahomet* himſelf, alledging, that the *Alchoran* was intended by God for *Aly*, but that by miſtake it happened to fall into *Mahomet's* Hands; all which together, with the Execrations iſſued againſt the *Turkiſh* Prophets, *Abubeker*, *Omar*, and *Oſman*, (which are ſo common in *Perſia*, that even thoſe who call the People together, never fail to do it,) an irreconcilable hatred was introduced betwixt theſe two Potent Nations.

The first Rite of the *Perſian* Religion. The *Perſians* not contented to have exalted their Darling Prophet *Aly* to ſo high a pitch, thought fit to aſſert that part of his Sanctity was tranſmitted to his Family, and that his firſt Succeſſors ought to be numbred among the Saints, by reaſon of their Miracles, for which purpoſe they have erected very Magnificent Tombs to their Memory. *Aly* left 2 Sons, *Haſſan* and *Hoſſein*, who left *Seinel*, *Abedin*, *Mahomet-Bagur*, *Tzafer-Saduk*, *Muſai-Caſum*, *Riſa*, *Mahomet-Taggi*, *Alli-Naggi*, *Hoſſein Alkeri*, and *Mehedii*; of which *Haſſan*, *Seinel*, *Abedin*, *Mahomet-Bagur*, *Mahomet-Taggi*, and *Alli-Naggi*, have their Sepulcres at *Medina*, *Tzafer-Saduk* at *Babylon*, and *Hoſſein*, *Muſai-Caſum*, and *Hoſſein-Alkeri* at *Kelbula*, or *Kufa*. The *Perſian* Saints.

Theſe are their 12 Head Saints, who they ſtile Prelates: Unto theſe as well as to *Schich Sefi*, the Foun-

1637. der of their Sect, they pay their Devotions, and go to his Tomb, and those of the other three, interr'd at *Kufa*, on Pilgrimage, when they can't conveniently go to *Medina* or *Mecca*. The Pilgrims receive a Certificate of their having perform'd the Duty of true *Mussulmans*, which besides this serves them as a sure Protection against the anger of the *Chans*, under whose Jurisdiction they live, and of the King himself. As the *Persians* celebrate with abundance of Ceremonies, the Anniversary of the Death of *Hassan*, and *Hossein*, the *Turks* laugh at it, and in lieu thereof extol *Abubeker*, *Omar*, and *Osman*, as also *Hanife* their Chief Commentator upon the *Alchoran*, the three first of which the *Persians* look upon as Usurpers, and upon the last as an Impostor; who, say they, being a Servant of *Tzafer-saduk*, one of their Saints, preserv'd the Water wherewith he had wash'd his Hands, which he carry'd into *Turky*, and cur'd those that were blind with it, the Honour of which belonged only to that Saint.

Commentators upon the *Alchoran*.

Among all the Commentators upon the *Alchoran*, the *Persians* give the Preference to *Aly*, and *Tzafer-saduk*. The *Turks* declare with the same Passion for *Hanife*, as the *Usbeque Tartars* and the *Indians* follow the Opinions of *Hembili*, and *Maleki*; as the *Alchoran* is so obscurely writ in many places, as not to be understood by any human Art, the Commentators have supply'd its defects with such absurd Fictions and Impostures, that it is almost unconceivable how so cunning a Nation as the *Persians* are, and so well vers'd in the Affairs of the World, could possibly be so much imposed upon, as to give the least credit to those Fables, as well as the Miracles of their Saints; most of which carry so little probability along with them, that they scarce deserve to be mentioned, much less to be related here.

The *Turks* don't give the least credit to any of the *Persian* Miracles, though they have so much Veneration for *Aly*, as to acknowledge him for a Saint, and a near Kinsman of *Mahomet*, and praise him for an excellent Horse-man, which is the reason that when they get on Horse-back, they say, *Isa Aly, in the Name of* Aly.

Their difference in Religious Ceremonies.

The difference in their Religious Ceremonies are as great betwixt the *Persians* and *Turks* as their Principles. If a *Persian* is to prepare himself for his Devotion, by Ablution, he turns up his Sleeves above the Elbow, washes his Hands, which he afterwards puts two several times upon his Arms, stroaking them from the Elbow down to the Wrists, and stroaks his Face with the right hand only. A *Turk* takes up as much Water as he can conveniently hold betwixt his two Hands, rubs therewith his Face, and afterwards stroaks 3 several times, first from the Fore-head down to the Chin, and afterwards from the Chin up to the Fore-head; he also draws with his breath some Water out of his Hands, and therewith washes his Mouth and Nose. A *Persian* stroaks his Head with his moist Hand only, from the Nape of the Neck to the Fore-head, and his Feet up as far as to the Ancles; whereas a *Turk* first pours Water on his Head, and, then with his moist Hand washes his Feet, and he puts his Fore-finger into the Ears which he rubs soundly with the Thumb afterwards; and with the same Finger stroaks his Head from the Nape of the Neck to the Throat. The *Persians* make use of a peculiar Stone, or rather piece of greyish Clay hardned, of an Octogonal Figure, which being made of the Earth about *Meshef* and *Kufa*, where *Hossein* was kill'd and buried, is about three Inches Diameter, and contains the Names of the 12 *Persian* Saints; these are sold by the *Arabians* to the *Persians*, who, whilst they are at Prayers, touch their Fore-heads with them, or perhaps lay them upon the ground, and so touch it with their Fore-heads. The Oblation is performed at home, before they go to the *Mosque*, where no Women are permitted to appear.

Their Prayers.

The *Persians* begin their Prayers at the *Mosque* with *Alla Ekber*, with their Eyes fix'd on the Ground, and their Arms hanging down carelessly; but the *Turks* keep both their Hands upon their Breasts; the *Persians* afterwards putting their Hands upon their Ears, turn their Faces to the South, because *Medina* and *Mecca* lay to the South of *Ardebil*, where their Sect drew its first Origin. After they have turned their Faces to the South, they begin the *Alihemdo Lilla*, which done, they lay their Hands on their Knees, and so stooping lay the *Subhanna Rebbi*, and repeat the *Alla Ekber*. Then kneeling down they repeat the *Subhanna Rebbi* with their Arms stretch'd out, touching the grey Stone with their Fore-heads. They conclude their Prayers in this kneeling Posture, and rising up turn to the right and left, pronouncing with a low Voice, *Salom alekom, Salom alekom*, their Salutations to the Angels, by whose assistance they believe the Devils have been kept off from disturbing them in their Devotions. The *Turks* salute the Angels before they finish their Prayers. According to the Tenets of the *Persian* Religion, they ought to say their Prayers five several times a Day, *viz.* In the Morning with the rising of the Sun, at Noon, in the Afternoon, in the Evening, and at going to Bed. Their ordinary Prayer is the *Fatah*, and next to that the *Alihemdo lilla*, which runs thus, *Glory be to the Lord of all Creatures, the King of the last Judgment. We honour and adore thee; don't leave us in our necessities; Lead us in thy way, and into the path of those to whom thou hast shew'd thy goodness; and not into the way of those, upon whom thou hast poured out thy wrath; nor into the path of those, whom thou hast suffered to go astray.* Amen. 1637.

Are very Devout.

The *Persians* scarce ever undertake any thing, but they pronounce these words, *bismilla rahman rahim*, i.e. *in the Name of God*; all the Chapters in the *Alchoran* beginning with the same; unto which they add sometimes these words, *In the Name of him who affords his Protection to, and is the Refuge of Souls.* And they are so intent upon their Devotion whilst they are at Prayers, that I remember I have often come into the great *Mosque* of *Ispahan*, at their Prayer time, and found their Eyes either fix'd on the ground, or else lifted up to Heaven, with so much earnestness, that they did not take the least notice of me. Some pronounce their Prayers with so much fervency and assiduity, that they fall into a Swoon, being quite out of breath. Some use certain Beads consisting of three dozen, and distinguish'd by great Beads.

Friday being the Day chiefly dedicated to their Religious Exercises, the *Chatib*, or Preacher reads certain Chapters out of the *Alchoran* with their Explications, from the Pulpit. The Bible, which they say has been quite adulterated by the *Jews* and *Greeks*, they don't put in comparison with the *Alchoran*, which they say is more correct, and the true Word of God. Accordingly their Opinion of the Creation of the World, of the Last Judgment, and Eternal Life, are very strange and extravagant.

Their Opinions very odd.

They assert that God created 7 Hells and 7 Paradises, unto which the eighth was added afterwards, concerning which they tell you a fabulous Story of one *Ath*, Grand-father of *Nimroth*: They often assign their Children one of their Saints as his Patron, sometimes before they are brought into the World; hence come the Names of *Mahomedculi*, *Imamculi*, *Aliculi*, &c. *Slaves of* Mahomet, *of* Iman, *and* Aly; they have a i.e. hole in their Ears, being the Badge of their Slavery.

Dedicate their Children to Saints.

The *Persians* also sometimes devote their Children to a Religious Life, but when they grow up and dislike it, they may be dispensed from this Vow for a certain Summ of Money.

Their Lent.

Their Lent continues a Month once a Year, which begins and ends with the Course of the Moon, of the Month *Ramesan*; the *Persians* call it *Rusch*, and the *Turks Oruzs*; they are obliged neither to eat nor drink during this Fast, from Sun-rising to Sun-set, but as they have liberty to eat at their own pleasure all the Night time, most of them make it up then, and after they have fill'd themselves well with Wine and good Meat, go to sleep towards Morning, and so pass away the Days. A Dispensation may also be obtained for Money by those who don't care for fasting.

The Kindred of *Mahomet*.

The Posterity of *Mahomet* and *Aly*, called *Seid* by the *Persians*, enjoy great Immunities. They never cut their Hair above 2 Inches breadth, but tie it up in a Tress; they never marry out of their own Family, are clad in white, and wear flat Shooes. They are not only strictly forbidden the use of Wine, but also must not be present where any is drunk; if they touch a Dog they are unclean, and one single untruth forfeits all their Privileges; they have such a Veneration for their Descent, that they swear by nothing else but *by their Birth*, whereas the other *Persians* swear by *God*, *Aly*, *Schich-Sefi*, &c. Some who have Possessions in Cities and Villages are generally rich, because they are exempted from paying of Taxes. Some Vagabonds there are who assuming the Title of *Seid*, which they commonly confirm by forged Testimonials, travell from place to place, and sell some Hair, which they say was taken off *Mahomet's* Head, at a very dear rate; the *Persians* lay this upon their Books whilst

1637. whilſt they are ſaying their Prayers. We ſaw ſuch a one in the Province of *Kilan*, who, by the help of a Chryſtal cut half round, ſet Cotton on fire as we do with our Burning-Glaſſes, which being look'd upon by the *Perſians* as miraculous; he eaſily got the Reputation of being one of *Mahomet's* Kindred. I remember that I ſhew'd to the *Perſian Ambaſſadors* that came into *Holſtein*, how eaſie a thing it was to draw Fire from the Sun, even in the midſt of Winter, by means of a Chryſtal full of Water, or a piece of Ice it ſelf which I had made half round in a Pewter Porrenger, at which they were ſo ſurpriſed, that I had enough to do to perſuade them, that it was not done by Witchraft.

Another ſort of Religious Men.

There is alſo another ſort of Religious Men in *Perſia* call'd *Abdalla's*, who deduce their Origin from *Aly*, and are like the *Derviſes* among the *Turks*. They are a kind of Monks meanly habited in ſleeveleſs Coats, pieced together and quilted. Some wear no more than a Hair-Cloth wrapt about them, with a Serpent of Braſs round their Waſte, which is beſtow'd upon them by their Doctors as they enter into the Order. They are Conſecrated by the *Suffi-baſchi*, or Head of the *Suffi*. Their buſineſs is chiefly to get their Livelyhood, by ſtraggling up and down the Country, to preach to the vulgar ſort of People in the Publick Places, their chief Theme turning upon the Praiſe of their Saints, and reviling thoſe of the *Turks*, by telling obſcene and ridiculous Stories of them, to heighten the Animoſity the *Perſians* have conceived againſt the *Turkiſh* Religion. They have in their Hands a kind of a Wooden Scepter, wherewith they make very odd Geſtures; for the reſt they are a vicious ſort of People, Drinking, Buggery and Robbery being their common Practice, which is the reaſon that certain Chappels are built near the *Moſques*, for their Lodging, there being very few who care to receive them at their Houſes, by reaſon of their Debauchery. Of this we had an Inſtance, whilſt we were at *Ardebil*; For one of theſe *Abdalla's* being at the Village *Lekere*, ſcarce 3 Lgs from that City, found means to get into a Peaſants Houſe, whilſt his Wife, who was very handſome, was gone out to milk the Kine, ſollicited her in her Husbands's abſence, to admit him to her Bed, which the Woman ſeemingly conſented to, but under pretence of getting ſomething for her Supper, got into another Room, where ſhe barricadoed her ſelf up ſo ſtrongly, that the *Abdalla* not being able to force the Door, threatned to kill her Child, unleſs ſhe opened it, which ſhe refuſing to do, he cut the Child in four quarters, and having afterwards made a hole under the Threſhold of the Door, thruſt himſelf into it to get through; the Woman being put to the greateſt nonplus, happens to find a Plough-ſhare in the Room, wherewith ſhe cut his Head and Neck, till he expired. Her Husband and ſome of the Neighbourhood coming in immediately after, ſhe told them all that had happened, and how the Villain at the firſt blow ſhe gave him, begg'd to have his Life ſpar'd, offering a good Summ of Money if ſhe would ſave him, whereupon the Husband having thoroughly ſearched his ragged Coat, found 800 *Chequines* quilted in it. His Body was burnt to Aſhes.

Their Interments.

The *Perſians* commonly bury their Dead within a few hours after they are expired; they waſh the dead Bodies before their Interment, the Vulgar ſort in the Church-yard, Perſons of Note in their Houſes. I ſaw a young Man thus waſh'd at *Caſwin*; they carry'd him in his Cloaths, before he was well cold, ſinging, to the Church-yard, where being ſtrip'd, they put him into a Ciſtern of Free-ſtone of about 16 foot ſquare. After his Body had been well waſh'd by the Sexton, they put a clean ſhirt about him, and being wrap'd up in a Calicoe Sheet, he was laid upon a Bier, and thus carry'd to the Grave, which was hard by. Perſons of Quality are Inter'd with much Ceremony; for after they are waſh'd they ſet their Body upright, (all the Overtures of which are ſtopp'd with Cotton) and pour Camphir Water upon the Head, which runs down all over the Body. Then they depoſit the dead Body near the Grave, where the Prieſt reads certain Paſſages out of the *Alchoran*, which done, he lifts up the Head a little, but preſently lets it down again, and ſo puts it into the Grave without a Coffin; ſome of the Graves are Vaulted, others only Wainſcoted. The Body is laid on the right ſide of the Grave, with the Face to the Weſt, it being the Opinion of the *Perſians* that the Day of Judgment ſhall begin in the Weſt. Then the Prieſt takes up a little Earth, and having read another Paſſage out of the *Alchoran*, goes back 7 paces from the Grave, and afterwards returning again, reads another Paſſage out of the *Alchoran*, and ſo retires with the whole Company. The richer ſort make a Feaſt on the 3d. Day after the Interment, and ſometimes alſo on the 7th. the 40th. and at the *Naurus*, the *Kurban*, and *Rameſan*, then they give Alms to the Poor. 1637.

The reaſon they give for ſtopping ſo cloſe all the Overtures of their Bodies, and making their Graves Vault-wiſe is, that whilſt the Prieſt retreats 7 paces from the Grave, the 2 Angels *Nekir* and *Munkir* come into it, and if the Overtures were not thus cloſed, they might be defiled by ſome uncleanneſs. They further aſſert, that theſe 2 Angels bring the Soul back to the Body for that time, and that they ask ſeveral Queſtions of the Deceaſed, which if he anſwers to as he ought to do, they then ſeize upon the Soul, which thereby is certainly ſaved.

The *Perſians* of any Note are inter'd with a great deal of Pomp; the Gentleman of *Schamachie*, who, as we told you, kill'd himſelf with drinking of *Aqua-vitæ*, was buried in the following manner: In the Front of the Proceſſion 6 Men carry'd 6 Banners on 6 long Poles, wreath'd; theſe were follow'd by 4 Horſes, the firſt carrying the deceaſed Perſon's Bow and Arrows, the other 3 his Cloathes; and after theſe one of his Servants mounted on a fine Mule carry'd his Turbant. After him came 2 Men with certain Towers call'd *Nachal*, upon their Heads, adorn'd with large Plumes of Feathers, leaping and dancing to the ſound of certain Tabours and Copper Baſons, they ſtruck one againſt another. Betwixt the Muſicians and the Dancers you have certain Perſons who carried eight Diſhes of Preſerves, with a Sugar Cake in the midſt of each, wrap'd in blue Paper, which is their Mourning colour; round each Cake being placed 3 lighted Wax Candles. Next came divers of the *Suffi* with their white Turbants; then 2 Bands of Muſicians ſinging with a loud Voice the *la illa illaha*, and the *Alla Ekber*, with ſuch odd Countenances, and awkward Geſtures, as befitted rather a *Scaramouch* in a Farce than a Funeral. Theſe were followed by 3 Boys with their right Arms and Shoulders naked, their Arms and Fore-head ſo ſcratch'd, that the blood trickled down to the ground. This part of the Proceſſion was cloſed by 3 Men each of them carrying a Tree, on which were ty'd ſome red Apples, and ſome Treſſes of Hair, which his 3 Wives had either pull'd out, or cut off their Heads; as alſo many pieces of green and red Paper. Then the Body was carry'd upon a Bier on the Shoulders of 8 Men, being covered with a fine Garment made of the beſt *Buchar*-Sheep Skins. After the Corps came 4 Men, carrying a young Lad aloft in a Chair, who read certain Paſſages out of the *Alchoran*. The Relations and Friends brought up the Rear, and accompany'd the Corps to a certain place in the City, from whence it was to be transported to *Babylon*.

CHAP. VII.

The Travels of the Duke of Holstein's *Ambassadors into* Persia, Tartary, *and* Muscovy.

1637. HAving given you a large Account of what we found most remarkable during our stay at *Ispahan*, in the preceding Chapter, it will now be our Task to give you the particulars of our Return out of that Kingdom.

The first difficulty we met with, when we were just upon the point of leaving the Capital City of *Persia*, was, that *Abasculi Chan*, our *Mehemander*, having received expres Orders from the *Schach*, to conduct us in our return thro' the Province of *Kilan*, which being one of the finest of all *Persia*, he had a mind we should take a view of it in our Journey, besides that we were likely to meet with better Accommodation there, than any other way. But this being misinterpreted by some of our Retinue, as if the *Schach* out of an aversion he had taken against the Ambassador *Brugman*, had done it with an intention to sacrifice us all to the fury of a barbarous People, (for such are the Inhabitants of that Province,) *Michael Cordes*, the Captain of our Ship, and his Mate, one of the Pages, the Chirurgeon, and one of the Guard, took Sanctuary in the *Alla Capi*.

Some of the Retinue take Sanctuary.

However we left *Ispahan* the 21st. of *Dec.* in the Evening, and after having been treated with a Collation a League from the City by the *English*, we made that Night 3 Lgs to the Village of *Reschman*.

The Ambassadors leave *Ispahan*.

Here we stay'd all that Day, which gave opportunity to the *Austin Friars* at *Ispahan*, some *French* Merchants, and among the rest too, Mr. *Mandelsloe* to take their leaves of us; the last of which acquainted us, that *Imanculi Chan*, the *Schach*'s Ambassador to the Duke of *Holstein*, was to follow us in few Days, and that the Presents he was to carry along with him, were valued at 25000 Crowns.

The 23d. after having taken our final leave of our Friends there, we Traveled that Day 5 Lgs, to the *Caravansera* of *Dombi*; and the next Day 5 Lgs more, to the *Caravansera* of *Serdehe*. We continued our Journey the 25th. being *Christmas-day*, and seeing at some distance the Tents of divers colours, under which the *Schach* Encamp'd at that time; Mr. *Murrher* was sent to Complement him, whilst we continued our Journey to the little City of *Natens*.

Come to *Katschan*.

The 26th. we pass'd on to the *Caravansera* call'd *Chotzakassim*, and the 27th. to the City of *Katschan*, where we were detained 4 Days, in reconciling the Differences that were arisen betwixt the Ambassador *Brugman* (occasioned by his domineering humour) and our *Mehemander*, who would have left us, in order to make his Complaint at Court.

1638. *Jan.* 1st. After having celebrated the *New-years-day* by the firing of our *Cannon*, and a Sermon, we continued our Journey in the Afternoon, and made 5 Lgs to the Village of *Sensen*, and the 2d. 5 Lgs further, to *Kasmabath*.

To *Kom*.

The 3d. we arrived in the City of *Kom*, where being very conveniently Lodged near the Market-place, we staid the 4. and were very well entertain'd, first by our *Mehemander*, and at Night by the *Muscovite* Envoy.

Jan. 5th. We had scarce left the City of *Kom*, but we perceived the Sun eclipsed 3 parts in 4, in its greatest obscurity, and made 5 Lgs that Day, to the *Caravansera* of *Schaserabath*; just to the right of this *Caravansera* we saw the Mountain of *Kitissim*, which is not so much remarkable for its height, as its being surrounded with many Salt Hills, the Country thereabouts, producing likewise a vast quantity of Salt and Salt-Peter, wherewith this Mountain, as well as those of *Nachtzuan*, *Kulb*, *Urumi*, *Kemre*, *Hemedan*, *Bisetan*, and *Suldus*, furnish the whole *Persian* Empire, being digg'd out of a Quary like Stone. The *Persians* have a certain Proverb concerning the Mountain of *Kitissim*, viz. That *those who go it up, come not down*, from whence some others have taken occasion to represent this Mountain as of a most dangerous access, whereas the whole is only an Equivocation, implying no more than this, That whilst they are going up, they can't come down at the same time.

The Mountain of *Kitissim*.

The 6. we had scarce left our Quarters when the Ambassador *Brugman* by a fall from his Horse put his right Arm out of Joynt, which so disordered his Brains, that we were forced to stay at *Saba* the next Day; we continued our Journey the 8th. making 9 Lgs, to the *Caravansera* of *Choskera*. We lost a Mule by the way, which being stoln with its Loading by some Peasants, we found him again in an adjacent Village, but the Thieves had made their escape with part of the Booty. The same Evening the Ambassador *Crusius* took care to punish some of our Seamen, who had committed several Disorders at *Saba*; but they standing upon their Defence, were seized by force, and clapt into Irons till our arrival at *Schamachie*. All hereabouts, and till we came to the Mountains of *Kilan*, we found the Snow half a foot deep upon the ground.

1638. Come to *Saba*.

Jan. 9. After we had travell'd 3 Lgs, we met with a certain Person of Quality, whose Name was *Theophilus de Schonberg*, a German by Birth, being sent by the King of *Poland* as his Ambassador to the *Schach*. He had been obliged by the *Muscovites* to send back the greatest part of his Retinue, consisting of 200 Persons, from *Smolensko*, his Train consisting now of no more than 25. He delivered to us a Letter from the *Armenian* Bishop we saw at *Astrachan*, and told us that a good quantity of Provisions lay ready in that City for our use.

They meet with a *Polish* Ambassador.

As we were travelling along the Road, we saw at a distance upon a Hill, one of the King's Hunting-houses, which was a very fair Structure. Our intention was to lie that Night at the Village of *Arasenc*, 6 Lgs from our last Nights Quarters; but the Harbinger that was sent before to prepare our Lodgings, when the Inhabitants well remembring the Affront the Ambassador *Brugman* put upon the Judge of the Village, at the time of our coming into *Persia*, by throwing Water (which he had brought to *Brugman* to wash his hands) with the Bason into his Face, refused us entrance. The Villages of *Dowlet*, *Abath*, and *Ketzisan*, being of the same humour, we were forced to travel 3 Lgs further, through very slippery ways, to the Village of *Kulluskur*, so that some of our Retinue did not reach our Quarters till towards Day-light.

The 10th. proved not much better, for our Beasts being much tired with the last Days Fatigue, most of our People were forced to travel on foot, and some were left behind, which were sent for after our Arrival at *Caswin*, which was on the 11th. and where we were obliged to tarry 9 Days, till fresh Beasts could be provided for our Journey.

Come to *Caswin*.

Here we saw not far from the Ambassador's Lodgings, a great Tree full of Nails and Pibble-stones, dedicated to one of their *Pyrs*, or *Beats*, who is buried under this Tree; each Nail or Pibble being a peculiar mark of the Miracles he does there in curing the Tooth-ach, Agues, and certain other Distempers. Those who are troubled with the Tooth-ach, only touch the aking Tooth with a Nail or Pibble, which they fasten as high as they can reach with their Mouth, to the Tree, and so believe themselves cured by this means; as a Testimony whereof they tie certain Ribbonds on the Boughs of the Tree, and give certain Alms to the Religious Man that keeps it; which is the reason that divers Counterfeited Trees of this kind are found in *Persia*.

Superstitious Cures of the *Persians*.

Jan. 15th. Being the Birth-day of *Knez Juan Basilowitz*, one of the Great Ministers of State of the *Muscovian* Empire, the *Muscovite* Envoy, whose Patron he was, made a very Magnificent Feast upon this occasion; at which were present the Ambassadors, and the Chief Persons of our Retinue.

Jan. 20th. We prosecuted our Journey from *Caswin*, and leaving *Sulthania* and *Ardebil* to the N. W. we took our way to the North, towards the Province of *Kilan*; we made but 4 Lgs that Day, over Manur'd Hills, and lodg'd in the Village of *Achsbaba*, situate at the foot of a Mountain; so nam'd, as the *Persians* say,

1638. say, from a certain Person, who being 100 Years old, begot a Son upon his Wife of the same Age; in Testimony of which they shew'd us his Tomb under a great Vault, which his Son has caused to be erected there.

Jan. 21st. We travelled through a very fruitful Country to the Village of *Tzitelly*, the grounds hereabouts affording great Plenty of Pasture. The *Vice-Daruga* of *Casvin*, accompany'd the Ambassadors to this Place; and at Supper entertain'd them with the most remarkable things relating to his Life; he being descended originally from *Georgian* Christian Parents, who were conducted into *Persia* under the Reign of *Schach Abas*; among other things he told us, that our *Mehemander*, according to the Custom of the *Persians*, did extort much more from the Places through which we pass'd, than was allotted for the use of the Ambassadors. At parting he had a Present made him of some Ells of Cloth and Satin.

The 22d. We made 7 Lgs, all over Mountains of divers colours, *viz.* red, yellow, green and blue, which afforded a very delightful Prospect, through which runs a Brook, with such variety of turning and winding, that we cross'd it above 30 times that Day; and in the Evening pass'd the River *Senderuth* over a Bridge, which joyns the two Mountains thro' which it runs. We lodg'd at Night at the Village named *Kurtzibaschi*, situated in a pleasant Valley, having got its Name from a certain *Kurtzibaschi*, or Col. of 1000 Horse, who was the Owner thereof.

The 23d. The first 2 Lgs of our Journey was a very fair Road, along a Forest of Olive Trees, at the extremity of which we found our selves at that Place famous among the Ancients, under the Name of *Fauces Hyrcaniæ*, but among the Modern *Persians*, as well as in the Time of *Alexander the Great*, known by that of *Pylas*. It is a very narrow Passage, and the in-let into the Province of *Kilan*, where two Rivers joyning with a swift Current, fall with a most dreadful noise from among the Rocks. After the Confluence of this River it is called *Issaruth*; but before they joyn, the largest is call'd *Kisiloscin*, which passing under a Stone-Bridge, afterwards passes into the Province of *Kilan*, and by two several Channels exonerates it self into the *Caspian-Sea*.

Fauces Hyrcaniæ.

This Bridge has six large Arches, each of which contains a good Room, and a Kitchin, besides other Conveniences, sufficient to lodge a whole *Caravan*. No sooner are you past the Bridge, but the Road dividing it self, one leads through a fine Champaign Country, into the Province of *Chalcal*, and so to *Ardebil*, the other runs straight through the Province of *Kilan*; but over such Precipices, as are most dreadful to behold, it being cut out of a pure Rock, so steep and narrow, that there is scarce Passage for one Horse or Camel loaded; nay, in some places they have been forced to make up the defect of the Rock with Masonwork, the Rock reaching on the left hand up to the very Clouds, whereas on the other side there is nothing but most dreadful Precipices, and a most horrid Abyss, rendred more terrible by the noise of the River, which forces there its Current through the Rock. The *Persians* as well as our People were so astonished at the sight of it, that they were glad to lead their Horses, and that but loosely neither, for fear, in case the Beast should slip, it should draw the Master after him. The Horses went on very carefully, and not without some danger, but the Camels made sure steps, putting their Feet into those steps that were cut in the Rock for that purpose.

A Caravan-sera under a Bridge.

At the top of the Mountain we saw a Custom-house, the Receiver of which presented us with some Fruits, and we were not a little astonish'd to discover the Vallies on the other side full of Blossoms, whereas we were scarce got out of the Snow on the other part; we were more and more convinced of this difference, when we found the descent of the same Mountain, the ascent of which had been so troublesom and dreadful to us before, to change its Face into the most delightful Prospect that could be imagined, it being not only of a very easie descent, but besides this, it is covered all over with Olive, Cypress, Box, Citron, and Orange Trees; of the Fruit of which last we found such plenty here, that our People flung them at one another for their Diversion: But what was more surprizing to us than all the rest, was, that in one and the same Day we found the cold which had sufficiently pinch'd us the same Morning, to turn into heat before Night.

Winter and Summer in one day.

Wee took up our Quarters at the Village of *Pyle-rubar*, at the foot of the Mountain upon the River *Issaruth*; the Houses were indeed very little, but the inconveniencies we suffered in our Lodgings, were in some measure recompensed by the vast numbers of Gardens, Vineyards, Citron, Orange, and Pomgranate Trees, which were planted all round about them. 1638.

A Description of the Province of *Kilan*.

It must be confess'd by all those who have travelled in these Parts, that the Province of *Kilan* is a Terrestrial Paradise, abounding in Silk, Oyl, Wine, Rice, Tobacco, Limons, Oranges, Pomgranates, and all sorts of other Fruits; the Vines (which spread themselves with their Branches up the Trees) being very excellent here, being as big in compass as a Man in the Waste. The *Caspian Sea*, as well as the Rivers belonging to this Province, afford to the Inhabitants prodigious quantities of Fish, as their Pasture-grounds furnish them with great store of Cattel, and their Forests with Venison and Wild Fowl, which makes me admire how *John de Laet*, who follows the Footsteps of *Johannes de Persia* could assert with so much confidence, that *Mesanderan*, (part of the Province of *Kilan*) lies under so cold a Climate, that the Fruits there seldom come to full maturity; when it is confess'd by all that have any right knowledge of those Parts, that among all the Provinces of that vast Empire, there is none that challenge Prerogative for a temperate and benign Air, before that of *Mesanderan*, which beyond all dispute, produces the best Fruits of all *Persia*. *Schach Abas* was so well convinced of this point, that he gave the Preference in his Opinion, to this Province before any other of all his Dominions, which made him lay the Foundation of the City of *Ferabath*, his ordinary Residence, where he died.

Its Fertility.

Having given you already an Account of the extent of this Province, and of its principal Cities, we will only add in this place, that the Province of *Kilan*, stretching all along the *Caspian Sea*, in the form of a Crescent, is encompass'd like an Amphitheatre, by a continued ridge of high Mountains, spreading its extremities to the *Caspian Sea*, and being covered all over with Trees; the whole Province appears at a distance, to be surrounded with one entire enclosure of Trees. Out of the Mountains arise divers Rivers, which watering the adjacent Plains, render them very fruitful, but carry this inconveniency along with them, that towards the Sea-side they render the Country Fenny, so that with this and the circumambient Mountains the Province is in a manner inaccessible, were it not for the several Cause-ways, which by *Schach Abas* were ordered to be made from *Astarabath* to *Astara*, quite through the Country, which renders the Passage easie, for Horses, Camels, Waggons, or any other Carriage.

L. V

The Inhabitants of the Province of *Kilan*, but especially those descended from their ancient Race, call'd *Kilek*, living betwixt *Kesker* and *Mesanderan*, are a hardy, and obstinate sort of People. They were in former times Govern'd by their own Kings, neither does the *Schach* exercise his absolute Power here in the same Degree as he does over the rest of his Provinces, for fear of a Revolt, to which they are much inclin'd; trusting to the advantages Nature has bestowed upon their Country, which is such, that they need not be beholding to their Neighbours for any thing necessary for the Sustenance of human Life, and being surrounded by high Mountains, and the *Caspian Sea*, makes it almost inaccessible, there being but 4 ways into this Province, and those so narrow, that not above one loaden Camel can pass at a time. The 1st. leads from the Province of *Chorasan*, by the way of *Astarabath*; The 2d. from *Mesanderan*, by the way of *Ferabath*; The 3d. by *Pyle-rubar*; and the 4th. by *Lenger Kunan*.

Its Inhabitants.

There is indeed another Passage through the Mountains, but this is so intricate as not easily to be ventured at by Foreigners; besides that the Passages may be made good by a few People. Those that live near the Sea-shore, are sometimes in danger of being rifled by the *Cossaques*.

Schach Abas had re-united this Province with the *Persian* Crown, not above 38 Years before our arrival in that Kingdom; but the *Kilek* dreading the Tyranny of *Schach Sefi*, his Successor, took up Arms, and having chosen the *Karib*, born in the Village of *Leschtensa*, and of the Race of the Ancient Kings of *Lahetzan*, in the Province of *Kilan*, brought together an Army of 14000 Men, and herewith he took the City of

A Revolt of the Kilek.

Reschd,

1638. *Rescht*, and several other of the Provinces, the Avenues of which he has guarded so well, that the *Chans* which were by the *Schach* sent against him, with an Army of 40000 Men, having divided the same into 3 several Bodies, and Attack'd him very furiously at once, were repulsed with great loss.

The History of *Karib*. If *Karib* had known how to make the best use of this advantage, he might questionless have maintain'd himself in his Post against the *Persians*; but being overwhelm'd with Pride by his last Victory, he Quartered his Soldiers in the adjacent Villages, where falling into Debaucheries, and keeping the Guard very negligently, the *Chans* with their united Forces surprized them in their Quarters, and put them to a total Rout, *Karib* himself narrowly escaping into a Garden, and being discovered by a Servant of *Emir Chan*, he gave him a considerable Present, and with Promises of a much greater Reward, engaged him to change his Clothes with him; which the Servant seemingly consented to, but had no sooner got the Present and his Clothes, but calling to his Aid some of his Comrades, carried him Prisoner to *Caswin*, where the King was at that time.

A very odd Punishment. His Punishment was extraordinary; for after he had, by *Schach Sefi*'s Order, been shod on his Hands and Feet, like a Horse, and kept thus 3 Days, he was fastened to the top of a high Pole in the Market-place, and shot to death with Arrows: The King was the first who let fly at him, and having given the word to the *Chans*, that all such as lov'd him should follow his Example; the Body of the miserable Wretch was in an instant all covered with Arrows.

The *Kilek* disarm'd. The *Kilek* were disarm'd, having ever since that time not the least thing that has any resemblance of Arms allow'd them, but a Hedge-Bill of about 4 foot long, for the conveniency of cutting their Wood, and dressing their Vines.

Whereas those call'd *Talischs*, living between *Kesker* and *Mesanderan*, who remain'd in Obedience to the *Schach*, retain the free use of all sorts of Arms to this Day.

Their Habits. The *Kilek* are distinguished from the other *Persians*, not only by their Garments, which are not so long, but also by their Complexion, which is much inclining to an Olive colour, but pretty clean, the Climate of this Province being much more Temperate than the other Provinces of *Persia*.

The *Talisch* The Women of the *Thalisch* are counted the handsomest of the whole Kingdom, neither do they (like the other *Persian* Women) cover their Faces. They tie their Hair in Tresses, the Maids having 24 or 25. the marry'd Women no more than 10 or 12. Their upper Garments are so short before, that their Smocks appear below them; instead of Shooes they wear Sandals of Wood, fastened with a string upon the Heel, and with a Wooden Button betwixt the great Toe and the next to it; though by reason of the slipperiness of the Ways in Rainy Weather, they generally go barefooted as well as the Men. The *Kileks* have Caps made of course Cloath, but the *Thalischs* of Lambs-Skin. Each of them have their peculiar Language, differing from the *Persian* only as to Dialect, though at the same time they scarce understand one another. The Women of *Kilan* have the Reputation of being the best Housewives all over the Kingdom; Spinning, Weaving of Stuffs, and Calicoes, making Syrups of Wine, are their Ordinary Employments. Besides which they bear their share in the Management of the Ground, they weed the Corn and bind it, and after it is brought into the Barn, thrash and sell it. They are all *Mahometans*, of the Sect of *Hanife*.

The Inhabitants were generally very obliging to us. And the 24th. of *Jan.* we continued our Journey along the River side, having to the left of us a Wood of Olive Trees, which afforded us a very agreeable shade against the heat of the Sun, which was very excessive. As we came within a Lg of *Pyle-rubar*, we saw a Rock in the midst of it, and upon it the Ruins of a Castle, and of a Bridge, which, they say, were demolished by *Alexander the Great*. Afterwards we pass'd over a very steep Rock, which brought us into a fair Plain, spread over with new Grass, and interspers'd with Violets, which afforded a very agreeable scent to our Nostrils. We lodged that Night in a Village where we saw the Sepulcre of *Iman Sade*. We observed that the Houses here were covered with Slates, and Tiles, because of the Rains which are very frequent here.

The 25th. after having Travel'd 5 Lgs we reach'd the City of *Rescht*, the Woods hereabouts having on both sides very good Corn Grounds, parted by deep Trenches, (call'd *Water-gangs* in *Flanders*,) into which they let in the Water, and make use of it for the watering of the Grounds, when the heat of the Summer has dry'd up the Water of the Rivers near their Sources. The Country People near this City apply themselves chiefly to the Husbandry of Rice, their Houses lying scattered at the end of each piece of Ground. 1638. Come to *Rescht*.

A Description of *Rescht*. The City of *Rescht* the Capital of the Province of *Kilan*, is of a considerable bigness, but without the least Defence, being open on all sides like a Village, and so well planted with Trees, that the Houses are not discovered from among them till you come within the Streets. Its Situation is according to the *Arabians* (who call it *Husum*,) at 85 deg. 10 min. Latitude, about 2 Lgs from the *Caspian Sea*. Their Houses are not so well built as those of the other Cities of *Persia*, but all covered with Slates or Tile; their best Ornaments without, being the vast numbers of Citron and Orange Trees, wherewith they are surrounded on all sides, and afford a very delightful Entertainment both to the Eye and Nostrils.

The Market-place is very large and well-stor'd with Shops; Provisions are sold here at a very easie rate, of which conveniency we were made sensible by the extraordinary Entertainment we received from our *Mehemander* during our stay of 5 Days here. This City is not Govern'd by a *Chan*, but only by a *Daruga*, whose Name was *Alyculi-Beg*.

Jan. 26th. We saw the Inhabitants of *Rescht* celebrate their Festival in Commemoration of *Aly*, with the same Ceremonies we had seen last Year at *Schamachie* 7th. of *Feb.* which now happen'd in *Jan.* because the *Persians* regulate their Festivals according to the Moon. The Preacher who made a very ample Harange upon the Miracles wrought by *Aly*, concluded with these words: *That if* Aly *where not really God, he approached at least very near a Divine Being.* Here we also saw the Sanctuary built by *Schach Abas*, in Memory of his Son *Sefi Myrza*, who was slain in that place by his Command, as we have related before. *Sefi Myrza's* Sanctuary.

The 30th. of *Jan.* Leaving *Rescht* in the Morning, we travelled over a spacious Plain all that Day, which reach'd to the very Borders of the Province of *Kilan*; it was planted with many Box and Mulberry Trees, and watered by many Rivers, the chiefest of which is the *Pesi-chan*, half a Lg from *Rescht*, that of *Cettiban*, a Lg from the other, and those of *Pischeru* and *Lissar*, all which have very high Bridges, by reason of the frequent overflowing of those Rivers, which makes them very difficult to pass; the Horses often tumbling down into the Water, as it happened with a Horse which carried our Physicians Baggage. Towards the Evening we cross'd the River *Tzomus*, which, as well as all the rest, affords plenty of Fish, from the Farming of which the *Schach* draws a considerable Revenue. We made 4 Lgs that Day, and took up our Quarters at *Kisma*, not far from the Town of *Fumen*, or *Pumen*, famous for the overthrow of *Karib*, of which we spoke before. They leave *Rescht*.

Jan. 31. We continued our Journey through the Plain for 4 Lgs, being so well stor'd with Mulberry Trees, that at a distance they made the shew of a Forest; we also saw many Vineyards.

Towards Evening we met the *Calenter*, or Deputy Governor of *Kesker*, at the Head of 30 Horse, and a Mule loaden with Wine, Fruits, and other Provisions, wherewith the Ambassadors made a Collation in the Field; we were met not long after by the *Chan*, the Governor, accompany'd by two Gentlemen on Horseback, who received the Ambassadors with more than ordinary Civility, conducted them to his own House at *Kurab*, and after they had taken part of a good Collation of Fruits and Preserves, ordered certain Gentlemen to attend us to the Lodgings prepared for us in the City, and made us a Present of 4 wild Boars: His Name was *Emir*, being the Son of a *Georgian Christian*, but circumcised in his Youth, and having done considerable Service to *Schach Abas*, at the Siege of *Irvan*, had thereby raised himself to the Dignity of the Government of this Place. He declared to us his good inclinations towards the Christians, notwithstanding which, we were told something concerning him, which had not the least resemblance to it, *viz.* That being lame, he had been advised by his Physicians, *Ut rem haberet cum cane fœmina*. Come to *Kurab*.

The

1638. The ſmall City of *Kurab* is ſeated among a great number of Trees, at the ſame diſtance from the *Caſpian Sea* as *Reſcht* is, *viz.* 2 Lgs; it is chiefly famous for the Birth of *Schach Sefi*, who Reign'd at the time of our Embaſſy; his Father *Sefi Myrza* and his Mother having follow'd *Schach Abas* in his Progreſs into the Province of *Kilan*; the Houſe in which he was born belonging to a wealthy Merchant, was, according to the *Perſian* Cuſtom, turn'd into a Sanctuary.

They leave *Kurab*

We left *Kurab Feb.* 1ſt. about 10 in the Morning, the Weather being very fair and hot. The *Chan* having taken his leave a Lg without the City, ordered the *Calenter*, a young Man of a very ſweet Diſpoſition, to Conduct us through his Government; He ſhew'd us by the way, ſeveral ſlights of his Activity, with the Bow and Half-Pike, which were very diverting. We had ſcarce made 2 Lgs when we came to the *Caſpian Sea*, and the Country thereabouts extending on the right hand, *viz.* from *Meſenderan*, and *Ferabath*, and to the left from *Aſtara*, a great way into the Sea like a Creſcent; we had a Proſpect of the whole Country, which was covered all over with Trees to the N. and S.

After we had travel'd about a Lg along the Sea-ſhore, we took up our Lodging at a Houſe call'd *Ruaſſeru-kura*, upon the Torrent of *Naſſeru*.

The 2d, We continued our Journey along the *Caſpian Sea-ſide*, for 6 Lgs together to the N. W. We paſs'd that Day at leaſt 14 ſmall Rivers, or rather Torrents; the moſt conſiderable of them were, *Schibern*, *Dinatſar*, *Chaleſſera*, *Alarus*, and *Nabarrus*; beſides the River of *Dinatſar*, which being the common Boundary, betwixt the Government *Kesker* and *Aſtara*, our *Calenter* about Noon left us, to the Conduct of the *Calenter* of *Aſtara*, who received us on the River ſide, and Conducted us from the High-road through ſome Corn Fields, to the Village of *Sengar-haſara*, where we were lodged that Night, and regaled with a Preſent of 5 wild Boars, of which there are vaſt quantities in the Foreſts here, becauſe the *Perſians* who are not permitted to eat them, ſeldom hunt them.

On 3d. we ſet out early in the Morning, and made 7 large Lgs that Day, in very ſnowy and rainy weather, taking our Courſe to the E. N. E. ſo near the Sea-ſide, that our Horſes frequently went up to the Girt in Water; our Lodging was as wretched as our Days Journey, in a miſerable Village, named *Hove-lemur*.

The 4th. Being provided with freſh Horſes, we continued our Journey early in the Morning, 4 Lgs along the Sea-Coaſt, to the N. After that we paſs'd through a Foreſt 2 Lgs long, and in that way croſs'd no leſs than 22 Rivers, the Bridges of which were ſo bad, that many fell into the Water, and 3 Peaſants and 4 Horſes were drown'd, and 6 more died by the way. The moſt conſiderable of theſe Rivers were *Lome*, *Konab*, and *Beskeſchan*. About half a Lg from the Village where we were to lodge that Night, we were met by the *Chan* of *Aſtara*, at the Head of 200 Horſe, who conducted the Ambaſſadors to the Village *Choskedehene*, (upon a River of the ſame Name, which runs through it,) his Name was *Saru Chan*, a Perſon of excellent Qualities, his ordinary Reſidence being at *Aſtara*, (which had borrowed its Name of the Province) a Place without Defence, within a Mile of the *Caſpian Sea*.

Feb. 6th. Being the concluſion of their *Lent*, the *Chan* entertain'd the Ambaſſadors at Noble Feaſt, where, among other excellent Diſcourſes, he gave them a particular account of the War, which enſued upon the Revolt of *Karib*, in which he had been in Perſon and among other things got *Karib*'s Table-Cloth of green Satin, flowered with Gold, which was laid at this Entertainment. He was in ſuch eſteem with the *Schach*, that he was then preparing for an Embaſſy to the *Indies*, which he was to begin the next Spring. He told us we muſt be upon our Guard, by reaſon of the danger that might attend us, from the *Coſſaques*, who had within 2 Years laſt paſt, Plundred the City of *Reſcht*. We found the Vines in thoſe Parts as big in Bulk as a Man's Middle, which, tho' it may ſcarce meet with Credit by ſome, yet may be atteſted by me, as well as many others, who having travel'd in theſe Parts, as well as in ſeveral others of *Perſia*, where they are no leſs big, are Eye-witneſſes of the truth of it.

This puts me in mind of what *Strabo* ſays of the Vines of *Margiana* (part of the Province of *Choraſan*) which turns to the ſame account, and further adds, that the moſt ordinary Stock yields a Pail full of Wine; but I can't affirm what he further tells us of the Bunches, *viz.* that they are above 4 foot long. At the foot of the Mountain of *Schindan* near *Aſtara*, lies the Village of *Schich-Sahadan*, which is exempted from all Taxes, on the account of the Sepulchre of *Schich-Sahadan*, *Aly*'s Maſter. 1638.

Feb. 7th. We made 7 Lgs along the Sea-ſhore, to the *Sreights* which lead into the Province of *Lengerkunan*, being a narrow Bank raiſed between the Mountains and the Fens, which is the only Paſſage from this ſide into the Province. At the end of this Cauſeway is the River *Serdane*, from whence we proceeded to *Lenkeran*, ſituate upon the River *Warſaſaruth*. The Town as well as the adjacent Country, has obtained its name from the eaſie Anchoring of Ships hereabouts, tho', to confeſs the truth, the Bay, which is made by the two Capes or Promontories, (one of which ſtretches into the Sea from the ſide of *Lenkeran*, being all covered with Trees, the other from *Kiſilagate*) makes no ſafe Harbours, but only a kind of Bay, where the Sea is ſo ſhallow, as not to be fit for the reception of Ships of any Burthen; beſides that, they lay open to the fury of the Eaſt Winds.

Come to the Province of *Lengerkunan*.

I remember to have read in (*a*) *George Dictander*, concerning a certain Ambaſſador, who 1603. was ſent by the Emperor *Rudolphus*, into *Perſia*, and being landed hereabouts, died here with moſt of his Retinue; but upon the moſt ſtrict enquiry I could make, I could not learn any thing as to this particular, from any of the Inhabitants. We ſtaid here 3 Days for ſome belonging to our Train that were left; as alſo to refreſh our Camels, and get freſh Horſes; and the 11th. proſecuted our Journey to *Kiſilagats*, five Leagues thence, croſſing in this Days Journey four great Rivers, *viz.* the *Kaſiende*, the *Noabine*, *Tzili*, and *Buladi*, the 3 firſt over Bridges, the laſt by the help of Boats, though it be very broad, and our Horſes were forced to ſwim; our Baggage was ſent by Sea in 6 ſmall Barks, the Sea-ſide as well as the adjacent Iſlands along this Coaſt, being covered all over with Canes, which ſerve for retreating places to the *Coſſaques* to attack ſuch Veſſels as paſs by that way, or elſe to croſs over from thence to the Continent. The ſmall City of *Kiſilagats*, i. e. *Red-wood*, is like all the reſt in thoſe Parts, upon all ſides, lying about half a Lg from the Sea to the N. W. in a fair Plain, upon a ſmall River, call'd *Willeſchi*. From hence we had a full view of the Mountain of *Kilan*, to the W. N. W. ſinking by degrees into little Hills, towards the Country of *Mokan*. At the foot of the Mountain were ſeveral fair Villages, and great numbers of Trees planted in a ſtraight Line along a very large Tract of Paſture Ground. I am apt to imagine that this is the fertile Plain *Strabo* mentions to be near the *Porta Caſpia*, adding, that it is kept for the King's Breeding Mares, and that it is able to maintain 50000 of them; but in this laſt he has ſomewhat overſhot the Mark, it being certain, that it is not near ſo large now-a-days; at leaſt, I remember that falling one Day into Diſcourſe with a certain Military Officer, belonging to the Duke of *Holſtein*, who pretended he had travelled into the *Great Tartary*, (though he had not been beyond *Aſtrachan*) he would needs be poſitive in aſſerting this Paſſage in *Strabo* to be true, and to be found ſo to this Day. Within, and about the Neighbouring Mountains are the Countries of *Kuawer*, *Marankn*, and *Deſchiewend*, as alſo the Village of *Dubil*, or, as ſome call it, *Chatiſekeka*, the Inhabitants whereof uſed to have their clandeſtine Meetings in the Night-time, and after having taken a good ſhare of ſtrong Liquor, the Candles were blown out, and then putting off their Cloaths, the Father with the Daughter perhaps, and the Mother with her Son, without any diſtinction of Age, Sex, or Proximity of Blood, went to the work of Generation, which coming to *Schach Abas*'s Ears, he commanded them to be quite extirpated, and a Colony of other People to be ſettled there.

(*a*) In his Travels

Leave *Lenkeran*.

The City of *Kiſilagats*.

Perhaps theſe were the ſame, or at leaſt the Offſpring of thoſe mentioned by *Herodotus*, who uſed to have Carnal Copulation promiſcuouſly like the Beaſts.

Three Lgs from the Continent, directly oppoſite to *Kiſilagats*, are 2 Iſlands named *Kelechol*, and *Alibaluck*, the laſt of which being 3 Lgs long, having gotten its Name from a pretended Miracle done by *Aly*, who being there in great diſtreſs for Water to quench his thirſt, a Spring of freſh Water broke out in an inſtant which they ſhew to this Day.

A pretended Miracle of *Aly*'s.

Feb. 12th. We purſued our Journey through a Champaign Country, and croſs'd ſeveral Rivers, and among

1638. among the rest the *Uskeru* and the *Butaru*, and took up our Quarters at Night in the Village of *Elliesdu*, seated at the foot of a very fertile Hill (as indeed is the whole descent of the Mountain) at the very entrance of the Heath of *Mokan*. The Village being inhabited only by Soldiers, maintained out of the King's Demesns in those Parts; the Houses were very mean, made of Laths, and plaistered with Clay.

Brugman's Barbarity.

Here happened a very odd Accident, occasioned chiefly by the violent Temper of the Ambassador *Brugman*; for his Groom as he was entring with a Led-Horse one of the Houses of those *Kisilbaschs*, was refused admittance by the Master thereof, who alledged, that by their Privileges they were exempted from Quarters; besides, that they had no accommodation for Horses; but the Groom persisting in his demand, the Souldier struck the Horse slightly with a Stick over the Head. The Ambassador *Brugman* having taken notice of what had pass'd, flew like Lightning upon the *Kisilbasch*, who being a Souldier, and not used to be attack'd in his own House, and, as he said, little expecting that it was the Ambassador who came to the Groom's assistance, gave *Brugman* such a welcom with his Stick, that being forc'd to cry out for help, some of our Retinue fell upon the *Kisilbasch*, and gave him such a furious beating, that with much a-do he made shift to crawl away, and to shelter himself in the next House: But the Ambassador not thinking himself sufficiently revenged upon this poor wretch, would needs make his Complaints to our *Mehemander*, who answered him, that the Officer of the *Kisilbaschs* being not at hand, he did not know what to do in the matter, but that the Person who had affronted him, had received so severe a Chastisement, as he would scarce be able to recover; but that for the rest, he might take what further satisfaction he thought fit. Hereupon the Ambassador *Brugman* not only ordered his Horse and Arms to be taken out of his House, but also having commanded all our Retinue (without communicating his design to his Collegue) to get on Horseback next Day, he demanded from the *Mehemander* the Souldier that had struck him, and being told by the said *Mekemander*, that he was not in a condition to be brought forth, by reason of his Wounds, he notwithstanding this, commanded him to be brought out in a Coverlet, and maugre all the intercessions of the *Persians* there present, caused a certain *Armenian* named *Mark Filerosse.n*, to Cudgel him, which this merciless Wretch did so effectually, that with two blows, one over the Arm, the other cross the Side, he laid the poor Souldier stretch'd upon the ground for dead, without sense or motion; *Brugman* telling the *Mehemander*, that it was no more than what he deserved, adding another Bravado, *viz.* That if *Schach Sefi* did neglect to give him further satisfaction, he would return himself in a short time, with so numerous an Attendance, as to be able to do it without him. His fellow Souldiers sufficiently discovered by their Countenances, that it was not for want of good will, that they did not revenge the Death of their Comrade; and as they wanted not strength to do it, I know not whether our Deliverance was owing to the presence of our *Mehemander*, or to a peculiar Providence.

Orders a Souldier to be kill'd.

We travel'd that Day, being the 13th. of *Feb.* 2 Lgs over the Heath of *Mokan*, and took up our Nights Lodging at *Oba* in Shepherds Huts; our *Mehemander*, who had staid behind in the Village, came to us at Night, with the Tidings that the poor Souldier was dead, desiring that the Ambassador *Brugman* would send back his Horse and Arms to the Widow whom he had left in a deplorable condition.

I made the following Observation here, *viz.* that the Sun rose to the E. S. E. and consequently the declination of the Load-stone 24 deg. from the N. towards the W. The Sun I observed at *Oba* at Noon, at the height of 40 deg. 48 min. and consequently the Elevation of the Pole 39 deg. 28 min. The Sea-Coast here stretched from the Pole to the N. E. The Mountain of *Scamachie* appearing within sight to the N. The Heath of *Mokan* call'd *Minumlack*, i. e. a *thousand ways*, or *thousand holes* by the *Turks*, is accounted to be 60 Lgs long, and 20 broad. Its Inhabitants are a sort of poor Wretches descended from certain Families, who having born Arms under *Jesid* against *Hossein*, were banished into this Desert, where they live in Tents in the Winter, and in the Summer remove with what small Stock of Cattel they have, to the foot of the Mountain. They live so wretchedly, that in derision they are call'd *Sumek Rajeti*, i. e. *from bone to bone*. They are most Savages, now their chief Families being call'd *Chotze*, *Tschaubani*, *Tekle*, *Elmenku*, *Hatzikasilu*, *Sulthan Baschelu*, *Carai*, *Ardenduschenlu*, *Chalerz*, &c. 1638.

The 14th. we made 3 Lgs Northward, and by the way saw the Sepulchre of *Bairam Tekle Obasi*, who being a famous Robber in *Schach Abas*'s time, did annoy the *Turkish* Army that was then entred *Persia*, with such success, that thereby the number of his Troops encreasing to 14000, they with continual Skirmishing did more mischief to the *Turks*, than the whole *Persian* Army, for which signal Service he was made a *Chan*, and had certain Lands assign'd him to maintain him according to his Quality. *A Robber made a Chan.*

We scarce were laid down in the Huts, when a Volley of Small Shot gave us such an unexpected Alarm, that every body betook himself to his Arms, fearing lest the *Kisilbaschs* were coming to revenge the death of their Comrade; but we soon understood that it was the *Muscovite* Envoy who had ordered this Discharge to be made under pretence of honouring the Ambassador *Brugman*'s Birth-day, but in reality to fright and put him in mind of his last Days Cruelty.

The 15th we made no less that 8 Lgs over the Heath, and came at Night within a Mile of the River *Aras*; our intention being to have lodg'd that Night at *Tzanar*, but understanding that *Areb*, Governor of *Scamachie*, was lodg'd there with all his Retinue, and was to continue there the next Day, we stay'd the 16th in the same place where we were, as having no great confidence in the said Governor, by reason of some misunderstanding that happened at the time of our first coming that way, but soon found our selves undeceived, the *Chan* being so generous as to pass by all those matters, laying the blame thereof upon our *Persian* Interpreter *Rustan*, who, as he said, had told him several Stories, and questionless had plaid him the same Game with us. He no sooner understood that we were come to the River *Aras*, but he sent a Person of Quality to receive us, and sent a Refreshment of 3 Bags of Wine, which came very seasonable to us; our Entertainment having been but slender the last two Days. Here we were also visited by *Aczebeg*, our first *Mehemander*, who presented the Ambassadors with a very fine Grey-hound Bitch.

The River Aras.

The 17th. We cross'd the famous River of *Aras*, (*Araxes*) by the means of a Bridge of Boats, near *Tzanar*. *Q. Curtius* speaking of this River, in two different Passages, and in a different Sense, has not a little puzled the Ancient Historians and Geographers, who indeed for the most part put it in the same Province, but can't agree in the description of its Course. For *Q. Curtius* in his 5th. Book puts it in *Persida*, and says its Course is to the S. whereas in his 7th. Book he makes it pass through *Media*, and to disimbogue in the *Caspian Sea*. *Strabo* is no less dubious, and (*a*) *Raderus* endeavouring to dissolve this Knot by asserting that the River *Medus*, before it is joyn'd with the *Araxes*, has its Course to the S. and afterwards exonerates it self into the *Caspian Sea*, is fallen into a gross mistake; for how is it to be conceived, that the River should make its way through the vast Mountain *Taurus*, which is so many Lgs in breadth, and divides not only all *Persia*, but even *Asia* it self, and so continues its Current from *Persepolis* to the *Caspian Sea*. The foundation of the whole Mistake lay here, that there are two Rivers which bear the Name of *Araxes*, in *Persia*; one in *Media*, the other in *Persida*; to the last, which washes the Walls of *Persepolis*, (now call'd *Schiras*) *Q. Curtius* has left the right Name of *Araxes*, but has taken the liberty to impose the Name of *Tanais* upon the *Jaxartes*, which passes through *Scythia*, as he has given the Name of *Caucasus* to the Eastern Branch of the Mountain *Taurus*, but with what Reason I am not able to determine.

(*a*) In his Comment upon *Q. Curtius.*

That which passes through *Persida*, is by the *Persians* call'd *Bend-Emir*, from a signal Miracle perform'd there by *Aly*; and disembogues in the Ocean in the *Persian* Gulph. That which we speak of now keeps its ancient Name, and rises out of the Mountains of *Armenia*, behind the great *Ararat*, and being joyn'd by many other Rivers, the chiefest whereof are, *Karasu*, *Senki*, *Kerni*, and *Arpa*, it turns its Channel near *Karasu*, deep into the Country, and afterwards near *Ordubath*, falls with a great noise, which is heard 2 Lgs thence, in the Plain of *Mokan*. Its Course there is very slow, and after having received into its Channel

1638. Channel about 12 Lgs above *Tzanat*, the River *Cur* or *Cyrus*, (as large a River as it self coming Northward out of *Georgia*,) it exonerates it self into the *Caspian Sea*. This sufficiently refutes *Ptolemy*, and those who follow his Footsteps, who make the *Araxes* and the *Cyrus* fall by two different Channels into the *Caspian Sea*. Thus they would have *Cyropolis* be the same which is by the Modern *Persians* call'd *Scamachie*, which *Maginus* would infer from the degrees of Latitude given by *Ptolemy*: But according to that Supposition, these 2 Rivers must not be placed above, but below the City, towards the S. it being certain, that when we travell'd in those Parts, we found the Conflux of those 2 Rivers at 39 deg. 54 min. and the City of *Scamachie* at 40 deg. 50 min. which is 13 Lgs thence, and under another Meridian. Neither is there any other River within 19 Days Journey of *Scamachie* on either side, which bears the least comparison in bigness, or otherwise to this River.

At Tzanat. The 17th. We were very splendidly treated by the *Mehemander* sent thither by the *Chan*; this Village owes its Name to the *Arabian* word *Tzanat*, which signifies a Passage, each Passenger being obliged to shew his Pass at the crossing of the River here, which is intended chiefly to keep the *Turks* out of the Kingdom.

The Mountain of Scamachie. The 19th. having travel'd 8 Lgs thro' a barren and desert Country, we were forced to take up our Lodgings at Night in 3 Huts, set up for that purpose, at the foot of the Mountain of *Scamachie*. Here our Painter died, and was buried the 22d. in the *Armenian* Church-yard, before *Scamachie*.

The 20th. We set out early in the Morning, that we might with the more leisure pass the Mountain of *Scamachie*, which extends it self thereabouts like a Crescent to the East, from the Sea along the River *Cyr*. The continual cold Rains had rendred the Ways so slippery, and difficult to pass, that this was one of the worst Days Journey we had since the beginning of it; those that were well mounted reach'd the City of *Scamachie* before Night, but others not till Mid-night, and some not before Morning, and the Camels with the heavy Baggage not till 8 Days after.

We were by the *Chan*'s special Order lodg'd with the same *Armenians* that had been our Landlords at the time of our first Passage through this City, who were all extreamly glad to see us, and I in particular had several Presents of Apples and Grapes sent me by my old Friends there, who all came the next Day to pay me their Visits, being desirous to see what Progress I had made in the *Persian* Language.

Feb. 22d. The *Chan* and the *Calenter* came in Person to invite the Ambassadors and their Retinue to Supper, which was very Magnificent; but what was most obliging, was the tender offers of his Friendship and Service, of which we found the effects during our stay of 5 Weeks at *Scamachie*, upon several occasions, the *Chan* taking all imaginable opportunities to divert us with Hunting, Feasting, and all other Divertisements the Place afforded.

The Chan's Civility to the Ambassadors The 1st. of *March*, the *Muscovite* Envoy Celebrated the Birth-day of the *Czar* his Master by a great and splendid Entertainment, as the *Chan* Celebrated the 3d. 6th. and 10th. their *Naurus*, or New-year, when the Ambassadors were splendidly treated at his own Palace; and the *Chan*'s Astrologer sent me a fat Lamb for my New-years-gift.

March 14th. *Arch-Chan* received the Garment (according to the Custom of *Persia*) the usual Mark of the continuation of the King's Favour towards him; after the Governours have sent their Presents to the King, he sends to them a Messenger to notifie to them, either his Favour or Displeasure; who being come near the City where the Governor Resides, gives him notice of his Arrival, and the *Chan*, being not sure whether he is likely to return again, takes his leave of the whole City, and so, in the Company of all his Friends, goes a Lg out of the City to meet the King's Envoy, who no sooner sees him a coming, but he makes a halt, and the Governor, after having laid aside his Sword, Turbant, and upper Garment, alights, and approaching in a submissive posture the Envoy, he has in a Box covered with rich Tapistry a Letter of Grace delivered to him, or else his Head is demanded. As a token of the King's favour he always receives a Garment from the Envoy's Hands, which after he has kiss'd at the Collar, and touch'd with his Fore-head, he puts on upon the spot; but if the King's Messenger is commanded to bring away his Head, it is cut off immediately and put into the Box. Of this kind there are divers instances, both in the Reign of *Schach Abas*, and of *Schach Sefi*. *Areb Chan* having received some underhand assurance of the King's Favour, and willing the Ambassadors should be present at this Solemnity, desired their Company, which they having accepted of, he appeared on Horse-back without any Arms, with divers very fine Led Horses before him, and a Guard of 15 Carabineers, besides a Retinue of above 400 Gentlemen, and certain Persons carrying on the tops of long Poles some *Turks* Heads fill'd with Hay, and the Colours *Areb* had taken from them. Being come in this Order to the King's Garden without the City, and seeing the King's Messenger standing at the entrance of it with the Box in his Hand, the *Chan* being come within 12 Paces of him, with a cheerful Countenance, laid aside his Garment and Turbant, but was a little startled, when he heard the Envoy say nothing, till at last breaking silence he said, *Schach Sefi sends thee a Garment and a Letter of Favour, thou art certainly beloved by the King.* Unto which the *Chan* Reply'd briskly, *I wish the King's Wealth to encrease for ever, and that every Day of his Life may be multiplyed to a thousand. I am one of the King's old Servants.* Then taking the Garment, which was of Sea-green Satin, and a Rochet of Cloth of Gold, a Girdle and Turbant; the Messenger assisted him in putting it on, and was presented with some *Tumains*. The Ceremony concluded with the *Casi* or Judges Prayer, which ended, the *Chan*'s Steward cry'd out aloud, *We pray for the King's Prosperity, the happy success of his Arms, and the Chan's Health*; unto which the People answered, *Alla, Alla, Alla*, and so the *Chan* return'd to the City, under the sound of the Trumpets and Timbrels, the before-mentioned *Turks* Heads and Colours being carried before him, he invited the Ambassadors to Dinner, but having drunk very freely before, he was forc'd to rise from Table, and so the whole Company withdrew soon after.

1638.

The 22d. Being *Holy Thursday*, we saw the *Armenians* perform the Ceremony of washing the Feet, which was perform'd at Church, the Priest wash'd the right Foot of the Men, and the left of the Women, and afterwards made thereon the Sign of the Cross with Consecrated Butter. This done, he was set in a Chair, and rais'd up aloft by 12 Men, who kept him up in the Air, with divers Acclamations, till he had invited them to Dinner. *The Ceremony of washing the Feet by the Armenians.*

The 25th. of *March*, being the *New-years-day* of the *Armenians*, which then fell on *Easter-day*, they made an extraordinary Procession; and the *Chan* having pitch'd his Tents without the City to be a Spectator of it, they stood with their Banners, Crosses, and Images before his Tent, the *Armenian* Women dancing in the mean while, in 3 separate Bodies, which without intermission relieved one another. The *Chan* diverted himself with letting out 2 Wolves among the People, but being ty'd to long Ropes, they might be drawn back at pleasure. He also ordered the Head of one of those Deer we have mentioned before, call'd *Ahu's*, to be cut off at one blow with a Cymitar, which was done, by striking the Beast first with a Stick over the Back, which made it lift up its Head, and afforded a fair aim to be cut off without missing. I was the same Night stung by a Scorpion. *Their New-year.*

The 26th. *Imanculi*, who was sent by the *Schach* to the Duke of *Holstein*, our Master, coming to *Scamachie*, he was by the *Chan* invited to Dinner, together with our Ambassadors; after which they had a long Conference concerning our intended Journey.

The 29th. *Imanculi* took leave of the Ambassadors, assuring them, that he intended to follow them in 8 Days. And *Abasculi-Beg*, our *Mehemander* being to return to Court, we had one *Hosseinculi-Beg*, appointed to Conduct us to the Frontiers of *Persia*.

The Ambassadors leave Scamachie. The 30th. The *Chan* and *Calenter* of *Scamachie* treated us very Magnificently half a Lg without the City, and having taken their leave with a great deal of Civility; we took the way to *Pyrmarias*, 3 Lgs thence, where we lodg'd that Night.

March 31st. We made 6 Lgs over the Mountains, without having as much as the sight of one single Village, yet at Night we took up our Quarters in a Valley, near the Village of *Cochani*.

April 1st. We made 7 Lgs more, over Hills, and through some Valleys as far as the Village of *Babel*, otherwise call'd *Sarra*, by reason of its Fertility in Millet.

Here the Chan is assured of the King's favour.

1638. The 2d. Leaving the Hills, we got into the plain Country, and having the Rock of *Barmuch* to the right, came within a Mile of the Sea. As we pass'd along we saw within the compass of 500 Paces, no less than 30 Springs of *Nefte* (being a kind of Medicinal Oyl, or rather a *Petroleum*, some white, others black, but more of the last than of the first, which has a much more agreeable scent.) The Pits were about 15 or 16 foot deep.

Sources of *Nefte*.

The 3d. We travell'd only 2 Lgs over three little Rivers to *Schabran*. The Mountains hereabouts are inhabited by a certain People call'd *Padar*, who living upon Rapine, make their Excursions in small Troops for 20 Lgs round to Rob Travellers; being inform'd that they had been at the Village to enquire after our Strength, the *Mehemander* advis'd us to be upon our Guard, and to keep close, and in sight of the Baggage in our March. The Inhabitants of *Schabran* are by the *Persians* call'd *Kurs*, which has misled some Authors into an Error, having mistaken them for the *Kurdes*, a People living in *Kurdestan* (the ancient *Chaldea*) which is far distant from this Place.

The *Padars*

April 4th. We made 4 Lgs thro' a pleasant hilly Country, and came up by the way with a *Carapan* of *Muscovite* and *Circassian* Merchants, who looking upon us as a sure defence against the danger of those Robbers, were very glad of our Company; for it was not long before one of the Gang appear'd at some distance, in order to take a view of us, but 12 *Persians* being by our *Mehemander* sent out to apprehend him, he escaped into the Wood, leaving a good Ox he had stoln, behind him, which was presented to the Ambassadors. In the Afternoon we pass'd through the Fenns near *Mschkar*, a Village within 2 Lgs of *Niasabath*, where we were Ship wreck'd; we found in one of the Houses belonging to the Priest of the Village, many fair Manuscripts.

The 5th, We travel'd thro' one continued Forrest and Desert 8 Lgs, to the Village of *Koptepe*, and upon the Road, not far from the Sepulcre of one of their Saints called *Pyr Schich Mulla Jusuf*, met with 25 Horsemen all Arm'd, who pretended to be Country People, and they travelled thus to secure themselves against the *Padars*; though it was more likely they were some of their Gang. Several of the adjacent Villages being inhabited by those Robbers.

The 6th. we made but 3 Lgs through the Woods, and cross'd 3 Rivers, the *Kossar*, *Sanbur*, and *Kurgane*. The *Sanbur* rises out of the Mountain of *Elbours*, and afterwards is separated into 5 several Branches, or Channels, which are so shallow, that the Water did not reach up half way our Horses Legs.

They come to *Derbent*.

The 7th. After a Days Journey of 3 Lgs, we came to the City of *Derbent*, where we were met only by a certain number of *Kisilbachs*, the Governor not darring, at that juncture, to leave the Castle for fear the Souldiers, who were disgusted, should surprise it in his absence.

A Description of *Derbent*.

The *Persians* put the City of *Derbent* at 85. deg. Long. and by my own Observation I found it at 41 deg. 50 min. Latit. It stretches from E. to W. a Lg in length, its breadth being 450 Paces. It may well be call'd the Gate of *Persia* on that side, because it reaches exactly from the foot of the Mountain, to the Sea-shore, the Waves beating sometimes over the Walls. The Modern *Persians* assert, that its Castle and the Wall on the South side of the City, was built by *Iscander* (*Alexander the Great*) which are of a great heighth, and near 5 foot thick; they appear at a distance as if they were of Free-Stone, but they are made only of Stones made of Mussel-shells, and pieces of Free-Stone beaten to Powder, and molded like Brick, which time has reduced to such a degree of hardness, that no Marble is comparable to it. The rest of the City was built by their King *Nauschiruan*. Upon one of the Gates belonging to that part of the Walls which acknowledges *Alexander the Great* for its Founder, I saw the Remnants of a *Syriack* Inscription in 3 lines, and in another place certain *Arabick* words and Characters, but so defaced by time, as not to be legible. The Castle, which is the ordinary Residence of the Governor, is built upon the top of a Mountain, and provided with 500 Men, of two different Nations, *viz.* the *Asumrumln* and *Koidurscha*, who keep a constant Guard there. The next and most populous Quarter of the City is just at the foot of the Mountain; but the Lower Town was much ruin'd by *Emir Hamse*, the Son of *Chodabende*, who regain'd it from the *Turkish* Emperor *Mustapha*, unto whom the Inhabitants had submitted by a voluntary Surrender; since which time, that part which extends to the Sea, is for the most part converted into Gardens, whereas before that time it was inhabited by the *Greeks*, whence to this Day it is call'd by the *Persians Scaher Juman*, that is, the *Greek* City. 1638.

The Coast all hereabouts is one entire Rock, and consequently very dangerous for Vessels; the Walls on this side are so broad, that a Waggon may with ease be driven on them.

The adjacent Mountain is full of Wood, notwithstanding which there are to be seen there the Ruins of a Wall above 50 Lgs in length; which they told us, in former *Ages*, reach'd from the *Caspian* to the *Euxine Sea*. In sundry places it appear'd still 5 or 6 foot high above the ground, in others perhaps 2 or 3, and in some places there was no Tract left. On the circumjacent Hills you might also discover the Ruins of many old Castles, which seem'd to have been four square. Two remain'd entire, and had a Garrison each for their Defence, as had divers Wooden Redoubts that were built upon certain Avenues.

Near this City is the Sepulchre of one *Tzumtzume*, who, as the *Persians* say, was a very Potent King, and relate a fabulous Story of him, concerning his interview with *Eissi*, (so they call our Saviour) which merits not to be mention'd here. Over his Sepulchre stands a great Tree, and near it a Scaffold of 20 foot high, and 16 square. On this side of the City we saw also above 5000 or 6000 Tombs, covered with a kind of Grave-Stones, exceeding the ordinary Stature of Men, being half round, Cylinder-wise, and hallow within; the Inscriptions were *Arabick*.

They affirm that a certain King of *Media*, named *Kassan*, being (since the time of *Mahomet*) ingaged in a War against the *Dagesthan Tartars*, was put to the Rout in that place, and that he ordered these Tombs to be made here for his Officers that were slain in the Battel.

Not far from the Sea-shore, we saw 40 more much bigger than the former, encompass'd with a very high Wall; they told us these were the Tombs of some of his Lords, and holy Men. Both the *Persians* and *Tartars* performed their Devotions at these Sepulcres.

They say further that King *Kassan* lived many Years after this Defeat, and was buried near the River *Atzi*, not far from *Tabris*; his Queen *Burla* is interr'd near the Fortress of *Urumi*, her Tomb being, as is reported, 40 foot long.

April 13th. Being the Day of the Commemoration of the Sacrifice of *Abraham*, among the *Mahometans*, we saw several *Tartars* of both Sexes paying their Devotions to these 40 Tombs, by kissing them, and laying their Hands upon them whilst they said their Prayers.

No Christians inhabit at *Derbent*, they being all *Mahometans*, except some few *Jews* of the Tribe of *Benjamin*, as they pretend; neither is it a place of Trade, unless, that the *Tartars* sell here such Children or other Captives as they have stoln, or otherwise taken from the *Turks* and *Muscovites*.

The Souldiers, as well as the Inhabitants, being an insolent uncivilized sort of People; our *Mehemander* forewarned us to be upon our Guard, and for the removing of all occasions of quarreling, strict Orders were given the 8th. to all our Retinue, not to give the least offence to any of the Souldiers or Inhabitants, and to be careful not to intermeddle in their Quarels.

The 9th. The *Chan* of *Tarku*, who, as we told you, gave a Visit to the Ambassadors in their first Passage that way, offer'd them a Convoy to conduct them safely through the *Tartars* of *Dagesthan*; but the Ambassadors considering him to be a *Dagesthan Tartar* as well as the rest, they sent him word, that they would not give him any trouble; but in lieu thereof ordered a view to be taken of all our Arms fit for Service, which were found to consist of 52 Muiquets and Fusees, 19. Cases of Pistols, 2 Brass Guns, and 4 Murthering-pieces.

After we had in vain staid several Days for the coming of the Ambassador *Imanculi*, who had promised to be with us in this Place, in a few Days, the Ambassadors gave Orders the 12th. to get every thing in readiness for our Departure, every Man having Bread delivered him for 4 Days, there being but little likelihood, we should meet with any by the way for some time.

They prepare for their Departure.

The

1638. The 13th. just as we were ready to go forward, word was brought us, that the Governor had caused the City Gates to be shut; and being ask'd by our *Mehemander* what was the Reason, he answer'd, that having received intelligence that one *Osmin*, a *Tartar* Prince near *Derbent*, intended to Attack us in our way, and that as he was answerable for us to the King, he could not let us depart without a Convoy, which being not at hand at present, he desired we might defer our Departure till the next Day. We were sufficiently sensible that this was no more than a fram'd excuse, neither were we desirous of his Convoy; yet we put the best Face we could upon the matter, we thank'd him for his Care, desiring only that we might have leave to go without the City that Day, and expect the Convoy there to Morrow, which being readily granted, we pitch'd our Tents a Mile without the City, near a fair Vineyard, upon the Bank of a small River, which thereabouts is the common Boundary betwixt the *Persians* and *Tartars* of *Dagesthan*.

Are stopt by the Chan of Derbent.

We saw likewise near this City the Sepulchres of 2 other *Mahometan* Saints, *viz.* that of *Pyr Muchar*, in the Plain, on the foot of the Mountain, and that of *Imam Kurchud*, within the Mountain. They told us, that the latter being a Kinsman and Disciple of *Mahomet*, lived 300 Years after him, and retired to King *Kassan*, and that at last he was slain by the *Dagesthan Tartars*, whilst he was endeavouring to bring them over to the *Mahometan* Faith.

His Sepulchre is within a Cave of the Rock. In the same Rock is another Cave, where you see a Coffin made only of 4 Boards nail'd together, and rais'd 4 foot from the ground: many Women and Maids repair thither every Day, who enter bare-footed into the Cave, and after having kiss'd the Coffin, and said their Prayers, make their Offering, Bread, Butter, Cheese, Milk, and Money, to an old Woman that has the keeping of it.

Leave Derbent.

We stay'd *April* 14th. 3 hours after Sun-rising, for the Convoy promised us by the Governor, but none appearing, we left *Derbent*. Our 3 Lieutenants with the Souldiers under Command in the Van. After these came a Field-piece, and the 4 Murthering-pieces, then the Baggage and the Ambassador *Crusius*; and these were followed by another Field-piece, and the Ambassador *Brugman*, with all the rest of the Retinue, and in this Order entred the Country of *Dagesthan*.

The Tartars of Dagesthan.

Ptolemy, and those who follow him, make this Country to be part of that *Albania*, from whence, according to *Q. Curtius*, *Thalestris*, the Queen of the *Amazons*, came to *Alexander* in *Hyrcania*, to obtain that kindness which Women will more willingly take than ask. The Inhabitants are call'd by the *Persians Lesgi*, and in their Native Tongue *Dagesthan Tartars*, i.e. *Highland Tartars*, from the word *Tag*, or *Dag*, which signifies a high Mountain, their Habitations being among the Mountains, and in the Plains at the foot of the Mountains, which are 20 or 30 Lgs distant from the *Caspian Sea*, as the Plains extend all along the Sea-coast to the N. as far as *Terki*, comprehending a Tract of 40 Lgs, tho' the Mountains extend in some places within half a Lg, and in some within 2 or 3 Lgs of the Sea; the interjacent Plains being very fertile, except very near the Sea-shore, which is Heathy and Barren.

The Complexion of these *Tartars* is a dark yellow, inclining to black, have good strong Limbs, but very ugly Faces; their black greasie Hair falling round their Shoulders: They are a very barbarous Nation.

Their Habit.

Their Garments are only a courie grey, or black close Coat of Cloth; their Cloak which they wear over it, being of the same Stuff, or sometimes of Sheep-Skins; their Caps are square, patch'd together of Cloath of divers colours, and their Shooes of Sheep-Skin, or Horse-Hide of one piece sow'd together at the Instep, or at the sides.

They are *Mahometans*, but besides the Ceremonies (which are the same used by the *Turks*) they are ignorant as to the substantial part of Religion. They live chiefly upon their Cattel, the management of which depends entirely upon the Women, the Mens Profession being to rob and steal, even the Children of their neerest Relations, who are sold into *Persia*.

Their Arms.

Their Defensive Arms, they put on and off with their Cloathes; they are a Coat of Mail, a Head-piece, and a Buckler; their Offensive Arms are the Cymitar, Bows and Arrows, and the Javelin; they set upon all which they meet with, not standing in fear either of the *Persians* or *Muscovites*, by reason of their retreating places among the Mountains, so that the *Carravannes* must either be strong enough to Encounter them, or else take their way by Sea. 1638.

Their Government.

They are not govern'd by one single Person, but each City with its Territories has its peculiar Lord, who is not Absolute, but shares the Government with the other Lords, and is Elective; he is called *Schemkal*, and upon his Death the *Myrsa's*, or Lords of the Country meet, and being sat down in a Circle, the Priest of the Place throws a Golden Apple into it, and he who is first touch'd by it, is the *Schemkal*.

Osmin's Country.

We entered the Country of *Dagesthan*, as we told you before, the 14th. of *April*, and travell'd 5 Lgs through divers Villages, and fertile Fields till we came to the Village of *Rustain*, in the Country of *Osmin*. We took care to Fortifie our selves as well as we could, with our Baggage, and placed Sentinels on all the Avenues to prevent any surprize.

Osmin's Son came in the Evening to our Quarters, but visited only the *Muscovite* Ambassadors, and so departed, after having sent 2 of his Officers only to Complement our Ambassadors.

The Lordship of Boinack.

The 15th. We travel'd through a Hilly Country, and took 9 Hares in a few hours. After a hard Days Journey of 6 Lgs, we entred the Lordship of *Boinack*, and fixed up our Quarters near a Village of the same Name, on the ascent of a Hill, which being unaccessible to the Sea-side, we took care to Guard our Quarters with our Baggage, in the form of a Cresсent; the Lord of *Boinack* is not very Potent in the extent of his Territories, but extreamly wealthy in Cattel.

The Ambassador *Brugman* was so peevish, that he could not endure that the People should stand and look upon us, and would have had some Fire-locks to be discharged, yet without Ball, to terrifie them from thence; he was highly incens'd at those who did not think fit to execute his Command, which it was our good fortune they did not; those *Barbarians* who were daring enough, grumbling sufficiently at his dislike, and telling us in plain terms, that the Country we were in was theirs and not ours; that they were in no great fear either of the King of *Persia*, or *Czar* of *Muscovy*; and that it would be no great difficulty for them to make us repent of our haughtiness. They were so disgusted at it, that they would not permit us to fetch Water without paying for it, but finding that the Well was within reach of our Cannon, they thought fit not to dispute that point any longer with us.

The *Schemkal* also sent us word the same Night, that we should not stir thence till he had visited our Baggage; but the Ambassadors answering that they were no Merchants, but Ambassadors, and such as would maintain their Prerogative; we heard no more of him.

A Polish Ambassador kill'd.

I have been credibly inform'd since, that the *Polish* Ambassador, whom, as I told you, we met upon the Road, in our return out of *Persia*, happening to lodge in his return, at this Place, and a Quarrel arising betwixt him and the inhabitants, he was kill'd by them with all his Retinue, except 3, who made their escape to *Derbent*.

The 16th. Setting out early on our Journey, we came in very good time into the Territories of the Prince of *Tarku*, where I narrowly escaped being taken by some of those *Tartarians* as I was walking with another Person of our Retinue, at some little distance from the rest towards the Sea-side.

Come to Tarku.

We saw that Day several small Troops of *Tartars*, sometimes before, sometimes behind us, and after a Days Journey of 7 Lgs, pitch'd our Tents near the City of *Tarku* within a Lg of the Sea.

The *Chan* himself being sick, he sent his Brother and 3 other Persons of Quality to Complement us upon our arrival, in return of which we sent him our Physician, who succeeded so well in the Cure, that we had thanks return'd us by him for this favour.

He was not above 38 Years of Age, named *Surchon Chan*, deducing his Descent from the Kings of *Persia*, with whom he always liv'd in Amity. Though his Authority is very great, yet the rest of the *Myrza's* take their share in the Management of the Government, and a Nephew of his, the Son of one of his Younger Brothers, was Lord of some part of the City.

A Description of Tarku.

Tarku, the Metropolis of all *Dagesthan*, is enclosed within the Mountains by steepy Rocks, which are so covered with Shells of the bigness of a Wall-Nut-shell, that at a distance they seem to consist of nothing else; and though the Rock be as hard as a Flint, yet it affords

1638. fords very good Pasture on the top; and many delicious Springs which furnish the City with fresh Water. The City is without Walls, and contains about 1000 Houses, built after the *Persian* fashion, but not so well. These *Tartars*, as well as those of *Boinak*, and the rest inhabiting towards the N. are call'd *Kaitack*, whereas those inhabiting the Mountain behind *Tarku*, to the W. are named *Kamuk*, or *Kasukumus*, being Govern'd by their particular Lords.

The Men hereabouts are very Savage and Barbarous, but their Women and Maids pretty well civilized, going with their Faces uncovered, and not living under the same restraint as the *Persian* Women do.

A German living among the Tartars.

We met here with one *Matthias Magmar*, an ancient Man, born in the Country of *Wertemburg* in *Germany*; and being taken by the *Turks*, had been sold to the *Tartars* who had Circumcised him, yet he declared he was still a Christian, and with much-a-do could say the Lord's Prayer, and the Creed in his Native Tongue. *Surchon Chan* having almost Complemented us into a good Opinion of his Sincerity, we were afterwards convinced that we were never in greater danger, during the 5 Weeks we stay'd among the *Tartars*. We would fain have persuaded our *Mehemander* to have gone along with us to *Terki*, but he excused himself with his having strict Orders to the contrary; and whilst we were treating with the Camel-drivers, to carry our Baggage thither, he without our knowledge took them back along with him in the Night. The surprise of this sudden departure, was not a little augmented by the Relation of 2 Women, who being born *Muscovians* and Christians, and married among the *Tartars*, told us that those of *Osmin* and *Boinak* had sent word to *Surchon Chan*, that we had pass'd their Country without paying any Custom; and besides that, had threatned them, and that therefore they were resolved to be revenged on us; we seem'd not to be much concern'd at their Relation, to put the better Face upon the Matter, but as we observ'd, that not the least care was taken for our Departure, and that many Messengers pass'd betwixt them, the Ambassadors summon'd a Council consisting of all the Chief of the Retinue, to consult what was best to be done in this extremity. Some could not forbear to reflect at this Juncture, upon the Conduct of the Ambassador *Brugman*, in exasperating those Barbarians; but as past things were not to be remedied, it was resolved, as there was no hopes of escape, to sell our Lives at the dearest rate, rather than fall into the Hands of those Barbarians. We understood since, that they were really concerting Measures at that time to set upon us, and had certainly done it, had not the *Schemkal*, who thought we had a vast Treasure along with us, not prevented it, in hopes by inviting us to take another way, to get the whole Booty to himself; to effect which, he sent us word by a Messenger, that he would have us take our way over the Bridge of Boats above the City where he resided, and that if we chose any other way, he must look upon us as Enemies.

The Ambassadors in great danger.

The Messenger had no sooner done his Erand, but rising from his Seat, was going his ways without expecting an Answer, when the *Muscovite* Envoy taking him resolutely by the Arm, told him, *Friend, tell thy Schemkal, it is not his business to direct the way we are to take, which we shall chuse at our own pleasure; perhaps it may not be any hard matter for him to cut off a handful of Men, but let him know, that the* Czar *my Master, whose Honour lies at stake, will take a most dreadful Vengeance of him.* This brave Resolution brought the *Tartars* to a more pliable Temper, which having made them change their Resolution, 4 of the *Tartar* Princes gave the Ambassadors a Visit, and Din'd with them the 20th. of *April*.

These were followed by *Osmin*'s Brother, and the *Daruga* of *Tarku*, who express'd a great deal of Civility; and the latter ask'd the reason why Carriages and other Conveniencies were not provided for our Departure; he told us frankly, that we must not rely upon them, before we had made *Surchon Chan* our Friend by a Present; accordingly we sent him the next Day a Pair of Gold Bracelets, a Pound of Tobacco, a Pistol, a Fusee, a Barrel of Powder, 2 pieces of *Persian* Satin, and some Spices, which put him in so good a humour, that he not only promised the Ambassadors all what they stood in need of, for their Money, but also invited them to Dinner, and entertain'd them and 4 more of our Retinue, with 8 Dishes of Mutton, Curds, and Whitings, with the Cloath laid upon the ground, and the Carver in the middle after the *Persian* way. Our ordinary Drink was Water in Glasses, and after that *Aqua vitæ* in Silver Cups. We entertain'd them for 3 hours with our Musick, after which Meat was brought in again, and among the rest the Liver and Rump of a Sheep, which weigh'd at least 6 pound. One of the 3 Carvers that were there, after he had mine'd the Meat, serv'd it up by handfuls, all which we were fain to comply with. 1638.

A Present to Surchon Chan.

April 21st. Another *Tartarian* Prince named *Imam Myrza*, who was scarce 18 Years of Age, and *Surchon Chan*'s Brother's Son, invited also the Ambassadors to Dinner, which was served up at a Table in a spacious Hall, with Chairs round about it; our Entertainment was much better than the former, every thing being better dress't; among other Dishes there was a whole Lamb roasted, of which each took that he lik'd best, but without Knives. Their drinking Cups were made of Cows Horns, the Liquor call'd *Bragga*, is made of Millet, resembling in colour the Lees of Beer; yet they drink of it very liberally, and so they do of *Aqua vitæ*, which makes them very drunk on a sudden, when they make a most odious noise. Within a few Days after the Ambassadors were invited by *Emir Chan*, another *Tartarian Prince*, their main aim being by this means to squeeze out of them some Presents. A Tartarian Feast.

The 23d. The Waggons for our Baggage being got ready, the same were loaded in order to our Departure the next Day, but the same Evening *Surchon Chan* let us know that having received Intelligence that the *Schemkal Sultan Mahmud* lay in Ambush near the River *Koisu*, to intercept our Passage, he could not permit us to depart; towards Evening 20 *Tartarian* Horse-men well Arm'd, pitch'd their *Tents* near ours, and being ask'd what business brought them thither, they told us, that they were sent by Prince *Osmin* to the *Schemkal*, to let them know, that the Ambassadors being Friends of the King of *Persia*, and the *Czar* of *Muscovy*, he had let them pass unmolested without paying any Duties, desiring him to do the same, which the *Schemkal* had promised to do, provided they carried no Merchadices along with them.

These *Tartars* departed early in the Morning the 24th. of *April*, and soon after 2 Messengers came from the *Schemkal Sulthan Mahmud*, to know the reason why the Ambassadors did not proceed on their Journey, promising them all imaginable assistance, provided they took the way he had appointed them.

These were no sooner gone than *Surchon Chan* came in Person, to give the Ambassadors a Visit, and being ask'd by them why he would not let them prosecute their Journey, he told them that every thing was ready for it, but that knowing the *Schemkal* better than we did (who never kept his word) he would advise us rather to stay 8 Days longer, in which time he hoped to see the *Persian* Ambassador there, and that he would provide us a sufficient Convoy; but, if notwithstanding his Advice we were resolved to depart, it was left to our Discretion, provided the Ambassadors would acknowledge it under their own Hands, which upon occasion might justifie his Conduct to the King of *Persia* and the *Czar* of *Muscovy*. These insinuations put us into a greater perplexity than ever, not knowing whom we had best to trust; besides that the arrival of the *Persian* Ambassador was very uncertain; in this extremity we had Recourse to the Governor of *Terki*, desiring him to send us a Convoy of *Strelitzes*, but he refused to do it: in the mean while the Messenger which *Surchon Chan* had sent to *Derbent*, having lost the Letters which the *Persian* Ambassador *Imanculi* had given him, and the unexpected Departure of some *Armenian* Merchants, who stay'd in hopes of going in our Company, and were now retired into the City, upon a Rumour that 200 *Tartars* intended to Attack us, was no small addition to our Jealousie; besides this, the continual Rains had sunk so through our Tents and Cloaks, that we could not make any Fire, and durst not venture to dispose of our selves in the *Tartarian* Huts, for fear of being carried away, like as it happened to one of our Souldiers, a *Scotch-man*, who being gone a little too far from our Quarters, was carried by the *Tartars* to the Fort of *Sachur*, 6 Lgs from *Tarku*. Another additional Misfortune happened to our Gunner, who approaching too near the Mark which some of the *Muscovites* were shooting at with Arrows, was shot into the Belly, whereof he died the next Day, all which rendered our present Condition the most deplorable in the World, not knowing which

wa;

1638. way to turn our ſelves and to conceal our Affliction; the *Tartars* would come every Day, and deſire our Muſick to play to them, at a time when we had more need to ſhed Tears, than for Rejoycings. Being reduced to the laſt Reſolutions to venture all, we ſent *May* 1ſt. a Meſſenger to *Sulthan Mahmud* to deſire Paſſage, who returning the next Day in company of 4 *Tartars*, brought us word from the *Schemkal*, that he was much ſurpriſed at the Character *Surchon Chan* had given him, and that without any cauſe, for which he would take Satisfaction in due time; That at the ſame time he offered us all his Intereſt and Service to forward us in our Journey, and that to give us all imaginable Teſtimony of his Sincerity, he would ſend to us 3 of the Principal Men of his Dominions, whom we might take along with us, or leave as Hoſtages with *Surchon Chan* till we were ſafely paſs'd his Territories. We were notwithſtanding all theſe aſſurances, put to a great nonpluſs what to reſolve upon, but being informed that *Sulthan Mahmud* was not ſo infamous a Perſon as *Surchon Chan* had repreſented him, and having received Letters the 6th. of *May* from the *Perſian* Ambaſſador from *Derbent*, that for want of his Diſpatches, he ſhould be forced to continue there at leaſt a Month longer, we reſolved to venture at all, and having by the means of another Preſent, and Security given for the return of the Beaſts, got leave to depart, we left *Tarku* the 12th. of *May*, and after ſome Conteſt with the Waggoners, travel'd that Day, 2 Lgs through a Plain but Barren Country, to a Rivulet which parts the Territories of *Sulthan Mahmud* and the *Surchon Chan*: We were forced to be contented with Bread and muddy Water for our Supper.

May 13th. being *Whit-Sunday*, we made about 4 Lgs thro' the Woods, and had been like to have been all loſt by the way, becauſe the *Muſcovite* Envoy having Cudgel'd one of the Waggoners, the reſt were for going their ways back, but they were appeas'd at laſt, and we paſs'd the Night in the Wood without a Supper.

The 14th. We made no more than 1 Lg to the River *Koiſu*, which I ſuppoſe to be the ſame *Ptolemy* calls *Albanus*. Its firſt Spring is in the *Mount Caucaſus*, its Courſe rapid, and the Waters muddy. It was in that place about the ſame breadth as the River *Elbe*, and 20 foot deep. The River *Albanus*.

The Town of *Andre*, the ordinary Reſidence of the *Schemkal*, is ſituate upon a Hill on this ſide the River. Near it is a Spring of ſeething Water, which being conveyed into an adjacent Pool, makes it fit for Bathing. The Inhabitants live upon Fiſhing, which they perform by thruſting a ſharp Hook baited, and faſtned to a very long Pole, to the bottom of the River, by which means they catch abundance of Sturgeons and other Fiſh.

I was told of a very odd Cuſtom they obſerve at their Weddings, that every Man who is invited, ſhoots an Arrow into the Floor, which is left there till it either rots or falls of it ſelf.

They no ſooner ſaw us come towards the River, but they came with their Boats, two of which were joyn'd together, and a Hurdle laid over them to carry us over; their demand was 2 Crowns for each Waggon, which amounting to a good Summ (becauſe we had 70 of them) we propoſed to bargain with them for the Tranſportation in the whole, which they no ſooner perceived, but they got with their Boats to the other ſide of the River, where they fell a laughing at us; the *Schemkal* ſtanding at the ſame time with ſome of his Lords at the entrance of an adjacent Wood.

Being again put to a plunge, we eat our Dinner under Huts we had made of the Boughs of Trees, where our Drink was nothing but a mixture of Water with a little Vinegar.

The 15th. We had Recourſe to the *Muſcovite* Envoy, who at our earneſt requeſt, croſs'd the River, and having argued the Caſe with the *Schemkal*, he prevail'd ſo far that the *Tartars* conſented to take 40 Crowns for the Tranſportation of all the Company and Baggage. Accordingly we paſs'd the River immediately to the other ſide, on which we pitch'd our Tents, and ſtrengthened our little Camp with our Baggage Waggons.

It was not long before the *Schemkal* with his Brothers and a Train of 50 Perſons on Horſe-back came to give them a Viſit; he might be of about 36 Years of Age, very robuſt, and of a goodly Countenance; his upper Garment, under which he had a Coat of Mail, was of green Satin, over which he wore a Cloak of very coarſe Cloath; his Arms, as well as of all thoſe in his Company, were the Cymitar, Bows and Arrows. He brought along with him ſome Sheep and Lambs, but eſpecially a great Chauldron full of Sturgeon, cut into ſmall pieces, boyl'd in Water and Salt, the Sawce Freſh Butter with a little Sorrel, a Diſh ſo agreeable to me at that time, that all the Delicacies of *Perſia* never pleaſed me ſo well. We entertain'd him with our Muſick, ſome *Aqua-Vitæ*, and the diſcharge of our Artillery for 2 hours, when being got half drunk he went his ways, but return'd not long after. 1638.

We took this opportunity to preſent him with a pair of Gold Bracelets, a Silver Cup, a Scarlet Cloak, lin'd with Furr, a Caſe of Piſtols, a Sword, a Barrel of Powder, ſome *Perſia* Silk Stuffs, and ſome Goats Skins dreſs'd into Leather; He was ſo taken with the Cloak, that he put it on upon the ſpot, and preſented the Ambaſſador *Brugman* with his own, who had the Complaiſance at that time to flatter him, and to tell him that they being not acquainted in theſe Parts, at ſo great a diſtance, had not provided themſelves with Preſents ſuitable to his Greatneſs: But that now having eſtabliſhed a free Commerce with *Perſia*, they would make an ample amends for it the next time they came this way, when they would bring along with them full Inſtructions to enter into a perpetual League with him, which he did not queſtion would turn to their mutual Advantage. Theſe Flatteries had ſo powerful an influence upon the Mind of this *Barbarian*, that to haſte our Return that way, he got Horſes and Carriages ready for us at a very reaſonable Rate.

We left *Andre* the 17th. of *May*, the *Schemkal* being ſo Complaiſant as to Conduct us with 50 Horſe through a thick Wood, half a Lg from the Town, where having taken leave in a very obliging manner on both ſides, we travell'd 2 Lgs croſs a Plain to the River *Akſai*, which being but narrow here, runs yet with a very ſlow Current. The Inhabitants affirm'd to us, that it was an Arm of the River *Koiſu*, into which it falls near the Sea. We being forc'd to ſtay ſome time for the Boats and Hurdles, thoſe of *Andre*, brought upon Waggons for our Tranſportation, we did croſs it by Moon-light, paying 40 Crowns for our Paſſage. Leave *Andre*.

The 17th. After having travel'd 7 Lgs over a vaſt Heath, we left ſight of the Mount *Caucaſus*, and pitch'd our Tents at Night in a Foreſt near the River *Buſtro*, which is very muddy, and as broad, but not ſo rapid as the River *Koiſu*. It runs Weſtward, and within 5 Lgs of the *Caſpian Sea*, is ſeparated into two Chanels, one of which being call'd *Timenki* (but formerly *Terki*) has given its Name to the City of *Terki*, where it is 50 foot broad. The 2d. Chanel is call'd *Kiſilar*, from the Grains of Gold which it carries down with the Sand; it is as broad as the other, but ſo ſhallow in the Summer, that one may often croſs it dry foot. It exonerates it ſelf into the *Caſpian Sea* 8 Lgs above *Terki*.

It is very obſervable, that the Current of all theſe Rivers comes from the W. N.W. and that betwixt the River *Kiſilar* and the *Wolga*, (a diſtance of 65 Lgs) there is not any other River, which makes me conclude that the *Akſai* is the ſame River which *Ptolemy* calls *Ceſius*, that the *Buſtor* is the *Gerrus*, the *Timenki* or *Terki*, the *Alonta*, and *Kiſilar* the *Adonta*, it being certain that there are only thoſe Rivers between the *Koiſu* (*Albanus*) and the *Wolga* and *Rha*.

The River *Buſtro* being the common Boundary betwixt the *Dageſthan* and *Circaſſian Tartars*, our Waggoners could not by any means be perſuaded to go beyond it.

May 18th. We paſs'd the River with all our Baggage, and ſo entred *Circaſſia*, which tho' inhabited for the moſt part by *Pagans* and *Mahometan Tartars*, yet was it not a ſmall ſatisfaction to us, to ſee our ſelves in a Country under the Juriſdiction of a Chriſtian Prince. Proviſions, but eſpecially Meat were ſo ſcarce here, that they would ſcarce let us have any for Money, ſo that we paid above 30 Shillings for a Sheep.

The 19th. We made 5 Lgs through a plain Country full of Reeds, and pitch'd our Tents at Night upon the Heath near a Well, the Water of which was ſo muddy and ſtinking, that the Beaſts would not ſo much as touch it. We found the ground full of holes, which the Serpents had made.

The 20th. We continued our Journey for 4 Lgs together, over Heathy and Barren Grounds, to the

City

1638. City of *Terki*; on our way we saw many Serpents of the bigness of a Man's Arm, and 6 foot in length, sporting themselves in the heat of the Sun; and near *Terki* a peculiar kind of *Field-Mice*, call'd *Jerbuah* by the *Arabians*. They are near as big as a Squirrel, and not unlike it in Shape, except that they are more inclining to the black, have Heads like Rats, long Ears, the fore Feet shorter than the hindermost, which makes them unfit for running, but will leap 5 or 6 foot high from the ground, with their Tails laid over their Backs, which are long without Hair, like those of other Mice, but that they are not so big. They are in vast quantities in *Arabia*, and about *Babylon*, where they are frequently eaten by the Inhabitants.

Field Mice.

If they get into the Houses, they will carry all the Money they meet with into their Nests, as it happened to a certain *Persian* (the Father of one *Achwerdi*, who was my Servant) who having miss'd several times his Money, at last found more than he had lost, in the Nest of this Creature.

About a Mile from *Terki* we were met by the Brother of Prince *Mussal* (of whom we have had occasion to speak before) with a Colonel, sent by the *Muscovite Weywode* to Complement us upon our happy arrival; we were received and entertained in Tents without the City, with a Collation of Ginger-bread, Hydromel and *Aqua-vitæ*, whilst they were preparing our Lodgings for us in the City.

The next following Day the Ambassadors were treated with 4 Dishes out of the *Weywode*'s Kitchin; they sent to Complement the Princess *Bika*, Prince *Mussal*'s Mother; and within a few Days after, gave her a Visit in Person, din'd with her, and gave her the divertisement of our Musick

In the precedent part of this Relation, we mention'd only the *Tartars* of *Circassia*, referring the further account of them to our Return.

The *Circassian Tartars* were, as far as I ever could learn, quite unknown to the Ancient Historians, as well as to most of our Modern Authors. 'Tis true *Scaliger* makes mention of them, but in very few words, and with *Strabo* gives them the Name of *Zigi*, and assigns their Habitations beyond the Mount *Caucasus*, upon the *Euxine-Sea*, near the *Palus Mœotis*, betwixt *Asia* and *Europe*; whereas those we speak of are descended from the *Scythians*, or *Caspian Sarmatians*, inhabiting part of the ancient *Albania*, being enclosed on the E. and W. by the *Caspian Sea* and Mount *Caucasus*, to the S. and N. by the River *Bustro* and the vast Deserts of *Tartary* and *Astrachan*.

Exerc. 33. 167. & 303. Sect. 3. *Contr. Card.*

The City of *Terki*.

The Capital City of the *Circassian Tartars* is *Terki*, which since their being reduc'd under the *Czar* of *Muscovy*'s Obedience, is, as well as all their other Cities Garrison'd by *Muscovites*, the Natives being only allow'd to live in open Places and Villages, tho' the Management of the Government, but especially of the Courts of Justice, remains in the *Tartarian* Lords, who being ty'd by an Oath to the *Czar*, transact every thing of Moment, in the Presence of the *Weywode* of the Place, and in the *Czar*'s Name. Their Houses are very low and mean, being made only of Boughs of Trees, plaistered over with Earth or Clay.

The Government.

The Men are generally strong Limb'd, of a Tauny Complexion, but not quite so broad Fac'd as the *Nagajan Tartars*; they wear black and long Hair, but shave the midst of their Heads, from the Forehead to the Neck, but not above the breadth of an inch; leaving a Lock just at the Crown, which falls down behind.

Scaliger makes them the most Barbarous and Perfidious of any Nation, which perhaps might with much more reason be apply'd to those of *Dagesthan*, because the *Circassians* are much more Civilized; but this perhaps must be attributed to their Conversation with Christians, since they have been reduced by the *Muscovites*.

Their Language.

Besides their own Language, which is the same with the other *Tartars*, they make use also of the *Muscovian*.

Habit.

Their Cloaths are likewise like the rest of the *Tartars* inhabiting in those Parts, only that their Cloaks which are either of Sheeps-Skin, of very course Cloth, are somewhat larger; they are fastened at the Neck with a String; but as they are too straight to cover the whole Body, they turn them according to Wind and Rain.

Women.

Their Women have both very good Faces and Shapes, with a clear Complexion, and well coloured Cheeks. They never cover their Faces, and their black Hair hangs down in two Tresses on both sides. They wear black Coifs upon their Heads, and cover them with a piece of fine Calicoe, or Linen Cloth, ty'd under the Chin. In the Summer the Women wear scarce any thing but a Smock, which is green, yellow, or blue; they are cut so deep before, that you may look with ease below the Navel. 1638.

Their Widows have this peculiar, that a full blown Ox Bladder covered with Calicoe, or some other Stuff of divers colours hangs behind in their Necks. Their Women appear'd very familiar to us, taking particular notice of our Cloathes, and not taking it amiss, that some of our Retinue, under pretence of handling their Neck-laces of Amber, Copper, or Tin, slip'd their Hands into their Bosoms. Some invited us to their Huts, tho' their Husbands were busied abroad in the Fields, and gave us to understand, that if they were at home they would go abroad, it being the Custom of that Country so to do. They have notwithstanding this, the Reputation of being very Vertuous; one of the Officers belonging to our Retinue, being got into a familiar acquaintance with one of them, who was very handsom, having an opportunity to make tryal of her Chastity, found her impregnable, tho' she was very willing to do him divers little kindnesses, and to grant him some favours.

Are Chaste.

They are allow'd to marry as many Wives as they are able to maintain, but generally are satisfied with one; if a Man happen to die without Issue, his Brother is obliged to marry his Widow, of which we had an instance in Prince *Mussal* himself, who married his Brother's Widow.

As to their Religion, tho' they use some *Mahometan* Ceremonies, and are circumcised, yet may rather be called *Pagans*; they having neither *Alchoran*, Priests nor *Mosques*, every one offering his own Sacrifice, especially on St. *Elias*'s Day.

Their Religion.

When a Person of any Note dies, the Relations of both Sexes appoint a Meeting in the Field to perform the Sacrifice, which is a He-Goat. The first thing they do, is to try whether it be proper for the Sacrifice; to know which, they cut off the Privy-Members, which being cast against a Wall, if they stick there, they flea the Goat, and stretch the Skin upon a long Pole, before which they offer the Sacrifice; the Flesh is both boyl'd and roasted, and afterwards eat. After the Feast the Men pay their Devotions to the Skin, which done, the Women are sent home, and the Men conclude the Day with drinking *Aqua Vitæ* to that excess, that they appear rather like Beasts than Men, and rarely part without blows. The Skin remains standing with the Pole, till another is put in the place of it, which is not done till another Person of Quality dies. We saw one of those Skins near *Terki*, upon a black Cross, with the Head and the Horns on it; it was fix'd in the middle of a Quickset-hedge to keep the Dogs and other Cattel from prophaning it.

Sacrifices.

For the rest they bury their Dead with a great deal of Ceremony, Persons of Quality having Houses erected over their Tombs. That of the lately deceased Brother of Prince *Mussal*, was built of Boards of several Colours nail'd a-cross Chequer-wise, with divers Wooden Statues, but meanly done, representing the shapes of some wild Beasts on the top of it.

Their Burials.

To express their Affliction at the loss of their deceased Friends, they scratch their Fore-heads, Arms and Breasts, till the Blood follows; and sometimes they renew their Wounds, by tearing of them open again after they have been healed up.

May 21st. We began to prepare for our Departure; and bargain'd with the Waggoners of *Terki* at a Crown a Waggon, with 2 Horses a-piece, to carry us over the Desart (being 70 Lgs) to *Astrachan*, and as many *Persian*, *Turkish*, *Greek* and *Muscovite* Merchants joyned with us, that we were above 200 Waggons strong, each carrying 3 or 4 Persons. Our Allowance for so great a Journey was but very slender, consisting only in some hard Biskt, a Loaf of moldy brown Bread, and half a dry'd stinking Salmon for each Man; we made no Provision for Drink, because the Ambassador *Brugman* would not be at the Expence of hiring a Waggon to carry it, and most of us did not much urge the matter of which we had sufficient reason to repent afterwards.

We had no sooner left *Terki*, *Jan.* 4th. But got sight of that dreadful Desart, taking our way to the left from the *Caspian Sea*; it was no small surprise to us to travel 11 Days without seeing as much as a City, Village, or Hills; nay, not so much as a Tree, or Bird,

They leave *Terki*.

1638. Bird, nor any River except the *Kisilar*; but only a vast Sandy Plain, which here and there produced a little Grass, and some standing Pools of salt and stinking Water, near one of which we took up our first Nights Lodging, having made no more than 2 Lgs that Day.

The Desart of Astrachan.

The 5th. We reach'd the River *Kisilar*, and the 6th. made 6 Lgs. These 3 Days we directed our Journey to the W. N. W. and E. N. E. towards the River *Wolga*.

The 7th. We travel'd 7 Lgs thro' Fenny Grounds, which were scarce passable, and were not a little afflicted with Heat, Thirst, Gnats, Wasps, and other Insects; especially the Camels, who having no Tails, could not defend themselves against them so well as the Horses.

The 8th. We made 4 Lgs in the Forenoon, and after having refresh'd our Beasts, we made 4 more in the Afternoon; in the Evening the *Tartars* roasted one of their Horses, which they had kill'd because it was ready to drop.

The 9th. We Encamp'd after a Days Journey of 7 Lgs near a standing Pool, made by the overflowng of the Sea, but the Water was so corrupted, that we could not drink it without stopping our Nostrils.

The 10th. After we had travel'd 7 Lgs farther, we had the good fortune to meet with some fresh Water, in a small Brook derived thither from the *Wolga*.

The 11th. We made again 7 Lgs to a standing Pool of fresh Water made by the overflowing of the River *Wolga*; but its scent was so nauseous that it was unfit for drinking. This Day some *Tartars* being in pursuit of 12 wild Boars, which pass'd hard by us, the Horses of the Waggon in which the Physician, the Steward, Mr. *Uchteritz* and my self were, fell a running, so that the two first fell out of the Waggon, but Mr. *Uchteritz* and I with much a-do kept our Places till the Horses stopt.

The 12th. We made 8 Lgs, and found an Eagles Nest with 2 young Eagles not quite fledg'd.

The 13th. After a hard Days Journey of 8 Lgs, we at last came to a place within sight of *Astrachan*, and after having travel'd 3 Lgs farther the next Day, *viz.* 14th. we took up our Quarters upon the Banks of the *Wolga*, opposite to *Astrachan*; it was a wonder to behold many of our People, who had scarce tasted any fresh Water since they had left *Terki*, running up to the Knees in the River to Drink, we were no sooner arrived here, but some of our Friends came from *Astrachan* to bid us welcom, and fresh Provision being brought us at the same time, we stay'd all that Day near the River, to give leisure to the Governor to provide for our Lodgings.

They come to Astrachan.

Jan. 15th. We pass'd the River, and had our Quarters appointed us in a large Store-house without the City, near the River side; we met here with good store of Provisions sent thither by Mr. *David Rutz*, his Highness the Duke of *Holstein*'s Factor at *Muscow*. The Ambassador *Brugman* having ordered all the Baggage to be shut up in one Room, which was done accordingly; some of our Retinue were so exasperated thereat, that they forced the Doors, and took away their Chests in spite of the Centinel that was to guard it.

Jan. the last, The Ambassadors received a Present of 4 Sheep, 1 Ox, 10 Wild Ducks, 10 Pullets, 6 Geese, 1 Tun of Beer, and one of Mead from the Governor, in return of a Present they had made him before. About this time we began to be more and more sensible of the indifferent understanding that was betwixt the 2 Ambassadors, occasioned chiefly by the mismanagement of the Ambassador *Brugman*, who beginning to be sensible of the ill consequences that were in all likelihood to attend them upon his return into *Holstein*, scarce ever spoke a word at Table, except when his peryerse humour prompted him to break out into injurious Language, as it happened one Day among the rest with the Secretary, that not being able and longer to endure his vilifying words directed to him, made some Reply, at which he was so enraged, as to threaten him with his Knife, so that he was forced to quit the Table, for which affront he received afterwards Satisfaction in *Holstein* from *Brugman*: His implacable Temper reach'd even to the Chaplain of the Embassy, whom having touch'd in his Sermons upon some things that were not agreeable to him, he kept, so poorly, that he had not wherewithal to provide himself with necessary Clothes; and as he was administring the Sacrament at *Scamachie*, the *Muscovite* Envoy, perceiving him to have only a pair of Drawers under his Cassock, he offer'd to make him a Present of a Suit of Clothes, which the Minister was forced to refuse, for fear of the said Ambassador *Brugman*. Neither was it long before we had warning given us by the *Muscovian* Envoy, (unto whom he had communicated his Design) that his intention was to leave his Collegue at *Astrachan*, and to go privately with a few of his own Creatures by Land to *Muscow*, in order, as it was supposed, to trapan his Collegue at the *Czar*'s Court. Within a few Days after the said *Muscovite* Envoy left *Astrachan*, taking his way by Land, but got no sooner to *Nise*, (as we were informed afterwards) when being inform'd by some Letters writ to him from *Muscow*, that he was likely to meet but with an indifferent Reception from the *Czar*, he poyson'd himself, of which he died at the same Place.

1638.

Jan. 25th. A certain *German* whose Name was *Andrew Reusner*, provided with Letters of Recommendation from the Duke of *Holstein* to the King of *Persia*, came with a *Muscovite Caravan* to *Astrachan*, where in a little time he entred into so strict an intimacy with the Ambassador *Brugman*, that he changed his Resolution of travelling into *Persia*, in order to return with the first convenienency into *Holstein*, to manage the said Ambassador's Affairs there.

Aug. 1st. Was a great Festival among the *Muscovites*, in Commemoration of the Conquest of *Astrachan*, which was taken on the same Day 1554.

Aug. 16th. *Imanculi Sulthan*, the *Persian* Ambassador to the *Duke* of *Holstein*, made his Publick Entry into *Astrachan*.

The Persian Ambassador comes to Astrachan.

Aug. 11th. *Henry Krabs* one of our Interpreters died here, was buried in the Church-yard of the *Armenians*.

Septemb. 5th. A *Muscovian* Caravan consisting of 200 Persons, went by Land from hence to *Moscow*, which opportunity the before mentioned *Andrew Reusner* took for his Departure; part of our Retinue with some Horses, were also sent at the same time, every thing being by this time in readiness for our Departure; for which purpose the Ambassadors had bought two large Boats of 60 foot long, and 15 broad, for 600 Crowns, and hired 30 Water-men at 12 Crowns a Head, to carry them by Water as far as *Casan*. A few Days before our Departure, some *Muscovite Strelitzes* brought to the Ambassadors 2 young Girls, one of 10, the other of 7 Years of Age, to be sold, the first was the Daughter of a *Tartar* of *Trecos*, taken by the *Cosacques* at the taking of *Asson*, *Aug.* 1st. a Place situate upon the *Palus Mæotis* at the entrance of the River *Don*; the latter had been stoln not far from *Astrachan*, and being very young they had put her naked in a Bag, like a Pig; she had in her Cheeks 2 blue Marks made by her Parents to be know again upon occasion. The Ambassador *Brugman* was so Charitable as to purchase them both, one at 25, the other at 16 Crowns, and after his return into *Holstein*, presented them to the Dutchess, who had them instructed and baptized, 1642.

Much about the same time the *Persian* Ambassador bought himself a Wife for 120 Crowns, and a Horse valued at 10, though he was 70 Years of Age, but was of a vigorous Constitution, being much addicted to the use of Hemp-seed bak'd in the Embers, which they look upon as a great Restorative; but that it hinders Conception. This Lady was the Sister of a *Tartar Myrza*, our Interpreter for the *Turkish* Language being also a *Tartar*, born in those Parts, who had embraced Christianity in *Muscovy*, his Relations would fain have prevail'd with him to stay among them, offering a sufficient Ransom for him; but as he remained stedfast in his Resolution of persevering in the Christian Religion, so he was very careful in not going at any distance from the Ambassadors Quarters, for fear of being surprised, and carried away by them.

Purchases a Wife.

Septemb. 7th. The Ambassadors having divided their Retinue, each of them Embark'd in his own Boat (upon the *Wolga*) and came to an Anchor within half a Lg of *Astrachan*, there they staid till next Day for the *Persian* Ambassador, who coming up with them in three Boats, was saluted with a Volley, and so they set sail together.

The Ambassadors divide their Retinue and leave Astrachan.

The 10th. we pass'd near the Isle of *Busan*, where we saw a Guard of 50 *Strelitzes* posted to prevent the *Crim* and *Precopense Tartars* from crossing the River, which is very narrow in that place; we sent them some Bread.

The 15th. We came to an Anchor before *Tzornogar*, (call'd also *Michailo Novogorod*, from the *Czar Michael Federowits*, its Founder) about 300 *Versts* or 600 *German* Lgs from *Astrachan*.

Come to Tzornogar.

The

1638. The 24th. We reach'd *Sariza* 200 *Versts* from *Tzornogar*, and the 29th. made 40 *Versts* with a fair Gale.

To Sariza. *Octob.* 2. One of the *Persian* Boats being run a Ground, the Ambassadors got a-shore whilst she was getting off, where they Din'd, and some of the *Persians* were got so drunk with *Aqua Vitæ*, that they were forced to be carried aboard again, and one of the *Persian* Ambassador's Pages had the misfortune to be drown'd, and was not miss'd till the next Day. There also arose a Quarrel betwixt the *Persians* and the *Muscovite* Guards which might have proved of bad consequence, had it not been timely appeased by our Ambassadors.

To Saratof. By the 6th. we were advanced as far as *Saratof*, 350 *Versts* from *Sariza*. Here we understood, that a Troop of *Cosaques* had had a design to set upon the before-mentioned *Caravan* that went from *Astrachan*, but finding themselves not strong enough, contented themselves with carrying off some few *Persian* Horses.

The 14th. We were overtaken by so violent a Tempest from the S. W. that the Ambassador *Crusius*'s Boat and 2 of the *Persian* Ambassadors which carried Horses were so disabled, that with much a-do they saved the Horses, which were forced to be sent by Land.

To Samara. We set sail again the 17th. and arrived before *Samara* the 24th. 70 Lgs from *Saratof*.

Novemb. 6th. We pass'd by the Mouth of the great River *Kama*, and by Night very seasonably entred that

To Casan. of the River *Casan*, the River *Wolga* being frozen over the next Morning.

The then Governor of *Casan* was *John Basilowits Morosou*, who having opposed our Negotiation at our first coming into *Moscow*, gave us but an indifferent Reception, and sending the next Day after our arrival a *Simbojar*, to the Ambassador *Brugman*'s Boat, he ask'd them which of the two was the Ambassador, which the Merchant, which so enraged *Brugman* (who found himself so gall'd by these words) that he took the *Simbojar* by the Arm, and told him, *Go tell thy Master, that if he can't read himself, he must get one that can, to understand from the Great Dukes Pass what Quality he gives us.* But to be even with us, he made us to continue for several Days, on the River side, notwithstanding the rigour of the Season; and though by way of Complement he sent us word we might lodge in the City at our own Cost, he forbid the Inhabitants to entertain us.

Novemb. 11th. The *Persian* Ambassador, having made his Publick Entrance at *Casan*, was lodg'd in the City, and at his Intercession, we were permitted to take up our Quarters in the Suburbs on the 13.

Nov. 20th. The Ambassadors having, among other Presents, bestowed their two Boats upon the Governor of *Casan*, we met with a much kinder Entertainment afterward.

Dec. 16th. Being the Anniversary, on which the *Muscovites* keep the Festival of their Patron Saint *Nicholas*, nothing but Drinking and Debaucheries was to be seen for the space of 8 Days: The Parson of the Parish coming to my Quarters to Incense the Images, told me a strange Story of 2 Monks named *Warsinofi* and *Kursi*, whose Bodies had been found uncorrupted 40 Years ago, in the Monastry of *Syras*, in the City of *Casan*, and what prodigious Miracles they had perform'd since, by restoring Health to such sick People as came to pay their Devotions at their Sepulchres. But when I ask'd him why they did not cure the Blind and other Distemper'd People which we had seen at *Casan*, he was put to such a nonplus, that he withdrew without answering a word.

After a stay of 5 Weeks at *Casan*, till the Ice was able to bear, we continued our Journey the 13th. of *Dec.* with 60 Sledges, leaving the *Persian* Ambassador, by the Governor's Order, behind us.

They leave *Casan*, come to *Nise*. We travel'd along the *Wolga*, and came 21st to *Nise*, 300 *Versts*, or 60 Lgs from *Casan*. Here is a *Lutheran* Church, but the Minister being dead some Months before, ours Preach'd the *Sunday* before *Christmass* in their Church. The 23d. in the Afternoon, we quitted the *Wolga*, and passing over the side of the *Occa*, we came to the Village of *Kurim* the 24th. 10 Lgs from *Nise*, and travel'd 10 Lgs farther the 25th.

The 29th. We arrived at *Wolodimer* within 18 Lgs of *Moscow*, and 42 from *Nise*; the Ruins of the Walls are unquestionable demonstrations both of the antiquity and vast extent of this City.

The last Day of *Dec.* we came to the Village of *Rubossa*, 8 Lgs from *Moscow*, wherewe received Orders 1638. from the *Czar* to prepare for our Publick Entry into *Moscow*, against the 2d. of *Jan.* next, which was put in Execution accordingly; for having travel'd *Jan.* 1. 5 Lgs to the Village of *Bechra*, we made the next Day 1639. our Publick Entrance; each of the Ambassadors in a very rich Sledge lin'd with Crimson Velvet, and adorned with *Persian* Carpets, having a *Pristaf* to Conduct them; and the chief of our Retinue being mounted on 12 white Horses, out of the *Czar*'s Stables. We found the Horses and the rest of our Train Make their Entry into *Mosc.* which were sent away by Land from *Astrachan*, already there, who, as well as the whole Embassy were defrayed at the Great Duke's Charge.

Jan. 6th. We saw the *Muscovites* Celebrate the Feast of the Consecration of the Holy Water, in the Presence of the *Czar*, and the Patriarch.

The 8th. the Ambassadors had their first Private Audience which lasted above an hour, and the 9th. *Knez Juan Michaelowits*, the *Czar*'s second Son died, The *Czar*'s second Son dies. in the 8th. Year of his Age: This put the City of *Moscow* into Mourning, most Men and Women laying aside all their Jewels and Silk Apparel, and appearing only in old Cloathes, for the most part of a dark grey colour; and when the Ambassadors were admitted to their second Private Audience *Jan.* 21. they were conducted thither on black Horses, the Court was all hung in Mourning, and the Courtiers Clad in black Chamblet.

Jan. 30th. The Sieur *Uchteritz*, a Gentleman belonging to our Embassy, obtained with much ado, leave from the Ambassador *Brugman* to return into *Holstein*, under Condition nevertheless that he should carry no Letters but what he should first Communicate to him; which he promised to do, and accordingly shew'd him divers Letters of the Ambassador *Crusius*, (with his consent) but was careful enough not to let him see several others which he carried away without *Brugman*'s Knowledge.

Feb. 2. Died Mr. *Grumeauld*, a Patrician of *Dantzick*, another Gentleman belonging to the Embassy, who had travelled formerly into the *East* and *West Indies*.

The 5th. the *Persian* Ambassador, whom we mention'd before, made his Publick Entrance into *Moscow*, and on the 8th. following, was conducted to his first Audience.

The 11th. The Ambassador *Brugman* (according to his request) was admitted to a Private Audience, without the Knowledge of the Ambassador *Crusius*.

Feb. 19th. Both the Ambassadors had their Audience of Leave from the *Czar*, and the *Persian* Ambassador leaving *Moscow* the 15th. taking his way towards *Germany*, our Ambassadors did the like on the 17th. and the approaching Spring making them to fear not without reason, that they should lose the convenience of Sledges, they travel so hard, that they arrived the 28th. at *Twere*, and the 29th. at *Torsock*, a small City, which has however near thirty Churches and Chappels. They leave *Mosc.*

The 3d. They overtook the *Persian* Ambassador at *Novogrod*, and continuing their Journey the 24th. arrived the 27th upon the Frontiers of *Ingermania*, and on the last of *March* made our Publick Entry into *Narva*, being met without the City by Col. *Wrangel* at the Head of 80 Horse. Come to the *Muscovite* Frontiers.

The *Persian* Ambassador being lodg'd at one of the Senator's Houses, and the People flocking thither in great numbers, to get sight of his Wife, (a thing very unpleasing to a *Persian*) he had always a Curtain drawn betwixt the Doors and the Sledge which carried her, to prevent her being seen by any body. To *Narva*

April 6th. The Ambassadors left *Narva*, and came the 8th to *Kunda*, a Country Seat of a Senator of *Riga*, where they were forced to change their Sledges for Horses, for want of Snow, and so continued their Journey to *Revel*, where they arrived the 13th. and were received with great Splendor by the Senate; the Ambassador *Brugman* now beginning more and more to dread the event of his many miscarriages, was so unwilling to return home, that without any real necessity, we stay'd here 3 whole Months, during which time several belonging to the Embassy, and among the rest the Ambassador *Crusius* engaged themselves in Wedlock, the last marrying a Senators Daughter of that City. The Secretary of our Embassy being quite tired with the many Indignities he daily received from the Ambassador *Brugman*, took the first opportunity of a Vessel bound from thence to *Lubeck*, from whence he continued his Journey to the Court of *Holstein*. Leave *Narva*. Came to *Revel*.

July 11th. Our Ambassadors, the *Persian* Ambassador, and a *Muscovite* Envoy sent by the *Czar* to the Duke of *Holstein*, embark'd at *Revel*, and after 11 Days sail came upon the Coast of *Holstein*, near the Isle of *Femern*; and the contrary Winds hindering them from making the Harbour of *Kiel*, they were forced to cast Anchor before *Newstadt*, 2 Lgs from *Lubeck*; but being informed that a contagious Distemper reigned there at that time, they went on to *Travemunde*, where they arrived safely the 23d. of *July*. Orders being taken for the Baggage, and most of our People to continue their Voyage by Sea to *Kiel*, they travelled by Land to *Eutin*, and the 28th. being splendidly entertained by *John*, Duke of *Holstein*, Bishop of *Lubeck*, our Princes Brother, came the 30th. to *Kiel*, where having left the *Persian* Ambassador, and the *Muscovite Pristanik*, they arrived at *Gottorp* the 1st of *Aug.* where they met his Highness the Duke of *Holstein* in perfect Health, and thus put a period to their Travels into *Muscovy*, *Tartary*, and *Persia*. They Embark at *Rev.* Come to *Travemunde*. To *Eutin*. To *Kiel*. To *Hostein*.

FINIS.

THE

Voyages and Travels

OF

Mr. *JOHN ALBERT DE MANDELSLO,*

(A Gentleman belonging to the former *Embaſſy*)

INTO THE

EAST-INDIES,

In the Years 1638, 1639, and 1640.

Containing a Particular

DESCRIPTION

OF THE

EMPIRE

OF THE

GREAT MOGUL,

The Kingdoms of *Decan*, *Calicut*, *Cochim*, *Zeylon*, *Coromandel*, *Pegu*, *Siam*, *Cambodia*, *Malacca*, *Sumatra*, *Java*, *Amboina*, *Banda*, the *Moluccas*, *Philippine*, and other Iſlands of *Japan*, the *Chineſe* Empire, the *Cape of Good Hope*, *Madagaſcar*, &c.

In Three PARTS.

John Albert de Mandelsloe's *Voyages and Travels into the East-Indies, &c.*

CHAP. I.

1638. THE Ambassadors of *Holstein* having left *Ispahan*, and being not long after follow'd by *Imanculi Eschagasi*, a Native of *Karabath*, who was sent in the Quality of an Ambassador from the King of *Persia* to the Duke of *Holstein*, I according to the Permission I had obtained from the Duke my Master, prepared for my Journey into the *Indies*, and being the 12th. of *Jan.* introduced to a particular Audience of the *Sophi*, he permitted me with much kindness to kiss the Hem of his Garment.

The Author leaves *Ispahan.* I set out from *Ispahan* the 16. of *Jan.* with a Retinue of 4 Persons, a Chirurgeon, a Footman, a Groom, and one *Persian* Servant. Being conducted out of the Town by Mr. *Honywood*, the *English* Agent, and several *English* and *French* Merchants; I took my leave of them a Lg thence, and travel'd 8 more the same Day to the Village of *Majar*, where I stay'd the next Day, and continued my Journey the 18th. to *Kamscha*, 6 Lgs thence; the whole Road being one continued Walk of Trees, made by the adjacent Gardens; the *Caravansera* I lodg'd in had nothing but bare Walls, but that wherein I was lodg'd the next Night at the Village of *Machsud*, 6 Lgs from *Kamscha*, had both convenient Lodging-Rooms and Stables.

Comes to *Majar.*

To *Kamscha.*

To *Machsud.*

The 20th. I came to the Village of *Hannabath*, seated upon the descent of a very pleasant Hill.

To *Hannabath.*

The 21st. I made 10 Lgs in very Snowy and Windy Weather, and lodg'd in a *Caravansera* named *Jurgisthan*. Betwixt this place and *Surma*, there being neither Village nor *Caravansera*, I was forc'd to travel the 22d. 12 Lgs, and the 23d. was obliged to make 12 more, before I could reach the Village of *Gusti*, where we met with very indifferent accommodations, scarce meeting with a House there we could put our Heads in, or preserve our Horses against the bad Weather; The next Day, being the 24th. proved rather worse; for being forced to travel 12 Lgs through the Mountains covered with Snow, and that in very ill Weather, we with much ado, late at Night reach'd the great and famous Village call'd *Meschid Maderre Suleiman*, from a Sepulchre which is within half a Lg of it; this Sepulchre is to be seen within a little Chapel of white Marble, the Tomb it self being erected upon a high Square of Free-stone, unto which you may go up by steps on all sides. The Air and Rains have penetrated through the Walls in several places, and divers Pillars round the Structure are almost consumed by Time; upon the Walls of the Chapel I found in *Arabian* Characters these words; *Mader Suleiman*. The general Opinion of the Inhabitants is, That this is the Sepulchre of *Solomon*'s Mother, but the *Carmelite Friars* of *Schiras* inform'd me with much more probability, that the Mother of *Schach Soliman*, the 14th. King of the Posterity of *Aly*, was interred here.

To *Gusti.*

To *Maderre Suleiman.*

Elmacin gives her the Name of *Wallada*, and that she was the Daughter of *Abbas Abbascam*; he tells us that this *Soliman* liv'd in the Year 715. and that being a very handsom Person, and viewing himself one Day in a Looking-Glass, he was so taken with himself, that he said that he might with the same right pretend to the Title of the King of Youth, as of the Kingdom; which being overheard by one of the Ladies of his *Seraglio*, she answered, That provided it was in his power to insure to himself any continuance of what perhaps he might not be able to enjoy very long, he might justly lay claim to such a Title; this struck such a damp upon his Spirits, that he died within a few Days after. We met here with an *Armenian* Caravan.

Hist. Arab. l. c. 14.

The 26th. I travel'd 5 Lgs to *Sivan*, and the 27th. as many more to *Mardasch*, one of the most famous Villages of those Parts, by reason of the Antiquities that are to be seen near it, which obliged me to take a full view of them.

They are the Ruins of a very ancient Structure call'd *Tzilminar*, i. e. *Forty Pillars* by the *Persians*, who affirm that this most Magnificent Palace was built by *Szemseid Padschal*, Grand-father to *Alexander the Great*, by the Mother-side, though some among them make King *Solomon*, others *Darius* the last *Persian* King its Founder. But the before-mentioned *Carmelites of Schiras* assured me, that it was the general Opinion of the Learned, that this was the place whereabouts the ancient *Persepolis* had stood, and that these were the Ruins of that famous Palace built by *Cyrus*. The Foundation or Ground-work on which this vast Structure was erected, is raised 22 Geometrical Feet, having at each of its four Corners a pair of Stairs of white Marble of 95 Steps, so flat and broad that 12 Horses may go up conveniently together a breast. Before you come to the main Body of the Structure it self, you pass through a Square, where you see the Ruins of a Wall, and the remainders of 2 great Gates, each of which have a Horse Harness'd and Saddled after a very antick manner, Carv'd on one side, and on the other 2 Creatures resembling a Horse, except that they have Wings on each side, and the Head is crown'd, and like that of a Lion. On the one side you see the Ruins of 19 Pillars of white and black Marble, the least of which are 8, and some 10 Ells high without the Bases, but whether they had been intended for the support of some large Hall, or were built purely in the Air is not to be distinguished at this time. The Inhabitants thereabouts told me, that not many Years before, there were 40 of these Pillars standing; as you go on further you meet with the Ruins of two Rooms, but indifferently large, as may be judged by the Doors and Windows, but every thing is of the finest polished Marble. Several Figures of Men of an extraordinary size are to be seen on both sides the Doors, some in a sitting, others in a standing posture. Their Hair are falling down carelessly over their Shoulders, and their Garments reaching down to their Heels, with very wide Sleeves, and a Girdle round the Waste. They had very long Beards, and round Caps on their Heads. Not far thence are two other Chambers, much of the same bigness as the former, but so ruin'd that nothing but the Doors and the Crossbars of the Windows are left. This Structure seems to have this common with most of the Buildings of a modern date in *Persia*, that it had many Doors, which is done here to give the more free passage to the Wind to cool the Rooms. Hard by these two last Chambers you find certain unknown Characters engraven upon a square Pillar; which have no resemblance to the *Greek*, *Hebrew*, *Arabian*, or any other Language, being triangular, or rather Pyramidal, not unlike Obliques. There are 12 lines of them, so well proportioned, and nicely engraven, that they have not the least footsteps in them of *Barbarism*. Some believe them to be *Telesms*, and to contain certain Mysteries. Besides these before-mentioned Rooms, there is upon the same Ground-work a large Court, 90 Paces square, with 2 Gates on each side, some of which are 6, others only 3 Paces wide. They are of the finest polish'd Marble, each of the pieces of which are 8 foot long, and 3 in breadth. You see also in another Court very curious carv'd work in Marble, Battles, Triumphs, Olympick Games; every thing in its due Proportion. Upon each of the Gates you find a graceful Person carv'd, sitting with a Globe in one, and a Scepter in his other Hand, tho' it be evident that the Kings of *Persia* never sate in that Posture.

1638. To *Tzilminar.*

Persepolis.

My Curiosity led me to get up on high, where I saw a King represented, paying his Devotions to the Sun, Fire, and a Serpent. As the Inhabitants do to this Day carry from thence a great quantity of Marble to carry on their private Buildings thereabouts, this with the length of Time has so defaced, or rather ruin'd this Noble Structure, that it is impossible to determine, whether its Architecture was of the *Ionick*,

1638. *Dorick*, or *Corinthian* Order; notwithstanding which even its Ruins are so surprising, that it is great pity that no body hitherto has undertaken the engraving of them, it being certain, that even these Remnants would find work for a very good Painter for above 6 Months. If we trace the ancient *Persian* History, we find, that according to *Ælian*, the Grand *Cyrus* laid himself the Foundation, and built a most Magnificent Palace at *Persepolis*, as *Darius* did at *Susa*; Perhaps these Ruins belong to that famous Palace mentioned by *Diodorus Siculus*, being encompass'd with 3 Walls of Marble, the first whereof was 16, the second 32, and the third 60 Ells high, and all the Gates and Balconies of Brass; All which, together with the inestimable Treasure it contained, was in a few hours reduced to Ashes by *Alexander the Great*, at the request of a Harlot.

Lib. 1. c. 59.

Lib. 17.

2 *Curtius*, l. 5. c. 7.

Having spent a whole Day in viewing these Antiquities, I continued my Journey the 28th. of *Jan.* and travell'd that Day 10 Lgs, to the City of *Schiras*. Here I met with 4 *Carmelite Friars*, *Italians* by birth, who were possess'd of a goodly Monastery, and had the free exercise of their Religion allow'd them. Not many Years before the *Portuguese* had here likewise a Convent of *Austin* Monks, but they were forc'd thence, as well as all the other *Portuguese*, after the taking of the City of *Ormus* by the *Persians*.

The City of *Schiras*.

Schiras is the Capital City of the Province of *Fars*, situate at the foot of a most pleasant Mountain upon the River *Sendemer*, (heretofore call'd *Araxes*) which exonerates it self into the *Persian* Gulph. This City lies under 29 Deg. 36 Min. Elev. It contains about 10000 Houses, but the Ruins of a great Wall at 2 Miles distance from the City, shew its extent to have been much larger than it is at this time. It may be truly said, that whatever Nature is able to produce, either for conveniency or pleasure, is centred in this place, and that in great plenty, as Wheat, Oranges, Limons, Pomgranates, Almonds, Dates, Pistacho's, *&c.* The Wine which grows hereabouts, is the best of all *Persia*, which being transported hence all over the Kingdom, and look'd upon as the best Entertainment they can give to their Friends, this makes it to be sold at a dear rate at *Ispahan*, where you can't have a Pottle of good *Schiras Scharab* under Half a Crown. Its taste is not unlike that of Canary Wine, but is more sprightly, and has a more pleasant flavour. This City being so much celebrated thro' all *Persia* for Wine and Women. The *Persians* are wont to say, that *if* Mahomet *had been sensible of the pleasures of* Schiras, *he would have beg'd of God Almighty to make him immortal there.* The Sheep hereabouts are of an Ash grey colour, with one white Eye, their Wool curled, and their Tails of such a bigness, as to weigh sometimes 18 or 20 pounds. The Woods hereabouts afford great store of Mastick, which is gathered in Dishes fastened to the Tree, and is green at first, but afterwards turns brown.

Leaves *Schiras*.

After a stay of 8 Days at *Schiras*, I left it the 5th. of *Feb.* and made 10 Lgs that Day to a certain *Caravansera*; the 6th. I travell'd 7 Lgs through very bad Roads, but the Prospect I had of many Villages, and a vast number of Date Trees, made me some amends for the toil of the Day.

The 7th. I made 10 Lgs, to the little City of *Scharim*, seated in the middle of a Date Tree Wood.

The 8th. We could make no more than 5 Lgs, the ways betwixt the steepy Rocks on one side, and the Precipices on the other side being so rough and narrow, that one can't pass them without great danger; of which I had a tryal in my Passage, for my Horses Hoof, which I was leading by the Bridle, being fill'd with Snow, he slip'd and tumbled upon me, which forcing me out of the way, I had infallibly tumbled down into the Precipice, had I not by good chance catch'd hold of a wild Almond Tree which stood there. I was forced to take up my Quarters that same Night at a *Caravansera* where there was not any Provisions either for Man or Beast.

The 9th. after I had travell'd 3 Lgs, I came to a *Caravansera* where we had the opportunity of refreshing our Horses, and having made 5 Lgs more in the Afternoon, I overtook the *Armenian Caravan* I spoke of before, at another *Caravansera*, and in their Company rode 2 Lgs farther, to the Village of *Berry*, near which I lodg'd in one of the best *Caravanseras* I met with in my whole Journey.

Berry.

The City of *Laar*.

The 10th. I travell'd through very bad ways, and came late at Night to the City of *Laar*, situate in a spacious Plain, at the foot of a Mountain; there is no Wine hereabouts, but Dates in abundance: The Air is very unwholsom here, and the Water (the ordinary Drink of the Inhabitants) very muddy, which breeds in them certain Worms betwixt the Skin and Flesh, of which we shall have occasion to speak more at large hereafter. 1638.

They say that this City owns for its Founder *Pilaes*, the Son of *Siroes*, whose Successor was *Gorgion Melech*, the first King of *Laar*, and that the 32d. Successor was one *Ebrahim Chan*, who was divested of the Kingdom 1602. by *Schach Abas*, King of *Persia*. It contains about 4000 Houses, built of Brick bak'd in the Sun; but is without any Walls or Gates: The Citadel which is built by the *Persians* since their Conquest, and advantageously seated upon a steepy Rock, is very well fortified with a Rampire of Free-stone, and commands the whole City; the Garison consisted at that time of no more than 100 Men, a sufficient number to defend it against any sudden Attack, the way which leads unto it being cut out of the Rock, and so narrow, that scarce 2 Horses can go a-breast; but they have a Magazine of Arms for 3000 Men. The worst is, that the Water within the Fort being brakish, they must, in case of a Siege, live upon Rain-water, which falls plentifully there at certain Seasons of the Year, and is preserv'd in Cisterns.

After a stay of 24 hours at *Laar*, I was going to leave it the 12th. but was stopt by the Custom-house Officers, who demanded half a *Tumain* (making betwixt 40 and 50 *s.*) for my Baggage; but having sent my Letters of Recommendation from the *Sophi* to the Governor of *Gamron*, to the Commander in Chief of the Citadel, he ordered my Departure without paying any thing, and I made that Day no less than 14 Lgs, which great Days Journey, together with the muddy Waters I had used, and the excessive heat, put me into a violent Griping and Looseness, which made me tarry in this little Village in hopes of getting a Litter, but no such thing being to be had, I was forc'd to get upon the Sumpter-horse, where I had a conveniency made to rest my Back, and so continued my Journey the 19th. to a large Village within 12 Lgs of *Gamron*. That same Evening we met here with 2 *English* Merchants, one of which was to succeed the *English* Director at *Ispahan*, who not only refresh'd my almost spent Spirits with some *Spanish* Wine, and other Refreshments, but also gave me Letters of Recommendation to an *English* Merchant of *Gamron*, desiring him to receive me into the House of their Company there, and to assist me in every thing that might conduce towards the prosecution of my Journey to *Suratte*. They continued their Journey the same Evening, whereas my Indisposition detained me till the 22d. of *Feb.* when I made 6 Lgs, to a *Caravansera*, where having rested my self a little, till the heat of the Day was somewhat abated, I travel'd 3 Lgs farther to another *Caravansera*, and found my self all that Night in a burning Fever, but there being no staying for me here, I made the best of my way to *Gamron*, where being arrived the 23d. of *Feb.* the *English*, *French*, and *Dutch* there, took such effectual care of my Distemper, which was by this time changed into a Bloody Flux, accompanied by a violent Fever, that I was pretty well restor'd in 4 Days, and found my self in a condition to pay a Visit to the Governor, unto whom I had sent *Schach Sefi*'s Letters of Recommendation immediately after my arrival there.

Leaves *Laar*.

His Indisposition.

Comes to *Gamron*.

He no sooner heard of my Recovery, but he invited me to Dinner against the 28th. and entertain'd me very courteously in the Company of several *Dutch* Merchants. The same Evening arrived at *Gamron* a Vessel from *Suratte*; of 600 Tun, belonging to the Governor of *Suratte*, she brought hither a certain Widow Queen, Mother to the King of *Golconda*, who falling in Love with her Daughter, his own Sister, would have marry'd her, but the Mother refusing to consent to such an incestuous Match, had been banish'd the Kingdom with her Daughter; who came along with her, and was, as it was reported, to be marry'd either to the King of *Persia* himself, or one of the Chief of the Kingdom.

Dines with the Governor.

March 11th. It being the *Nauruz* of the *Persians*, the Governor invited me again to Dinner upon this solemn occasion, with several *English* and *Dutch* Merchants. The same Day return'd to *Gamron* Mr. *Chapman*, whom I had met with the *English* new *President*, near *Laar*. He brought along with him another *English* Merchant, with whom I having contracted a familiar Acquaintance before at *Ispahan*, I was extreamly pleased to meet

1638. meet in this place with a Friend, in whom I could put some confidence, because the *Dutch*, tho' in outward shew very obliging to me, had opposed our Negotiation at *Ispahan*.

March 13th. I was intreated by the *English* to take up my Lodgings at the House belonging to their Company, which I did accordingly.

The 21st. One Mr. *Hall* an *English* Merchant arrived at *Gamron* with 233 Bails of Silk, valued at 150000 Pistoles, which he had received on account of the Moyety of the Custom of *Gamron*, due to the *English*, of which more anon.

The same Day my Surgeon died of a Fever, the loss of whom was no small Affliction to me, he having been a great Traveller, and attained to the Knowledge of the *Spanish*, *Italian*, *Polish*, and *East-India* Languages. As I was walking abroad one Day, to amuse my self a little, with some *English*, I met with

Lib. 9. one of those Trees mentioned by *Q. Curtius*, the Branches of which spring out of the Trunk of a Tree, and bowing down to the Earth had taken Root there, and growing up afresh, had produced a new Tree 15 or 20 foot high, which casting forth other Branches in the same manner as before, made rather a small Forest than a Tree; that which I saw being 214 Paces in Circumference, capable of affording shelter for 2000 Persons. The *Portuguese* call it *Arbol de Rays*, and is generally known by the Name of the *Indian Fig-Tree*, by reason of its Fruit, which both in bigness and the abundance of its Grains, like our common Figs, resembles that Fruit; but its taste is more unsavory, luscious, and its colour red; the Leaves of the Tree, are like those of Quince Trees.

The Indian Fig Tree.

Near the head Trunk of this Tree, we saw a small Chapel, and within, the Sepulchre of a certain *Benjan*. We found the Tomb strew'd all over with Beans of divers colours, and several Lamps, which burn Night and Day, hanging over it under a Canopy; these *Benjans* adhering to the Opinion of *Pythagoras*, that the Souls of the Deceased retreat into Beans, which Opinion is generally received among the *Pagans*, both in the *Indies*, and in *China*.

Of the Religion of these *Benjans* we shall have occasion to say more hereafter. The Guardian of the Sepulchre treated us with some Almonds, Nuts, and Dates.

April 1st. An Envoy from *Schach Sefi* being come to *Gamron*, to assure the Governor of the continuance of his Favour, I in Company of several *English* and *Dutch* Merchants, invited for that purpose by the *Chan*, saw him go unarmed a Mile out of the City, where meeting with the said Envoy, he received the King's Letter, the Garment and Turbant, with a great deal of Submission, in the same manner, and with the same Ceremonies, as has been related before in the preceding Treatise of our Embassy into *Persia*.

The City of *Gamron*, or rather *Bandar Gamron*, i.e. The Port of *Gamron*; is by the *Persians* and *Arabians* put at 25 Deg. but erroneously, its true Latitude, according to the Computation of the *Hollanders*, whose foot-steps we follow in this Point, being at 27 Deg. most of the Maps of *Persia* being hitherto very defective, which proceeds from hence, that by placing the *Caspian Sea* too high, they extend the breadth of *Persia* from N. to S. beyond its true Bounds; for they put the City of *Resecht* at 41 Deg. whereas it is at 37. so that the whole breadth of *Persia* from *Gamron* to *Resecht* is no more than 10 Deg. which plainly shews the mistake of *Boterus*, who makes the extent of *Persia* 8 Deg. whereas, if according to their own Computation, we should grant *Ormus* to be at 25 Deg. the breadth of *Persia* could amount to no more than 12 deg. It is not many Years since this City was a meer Village, inhabited by a few Fishermen, but, since the Reduction of *Ormus*, the *English*, *Dutch*, and *Indian* Ships have found out the conveniency of this Harbour, and the Traders of *Ispahan*, *Schiras*, and *Laar*, bring thither their Silk and other Manufactures, which they exchange for *European* and *Indian* Commodities.

The City of Gamron.

The true Latitude.

Its Situation. Its Situation is upon the *Persian Gulph*, the entrance at the Haven in which Ships may ride at Anchor without the least danger, at 5, or 6 fathom Water, being defended by 2 strong Castles, and a square Redoubt. The Castle is fortified with some antick round Bastions, but well provided with Artillery.

The Houses of *Gamron* are of Brick, made of a mixture of stiff Clay, Sand, shredded Straw, and Horse-dung; whereof having sett one Layer, they cover it with a Layer of Straw or Faggots, and so alternatively till they have raised it to 6 or 7 foot high; then they set it on Fire, and burn it to Brick. Their Mortar is a Composition of the same Ingredients, mixed with Salt Water, and some Lime, which becomes as hard as the Brick it self. The Houses of Note are the *Sulthan's* Palace, and the Ware-houses, where the *English* and *Dutch* are lodged, which are so near the Sea-side, that at High-Tide the Water comes up to the very Walls of them. The lower Rooms being employed for the laying up of their Merchandices, and the uppermost for Lodgings, being the most convenient for the free passage of the Air. The poorer sort cover their Houses only with the Sprigs and Leaves of Date-Trees. 1638.

The Streets of this City are very narrow, irregular, and not kept clean, which together with the excessive heat of the Climate, and the changeableness of the Winds, renders the Air very pernicious here. For in the Morning they are sufficiently sensible of the effects of a cold East Wind, which towards Noon changes to the other extream, *viz.* a very hot S. Wind; the West Wind, which blows towards Night, from the side of *Arabia*, continues the Heat of the Day till Mid-night, when a cold North Wind coming from the Mountains, introduces a sudden Alteration. Besides this, it Rains so seldom here, that 1632. they ordered a Publick Thanksgiving for a plentiful Shower of Rain, after a continual Draught of 3 Years.

Its Streets and Air.

A great Draught.

This is the reason that all about the City you see not any thing of Grass, or other Herbs, except what is produced with incredible labour in some Gardens, where they have Garlick, Onions, Chibols, Radishes, and Cucumbers, but these must be watered twice or thrice a Day.

It is the Isle of *Kismisch* which chiefly furnishes this City with all manner of Pulse and Fruits; it lies 3 Lgs from the Continent of *Gamron*, being 15 Lgs in length, and 3 Lgs in breadth.

The Isle of *Kismisen*.

In *June* and the rest of the Summer Month this Isle produces Grapes, Damascens, Peaches, Mangoes, Quinces, Oranges, Limons, and Pomgranates both red and white; and in *October* Melons, Citruls, Cucumbers, Radishes, Onions, Turneps, Almonds, Pistachoes, Apples, Pears, and divers other Fruits, and that in such vast Quantities, that they are sold here at an easier rate than at any other place in all *Persia*. Whence it comes that the Inhabitants feed, for the most part, upon Pulse, Fruits, and what Fish the Neighbouring Sea furnishes them with; the Meat hereabouts being, by reason of the excessive heat, not very well tasted, and of little Nourishment; though otherwise they have sufficient store of Cattel, such as Oxen, Cows, Sheep, but especially of Goats, which are sold at the rate of 6 or 8 *s.* a-piece. They have here also a kind of Rams with 4 Horns, but no wild Fowl; among other Fish, Pilchards, Smelts, Oysters, and Crabs are catch'd here in vast Quantities. Their ordinary Drink is fair Water, which being brought into the City 2 Lgs thence, is very dear sometimes; the drink also *Aqua Vitæ* made of Rice, or Dates. Persons of Note, and the best Merchants have their Cloathes after the *Persian* Mode, but the Common People take no further care than to cover their Privy Parts; the Women look upon it as their chief Ornament, to have many Rings of Silver, Brass or Iron, according to their respective Abilities, about their Arms and Legs; to their Hair, which hangs down over their Fore-heads, they fasten a kind of a Bodkin of Silver gilt, or Brass; and wear in the left Nostril of their Nose a Gold Ring, with a Turquoise, a Granate, or perhaps only a Gold Knobb, enamel'd or plain; their Pendants are so weighty, as to draw their Ears down almost to their Shoulders.

The Traffick of *Gamron*.

Their Winter Season being betwixt *October* and *May*, when the Heats are less violent, this is their chief time for Trading, when the *Persians*, *Arabians*, *Banjans*, *Armenians*, *Turks*, *Tartars*, come thither with the *Caravans*, which set out at certain times from *Aleppo*, *Bagdat*, *Ispahan*, *Schiras*, *Lahor*, *Herat*, and *Bassora*, under the Convoy of certain *Janizaries*.

The *English* and Dutch commonly come thither by Sea, and besides their ready Money, bring divers Commodities both out of *Europe* and the *Indies*, which they exchange for *Persian* Tapistry, Raw Silk, Cotton, Rhubarb, Saffron and Rose-water, which is made in vast quantities about *Schiras*, either by Infusion which they call *Gull-ab*, and look upon it as the best; or by Distillation, and this they call *Areka-gull*, i. e. the Sweat of Roses; both kinds are much used all over the *Indies*, where they mix it with Perfumes and use it

1638. it to sweeten their Rooms with. Here is also abundance of Callicoe made, in portable Looms, which the Weavers fasten to a Tree, or some other place without the City, and having finish'd their Days work, carry it home again without any trouble, being composed only of Canes, fastened to the Woof of the Cloth.

Their Coin. They have here a certain Copper Coin which they call *Besorg*, 6 whereof make a *Peys*, 10 *Peys* a *Chay*, which is equivalent to 5 Pence *English*. Two *Chays* make a *Mamoudy*, 2 whereof make an *Abas*, and 3 *Abas's* a *French* Crown, 100 *Mamoudy's* make a *Tumain*, which is worth 5 *French* Pistoles: But *Spanish Rials* and *Rix-dollars* are prefer'd before all the other Coins in *Persia*, by reason of the advantage they make of them in melting them down.

Weights. As to their Weights a *Man* is 6 Pound, a *Muncha* 12, and the *Mansurats* 30 Pound.

Pearl Fishing. The Pearl-Trade is also one of the chiefest at *Gamron*, which are taken near the Isle of *Bahram*, 6 Lgs from this City. The Fisherman's Head is enclosed in a Bag of boil'd Leather, which has a Pipe reaching up above the Water to fetch breath through; he rakes together all the Shells he meets with at the bottom, and having fill'd his Bag, which hangs about his Neck, at a certain signal given by him, he is drawn up into the Boat which waits for that purpose.

The King of Persia's Officers at Gamron. The Governor of *Gamron* has the Dignity of *Sultan* annexed to his Office, and has under him a *Visir*, or Secretary, and a *Couteval*, or Captain of his Guards. Besides these there is a *Sabandar*, or a Receiver of the Customs; tho' the *Hollanders*, pursuant to a Privilege granted them by *Schach Abas*, pay none; and the *English* are so far from paying any Duties here, that they ought to have one Moiety of all that is received here, (upon what account shall be shewn anon) but are forced to be contented with one tenth part; the *Persians* not looking upon it as the least Crime to defraud any Strangers, especially if they be Christians, of their Due, when their Princes Interest is concern'd.

Persian Horse much valued in the Indies. As the *Persian* Horse are incomparably better than the *Indians*, the *English* as well as the *Dutch*, pay 50 Crowns Custom for every Horse they Export; however the *English* have the Privilege of Transporting 12 Horses yearly without paying any Custom for them; an indifferent *Persian* Horse being worth 400 Crowns in the *Indies*.

The Inhabitants of *Gamron* are, generally speaking, *Persians*, *Arabians*, and *Indians*, who all speak the *Portuguese* Language, which had been introduced into those Parts, whilst the *Portuguese* were Masters of *Ormus*; tho' ever since the Conquest of it by the *Persians*, they are not permitted to come to *Gamron*, which is open to all other Nations, *Christians*, *Jews*, *Pagans*, and *Mahometans* being permitted to Traffick here; which is the occasion they live in open Hostility with the *Persians*, take their Ships as Prizes, and frequently land in the Neighbouring Islands; unto one of which, about 3 Lgs off the Continent, the King of *Spain's* Subjects are permitted to command Traffick, paying certain Duties, to the Governor of the Castle that Commands the Island.

The Island and City of Ormus. The City of *Ormus* is seated in an Island of the same Name, about 2 Lgs from the Continent, and 6 Lgs in Circumference, being composed of nothing but Salt Rocks, not producing the least fresh Water: But in the advantage and goodness of its Harbour and Situation, which makes it so famous for Commerce, that it was said as a Proverb among the *Arabians*, that, *if the World were a Ring*, Ormus *ought to be considered as the Diamond of it.*

According to *Texeira*, *Schach Abas*, a Native of *Arabia*, having in the 10th Age made himself Master of the Provinces bordering upon the *Arabian Gulph*, pass'd over into that Island, where he built the City of *Ormus*. *Schabedin Mahomet*, of the Posterity of *Mahomet*, the 11th. King of *Ormus*, died 1228. and he who Reign'd 1608. when it was Conquered by the *Portuguese*, was named *Seyfadin*, a Tributary to the King of *Persia*.

How Conquered by the Portuguese. For *Albuquerque* having been sent from *Zocotora* to visit the Coasts of *Arabia*, being inform'd that the People of *Ormus* lived in no good understanding with their King, by reason of the Mismanagement of his Chief Minister, came the 25th. of *Septemb.* before that City, and after having defeated their Fleet, obliged the King of *Ormus* to acknowledge the King of *Portugal* for his Sovereign, to pay a certain Tribute, and permit *Albuquerque* to build a Citadel where he should think fit most proper, which was perform'd accordingly, and the Citadel call'd *Our blessed Lady of Victory.* 1638.

The *Moors* soon after repenting of their Bargain, made several efforts to rid their Hands of these unwelcom Guests, but they being constantly upon their Guard, not only frustrated all their Designs, but also engross'd all the Commerce of those Parts to themselves, only permitting *Seyfadin* to live in the Isle at a good distance from the Citadel.

Schach Abas being provoked by their Insolence, and especially by their having given Protection to a certain *Italian* named *Gabrieli*, who was fled out of *Persia*, engaged the *English* to joyn with him in reducing this Place, which was Attack'd and Carry'd 1622. and put into the Hands of the *Persians*; the Walls of the City being demolish'd and carry'd to *Gamron*, which was there raised upon the Ruins of *Ormus*; and the *English* as a Reward of their Service, had not only an exemption of all Duties granted them at *Gamron*, but also a Moiety of all the Customs that should be received there.

By this time an *English* Ship call'd the *Swan*, Burthen 300 Tuns, carrying 24 Guns, being arrived in the Harbour of *Gamron*, bound for *Suratte*, Mr. *Honywood*, the Chief *Agent* for the *English* Company, recommended me to the Captain, to carry me and defray all my Charges thither. But that that proved very vexatious to me, was that of 8 Horses, which I had brought along with me, and could have sold for 150 Crowns a piece at *Suratte*, I could carry no more than 2, being obliged to sell the rest at *Gamron* for half what they cost me.

The Author Embarked for Suratte. Accordingly I Embark'd the 6th. of *April*, with Mr. *Manley* and Mr. *Hall*, 2 *English* Merchants, and went from *Gamron* to *Suratte* in 19 Days, during which time I was very civilly entertained by the Captain, who resign'd his own Bed to me, and being well provided with Fowl, Mutton, good Sack, *English* Beer, *French* Wine, and other Refreshments, this with the use of *Ptisane* made with Cinnamon and the Rind of Pomgranates, and of a good quantity of *Thee*, restored me entirely to Health. The Wind proving contrary that Day, we were fain to lie at Anchor till the next, when we took our Course toward the Isle of *Ormus*, but being surprised by a Tempest from the West, were forced to come to an Anchor in sight of this Island.

The 8th. We endeavoured by labouring with a W. Wind to pass betwixt the Isles of *Ormus* and *Kismisch*, which are 4 Lgs distant from one another; the same Day one of our Seamen, who died of the Bloody Flux, being thrown over Board, and I being as yet afflicted with the same Distemper, the sight of it caused divers melancholy speculations in me. The next following Night having pass'd betwixt the 2 fore-mentioned Islands, we coasted it along the Sea-shore of *Arabia*, which is very safe thereabouts.

The 10th. Being detain'd there by a Calm, we left the said Coast the 11th. and made over to that of *Persia*, which we kept in sight all that Night; but the 12. we steer'd our Course with a W. N. W. Wind to the E. S. E. at 25 Deg. 50. Min. Elev.

April 13th. Being in the open Sea, we discovered a Pirate, who sometimes came pretty near us, but finding we endeavoured to get the Wind of him, he made towards the Isle of *Zocotora*; situate at 21 Deg. 40. Min. at the very entrance of the *Red Sea*: To the S. W. and N. E. it has *Melinda*, or *Ethiopia*, and to the S. the Continent of *Arabia*, from whence it is not above 16 Lgs distant; its length is about 25th Lgs and the breadth 10, having very good Harbours and safe Anchorage on all sides. The Inhabitants, who are govern'd by a *Sultan* under the Jurisdiction of the King of *Arabia*, are of a mean Stature, inclining to leanness, of a black Complection, but very hardy; they feed chiefly upon Fish and Fruits. They live very friendly with their Wives, who are for the most part *Arabians*, but permit them not to be seen by Strangers. As they are very Crafty in their Dealings, and adulterate those few Commodities they have, so they are always mistrustful of others. They use the Paste of Dates instead of Bread. The Island affords some Oranges, but none of the best; Tobacco, and Citruls; as also some Cocoa Trees, but the Fruit seldom comes to Maturity, by reason of the Stony Grounds.

The Isle of Zocotora.

The Aloes of Zocotora. Their chief Commodity is Aloes, the Juice of which is gathered in Bladders or Goat Skins, dry'd in the Sun. They are also well stor'd with the Gumm call'd Dragons Blood, and keep abundance of Civit Cats;

10

1638. so that Civit may be bought here for 3 or 4 Crowns *per* Ounce, but the worst is, that they adulterate it with Grease; they have no wild Fowl, and very little Tame, yet are not destitute of Cattel, such as Camels, Asses, Oxen, Cows, Sheep and Goats, the Hair of which about the Thighs are curl'd, as our Satyr, are painted. The Residence of the Governor is call'd, *Tamary*, being defended by a Fort not above a Cannon shot from the Sea-side.

Their Arms. They make use of broad Swords, with large Hilts, without a Guard. Their Ponyards, which they wear constantly on their Girdles, have Blades of 3 inches broad near the Hilt, but very sharp towards the Point. They also understand the Management of Fire Arms, but don't keep them well, and are very expert in the use of their small Bucklers, wherewith they defend themselves against their Enemies.

They have no other Shipping but a few flat-bottom'd Fisher-Boats. The Waters which fall down from the Mountains into the Sea like a River, furnish all the Ships that come into that Road with sufficient fresh Water. They eat no Swines Flesh, no more than all the other *Mahometans*, but have no *Mosques*, or any other Publick Places of Devotion, which consists chiefly in adoring the *Sun* every Morning and Evening, and the rising and setting of the *Sun*, which they repeat 3 or 4 times a Day, besides muttering out certain words as they make their Reverence.

The 14th. of *April* we were at 23 deg. 24 min. the 15th. at 22 deg. 40 min. and the 16th. at 22 deg. 40 min. the 17th. at 21 deg. 55. min. when our Captain fell sick of a Fever: The 18th. at 21 deg. 8 min. the 19th. at 20 deg. 42 min. the 20th. at 20 deg. 50 min. the 22d. 20 deg. 50 min. the 23d. at 20 deg. 18. min. and the 25th. arrived safely in the Road of *Suratte*, where we cast Anchor 2 Lgs from the Shore, because the Captain not intending to stay long here, would be sure of the Convenience of going away when he pleased; besides that from *May* to *September*, there is no safe riding at Anchor in this Road, by reason of the frequent Tempests, whereas on the Eastern Coast of the *Indies*, in the Gulph of *Bengala* the Season is very fair and calm all that time. For it is to be observed, that the Year here has only 3 Seasons; for in the Months of *February*, *March*, *April* and *May* it is excessive hot; in *June*, *July*, *August*, and *September* it does nothing else but Rain, with Thunder and Lightning; and the Months of *October*, *November*, *December*, and *January*, are cold, as far as is consistent with that Climate.

Come to *Suratte*.

Three Seasons of the Year.

April 26th. The Captain having sent advice of his arrival, the chief Director of the *English* Company at *Suratte*, sent 2 young Merchants on Board us to come to *Suratte*, so that after having shew'd my acknowledgment to him for his many Civilities by a small Present, I left the Ship the 29th. and were no sooner entred the River *Tapte* or *Tynde*, upon which *Suratte* lies, but we had a very agreeable Prospect of a very fertile Soil, and many pleasant Gardens and Summer-Houses, all white (a colour much affected by the *Indians*) and surrounded with green Trees. It is so shallow at the entrance, that it will scarce carry a Bark of 70 or 80 Tun. We landed near the *Sulthan's* Palace, and from thence went straightways to the Custom-House, to have our things search'd, which is done with so much rigor here, that they even spare not your Cloathes or Pockets. And what is worst, the *Sulthan*, nay, the Chief Custom-House Officers have a Custom to oblige Strangers to part with any thing they like best, at such a price as they themselves please to afford; accordingly the *Sulthan* having espied an Amber Bracelet and a Diamond among my things, would needs cheapen them both, but I telling him that as I was no Merchant, so I intended not to sell them, but to keep them for the sake of those that had presented them to me; I sav'd my Diamond, but he would needs take the Bracelet, under pretence, that he would restore it to me whenever I should honour him with a Visit. By this time the *English* Chief Director having sent his Coach drawn by two white Oxon, I went to the House belonging to their Company, at the entrance of which I was received by the Director himself, and his Deputy, one Mr. *Fremling*; as the Director understood *Dutch* very well, he acosted me in that Language, telling me, that in such a Country as this, he thought all Christians were obliged to give assistance to one another, but that to me he was obliged to do it more particularly, in return of the affection I had express'd to some of his Country-men at *Ispahan*. Having returned the Complement, I was conducted into a Room where a Collation of Fruits and Preserves was ready for me; we were no sooner sat down, but having understood that my intention was to return to *Germany* within 12 Months, he invited me very obligingly to stay with him 5 or 6 Months, because that no more Ships would come in that Road this Year, advising me to spend what time I had, in viewing the Country, and offering his Recommendation to the *English* Merchants living in those Places, through which I was to pass. His obliging expressions engaged me to choose my Chamber in the same House, next to that of the Deputies, and in the Evening divers Merchants came thither to conduct me to Supper in a spacious Hall, where I found the Minister and about 12 Merchants more; after Supper the Minister brought me into an open Gallery, where we found the Director and his Deputy (who were not accustomed to Suppers) taking the benefit of the cool breezes of the Sea Air, which was our ordinary Rendevouz after Supper; at Dinner we had commonly 15 or 16 Dishes, besides the Desert. Every thing was carried on in this House with an extraordinary good Order and Decorum. We had twice Prayers every Day, and *Sundays* 3 times. 1638.

The Order and Diversions of the *English*.

On *Fridays* after Evening Prayers, we had a certain Club, where we drunk our Wives and Friends Healths beyond the Seas, in *Sack* or *Pale Punch*, being a mixture of *Aqua Vitæ*, Rose-water, Juice of Citrons and Sugar.

At our ordinary Meetings we as well as the *Dutch* were entertain'd with *Thee*, instead of which the *Persians* use *Coffee*.

The English have a very fair Garden without the City, where we used constantly to take a walk on *Sundays* after Sermon, and oftentimes on other Days; our Exercise was shooting at the Butt, and I made a shift to get near 5 *l. Sterling* a Week among them; we seldom went away without a good Collation, and often bathed our selves in a Cistern, which had 5 foot water. My chiefest affliction was, that not understanding the *English* Tongue, I could not converse with any of them to my satisfaction, except with the President, who spoke *Dutch*: But before I proceed to give you a further account of what I observed at *Suratte*, and in my Voyage, it will not be beyond the Scope, to give you a short view of the *Mogul's* Country.

A Description of Indostan.

The Country which properly challenges the Name of *India* (call'd *Indostan* by the *Persians* and *Arabians*) begins on the West-side from the River *Indus* or *Sindo* and reaches to the River *Ganges*. It was known among the Ancients by the Name of *Carmania*, and it hath a Haven call'd *Guader*, 25 deg. on this side the Line. The *Persians* and *Indostnans* themselves have given the Name of *Pangah*, i. e. *Five Waters* to the River *Indus*, because it is joyn'd with so many Rivers before it exonerates its self into the Sea. The first is the River *Bugal*, or *Begal*, whose Sourse is near *Kabul*; the 2d. is call'd *Chanab*, which rises in the Province of *Quesmir*, or *Cassimier*, 15 Days Journey to the North, above *Lahor*. The 3d. is that of *Ravy* or *Ravee*, which rises not far from *Lahor*, and runs by it. The two others, *viz.* the Rivers *Via* and *Osuid*, have their Sourses at a vast distance, their Confluence being near *Bakar*, which lies at an equal distance betwixt *Lahor* and the Sea. Some Authors have confounded this River with that of *Diul*, and placed it at 24 deg. on this side the Line. The vast Empire of the *Great Mogul* borders to the East upon the Kingdom of *Mavy*; to the West upon part of *Persia* and the South Sea, on the North side it is enclosed by Mount *Caucasus* and the *Great Tartary*, and to the South it has the Kingdom of *Decan*, and the Gulph of *Bengala*. It comprehends in all 37 Provinces, which anciently were as many Kingdoms.

The Province of *Candahar* which has given its Name to the Capital City, borders upon *Persia*; as the Province of *Kabul* has received its Name from its Metropolis; it borders upon the *Great Tartary*. Here rises the River *Begal*, of which before. The Province of *Multan* with its chief City of the same Name extends along the River *Indus* to the East, as the Province of *Haca Chan*, or *Hangi-Chan* has the same River to the West. *Bachar*, or *Bukar*, lies on both sides of the River *Indus*. The Province of *Tatta* is a congeries of many Islands made by the same River. *Soret* is a small Province extending from the Sea-side to the East as far as the Province of *Guzarata*. The Province of *Iselmere* is enclosed betwixt the Provinces of *Soret*, *Bachar*,

1638. *char*, and *Tatta*. The Province of *Attach* is seated upon the River *Nibal*, (which falls into the *Indus*) and is by it divided from the Province of *Haca-chan*. That of *Pangab* (so called from the 5 before mentioned Rivers that pass thro' it) is the chiefest of all the Kingdom; its Capital City is *Lahor*. The Province of *Chismer*, or *Quexmer* lies upon the River *Bezat*, or *Badt*, which after it has made a vast number of Islands in this Province, joyns its Current with the River *Ganges*. The Province of *Bankisch* borders to the East upon that of *Chismer*, and the Province of *Jengapar*, or *Jemipar*, lies between the Cities of *Lahor* and *Agra*. The hilly Province of *Jemba*, or *Jamba*, borders to the West upon that of *Pang-ab*. The Province of *Delly* lies between that of *Jemba* and *Agra*, not far from the Province of the River *Gemini*, or *Semana*; which passes by the City of *Agra*, and afterwards falls into the *Ganges*; the Capital City bearing the same Name with the Province, was formerly the Metropolis of all *Indosthan*. The Province of *Bando* hath on the West side the City of *Agra*. The Province of *Malway*, or *Malwa*, has for its Capital City *Ratipore*, within half a Lg of the River *Cepra*, which falls into the Sea in the Gulph of *Cambaja*. The Province of *Chitor* borders to the East upon that of *Candisch*, and to the South upon that of *Guzuratta*; it was formerly a very flourishing Kingdom, its Metropolis bearing the same Name with the Province, being 60 Lgs in compass, which was laid desolate by the *Great Mogul*, *Achabar*, Great-grandfather of *Schach Chiram*. The Province of *Guzuratta*, (call'd *Cambaja* by the *Portuguese* from its Capital City where they drive a considerable Trade) is one of the Noblest and most Powerful Provinces of all the *Mogul's* Country, of which more hereafter. The Province of *Candisch*, the Metropolis whereof is *Bursampour*, or *Brampour*, is divided from the Country of the Prince of *Partaphà*, a Vassal of the *Great Mogul*, by the River *Tabet*, or *Tipte*, which disembogues in the Gulph of *Cambaja*. The Province of *Berar* extends to the South to *Guzuratta*, and the Mountain of *Rana*. The Province of *Gualor*, or *Gualiar*, is famous for the Tower or Castle, whither the *Mogul* commonly sends his Prisoners of State, and lays up part of his Treasure. The Province *Agra* (of which more at large hereafter) and its Metropolis unto which it has imparted its Name, claims now-a-days the Precedency before all the rest. The Province of *Sambel*, or *Sanbel*, is divided by the River *Gemini*, which falls into the *Ganges*, from that of *Narvar*. At the Confluence of these two Rivers near the City of *Hallebasse*, they make a kind of Isle, which has given the Sir-name of *Doab*, i. e. *Interaquas* to this *Province*. The Province of *Bakor* extends along the Western Bank of the *Ganges*; as that of *Narvar* is divided by a very large River, which joyns its Current with the *Ganges*. The Province of *Nagracut*, or *Nakarkut*, is one of the most Northern Provinces of the *Mogul's* Dominions. Its chief City bears the same Name, where in a sumptuous Chapel (the Floor whereof is covered with Plates of Gold) is kept the Figure of a Monster call'd *Matta*, unto which the *Indians*, who flock thither from all Parts, offer a little Snip, which they cut out of their Tongues. Near the City of *Kalamaka*, belonging to the same Province, arises a certain Spring out of the Rocks, which casts forth Flames, and for that reason is reverenced by the Pilgrims that come thither from all Parts. The Province of *Siba* is famous for the Sourse of the River *Ganges*. Both this and the Province of *Nakarkut* are very mountainous, as well as that of *Kakares*, which is divided from the *Great Tartary* by the Mount *Caucasus*. The Province of *Gor*, which is also very mountainous, gives its rise to the River *Perselis*, which joyns its Current with the *Ganges*, as does the River *Kunda*, which divides the Province of *Pitan*, or *Partan*, bordering to the W. upon that of *Jamba*. The Province of *Kandnana*, which together with that of *Gor*, are the most Northerly Provinces of the *Mogul's* Dominions, extends on both sides of the River *Iderelis*. The Province of *Porena*, being enclosed betwixt the 4 Rivers of *Ganges*, *Perselis*, *Gemini* and *Kandach*, is very fruitful. That of *Jewal*, is famous only for its chief City call'd *Rajapour*, or *Rajapor*. The Province of *Menat*, a barren Country, extends from the *Ganges* to the East. That of *Voessa*, or *Voeza*, is the uttermost Province to the East. The Province of *Bengala*, which imparts its Name to the Gulph, into which the *Ganges* exonerates its Waters, challenges one of the first places among all the rest under the *Mogul's* Jurisdiction. It is subdivided into several Provinces, the chiefest of which are *Puna* and *Palan*, which have formerly been dignified with the Title of *Kingdoms*. 1638.

Texeira (a) mentions a certain Province call'd *Utrat*, but gives us no more than the bare Name; and what he says of the Kingdom of *Cacche*, *viz.* that it lies near *Cambaya* to the North, and is famous for the excellent breed of Race Horses it produces, can be understood of no other than the Province of *Candisch*. (a) Descr. Pers.

The whole extent of the *Mogul's* Territories is from E. to W. 600 *French* Lgs, and from N. to S. 700, its uttermost Frontiers to the S. being at 20, and to the N. at 43 deg.

The Province of *Guzuratta*, (call'd *Cambaja* by the *Portuguese*) lies westward along the Sea-side in the form of a Peninsula, having on each side a Gulph or Bay, one whereof is 8 Lgs broad at the entrance, and grows narrower and narrower for 40 Lgs thence; it is bounded to the North by the Provinces of *Soret*, *Quismer* and *Bando*, to the E. by those of *Chitor* and *Bando*, and to the S. by the Kingdom of *Decan*; though its extent was much larger formerly, yet does it comprehend above 20000 Cities, Towns, and Villages; the chiefest thereof laying near the Sea-side are, *Suratte*, *Broitschia*, *Gandeer*, *Goga*, *Cambaja*, *Dieu*, *Patepatane*, *Mangalor*, *Gondore*, *Nassary*, *Gandivi*, and *Balsara*. It has 3 noted Rivers, *viz.* the *Nadabat*, which passes near *Broitschia*, the *Tapta*, and the *Wasset*, two of the best Harbours of the *Indies*, viz. that of *Suratte* and of *Cambaja*. The Province of Guzuratta. Its Rivers and Ports.

For Fertility this Province may also challenge the Precedency before any of the *Indies*, most of the circumjacent Provinces being supply'd thence with Fruits and Provisions; tho' the great Drought in 1640, and the ensuing Rains did almost lay this Province desolate; which however it has sufficiently recovered since. But it is time to return to our Relation. Fertility

The *Persian* Servant whom I had brought along with me from *Ispahan*, being born of *Christian Georgian* Parents, had given me some hopes of returning to the Christian Faith, which was the reason that I treated him with more than ordinary Civility, and allow'd him 4 Crowns Wages *per* Month; but I was much surprised to understand that the young Fellow, in hopes of getting better Preferment, by the assistance of an Uncle of his, who was Master of the Horse to the *Mogul*, was gone to *Agra*, and could not but be perswaded that his intention of leaving me thus on a sudden, was in part to betray me into the hands of the *Indians*, he being not ignorant of what had happened betwixt them and our People at *Ispahan*; but I had great reason to admire God's Providence in sending him as it were on purpose thither to save me, for without him I had certainly been lost at *Agra*, as will appear by the sequel of this Relation.

In *May* we received News at *Suratta*, that the *Chan* of *Candahar*, dreading the *Sophi's* anger, had revolted and surrendred the Place to the *Mogul*, who had sent 500000 Crowns as a Reward for him and the Garrison. *Candahar* surrendred to the *Mogul*.

June the 16th. we went a hunting with a *Dutch* Merchant and another *Englishman*, cross the River to a Place call'd *Reniel*, where the *Dutch* have a Warehouse, and being nobly treated there that Night, went the next Day to a Village call'd *Bodick*, there we kill'd divers wild Ducks, and a Heron; we saw also a good number of Deer with grey Skins, but chequered all over with white spots; their Horns were very fair, and had several Brow-antlers. Some were inclining to a dark brown, chequered likewise with white spots, with very fine Horns, and of the bigness of our Roe-Bucks. Some are of Opinion that they are a kind of *Cervi-capras*, which produce the *Bezoar*; all the Fields have a small Dyke raised about them here to keep in the Water, the Rice requiring abundance of moisture. Here we also drunk some *Terry*, a Liquor they draw out of the Palm-Tree, by making an incision in the Bark on the top of the Tree, unto which they fasten an Earthen Vessel into which the Liquor distils; it is very sweet, but soon turns sower. Palm Wine.

The City of *Surat*, or *Suratta* it self lies at 21 deg. 42 min. upon the River *Tapta*, which arising near *Barampour* disembogues into the Sea, 4 Lgs below *Suratta*, which is built four square upon the very Banks of the River. It has no Fortifications on the River-side, but is provided with a good Stone Rampier on the Land-side, and the Castle is all of Free-stone. The City of Surat.

It has 3 Gates, one leading to the Village of *Brion*, the second to *Barampour*, and the third to *Nassary*. All the Houses are flat on the Top, and have generally fair Gardens. Its Gates and Houses.

The

1638. The Castle has no more than one Gate, which looks into the great Market-place; not far thence is the Governor's Palace and the Custom-house; the Governor of the Castle has not the least dependance on the *Sulthan*, whose business is the Administration of Justice, and to look after the Customs; all Merchandises imported or exported, pay 3 and a half *per Cent.* here, except Silver coin'd or uncoin'd, which pays no more than 2 *per Cent.* Both the *English* and *Dutch* have very fair Houses, call'd *Lodges*, well provided with Chambers, Halls, and Galleries.

The Castle.

The Port of *Suratte.*

The Harbour of *Suratte* is about 2 Lgs from the City, near the Village of *Suhaly*, where Ships are unladen, and the Commodities brought thence to *Suratte*, by Land Carriages. The Haven lies at 21 deg. 50 min. upon the Course of N. E. and S. W. The Entrance is narrow, and at High-water not above 7 fathom deep, at low but 5; the Harbour it self being not above 500 Paces broad, a sandy bottom, with sharp and steepy Banks, which are almost dry at Low Water; it is however safe Anchoring here, there being no danger, but from the S. W. Wind, except from *May* to *September*, when there is no abiding here, by reason of the furious Tempests.

Its Inhabitants.

Most of the Inhabitants of *Suratte* are either *Benjans*, *Bramans*, or *Moguls*; the last are more respected than the rest, as being *Mahometans*, and that they always apply themselves to Arms, as on the contrary the *Benjans* make Traffick their chiefest business, and are much addicted to Religion; of whom we shall have occasion to say more hereafter. Besides these, some *Arabians*, *Persians*, *Armenians*, *Turks* and *Jews* inhabit here, but the most considerable of all Foreigners here, are the *English* and *Dutch*, who have their Setlements, Directors, Merchants, and Clerks here; especially the *English*, who have made this the chief Place of their Traffick in the *Indies*; all the other Factories they have at *Agra*, *Ispahan*, *Masulipatan*, *Cambay*, *Amadabat*, *Brodra*, and *Broitschia*, having a dependance on that of *Suratta*, and being obliged to be accountable to their Chief Director residing in this City; and there is scarce an *English* Ship which either going or coming into those Parts does not touch at *Suratte*.

The chief Factory of the *English.*

The Circumjacent Country.

The Country round about this City, is very delightful, being adorn'd with a vast number of Gardens and Fruit Trees, and among the rest I observed hereabouts one of those Trees, the Branches of which take root a-fresh in the ground, mentioned in the Description of *Gamron*. Among other things I saw a large Cistern of Free-stone eight square, having at each Angle a pair of Stairs, and in the midst of it a most sumptuous Sepulchre of its Founder; this Cistern is so large, that it supplies the whole City with Water.

About the 14th. of *Sept.* then the Tempest began to cease, 2 *English* Ships arrived in the Port of *Suratte*, call'd the *Discovery* and the *Mary*; the first 600 Tun burthen, 28 Guns, and 190 Men; the 2d. of 1200 Tun, carrying 48 Guns; we were very generously entertain'd aboard them for 8 Days together, our constant Employment being to go ashore every Day a hunting, and to return aboard by Night.

Several Ships arrive at *Suratte.*

The 24th of the same Month arrived two other Ships, one a *Dutchman* of 1400 Tun, bound from *Batavia* for *Holland*; the other an *English* Vessel call'd the *Swan*; we were likewise very generously entertain'd aboard them, the *Dutch* Vessel being both the biggest and best contrived of any Ship that ever came out of *Holland*. With these and such like Divertisements I pass'd my time pleasantly enough at *Suratte*, but understanding that it would be several Months before the *English* Ships would be ready for their Departure, I resolved to take the opportunity of a certain *Caravan*, sent by the *English* to *Amadabat*, under a Convoy of some *English* Souldiers, to take a view of the *Great Mogul*'s Court.

The Author leaves *Suratte.*

Thinking my self thus sufficiently guarded against the *Rasbootes*, (a Gang of *Tories* and *Robbers* inhabiting the Mountains betwixt *Brodra* and *Broitschia*) I left *Suratte* the last of *Sept.* and joyning with the *Caravan*, we took our way towards *Broitschia*, crossing the River at the Village of *Brion* 4 Lgs thence, we pass'd by *Cattodera*, and afterwards by *Enklisser*, where we kill'd abundance of wild Ducks, and other Waterfowl, as also a Roe-Buck, Deer, and wild Boors being in such a plenty hereabouts, that one need not be long in want of Provisions, especially at this time, when we had a good Cook along with us. Before we came to *Broitschia*, we cross'd a broad, but shallow River, and were no sooner arrived, but the *English* Secretary invited us to Dinner. 1638.

The City of *Broitschia* lies at 21 deg. 56 min. 12 Lgs from *Suratte*, and 8 from the Sea-side; upon a River which coming out of the Mountains, is the common boundary betwixt the Kingdom of *Decan*, and that of *Balagatta*. As it is situate upon a steepy Hill, and is provided with Walls of Free-stone, it is accounted one of the strongest Fortresses of all the *Indies*. It has two large Gates to the Land-side, and as many lesser ones upon the River; all Merchandices that pass through it pay 2 *per Cent.* It is very well Peopled, but for the most part with Callicoe Weavers, who make the best here of any in the whole Province; the Fields for 6 or 7 Lgs round the City are very flat, which, as well as the Mountains beyond them to the S. W. call'd *Pindatsche*, are very fertile in Rice, Wheat, Barley and Cotton. These Mountains produce abundance of *Agat*, which is so much celebrated in *Europe*. Four Lgs below the City the River dividing it self into 2 Branches, which after they have made an Island of 2 Miles in Circumference, disimbogue into the Sea by 2 different Channels. Eight Lgs beyond *Broitschia*, upon the way leading to *Cambaya* is the Village of *Jambuysar*, or *Jambousser*, famous for the great quantity of *Indigo*; and in the way to *Amadabat* is to be seen the Sepulchre of a certain *Mahometan* Saint, whither they come on Pilgrimage with Pad-locks on their Mouths, and Chains on their Arms, till they have perform'd their Vows.

Leaves *Broitschia.*

We left *Broitschia* in the Evening, and travel'd all that Night, and part of the next Day, till the excessive heat oblig'd us to seek for Refreshment near a standing Pool, where we pass'd the Remainder of that Day, and, part of the Night following; we continued our Journey about Mid-night, taking our way through the Villages of *Karawanet*, and *Kabol*, where they made us pay certain Passage Money.

Comes to *Brodra.*

The 17th. of *Octob.* we came to *Brodra*, where the *English* Merchants that belong'd to our *Caravan*, and my self were lodg'd, and most nobly Entertain'd in the *English* Lodge, and among the rest had the Divertisement of the Women-Dancers, who being mighty curious to see my Cloathes made after the *German* Fashion, would fain have had me strip'd my self naked, offering to do the same, which I refusing to do, they went away discontented.

A Description of *Brodra.*

The City of *Brodra* is seated in a large sandy Plain, upon a small River call'd *Wasset*, about 15 Lgs from *Broitschia*; It was built of late Years by *Rasia Ghie*, Son of *Sultan Mahomet Begeran*, the last King of *Gusseratta* out of the Ruins of the old *Brodra*, which was half a Lg thence. It is indifferently well fortified after the antick way, and has five Gates, one whereof is damm'd up. The City, but especially the Western Suburbs, are for the most part inhabited by Callicoe-Weavers, Dyers, and other Workmen belonging to that Manufactury; which are made somewhat narrower here, and the Pieces shorter than at *Broitschia*. The Governor of *Brodra* has no less than 210 Villages under his Jurisdiction, 65 of which are assign'd for the Payment of the Garison, and the other 135 allotted for Pensions to certain Officers belonging to the *Mogul*'s Court.

Lacque.

Among these there is a certain Village call'd *Sindickera*, which produces every Year 25000 Pounds of *Lacque*; this *Lacque* is a red Gum which comes from a Tree resembling our Plumb-tree, which being dry'd, and beaten to Powder, they give it what colour they please, and make it into sticks to seal Letters with, or for Lackering of Cabinets, Boxes, *&c.* This Country affords also abundance of *Indigo*. I went the same Day to rejoyn the *Caravan*, which I found at the Corner of a Grove of Coco-trees without the City, and one of the *English* Merchants of *Brodra* would needs accompany us as far as *Wasset*, an old ruin'd Castle upon a very high Mountain, where is kept a Garrison of 100 Horse, who being to be maintain'd out of the Customs paid there, which amounted to 4 each Waggon, but we having a Pass from the *Mogul*, and consequently not thinking our selves obliged to pay it, this occasion'd a Contest betwixt them and us, which was very likely to have ended in a bloody Engagement. For we forcing our way, and having cross'd the River where we staid that Night, they would have attack'd us, but a *Dutch Caravan* coming to our assistance, after the exchange of some Small Shot, the matter was compos'd, and the Garrison forced to be contented with a Present of 3 Crowns. Thence we pass'd 2 Lgs and a half further

1638. through the Village of *Ammenoygii* and 3 Lgs and a half further through that of *Sejuntra*; and so to the small City of *Niriad*, or *Niriaud*, 9 Lgs from *Brodra*.

Comes to Niriad.

Octob. 11th. We arrived at *Mamadebath* a small City situate upon a pretty large River, 5 Lgs from *Niriad*; the Inhabitants are *Benjans*, who maintain themselves by making of Cotten-Thread.

To Mamadebath.

Octob. 12th. After we had travel'd 5 Lgs and pass'd in our way by *Canis*, *Barova* and *Issempour*, got safe to *Amadabat*. We were met in a fair Garden within half a Lg from the City, by Mr. *Benjamin Roberts*, the chief Merchant of the Factory there, who carried me in his Coach, drawn after the *Indian* Fashion, by two white Oxen, which were as mettlesom as the best Horses, into the City, ordering the 2 *English* Merchants that were my Fellow-Travellers, to tarry there for the coming up of the *Caravan*.

To Amadabath.

The *Indian* Oxen as mettlesom as our Horses.

The *English* Lodge is a very fair Structure, in the very heart of the City, fitted with very convenient Apartments, and divers Courts for the disposal of Merchandices. Mr. *Roberts* gave me a Collation in his own Chamber, which look'd into a Flower-Garden, and was very richly furnish'd. We Supp'd in a very spacious Hall, where the *Dutch* Head Factor with some of his Merchants, came to pay us a Visit; after he was gone, I was conducted by the whole Company into my Lodging-room, which I had chosen my self; Mr. *Roberts* kept me Company there till Midnight, and to give me all imaginable diversion, sent for 6 Women-dancers of the Country, telling me that if I lik'd any thing in them besides their singing and activity, I might command it, which Civility I refused with a Complement; they were mightily taken with my Cloathes and Hair, and would scarce be persuaded but that I was a Woman in disguise.

Two Days after my noble Host carry'd me in his Coach to view the City; the Market-place, call'd *Meydan-Schach*, or the *Royal Market*, is at least 1600 foot long, and above 800 broad, Planted all about with Palm and Date Trees, intermix'd with Orange and Citron Trees, whereof there are also many in the Streets, the sight, smell, and shadow whereof are very desirable and pleasant. There are besides these 4 *Basars* or Publick Places for the sale of Merchandices.

The *Meydan*

Not far from the *Meydan* we saw a House built of Brick, which is the King's Palace, the Apartments were sumptuously furnish'd, and adorn'd with many Pictures, more remarkable for the diversity of colours, than any exactness of proportion, according to the *Indian* way; Over the Gate of this Palace, was a large Balcony for the Musick, consisting of Violins, Haut-Boys, and Bagpipes, to play there 3 times a Day, *viz.* in the Morning, at Noon, and Night, a Custom observed in most of the *Mahometan* Countries. The Walls of the City were tolerably well built, with 12 Gates, and many Towers, but the Ditch, which is 16 fathom broad, was ruin'd and dry in several places.

The Castle.

We also took a view of the Castle, which is very large, and built altogether of Free-stone.

The great Mosque of the Benjans.

The Chief *Mosque* of the *Benjans*, is one of the finest Structures that ever I saw, it being but lately built then; and stands in the Center of a vast Court, surrounded with a very high Wall of Free-stone, all about which is a *Piazza*, divided into Cells, in each of which stands a Statue either white or black, representing a naked Woman sitting with her Legs under her, according to the Eastern Fashion. Some of these Cells had three Statues, *to wit*, a great one betwixt 2 little ones.

As soon as you enter the *Mosque*, you see two Elephants of black Marble, done to the life, and upon one of them the Effigies of the Founder, a rich *Benjan* Merchant named *Santides*. The *Mosque* is vaulted, and the Walls adorn'd with the Figures of Men, and other living Creatures. There was not the least thing to be seen within the *Mosque*, except 3 Chapels, which were very dark, and divided only by Wooden Rails, wherein were placed Statues of Marble like those in the Cells, the middlemost having a Lamp hanging before it. We saw the Priest busie in receiving from such as were performing their Devotions there, Flowers, Oyl, Wheat and Salt; with the first he adorn'd the Images, his Mouth and Nose being covered with a piece of Callicoe, for fear of prophaning the Mystery by the impurity of his breath; the Oyl was intended for the Lamps, and the Wheat and Salt for the Sacrifice. He muttered out certain Prayers over the Lamp, and wash'd ever and anon his hands in the smoak of the flame, out of an Opinion they have, that Fire having a greater Power of purifying than Water, they may without offence lift up their Hands to God. 1638.

Amadabat, the Capital City of all the Province of *Gusuratta*, is seated upon a small River, which not far thence joins its Current with the River *Indus*, at 23 deg. 32 min. on this side the Line, 18 Lgs from *Cambaya*, and 45 from *Suratte*. It comprehends in its Circuit (including the Suburbs) near 7 Lgs: Its Streets are very spacious, and its private Buildings and *Mosques* very Noble, especially the Governor's House. The *Mogul* keeps constantly a good Garrison here, to bridle the *Badures*, a sort of People living not above 25 Lgs distant thence, who make frequent Incursions into the Country. It may safely be said that there is scarce any Nation in the World, or any Commodity in *Asia*, but may be seen in this City, where there is also a vast Manufactury of Silk and Callicoes, as also of Gold and Silver Brocades, but they are slight and dear, which is the reason the Inhabitants use much of *China* Silks, which are both finer and cheaper.

A Description of Amadabat.

At the time of my being there, they had invented a new kind of Stuff of Silk and Cotton with Gold Flowers, which was sold at 5 Crowns *per* Ell; they also deal much here in Sattins, and Velvets, Taffatas, Carpets, Sugar, Candy'd or in Powder, Cummin, Honey, Lacque, Opium, Borax, Ginger, *Myrobalans*, or *Indian* Plumbs dry'd and preserv'd, Preserves of all sorts, Salt-Peter, *Sal Armoniack* and *Indigo*. They also sell Diamonds here, which are brought thither from *Visiapour*, and Ambergreece and Musk, which they have from *Pegu*, *Bengala*, *Mosambique*, and *Cabo-verde*, and is sold here at 8 Crowns *per* Ounce Some would have the Ambergreece to be the Seed of the Whale congeal'd, but without the least probability; others would make it the Product of certain Sources of Mines like the *Nafte*, but with as little likelihood of truth, it being certain that it is found no were but near the Sea-side, and grows like our Mushrooms at the bottom of the Sea, whence it is torn off and cast ashore. *Peter de la Brouk* (*a*) assures us that in his time there was found a piece of Ambergreece at *Cabo-verde* near the Mouth of the River *Gambi*, which weigh'd 80 pounds, of which he bought a piece.

Its Commodities.

Musk and Ambergreece.

(a) His Voyage to Angola, Guinea, and the Indies.

The Musk is by the joynt opinion of all Naturalists, the product of a certain Protuberance or swelling rising about the Navel of a certain Animal which some make only of the bigness of a Fox, others like a Roe-buck. Some call this Creature *Gazela*. But the greatest conveniency of Traffick at *Amadabat* is, that the *Benjans* having a general Correspondence in all parts of *Asia*, even to *Constantinople* it self, which makes Trading by way of Exchange, both very easie and advantageous; add to this the Exemption from all Customs of all Merchandices imported or exported, the King's Receiver having no more than 15 pence, by way of Present for every Waggon, and the liberty allow'd to all Strangers to deal in what Commodities they pleased, except that the Exportation of Gun-Powder, Lead and Salt-Peter, without the Governor's Licence is forbidden, which is soon obtain'd by a small Present.

The City of *Amadabat* having under its Jurisdiction 25 large Towns, and 2998 Villages; its yearly Revenue amounts to above 6 Millions of Crowns, which the Governor disposes of in the maintaining of a certain number of Souldiers for the King's Service, and for the clearing of the High-ways, which are very unsafe hereabouts.

Its Revenue.

The *Couteval*, or his Deputy commands under him, and has the Administration as well of the Government, as of the Courts of Justice in Conjunction with the *Kasi*, or Judge of the Place.

Among divers noted Sepulchres which are near this City, is that of a certain *Kasi*, built by a King of *Gusuratta*, in the Village of *Zirkees*, a Lg and a half from the City. The whole Structure is of Marble, being sustained by 440 Pillars, 30 foot high, within which are to be seen the Tombs of three Kings that were buried there. At the entrance of it is a large Cistern full of Water, the Wall about it having several Windows on all sides, and about a Lg thence there is a very large and fair Garden and House, the work of the *Mogul*, *C. on Chimaum*, built in memory of a Victory obtained by him over the last King of *Gusuratta*. About a Lg and a half on the other side of the City we were shewn another Sepulchre, erected in Memory of a certain Moor, a rich Merchant, named *Ha-*

The Sepulchre of a Kasi.

Jam

1638. *jam Majom*, who being in love with his own Daughter, and having by fraudulent means obtained the *Kasi's* consent, would have married his Daughter, but she refusing to comply, he ravish'd her, for which he had his Head cut off, whence it is call'd to this Day *Betti Chuit*, i. e. *thy Daughters shame discovered*. A little way without the City of *Amadabat*, you may discover the vast Mountains of *Marva*, extending above 70 Lgs towards *Agra*, and above 100 towards *Onyen*, where the *Rasgai* (or Prince) named *Rana*, had his Residence in the Castle of *Gurchitto*, among the inaccessible Rocks, so that the joint Forces of the *Mogul*, and the King of *Pettan* were scarce able to reduce it. The *Pagan Indians* retain still a great Veneration for that Prince, who as they say, was able to bring 120000 Horse into the Field. In the Mountain betwixt *Amadabat* and *Trappe* lives such another Prince, who by reason of the inaccessibleness of the Woods and Deserts, maintains his Soveraignty against the *Mogul*; and the *Rasgai* (Prince) of *Ider*, tho' he is his Vassal, yet oftentimes refuses to execute his Commands.

Among many noble Gardens which are about this City, that of *Schach-bag*, or the *King's Gardens* in the Suburbs, call'd *Begampour*, claims the Precedency, being enclosed with a noble Wall, within which stands a very fair Summer-house, very richly furnished. I pass'd thence over a very fine Stone-bridge 400 Paces in length, into another Garden, call'd *Niccinabag*, i.e. the *Jewel*, which they say is the work of a beautiful rich Lady. The House as well as the Garden, is not so remarkable for their bigness, as the most admirable Prospect it has from the descent on which it lies, into a fine Champagne Country; it has a very large Fish-pond, which during the Winter Season is supply'd with Water by the Rains, but in the Summer Season it is fill'd out of certain deep adjacent Wells, the Water of which is drawn up by certain Engines, turn'd by Oxen. You can scarce ever come into this Garden, but you will find some Ladies bathing themselves there; they would not allow the *Indians* to see them, but gave us the freedom to come in and to talk with them. The whole Country round *Amadabat*, and the City it self, is so full of Gardens and Trees, that at a distance it resembles a great Forest.

There is among other remarkable things here, a Walk very straight, and Planted with a double row of Cocoe-trees on each side, which reaches to a Village 6 Lgs from the City; but that which reaches from *Agra* to *Barampour*, 150 Lgs in length, surpasses this without all comparison. These vast numbers of Trees are the receptacles of prodigious multitudes of Apes, some of which are as big as Grey-hounds, yet will rarely assault any body, unless they be provoked. They are generally of a brown colour, inclining to a mixture with green, with white long Beards and Eye-brows; they multiply beyond what can be imagined, because the *Benjans*, who are more numerous here than the *Mahometans*, believing the Transmigration of the Soul, and looking upon these Creatures as having the greatest resemblance in all respect to Mankind, are so far from killing them, that they cherish them. Hence it is that you shall see the Apes come in great numbers into Peoples Houses; for I remember that at one time I counted no less than 50 together in the *English* Lodge; and I used to give some Almonds and Dates to 2 or 3 of them, which made them duly attend every Morning at my Chamber-door, in expectation of their Breakfast, which they would take out of my Hand; sometimes I used to catch hold of one, which made the rest snarle, till I had let go their Companion again.

These Trees also harbour abundance of wild Fowl, and an incredible number of Parrots of all kinds, the biggest of which are called *Indian* Crows, being all white, or of a Cream colour, with a Tuft of Feathers of a Carnation colour on the Head. They are so common all over the *Indies*, that they build their Nests under the Eaves of Houses, as our Swallows do. But the lesser sort of Parrots build their Nests in the Woods, on the extremities of the top Branches of the Trees; and tho' they do much mischief to the Fruits and Rice, the *Benjans* look upon it as a crime to hinder them from eating, no more than they do to the wild Ducks, Herons and Cormorants, of which there are abundance in this River. Having had occasion to speak of them before, I will only add in this place, that they will swallow Mussels till being opened by the heat of the Stomack, they cast them out again, to eat the Fish.

This Country also abounds in all kinds of wild Fowl, and Venison, but Fallow-Deer, Roe-Bucks, *Ahus's*, or wild Asses, wild Boars, and Hares are in vast plenty here; and as they are sufficiently stored with tame Creatures, such as Bufflers, Oxen, Cows and Sheep, and that the River furnishes them with Fish in abundance, I scarce know any place in the World where a Man may indulge himself with more ease than here. The only thing they want is Wine, but instead of that, generally make use of the Liquor of the Cocoe-tree, and their Water is most excellent; besides that out of Rice, Sugar and Dates, they make a kind of *Aqua Vitæ* with exceeds that made in *Europe*: But as they are sufficiently furnish'd with beneficial Creatures, so they have their share of others that are as mischievous.

They want Wine.

Crocodiles.

30 foot long.

A Crocodile with a Woman in his Belly.

(a) *Nat. Hist.*

Serpents.

Bats as big as Crows.

Crocodiles are found here in abundance, which often surprise Men in the River, where they lie lurking among the high Grass; I am positive that those in the Ditches of *Pegu*, were of above 30 foot long, they did such prodigious mischief, that scarce a Day pass'd, but some or other were kill'd by them; notwithstanding which, the *Benjans*, who believe that such as are devoured by them, go straightways to Paradise, will not destroy them. The King having ordered one in particular, which did more mischief than all the rest, to be kill'd, they found a Woman with all her Cloathes in his Belly. They lay about 28 or 30 Eggs which they cover in the Sand, where being hatch'd, they kill most of the young ones, without which they would multiply infinitely. *Johnston.* (*a*) tells us that near *Panama* in the *West-Indies* are *Crocodiles* of 100 foot in length, but I will ingeniously confess that of all that I saw, none were above 12 or 15 foot long; the Scales on their Backs being Musquet proof, they must be wounded in the Belly.

This Country produces also abundance of Serpents, and Snakes, and among the rest some with 2 Heads, as they told me, tho' I must confess I never saw any of them; which induces me to imagine, that this Error has been introduced by such as have seen Serpents, which, contrary to the Nature of all Reptiles, were as big towards the Tail as towards the Head. The Woods are likewise full of Lions, Leopards, Tigers and Elephants: But the most troublesom Creatures all over the *Indies*, are a certain kind of Bats, as big as our Crows, nay, some of our Hens; which obliges the Country People to keep constant watch in their Gardens.

The City of *Amadabat* is obliged to maintain out of its Revenues 12000 Horse and 50 Elephants, who stand under the Command of their *Sulthan*, who has the Quality of *Rasgai*, or Prince annex'd to his Dignity. *Areb-Chan*, a Person of 60 Years of Age, was Governor of this City at that time, and, as I was credibly inform'd, had amass'd a Treasure worth 50 Millions of Crowns. Not long before my arrival, his Daugher was marry'd to the *Mogul*'s second Son, when her Father at her departure sent her with an Attendance of 20 Elephants, and 1000 Horse to Court, besides 6000 Waggons loaden with Riches. His Attendance consisted of 500 Persons, 400 of which were his Slaves, dieted at his own Charge, the Expence of his House-keeping amounting to 5000 Crowns a Month, not including his Stables, where he maintained constantly 500 Horses, and 50 Elephants for his own use. The Chief of his Attendants were generally sumptuously clad, tho' he himself seldom wore any thing but Callicoe, except when he appeared in Publick, when he was carried in a rich Chair of State upon an Elephant, being attended by a Guard of 200 Men, with many *Persian* Led Horses, and Standards and Banners before him.

The City of *Amadabat*'s Wealth.

His Expence.

Octob. 18. I went with an *English* Merchant to pay a Visit to the *Chan*, whom we found in a Tent looking into a Garden; having understood from the Merchant that Curiosity had only led me into that Country, he ask'd my Age, and I having told him that I was 24 years old, 3 of which I had already spent in Travelling, he wonder'd at my going abroad so young, as well as at my Habit, which I still wore after the *German* Fashion; after an hours Discourse, I was entertain'd with a very noble Dinner, serv'd up after the *Persian* way, and at parting he was pleased to tell me in the *Turkish* Language, which I had told him I understood pretty well, *Senni dahe kurim*, i. e. we shall see you again.

The Author Visits the *Sultan*.

Being encouraged by this obliging Invitation, we went the 20th. a second time, when having changed my Cloathes according to the Mode of the Country, I found him very well pleased with it; we found him

A second Visit to the *Chan*.

1638. in the ſame place, buſie in diſpatching ſome Orders, and taking a view of certain Companies of Horſe and Foot, which made us take our leave of him, but he would needs make us ſtay to Dine with him. His Diſcourſe run much upon *Schach Sefi*, concerning whom he ask'd me ſeveral Queſtions, and eſpecially whether he continued ſtill in his Cruelties, unto which I having anſwer'd, that his Age had moderated much of his youthful extravagant Temper; he reply'd, that Tyranny and Cruelty was an Inheritance to him, derived from his Grandfather *Abas*; and that that was the only reaſon why lately the *Chan* of *Candahar* had put himſelf under the *Mogul*'s Protection. He then was for exaggerating the prodigious Wealth of the *Mogul*, in compariſon of that of *Perſia*, asking my Sentiment upon that ſcore, unto which I reply'd, that it muſt be confeſs'd that the Wealth I had ſeen in the *Great Mogul*'s Country, was without Compariſon much greater than what could be expected in *Perſia*; but that on the other hand, it muſt be acknowledged that *Perſia* had one thing, which was to be valued above all the Riches of the World, *viz.* that great number of brave *Kiſilbachs*, with whoſe aſſiſtance he might be able to conquer all *Aſia*. Knowing the *Chan* to be a *Kiſilbach* by deſcent out of the Province of *Schirwan*, I ſaid this on purpoſe to pleaſe his fancy, which took ſo well with him, that he not only agreed to what I ſaid, but alſo told ſome of his Officers that ſtood hard by him, *I believe this Young Gentleman is brave, becauſe he ſpeaks ſo advantagiouſly of thoſe that are ſo.* His Diſcourſe with the Author.

After Dinner we took our leave of the *Chan*, who would have ſtaid us, and given us the Entertainment of the Women Dancers, but he being call'd aſide about ſome earneſt buſineſs, and we not very eager to ſee more of what we had ſeen ſo often before; we return'd his offers with a Complement. For the reſt the Governor was a Perſon of extraordinary Judgment, but very rigorous in his Government; one Day having invited the 2 Chief Directors of the *Engliſh* and *Dutch* to Dinner, and deſirous to give them the Diverſion of the Women Dancers, they came accordingly, who according to the cadence of the Haut-Boys and Timbrels, danced with great activity through Hoops, with great variety of Poſtures; which done, he ſent for another Band of the ſame Gang; but thoſe being employ'd elſewhere in the City, ſent an excuſe, that being ſick they could not come; but the *Chan* not thus contented, he ſent a ſecond time, ordering his Servants to bring them along with them, who returning without them upon the ſame pretence, he ordered them to be Cudgel'd immediately. Theſe poor Wretches finding themſelves in ſuch danger, caſt themſelves at the *Chan*'s Feet, acknowleding that it was not any ſickneſs, but the hopes of Lucre that had made theſe Women refuſe to obey his Commands; at which he laugh'd, but immediately ſent ſome of his Guards to fetch them, who no ſooner had brought them into the Room, but he ordered their Heads to be cut off immediately, which was executed in an inſtant. The Governor perceiving that the Strangers were ſtartled at this Severity, fell a laughing, and told them, that if he ſhould not by ſuch Examples maintain his Authority, he ſhould not be long Governor of *Amadabat*. His Character.

Octob. 21. I left *Amadabat* in the Company of a young *Engliſh* Merchant, and travell'd that Day to the Garden of *Tſchichbag*, of which more anon. The Author leaves *Amadabat*.

The 22d. We made 7 Lgs, to the Village of *Serguntra*, and the 23d. 5 Lgs further, to *Cambaya*, where I was lodg'd and very well accommodated at the Houſe of a certain *Mahometan*, the *Engliſh* Head Factor being from home. The City of *Cambaya* lies 16 Lgs from *Broitſchia*, upon ſandy Grounds near the River, which makes there a great Bay, into which the River *Mey* exonerates it ſelf. The Haven is none of the beſt, for, tho' at High-water there be 7 fathom depth, yet at Low Tide the Ships are almoſt ſwallowed up in the Sand and Mud. It has a very fair Wall of Free-ſtone, with 12 Gates, large Houſes, ſtraight and very broad Streets. It is 10 Lgs in Compaſs. A Deſcription of *Cambaya*.

The Inhabitants are *Pagans*, *Benjans* and *Rasboutes*; the laſt of which apply themſelves to the exerciſe of Arms, as the *Benjans* do to Commerce. Their chief Trafficks is at *Achim*, *Dio*, *Goa*, *Mecca*, and into *Perſia*. Taking a Walk out of the City, I ſaw there among ſeveral other very curious Gardens, one, that for its ſituation and proſpect to the Sea, on one ſide, and into the faireſt Champagne Country that could be, to the Land ſide, deſerves the Precedency of any that ever I ſaw before, it was ſurrounded by a very high Wall, which had within its Compaſs 2 very fine Structures, and in the midſt of the Garden was the Sepulchre of a *Mahometan*, who was the Founder of it. Whilſt I was contemplating the Tomb, ſome *Engliſh* Merchants came in to reprove me for the affront I had put upon them, as they interpreted it, of preferring a *Mahometan* Houſe before theirs, to lodge in; and as a reparation ask'd me to go along with them to morrow morning, to a place where an *Indian* Widow was to burn her ſelf, her Husband who was a *Rasboute*, having been kill'd 200 Lgs thence. We went accordingly to the place of this voluntary Execution, near the River ſide, where we ſaw the Woman, who was ſcarce 20 Years of Age, coming up with ſo cheerful a Countenance, as is ſcarce to be imagined. It is to be obſerved, that the Governor, who was a *Mahometan*, and conſequently would willingly quite aboliſh this barbarous Cuſtom of the *Pagans*, had for a long time oppoſed her Reſolution under pretence that her Husbands death might be uncertain at ſo great a diſtance, in hopes that time might make her change her Reſolution; but finding her immovable, he at laſt gave his conſent. 1638.

In the Front of the Proceſſion march'd the Muſick, conſiſting of Haut-Boys and Timbrels, theſe were followed by a good number of Maids and Women, dancing and ſinging before the Widow, who was dreſt in her beſt Apparel, and had many Rings and Bracelets on her Fingers, Arms, and Legs; in the Reer came a confuſed multitude of Men, Women and Children. She had waſh'd her ſelf before in the River, and coming near the Funeral Pile, which was made of the Wood of Apricock-trees, mixt with ſome Sanders and Cinnamon, ſhe ſtop'd a little, and looking over it with a great deal of careleſneſs, took her laſt farewel of her Kindred and Friends; I was very near on Horſe-back, and ſhe perceiving perhaps in my Countenance, that I had compaſſion of her, ſhe caſt me one of her Bracelets, which I keep to this Day, diſtributing the reſt among her Friends. So ſoon as ſhe had placed her ſelf on the Pile, and perceived that they had ſet fire to it, ſhe poured a Veſſel full of perfum'd Oil over her Head, which the Fire taking hold of, burnt her to Aſhes immediately, without giving the leaſt ſign of reluctancy, whilſt all there preſent fill'd the Air with their Shouts and Acclamations. An *Indian* Woman burns voluntarily.

This Cuſtom, as it ſeems, was firſt introduced into the *Indies* to prevent the Jealouſie of the Women created to Polygamy; which had this diſmal effect, that they uſed frequently to poyſon their Husbands, it having been found by experience, that in one Year their uſed to be 4 Men buried to one Woman; to prevent which it was thought convenient, that a certain Law ſhould be introduced, for all Women that would be accounted honeſt, to accompany their Husbands at their Deaths, as the only means to make them careful of their lives; yet was no puniſhment inflicted upon ſuch as did not think fit to comply with this rigorous impoſition, except that they were look'd upon as infamous for ever after. How this Cuſtom was introduced.

This Ceremony being over, I paid a Viſit to one *Myrſabeg*, one of the chiefeſt *Mahometan Merchants* in that City, unto whom I delivered the Letter of recommendation from the Director of the *Engliſh* at *Amadabat*. As he underſtood the Language, ſo he complemented me with all imaginable expreſſions of Civility, endeavouring to perſuade me to tarry for ſome time at *Cambaya*, and proffering his Service in every thing, that might tend to my Satisfaction; whilſt I was returning his Civilities, came up to us the King's Lieutenant or Deputy Governor, who with a very ingaging Air intreated me to give him a Viſit, which I promiſed to do. I went home, and ſcarce had eat my Dinner, when the before-mentioned Merchant ſent me 2 Muttons, 12 Capons and Pullets, beſides ſome Fruits, and a very fine Veſſel of Agat. I ſent back the bearer with a ſmall Preſent, telling him that I would return my hearty thanks to his Maſter the next Morning, but I was ſcarce got out of the Bed, when he came and told me that the fear of parting with me, without taking his leave, had made him come ſo early; I thank'd him, and as a Pledge of the good will I bore him, preſented him with a very fine *Engliſh* Pocket Piſtol, which he at firſt refuſed to accept of, excuſing himſelf that it was not handſom to receive a Preſent from a Stranger, were it not that his refuſal might be miſinterpreted by me to his diſadvantage, upon which ſcore he could not forbear to accept of what I had been pleaſed to beſtow upon him with ſo much

1638. much kindness. I thought fit to make particular mention in this place of these Civilities, to convince the World that Barbarism which the *Indians* are so often branded with by some Authors, is not so deeply rooted among them, but that they understand and make use of Civility as well as some other Nations, who challenge the preference upon that account before all others, but fall short in that sincerity which is natural to the *Indosthans*, who are as good Friends to those unto whom they have promised their Friendship, as they are irreconcilable to their Enemies. I caused a Box of *Bettele* to be presented to the Merchants, a Drug as commonly used in the *Indies*, as Bread is in *Europe*; of which he having taken a little, he took his leave; soon after as I was going to call at the Deputy Governor's House, I met him in the Street in his Coach, and he no sooner espied me, but obliged me to go back with him to his House, built in one of the most pleasant parts of the City. He treated me with *Bettele*, and some Palm Wine, and sent one of his Servants to give order at the Gates to let me pass unmolested without paying any Customs. I stay'd not above half an hour, and immediately proceeded on my Journey, but being pretty late, before I could reach *Serguntra*, the *Benjans* who burn no lights, for fear of hurting the Flies or other Insects, would not open their Shops, to sell us some Forrage for our Beasts, being a certain Paste of Sugar, Meal and some Butter, which is used here for want of Oats and Hay; but at last were prevail'd upon to let us have some, because we threatned to break open their Shops.

The Civility of the Indosthans.

The Author leaves Cambaya.

We made 5 Lgs the next Day, before Noon, to a great Village, where having baited our Beasts, we continued our Journey to the Garden of *Tschictbag*.

The Garden of Tschictbag.

This Garden, which we had occasion to mention not long before, is look'd upon as one of the most considerable of all the Empire, not only in respect of its noble Buildings, and the vast quantity of most excellent Fruits, but especially for the Conquest of *Guzuratta*, in memory of which it was founded, and thence has got the Name of *Tschictbag*, i. e. the *Garden of Victory*. The Alleys of this Garden, of which there are many, are all planted with Fruit Trees, such as Orange and Citron Trees, Pomgranate, Date, Almond and Mulberry Trees, besides many of those that bear Mango's, Coco's, and some other that were unknown to us. Having taken a short View of it whilst our Beasts were baiting, we continued our Journey and came that Night to *Amadabat*; we were not a little troubled by the way with the Apes, of whom I shot two with my Pistol, which so incensed the rest, that about 20 of the largest size pursued us for half a Lg, and by their odd looks gave us to understand, that they were ready to do us any mischief, if they durst approach us.

Goes for Agra.

At *Amadabat* I met with a *Caravan* of *English* and *Benjan* Merchants, bound for *Agra*, and being recommended to them by the Director of the *English* Factory of *Amadabat*, I went along with them the 28th. of *Octob.* We met in 5 Days Journey with no more than one Village worth mentioning, called *Painger*, and came the 6 Days after our setting out from *Amadabat*, to the small City of *Heribath*, 50 Lgs thence. It is without Walls or Gates, which have been destroyed by the famous Conqueror *Tamerlain*, as well as the adjacent Castle, the Ruins of which are to be seen near a high Mountain. Betwixt this City and that of *Damtiges*, which is 50 Lgs from *Heribath*, we met a *Caravan* of *Benjan* Merchants, who told us that they had been set upon by 200 *Rasboutes* who had forced them to pay them 100 *Roupies*; accordingly we ordered our Waggons to be fastened together, and disposed our Guards in such a manner as we thought them most serviceable. Neither was it long after before we got sight of 50 of the same Gang, that were sent, without question to view us, but finding us too well guarded, let us pass unmolested.

Comes to Heribath.

We travell'd 50 Lgs further, before we came to the Village of *Sardek*, which has a strong old Castle; as we were travelling in a Bottom, ten *Rasboutes* surprized some of our Waggons that were got about 600 Paces before the rest, and wounded 2 *Benjans*, but some of our Guards being sent to their relief, the Robbers were forced to betake themselves to their Heels, and to leave the Booty behind them.

After this Rencounter, we met with no further disaster, and arrived safely at *Agra*, where I was received with the same Civility by the *English*, as I had been in all the other Places through which I pass'd.

To Agra.

The City of *Agra*, without comparison, the noblest of all *Indosthan*, is the ordinary Residence of the *Great Mogul*; it is seated at 28 deg. on this side of the Line, in the Province of *Indosthan*, upon the River *Gemini*, which joins its Waters with the *Ganges*, above the Kingdom of *Bengala*. It being twice as big as *Ispahan*, a Man can scarce ride round it on Horseback in a whole Day. Its Fortifications are of a kind of red Free-stone, and the Ditch is above 30 fathom broad. The Streets are fair and large, there being some Vaulted, which are a Mile in length; and are furnished with Shops of all sorts of Trades, each of which have their peculiar Streets and Quarters assign'd them. It contains 15 *Meydans* and *Basars*, the most spacious of which is before the Castle. In the midst of it stands a high Pole, where the *Mogul* himself shoots sometimes at a wooden Parrot fastened to the top of it. Eighty *Caravanseras*, are appointed for the Reception of Foreign Merchants, and their Merchandices; they are provided with noble Appartments and convenient Shops, Vaults, Stables, and other Conveniencies. As the Mogul and the chiefest of his Court are *Mahometans*, so there is a vast number of *Mosques* throughout the City, of which 70 are remarkable for their bigness, and six among them appointed for their Devotions on Holy-days; these last they call *Metschidadine*. In one of these they shew you the Sepulchre of a certain *Saint* named *Seander*, of the Posterity of *Aly*, and in another the Tomb of a Giant Saint, being 30 foot in length, and 16 in breadth. His Tomb was surrounded on all sides with little Banners or Flags, as so many tokens of his Heroick Atchievements; whence it is that his Sepulchre is frequented by a vast number of Pilgrims, who bring thither daily their Offerings, out of which, and the ordinary Revenue belonging to it (which is very great) are maintained so vast a number of Poor, that in those respects, it is not inferior to the Sepulchre of *Schich Sefi* at *Ardebil*.

1638.

Its Description.

Fifteen Market Places.

Eighty Caravanseras.

Mosques.

The Tomb of a Giant.

These *Mosques*, with their adjacent Courts, are so many Sanctuaries both in Criminal and Civil Cases, the *Mogul* himself never presuming to take any Criminal, tho' he be never so great an Offender, thence, out of a Veneration all the *Mahometans* have for their Saints.

Sanctuaries.

In the City of *Agra* are above 800 Publick Baths, which pay a considerable Summ yearly to the *Mogul*; for as Purification is one of the main ingredients of the *Mahometan* Religion, so these Baths are daily frequented by a vast number of People. The Great Lords of the Court, who bear the Title of *Rosgai*, or Princes, who have very many Magnificent Houses both within and without the City, where the King also has several Gardens and Summer-houses, to retire to upon occasion, with the Women-Dancers, who dance before him stark naked.

800 Baths.

But his Palace which stands upon the River *Gemini*, and is 4 Lgs in compass, surpasses all that I ever saw of that kind before or since. It is surrounded with a Wall of Free-stone, and a broad Ditch, having a Draw-bridge at each Gate; the Gate on the West side leading to the *Basar*, is call'd *Ciftei*; Under this Gate is kept the Court of Judicature, and in an adjoyning spacious Hall, the Chief *Visier*, or Lord Chancellor, dispatches all matters relating to Military Affairs, whereof the Originals are kept here. Immediately within this Gate you come into a very spacious Street, with Shops on both sides, leading directly to the *Mogul*'s Palace, the Gate of which is call'd *Achebarke Dezwage*, i. e. King *Achobar*'s *Gate*, through which all the Great Lord's of the Court, except the King's Sons, are obliged to go in on foot; this being the Quarter where the dancing and singing Women are lodg'd.

The Royal Palace.

There is another Gate leading to the River, where the *Mogul* every Morning pays his Devotions to the *Sun*, at his rising. It is on that side the Great Men pay their daily Respects to the King, from a certain Eminency where the King can take particular notice of them. The Commanders of Horse do also stand on that side, but at a greater distance, at a place where the *Mogul* sees the Engagements every day betwixt Lions, Elephants, Bulls, &c. except *Fridays*, a Day dedicated to their Devotions: There is also another Gate, which brings you into the Guard-Hall; through this Hall is passage into a Pav'd Court, at the further end of which you see a row of Silver Pillars under a *Piazza*, where is kept another Guard, to prevent the common People from entering there; here I met with my *Per-*

The Mogul Worships the Sun.

sian

1638. *sian* Servant who had left me at *Suratte*, he offered me all the Service he was able to do me, and would fain have brought me within these Pillars, but that the Guards would not permit it; this being the ready way to the *Mogul*'s Apartment, where is a row of Golden Pillars of a lesser size, and within them the Royal Throne of Massie Gold, enrich'd all over with Diamonds, Pearls and Precious Stones, and above it a Gallery, where the *Mogul* appears every Day at a certain time, to hear and determine the Complaints of his Subjects; but this Tryal is so dangerous, unless you prove the matter of Fact by undeniable Evidence, you run the hazard of your Life. None but the King's Sons who fan him, and keep off the Flies, are admitted within the compass of those Golden Pillars, neither is any other Person admitted into the innermost parts of the King's Lodgings, except the Eunuchs, who being 1200 in number, wait on the Ladies of the *Seraglio*.

His Throne.

Seraglio.

There is another Apartment in the Castle very remarkable for its Tower, which is covered with Gold, and the Treasure it contains, having 8 large Vaults fill'd with Gold, Silver, and Precious Stones, the value of which is inestimable.

I had it from very credible Persons, that *Schach Choram*, who reign'd in my time, had a Treasure which amounted to 1500 Millions of Crowns; I had from the same hand an exact Inventory communicated to me of the Treasure which was found at the Death of *Schach Achobar*, his Grand-father, which I will faithfully communicate to the Reader.

The *Mogul*'s Treasure.

In a certain sort of Money coined by special Order of the said *Achobar*, of 25, 50, and 100 *Toles*, the first of which was valued at 200122 Crowns, the second at 40025, and the third at the rate of 80050 and a half Crowns a piece, 148 Millions 790000 Crowns.

In another kind of Money call'd from his Name, *Achobar Repies*, 50 Millions of Crowns.

In another sort of Money call'd *Peyses*, 60 whereof make a Crown, 383333 Crowns and 10 Pence.

In Diamonds, Rubies, Emeralds, Sapphires, Pearls, and other Precious Stones, 30 Millions, 26026 Crowns.

In Statues of Gold of divers Creatures, 9 Millions 503370 Crowns and a half.

In Houshold-stuff, Gold Plate, as Dishes, Cups, *&c.* 5 Millions 866895 Crowns 5 Pence.

In Brass and Copper Utensils, 25612 Crowns and a half.

In Porcelain and other Earthen Vessels, to the Value of one Million 253873 Crowns and a half.

In Brocadoes and other Gold and Silver Stuffs, and in Silk and Calicoes, 7 Millions 654989 Crowns and a half.

In Woollen Clothes 251626 Crowns.

In Tents, Hangings, and Tapistry, 4 Millions 962772 Crowns and a half.

Twenty four thousand Manuscripts richly bound, valued at 3 Millions 231865 Crowns and a half.

In Artillery and Ammunition, 4 Millions 287985 Crowns and a half.

His Magazine of Small Arms, Swords, Bucklers, Pikes, Bows, Arrows, *&c.* 3 Millions 777752 Crowns and a half.

In Saddles, Bridles, and other Gold and Silver Accoutrements, to the Value of one Million 262824 Crowns.

In Covering Clothes for Horses and Elephants, Embroidred with Gold and Silver, and Pearls, 2 Millions 500000 Crowns, all which cast up together amounts to 174 Millions 113793 Crowns, which falls far short of 1500 Millions, supposed to be the present *Mogul*'s Treasure; it being certain, that tho' the ordinary Revenue is not considerably encreased, yet by the many and vast Presents made by the Governors, and the Escheats that fall daily to the Crown from the Estates of the Great Lords, whose Children can claim no Right of Inheritance here, his Wealth must be considerably encreased since that time.

No Hereditary Dignity in *Indostan*.

As there is no Inheritance of Estates belonging to the Children of Great Persons, so they can claim no share in their Fathers Dignity, the Title of *Rasgai* being more inheritable here than that of the *Chans* in *Persia*; the only advantage they have, is, that they are entrusted with lesser Charges by the *Mogul*, till by their Merits they can raise themselves to the highest Dignity.

The Chief Officers

The chiefest Officers of the Court are the Head *Visier*, or Lord Chancellor.

The chief of the Eunuchs, or Lord High Steward of the Treasury, Principal Secretary of State, General of the Elephants, and Surveyor of the Houshold-stuff, Tents, and Jewels. These are constant Members of the *Mogul*'s Privy Council, unto which is also sometimes called the *Conteval*, who is both Chief Justice, and Commander in Chief of the *Mogul*'s Guards. 1638.

The Council commonly sits in the Night-time, from 7. till 9. The *Mogul* appears every Day in the Morning at Sun-rising, when the Lords come to pay their Veneration to him; about Noon, when he comes to see the fighting of the wild Beasts, and about Evening when he appears at a certain Window, to see the Sun setting.

The *Mogul*'s Revenue.

According to the Roll of the Kingdom, the Provinces of *Candahar*, *Cabul*, *Agra*, *Guzuratta*, *Cassimer*, *Barampour*, *Dely*, *Bengala*, *Orixa*, and some others bring in a yearly Revenue of 87 Millions 250000 Crowns, the Province of *Guzuratta* is able to raise 90000 Horse, *Cambaya* 12000, *Cabul* as many, *Orixa* 80000, and *Dely* 150000, besides those of the other Provinces, of which I could learn no certainty.

This Militia is divided into certain Brigades of 15000, or 12000 Horse, commanded either by the King's Sons, or the chiefest Lords of the Empire; some of whom have also under their command certain Regiments of 2000, 3000, and 4000 Horse.

Certain it is that then the present *Mogul* went in Person into the Field against *Chan Chaan*, 1630. his Army consisted of 144500 Horse, divided into 4 Brigades, besides a vast number of Elephants, Camels, Mules, and Artillery Horses.

Their Arms.

The Arms used in their Camp, were the Bow and Arrows, a Javelin, which they dart with great dexterity, a Cymitar, Ponyard, and Buckler, which hang about their Necks.

The Horse use no Fire-Arms, but their Infantry manage the Musquet tolerably well. Their Pike-Men have Pikes of 10 or 12 foot long, which they dart at the Enemy instead of opposing the Horse with them as we do in *Europe*; some use Coats of Mail reaching down to their Knees, but are without Head-pieces.

Martial Discipline.

They understand nothing of Martial Exercise, the Van or Rear, Front and File being things never heard of among them, but fight without any Method or Order. Their chiefest Trust lies in their Elephants, on the Backs of which are fix'd certain wooden Towers, carrying 3 or 4 Harquebuses with as many Men to order them; and the Elephants serve them instead of a Bull-wark, to hinder the Enemy from breaking in upon them; but the worst is, that these Beasts being terrify'd by artificial Fire-works, or some other means, make a greater havock among their own People than the Enemy.

Their Artillery.

They commonly have a great Train of Artillery, and some very large Pieces. They also make Gunpowder, but not so good as ours; their Copper Trumpets and Timbrels make no unpleasant noise in the Field; their Armies never march above 5 Lgs in a Day, as in their Encampments they take up a vast circumference of Ground, so they observe a very good Order in them, every thing being as well regulated there as in a well govern'd City; and it is observable that the *Mogul* and the General of the Army always have their Tents pitch'd without the reach of Musquet Shot from the rest.

Their ordinary Encampment.

Its ordinary Guard is 12000 Men strong, besides the 600 Men that have the Title of the Guard of his Body, and are always attending his Person. The *Mogul* sometimes confers the Dignity of *Rasgai* or Prince upon his chief *Visier*, or Lord Chancellor, who has the Supream Management of all Civil and Military Affairs throughout the Kingdom. He is not permitted to take the least Presents, but his Clerks are so little conscientious in this point, that for Money a Man may know every thing that passes through their Hands. The *Rasgai* and other great Men pay a most profound Veneration to their Monarch; they never approach or speak to him without many bows and reverences, and when they are going away, they do it backwards, bowing their Heads down to the ground, putting their Hands over their Eyes, and afterwards upon their Breasts, to shew their humility.

The *Mogul*'s Retinue.

The *Mogul* never stirs abroad out of the City or otherwise, without a Guard of 10000 Men, in the Head of which march a 100 Elephants, covered with Scarlet, Velvet, and Brocades, each having two Men on his Back, *viz.* one who guides the Beast, the other carries a Banner of Silk; upon 7 or 8 of the foremost are mounted the Musicians, who play upon the Timbrel. The *Mogul* himself is either mounted on a fine *Persian* Horse, or is carried in a Coach, drawn by 2 white Oxen, or carried in a Chair; the chief Men of

1638. of the Court follow immediately after, and after them the Baggage. He commonly pitches his Tents in the Field, the better to enjoy the conveniency of the cool Air in the Summer, and to chuse the warmest places in the Winter; which is the reason that he commonly leaves *Agra* in *April*, and passes the Months of *May*, *June*, *July* and *August* at *Lahor*, or in some other Northern Province.

He changes his Residence with the Season.

The City of *Agra*.

The City of *Agra* is so populous, that it is able to raise 200000 Fighting Men; most of the Inhabitants are *Mahometans*, but there is scarce any Nation in the World but what Traffick thither, and all Commodities, whether imported or exported, pay 10 *per Cent* Custom.

This City has under its Jurisdiction 40 small Cities, and 3500 Villages, its Teritories extending above 60 Lgs about. The circumjacent Country is very fertile in Indigo, Cotton, Salt-Peter, and several other Commodities.

The Festival of the *New-Year*.

The Festival of the *Nauruz*, or *New-years-day* is celebrated in this City with a great deal of Ceremony. Before the King's Palace a Threatre or Scaffold richly adorn'd, is erected, surrounded with small Pillars, in the nature of a Balcony, where the King is seated upon richly embroidered Velvet Cushions, being attended by his 7 Ministers of State, the Queen being not far off in a Gallery, where she can see the whole Ceremony, but can't be seen by any body. Near the King's Scaffold is another erected painted and embellish'd with Mother of Pearl, whither the Principal Lords come out of their Tents pitch'd, and furnish'd with their most precious Movables, in the outermost Court of the Palace, to pay their Venerations to the King; which done he leaves the Theatre, and being seated upon his Throne, he receives the Presents of his Subjects; and this he continues for 18 Days successively. Towards the conclusion of these 18 Days, the King in return of the Presents, the Lords and others have made him, bestows upon them his Presents, which are certain Employments and Honours proportionable to the Gifts he has received from their Hands.

The *Mogul*'s Birth-day.

The *Mogul*'s Birth-day is also celebrated here after a peculiar manner. The Day is begun with all manner of Divertisements, which done, he shews himself to the Queen Mother if living, in her own Apartment, where the great Lords are obliged to appear, and to bring along with them considerable Presents. After Dinner he puts on the richest Apparel that can be contrived, being loaden all over with Gold and Precious Stones, thus he goes into a Tent, and in the Presence of the Chief Lords, weighs himself in a Pair of Scales of massy Gold, the Chains whereof being of the same Metal, and beset with Precious Stones. He is set in one of the Scales, and in the other are put several Bags of Silver, one of Gold, some Precious Stones, certain pieces of Silk-Stuffs, Callicoes, Pepper, Cloves, Nutmegs, Cinnamon, Wheat, Pulse and Herbs, and an exact account is kept of the difference of his weight from one Year to the other.

This done, the King gives the Money with his own Hands to the Poor *Mahometans*, and the rest is distributed among certain *Benjans*, then being seated in his Throne, he orders to be cast among the Lords of his Court Nuts, Pistachoes, Almonds, and divers other sorts of Fruit of Gold, but so slightly made, that 1000 of them scarce weighed 30 Crowns; which, tho' it may seem incredible, yet is it certain, and has been try'd by experience that a whole large Bason full of this kind of wrought things have not amounted to above 10 Crowns; and it is computed that all what this Great Monarch bestow'd upon this occasion, could not amount to above the value of 100 Crowns; the Day is concluded with a great Feast at Court, unto which are invited all the principal Lords of the Court, who pass away the Night with the *Mogul* in drinking.

nother east.

They also celebrate another Festival which begins 10 Days after the New Moon, of the Month of *July*. This is observed to perpetuate the Memory of 2 Brothers named *Janze* and *Jawze*, who being *Haly*'s Servants, went on Pilgrimage to the Court of *Coromandel*, and were there kill'd by the *Bramans* and other *Pagans*. They carry Coffins covered with Bows, Arrows, Turbants, Cymitars, and Garments of Silk, through the City, the People following in whole Troops, with great Lamentations, some slashing their Arms till the Blood issues forth plentifully. In the Evening they make divers Figures of Straw, representing the Persons who murdered them, at these they shoot their Arrows, and at last burn them to Ashes; they perform this with so much animosity, that no *Pagan* dares to appear about that time in the Streets. The *Indian Mahometans* also celebrate the Feast of the Sacrifice of *Abraham*, it is done in *June*, when they kill a He-Goat, which serves them to entertain their Friends with that Day. 1638.

The Mogul descended from Tamerlain.

The *Great Mogul* deduces his Off-spring from the Great *Tamerlain*, in a direct Masculine Line; the said *Tamerlain* being descended from the Family of *Chinguis Chan*, King of *Tartary*. *Schach Choram*, who reign'd at the time of my Travels into those Parts, usurped the Crown from his Nephew, Prince *Polagi*, whom, as we told you, we saw at *Cassin*. The *Mogul* was then about 60 Years of Age, he had 3 Sons; the eldest was about 25: but his Affections being most for the youngest, he intended to bestow the Crown upon him, and to make the other 2 to rest contented with the Government of certain Provinces. The beginning of his Reign had savour'd not a little of Cruelty, and even afterwards he could not but betray his Inclinations, by putting such as were guilty of High Treason to unheard of Torments. For the rest, he was of a pleasant humour enough, taking much delight in Musick, and to see the Women Dancers to dance naked before him; of these I heard the *English* relate a pleasant Story, *to wit*, That a certain Person of Note belonging to the Court, in whose Conversation the *Mogul* took particular delight, being missing one Day at Court, the *Mogul* enquired after the reason of his absence, and being answered that he had taken Physick, the *Mogul* ordered his Women Dancers to go to his House, to strip themselves naked, and to ease their Natures before him; the Gentleman hearing of their coming, and having got some scent of what their Errant was, ask'd them immediately after their coming into the Room, what the King had commanded them to do, and being answer'd that they were to ease themselves there, he told them, that they might put the King's Command in Execution as soon as they pleased, but asking them at the same time whether they had any further Commands from the King, and they having answered no, he bid them have a special care not to transgress the Orders laid upon them, for, says he, If any of you piss but one drop, I will have you all soundly whipp'd; which put them into such a fright, that not daring to run the hazard of the Lash, they return'd to the *Mogul*, who understanding by what invention the Gentleman had diverted them from what they were ordered to do, laugh'd very heartily at his ingenuity.

A pleasant Story.

Divertisements.

His daily Divertisements were to see the Lions, Elephants, Tygers, Leopards, and other wild Beasts to fight one another; he also often delighted in seeing Men engage with those Savage Creatures, but never without their own good liking, there being not wanting those who in hopes of obtaining thereby the *Mogul*'s Favour, would hazard their Lives upon that score. I remember, the *Mogul* at his Son's Birth-day, being present at the Combat betwixt a Lion and a Tyger, which were both very much hurt, he ordered Proclamation to be made upon the spot, that whoever had so much Courage as to fight with any one of these Beasts, with Sword and Buckler only, should be, if he vanquished honoured with the Title of *Chan*; it was not long before three *Indostans* appear'd to accept the Challenge, and having laid by their Coats of Mail, one engaged with a furious Lion, and for some time made his Party good very couragiously, but the Beast pressing very hard upon his left Hand, in which he held his Buckler, the weight thereof at last forced the Buckler out of his Hand, so that seeing himself in unavoidable danger of his Life, he thrust a Dagger which he wore on his Girdle, into the Lion's Jaws, who thereupon let go his hold, and was marching off, but the *Indosthan* followed him, and with a blow cross his Head laid him dead upon the ground; great were the Acclamations of the People upon this occasion, but the *Mogul* was so far from being pleased with the Action, that on the contrary being highly incensed at his having made use of any other Arms except his Sword and Buckler, he command the Fellows Belly to be rip'd up, and the Body to be expos'd to the view of the whole City. The second *Indosthan*, made up with no less Courage than the former to a Tyger brought in for that purpose, but this fierce Creature was so dextrous and nimble, as to seize him by the Throat, and so kill'd him. The third *Indostan*, tho' a Person of a very mean Stature, and worse Aspect, nothing

A Combat betwixt a Man and a Lion.

A Combat betwixt a Man and a Tyger.

1638. nothing dismay'd at the Misfortune of his Comerade, engag'd the same Tyger with unspeakable Bravery, who was for playing the same Game with this as he had done with the other; but as he was going to fasten on the *Indostan*'s Throat, he cut off both his Fore-paws at one blow, and soon after dispatch'd him; at which the *Mogul* was so well pleased, that he presented this Man (whose Name was *Geily*) with a Garment of *Brocado* from his own Hands, and bestow'd the Dignity of a *Chan* upon him.

Courage rewarded.

I should not have left *Agra* so soon, had not an unhappy Accident made me alter my first Resolution. For, as I was talking one day in the Streets with my *Persian* Servant, who left me at *Suratte*, an *Indostan* of a very goodly Aspect came up to me, asking me what Business I had in those Parts; unto whom I having given in answer, that I was a Native of *Germany*, whom Curiosity had brought thither: He told me, that unless he were much mistaken, I was the Person that had kill'd his Kinsman, in the Engagement at *Ispahan* betwixt the *Indostans* and *Germans*. As I was convinced in my Conscience that he spoke Truth, so I was not a little amazed at it; but 2 *English* Merchants that were along with him, protesting that I was lately come from *England* by Sea to *Suratte*, made me persist positively in it, that I had never set a foot in *Persia*: This would perhaps however have stood me but in little stead, had not the same Servant declared and sworn by his *Mahomet* and *Hossein*, that he knew me, and that I said nothing but Truth; so with much ado we got rid of the *Indostan* at that time; but as his sight was not very agreeable to me, so I made it my business to take the next opportunity of leaving *Agra*, which I did accordingly, taking the conveniency of a *Caravan*, that was going thence to *Lahor*, 60 Lgs deeper into the Country; all which way we travelled thro' one continued Alley of Palm, Date, Coco, and other Fruit-trees, which with the Company of 2 *Dutch* Merchants, and some *Benjans*, made this Journey very pleasant, tho' these last were not very well pleased with the Diversion I took to shoot at the Apes, Parrots, and some other Creatures, and among the rest at a Serpent, a thing much esteem'd by them.

The Author in great danger.

Leaves *Agra*.

The City of *Lahor* is seated upon the River *Ravy*, one of those that with 4 more joins its Waters with the *Indus*: It lies at 32 dgs 30 min. having many fair Gardens on the River-side, and the Country about it, being fertile in Fruits of all sorts, but especially in Wheat and Rice. The Royal Palace, which lies in the middle of the City, is surrounded by a very high Wall, besides that it contains many other Palaces belonging to such Persons of Note, as generally attend the *Mogul* where-ever he goes, and a great number of *Mosques* and Publick Baths. I had the Curiosity to go into one of those Baths, which I found to be exactly after the *Persian* Fashion, with several Partitions made half round within, narrow at the entrance and wide at the bottom, each having its peculiar Door, and 2 Cisterns for the receiving the Water, which is let in by brazen Cocks, more or less according as those who bath are pleased to order it. After bathing I was desired to lay down upon a Stone 7 or 8 Foot long, and 4 broad, where being soundly rubb'd first upon my Belly, and afterwards all along the Back-bone down towards the Sides. The Fellow would have rubb'd the Soles of my Feet also with some Sand, which I not being able to endure, he ask'd me immediately whether I was a Christian? And I having told him, that I was, he gave me the Hair-cloth to rub them my self. In this Journey to *Lahor* I rid upon 4 several Creatures, to wit, a Camel, a Mule, an Elephant, and an Ox, who trotted so fiercely, that he carried me 6 or 7 Lgs within 4 hours.

Description of *Lahor*.

The *Mahometan* Baths.

Having received Letters from *Agra*, that the *English* Director was preparing for his Embarkment, in order to his return from *Suratte* to *England*, I took the conveniency of a small *Caravan* of *Indian* Merchants that were going to *Amadabath*, where I was no sooner arrived, but understood that he expected only the coming of the *Caravans* of *Agra* and *Amadabat*, in order to the prosecution of his Voyage to *England*, desiring me to make what haste I could to *Suratte*, being very desirous I should be present at the Resignation of his Presidentship, which was to be perform'd in a few Days.

Whilst I was at *Amadabat*, I saw the *Mahometans* celebrate a Feast: All the Windows of the Houses round the great Market-place were fill'd with Lamps, before which stood Glass-Vessels full of Water of all sorts of Colours, which afforded a very delightful Prospect at a distance; and the Night was concluded with Feasting and fine Fire-works, composed of Squibs, Crackers, and divers other ingenious Inventions of that kind; among the rest they had fasten'd certain Lamps to Wheels, which being turn'd round with great violence, made no unpleasing shew.

A *Mahometan* Feast.

1638.

The *Caravan* of *Agra* was no sooner arrived at *Amadabat*, but I prepared to go along with them to *Suratte*. The first Day we made 6 Lgs to *Mamadabath*; but the next Day, the *English* Director, and his Deputy (being desirous to be at *Suratte*, at the Resignation of the chief Director there,) my self and another left the *Caravan*, taking 24 Soldiers along with us for our Guards.

We cross'd the River *Wasset*, with our Banners before us, according to the *Indian* Custom, where Persons of any Note always have Banners not unlike our Cornets carried before them. At night we took up our Quarters in the Fort of *Saselpour*, where meeting with the *English* Factor of *Brodra*, we staid in that Place all the next Day, but continued our Journey in the Evening, and were lodged the next following Night in a Garden, whence we proceeded on our Journey the next Day to a noted Cistern for fresh Water, call'd *Sambord*; which being at that time guarded by a Troop of Country People, who pretended to keep us from fetching the Water we had occasion for, thence a Dispute arose betwixt them and some of our Soldiers, which at last came to Blows; for whilst our People were drawing up their Water, the Country-Fellows wounded five of ours with their Arrows, which so exasperated the rest, that they kill'd three of the Country People.

The use of Banners in the *Indies*.

An Encounter with the Country People.

But before next Day appear'd, met with another Encounter, which was likely to have proved fatal to some of us; for the *Dutch Caravan*, (which we had overtaken by the way) going away about Midnight, we follow'd soon after, but were not gone far before we perceived one of those Trumpeters (who in the *Indies* commonly march before the *Caravans*, or before Troops of Horse) to sound his Instrument of Brass (which is much longer than our Trumpets) in an adjacent Wood: As we had been already forewarned against the *Rasboutes*, who had committed several Robberies, and kill'd divers Persons hereabouts the day before; so we did not in the least question, that this sounding was the Signal of our coming to be given to those Rogues; neither was it long before we found our guess verified, by their coming out of the Wood with Pikes, Bucklers, Bows and Arrows; but the best was, that they had no Fire-Arms. We had scarce time enough to put our selves in a posture of defence; but the *English* Merchant and I getting on Horse-back, we bestow'd the 4 Firelocks we had among those of our Company that were in a Coach, reserving 3 Pair of Pistols for our use on Horse-back: Our agreement was not to fire, till we were sure to do good Execution. And the *Rasboutes* gave us a fair Opportunity to employ our Fire-Arms to the best advantage; for as they were coming towards us in a very close Body, we discharged our Firelocks, which were charged with square pieces of Iron among them, which made three drop at once; but trusting in their number, they push'd forward, kill'd 2 of our Soldiers, shot an Arrow into the Pommel of my Saddle, and another into the Turbant of the *English* Merchant; nay, they came so near us, that I received 2 Thrusts with their half Pikes upon my Buff-collar, which I was beholding to at that time for my Life; nay 2 of these *Rasboutes* got hold of my Horses Bridle, and were just a going to carry me off, when the *English* Merchant came in very seasonably to my Relief, so that I made shift to kill one of them by a Pistol-shot, and to get clear of the other. By this time 10 Soldiers belonging to the *Dutch* beforementioned *Caravan*, came in to our Assistance; and the *Caravan* it self being not much behind, the *Rasboutes* did not think it convenient to stay much longer, but made the best of their way to the Wood, leaving 6 of their Comrades kill'd upon the spot, besides several others sorely wounded, whom they carried off. We had only 2 Foot-Soldiers kill'd, and about 8 wounded Persons: We expected another Visit from them, but we heard no farther of them, and so arrived about Noon at *Broitschia*, and made 8 Lgs more the same Day to the Village of *Onclasser*, and the next Day, being the 26th of *December*, to *Suratte*.

With the *Rasboutes*.

Next Day after my Arrival at *Suratte*, I was present at the Resignation of Mr. *Merwold*, the then Chief Director

1638. rector of the *English East-India* Company at *Surat* of his Office to Mr *Fremling*, who had been his Deputy before; there were present at it 5 Consuls, or Head-Factors of that Nation in the *Indies*, 3 Ministers, 2 Physicians, and 25 Merchants.

The Chief Director of the English resigns his Charge.

After he had given them thanks for their Fidelity to the Company; and for the Affection and Respect they had shew'd to his Person, he beg'd of them to continue in the same both to the Company and Mr. *Fremling*; and thus, with a short Complement, delivered the Commission to the said Mr. *Fremling*.

After which he gave us a very magnificent Entertainment, there being not any thing wanting there the Season afforded, besides that we had a good share both of the *English* and the *Indian* Musick, as well as the Women-dancers.

Dec. 28. The new *Sultham*, or Governor of *Suratta*, made his Publick Entry in that Place, having carried before him a certain number of *Palanquins* (or Chairs) follow'd by 120 Foot-Soldiers, 20 of which carried Banners after the *Indian* Fashion: His name was *Myrsa Mahomet*, and was mounted on a most excellent *Persian* Horse, almost all the Persons of Note of the Province, and among the rest, the chief of the *English* Merchants (who carried me along with them) conducted him to his Palace.

Immediately after the Establishment of the New *English* chief Director, the Factors and Merchants return'd to their respective Places of Residence, and the 2 *English* Ships then in the Harbour there, call'd the *Mary* and the *Swan*, were ordered to dispose every thing for their Voyage, the latter being to sail 10 Days before the other, and to expect our coming at the *Cape of good Hope*. But before we take our last Farewel of *Suratta*, it will be requisite we should discharge our selves of our Promise of giving you some account of the Province of *Guzuratta* in which it lies.

How *Guzuratta* was conquer'd.

The occasion of the Kingdoms of *Guzuratta* being joined with the *Mogul*'s Empire, happened thus: *Ebamet-Chan* a Favorite of *Sulthan Mahomet*, King of *Guzuratta*, who died 1545. and constituted Guardian to the Young King his Son, who was then not above 11 years of Age, finding himself uneasie in this Station, by reason of the Jealousie of the Chief Lords of the Kingdom against him, craved the Assistance of *Achobar*, the then *Great Mogul* of *Indosthan*, to nominate him in this Dignity, offering the City of *Amadabath* to him as a Pledge of his Fidelity. The *Mogul* willing to accept of so fair an Opportunity, not only possess'd himself of *Amadabath*, but also of the whole Kingdom, carrying both the young King and his Guardian away into Captivity: The King being afterwards come to Age of Maturity, found means to make his escape, and to repossess some part of his Dominions; but the *Mogul* was so close upon his Heels, that in less than a Twelve-month's time he again chased him thence; and the King of *Guzeratta* finding himself a second time fall'n into his Enemies Hands, from whence he expected no good Treatment, he cut his own Throat.

The Viceroy of Guzaratta.

Ever since that time this Province is governed by a *Sulthan* or Viceroy, who has an absolute Authority here, in managing both the publick Affairs of the Government, as well as all the Revenues thereunto belonging, which is very great, and formerly amounted to 18 Millions of Gold, besides the Customs of *Broitschia* and *Brodra*, which produced 800000 Crowns *per An.* the rest arising, for the most part, out of the third part of the arable Lands, which belong to the King, the Revenues of which are assign'd to the Governor for the maintenance of a certain Body of Horse and Foot, to bridle the Insolencies of certain petty Princes inhabiting the Mountains, and to clear the High-ways from certain Tories or Robbers, which issue forth out of the Woods in Troops of 300 or 400, and make the Roads very unsafe. But as the number of Troops that are kept thus, falls very short from what they ought to be, this with the absolute disposal of Justice, which the Governor is intrusted with, gives him such an opportunity of amassing such prodigious Wealth as is almost inconceivable. His ordinary Residence is at *Amadabath*, and his Court and Equipages so splendid when he appears in Publick, that scarce any Court in *Christendom* is to be compared with it; for as the continuance of these Governors are merely depending on the *Mogul*'s Pleasure, so they are sure to make the best use that possibly they can of their time, to enrich themselves at any rate. Hence it is, that he who complains first, and knows how to back it with Money, shall seldom go off a Loser; neither is any Crime so great, but what may be bought off with Money. 1638.

The Administration of Justice.

The *Couteval* or Governor's Deputy has however the Privilege of giving Judgment in Affairs of less moment, and 'tis he, who has the Surveyorship over the Brothel-Houses, and receives their Taxes; for as they look upon Murther and Adultery, (especially if committed with a Woman of Quality) as the greatest Crimes, so that they not only allow, but also protect Prostitutes; and that with so much Circumspection, that it is both without danger or blame that People frequent these Houses.

Having given you before a short account of those Cities we pass'd through in our Journey to and from *Agra*, we will here also say something of the rest of the Cities belonging to this Province.

Goga.

Goga is an open Place 30 Lgs from *Cumbaya*, situate upon the Gulph, where it is so narrow, that it rather resembles a River than an Inland Sea. It is chiefly inhabited by *Benjans*, the *Portugeuse* Ships keep here their *Rendezvous*, in order to convey their Ships to *Goa*.

Pattepatane, *Mangerol*.

Pattepatane and *Mangerol*, 2 large Towns, 9 Lgs from *Goga*, are inhabited by Calicoe-weavers. The City of *Diu* lies upon the Southern Frontiers of the Kingdom; the *Portugueses* have 3 considerable Forts here.

Bisantagan.

The City of *Bisantagan* contains above 20000 Houses, and is consequently one of the bigstest of the whole Province. The Fertility of the circumjacent Country in Rice, Wheat, Cotton, and Pasture; and its Situation, which is in the Center of the Province, has raised it of late to what it is, it being formerly but an inconsiderable Village.

Pettan.

The City of *Pettan* was formerly one of the most considerable of those Parts, having 6 Lgs in circumference, and encompassed with a good Wall of Free-stone, which is now decay'd in many places, since the Trade of this place has been destroyed by certain kind of *Tories*, which so infest the Roads thereabouts, that the Merchants durst not venture their Persons and Commodities thither. The Inhabitants live now for the most part upon weaving of silk Suffs and Calico's; but these last are very course. The Governor has his Residence in a very goodly Castle, and in the very Center of the City is one of the most sumptuous *Mosques* of all the East, the Roof being sustained by 1050 Pillars, most of Marble.

Cheytepour.

Cheytepour is a small City garrison'd only by 150 Men, for the security of the *Caravans*, 6 Lgs from *Pettan*, and 22 from *Amadabath*, situate upon the Banks of a small River. The Inhabitants are *Benjans*, who live upon weaving of Calico's, and making of Cotton-yarn.

Messana.

Messana is an open place, but maintains 200 Horse-Soldiers in an old ruin'd Castle, for the safe passage of the *Caravans*; some Calico's are made here, the Country being very fertil in Cotton.

Nassari, *Gaudii*, and *Balsara*.

The 3 small Cities of *Nassari*, *Gaudii*, and *Balsara*, are under the Jurisdiction of *Suratte*, the 1st lying 6 Lgs, the 2d 9 Lgs, and 3d 14 Lgs thence; and all three not above 2 Lgs distant from the Sea. Their Trade is in course Cottons, which are made in great quantities here; the Country thereabouts also affords great Plenty of Timber for the building both of Houses and Ships.

The Inhabitants of Guzaratta.

The Off-spring of the antient Inhabitants of this Province are still Pagans, and are call'd *Hindoy* or *Indeu*. The *Mahometan* Religion was first introduced here by *Tamerlan*, and is since increased by the great concourse of Strangers of the same Religion, this Country being inhabited by *Persians*, *Arabians*, *Armenians*, and several other Nations, but you seldom meet with any *Chineses* or *Japoneses* here. As most of the *Mahometans* here profess the same Religion with the *Persians*, so their Language is as current here as the *Indosthan*: These last indeed adhere to the Opinion of *Hembili* and *Maleki*; whereas the *Persians* admit of no other Expositions of the *Alchoran*, but those of *Haly* and *Tzaterssaduck*; but they both with the same Zeal reject that of the *Turkish* Interpreter *Hanife*.

They are generally of an Olive or dusty Complexion, tho' those to the North are not quite so dark as those living more to the South. The Men are generally strong and well made, with large Faces and black Eyes; they shave their Heads and Beards, excepting only the Mustacho's, like the *Persians*; and the *Mahometans* are clad after the same way, except that they plcat their Turbants in a different Fashion; and the

1638. *Indoſthans* wear the opening of their Garments under the left Arm, whereas the *Perſians* have it under the right; they tie their Girdles before with the ends hanging down, and the laſt wind it ſeveral times round the waſte, and twiſt the ends within it; To thoſe they faſten their Daggers, which are about a foot long, broad towards the handle, but very ſharp and narrow to the Point. Some Swords there are wore here, but the Soldiers generally make uſe of Cymitars. As the *Indian* Horſes are not very valuable, and yet very ſcarce, ſo Oxen are frequently uſed inſtead of them; which are as ſwift as Horſes; I have ſeen whole ſmall bodies of theſe Troopers. Their Women are ſhort, but well ſhap'd; they wear their Hair hanging down over their Shoulders, and on their Heads a kind of a Cap, or Crepine of Lawn, interwoven with Gold, the ends of which come down quite to their Knees. The richer ſort are very ſumptuous in their Apparel, have Pendants of Pearls and Diamonds, or other precious Stones in their Ears, and very fine Necklaces of Pearls, which make the fairer ſhow upon their Necks, which are of a brown complexion: they ſometimes alſo wear Rings in their Noſtrils. Breeches are here common to both Sexes, and are generally made of *Taffata* or Calicoe, and that of ſuch a length, that they would cover all the Body, were it not for certain Strings which are ſo faſtned to them, that they can draw them together in Pleats, like Mens Boots, though above the Ham they ly cloſe to the Body without any folds. Over theſe they wear their Smocks, which, however, reach ſcarce to the Navil, and over theſe again, a Petticoat of *Taffata* or Calicoe, but ſo thin, that you may ſee through it. Their Shooes are flat ſoal'd, and narrow towards the Toe, and commonly of red *Spaniſh* Leather. Their Breaſts and Arms as far as the Elbow are bare, but covered with Bracelets; Women that value their Reputation here, never appear with their Faces uncovered; and thoſe of Quality, ſcarce ever go abroad. The Women of the *Benjans* are clad after a quite different Faſhion, for they, as they don't ſhave their Heads, ſo they don't wear their Hair very long; neither do they cover their Faces, but wear Pendants and Necklaces, eſpecially in their Ears. Black Teeth are a ſingular Ornament among them; which is the reaſon they call us *Europians*, in deriſion *Bondra*, i.e. *Apes*. They alſo wear no Breeches, but inſtead of them a piece of Silk reaching down to their Hams, over which they put their Smocks, and over them their Upper Garments, which are faſtned round the waſte with a kind of a Girdle. Some of them uſe ſmall waſte-Coats, the Sleevees of which come no further than to the Elbow, being naked from the Breaſt down to the Navil. During the Summer Seaſon their Shooes are made of wood only, faſtned with ſtraps to their Feet, but in the Winter they have Shooes of Velvet or Brocado, or gilt Leather, the Quarters of the which are very low, that they may put them off and on, with more conveniency, when they are going in or coming out of a Room, the Floor of which is covered with Tapeſtry. Children of both Sexes are kept quite naked, till they are paſs'd 5 years of Age. For the reſt, the *Benjans* live with a great deal of Circumſpection among the *Mahometans*, who treat them contemptibly, and much after the ſame manner as the *Jews* are look'd upon in thoſe Places where they are ſuffered to live. Notwithſtanding which they are more ingenious and crafty than the *Mahometans*, which is the reaſon, both the *Engliſh* and *Dutch* employ them before others as their Brookers, it being next to an impoſſibility that any Strangers ſhould be able to find out all their Impoſtures, without the Aſſiſtance of ſome of their own Gang. Their Children, eſpecially their Daughters, they marry at 7, 8, 9, or 10 Years of Age, it being very rare for them to ſtay till the 12 th. for as the *Indians* arrive ſooner to Maturity than other Nations, they are of Opinion, that if a Maid ſtays any time beyond that Age, ſhe muſt be ſubject to ſome Infirmity.

The Day for the Conſummation of the Marriage being come, the Parents of both Parties ſit round a good Fire in a ſpacious Room, the Bride and Bridegroom, being to take three turns about them, whilſt the *Braman* gives them his Benediction; If any *Benjan* Bridegroom happens to die before he has taken his 3 turns thus, the Bride may Challenge the Privilege of marrying another; the Widows of the *Benjans* being not allowed a ſecond Marriage upon any Account, tho' their Husbands ſhould chance to die before the Conſummation of the Marriage; ſo that thoſe who cannot diſpence with a ſingle Life, aſſoicate themſelves to the Women Dancers; The *Benjan* Women are not obliged to burn themſelves with their dead Husbands (as the Wives of the *Bramans* and *Rasbouts* are) unleſs they will do it voluntarily. The Men are permitted not only to marry a ſecond or third time, but may have 2 or 3 Wives at a time, provided the firſt or ſecond prove Barran; but the firſt Challenges and retains the Precedency. The Sons only inherit their Fathers Eſtates, but are to maintain the Mother, and to provide Husbands for the Siſters. 1638.

As they uſe neither Baptiſm nor Circumſion, they muſt be numbered among the *Pagans*, and though they acknowledge One Supream Being, the Creator and Preſerver of all things, they pay Worſhip to the Devil, for this reaſon, becauſe that God having conſtituted him to govern the World, he ought to be appeaſed by Offerings; The Figure under which they adore him is to be ſeen in all their *Pagods* or Temples, ſome of Gold and Silver, ſome of Ivory, Ebony, and Marble, and others of Wood or common Stone. The Head, which has four Horns, bears a triple Crown, in the ſhape of a *Tiara* or Miter; with a grim Countenance, and 2 great Teeth coming out of the Mouth, like the Tuſks of a wild Boar, and a great rough Beard all over the Chin. The Arms hang down careleſsly on both ſides, and the Breaſts are extended as low as the Navil. Under which, betwixt his Thighs you ſee another Head with 2 Horns, more deformed than the firſt, thruſting out of the Mouth a very ugly large Tongue. The Feet are like the Paws of ravenous Creatures, and behind a Cows-tail. This Statue is always fix'd upon a Stone Table, which is the Altar, where the Offerings are made to the Idol. On the right ſide of it ſtands a Ciſtern, in which thoſe that come to Sacrifice, purifie themſelves before-hand; and on the left hand a Cheſt, into which they put their Offerings, which are always made in Money. There is another Veſſel not far from the Ciſtern, out of which the *Braman* (or Prieſt) takes a certain Yellow mixture made of Water and Sandal-wood, and therewith marks the fore-heads of ſuch as have performed their Devotions. The *Bramans* ordinary Place is at the Foot of the Altar, but riſes from thence frequently to ſay his Prayers, and before he goes away, he is ſure to purifie his Hands by rubbing them over the Flame of the Lamps, which are placed before and about the Altar, and furniſh their *Pagods* with light, and conſequently are kept continually burning, being the chieſeſt, if not the only Ornaments of theſe Temples, which look more like Caves and Holes of Darkneſs than Places of Devotion; there being nothing to be ſeen on the Walls of them, but the Figures of Beaſts and Devils; Notwithſtanding which theſe poor Wretches pay their Devotions with more Reſpect and Zeal, than is obſerved in moſt Chriſtian Churches. They are like the *Mahometans*, much addicted to corporal Purifications, which they ſeldom fail to do every Morning before Sun-riſing.

The *Bramans* deduce their Original immediately from their God *Brama*, and ſay, that they are the Products of his Head, whereas the reſt came out of his Thighs, Feet and other more ignoble parts.

M. *Abraham Rogers*, who lived Ten years in the *Dutch* Service on the Coaſt of *Coromandel*, ſays, that the *Bramans* acknowledge for the Supream God, one *Wiſtul*, or *Erwara*, and that out of his Navel ſprung forth a Flower, called *Tamara*, which produced *Brama*, the firſt of all Men; who had Power given him, not only to create the World, but alſo to ſettle what Order and Government he thought beſt; they further ſay, That this *Brama* being God's Vicegerent, has divided the Adminiſtration of the Univerſe among 8 Lieutenants, the Chief of whom they ſtile *Derwendre*, and ſay, he commands all the reſt of the Governours who govern 8 peculiar Diſtinct Worlds; ſuch like ours are, (becauſe they rekon 7 more beſides ours) all which they are of Opinion ſwim upon the ſurface of the Water like ſo many Eggs. They ſay further that there have been divers Worlds before that which is now in being, and others will be after it, though they tell us, that the World we live in is to continue a Million of Ages longer; ſince that in the Year 1639. there were no more than 4739 Years of the fourth Age of the World elapſed; and that the firſt Age had laſted 17290 Ages; That in the firſt Age of the World, all Men were juſt and good, to ſuch a Degree, that the Devil who was then created, had

1638. had no Power to injure them; that in the next following Age, the fourth part of Mankind became depraved, that in the third there was an equal mixture of good and bad, and that in this last Age of the World, the number of the good amount only to one fourth part of the whole. But let this suffice concerning the Original of the Theology of these *Pagans*.

The Authority of the *Bramans*.

We will only add here, That the *Bramans* have by their Austerity of Life and Abstinence, gain'd a great ascendent over the *Pagans*, who look upon their Expositions of the Mysteries of their Religion, as so many Oracles, for which reason also they generally entrust them with their Education, and over-sight over their Children. They are distinguish'd from the other *Benjans*, by a peculiar kind of Linen Coiffure, besides, that they never cut their Hair, and wear three Strings of Pack-thread next to their Skins, coming from the Shoulders cross their Breasts to the Waste; and as this is the Badge of their Order so they never lay it aside. They believe the Immortality of the Soul, and its Transmigration from the Bodies of Men into those of Beasts, before they can be capable of the Enjoyment of the Blessings of the other World, for which reason it is, that the *Benjans* will not allow the killing of any Living Creatures, even to the Insects; and they are so careful in this Point, that they will not keep any Fire or lighted Candles in the Night time, for fear the Flies should burn themselves, and when they do at other times, they make it in Pits under ground; their Charitable inclination to all living Creatures is so great, that they redeem such Birds as are catch'd by the *Mahometans*, in order to be kill'd; Nay, they have certain Hospitals appointed for the Sick and Wounded Birds.

A peculiar Office of the *Bramans* in *Malabar*.

Among the *Malabars*, these *Bramans* are in such Veneration, that they have the first Fruits of all the Birds, and by the richer sort, are invited to perform this task with very considerable Presents; nay, there is scarce any Body of note there, when he is to be absent from home for any time, but recommends his Family, but especially his Wife, to the care of a *Braman* to supply his place.

The four chief Sects of the *Benjans*.

The *Benjans* are accounted to have 83 Principal Sects among them, not to speak here of the lesser ones, which are not to be numbered; But they have 4 general Sects, in which all the rest are included; *viz.* those of *Ceuramath*, *Samarah*, *Bisnow*, and *Godghy*. Those of the first Sect, are very peculiar in the Preservation of Living Creatures, for which reason their *Bramans* have their Mouths covered with a piece of Callico, for fear any Insect should get into, and perish in their Mouths; they for the same reason sweep their Rooms continually, and will not sit down before they have look'd, for fear of sitting upon them; neither do they keep any Fire or Candles in their Houses. They are distinguish'd from the others, by a white Staff they carry in their Hands, and walk always bare-headed, and bare-footed; Their cloathing is only a piece of Callico, coming down from the Navil to the Knees, the upper part of their Bodies being covered only with a piece of Woollen-cloath. They don't believe an Infinite Being, as the rest do, but Attribute the Events of all things to chance; and know of no other good Deeds but Fasting and giving of Alms; In consequence of this Opinion, they acknowledge in the Sun, Moon, Stars, the Earth, in Creatures, nay in Trees and Metals, and all visible things, the inherent causes of their Productions; they allow 2 Suns, and as many Moons, which they say relieve one another alternatively every-Day; They know nothing of Heaven or any Mansion of the blessed, though at the same time they acknowledge the Immortality of the Soul, and its Transmigration, which they say does, after the separation from the first Body, enter into another, either of Man or Beast; according to the behaviour of the deceased in this World; they say, it always makes choice of a Female, that it may return into the World, though in another Body.

The. Cloathing of the *Ceuramath Bramans*.

Their Belief.

Temples.

Their Temples are all four Square, with flat roofs, open to the East-side, under which are the Chappels of their *Pagodes* or Idols, rais'd 10 foot from the ground in the form of a Pyramid, with Stairs leading up to them, on which you see certain Figures of Wood, Stone, or Papers, representing some Persons among them, who have rendred themselves famous by their extraordinary good Fortune. The chiefest time of their Devotion is in *August*, when they mortifie themselves, especially by abstinence, to such a degree, as would pass for fabulous, were it not, that even their Profess'd Enemies in the *Indies*, had unanimously given them that Character, that some have been known for the space of 15 or 21 Days, nay, some for a Month or 6 Weeks, not to take any other Nourishment, but some Water with the shavings of a certain bitter Wood. In this Month they have their general Assemblies in their Temples, whither they resort to hear the *Braman*, (who sits in the Center of them,) read certain Legends of the Lives of their Saints. Immediately after they come into the Temple, they put their Offerings of Money into a Copper bason, placed there for that purpose; in return of which, the *Braman* bestows upon them, the yellow Mark, either on their Fore-heads or Cloaths. Whilst they are hearkening to the *Braman*, they are entertain'd with Musick; If any aged Person dies, they burn the dead Carcass; but Children which die before they come to 3 Years of Age, are buried. Their Wives are not obliged to burn themselves with their deceased Husbands, but must vow a perpetual Widowhood; and there is none belonging to this Sect, but what is capable of being received into Priesthood; to allow which he has no more to do, than to change his Habit, vow Chastity, and follow the same austerity of Life, prescribed to their Order; Women are even not excluded from this Function, but they must be above 20 Years of Age, whereas Men may come in at 7, 8, or 9 Years of Age; Nay, if either of the married Couple Embraces Priesthood, the other is engaged to celebacy for Life. Some of them make a Vow of Chastity in Marriage, but this is not so well kept as made. This Sect is an Abomination to the other *Benjans*, to such a degree, that they will not eat, drink, or converse with them; nay, if they happen to touch them, they are obliged to a very strict penance.

The Sect of *Samarath*.

The second Sect among the *Benjans*, which consists for the most part, in Lock-Smiths, Farriers, Carpenters, Tailors, and most other sorts of handy Craftsmen; as also some Soldiers, Officers and Clarks; have scarce any thing common with the first, except that they allow not the killing or eating of any living Creature; believing for the rest, that the Universe owes its Origin to a first Cause, which also preserves it, by its certain and unchangeable Rules.

Their Belief of God.

They give the name of *Permisseer*, to this Supream ruling, and that it governs the World, by three Deputies; The first they call *Brama*, and Attribute to him the management of Souls, according to the Direction of *Permisseer*, in order to their Transmigration into the Body of Men or Beasts; The second named *Buffima*, is appointed to instruct the World in their Duty to God; and manages the Wheat, Herbs and Pulse in the Fields, and Gardens; The third call'd *Mais*, is the Chief manager of the dead, being *Permisseer*'s Secretary, who, after having taken an account of the good and bad Actions of the deceased, makes a report thereof to his Master, who according to every ones desert, sends the Soul into the Bodies of certain Beasts, where they must do more or less pennance, before they can be purified of their Sins. In this kind they look upon the Cow as one of the best, having something divine in it above all the rest.

Why these Women burn themselves with their dead Husbands.

They burn the dead Bodies of their Friends, except those of their Children under 3 Years of Age, whom they bury near some River or Brook. Not any of the *Indian* Women accompany their Husbands, with so much chearfulness in their last Journey, as those of the Sect of *Samarath*; for as they are perswaded, that such as die [illegible] their Husbands, shall live with them in the other World 7 times as long, and enjoy with him 7 times more pleasure there, they are so fond of so plentiful a Blessing, of which they commonly have so slender a share in this World, that they are ready to Sacrifice their Lives, in order to attain it.

The Sect of *Bisnow*.

The Sect of *Bisnow*, agrees with the 2 Preceeding in this point, that they don't feed upon any thing that had Life; They are also much addicted to abstinency, and keep their general Assemblies in their Temples in *August*, where they Sing and Dance to a set of Musick consisting of Drums, Pipes, and Copper basons, before their *Pagode*, call'd *Ramran*, singing Hymns in his praise. They represent him with his Wife in Statues adorn'd on their Festivals with Gold Chains, and Collars of Pearl, and precious Stones; with many Lamps,

1638. and lighted wax Candles before them. This God acts without any Deputies.

Their way of living. They feed upon nothing but Herbs, Pulse, Fresh-butter, Milk and Curds; and are great Admirers of a certain pickle made of Ginger, *Mango*'s, Citrons, Garlick and Mustard seed, and their Drink is Water; None but Women or Priests dress their Meats, and use Horse-dung mix'd with Straw, and made up into a kind of Turf, instead of Wood, for fear some small Worms, or other insects should be burnt with it. Most of this Sect are Merchants, Factors or Brokers. they have this Custom peculiar to themselves, that They will not permit their Widows to burn themselves with their deceased Husbands, but oblige them to continue Widows. Not many Years ago, the Younger Brothers among them were obliged to marry their Elder Brother's Widows, to raise up seed to him; but this is abolished now. They commonly wash themselves every Morning in some Cistern or a River, if any be near them, where they wallow and swim in it, whilst the *Braman*, who stands hard by, mutters out certain Words, and imparts to them his Benediction; and at their coming out gives themt the Mark in their Foreheads, or in some other place, for which he is paid with Wheat, Rice or Pulse.

The Sect of *Goeghy*. Those belonging to the Sect of *Goeghy*, are a kind of *Hermits*, neglecting all publick or private Affairs, and dwelling in solitary places, and ruin'd Houses or Woods, shun the Conversation of others. They worship a God, whom they call *Bruin*, and his Servant *Mecis*, but have no peculiar Temples, or any other publick Assemblies, to perform their Devotions in. As they are forbidden to have any Possessions of their own, so they have nothing but a piece of Callicoe to cover their privy parts; they never speak to any Body, or will give an answer to any; or ask for any thing, though they were in the utmost extremity, but will take what is given them; They rub their Bodies all over with Ashes, and especially their Hair, which makes them look very strangely. They are in great Veneration among all the other *Benjans*, except the Sect of *Ceuruvath*, who abhor them. They believe that their God is the Creator of all things, which he preserves by his own infinite Power, by which he is able to reduce all to nothing; That he is not to be described under any shape, being a light, which as it is the cause of the Sun, his brightness is not to be seen by our Eyes. They differ from all the other *Benjans* in this, That they don't believe the transmigration of the Souls, but that they are immediately, after they have left their Bodies, transferred to God, and united with that infinite Light. They are so strict adherers to their Rules, that they admit no *Mahometans* into their Sect, or re-admit such of their own, that have been Prisoners among the *Mahometans* and *Christians*, and have eaten meat, without a most severe penance which is, to eat for 6 Months together Cow-dung mix'd among their Victuals; Nothing can be conceived more Superstitious than the *Benjans* in general, they never stir out, before they have pay'd their Devotions; and if in going out of their Houses with any thing, which they look upon as Ominous, they retain, and undertake nothing further that Day.

Believe no Transmigration of the Souls.

The *Benjans* very Superstitious.

The *Rasboutes* are by some reckoned among the number of the *Benjans*, and allow them a place with those of the Sect of *Samarath*, as believing the Transmigration of the Souls, besides several other things, affirm'd and maintain'd by that Sect; they are further of Opinion, that the Souls of Men go most particularly into Birds; Their Widows are obliged to burn themselves, unless the contrary be provided for in the Marriage contract; for the rest they are not of that reserved Temper, as most of the *Benjans* are, who abhor the effusion of Blood, even of that of the irrational Creatures, whereas these live upon Rapine, eat meat, and addict themselves altogether to War-like Exercises; and as they are a daring Generation, so they are employed by the *Mogul* in his Armies. Some compassion they have for Birds, which they will feed and cherish. They like the other *Benjans*, marry their Children very young, which as I have mentioned before proceeds from hence, that the *Indians* of both Sexes come sooner to perfection, in this respect, than any other Nation in the World; Of which I can't forbear to give you an Instance, which though it may seem incredible, yet as I shall relate the whole upon the Credit of divers very grave Persons, and that the relation is of a late date, I think it ought not to be pass'd by in silence here.

1638. In the Reign of *Schach Choram* the present *Mogul*, a certain *Rasboute*'s Wife, living at *Agra*, was brought to Bed of a Daughter, who's Breasts in 2 Years after encreased to such a bigness, as if she had been a Nurse; The Father and Mother at the perswasion of a certain *Locksmith* their Neighbour, had a hot Iron apply'd to them, to remove the Superfluous humours; but in vain, for at 13 years of Age the Girl had a shew of what Women in our Climate seldom have, before 14 or 15 years of Age, which however vanish'd again the next Year, but her Belly increased in bigness, as if she had been with Child; This swelling abated something the next following Year; and at six years of Age she was brought to Bed of a Boy, who with the Mother was by Special Order from the *Mogul*, brought up at Court.

A very odd Story.

The Parsis. There is besides these another sort of *Pagans* in *Guzuratta*, call'd *Parsis*, descended from the *Persians* of *Fars* and *Chorasan*, who left their Native Countries in the 7th Century, to avoid the persecution of the *Mahometans*; They live for the most part along the Sea-coast, and live upon planting of Tobacco, and making *Arack* or *Aquavitæ* out of *Terry*; tho' many of them addict themselves also to trading. They believe one God, the Creator and Preserver of the Universe, who Acts by his own Power, but has committed the Administration thereof to his 7 Servants; whom they Represent thus.

Their Belief. The First named *Hamasda*, has the Government of Men.

The Second call'd *Bahman*, the surveyorship over all Beasts and living Creatures.

The Third *Ardybesh*, takes care of the Fire.

The Fourth named *Sarywar*, has the charge of Metals.

The Fifth who's name is *Espander*, takes care of the Earth, as

Amvaerdath the Sixth does of the Water.

And the Seventh call'd *Ammadath*, has the presidency over Fruits, Trees, Herbs and Pulse, yet under Gods direction, unto whom they are accountable for their Transactions.

Besides the 7 Head Servants, God, say's they, makes use of 26 others, each of which has his peculiar Function assign'd him.

The business of the First is, to take possession of the Soul immediately after its departure out of the Body, which he carries before 2 Judges, named *Meer Resiu*, and *Saros*, who taking care to have the good and evil Works put into two Scales, pronounce Sentence according to their Weight, and deliver the Soul up, either to the good Angels to be carried into Paradise, or to the evil Spirits to drag them to Hell, where they are to be tormented to the end of the World, which according to their Opinion will be renewed in 1000 Years.

The Fourth call'd *Beram*, has the Administration of all Military Affairs.

The Fifth *Carraseda*, is the Sun.

The Sixth *Anva*, the Water.

The Seventh *Ader*, manages the Fire.

The Eighth *Moho*, is the Moon.

The Ninth *Tiera*, or the Rain.

The Tenth named *Gos*, has the management of Cattle.

And the Eleventh *Farwardy*, the oversight of the Souls in Paradise.

The Twelfth call'd *Aram*, imparts Joy or Sadness to Mankind.

The Thirteenth *Goada*, is the head manager of the Winds.

Dien, The Fourteenth is he who is to instruct, and to infuse into Mankind the Law of God.

The Fifteenth *Apirsanich*, is the giver of Riches.

As *Astaet*, the Sixteenth, has the disposal of Understanding and Memory.

The Seventeenth call'd *Assamant*, is chief President over Commerce.

And *Gamigat*, the Eighteenth, has the Government of the Earth.

The Nineteenth, call'd *Marispan*, is Goodness it self.

And the Twentieth named *Amiera*, the manager of ready Money.

The One and Twentieth call'd *Hoem*, has the Management of Generation in Men, Cattle and Fruits.

The Two and Twentieth and Three and Tweentieth, call'd *Dimma* and *Berse*, are look'd upon as two *Genius*'s appointed to watch all Men; and the three remaining, *viz. Dephader*, *Dephemer*, and *Dephdin* are Gods

1638. Gods constant Attendants, who employs them in what Affairs he pleases, without distinction.

As the *Parsis* are of Opinion, that God has left the Administration of the respective Affairs, in relation to their Station, to their own Disposals, so they adore them in case of Necessity. Their Teachers are in much Veneration among them, some of which also applyed themselves to Traffick and other Employments; they have no publick Places of Devotion, but perform the same in their Houses, sitting without any motion of their Bodies. They have no peculiar days set aside for their Religious Worship, except that they observe particularly the First, and Twentieth Day of the Moon; Each of their Months consisting of 30 days, they add 5 days to the last Month, to make up the year 365 days. Their Teachers are not distinguish'd from the rest by their Habit; which they have common with the *Parsis*, and the other Inhabitants of the Country, being known only by a certain twisted Girdle of Wool or Camels Hair, which comes twice round the waste, and ty'd with two knots behind, this being the certain distinctive Badge of their Religion, and so essential to them, that he who looses it, must neither eat nor drink, nor stir from the place where he is, before he has bought another from the Priest. The Women are also allow'd to wear them after the 12th year of Age. They live very meanly in little dark Houses, poorly furnish'd, and affect much to live near one another; they have the Liberty of choosing two of the most considerable Persons of the Nation for their Judges.

Their way of Living.

Fire is so sacred a thing among them, that they would not extinguish it with Water, though the house were on Fire, looking upon it as the most lively Representative can be made of the Divine light, for which reason it is, that they will rather smother their Fire with Earth, nothing being more irksome to them, than to see their Fire extinguish'd at any time, rekindling without the help of other combustible matter. They early engage their Children in Wedlock, but the Marriage is seldom consummated, till in the 15th, or 16th years of Age, and in the mean while, they are committed to the care of their Respective Parents. As they look upon Adultery and Fornication, as the most hainous Crimes in Nature, so they allow their Widows to marry a second time.

Fire Sacred among them.

They have an odd way of Burials; For, so soon as the Patient is given up, they lay him upon a little Bed of green Turfs, where he gives up the Ghost, which is no sooner over, but 5 or 6 Grave Makers come, take him from the Bank of Turfs, put a shroud about him, and lay him upon an Iron Grate, made like a Bier, and so carry him to their burying place, a Lg without the City, which is divided by a Wall into three parts, *viz.* one for the Men, the second for the Women, and the third for the Children. Over their Graves are laid Iron Bars like Grates, upon which they leave the Corps, till the Birds have eaten all the Flesh, and the Bones drop into the Grave underneath. The Friends accompany the Corps till they come within 500 paces of the Grave, where they stay and make most doleful cries, till the Grave-Makers have laid it upon the Grate. A month or 6 weeks after the burial, they carry the Turfs upon which he dyed, as a thing polluted to the burying Place, and every month entertain the neareſt Friends with a Collation in memory of the deceased; If any one happens to touch a dead Carcass, or the Bones of a dead Beast, they are defiled, and must undergo a penance of 9 days; They reckon those damn'd, whose Bones happen to fall into the Water. They are forbidden to eat of any living Creature, yet in time of War they will make now and then bold with a Sheep, Goat, some tame Fowl or Fish, and eat it; but never kill any Camels, Elephants, Horses or Hares, and, as to the Ox and Cow, they are so far from killing them, that they have a Proverb, that they would rather feed upon the Flesh of their Fathers and Mothers, than upon an Ox or Cow. Though they are not forbidden the use of Wine and Terry, their Law enjoins them a severe penance for Drunkenness, and upon that score, the drinking of *Aqua vitæ*. They are but middle seized, but of a much clearer Complexion than the Natives of the Country, especially their Women, who in this point such exceed the *Mahometan Indosthans*. The Men have great Beards, but somewhat round; some cut their Hair, others wear it without cutting; the first leave only a lock of an inch in Compass on the Crowns of their Heads.

Their Burials

They are a very industrious and over-reaching Generation, and were it not for their avaricious temper, would be much better Natured than most of the *Mahometans* are. 1638.

They have two other sorts of *Pagans* in *Guzuratta*, viz. the *Indous* and *Jentives*; the first are descended from the Province of *Multhan*, and the Parts about *Asmeern*. They are so far from being *Benjans*, that they won't admit them to be present at their Meals, which they eat within a Ring, and they eat of all sorts of Beasts, except the Ox and Cow. They apply themselves for the most part to the Wars. The *Jentives* deduce their Origin out of the Kingdom of *Golconda*, being a sort of poor ignorant Wretches, who pin their whole Faith upon the Sleeves of their *Bramans*. Their Belief is, that originally there was but one God, but as in process of Time Men deserved well of him by their great Actions, he communicated to them some share of his Power: these are their chief Saints whom they worship in their Temples.

The *Indous* and *Jentives*.

There is another sort of People here, call'd *Theers*, being neither *Mahometans* nor *Pagans*, living without any Religion, their daily Employment being the cleansing of Wells, Sinks, Common-Shores, and the fleaing of dead Beasts, whose Flesh they eat. They are also frequently employed as Executioners, which is the reason that they are avoided by all the other *Indians*, for fear of being defiled by them, and are not permitted to live any where but in the Suburbs. As the Religion of the *Mahometan Indosthans*, some few points excepted, approaches very near to that of the *Turks*, and *Persians*, we will not inlarge here upon that Head, but will proceed to give you some account of the manner of the Life of these *Mahometan Indians*, forasmuch as the same is very different both from that of the *Turks* and *Persians*.

The *Theers*.

To begin with their Marriage-Ceremonies, they are performed thus; On the Day appointed for the Wedding, the Bridegroom mounted upon a Horse, whose Main and Crupper are adorn'd with Flowers, and a Net over his Face, rides from his House accompany'd by his Friends and Kindred, with a set of Musick before him, and certain Fellows appointed to cast Squibs and Crackers, to the Brides House, where having given her the Diversion of the Musick, and Fire-works, for half an hour, he dismounts, and sits himself down in the House upon Tapistry laid upon the Floor for that purpose; soon after the Bride with her Friends, and the *Molla* and *Kasi*, or Judge of the Place, come in; the *Molla* having read certain Passages out of the *Alchoran*, and taken the Bridegroom's Oath, that in case of Divorce he will make Provision for his Wife, he gives them his Blessing, and departs; the rest of the Company who stay behind, are entertain'd with *Bettele* and Pills of *Amphion* or *Opium*, which they use instead of Wine, and produce very near the same effect. If the Bride prove an undefiled Virgin, by the Marks upon the Sheets, the Friends assemble for 5 or 6, and sometimes 8 or 10 Days after; but if the Passage be found not so well guarded as it should be, the Bridegroom takes his leave of her, and returns her to her Friends; on the other hand, if the Bridegroom finds her so strait lac'd as that he can't force his way in 3 or 4 Days, and consequently is suspected of want of Ability, one of the neareſt Kinswomen of the Bride, sends him a Distaff with this Message, That not being made for Mans work, she had thought fit to furnish him with some Womens business. The Marriages of the *Indian Mahometans* are not so strict as those of the other *Mahometans*, who can't be divorc'd without both Parties be heard, and Sentence pronounced by a Judge; but here they may be divorced with less Ceremony, upon a bare aversion or distast, with this proviso however, that pursuant to what they promise at the Marriage the Men are obliged to provide for the Sustenance of their Wives, who, as they have no other Dowries here, but the Jewels they bring along with them, they can't reclaim any thing of that nature.

The Marriage-Ceremonies of the *Indian Mahometans*.

Their Divorces.

The Women of any Quality stir but seldom abroad, and that either in a close Coach, or *Indian* Litter, and if they happen to ride on Horse-back, their Faces are covered with a Scarf; none but the meaner sort, or common Prostitutes being to be seen on foot and bare-fac'd in the Streets; the *Indian* Women have generally a very easie deliverance, it being a great rarity to hear of a Woman that is above 2 or 3 hours in Labour.

Their Children they Educate with peculiar care in Schools, where they are taught to read and write; and such as are not able to do it, they send either into

The Education of their Children.

1638. into the Wars, or into the Service of Great Persons, where their Allowance is so slender, that they lead but an unhappy Life. It is generally observed, that the *Indian* Children have a most peculiar respect for their Parents, to such a degree, that they would starve themselves to preserve them. Most Persons of Note are very careful to build themselves Houses in very handsom Gardens, which serve them and their Families for Sepulchres. These Houses have many small Windows on all sides.

Their Burials. They use the following Ceremonies at their Burials, immediately after the Decease of the Patient, the Kindred with great Lamentations come to ask him what made him die? Whether he wanted such or such Conveniencies which they name to him; this done, whilst the Corps is washed and put into a Coffin, the Friends divert their sorrow by making good Cheer. Three or four *Mollas* remain constantly near the Body (which is wrapp'd in a Perfum'd Sheet) to pray for the Soul, till it be carried to the Burial-place; whither the Coffin with the Corps covered with Callicoe, Velvet, or some other precious Stuff, is carried by 10 or 12 Men, the *Mollas* singing all this while their Hymns, and the Kindred accompanying it to the Grave; here the Body is laid down upon the right Side, with the Face to the W. the Feet to the S. and Head to the N. the Coffin being covered with a Board for fear the Earth should defile the Corps, it is let down smoothly into the Grave, whilst the Kindred mutter out certain Prayers, and so return to the House of the deceased, where the same *Mollas* continue their Prayers for several Days after; during which time not a spark of Fire must be seen in the House.

They stile themselves *Mussulmans*, or *True Believers*, looking upon all other Religions as Hereticks and damnable; but as they have a singular aversion to Images, so they shew more hatred to the *Roman Catholicks* than *Protestants*.

Their Stature and Complexion. They are generally of a goodly Stature, without any natural defects; they have all lank black Hair, tho' those they call *Mogollies*, have a clearer Complexion than the rest. They don't admire Flaxen Hair, but hate Red Hair'd People, out of an Opinion they have that they are Leprous, a Distemper very common here, one reason of which is, that the Pox, being rarely cured here, as it ought to be, by degrees infects the Blood afresh, and turns to a Leprosie. The *Mollas* let their Beards grow, but all the rest shave their Heads as well as their Beards, leaving only a Lock on the Crown, by which they say, *Mahomet* is to pull them up to Heaven.

Their Cloathes. There is no distinction in the Dress of Men or Women; they make their Garments of Callicoe, Silk, or Brocade, according to the ability of those that wear them; they lie close to their Bodies above the Waste like ours, but grow wider and wider downwards to the Small of the Leg; whereabouts their Breeches, which reach to their Shooes, are gathered by a String into many Pleats. Their Shooes are of *Spanish Leather*, Silk, or Brocade, with very low Quarters, because they have frequent occasion to pull them off, when they go into Rooms where the Floors are covered with rich Tapistry. Their Head-dress comes nearer to that of the *Turks* than of the *Persians*, being commonly of thin Callicoe, or Silk, interwoven with Gold and Silver Thread; they lay it by when they go to Bed. They have over their Garments a kind of Cloak to defend themselves against the Injuries of the Season; Their Garments are ty'd round the Waste with a Silk Girdle wrought with Gold, and over this they have a kind of a Sash of fine Callicoe; in these Persons of Quality wear their Daggers, the Handle and Sheath of which are generally of Gold, and beset with Precious Stones.

Their Houses. Their Houses are but slightly built, the Walls being nothing but Plaister-work, made of a mixture of Free-stone powdered, some Lime, Gum and Sugar, which being very white and smooth, makes no disagreeable shew at a distance; They are also but indifferently furnished, especially the Kitchins, where, besides a few Dishes, and Stoves, you see very few other Utensils; tho' for the rest, the Houses of Persons of Quality are very large, and divided into convenient Halls, Apartments, Chambers and Closets; in the two last of which the Women take great delight to set them out with their Gold and Silver Plate.

Their visits. When they are to receive Visits, they place themselves in the Hall upon pieces of Tapistry; they Salute one another at their first coming in, with their *Salom*, and an inclination of the Head; and if the Person be of greater Quality, they put their right Hand to their Heads, to shew their readiness to submit to him: If they are of an equal Condition, no further Ceremony is observed, but a mutual inclination with their Bodies; sometimes they touch one anothers Lock, adding these words, *Grab anemcas, Be it to you according to the Prayers of the Poor.* He who receives the Visits, never stirs from his Place, the Visitors being set by his right and left Hand. Their Visits are made with a great deal of reservedness, no such thing as the least loud Discourse being to be heard, or any Gestures made with their Hands or Heads. If they whisper to any Body, they are sure to hold to their Mouth a Napkin or some such thing, for fear of offending with their breath, him to whom they speak. 1638.

Their Expence and Domestics. Their greatest Expence is in Cloathes, Eating, and Women; for as by the *Mahometan* Law they are allow'd to pursue their sensual Pleasures to the utmost, as far as may be done without detriment to their Neighbours, they indulge themselves in this point to the utmost of their Power. They keep a numerous Retinue of Servants, each of which has his own business assign'd him. Their Footmen have great Plumes of Feathers on their Heads, and 2 little Bells on their Breasts, and are so hardy, that they will travel 15 or 16 Lgs a Day without much difficulty. They have all their Board Wages, and some Vails, but both are so small, that they can scarce keep themselves from starving. The many Women the *Mahometans* marry, are very chargeable to them, together with their Eunuchs, they being very extravagant in their Cloathing, Jewels, and Furniture. The chief amends they have for this is, that each Woman endeavours by all imaginable Art to gain her Husband's Affection, and Enjoyment before the rest; there being nothing to be contrived, but what they will make use of to excite him to voluptuousness.

Handycraft Men. The poor Handy-Crafts People, are but in a very indifferent condition here; for as every piece of Work passes through several Hands, before it is finished, they can scarce get 6 Pence a Day; and the worst is, that the Children must be bound to no other Trade than that their Fathers are of: Hence it is that they are forced to live upon Bean Flour, and a little Rice boyl'd with Water in the nature of a Hasty-Pudding, into which they put a little melted Butter; and their poor Houses are suitable to their way of living.

Merchants. Merchants live here in Plenty enough, and would be sufficiently happy, were it not for the danger they lie under of being fleec'd by the covetous Governors of the Places in which they live, under some pretence or other, as soon as they begin to discover their Wealth.

Though all the *Mahometans* in the *Indies* profess the same Religion, yet are they distinguished into divers Sects, such as the *Patans*, *Moguls* and *Indosthans*, (besides several others) which, as well as their different Tempers arises chiefly from the different Disposition of those Countries from whence they came, than upon any Religious account.

Patans. Thus the *Patans*, or *Padars* are a sort of Daring, Cruel, and Barbarous Generation, who without any consideration will thrust themselves upon hazardous Enterprises.

Moguls. The *Moguls*, or *Mogollies* on the other Hand, who deduce their Origin from the *Great Tartary*, are Complaisant and Discreet, which gains them great Respect among the other *Mahometans*.

Indosthans. The *Indosthans* or *Hindusthans*, are somewhat Barbarous, and though Covetous, yet are not Crafty enough to deceive without being found out; they are the true ancient Inhabitants of *Guzuratta*, and may be easily distinguish'd from the rest by their Complexion, which is much more inclining to black than the two former.

Bloches. There is another sort of People in the Province of *Haca-Chan*, who, as they are very hardy and bold, so they are employed chiefly in the carriage of Merchandices; they are call'd *Bloches*, their chief Employment being to let out Camels, and to Conduct the *Caravans*, which they do with so much fidelity, that they would rather sacrifice themselves, than suffer any thing to be lost.

No Inns in Guzuratta. All over the *Mogul*'s Country, as well as in this Province, no such thing is to be seen as Publick Inns; except that in the Cities and some Villages are erected certain Publick Buildings out of Charity, for the convenience of Travellors; these *Caravanseras* having

1638. ving no other Accommodations but 4 bare Walls and a Covering over Head.

They Travel with Camels, Mules, Horſes, and Oxen; they make uſe alſo of a certain kind of Coaches drawn by Oxen, which will travel 10 or 12 Lgs a Day; they are covered with Velvet on the upper part, but thoſe for the Women are ſo on all ſides.

Perſons of quality travel for the moſt part upon Elephants, or are carried in *Palanquines* or Litters, carried by 2 Men upon their Shoulders with a Bar. They are very careful in breeding up their Elephants. Hawking and Hunting is their chief Sport. Their Grey-hounds are leſs than ours, but they make uſe of tame Leopards and Tygers in Hunting, which are the beſt in the World at ſurpriſing a wild Beaſt, but never purſue it.

They catch Water-Fowl by means of the Skin of a wild Duck fill'd with Hay, which being ty'd to the Decoy Duck, they ſwim upon the Water, till they get inſenſibly among the reſt without frightning of them.

Their ex- Their Bows are made of wild Oxes Horns and
ceſt in their Arrows of Cane, and they manage them with
Bow. ſo much dexterity, that they will kill Birds flying.

Their Games are Cheſs, and ſome at Cards. They are great lovers of Muſick, tho' theirs be very rough; but Judicial Aſtrology has got ſuch an aſcendant among them, that nothing of moment is to be undertaken here, without firſt conſulting thoſe who profeſs it.

Learning. They are not quite deſtitute of Books, *Ariſtotle's* Works, or at leaſt ſome of them are to be met with here, tranſlated into the *Arabian* Tongue; as likewiſe certain Treatiſes of *Avicenna*, who is in great requeſt with them, as being born at *Smarcanda*, under the Juriſdiction of *Tamerlan*. Their Writings are not deſpiſable, and have ſomething of Rhetorick in them; and their Annals are ſo well and exactly kept, as would furniſh ſufficient Matter for a good Hiſtory.

Tho' their Language divided into many Dialects, yet is the ſame to be learnt without much difficulty; Language. they write from the left hand to the right; the *Perſian* is the Court Language in *Indoſthan*, and ſome have likewiſe a taſte of the *Arabick*.

Diſeaſes. The Bloody Flux and Fevers are the moſt Current Diſeaſes in the *Indies*, againſt which they uſe ſcarce any other Remedy but Abſtinence: They don't want Phyſicians, but have no Surgeons; their Barbers let Blood, and apply Leeches.

The Cli- The Winter begins in *Guzuratta*, in *June*, and holds
mate of Gu- till *September*, but the Rains are not as at *Goa*. There
zuratta. are but two Winds which Reign on this Coaſt, *viz.* the N. and S. Winds, which blow each for 6 Months without Intermiſſion. Their greateſt heat is in *April*, *May*, and the beginning of *June*; but the ſultrineſs of the Seaſon is ſomewhat temperated by frequent Breezes of Wind, which however bring this Inconveniency along with them, that they raiſe the duſt to ſuch a degree, as robs you of the very ſight of the Sun at Noon-day.

Com- The chiefeſt Commodities of *Guzuratta*, are Calimerce. coes and Silk Stuffs, as Satins, Taffatas, *Petolas*, *Commerbands*, *Ornis* of Gold and Silver, uſed for Veils for Women, Brocados, Tapeſtry, ſtreaked Carpets, Quilts, Tents, Bedſteads, and Cabinets, Lacque, Seals, Beads, Chains, Buttons, and Rings of Ivory, Amber, Rock-Chriſtal, and Agat.

Indigo here. In a Village call'd *Chirchees*, near *Amadabat*, is the beſt *Indigo* made. The Herb is like that of a yellow Parſnip, but ſomewhat ſhorter, and more bitter; it ſprouts forth into Branches, like a Reed, and riſes ſometimes 6 or 7 foot high, its Flower is like that of a Thiſtle, and the ſeed like Fenu-greek; they ſow it in *June*, and cut it in *November* or *December*; it is ſown but once every 3 years; the firſt Year they cut off the Leaves within a foot of the Ground; and after they have clear'd them from the Stalk, dry them in the Sun, and afterwards lay them a ſoaking in a Stone Trough, which has 6 or 7 foot of Water in it, ſtirring it very frequently, till they think the Water has ſufficiently extracted all the Colour and Vertue of the Herb; then they draw the Water off into another Veſſel, which being well ſettled all Night, they take it off the next Day, and the ſettlement on the bottom is ſtrain'd through a courſe Cloth, and dry'd in the Sun. This is the beſt *Indigo*, which is adulterated by the Inhabitants, by the mixture of a certain Earth of the ſame colour, and ſome Oyl to make it ſwim upon the Water; the goodneſs of this Drug being commonly judged by its lightneſs; the Stalks left the firſt Year, produces Leaves the next, but theſe are not to be compared 1638.
in goodneſs to thoſe of the firſt, tho' they exceed thoſe of the wild *Indigo*. The ſecond Year is that which chiefly produces the Seed; the Product of the third Year is never tranſported beyond the Seas, but kept by the Country People for their own dying. The beſt *Indigo* (which they call *Anil*) is inclining to a Violet colour, and has ſomewhat of that ſmell, if burnt. They always let the Ground ly fallow after the three Years are expired, for a twelve Month.

There is alſo a great deal of Saltpeter vented at Salt-Peter.
Surrate, which is made at *Aſmer* 60 Lgs from *Agra*, out of the fatteſt Ground after it has lain fallow for a conſiderable time; they dig certains Trenches, which after they have fill'd with Salt Earth, they let in as much Water as is ſufficient to reduce it to the Conſiſtency of a Broath, and to ſoak it the better, they frequently tread it with their Feet; when they judge the Water has diſſolv'd all the Saline Subſtance that was in the Earth, they draw up the Water into another Trench, where in ſome time it thickens, when they boil it like Salt, ſcumming it continually, and afterward put it into Earthen Pots; where the Dregs being ſettled to the bottom, they take it out again, and dry it to a hard Subſtance in the Sun.

Borax, well known for its uſefulneſs in refining of Borax.
Gold and Siver, is found near a Mountain in the Province of *Purbet*, upon the Borders of *Great Tartary*, which Country produces alſo Spikenard, Quickſilver, Muſk, and Copper, and a certain Colour which dyes the moſt beautiful Brown in the World; The *Borax* grows like Coral, in the bottom of the River *Jankenckar*, which coming down from the Mountain, joins its Stream with the River *Maſeroor*, which paſſes through the ſaid Province, and furniſhes it with this Drug. The *Indoſthans* call it *Jankenckar*, from the before-mentioned River, and keep it for its preſervation in Bags made of Sheep-Skins, fill'd up with Oil.

The greateſt part of our *Aſſafœtida* is brought from Aſſafœtida.
Perſia, but that which is brought from the Province of *Utrad* in the *Indies* is preferr'd before it; there are 2 kinds of this Plant, one grows like a Shrub with ſmall Leaves like Rice, the other has Leaves as big as thoſe of Turnips; and in colour reſembling Fig-tree Leaves. It grows commonly in Sandy and Stony Ground; its Gum comes forth in the latter end of the Summer, and is gathered in *Autumn*: The *Benjans* in *Guſuratta* are ſuch admirers of its ſcent, that they uſe it in their Sawces, and rub their eating and drinking Veſſels with it.

There is abundance of *Amſion* or *Opium* brought Opium.
from *Cayro* into *Europe*; that which comes from the Province of *Gaulor* in *Indoſthan*, and is vented all over the *Indies*, is only the coagulated Juice of Poppy, which is gathered, by making an Inciſion therein when it begins to be ripe: All the Eaſtern Nations are ſo addicted to the uſe of it, that thoſe who cannot come at the Iuce, will make and uſe the Decoction of Poppy. The *Perſians* boaſt themſelves to be the firſt Inventors of its uſe. They take every Day the Quantity of the bigneſs of a ſmall Pea, made up into a Pill; not ſo much with an intention to make themſelves ſleep, as to raiſe courage in themſelves, eſpecially in the exerciſe of Veneral Acts, for which purpoſe it is chiefly uſed by the *Indians*. They uſe themſelves to it by taking a little and little by degrees, without which it is Mortal: It draws this inconvenience after it, that it will quite ſtupifie the Senſes, unleſs they continue it for ever.

Of *Lacque* we have ſaid ſomething before, and ſhall ſay more anon.

The Province of *Guſuratta* produces abundance of *Cammin*, *Ginger*, and *Mirabolans*, which they preſerve with brown Sugar; beſides which they have ſeveral Phyſical Drugs. Diamonds are likewiſe one of the chief Products of this Province, but not many; yet have they good ſtore of Pearls, Emeraulds, Gra- Their Pre-
nats, Agats, Alabaſter, Red Marble, and Jaſper cious Stones.
Stone, which are better polliſh'd here than any where elſe.

They know but of one Weight all over *Guzuratta*, Their
which is call'd *Maon*, and contains 40 *Ceers*, in the Weights
whole 30 half pound, at the rate of 16 Ounces in the and Ells.
pound; a *Ceer* containing 10 *Peyſes*, a kind of Braſs Money weighing 12 Ounces.

Their Ells are of two kinds; the leſſer amounts to no more than half a *French* Ell, and a 16th. part; and 19 of their large Ells make 13 Ells 3 quarters of the ſame Meaſure.

They

1638. They have also no more than two sorts of Money, *viz.* the *Mamoudies* and the *Ropias*; the *Mamoudies* bieng Coin'd of Silver of a base allay, go no farther than at *Suratte*, *Brodra*, *Broitschia*, *Cambaya*, and those Parts, and are worth about one Shilling *Sterling*; but the *Ropias Chagam*, which are worth about a *French* Half Crown, and made of very good Silver, pass current all over. The *Peyses* we spoke of, are their Copper Money, 26 of which make a *Mamoudy*, and 54 a *Ropia*. They count also with Almonds, 36 whereof make a *Peyse*, and with certain Shells found by the Sea-side, 80 whereof make a *Peyse*. They account *Spanish* Pieces of Eight and *Rixdollars* equivalent to 5 *Mamoudies*, because they make great advantage of them in their Mints. The *Persian* Larris, which are very good Silver, are also much esteem'd here. They have a Golden Coin call'd *Xeraphins*, worth about 13 half *Ropias*. The *Chequins*, and *Venetian Ducats* are very current here; and are reckoned to be worth 8 and a half for 9 *Ropias*, according to the rising or the falling of the Change. As there is abundance of Counterfeit Money here, and all over the *Indies*, so scarce any Summ is received, but in the Shops of the Changers, call'd *Xaraffes*, which are at the corners of every Street; these secure the receipt of the Money for a small matter, and are so expert, as that no Counterfeit Money can escape their Hands undiscovered.

Their Money.

Their way of computing Summs is by *Lacs*, one of which consists of 100000 *Ropias*; and two of these *Lacs* make a *Crou* or *Carroa*, and 10 *Carroas*, an *Areb*; a *Theil* of Silver makes 11, 12, or 13 *Ropias*. One *Massas* and a half a *Theil* of Silver; and 10 of these a *Theil* of Gold. No Coin, whether Gold, Silver, or Brass, must be exported out of the Kingdom upon pain of Death. Besides what we have said of the Products of *Guzuratta*, it is very fertile in Wheat, Rice, Pease, Beans, Barley, Millet, *Turkey* Wheat, Flax, Mustard-Seed, Oil, Butter and Cheese, the last of which is somewhat salt and dry; Their Wheat is larger than ours, they don't bake their Bread in Ovens, but upon Iron Plates, and the *Benjans* in Frying-pans.

No Oates here.

Their Beans and Pease are less, but much more delicious than ours; especially their red Ciches, wherewith in many Places they feed their Horses, Oxen and Boufflers, instead of Oats, a Grain not much used in the Eastern Parts. They sow in *May*, and their Harvest is in *September* and *November*. They cut no Grass, but consume it green.

The *Mogul* in Possession of all the Country.

As the *Mogul* is the sole Proprietor of all the Lands in his Empire, so the Peasants when Seeding-time approaches, must make their Application to the Governor of the Province, and agree with him for as much Ground as he thinks he is able to sow for that Year; for the use of which he pays a third part, and sometimes one half; which is the reason that most of the Grounds lay Fallow, there being but few who think it worth their while to manure them at so excessive a rate.

Their Gardens.

Their Gardens are well stor'd with Pot-herbs of all sorts, as Lettice, Succory, Sorrel, Parsley, Radishes, Cabbages, Cucumbers, Citruls, Garlick, Onions, Parsnips, and above all with the most delicious Melons in the World. They don't value their Flowers here so much for their scent as the Colour, the Rose only excepted, the scent of which is much admired; the Flowers call'd *Mogera* and *Scampi*, have also a very agreeable smell, notwithstanding which they are admired by the Women for their Colour, the first being a delicious white, and the latter yellow; they hold all the Year round, as does the Grass here, unless it be dry'd up by the excessive heat of the Summer Season.

Trees.

Besides their Limon, Citron, Pomegranate, and other Trees sufficiently known in *Europe*, they have those call'd *Ananas*, *Bananaes*, *Jaccas*, *Cocos*, and *Indian Fig-Trees*; they have also a kind of Vines about *Suratte*, the Grapes of which are not so big as those of *Persia*, and are sold at a dear rate. Their Forests in those parts entertain among other Creatures, a kind of wild Dogs, call'd *Jacalls*. No body dare hurt them, no more than any other Beasts that are yellow or black, under pain of death, they being reserved for the King's Sport, or the Governor's of the Province. 1638.

Tho' *Indian* Horses are in no wise comparable to those of *Persia* and *Arabia*, yet are they very careful in keeping them. They commonly feed them with those Pease they call *Ciches*, which they bruise and boil, and every Morning and Evening give them a Paste made of 2 pounds of Barley Meal, half a pound of Butter and as much Sugar.

Horses.

Their Oxen are not different from ours in Shape, except that they have a large bunch betwixt their Shouldiers; the poorer sort of *Mahometans*, eat abundance of Beef and Mutton, but the better sort feed upon Kids, either roasted with a Pudding of Rice, Almonds and Raisons in the Belly, or stew them with Butter and Pepper; they also have *Persian* Sheep with fat Tails, but they are very rare, and used seldom but at great Entertainments.

Their Oxen

They have sufficient store of Fowl, Capons, Geese, Wild-ducks, Peacocks, Teel, Partridges, Pidgeons, Sparrows; not to speak of their Faulcons, Hawks, Eagles, and other Birds of Prey.

Fowl.

They are not destitute of River Fish, such as Carps, Eels, Breams, but their Salt-fish is extraordinary good, and cheap here, because the *Mahometans* prefer Flesh before Fish, and that *Pagans* eat not of it at all; they have also Oisters, Crabs, and Prawns. It is observable that whereas in *Europe* all sorts of Shell-fish is best at the Full Moon, here they are best at the New Moon, and empty at the Full.

Flesh.

Their Vessels are generally slightly built, and their Great Guns kept above Deck; and they seldom venture any farther than to *Java* and *Sumatra*, or to *Aden* and *Mecca*, upon the *Red-Sea*; whither they go with a vast number of Pilgrims in the beginning of *March*, and return not till *September* for fear of the Tempests, which from *June* till then are very violent on that Coast, whereas otherwise this Voyage might be performed in 2 Months.

They carry to the Coast of *Aden* Calicoes, Indigo, Champhire, Tobacco, Alum, Sulphurs, Benzoin, Pepper, and other Spices, Mirobalans, and many other Preserves; in lieu of which they bring back Coral, Amber, a certain red Dye call'd *Misseir*, Coffee Berries, and Opium, but their best returns are in ready Cash. Their Coasting Vessels which go to *Cambaya*, and *Broitschia*, and sometimes to *Persia*, go away in *January* and *February*, and return in *April* or *May*, and bring along with them Brocadoes, Silk Stuffs, Velvets, Camlets, Pearls, Almonds, Raisons, Nuts and Dates, but especially Rose-water.

Trade the Red-Sea.

Their Ships that go to *Achin* in the Isle of *Sumatra*, are of 200 and 300 Tuns in burthen, carry thither the products of their Country; in lieu of which they bring back Brimstone, Benzoin, Champhire, Porcelain, Tin and Pepper; they set sail in *May*, and return in *October*.

The Voyage to Achin.

The *Malabars* also drive a great Trade at *Suratte*, *Cambaya* and *Broitschia*, they bring thither the Bark of the Cocoe-Trees, which is used for making Cordages of Ships; the Pith of the same Tree, *Areca* and *Bettele*, a kind of Wood which dyes red, call'd by them *Patang*, and *Harpus*, which they use for Calking their Ships, besides Rice and other Provisions; These they exchange for Opium, Saffron, Coral, Calicoes, and other Stuffs. They come to the Coast of *Suratte*, in *December*, and return in *April*. Formerly the *Portugueze* used to be the sole Masters of the Trade of *Guzuratta*, by means of their Forts at *Daman*, *Diu*, and *Goa*; But since the *English* and *Dutch* have made their Settlements in those Parts, they have been forc'd to confine their Trade to *Goa*, of which more in the next following Chapter.

The Trade of the Malabars.

CHAP. II.

CHAP. II.

Mr. Mandelsloe's *Travels into the* East-Indies. *&c.*

1639. MR. *Metwold*, the *English* Chief Director, having as I told you before, surrendred his Charge to Mr. *Fremling*, took leave of the Governor of *Surratte*, the 1st. of *January* 1639. who received him with extraordinary Civility, and presented him with a Garment of Brocadoe, besides many other Rarities; and having spent two Days more in taking our leaves of our Friends, we went aboard the 3d. in Company of the new President, and all the other *English* Merchants, where we feasted for three Days, and at last set sail the 5th. in the *Mary*, and came the same Night in sight of the City of *Daman*, where we met with one of our Ships that had stay'd there for a *Portugueſe* Vessel, that was to go along with us to *Goa*. The Governor of the City sent us a large Vessel with Wine, and divers Refreshments; for tho' the City was then besieged by the King of *Decam*, yet the Harbor being open, they had sufficient Supplies brought them by Sea.

The Author leaves *Surratte*.

Comes to *Daman*.

The Kingdom of *Decam* or *Cuncam*, by some call'd *Visiapour*, from its Capital City, extends all along that Coast from *Ingediva* (which is within 12 Lgs of *Goa*) to the South as far as *Siffarde*. The chief Maritime Places belonging to the King of *Decam*, are *Geytapour*, *Rasapour*, *Carapatan*, and *Dabul*; but *Visiapour* the Capital City lies 80 Lgs from *Dabul*, and 84 from *Goa*.

The Road from *Goa* to *Visiapour*.

The way from *Goa* to *Visiapour*, lies thus, no sooner have you left *Goa*, but you must cross the River *Madre de dios*, if you intend to Travel into the Kingdom of *Visiapour*; the first City you meet in your way is that of *Ditcauly*, 3 Lgs from *Goa*. From this Place you must travel 6 Lgs before you come to *Danda*, a pretty large and well-built City upon the River *Derry*, which exonerates it self into the Sea, near the Isles call'd *Islas Quemadas* by the *Portugueſe*.

Ditcauly. *Danda.*

The Mountains of *Balagatta*.

From *Danda* to the Mountains of *Balagatta* are 9 Lgs, which reach through the Kingdom of *Cuncam* as far as the Coast of *Coromandel*.

From *Amboly*, which lies at the foot of the said Mountain, to the Village of *Herenekassi*, situate upon a River of the same Name, are 11 Lgs; 2 Lgs thence you come to the Village of *Werseree*, and 3 Lgs further to that of *Outor*; 6 Lgs and a half more to that of *Berapour*; half a Lg thence to that of *Matoura*, and a Lg further to that of *Calingra*. From hence you pass through the Village of *Kangir*, to a *Hamlet* call'd *Bary*, a Name given to all Places in the *Indies* that have no peculiar Name.

Thence you go to the *Village* of *Worry*, and *Attrowad*, all which are within a Lg distant from one another; near which you see upon an Eminency a Magnificent *Pagan* Temple; and turning about 2 Lgs and a half thence to the left, you pass through the Village of *Badataly* to *Kerwes*, which is 2 Lgs thence. From *Kerwes* to *Skeokory* are 2 Lgs more, and thence to a Magnificent *Benjan Pagode* or Temple 5 Lgs; from hence at 2 Lgs distance you see to the left the strong Castle of *Mirsis*, and the City of *Rajebag*, a great Trading City, especially in Pepper, which is not above a Lg distant from the said *Pagode*.

Not above a Lg from *Rajebag* you come to a very famous Well, which directs you to the River *Cugny*, 2 Lgs thence; and after you have cross'd it, you have not above half a League to the City of *Gotteny*. After you come out of the Gate, you must leave it to the left, in order to come to the Villages of *Goeteſi* and *Omgar*, which are within 1500 Paces of that City; and half a Lg thence to the great River *Corstena*, which continues its Current through the Kingdom of *Decan*, as far as *Masulypatan*. Betwixt this River and that of *Agery*, is not above 4 Lgs, and in your way you pass through the Villages of *Lynatour*, of *Katerna*, *Tangly* and *Erury*. About 3 Lgs from this last River, you come to the City of *Atteny*, which is one of the chief Markets in those Parts; 4 Lgs thence is the Village of *Bardgie*, and 3 Lgs and a half further that of *Agger*, lying within 3 Lgs of the City of *Talsenghe*, which is as many Lgs to *Homoware*, and thence 3 more to the City of *Ticota*, 6 Lgs distant from *Visiapour*. Before you enter the City of *Visiapour*, you pass through the Suburbs call'd *Nouraspour* and *Sirrapour*, the first of which was within this two Years the Residence of their Kings; but being now destroy'd entirely, its Ruins furnish Materials towards the building of *Visiapour*.

1639. *Talsenghe.* *Ticota.* *Visiapour.*

This City is above 5 Lgs in Circumference, being encompass'd with a very high Wall of Free-stone, and a broad Ditch, and many Out-works, provided with 1000 Pieces of Iron and Brass Cannon. The Royal Palace is in the very Center of the City, having 3500 Paces in Compass, being divided from the Body of the City by 2 Walls, and as many Ditches. The City has no less than 5 Suburbs, where most of the Merchants live, and in the Suburb of *Schanpour* most of the Jewellers have their Habitations. The Inhabitants are for the most part Natives of the Kingdom of *Decam*, the rest are *Benjans*, *Moguls*, and *Jentives*. If you intend to go from *Visiapour* to *Dabul*, you must go back as far as to the City of *Atteny*, and thence 2 Lgs to the Village of *Agelle*, and so 6 Lgs and a half further to the City of *Arecq*. Thence you have 3 Lgs to the City of *Berce*, and as many more thence to the City of *Mirdsi*, or *Mirisgie*, which is large, but not very populous; its Castle, which is very strong, being very famous for a Siege it held out against the joint Forces of the *Great Mogul's* Empire. Here are also to be seen the Tombs of 2 ancient Kings, which are in great Veneration among the Inhabitants of those Parts. From this Place to a Village call'd *Epour*, are 2 Lgs, and thence 3 Lgs more to the City of *Graeen*, which is divided in two by the River *Corsena*, which is 800 Paces broad there. From the River side to the Village of *Toncq*, are reckoned 2 Lgs and a half, and thence 3 Lgs further to the City of *Asta*; a City very considerable for its Traffick.

Arecq. *Berce.* *Mirdsi.* *Graeen.* *Asta.*

Thence you go 3 Lgs further to the City of *Ballowra*, and 3 Lgs further to those of *Oeren* and *Isselampour*, which lie not above a Cannon shot from one another; leaving the latter, which is strengthened by a goodly Castle, on the left, you go on 2 Lgs further to the Village of *Tasset*, and 3 Lgs thence to that of *Cassegam*, and so 2 Lgs more to the City of *Calliar*, which is quite demolished now. Within 2 Lgs of this City you see a small Village call'd *Galoure*, from whence passing through that of *Winge*, and by the City of *Qualampour*, a Place famous for its Linen Manufactory, and to that of *Domo*, you come to the City of *Tamba*, 6 Lgs from *Galoure*, a Place both very large and populous, situate on the other side of the River, the Name whereof I was not able to learn. Its Inhabitants are *Benjans*, and *Jentives*, the first of which live by Trading, the last are Husbandmen. From this City you pass through the Villages of *Morel*, *Sappero*, *Belour*, to the Town of *Werad*, 10 Lgs from *Tamba*, and 9 Lgs from the Mountains of *Balagatta*; near which is the Village of *Patan*, famous for a certain Robber nam'd *Hiewogby*, who lived there, and when pursued, had his inaccessible retreating Places in the Mountains. From *Werad* to the Village of *Helewacko*, which lies upon a River, are 3 Lgs: This River comes as far as the City of *Chaury*, 36 Lgs distant from this Village, unto which it had given its Name. Hence to the Village of *Gattamatta* lying within the Mountains of *Balagatta*, are 3 Lgs, and 3 more to the Village of *Pory*, seated at the foot of the craggy part of the Mountain. Thence to the Village of *Camburley*, are 2 Lgs, and as many hence to that of *Chipolone*; the last of which lies upon the River *Choyhbeer*, which joining its Current with that which runs by *Helewacko* (and bears the same Name) is the ordinary Passage by Water to *Dabul*, being 16 Lgs from it.

Ballowra. *Oeren* and *Isselampour.* *Calliar.* *Qualampour.* *Domo.* *Tamba.* *Werad.*

1639. The City of *Dabul* is seated upon the River *Helemacko*, at 17 deg. 40 min. on this side of the Line, being one of the most ancient Cities of the Kingdom of *Decam*; but is now-a-days without either Gates or Walls, defended only on the River side by two Batteries. As you enter the River you see to the left hand a Wood, and near it a Castle, as also a white Tower, which serves for a *Pagode*, but is a good direction to the Pilots; its entrance being none of the best, by reason of a certain Sand-bank at the very Mouth of it, which at low Water is quite dry; the only safe way to escape it, is to keep to the South side, there at low Water you have 5 or 6 fathom Water, tho' at the very Mouth you have not above 12 or 14 foot. Within a Lg before you come to the River, is very safe riding for Ships, tho' the Road in the Bay of *Zanquizara*, 4 Lgs thence, is incomparably better. The Harbour of *Ceitapour*, the most excellent on all that Coast lies 12 Lgs thence, the Vessels being sheltred here by an adjacent Island against all Winds, it lies at 17 deg. 10 min. and 20 Lgs from *Goa*. 3 Lgs from the said Harbour lies the City of *Rasapour*, one of the best Maritime Towns of the Kingdom of *Decam*, and 19 Lgs thence is the Bay of *Wingurla*, a very convenient Haven. It is 3 Lgs from *Islas Quemadas*. Thus much of the Geographical Description of the Kingdom of *Decam*.

The City of *Dabul*.

Rasapour.

We will now come to its Inhabitants, which are either *Benjans* or *Mahometans*; the chief Trade of the City of *Dabul* is in Salt, and Pepper brought thither from *Orannbammara*; they used formerly to drive a considerable Traffick to *Persia* and the *Red Sea*, but they send but few Ships thither now.

The ordinary Custom pay'd here is 3 *l.* 10 *s. per Cent.* but the *English* pay only one Moyety of it; tho' the greatest part of the Inhabitants of the Kingdom of *Decam*, or *Cuncam*, are *Benjans*, yet are they not so averse to Flesh as the others in the *Indies*, for they will feed upon any Flesh except upon that of an Ox, Cow, Bouffler and Swine; for the last they have an absolute Abomination, and the Ox and Cow are in great Veneration with them. In their Life and Conversation, Marriages, Purifications, and other Ceremonies, they follow the footsteps of the other *Benjans*. Their Habitations are only Cottages of Straw, the Doors being so low, that one can't go in without stooping. Their Furniture amounts to no more than a Mat to sleep upon, and in the midst of the Hut you see a Pit in the Ground, wherein they beat the Rice. They don't differ in their Habit from the other *Benjans*, except that they wear Wooden Shooes, ty'd up over the Insteps with Leather Straps: But their Children go naked till they are 7 or 8 Years of Age. Their Arms are the same with the *Indosthans*; most of them are Goldsmiths by Trade tho' some also profess Physick and Chirurgery, they have also some Carpenters, Masons and Barbers among them. The chief Commerce of the Kingdom of *Decam*, consists in Pepper and Provisions. The first is transported thence into *Persia*, *Suratte* and *Europe*, as also abundance of Callicoe, with the Latter they furnish the Neigbouring Provinces of *Indosthan*, *Golconda*, and *Coromandel*, who fetch good quantities of Silk Stuffs thence. In the Mountains of *Balagatta* much *Lacque* is made, but does not approach in goodness to that of *Guzaratta*; at *Visapour* are abundance of Jewellers that deal in Pearls, but they are not so cheap here as in some other Places.

The *Portugueſe* have a considerable Trade in this Kingdom, its Frontiers reaching within 4 Lgs of *Goa*. There are a certain sort of People call'd *Venesars* in *Decam*, whose chief business is to buy up vast quanties of Wheat and Rice here, and to carry it in great *Caravans* of 1000 Beasts at a time, to *Indosthan*, and the other Neighbouring Countries; they carry their Families along with them, their Wives being so expert and brave in managing of the Bow, that they serve them for a Guard against the *Rasboutes* and other Robbers.

The Venesars.

Two sorts of Money are current in *Decam*, the *Larins* or *Laris*, which come from *Persia*, and the *Pagodes*; 8 of the first make a *Pagode*, which is equivalent to 10 *Laris* of *Dabul*. Their Copper Coin is called *Bisarniques*, 9 whereof go to a *Peise*, and 18 of these to a *Laris*; besides which each City, nay each Village of Note has its peculiar Coin, which together with the counterfeit Coin, breeds no small confusion.

The Money of Decam.

Their Weights are the same with those of *Guzaratta*, except that 20 *Macns* of *Suratte* make 27 in *Decan*. The ordinary *Mann* consisting of 40 *Ceeres*, and 1 *Copeyses* make 27 pounds each of which has 2 marks. They have a particular weight for Pepper call'd *Goemy*, weighing 12 *Macns*, 4 *Macns* making 100 weight, and 20 a *Candy*. The King of *Decam* or *Visapour* is a Tributary to the *Great Mogul*, tho' it be suppos'd he can raise 200000 Men; and these Kings have had considerable Wars with the *Portugueſe*, from whom they took twice the City of *Goa*, 1586. but at last finding the War destructive to their Commerce came to a Composition with them, which lasted till 1638. when the *Portugueſe* having seiz'd some of the King of *Decam*'s Ships, which contrary to their agreement were carrying Pepper to *Mecca* and *Persia*, they came again to Hostilities.

1639.

The King of *Decam*'s Strength.

The King of *Decam* is famous for his great Artillery, of which he has greater store than any of the *Indian* Princes, and among the rest one great piece of brass Cannon, the Ball whereof weigh'd 800 weight, and required 540 pound of fine Powder. The Caster of it was an *Italian*.

His Artillery.

But to return to our Voyage, early in the Morning *Jan.* 7. we came before the City *Bacim*, belonging to the *Portugueſe*, where we staid some hours in expectation of a certain Jesuit we were to carry to *Goa*, but he not coming, we continued our Course, but were scarce got a Lg before we saw a *Portugueſe* Frigot come after us, we struck our Sails till she came near us, and found her to be a Vessel that came on purpose to go along with us under *English* Colours, for fear of being interrupted by the *Dutch*; she brought us some Presents, *viz.* 3 Oxen, some Sheep, Oranges, Citrons, and Bread from the Governor.

Jan. 9. We sail'd with a North Wind by the Isles of *Bandera* and *Bambay*, which stretch'd along the Coast from *Bacim* to *Visapour*. The last has a good Road for Anchorage, and is of a pretty large extent.

Bacim.

Jan. 10. We sail'd by *Rasapour* within 2 Lgs of *Goa*, and in the Afternoon by the City of *Fingerla*, (where the *Dutch* have a Settlement) 4 Lgs from *Goa*, and in the Evening came in sight of the Isles about *Goa*, and of the 2 Castles that secure that Harbour.

Jan. 11. We came to an Anchor under the Fort *Deguard*, which lies not above a Mile from the City of *Goa*; We saw 6 Galleons and a Carrack in the Haven. Soon after came aboard us a *Portugueſe* Captain to Complement the *English* President in the Vice-Roy's Name, and immediately after the Commodore of the Galleons; the Harbour of *Goa* was then block'd up by 12 *Dutch* Ships, notwithstanding which we saw coming in a Caravan consisting of 300 small Coasting Vessels, laden with Pepper, Ginger, Cinnamon, Sugar, Rice, Fruits and Preserves, besides abundance of Provisions.

Come to *Goa*.

The *English* President, whose Business here was chiefly with the Overseer of the Exchequer, went to pay him a visit, his Trumpets sounding all the way as he went up the River, who received him with great Demonstrations of Friendship, because they had known one another long before; Being thence carried to his Lodgings, he desired, and had Audience given him immediately by the Vice-Royal. His Palace lying on the River side, we found divers of his Gentlemen there, to receive and Conduct us into the Hall of Audience, in the Antichamber of which, (where we saw divers good Pictures of the Princes of *Europe*) we saw his Guards standing in two Files. The Vice-Roy himself was Clad in Black, and so were all his Courtiers, and at the coming in of the President, rose out of his Chair, till the other was sate down. After some stay, the President was Reconducted to the Water-side by the same Gentlemen, that brought us thither, as we pass'd along, we were shewn 12 of the Vice-Roy's Horses, richly accoutred; and a *Biggel*, a Creature much about the Bigness and Colour of a Rene-deer, its Head like a Horse, its Main like an Ass, with Black Cloven Feet, and two Black Horns on his Head. We had scarce dined, when we were crowded with Visitants; most of the Persons of Quality among the *Portugueſe*, and the Deputies of all the Monasteries coming to Complement us, the 10 days we stay'd at *Goa*, being spent in nothing but Feasts and Visits. The most Magnificent Entertainment of all we received from a certain *Portugeſe* Lord, who was then Governour of *Mozambique*; each Course consisted no more than of 4 Dishes, but we had so many of them, and such variety of Meats, Fruits and Preserves, that I scarce ever saw the like in my Life. And to add to the rest, we were serv'd at Table by 4 very handsome *Malacca* Maids.

The *English* President visits the Vice-Roy.

They are Entertain'd at the Prosessed House of the Jesuits.

The

1639. The 16. we were invited to the Profes'd House of the *Jesuites*. It consisted of 150 Fathers, and as many Students, but the Structure which was 4 Stories high, and very spacious, cou'd have contained a much greater number; we pass'd through the Hall, where we found Tables set all along the Walls; with Trenchers, drinking Cups and Earthen pots; In the midst of the Hall we saw another square Table, intended for such of their Society, as were bound over to Penance, upon the account of some trespass or other. Towards the entry stood a Pillar, from whence issued a spout of Water, for the conveniency of washing their Hands. We were thence Conducted into a Noble Apartment richly furnish'd, and adorn'd with Tapistry, where a Table stood ready prepared for us in the midst of the Room, covered with a Noble Cloath, and Fruits and Bread, in Porcelain Dishes, which is here prefer'd before Silver. The Father Provincial having placed the *English* President on his right hand, sat down, and so did the rest of the Company, so that betwixt every 2 sat 2 Jesuits to entertain us; the Meat was likewise served up in Porcelain Vessels as well as the Disert of Tarts, Florentines, March-pains and Preserves.

After Dinner we were brought into several Chambers to take our Repose according to the Custom of the Country; after which we passed into another spacious Hall, where we had the divertisement of Dancing by certain *Indian* Children, bought and brought up in the *Roman Catholick* Religion. There were among other Shews an Entry made by 15 Persons, having in their hands some pieces of a broken Pillar, and divers Garlands of Flowers, wherewith they adorn'd the Pillar, after they had with an exact observance of the Cadence, each in their several turning put it together; and soon after we saw at the top of the Pillar come out a Tulip, which opening of it self by doors, produced the Image of the blessed Virgin, with our Saviour in her Arms, besides which the Pillar opened in several other places, and cast forth (like a Fountain) perfum'd Waters; after which the Dancers took the Pillar to pieces again, and carried it off dancing, as they had brought it in. We had another Entry of 12 young Lads, each playing upon a peculiar Instrument; some Morris-Dancers, and the Ball was concluded with another Entry of 12 Boys dress'd like Apes, who imitated those Creatures in their Leapings and Gestures to the life. They farther told us, that they used these inticements to bring over the *Pagans* and *Mahometans* to the Church, and to divert their Disciples after their Studies.

Jan. 18. We din'd with the Jesuits at their College call'd *Bon-Jesus*. The first thing we observ'd in their Halls, were the Pictures of many Princes and Persons of Quality, that had been of this Society, and the Histories of their Martyrs, among whom we found those of that Faternity that were engaged in the Gun-Powder Plot in *England*; upon which account they made to us an ample Relation of the Sufferings of their Brethren in *Japan*, and the unheard of Cruelties exercised against them, as well as the *Japonese* Christians.

Dine at another Jesuits College.

Thence they brought us into their Church, which for its greatness and sumptuousness may without all comparison challenge the Preference before any Church the Jesuits are Masters of in *Asia*. The High Altar was one of the most Magnificent that ever I beheld of that kind, but that which was dedicated to St. *Francis Xavier*, whom they stile *The Apostle of the Indies*, exceeded the other in Riches. Here we saw his Image drawn to the life upon Wood; and they were pleased to tell us, that his Body was yet to be seen in the same Church, as entire as it was the first minute after his Death; nay, further inform'd us, that the Body of this Saint being hid in the Isle of *Ceylon*, was discovered by its odoriferous scent, which was perceived many Lgs at Sea; in which the good Fathers were not a little deceived, since the scent which is smell'd at a great distance from the Island of *Ceylon*, proceeds from the vast number of Cinnamon Trees which are all over that Island; besides that, this Story does not agree with what *Maphæus*, one of their own Authors, tells us concerning this Saint, *viz.* That after having preach'd the Gospel in the *Indies*, he came to *China*, where he died immediately after his landing; and that the Master of the Vessel, having put his Body in unslack'd Lime, in order to carry his Bones away, this corroding matter did not exert its vertue upon it, but the Body remained entire, and uncorrupted, and had a very odoriferous smell; whereupon it was resolved to carry it to *Goa*, which was done accordingly.

The several cure of St. *Xavier*.

As we were going from the Church to the Refectory, they forgot not to entertain us with the Miracles of this Saint, of his raising the Dead, commanding the Sea and Winds as well as the Sun, the last of which he brought back an hour after Sun-set. We saw in the Hall here Tables for 200 Persons, but only the chiefest din'd with us, the rest waited. Our Entertainment was much the same as in the other College, but we had most excellent Canary given us, and tho' these Fathers have the Reputation of extraordinary Sobriety, yet out of Complaisance to our Company, they were not backward in making the Cup go round, when they perceiv'd we lik'd the Wine. They also carry'd us up into the Steeple, whence we had a full view of all the City, the Sea, the River, and all the circumjacent Country, as far as the Mountain. 1639.

The next Morning 2 of the Fathers came to our Lodgings to shew us the Hospital which is under the inspection of the Jesuits. It is a very large and noble Structure containing as many Chambers, Halls and Galleries, as will conveniently lodge and accommodate 1000 Sick Persons. Each Bed is mark'd with a particular Number, and such as are not taken up, distinguish'd from the rest by a certain Mark. The Kitchin and Apothecaries Shop are very well worth observation. I found the chief Distempers of the Sick here to be the Bloody Flux and Pox. They have this Custom, that as soon as any Patient is past all hopes of Recovery, he is shut up in a Private Room with a Priest, that the rest may not be disturbed by the Groans of a dying Person.

The Hospital of *Goa*.

Hence we went to the Convent of *our Lady* belonging to the *Austin-Friars*, which being built upon a rising ground, makes a most glorious shew at a distance. I delivered to them the Letters of Recommendation I had received from their Brethren at *Ispahan*, which made them treat me with more than ordinary Civilities, shewing me all the rich Copes and Vestments belonging to the Monasteries, and offering all what lay in their Power for my service; the President having by this time received 9000 *l.* due, and received a promise of the Payment of the rest to such of the *English* Merchants as were to stay behind at *Goa*, he gave a splendid Entertainment to all such as had shew'd us any Civilities; and after having taken his leave, the Governor and Commodore of the Galleons sent him a Present of Cinnamon, Canary, Sheep, Fruits, and among the rest a Bottle of Oyl, made of the Flowers of Cinnamon.

The Convent of the *Austin Friars*.

The Vice-Roys Present.

Jan. 20. We left *Goa*, and upon the River met with 100 small Vessels, which came from the Coast of *Malabar*; we were no sooner got out of the River, but we made straight to the *Portuguese* Fleet, and went aboard the Flag Galleon call'd the *Bon-Jesus*, carrying 64 Guns, and 600 Men. She was a very noble Ship, and we were entertain'd with extraordinary Civility by the Commodore, who shew'd us likewise all the other Ships. At parting we had the usual Salute from the whole *Portuguese* Fleet, as also from the Fort *de Guarda*; As soon as the President was come aboard, he return'd them 20 Guns, which the Commodore answered with as many; and so came to an Anchor in the Road, betwixt the *Portuguese* and *Dutch*.

They leave *Goa*.

But before we take our leave of *Goa*, it will not be a-miss to say something of what we found most remarkable in a Place which is the chiefest of all belonging to the *Portuguese* in the *Indies*. It lies in the Kingdom of *Decan*, or *Cuncam*, 15 deg. on this side the Line, in an Island of the same name, which is divided from the Continent only by a River. The *Portuguese* conquer'd it 1510. *Feb.* 16. but lost it again the 30th. of *May* following, and regain'd it once more the 21st. of *Novemb.* in the same Year, when they took it by Storm. It was at that time a very considerable Place of Traffick, though it has much increased both in Bulk and Trade since the *Portuguese* have been Masters of it: On the South side is the Island of *Salsette*, likewise divided from the Continent by a small River; as is the Isle of *Bardes* to the North, where there is safe Anchorage for Ships with all Winds. The Fort *de Guarde* is built at the Foot of a Rock upon which is erected a Tower in form of a Redoubt, which in the Night-time serves for a Beacon to Mariners. From the Mouth of the River to the Harbour are about 2 Lgs, but it has the same breadth all along, tho' in some Places it is so shallow, that in a dry Season there is not above 2 foot Water.

A Description of *Goa*.

1639. The Island of *Goa* is so barren that it produces nothing fit for the Sustenance of Men or Beasts, except a few Fruits in the Gardens, and a slender share of Grass for Lambs and Goats, notwithstanding which they are so plentifully provided with Provisions, from the 2 beforementioned Islands and the Continent, that in spight of the Blockade of the *Dutch*, a Hog was then sold for a Crown, 6 Sucking Pigs, 10 Pullets, or 8 wild Ducks for the same price; but Beef and Mutton is a great rarity here. There is a certain Fountain representing *Lucrece*, out of whose Wound issues forth as much fresh Water as supplies the whole City; the Ships provide themselves with fresh Water out of a Rivulet, which coming out of the Rock falls into the other River near the Castle.

Goa without Walls. The City has no other Defence but the River, having neither Gates nor Walls. The Buildings are generally very handsom, and Persons of Note shew a great deal of Magnificence here, both in their Buildings and Furnitures.

The Inhabitants. The Inhabitants are of 2 sorts; either *Castizes*, or *Mestizes*; the first are such as are born here of *Portuguese* Father and Mother; the second those who were begotten by a *Portuguese* Father and *Indian* Mother; the last are inclining to an Olive colour, and in the third Generation become as black as the Natives of the Country, which is also observable in the fourth Generation of the *Mestizes*, tho' there is not the least mixture among them. The *Portuguese* are distinguished into several Ranks, *Titulados* are those in Publick Employments, *Fidalgos da casa del Rey*, are Gentlemen in Ordinary of the King's Houshold; *Mocos Fidalgos*, are the Sons of the *Titulados*, admitted to Gentility by the King; the *Cavalleros Fidalgos*, and *Escuderos Fidalgos*, are simply Gentlemen; those call'd *Mocos da camra*, or Grooms of the King's Chamber, pass also for Gentlemen. All the rest are *Hombres Honrados*, and *Soldados*; the first of which are Merchants, and appear as great as any Gentlemen, there being scarce any thing here except Taylors and Shoemakers but what are served by Slaves. No Person of Quality ever goes on Foot here, but either on Horseback, in a Litter, or *Gondole* (Boat), one Slave among the rest constantly attending him with an *Umbrello*.

The Pride of the *Portuguese* of *Goa*. The *Portuguese* have always had the Reputation of being a very proud Nation, but those of *Goa* are so to such an excess both in their Gestures and Actions, as is scarce to be express'd; however they are very Ceremonious to one another, to such a punctilio, that if for instance in a Visit, any thing should be omitted that is judged Customary, and belonging to the Person that requires it, such a stain could not be wip'd off without a Cudgeling or blood-shed; with the first they are very liberal towards inferior Persons, if they think them to have been wanting in the respect due to those of a better Rank.

Their Winter Season. The S. W. Winds which begin to blow here towards the end of *June*, bring the Winter Season along with them, which continues for 4 Months all along that Coast, from *Din* as far as the Cape *Comory*; at which time the frequent Tempests make the Sea so turbulent, that there are but few Havens where Ships can ride with safety. This is the more to be admir'd, inasmuch as in the same Months the Coast of *Coromandel*, which extends along the same *Peninsula* on the other side, and lies under the same deg. of Elev. nay, in some Places is not above 20 Lgs distant from the Coast of *Malabar*, is bless'd with the most pleasing Season of all the Year. This is manifest to those who travel from *Cochim* by Land to St. *Thomas*, when they must cross the Mountain of *Balagatta*, which divides this Demi-Isle (as the *Apennine* does *Italy*) and no sooner come to the top of the Mountain, but they see on one side a most clear and temperate Air, and the Country on the other side covered with Waters by the continual Rains and Fogs; the Ships that go from *Ormus* to the Cape of *Rosalgate*, have made the same observation, for no sooner are they pass'd the Cape, but the fair Weather that has attended them thither, changes on a sudden into dreadful Tempests, so that it is evident there are but 2 Seasons in this Country; and the E. and W Winds rule alternatively once a Day; for the *Theremas* or Land-winds coming from the E. blow from Mid-night till Mid-day, but don't reach above 10 Lgs into the Sea, whereas the Sea-winds coming from the W. (call'd *Virasons*) blow all the rest of the day.

Diseases. This so sudden change of the Season, as well as constant variation of the Winds prove the occasion of many Distempers, especially that call'd *Mordexin*, which kills without delay, besides Fevers and Bloody Fluxes, the only Remedy against which here, is bleeding. The Plague is not so much as known in the *Indies*, but the Pox destroys a great number, and above all among the *Portuguese*; for, tho' the Country it self furnishes them with Remedies against this Distemper, yet the inclinations betwixt Men and Women to one another are so strong and violent here, that they won't afford themselves a proper time for the cure of this Disease, which is thus propagated beyond all bounds. As the Women of these Parts have an excessive inclination to white Men, and are always kept under constraint, they will venture very hard to encompass their ends; and to pursue this end, frequently make use of the Herb *Doutro*, *Doutry*, or *Datura* (as it is called by the *Indians*) to stupifie their Husbands Senses, to get an opportunity of enjoying what they so much delight in. This Herb call'd by the *Turks* and *Persians Datula*, is a kind of *Stramonea* according to *Garcias ab horto* and *Christopher d'Acosta*, being somewhat like our Bearsfoot, and growing in the *Indies* in shady places; of this they extract the Juice whilst it is green, or only take the Seed beaten to Powder, and mixt it either with Preserves, or in the Drink of whom they intend to stupifie; which it does effectually for 24 hours, after he has taken it, being deprived of all Sense or Motion, tho' with his Eyes open; unless some cold Water be apply'd to the Soles of his Feet, which recovers him as it were out of a sound sleep. 1639.

The Women. Scarce any *Portuguese* or *Mestize* Women are seen to walk in the Streets, but if they go abroad upon necessary occasions, they are carried in *Palanquins* or Litters, and so closely guarded, that it is impossible to speak to them. They appear abroad richly attired in Velvets, Silks, and Brocado's adorn'd with Jewels and Pearls, tho' at the same time they go at home in their Hair only, with nothing over them but a Callicoe Smock reaching down to the Navel, and a painted Callicoe Petticoat.

Their Fare is not much better, being Rice soak'd in Broath, Salt Fish, Mangoes, and such like Food. They have certain black Earthen drinking Vessels, call'd *Gorgolettes*, which have Pipes coming up as high as the Brim, by which they suck the Water out of the Bottles. As Chastity is a Vertue here among the Women, produced rather by Necessity than Inclination, so their Husbands are extreamly Jealous of them, notwithstanding which they will contrive all possible means to have their satisfaction in spight of the danger that attends it: This must in a great measure be attributed to their idle Life, having nothing to do to spend their time but in chewing of *Betele*, and Cloves, and Nut-megs. A remarkable instance of this affection is the Love the *Indian* Women bear to the Children begotten by an *European*, which is such, that they would rather die than part with them.

The *Portuguese* Soldiers at *Goa*. The Soldiers of *Goa* live at a very odd rate, being not listed under any certain Companies or Officers, unless in time of War, but in time of Peace are at liberty to seek their Fortune where they best can, as having no other Pay but what perhaps their former Officers allots them voluntarily towards their Subsistance, that they may keep them at hand upon all occasions. You shall see 10 or 12 of them live in a Hut, having not above 2 or 3 Suits of Clothes among them all, which they wear by turns when they go abroad a begging or seeking their Livilihood where they can best meet with it.

Their Marriages and Christenings. The *Portuguese* shew a great deal of Magnificence in their Marriages and Christenings. The Bridegroom accompany'd by all his Friends and Relations, goes to Church on Horse-back, the Bride following him in a Litter; both have two God-fathers, who presenting them to the Priest after the Benediction is given, they return in the same manner to the House, but none are permitted to enter with the young Couple except the God-fathers, who go all together into a Balcony to give the Company thanks for this Favour. Their Christenings are performed with the same Pomp, save that they carry also an Ewer with a clean Napkin, a Salt-seller, a Silver Bason surrounded with Flowers, and a Wax Candle in which is put a piece of Gold or Silver for the Priest: But the God-father and Midwife are always carried in a Litter.

Their Slaves. The *Portuguese* entertain a great number of Slaves of both Sexes, them they employ both in their Retinue and about all other Businesses; as for instance, in selling of Fruits and other things, when they will be sure to pitch upon handsom Wenches, which draw sooner the Customers to them, and consequently sell at a dearer rate; all that the Slaves get belongs to their Masters, even their Children, whom they either keep or sell like Cattle, unless the Fathers redeem them

1639. them within 8 or 10 Days after they are born. They keep them at a very easie rate, their Diet being miserable, and their Clothing only a little course Callicoe to cover their Privy Parts.

The Inhabitants of the Country.

The Inhabitants of the circumjacent Country are *Pagans*, and generally *Benjans*, who dwell in Straw Huts, with little Doors, which serve also for Windows; their whole Furniture consists in Matts made of Rushes, which serve both for Beds and Tables, a Drinking Cup and Oil Pitcher made of Fig-leaves, their daily food being Rice.

They are so Superstitious, that if after they have said their Prayers, they go abroad, and meet with a Crow, they return home, and stir no more that Day. Upon the Roads they constantly pay their Devotions to the *Pagodes*, which the *Portugueſe* connive at; their Inquisition going no farther than to Christians, or such as have been so.

Their Ceremonies and manner of living is the same with those of *Decan*. One thing is remarkable among them, that their Physicians are in so great esteem at *Goa*, that they are generally preferr'd before the *Portugueſe* themselves, and are permitted to have their Umbrellos carry'd along with them, a Privilege allow'd here to none but Persons of Quality. They will not eat with any body except of their own Sect; not even in a Journey, tho' they should be driven to the greatest extremity. There live at *Goa* many *Decanins* and *Canarins*, who keep Shops there, and exchange their Provisions and other Commodities they bring, for Porcelain, Velvet, Damask, *China* Commodities, Silks and Callicoes. They have also many Jewellers, Goldsmiths, Gravers, and other Artizans of this kind at *Goa*, who exceed all the *Europeans* in that kind.

The *Canarins* live either upon Husbandry or Fishing; some maintain themselves by managing the Coco-trees, some by washing and whitning of Callicoes. The Husbandmen furnish the City with Fowl, Milk, Fruit and Eggs. Their Wives are so hardy, that they never make use of a Mid-wife, and are no sooner delivered but they wash the Child themselves, wrap it up in a few Fig Leaves, and go about their business again as before, which makes them so strong and healthy, that they frequently live to 100 years of age. They are so excellent at swiming, that nothing is more common than to see them overturn in their little Boats, which hold no more than one Person, and to swim ashore without any harm, or loss of the Boat. They burn their Dead, but their Women are under no obligation to burn themselves with their Husbands; but only make a Vow of Widowhood.

Good Swimmers.

The Jews of *India*.

Here are two sorts of *Jews*, either born in the *Indies*, both by Father and Mothers side, or come hither from *Palestine*, the last of which commonly speak good *Spanish*; they enjoy a perfect liberty of Conscience, and have their own Synagogues.

The *Mahometans* here Trade most in Spices to the *Red-Sea*. The *Portugueſe* Traffick to *Bengala*, *Pegu*, *Malacca*, *China* and *Cambaya* in *Guzuratta*. From 7 a Clock in the Morning, till 9 (when the Heat begins to encrease) you see all Persons of Quality and Gentlemen meet in the Market-place to divert themselves, partly with hearing of News, or else to see what is to be bought and sold there; Merchants and Tradesmen have their peculiar Streets, or Stations assign'd them according to their different Professions; But their greatest Profit is in exchanging, and buying or selling of Money, especially the *Spanish Ryals*, and *Persian Laris*.

Their Money.

As to their Coin, it is of divers sorts; their smallest Money is of Tin, having a Globe on the one side, and on the other 2 Arrows croswise; 8 of these *Basoracques* make a *Ventin*, 5 whereof make a *Tanghe*; 5 *Tanghes* make a *Seraſin* of Silver, which makes 300 *Reis*, six *Tanghes* go to a *Pardai*. The *Seraſin* has on one side St. *Sebastian*, and on the other a Quiver full of Arrows. There is also a *Seraſin* of Gold coin'd formerly at *Ormus*, the Metal of which exceeds in fineness any other Coin in the *Indies*. They have also *Simeones* of 6 *Tanghes*, and *Pagodes* of 14, 15, and 16 *Tanghes*.

Customs.

Foreigners are obliged to pay 8 *per Cent.* of all Commodities imported or exported, but great Moderation is used in the Taxations; besides that, if a Merchant happen to export the same Commodities for want of Sale, they are allowed to transport them without paying any further Custom; they have also a way of entring the Commodities they buy at *Goa*, under the Sellers Name, and so it passes Custom-free.

The Vice-Roy who was there at our time, was one *D. Pedro de Silva*, who was of no great Aspect, but was for the rest served in the same State as a King. This Office is never continued above 3 Years in one Person, which is sufficient to enrich him even to a very high Degree: For he has the Management of the King's whole Revenue, who is at the Charge of keeping his Court; and in the Progress he makes once a Year for 60 or 80 Lgs round, he receives vast Presents from the Neighbouring Princes and Governors; for though he has his Council of State, and Courts of Law and Equity, yet is he the sole Judge of all Civil Causes, unless they be of very great consequence, when an Appeal lies to the King; but in Criminal Cases no appeal is admitted, if the Person be under the degree of a Gentleman; for these must be sent with the Information brought against them to *Portugal*. The Vice-Roy at his Arrival, always lands first in the Isle of *Bardes*, from whence he sends his Deputies to his Predecessor, who thereupon quits the Palace. 1639. The Vice-Roy of *Goa*.

Jan. 22. The *English* Chief Director having sent away the 2 Ships that came along with us, to *Suratte*, to carry thither the Money he had received at *Goa*, we hois'd Sail; in the Evening we saw the whole *Dutch* Fleet under Sail, whence we judged that the Admiral, whose Name was *Van Ceulen*, would have come aboard of us, as he had promised he would; but we lost sight of them by Night. They continue their Journey.

Jan. 23. In the Morning we had sight of them again, and supposed that they steer'd their Course towards *Ceylon*, to assist that King against the *Portugueſe*. About Noon we found our selves out of sight of the at Land at 13 deg. Lat. We intended to go for the Coast of *Malabar*, upon information that an *English* Ship richly laden, coming from *Bantam* was taken by these after a brave defence, in which it had blown up above 1200 of the *Moors* after they were entred the Ship; our intent was to redeem the Master and the Mate with 14 Prisoners that were taken aboard her, but coming the same night to an Anchor in the Harbor of *Cananor*, we found three *English* Ships, the *Dragon*, the *Catharine*, and the *Seymour*, Commanded by Captain *Weddel*, a very experienced Sea-Officer, who had served at the taking of *Ormus*, by whom being inform'd that most of those Prisoners were set at Liberty, we resolv'd to leave the Coast of *Malabar*.

The City of *Cananor* is inhabited by *Malabars*, a People that inhabit that Coast from the City of *Goa* as far as the Cape *Comory* or *Comorin*. But the *Portugueſe* have a good Fleet at *Cananor*. All that Tract of Land is very fertile in Spices, but especially in Pepper, which is esteem'd better even than that which is brought from *Sumatra* and *Java*. They go for the most part naked, except that they cover their Privy Parts, have holes in their Ears, and are like the *African Moors*, except that their Lips are not quite so thick. Their Hair they tie in a knot upon the Crown of their Heads, and let the Beard grow without any trimming, which makes them appear more like Monsters than Men; neither is their internal Disposition unanswerable to their external Appearance, being in effect a very uncivilized and barbarous Generation, and making, for the most part, Profession either of Piracy or Soldiery. They are rather fierce than brave, handle their Bows and Arrows, as also their Swords and Bucklers with sufficient dexterity. They have their particular King, who being of the Sect of the *Bramans*, is also their High Priest, and stiles himself *Zamorin*, (Emperor) of *Cananor*, and *Calicut*. The Malabars.

The *Nayers* are the Gentlemen of the Country, who by their Bracelets and Rings are distinguished from the *Polyas* or vulgar sort; these last being obliged to go out of their way, and pay them a peculiar respect as they pass by. I was told, That at the time of the first Settlement of the *Portugueſe* in those Parts, the *Nayers* pretended to have the same honour from the *Portugueſe*, which these (who were no less proud than the others) refusing to comply with, it was agreed the difference should be decided by a single Combat, betwixt a *Portugueſe* and a *Nayer*, in which the first having got the better, the *Nayers* ever since pay the same respect to the *Portugueſe*, as the *Polyas* do to them. They have among other Privileges this, that they may freely enter the Houses of their Comrades, and please themselves with their Wives and Daughters, the Signal being to leave their Sword and Buckler at the Door, which done, no body, not the Master of the House will enter to disturb them: But a *Nayer* will never degrade himself so far as to have any Com- The *Nayers*.

merce

1639. merce with the Wife of a *Polyas*. The *Malabars* uſe Bodkins wherewith they write upon the Bark of Co-co-Trees; their Characters being quite different from thoſe of the other *Indians*, are underſtood only by the *Bramans*. The King of *Calicut* never eats or drinks any thing but what has been preſented before to his *Pagode* or Idol; The Inheritance to the Crown does not fall to the Son, but his Siſters Son, foraſmuch as the *Bramans* here have the firſt Fruits of the Brides Virginity, the Children are ſuppoſed to be begotten by them.

As to the City of *Cochim*, notice muſt be taken, that there are two of that Name in the ſame Kingdom of *Cochim*, one whereof is inhabited by *Malabars*, and lies upon a great River; the laſt, of which we now ſpeak, lies upon the Coaſt, and is under the ſubjection of the *Portugueſe*, at 20 deg. on this ſide of the Line; having the Sea to the W. and being ſurrounded on the Land ſide with a Foreſt of certain black Trees, which the Inhabitants hollow out and make Boats of them, and will go with them as far as *Goa*. The entrance of the Harbour is Rocky, and conſtantly dangerous. The Rains of the Winter Seaſon which ſwell the Neighbouring Brooks, force ſo much Earth during that time into the Mouth of the Harbour, that it is quite ſtop'd up, and makes it quite unpaſſable till the Wind which changes with the Seaſon, carries the ſame into the Sea. The *Portugueſe* buy the Pepper here from the King at a certain rate, who is one of the moſt Potent Princes of all thoſe Parts, being able to bring into the Field 100000 Men, moſt *Nayers*; Who are obliged to appear in Arms at their own Charge.

The King of *Cochin.* His Subjects are ſomewhat more civilized than the other *Malabars*, but obſerve the ſame Rule in their Marriages concerning the *Bramans*, and conſequently in reſpect of their Succeſſion. The chief Trade of *Cochin* is in Pepper, Ginger, and Cinnamon.

Emperor of the *Malabars.* The *Malabars* had formerly but one King, till *Sarama Perymal*, who alone commanded on all that Coaſt from *Goa* to *Comori*, having embraced the *Mahometan* Religion, and reſolved to ſpend his Days near the Sepulchre of the Prophet, divided his Dominions among his neareſt Friends, under condition, that the Kings of *Cananor*, *Cochin*, and *Chaul*, ſhould pay homage to the King of *Calicut*, upon whom, for that reaſon, he beſtowed the Title of *Zamorin*, or Emperor: But all this time the King of *Cochin* is much more Potent than he.

Jan. 26. We left *Cananor*, and the next Day diſcover'd 18 Sail of Ships, which making up towards us, we began to ſuſpect for Pirates, as indeed they proved. We had juſt time enough to put our ſelves in a Poſture of Defence, when they began to come pretty near us, but did not think fit to attack us till Midnight, when the Moon ſhining very bright, they ſurrounded us on all ſides, but were ſo warmly received, that we ſunk 2, and diſabled 3 or 4 more, which made them think of retreating; We paſs'd that Night in ſight of the Fort of *Cochin*, and the 28th. ſaw no more than 14 of theſe Pirates following us at a diſtance; we continued our Courſe with a fair Gale, in ſight of the Cape of *Comorin*, to the S. E. of us, being the moſt Southern part of the *Indies*, known among the Ancients by the Name of *India*, on this ſide the *Ganges*. The next following Night the *Malabars* made a ſhew as if they intended to venture the other bruſh with us; but a Volley of Shot, tho' without Bullets, ſet them a going, ſo that we heard no more of them.

An Engagement with the *Malabar* Pirates.

Paſs in ſight of Cape *Comorin.*

The Iſle of *Ceylon.* The 29. We came within ſight of the Iſle of *Ceylon*, at the very point of which we were becalm'd for three Weeks. This Iſle extends from the S. E. to the N. E. betwixt the two Capes of *Comorin* and *Negapatan* (at 11 deg. towards the Coaſt of *Coromandel*) about 10 Lgs from the Continent, its length being 60 Lgs, and its breadth 40. its circumference 250, and according to the report of the Inhabitants, its compaſs was much larger before the violence of the Sea had carried away a large part of Land on the ſide towards *Comorin*. It is the richeſt and moſt fertile of all the *Indian* Iſlands, which I ſuppoſe to be the *Taprobane* of the Ancients, tho' I am not ignorant that ſome of our Modern Geographers make the Iſle of *Sumatra* the *Taprobane* of the Ancients, of which more hereafter.

The *Taprobane* of the Ancients.

Its Deſcription. I did not without reaſon call the Iſle of *Ceylon* the richeſt and moſt fertile of all the *Indian* Iſlands; it being unqueſtionable that it not only has great plenty of every thing the other Iſlands produce, but beſides this whole Foreſts of Orange, Limon, and Cinnamon Trees, which emit their fragrant ſmell at a great diſtance into the Sea; Beſides that there is no precious Stone but what it affords, except Diamonds; Pearls they take alſo here in abundance, but are not altogether ſo fine as thoſe of *Baharam*, in recompence for which it affords the fineſt Ivory in the World. 1639.

The firſt diſcovery of it is owing to the *Portugueſe*, 1506. when *Lawrence*, Son of *Franciſco Almacida* made a Treaty with one of the Kings of the Iſland, ſince which time they took care to fortifie themſelves in the Town of *Colombo*, at 7 deg. on this ſide of the Line, but were chaſed thence, and conſequently from the whole Iſland by the *Dutch*, 1657. The *Dutch* did not Traffick here till 1602. under the Reign of *Fimala Derma Suriada*, King of *Candy*, the moſt Potent, and in a manner, the only Sovereign Prince of the whole Iſland; who aſcended the Throne in a very extraordinary manner; For the Throne of *Candy* being become vacant by the Death of *Derma*, who from a Baſtard was advanced to that high Dignity, the *Portugueſe* took this opportunity to eſtabliſh themſelves in *Ceylon*; but *Fimala Derma Suriada*, the Son of one of the chiefeſt Men of the Kingdom, who had been Educated among the *Portugueſe*, and baptized, and by their Intereſt advanced to the Dignity of High-Conſtable, diſliking the encroachments of a Nation whom he knew would be in a little time for graſping at all, had ſo gain'd the Affection of the Soldiery, that he prevail'd with them to kill all the *Portugueſe* in the Town of *Candy*, and to declare open War againſt them, which being done, he was by the *Cingales* (Nobility) declared King. The *Portugueſe* had among them a certain Princeſs, the next Heireſs to the Crown, who was baptized and named *Catharine*; *Pedro Lopez de Souſa*, being the General of *Malacca*, for the *Portugueſe*, reſolving to enter that Kingdom with a good Army, ſtrengthning his Intereſt, brought the ſaid *D. Katharina* along with him, and having cauſed her to be declared lawful Heireſs of the Kingdom of *Candy*, made himſelf Maſter of the Capital City of the ſame Name; but being cloſely block'd up by *Fimala Derma*, who intercepted his Foragers, and cut off his Proviſions, found himſelf conſtrain'd to come to a Battle, 1590. in which he was put to the Rout, he himſelf kill'd upon the ſpot, and *D. Katharina* taken Priſoner by *Fimala*, who afterwards to ſtrengthen his Title to the Crown, married her.

First diſcovered by the *Portugueſe.*

How *Fimala Derma* aſcended the Throne of *Candy.*

A Battle betwixt the *Portugueſe* and thoſe of *Candy.*

Four Years after the *Portugueſe* made a ſecond Attempt againſt *Candy*, but not with much better ſucceſs, for tho' they were not abſolutely routed, yet were they ſo haraſſed, that they did not think fit any longer to be at open War with them. The *Dutch* at their firſt Settlement had not much better Fortune, for tho' the King received, 1604. their Admiral with a great deal of Civility, yet in the next following Year having commanded their Vice-Admiral with 50 of his Men to be put to death, the *Dutch* laid aſide their deſign of Trading there till having found an opportunity of gaining the Fort *de Punto de Gallo* from the *Portugueſe*, and fortifying the Harbour of *Negambo*, they began to eſtabliſh themſelves there, and at laſt accompliſhed it by the taking of *Colombo* from the *Portugueſe*.

A ſecond Engagement.

The *Dutch* Eſtabliſhment in *Ceylon.*

The King of *Candy* is the moſt Potent and moſt Abſolute of all the other Princes in the Iſle of *Ceylon*; He takes great delight as well in the *European* way of Building as in their Fortifications. This Kingdom is ſituated all along that River, upon which lies the City of *Vintane*, which ſerves for a Harbour to the King's Ships.

The Kingdom of *Candy.*

The Inhabitants reſemble the *Malabars*, but that they are not quite ſo black; they generally go naked to the Navel, except that ſome uſe *Portugueſe* Doublets; they alſo wear Pendants in their Ears, and Ponyards on their Sides.

Its Inhabitants.

The Women likewiſe go with their Breaſts uncovered, but for the reſt are very modeſt both in their Cloathing and Converſation; dreſſing their Heads much like the *European* Women, with their Hair laid cloſe behind, and tied in Treſſes. They appear in Gold and Silver colours, with Rings upon their Hands, Feet and Legs, beſet with Precious Stones. They live conveniently enough in their Houſes, their Wives being good Houſe-wives, and eſpecially well skill'd in Cookery; the *Cingales* or Nobility are ſo much addicted to an idle life, and effeminacy, that they are neither fit for War nor any thing elſe.

Women.

Ceylon is beyond all diſpute the moſt plentiful Iſle of all the *Indies*; Nothing is to be named either of Proviſions or Fruits, but what is very cheap here; tho' they are *Pagans* they eat of all things in general, not

Fertility.

even

1639. even excepting Pork (unless it be the Flesh of an Ox or Cow. The *Mahometans* enjoy a full Liberty among them, and the *Pagan* Inhabitants abstain from Wine as well as they.

Religion. They have a great Veneration for their *Bramans*, marry their Maids at 10 or 12 years of age, and burn their Dead. *Fimala Derma*, whom we spoke of before, had got as much Christianity as could be supposed to be got among the *Indian Portugueſe*, which he soon laid aside, so that his Successors continued in their Idolatry. Some of the Inhabitants worship the Head of an Elephant cut in Wood or Stone, who, they say, outdo Mankind in Judgment, and therefore pray for Wisdom to them. They lay up every Day a certain share of their Provisions in a Basket kept for that purpose, for their *Pagodes*, and hold it as a point of Faith, that the World will not perish, as long as their Grand Temples, which may be discovered at a great distance at Sea, betwixt *Punto de Gallo* and *Monte Calo* shall remain standing. They have another Opinion concerning a certain Mountain in this Island, named *Pico d' Adam*, where they say the first Man was created, and that the Spring on the top of the Mountain arose from the Tears *Eve* shed for *Abel*, and that the Isle of *Ceylon* was the Terrestrial Paradise. This Tincture of Christianity seems to give us sufficient hopes, that among a People docile enough in themselves, the Christian Religion might be established, if People were as forward in the work of Salvation, as to gain Riches.

Kings Tributary to the Portugueſe. There is scarce any other King in the Isle of *Ceylon*, except he of *Candy*, but what pays some small Tribute by way of acknowledgment to the *Portugueſe*, of which the King of *Matecalo* pays no more than 50 Ducats *per Annum*. *Ceylon* affords very good Pepper; but their Staple Commodity is Cinnamon. The Kingdom of *Candy* has certainly both Gold and Silver Mines, but are not cultivated, by an expreſs Inhibition from the King; Neither must their Precious Stones be sold to any but the King, but as they have such plenty of them, that they are found among the Gravel that is washed down from the adjacent Mountains, and carried along with the Currents of the Water, so it is impossible to prevent their being sold under hand to Strangers.

Gold and Silver Mines.

This Isle also furnishes sufficient store of Timber and Stone for building, of Corn, Oil and Wine, if they would take the pains to cultivate the Vines, Cotton, divers Roots for the use of Dyers, Ginger, Cardamom, Mirobalans, Corcoma, Nutmegs, and divers Medicinal Drugs; and of Rice they have such store, that they furnish the whole Coast of *Coromandel* with that Commodity. The *Dutch* buy the Cinnamon here at the rate of 128 Livres the hundred weight.

The distance and situation of the chief Maritime Places of *Ceylon*, are thus: From *Punto de Gallo* to the W. of *Alican* 9 Lgs, *Verberin* 1 Lg, *Calutre* 3 Lgs, *Colombo* 6 Lgs, *Nogombo* 5 Lgs, *Le Gilan* 5 Lgs, *Putalon* 10 Lgs, *Mannar* 18 Lgs, to the Coast of *Matecala*, on the East side of *Belingen* 4 Lgs, *Mature* 2 Lgs, *Dundule* 1 Lg, *Tammadur* 1 Lg. *Halpilana* 2 Lgs and a half, *Attalle* 3 Lgs, *Velecche* 9 Lgs, *Tansilir* 7 Lgs, *Trincoli* 12 Lgs, *Matecalo* 5 Lgs, and thence to the River *Trinquamale* 10 Lgs. From *Colombo* to *Candy*, you must go by the way of *Tranquero grande*, *i. e.* the great Fort 3 Lgs, *Maluana* 2 Lgs, *Gronably* 3 Lgs, *Settavecca* 3 Lgs, *Gronenelle* 2 Lgs, *Mumera tuate* 4 Lgs, *Duiely* 3 Lgs, *Matappety* 2 Lgs, *Alteonnar* 1 Lg, *Ganiattany* 1 Lg, *Ballene* 1 Lg, *Cady* 1 Lg. From *Matecalo* to *Candy* you go to *Aldea de Nore* 1 Lg, *Occatoty* 2 Lgs, *Viador* 2 Lgs, *Neguritti* 5 Lgs, *Nilvale* 2 Lgs, *Vegamme* 4 Lgs, *Vintane* 6 Lgs, *Vendro* 5 Lgs, *Candy* 4 Lgs.

Whilst we were becalm'd near this Isle, I had the opportunity of making an enquiry of our President and some Jesuits who were on board us, and had spent most of their Days in the *Indies*, concerning those Parts I had not seen, according to whose Relation I thought fit to insert the following account.

The Malabars. Near the Cape of *Comorin*, along the Coast of *Malabar*, for a Tract of near 140 Lgs by Sea, extend the Isles (by some accounted 1000 in number) call'd *Maldivus*, or *Maldivar* by the *Portugueſe*; having the Cape to the N. some of which, being so very low, that they are often subject to Inundations, are not inhabited, others are. The *Malabars* are of Opinion, that they were torn from the Continent by the violence of the tempestuous Waves of the Sea, which in some Places is at so slender a distance from the Continent, that a brisk active Fellow might leap over it. The Capital City which has given its Name of *Maldives* to all the Islands, is built upon 4 small Isles, being the Residence of the King, who commands over all the rest, and a Place of good Trade, tho' they produce naturally scarce any thing but Cocoes, but the Industry of the Inhabitants supplies, in some measure, the defect of Nature here, there being not any Nation in the *Indies* more ingenious in making Garments of Silk and Thread (brought thither from the Continent) than they. 1639.

The Coast of Coromandel. The Coast of *Coromandel* being the most Eastern part of the *Indies* on this side of the *Ganges*, is divided from the *Malabar* Coast by the Mountain of *Balagatta*, its extent being 100 Lgs along the Coast from the Cape *Comorin*, or rather the Point of *Negapatam*, as far as the River *Nagund*, and the Town of *Masulypatan*. As it has excellent good Harbours, and the best Roads for Anchorage in the *Indies*; so it serves for a safe retreat for such Vessels as are by the tempestuous Winter Season forced from the Coast of *Guzuratta* thither; where the Climate and Weather is very calm and benign at the same time.

The Story of St. Thomas. The *Portugueſe* are Masters of the Town of St. *Thomas* on this Coast, at 13 deg. 32 min. on this side the Line; they say, that when they first possess'd themselves of *Cochim* and *Cranganor*, the Inhabitants of this Coast, who were Christians of the *Greek* Religion, implored the Protection of the King of *Portugal* to back this Tradition, That St. *Thomas*, one of the 12 Apostles, after he had taught the Gospel in the Kingdom of *Narsinga*, Petition'd the King to give him leave to build a Chapel for the performing of Devotion, which being strongly opposed by the *Pagan* Priests, it happened that a prodigious piece of Timber being lodg'd at the very entrance of the Harbour of the City of *Meliapour*, which hindred the free passage of all Ships, a trial was made by Elephants and all other ways, even by consulting the Magicians themselves, to remove it thence, but in vain; whereupon the King issuing his Proclamation, by which he offered a considerable Reward to such as would undertake to clear the Harbour; St. *Thomas* offered his Service, reserving to himself no other Reward than the piece of Timber: The Day appointed for this purpose being come, and the Saint appearing without any Instruments to effect it, than his Girdle, which he fastened to the Beam, all there present laugh'd at his endeavours; but he no sooner began to pull, than that vast piece of Timber, which could not be moved before by the strength of so many Elephants, followed without the least difficulty, at which the King being surprised to the highest degree, permitted him to build the Chapel according to his request; which so incens'd the *Bramans*, that they set certain People to Murder him, whilst he was at his Devotions in the said Chapel.

The Indian Christians.

Maffeus says, that by special command of *John* King of *Portugal*, the Bones of this Saint were search'd for, and found on the Coast of *Coromandel*, and thence transfer'd to *Goa*, where a very fine Church was erected to his Memory. On the other hand both *Rufinus* and *Socrates* affirm, that St. *Thomas* suffered Martyrdom at *Edessa* in *Mesopotamia*, and that they used to go on Pilgrimage to his Sepulchre there. The Town of St. *Thomas*, tho' none of the biggest, yet is well built, most of the Houses being of Stone; the Church has no Steeple, it contains about 600 or 700 Inhabitants, *Portugueſe* and *Mestizes*, and some *Armenian* Merchants; the *Indians*, *Pagans*, and *Mahometans* living at a place called *Meliapour*, seated upon a Rivulet 2 Lgs to the N. of St. *Thomas*, which was formerly the Capital City of the Kingdom, but is now reduced to a very indifferent condition. *Lib. 8. Hist. Indic. Hist. Eccles.* *Meliapour.*

From *April* to *September*, whilst the S. and S. W. Winds blow upon this Coast; the Road here is very safe, but all the remaining part of the Year, small Vessels are obliged to shelter themselves within the River of *Paleacatte*, and the greater in the Harbor of *Negapatan*. There is 5 fathom Water within Cannon-shot of the Town, but makes a very ill Landing-place, by reason of the roughness of the Sea.

The *Dutch* have a considerable Traffick on this Coast, but especially at *Petlapouli*, or *Nisapatan*, and at *Paleacatte*, where they have the Fort *Gueldria*.

This whole Country was formerly divided into 3 separate Kingdoms, *i. e.* of *Coromandel*, *Narsinga* and *Bisnagar*, which is now subject to one Prince, whose Residence is at *Bisnagar*, and sometimes at *Narsinga*.

The

1639.

The Kingdom of *Orixa* begins above the Town of *Masulypatan*, extending from the River of the same name to that of *Guenga*; the *Dutch* include this in the Coast of *Coromandel*. *Masulypatan* and *Golconda* are its 2 chief Cities, the first considerable for Traffick, the last for being the ordinary Residence of its Kings; it produces abundance of Salt, and some Diamonds, among which all that weigh above 5 Carrats belong to the King.

Bengala.

To the North of *Orixa* lies the Kingdom of *Bengala*, whence the Gulph known to the Ancients by the *Sinus Gangeticus*, has got its Name. Their Traffick is in Rice, Sugar, Cotton, Calicoes; but especially in Silk, which for goodness exceeds all the others in the *Indies*. Hence also are brought the finest Canes, and they have another sort of Canes, out of which they make drinking Vessels, and being lacqu'd will hold any liquid Matter, as well as Metal. Here grows a certain Herb, the Stalk of which is of the thickness of a Man's Thumb, having on the Top a large Button like a Taffel, this is spun out, and furnishes Materials for an excellent kind of Stuff, much esteem'd by the *Portugueſe*, who call this Herb *Herba de Bengala*.

The Inhabitants.

The Inhabitants are *Pagans*, leading a very barbarous Life, Thieving and Adultery being their ordinary Vices, tho' severely punish'd; they worship the *Ganges*, out of an Opinion that its Water cleanses them from all their Impurities, which is the reason, that the King of *Narsinga* sends for the Water he washes himself with, from that River.

Pegu.

The Kingdom of *Pegu* borders to the East upon *Bengala*, owing its Name to its *Metropolis*, there the King keeps his constant Residence; *Gaspar Balbi* tells us wonders of this Kingdom, which I had not the opportunity to see; and since others also have given us an account of what they have themselves observed there, I will only add, that the City is divided into 2 parts, *viz.* the New and Old City; the first of which is inhabited by Merchants, the second is properly the Residence of the King, and his Court; which is exactly four square, surrounded with a broad Moat, in which Crocodiles are kept for its better security; the Palace Royal is said to be as big as *Venice*, and separated from the City by its peculiar Fortifications, which have no more than two Gates. He keeps above 800 Elephants within the Castle, among which those for his own use, pay him reverence.

Palace-Royal.

If we may relie on *Balbi*'s Testimony, this King is next to the Emperor of *China*, the most potent upon Earth, being able to bring 1500000 Men into the Field, and 800 Elephants, who are for the most part maintain'd at the charge of his Lords. Among other Idols they have in their Temples, there is one of Massy Gold in the Chapel within the Palace, with a Crown beset with Precious Stones, on his Head, and one only of the bigness of a Plumb on his Forehead, with Pendants of an inestimable value in the Ears, a Scarf about the Waste, and cross the right Shoulder, and under the left Arm a Chain made all of Diamonds, and other Precious Stones. The same Chapel has two Silver Idols of the same shape, but 2 foot higher than the former, with Crowns beset with Gems, and a 4th. which exceeds all the rest besides, a 5th. made of a mixture of Copper and Brass, valued at a higher rate than the other four.

The King's Forces.

Idols.

Pegu affords more Elephants than all the rest of the *Indies*, they are taken by means of the Females, who intice them out of the Woods into the Stables, where they have Penns that holds but one of these Beasts, where they are kept till they are tam'd.

Their Arms.

The Arms of the *Peguans* are commonly Half-Pikes, made of Canes, short and broad Swords, and Bucklers and Helmets, made of boil'd Leather, laid double and Gum'd over with a certain Gum call'd *Achiran*, They are *Pagans*, believe one supreme God, who has a great many Vice-Gerents under him; whom they also acknowledge for Gods, and that they are the Authors of all good that happens to Mankind, as on the other hand, the Devil is the Author of all Evil, whom for that reason they worship to appease his wrath.

Religion.

The Day on which they do chiefly their Devotions, is *Monday*. They celebrate 5 Feasts in the Year, call'd by them *Sapan*. The 1st, call'd *Sapan Giacchi*, is celebrated by a Pilgrimage, by the King and whole Court 12 Lgs out of Town, with the utmost magnificence. The 2d. call'd *Sapan Carena*, is celebrated in honour of the Statues in the Royal Chapel, as is also the 3d. call'd *Sapan Giaioma Segieuon*. The 4th. call'd *Sapan Daiche*, is celebrated by the King and Court, by casting Rose Water at one another; and the 5th. call'd *Sapan Donon*, is a kind of race of Boats upon the River in the presence of the King and Queen.

1639.

When the King dies, they join 2 Boats together, and putting a Table in the middle of one, they lay the Corps upon the Table, under which they make a Fire of *Sandale* Wood, *Storax*, *Benzoin*, and other sweet scented Woods and Gums, which being sent down the Stream, the Priests attending, rejoyce and sing till the Flesh be burnt to Ashes, which they mix with Milk into a Paste, and so cast it into the Sea at the Mouth of the River; but the Bones they preserve and lay them up in a Chapel built for that purpose.

How they burn the Corps of their Kings.

Their Priests carry an empty Bottle on their Girdle, are clad in red Vestments, coming down to their Heels, with a Cloak reaching to their Hams over them, and wear a Hat to shelter themselves against the Sun-beams, their Heads being shaved. They go bare-footed, live by Alms like our Mendicant Friars, eat but once a Day, and sleep in the Forests in hanging Matts fastened to the Boughs of the Trees. They lead a very exemplary Life, and on *Monday* Morning early go about to invite the People to their Devotions; in their Sermons they exhort their Auditors to Morality; they have no aversion to those who turn Christians, but exclaim against the worshiping of the Devil, a Custom so deeply rooted among the *Peguans*, that with all their Arguments they are not able to dissuade them from it. They are in great Veneration among the most sensible Men of the Nation; their Corps are burnt like their Kings with Sweet Woods, the Ashes cast into the River, and their Bones preserved. *Pegu* has no other Corn but Rice, which it produces in such Plenty, that great part of it is sent to the Neighbouring Provinces.

Their Ecclesiasticks.

Sodomy was heretofore grown so general here, that one of the Queens of *Pegu*, to obviate this Vice, ordered a small Bell to be fastned betwixt the Skin and the Flesh by way of incision, to the Mens Yards; on the other hand the Women were to have their Virginity taken away by a certain Composition, which had the faculty of relaxing those parts, which most Women of Pleasure take so much pains to keep within the natural compass. She commanded also that all the Boys whilst young, were to be painted with a blew colour on their Posteriors, thereby to create an aversion to them; as on the other side the Women take all imaginable pains to provoke the Men to Venery, by covering their Privy Parts only with a thin Calicoe, through which upon the least motion you may see all they have. Men and Women delight in black Teeth. The King is sole Heir to all that leave no Children behind them, and even one third part of the Estates of those that have Children, belongs to him.

A peculiar Custom.

Pegu affords no other Spice but Ginger, and scarce any other Commodity is exported, except Rice and Silver, in exchange of which they bring thither Stuffs and Calicoes, Pepper, Cinnamon, Nutmegs, Opium, Sandale-wood, *&c.* They will pawn their Children to borrow Money, but if the Creditor enjoys them carnally, they are free, and the Debt is paid.

The Traffick of Pegu.

Siam, One of the next considerable Kingdoms in the *Indies*, at 18 deg. on this side of the Line, borders to the N. upon *Pegu*, and *Ava*, to the W. upon *Bengala*, to the E. upon *Patana*, whence the Coast (in which I comprehend the Gulph of *Siam*) runs N. to the 13th. deg. and a half, and turning to the S. to 12 deg. extends at a greater distance from the Sea, making a Semicircle of 450 Lgs. The Country is both very woody and mountainous, except towards the Sea side, where it is very fertile; and has divers convenient Isles and Harbours, besides some Islands in the Gulphs.

Siam.

The River *Menam* may vie for largeness with any other River of the *Indies*; for tho' its breadth is not very great, its length is such, that hitherto its source has remain'd undiscover'd. It runs from N. to S. through the Kingdoms of *Pegu* and *Ava*, and afterwards through *Siam*, where it falls by three several Chanels into the Gulph of *Siam*. It yearly (like the *Nile*) overflows the circumjacent Country for 5 Months, which renders the Rice Fields very Fruitful. Its Eastern Chanel, which lies at 13 and a half deg. elev. is most proper for Navigation, were it not for a Shelve of a Lg in length, which lying just at the Entrance of it, holds at above 5 or 6 foot water at low Tide; But at High-water holds 15 or 16, and in *September*, *October*, and *November*, 17 or 18 foot, for which reason it is that Vessels of any burthen anchor in the Road 2 Lgs from the

The River Menam.

Overflows every year.

1639. the Shelve; but such as may venture over the Shelve with High-tide, may go freely up the River as far as the City of *Banckock*, 6 Lgs from the Sea, and thence as far as the City of *India* 24 Lgs from the Mouth of the River; except in the beforementioned Mouths, when the River is unnavigable.

This Kingdom is very populous, especially those Provinces bordering upon the Seas. The most considerable Cities are *India*, or *Odya*, the *Metropolis* of the whole Kingdom; next *Camboya*, *Campaa*, *Sincapura*, *Picelouck*, *Surkelouck*, *Capheng*, *Soucethay*, *Kephinpet*, *Conseyman*, *Pytsyay*, *Pitsedi*, *Lidure*, *Tenou*, *Mormelon*, *Martenoy*, *Lygor*, *Bordelong*, *Tanasserim*, where the *Portugueſe* drive a considerable Trade; *Banckock*, *Pipry*, *Mergy*, &c.

The City of *India*. The City of *India* is built upon an Island in the River *Menam*. It is the ordinary Residence of the Kings of *Siam*, having divers very fair Streets, with spacious Channels regularly cut; the Suburbs are on both sides of the River, which as well as the City it self, are adorn'd with many Temples and Palaces; of the first of which there are above 300 within the City, distinguished by their guilt Steeples, or rather Pyramids; and afford a glorious Prospect at a distance. The Houses here, as all over the *Indies*, are but indifferently built, and covered with Tiles. The Royal Palace, which is equal in bigness to a large City. *Ferdinando Mendez Pinto* makes the number of Inhabitants of this City amount (but with not much probability of Truth) to 400000 Families; it is look'd upon as impregnable, by reason of the overflowing of the River at six Months end.

The King of *Siam*. The King of *Siam* who takes among his other Titles, that of *Precau Salcu*, i. e. *Sacred Member of God*, has this to boast of, that next to the *Mogul*, he can deduce his Descent from more Kings than any other in the *Indies*. He is Absolute, his Privy-Counsellors, call'd *Mandorins*, being chosen and depos'd barely by his Pleasure; when he appears in Publick, it is done with so much Pomp and Magnificence, as is scarce to be imagined, which draws such a Veneration to his Person from the Common People, that even in the Streets as he passes by, they give him God-like Titles, and Worship.

His Greatness. He marries no more than one Wife at a time, but has an infinite number of Concubines; he feeds very high, but is drink is only Water, the use of Strong Liquors being severely forbidden by their Ecclesiastical Law, to Persons of Quality in *Siam*. As the Thirds of all the Estates of the Kingdom fall to his Exchequer, so his Riches must be very great, but what

Riches. makes it almost immense is, that he is the chief Merchant of the Kingdom, having his Factors in all places of Traffick, to sell Rice, Copper, Lead, Salt-Peter, *&c.* to Foreigners.

Mendez Pinto makes his yearly Revenue arise to 12 Millions of Duckats; the greatest part of which being laid up in his Treasury, must needs swell to an infinity in process of time.

Each City has its peculiar Court of Justice, from whence an Appeal lies to the chief Court in the City of *India*, consisting of a Lord-Chief-Justice, and 12 Judges; and sometimes to the Privy-Council it self, if the Parties will be at the charge of it. They have their Counsellors, Attorneys and Sollicitors, and the Causes are pleaded in the presence of both Parties. In Criminal Cases they proceed much after the *French* way; for, upon Information given, the Party accused is committed, and examined afterwards; and for want of sufficient Evidence put to the Rack, if there be very strong Circumstances; after which, the Judges either upon confession of the Fact, or sufficient Evidence, give Sentence, which is confirm'd by the King, unless he be pleased to pardon the Offender.

Their Punishments. Their Punishments are so severe, or rather cruel, that such as are used among us, are not as much as known here: For the slightest Crime deserves Banishment or Transportation; Theft is punished with the Amputation of Hands or Feet. The common way of Executing Criminals is, to cast them alive into boyling Oil. They have three sorts of Trials for want of sufficient Evidence; by Fire, Water, and Oil: In the

Trial of Fire, Water, and Oil. Water-trial, both Parties are let down to the bottom of the River, along a great Pole, and he who can stay longest under Water, obtains thereby his Justification, as does he who can hold his Hand longest in boyling Oil, in the trial of Oil: In the Fiery-trial they are to make 5 or 6 steps through a great Fire very slowly, 2 Men leaning very hard upon their Shoulders. But that which they look upon (as the most dreadful of all is) when in order to their Justification, they take a Pill of Rice only; over which the Priest has pronounced a certain Malediction; if he swallow it without spitting, he has clear'd himself to all intents and purposes, and his Friends carry him off in Triumph. 1639.

The Forces of *Siam* consist chiefly of the Militia of the Country, all his Subjects being obliged to take Arms when call'd upon, so that as occasion requires, he summons the 100th. the 50th. the 20th. the 10th. or 5th. Man; who, as well as the Noblemen with their Attendants, serve at their own Charges.

Their Arms. Their Infantry are pretty well Disciplin'd, but want the use of Fire-Arms, being provided only with Bows, Arrows, Swords, Pikes, and Bucklers. Their Horse are also but indifferently Mounted; their chief Strength consists in their Elephants, which are very well train'd to the Wars, and carry each 3 Arm'd Men. They are not destitute of Great Cannon, but have but little skill to manage them to the best advantage. They have also great numbers of Frigats and Gallies well provided with Guns, but the Gunners and Mariners are so unexpert in the Management of them, that they can't encounter any *European* Fleet with the least hopes of advantage; for which reason it is, that of late Years the *Siameſes* here have liv'd in continual Enmity with the *Portugueſe*: they have highly courted the Friendship of the *Dutch*, who were always ready to give them assistance against their Enemies. The King of *Siam* knowing that his chief Strength consists in his Elephants, keeps a greater number of them than any other *Indian* Prince; the Elephants of *Siam* being both for their Strength and Apprehension esteem'd above all the rest; they take them after the same manner as they do in *Pegu*, by sending divers Females into the Forests, who decoy them into the Stables, where they are tam'd, either by putting them into Pens exactly fitted to the bulks of their Bodies, or by tying their Legs to 3 or 4 tame Elephants.

White Elephants. It is to be observed that sometimes they meet with white Elephants in *Siam*, but they are so rare, and so much admir'd in those Parts, that in 1568. the King of *Pegu* being inform'd that the King of *Siam* had two white Elephants, he sent an Ambassador to desire he might have one of them, at what price he would be pleased to set upon him, which the King of *Siam* refusing to accept of, the King of *Pegu* entred *Siam* with a vast Army, and conquered it, making the King his Tributary, tho' with the loss of no less than 500000 Men. The *Siameſes* call the white ones the Kings of the Elephants, and attribute to them something of Divinity, for which reason also the King of *Siam*, when he meets with one, makes him to be serv'd in Vessels of Gold, allows him a good Attendance, and a Canopy to be born over his Body.

The *Siamites* Pagans. The King and his Subjects are *Pagans*, and have an infinite number of Idols of Gold, Silver, Stone, Wood, and other Materials, some 20, some 30, and 40 foot high, and among the rest one which sits, which if it stood at its full length, would be 120 foot high; their Temples have gilt Towers or Pyramids.

Their Ecclesiasticks. Their Ecclesiasticks are composed of a kind of Hierarchy, under the Direction of a High-Priest, residing in the City of *India*, were are at least 30000 Ecclesiasticks; they wear Garments of yellow Calicoe, and have their Crowns shaved. The most learned among them are chosen for Priests to preach in the Temples, and to sacrifice. They are under a Vow of Chastity upon pain of Death, but may change their Professions, and marry whenever they think fit. Each Temple has a kind of a Convent belonging to it, for the entertainment of a certain number of Priests, who attend the Service duly every Day Morning and Evening. They live for the most part upon Alms, like our Mendicant Friars. They have also a kind of Religious old Women, but these are not bound by any Vow, or peculiar Discipline.

Their Belief. They believe one Creator of the Universe, who governs the World by divers inferior Gods; they say that the Soul is immortal, and after it is purify'd by passing through several Bodies, is either condemned to eternal Torments, or enjoys Beatitude; they tell you that this has been transmitted to them by Tradition time out of mind; for the rest they hold, that good Deeds, and especially Charity, are the chief means to attain Salvation; which is the reason they extend their Charity even to Beasts, such as Birds and Fish,

which they buy to ſet them at liberty, as believing the Tranſmigration of the Soul. This is the reaſon alſo why they never condemn any other Religion, or diſpute with them; but their Eccleſiaſticks preach without interceſſion againſt that old Cuſtom of invoking the Devil, which is ſtill retain'd among the vulgar ſort. They have abundance of Lamps hanging before their Idols in time of Service, theſe they ſet out with Garlands of Flowers, and incenſe them. They have certain Days each quarter of the Moon appointed for their general Devotions, and a Lent of 3 Months. Their dead Corps they ſhave, waſh and perfume, and afterwards burn them near the Temple, where the Aſhes are buried under a Tomb or Pyramid. The Relations mourn for their Friends by ſhaving themſelves, by giving of Alms, and benevolences to the Prieſt to pray for them; at their Obſequies the Corps is attended with Muſick, and Fire-works.

Their Burials.

The *Siameſes* are ſtrong Limb'd and well proportion'd, but their Courage is not anſwerable to it, which makes them uſe their Victims with a great deal of inſolence. They are black, and very crafty in their Dealings. They are ſo much addicted to idleneſs, that they leave all Toils to their Wives and Slaves.

The *Siameſes* well Limb'd.

They wear a painted piece of Calicoe from the Navel down to the Knees; tho' the Men have alſo Shirts with Sleeves hanging to their Elbows. The Women cover their Breaſts with a piece of Calicoe faſtened about their Necks. There is ſuch little difference in the Clothing of People of Quality, and thoſe of the inferior Rank, that they are not to be diſtinguiſhed, except by their Train of Slaves.

Their Habit.

Their Houſes are built either of Timber or Canes, covered with the Leaves of the Coco-tree, and raiſed 3 or 4 foot from the ground; each Apartment has ſeveral Windows, for the more commodious paſſages of the Air; they know of no other Furniture but what is abſolutely neceſſary for their Conveniency in the Chambers, and Kitchin; they feed commonly upon Rice, Fiſh and Pulſe; their ordinary Drink is Water, but don't refuſe Strong Liquors if they are addicted to it.

Houſes.

Perſons of any Faſhion here, make no uſe of Prieſts for the Confirmation of their Marriages, which after the Parents Conſent is obtained, and the agreement made, they Conſummate upon one anothers words, as long as they like one another; and in caſe of Separation, all the Goods and Children are divided, ſhare and ſhare like betwixt them; and both Parties are at liberty to marry again. But the Concubines are ty'd to the pleaſure of their Maſters, who conſider them no otherwiſe than Slaves, their Children having but a ſlender ſhare in their Fathers Eſtates, which after their Death (eſpecially if they be Perſons of Quality) is divided into three parts; one goes to the King, the 2d. to the Prieſts, who are to bear the Funeral Charges, which are very great; and the 3d. to the Children, who have an equal Share, except that the eldeſt is allow'd ſome ſmall advantage. People of an inferior Rank, purchaſe their Wives, notwithſtanding which, both Parties are at liberty to be divorced.

Marriages.

They don't take the leaſt care for the Education of their Children till they are 6 years old, when they put them to their Eccleſiaſticks to be inſtructed in Reading and Writing, afterwards breed them either for a Trade, Traffick, or the Court. The Peaſants lead a miſerable life, by reaſon that Proviſions are ſo cheap here, that they can't gain any thing by their Labour.

Education of Children.

The chief Traffick of the City of *India* lies in Stuffs, brought thither from *Suratte* and the Coaſt of *Coromandel*, in all ſorts of *China* Commodities, precious Stones, Gold, *Benzoin*, Wax, Copper, Lead, Indigo, *Calamba*-wood, *Braſil*-wood, Cotton, and Deer-ſkins, of the laſt of which they export 50000 every year to *Japan*; and their Rice is tranſported in vaſt Quantities to all the Neigbouring Countries. The King himſelf is a Merchant here, and has his Factors at *Iega*, *Aava*, *Jangoma*, on the Coaſt of *Coromandel*, and in *China* it ſelf.

The Traffick of the City of *India*.

Their Money is very good, being of three different ſorts; *viz. Ticals*, *Maſes*, and *Foungs*: 2 *Foungs* make a *Maſe*, and 4 *Maſe* a *Tical*, which is equivalent to a *French* Half-crown: 4 of theſe *Ticals* go to a *Tayl*, 20 of which make a *Catty* in Silver. Their ſmalleſt Silver Money is the *Foung*; but Proviſions being ſo very cheap here, they make uſe of certain Shells brought thither from *Manilles*, 800 or 900 of which go to a *Foung*.

Their Money.

The *Portugueſes* being ſufficiently ſenſible what prodigious advantage they were able to reap from this Kingdom, for ſupporting their Traffick to the *Moluca's*, *Philippine* Iſles, and the *Manilles*, the Viceroys of *Goa* were always very careful to cultivate a good correſpondence with the King of *Siam*, who in return granted them many Privileges, till ſuch time that the *Dutch* having got footing there, at the beginning of this Age, the *Portugueſes* were ſo alarm'd thereat, that they not only obſtructed the Trade of the *Siameſes* to St. *Thomas* and *Negapatam*, but alſo attack'd a *Dutch* Veſſel in the River *Menam*, which with ſome other Outrages, ſerved only to incenſe the King of *Siam* againſt them, who ever after encouraged the *Dutch* in their Settlement and Commerce, which is very advantageous to them in reſpect of the Iſles of *Java* and *Sumatra*. 1639.

The *Dutch* Settlement in *Siam*.

The Kingdom of *Cambodia* borders to the N. W. upon the Kingdom of *Siam*, being incloſed by the Sea on the other ſide. The Capital City, which has given it its Name, is ſeated upon a River 60 Lgs from the Sea-ſhore, which riſes out of a Lake, as do all the other Rivers of this Kingdom. That which runs by *Cambodia* overflows every Year, like the *Nile*. Its firſt Riſe is in the beginning of *June*, encreaſing by degrees to 10 or 12 Foot, and in *July* and *Auguſt* it overflows the Country to that degree, that it is quite unnavigable; for which reaſon it is that the City of *Cambodia* is built upon a riſing ground, having but one large Street. The Trade of the *Portugueſes* here conſiſts chiefly in *Malacca* Stuffs, which they exchange for *Benzoin*, *Lacque*, Wax, Rice, Braſs, Veſſels and Bars of *China* Iron.

The King of *Cambodia*.

The King of *Cambodia* is only a Vaſſal of the King of *Siam*, being not able to bring above 35000 Men into the Field. The Nobility, or Officers of the Court, are divided into 4 ſeveral Ranks; *viz.* into *Ockinas*, *Tomima's*, *Tonimnes*, and *Nampres*; the firſt of which are the only Men of Conſideration, they being admitted into the King's Preſence, and he conſers with them concerning the Management of Publick Affairs. The *Portugueſes* are ſo firmly ſettled here, that the *Dutch* have not been able to get any firm footing here. Proviſions of all ſorts, Veniſon, Beef, Pork, Goats, Hares, Kids, Cranes, Herns, and in ſhort all manner of Poultry, as likewiſe Oranges, Citrons, Mango's and Coco's, are ſold in a manner for nothing here, there being ſuch plenty here of every thing, and eſpecially of Rice, that thoſe of *Quinam* alone export yearly 2000 *Coyangs* of Rice, (5 of which make 8 Tuns) at 17 or 18 *Tayls* the *Coyang*.

That Neck of Land which extends in the Form of a Demi-Iſland, from the Kingdom of *Siam* from the S. E. to the N. W. to the *Equinoctial Line*, betwixt the Gulphs of *Bengala* and *Siam*, is call'd *Malacca* (which Name it has borrow'd from its Capital City) and contains the Kingdoms of *Jahor*, and *Patapan*. This Country was firſt diſcovered by the *Portugueſe*, 1511. who eſtabliſhed themſelves there to that degree, that no body hitherto has been able to diſlodge them. The City of *Malacca* is ſituate upon the Straight which ſeparates the Iſle of *Sumatra* from the Continent, at 2 deg. and a half on this ſide of the Line, at the foot of a Mountain, which is wholly taken up with the Town, and is about 1800 Paces in compaſs, 600 whereof extend along the Sea-Coaſt, fortified with a good Wall, as likewiſe to the River ſide, which encloſes another third part of the Town, being ſtrengthened to the Land-ſide by 4 regular Baſtions. That of St. *Domingo* on the point of the River ſide; that of St. *Jago* on the Sea-ſhore, and thoſe call'd *Madre de Dios*, and *Unze mil Vergenes*, betwixt theſe two. The *Jeſuits* College, call'd St. *Paul's*, ſtands on the top of the Hill, and upon a riſing ground in the Plain without the City, a Convent of *Jacobins*. The River runs N. W. is very broad and brackiſh at High-water, but freſh at Low-tide; there is a Bridge over it; it rains conſtantly here 2 or 3 times a Week, except in the Months of *January*, *February* and *March*; the Shore is ſo muddy that there is no landing at Low-water.

Malacca.

The 2 Iſles call'd *Ilha da Naos*, and *Ilha de Pedra*, lie not much above a Cannon-ſhot from the City, the Channel betwixt theſe 2 Iſlands affording a ſafe Harbor for the Galleons, and bigger Veſſels, as that betwixt the City and the *Ilha da Naos*, is for the Veſſels of a middle ſize, but ſmall Barks may enter the River.

In the City of *Malacca*, its Suburbs and circumjacent Towns, under the Juriſdiction of the *Portugueſe*, are computed to be about 1200 Inhabitants, and among

1639. among them not above 3000 Fighting Men; and scarce 300 *Portugueſe*, the reſt being either *Meſtizes* or *Malayans*. The *Portugueſe* are in Poſſeſſion only of the City of *Malacca* and its Suburbs, to the Town of *Noſtra Senhora de Guadalupe*, 5 Lgs thence upon the ſame River; the Territories of the King of *Johor* beginning at half a Lg thence. This City being ſo commodiouſly ſituated for the Traffick of *China*, and the *Moluques*, the *Portugueſe* had, in all probability, made this one of the chiefeſt Trading Places in the *Indies*, if the *Dutch*, who beſieged it 1606. and laid great part of it deſolate, had not prevented them, and being by their Settlements in *Ceylon* and *Java*, become Maſters of theſe Seas, quite ruin'd the Commerce of the *Portugueſe* to *China* and the *Moluques*.

Patana. The Kingdom of *Patana* is not of ſo large an extent, but much more populous than that of *Johor*; the King of *Patana*, being, according to the computation of the *Hollanders*, able to raiſe 180000 Men. The Capital City bearing the ſame Name, is ſeated upon the Sea-ſide, tho' its Harbour be above 2000 Paces thence. The Houſes are handſom enough, of Timber and Canes. The Royal Palace is fortified only with Palliſadoes; their Great Temple is of Brick. The City is able to raiſe 10000 Fighting-Men. The Inhabitants are rather inclining to a brown than Olive colour, generally well ſhap'd, and proud in their outward Deportment, but obliging enough in their Converſation with their Friends. The Natives are for the moſt part employed in Husbandry and Fiſhing, and drink nothing but Water, Wine and ſtrong Waters being an averſion to them; the only pleaſure they delight in is that of Women, ſo that each Man, beſides 4 or 5 Wives, maintains as many Concubines as he is able: as they look upon Fornication as a ſlender Treſpaſs, ſo they puniſh Adultery with the utmoſt ſeverity, tho' nothing be more common among them than this Crime. Their chief Wealth conſiſts in their Slaves, whom they feed at a ſmall charge, upon Rice and Fiſh; the Foreigners are the only People here who apply themſelves to Traffick and Navigation.

The Air of *Patana*. The Air of *Patana*, tho' exceeding hot, as lying near the *Equinoctial*, yet is not unwholſom; they have but 3 Months Winter, *viz. November*, *December*, and *January*, when it rains without intermiſſion; the reſt from *February* to *October* is their Summer. They ſow nothing but Rice, and till the Ground with Bouffiers. Fruits are here in ſuch Plenty, that every Month produces a new kind; Hens lay twice a Day, and Proviſions are here in ſuch quantities as can't be imagined, as Rice, Oxen, Goats, Deer, Geeſe, Ducks, Hens, Capons, Peacocks, Hares, and all ſorts of Veniſon. Hogs they breed none, but the Foreſts are ſo full of wild Boars, that tho' they eat them not, they kill them becauſe they are ſo pernicious to the Rice. The Tygers and great Apes, which are in the Foreſts here, do alſo conſiderable miſchief, but the wild Elephants occaſion no damage, they hunt them with tame Elephants, and whilſt they are engaged with them, find means to tie their hinder Feet together, and afterwards tame them by hunger. The King of *Patana* is a Vaſſal to the King of *Siam*.

Johor. *Johor* is the utmoſt point of the Land of Demi-Iſle, call'd by the Ancients *Aurea Cherſoneſus*, reaching to the Streights of *Sincopura*; its chief Towns are, *Linga*, *Bintam*, and *Caymon*, and its *Metropolis* is named *Batuſabar*, which is however divided into two Cities, ſituate upon the River *Johor*, 6 Lgs from the Sea; the firſt of which is call'd *Batuſabar*, the ſecond *Cottaſabrang*; one having about 1300 Paces, the other 500 in compaſs; as the Houſes are all built of Free-ſtone, along the River ſide, and raiſed on Piles 8 or 10 foot from the Ground, they make a glorious Proſpect as you come up the River; for this City contains at leaſt 4000 Inhabitants fit for Service.

The King of *Johor* is Proprietor of all the Grounds, which he beſtows on any that will deſire it to be Manured; but tho' the Grounds be extreamly fertile, ſuch is the ſlothfulneſs of the *Malayans*, that they ſeldom cultivate it. The *Malacca* or *Malayan* Language, as it is the moſt Elegant of any in the *Indies*, ſo it has gain'd as much reputation there, and is as generally uſed as the *French* in *Europe*; and having no inflections either in Nouns or Verbs, it is not very difficult to learn.

Sumatra. We will now take a ſtep from the Continent to the Iſle of *Sumatra*, 10 Lgs diſtant from the *Malacca* Shore; it extends from the 5th. deg. on this ſide to the 6th. deg. beyond the Line, containing thus 165 Lgs in length, and about 60 in breadth; ſo that thoſe who inhabit the middle of the Iſland, have the *Equinoctial* Line directly over their heads, whence it may eaſily be conjectured that the heats are exceſſive here, which together with the vaſt multitude of Lakes, makes the Air very unwholſom. This defect is recompenſed by its vaſt Riches in Gold, Silver, Copper, Iron and Braſs, (whereof they make as good Artillery here as in any part of *Europe*;) beſides Rice, Millet, and Fruits in prodigious quantities, even in the very Foreſts. Add to this its Wealth in Diamonds, and other Precious Stones, and its Products of Silk, Spices, Wax, Honey, Cotton, Camphire, Caſſia, and divers other Medicinal Drugs. Of white *Sandale* they have whole Woods, and in the Centre of the Iſle, is a burning Mountain, like that of *Veſuvius*, which they ſay is ſupply'd conſtantly by a Balſamick River. The whole Iſland is divided into 10 Kingdoms, of which thoſe of *Achim*, *Pedir*, *Pacem*, *Camparam*, *Zande* and *Mancabo*, lying on the Sea-ſide, on this ſide the Line, are only known to Foreigners; thoſe who have travell'd thither more for Profit than Curioſity, having made but little ſearch into its inland Provinces, of which the *Portugueſe* give us an account only of 2, *viz.* that of *Andragidan* and *Arunat*. The *Dutch*, have alſo diſcovered the Kingdom of *Polymbam* beyond the Line, where they have got a firm footing.

1639.

Its Riches.

It is divided into divers Kingdoms.

The Kings of *Achim* are alſo Maſters of *Pedir* and *Pacem*, which includes all the Northern Coaſt of the Iſle. Achim.

The City of *Achim* is ſeated in a ſpacious Plain, upon a broad, but ſhallow River, being ſcarce paſſable by ſmall Boats; it has neither Fortifications nor Gates; the Houſes are built upon Piles, and covered with the Leaves of Coco-trees. The Royal Palace ſtands in the Centre of the City, which being well Palliſado'd and Flank'd, commands the whole Town, and has 7 Gates.

Inhabitants. The Natives are of an Olive colour, and very flat fac'd. Their Garments are only a Calicoe or Silk Shirt, and a Turbant on their Heads of the ſame Stuff. The King is ſerved by Women and Eunuchs, and is a *Mahometan*, as well as moſt of all the reſt inhabiting near the Coaſt of *Sumatra*. They begin their *Lent* at the New Moon in the 12th. Month, which ends at the ſame time in the next. They have no Corn, but Rice in great Plenty; as alſo Beef, Bouffiers, Goats and Sheep, the laſt of which no body has the privilege to breed except the King; they abound alſo in Oranges, Limons, *Bonana*, *Tamarindes*, *Batalas*, Radiſhes, Spinage and Lettuce. Their ordinary Drink is Water, but they make a kind of *Aqua Vitæ* of Cocoes or Rice.

Religion.

The Iſle of *Sumatra* produces a peculiar Tree, called *Singadi* by the *Malayans*, and *Arbor triſte de dia* by the *Portugueſe*. It is full of branches with knots, from each knot ſprout forth 2 leaves like a Plumb-leaf, except that they ſmell like Sage, and are covered with a whitiſh down. Each of theſe leaves hath its bud, which thruſts forth ſmall heads, whereof each has 4 round leaves, each head produces 5 flowers in a cluſter, the 5th. being exactly in the middle, they are as white as Snow, of the bigneſs of an Orange-flower, and blow in the twinkling of an Eye, as ſoon as the Sun is ſet, which riſes no ſooner again the next Morning, but the flowers and ſweet ſmell which have continued all Night, drop in an inſtant. Thus the Tree continues till Sun-ſet again, when it opens and produces the flowers in the ſame manner as before, and caſts them again at the firſt appearance of that Planet, which invigorates all the other Vegetables.

The Mourning day Tree.

The Coco-trees, of which there are 4 kinds, are very common in this Iſland. The Tree which bears the Coco-Nuts grows very high, but not above a foot diameter in bulk; it has not a branch but at the top, where it ſpreads like a Date-tree, and theſe don't produce the Fruits, which grow 10 or 12 in a cluſter out of the body of the Tree; the Flower reſembles that of a Cheſnut; the Tree is of Univerſal uſe in the *Indies*. In the *Maldives* Iſlands they build whole Ships without any thing but what they are furniſhed with by the Coco-tree; the outward Rind affording them a kind of Hemp for their Cordages and Cables, and the Leaves with Materials for Sails, and the Covering of their Houſes; beſides that they uſe them for the making of Umbrellaes, Fans, Tents, Matts and Hats. The Fruit is of the bigneſs of an Oſtriches Egg, and the outward Rind which reſembles that of our Wall-nuts, when dry'd, affords that Hemp we ſpoke of before;

Cocos.

Whole Ships made of the Tree

1639. if they gather it before the Nut is come to full maturity, it affords about a quart of very pleasant Liquor, which if kept in the Shell, by degrees turns to a kind of Apple, which becomes yellow, and is of a very good taste.

Terry. Their *Terry* or Palm-wine they draw from the Tree whilst it is in Blossom, and pulling off the Flower they fasten to it an Earthen Vessel well stopp'd, into which runs a Liquor resembling in taste and colour our Whey. This when boil'd is call'd *Terry*, and set in the Sun turns to Vinegar immediately, and if distill'd makes a kind of *Aqua Vitæ*. The Pith of the Tree as it is very white, so it furnishes the *Indians* with Paper.

The second kind is call'd by the *Portuguese Arrequeiro*, from the *Areca* it produces, of which and the 2 other kinds more hereafter.

Bananas. The *Bananas* or *Indian* Fig-tree is also very common in this Isle, it may rather be call'd a Shrub than a Tree, as having no body, but grows to a Man's height. It brings forth leaves before it comes to a foot high, but these wither and fall, and others sprout forth in their stead, till such time the Plant arrives to its full growth, and the Fruit to its maturity, which is in shape and colour like our Figs, being of a yellow green, which being gathered and hung on a Nail will ripen in 4 or 5 days: in the middle of the Leaf comes a Flower of a violet colour, of the bigness of an Ostrich's Egg, whence sprouts forth a kind of a Branch not unlike a Cabbage stalk, loaden with a bunch of Figs; one stalk produces no more than one bunch (but of near 100 Figs) at a time, but being cut close to the ground another springs out and bears Fruit in a Month, and continues to do so throughout the Year. The Leaves of the Tree are 6 foot long, and 1 and a half broad, and the Fruit 7 or 8 inches long, and as big as a good Cucumber; the Figs are enclosed in Husks which are very nourishing and eaten instead of Bread.

Pepper. The Pepper of *Sumatra* is next to that of *Cochim*, the best of all the *Indies*. It is commonly planted at the Roots of Trees, or prop'd up with Canes as we do our Hops. The Leaves are not unlike those of the Orange Tree, but somewhat less, and picquant; the Fruit grows in little branches like Juniper-berries. It is green whilst upon the Tree, but grows black after it is dry'd, which is done in *December* and *January*. The white Pepper does not grow in such abundance here, and *Bengala* is the only Country that brings forth long Pepper. It is certain that there is more Pepper consumed in the *Indies* than in *Europe*, because the *Indians* put handfuls of it in all their Sauces, but not beaten or grinded.

Java. The Isle of *Java Major* (to distinguish it from the lesser, which lies hard by) is divided from *Sumatra* to the S. E. only by the narrow Streight of *Sunda*, 7 deg. beyond the Line; its length is 50 Lgs, but as to its breadth is undiscovered as yet, some will have it part of the Continent, which extends to the Streight of *Magellan*, commonly call'd *Terra Australis*. (a) *Julius Scaliger* was not in the wrong of it when he call'd it the *Epitome of the World*; it being certain that there is no Animal, Fruit, Metal, or Drug, but what is found here in greater plenty than in any part of the Universe.

Inhabitants. The Inhabitants deduce their Origin from the *Chinese*, and to speak truth, their large Fore-heads and Brows and little Eyes, resemble much that Nation. Each Town of Note in *Java* has its peculiar King, who were formerly Vassals to one, but now they are all Sovereigns independant from one another. The Kings of *Bantam* and *Palimbam* are the most Potent now; the last of which has given the Name to the Streight that divides the Isles of *Java* and *Bali*. Ten Lgs to the N. is the City of *Panarucan*, near which is a burning Mountain. The King of *Panarucan* and *Palimbam* are *Pagans*, but the King of the City of *Passuan*, 6 Lgs from *Panarucan*, is a *Mahometan*.

Jortam Ten Lgs to the W. is the City of *Jortam*, noted for its convenient Harbour upon a River, where the Ships going from the *Molutques* to *Bantam*, commonly touch to take in fresh Water and Provisions.

Upon the same River lies the City of *Gertici*.

Brandam. *Cidaye.* The City of *Sarabaia* has its proper King, under whose Jurisdiction is also the City of *Brandam*, 6 Lgs thence to the W. He keeps his Court at *Cidaye*, which is well fortified, but destitute of a safe Harbour. Ten Lgs more to the W. lies the City of *Tabanbalin*, next to *Bantam*, the most considerable of the Isle. And 5 Lgs further to the N. W. the City of *Cheribon*. *Maysadicaon* is inhabited only by Fisher-men.

Japara. Five Lgs further to the W. is the City of *Japara*, upon a Neck of Land which jets out 3 Lgs into the Sea. Twenty five Lgs hence, and 45 from *Bantam* lies *Matram*, or *Matavam*, a great City, and the Residence of a powerful King, who once pretended to the Sovereignty over all the rest of the Isle.

1639. *Matram.*

Pati. *Dauma.* Five Lgs to the W. of *Japara* lies the City of *Pati*, and 3 Lgs further that of *Dauma*, both under the Jurisdiction of the King of *Matram*, as well as that of *Tagal* in the same Bay.

Tagal.

Charabaon. The next is the fair and strong City of *Charabaon*, seated upon a River, whence you pass through the Cities of *Dormago* and *Monucaon*, and so through the Village of *Gaceen*, to the City of *Jacatra*, and thence to *Bantam*, the most considerable of the whole Isle, seated at the foot of a Mountain, about 25 Lgs from the Isle of *Sumatra*; three Rivers arise out of this Mountain, 2 whereof surround its Walls, the third passing through the middle of it. The Houses are miserably built, and the Walls very wretched as well as the Gates, tho' at every 100 paces provided with a great piece of Cannon, which are of little use in a place where the Curtains are not defensible, and have instead of Towers only Scaffolds. The whole City has only three principal Streets, which are not pav'd, but sandy; the Channels which run through them, being very stinking and foul, which sends forth a very nauseous smell all over the City. At each corner of the Streets stand Guards, as also at the Prison Gate near the Palace; and each Person of Note keeps a Guard of 10 or 12 for his own security in his House. Their Houses are mean, built upon Piles, they are commonly of Reeds and Canes, and the Partitions all of *Bambou*-Canes slit very thin. All the Foreigners here live without the City. The Merchants meet daily in one or other of the three great Market-places belonging to this City. The *Bazar* or *Exchange* is chiefly frequented by the Foreigners, who meet there at break of Day, and continue till 9 a Clock. The second Market-place faces the Grand *Mosque*, where the Women buy and sell Pepper, *Betele*, *Areca*, *Bananas*, *Melons*, Cakes, &c. and those that deal in white and yellow Sandal Wood.

Jacatra. *Bantam.*

The City of Bantam.

The Armorers who sell Arms, Guns, Pistols, Swords, &c. stand higher up to the right, and to the left the Confectioners, with their Sweet-meats: near them is the place where they sell all sorts of Beans, and next to that the Onion Market, where the Cloth-sellers and Ensurers have their Meeting: Hard by this you see the Poulterers, who deal in Geese, Kids, Pidgeons, Parrots, and all sorts of Tame Fowl. Thence you see three several ways, one leading to the *Chinese* Shops, the 2d. to the Herb-Market, the 3d. to the Shambles; among the *Chinese* to the right the Jewellers who deal in Precious Stones, have their Station, and the *Bengalians* with their Toy-shops are on the left; the Sale of all these things lasts only till 9 a Clock, when the Market for all sorts of Provisions is opened before the Royal Palace, and about Noon the *Chinese* Market begins.

Tuban. The City of *Tuban* or *Tubaon* challenges the next place after *Bantam* in the Isle of *Java*, being stronger than all the rest, and tho' not so large, yet better built than *Bantam*. Its Palace is very spacious, and remarkable for the many Apartments made here for divers sorts of Beasts that are kept here with more than ordinary care, such as Elephants, Fighting Cocks, and Parrots, the last of which are much more beautiful than are transported into *Europe*, because they are too tender to endure the fatigues of so long a Voyage. Their chief Traffick lies in Pepper, which they exchange in the Isle of *Body* for Calicoes, Cotton and Silk, and carry these Commodities to *Banda*, *Ternate*, and the *Philippine Isles*, to truck for *Cloves*, *Mace* and *Nutmegs*. The Natives live most upon Fish; they have no other Garments but a piece of Calico wrapp'd round their Loins, except that the better sort wear a kind of loose Camblet Coats reaching only to their Thighs. They are great lovers of Horses, their Saddles being made like our great Saddles. The Natives inhabiting the inland-Countries of *Java* are all *Pagans*, and believing the transmigration of the Soul, eat neither Fish nor Flesh; to the South there are a few *Mahometans* of the *Turkish Sect*. They have 2 great Fasts, the chiefest of which begins the 5th. of *August*.

The Javians. There are few among the *Javians* but what have 3 or 4, nay sometimes 10 or 12 Wives; besides their Concubines, who are obliged to wait upon the Wives, tho' their Children have the same Prerogatives as the

legitimate

1639. legitimate ones. Children go naked; the Girls having only a Plate of Silver or Gold to cover their Privities; they marry at 8, 9, or 10 Years of Age: In their Marriages they use but little Ceremonies: Certain Poles are stuck on the Wedding-day before the Houses of the Bride and Bridegroom, with Tassels of white and red Cotton; and after Dinner the Bridegroom goes on Horseback through the Town in the Evening, where the Slaves, who are part of his Dowry, come to meet him, and bring him some Presents. Women of any Fashion are kept under such restraint, that they are not permitted so much as to see their own Sons within their Chambers; neither does any Man speak or approach such a Woman when she goes abroad, but every body gives her way, even the King himself. They are known only by their Retinue, being for the rest clad after the same fashion with the rest, *viz.* in a kind of Calicoe or Silk Petticoat, reaching down from the Breast to the mid-leg; they wear neither Stockings nor Head-Ornaments, but tie their Hair upon the Crown; except it be at Weddings or any other Solemnity, when they have Coronets on their Heads, and Rings and Bracelets about their Fingers and Arms. They are so much addicted to cleanliness, that they neither do their necessities, or enjoy their Husbands without washing or bathing themselves, which is one of their chief Employments, and which they look upon as a proper means to incite their Husbands to Venery, in which they strive to outvie one another.

In their Courts of Judicature, the Plaintiff and Defendant are obliged to plead both their own Cause, their Punishment of Criminals is to tie them to a Post, and stab them with a Dagger: Foreigners have this advantage, that provided they can make their Peace with the Party complaining, they may redeem themselves from Death, except in the Case of premeditated Murther. The King's Council which consists sometimes of 500 Persons, meet at Moon-light under a great Tree, where they continue till the Moon sets. The King when present sits in the middle.

The Qualifications of the *Javans*.

The Nagiyes of *Java* are a proud, perfidious, and cruel Generation; and so stubborn, that such as know they have deserved Death will rather be kill'd than be taken. Their Hair, which is very long, is generally of a Chesnut-colour; they have great flat Faces, large Jaw-Bones, and Eye-brows, little Eyes, and thin Beards, are for the rest only middle-siz'd, but very strong Limbs. They seem not to want Courage, were they bred up to all the Advantages belonging to our Modern Arms; but they are contented with their Pike, Battle-Axe, broad Sword and a Dagger: Their Bucklers are of Wood, and sometimes of boil'd Leather: They wear also Armour, the pieces of which are join'd together with Iron Rings: Their Soldiers receive no Pay in time of Peace. They have a way of blowing small poison'd Arrows out of Trunks, by which the Wound is made incurable. But those inhabiting upon the Streight of *Sunda*, being transplanted thither from *Passuan*, and living under their own King, (who is however tributary to the King of *Bantam*) are much more honest and open-hearted.

The Grounds of *Java* are either farmed out by the King or Lords to certain Free People, or cultivated by Slaves, and produce Rice, Pepper, and Coco's. Some Slaves here take their Masters Trees, and other Commodities, at a certain Rate, which they sell to the best advantage they can: Others work abroad for their Masters Profit at a set Rate *per diem*: Others maintain themselves, and work alternatively 6 Days for their Masters, and as many for themselves. They commonly adulterate their Pepper with black Gravel, as they do with all other Commodities they sell to Strangers, they being very crafty in their Traffick; tho' very few rich Merchants venture their Persons on any long Voyage, but traffick like our *European* Merchants.

Their Slaves

Bonds, and other such like Deeds, are written upon the Barks of Trees, the Characters being engraven with a kind of Bodkin, which is either roll'd up afterwards, or laid together four square betwixt two Boards, which they have the way to tie neatly together with Pack-thread. Sometimes they use *China* Paper. They have a Language peculiar to themselves, but the *Malayan* is most in vogue here, and the *Arabian* used by the *Mahometans*. The Traffick of the *Persians* that live here, is in precious Stones, Stuffs, and Drugs, and the *Arabians* and *Benjans* exchange their Commodities chiefly for *China* Ware. Those of *Guzarat* live, for the most part upon Fishing. All these Foreigners are clad after the same Fashion in a Calicoe Garment, with a Turbant of the same Stuff. At their Arrival they purchase a Woman, who is to serve for all Uses; at their departure they dispose of her again, but must make Provisions for the Children, if they leave any behind. 1639.

The *Chinese*.

But the *Chineses* are of all Foreigners here the most industrious in their Trading, being look'd upon here no otherwise than the *Jews* in *Europe*. One of their main businesses, is, to forestall and buy up the Pepper in the Country against the coming of their *China* Fleet to *Bantam* (which consists commonly in 10 Ships of 50 Tun each) in *January*. These bring in a sort of wretched Money, call'd *Pity* by the *Javaneses*, and *Cas* in the *Malayan* Language, being a mixture of Lead and Brass; so brittle, that if they fall upon the Ground, they certainly break. They are made in the City of *Chincoa* in *China*, having each a four-square hole in the middle, thro' which they string them upon Straw; it pass'd at first for very current in *Java*; but being its baseness has been discovered, it goes at a very low rate. The *Chineses* sell their Percelain here at cheap rates, and bring also Silk, Sattin, and Damasks of their own Manufactory, which they exchange for Pepper, Lacque, Indigo, Sandal Wood, Nutmegs, Cloves, Tortoise-shells, and Ivory. They have neither Temples nor Priests at *Bantam*, but have both at *Panarucan*.

Java abounds both in wild and tame Beasts, the Forests are fill'd with Elephants, Rhinocerots, Leopards and Tygers, which make them very unsafe, and is the reason why Frankincense, Mastick, Myrrh and Benzoin (which is better here than in any other place) are not gathered in so great Quantities; the before-mentioned Beasts, as well as the Serpents, Lizards and Salamanders, making the Forests very dangerous to pass. The Hogs here are without Bristles, but their Bellies hang down to the Ground.

The Rivers are very well stor'd with Fish, there having been Oisters seen in those Parts that weighed 300 pound; which would seem incredible, if there were not to be seen to this day 2 Oister-shells in the Duke of *Holstein Gottorp*'s Cabinet, which *Olearius* 1657. bought of a Sea-Captain's Wife at *Enchuysen*, and weigh'd 462 pounds. Deer, wild Goats, and Boars, are likewise here in vast plenty, but are not easily to be taken, by reason of the unpassableness of the Woods, and the unskilfulness of the *Javaneses* in the Use of Fire-Arms. The Rivers feed also abundance of Crocodiles; the *Chineses* tame, fatten, and eat them for a peculiar Dainty.

Oisters of 300 weight.

Their Civet is not so white nor well scented as that of *Guinea*. They have 2 sorts of tame Fowl, one like those of *Europe*, the other of the *Indian* Breed, which are wild and furious; some have black Flesh, but notwithstanding this is very good Food. Civet.

The *Rhinoceros* is in the same esteem with them now-a-days as the Unicorn was with the Ancients; his Flesh, Horn, Blood, and Teeth, nay, even his Dung being apply'd to Medicinal Uses. They have also Ants here of a much larger size than ours; they spoil every thing they come at. They have a certain kind of these Creatures reddish, and of the length of a Man's Finger, but these live in the Fields upon the Barks of Trees. Rhinoceros.

Among the Fruit-trees of *Java*, the *Arrequero* which bears the *Areca* is none of the worst. It is a Species of the Coco, but less in bulk, and with narrower Leaves. The Fruit resembles a Date inclosed in a Husk, which falls off when it ripens. It is without taste, but taints the Lips and Teeth of a black colour. The *Indians* after they have mix'd it with a little Lime, wrap it up in a *Betele*-Leaf, and so chew it, looking upon it as a good remedy against the Scurvy: It will cause to such as are not used to it a dizziness in the Head, but it soon passes over.

The *Manga* is a Fruit growing upon a Tree not unlike our Walnut-trees; it is something like our Peaches in bigness and colour, being of a red and green. The Shell incloses an Almond, which is of a grateful taste when roasted in the Ashes. They pickle them whilst green, and are accounted a good remedy against the Worms and Looseness. The wild ones are rank Poison, which kill without a present Antidote. Manga.

The *Ananas* grows on a Shrub with Leaves like a *Semperviuum*, is green at first, but when ripe turns to an Orange-colour; its Shape is like a Pine-apple yellow within, but they are dangerous if used in excess, tho' the taste is very pleasant: They are not much Ananas.

larger

1639. larger than a good Limon. The Stalk is like a Thistle, every one bearing but one at the very top; it is very apt to overheat, and occasions Fevers.

Samach. The Fruit call'd *Samach*, is also of the bigness of a Citron, juicy and tart, with black Kernels. The Leaves which are like to, but somewhat less than the Limon-trees, Pickled with Salt and Sugar are accounted a good remedy in Fevers and Inflammations, as we do our *Tamarinds*, which also grow in great plenty here.

The *Tabaxir*, i. e. *a white frozen Liquor*, is found in the knots of certain Canes, of the bigness of a Poplar, with streight Branches and Leaves, not unlike those of the Olive-tree, but somewhat longer. It is like Starch, and in such esteem with the *Persians* and *Arabians* for the Vertue they attribute to it in the cure of Fevers and bloody Fluxes, that they buy it at a very dear rate. These Canes are so big, that the *Indians* cleave them asunder, and make Boats of them, leaving a knot on each end.

Durions. The Isle of *Java* produces also another Fruit, call'd *Durions*, not to be met any where except here and in the *Malaccaes*. The Tree call'd *Batan*, is of the bulk of our Apple-trees, the Blossoms of a pale yellow colour, the Leaves half a Foot long, and 3 Inches broad, of a very lively green on the inside. The Fruit both for its colour, bigness, and outward division resembles our Melons, but within is divided into 4 Partitions; which being again subdivided into 2 or 3 lesser Cells contain the Fruit, which is as white and big as a Pullet's Egg, and of the most luscious taste in the World; it has a Stone as big and rough as that of a Peach. It will not keep, and therefore must be used as soon as the outward Husk opens. One thing is very observable, that if you lay but a few *Bettele* Leaves near a whole Room full of *Ditriaons*, they will all rot immediately; and if you have surfeited your self with the excessive eating of this Fruit, 2 or 3 *Bettele* Leaves apply'd to your Breast, or one of the same Leaves eaten, will give you ease, and digest them without any farther danger.

Lantor. The *Lantor* Tree, another Species of *Coco's*, has Leaves 5 or 6 Foot long, and so smooth, that the *Javaneses* use them instead of Paper.

Cubebs. Cubebs are found no where in the *Indies* but in the Isle of *Java*; it grows upon a Tree not unlike the Pepper, and in bunches. The *Javaneses* hold it in such esteem, that they will not sell it unboil'd, nor will allow as much as one Plant to be transported into other Parts.

Mangosthan. The *Mangosthan* is much of the taste of our Sloes, and grows wild in the High Ways in *Java*. And the Herb *Talasse* bearing neither Flower nor Fruit, is used green in Sauces, its Vertue being to fortifie the Stomach.

Jaca. The Fruit *Jaca* is of the bigness of a Citrul, having a rough Rind, within which are certain Nuts, the Kernels thereof being roasted are a present Remedy against a looseness. It is observable that this Fruit often changes its taste, sometimes like a Melon, sometimes like a Peach, and at other times like a sweet Limon. The Nut is as big as a Date, but is not to be used raw, because it occasions Vomiting and Griping in the Guts, but roasted it is both pleasant and good, and reckoned a good Restorative for those that love Women.

Wild Cinnamon. On the side of the Island towards the Streight of *Sunda*, you meet with abundance of wild Cinamon, but is never transported into foreign Parts.

Cacapuli. The *Cacapuli* are a kind of *Indian* Cherries, white, dark red, and of a Carnation Colour; the Trees and Fruit are like those in *Europe*.

Costus Indicus. The *Costus Indicus*, call'd *Pucho* by the *Malayans*, resembles in every respect, both in heighth and Flower, the *European* Elder-tree, wherewith the *Persians* and *Arabians* drive a considerable Trade, as they do also with the *Calamus Aromaticus*. There is a yellow and spungy Matter in its Stalk, which some Women make use of to appease the Pain of the Matrix.

Zerumbet. The *Zerumbet*, call'd *Cantor* by the *Malayans*, is like Ginger, except that it has somewhat larger Leaves; it is preserv'd or dried like Ginger, but valued above it.

Galanga. Of *Galanga* there are 2 kinds, the lesser is brought from *China*, and is preferable before that of *Java*. The Herb grows wild about 2 Foot high with a white Flower and pointed Leaves: The *Javaneses* use both the Root and Herb in their Salads; the first are knotted like Canes, and of a biting taste and good Scent.

Benzoin is a Gum of a Tree resembling the Limon-Tree; whilst they are young, the Gum is white, but when they grow old, it changes black: It is by the *Moors* call'd *Lovan Javy*, *i. e.* the Juice of *Javy*. 1639. Benzoin.

Sandal. This Isle produces abundance of red *Sandal* Trees, which are of the bigness of our Walnut-Trees; their Fruit resembling our black Cherries, but is insipid: But the white and yellow *Sandal*, which are much preferr'd before the red, grows in the Isle of *Timor* and *Solor*. Of this the *Indians* make a Decoction wherewith they rub their Bodies, looking upon it as a great Restorative.

Ginger. Ginger they have also in abundance here, which they eat either green or preserved, but never dry'd.

Anacardium. *Anacardium* is used by the *Javaneses* as an approved Remedy against the *Asthma* and Worms; they boil it in Milk, or pickle it like Olives.

Pala de cuebra. The Wood call'd *Pala de cuebra* by the *Portugueses*, of a pale yellow Colour, is used by the *Indians* in Wine or Water against Fevers and the Stings of Serpents.

Calamba. That by the *Indians* call'd *Calamba*, and by us *Lignum Aloes*, grows not only in *Java*, but also in *Malacca*, *Sumatra*, *Cambaya*, and other Places. It is not unlike to, but somewhat bigger than an Olive-tree; and whilst green has no Scent, but as soon as it dries its Scent is perceived: Its Goodness is known by its weight and Colour, which must be brown, from whence issues an Oil, if held to the Fire. The wild *Calamba* is used chiefly in Funerals, for the burning of the dead Corps of the *Indian* Priests.

Lacque. Abundance of *Lacque* is sold at *Bantam*, but the choicest comes from *Begu*: Here certain great winged Ants suck the Gum of the Trees, which they afterwards cast upon the Boughs, as the Bees do the Honey and Wax; these are cut off, and set in the Sun to dry till the *Lacque* falls off, which they give what Colour they please, and is used in Sealing-wax and *Lacque*-works of *China* and *Japan*.

The other Drugs of *Java*. The other Drugs of *Java* are *Pody*, which they use against Winds and Rheumes; *Flors*, a Root they dye their Calico's with; *Conjuapi*, is another Root wherewith they rub their Bodies; *Samparentam*, is another Root stronger than *Ginger*, but bitter. *Pontibu* is accounted a Sovereign Remedy against Fevers, and upon that score sold at a dear rate. *Gatogamber* is a Fruit resembling Olives, good against the Tooth-ach. *Ganti* is altogether like *Ginger*, but much dearer, they use it to rub their Bodies with; *Safam*, they call Mustard-seed. *Doringi* is given to Children as soon as born; the Root *Galam*, growing in Watery places, is a great cooler. The Fruit *Tianco* is taken at all times, whenever they find themselves indisposed; *Maidian*, *Maya* and *Corossani* are used in their Liquors, as having an intoxicating quality. *Spodium* is the Ashes of a Tree, wherewith they rub their Bodies; they do the same likewise with the Flower call'd *Sary*, and the Roots *Targary*, *Surabian*, and *Sedowaya* are appropriated to the same use. *Sambaya* is a Fruit of the bigness of an Acorn, which being accounted a most Sovereign Remedy against Poison, and especially that of venomous Beasts, is sold at a very high Price; *Jalave* is of the same use as *Sambaya*. The Herb *Paravas* is cooling, but scarce and dear. *Tomonpute* is a Root used against the inflammations of the Spleen. The *Conduri* are poisonous Berries, but are used to weigh Gold and Silver with, *&c.* The *Javanese* being exasperated by the ill usage they often received from the *Portuguese*, would not for a long time permit any Strangers to have any Settlements there; till at last the hopes of gain engaged the Kings of *Bantam* and *Jacatra*, to let the *English* and *Dutch* set up their Factories there, under certain Conditions, which being but ill observed by the *Indians*, the *Dutch* took this opportunity of fortifying their Settlements at *Jacatra*, and that with so much expedition, that the *Indians* finding themselves not in a condition to force them thence, engaged with the *English* to assist them in the expulsion of these bold Strangers; in the first Sea-engagement *Jan.* 2 1619. near *Bantam*, the *Dutch* had the worst; upon which the King of *Jacatra* in conjunction with the *English*, besieged and attack'd their Fort for six Months, till the *Dutch* Fleet being re-inforced, obliged the *English* to quit both the Siege and the Streights of *Sunda*; and landing their Men, took the City of *Jacatra* by Storm, and put all to the Sword; the next thing they had to do, was to compleat their Fortifications, which they did so effectually, that in a little time they made them very regular, with 4 Bastions of

The Dutch Establishment in Java

Free-

1639. Free-ſtone, well Trench'd, and Palliſado'd, and defended by a Proportionable number of Half-moons, Redoubts, *&c.* The King of *Matram* laid Siege to it twice ſince, *viz.* 1628. and 1629. but was forced to raiſe it as often, ſince which time the *Dutch* remain in the quiet Poſſeſſion of their Traffick here, with the *Chineſes*, *Japoneſes*, *Siameſes*, and other Neighbouring Nations, and receive 10 *per Cent* Cuſtom upon all Commodities, imported or exported, each Stranger inhabiting in the City of *Batavia* (for ſo they call'd it afterwards) being obliged to pay a certain monthly Tax, Proportionable to what profits they make, which is very great, and conſequently the Tax not in the leaſt burthenſome, for a Porter who perhaps gets 2 Ryals a day, does not pay above one and a half in the Month.

Batavia.

The City of *Batavia*, (which lies 12 Lgs to the E. of *Bantam*) being for its convenient Situation in a Bay, which is ſheltred by many Iſlands from the Violence of the Winds, one of the beſt Roads in all the *Indies*, and the chief place of Commerce belonging to the *Dutch* in thoſe parts.

The Iſle of *Madura.*

To the N. W. from *Java*, betwixt that and the Iſle *Borneo*, lies the Iſland of *Madura*, ſubject to its own Prince, whoſe Reſidence is in the City of *Aroſſabaya*. As by Reaſon of its barrenneſs, it is a place of no Trade, they live upon Pyracy, eſpecially upon the Coaſt of *Pegu*.

The Iſle of *Baly.*

The Iſle of *Baly* lying to the E. of *Java*, has not above 12 Lgs in Circuit; but to the S. jets out a Cape a great way into the Sea. Its Northern point is 8 deg. and a half beyond the Line; The King Reſides in a City bearing the ſame Name with the Iſle. The Inhabitants are *Pagans*, and ſo Superſtitious, that they Worſhip the firſt thing they meet with in the Morning, they are very Black, with curl'd Hair, but wear no Beards, no more than the reſt of the Iſlanders in theſe parts, and wear the ſame Garments, for their Women, who have an averſion to Beards, oblige them to pull out the Hair by the roots. They have each ſeveral Wives, whence this Iſle is ſo Populous, that above 600000 living Souls are accounted to be within its Compaſs, though abundance of Slaves are ſold from thence every year.

Plenty.

They live for the moſt part upon Husbandry or Weaving; becauſe they abound both in Cotten, and Rice, but allow none to be tranſported; They are alſo ſufficiently provided with Oxen, Buffles, Goats, and Hogs, and ſome Horſes, but very ſmall ones; They have whole Foreſts of Oranges, Limons, and Citron-Trees, which furniſh them with vaſt Stores of Pheaſants, Partridges, Peacocks, and Turtles; as their Marſhes do with Ducks, and other wild Fowl.

Drugs.

It produces no other Spice but *Ginger*, but they have ſeveral other Drugs; and a certain Fruit growing in a ſhell like a Cheſnut, white, and of a delicious Taſte, and is beſides this an approved remedy againſt the Scurvy.

Fiſh.

All along the Coaſt, the Seas, and the Rivers furniſh them with incredible plenty of Fiſh; which next to Rice, is their main Subſiſtence; They have but little Commerce with Strangers, except that they ſend now and then ſome of their Calicoes in ſmall Veſſels to the Iſle of *Java*. In this Road moſt Ships bound for the *Molucques*, take in freſh Water and Proviſions, which are to be bought here at a very low Rate. They have Iron, Copper, and Gold Mines, but the laſt are not cultivated, for fear the Fame of theſe Riches ſhould draw thither ſome Foreign Nation or other, that would without Queſtion reap the Fruits of their Labour. Their King whoſe title is *Quillor*, *i. e.* a Conſtable, is in great Veneration among his Subjects, and governs his Dominions, by certain Governours appointed for each Province. They perſiſt very obſtinately in Paganiſm, as alſo in that Diabolical Cuſtom, for Women to burn themſelves with their Husbands.

Borneo.

The Iſle of *Borneo* lies further to the N. than *Java*, one of the largeſt in thoſe Seas, extending 6. Degr. to the N. though its greateſt part lies on this ſide of the Equinoctial Line; ſome make it 400 Lgs. in Compaſs; but the *Dutch* with more probability aſſign it no more than 290 Lgs. in circumference. Its Chief Places are, *Borneo*, *Succidana*, *Landa*, *Sambas*, and *Benghemaſſin*.

The City of Borneo.

The City of *Borneo*, is like *Venice*, built upon divers ſmall Iſlands, interwoven with Channels, there being no Paſſage there but by Boats; According to the account the *Dutch* have given of it, it contains about 2000 Houſes. This Iſle produces the beſt Camphire, as alſo Gold and *Bezoar*, which Stone breeds in the Maw of a Sheep or Goat, within the ſubſtance of which is ſometimes found incloſed a tuft of Graſs. It is ſmooth, inclining to a greeniſh Colour, its goodneſs being to be tried by its weight. In the Country of *Pan*, near *Malacca*, is a certain ſmooth and ſlippery Stone, found in the Gall of certain Hogs, of a reddiſh colour and bitteriſh taſte; which being ſteeped only in cold Water, afford a moſt effectual remedy againſt all Poiſon and infectious Diſtempers. The Iſle of *Borneo* affords alſo Diamonds, *Sapan*-wood uſed by the Dyers, *Braſile*-wood, Wax, Pepper, Frankincenſe, Maſtick, and divers other Gums. 1639.

The Iſle is not deſtitute of good Harbours, among which that of *Borneo*, at the mouth of a very good River, is one of the largeſt and moſt Commodious. Their Cities are not very populous, and their wooden Houſes ſo ſlightly built, that they often remove them at pleaſure. They are accounted very ingenious, but will rather live upon Pyracy than Induſtry, unto which they are ſo much addicted, that their Veſſels are ſeen upon the Coaſt of *Pegu* 400 Lgs thence. They uſe Swords, Bucklers, Lances, Darts and Pikes. The King, and moſt of the Inhabitants near the Sea-ſide are *Mahometans*, but deeper in the Iſland they are *Pagans*. They are black, and well-ſet, wear Callico wrapt about their Loins, like moſt of the other *Indians*, and Turbants on their Heads.

The Iſle of *Celebes*.

The Iſle of *Celebes* lies betwixt that of *Borneo* and the *Molucques*, under the Equinoctial Line. *Mercator* would have it to be one of thoſe Iſlands, call'd *Sindas* by *Ptolemy*. Its Capital City is call'd *Macaſſar*, which lies in the moſt Southern part of the whole Iſle, 5. Deg. 17. Min. beyond the Line. The Inhabitants are ſo Induſtrious, that they leave not an inch of ground unmannor'd, and ſow with Rice, what they ſtand not in need of for their Cattle and *Coco*-trees. Tis not long ſince they have embraced Mahometiſm. They much reſemble the *Siameſes*, and thoſe of *Pegu*; eſpecially in their Faces, and carry like them a Ball of Ivory in their Prepuce, and are for the reſt of a comely Stature. The Women Dreſs their Heads like thoſe of *Malacca*, and in the Street have their Breaſts open, and wear Breaches reaching to the knees. The N. W. Winds, which blow here from *November* till *March*, make the ſhore very unſafe during that time, and the continual Rains over-flow the flat Country, which is the reaſon that moſt of their Houſes are built upon Piles 9 or 10 foot above the ground.

There are two Kings more, *viz.* one of *Tello*, and the other of *Battergoa*, in this Iſland. The Iſle of *Gilolo*, by the *Portugueſes* call'd *Bato China de Moro*, exceeds the *Celebes* in bigneſs, and produces plenty of Rice and *Sagu*, (whereof more in the Deſcription of the *Molucques*;) Tortoiſes, *&c.* The Inhabitants are very well limb'd, but Barbarous, and not many years ago were Canibals.

The Iſland of *Amboyna*, is ſo near the *Molucques*, that ſome have accounted it among their number; Its circuit is 24 Lgs. at 4 degr. beyond the Line, and 2 Lgs. from the Iſle of *Ceiram*. The Chief City has to the W. of it, a very fair Bay of 6 Lgs. where there is ſafe Anchorage, and good ſhelter for Ships againſt the Winds. This Bay enters ſo deep into the Country, and the Sea on the oppoſite ſide cuts ſo deep within the Land, that the Iſle is very near divided into two, there being only a ſmall *Iſthmus* of 120 fathom left, by which it is join'd together. The leſſer part of the Iſle, therein is the Caſtle of *Amboyna*, contains about 120 ſmall Towns, and the greater but four Towns, and about 7 Villages. The Inhabitants were heretofore Savages, and Barbarous, nay, Canibals, who apply'd themſelves to no Agriculture, which made the Country appear like a Wilderneſs; but of late Years they have apply'd themſelves to he cultivating of the Ground, which being very fertile, produces great plenty of Oranges, Limons, Cocoes, Bananas, Sugar-caues, beſides Cloves. They continue ſtill to be a ſort of Ignorant people, the only skill they ſhow, being in the Management of a Dart, which they do with ſo much dexterity, that at 60 paces diſtance, they will hit a Crown piece. They are famed for their Cakes, made of Rice, Almonds, and Sugar; which the Inhabitants of the adjacent Iſlands take againſt the bloody Flux; for their Rice-bread, made in the ſhape of our Sugar-loaves, and for their ſmall Galleys, which in ſwiftneſs exceed any in *Europe*. It was firſt diſcovered by the *Portugueſes*, in the year 1515.

The Iſle of Amboyna.

Its Inhabitants.

1639. 1515. But the *Dutch* having afterwards also got footing there, the *Portugueses* being resolved to spoil their Commerce, set upon 5 *Dutch* Vessels in the Port of *Banda*, but being repulsed with loss, revenged their disgrace upon the *Amboynese*, whom they suspected to favour the *Dutch*; whereupon, the then Admiral for the *Dutch* in those parts, *Stephen Verhagen*, landed 2 years after, *viz. Feb.* 21. 1603. landed a certain number of Soldiers near *Amboyna*, in order to attack the Castle, but whilst he was landing his Artillery, the *Portuguese* Governor, not daring to stand the shock, surrendred the place without a Cannon shot; though the Garrison consisted of 600 *Portugueses*.

The Dutch take Amboyna.

Before *Mahometism* was introduced into the Isles of *Java*, *Amboyna*, and the *Molucques*, by the *Persians*, and *Arabians* tracing hither, they were all *Pagans*; some of which continue in it still, others, though circumcised, yet persevere in their *Pagan* Superstitions. Nothing is more frequent here, than to Worship the Devil; tho' they are not able to tell you what he is, They affirm him to be an Aereal Demon; whence they give him the Name of *Lamithe*, i. e. *Air*, yet make him subordinate to another call'd *Lanthila*, as well as to him they call *Tantay*, who is a deg. lower than *Lanthila*. They give them one general Name, *viz. Tito*, i. e. *Evil* Spirits, and say that they appear to them in Human shape, when they are to pronounce their Oracles, and reveal unknown things to them. To do this 20 or 30 of them Assemble, and by the help of a small Drum, call'd *Tyfa*, some Wax-candles, and certain Conjurations, as also a Sacrifice of Meat and Drink, make them appear before them. As they are of Opinion, that what ill befals them comes from the Devil, they are very careful not to neglect his Worship; for which purposes, they have Wax-candles lighted in their Houses, where they attend the Devil with Meat and Drink.

Their Religion.

Consult the Devil.

Circumcision. Their Circumcision is also different from that of the *Jews* and *Mahometans*, for instead of cutting off the Prepuce, they only slit it, and that not till they are 12 or 13 years of Age.

Marriages. Their Marriages are soon made, and as soon dissolved; For every thing being agreed upon, they use no further Ceremonies, except that the Bridegroom's Father gives a small present to the Bride, in lieu of which her Father makes the wedding Feast; where they have their Musick and Dancing. If a Wife have a mind to part from her Husband (which they do upon very frivolous occasions) she has no more to do, than to restore the present, which done, she pours Water on her Husband's feet, to intimate, that thereby they are both cleansed from all Impurities they have contracted during their Marriage, which is thereby dissolv'd, and either party at Liberty, to provide themselves another Spouse, as soon as they please, when they are to take a solemn Oath; Water is put into a Dish, into which having cast Gold, Earth and a Leaden Bullet, they dip into it, the extreamity of a Musquet Barrel, the point of a Halbert, Sword, Knife, or some other Weapon, and so give the Dish with Water to him, who is to take the Oaths to put him in mind, that all what has been cast or dipt into the Water, will be Instrumental to his Destruction, if he forswear himself.

Oaths.

Sorcerers. They have among them a certain mischievous Gang, who under pretence of Witchcraft, do mischief to their Neighbours, either by poison or other means; they are call'd *Zippngi*, but when ever they are found out, they are sure to meet with very severe Punishment.

Their Qualities. The Natives of *Amboyna* are naturally stupid, timorous and gross; they commonly bury their Riches, for fear of being rob'd, and such is their simplicity, that they are not to be brought to any Trade; They are so far from any Knowledge, that they have not as much as any Characters among them; all they apply themselves to, is Fishing, and cultivating their Gardens, upon the Fruits of which they live very miserably, though it is observable, that they generally are strong and well proportion'd.

The *Dutch* have three Forts in this Isle, *viz.* The Fort *Cumbella*, or *Victoria*, (fortify'd with Stone Bastions) and those of *Hitten* and *Larew*.

Banda. The Isle of *Banda*, which is 3 Lgs in length, and one in breadth, lies 24 Lgs from *Amboyna*, extending from N. to S. It has some few Towns, the Chief of which is *Nera*. The Inhabitants are very zealous *Mahometans*; As they are always at War with some of their Neighbours, so they keep a constant guard along their Coasts. Their Arms are, the Cymetar, and a wooden Buckler 4 foot long; in the managing of which they are very expert, as being train'd up to it from their infancy. They make use also sometimes of Fire-arms, but what they put their chief trust in is the Lance, being 8 or 10 foot long, which they cast with such Dexterity and Strength, that they will run a Man quite through with it; of these they commonly have 2, which after they have cast, they betake themselves to their Swords; so they make use of a kind of light Gallies, having on each side just above the surface of the Water, two seats like Wings, where the Slaves are set to row. Three are allotted for each seat, every one with his Oar, which being made like a hollow wooden Shovel, they thrust it as far as they can into the Sea, and in drawing of it back, turn it about their Heads, with such a slight and swiftness, that there are but few Ships that can over-take them, with all the Sails they can make. 1639.

Their Arms.

The Natives of *Banda*, live very often to 120 years of Age. When they inter their Corps, they are carried by 12 Persons upon a Bier or Coffin, covered with Calicoe, the Men first, and the Women following it; after it is buried, they return to the House of the deceased, where they Feast together, order incense to be burnt over the Grave, for 24 hours, and set up a burning Lamp at Night, in a hut, made for that purpose. The Men lead a very idle Life, leaving all Business to the Management of the Women; who are imployed in breaking the Nutmeg-shell, and drying the Nut and Mace, the chief thing they rely upon for their Maintenance. As far as ever I could learn, this most excellent Spice, grows no where but in the Isle of *Banda*, and the six following adjacent Isles, which make up the Isle call'd *Banda* by the Inhabitants; *viz. Gunaxi*, *Nera*, and *Lantor*, (which is the best Road for Vessels) *Puloway*, *Pulorini*, and *Rossingin*.

Interment.

It is next to a Paradox to believe, that these 6 small Islands should be able to produce such Prodigious quantities of Nutmegs, as are sufficient for the whole World; unless it be considered, that besides a few *Duriaons*, *Nancan*, *Bananas*, *Oranges*, and *Coco*-Trees, the Islands are covered all over with them, like one continued Forest; the Trees of which are laden with Flowers and Fruits, which is gathered three times a year; *viz.* in *April*, *August*, and *December*; but the best is gathered in *April*. The Tree it self resembles our Peach-tree, the Leaves whereof are somewhat less, and more round. The Fruit is enclosed within a husk, as thick as that of our Walnuts, which being opened, you see a Leaf very thin upon a hard shell, which may be discovered through it; this Leaf is the Flower of Nutmeg or Mace, and to come to the Fruit you must break the shell, whilst the Nut is green; the Flower is of a Carnation Colour, which after it is parted from the shell, turns to an Orange Colour. It makes a most excellent preserve, if done with Salt and Sugar. The Inhabitants make a good Stomachick Ointment of Nutmegs or Mace Powdred, and mix't with the Oil of Roses.

Nutmeg.

Mace.

The Inhabitants don't amount to above 12000 in all, among them are not above 500 fit to bear Arms, yet are they so mutinous and stubborn, that to Bridle them, the *Dutch* have 2 Forts here, call'd the *Nassau* and the *Belgica*, where Vessels may Anchor at 9 or 10 fathom Water, within Musquet shot, and that without the least danger. The Serpents here are of such a Prodigious bigness, that in the Isle of *Nera* one was found, with 5 Hens, one Duck, and a sucking Pig in the Belly.

The Dutch Forts of Banda.

The *Molucques*, properly so call'd, are no more than five in number, to wit, The Isles of *Ternate*, *Tidar*, *Motsel*, *Machiam* and *Bachiam*, known to the Ancient *Pagans*, by the Names of *Cupe*, *Donco*, *Montil*, *Mara*, and *Seque*; and situate all together within the space of 25 Lgs. The Sun-beams are so penetrating here, that they render the ground as dry as a Sponge, which not only sucks in all the Rains that fall, but also swallows the very Torrent near their Scources. But as they are not able to penetrate through the thick Forrests, so the grounds there produces both Trees and Herbs; whence it is, that these Islands are sufficiently stored with *Bananas*, *Cocoes*, Limons, Oranges, *Sandal* and *Calamba*, besides Spices of all sorts, but they produce neither Rice nor any other Grain; The defect of which is supply'd by the Tree, call'd by the Natives *Laudan*, and *Segueiro*, by the *Portugueses*, the pith of which furnishes them with a kind of Meal for Bread, as the Leaves when come to their full growth

The Molucques.

serve

1639. ſerve them for the covering of their Houſes, and the bigger veins for Rafters, as the leſſer make good Cordage. While theſe Leaves are young, they are covered with a kind of woolly ſubſtance, which affords Materials for Stuffs. They are not unlike the *Cocoe* Leaves, the Tree which bears them being commonly 20 foot high, and the trunk a fathom in Compaſs, but being compoſed only of the Bark and Pith, is eaſily cut down, the firſt not exceeding an Inch in thickneſs; The Pith is very white, and may be eaten without any further Preparation, after the ſtrings of the wood which are mix'd with it are removed; But, if they intend to make Meal of it, they beat the Pith to powder, put it in a Searce made of the Bark of the ſame Tree, over a Tub made of its Leaves; and by pouring a ſufficient quantity of Water upon it, ſeparate the ſtrings from the mealy part, which ſettles at the bottom of the Tub, and being ſeparated from the Water, and dry'd, affords that Meal they call *Saga*. This they Bake in certain moulds of Earth, made red hot, with incredible diſpatch. This Tree, which grows alſo in *Amboyna*, and ſome other places, affords alſo a certain Liquor, call'd *Thuack*, which taſtes like Wine.

Sagu, a ſort of Meal.

A ſort of Wine.

Theſe Iſlanders, tho' they are not deſtitute of Cattel, yet live for the moſt part upon Fiſh; they have no Gold, Silver, or any other Mines, being furniſh'd with Iron from the Iſland of *Lambaco*. They are generally black, tho' the Women not ſo much as the Men, with black ſhining Hair, (occaſioned by their continual perfuming it with ſweet ſcented Oils) great Eyes and Eye-brows, and ſtrong Limbs; they ſoon become grey, yet live to a great Age, are active rather than laborious, and very ſociable in Converſation, but ſomewhat inclining to boldneſs, and inſolence, and in their Dealings cratty and deceitful. The Men wear generally Turbants like the *Turks* covered with Plumes. The King is diſtinguiſhed from his Subjects by a kind of a Mitre, being for the reſt clad in Drawers only of blue, red, green, or yellow Satin, ſome of theſe Iſlanders make uſe alſo of a kind of cloſe-body'd Coat faſtned round the Shoulders, and cut below like the Military Garments of the ancient *Romans*. The Women wear no Head-dreſſes, but lay their Hair ſmooth over their Heads, which they tie behind, and cover it with Plumes, or Flowers; their Garments are of *China* Silk Stuffs, but their chief Ornaments are their Bracelets, Rings, and Necklaces of Pearl, Diamonds, Rubies and Emeralds. The *Chineſes* were the firſt who made themſelves Maſters of theſe Iſlands, and after the *Perſians* and *Arabians*, who introduced *Mahometiſm* here.

The Inhabitants.

Their ancient Cuſtoms (tho' very barbarous) are their only Law; they allow Polygamy, yet don't puniſh Adultery; but ſtealing is a mortal Crime. At break of Day certain Perſons appointed for that purpoſe, beat the Drum about the Streets, to exhort the People to the performance of the Matrimonial Duty; they uſe generally the *Malayan* Language, tho' every one of theſe Iſlands, has its peculiar one, which ſhews them to be deſcended from divers Nations.

A peculiar piece of Policy.

Thoſe of *Java* firſt of all brought Cloves to theſe Iſlands, whence queſtionleſs the *Perſians* and *Arabians* tranſported them among the *Greeks*, and *Romans*; the *Egyptian* Kings had eſtabliſh'd the Spice-Trade in the ports of the *Red-Sea*, where after the Conqueſt of this Kingdom by the *Romans*, it continued till the diſſolution of the Empire. The *Geneneſes* monopolized this Trade for many Years at *Caffa*, till the *Turks* found means to carry the Spices by the means of their *Caravans* to the *Mediterranean Sea*; but this Commerce was much ſpoil'd by the *Soldans* of *Egypt*, who having eſtabliſh'd it at *Alexandria*, and *Cairo* by the way of the *Nile*, remain'd in Poſſeſſion of it till the *Portugueſe* found out the way by Sea round *Africa*, to the *Eaſt Indies*, and by means of their Fleets deſpoil'd the *Egyptians* of this Commerce, and continued Maſters of it till the *Dutch* diſputed the ſame with them, and at laſt got it into their Hands; it was in the Year 1511. that the *Portugueſe* firſt diſcovered the *Molucques* Iſlands, being invited thither by ſome of their Kings, who were at variance among themſelves, and had ſo much good nature as to deſire the *Portugueſe* to erect their forts there, for the better defence of their reſpective Iſlands. Pope *Alexander* VI. having divided the two *Indies* betwixt the *Caſtilians* and *Portugueſe*; the Emperor *Charles* V. pretending the *Molucques* to belong to him, (upon an erroneous Suppoſition concerning the diſtance of the two Rivers, *Ganges* and *Indus*,) ſent *Ferdinand Magellanus* the 21ſt. *September* 1519. from St. *Lucar* to take poſſeſſion of theſe Iſles in his Name. Being come to 53 deg. he paſs'd the Streight call'd ever ſince after his Name, the Streight of *Magellan*, and came up to the height of the *Molucques*; but being by contrary Winds, and the Current of the Sea forced to the *Manilles*, was there ſlain with 35 of his People. 1639.

The Cloves and Spice Trade.

The Streight of Magellan.

The Emperor ſent afterwards thither *Gonzalo Gomez de Eſpinoſa*, and *Sebaſtian del Cano*, who took the Oath of Fidelity of the Kings of *Ternate*, of *Tidor*, and of *Gilolo*; but the *Portugueſe* being ſenſible of the advantage that accrued to them in the Spice-Trade by theſe Iſlands, took the opportunity, whilſt the Emperor was embroil'd in heavy Wars in *Europe*, to interrupt the Commerce of the *Caſtilians* in thoſe Parts, which occaſioned ſeveral Treaties, *viz.* that at *Segovia* 1525. and that at *Sevil* 1526. which proving fruitleſs, the matter was at laſt brought to an iſſue at *Saragoſſa* 1529. by vertue of which Treaty the Emperor Mortgaged theſe Iſlands to the *Portugueſe* for 350000 Ducats; ever ſince which time theſe laſt remain'd ſole Maſters of the Clove Trade here, till they were interrupted by the *Dutch*.

Ternate.

The Iſle of *Ternate*, the chiefeſt and biggeſt of the *Molucques* is ſituate 48 deg. on this ſide of the Line, 28 Lgs from the Iſle of *Banda*; its compaſs is about 8 Lgs, it affords but little Proviſions, except Goats and ſome Poultry; but the Almonds here are moſt excellent, the Shell (each of which contains 3 or 4) being ſo hard that the Smiths uſe them inſtead of Coal. It produces alſo ſome Tobacco, but much inferior in goodneſs to that brought from the *Weſt Indies*.

Gamma Lamma.

The Town of *Gamma Lamma*, the Capital of the whole Iſland, conſiſts only of one Street 2500 Paces long, built along the Sea-ſide, the Houſes being all of Cane or Timber. The Road is not fit for Anchorage, the bottom being all rocky, which makes the *Dutch* Veſſels always lie at Anchor near the Village of *Telingamma*, within 2 Miles of *Malay*, betwixt the Iſlands of *Ternate* and *Tidor*.

Cloves.

The Clove Tree.

But the chief Product of theſe Iſlands is the Clove, call'd *Clavos* by the Modern *Spaniard*, by reaſon of its reſemblance to an ordinary Nail. The Tree that bears it, is by thoſe of the *Molucques* call'd *Siger*, the Leaf *Varaque*, and the Fruit it ſelf *Chanque*. The Tree reſembles the Laurel, its Leaves being however ſomewhat narrower, like thoſe of the Almond-tree; ſhooting forth its branches at the top, not unlike the Myrtle. The Fruit is white at firſt, grows green by degrees, and brown when it comes to Maturity, but does not turn black till it be dry'd in the Sun, which is done in 2 or 3 Days.

This Tree grows naturally without planting, or cultivating; bears Fruit in the 8th. Year, and laſts 100 Years. The Fruit is gathered but once every other Year, becauſe the Inhabitants break off the Buds the firſt, that they may have a more plentiful Crop the ſecond Year. The Fruit is ripe from *Auguſt* to *January*. This Tree affords no Gum, by reaſon of its exceſſive heat, the Fruit being ſo dry, that the Inhabitants, to increaſe its weight, put a Pitcher with Water within 10 foot of their Clove Bags, which is ſuck'd up within 2 or 3 Days time. The *Chineſes* do the ſame with their raw Silks. As the *Molucques* yield more Cloves than any of the other Iſlands hereabouts, this has miſled ſome to affirm, that they grow only here, it being certain they yield yearly 6000 Barrels of Cloves (550 weight to a Barrel) tho' at the ſame time the Iſles of *Ires*, *Meyeraus*, *Crudy*, *Sabuge*, *Marigoran*, *Gamoconora*, *Amboyna*, but eſpecially the Iſle of *Veranula* produce conſiderable quantities, but not ſo good as thoſe of the *Molucques*.

The Mountain of Ternate.

In the midſt of the Iſland of *Ternate* is a very high Mountain full of Palm and other Trees, which has a moſt miraculous Well on the top, which is ſo deep, that 500 fathom of Rope did not reach to the bottom, but to a very fair Spring, the Water of which no body hitherto has ventur'd to taſte, by reaſon of the ſulphurous Exhalations, which about the *Equinoxes* eſpecially iſſue from this Mountain, and ſometimes caſt red ſtones at 20 Lgs diſtance; this Mountain is covered with Wood near 2 parts of its height, but afterwards is exceſſive cold, having on the top a very cold ſpring, and a Lake of ſweet Water planted about with Trees. They know not of any certain difference of ſeaſons in theſe Iſlands, except that it generally rains more with the N. than with the S. Wind. Serpents

1639. they have of 30 foot long, but neither malicious nor venomous, living for the most part upon Fish.

This Island has also a peculiar Creature call'd by the Inhabitants *Cuſos*, which as it feeds on Fruits, so it is always seen upon the Trees, its Tail being of such strength, that it will hang by it to a branch of a Tree the better to come at the Fruit; it is in shape not unlike our Rabbets; its colour betwixt a gray and a red, with thick curling and soft Hair, round and fierce Eyes, and very small Feet. As they have scarce any Domestick Birds except the Parrots, so their Forests are full of wild ones.

Cuſos.

The *Moluccques* produce a certain Wood which burns, sparkles and flames like common Wood, but consumes not, tho' you may rub it to Powder with your Fingers. Not far from the Fort *Ternate* grows a certain Shrub call'd *Catopa* by the Inhabitants, from which falls a Leaf which by degrees turns to a Butterfly.

An incombustible Wood.

The Isle of *Tidor* is at least as large and fruitful as *Ternate*, the Inhabitants here being so industrious as to improve the Fruit of the Clove Tree by pruning and watering it, which by this means becomes both fairer and larger than the rest. Here they have also the best white Sandal-wood, and those Birds call'd *Paxaros del Cielo* by the *Spaniards*, and by us *Birds of Paradise*. After they have catch'd them, they cut off their Feet close to the Body, so that when the Flesh drys, the Skin and Feathers join insensibly together, that many have been of Opinion, that these Birds are without Feet.

Tidor.

Birds of Paradise.

The *Dutch* are Masters of *Malaya*, a well fortify'd Town in *Ternate*, as also of the Fort of *Taluco*, and that of *Maricco* in *Tidor*, of the Fort *Barneveld* in *Bachiam*, and 3 more in the Isle of *Machiam*, *viz.* at *Taſſaſo*, *Tabillola*, and *Guoſſiquia*. They have also a Stone Fort in *Motir*.

The Kingdom of *Bachiam*, which is govern'd by its own Sovereign, being so well stor'd with *Sagu*, that the Inhabitants have sufficient wherewithal to subsist without Labour, has made them so idle, and careless, that they are scarce able to raise 500 fighting Men.

Bachiam.

The Isle of *Machiam*, which is subject to the King of *Ternate*, is about 7 Lgs in Circumference; the *Dutch* made themselves Masters of it 1601. since which time they have erected three Forts; the 1st. at *Guoſſiquia*, situate upon an Eminency, and strengthened by 4 Bastions of Stone; as is also the Fort of *Taſſaſo*, built likewise upon an Ascent, at a 160 Paces from the Sea-shore; it is bigger than the first. The Fort of *Tabillola* has only 2 Bastions. Besides these 5 Islands properly call'd the *Moluccques*, there are about 72 more, subject to the King of *Ternate*; from *Mindanao* on the North side, and *Bina* and *Corea* to the South, and between the Continent of *New Guiney* to the East. The most noted are these, *Motir*, *Machiam*, *Cajoa*, *Xula*, *Burro*, *Na*, *Nolos*, *Meao*, *Tuſiare*, *Doe*, *Saquite*, *Totole*, *Baol*, *Guadupa*, *Gorontano*, *Ilibato*, *Tamſue*, *Manado*, *Dondo*, *Labague*, *Jaqui*, *Gabe*, *Tobuquo*, *Buto*, *Sanguaen*, &c. Some of which are 70 Lgs distant from *Ternate*.

Machiam

The *Philippine* Islands which lie to the North of the *Moluccques*, were discovered by *Ferdinand Magellanus*, 1520. but no establishment was made there, till 1565. when they got the Name of *Philippines* from *Philip* II. then King of *Spain*.

The Philippine Isles.

The first Settlement of the *Spaniards* was made in the Isle of *Zebue*, and about 6 Years after that in the Isle of *Luſon*, now called *Manille*, from its chief City, which is situate in an Isle made by an Arm of the Sea, at 12 deg. on this side the Line, in the most Southern part of the Isle; the whole compass of which is 350 Lgs; it is 70 Lgs from *China* to the North, and 270 Lgs to the N. E. from *Japan*; to the East it is encompass'd by the Ocean, and to the South by the great *Archipelago*, which is thereabouts divided into 5 Seas, and stor'd with a vast number of Islands. The Fertility of the Soil joyn'd to the Industry of its Inhabitants, makes this Isle abound in Corn, Rice, Fruits of all sorts, and Drugs; as likewise in Beef, Bouffles, Deer, Goats and Hogs; their Cocoe-wines they keep so long, till it becomes as strong as *Spaniſh* Wine. Their Limons, Oranges, Figs, and Pears are the best in the World; and they abound both in Domestick and wild Fowl and Birds. They have a peculiar way here of killing the Crocodiles, of which they have great numbers; he who is to engage with this Creature, Gantlets his left Arm to the Elbow, having in the same hand a Truncheon of a foot long, pik'd at both ends, with a Dagger in the other; thus armed, he goes into the Water up to the Waste, and while the Crocodile is making at him with his Jaws open, he thrusts his left Hand down his Throat, so as to keep them from shutting, and in the mean while stabs him with his Dagger in the Throat till he drops down dead. 1639.

The *Philippine* Islands produce more Tygers, Lions, Bears, and such like wild Beasts, than *Africk* it self, and abounds in *Algalias* (which are the Creatures from which they get the Musk) and Civet-Cats.

The *Chineſes* drive a vast Trade in these Islands with the *Spaniards*, the last of which buy their Calicoes, Silks, Porcelain, Gun-powder, Sulphur, Iron, Quick-silver, Copper, Meal, Nuts, &c. and carry them to the *West Indies*, where these things are sold at a very dear rate.

In the City of *Manilla* resides a *Spaniſh* Archbishop, who has three Bishops under his Jurisdiction for the Spiritual Government of the *Philippine* Islands; and such is the influence they have here over these ignorant Wretches, that they keep them in subjection without any standing Forces; the Archbishop is also Vice-Roy of these Islands, and has the Management of all Publick Affairs, in conjunction with the King's Council appointed in that City, which is very large, and its Houses built of Stone, after the Modern way. Within and about it live above 15000 *Chineſes*, and vast numbers of the same Nation resort thither every Year for the Conveniency of Traffick; so that from *December* to *April* you may see in the Harbour (which is defended by 2 Wooden Forts) near 500 *Chineſe* Vessels. This Place is also much frequented by the *Japoneſes*, but not in near so great a number as by the *Chineſes*, notwithstanding which the *Spaniards* are much more jealous of the first than of the last.

The Archbishop of *Manilla*.

The City of *Manilla*.

Japan is composed of many Islands, distinguish'd by several Arms of the Sea, extending from 31 to 39 deg. of elev. being in some places scarce 10, in others 30 Lgs in breadth. On the East side it hath *New Spain*, to the North *Tartary*. On the West *China*, and the Sea to the South, with part of the *Terra Auſtralis*. The whole Empire consists of 66 lesser Kingdoms or Provinces; 53 whereof are comprehended within the two great Kingdoms of *Meaco* and *Amagunce*; 9 others within the great Kingdom of *Ximo*, and the remaining 4 in that call'd *Xicoum*.

Japan

According to the *Japoneſes* own confession, they are to this Day uncertain whether the whole Empire be an Island, or annexed to the Continent, forasmuch as from the Province of *Quanto* to the Borders of the Province of *Tzungaa* is 27 Days Journey to the E. N. E. and then they cross an Arm of the Sea of 11 Lgs broad, which brings them into the Province of *Jeſſo*, or *Seſſo*, so encloſed by unaccessible Mountains, that no body hitherto has been able to discover the extent of them. The whole Empire of *Japan* being divided into many Provinces, the same are committed to the Government of certain Princes and Lords, who have their Secretaries assign'd them by the Emperor himself, whose business it is to have a watchful Eye over them, and to give an account of their Transactions, especially concerning their Revenues, which are very great, and according to the computation of the *Japoneſes* amount yearly to 18 Millions 400000 *Kockiens* (each of which makes 4 *French Crowns*) out of which they are oblig'd to maintain a certain number of Forces both Horse and Foot for the Emperor's Service, in proportion to their Revenues, which consist chiefly in Lordships, and Demesns. They have Mines of all sorts, &c. so that he who has 1000 *Kockiens per Annum*, is oblig'd to maintain 20 Foot and 2 Horsemen, by which means the Emperor is able to raise an Army of 368000 Foot, and 38800 Horse, besides the 100000 Foot and 20000 Horse he entertains as a standing Force, out of his own Revenue, which is so much the less to be admir'd at, that some of these Lords have such vast annual Revenues, that according to the beforementioned Proportion, they are obliged to furnish 1200 Foot and 120 Horse.

Whether it be an Isle or Continent.

The Emperor of *Japan*'s Army.

All the great Lords of *Japan* have three Names, *viz.* their proper Name, that of the Family, and a Sirname; which they commonly take from the Province, City, or Castle they govern; they have also a Custom of changing their Names thrice in their Lifetime, the first given them in their Infancy being altered at the Age of 26, and that again at 50 or 60 Years of Age.

They

1639. They have another Custom in *Japan* for the Slaves to offer themselves a voluntary Sacrifice to their Masters whenever they die, which is done by a solemn Engagement, and confirmed by a Bottle of Wine.

They die with their Masters.

As this is chiefly done by those Slaves, to put an end to the Miseries they endure in their Life time, so there have been some, who have desired from their Masters to bury them under the Foundation they were going to lay for some Considerable edifice or other. Their *Pagodes* or Temples are of wood, about 7 or 8 fathom square, and rais'd 3 or 4 foot from the ground. They have small Turrets with lights in them on all sides, and within certain Statues, unto whom they Address their Prayers. The King, and Great Lords have many fair Castles belonging to them, among which, those that are fortify'd, are Garrison'd by the Emperor; but their Cities are generally without any Fortifications, and if some few of them have any, they are only single Walls. Their Cities are built after the same manner, each Street having two Gates, which are shut up, and guarded in the Night time; They have no peculiar Revenues belonging to them, neither pay they any Impositions, except a very inconsiderable rent for their Dwellings to the Governour; for whose use they are also obliged to keep a Man at work at certain times, but this does not happen very often; The Governours having, as we told you before, certain Demesnes allotted them for their Revenues, and among others, the advantage of Fishing, especially of the Whale, of which there are yearly taken near 300 upon the Coast of *Japan*, but they are neither so big nor so fat, as those of the Northern parts.

The Japonese freed from Impolts.

Every *Japonese* of what Condition soever, is absolute Master of the Life of his Slave; They are so cruel in their Punishments, that the least trespass is punish'd with Death; Gaming for Money, and killing any Person, though in his own defence, is Capital, and so is Theft, though it were but for a Penny; and in Offences of a more heinous Nature the Fathers, Brethren and Children are put to Death for the Crime of a single Person; nay the Wives and Daughters, tho' never so Innocent are involv'd in the same misfortune, for they are made Slaves, and their whole State is confiscated. Thieves are fastened with a Rope of Straw to a Cross, and then the Executioner runs them with a Pike into the right side up to the left Shoulder, and again, from the left side up to the right Shoulder. Other Malefactors are fastned only to a Post, with their Hands stretch'd out, and held up by two Persons, and so the Executioner runs them with a Pike through the Neck into the Heart. Those Crimes which involve the whole Family into the same Punishment, are Extortion, Coining, Firing of Houses, Wilful Murther, and Ravishing of Women, and are punished, by crucifying with the Head downwards, by boiling in seething Oil or Water, tearing them to pieces by 4 Horses, *&c.* Lying is also capital here, especially if said before a Judge.

Their Punishment.

Lying capital.

Their Princes and Great Lords, if guilty of any Crimes are banish'd into the Isle of *Faitsenjima*, lying 14 Lgs from the Province of *Jedo*. It is all Rocks, without any Road or Harbour, producing nothing but Mulberry Trees, and Silk-worms, which furnish those Miserable Prisoners with Materials, for the making of Stuffs, in which they employ their Life, and are relieved from time to time with most miserable food. It is computed that the Expence the Emperour of *Japan* is at yearly in his Court, amounts to 4 Millions of *Kockiens*, and 5 Millions more for his Governours and Military Officers.

His ordinary Residence is in the Castle of *Jedo*, which is 2 Lgs in Circumference, and strenghned with a triple Wall, and as many Mounts all of free-stone; The gates whereof are covered with strong Iron Bars, and lodges built over them, which contain 300 Soldiers, for a guard of each Gate. His own Palace, with the Apartments of the Women, stands in the Center, and round about it the Houses of the Princes, and other Great Lords, all richly gilt and sumptuously furnish'd, their chief emulation being to out-view one another in this kind of Magnificence, which is among them look'd upon as the greatest mark of the respect they can pay the Emperour, who never stirs abroad, but in Company of a great number of these Lords, and their young kindred, who are the Guard of his Body, and by applying themselves, to Musick, Physick, Writing, Painting, or the Management of publick Affairs, render themselves qualified for higher employments. They are all clad in Black, and as they march along the Streets, don't so much as utter one word.

The Castle of Jedo.

1639.

As the Revenues of the Emperour of *Japan*, are so great, that the ordinary income of 2 Months is sufficient to defray his whole years expence, his Treasure must be immense, most of which consisting in Gold and Silver, is laid up in vast Chests, enclosed in several Towers, belonging to the Castle, besides what is disposed in divers parts of the Country.

The Emperour's Treasure.

Their Horse are arm'd with Corselets, Fire-locks, not much longer than our Pistols, with Pikes, Bows, Arrows and Cymetars. The Foot have only Head-pieces, 2 Cymitars each, a Musquet, Pike, a half Pike, and a broad Knife; each Company consists of 50 Soldiers, a Captain, a Lieutenant, and 10. Corporals; 5 of these Companies make a Battalion, commanded by a peculiar Officer, and 50 Companies a Brigade.

Their Arms and Soldiery

The Emperour of *Japan* has a numerous Council, though only 4 are charged with the Management of all Important Affairs, and are to attend daily at Court; some of these have 2 Millions of Crowns, others 300000 or 400000 Crowns, others 40000 or 50000 Crowns yearly Revenue; But their Expences are Proportionable to their Riches; being obliged to live at least half the year at Court in vast splendor, maintaining perhaps a retinue of 300 Persons, and above 1000 in their Families, and that in a place where Provisions are excessive dear; not to mention the vast Expences they are at in their Buildings, and the Entertainments they are obliged to give to the Emperour, whenever he is pleased to honour them with a present, perhaps of a Crane, which he has taken a hunting. As Great Persons are not to marry any Wife, but what is presented to them by the Emperour himself, so they are put to vast charges, in giving them all the Magnificent Entertainment, and all the Enjoyments they can, except their Liberty, which they must resign to their Husbands, and are not permitted to go abroad, above once a year, to visit their neerest Relations; notwithstanding the Wives of *Japan* have the Reputation of great reservedness, and being beyond all others faithful to their Husbands, of which many instances might be alledged, which for Brevities sake, we will not relate here.

The Council of State.

Their Expences.

There are however not wanting those who ascribe this reservedness, rather to the severity of their Laws, than their Inclinations, it being certain, that even the least suspicion of dishonesty after Marriage is punished here with the utmost cruelty; so that, if a Husband finds his Wife lock'd up in a Room with another Man, he may without any further enquiry kill them both. The better to allay the heat of youth, and the danger arising from thence, in respect of Adultery, they have in the Cities; nay, even in most Inns upon the Road, certain Prostitutes, who being for the most part Slaves, expose themselves to Travellors for Money; and, if a Man is to stay for any time in a place, he may hire one of these Concubines from their Masters, at a certain easie rate, and keep her for his own use.

Jealousie

As to their Devotion, it may truly be said, that they scarce have any at all; the most devout among them seldom praying in publick above once a Month, before their Idols, which stand in their Temples (of which there is a vast number all over *Japan*;) near them are their Sepulchres, covered with great Tomb-Stones 2 or 3 foot high, and those of Persons of Quality, have a little Pillar erected near them, containing their Names, and certain other Inscriptions, in the Nature of an Epitaph.

Devotion.

Their Ecclesiasticks are divided into 12 different Sects; eleven of which abstain from any that has been living, and from Women, but are permitted to use *Sodomy*; if they break their vow, they are punish'd with Death. Those of the 12th Sect, are allow'd to marry, and to feed upon all sorts of Provisions; the chief of this Sect is the Head of all their Clergy, and their Temples are endow'd with many Priviledges, and settled Revenues, whereas those of the other Sects, are maintain'd only by Alms. Some among the *Japoneses* believe the Immortality of the Soul, and the rewards and punishments of another Life for ever; But the most have so little sense of Religion, that they meet in their Temples to Drink, and commit other Debaucheries; whence it is also, that never any such thing is heard of as Controversie about Religion; tho' they are such irreconcilable Enemies to the Christians, that suffering Death not to be sufficient

Their Ecclesiasticks.

Their Opinion concerning the Soul.

1639.

Their hatred to Christians.

ent to shake their constancy, they invented a 1000 Methods, to renounce their Faith, which however at last they were not satisfy'd with, unless they could discover another Christian to release them from their Torments; which are so various as would almost fill up a whole Volume.

Their Houses are very slightly built, and seldom above one story high, because the Country is much subject to Earth-quakes, they are raised 3 or 4 foot from the Ground, and convenient enough within; being divided into certain Apartments, some of which are for the Men, the rest only for the use of the Women; where the best part of the Furniture is bestow'd; they are also very nice in their Gardens and Orchards;

Are civil.

They are very obliging in Conversation, especially in their visits, when they present their Guests with *Tobacco*, *Tsia* (a kind of *Thee*, but much better) and with Wine; of the last of which they will take sometimes a very plentiful share; but are sure never to quarrel over their Liquors; Except the Inns for conveniency of Travellers, no drinking Houses are allow'd of in *Japan*; nay, not so much as a publick Cooks-shop, it being their Custom to make their good chear (of which they are great Lovers) in their Houses, where among other things they entertain one another with their Musick, the chief of which is a kind of a Lute, with 4 Silk strings, which they strike with a Peg of Ivory. Their Wine, or rather *Hydromel* is made of Rice, Sugar and Honey, and is as strong as any Wine.

Their Marriages.

Their Marriages are contracted betwixt the Relations, the Bride and Bridegroom being not permitted to see one another, till it is to be Consummated. Those of a common rank may soon be divorced, and if they dislike the Wife, send her back to her Relations, but People of Quality notwithstanding any Disagreement, maintain them in their Houses. Their Children, they educate with all imaginable mildness, without any

Education of their Children.

beating, as well at home as at School, whither they are not sent till they be 7 or 8 years of Age; and when they come to Mans Estate, the Father assigns to his Son a certain part of the House and of his Employment; nay perhaps, the whole, reserving, only a certain allowance for his Subsistence to himself, but the Daughters have neither dowry, nor the least share in their Father's Estates. They are so nice in point of Honour, that they will rather die than recede an inch from it; and a *Japonese* will rather run the hazard of the ruin of his Family, than break his Promise to his

Are Honourable and Trusty.

Friends, which is the reason, that most of their delinquents, will rather endure the most exquisite Tortures, than discover their Accomplices.

The *Japoneses* having such vast plenty of all things, seldom traffick in any Foreign Commodities, but leave that Commerce to Strangers, especially to the *Chineses*; who bring thither the Products and Manufacturies of their Country; though ever since (by reason of the Insolence of the *Japoneses* residing in *China*) the Ancient good Correspondence betwixt those two Empires has been interrupted, the *Chineses* are forbidden by their Kings to Traffick into *Japan*, and therefore are obliged to carry on this Commerce under pretence of transporting their Commodities, to some other parts of the *Indies*; unto which they are the more encouraged by the vast hopes of gain, all Commodities either Imported or Exported out of *Japan*, passing free without paying the least Duties or Customs.

Their Language.

The whole Empire of *Japan* uses but one and the same Language, which is quite different from the *Chineses*; as well as their Characters. As they always use but few words, they write every thing with Pencils, in certain short-hand Notes, in a very little time; their accounts they keep by the means of certain small bowls, which they thread upon little sticks on a square Board. They are not destitute of Books

The *Dairo*.

nor Libraries; The *Dairo* (who formerly was the Soveraign of the Country, and still retains the Preeminence over the Clergy) keeps the publick Records and Writes the Chronicle of the Country. Neither are any other Persons, except the Gentlemen of his House, and such Lords and Ladies as are descended from his Family, allow'd to write Books, which makes them constantly apply themselves to Learning.

Their Money.

The *Japoneses* have but one kind of Measure; Their Gold is of the best kind, but their Silver none of the finest; Of Gold Coins they have three sorts, one whereof is valued at 48 *Tayls*, each of which being worth 5 Crowns Sterl. amounts to 12 Pound Sterl. The 2d sort are worth each 1 *Tayl* and a 5th part, and the 3d 1 *Tayl* and a 6th part; Their Silver Coin goes by weight, being in the form of *Lingots*, so divided, that each piece commonly amounts to 50 *Tayls*. They have also a lesser Silver Coin, made in the shape a *French* bean, which goes likewise by weight.

1639.

The product of Japan.

As the *Japoneses* don't geld any Creature, so they are well stor'd with all sorts of Cattle, as well as Fowl and small Birds; they also abound in Mineral and hot Waters. There is a certain hot Spring here, which spouts forth its Waters duely twice every 24 hours (except when the East Wind blows, when it gives Water 4 times) with such violence, that though the Water arises amidst the Stones, which are laid on the top of the hole, to the height of 20 or 24 foot, it is so hot, that no boiling Water is to be compar'd to it, burning every thing it touches at its first coming out; but being conveyed by certain Pipes into the Circumjacent Houses, it is reduced to such a Degree of heat, that it is convenient for bathing: These Mineral Waters are sufficient proofs, that *Japan* is full of good Mines of all sorts, for they have Gold, Silver, Copper, Tin, Iron and Lead of their own; as well as Cotten, Flax, Hemp, Silks, and all manner of Provisions in Plenty. Their Physicians have a singular reputation for their Ability, but Chirurgery is unknown among them as yet; They make frequent use of *China* root and *Rhubarb*, which as well as most of their other Medicines they, make up into Pills.

The *Portugueses* and *Spaniards* found it no hard matter to settle themselves in *Japan*, and their Religious Ceremonies took so well with the Inhabitants, that they were permitted to build divers Churches in the Kingdom; But the *Spaniards* not being able to contain themselves long within the bounds of Modesty, their domineering temper created such a jealousie and aversion in the *Japoneses*, that they set upon them, burnt their Ships, and 1636. totally banish'd them the Island,

The *Spaniards* banish'd *Japan*.

under pain of Death, if ever they return'd again.

The *Dutch* began to Trade thither first, 1611. Some of their Relations affirm, the City of *Meaco*, to be 21 Lgs in compass; and that the City of *Ossack* and *Bomgo*, are for their Wealth, not inferiour to any of the *Indies*.

The *Dutch* settled there.

The Air of *Japan* is very moderate and healthy, but inclining rather to cold than heat; they Sow in *May*, but don't Reap till *September*. They have neither Oil, nor Butter, and have an aversion for Milk, which they consider as part of the Blood, the Receptacle of the Souls of Beasts; they will not feed upon the Flesh of tame Beasts, but are great Lovers of all kinds of Venison and wild Fowl. Their Cedars are so big here, that they make Masts of them for their Ships; Their Complexion is inclining to Brown, and for the rest are Lusty and Strong limb'd, hardy and patient to undergo any Labour, as well as the injury of the Seasons; never changing their Cloaths, either Winter or Summer; and very moderate in their diet upon occasion.

The Climate of Japan.

The *Japoneses* are distinguish'd into 5 several Ranks, the first is that of the Princes, Lords, and the Chief Officers, both Civil and Military; the second of the Clergy, the third of the Gentlemen and Merchants, the fourth of Trades and Seamen, and the fifth of day Labourers. Once in five Years the Emperor of *Japan* has an interview with the *Dairo* at *Meaco*, which is very Remarkable for its Magnificence, and the great presents made to the said *Dairo*, an ample account of which being to be found in the *Dutch* Relation of the director of the said Company in *Japan*, we will supersede to give the particulars of it here, our intention being only at present to give the Reader a short Relation of what we have received from very good hands, leaving the rest to be compleated by those who have since had the opportunity of taking a view in Person of that Country.

After the Banishment of the *Japoneses* out of *China*, the *Chineses* to avoid the Penalties inflicted upon such as should Trade with them, made use of the Isle of *Tayovang*, whither they carried their Commodities, in order to continue their Commerce with those of *Japan*.

Form of Government.

The Isle of Tayovang.

The *Dutch* being excluded from the Commerce of *China*, follow'd their Footsteps, and 1632 settled themselves in the said Island, as the most convenient place in all the *Indies* for carrying on their Traffick both with *China* and *Japan*; there being a free Passage here all the Year, without being obliged to stay for the *Mousons*, which in most other Places last whole six Months.

1639. Months. The *Dutch*, I say, being sensible of this Conveniency, built immediately a Stone Fort of four Bastions on the Downs, within half a Lg of the great Isle of *Formosa*, which is divided from this Isle by a Chanel only; which tho' not very deep (as having not above 13 or 14 Foot Water at high Tide) yet affords a safe Harbour for Ships against any Winds. For the better defence of the entrance of this Chanel, the *Dutch* have built a strong Redoubt, call'd *Zealand*. The Island of *Formosa* it self is situate at 21 dgs on this side the Line, about 32 Lgs distant from the River of *Chincheu*, and the *Chinese* Island, call'd *Quemoy*, extending from S. W. to N. E. to 21 dgs and an half; its Compass being of 130 Lgs. It is well fill'd with Villages and Inhabitants, who are not govern'd by any single Person, but such as they chuse themselves for their Magistrates; of which more hereafter.

The Dutch settle here.

The Products of Formosa.

It has many Rivers full of the best Fish; their Forests are well stor'd with wild Fowl and Venison, and their Meadows with Cattel; besides Deer, wild Goats, Hares, Rabbets, and such like. Their Forests produce a kind of Horse with Horns like a Deer, call'd *Olavang* in their Language, the Flesh whereof is a great Dainty; as also another Creature not unlike our Bears, but of a much larger size, the Skin of which is much esteem'd in those Parts.

Their Grounds are very fertile, but lie neglected, which makes Fruit very scarce, and what they have, not very grateful to the Palate: It produces also some Ginger and Cinamon; and, as the *Chineses* relate, likewise Gold and Silver: But the *Dutch* have hitherto found none of these Mines worth their looking after. The Places in which the *Dutch* have their Settlements, and lie for the most part along the Sea-side, are, *Sinkan*, *Mandauw*, *Toulang*, *Taffacang*, *Tifulucang*, *Teosang*, *Tefirang*.

Its Inhabitants.

Its Inhabitants appear at first sight like Savages, being of a more than ordinary size, black and hairy all over their Bodies, but in their Conversation are very obliging, honest, and good natur'd. Their Women are not so strong and big, but inclining to Fatness, and yet not ill-shap'd. They wear a sort of Garment round the middle; but when they bath themselves (which they do commonly twice every day in warm Water) they as well as the Men strip themselves stark naked, and make no great account whether they are seen by one another or not. For the rest they are very constant Friends, and religiously observe the Agreements they make with Strangers, Treachery being a thing abominated among them.

Are civil and ingenious.

They neither want Ingenuity nor Memory, being very docile and apprehensive in any thing they apply themselves to. Tho' their Grounds be very fertile, and able to produce much more than they do, they are contented to live upon what small quantity of Rice is brought forth by the Industry of their Wives, who instead of Ploughs (of which they have none, no more than Creatures fit for Tillage) cultivate and dig the ground with Spades, transplant and cut the Rice; and after having dry'd as much of it every night in the Chimney-corner, as will suffice the Family the next day, beat it early in the morning in a Mortar, the Mens minds being wholly taken up with Hunting, especially till they are 40 Years of age, before which time they seldom mind any thing relating to the Grounds. They sow also three sorts of Fruit, call'd by them *Ptingh*, *Quach*, and *Taraun*, not unlike Millet, and a certain sort of Pulse resembling our *French* Bean. Some Roots they have likewise, which might serve them instead of Bread, if they were not furnish'd sufficiently in that respect with Rice. Besides this, they have Ginger, Cinamon, Sugar Canes, *Bananas*, Limons, and great store of *Areca*, not to mention several sorts of Fruits and Pulse not known in *Europe*.

Their Wine.

Instead of *Coco*-Wine, of which they are destitute, they make a certain mixture of Rice, which being soak'd in warm Water, they beat it in a Mortar till it be reduced to a Paste: This they mix with Rice-Meal, chaw'd instead of Leaven; and having put it into an earthen Vessel, fill it up with Water, which after it has fermented and stood 2 Months affords a very pleasant Liquor; which is stronger or weaker according as it is kept shorter or longer, and the older the sweeter it is, and may be kept good 30 or 35 Years.

Their Hunting.

When they go abroad a-hunting, they make use of Snares, small Pikes, Bows and Arrows: Their Nets they spread in the open Fields, or cross the High Ways, and so force the wild Beasts into them. Sometimes the Inhabitants of several Villages make a Hunting-match; and dividing themselves into divers Parties, armed with Half Pikes or Lances, send their Dogs into the Woods, by which means having forced the wild Beasts thence into the open Fields, they encompass them on all sides, sometime for a whole Lg in compass; and so with their Pikes kill all that comes within the Ring, of which few escape with Life. These Lances, or rather Darts, are of Cane 6 or 7 Foot long with several Hooks, which being once fastened in the Flesh of the Beast, are not to be pull'd out; but as the Iron is not well fasten'd to the Wood, but that with the running of the Beasts thro' the Bushes it comes off, a Cord is ty'd to both and a little Bell to the Iron; so that the Lance annoys the Beast, and the Bell discovers its passage where-ever it runs. By this means they catch vast numbers of Deer, which they truck with the *Chineses* for their Commodities, they seldom reserving any thing for their own Use but the Umbles and the Entrails, which they salt, and eat them not before they are half corrupted, as being not cleansed of the Filth before they were salted. 1639.

When one Village is to engage in a War with another, they first declare open War against one another; which being the Signal to be upon their Guard, they don't attack one another by open force, but dividing themselves into small Troops perhaps of 25 or 30 Men, lay in Ambush near the Village they intend to attack till night, when they set upon the Huts which lie dispersed in the open Country; & if perhaps they can meet with an aged Man, they kill him, cut off his Head, Hands, and Feet; nay, if they have time enough, cut the whole Body into small pieces, that every one may take home along with him a piece of it, as a Mark of his Bravery. But if the next Village happens to take the Alarum, they are glad to be contented with the Head alone, or perhaps a good Lock of the Hair, which they carry home in Triumph, as an undoubted Sign of their Victory. When they intend to do a very bold Exploit, they enter the Village by night, force open a House, kill all they meet with, and so betake themselves to their Heels, for fear of being pursued. When they engage in the open Field, their chief aim is to draw one another into an Ambush; but the Death of one Man commonly decides the Quarrel, that side which has lost him retiring immediately. *Their Wars.*

Their Arms are Pikes, but without Hooks; their Bucklers are so large, that they shelter their whole Body, but their Swords short and broad. Besides which they also make use of Knives or Bagonets, like those of the *Japoneses*, Bows and Arrows. Sometimes certain Villages enter into a Confederacy against divers other Villages, in which case they don't chuse a General or any Commander in chief, but such among them as have acquired some Reputation of Courage by having cut off some of their Enemies Heads, are follow'd by a certain number of Voluntiers, who go abroad in Parties, and surprize their Enemies. *Their Arms.*

They frequently engage in a War against the Island of *Tugin*, (call'd by the *Dutch* the Isle of the *Golden Lion*.) The Inhabitants thereof are so mistrustful, that they will not let any Foreigners or others set a Foot a-shore; not the *Chineses* themselves, who come thither to trade with them; but are forced to remain aboard their Vessels, whither these Islanders come to truck with them. If they are so happy as to carry off an Enemy's Head, or perhaps only a Lock of his Hair, or a Pike, they carry it in Triumph as a Sign of their Victory, appoint a publick Thanksgiving-Day, sing Hymns, and offer Sacrifices to their Gods. He who has done the Exploit, is look'd upon for ever after as an extraordinary Man, has a most particular Reverence paid him by all the rest; and he preserves the Head or Pike of his Enemy as a most precious Relick in his Family, which they value beyond any Gold or Silver. *The Isle of Tugin.*

No Body here claims any preference above another, than what is allow'd to Age; each Village being governed here by 12 Senators, chosen every 2 years out of the most aged Persons, who are not invested with any other Power or Authority, than that of calling together the Assembly of the whole Village in one of their Temples, and to propose to them what they think necessary to be done, making use of all their Eloquence (of which they have a sufficient share bestow'd upon them by Nature) and Arguments, to perswade the Chiefs of the Families there present to a compliance with what has been proposed to them; which they are at liberty to accept of, or reject, according as they think fit. *Their Magistracy.*

The

1639. The only Power theſe Senators are inveſted with, conſiſts in this, that they ſee the Commands of their Female Prieſts (which are look'd upon as inviolable) to be put in execution; to take care that ſatisfaction may be given to ſuch as are injur'd, not by any Corporal Puniſhments, but by enjoining them to give a piece of Cloth, Deer-skin, ſome Rice, or perhaps a Pot of ſtreng Liquor, as an Atonement, to their Adverſaries: For theſe Magiſtrates have no Power to puniſh Murther, Theft, or Adultery. In the firſt Caſe, the Matter is commonly compoſed by the Mediation of the Relations on both ſides. If any one be robb'd, he goes accompany'd by his Friends to the Houſe of him who has taken his Goods, and with their aſſiſtance forces him to make an immediate reparation; and what is agreed upon betwixt them, he carries away along with him to his own Houſe. In caſe of Adultery, the injur'd Husband goes without any farther Ceremony to the Dwelling-place of his Wife's Gallant, takes from him two or three Pigs, in ſatisfaction of the Affront put upon him, by making uſe of his Wife againſt his Conſent.

Their Quality of Condition. We told you before, that there is no difference of condition among them; which is ſo abſolutely true, that the Names of Maſters and Servants are not ſo much as known among them. All the Reſpect they pay to one another, is in regard of old Age, which is in ſo high eſteem among them, that a young Man meeting an old one, goes out of his way, and turns his back to him till he is paſs'd; nay, ſuch is the reſpect the young People pay to aged Perſons, that they will not refuſe them eaſily any thing they deſire, tho' it ſhould be to go 3 or 4 Lgs upon their buſineſs.

Their Marriages. Men are forbidden to marry till they are 20 or 21 Years of age. They don't let their Hair grow below their Ears till after 17, and, inſtead of Sciſſors or Razors, make uſe of a chopping Knife, wherewith they cut it upon a piece of Wood. The Hair of their Beards they draw out with braſs Pincers. Maids always let their Hair grow, and may marry as ſoon as they can. The Courtſhip is perform'd by the young Man's Female-Relations, whom he ſends to the young Womans Parents or Friends, to ſhew them what he intends to beſtow upon his Miſtreſs; which if it be accepted of, the Match is made, and he may conſummate the Marriage the next day, if he pleaſes. The Preſents commonly offer'd to the Bride, conſiſt in ſome Silk or Calicoe Scarfs, the Women wear round the Waſte; ſome Waſt-coats, Bracelets of Cane, 10 or 12 Rings of Deers-horn, 4 or 5 courſe Cloth-Girdles, ſome little Veſtments made of Dog's-hair, ſome *Chineſe* Garments, a bag of Dog's-hair, a kind of Head-dreſs made of Straw and Dogs-hair, and 4 or 5 pair of Stockings of Deer-skin, amounting perhaps in all to about 40 Crowns. The poorer ſort content themſelves with a Preſent of a few Bracelets, and 2 or 3 Garments, not amounting to above 3 or 4 Crowns. When the Marriage is to be conſummated, the Bridegroom gets into her Father's Houſe by ſtealth at night, without being ſeen by any body, and ſo creeps into the Bed; which he continues thus for many years after, always coming into the Houſe at night, and going thence in the morning before day-light, the Wife living all this while in her Father's Houſe till her Husband be 40 Years of age; and never ſee one another by day, unleſs ſhe happen to be at home alone, or elſe ſomewhere in the Field.

Women deſtroy the Fruit of their Womb till 35 Years of Age. The Women are obliged not to bring any Children into the World, till they are 35 or 36 Years of age, but deſtroy their Children in the Womb, by cauſing one of their Prieſteſſes to kneel upon their Bellies, till they ſqueeſe the Fruit downwards, and cauſe an abortion. As their Marriages are ſoon made, ſo they are as ſoon diſſolved; for if they grow weary of one another, they may divorce, which liberty is equally allowed to both Parties; with this difference only, that if the Husband ſends away his Wife without any cauſe, ſhe keeps the Preſents he has given her before Marriage; but if for Adultery, or any other Affront offered to him, ſhe is obliged to make Reſtitution. No Marriages are contracted among them, within the 4th degree of Conſanguinity or Affinity.

Their Houſes. Their Houſes are generally large, and better built than is ordinarily ſeen in the *Indies*, with 4 Doors, one to each quarter of the Heavens; ſome have 2 Doors on a ſide; they are commonly raiſed 5 or 6 foot from the ground, and 3 or 4 Stories high. Their Furniture conſiſts in ſome wild Boars and Deers Heads, which next to the Heads or ſome other Trophies taken from their Enemies, are their chief Ornaments; the reſt conſiſts in Deer Skins, which they uſe inſtead of Feather-beds, certain Stuffs, wherewith they cover themſelves, a Spade, Pike, Bow and Arrows; a wooden Trough inſtead of our Diſhes, one Earthen drinking Cup, and a Pot to boil their Rice in, which is their ordinary Food. 1639.

Tho' they have no certain Days appointed for Devotion, yet do they meet at ſet times to make good Cheer, eſpecially every Quarter, in their Temples, where the Women alſo appear in a very odd Dreſs (not eaſie to be deſcribed) in their beſt Apparel made of Dogs Hair; for here inſtead of Wooll they cut off the Dogs Hair once a Year, and after they have dy'd them red, make certain Stuffs of them, which they value as much as we do our Scarlet Velvets. Stuffs of Dogs Hair.

Their Funerals. Their Ceremonies uſed after the death of their Friends, are ſcarce to be parallel'd in Hiſtory; for no ſooner is any one dead, but by beat of Drum made of the Trunk of a great Tree, they give notice thereof to the Village, upon which all the People repair immediately to the Houſe of the Deceaſed, and among the reſt the Women; after they have plentifully drunk of *Arac* (which they bring along with them) fall a dancing very ſlowly upon great empty Cheſts, which makes a doleful noiſe, to expreſs their ſorrow at the Departure of their Deceaſed Friend. Eight or ten Women having thus danc'd for ſome time, with their Backs turn'd to one another, they give way for others, who continue the ſame Exerciſe, which laſts in all two hours. The next Day Preparations are made for the Funeral Rites, which are performed not by burying or burning the Corps, as other Nations do, but to dry it in the following manner; they raiſe a kind of a Scaffold of Canes of 5 or 6 foot high, whereto they faſten the Body by the Hands and Feet, and ſo dry it, by making a good Fire round about it, which laſts 9 whole Days, during which time they ſacrifice ſeveral Hogs, and Feaſt upon the Fleſh, waſhing the Body every Day. After the Expiration of the 9 Days, they place it upon another Scaffold, wrap it in a Matt and ſeveral Garments, where it remains till the 3d. Year; then they take out the Bones and bury them in the ſame Houſe in the preſence of their Friends, who make again Merry with Feaſting and Dancing.

Religion. They have not any certain Religion; for as they can neither write nor read, whatever they have of this kind, is founded meerly upon Tradition. Hence it is that they believe the Eternity of the World, and the Immortality of the Soul; which they affirm ſhall find Good or Evil in the other Life, according to their demerits in this. What is accounted amongſt us as moſt Criminal, are taken for ſlender Treſpaſſes among them, *viz.* Murther, Theft, and Adultery; and Fornication is not ſo much as look'd upon as a Sin; and if a Young Man can get a favour of his Neighbours Wife, it is look'd upon as a very ſlight Offence, becauſe they are not permitted to Marry till they are 20 or 21 Years of Age. The greateſt Crimes among them, and of which the Magiſtrates take notice are, To cover their Privy Parts at certain times of the Year, when they ſhould not; to wear at certain times Silk Garments when only Calicoe ones are allowed them; and not to deſtroy the Fruit in the Mothers Womb before ſhe arrives to the Age of 35.

Their Gods. Among ſeveral Deities they have 2 that have the preeminency above the reſt, *viz.* one *Tamigaſanbach*, and the other call'd *Sariahſingh*; the firſt, whoſe Reſidence they place in the South, is the giver of all good and profitable things to Mankind, the other unto whom they aſſign his Station in the North, they ſay deſtroys all what the former is pleaſed to beſtow on Man, for which reaſon they worſhip both, one for doing them good, the other that he may do them no harm. They have among others, 2 Gods named *Talafidao*, and *Tapuliape*, who, as they are accounted the Patrons of Warriors, are adored only by thoſe Men.

Women Prieſts. They have this peculiar, that their Religious Ceremonies are performed by Women, which they call *Inibs*; their Worſhip conſiſts in Prayers and Sacrifices of Hogs, *Areca*, Deer, and wild Boars Heads, as alſo ſome of their Liquors; after they have feaſted very well, the Prieſteſſes ariſe and muttering out certain Prayers, turn up their Eyes, and at laſt fall on the ground with dreadful Cries; ſometime after they lay immoveable like one in a Trance, for an hour, during which time, they ſay, they have an interview with their Gods. This being over, they climb up to the top of the Temple, walk from one end to the other, and after they have ſaid their Prayers again

ſtrip

1639. ſtrip themſelves ſtark naked, expoſe their Privy Parts, and waſh them in the preſence of all the ſtanders by of both Sexes; tho' but few Men aſſiſt at this kind of Devotion, and the Women have generally taken ſo much ſtrong Liquor, that they ſcarce perceive what paſſes. Theſe *Inibs* alſo pretend to foretel things to come, and to baniſh the Evil Spirits; for the reſt each Houſe has a peculiar place for the private Devotions of the Family, which are perform'd for the moſt part by the Women, who make offerings to their Gods, of what is ſpent every Day in the Houſe; as they do upon certain Altars erected for that purpoſe upon the great Roads.

China. The *Chineſe* Empire being of ſo vaſt an extent, that a moderate account of it would take up a large Volume, we will content our ſelves to give only a Scheme of it here, leaving a more ample Deſcription to thoſe, who of late Years have had the opportunity of taking a full view of it. It is certain that thi svaſt Kingdom of *China* (call'd *Cathay* by the *Tartars*, and *Chinghoa* or *Chunque*, i. e. *Middle Kingdom* by the *Chineſes*) is the utmoſt Province of all *Aſia*, to the Eaſt; having beyond it no other Borders but the Sea, for this reaſon call'd by the *Chineſes*, *Tung*, i. e. *of the Eaſt*.

Its Frontiers. To the North its Frontiers extend all along the *Great Tartary*, from which it is divided by a ridge of Mountains, and where that fails by the famous *Chineſe* Wall, which beginning upon the Confines of the Province of *Leaotung*, extends to the River *Croceus*, upon the Frontiers of the Kingdom of *Tibet*, 300 *German* Lgs in length. To the Weſt it borders upon the Kingdoms of *Kiang*, *Vuſucang*, and *Bengala*; and to the S. and S. W. upon the *Conchinchine* and the Sea; comprehending in its length all the Southern Parts betwixt the 130 and 160 deg. making 1800 *Spaniſh* Lgs in length, and 3000 in compaſs.

Extent.

Provinces. It is divided into 15 great Provinces, among which, ſix, *viz.* thoſe of *Peking*, *Xantung*, *Kiangnan*, or *Nanking*, *Chekian*, *Fokien*, and *Quangtung* extend along the Sea-ſide; the other 9 being Inland Provinces; 5 of which, *viz.* thoſe of *Quangſi*, *Kiangſi*, *Huquang*, *Honan* and *Xanſi* lie to the North, as the 4 remaining, *viz.* thoſe of *Xenſi*, *Suchuen*, *Queichen* and *Juanan* lie to the Weſt. The Provinces of *Leaotung*, and *Corea*, which are on the Eaſt ſide, don't properly belong to *China*.

Cities. All which contain 145 great Cities, and 1263 others, which would paſs for conſiderable Cities elſewhere. Their Cities are for the moſt part built after the ſame Faſhion, ſquare, with 2 large Streets, dividing the whole into 4 Quarters, like a perfect Croſs, ſo that from the Centre of each place you may view the four Gates of it. They are fortified with broad Brick Walls, and flank'd with Towers after the ancient *Roman* faſhion, plaiſtered over with the ſame Earth they make their Porcelane of, which in time grows ſo hard as Stone, and preſerves the Walls againſt the Injuries of the Air, it having been computed, that ſome of them have ſtood 2000 Years, without any conſiderable change.

Their Houſes are very neatly and conveniently built, with Gardens, Orchards, Groves, Fountains, and all other Conveniencies and Ornaments, their Architecture exceeding that of the beſt Maſters of *Europe*. They are of all the Nations in the World the moſt careful in paving and keeping their High-ways, and providing all neceſſaries for the Accommodation of Travellers, throughout the whole Empire, tho' of ſo vaſt an extent, that the Inhabitants of the Province of *Quantung* lying on the Torrid Zone, are as black as the *African Moors*; whereas thoſe of the Province of *Peking*, which is moſt Northerly, are as white as the *Germans*; which difference is alſo obſervable in their Fruits, the Southern Provinces producing all ſuch Fruits as the *Indies* afford, whereas the more Northern Parts have plenty of *European* Fruits.

Climate.

Product. Beſides this, *China* abounds in Gold, Silver, Precious Stones, Musk, Silk, Salt, Precious Gums and Drugs, Rice and Corn, for moſt of which they are beholding to Nature, yet muſt it be withal confeſs'd, that the Induſtry of the Inhabitants, and the eaſie Government they live under, is a vaſt addition to what they are obliged to Nature for; there being not a Fen, Marſh, nay, not a Mountain, but what is planted, cultivated, or put to ſome uſe or other; no Crime being more heinous in *China*, than Idleneſs.

Plenty of Provisions. *China* does not only produce all ſorts of living Creatures, but alſo all the Fruits and Simples we have in *Europe*, but much better, and in greater plenty; and are conſequently ſold at a very cheap rate; nay, even Spices are ſo cheap here, that you may buy 400 Nutmegs for a Crown, and 2 pound of Cloves for half a Crown, and the vaſt quantities of Silk it produces, may be gueſs'd at from what is exported thence into Foreign Countries. 1639.

Their way of Fiſhing. As the Country is full of Rivers, ſo they abound in Fiſhes, which they catch by the help of the Cormorants, of which they have vaſt numbers here; to thoſe they tie a String round their Necks above their Stomachs, ſo that after they have fill'd their Bags which hang under their Throats with Fiſh, they are forced to diſgorge what they have taken, into the Boat, unto which they are faſtned.

Of breeding of Ducks. They have alſo a peculiar way of breeding of Ducks in prodigious quantities. Of theſe they keep 3000 or 4000 in Cages of Canes ſet at the Sterns of great Boats, and let them out every Day to go aſhore and pick the Weeds from among the Rice, and towards the Evening call them to their Cages by a Whiſtle, the ſound of which infallibly brings them back to the Boat unto which they belong. Their Duck Eggs they hatch in Dung, and afterwards put the young ones under the Wings of the old Ducks in the Cages; this way of breeding makes them ſo cheap, that they ſell 5 or 6 for two pence.

The *Chineſes* are generally well ſhap'd, and of good ſize, but the Men are flat Nos'd, with large Faces, ſmall Eyes, and very little or no Beard: They neither cut their Hair nor Nails on the left hand.

Of Clothing. Their Clothing is altogether of the ſame faſhion, with this difference only, that in the Northern Province they uſe Furrs, whereas in the Southern Parts they wear commonly Silk Garments. The Women are very Magnificent in their Apparel, and wear abundance of Jewels and Pearls; they are very remarkable for their little Feet; they ſeldom appear abroad, and whenever they viſit their Relations, it is done in cloſe *Palanquins* or Litters.

Ingenuity. The *Chineſes* are ſo quick, not only in all ſorts of Manufacturies, but alſo in their way of Tradeing, that ſcarce any body is able to over-reach them. Their Money is Gold and Silver, which paſſes altogether by weight.

Provisions for the Poor. They are ſo careful in providing for the Poor, that in each City a peculiar Judge is appointed in order to provide for the relief of ſuch as are unable to provide for themſelves, and to ſet to work ſuch as are in a capacity to get their Bread.

As there are Books extant in *China* which have been printed above 700 Years ago, it is certain that they invented the Myſtery of Printing before us, which was not diſcovered in *Europe* till 1450.

Their Writing. Their Characters are rather Figures, ſignifying certain Words, than Letters, which they write from the top downwards, not with Pens, but with Pencils, and that on one ſide only their Paper, which they make of the Bark of *Bamboe* Canes, being very thin.

Schools. The King maintains at his own charge many Schools and Academies, the overſight of which is committed to certain Viſitors, who at certain times, not only examin the Profeſſors and Scholars, and expel ſuch as they find unqualified for Studies, but alſo promote ſuch as have made ſufficient Progreſs in Learning to the degree of a *Loytia*, a Dignity here like our Doctors. They are very Ceremonious and obliging in their Converſation, in which Point they are ſo nice, that the firſt Rudiments of Learning given to their youths, are certain Books of Complements treating of that ſubject. Their Entertainments are very Magnificent, in which they have this peculiar, that they ſet as many Tables, as they have Guests. Their Meats are ſerved up either in Plates or Porcelane, they have ſmall Cups, becauſe they drink often, but no Napkins, and they frequently ſend home to their Guests, what Meats are left untouch'd upon the Tables, and are eſpecially careful in Entertaining Ambaſſadors (let their errand be what it will) with more than ordinary reſpect. They allow Polygamy, but puniſh ſeverely Inceſt, which is forbidden in a direct line to Infinity, and in the Collateral line to Siſters and Nieces. The firſt however is the only lawful Wife, whoſe eldeſt Son inherits half the Eſtate of his Father, but if ſhe has no Son, or he dies before the Father, the eldeſt Son of the next Wife has the ſame pre-eminency. Adultery, though it be a Capital Crime here yet is ſeldom heard of, partly by reaſon of the great reſtraint the Women are kept under, partly becauſe the *Chineſes* are ſo wiſe, as rather to make the beſt of ſuch an accident, by an ad-

Marriages.

vantageous

1639. vantageous Agreement, than to expose themselves by publishing their own disgrace.

The Government of China.

Though the Government of *China*, be not only Monarchical, but also despotical, yet is it observed, that even in those Nations, which enjoy the greatest degree of Liberty in *Europe*, are much more burthened with Taxes than the *Chineses*; which chiefly proceeds from this Fundamental maxim imprinted in their Kings, that as War is Destructive, and the chief means to impoverish a Nation, they ought not to enter upon it in order to extend their Limits, or making any Conquests; for which reason it is, that to avoid all occasion of Contest with Foreigners, for which the *Chineses* are forbidden, not to go out of the Kingdom, without license from the Emperour, or the Governour of the Province where they dwell. The Eldst Son always succeeds the Father in the Throne, the Younger Sons having only certain appendages with the Titles of Kings allow'd them, but have not the least share in the Administration of the Government, being under the Jurisdiction, or rather inspection of the Governour of the Province, where they reside, who pays them their allowance Quarterly.

The Chief Council of State consists of 12 Councellors and a President. Besides which there are in most of the great Cities 6 Commissioners; The 1st. for the Administration of Justice; The 2d. for the Revenues; The 3d. for the Ceremonies; The 4th. for Martial Affairs; The 5th. for Surveying the publick Structures; And the 6th. for Criminal Cases. To prevent the mismanagement of the Governnors, and the corruption of Judges, and other Officers, the King sends every three years, certain Visitors into the Provinces, who after having taken an account of their Transactions, make a faithful report thereof to the King, who Changes the Officers of the Provinces every three years, with this Circumspection, that scarce ever any Officer of note is sent, but into a Province remote from the place of his Birth.

Their Prisons.

Debtors are punish'd by most cruel fustigations, which makes them rather chuse to sell themselves to their Creditors, than to undergo this kind of punishment. The Prisons, wherewith all the great Cities are provided, are very strictly kept, but at the same time want not any Conveniences, such as Courts, Gardens, Ponds, Walks, &c. for the Divertisement of the Prisoners, and Drinking-houses, and Cook-shops, for their Conveniencies.

No Sentence of Death is Executed without a Warrant from the King, and this must be done in the Presence of the Judge, who are so nice in this Point, that they allow a very considerable time betwixt the Condemnation and Execution; make divers visits to the Prisoners, and examine them, whether they have any thing to alledge in their behalf; by which delays it happens, that more Malefactors die in Prison, than are Executed. Their ordinary Punishments are hanging, impaling, and burning alive, but the last is only in case of high Treason.

Thieves they lay upon their Bellies, with their Hands tied back, and so the Executioners beat them with Canes moistned in Water, upon the Calf of their Legs, with such violence, that they frequently expire under their Hands.

Their Religion.

The *Chineses* are *Pagans*, though some Authors have taken a great deal of pains to perswade the World, that they found some remnants of Christianity among them, which they say, was introduced there by the Apostle St. *Thomas*, but these are bare Imaginations without the least appearance of Truth, it being certain that there was not the least Tract of the Ancient Christian Religion to be met with, before the *Portugueses* and *Spaniards* brought it into this Country. They acknowledge the Heaven, the Creator, and Chief Governor of the Universe, which is managed by a Vicegerent, call'd *Laocon Tzuntey*, unto whom they pay the greatest Veneration next to the Sun. The next Divinity is call'd *Cansay*, unto whom they Attribute the Government of all sublunary things; They allot to these 3 Divinities, as many Great Ministers, *viz. Tanquam* who presides over the Air, *Teiquam* whose business is to look after the Generation of Men, and all living Creatures; as well as the Products of the Earth; and *Tzuiquam* the Chief Patron of the Sea. They have also 3 famous Saints. The first call'd *Sichia*, Founder of all the Religious Orders of both Sexes, of which there are great numbers in *China*, the other 2 are Females, call'd *Quanina* and *Neoma*. 1639.

The *Chineses* are also much addicted to Incantation, and adore the Devil. They believe the Immortality of the Soul, which is Communicated to it by Heaven, and that it shall either enjoy Eternal Felicity or Torments, according to the good or bad Actions done in this World; for which reason it is, that they assign a certain place of abode, not unlike the Purgatory to the Soul after its departure from the Body, there it is purged from its Sins, and by the Incercession of its Relations and Friends, may be eased in its Sufferings; Many of them also adhere to the Opinion of the Transmigration of the Soul.

Their Religious Men.

Their Orders of Religious Men, have one General residing in the City of *Ximtien*, who has under him several Provincials, and these under them the Superiours and Guardians of their respective Monasteries. They make use of Beads, and keep to their constant Mattens and Offices, not unlike the Monks in *Europe*; The eldest Sons amongst the *Chineses*, are not permitted to enter into Religious Orders, and such as have, may quit them at pleasure, and marry, as may all the rest, who have embraced a Monastick Life.

Funeral Rites.

As to their Funeral Rites, the *Chineses* wash the dead Bodies, put them in a Coffin of Sweet-wood well closed, and so keep them upon a Table 15 days, during which time the Priests, who come there to Sing and Pray over the Dead, are Feasted with Wine and Fruit, whose Business it is to interr them after the Expiration of those 15 days, which is commonly done in the Country, near a Pine-tree, and if that be not to be found, they plant one on purpose.

Their Mourning is very close, in Course Cloath and Hats, with a Cord ty'd about their middle. Sons continue thus for two Years, and the other Relations Proportionably.

The first time the *Tartars* broke through the *Chinese* Wall, was 1206. when they made themselves Masters of all the Country, and remain'd in Possession of it till 1368. When they were not only forced from thence, but also obliged to acknowledge the Soveraignty of the Emperor of *China*.

About the year 1600. seven powerful Colonies of the *Tartars* were join'd into one Kingdom, under the Name of *Nuche*, whose King entred, 1616. *China* with a powerful Army.

Many bloody Engagements happened among the *Chineses* and *Tartars*, especially 1618, 1619, 1620, 1625, 1627. till at last 1630. the *Tartars* were once more forced to quit the Possession of *China*, and to content themselves with making Excursions as they found Opportunity.

But 1641. No less than eight Armies of Robbers appearing at once in the *Chinese* Empire, and the Grandees being divided into Factions, some of them call'd in the *Tartars* to their Aid, and at last betray'd the Capital City, and the Emperor to them, who was strangled, 1644.

After which the *Tartars* having spent some years in reducing the other Provinces, they made themselves absolute Masters of the whole Empire, by the Conquest of the City of *Quangchew*, in the Province of *Quangsi*, Nov. 24. 1650.

CHAP. III.

CHAP. III.

Mr. Mandelsloe's *Travels into the* East-Indies. *&c.*

1639.

The Voyage continued.

WE told you how we were becalm'd in the sight of the Isle of *Ceylon*, where we continued till the 20th of *Feb.* when the N. W. wind obliged us to steer our Course to the S. E. we found our selves then 2 min. beyond the Equinoctial Line. I took this Opportunity to ask the Master of the Ship, whether (according to the vulgar Opinion) I might discover both the Poles here, but he sufficiently convinced me, that the *Artick* Pole was not to be seen till about 6 deg. and the *Antartick* not till the 8 deg. of the Line, and that when you come to 8 or 10 deg. the N. W. wind reigns there constantly for 6 Months, as the S. E. does the other Months of the Year.

Divers sorts of Birds and Fish.

We saw abundance of Birds, some white like Pidgeons, others like wild Ducks; and vast Quantities of certain Birds call'd by the *Portugueſe*, *Garayos*, being Black and White, but larger than our Magpies, their Tails are divided like a pair of Taylors shears. All these live upon the flying Fish, who, to avoid the pursuit of the *Albocores*, *Bonitos*, and *Dorados*, betake themselves into the Air. The *Albocores* are White, and without scales, and so are the *Bonitos*, but the first exceed the others in bigness, and have but one Bone, from the Head to the Tail, but are no extraordinary meat. The *Dorado* is like a Salmon, but more luscious, and has smaller Scales.

A Sea Hog.

We also took a Sea-hog (so call'd from its snout, which is like that of a Pig) which if seen in great sholes near the Vessel, are look'd upon by the Sea-men as the fore-runners of a Storm.

The *Dutch* in their first Voyage into these parts, opened one of these Fish, and found a great deal of Fat, and a young Pig in the Belly of it. There is another great Fish in these Seas, call'd *Hayes* by the *Dutch*, and *Shark* by the *English*; their Teeth are very close and sharp, and as they delight in Mans Flesh, it often happens, that they snatch a limb of an unwary Seaman. Their Mouth being below their Heads, they lie upon their Backs, when they are to catch a prey. That we took, had the heart in the Head, and lived a good while after it was taken. This meat is not fit to be eaten. There are also abundance of that sort of Fish hereabouts, call'd by the *Portugueſes*, *Peſce puerco*, because they make a noise like Pigs, and are of the bigness of a Bream.

Tortoises.

Tortoises (the meat of which is as fine as Veal) are in such plenty here, that the Sea-men draw them at pleasure into the Ship with hooks.

Feb. 21st. we found our selves at 1 deg. 20 min. of the Line, with very rainy and inconstant weather, which are ordinary hereabouts.

The 23d. one of our Seamen dyed of the Pox.

The 25th. we were becalm'd; but the next following Night there arose a Tempest, which made us be continually upon our guard, for fear of the *Travado's*, or Whirlwinds, which are so sudden here, that the Seamen have scarce leisure to take in their Sails.

We could not make any observation by the Sun, till the 5th. of *March*, when we were at 8 deg. 6. min. Latitude.

And *March* 10th at 10 deg. 14 min. the wind at W.

The 12th. & 13th. it blew a great Storm, with Thunder and Lightning, but what most surprised us was, that tho' we were at 13 deg. we found not the least effects of the *Monſon*, or ordinary wind of the Season, which is commonly perceived at 8 or 9 deg. the S. wind blowing so hard, that we were in fear of being forced back to the *Indian* Coast.

It was not till *March* 15th. that we found the wind changed to the S. when putting up all our Sail, we made 2 Lgs in an hour, and took several Dolphins, that swam near our Ship.

March 20th. we were becalm'd at 16 deg. where we found the Compass decline 30 min. to the W. and so it continued till the 24. deg. But as soon as the Cape of *Good hope* is doubled, the Load-stone draws towards the Earth.

1639.

As we were floating thus up and down, the 21th of *March*, our Ship took Fire by the carelesness of the Butler, who set Fire to a Barrel of *Aqua vitæ*, as he was removing it. Our fresh Water beginning to be scarce, we made use of an Engine to draw fresh Water out of the Sea, but its taste being somewhat nauseous, it served only for the dressing of Meat.

March 22d. We made by the help of the *Monſon*-wind 2 Lgs an hour, which continued the 23th. 24th. and 25th.

March 26th, the wind held still fair, but for fear of a change and want of fresh Water, it was resolved, to direct our Course to *Maurice* Island, to take in Refreshments there. We discovered the same Night the Isle of *Dieg Rodriguez*, at 20 deg. 48. min. which lies 60 Lgs from the said Island of *Maurice*, so call'd by the *Dutch* from the Prince of *Orange*, who was *Admiral* of the United Provinces, at the time of their first Voyage to the *Indies*. Its Harbour is very large being able to contain 50 great Vessels) and Commodious, by reason of its depth, which is 100 fathom at the entrance. The high mountains, which are covered with Trees, may be seen at a great distance at Sea; The Vallies produce some Fruit, and abundance of other Trees; some of which are those that afford the best Ebony wood in the World; black, red and yellow, but the two last are in greatest esteem; and the Sea abounds in Fish; The *Dutch* in their Relations speak of a Thornback, they catch'd near this Isle, which found 2 good Meals for the whole Ship, and of Tortoises of such a bigness, that 10 Men might sit upon one shell. The Isle was quite destitute of Inhabitants at that time, but since 1640. the *Dutch* have erected a Fort therein.

Mauric Island.

The best Ebony.

A prodigious Thornback.

It abounds in Birds, but is destitute of four Legg'd Creatures; but as for Fruits and Water, it affords sufficient Refreshment to the Ships passing that way. The wind continuing fair, when we came within sight of this Island, a Council was call'd, in which it was agreed, not to lose any time by putting into the Island, but to continue our Voyage with all possible speed, to the Cape of *Good hope*, to avoid the danger of being obliged to winter in the Isle of *Madagascar*. Accordingly we lost sight of this Isle the same day, and pass'd the Tropick of Capricorn, *March* 30th. steering our Course to the W.S.W.

No 4 Legg'd Creatures.

April 1st. we found our selves at 26 deg. 3. min. and after having made 40 Lgs. were becalm'd before Night; we saw the next day divers Whales, and the weather becoming very stormy, carried us to the W. S. W. our business being to steer to the S. and consequently to the Cape of *Good hope*.

The 3d. steering our Course to the W. at 28 deg. 30 min. we made 50 Lgs.

April 5th. the Compass still varying, we took our Course still to the W. and though we had not much wind, made 73 Lgs in these 2 days.

The 6th. we were at 30 deg. Lat.

And the 8th. were becalm'd at 32. deg.

From the 9. (when we were about 300 Lgs from the Cape) to the 14th, we advanced tolerable well, but the 15th, it blew very hard, and those Birds call'd by the *Portugueſe Pintados*, which keep within 40 Lgs of the Land, and several other Birds, which came near our Ship.

Divers sorts of Birds.

The 16th. perswaded our Seamen, that we were not far from the Shoar.

The 17. we continued our Voyage with a fresh Gale, but the 18 and 19 we had scarce any Wind, though the roughness of the Sea, proved an infallible Omen of the Tempest, that overtook us the same night from the S. W. at 35. degr. Latit. As these storms are unavoidable about the *Cape of Good Hope*, we took in our Sails *April* 20th. perceiving the Wa-

1639. ter somewhat more inclining to White than before, and a great many white Seamews, call'd *Mangas de Valndo*, by the *Portugueses*, round our Ships, we concluded, that there was ground within 100 or 150 fathom; and upon trial found it at 80 fathom; we saw also the same day abundance of Black-birds, with a small spot of white only on their Breasts; these according to the Opinion of the *English* Seamen, always forebode a Tempest, which proved true, for before Night a storm arose from the W. N. W. which the 24 turn'd to the N. W. with a very rough Sea, which took our Carpenter from the Deck, but was saved by the means of a Rope. The ground which stuck to the Plummet being black at eighty fathom depth, we concluded we were not far from the *Cape d' Agulhas*, which is 60 Lgs distant from that of *Good hope*.

Cape of the Agulhas.

The 25. the Tempest encreasing at 36 deg. 20 Min. beyond the Line, we were in great danger of being lost, being forced by the Current towards the shoar, but the Tempest being somewhat allay'd, we escap'd that danger, but were soon after threatned by another, occasioned by a Lamp in the Presidents room, which had set Fire to the wainscot.

The 26. the storm continued till 2 in the Afternoon, when the *Pesce puercos* coming in great numbers about our Ships, were the fore-runners of fair weather, and the N. W. wind which ensued.

The 27. in the Morning it was calm, but in the Afternoon we made 2 Lgs an hour with a N. W. wind, taking our Course to the N. N. W. As we saw that day abundance of *Trombas*, or a kind of Canes, 3 or 4 foot long, and of the bigness of a Mans Arm, which float upon the Water, and are to be met with no where but near this Cape, we concluded, that we were not far from the *Cape of Good hope*.

Trombas.

And the 28. discovering the Coast from N. to W. some thought it had been that Cape, but finding ground at 40 fathom, and at 34 degr. 40 Min. we were soon convinced it must be the Cape *de Agulhas*.

The 29. the wind turning S. E. we steer'd our Course to the N. W. along the Coast, and the wind turning to the N. W. the following Night we could advance but little, we then found our selves at 84 deg. 27 min. and consequently 24 Lgs of the Altitude of Cape *de Agulhas*.

April 30th, the wind continued against us.

But *May* 1st. the wind turning to the N. E. by E. we sail'd along the Coast, and at last discovered the high shoar, known by the Name of *Cabo Falso*, (because it resembles a Promontory) within 7 Lgs of the *Cape of Good hope*.

Cabo falso.

The 2d. the N. E. wind continuing, we got sight of the *Cape of Good hope*, but soon after turning about to the N. W. we could not get into the Bay, so were forced to stand out at Sea steering our Course to the S.

The 3d. the wind still at N. W. brought along with it a most furious Tempest, notwithstanding which we made the best of our way to the Coast.

And *May* 4th. doubled one of the points of the *Cape of Good hope*: 10 Lgs distant from the Bay we discovered the Mountain, call'd by the *Dutch* the *Table Mountain*, from its flatness and square Figure, at 34 degr. 4 m. within 15 Lgs. of the Cape; our intention was to have got in there, but the Wind proving contrary, we kept along the Coast as well as we could.

But the 5th. at Sun-rising we were out of sight of the shoar, which made us change our Course to the N. E. so that we discovered Land again about noon, and in two hours after by passing the Isle of St. *Elizabeth*, got into the Bay by Night, where we cast Anchor at seven fathom Water.

The Cape of Good hope.

This Cape of the continent of *Africk*, extending to the S. into the Sea, at 36 degr. beyond the Line, received the name of *Cabo de bon Esperanza*, 1493. from *John* II. King of *Portugal*, when the *Portugueses* first went in quest of the passage by Sea to the *Indies*, lying as it were at a nearer distance of about 2500 Lgs betwixt *Europe*, and the most Eastern Coasts of the *Indies*, ever since which time this has been the Place, where Ships bound to those Parts, take in their refreshments, Water being very excellent here, and Cattle very cheap; their Oxen are very large with bunches on their backs, like those of the *Indies*, and their Sheep very good, with long hanging Ears, and Tails as big and weighty as a good quarter of Mutton. Neither do they want here for wild Fowl, Deer, wild Boars, Partridges, Quails, and among the rest a kind of Geese with stumps instead of wings, but their Flesh is not eatable; they have also Dogs, or rather Sea-bears, Camels, Tigres, Lyons, and Lynxes. 1639.

The *Dutch* are used to leave Letters here, under a certain Stone near the Harbour, acquainting their Country-men, that come after them, with all the remarkable Passages in their Voyages, and what Course they intend to Steer.

Their Inhabitants are very savage, ugly, and ill-shape, grease their Bodies continually with train Oil, and eat their flesh raw; nay, they seldom kill any Beast, but feed upon them, when they die of any Disease. Both Men and Women go naked, covering their privy parts only with a piece of skin, fastened round the waste with a Leathern girdle. Some wrap a Lyons skin, or Oxe Hide round their Buttocks, drawing the Tail betwixt their Legs. Some wear them over their Shoulders down to the waste only, exposing all the rest to publick view, and disfigure their Arms, Thighs and Legs, by making Characters in them by way of incision. The Women adorn their Arms and Legs, with broad rings of Iron or Brass. Those living deeper in the Country, are no less savage than the rest, with this difference only, that they live a little better, those near the Sea-side, living upon Oisters, Fish, and the Flesh of Whales, for they know not what Husbandry is, though their Grounds be very excellent. They live in the same Huts with their Cattel, and scarce ever come to the Sea-shoar, except when, upon the Arrival of Foreign Ships, they are to truck their Commodities, which are Ox-hides, Lions, Leopards, Tigers skins, and Ostrich-feathers, for Knives, Looking-glasses, Nails, Hammers, Hatches and Iron.

The Inhabitants. Their Cloathing. Know no Husbandry.

They know not what Religion is, both God and the Devil being equal to them.

Nor Religion.

May 10th. we were ready to set sail again out of the Bay, but the wind proving contrary, we did not get to Sea.

Till 12th. with a N. E. wind steering our Course to the W. but the wind varying that Day, through most of the Points of the Compass, we could not get out of sight of the Coast, and at Night were surprised by a Tempest, which continued till the 17th, with such violence, that our Ship had much ado to resist it.

Pursue their voyage.

The 18th. the sky began to clear up, and the fury of the Winds being somewhat allay'd, we found our selves at 34 degr. 40 min. elev. whence we conjectured, that the Tempest had forced us back 25 or 30 Lgs between *Cabo Falso*, and the Cape of *Good hope*.

The Night following, there arose such a dreadful Hurricane, that we gave our selves over for lost, being by the contrary winds forced into the main Sea.

The 19th. proved not much better, and the 20th we found but little Alteration, though we hoped for some Alteration, from the change of the Moon, which happened that Day, but the storm continued till the 22d. when the Rains having somewhat abated the fury of the Winds, we made use of our Sails, steering our Course to the W. as well as we could.

May 23th. we were becalm'd in sight of the Coast to N. E. of us; and finding the elev. to be 37 deg. 6. min. we supposed our selves to be in the same Altitude with the Coast, between *Cabo Falso*, and that of *Agulhas*, but another Tempest arising, the same evening from the W. N. W. we were forced to chuse the main Sea.

The 24th. the wind held still contrary, which turn'd to a Tempest at Night.

The 25th. at 36. deg. Latitud. we steer'd our Course with a W. wind to the S. W.

The 26th. the Wind blowing fresh from the N. E. We made all the Sail we could to the W. But in the Evening the wind turning to the N. W. brought along with it a most violent storm, which continued the 28th, and 29th.

So that the 30th. of *May* it was resolved, that, seeing our ship would not be in a Condition to prosecute the Voyage to *England*, without manifest danger, to put into the Isle of *Madagascar*. Pursuant to this Resolution, we tack'd about at 2 in the Afternoon, in Tempestuous weather, and a very rough Sea, which continued the next day till about noon.

Jun. 1st. we made 40 Lgs in 24 hours, with a W. wind, steering our Course to the E.

And the 2d. about 11 at Night, the wind veering about to the S. S. E. the best wind we could wish for, for the Prosecution of our Voyage to *England*, we took no measures, resolving to return to the Cape

of

1639. of *Good hope*, and to take in fresh Water at the Isle of St. *Helens*.

The 3d. we got with the same wind to 35 deg. 8 min.

Jun. 4th. The abundance of the Birds call'd *Mangas d' Valndo's*, and the *Trombas* or Canes floating upon the Sea, gave us great hopes, that we were not far from the Cape of *Good hope*.

The 6th. we were becalm'd at 43, 48, 54, and 63 fathom of Water, and in the Evening the wind was N. W. but turn'd the 7th. to the W. which by Night turn'd to a violent storm, and continued the 8th. till midnight, when coming about to the N. we took our Course to the N. W.

The 9th. the winds being much abated, we found our selves at 35 degr. 30. min. elev. but in the Afternoon we were surprised by another Tempest, which putting us in most imminent danger of running upon the Coast, the Master of the Ship, who hitherto had been the Chief Instrument of our turning this way, seeing himself now under an absolute necessity of changing his Resolution, declared that there was no other way left to save the Ship, than to endeavour to put in at *Madagascar*. Accordingly we changed our Course

The 11th. with fair weather, but about midnight were overtaken by another dreadful storm, which lasted the 12th, 13th, and 14th. It ceased the 15th, and the wind being W. N. W. we sail'd 33 Lgs in 24 hours to the N. E.

The 16th we made 44 Lgs; the 17th. 50 to the N.E. with an E. S. E. wind.

The 18th. the wind at W. S. W. we made 30 Lgs.

The 19th. 40, and the 20th. after we had sail'd 30 Lgs. we found our selves at the elev. of 31 degr. 15. min.

The 23th. at break of day we discryed an *English* Vessel bound to the *East-Indies*, Captain *Hall* Commander, burthen 500 Tun, and it being resolved, that we should make jointly all the sail we could for *Madagascar*, Capt. *Hall's* Ship being much less than ours, did lead the way with a S. E. wind.

Arrive at *Madagascar*.

The 1st of *July* he was got out of sight, and the same Evening we discovered the Coast of *Madagascar*, so that we were forced to keep continual Watch all that night, to take care that we did not come too near the Coast, which is very rocky and dangerous, especially on the Point of the Isle, or might go beyond it, it being almost impossible to make the Bay, if you pass beyond the true Altitude.

The 2d we arrived in the Bay of St. *Austin*, where there is no bottom, till within a mile of the Shore, where we cast Anchor at 25 Fathom Water. The day of our Arrival after having escaped so many dangers, was redoubled by the meeting here (besides Mr. *Hall's* Ship) an *English East-India* Man, call'd the *London*, Burthen 1400 Tun, commanded by Captain *Willis*, bound for *England*.

The 3d, the Captains of these Ships came aboard ours to consult the best Methods, to prevent the being imposed upon by the Inhabitants in the trucking of what Commodities they had for their Cattel. Accordingly these Commodities being produced by joint consent, and committed to the Management of the three Clerks of the Ships, they bought, or rather exchanged, every day 4 Oxen for 40 pair of glass Bracelets, a Sheep for two, and a Calf for three pair; and for a brass Ring of 10 or 12 Inches about, a fat Ox, worth 6 or 7 Pound in *England*.

The 4th, The President and the two Captains went up the River, to discover what Cattel was coming down towards the Bay.

The 6th, The President treated the two Captains, and all the Officers of the three Ships, aboard ours; and Capt. *Willis* did the same some days after.

The 14th, Cap. *Hall* prosecuted his Voyage to the *Indies*, as Capt. *Willis* did two days after for *England*, having supply'd us with what we stood in need of, for the prosecution of our Voyage.

The 21st, a Tent and certain Huts being set up for the President and Soldiers near the Sea-side, he took up his Lodgings there.

A certain Lord of those Parts.

About 4 Lgs from the Harbour lived a certain Lord, who had three Sons, the eldest of whom was named *Massar*. They came all three to pay us a Visit, with a Retinue of 100 Persons well arm'd with Javelins, bringing along with them near 300 Oxen, besides some Sheep, Goats, Poultry, Citrons, and Oranges, in order to exchange them for some of our Toys. After having made a little Halt, the eldest of the three Brothers presented the President with 12 Goats, and his two Wives each with a fat Capon; in return of which, the President made a Present of 3 strings of glass Coral to himself, two to each of his Brothers, and a Bracelet to each of his Wives, which they seem'd to value at a great rate. After having fix'd a great Pole in the Ground, as a Token of the Amity they intended to preserve with us, which they desired us to maintain also on our side, they sold us, or rather truck'd with us (for Money they neither know nor esteem) for 10 fat Oxen, some Sheep, Goats, and Poultrey; and among the rest we had a fat Sheep, the Tail of which weigh'd 20 or 24 pound, for 7 or 8 Grains of Coral or Agat, and a Capon for 3 or 4 Grains of counterfeit Coral.

1639.

We staid here 6 Weeks, which was spent for the most part in shooting at Buts, and fishing with Angle-Rods. We had great store of Fish, and among the rest Oisters, as large and delicious as any in *England*.

From the 5th to the 8th of *August*, we saw such prodigious multitudes of Grashoppers, as dark'ned the Skies; but one small Shower of Rain dispersed them all: The Inhabitants eat them.

The Extent of *Madagascar*.

The Isle of *Madagascar*, call'd the Island of St. *Laurence* by the *French*, lies in the torrid Zone, extending from N to S. from the 10th to the 20th dg. its length being 150, and breadth 18 Lgs, and consequently one of the greatest Islands in the World.

Its Harbours.

It has the conveniency of divers good Harbours, such as the Bay of St. *Austin*, where we lay at Anchor, St. *Jago*, *Anton Gil*, *Antipera*, St. *Juhanes*, St. *Mary's*, St. *Sebastian*, St. *Romanus* and *Mantaras*. Most of their Mountains are covered with Orange and Citron-trees, and the Rocks themselves are a pure white Marble, from whence spring the clearest Fountains in the World. They have also Ebony and Date-trees, and a certain kind not unlike the *Brasil*-wood, where-of they make their Darts and Lances. These Trees shelter vast numbers of Apes and Birds, and among the rest a kind of Poultry resembling our Turkeys, being black all over the Bodies with little white Spots. Their Heads are of a mixture of blue and red, with yellow Horns on their Foreheads; they feed by hundreds together in the Woods.

Dragons blood.

Here you meet also with that Gum, call'd *Dragans Blood*, which they draw out of the Flower of a Tree, no bigger than our common Pear-trees, but more branchy, and not so full of leaves; which are longer, but not so broad, than those of the Lawrel.

Aloes.

This Isle also produces some *Aloes*, but it is not so good as that of the Island of *Zocotora*: They have also *Cotton* and some *Indigo*, but they understand not the way of reducing it into Paste, as the *Indosthans*, and some other *Indians* do.

Fruits.

Cattel.

As they don't apply themselves to Tillage, except it be for a little Rice, Beans, Pompions, and Melons, so they abound in most excellent Pasture, and consequently in Cattel, in which their chief Riches consist. They have also Citron and Orange-trees, which bear Fruit twice a-year, Date-trees, Coco-trees, and *Bananas*; and there is scarce a House but has its own Bee-hives: For tho' they are ignorant as yet of the advantage of making Honey and Wax, they make a certain Drink of it, with the Addition of Rice, which serves them instead of Wine. It yields also Salt and Salt-peter, and near the Sea-side Amber-grease. Some will have it to be rich in gold and silver Mines; but as the Inhabitants value Tin beyond these Metals, they neglect to search after it.

Its Inhabitants.

This Isle is very well stock'd with Inhabitants, who are well shap'd, and very sizable, for the most part *Negro's*; they wear no other Garments, but a piece of printed Callico, which they wrap about their middle, in such a fashion, that one piece of it hangs down before to the Knee, the other behind to the Ham. Except the little Houses of their Princes (which are of Wood) their Huts are only made of the Branches of Trees, wherein they have no other Beds or Quilts, but some few Mats to lye upon; they use to make Fires round about them to disperse the Vapours of the Mill-dews, which are very pernicious here. Their chief Ornaments are certain strings of Glass-beads of divers Colours round the Waste, and Bracelets of the same about their Necks, Arms, and Legs. Both Sexes have holes in their Ears, in which they put large Copper or brass Rings. They have all black Hair,

1639. Hair, some very much curl'd, others not; but it is seldom very long, notwithstanding which they tye it up in several Tresses. There is no considerable difference betwixt the cloathing of the Men and Women; the last wear sometimes a sleeveless Coat, and the Calico which covers their middle Parts is somewhat larger than those of the Men.

The Women are very famous for their Fidelity to their Husbands, who put so great a value upon them, that they will scarce undertake any thing of moment without their Advice. They have 2 Wives at least, each of whom has her peculiar Hut; and tho' the Husband is very compliant with both, the elder of the two always claims the preference. They purchase their Wives from their Parents or Relations, for some Oxen, Pikes, Darts, or other Arms. Adultery and Fornication are capital; but as there is no familiarity so great, which is able to raise a jealousie in them, these things are scarce ever heard of. Some of their young Women came very frankly into our Tent, unto one of whom the President presented one of my Shirts, desiring her to wear it for my sake; she made not the least difficulty to receive it, and wore it 2 days, after which she tore it to pieces for some other use.

The Men brave. Their Men are brave and martial, and very dext'rous in the management of their Lances, Darts, and Pikes, which always lie near them, even when they are at work in the Field, they being train'd up to the use of Arms from their Infancy.

Their Arms. Persons of Note seldom stir abroad without having 25 or 30 Darts, or small Pikes carried after them, ty'd up in a bundle. Their Bows are 5 or 6 Foot long; and tho' the Strings be loose, they have a slight of shooting with great strength and activity: And as to their Javelins, they dart them with so miraculous a dexterity, that they will hit a Bird at 40 Paces distance. They are divided into several Tribes or Clans, of 100, 200, or 300 each, under his own Lord, whom they call *Tschich*; 2 of these had their Residence in a Wood not far from our Tent. Their Wars among themselves are commonly occasioned by the want of Pasturage for their Cattel: And the Prince *Massar* told us, that he had join'd with 2 neighbouring Lords, and that they intended to attack some on the other side with 500 Men, to drive them from their Pasture-Grounds, which they stood in need of for their Cattel. This Dignity is not Hereditary, but they govern whilst in the possession of it with an uncontrolable Authority.

Religion. It is not easily determined what Religion they profess; as far as I was able to learn, they believe one God, Creator of Heaven and Earth, who will reward the good, and punish bad Actions. I remember I saw one among them, whom I supposed to be their Priest, getting upon a Tree, and making his Oration to the People; but as I had not the least knowledge of their Language, I could not be satisfy'd what he said; neither what difference there was in the outward appearance of their Priests and Laicks, except that I observed some of them to carry a piece of a Cow's Tail at the end of a Cane; and I saw one, whose Nails on the 2 Fore-fingers of his right Hand were as long as the Talons of an Eagle. Each Tribe has its own Priest, who pretends also to Incantations, thereby to make the Devil dance after his Pipe.

Mozambique. The Isle of *Mozambique* is not above half a Lg from the Continent of *Africk*; and being in the possession of the *Portugueſe*, this small Island (which is not above half a Lg in compass) is so beneficial to the Governor thereof, that what with the Trade of *Madagascar*, and that of *Sofola*, he commonly amasses a Treasure of 150000 pound Sterling, during his 3 Years Government.

The discovery of this Isle by the Portugueſe. This Island was first discovered by the *Portugueſe* 1506, when a whole Boat of *Negroes* coming aboard the *Portugueſe* Vessels, they were very civilly entertain'd by the Captain, who also gave them divers little Presents. But they requited his Kindness with a Shower of Arrows as soon as they were got into their Boat, till the Captain by a Volley of small Shot and some Canon-ball made them soon give over that Sport. Another *Portugueſe* Captain, named *Rodrigo Percira*, being in the same Year driven upon that Coast by stress of Weather, sent a-shore a certain *African* Negro, who had some knowledge of their Language, to signifie to them, that he was come there to settle a good Correspondence and Commerce with them. They seem'd to approve of this Proposal; but were no sooner got at some distance from the *Portugueſe*, when they fell upon the *Moor* with an Intention to kill him; which they had certainly done, if the *Portugueſe* had not discharged their Fire-Arms among them, which obliged them to leave the Negro, and to betake themselves to their Heels, leaving several of their Companions dead upon the Spot. 1639.

Pereira sail'd thence to another Place upon the same Coast, where having surprized one of their Princes, he carried him aboard, and gave him such kind Entertainment, that in requital for his Courtesie, he proffer'd to shew him a very good Harbour. Accordingly he conducted them to a great Bay, at the entrance of which was a small but populous Island; but the Inhabitants being terrified at the sight of these Foreigners, fled into another adjacent great Island, so that the *Portugueſe* being become Masters of the small Isle without the least opposition: They sent to the Inhabitants desiring them to return to their Habitations, the occasion of their coming thither being to settle a good Correspondence with them. Upon this most of them return'd, and as a mark of their good Will presented *Pereira* with 50 Oxen and 20 Goats; but being nevertheless willing to be rid of these Strangers, they tempted the Captain with the hopes of great Riches, which they said he might meet with in the Port of *Matatana*; which was so well approved by him, that he was preparing to go thither; but one of his Ships being soon after forced upon the Coast of the Isle, he retired with the other to *Mozambique*. Another Ship of the same Fleet being driven by tempestuous Weather into the Port of *Matatana*, a Boat of the Country came immediately aboard them, in which the Captain sent the Master of the Vessel, who was well vers'd in the *African* Language. The *Moors* making more than ordinary haste to get ashore with the Master, and the *Portugueſe* conceiving some Jealousie at their Behaviour, they pursued them with 80 Men in their Chaloop, but too late, the *Negroes* having reach'd the Shore before them. However after they were landed, they got sight again of the Master, who told them, that he had been treated with much Kindness by their Prince, who was desirous to see the Captain himself, in order to enter into a stricter Correspondence with him; which the Captain not unwilling to comply with, went accordingly ashore, where he was kindly received, and magnificently treated by the Prince, according to the Fashion of that Country. But in the Evening, being ready to return aboard in the Chaloop, there arose so violent a Tempest, that he durst not venture to commit himself to the merciless Waves in so small a Boat; which continuing for 4 days successively, and there being no possibility to get aboard, his Ship's Crew imagining no otherwise than that he had been massacred by these Barbarians, thought it most advisable to save themselves, and to return to *Mozambique*, which they did accordingly. The Captain finding the Ship gone, was so discontented that he died not long after, as did 8 others of his Retinue. The rest thinking it better to run the risque of the Sea, than to perish without the least hopes of Relief a-shore, embarked in the Chaloop; and having by good Fortune met with a *Portugueſe* Vessel, commanded by *John Fonseca*, he carried them to the next *Portugueſe* Port of *Africk*.

The first time of the landing of the *Dutch* in the Isle of *Madagascar*, happen'd rather by chance than any design: For their Seamen being miserably infested with the Scurvy, so that they were no longer able to manage the Ship, they were forced to seek for refreshment in this Island; but lost 70 Men out of the four Vessels, of which their Fleet consisted, before they could get any. These Men were buried in a small Island, which to this day is called the *Dutch Church-yard*. Some will have the *Madagascarians* to be *Mahometans*, but certain it is that in their outward demeanour they don't shew the least resemblance of it. The first landing of the Dutch here.

They make their Voyage. The Winter Season being pretty well over, we began to think of our Voyage; for which purpose having bought *Aug.* 19. of Prince *Massar*, and some other Neigbouring Lords, 25 Oxen and 100 Sheep (besides 150 Oxen we had provided before) we embark'd our Baggage the 20th, and the 21st set Sail out of the Bay of St. *Austin*, with a S. W. Wind; which proving favourable all that night, we soon lost sight of the Isle of *Madagascar*.

The 22d, being rejoiced with the *Monson*, or Wind of the Season, which happen'd sooner than ordinary, we briskly pursued our Course to W. S. W.

And the 23d, the Wind blowing a brisk Gale from the E. in our Stern, we sail'd briskly a little more to the S. with an intention to avoid the *Cape of Good Hope*.

The

1639. The 24th and 25th, the Wind was not ſo brisk; but being ſeconded by a freſh Gale, the 26th we advanced bravely, and found our ſelves that day at 27 dgs, and 27 min. Latitude; and the 28th, at 28 dgs, 12 min.

The 29th, We were ſurprized by the *Travado's*, or Whirl-winds, at 31 dgs, 15 min. but they did not continue long.

The 30th. it blew a Storm, notwithſtanding which we made the beſt of our way, and the laſt of *Auguſt* found our ſelves at 33 deg. 34 min.

September 1ſt. we made 50 Lgs in 24 hours, tho' the Wind blew very hard, and the 2d. we got 30 Lgs further with a S. W. Wind.

The 3d. being becalm'd, we kill'd a Cow we had bought at *Madagaſcar*, and a Goat; in the Belly of the firſt we found 3 Calves, and in the laſt 4 young Kids, from which a Judgment may be made of the fruitfulneſs of that Country.

Septemb. 6th. we were terribly ſhaken by a moſt dreadful Tempeſt, ſo that our Ship beginning to be leaky, we were forc'd to pump without Intermiſſion; we found our ſelves at 35 deg. Latit.

The 7th. the Weather being tolerably fair, we ſteer'd our Courſe to the W. N. W. tho' the Sea continued very rough.

The 8th. and 9th. we had abundance of Rain with a S. Wind.

The 10th. we made 40 Lgs with a moderate Gale, and ſeeing many of the Birds call'd *Mangas de Valvdo*, concluded that we were not far from the *Cape d'Aculhas*.

The 11th. the Eaſt Wind hindred us from making any conſiderable Progreſs, and finding a ſandy bottom at 12 fathom of Water, we were more and more perſuaded that we were near the *Cape* of *Agulhas*.

The 12th. we were forced to make the beſt of our way, ſometimes with a N. N. W. ſometimes with a S. W. Wind, which continuing in the Afternoon, we took our Courſe to the W. N. W. and in the Evening found a yellow Sand at 190 fathom Water.

The 13th. the W. being at S. E. we continued our Courſe to the W. N. W. and finding a Whale floating upon the Water at the Latitude of 35 deg. we believ'd our ſelves to be at the Altitude of the *Cape of Good Hope*, where abundance of Whales are commonly ſeen.

Declenſion of the Load-ſtone. The 14th. at Sun-riſing, finding the Declination of the Needle 4 deg. 50 min. we concluded that we had compaſſed the *Cape of Good Hope*; the 15th. we had a fair Wind and Weather, and found the declination of the Compaſs to be 1 deg. 50 min. and preſently after the declination of it near the *Cape of Good Hope* is 4 deg. tho' otherwiſe it does not decline ſo much, and as ſoon as you have paſs'd the *Cape*, you find the Compaſs to vary to the E. becauſe the Needle draws to the Earth by reaſon of the Iron and Load-Stones that draw it, but the declination on that Coaſt never exceeds 8 deg.

The Iſle of St. *Elizabeth*. At 33 deg. 15 min. elev. lies the Iſle of St. *Elizabeth*, not above 20 Lgs on this ſide of the *Cape of Good Hope*, being not above 2 Lgs from the *African* Coaſt, on which ſide it has a very good Harbour at 16 fathom Water. The whole Coaſt is but one continued Rock, but the Country is ſo fertile in divers ſorts of the beſt Herbs, that there is ſufficient reaſon to believe that if it were cultivated it would in its Products not be behind hand with the Iſle of St. *Helens*, or any other in thoſe Parts. The worſt is that it wants freſh Water, except what is ſupply'd by the Skies when it rains; which makes this Iſle to be not much frequented, tho' they have ſuch vaſt numbers Sea-Wolves. of Sea-Wolves here, that in a few Days they may catch as many that the Fat thereof would freight a Veſſel of 600 Tun. They call thoſe Creatures Sea-Wolves, tho' both in colour and the ſhape of their Heads they rather reſemble our Bears, except that their Snout is not ſo ſharp; they have only two Paws beneath the Breaſt, by which means they draw the other part of the Body after them, and that with ſo much ſwiftneſs, that the nimbleſt Man can ſcarce overtake them. This Beaſt is very fierce, its Teeth being ſo cloſe and ſtrong, that it will bite through Badgers. the handle of a Partizan. This Iſle alſo produces a kind of *Badger*, the Fleſh whereof is very delicious.

The 16th. we made the beſt of our way with a contrary Wind at 32 deg. and the 17th. and 18th. made 64 Lgs with a N. N. W. and S. W. Wind, and came the 19th. to 29 deg. 16 min. Latit. when with a S. W. Wind we made 40 Lgs to the N. W. and in the Evening found our ſelves at 28 deg. Latit. 1639.

The 20th. we held the ſame Courſe to the N. W. and made 34 Lgs with a S. E. Wind.

The 21th. we made 28 Lgs with the ſame Wind and Courſe.

The 22d. 20 Lgs with the ſame Wind and the ſame Courſe.

The 23d. 24 Lgs with the ſame Wind, our Courſe to the W. N. W.

The 24th. 30 Lgs with the ſame Wind, our Courſe ſtill to the W. N. W.

The 25th. we were becalmed, and made but 20 Lgs with an E. S. E. Wind, and the ſame Courſe the 26th.

The 27th. purſuing the ſame Courſe, we were carried 36 Lgs by a N. E. Wind, at 21 deg. Latit.

The 28th. with the ſame Wind and Courſe we made 46 Lgs, and found our ſelves at 20 deg. Lat.

The 29th. we continued the ſame Courſe for 20 Lgs, with an E. N. E. Wind.

The 30th. we made 25 Lgs, our Courſe to the N. W. and *Octob.* 1ſt. with the ſame Courſe and a S. W. Wind ſail'd 25 Lgs, and found our ſelves at 17 deg. Latit.

The 2d. continuing the ſame Courſe, and with the ſame Wind, we got 25 Lgs. at 16 deg. 16. min. Latit.

The 3d. 28 Lgs with the ſame Wind and Courſe.

The 4th. 20 Lgs with the ſame Wind, ſteering our Courſe to the W.

The 5th. 16 Lgs in the ſame Courſe.

The 6th. a S. E. Wind carried us 15 Lgs further to the Iſle of St. *Helens*.

The Iſle of St. *Helens*. The Situation of this Iſland call'd St. *Helens* by the *Portugueſe*, (by reaſon of its firſt Diſcovery on St. *Helens* Day) is at 16 deg. 12 min. It is diſtant from the *Cape* of *Angola* 350 Lgs, from that of *Good Hope* 550, and from *Braſil* 510. it being almoſt ſurpriſing, that an Iſland of no more than 7 Lgs in compaſs ſhould be found at ſo great a diſtance from the Continent. It is ſo plentiful both of moſt excellent Fruits, and all ſorts of Creatures, that it ſurpaſſes moſt of the Provinces of *Europe*.

Some are of Opinion that there was neither of this to be ſeen when the *Portugueſe* firſt diſcovered it; and that thoſe few Trees and Cattle they brought thither, Planted firſt by the *Portugueſe*. have received ſuch vaſt improvements, from the natural good Conſtitution of the ground, that at preſent it is able to ſupply whole Fleets with ſufficient Refreſhments; Figs, Pomgranates, Citrons, Oranges, Goats, Hogs, *Barbary* Hens, Pheaſants, Partridges, Quails, Peacocks, and Pidgeons, being to be had here at all the Seaſons of the Year; not to mention the Fiſh which are found here in vaſt quantities, and Salt ſufficient for the keeping of them.

The Ground naturally produces ſo many wholſome Herbs, that the *Portugueſe* frequently leave there their ſick Men which are ſure to recover againſt their coming back again that way the next Year.

The Mountains of this Iſle are ſo high that they are diſcovered 14 Lgs off at Sea.

The *Portugueſe* thought it a piece of Prudence not to make any Eſtabliſhment upon this Iſland, conſidering that the jealouſie which its poſſeſſion might raiſe in other Nations trading into thoſe Parts, with its vaſt diſtance from the Continent, would make it very difficult to keep; whereas its being free would afford a certain retreat to all Veſſels, and thoſe Refreſhments eſpecially of freſh Water, which they alſo would be obliged to ſeek for as far as the Coaſt of *Guiney*, where they muſt be forced to ſtay for the Rains, to the great inconvenience of the Sea-men, many of whom muſt in the mean while periſh for want of it.

The Fertility of this Iſle muſt chiefly be attributed to the daily Showers of Rain that fall there; which being animated by the Sun-beams ſhining preſently after, by intervals, incredibly advances the maturity of things in a Climate like this; it has alſo three Places where Ships may provide themſelves with freſh Water, *viz.* where the 3 Rivers which have their Sources among the Mountains exonerate themſelves into the Sea; theſe produce abundance of Snakes, which are eaten by the *Dutch*, who prefer them before Eels.

Aſcenſion-Iſle. At 190 Lgs to the N. W. of the Iſle of St. *Helens* you ſee the Iſland of *Aſcenſion*, ſo call'd from its being diſcovered upon *Aſcenſion-day* by the *Portugueſe*, lying 8 deg. 30 min. S. of the Line. It is a very mountainous Iſland, affording neither freſh Water nor any other Proviſions, except Fiſh, of which there is great ſtore on that Coaſt.

Oct.

1639. *Oct.* 9th. with an eaſie S. Wind we made but 15 Lgs our Courſe to the S. W. at 16 deg. 11 min. Latit.

Being becalm'd the 10th. we got no more than 8 Lgs, keeping the ſame Courſe; the Heats were almoſt inſupportable.

The 11th we held the ſame Courſe, making 15 Lgs with an E. Wind.

The 12th. the ſame Wind continuing we made 21 Lgs to the N. N. W.

The 13th. the N. E. Wind advanced us 25 Lgs, our Courſe to the N. N. W. at 14 deg. 45 min. Latit. and the 14th. with the ſame Wind and Courſe made 22 Lgs.

The 15th. holding the ſame Courſe we made 44 Lgs, the Wind at S. E.

The 16th. we got 46 Lgs with the ſame Wind, and having the Sun in the *Zenith*, could not make any Obſervations; the Heats were very exceſſive here.

The 17th. the ſame Wind carried us 40 Lgs. forward, and the 18th. 42 Lgs to the 5th deg. the Heats were almoſt unſupportable this Day, and we ſaw Millions of Flying Fiſh, and great numbers of the Birds called *Alcatraz de Volada*.

The 19th. the Wind blowing from the S. E. we made 40 Lgs to 3 deg. 19 min. Latit. and the 20th. the ſame Wind continuing, 40 Lgs further to 1 deg. 18 min. Latit.

The ſame Wind carried us the 21th. 35 Lgs when we paſſed the *Equinoctial-Line*. At 1 deg. beyond the Line we diſcovered the *Cape de Lopez Gonſales*, upon the Coaſt of *Guiney*, which has a ſafe Harbour for Ships, which ſometimes provide themſelves with refreſhments here.

The Iſle of St. *Thomas*

The Iſle of St. *Thomas* (ſo called by the *Portugueſe*, from it's being diſcovered on St. *Thomas*'s Day) is ſituate under the Line; the Air of which is ſo unwholſome, and the Heats are ſo exceſſive, that few *Europeans* live to 50 years of Age here, tho' ſome of the Natives arrive to 100. Here is a conſtant equality of Day and Night throughout the whole Year, and it never rains except in *March* and *September*, the defect of which is ſupply'd by the Dew which falls conſtantly every Night, moiſtens the grounds, and renders them very fruitful. When it was firſt diſcovered a certain kind of a Tree was found here, the Branches whereof were exactly ſtrait; and formerly this Iſle produced ſuch vaſt quantities of Sugar, that above 40 Ship loads might be tranſported thence every Year; but a certain Worm being got among the Canes, has ever ſince made ſuch havock among them, that it ſcarce affords now loading for 6 Ships. Beſides which this Iſland produces Wheat, Wine, Millet, Rye, Barley, Melons, Cucumbers, Figs, Ginger, red Parſnips, Cabbages, Navews, Lettuce, Parſley, and all ſorts of Roots, Pulſe, and Pot-herbs, and among the reſt a certain kind of Muſhrooms, the Rind whereof is black, but the Meat white not unlike the *French Navew*, ſave that it ſhoots forth divers Branches below.

The Inhabitants look upon it as a great Dainty, and when bak'd in the Embers, eat them as we do Cheſnuts, but they have a better flavour.

The *Spaniards* have planted ſome Olive, Peach, and Almond Trees here; they thrive well enough, but bear no Fruit. This Iſle alſo affords a kind of Land Creviſſes, which live under Ground, and work like Moles; Partridges, Quails, Black-birds, Parrots, and other Birds in abundance. The Sea produces vaſt ſtore of moſt excellent Fiſh, and among the reſt Whales of a vaſt bulk. In the very Center of the Iſle is a Mountain covered on the top with a Cloud, which furniſhes Water ſufficient for the conſtant watering of the Sugar Canes, and what is moſt obſervable is, that the higher the Sun comes above the Horizon, the more Water falls from the Cloud.

The Natives are Negroes, but ſuch Foreigners as ſettle there continue their natural colour to the 3d. or 4th. Generation. They affirm that the Lice and Fleas wherewith the Negroes are much peſtered, never afflict any Strangers.

At 35 Lgs diſtance from the Iſland of St. *Thomas* to the S. you ſee another Iſland called *Rolas Ile* by the *Portugueſe*; it produces ſuch plenty of Oranges, Citrons, *Limonias*, *Ananas*, Ginger, Poultry, Hogs, and other freſh Proviſions, that it is one of the moſt convenient Places for Ships to refreſh themſelves in, its Haven being very commodious at 10 fathom Water.

The Iſle of *Caniſco* lies cloſe to the Continent, and affords nothing but freſh Water.

Octob. 22. We made 33 Lgs, the Wind S. W. and fair Weather, we found our ſelves about Noon at 1 deg. 35. min. Latit. North from the Line. 1639.

The 23d. being exceſſive hot, we got 26 Lgs with the ſame Wind at 3 deg. 1 min. Latit.

The 24th. it thundred and lightned all the Day, we made no more than 22 Lg.

The 25th. a S. E. Wind advanced us 32 Lgs, our Courſe to the N. N. W. It was very rainy, and we we were frequently troubled with thoſe *Travado's*, or Whirl-winds which are ſo frequent on the Coaſt of *Guiney*, from whence we might be 150 Lgs diſtant.

The 26th. the Wind continued the ſame, and we made 25 Lgs to the 7th. deg. Lat. We obſerved here the Heats to be more Intenſe than we had felt them on the other ſide of the *Equinoctial Line*, notwithſtanding, the Sun was 10 deg. further from our Hemiſphere; the reaſon of which I conceived to be, that the Sun-beams which had ſo lately warm'd the Septentrional Hemiſphere, had not had ſufficient time to produce the ſame effects in the Meridional.

The 27th. the Wind changing to the N. by E. we were alſo obliged to alter our Courſe, and made only 13 Lgs that Day; about Noon we found our ſelves at 7 deg. 50 min. Latit. and it was obſervable, that the further we ſteered from the Coaſt of *Guiney*, the leſs we were troubled with bad Weather, which had ſufficiently afflicted us for ſome Days paſt.

The 28th. the Wind turn'd to the N. E. which is the ordinary Wind betwixt the 10th. and 20th. deg. which afterwards changes like as it does in our Seas. We made 30 Lgs that Day, and the 29th. 31 Lgs more with the ſame Wind at 10 deg. Latit. about Noon.

The 30th. we made 28 Lgs with the ſame Wind and Courſe to 11 deg. 13 min. Latit. And the 31th. 23 Lgs with the ſame Wind, and rainy Weather.

Novemb. 1ſt. the Wind continued the ſame, and carried us 26 Lgs forward.

The 2d. we made 24 Lgs with the ſame Wind, ſteering our Courſe to the N. W.

The 3d. we continued the ſame Courſe with the ſame Wind, which brought us about Noon to 14 deg. 40 min. and conſequently near the Latitude of *Cape Verde*, being a point of Land ſtretching out into the Sea from the *African* Continent between the Rivers of *Gambea* and *Senaga*; *Ptolemy* calls it *Promontorium Arſinarium*. Cape Verde.

The Inhabitants here are *Moors*, large ſiz'd, and not ill ſhap'd, but very miſchievous and treacherous; they are *Pagans*, worſhipping the Moon and the Devil; ſome among them call themſelves *Mahometans*, but ſetting aſide Circumciſion, they have no other marks of that Religion or any other. They are embroil'd in continual Wars with their Neighbours, and very good Horſe-men; their Horſes, which are very ſwift, being brought thither from *Barbary*. Their Arms are only the Bow and Arrows, and a kind of a Lance, or Pike, which they manage with marvellous dexterity. The Privy Parts of their Enemies are the Trophies they moſt eſteem; thoſe they preſent to their Wives, who make Neck-laces of them, and wear them as the greateſt Ornament. Its Inhabitants.

They allow Polygamy, and their Wives are forced to do all the Work both at home and in the Field, whilſt the Husband in his Hut is attended by his Wives, and goes a Hunting or about ſome other ſport at his own Pleaſure. Their Women are very hardy, they are no ſooner delivered, but they waſh the Child themſelves in the Sea, or next River. Their Wives.

The Men are generally addicted to Drunkenneſs to ſuch a degree, that ſome of them will take off a whole quart of *Aqua Vitæ* at a draught. Their chief times of Merriment are at the Funerals of their Friends, or Relations, where they drink and howl by turns, and that for 4 or 5 Days together, under the ſound of the Drum and Pipe. The Men great Drunkards.

They believe the Reſurrection of the Dead, and ſay they ſhall be white like the *Europeans*. They have a conſiderable Trade with the *French*, *Spaniards*, and *Dutch*, in Oxes Hides, Bouffles, Elks, Elephants Teeth, Wax, Rice, and Ambergreece, which is to be found in its perfection here; for here one Mr. *Peter de la Bronck*, a *Dutch* Merchant bought 1606 pieces of Amber of 80 pound weight. Believe the Reſurrection of the Dead.

The diſcovery of this Coaſt is likewiſe owing to the *Portugueſe* in the Year 1417. but this firſt Voyage meeting but with very indifferent Succeſs, *Anthony Gonſales*, 1441. having diſcovered the *Cape del Cavellero*, carried off certain *Negroes*, who being ſent by the The Diſcovery of the Coaſt.

1639. the *Infanta* of *Portugal* to Pope *Martin* V. he was willing enough, under the ſpecious pretence of planting Chriſtianity in thoſe Parts, to grant him (what indeed coſt him nothing, and had no right to) all what he ſhould diſcover on the *African* Coaſt, under Condition that after his death it ſhould be annexed to the Crown of *Portugal*. The *Infante* having already diſcovered the whole Coaſt, between *Cabo de Naom*, and 100 Lgs beyond the *Cabo Verde*, happened to die 1453. But King *Alphonſo* 1457. granted all theſe Conqueſts to *D. Ferand* Duke of *Viſeo*, Heir of the *Infante*, and 1461. ordered a Fort to be built in the Iſle of *Argoin*, for the ſecurity of Commerce. It was in the ſame Year Farm'd out to one *Ferdinand Gomez*, under Condition, that he ſhould be obliged to diſcover every Year 100 Lgs at leaſt on this Coaſt; by which means the *Portugueſe* had 1479. diſcovered the Iſles of *Fernando del Po*, St. *Thomas*, *Anno Bueno*, thoſe of *del Principe*, and the Cape of St. *Katharin's*. K. *John* II. was no ſooner come to the Crown, but he ſent in 1481. *Diego d'Azambuja*, who 1482. *Jan.* 19th. made the firſt diſcovery of *Mina*, caſting Anchor near a Place call'd *Aldea de dos Partes*, then under the Command of a certain Prince named *Caramanſa*.

Mina. This Place, unto which the *Portugueſe* gave the Name of *Mina* (from the great quantity of Gold found there) is ſituate upon the Coaſt of *Guiney*, 5 deg. 40 min. S. of the *Equinoctial Line*, betwixt the 2 Kingdoms of *Aken* and *Cara*, bordering to the N. W. upon *Camana*, and to the N. E. upon *Afuto*, ſmall Countries under the Juriſdiction of thoſe of *Abarambues*; Hereabouts too, *viz.* within the compaſs of 50 Lgs, is managed the chief Gold Trade of all this Coaſt. They have built a Fort here upon an Aſcent, on a Point of Land which jets out into the Sea like a Demi-Iſle, having on one ſide, *viz.* to North, the *Æthiopian Sea*, and to the South a ſmall River. The Town which is ſituate juſt below the foot of the Fort, has about 800 Inhabitants, and its ſituation is ſuch, that 500 Men may maintain it againſt a conſiderable Force, being fenny all about, and ſo barren, that the Inhabitants are forced to be ſupply'd with Proviſions from *Camana* and *Afuta*.

Its Inhabitants. The Natives here are ingenious enough, and much more pliable than the *Negroes*, but are extreamly ignorant in matters of Religion; for they adore every thing they ſee, that is the leaſt ſurpriſing to them. At that time they offered their daily Sacrifices of Water and Meat, by their Prieſts, to a certain Tree of an extraordinary bigneſs, encloſed for that purpoſe with a high Wall; they adored the Bones of a Whale, and paid Divine Worſhip to a certain Rock, becauſe it exceeded all the reſt in height.

Are Superſtitious. They are extreamly addicted to Divination, and therefore ſet as high an eſteem upon thoſe who profeſs themſelves Sorcerers, but in effect are nothing elſe but Cheats, who improve the weakneſs of theſe ignorant Wretches to their advantage. They are the moſt Religious People in the World in the obſervance of their Oaths, it being their Opinion, that ſuch as violate them, will be ſnatch'd away by a ſudden Death; and hence it is that their Law-Suits are determined in a few hours, upon the ſolemn Affirmation or Denial of either of the Parties. All Crimes, even Capital ones may be redeemed with Money, unleſs the ſame be reiterated ſeveral times by the ſame Perſon.

Their Cloathes. They have no other Clothing but a piece of Cloth or an Apes-ſkin, wherewith they cover their Privy-Parts, all the reſt of the Body being naked. For Ornaments ſake, they wear Barcelets of Gold about their Arms and Legs, and twiſt their Hair and Beards with golden Chains; they conſtantly rub their Bodies with Oil or Fat, to make them ſhine.

Arms. Their Wars are no more than confuſed Skirmiſhes, without the leaſt Order or Diſcipline. They make uſe of Darts, and ſhort Lances, and for their Defence cover themſelves with the Skins of Tygers, Lions, or Leopards. Their *Hidalgos* or chief Men are attended by 2 Pages, when they are going to the Wars, the one carries the Buckler, the other a Stool, for his Maſter to reſt himſelf upon, as occaſion ſerves. They marry as many Wives as they are able to buy and maintain, the Purchaſe of a Wife being commonly 10 Rials, which paid, the Marriage is conſummated without any further Ceremony, except that they get heartily drunk.

The Dutch ſettlement. The *Dutch* have erected a Fort call'd *Boure*, within 4 Lgs of *Mina*, beſides which they have their Factories at *Cara*, *Coromantin*, and *Aldea del Tuerto*, whence they return vaſt Quantities of Gold yearly, having much undermined the *Portugueſe* Traffick, with the *Æthiopians*, by their mild way of dealing, and being contented with a much leſs Profit than the other. 1639.

The King of Congo. King *John* II. of *Portugal*, having refuſed the offer made him, by *Chriſtopher Colombus*, of diſcovering the *Weſt-Indies*, bent all his Thoughts upon the Conqueſts in the Eaſt; For which purpoſe he ſent *Diego Can*, and *Juan Alonſo d'Avero*, into thoſe parts.

The firſt directing his Courſe towards *Mina*, came to the Cape *de Lope Conſales* and having afterwards doubled the Cape of St. *Catharine*, entred the River *Zaire*, 7 degr. S. of the Line into the Kingdom of *Congo*.

This Kingdom extending from the Cape of St. *Catharine* to the S. of the Cape *de Ledo*, is incloſed on the W. ſide by the *Æthiopian* Sea, to the S. by the *Mountains of the Moon*, and the *Cafres*; as it is to the E. by the *Mantabas*, and Borders to the N. upon the Kingdom of *Beny*, reaching in length from 2 deg. 30 min. to the 13th degree beyond the Line, and conſequently near 160 Lgs. It is divided into ſix great Provinces, viz. *Bamba*, *Songo*, *Sunda*, *Pango*, *Batta* and *Pamba*. Its Provinces.

Bamba. The Province of *Bamba* extends along the Sea-ſhoar, betwixt the 2 Rivers of *Ambriſi* and *Coanſe*. Its chief City bearing the ſame Name with the Province, lying 20 Lgs from the Sea-ſide, betwixt the Rivers of *Loſa* and *Ambriſi*.

Songo. The Province of *Songo*, is encloſed betwixt the 2 Rivers of *Zaire* and *Loango*, reaching from the River *Ambriſi*, to the foot of the Mountains, which ſeparate it from the Kingdom of *Loango*.

Sunda. The Province of *Sunda* is only 8 Lgs in Compaſs, comprehending all the Country about the City of *Congo*, (nam'd St. *Salvador* by the *Portugueſes*) to the River *Zaire*. Its Metropolis has given its Name to the Province.

Pango. The Province of *Pango*, formerly under the Juriſdiction of its own Kings, Borders to the N. upon the Province of *Sunda*, to the S. upon that of *Batta*, to the W. it has the City of *Congo*, and on the Eaſt ſide is ſurrounded by the *Mountain of the Sun*.

Batta. The Province of *Batta* lies to the N. E. betwixt that of *Pango*, and the River *Barbella*, extending to the *Burnt Mountains*.

Pamba. The Province of *Pamba*, has for its Metropolis the City of *Congo*, which is built upon a Mountain at leaſt 50 Lgs from the Sea-ſide. Another Mountain belonging to this Province, which is above 6. Lgs in length, is ſo well ſtor'd with Villages, that its Inhabitants are computed to be near 100000 Perſons.

The Climate. *Duarte Lopez*, who lived ſeveral years in theſe parts, declares, That the Climate here is as agreeable in Winter, as it is in *Italy*, in *October*, and that the greateſt Inconveniency they are ſubject to there, are the hot Rains, which fall every day, 2 hours before, and as many hours in the Afternoon, during the Months of *April*, *May*, *June*, *July*, and *Auguſt*, being their Winter, which begins the 15th of *March*, and ends the 15th *September*. The Days and Nights are of a length here both Winter and Summer.

The River Zaire. The River *Zaire*, riſes out of the ſame Lake, whence the *Nile* derives its riſe, it is beyond all Queſtion the largeſt River in all *Africk*, for being join'd with the Rivers, *Vambo* and *Barbella*, as it paſſes through the Country, it is at the mouth, where it diſembogues into the Sea, at leaſt 28 Lgs broad. The River *Goanze* is the common boundary, betwixt the 2 Kingdoms of *Congo* and *Angola*; and the River *Lelonda* abounds in Crocodiles, and Sea-horſes.

Sea-Horſes. This Creature is of a duskiſh Colour with very little hair. Its head is without Ears, has broad Noſtrils, and in his jaw 2 Teeth, like the Tuſks of a wild Boar. Its hoof has the ſhape of a three leav'd Graſs, it neighs like an Horſe, and will run a great pace. The hot Rains which fall in the Winter Seaſon rendring the Grounds very fertile, they produce Herbs, Corn and Fruit, in incredible Quantity.

Gold Mines. The Province of *Pamba* has divers Gold-mines, as the Foreſts are full of Elephants of an extraordinary ſize, ſome of their Teeth having been found to weight 200 pound. They produce alſo a peculiar kind of Creature, call'd *Sebra*, in ſhape not unlike a Mule, but is capable of engendring; it is mark'd with 3 Liſts round the back reaching down to the Belly, of about three Fingers breadth each; one is black, the other white, and the third yellow. This Beaſt is famous for its marvellous ſwifteſt.

Their

1639. They have also a kind of Oxen call'd *Empalenges*, but somewhat less than ours. Wolves, Foxes, wild Buffers, wild Goats, Deer, and Rabbers, being never sought after here, they are seen in prodigious Quantities, the only thing they hunt after being the Civet-cat, by reason of the great Advantage it affords to the owners.

They abound also in Birds and Fowl, such as Pheasants, Partridges, Hens, Turkeys, Ducks, Geese, Turtles, Pidgeons, Hawks of all sorts, and Eagles.

Serpents they have of 15 foot long, which will swallow an entire living Creature at once, and some Amphibious Creatures, the Flesh of which is eaten by the Inhabitants, whereas some others are so Venomous, that such as are sting by them infallibly die within 24 hours.

The Mountains of *Pemba* bring forth Citrons, Oranges, Banana's, and divers other Fruits, as plentifully as in most parts of the *Indies*, and the valleys afford a kind of Wheat call'd *Lenco*, not much bigger than Mustard-seed, which making better Bread, than any common Wheat, is reserved for the use of the better sort, the poor being fed here with Bread made of Rice, and *Turkey* Wheat.

Cocoes. Of *Cocoe*-Trees they have 2 sorts, some are Date-Trees, the other produces *Cocoes*, and a certain juice which is accounted an extraordinary cleanser of the Reins, and consequently a Soveraign remedy against the Gravel.

Their Fruits, as well as Pulse and Herbs, are without comparison more excellent here, than in other Countries, their Mountains which are for the most part covered with Fruit-trees, are green all the year round, and the Rocks produce white Marble, Alabaster, Jasper, Porphyry, and sometimes Hyacinths.

The Inhabitants are Black, but the Women not so much as the Men; they have neither such thick Lips, nor are so flat nosed, as commonly the Negroes are, and their Hair curls naturally. Those of *Bamba*, are famous for their strength.

The Houses. As every Man here is his own Architect, and Physician, so their Houses are small, low, and slightly built; they cure Fevers with the Powder of Sandal-wood, the Head-ach by bleeding, and when they are to procure an Evacuation by Purging, they do it with the Bark of a certain Tree, beat to Powder.

Clothing. They generally appear bare-headed, but such as do not, wear a kind of Hats, made of the barks of Trees, or Nutshells; some have a way of fastning with pack-thread, Plumes to their Hair; and both Sexes have holes in their Ears, in which hang very weighty rings of Gold, set with Stones; About their Arms and Legs, they wear rings or rather Plates of Iron, Tin or Brass, but the better sort are clad after the *Portuguese* Fashion.

Wealth. They sleep, and eat upon Mats spread upon the Ground. Besides the vast Wealth in Gold, Silver, Copper, Crystal, Iron, and other Metals, this Country produces, a great Traffick is carry'd on here in Ivory, Civet and Slaves, whom the *Spaniards* and *Portugueses* employ in their Mines, and Sugar-mills of *Brasil*.

Money. They use certain shells, which they fish out of the Sea, near the Isle of *Londa*, instead of Money, there being a peculiar Governour appointed there for that purpose, who has the over-sight of it.

The Government of the Country. The King of *Congo*, governs with an Arbitrary and Uncontrolable Power, both the Lives and Estates of his Subjects, at his own disposal. The Provinces are under the Jurisdiction of certain Governours, among whom he of *Batta* is the Head, and constant Chief Minister of State, being of the Blood-Royal; which is the reason, he sometimes eats at the Kings Table, (a thing not allow'd even to the King's Sons) but never sits down, but stands all the time. He has alone the Privilege of having the same Pipers and Musicians the King has, and of the use of Fire-arms for his Guard, of whom he keeps a good number, to bridle the insolency of a certain People, living upon the *Nile*, call'd *Giaques*, who make frequent inroads into his Territories, of which notice is given to the Country, by the discharging of a Musquet.

The Province of *Bamba*, is however accounted the Bulwark of this Kingdom, for though the Province of *Batta*, is able to raise about 70000 Fighting Men, whereas that of *Bamba* is able to raise only 40000. yet are the first for goodness, not to be compared to the last. They use great broad Swords, like the *Swisses*, and handle them with as much activity as we do our Rapiers; They make use also of Darts and Bucklers, the last of which, are made of the Barks of Trees. 1639.

Their engagement. They have no Cavalry, their Armies which are divided into divers Brigades, consisting only of foot, who engage all at a time; The General keeps in the Center, and by the help of their Warlike Instruments, call'd *Mani*, gives the signal to the Commanders, when to attack, to retreat, to close, or to open. Their Trumpets are of Wood, and make a most dreadful noise, their Drums are made of the Barks of Trees, and covered with a skin, which they beat with great Ivory sticks.

Warlike Instrument. Besides these they have a kind of Instrument, being only an Iron plate, of a Triangular form, which they beat with ordinary sticks; they have also a way of hollowing the Elephants Teeth, and blowing them as we do our Horns. With these Instruments the Commanders in the Army, answer the Signal given them by the General.

How Christianity was introduced here. The *Portugueses* were the first who introduced the Christian Religion here, under the Reign of *John* II. their King, who, as we told you, sent *Diego Can*, and *John Alonso d' Avero* into those parts. It was about that time, that *Caramansa* King of *Congo*, sent *Casuta* his Ambassador to the King of *Portugal*, who being baptized there, was sent back with three *Portuguese* Ships, commanded by *Gonsalo de Sonsa*, but in touching at *Cabo Verde*, both dyed there of the Plague; *Ray de Sonsa* who succeeded in the Command, being forced into the Port of *Finda*, in the Province of *Songo* (where the *Dutch* have establish'd themselves since) the Governor of the Place who was Uncle to the King of *Congo*, was baptized with all his Family, whose Foot-steps soon after were follow'd the King and Queen being named *John*, and *Eleanor*.

Emanuel King of *Portugal* sent another Squadron thither, 1504. But soon after the discovery of the *Indies*, and Prospect of greater Advantages to be reap'd from thence, occasioning the Discontinuance of those Voyages to the *African* Coast, the Foundations of Religion were also neglected by the *Portugueses*, which the *Dutch* improving to their Advantage, introduced their Traffick, and with it the Protestant Religion.

We told you before that *Diego Can* discovered *Congo*, let us now see what became of his Comrade, *John Alonso d' Avero*. He about the same time made a discovery of the Kingdom of *Beny*, betwixt the *Mina* and *Congo*. Its length is 80 Lgs, and its breadth 40.

The King-dom of Beny. The City of *Hugatoo*, is at 12 Lgs distance from the Sea, and somewhat deeper into the Country, upon the River, named *Rio Formoso* by the *Portugueses*, its Capital City, bearing the same name with the Kingdom.

The King of *Beny* having soon engaged, in a Treaty with *Alonso*, was also baptized, but this Conversion being not founded upon any Real knowledge of the Principles of the Christian Religion, was of no longer continuance than the Traffick of the *Portugueses* in those Parts, which was neglected as soon as they had made a discovery of the Passage by Sea to the *Indies*.

Cabo Verde described. *Cabo Verde*, is by *Ptolemy*, call'd *Promontorium Arsinarium*, and put at 10 deg. 40 min. on this side the line, whereas by our own Observation we can positively affirm it, to be at 14 degr. 20 min. betwixt the 2 Rivers of *Zanaga* and *Gambra*, or *Gambea*, call'd by *Ptolemy*, the *Dasago* and *Stachiris*, and which according to his Opinion, are but very small ones, the Scources of which are unknown, whereas it is beyond all Question, that they rise out of 2 Lakes, one of which is by the said *Ptolemy*, call'd *Palus Chelonides*, now the Lake of *Geaga*, and the other that of *Naba*; tho' some of the Inhabitants are of Opinion, (but without any Probability of Truth) that they have their rise in the *Nile*. It is call'd *Cabo Verde*, from the many Trees and Verdure. *Ptolemy* also mentions nothing of these 2 Rivers falling into the Sea, whereas it has been found since, that the River *Gambra*, after being join'd by the Waters of divers other Rivers, in the Province of *Mandiga*, disembogues into the Ocean at 13 deg. 30 min. and that the River *Zanaga*, running directly from E. to W. falls at 15. deg. 30. min. into the River *Geny*, which has imparted its name to that Country we call *Guinea*.

Its Inhabitants. As it is certain that *Ptolemy* had no knowledge of the Inhabitants betwixt these 2 Rivers, so we must rely entirely upon the Credit of those Modern Authors, who have given us their Relations concerning them. They tell us that a certain People call'd the *Budumeys* inhabit the Eastern part of the Country, as far as to *Cabo Verde*; The *Foules* and *Berbecines*, they

place

1639. place deeper into the Country, upon the River *Zanaga* to the N. of the *Jaloses*, some of which are subject to the *Foules*, others to the *Budumeys*. It is a plain Country, producing abundance of Cattel, Wine, Cotton, Wild Fowl, Ivory, and Horses. Gold and Silver, they have none, but Iron in vast Quantities. The Air is accounted very wholesome, and the Inhabitants near *Cabo Verde*, brave and good Horse-men, they are *Pagans*. They are every famous for Administring Justice, and publick Affairs, with a great deal of equity, prudence and secrecy. Those that are admitted into their Councils or Courts of Judicature, being generally chosen by their Age and long Experience. Though they are Ignorant of what belongs to Martial discipline, such as is practised in *Europe*, yet is their manner of disposing and gathering their Forces not to be pass'd by in silence:

How they raise their Armies.

For all such as are able to bear Arms, being divided into certain Bodies or Regiments, under their respective Commanders, have also their particular Divisions or Quarters allotted them; so that in case of necessity, the Orders for their appearing togeher in a Body, being dispatch'd from one Division to the other, the whole Army is ready in a little time to be at the Rendevouz appointed, without the Trouble of any new Levies, the Sons succeeding constantly in their Fathers Places, if they happen to die, so that their number is always compleat. They are not altogether Ignorant of the Degrees of Nobility and Peasantry; For their *Grandees* they call *Thubalas*, unto whom they pay more than ordinary Reverence, their King being always chosen out of their number, but he must be 30 years of Age at least.

Not long after the discovery of the Country of the *Jaloses* by the *Portugueses*, one *Beomi* reign'd in those parts, but being got into the Throne by sinister means, and forsaken by most of his Subjects, sought for aid by *John* II. King of *Portugal*, who had him instructed to the Christian Religion, and baptized, and sent him back with a good Squadron of Ships, under the Command of *Pedro Vaz de Cogna*, who had positive Orders to erect a Fort at the entrance of the River *Zanaga*, to facilitate their penetration deeper into the Country. A Fort was built accordingly, but was by the said *Vaz*, (for what reason is unknown) demolish'd again; and being severely upbraided upon this account by King *Beomi*, he kill'd him with his own hands, and so return'd to *Portugal*, where he was never call'd to an account for this Treacherous proceeding.

The Green-Islands.

Those Islands which the *Portugueses* call *Ilhas Verdes*, and the *Dutch*, the *Salt Islands*, lie directly opposite to *Cabo Verde*, yet so, that the neareſt of them is 70 and the most remote 160 Lgs distant from the Continent, which makes me imagine, that those who would have them to be the *Gorgonides* of *Ptolemy*, are under a mistake, since it is not very probable, that he, who has left us so confused an account of the *African* Coast, should have any Knowledge of the Isles at great a distance. They are in all ten, *viz.* St. *Jago*, St. *Antonio*, *Santa Lucia*, *Sant. Vincent*, St. *Nicholas*, *Ilha blanca*, *Ilha de Mayo*, *Ilha de Sal*, *Ilha de Fogo*, and *Ilha de Boa Vista*, extending from the 15th to the 19th deg. The *Portugueses* have given them the Name of *Green-Islands*, either from the Cape, or else from a certain green-weed, call'd by them *Sargasso*, which is like our Water-Cresses; of this you see such prodigious Quantities floating upon the surface of the Sea, from the 20th to the 24th degree, that without a strong gale Ships are sometimes stop'd in their Passage. But what is most surprising is, that, the Sea having no bottom here, and this Herb being not seen in any other part of the Sea, at least not within 150 Lgs from the *African* shoar, how this verdure should come to this particular Tract. Some alledge, that this verdure is wash'd from the Rocks in the *West-Indies*, & forc'd hither by the winds, but as the N. E. Winds reigns here all the year round, there is but little probability in this Opinion. When these Islands were first discovered by the *Portugueses*, they were without Inhabitants, Desert, but now produce Rice, Millet, *Turky* Wheat, Oranges, Citrons, *Bananas*, *Ananas*, *Ignames*, *Potatoes*, Melons, Citruls, Cowcumbers, Figs and Rasins, twice a year, and the 3 Islands of *Mayo*, *de Sal*, and *Boa Vista*, have such plenty of Cattle, that the *Portugueses* send whole Ship loads of them thence to *Brasil*. The considerable Quantity of Salt these Isles produces, has made the *Dutch* give them the name of the *Salt-Islands*. The *Portugueses* have also taken care to store these Islands with all sorts of tame and wild Fowl, which are multiply'd

Sargasso.

1639. at such a rate; that they may be had almost for nothing.

Flamincos

They have a peculiar kind of a Bird here, call'd *Flamencos*, by the *Portugueses*, they are as big, and white all over their Bodies, as our Swans, but their Wings are of a high red Colour. Rabbets are here in vast numbers, and the circumjacent Sea furnishes them with incredible store of Fish; which is the reason you see here at all times a considerable number of *Portugueſe* Fisher boats, who carry what they catch to *Brasil*. These Islands lie extreamly Commodious for such Ships as Trade to the *Indies*, in as much, as going thither, they may take in refreshments at a very easie Rate in the Isle of *Mayo*, and in their return at that of St. *Anthony*, the *Portugueſe* Inhabitants being not in a Condition to prevent it.

St. Jago

The Isle of *Jago*, as it is the Chiefest, so here the Governor and Archbishop keeps their ordinary Residence; the Spiritual Jurisdiction of the last extends not only over these Islands, but also over all the *African* Coasts, as far as it is in the Possession of the *Portugueses*.

Continue our Voyage.

Nov. 4th. we continued our Voyage for 24 Lgs, with a N. E. wind, steering our Course to the N. N. W. and found our selves at 16 deg. 1 min. Latitude.

The 5th. the wind the same, we made 31 Lgs to 17 degr. 27 min.

The 6th. keeping the same Course with the same wind, 34 Lgs to the 19th degr. 10 min.

The 7th. the wind held still in the N. E. which reigns here all the year long, as far as to the Artick Tropick, we made 36 Lgs.

The 8th. the wind coming to the E. N. E. we sail'd 32 Lgs to 22 degr. 35 min. Here we were much pestered with the *Sargosso*, or green, which we mentioned before; which, upon examination, I found very like our Water Cresses, only these were of paler Green, and had a small seed, like those of Green Goosberries.

The 9th. we sail'd 33. Lgs to the N. with the same wind, at 24 deg. 32 min. Latitude.

The 10th. the same wind carried us 25 Lgs to the N. N. W. at 25 deg. 40. min. Latitude.

The 11th. the wind turning in the Morning to E. S. E. and soon after to the S. we made but 8 Lgs, and were becalm'd before Night, the wind at N. W. our Course was to the W. at 26 deg. 40 min. Latitude. We took that Day a *Haye*, as the *Dutch* call it, (a Shark) which is accounted a rarity in these Seas, tho' they are frequent in the *Indies*.

The 12th. the wind being at N. N. E. we made 11 Lgs to the N. W.

The 13th. and 14th. the wind at N. E. we steer'd our Course W. N. W. and made the first day 21, and the next 22 Lgs.

The 15th. the wind was at the N. E. which carried us 20 Lgs to the N. W. to 27 deg. 30. min. Latitude.

The 16th. and 17th. we made 32 Lgs with the same Wind and Course.

The 18th. the wind turning to the S. E. we took our Course to the N. W. and made 21 Lgs to 29 degr. 20 min. Latitude.

The 19th. the wind chopp'd about to the S. S. W. with rainy weather, we steer'd our Course to the N. E. and made 37 Lgs.

The 20th. we got with a N. W. wind 12 Lgs in the same Course, and the 21st. 22 Lgs. more.

The 22th. the wind being at W. S. W. we steer'd our Course, for 40 Lgs to the N. N. E. at 35 deg. 20 min. Latitude. The 23th. a S. W. wind carried us 34 Lgs to the E. N. E. and the 24th. 35 Lgs further. The 25th. we had a N. W. wind, so, steering our Course to the N. E. we made 33 Lgs, at 38 deg. Lat. The 26th. being becalm'd, we got but 13 Lgs, and the 27th. but 12 more, taking our Course E. N. E. at 38 deg. 48 min. Lat. The 28th. the wind turning to the S. S. E. we took our Course to the E. S. E. for 27 Lgs, and the 29th. the same wind continuing, we made 24 Lgs taking the same Course; and at noon, at 33 deg. 30. min. got sight of the Islands of *Corvo* and *Flores*, which some, but erroneously number among the Islands, called by the *Spaniards* the *Azores*, from the many Hawks found here.

The Azores or Flemming Isles.

These are generally by the *Dutch* call'd the *Flemming* Islands, because the first Inhabitants of the Isle of *Fajal* (one of the *Azores*) were Natives of the Low-Countries, who settled themselves on that little River call'd by the *Portugueses*, *Ribera dos Flamencos*, and their Posterity live to this day there, according to the Custom of their own Country. The 7 Isles known by the name of *Azores*, are *Tercera*, St. *Michael*, *Santa Maria*,

Tercera.

1639. *Sant, Georges, Gratiosa Pico*, and *Fayal*. *Tercera* being 15 or 16 Lgs in Compass is the biggest and chiefest among them, being a Congeries of Mountains, which make it almost unaccessible, there being no safe Road or Harbour here, except at the City of *Angra*, being the Metropolis of this as well as the 6 other Islands, and the ordinary Residence of the Governors of these Isles, and of the Bishops themselves. This Road is not safe at all times, tho' this Port is enclosed like a Crescent, by 2 Mountains advancing very deep into the Sea; they call these Mountains *Bresil*, and may be seen 13 or 14 Lgs off at Sea. About 3 Lgs from the City of *Angra*, is a Town call'd *Villa de Praya*, the Houses whereof are very well built, but as it is a place of no Trade, so it is not very Populous. The City of *Angra* has obtained its Name from its Situation in the form of a Crescent, this Word being used by the *Portugueses*, to express the Figure of the new Moon. It is defended by two Forts, one of which is built upon the ascent of the Mountain, the other upon one of the points of Land, which cover the Haven, and consequently for the defence of its Entrance; the opposite point, having 2 high Towers, whence by a certain Signal, they give notice to the Inhabitants, what Vessels they espy at Sea, whether they come from *Europe* or *Bresil* side. All these Isles are subject to the Crown of *Portugal* now, though the *Castilian* Governor, *Don Alvaro de Vizeros*, defended himself very bravely in the 2 Forts of the City of *Angra*, after the revolution in *Portugal*, and did not surrender the Castle upon the Mountain till *May* 6. 1642. after he was reduced to the last extremity by famine; it is almost surprising to behold, that the bare Rocks here, which are not so much as covered with Earth should produce good store of Vines, which thrive better there than in the Valleys, though it must be confess'd, that their Wine does not come near in Goodness to those of the *Maderas*, and the *Canaries*.

Tercera

Angra.

Fertility of the Soil.

These Islands produce every thing, that is either necessary or convenient for human Life (except Oil and Salt) for they have Wheat good store, Pears, Apples, Citrons, Oranges, and Peaches in great plenty, besides Cherries Plums, Walnuts, Chestnuts and Pot-herbs of all sorts. They have also Potatos, but these are more esteem'd in *Portugal*, than in the Islands, and a peculiar Shrub, which growing up to the height of 5 or 6 foot, spreads its Roots by an Infinite number of Branches, as small as the Hair of a Mans head; of a yellowish Colour; they are used chiefly for their Quilts and Beds instead of Feathers, though there is not the least question, but that if they were spun into a Thread, they would afford Materials for a very good stuff. Cattle and all sorts of tame Fowl, as well as small Birds, multiply here beyond what can be imagined, but they have neither, wild Fowl nor Venison.

How they keep their Wheat.

Their Wheat is excellent good, but will not keep unless it be put under ground; for which reason each Family has its particular Vault, the entrance whereof is no bigger, than is sufficient for one Man to enter into, thence they carry it after *Christmass* to their Houses, where they keep it in Chests of Bulrushes, the remaining part of the year without ever stirring it. The Oxen of the Isle of *Tercera*, are the bigest and fairest of all *Europe*, and very conspicuous for the excessive bigness of their Horns, they are as tame as our Dogs, and will go and come as they are bid to do. The noise which is perceived when People go over the Rocks here, sufficiently demonstrates their hollowness within; whence arise the Earthquakes, which are so frequent in this, as well as the other *Azores* Islands.

Terc. Oxen.

Subject to Earthquakes.

Thus 1614. 24th. *May*. 11 Churches and 9 Chappels, besides private Houses, were ruin'd by an Earthquake, in the City of *Angra*, and the City of *Praya* was almost laid desolate at the same time; and the whole Isle of St. *Michael* was so terribly shaken by an Earthquake, 1628. 16 *June*, that at some small distance from the shoar, the Sea opened in a place where was 150 fa. Water, and thence thrust forth a small Isle of a Lg. and a half in length, at least 60 fathom above the water. These 2 Islands have also certain hot Springs, whence at some distance from them issue Sulphurous Vapors. About 3 Lgs. from *Angra* is a Spring which turns Wood to Stone, as is evidently to be seen by a certain Tree, the Root whereof as far as it has been under Water, is absolutely petrefied, whereas the trunk and all the rest, are not in the least changed. The Isle of *Pico* has a peculiar kind of Wood, as hard as Iron, red like Scarlet, in which when cut appear certain Veins, like the Water of a Chamlet, of which

An Island started out of the Sea.

A petrefying Spring.

1639. are made very fine Cabinets, highly esteem'd in *Portugal*. Cedar is so common among them, that they don't only use it for their ordinary Houshold-stuffs, but also for Fuel; nay, they make whole Waggons and Boats of it. They have scarce any Commodities to trade with, except Provisions, which they sell to the Ships that touch there to take in refreshments, as they are going to the *East-Indies*. 1639.

The Isle of St. *Michael* (the second among the *Azores*) is about 20 Lgs long, lying 28 Lgs S. E. from that of *Tercera*. Its Capital City is call'd *Punta Delgada*; its Soil very fruitful, producing more Wheat than they are able to consume; the worst is, that they have no safe Road for Ships to ride in. St. Michael Isle.

The Isle of St. *Mary* being not above 12 Lgs in compass, lies 12 Lgs S. of that of St. *Michael's*; its Products are Provitions and Potters Earth. St. Mary.

The Isle of *Gratiosa* lies 7 or 8 Lgs N. E. from that of *Tercera*; its compass being not above 5 or 6 Lgs: It has got its Name from its Pleasantness, and vast plenty of all sorts of Fruits. Gratiosa.

The Isle of St. *George*, which is 12 Lgs long and 3 broad, lies 8 or 9 Lgs to the N. W. from that of *Tercera*: It is well stor'd with Provisions, tho' it be full of Mountains, which furnish them with vast store of Cedar, which they sell to those of *Tercera*, where it is made up into Joiners and Cabinet-makers works, and transported thence to other Places. St. George.

The Isle of *Fayal* being at least 17 or 18 Lgs in circumference, lies 7 Lgs to the S. W. off of that of St. *George*, being the best of all the *Azores*, next to those of *Tercera* and St. *Michael*: Its Capital City is call'd *Villa Desta*, inhabited chiefly by the Posterity of the *Flemmings* we had occasion to mention before; they send hence abundance of Provisions, but especially Fish, to the other Islands. Fayal Isle.

The Isle of *Pico* has got its name from the High Peak or Mountain within it, call'd *Pico*, supposed to be as high as the Peak of the great *Canary* Island, of which more anon. It lies enclosed betwixt the Isles of *Fayal*, from whence it is distant 3 Lgs to the S. E. of St. *George*, and *Tercera*; from the first of which it lies 4 Lgs to the S. W. and from the latter 12 Lgs to the W. S. W. The grounds are accounted more fertile here, than those of any of the other Isles. The Isle of *Flores*, as we told you, we got sight of 29th. of *Nov.* being 70 Lgs to the W. of *Tercera*; *Flores* is 20 Lgs in circumference, and the Isle of *Corvo*, is no more than 2 Lgs thence to the N. they are both under the *Portuguese* Jurisdiction, but their distance from the *Azores* shews them not to be of their number. As the *Azores* lie very convenient for the refreshment of the *Portuguese* Ships bound to the *East-Indies* and *Brasil*, they are very careful of their Preservation, whence it is, that they will allow no Foreigners, to view the Coast of the Isle of *Tercera* (which is the chief of all, the rest having no safe Roads, or any Forts) for fear they should by its weakness be invited to land and settle there. The Air is very clear and wholesome, but withal very sharp, so that it corrodes Iron, and consumes Stones in a few Years, which is the reason they use flint-Stones in their building, which having lain for a considerable time under Water near the Sea side, are better qualified than other Stones to resist the sharpness of the Air. The Isle of Tercera. The Air of the Azores.

But before we leave the *African* Coast, it will not be amiss to say something also of the *Canary* Islands, which lie upon that Coast, opposite to *Gibralter*.

The wholesomness of the Air, and Fertility of the soil, had got them the name of the *Insulæ Fortunatæ*, among the Ancients; tho' one of them is also call'd, *Canaria* by *Pliny*, *Solinus*, and *Ptolemy*, which Contradicts the Opinion of those, who affirm, That those who discovered them in the year 1342. gave them the name of *Canaries*, from the many Canes found there. They are 7 in number, *viz. Lanzarotta*, *Fortuentura*, the *Great Canary*, *Teneriffa*, *Gomera*, *Fierro* and *Palma*, extending from E. to W. in a manner in a direct Line; *Lewis* Count of *Clermont*, having 1348. got a Grant from the *Pope* of these Islands, set out a Fleet on the Coast of *Catalonia*, to endeavour the Conquest of them, which was effected accordingly, under the Protection of the King of *Arragon*, but the same being afterwards relinquish'd, by D. *Lewis de la Cerda*, the *Biscayans*, and *Andalusians*, having set out some Vessels surprised the Isle of *Lanzarotta*, whence they brought back so much wealth, that the King of *Castile* then resolved upon the Conquest of these Islands, which questioness he would have effected, had not the more pressing Wars he was engaged in with his Neighbours, diverted him from that purpose. Not The Canar. Isles. Conquered by the Count de Clermont.

1639. Not many years after, a certain *French* Gentleman, named *John de Betancourt*, having obtained a Commission from *Henry* III. then King of *Spain*, to Conquer these Islands, under Condition, that he and his Posterity should acknowledge the Sovereignty of the Crown of *Castile*, he was so Fortunate, as to make himself soon Master of the 5 lesser Islands, but could not bring the 2 great ones under subjection. However the King of *Castile* as Sovereign, having sent thither a Bishop, this occasioned such a difference betwixt him, and *Betancourt*'s Nephew, who had succeeded his Uncle, that the King of *Castile*, was forced to send thither one *Pedro Barba*, who having forced the *French-men* thence, gave them as a Dowry with his Daughter, to one *Perrera*, who assuming the name of King of the *Canaries*, left no Stone unturn'd to make himself Master of them all, by the Conquest of the remaining Islands, but finding his endeavours to prove fruitless, he sold 4 of these Islands, to *Ferdinand*, Surnamed the *Catholick*, King of *Arragon*, reserving to himself only, that of *Gomera*, with the quality of an Earl. King *Ferdinand* had the good Fortune, soon to reduce the 2 Great Islands also, which ever since, as well as the rest have remain'd under the *Spanish* Jurisdiction. The *Great Canary* Isle is computed to contain above 9000 Inhabitants, here being also the Residence of the Bishop, Inquisitor, and Great Council, which manages the publick Affairs of all the other Isles. Besides, that excellent Wine so well known and esteem'd in *Europe*, it produces Wheat, Barley, Honey, Wax, and Sugar Canes, and the plenty they have of Cattle, makes them Trade much in Leather; with the *Spaniards*, *English*, *Dutch* and *Hamburgers*; the first, in their Voyages to the *West-Indies*, take most of their fresh Provisions in here. The Isle of *Teneriffe* is famous for its Mountain, call'd *El Pico de Terraira*, being accounted the highest in the World, so that it may be discovered for above 60 Lgs at Sea, and on the top a Man may see all the other *Canary Islands*; tho' some of them are 50 Lgs distant from this; But it requires 3 days time to get up, which must be either in *July* or *August*, it being covered with Snow, all the rest of the year, tho' there falls none in any of those Islands. The Isle of *Fierro* claims the next place to that of *Teneriffe*, among the *Canary Islands*; it has got its Name from the drought of the ground, which being without Water, seems to be of Iron. For, except a few Springs near Sea shoar, this whole Island is without a Rivulet, Brook, Well or Spring; Against which default Provident Nature, has bless'd this Island with a certain Tree, which has no resemblance to any other, that ever I saw, either in *Europe* or the *Indies*, and stands in the very Center of the Isle. Its leaves are very long but narrow, and never cease to be Green either in Winter or Summer; Betwixt the Branches hang certain Clouds or Vapours, which are never dispell'd, but constantly dissolv'd in a Liquid substance, which hanging to the Leaves, falls from thence as clear as Water into the Cisterns, that are made under the Tree, on purpose to receive it, and that in such great quantities, that they are never empty, and sufficient to supply both Men and Beasts. It is the Opinion of the Inhabitants, and those that have frequently sail'd in those parts, that 100 Lgs W. of the *Canaries*, there has been seen a certain Island, call'd St. *Borondon*, very pleasant and fruitful, and inhabited by Christians; but are not able to tell you how it came to be peopled, and what Language is in vogue there. Certain it is, that the *Spaniards* inhabiting the *Canaries*, have made several attempts to find it out, but whether the thick Fogs which surround it, or the Current of the Sea, which keeps Ships from the shoar, is the occasion, that it has not been discovered, certain it is, that no body hitherto has been able to give a satisfactory account of it.

By a French Gentleman.

By the Spaniards.

Teneriffe.

Fierro.

A strange Tree.

Continue their Voyage.

But to return to our Voyage. The wind turning to the S. the 29th of *Nov.* we took our Course to the N. leaving the Isle of *Flores* to the E. of us, and soon lost sight of that, as well as of the Isle of *Corvo*. The 30th. *Nov.* we made 31 Lgs to the N.E. with a S.S.VV. Wind, and at noon found our selves at 40 deg. 32 min. Lat. *Dec.* 3d. we made 34 Lgs with the same wind and Course, and *Dec.* 4th. a N. E. wind advanced us 27 Lgs to E.N.E. The 5th. the wind coming to the S. VV. we continued the same Course, and got 34 Lgs. It was this day exactly eleven Months since we had been toss'd up and down the Sea, though our Voyage had been tolerable enough, ever since our departure from *Madagascar*. The 6th. It blew a storm out of the E. but being for us, we advanced 50 Lgs. It is observable, that soon after you are past the *Azores* Islands, you may assure your self of a VV. wind, let it be what Season of the year it will, till you come to the Coast of *England*, it being very seldom known, that it turns either directly to the S. or N. though perhaps it may change a few parts in the Compass.

West wind reign from the Azores to England.

1639

The 7th. the Wind turning to the N. W. we sail'd 39 Lgs to the E. N. E. The 8th. we made 47 Lgs with a very brisk Gale from the S. W. keeping the same Course, and the 9th. with a S. S. W. Wind made 31 Lgs to N. N. E. we found our selves at 49 deg. 13 min. the Weather being very cold, and a sandy white bottom at 68 fathom, and in the Evening sounding again, found but 53 fathom, the sand not so white as in the Morning. The Wind chopping about to the N. E. in the Night, was directly in our Teeth till the 10th. about Noon, when coming to the S. W. we made 22 Lgs. The 11th. we espied at break of Day 2 *English* Ships, and in a few hours after, that Point of *Cornwel* commonly call'd the Lands End. We endeavoured to double the Point by laveering, the Wind being contrary, and with much-a-do made 16 Lgs. The 12th. the Wind being still against us, we continued laveering, and at a distance we saw another *English* Vessel, but could not come near it. The 13th. the Wind being at S.W. and S. S. W. we steer'd our Course to the E.S. E. and to E. with a point to the S. we made 64 Lgs to 49 deg. Latit. The 14th. after having changed our Course, taking to E. N. E. in order to make the Channel which divides *England* from *France*, we saw 2 *Dutch* Vessels, and a *Dunkirker*, not far from us, but the roaring of the Sea prevented our hearing one another. The 15th. we steer'd the same Course, and met with 3 *Dutch* Ships bound to *Brasil*, not far from the *Isle of Wight*, which lies at 50 deg. 26 min. Latit. and 19 deg. 4 min. Longit. The 16th. by 10 in the Morning we pass'd in sight of *Dover-Castle*, and about Noon came to an Anchor in the *Downs*, and thus compleated our Voyage in the 12th. Month after our departure from *Suratte*. We saw there near 100 Ships, riding at Anchor, in expectation of fair Weather, it being so boisterous, that for 2 Days after we could not stir out of our Ship. The *English* Admiral who was then with some Men of War in the *Downs*, invited the 19th. (when the Wind was somewhat laid) the President to Dinner, who taking me along with him, I had my share in the Entertainment, which was so Magnificent both for the Meat and great quanity of Plate, that the King's Table could scarce have been better served in *London*. As we were extreamly well pleased with our Entertainment, so it was near Night before we got into our Boat. Our Ship laid not above a Musquet Shot from the Admiral, but no sooner were we got into it, when a sudden Storm forced us to Sea, the Waves continually coming over our Boat, so that we were obliged to make the best shift we could to cast out the Water without intermission with our Hats. We then began to reflect, how that after we had surmounted so many dangers during this tedious Voyage, we should at last be Ship-wrack'd in sight of our dear Country, and in that very part, whither we were come with so much danger to seek for safety; but to be short, we were for 4 hours thus betwixt hope and despair, when at last we got sight of a small Vessel, but so miserably torn by the Tempest, that it had lost all its Anchors but one, which was not strong enough to keep it from being forc'd towards the Sea. However we betook our selves to our Oars, sitting up to the Waste in Water, and with much-a-do reach'd the Vessel, in which, in effect, we were not much safer than in our Boat, as being in danger to be stav'd against a dangerous Sand Bank that was not far off, but that the cold we had endured in the Ship, had so disinabled us in all respects, that we were not apprehensive of our condition, being in a manner half dead the next Day, when we were brought to our Vessel, where they had given us over for lost, and bewail'd our Death. *December.* 24th. another Tempest arose, which was so violent, that 24 Ships were forc'd to cut their Masts, among the number of which was also our Vessel, not so much by the Tempest, as for fear of 2 Men of War, which being forc'd from their Anchors, would else have run foul upon us. The 26th. we got at last to the so long wish'd for *English* Shore, and lay the same Night at *Canterbury*, the Cathedral of which claims the preference before any other in *England*, and is not inferior to some of the best Structures in the World. The 27th. we came to *Graves-end*, and the 28th. to *London*, being met in our way by certain Deputies of the *East-India* Company, who staid for the Presidents coming, at *Black-Wall* with 8 Coaches.

Come into the Channel.

Pass the Isle of Wight.

Come to Dover.

Are like to be cast away.

Come to Canterbury.

To London.

Decemb.

1639. *Decemb.* 30th. I view'd the *East-India* House, and took that opportunity to return thanks to the Directors for the many Civilities I had received at the Presidents hands, and they having made a splendid Entertainment for him that day, I was also invited. The 31st. of *Dec.* and 1st. of *Jan.* we were splendidly treated by some other *English* Merchants, and 2 *Jan.* by Sir *Edmund Wright* the then Lord Mayor of *London* as he was much delighted in the Relation of the many Adventures that had befallen us during our Voyage, so he would needs invite the President and me again the next day; our discourse running again upon the many dangers we had escaped: the Lord Mayor, to shew us that Sea-faring People were subject to such, and often escaped much greater danger, related to us a Story of a certain *Dutch* Seaman, who being for some Crimes condemned to death, his Punishment was changed into that of Banishment into the Isle of St *Helens*, near which they then were; which was done accordingly. This poor Wretch thinking this Solitude insupportable to him, resolved rather to hazard his Life at any rate, than to endure it, and having met with a Coffin, in which a certain Sea Officer had been interr'd the day before, he without more a-do took out the dead Corps, and having out of the upper Board of the Coffin made a kind of a Rudder, put himself into it, and so made out to Sea; as good chance would have it, the Ship unto which he had belonged, was becalm'd at a Lg and a half distance from the Shore, and the Ships Crew perceiving so odd a kind of Vessel floating on the Surface of the Water, thought it had been an Apparition, till coming nearer and nearer to the Ship, they stood amazed at this unaccountable boldness of the Man, who had ventured so far in a or 3 pieces of Boards, and that without being assured whether he should be received or not; it being put to the question, it was at last concluded he should be taken aboard, which was done accordingly, and return'd to *Holland*, where he lived afterwards in the Town of *Horn*.

1640.

A strange adventure of a Dutchman

He gave us another instance of this kind in an *English* Man, who being taken by a *French* Privateer in the Pacquet Boat going from *England* to *Dublin*, was freed from the Privateer by a sudden Storm, which parted them; but soon after also split the Pacquet Boat against a Rock on the Coast of *Scotland*, opposite to that of *Ireland*. This *Englishman* with another of the Crew happened to be cast ashore among the Rocks, where they made a-shift to erect a Hut out of some Boards belonging to their Ship; they lived upon the Sea Mews they catch'd, which they dry'd in the Sun and so eat them raw, as also upon certain Eggs they found in the Crevices of the Rocks, which kept them from starving, but their greatest want was fresh Water, of which they had none but what the Rains blessed them with. They continued in this condition 6 Weeks, at the expiration of which the *Englishman* awaking in the Morning, miss'd his Companion (whom he supposed to be fallen from the Rock through carelessness) the only comfort of his life in this Solitude, which almost put him to despair, especially when the approaching Winter made every thing appear with a more doleful Aspect than before; his Hut being covered with Snow, he made the hardest shift in the World to sustain himself, till after a miserable life of eleven Months some Seamen belonging to a *Flemish* Ship commanded by Captain *Peckman* (famous for his Art of getting the great Guns of the *Spanish Armada* forc'd upon the Coast of *Scotland* and *Ireland*, 1588, out of the Sea) and forc'd by Tempests upon that Coast, as they were looking for Eggs, discovered this poor Wretch, whom at last with much entreaty they took into their Vessel, being all black, hairy, and meager, more like a Specter than a Man, and having given him what refreshments the Ship afforded, set him ashore at Derry in *Ireland*, from whence he afterwards return'd into *England*.

Another instance of this kind in an *English* Man, who being taken by a *French* Privateer in the Pacquet Boat going from *England* to *Dublin*

A strange Resolution of 4 Christian Slaves

Another Relation he was pleased to give us of a most surprizing Resolution of 4 Seamen, who being taken by the *Algerines*, and one of them being a Carpenter, they resolv'd to make a small Boat, and venture in it in the open Sea, in order to their Deliverance; accordingly having secretly made what Preparations they could for the execution of this design, they took off five Boards from the Store-room, 2 whereof were employed for the Bottom of the Boat, 2 more for the Sides, and the 5th, for the Prow and the Poop, their Quilt serving for Tow; the Boat being well Pitch'd, and the appointed time come, they found that their Boat was so little, as not to be able to bear above 2, so that two of the Confederates were obliged to stay behind, the other two being an *Englishman* and a *Dutchman* persisting in their Resolution to go forward, let it cost what it would; accordingly having found means to provide a pair of Oars, a piece of a Sail, and a slender Portion of Bread and fresh Water, they boldly put to Sea, having neither Compass nor Astrolabe, so that being overtaken by a Storm, they were forc'd to go where the Wind would carry them, their chief business being to cast out the Water, which continually came into the Boat, and soon spoil'd what little Bread they had; which together with the want of rest, had brought them so low, that they were scarce able to stand upon their Legs; in this miserable condition Chance brought them to the Coast of *Barbary*, where lighting on some Wood that served them to refit and enlarge their Boat, which they had no sooner done, but being in manifest danger of being kill'd by the Inhabitants, were forced to chuse the Main Sea a second time, and at last after being tos'd up and down in the Sea for 10 days, were cast upon the *Spanish* Coasts near the *Cape of St. Martin*, betwixt *Alicant* and *Valentia*, where being civilly entertain'd by the Inhabitants, they after came into *Eng*

The 5th of *January* I saw the King of *England* touch many Persons that were afflicted with the Evil, and the Ceremony be-

ing over, my Lord *Strafford* did me the honour to introduce me to his Majesty to kiss his hand, and afterward to the Queen, both their Majesties at several times after being pleased to bestow some time in hearing my Relations of my Travels, especially of those into *Persia* and *Muscovy*. During my stay of 3 Months in *England*, I spent part of my time at Court, and the rest in taking a view of what was most worth observation in *London*, and the circumjacent places, such as *White-Hall*, St. *James*, *Hampton-Court*, *Westminster Hall*, and the *Abbey*, *Greenwich*, the *Tower*, *&c.* and having by this time sufficiently recovered my self of the fatigues of so tedious a Voyage, and received the Money I expected from my Native Country, I left *London March* the 20th. and taking Water for *Gravesend*, went thence to *Rochester*, and coming the 24th. to *Dover*, embark'd the 25th for *Dunkirk*, where I arrived the same Day. 1640. The Author leaves *London*.

The 26th. I continued my Journey thence to *Newport*, where I staid that Night, and came the next Day to *Bruges*, and the 29th to *Ghent*, where I staid only till the 1st. of *April*, when I prosecuted my Journey to *Brussels*, the Capital City of the Province of *Brabant*; after a stay of 2 Days at *Brussels*, I came the 5th. to *Louvain*, and travel'd the same Day 4 Lgs further, to *Mechlin*. Thence I prosecuted my Journey the 6th to *Antwerp*, where I staid 2 Days, and the 9th. and 10th. travel'd to *Breda*, where having spent the remainder of that Day, I made 5 Lgs the next to *Bois-le-duc*, or *Bolduc*.

The 12th. I set again forward for St. *Gertrudenburg*, whence I took Boat the same Day, for *Rotterdam*, where I arrived the 13th. and continued my Journey the same day for *Delft*, and so further through the *Hague*, by the way of *Leiden* to *Harlem*. This City which is the biggest next to *Amsterdam*, in the Province of *Holand*, challengeth the Glory of the Invention of the Mystery of Printing, by one of its Inhabitants named *Laurence Coster*, who in the Year 1420. first made the Characters of Beech Wood, and afterward having found out also the Ink that to this Day is used by Printers; he changed the Wooden Characters into Leaden ones, and having at last made them of Tin, he brought the whole to perfection 1440. in Memory of which the Senate of *Harlem* have caused this following Inscription to be set over the House he lived in. *Harlem.*

Memoriæ Sacrum, Typographia, Ars Artium omnium Conservatrix nunc primum inventa circa Annum MCCCCXL.

Leaving *Harlem* in the Evening I came the same Night to *Amsterdam*, of which Place having heard so much in the *Indies*, I resolved to spend some time in taking a view of it. The first thing that surprized me the next Morning, was, that vast number of People which so crouded the Streets, that a Man could not pass unmolested, but when I came to the Port, I stood amazed at the prodigious numbers of Ships which appeared at a distance no otherwise than one continued Forest, especially when I was inform'd how many Ships were abroad at that time, bound to all parts of the World, and that I saw every Day a considerable number go to their own and other adjacent Coasts. The vast Stores brought thither from all, even the most remote parts of the World, especially in the House of the *East-India Company*, made me imagine no otherwise, than that all what I had seen in my Travels through so great a part of the Globe, was all center'd in this place; there being such prodigious quantities of Spices, Silk, Porcelain here, that *China* and all the rest of the *Indies* seem'd to have exhausted their Store-houses to lay them up in this City. It was in the Year 1595. that the *Dutch*, by the encouragement of a certain Merchant, whose Name was *Cornelius Houtman*, and who had lived for a considerable time in *Portugal*, undertook the first Voyage to the *East-Indies*, along the *African* Coast; their design of finding out the Northern Passage having proved abortive; this first Voyage did not answer the expectation of the Merchants, notwithstanding which they sent 8 Ships more thither, 1598. and 1599. another Squadron, but by different People, so that for fear of the destroying this so profitable Trade, a Charter was granted to all the Persons concerned, 1602. for 20 Years, and six Chambers erected, *viz.* at *Amsterdam* consisting of 20 Directors, *Middleborough* for *Zealand* 12 Directors, at *Delft* and *Rotterdam* for the *Meuse*, at *Horn* and *Enkhuisen* for *West-Friesland*; these 4 last consisting each of 7 Directors. According to the same Charter the City of *Amsterdam* was to defray one half of all the Charges, and to send 8 Deputies to their General Meetings, that of *Zealand* one 4th. part, and to send 4 Deputies to their General Meetings; and those of the *Meuse* and *West-Friesland* one half quarter each, and to send 2 Deputies each. *Amsterdam.*

Their Original Stock did amount to 6600000 *French Livres*, which was improved to that degree, that in the Year 1613. the Persons concern'd had gain'd 260 upon the Hundred, and the next Year the Profits were more considerable. The Regularity of the Streets and Water Channels, and the neatness and splendor of the Bridges and Houses of *Amsterdam* is not to be imagined, except by those who have been Eye-witnesses of it, especially those in the New Town, many of which are rather to be called Palaces, than the Houses of Private Persons. Among the Publick Structures the old and new Churches are worth Observation, and if the Town-house be compleated, according to the Draught I saw of it, it will beyond question vie with any of the Noblest Structures in the World, and the *Exchange* of *Amsterdam* surpasses that of *London*, in the number of People that daily resort thither, as it does that of *Antwerp* in Magnificence? not to mention here the Gates of the City, and its 3 Sluices which can't be match'd in the World, the Publick School, College, Arsenal, Play-House, Anatomy-Hall, and other Publick Edifices, which deserve the Travellers peculiar Observation. But to come to a conclusion of my Voyage, after a stay of 8 Days at *Amsterdam* I took Shipping for *Hamburgh* the 23d. of *April*, where I arrived safely the 28th. and after I had rested my self there for one Day and Night, continued my Journey to *Gottorp*, which I reach'd the 1st. of *May*, and had the honour to be admitted to their Highnesses the Duke and Dutchess of *Holstein*, unto whom I gave a more account of the success of my long and toilsome Travels. CHAP.

The Earl of Carliſle's *Embaſſy from King* Charles *the* II. *to the Great Duke of* Muſcovy; *and to the Kings of* Sweden *and* Denmark, *in the Years* 1663, *and* 1664.

CHAP. IV.

A Relation of the Firſt Embaſſy into Muſcovy.

1663. KING *Charles* II. was no ſooner Reſtored to his Dominions, but moſt of the Chriſtian Princes being very deſirous of his Alliance, ſent their Ambaſſadors to *London*, to Congratulate this Prince upon his happy Reſtauration. Amongſt thoſe the preſent Czar of *Muſcovy Alexis Michaelowitz*, as he had ſhewn a ſingular abhorrency of the Murther of K. *Charles* I. by aſſiſting our preſent King with money, ſo he had ſent a ſplendid Embaſſy hither, which was received with all the moſt ſingular marks of Honour and Friendſhip; It was on account of this Embaſſy and thoſe from the two Northern Crowns, which arrived in *England* much about the ſame time, that his Majeſty of Great *Britain* reſolved to ſend *Charles* Earl of *Carliſle* his Ambaſſador to *Alexis Michaelowitz*, *Czar* of *Muſcovy*, and afterwards to the Kings of *Sweden* and *Denmark*: tho' it muſt be confeſt, that his buſineſs in the *Ruſſian* Court was not a bare Compliment only, but intended for the *Recovery of the Privileges of the* Engliſh Ruſſian *Company*, granted to them by the famous *Ruſſian* Tyrant, *Juan Baſilowitz*, by vertue of which *they uſed to Traffick at Arch-Angel without paying any Cuſtoms*, which being taken away from them by the preſent *Czar*, on occaſion of the late Rebellion," (in which they were ſuppoſed to have had their ſhare) K. *Charles* II, after the *returning of his Subjects to their Allegiance*, did expect no leſs from the *Czar*'s generoſity than the re-eſtabliſhment of thoſe Priviledges, which were the *Baſis of the ancient Friendſhip betwixt the two Crowns of* England *and* Muſcovy; in which however he found himſelf miſtaken in the end.

The Earl of Carliſle ſent Ambaſſador to Muſcovy, Sweden, and Denmark.

The Earl of *Carliſle* being a Perſon of a very Majeſtick Stature and Deportment, and of great Vivacity in all his Actions and Diſcourſe, ſcarce then exceeding the Age of 36. was a Perſon abſolutely well Qualifyed for ſo conſiderable an Employment, his Train conſiſting of 80 Perſons; among which were 10 Gentlemen, 6 Pages, 2 Trumpets, 12 Footmen; one Chaplain and a Chirurgeon, 6 Muſicians, ſeveral Interpreters and Tradeſmen that were neceſſary for ſuch a Journey. For, beſides his Liveries, which were made at *London*. Beds and Chairs, nay, all Kitchin moveables were to be provided. As to other things it being the Cuſtom for the *Czar* to furniſh all Foreign Ambaſſadors with as ſoon as they enter his Dominion; His Majeſty of Great *Britain* had alſo bin pleaſed to preſent the ſaid Earl with a Red Damask Canopy Edged with a Gold and Silver Fringe, Embroidred on the back with the Kings Arms in ſilver, and a Rich Chair of ſtate with its footſtool. Thus prepared we Embark'd in *July* 1663. but before we come to the particulars of our Voyage, it will not be beyond our Scope to give you a general ſcheme of its whole extent, which was 1800 Lgs; to wit, upon the Northern Seas betwixt *London* and *Archangel* 750. from thence to *Vologda* up the Rivers *Dwina* and *Sucagna* 250. and from *Vologda* to the City of *Muſco* 100 Lgs by Land, which in all amounts to 1100 Lgs. In our Return, from *Muſco* to *Riga* the Capital of *Livonia* 250 Lgs. moſt part by Land; from thence to *Stockholm*, the Reſidence of the *Swediſh* Kings, 100 Lgs. upon the *Baltick*; from thence 100 Lgs more by Sea to *Copenhagen* the chief City of *Denmark*; and from *Copenhagen* to *London* at leaſt 250 Lgs. Two Veſſels being appointed for our Voyage, one a Man of War of 50 Guns, the other a Merchants Ship, 32 of his Excellencies Domeſticks, of which number I was one, a great part of the Baggage, the preſent deſign'd for the great Duke, and Eight Coach Horſes were Embark't aboard the Laſt at *London*, from whence we did fall down to *Graveſend*, where whilſt we were Riding at Ancher, one of our Company had an unlucky fall, of which he however recovered ſoon after, and his Excellency for his better conveniency having taken him into his Man of War, he Married one of our Maid ſervants, whilſt we were at *Muſco*.

The Train of the Ambaſſador.

Their Voyage from London to Archangel.

1663. The 15th *July*, we ſet Sail from *Graveſend* with a favourable Gale, but ſcarce had we loſt the River *Thames*, when the wind turning violent and contrary upon us, put moſt of us who were not acquainted with the watry Element, under no ſmall conſternation.

Set ſail from Graveſend.

The 21*ſt*. We were ſomewhat refreſh'd by an agreable Calm, and had the diverſion of a great Porpoiſe, plunging and leaping about our Ship; but our joy was ſoon allay'd by a ſucceeding Storm, which blowing with great violence from the N. E. for three or four days, at laſt forced us upon the Coaſt of *Norway*. We entreated the Maſter of the Veſſel to ſhelter himſelf hereabouts, till the Wind might prove more favourable; but he alledging on his behalf theſe advanced Seaſons which would not admit of any delay, reſolved to purſue his Voyage in ſpite of the oppoſition of the Winds.

Violent Storms.

The 26*th*. The violence of the Wind was ſuch, that it blew down the Scuttle of our Main-maſt, tore our Main-ſails, and broke one of our Maſts. This was a very terrible ſpectacle to us that were unacquainted with ſuch like accidents at Sea. But our fear was not a little allay'd, when we found the Maſter turning to the Weſt, and ſtanding for *New Caſtle*, to refit his Ship, every one being overjoy'd at the hopes of finding ſome comfort aſhore, after ſuch terrible ſufferings, tho' we were forced to go above 300 Lgs. backwards. But this joy was but of ſhort continuance, for the next day about Noon we were becalm'd in ſight of the Mountains of *Cheviot* in *Scotland*, and towards Evening the Wind turning to the South, with a gentle Gale, the Maſter at the perſwaſions of the Carpenters, who promiſed to mend the Maſts, ſo as that they ſhould hold out to *Archangel*, turned his back again upon *New Caſtle*, and when we were within 6 or 7 Lgs. from the *Engliſh* Shore, diſappointed us in all our preſent hopes. The next Morning, whilſt the Carpenters were ſtill employ'd in repairing the Scuttle and Maſt; the Wind turned again to the N. E. with ſuch violence, that we expected every hour to be loſt. Some of his Excellencies Gentlemen began then to expoſtulate with the Maſter, but in vain, he perſiſting in his former reſolution, till at laſt on the 29*th*. the Bolt-ſprit being blown down, he ſaw himſelf under an unavoidable neceſſity of making what Sail he could towards *New-Caſtle*, but were by ſtreſs of Weather forced into *Burlington Bay* in *Yorkſhire*. Whilſt we were refreſhing our ſelves here, after ſuch terrible fatigues, Mr. *Watſon*, who had the chief direction of our Company, was commanded away by General *Monk*, to aſſiſt in the ſuppreſſing of a *Fanatick* revolt in the North, (he having a Command in his Majeſty's Guards) juſt as he was preparing to go aboard again.

Are forced into Burlington Bay.

The 8th *Aug*. we ſet Sail again with a favourable Wind, ſo that from the 11 to the 16 we made near 400 Lgs, leaving *Shetland* the 12. to the Leeward.

The 20 and 21 proved Fogs, but then the Weather was clear, the time betwixt Sun-ſetting and Riſing, was a continual Twy-Light.

1663. The 22d we diſcryed the Iſles of *Ruſs* and *Gromland*, covered all over with Snow, the 26 ſteering our courſe S. East, we advanced towards the *North Cape*, and keeping near the Coaſt of *Lapland*, in a few days after found our ſelves in ſight of *Lapland*.

The 2d *Sept.* we ſaw a vaſt multitude of Fiſhes, and among them a great Whale, at about two or three Leagues diſtance, about noon Sailing along with a gentle breeze, we got ſight of the Men of War, which had carried the Ambaſſador to *Archangel*, and were inform'd by them, that the *Czar* having given us over for loſt, he reſolved to begin his Journey the 8th. *Sept.* for *Vologda*. We were then 60 Leagues from that Port, and the next day were forced to come to an Anchor towards to point of *Ortogones*. Five or ſix of our Ships Crew got a Shoar to get ſome fewel, of which we ſtood in great need, brought, along with them a wooden Croſs they had cut down, and a bottle of delicious Water, they had met with at a Rock near the Sea ſhoar, of which the Maſter order'd two or three Tun to be fill'd.

The 4th. The Wind veering about, we eſcap'd narrowly being loſt among the Rocks, being forced by the Tide towards the Shoar; the Maſter ſtriving in vain to diſentangle the Ship from amongſt a whole ridge of thoſe Rocks, in the midſt of a furious Tempeſt cries, *All is loſt*; which made every body prepare to get a Shoar; But whilſt we expected every moment to be daſh'd to pieces, we with incredible Labour got clear beyond all our hopes, and doubling the Cape of *Ortogones*, reach't *Cathneſs* the ſame night, having ſail'd that day above 40 Leagues.

They come before *Archangel.* The 5th. *September* was the happy day, when we arrived before *Archangel*, but at the entrance where the *Dwina* diſembogues into the Sea, where we were again in great danger of running aground, by reaſon of the ſhallowneſs of the Sea, which is not above two or three foot deep here; ſo that we were forced to continue there till the return of the tide in the Evening, after which we arrived ſafely in three hours at *Archangel*, where we were joyfully received by our Companions.

The Ambaſſadors Voyage and Entry. The Ambaſſadors Voyage had proved much more Succeſsful than ours, for whereas we ſpent Seven Weeks, his Excellency made the whole Voyage betwixt *London* and *Archangel*, being 750 Lgs. in leſs than a Month, *viz.* from the 22d. of *July.* to the 19. *Aug.* Immediately after his arrival at the Barr of *Archangel*, having ſent word thereof to the Governor, by Mr. *Marvel* his Secretary, he was conducted to the Caſtle by ſix Gentlemen, through a Regiment of 600 Men, and the next Day ſixteen Boats, with a guard of 400 Men, under the Command of a Colonel, were ſent to bring his Excellency aſhore. The 23d. the Ambaſſador made his entry into *Archangel*; beſides the before mentioned ſixteen Boats, a very fine Barge was equipp'd, richly furniſh'd for the Ambaſſador, and ſeveral others adorn'd with Tapeſtry, came to meet and to conduct him into the Town; where he was Saluted by the *Engliſh* and *Dutch* Men of War, and Merchant Ships then in Harbour: At his Landing on the Wooden Bridge, he was received and Complemented by a certain Colonel, call'd *Bogdan*, who declar'd himſelf to be appointed his *Priſtaff* (ſo they call thoſe, who receive Foreign Ambaſſadors, and provide for their paſſages and other neceſſaries.) His Excellency having returned his Compliment, began to advance towards the Houſe prepar'd for his Entertainment, but to his great aſtoniſhment found the *Priſtaff* ready to take the right hand; upon which his Excellency told him, that he acknowledged to have received great Civilities hitherto, but that it was not in his Power to give that place to him, without derogating both from himſelf, and the Honour of his Majeſty of *Great Britain*, who had ſent him. *Bogdan* having no other Plea than the Governours orders, intreated his Excellency to ſtay a little, till he could ſend a meſſenger to the Governor, at whoſe return the *Priſtaff* took the left (he having continued bare headed all the while, though the Ambaſſador was covered) and ſo conducted his Excellency to his Lodgings; But before I proceed to give you a further account of our abode at *Archangel*, and our Journey to the City of *Muſco*, it will I ſuppoſe not be diſagreeable to give you a ſufficient account of this Country.

Deſcription of *Muſcovy.* *Muſcovy* is properly the name of one Province only, of which *Muſco* is the Capital City; but in general is taken for the whole *Ruſſian* Empire. This Country is part of the ancient *Sarmatia Europea*, call'd by ſome *Ruſſia* or *Roxolaria*, from whence the Inhabitants have got the name of *Ruſſians*. The *Muſcovite* Empire is without all contradiction the greateſt of all *Europe*; its whole extent both in *Aſia* and *Europe* being 30 Deg. or 600 Lgs. and its Latitude above 300 Lgs. To the North it is encompaſs'd by the Frozen Sea, beyond the *Artick* Circle, to the East by the great River *Oby*; On the South ſide it borders upon the *Crim* and *Precopian Tartars*, and on the Weſt upon *Livonia*, *Poland* and *Sweden*. It is a Champain Country, beautified with vaſt numbers of Trees, Lakes and Rivers, which render it infinitely Pleaſant. 1663.

Its Rivers. The River *Wolga*, call'd the *Rha* by ſome, and by the *Tartars*, *Edel*, is the fineſt in all *Europe*; it ariſes from the Lake *Tronoe*, in the Province of *Roſcovia*, and paſſing for ſome Lgs. farther into the Lake of *Wolga*, (from whence it has borrowed its name,) diſcharges it ſelf into the *Caſpian* Sea near *Aſtracan*, being the common boundary betwixt *Aſia* and *Europe* on that ſide. From its ſource to its mouth is a tract of 1000 Lgs. and being inlarged by moſt of the Rivers of *Muſcovy*, which fall into it, it is according to Mr. *Olearius* 4500 Geometrical Feet broad near *Nice*. The river *Boriſthenes*, the boundary betwixt *Muſcovy* and *Lithuania* takes its Source likewiſe in the Province of *Roſcovia*, and diſembogues in the *Euxin* Sea. The River *Dwina*, which in its paſſage is encreaſed by the Rivers *Conſtans*, *Jagel* and *Sucagna*, diſcharges it ſelf about 7 Lgs. from *Archangel* into the *White Sea*. There is another River of the ſame name, which riſing not many Lgs from the River *Nieper* or *Boriſthenes*, from a Lake that has given it its Name, Diſembogues into the *Baltique*, about 4 Lgs. from *Riga*. The vaſt River *Oby* takes its firſt ſpring from the Lake *Cataiſco*, and falls into the Frozen Sea; it is ſo broad at the mouth, that with a fair wind it can ſcarce be croſs'd in a Day. Beſides theſe, it has the *Muſca*, the *Occa*, and ſeveral other Rivers, which for the moſt part loſe themſelves in one or other of the great ones; Brooks, Pools and Lakes are in ſuch abundance here, that one can ſcarce Travel four or five Lgs. without meeting with ſome of them.

Climate. The Climate of *Muſcovy* is exceeding Cold, and conſequently ſubject to moſt violent and long Froſts; tho' about *Muſco* and the other Southern Provinces the Winter continues not above ſeven Months; whereas in the Northern and Eaſtern parts, eſpecially in the Province of *Petzora*, bordering upon the Frozen Sea, their Winter begins before *Auguſt*, and continues till *May*. The cold is ſo exceſſive even in the moſt Souther Provinces of *Muſcovy*, that nothing is more common than to meet with People, who have loſt their Ears, Lips, Hands or Noſes by the Froſt, and to ſee the Earth cleaved as much as in a great Drought; and to paſs over a River and Lake, which had not the leaſt appearance of Ice in it but 24 hours before. However theſe ſtrong Froſts exempt the *Muſcovites* from Epidemical Diſtempers, wherewith moſt of the hot Climates are frequently afflicted; for, though the Heats in the Summer are exceſſive here, yet are the ſame allay'd by the cool Nights; the worſt is, that the Whaſps and Flies engendred in the Pools, and Marſhes, make the Summer ſeaſon very troubleſome.

Its Product. *Muſcovy* abounds in Corn, Graſs, and all other things requiſite for the ſubſiſtence of Men and Beaſts; ſo that conſiderable quantities of the firſt, are expected from thence into *Holland*. In the Southern Provinces, their Seed time is in *April*, in the Northern parts not till *May*, notwithſtanding which their Harveſt is in *Auguſt*, the length of the Days (being eighteen Hours) and the cool dews at Night, contributing much to the growth and ſudden maturity of the Corn. Thus Beef, of which they have great plenty, is exceeding good, but there Mutton but indifferent. Of Dear, Wild Boars, Elks and Hares, they have great plenty, the laſt are Grey in the Summer, and turn White in the Winter. Of Pheaſants, Partridges, Wood-Pigeons, Geeſe, Quails, and other Pidgeons, they have ſuch ſtore that they neglect Thruſhes, Larks, Feldefairs, and ſuch like ſmall Birds, in which their Foreſts abound.

About *Archangel* you ſee certain Birds of Prey, white all over. Their Rivers, Lakes and Pools, furniſh them with incredible quantities of Fiſh; the *Wolga* affords them vaſt multitudes of Sturgeons, of whoſe eggs they make what they call *Ikari*, and the *Italians*, *Cavayar*, being a Paſt made of theſe Eggs with Salt; this they eat with Vinegar, Oil, Pepper and Onions, in the nature of a Sallad; the *Czar* Monopolizes this Commodity. Neither do they want Pulſe and Pot-herbs, but it is not many years ſince Sallads, Aſparagus, Sweet-Herbs and Flowers have been tranſplanted thither. Garlick and Onions are like their Daily Bread in Lent-times, and they abound in Melons, Cucumbers and Gourds; I have been credibly informed, that (like thoſe mentioned by *Olearius*) they move from the place where they firſt grow, dry up the graſs where they turn, and when ripe, the ſtock withers, the Velvet Down which

1663. which grows on the ridd, being afterwars prepared into a kind of Furr. Theſe Gourds are often met with neat *Samara*, betwixt the *Woga* and the *Don*. They have alſo tolerable good Apples, Plums and Cherries, but no Walnut Trees, or any other Fruit which requires a continued moderate heat for ripening. Straw-berries are here very plentiful, and a kind of Gooſe-berries, which grow cloſe upon the ground, and don't ripen till Autumn: neither do they want Mulberrries and Raſberries, and ſuch plenty of Honey, that beſides what Wax they conſume at home, above 20000 Quintals is Yearly exported. Of this Honey they make their Mead, call'd *Meoudy* by them, which is their ordinary Drink; they mix the raw Honey with warm water, which they ſtir frequently with a ſtick, and after it has ſtood twelve hours, they boil, ſcum and drain it; ſometimes they add Strawberries, Cherries, Mulberries and Rasberries; *Quaz* the ordinary drink of the common People is a kind of ſmall Mead, of no ungrateful taſte; beſides which, the better ſort make a kind of ſtrong Beer, which they preſerve in their Snow-Houſes; Hemp, Flax and Leather, they have in ſuch abundance, that great quantities of them are every Year exported by the *Engliſh* and *Dutch*; Vines and Cloth they have none except what is very courſe, for the uſe of the Peaſants, the defect of which is ſufficiently ſupply'd by the *Engliſh* and *Dutch*, who provide them with fine Cloaths, Wines and Brandies.

Their Houſes. As they have vaſt plenty of Wood, and great ſcarcity of Stone, ſo their Houſes are for the moſt part built of Wood. The greateſt miſchief is, that they are very ſubject to fire, which ſometimes conſumes whole Towns at once; but theſe damages are ſoon repaired in *Muſcovy*, where the Houſes are no more than many pieces of Firr pile'd upon one another, plaſtered up with ſome Moſs, covered with the barks of Trees, or Turf; and their furniture ſo mean, that beſides a few earthen diſhes and wooden Utenſils, they have nothing to loſe in theſe conflagrations; their windows are very ſmall, and the whole building low, thoſe of the peaſants having not above one or perhaps two rooms, where the whole Family is lodged amongſt the Cattle. The beſt conveniency in the winter, are their ſtows, but as the vulgar ſort make uſe of no Chimneys, the ſmoak paſſes out through the windows.

Their Garriſh. Their Foreſts being full of Beaſts of Prey, theſe furniſh them wherewithal to protect themſelves againſt the extremity of the winter ſeaſon. The skins of Otters, Martins, Foxes and Hares, are uſed for that purpoſe, not to mention thoſe of a higher value, ſuch as the black Foxes, Sables, Beavers, Ermines and graſs Squirrels. The skins of the white Bears are in great eſteem among the *Muſcovite* Nobility, who uſe them for an ornament of their ſledges, as they do the common Bears skins for conveniency; theſe laſt being in ſuch numbers here, that they make the High-ways very unſafe in the Winter, and ſometimes in troops fall upon a whole Village. The Wolves are no leſs troubleſome; they have alſo ſome white ones, but very rarely. There is a certain kind of a water-Rat in *Muſcovy*, the Skin of which is of ſo odoriferous a ſcent, that they lay it amongſt Cloaths.

Their way of Travelling. They travel with a great deal of conveniency in *Muſcovy*, eſpecially in the Winter, when their ſledges are drawn along with incredible ſwiftneſs in a flat Country; theſe ſledges are made of the bark of the Linden tree, fitted only for one Perſon, they line them with felt, to make them warm, and being open on the top, they cover and wrap themſelves in Furrs. The Carter manages the ſledge, who warms himſelf ſometimes by running, ſometimes by the help of his bottle of *Aquavitæ*, if they happen to overturn, the fall ſeldom proves dangerous, the ſledges being very low; though the Ladies ſledges, which are higher built are ſubject to more danger. This way of Travelling is both convenient and expeditious, becauſe a Man may travel 100 Lgs. in three Days and Nights, the eaſie motion of the ſledge rather favouring than diſturbing ones repoſe; in the Summer they travel both by Land and by Water; by Land you go either on Horſeback, or in Coaches and Waggons, the roads being very broad and well kept all over *Muſcovy*. By Water they make uſe of certain ſmall Boats, being only a trunk of a tree hollowed out; theſe being very light, they row in them, ſtanding over the Rivers and Lakes, but if they are not well trim'd, they are very apt to overturn; they alſo make certain floats of pieces of Firr join'd together, and uſe them upon the Rivers inſtead of Boats. The worſt inconveniency in their Travellings, is, that having no publick Fairs in the Country, they are obliged to carry their proviſions and other neceſſaries along with them; which is the reaſon that the Merchants trading to *Moſcow*, have their own houſes at *Vologda*, and therefore the moſt commodious way for ſtrangers is, to travel along with them; the prodigious ſwarms of Whaſps and Flies do alſo much interrupt the pleaſure, one otherwiſe might take in viewing ſo beautiful a Country: We will now proceed to give you a ſhort account of its Inhabitants. 1663.

Their Cuſtoms and Stature. The *Ruſſians* are the ſame the antients call'd *Roxalani* and deduce their Pedegree from the *Greeks* whom they pretend to imitate in many things; perhaps they may have ſo me Relation to the *Sibarites* who were accounted good Drinkers. Their Shape and Complexion approach ſomewhat to the *Germans*, and ſo do their Beards, a great Beard being conſidered here as a token of virility. Their *Boyars* (Noble men) alſo make great account of a large Belly, but they all cut their Hair cloſe to their Heads; except upon ſome extraordinary occaſions, as for inſtance, when a Perſon of note is faln into diſgrace with the *Czar*, he lets, (in imitation the of ancient *Greeks*) his Hair hang down over his ſhoulders, in token of his Affliction. Their Clergy wear always long Hair.

The *Muſcovite* Women are of a middle ſize and well featur'd, but they paint ſo much and ſo groſsly, that what other Women do for an encreaſe of their Beauty, theſe may be ſaid to uſe it as a concealment. The married Women put up their Hair under a Coiſe, but the Virgins wear them twiſted in two Treſſes upon their backs. They alſo imitate the *Greeks* in their habits, which is a Robe reaching down to the Feet, with ſtreight ſleeves of the length of the whole Robe, which they pleat together upon their Arms; theſe long ſleeves, ſerve in the Winter inſtead of Muffs, and ſometimes to hide their Cudgles, Stones and Daggers in, when they have a deſign of ſetting upon any body. They reach down to their Knuckles. Perſons of Quality have theſe Robes of Sattin, Damask or Cloth of Gold; indifferent Perſons of Cloth of a dark, Violet, Green or Red colour. The vulgar Sort wear thoſe made of a courſe home made Cloth. They are all lin'd with Furs in the Winter, according to every ones Ability, but thoſe lined with Sheep-skin, uſed by the Poor are very offenſive to the Noſtrils. Under theſe they wear *Juſte-au Corps* or a kind of cloſe Veſts reaching to the Calfs of their Legs, open before, with Gold or Silver buttons, and large Collars; and under theſe very ſtreight Breeches and Waſtcoats (call'd by them *Caftan*) which reach only to their knees, but have Collars ſomething higher than the Jeſuits Collars; and being very conſpicuous on the back of their Heads, they line them with the beſt Silks, and Embroider them with Pearls and precious Stones. The ſame they doe to their Shirts, the Neckbands, Wriſts and Breaſt of which are Embroidred with Silk, Gold or Pearls. Inſtead of Hats they make uſe of Bonnets of Cloth, with a little ſnip open before and behind, riſing up in the form of a Pyramid; Perſons of Quality wear them of Scarlet Cloth, or ſometimes of Velvet, richly embroidered on the ſides, and lined with the fineſt furs in the Winter; the Vulgar ſort are feign to be contented with a Felt or Cloth cap, lined with ordinary furrs; and theſe ſometimes miſerably patch'd on the outſide, Cloth being a dear Commodity in this Country. The *Muſcovite* Bonnets, having no brims to defend them againſt the Sun and Rains or Snow, are not near ſo convenient as thoſe uſed by the *Poles*, which having brims of paſt-board, covered on both ſides with Furs, are much more commodious, and therefore much more uſed by Foreigners in *Muſcovy*. Boots without ſtops are moſt generally worn by the *Ruſſians*, tho' the boors make uſe alſo of Shooes, made of the bark of Trees, thin wrought and twiſted like our baskets, but inſtead of Stockings they rap a piece of courſe Cloth or Furr about their Legs, and tie it with a pack thread. The main difference betwixt the Men and Womens habits is, that their Robes are ſomewhat larger, and the ſleeves hang ſo looſe to the Bodies, that they can let them hang or put them on as they pleaſe, their ſmock ſleeves are alſo near four Ells long, which are pleated cloſe together to their fingers ends. Their Bonnets are of a fantaſtical ſhape.

Habits.

Robes.

Their Language is a Dialect of the *Sclavonian* as well as the *Poliſh* tongue; for the reſt the *Muſcovite* is not unpleaſant nor very difficult to learn. Their characters they have borrowed from the *Greek*, this being the only affinity that is to be found betwixt theſe two Languages, tho, the *Muſcovites* have increaſed them to the number of forty in their Alphabet.

Language.

Their Humour and Diſpoſition. The *Muſcovites* are very Cunning and Ingenious in their dealing; and as to their conſtitution, they have this remarkable, that the moſt ſudden and violent extremities of Heat and Cold have not the leaſt ill effect upon

1663. upon them, nothing being more common here, than to ſee Children to come from their hot ſtows into the Snow, and to return without the leaſt prejudice to their health; and as beſides this, they are not much uſed to exceſs in their food, they would not be unfit for Wars; if they were brought under good Diſcipline, tho' on the other hand it muſt be confeſs'd that they are much addicted to idleneſs, that unleſs they are forced to it by abſolute neceſſity, they avoid Labour like a Plague. This leads them into another vice, which is Drunkenneſs, a thing ſo common among them, that neither Clergy nor Laity, neither Men nor Women, Young or Old, are exempt from it. The uſe of *Aquavitæ*, the Sovereign remedy againſt the extreme cold of this Climate, for the reinforcement of the Spirits, being uſed by them to ſuch an exceſs, as to turn to their deſtruction: Tobacco had not many Years ago the ſame effect upon them; for the poorer ſort uſed to ſpend all what they had in buying of it, appear'd with their Smoaky breaths before the Images of their Saints, and what was the worſt of all, frequently ſet their houſes on Fire, through their careleſneſs, which made the *Czar* prohibit the uſe of it. Notwithſtanding this it has been more uſed of late Years, than it was ſome time paſt, the Laws againſt the Importers and Sellers, being not ſo ſtrictly put in execution as formerly, and its uſe permitted to ſtrangers. The moſt ordinary concomitant vices of Drunkenneſs, being Laſciviouſneſs, and Quarrelſomneſs, theſe are very conſpicuous amongſt the *Muſcovites* of both Sexes; nothing is more common than to hear them raving in their quarrels, and upbraiding one another with Inceſt, Sodomy, and ſuch like other abominable Crimes; to be ſhort, they uſe ſo little civility among themſelves, that no wonder, if they are ſo ſparing of it to Strangers, unleſs it be upon a proſpect of gain, when they are very free with their Caps, and the vulgar ſort will beat the very ground with their Foreheads, a way of Saluting they conſtantly uſe to the Nobility and their Magiſtrates, which with the extraordinary conceit they have of the Power and Greatneſs of the *Czar*, makes them ſo ſupercilious to Strangers, that they ſcarce ever think them ſelves ſufficiently reſpected, ſo that it requires the greateſt prudence and circumſpection in the World for a foreign Miniſter to preſerve the Honour of his Maſter untainted among them.

Their manner of Living.

Tho' *Muſcovy* is one of the moſt Fertile and Plentiful Countries in the World, its Inhabitants being from their Infancy inured to a ſlaviſh hardſhip, live very meanly, no exceſs being to be ſeen here, but drinking. Perſons of Quality are furniſhed with the neceſſary ſubſiſtence for their Families, from their Farms; the common People living for the moſt part upon Peaſe, Turneps, Cabbages, Coleworts, and Cucumbers, freſh or pickled, beſides ſome Fiſh. Onions and Garlick are their daily Sallades; Fleſh is not much eaten here, the greateſt part of the Year being taken up with their Faſts, and their Butter and Cheeſe are very bad. Thoſe that can afford it, ſcarce ever ſit down or riſe up from Table without a good cup of *Aquavitæ*, into which they often put a conſiderable quantity of Pepper, to promote digeſtion. Their ordinary drink is *Mead* and *Quaz*; they have a conſtant cuſtom of ſleeping after Dinner, when the Tradeſmen ſhut up their Shops, and Perſons of Quality will ſpeak with no body, who indeed are the only perſons that uſe Beds or Quilts, the reſt contenting themſelves to lie upon benches of Firr, near the Stoves in the Winter, and in the Summer upon the ground. The Peaſants uſe thin chips of Firr inſtead of Candles, which give a good light, but are ſoon conſumed. One of the moſt commendable cuſtoms among the *Muſcovites* is, that the Women pay a great deference to their Husbands, and live extremely retired; tho' otherwiſe they are uſed with more ſeverity than is conſiſtent with good nature, the *Muſcovites* looking upon them no otherwiſe than neceſſary evils, and treating them little better than Slaves; this reſervedneſs is more ſtrictly obſerved among the Virgins of noble deſcents, who never appear unveil'd, and are frequently married before the Bridegroom has ſeen their Faces; ſo that it often happens that inſtead of a beautiful *Rachel*, he finds himſelf in the arms of a blear-ey'd *Leah*.

Their Baths.

Their Baths are cloſe places, with furnaces, which being heated exceedingly, they throw frequently water upon them, for the excitation of vapours; the benches which are round the room, are above one another, upon which they lay themſelves naked at length, and after they have ſwet ſufficiently, they are well waſhed with warm water, and rubb'd with herbs; and ſo conclude the matter with a good draught of *Aquavitæ*; this being the univerſal remedy of the *Muſcovites* for the preſervation of their Health, there is ſcarce a Town ſo inconſiderable, but what is furniſh'd with ſome of theſe Baths, both private and publick; beſides that, they uſe them by way of Purification for new married People after their firſt cohabiting together. 1663.

Their recreations and exercises.

At their Feſtivals they divert themſelves with cudgel playing and wreſtling, which they perform without quarrelling, tho they lay on one another very often in good earneſt; in the Winter they ſlide upon the Ice with Scates, made of wood, with a long piece of poliſhed Iron at the bottom, which is very ſtrait and turns up at the toes. They alſo divert themſelves by ſwinging in certain Engines, made like a double gallows, in which are faſtned four Seats at an equal diſtance, which by a continual counterpoize goes up and down, and whilſt ſome ſwing up high in the air, the others deſcend near the ground: The Women ſwing with ropes, or elſe put a plank croſs a tree or block of a tree, and ſo toſs one another up and down: Their Muſick ſeldom goes beyond a Bag-pipe, unto which they ſing ſome wretched rune or other; their Trumpets and Kettle-Drums have more noiſe than harmony in them, but their Hautboys uſed by their Infantry, make indifferent good Muſick. Their Dancing is ſo ridiculous, that even the Bears exceed them in this kind; their poſtures being altogether brutiſh, and nothing but certain laſcivious diſtortions with their Hands, Shoulders and back parts, ſo that they appear ſcarce to move one ſtep from their place. We will now proceed to their policy.

Their Policy.

The Government of *Muſcovy*, is not only Monarchical, but alſo Abſolute; the *Czar* being ſole Lord and Maſter over the Lives and Eſtates of his Subjects, ſuch as in Ancient times were the *Aſſyrian*, *Median*, and *Perſian* Monarchs, and at this day the Gran Signior in his Dominions.

The greatneſs of the *Czar*.

The *Czar* being as I told you ſole Lord of this vaſt Empire, gives what Laws he pleaſes, diſpoſes of all Governments, and other Offices, levies Taxes, and in ſhort, Acts as he thinks moſt convenient; from hence it is that he is ſtiled Great Lord, and *Czar*, *i. e.* King or Emperour, and *Velika Knez*, *i. e.* Great Duke. His arms are a double headed Eagle, with three Crowns, ſignifying that of *Muſcovy*, *Caſan* and *Aſtracan* two *Tartarian* Kingdoms. In his Eſchutcheon is alſo repreſented a Cavalier in combat with a Dragon, which is intended either for *Michael* the Archangel, or St. *George*. His revenues are proportionable to his Power; for not to mention his demeſns, which are very conſiderable, he has a vaſt income from the Licenſing of publick Houſes, and five *per Cent* for all Merchandices imported or exported, beſides the vaſt Sums he receives from his Factors, who manage the Caviar and Furr trade in his behalf. But tho his revenues be very great, the ſplendor of his Court, but more eſpecially the vaſt Armies he is forced to keep on foot, and the great Summs he beſtows upon drawing Foreigners into his Service, to match his potent Neighbours, the *Swedes*, *Poles*, and *Crim Tartars*, commonly drain his Coffers to that degree, that upon the commencement of War, he is oblig'd to have freſh recourſe to his Subjects purſes, and to make them ſenſible of the power he has over their Eſtates.

The obedience of his Subjects.

The vaſt extent of his Dominions, and the indiſputable abſoluteneſs he is poſſeſs'd of, together with the ſplendor of his Court, has made ſuch deep impreſſions upon his Subjects, that they glory in their chains, and willingly confeſs themſelves his moſt abject Slaves; to ſhew which, they would look upon it as an impardonable Crime, if a Petitioner ſhould in the *Czar's* preſence name himſelf otherwiſe than with a Diminutive, as for inſtance, *I little* Peter, *the humbleſt of all your Vaſſals, do implore*; and nothing is more common than to hear them ſay, *I have or ſhall have the honour of ſeeing the bright eyes of his Czariſh Majeſty*. This profound reverence as it is inprinted in them from their Infancy, and ſo tranſmitted from Father to Son, ſo it is maintain'd and cultivated by three general Maxims of State.

By what Maxims maintain'd.

The firſt is, that no body under pain of Death, dares to travel into Foreign Countries, unleſs the *Czar's* Factors and Ambaſſadors; for fear that having once taſted the moſt delicious Fruits of Liberty in a Foreign Country, they ſhould not reliſh Slavery after their return home. The natural genius of the *Ruſſians*, fitted as it were for ſlavery, and the vaſt extent of their Country, affords them ſufficient comfort for this reſtraint, which would ſeem inſupportable to others; beſides that it is in ſome meaſure allay'd by the Liberty they have of Converſing and Trafficking with Foreigners in their own Country, which perhaps in time may prove a means to correct in ſome meaſure their Barbarity. And this maxim is ſo ſtrictly obſerved here, that it even extends

1663. extends to all Foreigners, who either have taken ſervice under the *Czar*, or embraced the *Muſcovite* Religion, they being confin'd within the limits of *Muſcovy*. From hence it is eaſie to imagine that they are no great Sea men, few of them except ſome Fiſher-men having the liberty to ſtir beyond the Sea ſhoar.

The ſecond Maxim. The ſecond Maxim made uſe of is, that the *Czar* always Marries one of his Subjects; contrary to what is practiſed by the Princes of *Europe*, who look upon it as a debaſement of their Grandeur; but the *Czars* of *Muſcovy* have always look'd upon this as one of their chief Maxims of State, for fear, that a Foreign Princeſs ſhould introduce ſuch cuſtoms, as might in time prove deſtructive to their abſolute power. Thus the preſent *Czar* (being then but 17 Years of Age) Married 1647. on Shrove Sunday the Eldeſt Daughter of one *Ilia Danilowitz Miloſlauski*, a Perſon, who had but little to boaſt of at that time, except the Beauty of his Daughter.

The third. The third Maxim is their Ignorance, which is ſuch that all their Learning ſcarce ever extends beyond Reading and Writing. It being ſufficiently proved by experience, that Pride and Ambition are generally the attendants of knowledge; the *Czars* of *Muſcovy* have always improved the ignorance of their Subjects, to the preſervation of their blind obedience to their Sovereigns; ſo that as they quietly enjoy, and reſt ſatisfied in the Principles tranſmitted to them by their Anceſtors, they don't diſturb themſelves with ſuch Notions as they ſuppoſe to be above their reach, the greatneſs and ſhape of the Earth, the dimenſions of the Moon, and ſuch like matters are things that never puzzle their Brains; they think it ſufficient for them to know the uſe of things by experience, and to return thanks to the Great Author of them, according to their capacity. They uſe rolls of Paper, like the *Jews* formerly, inſtead of our Books; they glue the leaves together by the ends, with a certain glue they have out of *Siberia*; which they only moiſten with the ends of their Tongues, and by thus joining many leaves, make Rolls of 7 or 8 Fathoms in length.

The adminiſtration of the Government. The great Council of State of the *Muſcovite* Empire, conſiſts of thirty Noblemen or *Boyars*, theſe muſt be always reſident at *Moſcow*; next to them come the *Ockolnitz* (Privy Councellors) the *Dumeny Duorainy* (Privy Councellors of the ſecond Rank) the *Sin Boyarsky*, the Chancellors, and two Secretaries of State. The whole management of the publick Affairs is divided into ſix Claſſes or Chambers; the firſt for Foreign Affairs; the ſecond for Military; the third for the Exchequer and the *Czar*'s Treaſury; the fourth for the *Czar*'s Factors, and the Commiſſioners for Licenſing the Publick Houſes; the fifth for Civil Cauſes; the ſixth for Criminals. The *Czar* changes the Governours of his Provinces every three years, and holds commonly Council in the night. Their Law-ſuits are ſoon diſpatch'd here, ſo that the Lawyers are in as little requeſt in *Muſcovy*, as the Philoſophers.

Their puniſhments. Beſides ſeveral other Puniſhments, they have one call'd *Batteski*, not unlike that mentioned in the 25 chap. of *Deut.* they lay them flat upon the Belly, after they have ſtrip'd them to the Shift, and two Men being placed on each ſide, they give the condemned Perſon 16, 20, or 30. blows more or leſs with a Cudgel, according to the orders of the Judge; this is done for Pelfring, Rioting, or ſuch like Crimes; and after he has ſuffered Puniſhment he riſes and makes a low reverence to the Judge: This kind of Puniſhment is alſo much inflicted upon the Slaves in Noblemens Families. They alſo puniſh certain miſdemeanors by the Whip, and that by the hands of the Executioner; it is made of Elk skin, cut in ſeveral thongs, which cuts the skin ſo ſeverely, that the blood frequently follows the Firſt laſh: thoſe condemn'd to die, have commonly their Heads cut off; and confeſſions they generally extort by ſevere Strapado's. They have but one kind of Money, and that of Silver, they call it *Copeca*, 50 of which make a Crown; they are of an oval Figure, and ſo ſmall that the value of two Crowns ſcarce makes up the bulk of four pence in *French* deniers; *Muſcofke* is the fourth part of a *Copeca*, and *Polaske* the half; an *Alim* is three pence, a *Grifna* ten, and a *Rouble* a Hundred, but theſe are not to be found in one piece: It is further to be obſerved that the *Muſcovites* begin the Day with the Riſing of the Sun, and end it at Setting; and conſequently their Nights when the Sun ſets, and their end when it riſes. They alſo begin their Year the 1ſt. *Sept.* they knowing of no other Epact than from the Creation of the World, which they believe to have been in Autumn; ſo that with the *Greeks* they account 5508 Years from the Creation unto our Saviours Nativity, whereas the Weſtern Churches allow no more than 3969 years; from whence it is evident that 1663. when we first came into *Muſcovy*, their computation from the Creation was 7175. years, whereas we reckened no more than 5686. They have great proceſſions every firſt day of the Year. 1663.

Their Religion. The *Muſcovites* adhere to the Faith and Rites of the *Greek* Church, the Invocation of Saints being one of the principal Parts of their Devotion; there is no Family ſo inconſiderable, but what has the Picture of ſome Saint or other hanging againſt the Wall of the Chamber, with a ſmall Wax Candle before it, which they light as often as they perform their Devotion; their Churches are likewiſe full of theſe flat painted Images, for they will not ſuffer any emboſt; the Pictures of the Virgin *Mary*, or of their Patron, St. *Nicholas*, are frequently to be ſeen over their Church Porches, and Gates of their Cities, and even in the Market-places; and ſcarce any body paſſes by them without making ſeveral bows before them, and croſſing themſelves with three fingers on the right Hand, ſpeaking out aloud at the ſame time: *Goſpodi Pomilui*, i. e. *Lord God have Mercy on me*; the ſame veneration they pay to all Croſſes they meet in their way, this being the chief part of Devotion the Parents enjoin their Children. The firſt thing a *Muſcovite* does after he comes into a Houſe, is, to pay his reverence to the Houſe Saint; when they buy any of theſe Images, they will not own they bought them, but ſay they exchang'd them for Silver; and when they are Old, they either bury them under Ground, or throw them into the River; to be ſhort, they ſcarce ever will enter upon any buſineſs without firſt making the Sign of the Croſs. On their Sunday and Holidays they go thrice to Church, *viz.* Morning, Noon and Evening; they perform Divine Service ſtanding and uncovered, neither have their Churches any Seats. The Women, being conſider'd amongſt them as impure, commonly ſtand only in the Porch, and ſo do thoſe Men who pretend to more Devotion than the reſt. Any one that has enjoy'd his Wife muſt not enter the Church that Day, before he has waſh'd and Shifted himſelf. Preaching is a thing unknown among them; the whole ſervice is perform'd by reading of certain Pſalms, or Chapters in the Bible, ſometimes the Prieſt adds *Athanaſius* his Creed, or Sings certain Hymns, and St. *Chryſoſtom*'s homily. All this they perform ſtanding, except when they ſay the *Goſpodi*, then they beat their Foreheads to the Ground. Some will perform their ordinary Labour on Sundays: beſides which they celebrate fifteen Feſtivals, to wit, the Nativities of the Virgin Mary on the 8th of *Sept.* the Exaltation of the Croſs the 14th. the Oblation of the Virgin *Mary* 21. *Nov.* the Nativity of our Saviour the 25. *Decemb.* Epiphany 6. *Jan.* Candlemas day 2d. *Feb.* the Annunciation of the Virgin *Mary*, 25. *March.* Palm Sunday, Eaſter-day, Aſcention day, Whitſunday, the Feaſt of the Trinity next day after the Pentecoſt; All Saints day, the Sunday after Manifeſtation of the Glory of Chriſt upon the Mountain, being 6. *Aug.* and the Aſcenſion of the Virgin 15. *Aug.* Beſides their ordinary Faſt days, which are *Wednesdays*, *Fridays*, and the Eves before Holy days; they have four Lents in the Year; the longeſt being the ſame with ours of ſeven weeks. The ſecond begins the Sunday after Pentecoſt, and holds to St. *Peters* day. The third begins the 1 *Aug.* and continues till the 16. and the fourth from 12. *Nov.* till Chriſtmas day. Theſe Lents they keep with ſuch Auſterity and Strictneſs, that even the uſe of Butter, Milk and Eggs is forbid them, except in the firſt week of their great Lent, which being to them like our Carnavals, they take full Liberty to commit all manner of Debaucheries, except that they abſtain from Fleſh. During this time they commit ſuch extravagancies with Drunkenneſs and other Enormities, that it is not ſafe for any ſober Perſon to appear in the Streets at Night. to make amends for theſe Inſolencies, they live upon Puſſe and Herbs, and eſpecially upon Garlick and Onions all the time after, unleſs it be Sundays, when they Eat Fiſh, and the moſt ſtrict of them, ſcarce drinks any thing but *Quaz*. During their Lents the Husband is not to converſe with his Wife, under pain of Excommunication for a whole Year; when they make their Confeſſions, they ſtand upright before their Images; their penances which the Prieſt enjoins them before abſolution, are commonly to abſtain from *Aquavitæ*, and the pleaſures of Matrimony, to ſay the *Goſpodi* ſo many times with the uſual reverences, to ſtand in the Church porch during Divine Service, but above all to waſh themſelves frequently with the Holy Water, which being conſecrated on the Epiphany, is part of the perquiſites belonging to the Clergy. They generally communicate on Faſt-days, and at Noon ſervice, becauſe they are forbidden the uſe of all manner of Fleſh on that day.

1663. They receive it in both kinds, *viz.* with Leavened Bread, and Wine mingled with Water, which repreſent (according to the Council of *Conſtantinople*) the Waterthat came forth with the Blood from our Saviours ſide; the Children only under 7 Years of Age receiving it in one kind, becauſe before that Age they ſay, they don't commit any Mortal ſins. Some ſleep as ſoon as they have Communicated, to prevent any occaſion of ſinning.

A Prieſt that Touches a dead carcaſe, nay if he be but preſent at a Funeral he is defiled, and cannot adminiſter the Sacrament that day. *Olearius* ſays they believe Tranſubſtantiation, but there are three principal Reaſons, which perſwade me to the contrary; (1) Becauſe in their diſcourſes they declare it frequently abſurd, and ridiculous, nor ever have recourſe like the *Roman* Catholicks, to Gods Omnipotency. (2) They don't adore or pay any peculiar Reſpect to the Hoſt, which in a Religion ſo full of Superſtition as theirs, muſt certainly be ſuppoſed, if they did believe a real Tranſubſtantiation. (3) Becauſe the *Greeks* from whom they have drawn the pattern of their Religion, never received this point of Tranſubſtantiation. They have many proceſſions appointed for certain days in the year, among which, that on Palm Sunday Repreſenting our Saviours Entry into *Jeruſalem* is the moſt Celebrated of all. Neither doe they want their Saints. One *Sergè* in the Convent of *Troitza* wrought great Miracles, if you will believe them, for tho' he dyed 1563. they tell you that his whole Subſtance is not in the leaſt altered ſince his death.

The *Czar* goes twice a Year in Pilgrimage to this Monaſtery, and within a League of it alights from his Horſe and walks the reſt of the way on foot. The uſe of Fleſh is forbidden in their Convents, nor is any other Drink allowed but *Quaz*, however when the Religious can get any thing that is good without their Convents, they may Eat and Drink what they pleaſe. The *Muſcovites* are at Liberty to leave their Wives and Children, provided they go into a Convent, and nothing is more frequent than to ſend their Wives, if they be Barrent, into a Nunnery, the *Czars* having a peculiar Prerogative of ſending theirs thither, if they have none but daughters. There is another privilege belonging to the Men, to wit, that they may ſend their Wives into a Nunnery, and Marry another within ſix weeks, if they can prove Fornication upon them; for they call nothing Adultery but when a man Marries anothers Wife. Tho' they don't allow a Purgatory, yet do they aſſign two ſeparate places to the Souls, till the day of Judgment; One for the Bleſſed, where they enjoy the Company of Angels and all ſorts of pleaſures, the other for the Wicked, in a diſmal Valley, in the Company of the Devils. And as they are of Opinion that the Souls of the Wicked be call'd back and Reprieved from the very brink of Hell, their Prieſts uſe incenſes and Prayers over their Sepulchres every Morning and Evening for 40 days ſucceſſively, this being the Term appointed for their Ceremonies. Theſe Ceremonies they Repeat yearly on the Eve of the Pentecoſt; Their Hierarchy conſiſts of a Patriarch, who being choſen by the *Czar*, is the ſupream judge of all Religious Affairs, and diſpoſes of all Eccleſiaſtical matters. His Reſidence is within the Walls of the great Dukes Caſtle of *Muſcow*. The next in Rank are ſeveral Metropolitans and Biſhops: The inferiour Clergy is Compoſed of *Proto-Popes* and *Popes* or ſimple Prieſts.

Each of theſe is obliged to Marry before he can be admitted into holy Orders, but if his Wife dies, he is not to Marry a ſecond time; for ſay they, St. *Paul* will have a *Biſhop to be the Husband but of one Wife*; for which Reaſon alſo a Prieſt that is a Widower, cannot Adminiſter the Sacrament, nor Marry, having only the liberty to give his aſſiſtance at Morning and Evening Service. But if he is not pleaſed with his condition, he may lay aſide his Cap and Veſt, which he is Inveſted with at his Conſecration, and turn Lay-man; 1 Tim. 3.

The Ambaſſadors ſtay at *Archangel*.

But it is time we return to *Archangel*. This Town, (ſo call'd from St. *Michael* the *Archangel*) is ſituated on the left ſide of the River *Dwina*, as you enter it from the Sea. It was not extraordinary large at that time, but very populous, by Reaſon of the great concourſe of Foreign Merchants, that reſort hither; this being the place where the *Engliſh* and *Dutch* Merchants carry their Cloth, Velvets, Damasks, Spices, Tin, Lead, Wines and ſtrong Waters, tho' the *French* and *Rheniſh* Wines are not Imported in any conſiderable quantity here, as being too weak for a *Ruſſian* ſtomach; In lieu of theſe they Export Corn, Caveares, Furrs, Hemp, Ruſſia Leather and Wax. The firſt Trade was Eſtabliſh'd here by the *Engliſh* above 100 years ſince, to wit under K. *Edward* VI. who having ſet out a Fleet for the diſcovery of ſome unknown Countries, at laſt were forced into this Port; and as a recompence of their undertaking had the privilege of Commerce without any impoſt granted them, by the then Great Duke of *Muſcovy Jean Baſilowitz*. 1663.

Immediately after our Arrival at *Archangel*, his Excellency began to make a ſtrict Enquiry into the occaſion of our delay and Mr. *Watſon*'s leaving our Company; The Maſter of our Veſſel laying hold of this opportunity of Mr. *Watſon*'s abſence, would fain have laid the fault upon him, had not both we and the Seamen ſufficiently convinced his Excellency: that, if, purſuant to Mr. *Watſon*'s and our Requeſt he had put into a Harbour of *Norway*, we might have come perhaps two or three Weeks ſooner. Whilſt the Ambaſſador ſtay'd at *Archangel*, we met with very good Entertainment there, a thing very welcome to us, after ſo hard a Voyage; For, we were furniſhed with all ſorts of Proviſions in ſuch plenty, that we were not able to conſume it. The Ambaſſadors Table was always provided after the *French* and *Engliſh* way by his own Cooks, and Bakers, but the reſt were fed after the *Muſcovite* faſhion; our drink was Beer, Mead, Aquavitæ, *Spaniſh* and ſeveral other ſorts of Wines. We imputed this good uſage in a great Meaſure, to the advantageous account given by the *Czars* Ambaſſadors in their Return home thro' *Archangel* about two Months before, of the generous reception they had met with in *London* from his *Britannick* Majeſty, which was look'd upon as a good Omen for the future, but found our ſelves not a little miſtaken in our hopes. Before his Excellency left *Archangel* three *Samojedes* were brought to him, who Entertain'd him with ſeveral things Relating to their Country, which being under the *Czar's* juriſdiction, the *Greek* Religion has been introduced here. The Samoredes.

They live under the *Frozen Zone*, near the Ancient *Scythia*, and the *Ryphæan* or *Hyperborean* Mountains, bordering upon the Province of *Petzora*. The word *Samojedes*, which implies as much as men Eaters, ſhews them to have been of the kind of the *Anthropophagi*; *Sam* ſignifying as much as ones ſelf, and *Jede* to Eat; becauſe they uſed to mix the dead Bodies of their Friends with their Veniſon. They live in perpetual darkneſs for five or ſix Months in the Year, when they ſupply the defect of Light by their Lamps, which are fed with Oil made of Fiſh. Their Huts are above half under Ground, and during the Winter they converſe by means of Trenches under Ground, and at the approach of the the Summer, creep out at the Top of their Chimney's. Their Food is Veniſon, hung and dried Fiſh, without either Salt or Bread.

Their Garments are Veſts of Rein-Deer or Buck-skins reaching down half way their Legs, they have no other opening but on the top and bottom, for they cover their heads with them as the *Capuchins* doe, tho' their Cap is made of the ſhape of the head of a Man. They have a kind of Muffs faſtned to the end of their ſleeves, ſo that they can put them on, or let them hang, as they think fit; their Boots are with the Fur on the outſide, under theſe Veſts they wear Shirts made of the Skins of young Rein-deer, which are ſofter than Linen, and under theſe they have drawers. Their Bonnets, which are commonly of Cloth, are ſo large that they hang round about their Shoulders; they are generally Lined with Fur. They are low of ſtature, with flat and broad Faces, and long Hair, not unlike the *Tartars*. In our Voyage from *Archangel* to the *Vologda* we were provided with 6 Barges or Lighters for the Train and Baggage, one of which was made uſe of as a Kitchin, another for his Excellency's Coach horſes. Beſides which the *Priſtaf* had one for his and his Wifes own uſe; we having by this time been made ſufficiently ſenſible of the Effects of this cold Climate, every one provided himſelf with Gowns lined with Furs, of Martins, Sables, Bever, Fox or Squirrel; moſt of our Gentlemen alſo bought themſelves *Poliſh* Caps, and ſome of the Caps of the *Samojedes*, with whole ſuits ready made, which ſtood them not in above Ten Shillings a piece. The Governour was ſo generous, as to preſent many of his Excellency's Domeſticks with Sheep-skins, dreſt after the *Muſcovite* faſhion, and ſome Buck-skins for quilts.

Ambaſſadors Voyage to *Vologda* upon the *Dwina* and *Suchona*.

On *Saturday* 12 *Sep.* the Ambaſſador departed from *Archangel* with his whole Train, and Arrived the next day at *Colmogro*, and the 19th. to *Arſinoa*, 250 Verſts from *Archangel*, four of which make a League. The 22 we went from *Arſinoa* to *Tagriſh*, where we Arrived the 27 being 130 long Verſts, and from thence to *Uſtiga* in five days 150 Verſts. The 3 of *October* we continued our Voyage and Arrive the 12th at *Tetma*, 250 Verſts from *Uſtiga*.

1663. *Uſtiga.* From this place we travell'd in three days to *Chuſca* 140 Verſts, and on Saturday the 17th. *Octob.* arrived at *Vologda*, 90 Verſts from *Chuſca*, ſo that we travell'd 250 Lgs. in five weeks time. During this whole Voyage which was againſt the current of the River, we made no uſe of Horſes, but only of Men, to hale our Barges, in which above 300 were employed at a time; notwithſtanding which, we were ſometimes forc'd, when the Current was too ſtrong againſt us, to employ the Men belonging to two Boats, for the drawing up of one. For the better diſpatch, the Ambaſſador deſired the *Priſtaff*, to go before us with his Bark in order to provide us freſh Watermen, and what Proviſions we might ſtand in need of; but our Boats-men were ſo indifferently skill'd, that they ran us ſeveral times a ground on the Rocks, which loſt us much time, and often put us into no ſmall conſternation: In the night time theſe Watermen would commonly make vaſt Wood Fires on the bank ſide, and lye round about them to ſleep. We were very plentifully.. provided with all manner of eatables and drink; the Bark which ſerved for our Kitchin, lay cloſe to the Ambaſſadors, from whence they carried the diſhes to his Table, the other Barge was uſed to fetch their Proviſions from thence in the ſmall Boats. Our chiefeſt diverſion during this long Voyage, was walking, the favourableneſs of the Weather, together with the pleaſantneſs of the Foreſts and green Meadows, making us forget the fatigues we underwent; ſometimes we diverted our ſelves with ſhooting of wild Ducks and Pidgeons, of which there is great plenty in *Muſcovy*. There was ſcarce any Town we paſt through which deſerved a particular deſcription; *Uſtiga* the Capital of a Province of the ſame Name, being a place built of Wood, and paved with Piles of Firr; the only thing worth our obſervation here was, that we had the liberty to come within their Churches, a thing not eaſily permitted to ſtrangers in *Muſcovy*, becauſe they look upon them as defiled, if People of another Religion come within them. Betwixt this place and *Archangel* we ſaw ſeveral Rocks of white Marble, near the River ſide, we could ſcarce paſs through a Village, but the Prieſt would come with a preſent of Fiſh, Gooſberries, Hens or Eggs, in hopes of a reward from the Ambaſſador, or at leaſt a good draught of *Aquavitæ*, a thing much covered by them. The next day after our departure from *Archangel*, the *Priſtaff* conducted his Wife, who was very handſome, and richly clad with Pearls and Jewels, into the Ambaſſadors Bark, his Excellency received her with a Salute, and beſides many other civilities, was not forgetful to entertain her with a Cup of *Aquavitæ* before Dinner; it was not long after, before ſhe left her Husband at *Uſtiga*. As we came to *Arſinoa*, being in hopes to have met with Boatsmen, which were according to the Governour of *Archangel*'s orders to be provided for us here, by the Governour of this place, the ſame was ſo far from purſuing his orders, that he flatly told us he was reſolved not to trouble himſelf about it, ſo that his Excellency was forced to hire Watermen at his own Charge, to carry us to *Tygriſh*. Near this place we ſaw a Wolf upon the bank of the River, we ſent ſome Dogs after him, but he ſoon eſcaped out of ſight.

The 26th. *Sept.* Fifteen of our Boats-men getting into a ſmall Boat, were by the Current forced againſt one of the Barks with ſuch violence, that the Boat overturn'd, ſeven of the fifteen were drowned, the reſt ſaving themſelves by ſwimming. Not long after another Boats-man fell over board into the River, and narrowly eſcap'd drowning; much about the ſame time we received the news, that *Archangel* was almoſt deſtroy'd by Fire, ſince our departure. The Governor of *Uſtiga* made us ſufficient amends for the incivilities of the Governor of *Arſinoa*, for, he ſent one of his Gentlemen to tender us all the good offices that were in his Power, and above all the reſt ſent us two very honeſt Officers, to provide us with all neceſſaries, inſtead of the *Priſtaff Bogdan* lately deceas'd; in return of his civilities, his Excellency preſented him with three dozen of Canary and *French* Wine. After a ſtay of two days here, we continued our Voyage, and becauſe theſe Barks cannot uſe their Sails betwixt *Uſtiga* and *Vologda*, upon the River *Sucagna*, (which hard by falls into the River *Dwina*) by reaſon of the many Rocks betwixt *Uſtiga* and *Tetma*, we cut our Sail-Maſts to lighten our Veſſels, for which reaſon alſo 300 Pigs of Lead, deſign'd among other things as a Preſent to the *Czar*, were left here, the Ambaſſadors Veſſel notwithſtanding it was rowed up the River by 70 Men, going the ſloweſt of all, as being more bulky and heavier freighted than the reſt; the lead was afterwards brought to us, during our ſtay at *Vologda*. By this time the Winter Seaſon beginning to come on a pace, our Furrs, Robes and *Samojeda* dreſſes began to ſtand us in good ſtead, the Froſts now encreaſing daily, ſo that at our parting from *Chuſca*, thoſe in the firſt Ship were forced to break through the Ice for 20 Lgs. to *Vologda*. Immediately after our arrival at *Tetma*, the Governour of the place, a Perſon of a goodly aſpect like a *Boyar*, and pleaſant converſation, came to wait upon the Ambaſſador in a very ſplendid Habit, offering all the good Services he was able to doe; in requital of which his Excellency ſent him a preſent of three Ells of Scarlet Cloth by Mr. *Taylor*, unto whom he preſented a pair of Sables worth four Pound, and ſhewing a particular Inclination to recreate himſelf aboard our Veſſel, Mr. *Taylor* in his Excellencies abſence laid the Plot with ſome other Gentlemen, to ſend the Governor well laden with ſtrong Liquors home to the Town; accordingly the Cup went briskly round, but the Governor, who was an old experienc'd Soldier of the Bottle, came of Victorious in this Engagement. 1663.

Vologda is the Capital City of a Province bearing the ſame Name; being a place very conſiderable for its bigneſs, and traffick as well as its ſtrength, its walls being of Stone. It is ſituate upon the right ſide of the ſame River with *Uſtiga*, *Colmogo* and *Tetma*. We were lodged in the Suburbs, near the River ſide, but the Buildings being not very large here, we were diſperſed in ſix or ſeven Houſes. At our firſt coming here, we did not intend to ſtay above a Month till the Grounds ſhould be made paſſible by the Froſt and Snow, but the weather proving very moiſt and changeable, we were detained three whole Months here, to our great diſſatisfaction, being very impatient to come to *Muſco*. The extremity of the cold obliged us to have recourſe to the *Muſcovite* Stoves, which however we uſed with more moderation, being not able to endure them ſo hot, as they doe; at firſt we were entertained with plenty enough, but as ſoon as the two new *Priſtaffs*, *Davidof*, and *Neſtrof*, arrived in the Month of *December*, every thing look'd with a quite different face. This *Neſtrof* being a Perſon ſo arrogant in his whole behaviour, that he took a pride in appearing uncivil, accoſted his Excellency at the firſt interview with this Complement; *The moſt Serene, and Puiſſant Great Lord, Czar* and *Grand Duke of*, &c. (enumerating all his Titles) *is very joyful to underſtand, that you, the Great Ambaſſador of his Majeſty of Great Britain are ſo happily arriv'd here, and has commanded that we and your excellency go together to* Muſco. By which laſt words he not only would have made his Excellency ſubject to the *Czar*'s commands, but alſo preferred himſelf and his Company before him; and he thought he had done a great piece of Courteſie to us all, when he ſaid afterwards; *We muſt go in Company together to Muſco.* No ſooner, as I told you, was he arriv'd at *Vologda*, but he fetrenched our Table to that degree, that it being one of their Lents then, we could ſcarce get Tallow or Wax Candles for our uſe, ſo that from the greateſt plenty, we were on a ſudden reduced to want even what was neceſſary for us. In the mean while we comforted our ſelves with the daily hopes of going to *Muſco*, where we expected much better Entertainment, yet did not neglect to frequent Prayers twice a day in our Chappel, and Sermon every Sunday. Our diverſions were Muſick, Dancing, and ſuch like recreations, but Hunting was the chiefeſt. His Excellency was conſtantly attended at his Table with a ſet of Violins and Trumpets, which being managed by one of the beſt Muſick-Maſters of *England*, the *Muſcovites* uſed to crowd our Houſe every day about Dinner time, to participate of this agreeable diverſion; we alſo began to be accuſtomed to the uſe of their Baths; and the 5th. of *Nov.* was celebrated amongſt us with Fire Works, a Stately Entertainment, and a Ball; this was our way of Living during our ſtay at *Vologda*. One particular obſervation I made here about the *Muſcovites*, that tho' *Tobacco* be ſeverely forbidden, they are ſo fond of it, that the Ambaſſadors Servants uſed to ſell great quantities of indifferent Tobacco at the rate of fifteen Shillings *per* Pound, which coſt them ſcarce two pence in *London*; they being ſo bewitch'd to the uſe of this Weed, that they will ſell their Shirts to purchaſe it. They uſe a Cows-horn inſtead of our Pipes, which having a whole in the middle, they put a wooden Veſſel in it, indifferently wide and deep, when they have fill'd it with *Tobacco*, they put water into the horn, through which they draw the Smoak, with ſo much eagerneſs, that they make not above two ſucks of a Pipe, which ſo Intoxicates their Brains, that you may ſee five or ſix of them drop down upon the ground, as if they were ſeized with the falling Sickneſs, but being reviv'd in half a quarter of an hour, all their diſcourſe runs upon the Praiſe of *Tobacco*. Red and Grey Cloth are

The Ambaſſadors reſidence at *Vologda*.

like.

1663. likewiſe ſold here at an exceſſive rate. About this time the Butlers Wife being brought to Bed, and both the Parents *Roman Catholicks*, who intended to bring it up in their own Religion, our Chaplain made ſome difficulty to baptize it, which however after a more mature deliberation was perform'd by him. There happened alſo a quarrel here betwixt two Gentlemen of the Ambaſſadors retinue, about precedency, as we were returning home from an Entertainment, given us by the *Priſtaf*, about two or three Miles from *Vologda*. One of them being of a long ſtanding in his Excellencies Family, and preſuming upon his Intereſt there, they fell to their Swords, but being prevented by the Ambaſſador himſelf from doing any miſchief, he uſed them both ſeverely, for having tranſgreſs'd the reſpect due to his Perſon.

The Annual Solemnity of the Fiery Furnace.

The 18th. *Decemb.* We ſaw the annual repreſentation of the fiery Furnace; the Perſons repreſenting *Shadrach*, *Meſec* and *Abednego*, run about the Streets like diſtracted Perſons, with lighted Torches in their Hands, with wooden hats on their Heads, and their Beards beſmear'd with Honey; they commit great Inſolencies to thoſe they meet, burning their hair of, Beards and Cloths; and being look'd upon as Pagans, all this while, every body gets out of their way, and they are rebaptized on the Feaſt of the Kings. Having paſs'd the Chriſtmas Holy-days here, we began to prepare for our journey to *Muſco*; the Ambaſſador ſent to *Neſtrof*, to deſire him to furniſh him and his Gentlemen with convenient Sledges, and that they might attend him quite to *Muſco*, without changing. But *Neſtrof* according to his wonted Surlineſs ſent for anſwer, that he could provide no others, but ſuch as were ordinarily uſed; upon this the Ambaſſador ſent his Secretary to him, to give him to underſtand, how unbecoming it wou'd be, that perſons of an eminent rank ſhould be treated worſe by ſo Great a Monarch as the *Czar*, than if they Travell'd at their own Charge; but all the anſwer he could get from this inſolent Perſon, was, that they might do their own Pleaſure, and that the *Czar* had honoured them ſufficiently by ſending them a Perſon of his Quality to conduct them; unto this it was replied, that, tho' his Excellency did not diſpute his Quality, yet he never thought it of ſuch rank as thereby to claim a preference for him and his Aſſociates, before him, as he had done at the firſt Viſit. But whatſoever Arguments were alledged to him, his Excellency was forc'd to provide himſelf with convenient Sledges, at his own Charge, and every one did what he could to defend himſelf againſt the rigour of the Seaſon, by lining the Sledges with Felt, ſetting up Cloth Tilts over them, and wrapping themſelves up in Coverlets, and other Cloaths well lined with Furrs.

The Ambaſſadors journey from *Vologda* to *Muſco*.

The Ambaſſador foreſeeing the inconveniences that would attend us betwixt *Vologda* and *Yeroſlaf*, where nothing but ſome ſmall Villages are to be met with, ſent his Horſes, with great part of his Baggage, attended with nine or ten Servants in ſixty Sledges, ſome time before our departure thither the 7th. *Jan.* 1664. He himſelf with a Train of 100 Perſons, following them in 40 Sledges the 15*th*. The 19*th*. we came to the River *Wolga*, which being Frozen, we paſs'd and Arrived the ſame night at *Yeroſlaf*. Parting from thence the 22*d*. we paſs'd by *Roſtof*, and the 29*th*. came to *Peroſlaf*, and the 27*th*. we came to *Troitza*, from whence after a ſtay of five days, we continued our journey to *Yaws*, a little Village about five Verſts from *Muſco*, were we arrived the 3*d*. *Feb*. from whence we were to make our Publick Entry into the City. At the firſt ſetting out of our Journey from *Vologda*, the weather was ſo very ſharp, that notwithſtanding all the precautions uſed againſt it, we were ſcarce able to endure it, but within a few days after it thawed, till we came to *Yeroſlaf*. However this continued not long; for the Winter reaſſuming its wonted Rigour, we were made very ſenſible what Climate we now lived in, which would have been inſupportable, had not the ſtrong Water bottle, and a good Kitchin, (which was always ſent ſome hours before) revived our drooping Spirits; but the greateſt inconvenience was our Lodgings, no Inns being to be ſeen in the open Country; at *Yeroſlaf* his Excellency had very good Lodging at a *Muſcovites* Houſe, lately built, and the Governour as well as an *Engliſh* Merchant Inhabiting there, entertained us very Splendidly, as the *Priſtaff Neſtrof* did twice in this Voyage; for the reſt, we were generally Lodged in Wooden Cottages, the Smoak of which, when they heated their Stoves, was ſo troubleſome to us, that we were forced to leave open our Doors and Windows. Another inconveniency we ſuffered in our Diet, for tho we wanted not Proviſions, the dreſſing, which was forc'd to be perform'd in their Furnaces, was ſo ill, that, being generally done in haſte, it was half raw when it came to the Table. Beſides this, we were bereaved of all manner of Diverſion as well as Society, every one being coop't up in his own Sledge, glad to defend himſelf againſt the extremity of the Cold, which to the *Muſcovites* ſeem'd very favourable, but to us almoſt inſupportable. The only ſauce againſt this Solitude was ſleeping, unto which being invited by the gentle motion of our Sledges, we paſt away the greateſt part of the way in ſleeping, which was the reaſon that as often as we approached to any Town or Village the Trumpets Sounded. As we had but few Towns in our way worth our deſcription, and that the *Muſcovites* are ſo jealous of allowing ſtrangers to take a view of their Fortifications, I will not detain you with an ample account of them. *Yeroſlaf* was the laſt, it is not very large, but Populous, and its ſituation, which is upon the *Wolga*, makes it remarkable for its Trade. *Peroſlaf* lies upon a very narrow River, the Channel of which is above two Fathoms deep, near it is alſo a ſmall Lake. *Troitza* is built upon the bent of a Hill; this place is chiefly Famous for its Convent, which is built of Stone, and ſurrounded with a ſtrong Wall, in an adjacent plain; it maintains 100 *Monks*. We tarried here five days, yet could not his Excellency have the liberty to ſee the Convent. We were no ſooner come to the *Yaws*, but we made all poſſible preparations for our Solemn Entry, being much tired with the ill accommodation we had in ſo little a Village. The next day being the 4th. *Febr*. *Neſtrof* came to acquaint his Excellency that the next day being appointed for his reception, deſir'd him to have every thing in readineſs by next Morning about nine a Clock, being the third hour of the day, according to the *Muſcovite* computation. Accordingly all neceſſary preparations were made, all the Gentlemen put themſelves in their beſt Equipages, and the Liveries were diſtributed to the Pages and Footmen, which were vaſtly Rich, thoſe of the firſt being covered all over with Silver, which coſt near 30 *l*. Sterling, beſides the fine Plumes they wore in their Hats; in ſhort every thing was ſuitable to the greatneſs of his Majeſty, whom his Excellency was to repreſent, in this Solemnity. The hour of nine being come, we expected with great impatience our orders to part, but contrary to our expectations ſtay'd till three a Clock, without hearing the leaſt news from Court, at which both his Excellency, and *Neſtrof* were not a little ſurpriſed, eſpecially ſince our Cooks were ſent before to *Muſco*, and we conſequently left deſtitute of Proviſions. At laſt about half an hour before Night, certain Meſſengers came with orders for our departure; the Ambaſſador was at firſt not a little ſtartled at this unuſual thing, and told *Neſtrof* in plain terms, that it was not cuſtomary for Ambaſſadors to make their publick Entry's in the night time, but at laſt, in regard of the inconveniencies we were likely to ſuffer, if we ſtay'd in thoſe Cottages, he conſented to Depart.

1664.

The Solemn Entry of the Ambaſſador into *Muſco*.

Accordingly we Marched forward in good Order for two Verſts, when being within ſight of the City, orders were ſent to *Neſtrof* from Court, that he ſhould diſpoſe of the Ambaſſador and his Train in a Neighbouring Village on the Left hand, from whence he might make his Entry the next Morning. This ſtop was not very unexpected to us, having foreſeen by their Manner of leading us thorough By-ways, that ſomething more was in the bottom of it; at which the Ambaſſador was ſo highly Exaſperated, that he reſolved and proteſted that he would not make his Entry, till ſatisfaction were given him for this affront. However we were no ſooner come to the Village aſſign'd us for our Lodging, but *Loukéan Golozof* a *Diack* (under Chancellour) came to excuſe the matter, alledging, that the Meſſengers, that were ſent in the Morning having by misfortune loſt their way, his *Czariſo* Majeſty, did not think fit, his Excellency ſhould expoſe ſo Solemn an Entry to the darkneſs of the Night, and therefore he had deferr'd him till next day? that he might give him a reception ſuitable to his Character; But the Ambaſſadours, who had bin informed before hand that they were not ready to receive him, looking upon this only as a pretence, told the *Diack*, that without any reflection upon his Perſon, that to excuſe a matter of ſuch conſequence, it would have been much more proper, to have ſent a Perſon of another rank. The only comfort we now had, was that our Cooks were returned by this time, with ſome proviſions, which ſtood us in good ſtead, after we had bin detained in a Languiſhing condition all this day. Early the next Morning his Excellency fearing, leſt the *Diack* might have diſſembled part of his Anſwer, after his return thought fit to ſend a Letter to the *Czar* containing all the Circumſtances of the whole matter, and intimating his Reſolution, not to come to *Muſco* till due reparation were made by puniſhing the Authors of this diſgrace.

The

1664.

Illustrissime atque Excellentissime Imperator.

The Ambassadors Letter to the Czar.

NOvum hoc & inusitatum ad Imperatoriam Vestram Majestatem scribendi, antequam optatissimo ejus conspectu frui liceret, consilium expressit hesternæ diei infortunium, dicam an opprobrium. Quippe post tot in itinere à Vologda moras, & tertiæ dici (quatuor tantùm ab aulâ vestrâ Imperatoriâ milliaribus expectationem, quum multo manè surrexissem & Offonarii Evan Vizy Nestrof mandatu, ante horam dici * tertiam ad iter me comparassem; ultra decimam tamen inter famosi gurgustii sordes & angustias sine cibo aut potu detentus marcebam & macerabar. Quæ quidem omnia, quamvis Serenissimi Regis mei Majestate, Imperatorio Vestro Fastigio, & nostra Dignitate indignissima, utcunque Metropolin Vestram intrandi, & ad Majestatem vestram Imperatoriam appropinquandi, & justissimas querelas nostras exponendi spe tolerabam. Tandem quum jam advesperasceret, signum proficiscendi datum. Tunc verò postquam (quod ignes fatui solent) per camporum & noctis errores me circumauxissent pronunciatur in ignobili hoc Pago ubi cum animibus incommodis & (honor sit auribus) cum vilissimis insectis conflictur pernoctandum. Accepi quidem ab Imperatoriâ vestrâ Majestate per quendam Procancellarium nuncium humanissimum, qui rem excusaret & in Angarorum & Veredariorum negligentiam culpam deriparet. Cui ego tunc quidem respondi & idem jam, ne optimo homini per viam aliquid intercideret, ad Majestatem vestram Imperatoriam perscribo, me Imperatoriæ vestræ Majestati quàm maximas gratias persolvere & nullo modo de humanitate vestrâ dubitare; sed neque hanc rem tam parvi momenti esse, ut tam facilè dilui possit & deleri; Neque ab Angaris aut Veredariis proculdubio hoc crimen profectum, sed ab aliis qui majori in ministerio eodem tamen in numero haberi mereantur; Neque tam impune serenissimi Regis mei honori, Imperatoriæ Vestræ Majestati, aut nostræ Dignitati posse illudi; Serenissimum Regem meum, qui summus & præcipuus est Imperatoriæ Vestræ Majestatis Amicus, ne quidem Inimicorum multò minùs Amicorum Legatos ità accipere; Et si modò aliquid hujusmodi in suo Regno evenire potuisset serenissimum Regem meum (quod sine Procancellarii ignominia dicitur) nobilissimum è Magnatibus aliquem missurum fuisse qui Rem excusaret, neque antea desiturum priusquam reorum sanguine quantacunque gratiâ aut nobilitate pollentium tam barbarum & inhumanum facinus expurgasset; Rem hanc fabulæ & ludibrio toti mundo futuram; Ne igitur quamvis Imperatoriæ Vestræ Majestatis conspectu fruendi cupientissimum, & in hoc loco pessimè habitum, nullo tamen modo hinc exiturum, donec de eorum corio mihi satisfieret quicunque quantum in se erat Serenissimi Regis mei Majestatem, Imperatoriam Vestram Majestatem, & Sanctissimam Legatorum dignitatem violassent, proculcassent, profanassent. Hæc utì facta & dicta erant Imperatoriæ Vestræ Majestati exposui, ut in gravissimo hoc negotio quod Imperatoriâ Vestrâ magnitudine & prudentiâ dignum est constituere possit. Interpreti meo mandavi ut responsum Vestrum Imperatorium in hâc re expectaret. De cætero Imperatoriæ Vestræ Majestati summam felicitatem voveo & exopto.

* Tertia dici hora apud Muscovitas tum erat nobiscum circiter nonam: Primam enim (ut priùs affirmavi) numerant horam ab Oriente sole.

6. *Februarii Anno Dom.* 1664.

CARLISLE.

The Superscription was thus; *Magno Domino Imperatori, & Magno Duci Alexio Michaelovicio totius magnæ minoris & albæ Russiæ Autocratori, & multarum aliarum Dictionum & Regionum Orientalium Occidentalium & Septentrionalium, Hæredi earum à Patre & Avo, Domino & Monarchæ.*

Most Illustrious and most Renowned Prince and Emperour,

THis vew and unaccustomed resolution of writing to Your Imperial Majesty, before I have the most desired Honour of being admitted to Your Majesties Presence, is occasioned by a misfortune, if not an indignity, which hapned to me Yesterday. After a tedious Journey from *Vologda*, and three Days waiting at the distance only of four miles from Your Imperial Court, when I had risen very early, and according to the advertisement of *Offonarius Evanovitsius Nestrof*, had fitted my self for my Journey; nevertheless, I was constrained to languish till after Ten without any manner of refreshment, in the confinement and dirt of a smoaky Cottage. All which things, though most unworthy the Majesty of the King my Master, Your Imperial Grandeur, and my particular Character, I patiently sustained with the hope however of Entring Your Imperial City, and approaching the Presence of Your Imperial Majesty, and declaring my just complaints. At length, when Night was now at hand, notice was given for our setting forward. And after the Guides had, like *Ignes fatui*, misled me up and down the Fields in the Night, it was signified to me, That I must quarter in this pitiful Village, amidst all kind of inconveniences, and swarms of troublesome Insects. I confess I received from Your Imperial Majesty, by a certain Vice-chancellor, a very courteous Message, excusing the matter, and charging the fault upon the negligence of the Guides and Posts. I then answered him, and write the same now to Your Imperial Majesty, lest the good Man may have forgotten something by the way, That I give Your Imperial Majesty very great thanks, and no wise doubt of your Generosity; but that the thing is not of so small importance, as to be blown off so easily; That the fault proceeded not from the Posts or Messengers, but from others of greater Quality perhaps, though but of equal merit; that affronts done to the Honour of the King my Master, Your Imperial Majesty, or my self, ought not to go unpunished; That the King my Master, who is Your Imperial Majesties highest and chiefest Friend, gives not such Reception to the Ambassadors of Enemies, much less to those of Friends; And that in case any such thing should happen in his Kingdom, the King my Master would have sent some Person of the highest Nobility to excuse it (which I speak without reproach to the Vice-chancellor) and not desisted till he had expiated so barbarous and inhumane an action, with the blood of the Criminals, of whatever quality or consideration; That this proceeding would give cause of talk and laughter to the whole World; that therefore, however desirous I was of approaching of Your Imperial Majesty, and ill accommodated in this place; yet I should not stir from it till satisfaction were given me upon the Persons of those, who as much as in them lay had violated and affronted the King my Master, Your Imperial Majesty, and the sacred Character of Ambassadors. I have related these things to Your Imperial Majesty, as they were done and spoken, to the end that You may make such determination in this most weighty business as shall be suitable to Your Imperial Grandure and Prudence. I have commanded my Interpreter to wait for your Majesties answer in this Matter. And I wish and imprecate to Your Imperial Majesty all Happiness.

1664.

CARLISLE.

The Letter was no sooner sent, but *Demente Bashmacof Diack* of the *Czar*'s Cabinet, came to wait on the Ambassador, promising all the satisfaction he should desire; his Excellency consented thereupon to prepare for his Entry immediately; this was confirmed by the Messenger, who carried the Letter to *Musco*, who returning soon after, brought word, that he having deliver'd the Letter to *Almaza*, the *Diack* of the Embassy's Office, he had told him, that *Bashmacof* was dispatch'd already by his *Czarish* Majesty, to give his Excellency the desired Satisfaction; so we departed on Saturday the 6th. *Feb.* in order to make our Solemn Entry, in which it must be confess'd, that the *Czar* gave us all possible marks of his Greatness, nothing being to be seen, where ever we cast our eyes, but precious Stones, rich Furs, Cloth of Gold and Silver, Velvets, fine Horses, and most splendid Equippages; of Trumpets, Kettle-drums, and other Military Instruments there was such a number, that the like had, according to reports, not been seen before, at the Entry of any Ambassador into *Musco*. The whole train was ordered thus: In the Front were the Ambassadors Trumpeters on Horse-back, Sounding their Silver Trumpets; After these came the Gentlemen belonging to the Embassy, each in a sledge, those of the best quality being neareſt to the Ambassador; and their Sledges adorn'd with Bear-skins, part of which hung down behind: These were followed by ten of the *Pristaffs* Domesticks on Horse-back, two and two in a Rank, and after them the two *Pristaffs* went in a Sledge. My Lord Ambassador followed *Nestrof*, in a Sledge drawn by two white Horses; (a Colour much esteem'd in *Muscovy*) his Tilt was Scarlet edged with Crowns of sky colour'd Velvet, hanging down round about, and trim'd with Silver lace, with a white Bears skin hanging over the back of his Sledge. His Interpreter sat upon a plank laid for that purpose on the right side of the Sledge, with his head uncovered, and behind the Sledge stood two Pages, six Foot-men marching on each side of it bare-headed, with their Partisans, which were correspondent to their Liveries. The Lord *Morpeth*, his Excellencies eldest

1664. Son, then ſeventeen years of Age, came immediately after him in a very fine Coach, with ſix black Horſes, the Harneſſes being of Scarlet, edged with Silver Lace and Fringes, and behind the Coach ſtood two Pages. My Lord was followed by my Lady Ambaſſadreſs in a *Caſtnax* (Womens Sledge) covered on the top with Crimſon Velvet, with broad Gold and Silver Laces, and lined with blue, according to our Liveries, which were Red lined with Blue. The Sledge had a glaſs door on each ſide, beſides two ſmall glaſſes, through which the Lady might behold the Spectators, without being ſeen by any. She had one of her Gentle-women in the ſame Sledge with her, two Pages ſtanding behind upon a Plank, and three Foot-men running by. After hers came My Lord *Morpeth*'s Sledge, without any body in it, and then two Womens Sledges more, which were followed by the whole Train, making in all 200 Sledges. About two a Clock, we ſaw a great Body of *Muſcovite* Horſe drawn up in a ſpacious Plain, and among them many Archers, with their Quivers well ſtored with Arrows; and as for Trumpets, Kettle-Drums, and Haut-boys, there was ſuch a multitude of them, that they batter'd our ears for two Miles together. As we approached nearer to the City, we were met by a good Number of *Boyars*, *Stolnicks* and other Officers of the Court, who made a moſt glorious appearance in their Veſts of Gold and Silver, lined with Sables, and in their Furr Caps of black Fox, ſhaped like Muffs, ſuch as they uſe at publick Solemnities.

Their Horſes on which they were mounted, were for the moſt part adorn'd with very rich Furnitures, beſet with Pearls and Precious Stones, and Silver bridles, made like broad links of Chains, which made a very agreeable Noiſe. Their led Horſes had alſo very Rich Sadles, and were cover'd with covers of Leopard Skins, Cloth of Gold, Velvet and Scarlet. Moſt of theſe, and all the Gentlemen of the *Czar*'s Chamber, accompany'd his Excellency to the Houſe appointed for our Entertainment: At laſt the *Czar*'s Maſter of the Horſe came and Preſented two Sledges, one for the Ambaſſador, and the other for my Lord *Morpeth*, and ſeveral white Horſes for the Gentlemen; and not long after *Pronchiſſof* (a Member of the *Czar*'s Council) and *Gregory Coſmewitz*, to ſerve his Excellency as *Priſtaff*, during his ſtay in *Moſco*. *Pronchiſſof* being come within ſome ſmall diſtance of the Ambaſſadors Sledge, gave us another inſtance of the *Muſcovite* Pride; for he gave his Excellency to underſtand, that he being ſent by the *Czar* to receive him, he expected he ſhould alight firſt out of the Sledge; the Ambaſſador replied by his Interpreter, that as he repreſented his *Britannick* Maieſty, he ought to claim the precedency in all things of this nature; but this had ſo little Influence upon the ſtubborn *Priſtaff*, that he remained unmoveable, like a Statue in his Sledge, alledging, that he alſo repreſented the Perſon of his Maſter, ſo that after many conteſts, his Excellency at laſt, to prevent any further delay, condeſcended to this; that they ſhould come out of their Sledges at the ſame time; which was but indifferently obſerved on the *Priſtaff*'s ſide, who continued hanging betwixt his Servants arms, ſcarce touching the Ground with his toes, whilſt his Excellency fairly came out of his Sledge. After the mutual Salute, *Pronchiſſof* deliver'd his complement firſt, telling the Ambaſſador, that he and his Collegue *Gregory Coſmewitz* had been ſent by his *Czariſh* Majeſty, to take care that he might be provided with all neceſſaries during his ſtay at *Muſco*; not forgetting in the mean while to rehearſe all the *Czar*'s Titles at length, in a ridiculous manner. The Ambaſſador having anſwered what he thought moſt pertinent to the matter, and *Neſtrof* and *Davidof* his laſt *Priſtaffs* having taken their leaves, they retired both to their Sledges, *Pronchiſſof* in the ſame manner as he came out, to wit reſting upon his Servants. Being by this time come near to the Town, we diſpoſed our ſelves for our Entrance; the Ambaſſador was plac'd in the middle of the two *Priſtaffs*, to wit, *Pronchiſſof* on the right, and *Coſmewitz* on the left; My Lord *Morpeth* had two *Boyars*, on each ſide one, ſo that in every rank three Sledges were a breaſt, our Gentlemen that were on Horſeback, with the Chaplains, Chirurgeon, Muſick Maſter, and ſeveral *Engliſh* Merchants, and two Valet-de-Chambers made up twenty three, were divided into ſo many Ranks, having each two *Simboyars* or Gentlemen of the Court in their Company. All theſe Ceremonies, and the frequent ſtops we made, having conſumed above three hours, before we had advanced two Miles, it was after Sun Set, before we could enter the Town; this had made the Inhabitants to light ſo many Fires and Torches in the Street, that the Night appear'd as bright as the Day, and the refulgency of the Precious Stones, ſeem'd to add a new luſtre to our Entry, which was accompany'd by an incredible number of People, both in the Streets and Houſes. The *Czar*, the Great Dutcheſs, and young Princes, being willing to be Spectators of this Magnificent Solemnity, had made a chink or private place near the Gate of the brick Wall, (as they had done the day before) where a great number of Wax Tapers were ſet up on each ſide of the Gate; as we came hither we were Saluted by a whole Volley from the *Muſcovite* Trumpets, who were placed there on purpoſe to make a little ſtop, that the *Czar* might with the more leaſure take an exact view of the whole Solemnity. From hence we were conducted to the *Czar*'s Guards, who had lined the Streets, to the Houſe prepared for the Ambaſſador. 1664.

The Ambaſſadors Reſidence at *Muſco*.

Before we enter upon the particulars of what happen'd during our abode at *Muſco*, we will give you a ſhort deſcription of that City. *Muſco* like the other Towns of *Muſcovy*, has ſcarce any other but Wooden Houſes (ſome few excepted) and is paved with large pieces of Firr laid croſs the Streets. It was then at leaſt four Lgs. in circumference, its extent and form being frequently changed by the many conflagrations they are ſubject to, notwithſtanding they endeavour to prevent the ſame by the ſpaciouſneſs of their Streets, and the large intervalls to ſtop the Fury of the raging Flames. It has three Walls, one of Stone, another of Brick, and a third of Wood, which divide the four quarters of the Town; call'd by them, *Cataigorod*, *Czargorod*, *Scoradom* and *Strelitza Slaboda*. *Cataigorod* is ſeparated from the reſt by a Brick Wall, as *Czargorod* is by that of Stone; the *Strelitza Slaboda* (or Suburbs of the *Strelitzes*, the *Czar*'s Guards) are ſurrounded with wooden Fortifications. The River *Moſca* (from hence the City has borrowed its name,) is the chiefeſt that paſſes by this City; its ſcource is in the Province of *Twere*, and loſes its ſelf in the *Wolga*, where the ſame joins with the River *Occa*, near *Columna*. The two ſmall Rivers *Neglina* and *Yaguſa*, likewiſe paſs by *Moſco*, and afterwards fall into the River *Moſca*; but that which gives the greateſt luſtre to this City, is the Royal Palace, call'd *Cremelena*, and the vaſt number of Churches, with their Steeples, which being cover'd all over with Latten, make a moſt glorious ſhow at a diſtance, there being above 2000 Churches and Chappels in this City. The City of *Muſco*.

The *Czar*'s Caſtle comprehends about two Miles in Circuit. He has two Palaces, one of Stone, after the *Italian* Faſhion, the other Wood; which being the moſt healthful, the *Czar* uſes for his ordinary reſidence. The Patriarch of *Muſcovy*, and ſeveral of the chief *Boyars*, have alſo Stone Houſes within the Precinct of the Caſtle, beſides two Convents, one for Fryars, the other for Nuns, and a good number of Churches and Chappels. The Church of St. *Michael*, contains the Tombs of the *Czar*'s; the Steeple of this Church as well as of all the reſt being covered with Copper, and burniſhed by the Sun beams, carry a reſemblance of Gold at a diſtance; one of thoſe Steeples having a croſs of Maſſie Gold. We ſaw here a great Bell, caſt by a *Muſcovite* ſome years before, within which fifty Men could ſtand upright, its Diameter being three Fathoms, and nine in Circumference; a Steeple being order'd to be built in the place where it ſtands. The Caſtle is fortify'd with a triple Wall, well ſtor'd with great Canons, and ſtrengthned by a very large Ditch. It is Inhabited, beſides *Muſcovites*, by *Greeks*, *Perſians* and *Tartars*, but no *Jews*. The *Greeks* are moſt eſteemed, and the Proteſtants and *Lutherans*, have alſo the Publick exerciſe of their Religions, which is not allow'd to the *Roman Catholicks*. All the Foreign Chriſtians, but eſpecially the *Germans*, *Engliſh*, *Hollanders* and *Poles* live in a *Slaboda* or Suburb, allotted them by the *Czar* for their mutual Converſation. The *Czar*'s Caſtle. The great *Muſcovite* Bell

The Houſe aſſign'd us for our abode, was one of the moſt commodious of the whole place, and not far from the Caſtle. The Chambers were arched, with Iron Window Shutters and Doors, tho' this Metal is not ſo very plentiful in *Muſcovy*; moſt of the Chambers were hung with red Stuffs or Cloth, and the Benches, which ſerved inſtead of Chairs, covered with the ſame; without any Beds, or other Accommodations, except Tables and Furnaces. It has two great Halls, in one of which was ſet up the Canopy of State, and ſerved us alſo for a Chappel, in the other ſeveral Gentlemen had their Lodgings aſſign'd them. At our firſt Arrival we were ſo reſtrained that they would not allow us to ſtir abroad, nor let any ſtrangers come to viſit us, not even the Merchants Wives to my Lady. But after the Ambaſſadors Audience, we enjoy'd ſomewhat more Freedom, having the liberty to viſit our Friends in the Suburb of the Foreign Chriſtians, tho' not without ſome of the *Czar*'s Guards; of which there were always 50 that kept Guard at the Gate, and examined The Ambaſſadors Houſe.

1664. ned every Body that came in or out. The Ambaſſadour himſelf was not allow'd to go abroad without a *Priſtaff*, and a Company of *Strelitzes*; one day the *Priſtaff* ſtaying longer away than was expected, and his Excellency intending to go abroad without him, his Foot-men were ſtop'd by the *Strelitzes* at the Gates, till the *Priſtaff* came. Neither were any of the *Boyars* permitted to Viſit his Excellency, unleſs ſent by the *Czar*; the leaſt commerce with a Foreign Ambaſſador being look'd upon with them as a capital Crime. Our chief recreations here, were Horſe matches; ſometimes we would alſo make a match at Foot-ball, we acted alſo a Play compos'd by our Muſick Maſter. Hunting and the Baths, which we uſed ſo frequently at *Vologda*, we were not ſo fond of here, except that ſome of our Family would now and then go to the *Stoves*, where they would divert themſelves, with talking rubbiſh to the Women, which they could ſee Naked, thro' a hole made in the Wall that parted the Rooms; one thing more which is very remarkable we obſerved about a Mile from *Muſco*, to wit, a ſmall Iſland Eloating in a Lake, being kept above Water by the roots of the Trees, which have taken Root in this Ground, we went to it in a Boat, and found, that we could move it like a piece of Timber Floating upon the Water. Next to our manner of living at *Muſco*, we muſt proceed to the Ceremonies and Recreations we obſerved in this Court, and in the firſt place of his Excellencies Audience the 2. *Febr.*

The Ambaſſadors Audience.

The next day after our Arrival at *Muſco*, being the 7th. of *Febr.* the two *Priſtaffs* offered Audience to his Excellency in the *Czar*'s name, on the 9th. but the next day after defer'd it till the 11th. His Exc. being in the mean while buſie to inform himſelf concerning the Ceremonies to be uſed at this Solemnity, ask'd them amongſt other things, whether he muſt be uncover'd in the *Czar*'s preſence; unto which they anſwered, that the *Czar*'s Ambaſſadors having lately appear'd bareheaded before his Majeſty of *Great Britain*, his *Czariſh* Majeſty could expect no leſs from him; unto this the Ambaſſador replied franckly, that having receiv'd particular orders from the King his Maſter to do ſo, he was oblig'd not to diſpute that point with them, but that otherwiſe it might very well be queſtioned, whether the *Czar*'s Ambaſſadors, who were profeſs'd Slaves, and ſo ſtiled in their Credentials, could repreſent the Perſon of their Prince in the ſame degree as he did. He alſo deſired Audience of the Great Dutcheſs, and the two young Princes, the eldeſt of which was not above ten Years old; but this was refuſed, it being not the cuſtom for the *Czar*'s Sons to appear in publick till they are 12 Years of Age, then they are expoſed to the publick view of the People.

The day of our Audience, which was the 11th. of *Feb.* being come, 130 of the *Czar*'s Guards, and 60 Sledges were ſent to carry the Preſents deſigned for the *Czar*; the two young Princes, *Knez Alexis*, *Alexiowitz*, and *Pheodor Alexiowitz*, beſides which there were alſo ſome Preſents from the Queen to the Great Dutcheſs, and ſome his Excellency preſented from himſelf to the *Czar*. They conſiſted in Veſſels of Gold and Silver, in Cloths, Velvets, Satins, and Damasks of ſeveral colours; beſides conſiderable quantities of Stuffs and Table-Linen, two Gold Watches, three Clocks, two pair of Piſtols, one Gun, two Carabins, ſix pieces of caſt Cannon, a great quantity of *Corniſh* Tinn, and a 100 piggs of Lead. The Plate was carried by 24 Men, the Cloth by 60, 10 Men more were employed in carrying the Velvets, Satins, and Damasks, 26 for the Stuffs and Table-Linen, and 10 more for the Guns, the Piſtols, the Watches and the Clocks; The Sledges carried the Cannon, Tin, and Lead. Two Sledges were alſo brought for the Ambaſſador and his Son, and white Horſes for the Gentlemen. We ſet out from our Houſe about Ten a Clock in the Morning in the following order, The Gentlemen of the Ambaſſadors Retinue, being joined with ſome *Engliſh* Merchants, all richly clad, with Plumes of Feathers in their Hats, appeared alſo on Horſe-back two and two in a Rank: After theſe came my Lord *Morpeth* in his Sledge betwixt the two *Priſtaffs* in their Robes; my Lord *Morpeth* was followed by two Trumpets, thoſe by ſix Pages and 12 Foot-men. His Excellency himſelf appeared that Day in Black, with a very rich Diamond Hat-band on his Hat, betwixt two of the principal *Boyars* in their Robes, each in his Sledge: In the Ambaſſadors Sledge was the Secretary and chief Interpreter, both ſtanding uncovered, the firſt carrying upon his hands the Credentials written upon Parchment, upon a piece of Damask, the Superſcription which contained all the *Czars*'s Titles, being done in Letters of Gold.

In this order we paſt along throw the Guards which had lined the ſtreets on both ſides. Near the Caſtle Gate we ſaw another Regiment of *Strelitzes*, and not long after in the out Court of the Caſtle, another Regiment drawn up in good Order, with a good number of Cannon planted on each ſide as if they were ready to diſcharge. From hence we were conducted into another Court filled alſo with Guards, but as we came to the Gate through which we were to paſs, all that were in Sledges or on Horſe-back were forced to alight, and to lay aſide their Swords, which was the reaſon the Ambaſſador and his Son had put none on that day. We had ſcarce gone a few paces, when coming to the place through which the Chriſtian Ambaſſadors are always introduced into the *Czar*'s Preſence (the Infidels being carried another way) his Excellency was Complimented by a *Boyar* in the *Czar*'s Name. From thence we paſs'd into a Stone Gallery where another *Boyar* received his Excellency with a Complement, leading into the Antichamber of the Audience Hall; here we ſaw the *Czar*'s Guard *du Corps* in moſt ſumptuous Equipages, their Velver Veſts were lined with Sables, their Caps adorned with Pearls and precious Stones, and their Hat-bands covered with Gold and Silver. At the entrance of this Audience-Hall his Excellency was again Complemented by one of the *Czar*'s Couſins; after which we opened to the right and the left, and the Ambaſſador entered firſt, after him my Lord *Morpeth*, who was followed by the Gentlemen and Pages. 1664.

It muſt needs be confeſſed, that at our firſt coming in the reſplendency of Jewels ſo dazzled our Eyes, as ſtruck us with amazement. The *Czar* being juſt oppoſite to the door, placed upon a moſt magnificent Throne, with his Scepter in his hand, and a Crown upon his head. The Throne which was raiſed 7 or 8 ſteps from the Floor was of maſſy Silver gilt and moſt artificially wrought with Pyramids and other works. His Crown (which he wore upon a Cap lined with black Sables) ſeem'd to be one entire piece of precious Stones, which run up in form of a Pyramid, with a Golden Croſs on the Spire. The Scepter was alſo beſet all over with Jewels, as was his veſt from top to bottom, at the opening before, and his Collar anſwerable to the reſt. On both ſides of his Throne ſtood four of the Talleſt Lords of the Court, each with a Battel-ax upon his Shoulder, caſting their Eyes with a profound ſubmiſſion towards the *Czar*. They were clad from top to toe with white Ermin, their Veſts, their Caps (which were ſhaped like our Muffs) nay even their Boots being covered with the ſame; they had alſo very large gold Chains hanging down from about their Necks. But the moſt glorious ſight of all was the ſplendid appearance of about 200 *Boyars* cloathed in veſts of Cloth of Gold and Silver, or Velvet ſet with precious Stones, placed upon benches covered with Tapiſtry round the Hall, and raiſed about 4 foot high from the Floors. Near to the door of the Audience Hall, attended a great Number of *Goſes*, or the *Czars* Factors, who are furniſhed with Robes upon ſuch ſolemn occaſions. The *Czar* Perſon appear'd upon this occaſion very Majeſtick, both in reſpect of the ſplendour of his Court, and his own Perſon, being well proportion'd and in the vigour of his Age, which was not 34 compleat. The only thing which anſwered not to the Magnificence of all the reſt, was the Hall of Audience, having nothing in it worth taking notice of, except its vaſtneſs, and that the Floor was covered with Tapiſtry, the walls having no other ornaments than ſome old Pictures, and the roof very indifferently Arch'd, ſupported by a Pillar that ſtood in the middle. As ſoon as his Excellency entred the Hall, he made a profound reverence to the *Czar* ſitting upon his Throne, then ſtopping at the Pillar, he made a ſecond, and as he was ready to ſpeak he made a third, when he Saluted him in theſe words: The moſt Serene, and moſt Puiſſant Prince *Charles* II. by the Grace of God King of *England*, *Scotland*, *France*, and *Ireland*, Defender of the Faith, &c. to You moſt High, moſt Potent, and moſt Illuſtrious Prince, Great Lord, Emperor, and Grand-Duke, *Alexis Michaelowitz*, of all the Great and Little and White *Ruſſia*, Self-up-holder of *Muſcovy*, *Kiavia*, *Volodimir*, *Novogorod*, Emperor of *Caſan*, Emperor of *Aſtracan*, Emperor of *Siberia*, Lord of *Pſcove*, Great Duke of *Lithuania*, *Smolensko*, *Twerſco*, *Volinſco*, *Podolsko*, *Ughorſco*, *Permſco*, *Veatſco*, *Bolgarſco*, &c. Lord and Great Duke of *Novogorod* in the Lower Countries, of *Chernigo*, *Reſanſco*, *Polotſco*, *Reſtofsco*, *Yeroſlafsco*, *Belozarſco*, *Oudorſco*, *Obdorſco*, *Condinſco*, *Witepſco*, *Metiſclaaco*, and all the *Northern* Parts, Lord of the Country of *Twerſco*, of the *Czars* of *Cartalinſco*, and of *Gruzinſco*, and of the Country of *Cabardinſco*, of the Dukes of *Chercaſco* and *Igarſco*, Lord and Monarch of ſeveral other Dominions and Provinces, Eaſt, Weſt, and North, of which he is Heir from Father to Son, by me *Charles* Earl of *Carliſle*, Viſcount *Howard* of *Morpeth*, Baron *Dacre* of *Gillſland*

1664. *Gilleſland*, His Majeſties Lieutenant of the Counties of *Cumberland* and *Weſtmorland*, one of his Majeſties moſt Honourable Privy Council, and His Extraordinary Ambaſſador, ſends Greeting, and has commanded me to deliver theſe Letters (the Credentials which he held in his hand) to Your Imperial Majeſty. And whilſt theſe words were explained with an audible voice by the Interpreter, the Ambaſſador advanced to the Throne to preſent them, which he delivered to the Chancellor. His Excellency was no ſooner returned to his former ſtation, but the *Czar* roſe up, and all the *Boyars* following his example, their Veſts of Tiſſue made ſuch a ruſſling and a noiſe againſt one another, that we were not a little ſurprized at it. After a ſhort pauſe, the *Czar* began to enquire after his *Majeſty of Great Britains* Health, which was repeated by the Chancellor, by reaſon of the two great diſtance betwixt the *Czar* and the Ambaſſador? Who anſwered, The moſt Serene and moſt Potent Prince *Charles* II. by the Grace of God, King of *England*, *Scotland*, *France*, and *Ireland*, Defender of the Faith, &c. was through the Mercy of the Omnipotent God, in perfect Health, the 20th of *July*, 1663. when I had the honour to kiſs his Royal Hands at my departure. Theſe words were no ſooner Interpreted to the *Czar*, but he roſe up again, and askt, *How does the deſolate Widow of that glorious Martyr*, Charles *I.* Unto which the Ambaſſador having made a ſuitable anſwer, he made the following Harangue in *Engliſh*, which was by his Interpreter tranſlated, period by period, his Excellency makes a pauſe for that reaſon at the end of every Sentence.

Illuſtriſſime atque Excellentiſſime Princeps Imperator,

The Ambaſſador's Speech to the *Czar*.

PErvenit nuper ad Sereniſſimam ſuam Majeſtatem Dominum meum Clementiſſimum perhonorifica Legatio, cujus quidem ſplendor uti magnificentia tanti Principis unde eſt profecta digniſſimus extitit, ità & argumentum Ei ad quem miſſa eſt longè erat gratiſſimum. Utpote quo, præter optatiſſimum de proſperâ valetudine Veſtrâ & rebus ſecundis nuncium, gratulatio quoque de Letiſſimo Ejus in Regna ſua Reditu, & ſumma Sereniſſimæ ſuæ Majeſtatis felicitate. Commemoratio antiquæ inter Auguſtiſſimos Utriuſque Majores amicitiæ, & perſeverantia Veſtra in eâdem colendâ atque in futurum augendâ continerentur. Itaque inæſtimabilis ille intimi animi Veſtri affectus tam luculentæ Legationis honore expreſſus & illuſtratus inſtar gemmæ clariſſimæ videbatur, cui poſtquam Natura ultimam manum impoſuit; perfectiſſima quoque artis politura acceſſit. Vel, ut de nuncio tam opportuno dicam, quod Solomon Regum prudentiſſimus de verbo commodè dicto, erat velut aurea mala cum figuris argenteis. Unum tamen eſt de quo Sereniſſima ſua Majeſtas cum Majeſtate Veſtra Imperatoria & meritiſſimò quidem conqueritur, præoccupatum ſeſe beneficio & Majeſtatem Veſtram Imperatoriam præripuiſſe ſibi, ne (quod ſemper animo deſtinaverat) Majeſtatem Veſtram Imperatoriam eâ celebritate & pompâ quæ ſummam Utriuſq; amicitiam deceret & dignitatem primus ſalutaret. Ego verò, ſi tantulum à Domini mei Sereniſſimi ſententiâ diſſentiri liceret, dum Utriuſque pares annos, communes rationes adeoque conſimilia ſtudia atque affectus conſidero, Neutri Veſtrûm priores in hoc officio partes tribuendas, ſed in excellentiſſimis Amborum mentibus eaſdem cauſas uno momento eandem utrobique Voluntatem excitaſſe crediderim. Sed & aſtrorum, quorum fulgores Majeſtatum Veſtrarum lucem optimè adumbrant, efficacitas pro variâ corporum intermediorum naturâ ſuſpenditur & retardatur: Nec amici, quorum nobiliſſimum exemplar in Majeſtatibus Veſtris reſplendet, tam commodam & opportunam rationem hactenus inire potuerunt, ut abſentes mutua mentis ſenſa condicerent, & pariter repræſentarent. Quum igitur alteri neceſſariò de tempore concedendum eſſet, Sereniſſima ſua Majeſtas minùs laborat quod eò ſe præverterit Imperatoria Veſtra Majeſtas, dummodo (quod nunquam fieri patietur) conſtantiâ etiam & ſinceritate affectûs Ipſum antecedat. Neque verò gravatur Sereniſſima ſua Majeſtas, uti ſolet inter amicos, rationem conſilii ſui reddere, & juſtiſſimis ſuis excuſationibus adverſus Majeſtatem Veſtram Imperatoriam uti, ſolam nempe negotiorum domeſticorum molem obſtare potuiſſe quo minus honorem hunc, quo dum Majeſtatem Veſtram Imperatoriam afficit Se ipſum impertit, maturiùs Majeſtati Veſtræ Imperatoriæ deferret; Et quum compluribus Principibus ſibi propioribus eodem beneficio prior eſſet obligatus, Se tamen interpoſuiſſe omnibus Majeſtatis Veſtræ Imperatoriæ remunerationem, utpote quo Neminem benevolentiâ & amore magis propinquum haberet; Se denique ab omni tam debiti officii dilatione tantùm abfuiſſe, ut occaſionem modò idoneam perſolvendi illud Majeſtati Veſtræ Imperatoriæ captaverit. Quamvis enim Sereniſſima ſua Majeſtas non ſoleat ex ſyderum motu conſilia ſua ſuſpendere, aut ex Cœlorum ordine de rerum ſuarum ſucceſſu ſuperſtitioſè hariolari, ſolet tamen ex Omnipotentis Dei nutu totus pendere & ad ejus Cœlorum ejuſdem & Regis felicitatis authoris ſignificationes actiones ſuas (ut ità dicam) modulari. Poſtquam igitur divinâ Benignitate in pleniſſimâ eorum omnium poſſeſſione Se conſtitutum vidiſſet quæcunque ſummam ornare poſſent fortunam & cumulare, hoc tandem uti auſpicatiſſimum tempus elegit quo potiſſimùm Imperatorem tam Illuſtrem, Fratrem, Amantiſſimum, & Chariſſimum Amicum ſalutaret, & Majeſtati Veſtræ Imperatoriæ eandemvel ſi fieri poſſit majorem etiam felicitatem auguraret. Quum enim in his tribus, Hoſtium Terrore, Subditorum Obſequio, & Amicorum multitudine atque conſtantiâ præcipuum Regalis Solii firmamentum & robur conſiſtat, liceat omnino affirmare Sereniſſimum Regem meum, qui in rebus adverſis admirandum undequaque virtutis & fortitudinis ſuæ ſpecimen dederit, nunc etiam è contrario ad miraculum uſque melioris fortunæ eſſe evectum. Quod enim Inimicos attinet nemo inventus eſt qui recentem Ejus felicitatem interpellare voluerit, præter infames iſtos Prædones Africanos Chriſtiani Nominis & Humani generis hoſtes, quos igitur quamvis bis mille paſſuum millibus diſtantes in illa ſua ſpelunca Algerienſi obſedit; Naves eorum partim cepit, partim depreſſit, captivos liberavit, & piratas nefarios ſuis conditionibus in poſterum aſtrinxit. Subditi autem Sui tam diu Tyrannorum & Perduellium vi & artibus decepti atque oppreſſi, poſtquam eorum ſupplicio manus commodaſſent, eò alacriores in Clementiſſimi Regis ſui fidem redierunt, & aluerunt antiquâ obedientiâ nuperæ Rebellionis maculam. Quoad Amicos denique uti cum nullo Principe Chriſtiano inimicitias exercet, ità vix Ullus eſt Eorum qui non honorificentiſſimè per Legatos Eum appellaverit, & in arctioris neceſſitudinis nexum accipi petierit, eâ ante omnia pactione interpoſitâ (quod etiam fecerunt) ut ſicubi in eorum Ditionibus deliteſcerent execrabiles illos fugitivos & parricidas dederent, qui Glorioſiſſimi Parentis Sui ſanguine manus cruentaſſent. Si verò ſuper hæc de Imperii ſui magnitudine diſſereret liceret hereditariis quæ ab Auguſtiſſimis ſuis Majoribus crevit in Europâ Regis alias etiam in Africâ, Aſia, atque Americâ Provincias Ipſe ſubjunxit, & hodierni Imperii fines protulit, ultrà quàm priorum infortuniorum rumor pervaſerit. Disjunctiſſimas illas Regiones Oceano tanquam Ponte Suo continuat, & Naves Suæ (quoties Ei videtur) ad remotiſſimos Orbis habitabilis fines mobilem Imperii ſui limitem circumferunt & tranſmittunt. Quamvis autem hæc Ditionum laxitas animi ſui magnitudini conſentanea videatur, Subditorum regimen prudentiæ & juſtitiæ Suæ proprium exiſtat, & hoſtium ſubjectio tantæ fortitudini inſuavis eſſe nequeat: Ille tamen utpote utriuſque fortunæ vicibus exercitatus, etiam victoriam faſtidire poſſet uti ſanguine commixtam, & regimen potiùs relaxare quàm humani generis libertatem nimis circumſcribere: imò quamtumvis ampla Imperii ſpatia, tamen angeſtiora ſunt capaciſſimæ mentis meditationibus quibus Deum Optimum Maximum horum omnium datorem complectitur. Nec tamen hiſce omnibus quæ per ſe præclara ſunt atque eximia victoriâ dominatu poſſeſſionibus tantùm ſibi placet quantùm amicitiarum fide atque conſtantiâ. Ipſe enim quantus eſt totus à Naturâ factus & ab Experientia educatus eſt ad amicitiam. Neque ego tam imperfectâ narratione res adeò conſpicuas & pervagatas perſtrinxiſſem, niſi hæc præſentis Suæ magnitudinis commemoratio Eum uti Amicum tantò præſtantiorem commendaret & cum gratitudinis argumento eſſet conjuncta quam erga Amicos ſuos profitetur, quorum ope res Suæ adverſæ tolerabiliores olim reddebantur, & qui nunc etiam veriſſimum ſaporem & guſtum meliori Suæ fortunæ conciliant. Et in Eorum numero quis eſt qui Majeſtati Veſtræ Imperatoriæ non dicam anteferri ſed omnino cum Ea conferri mereatur? Sive enim Principis Majeſtatem, ſive antiquitatem amicitiæ, ſive recentia beneficia æſtimemus, nulla eſt arbor quæ aut viridiorem & latiorem umbram porrexerit, aut altiores radices egerit, aut fructus uberiores & ſuaviores ediderit. Solet ſæpenumero Majeſtas ſua Sereniſſima inter Nos qui ſemper Ei proximi regiorum ſermonum oracula captamus, non ſine ſummâ ſua voluptate narrare, ut ante centum annos ex Auguſtiſſimis Suis Majoribus unus Edwardus Sextus heroico incæpto claſſem & homines emiſerit, ut in Mundi fines inquirerent, & ignotas adhuc Gentes commercio miſcerent. Hi feliciſſimo ſucceſſu Maris Septentrionalis, quod ad illa uſque tempora imperium credebatur, ſecreta & ſinus perveſtigarunt donec uti olim Iſraelitas per eremum clariſſimi ignis ità illos continuæ dieì columna per illa Oceani deſerta ad Oras Veſtras deduxiſſet. Hos demum verum magnetis uſum reperiſſe dixeris, & acus illa divina, tunc primùm quievit invento quem per tot ſæcula fruſtrà indicaverat Veſtro Septentrione. Eluctatis tandem Maris difficultates duplex adhuc reſtabat nec levius periculum, ne vel in itinere per non minora Terrarum Veſtrarum ſpatia deficerent, vel ſaltem novâ illâ Majeſtatis ad quam appropinquabant, & quam extra ſuam Regionem vix expectaverant, luce percellerentur. Attamen non ſolùm recreati ſunt (prout æquum eſt) Imperatoris qui

1664.

1664. *qui tunc temporis regnabat humanitate, sed etiam in præmium Commercii ex isto latere Vestri Orbis tunc primùm aperti ea Privilegia à munificentiâ Ejus acceperunt, ex quibus Utraque Natio non mediocria deinceps commoda & utilitates percepit. Et ab illâ origine hæreditaria & sincerissima amicitia mutuis beneficiis exculta à Patre ad Filium usque ad Majestates Vestras jam rerum potientes descendit. Circa idem tempus alios etiam* Europæ *Principes cupido incesserat scrutandi si quid adhuc in lacinioso Naturæ sinu lateret.* Lusitanus *in* Orientali Indiæ *Margaritarum & Aromatum thesauros detexit, nulla tamen aromata quæ suavitate, aut uniones qui candore exæquent, quod præsens* Lusitania *Rex apud Serenissimum Dominum meum deposuit.* Hispanus *autem* India Occidentali *Auri & Argenti fodinas occupavit. Adeóque cùm nihil dignum Regibus* Angliæ *reliquum videretur, invenerunt tamen quod Principibus nec avaris nec indigis ulteriores Imperii magis placeret Amicum. Et solet quidem affirmare Majestas sua Serenissima Illos optimam Omnium sortem traxisse, & nolle se Amicum suum centum annorum cum utriusque* Indiæ *gazâ commutatum. Rationisque loco proprium experimentum subjungi, quandoquidem cùm Subditi sui defecissent, Amici plerique (quod solet) tempori cessissent, & Cælum & Terra in ruinam suam conjurâsse viderentur, dum tantùm de felicitate sua consultarent, Imperatoria tamen vestra Majestas non solùm tunc Tyranni preces repulit, & omnibus qui vel minimum contagione istius rebellionis afflati viderentur præsidium suum negavit, sed Ipsum etiam copiis & facultatibus vestris promptè & benevolè sublevavit. Ideóque Serenissima Sua Majestas, uti libentissimè in manus Imperatorii vestri Legati pecuniæ quas Majestas Vestra Imperatoria Sibi suppeditaverat persolvit, ità semper in Regiæ mentis sacrario depositam retinebit, & ad ultimam Posteritatem transmittet gratissimam omnium beneficiorum Vestrorum memoriam. Et propter tot causas recentes & super solida ista & antiqua fundamenta, Serenissima sua Majestas in ipsissimis Majestatis Vestræ Imperatoriæ verbis, utpote quibus nulla vel per se magis efficacia vel Serenissimæ suæ Majestatis menti magis consona & conformia esse possint declarat,* Majestatem suam Serenissimam animadversô florentissimo Regnorum suorum statu, & sinceriſſimo illo amore, amicitiâ, & frequenti communicatione quæ inter Augustissimum & gloriosæ memoriæ Patrem suum *Carolum* Primum ab ipso Regni sui principio, & Patrem Vestrum Augustissimum gloriosæ etiam memoriæ *Michaelem Phederovicium* Imperatorem & Magnum totius *Russiæ* Ducem viguerunt & inviolata permanserunt, & summâ felicitate & tranquilliate quæ ab illâ causâ in Utriusque Ditiones redundarunt vehementissimè & ex animo cupere non solùm ejusdem affectûs continuationem, sed etiam propiorem, intimiorem, & firmiorem charissimum & fraternum amorem, amicitiam, & frequentem communicationem cum Imperatoriâ Vestrâ Majestate charissimo suo Fratre & amantissimo ut nihil ultrà esse possit. *Deum denique Optimum Maximum solum suum & Vestrum Regem veneratur, ut Imperatoriæ Vestræ Majestati longam vitam, regimen tranquillum, perpetuas amicitias, & summum Imperatoriæ Fortunæ cumulum addere velit, & largiri ultra omnium immortalium Vestrorum Majorum felicitatem, & Thronum Vestrum Imperatorium æternâ successione augustissimæ stirpis confirmare quoad Solis & Lunæ cursus duraverint.*

Serenissima sua Majestas resalutat etiam humanissimè magnum Principem Alexium Alexiovicium *Imperii Hæredem, & magnum Principem* Theodorum Alexiovicium (* duas illas Imperatoriæ Pharetræ Sagittas, quas in quemcunque gloriosum scopum Imperatoria Vestra Majestas collineare voluerit neutrâ potuerit aberrare, quos Subditi Vestri tanquam duplex pacis suæ Pignus suspiciunt, Inimici ut ancipitem belli Terrorem reformidant) *Diu est quod Serenissima sua Majestas de præclarâ Eorum indole, & virtute tam illustri genere dignissimâ inaudiverat. Ideóque valde delectatus est dum è Legatis Vestris intelligeret, Eos erga se ità affectos hâc etiam in re Paternum exemplum tam bene imitari: Quod non solum Ipse Dominus meus Serenissimus pro summo beneficio habet, sed etiam pro thesauro ingenti successoribus suis reservabit* (Certò augurans, duos illos Aquilæ *Moscovitici* Pullos, qui hactenus ad lucidissimos Majestatis Vestræ Imperatoriæ oculos visus suos exacuunt atque illustrant, justâ etiam ætate ad Vestrum exemplum alas commoturos & ad summam evolaturos altitudinem, quò vera virtus & labor indefessus magnanimam Heroum Progeniem provehere unquam & efferre potuerint.)

* *Quæ includuntur in istâ Parenthesi, & proxime sequenti, omissa fuerunt in recitatione. Principum absentiæ causâ.*

Quod ad meipsum denique attinet, uti Serenissima sua Majestas nihil mihi potest imperare quod non novo honore me augeat, ita nullum majorem mihi honorem mandare potuit hâc ad Imperatoriam Vestram Majestatem Legatione. Quum enim ex summâ Serenissimæ suæ Majestatis & Augustissimorum Majorum suorum munificentiâ multas possessiones & hæreditarios dignitatis gradus sim adeptus (quibus alios tamen mihi exæquare potuissent) absit verbo invidia, præter Solem assiduum illum inter Imperia Vestra Legatum, nemo est qui in hoc munere jure mihi præponi possit aut anteferri. Cùm igitur particeps hactenus & testis Imperatoriæ Vestræ Majestatis gloriæ & serenitatis (quæ augeri usque & perpetuari voveo) factus fuerim, nihil ultrà est quod exoptem, nisi ut Majestas Vestra Imperatoria eodem porrò favore me velit dignari ad Serenissimæ suæ Majestatis mandata conficienda, in mutuum Utriusque Imperatoriæ Coronæ commodum & Posterorum utilitatem. Ad quam rem ut omni humillimi officii atque erga Serenissimam suam Majestatem obsequii nexu obstringor, totum animum, studium atque industriam meam, prout inceptum tam laudabile postulat, adhibebo. Neque dubito Majestatem Vestram Imperatoriam vicissim tales Viros delegaturum, qui candore, & affectu, celeritate etiam agendi ad tantum opus maturandum maximè sint idonei.

1664.

Most Excellent and most Renowned Prince and Emperour.

HIS most Serene Majesty, my most Gracious Lord and Master, hath lately received from Your Imperial Majesty a most honourable Embassage, the splendour of which as it was most worthy the magnificence of so great a Monarch from whom it proceeded, so the subject was most acceptable to Him to whom it was directed. For as much as it contained, together with the most welcome news of the health and prosperity of Your Imperial Majesty, Your joy for His happy Restauration to His Kingdoms, your memory of the ancient friendship betwixt the glorious Predecessors of both your Majesties and your own most constant resolution to continue and increase the same for the future. So that the inestimable worth of your Imperial affection being expressed and set off by the honour of so conspicuous an Embassie, seemed as a Jewel to whose value nothing could be added by Nature and Art, hath appropriated its utmost perfection. Or rather what the wisest of Princes said concerning a word fitly spoken, your seasonable Imperial Message was like apples of gold in pictures of silver. One thing onely his most Serene Majesty complains of, and not without reason, that Your Imperial Majesty hath thereby prevented Him, and whereas he had nothing earlier in his Royal intentions than to have saluted you with that solemnity which belongs to the greatness of both Your Estates and Friendship, that he must now be the last to perform it. Yet doubtless, considering the parity of Your Years, the conformity of Your Interests, and consequently the sympathy of both Your Inclinations, there was herein neither first nor last betwixt you, but in one instant the like causes must in Your Princely breasts have produced the same resolutions. But even the influence of the celestial luminaries, those truest Emblemes of Majesty, is suspended by the various disposition of inferiour bodies and friends; of whom Your Majesties are the best pattern, although they think the same things could never yet invent so punctual an happiness, as to interchange those thoughts at one and the same minute. Seing therefore the prevention must fall on one side, his most Serene Majesty is content that your Imperial Majesty hath gained the advantage of time upon Him, so that he may not come behind you as he never will in the truth and sincerity of his affections. And therefore as is usual among Friends, he hath thought fit to render you a reason of his actions, and to alledge his most just excuses, that nothing but the multiplicity of his Royal domestick affairs could have so long retarded the honour he receives and pays in sending to you: That in order to this Embassage to your Imperial Majesty he hath postponed the return to other Princes nearer to Him, though none have a situation closer to his heart than your self, and that he hath been so farr from admitting any delay herein, that he hath only watched the most proper opportunity to acquit himself of so due an Obligation. For though his most Serene Majesty consults not the starrs and the position of the heavens as oft as he would undertake any great action; yet he asks counsel of him that is the Creator of them and the first mover of his felicity. And therefore finding himself now stated by his Almighty Grace and Providence in full fruition of all the blessings that can crown a Soveraign head, he hath chosen this as the most fortunate hour to salute so great an Emperour, Friend and Brother, and to congratulate and augurate to Your Imperial Majesty a perpetuity of the same, or, if it may be, greater happiness. For if Victory over Enemies, obedience of Subjects, and multitude of Friends be, as doubtless they are, the greatest strength and ornaments of the Regal Throne, certainly his most serene Majesty having been a miracle of courage and æquanimity in his adverse fortune is at this day a greater miracle of prosperity. For as for Enemies none hath provoked or tried his power, but those infamous Pirates of *Algier*, Enemies of Christianity and mankind, whom therefore at two thousand miles distance he blocked up in their own dens, destroyed their ships, battered their forts, rescued the captives, and forced those miscreants to his own conditions. For his subjects, they have gladly assisted to the punishment of those Traytors and Tyrants, which so long oppressed and misled them, and with so much more veneration and duty to pay their homage unto their natural most Gracious Sovereign, and have with their

1664. their ancient loyalty waſhed out the ſtains of the late Rebellion. And for Friends as he hath no Chriſtian Prince at enmity with him, ſo is there ſcarce any of them but have addreſſed themſelves to him by extraordinary Embaſſages, and have upon their deſires been received into his nearer Alliance; Covenanting firſt to deliver up (as they have done) thoſe deteſtable fugitives who were imbrued in the blood of his moſt glorious Father. And if after all theſe things there were leiſure to diſcourſe of the largeneſs of his Dominions, he hath to his Hereditary Kingdoms in Europe, Himſelf added ſeveral Provinces in Aſia, Africa, and America, beyond whatever was acquired by his immortal Anceſtors. The Sea is his Bridge betwixt ſo diſtant Territories, and as oft as he pleaſes, his Navies do carry a moveable Fronties to all the habitable World: ſo that the Fame of his former affections hath not been heard ſo far as his preſent Dominions extend. But though the Extent of Empire be conſonant to the greatneſs of his mind, the Government of ſubjects natural to his Prudence and Juſtice, and Victory over Enemies muſt needs be guſtable to the height of his Courage, yet he, a Prince ſo well exerciſed in the viciſſitude of humane affairs, could even diſreliſh Victory, becauſe it taſtes of Blood, and relax his Government rather than it ſhould oppreſs the Liberty of Mankind, and looks upon whatſoever Extent of Dominion, but as a confinement of thoſe more capacious thoughts wherewith he adores the Author of all theſe mercies. Nor values he himſelf therefore ſo much upon all theſe things though in themſelves excellent and deſirable; not upon the largeneſs of his Territories, nor the Tranquility of his Kingdoms, nor the fortunateneſs of his Arms, in compariſon of the conſtancy of his Friends. He hath himſelf been faſhioned to it by experience, and is by nature all made up of friendſhip. Nor ſhould I have made this defective rehearſal of things ſo univerſally known, did not the commemoration of his preſent Greatneſs ſhew him to be the more conſiderable Friend, and imply the gratitude he profeſſes to thoſe his Friends who formerly made his adverſity more tolerable, and do now give the trueſt ſeaſon and ſweetneſs to his better fortune. And among all thoſe Friends, who can be preferred, or who indeed is comparable to Your Imperial Majeſty? For whether his moſt Serene Majeſty conſider the Greatneſs of the Prince, the ancientneſs of Alliance, or freſhneſs of Obligations, what tree is there that ſpreads a deeper root, or ſheds a greener ſhade, or bears a fruit more delicious? His moſt Serene Majeſty himſelf uſeth with much delight to diſcourſe among us who have the honour to be neareſt his Sacred Perſon, how above an hundred years ago one of his Royal Anceſtors, *Edward* the ſixth, did out of an heroical mind man out his ſhips to trace out the limits of the World, and joyn the moſt diſtant and unknown Nations by intercourſe. Theſe were they that firſt diſcovered the vaſtneſs of the Northern Ocean counted till then unnavigable, who as the Children of Iſrael with a pillar of fire by night, ſo were conducted by a pillar of continual day through that wilderneſs of waters unto this Your Empire. They may juſtly be ſaid to have invented the true uſe of the load ſtone, and that ſupernatural needle then firſt reſted, at the finding out of your northern principalities, to which it had pointed in vain for ſo many ages. Having eſcaped the hazards of the Sea, they were yet in danger twice to be loſt, firſt in the remaining Journey through ſo ſpacious Dominions, and then in the brightneſs of that Majeſty which they expected not out of their own Country. But they were not only refreſhed, as it was ſeaſonable, by the Courteſie of the then Emperor, but received moreover from his munificency, and as a reward of the Trade then firſt opened and introduced on that ſide of your World, thoſe Immunities and privileges from which thence forward both the Nations have reaped no ſmall Advantage. And ever ſince a moſt ſincere and hereditary Amity hath been tranſmitted between the Succeſſors of both Princes from Father to Son, unto your Majeſties now reigning. 'Twas much about that time that other Princes had ſent out their Navies likewiſe for new Diſcoveries. The *Portugueze* found out and conquered in the *Eaſt-Indies* the Land of pearls and ſpices, though none ſo orient or fragrant as what his preſent Majeſty of *Portugal* hath depoſited by the ſide of my moſt Serene Lord and Maſter. The *Spaniard* in the *Weſt Indies* ſeized upon the mines of Gold and Silver. So that when nothing of value ſeemed left for the Kings of *England*, they found what was more adequate to the deſires of Princes who neither needed nor covered further Empire, a Friend. And his moſt Serene Majeſty is wont to ſay that his was the beſt lot of the three, and that he would not change his Friend of an hundred years for the Treaſure of both the *Indies*. And

1664. He adds for reaſon his own Experiment, foraſmuch as when his Subjects were generally revolted, his Friends as it is uſual moſt of them failed, and when it ſeemed that Heaven and Earth had conſpired his Ruin, while they were but contriving his Happineſs, he was then not only readily aſſiſted by Your Imperial Majeſty, but the addreſſes of the Uſurpers rejected, and Your protection withdrawn from all who might ſeem any way tainted with the infection of that Diſloyalty. And therefore his Moſt Serene Majeſty, as he hath readily repayed into the hands of Your Imperial Ambaſſador, thoſe Sums with which You did then pleaſure him, ſo will he always retain depoſited in the moſt Sacred Receſs of his Royal Heart, and tranſmit to his Succeſſors the memory of all theſe Obligations. And for all theſe new cauſes, and upon thoſe good and ancient grounds, his Moſt Serene Majeſty declares in Your own Imperial Words, than which none could be either more ſignificant in themſelves, or more conſonant to his Senſe, *That his Moſt Serene Majeſty taking into conſideration the Flouriſhing Eſtate of his Kingdoms, and that Intire Brotherly Love and Amity, and frequent Correſpondency which was inviolably held, and continued from the beginning of the Reign of his Royal Father,* Charles *the Firſt, of Bleſſed Memory, with Your Imperial Father of Bleſſed Memory, the Great Lord, Emperor, and Great Duke* Michael Pheoderovitz *of all* Ruſſia *Self-upholder, and the Happineſs and Tranquility thereby accruing to both Dominions, doth moſt earneſtly and heartily deſire, not only the continuance thereof, but a nearer and dearer, and firmer affectionate Brotherly Love, and frequent Correſpondency with Your Imperial Majeſty, his Dear and Loving Brother than formerly.* For Concluſion, wiſhing and praying to the Omnipotent God, His and Your only King and Sovereign, That he will grant You length of Days, Tranquility of Reign, Perpetuity of Friendſhips, and all other Imperial Bleſſings beyond the atchievements of all Your Immortal Anceſtors, and that there may never want of Your moſt Illuſtrious Line to ſit upon Your Imperial Throne, ſo ſo long as the Sun and Moon endure.

His Moſt Serene Majeſty likewiſe returns his moſt Affectionate Salutations and Friendly Congratulations to the Great Prince *Alexis Alexiovitz*, the Heir of Your Imperial Dominions and the Great *Pheodor Alexiovitz*, [*Thoſe two Shafts of the Imperial Quiver, which at whatſoever glorious mark Your Majeſty ſhall draw them, you can miſs with neither: Thoſe two Pledges of Peace to Your Subiects and a double Terror to Your Enemies.*] His Moſt Serene Majeſty had long ſince heard of their Hopefulneſs and Virtues worthy of ſo Illuſtrious a Parentage, and therefore was highly delighted to underſtand by Your Ambaſſadors that in their Affection to him alſo, they did ſo well follow their Fathers patterns, which he therefore thankfully accepts as an Obligation on Himſelf, and a Treaſure for his Succeſſors, [*Certainly augurating that thoſe two Sons of the* Ruſſian *Eagle, as they are now ſharpning their ſighe, daily at the moſt clear Eyes of Your Imperial Majeſty, ſo will alſo in due time extend their Wings after Your Example, and ſoar to the higheſt pitch that true Virtue and indefatigable Labour can carry the magnanimous Off-ſpring of Princes.*]

And now for what concerns my ſelf, as I can receive no command from His Moſt Serene Majeſty, my Moſt Gracious Lord and Maſter, but what places a new Honour upon me, ſo muſt I acknowledge that in chuſing me for this Embaſſage, He has done me as great an Honour as he could command me. For whereas from the ſupreme munificency of Himſelf and His immortal Anceſtors, I have and Inherit ſeveral Poſſeſſions and Dignities (but of which other Men might alſo be equally capable) may it be ſpoken without Vanity, the Sun that only poſts on daily Embaſſage betwixt both Your Dominions, can juſtly diſpute the Precedence with me in this Employment. So that having been thus farr made a partaker and Witneſs of the Glory and Serenity of Your Imperial Majeſty (which may it long continue) I can have nothing further in my wiſhes, than that You will ſtill vouchſafe me the ſame Favour toward the happy expedition of His Moſt Serene Majeſty's Affairs, for the mutual Advantage of both Your Crowns, and the good of Poſterity. Unto which ends, as I am bound by all the Obligations of Duty to my Moſt Gracious Prince, Lord and Maſter, ſo ſhall I bring all the Affection, Zeal and Diligence, which may befit ſo laudable an undertaking. In order to which I doubt not but Your Imperial Majeſty likewiſe will appoint me ſuch Commiſſioners, as ſhall bring the ſame Candor and Inclination, together with that diſpatch and expedition which is neceſſary for the furthering of ſo great and good a deſign.

My

1664. My Lord Ambaſſador having finiſhed his Speech, he was told, That his *Czariſh* Majeſty would do him the Honour to let him kiſs his Hand, (a Ceremony never allowed to *Pagan* Ambaſſadors) which though his Excellency would rather have been diſpenſed with, as being below his Character at that time, yet in compliance with their Cuſtom, he advanced to the Throne, and kiſſed his hand, as did likewiſe all his Gentlemen, in good order, the *Czar*'s Right Hand that was kiſſed being all this while upheld by a *Boyar*, he holding the Scepter in his left; and the Ambaſſador being ſeated upon a Form, which his *Czariſh* Majeſty called for for that purpoſe. My Lord then took an opportunity to recommend Sir *John Hebden*, (who was come along with him from *England*, and had been an Agent for the *Czar* there) to his Majeſty. *This Gentleman*, ſaid he, as he was kiſſing the *Czar*'s Hands next after my Lord *Morpeth*, *is, I ſuppoſe well known to Your Imperial Majeſty, having done You very good Service in* England, *and therefore His Majeſty has a particular Eſteem for him, and has commanded me to recommend him to You in a moſt peculiar manner, when I ſhall have next the Honour of being admitted into Your Imperial Preſence.*

After the Gentlemen had kiſſed the *Czar*'s Hand, the before-mentioned Preſents were brought in by 130 Men, and carried cloſe by the Pillar into an adjacent Room. As they paſs'd by, My Lord Ambaſſador riſing from his Seat, ſaid to the *Czar*, *His Moſt Serene Majeſty ſends theſe Preſents as a Token of his Affection to Your Imperial Majeſty, the value of which will be conſiderably augmented by Your kind Acceptance.* When the Gun was brought in, his Excellency ſaid, *This Gun I received from His Majeſty's own Hand, being very excellent in its kind; His Father of Bleſſed and Glorious Memory uſed to Shoot in it, the Relique of this Renowned Prince he thought could not be better Dedicated than to Your Imperial Majeſty.* As the pair of Piſtols paſs'd by, he ſaid, *That pair of Piſtols were alſo delivered to me by His Majeſty's own Hands, thinking, that their oldneſs would not be leſs acceptable, when Your Imperial Majeſty was acquainted, That they were the ſame, which, after His Exile He made His Triumphant Entry with in His Metropolitan City of* London. After theſe, the Plate was brought in, and among the reſt, a great Silver Baſin Gilt, ſupported by two Men; the others came after theſe, as well thoſe intended for the *Czar* as the two Young Princes; then the Queens to the Great Dutcheſs, and at laſt the Ambaſſadors.

The Audience being ended, his Excellency was reconducted to his Houſe, and (according to Cuſtom) entertained with the *Czar*'s own Meat, of which there were above 100 Diſhes, and Wine, Brandy, and Mead, in great plenty. A certain *Boyar* was alſo ſent by the *Czar* to take care of the Ceremonies to be obſerved at this Entertainment, the chiefeſt of which was to drink Healths, which were all ſet down at length in a Paper. His Excellency was ſeated at the middle of the Table in a Chair of State, with my Lord *Morpeth* on his Right and Sir *John Hebden* on his Left ſide, both at each end of the Table; at a pretty good diſtance from the Ambaſſador, the *Muſcovites* ſat at the oppoſite ſide of the Table, which was ſquare. My Lord made uſe of a Dozen of his own Silver-Gilt Plates, at which the *Boyars* ſeem'd not very well pleaſed, but were diverted by his Excellencies Charming Converſation, and our Muſick. The firſt Health begun by the *Boyar*, who ſupplied the place of Maſter of the Ceremonies, was the *Great Duke's* Health, and then the King of *England*'s, which he drank off with extraordinary cheerfulneſs, becauſe the Ambaſſador preſented him with the Cup, which was Silver-Gilt, and ſo he went away.

The Ambaſſadors ſecond Audience.

The 13th of *Feb.* The Ambaſſador had a ſecond Audience of the *Czar*, this being the firſt Day appointed for the Conference with the *Muſcovite* Commiſſioners. We were conducted to Court in the ſame manner as before, but the Audience Room was much finer Carved and Gilt on the Roof, with good Pictures, pretty handſome Windows, and very rich Tapeſtry. The *Czar* was ſeated upon a Throne, not above two ſteps high, with the Crown on his Head, the Scepter in his Hand, and the Imperial Globe at his Right Side. This being a Private Audience, the *Czar* enquired after the Ambaſſador's Health, and told him, That he having underſtood his Majeſty's Intention out of his Letters, he had nominated Six Commiſſioners to Treat with him. After a quarter of an hours ſtay, during which the Ambaſſador ſtood very near the *Czar*, but uncovered, he went into the Apartment where the Commiſſioners expected his coming; he delivered to them two Memorials, one concerning the promiſed Satisfaction for the Affront put upon him before his Entry; the ſecond, about the reſtitution of the Privileges formerly granted to the *Engliſh* Merchants. The firſt, contains in Subſtance, 'That after the Ambaſſadors arrival at the 'Taws, within 5 Verſts of *Muſco*, notice having been gi-

The firſt Memorial delivered by the Ambaſſador.

'ven him to be ready for his Entrance by 9 a Clock the 5th 1664.
'of *Feb.* he had accordingly got himſelf and his Train
'in a readineſs againſt the appointed time, notwithſtand-
'ing which he had been detained in a Nauſeous place,
'without Meat or Drink: That when Orders were ſent
'at laſt for their departure, they were led through By-
'ways, till inſtead of Entring the City, they were Or-
'dered to Lodge in a mean Village, at three Verſts di-
'ſtance from *Muſco*: That he thereupon thought himſelf
'obliged to give an account of it to his *Czariſh* Majeſty,
'and to deſire due Satisfaction, but before he received
'anſwer to the ſaid Letter, a *Diack* being ſent by the
'*Czar* to excuſe the matter, and to promiſe Satisfaction,
'he had accordingly made his Entry the 7th of *Feb.*
'But, no due Reparation being offered hitherto for the
'ſaid Indignity, by which he had been detained a whole
'Day from Entring upon the Buſineſs he was entruſted
'with by his *Britannick* Majeſty, whoſe Honour did
'daily, and was likely to ſuffer more and more by it,
'without a Publick Satisfaction; he thought it his utmoſt
'Duty, as he was anſwerable with his Head to his Royal
'Maſter, if he ſhould paſs ſuch an Affront by in Silence,
'to deſire his *Czariſh* Majeſty to have an Authentick
'Narrative drawn of the true reaſons of the ſaid Diſ-
'order, of the Names of thoſe that were concerned
'therein, and what example of Juſtice his Majeſty had
'ſhew'd upon them, and to have the ſame delivered un-
'der the Commiſſioners Hands and Seals to him for his
'Juſtification.

The Second Memorial concerning the Privileges, con- The ſecond Memorial.
tained, 'That, whereas the Foundation of the good
'Correſpondence betwixt the Kings of *England*, and
'*Ruſſian* Emperors, was laid in the Privileges granted by
'the ſaid Emperors to the *Engliſh* Merchants, who were
'the firſt that eſtabliſh'd the Traffick at *Archangel*, to the
'great and mutual Benefit of both Subjects, but
'eſpecially of the *Muſcovites*, his Majeſty of *Great Bri-*
'tain being willing to improve the Brotherly Amity
'ſettled betwixt their Anceſtors, and conſidering that the
'before-mentioned Privileges have proved the moſt proper
'and permanent grounds of that perpetual Friendſhip,
'had commanded him to deſire the Reſtitution of the
'ſaid Privileges, as they had been enjoyed in the time of
'the Father of his *Czariſh* Majeſty, and in the Reign
'of his preſent Imperial Majeſty, before they were taken
'away by the late Rebellion.

The 17th. The Ambaſſador had a ſecond Conference with the Commiſſioners, who reading their Anſwer to him, but refuſing to give him a Copy of it, his Excellency began to ſpeak to them in pretty hard terms; at which time, it ſo happening, that a Caſement of a Window in the Room where they were fell down, and the Commiſſioners were ſo terrified thereat, that it was a long while before they could recover themſelves.

The 26th. *Pronchiſſof* brought the Ambaſſador a Copy of the Commiſſioners Anſwer, read to him the 17th. in which, as to the Reparation demanded, they (after they had extoll'd his Reception to the Skie) laid the fault of this miſhap upon the miſtake of the Meſſengers. That The *Ruſſian* Commiſſioners Anſwer to the Memorials.
after this, his *Czariſh* Majeſty not judging it convenient he ſhould make his Solemn Entry by Night, had ordered him to be Lodged near *Muſco*, that ſo he might be received with the more Splendor the next Day, and his *Czariſh* Majeſty might have the opportunity to teſtifie to all that were preſent in that City, what Amity he bore to his *Britannick* Majeſty. They further told his Excellency, That he ſtaid a great while the next Day, and that he ought to have demanded Satisfaction in that place; but that, however, the Meſſengers were chaſtiſed for their miſtake. As to the ſecond Memorial, they told the Ambaſſador, That the Privileges of the *Engliſh* at *Archangel* were taken away, becauſe they were engaged in the late Rebellion of *England*; to confirm which, they alledged, That one *Luke Nightingale* had ſecretly been ſent by King *Charles* I. to deſire the aboliſhment of theſe Privileges. They further added, That the ſaid *Nightingale* had diſcovered to ſome of the *Boyars*, a deſign theſe Merchants had laid with one *John Cartwrite*, belonging to the ſaid Company, to Rob the *Czar*'s Subjects in the *Eaſt Countries*, which deſign the ſaid *Cartwrite* had effectually put in execution not long after, and that *John Hebden* (meaning the Knight we mentioned before) had been *Cartwrite*'s Factor. Beſides this, they accuſed the Company of having neglected to furniſh the *Czar*'s Treaſury with their Commodities, and eſpecially *Tobacco*, and carried Foreigners Goods through the Counrry without paying any Cuſtoms; that this had occaſioned a general Complaint of the *Ruſſian* Merchants and Tradeſmen, that the *Engliſh* engroſs'd all the Trade, and grew vaſtly Rich, whereas the *Czars* Subjects were thereby Impoveriſh'd. They further alledged, That the Merchants unto whom thoſe Privileges were granted firſt of all being dead long

ſince

1664. since, the said Privileges were expired with them. Last of all, they began to pick a Quarrel with his Excellency concerning the Title of *Most Illustrious*, given to his *Czarish* Majesty. *Pronchissof* who had desired a *Latin* Copy of his Excellencies Speech, having pick'd out the word *Illustrissimus* to cavel upon, alledging the same to be much Inferiour to the Dignity of their *Great Monarch*, requiring his Excellency to use for the future the word *Serenissimus*, and to acquaint his *Britannick* Majesty to use the word *Serene*, instead of *most Illustrious*, in his Letters to the *Czar*. They alledged in their behalf, That all the other Princes of *Europe*, and the *Roman* Emperour himself did give his *Czarish* Majesty that Title, in confirmation of which they produced a Letter; wherein his Excellency having taken notice that the Emperour called him only *Czar*, whereas he had always Stiled him Emperour, he resolved ever after to do the same.

The Ambassadors Reply to their Answer.

The 29th. The Ambassador at another Conference made the following Reply, concerning the demanded Reparation; That considering the good order that was observed in his *Czarish* Majesty's Armies, tho' at a great distance, he could scarce conceive, that after his slow Journey from *Volegda*, and three Days stay under the Gates of *Musco*, they should not be in readiness for the Reception of the Ambassador of a Friend; and that it was more surprizing to him that his Majesty's Messengers who are used to pass through such Spacious Dominions, nay even through the *Tartarian* Desarts, should mistake their way by Day-light, within 5 Miles of the Capital City, and the *Czar*'s Residence; especially if they would consider, That certain Persons sent the same Day from the same place, to offer an Affront to Sir *John Hebden*, found the way early in the Morning without the least difficulty. He saw therefore himself under an indispensable obligation, in respect of the Honour due to his Majesty, which had thereby been exposed to the scorn of Strangers who were Eye-witness of the action, to demand due Reparation for it in his first Memorial. He told them further, That instead of the demanded Satisfaction, they had been pleased to charge him in their Answer of the 26th of *Feb.* That he had staid late, tho' several Messengers were sent to him; that perhaps these Messengers, like the former, might have lost their way; that the first Messenger he had seen that day was the *Diack* of the *Czar*'s Cabiner, who having promised him Satisfaction, he was ready in a quarter of an Hour after with his Train; and that, tho' nothing could have been more acceptable to him, than to have made his Publick Entry by Day, which if he had delayed (as he had sufficient occasion to do) till next Morning, might have succeeded according to his Wish, yet out of Complacency to his *Czarish* Majesty, he had chosen that obscurity rather than be detained longer from his Majesty's Presence. But that whereas they objected, he ought not to have ask'd Satisfaction for what had pass'd the day before in that place; he desired them to forbear these expressions, he acknowledging no other Judge in that case but the King his Master; though at the same time he was ready to confess, that if upon the word of so considerable a Person as the *Diack* of the Imperial Cabinet, he had Enter'd the City, and upon the fairest hopes given him by some of the chiefest *Boyars*, he had upon their Honour engaged into Business, and no Reparation be made, he had indeed done what he ought not, and that he positively declared that no such Satisfaction had been made hitherto. The extraordinary Honours done him by his *Czarish* Majesty at the Day of his Entry, being not to be interpreted as a Reparation for the Dishonours of the preceeding Days; and as to what they had alledged concerning the punishment of the Transgressors, he would appeal to themselves, whether, provided it was their own Case, they would look upon it as a suitable Satisfaction to the *Czar*, or a sufficient discharge for themselves; for which reasons he was obliged not to desist from his demands made in his First Memorial, of the 13th of *Feb.* Concerning the taking away of the Privileges of the *English* Merchants of *Archangel*, he told them, That whatsoever had been transacted in Publick or Private upon that account, was sufficiently known to the King of *Great Britain*, who had been very ready to interpret it to the best advantage; and though many of his Subjects, both here and in *England*, were free from the guilt of that Rebellion, and several Attestations from the Lord *Culpeper*, then his Majesty's Ambassador in this Court, of their Loyalty, and shew'd their Abhorrence of that detestable Parricide, by going into Mourning, and furnishing considerable Sums of Money, yet as all these particulars might not come to his *Czarish* Majesty's knowledge, the sending away of the *English* Merchants out of the *Muscovite* Dominions, and detaining their Effects, was lookt upon by his Majesty as an effect of the *Czar*'s Generosity, especially if what was alledged by the *Boyars*, his *Czarish* Majesty's Commissioners, concerning *Luke Nightingale*'s Negotiations, be taken in the same Sense, as had been proposed in their Reply. But that it was manifest that the said *Nightingale* did not come with any Secret Commission, his Letter being unsealed; neither was the said Letter from his Majesty, of which they might be sufficiently convinced, if they would produce it, which he desired in his Majesty's Name might be done. That what they said concerning his being always near the King's Person, was so far from being true, that his Majesty never knew, nay not so much as ever heard of him, before notice was given him of his Crimes in *Russia*, the said *Nightingale* being a Broken Merchant, a Perjured Fellow, and an Imposture. To convince them of the truth of it, he desired them to cast an Eye upon an Extract of a Letter written by King *Charles* I. of *Blessed Memory*, in Answer to the *Czar*'s Letter, dated *July* 11th, 7155, wherein he gave an account of the said *Nightingale*'s proceedings; which by reason of his succeeding Death, which followed not long after, was never sent over, but since a Copy thereof was delivered to him out of his *Britannick* Majesty's Secretary's Office. *Lastly, Whereas Your Imperial Majesty hath intimated, That one* Luke Nightingale *had presumed to Treat with Your Imperial Majesty in Our Name, and to present a Writing in Your Majesty's Office, We therefore finding Our Selves much dishonoured thereby, desire a Copy of the said Writing, that thereupon, when he shall repair into Our Jurisdictions, We may, according to Justice, proceed against him, as a Person abusing Our Name, and Treating without Our Royal Commission and Order, in prepounding Matters Repugnant to Our Royal Intentions*, 1638. He further told them, That tho' the Fellow had escaped Justice by his death, yet he desired the said Letter to be delivered into his hands, and that the *Boyars* he then Treated with might be named, that accordingly he might be able to give the better Account of it to the King. That the said *Nightingale* having been proved an Impostor, and consequently not the least account ought to be made of his words; he could not comprehend upon what account it was, the said Commissioners had mention'd Sir *John Hebden*, who had been Ten Years before disengaged from the Service of *Cartwright*, and who procured the detainure of *Nightingale* at *Musco*, till he made his escape, and afterwards died at *Riga*. He said, That however, the said *Boyars* and Commissioners had acted very prudently, in not admitting the said Sir *John Hebden* into the Conference, though required by him; they being sensible that the said Gentleman could discover the whole Truth in an instant. What they had alledged against *Cartwright*, he reply'd, If out of Revenge he had sought for Reparation abroad against his Late Majesty's Will or Knowledge, he was not to be answerable for it, at this time. But as for the Miscarriages in way of Trade charged upon the *English* Merchants, he said, It was a thing never complain'd of before; and that therefore their Allegations would have carried along with them a much greater weight, if they had named the particular Persons accused of the said Miscarriages, it being positively affirm'd by the said Merchants, That they never neglected to furnish his *Czarish* Majesty's Treasury with Cloth, Tin, Lead, Pewter, and all other Commodities of the Growth and Manufactury of *England*, at a Cheaper Rate than the *Dutch* or *Hamburgher* Merchants could, and that they have several times offered these Commodities at the same price they cost, which had been rejected, and such as had been acceped of, the Factors could scarce ever get their Monies without Bribing the *Czar*'s Officers, those that did otherwise being forced to go away without it. That concerning the complaint of their Importing *Tobacco*, the Company had taken all effectual means (each Member being under an Oath) by burning the same publickly, and otherwise to prevent it; That on the Trading of prohibited Commodities, or carrying Foreign Goods into the Country Custom-Free, they had always used all imaginable precautions, by making a strict Order, That all Transgressors should be delivered to the Emperor, and not enjoy the Protection of the Company; Nay, that to remove all occasion of jealousy, they had made a strict Order, To prohibit all Trade with the *Dutch*, *Hamburghers*, and other Foreigners. That what they alledged of the first Merchants being dead, it was always understood, That the Privileges then granted were not made to any particular or individual Persons, but to the whole Nation, and consequently to all that should succeed them in the same Quality; That it was very probable that the *Gosesy* or *Czar*'s Factors, might Petition against the Privileges of the *English* Merchants, by which they hoped to engross the whole Trade to themselves, to the great prejudice of his *Czarish* Majesty's Subjects in general, who did reap no small advantage by the *English* Trade.

1664.

That

1664. That therefore, without inſiſting further upon thoſe Matters, which might be debated in the enſuing Conferences, the whole ſtreſs of the Argument did turn upon this; that, if the Privileges were taken away upon occaſion of the Rebellion, and the impoſture of *Luke Nightingal*, the ſame being now diſcovered, and the Rebellion ceaſed, and pardoned, this was the time for reſtoring the Privileges, according to his Majeſty's deſire, when offer'd by him to acknowledge ſuch an Obligation, by renewing the ancient Orders, and making new Proviſions againſt any future Miſcarriages. That the deſire the King his Maſter had of ſeeing the ſaid Privileges reſtored, did not ſo much proceed from the great advantage his Subjects had reap'd thereby, in compariſon of thoſe of his *Czariſh* Majeſty, or from any deſire of recompence for thoſe Obligations his *Czariſh* Majeſty had received from the Crown of *England*, upon ſeveral Emergent occaſions, but as he look'd upon theſe Privileges, as the Foundation ſtone of that Amity, tranſmitted for ſo long continuance of years on both ſides from Father to Son. That his Majeſty and his Subjects did not in the leaſt doubt, but that according to his *Czariſh* Majeſty's Letter, Dated 28th of *July*, 1661. where he aſſures his Majeſty of *Great Britain*: *That as ſoon as his Ambaſſadour ſhould arrive and declare to him his Commiſſion, he would be ready to the utmoſt of his Power to give Aſſent thereto*; and, upon his *Czariſh* Majeſty's Letter of the 21ſt of *July*, 1661. where he ſays, *That he earneſtly deſired only the Continuation of their ancient Friendſhip, but a more ſtrict and affectionate Amity, and to be ready upon all occaſions to the utmoſt of his Power, to anſwer the Deſires of his Majeſty, his dear and loving Brother*; he ſaid, That theſe Expreſſions did not give them room to doubt, but that theſe Privileges would have been granted, without the leaſt Contradiction; it being not to be imagined, that there could be a Continuation, and encreaſe of the ancient Friendſhip without them. And, to convince the *Boyars*, and his *Czariſh* Majeſty's Councellours, that this Requeſt was not exorbitant, he could give them an inſtance of this kind in *England* it ſelf, where ſome 100 years ago, they being beholding for their Traffic to the *Hanſeatick* Towns, who brought divers ſorts of Commodities thither in their own Ships, had ſeveral conſiderable Privileges granted them by the King's of *England*; and notwithſtanding by length of time, the tide of Trade was quite turn'd in *England*, the ſame Privileges had been ever ſince continued, and renewed after the happy Reſtauration of his Majeſty; who could not but be fruſtrated in the moſt ſenſible part of his hopes, when he ſhould underſtand, that whereas his Subjects have recovered their former Privileges in all other places, the ſame ſhould remain unaccompliſh'd amongſt his moſt ancient Allies; and, as the King's of *England* were moſt generally the freeſt in Granting, ſo they were the niceſt of their Honours, which did oblige him to deſire a definitive Anſwer, that accordingly he might make ſuitable Preparations for his Departure.

In relation to the Title of *Illuſtriſſimus*, inſtead of their pretended *Sereniſſimus*, he alledged, That the Paper being only a Tranſlation out of *Engliſh*, not delivered into the Embaſſy's Office, but only given as a piece of Curioſity to his Majeſty's Chancellour *Evan Offanaſty Pronchiſſof*, and not ſubſcribed by himſelf, and which was reſtored to him ſince the *Boyars* were ill grounded in this Point. But however a due compariſon being made according to the Grammatical Rules betwixt the words *Illuſtriſſimus* and *Sereniſſimus*, the firſt ought to Claim the precedency, *Serenus* ſignifying in its natural Signification no more than Calm, and being properly adapted to the Calmneſs of the weather; whereas *illuſtris* implys that which is reſplendent, bright and glorious by its original Light, in which Senſe it was uſed by the Poets, and attributed to the Sun the Fountain of Light. But that, ſeeing the *Ruſſians* were not as yet arriv'd to the true nicety of the *Latin* Tongue, he could not but let them know, that indeed, ſince the Declenſion of the *Latin* Tongue from its native Purity, and ſince the World had ſtood in want of words to ſupply the modern ambition of Titles; the word *Sereniſſimus* as well as ſeveral others, had been uſhered into the Titles of leſſer as well as greater Princes; but that, ſuppoſing, (but not confeſs'd) the word *Illuſtris* had by modern uſe been forc'd to give way to *Serenus*, the addition of the word Emperour, muſt make it at leaſt of the ſame value. That, ſince they had mentioned to him the Emperour of *Germany*'s Letter to the *Czar* written in *High-Dutch*, they would find that he had not made uſe of the Title of *Durchlenchtigſter*, (the ſame with *Illuſtriſſimus*) being a Title he reſerved for himſelf; whereas the *Dutch* in their Letter to his *Czariſh* Majeſty of the 16th of *Jan.* 1663. ſtiled him *Doorlenchtigſte*, the ſame in their Language with *Illuſtriſſimus*. But that, to be ſhort, his Majeſty had in his Letter to the *Czar* made uſe of this word, according to the conſtant practice of his own Court, always joyning the ſame with *moſt High and moſt Potent*, and adding after it, *Great Lord, Emperour*, the higheſt Title that ever was, or can be given to his *Czariſh* Majeſty, the King of *England* being always willing to give to each Prince his proper Title, but out of a peculiar Amity to his *Czariſh* Majeſty to pay them in ſuperfluity, which was the reaſon he had thought fit to add the word *Illuſtrious*; in which Senſe he himſelf had alſo uſed it in the *Latin* in his Speech; ſolemnly proteſting, that by the word *Illuſtriſſimus* he had not the leaſt Intention of diminiſhing his *Czariſh* Majeſty's Titles, but only to follow the footſteps of his Royal Maſter. He further added, That ſince they were entred upon the point of Titles, he muſt acquaint them, that the moſt ancient Title of *Defender of the Faith* belonging to the Kings of *England*, had been neglected by them, he deſired that in all the Letters to be ſent to the King his Maſter, for the future, the ſame might be carefully inſerted. 1664.

The 9th of *March*, an Anſwer was given in to the Ambaſſadour, by *Pronchiſſof* to his Reply. After many cavillings about Words and certain Expreſſions, which they pretended were ſpoken ſlightingly, they denied that the Privileges of the Merchants were the Foundation of the Friendſhip betwixt the two Crowns; from thence they proceeded to enumerate the Obligations of the King of *England* to his *Czariſh* Majeſty, who in his Exile had ſent him divers Letters, and aſſiſted him (as they term'd it) with Bread and Money, whereas his *Britannick* Majeſty did not as much as offer the leaſt aſſiſtance to the *Czar* againſt the *Crim Tartars* and *Poles*, as his Father had done to his *Czariſh* Majeſty's Father againſt the *Poles*; nay, that the Merchants in *England* had denied the *Czar's* Ambaſſadours Money for his Wars. They offer'd however, That his *Czariſh* Majeſty would grant the freedom of Trade to ten *Engliſh* Merchants, to be appointed by his *Britannick* Majeſty under certain Conditions, but not, till after the Wars with *Poland* and the *Crim Tartars* was ended. Then they began to Quarrel again about the Titles, but eſpecially, that the Ambaſſadour ſhould ſay, they were not well grounded, whereas at the Conference he had call'd them *Wiſe* and *Right Honourable*, from whence they would infer, that he had made a Contradiction. The anſwer of the Commiſſioners, to the Ambaſſadour's Reply.

His Excellency at the Conference of the 22d. of *March* replyed, That, they had miſ-underſtood his words, and conſequently miſtaken the Senſe; but that, for the reſt, they acted rather like Judges, than Councellours in their Cenſures, having in their laſt Anſwer, perhaps in haſte (though they were three weeks about it) left out the uſual Complement, *as we conceive*. The next thing propoſed by his Lordſhip, was a repeated Demand of the ſo often deſired Satisfaction. His Excellency being not a little diſſatisfied at the reproach of his *Czariſh* Majeſty's aſſiſtance, he told them, That the ſame had been ſufficiently acknowledged on their ſide to all the World, but, that they would do very well to remember, that as the ſtricteſt Obligations uſed to be worn out by too much handling; ſo the good Actions too often repeated by a Benefactor. What they offer'd in relation to that now, he had no Commiſſion to treat upon that Head, unleſs it were concerning the Reſtitution of the Privileges. In anſwer to this Complaint, that his Majeſty did not aſſiſt the *Czar* againſt his Enemies, he told them, That ſeeing they did weigh the Actions of Princes by Ounces, he might with the ſame reaſon tell them, that *Charles* I. of bleſſed Memory, did lend his *Czariſh* Majeſty's Father of highly glorious Memory, beſides the Forces under *Sanderſon* 40000 Rixdollars; which were repaid, and that his preſent *Czariſh* Majeſty had lent his Royal Maſter 40000 Crowns, and they were all repaid; that beſides this the preſent King of *England* had given leave to Sir *John Hebden* to levy 3000 Horſe and Foot, which might have proved an equivalent to their Bread and Money, had it taken effect, and that it did not was not his Majeſty's fault; what they alledged concerning that he had told them, *they were not well grounded*, he deſired them to uſe the ſame Expreſſions to him, as often as they ſhould have occaſion. The Ambaſſadour's Reply.

1664. Another Memorial delivered by the Ambaſſadour.

The Ambaſſadour at the ſame time delivered to them a Memorial, containing ſeveral Demands in relation to his Majeſty's Subjects living in *Muſcovy, viz.* Satisfaction to the *Engliſh* Merchants for their old, as well as new Debts, and their Houſes; that all his Majeſty's Subjects without exception might have free Liberty to return, and that all *Engliſh* Merchants, at their Requeſt ſhould have Paſſes granted them for their Wives and Families to return. Laſt of all, he deſired another private Audience of his *Czariſh* Majeſty, in hopes of having the opportunity to repreſent the reaſonableneſs of his Demands to the *Czar* in Perſon, and to meet with a more favourable Interpretation of them at his hands, than he had done with the Commiſſioners; it was a conſiderable time, before he could obtain that Favour which they at laſt agreed to, yet under condition that he ſhould not ſpeak of any Buſineſs, which his Excellency being not ſatisfied with, as not anſwering his Purpoſe, he had Liberty granted him by the *Czar*, to ſpeak to him concerning the Buſineſs in hand; it was the 22d of *April*, when being conducted about ten a Clock at Night into the *Czar*'s own Lodging Room, he had full Liberty to Diſcourſe the *Czar* till one a Clock in the Morning, and to give more weight to the Matter, after a ſhort Preamble from himſelf, he ſpoke in the King's own Perſon as followed.

Sereniſſima atque Potentiſſima Czarea Majeſtas.

QUum decem Septimanæ effluxerint ex quo Czarea Veſtra Majeſtas negotiorum meorum curam proximis ſuis Magnatibus & Conſiliariis delegavit, & tamen indies ab optato Legationis noſtræ ſucceſſu me longiùs abeſſe comperiam; coactus ſum, quod ſolent Viatores qui Fluminis rapiditatem aut flexum ſuperare nequeunt, ad ipſum fontem contendere. Quicquid per tam ampla Imperii Veſtri ſpatia, ſive poteſtatis ſive rationis, reperitur à Czareâ Veſtrâ Majeſtate tanquam unica fonte atque origine manat & derivatur. Et uti omnium Subditorum veſtrorum eſt ſeipſos ſuáſque ſententias Summæ Veſtræ Poteſtati ſubjicere, ità neque ego rectiſſimæ veſtræ Rationi meipſum & totius negotii Noſtri judicium permittere recuſem. Mihi enim videtur Deum Optimum Maximum uti olim Salomoni, *ità Czareæ veſtræ Majeſtati non ſolùm divitias atque honores, ſed ſapientiam quoque & prudentiam largitum; ut neque ex Auguſtiſſimis veſtris Majoribus ullus cum Czareâ veſtrâ Majeſtate poſſit comparari, neque Veſtri ſimilis in poſterum aliquando poſſit exoriri. Hinc eſt quod à Czareâ veſtrâ Majeſtate ſecretò hodie audiri petierim, & impetraverim. Ità etiam magnus ille* Johannes Baſilii, *qui primus fundamenta jecit amicitiæ inter* Angliæ & Ruſſiæ *Coronas, & Privilegia illa mercatoribus* Anglis *conceſſit, ità Ille remotus arbitris cum Legatis Regum & Regnarum* Angliæ *agere, & familiarius colloqui ſolebat, adeóque Conſiliariis quibuſdam ſuis & Domino Cancellario fruſtrà renitentibus tam certas rerum ſuarum menſuras, inſiit ut ab illo tempore uſque ad Czareæ veſtræ Majeſtatis regni initia, aut ad hunc diem, nemo mutuam illam amicitiam inter Utraſque Coronas & Nationes convellere aut labefactare potuerit. Et ego qui eandem materiam & animo non minùs ſincero inter Principes, majorem etiam affectum mutuò profitentes pertracto; non dubito, quin & ipſe bono cum Deo à Clariſſima Czareæ veſtræ Majeſtatis oculis cum eodem optato Legationis noſtræ fructu ſim dimittendus.*

Quum enim cæteri omnes poteniſſimi Europæ *Principes nullo nuncio à Sereniſſimâ ſuâ Majeſtate accepto curaverint, ut Legationibus Extraodinariis gratulabundi Regiam ſuam Majeſtatem in Regna ſua redeuntem certatim proſequerentur: Regia ſua Majeſtas pro ſingulari ſua benevolentia, atque erga Czaream veſtram Majeſtatem affectu, ad Czaream veſtram Majeſtatem ſolam ex omnibus Principibus Chriſtianis prior literas dedit 10mo. Maji. Anno 1661. ante Legatorum veſtrorum adventum. Quibus Czaream veſtram Majeſtatem de lætiſſimo ſuo reditu certiorem fecit, & ſimul de Czareâ Veſtrâ in rebus ſuis adverſis fraternæ benevolentiæ gratias egit. Iiſdem etiam literis ſignificavit ſe* Johanni Hebden *Equiti aurato, tametſi nullas ad Regiam ſuam Majeſtatem à Czareâ veſtrâ Majeſtate literas, quas vocant Credentiales, pertuliſſet; ea tamen fiducia quam etiam in eodem* Hebdenio *Czaream veſtram Majeſtatem reponere credebat indulſiſſe ei petenti, ut tria millia equitum & peditum ſub Ducibus probatæ fidei & virtutis pro Czareâ veſtrâ Majeſtate in regnis ſuis conſcriberet. Illud inſuper addidit ſe Czareæ veſtræ Majeſtatis inimicis Regiorum ſuorum Miniſtrorum interventu ſignificaturum quam gratum ſibi foret, ut honeſta & firma pace cum Czareâ veſtrâ Majeſtate deciderent. Quòd ſi eorum pertinaciâ & culpâ minus ſuccederet, ſe effecturum ut & illis & toti terrarum Orbi innoteſceret, quantopere Czareæ veſtræ Majeſtati cupiat, & rationes Veſtras ſingulari cura amplectatur. Quin & magnanimitatem Czareæ veſtræ Majeſtatis prædicat, qua mercatoribus* Anglis *utpote qui nuperæ rebellionis contagione affluti viderentur, præſidium ſuum negavit, & ſimul rogat ut quoniam omnes Subditi ſui jam poſtliminio in fidem ſuam Regiam redierunt, Czareæ quoque Majeſtati placeret Mercatorum Privilegia in integrum reſtituere, & voluntatem veſtram ea in re declarare. Quod ſimul ac Czarea veſtra Majeſtas declaraverit, Regiam ſuam Majeſtatem Legatum ſuum miſſurum qui Czareæ veſtræ Majeſtatis humanitatem & benevolentiam Regio ſuo ſenſu celebraret, & omnimoda mutui affectus officia cum Czareâ veſtrâ Majeſtate reciprocaret. His acceptis Czarea veſtra Majeſtas per literas reſpondit 28. Julii Anno 1661. Czareæ veſtræ Majeſtati in votis & animo eſſe eandem amicitiam cum Regiâ ſuâ Majeſtate colere quæ inter Patres Veſtros beatæ memoriæ coaluerat, & quod ad illa attineret de quibus regia ſua Majeſtas ſe Legatum miſſurum confirmaverat Czaream veſtram Majeſtatem paratam iri, quantum in ſe aut quantum poſſibile eſſet de iis Regiæ ſuæ Majeſtati aſſentiri. Et poſt hæc Czarea veſtra Majeſtatis alteris literis 31 Julii Anno 1662. per Legatos veſtros Extraordinarios declaravit Czaream veſtram Majeſtatem animadverſo florentiſſimo ditionum ſuarum ſtatu, & ſinceriſſimo illo amore, amicitia, & frequenti communicatione, quæ inter auguſtiſſimos utriuſque Principis Patres inviolata permanſerunt, & ſummâ felicitate & tranquilitate quæ ab illâ origine in Utriuſque ditiones redundarunt, vehementiſſimè & ex animo cupere non ſolum ejuſdem affectus continuationem, ſed etiam propiorem, intimiorem, & firmiorem, chariſſimum, & benedictum fraternum amorem, amicitiam, & frequentem communicationem cum Regiâ ſuâ Majeſtate, chariſſimo ſuo Fratre & amantiſſimo ſupra quod antea fuerit cum ſumma promptitudine & animi alacritate ad obſecundandum omni occaſione Regiæ ſuæ Majeſtatis chariſſimi veſtri Fratris votis, quantum Czarea veſtra Majeſtas maximè potuerit. His luculentiſſimis & certiſſimis ex Czareæ veſtræ Majeſtatis parte teſtimoniis freta Regia ſua Majeſtas me ad Czaream veſtram Majeſtatem legavit, & quod ex Regiæ ſuæ Majeſtatis parte & ſuo mandato coram & toto mundo audiente Czareæ veſtræ Majeſtati, de pari & mutuo Regiæ ſuæ Majeſtatis erga Czaream veſtram Majeſtatem affectu expoſui procul dubio in memoria Czareæ Veſtræ Majeſtatis penitus inſedit. Czarea Veſtra Majeſtas ſtatim delegavit, qui mecum agerent, Viros ſumma nobilitate & maximo rerum uſu atque experientia pollentes, pro quo beneficio gratias quas poſſum maximas Czareæ veſtræ Majeſtati perſolvo, & utinam non minores perſolvere poſſim de eorum omnium affectu erga amicitiam inter duas Coronas & celeritate in negotiis noſtris tractandis à Czarea veſtra Majeſtate eorum curæ commiſſis. Sed illi quum primo Colloquio ex Regiæ ſuæ Majeſtatis præſcripto Privilegiorum reſtitutionem primò propoſuerim, ſignificando ſimul poſt eorum conceſſionem me alia inſuper in mandatis habere pro ſummo Regiæ ſuæ Majeſtatis affectu Czareæ Veſtræ Majeſtati retribuenda, reſponſum mihi reddiderunt tam ab omni ſpe noſtra abhorrens, & alienum, ut neque ſi Cœlum ipſum corruiſſet, uti feneſtræ Cubiculi ad ejus recitationem, bis ingenti cum fragore ſunt devolutæ magis prodigioſum & inexpectatum mihi accidere potuiſſet. Idem erat acſi omnem Privilegiorum ſpem præcidiſſent. Primò quidem nuperam in* Angliâ *rebellionem cauſantur. Poſtea affirmant Regiam ſuam Majeſtatem beatæ memoriæ per* Lucam *quendam* Nightingale *petiiſſe ut Privilegia illa reſcinderentur. Tum varias mercatorum* Anglorum *fraudes prætexunt. Deinde ſupplices literas Publicanorum & Mercatorum totius* Ruſſiæ. *Et Mercatores* Anglos *emortuos affirmant. Tandem ſecundo ſcripto Czareæ Veſtræ Majeſtatis bella cum* Tartaro Crimæo *&* Polono *objiciunt. Regiam ſuam Majeſtatem pecunias ad Majeſtatis Veſtræ bella Czareæ veſtræ Majeſtati ſuppeditar inoluiſſe. Mercatores dem* Ruſſicæ *in* Angliâ *Societatis idem Czareæ Veſtræ Majeſtatis Legatis Extraordinariis denegaſſe. Et alia quædam argumenta ad numerum faciendum aſtruunt, quorum vel unum ſi prius contra Privilegia omnimodo ſtatuntum eſt ſufficere potuiſſet; ſed ne quidem omnia unam ſatis honeſtam & juſtam cauſam componere poſſint ſi modo tam acri & profundo quale eſt Czareæ Veſtræ Majeſtatis judicio perpendantur. Quum igitur hoc modo proximi Czareæ veſtræ Majeſtatis Magnates & Conciliarii omnem in præſentia Privilegiorum ſpem præſecarent, & inſtarent ſolummodo ut alia Regiæ ſuæ Majeſtatis mandata ſecum communicare pergerem. Ego verò ſi*

1664.

1664. *si quid illi in Czareæ Vestræ Majestatis rem proponendum haberent quandoquidem hoc illis præcipuè incumbebat, commodum responsum pollicerer & de hoc solo mihi satisfieri rogarem, num si quæ ego alia in mandatis haberem digna quæ privilegiis permutari possent viderentur ipsi potestatem ea concedendi haberent, illi nullo modo aut potuerunt aut voluerunt hâc in re mihi satisfacere. Ad Czaream Vestram Majestatem provoco, quum ego plenissimas autoritatis literas quod per se sufficit à Regiâ suâ Majestate Czareæ vestræ Majestati obtulerim, & aliâ etiam autoritate à Regiâ suâ Majestate sub magno Sigillo Angliæ, ad Privilegia recuperanda essem munitus, utrum meum esset Regiæ & Fraternæ benevolentiæ arcana illis committere, qui vel nullam omnino vel tantummodo denegandi potestatem non itidem assentiendi & transigendi vim haberent. Quocirca quum negotium nostrum huc redierit, & hujusmodi responsa à proximis Czareæ vestræ Majestatis Magnatibus & Consiliariis acceperim, adeóque è nostris manibus totius rei disceptatio ad Regiam suam Majestatem & Czaream vestram Majestatem brevi sit devolvenda, liceat in quantum Serenissimum Regem & Dominum meum in hoc munere repræsento, etiam Regis sua verba hâc occasione referre & imitari, tanquam coram congredi & inenarrabiles Vestras Majestates in clarissimis alterutrius oculis splendidissimis illis veræ amicitiæ speculis simul contemplari Vobis daretur. Quantum ego quidem tenuiori nostro judicio profundissimos Regiæ suæ Majestatis sensus capere & conjecturâ assequi valeo, sic omnino esset dicturus.*

Si novum aliquid à Czareâ Vestrâ Majestate Fratre nostro amantissimo petiissem, aut ad quod Czarea Vestra Majestas se prius non obstrinxisset minori cum animi agritudine tam deliberationem Vestram tolerare & forsitan libenter sustulisse potuissem. Privilegia autem illa ultra centum annos steterunt, & duratione sua supremæ rationis, quæ primùm constituta fuerunt, soliditatem approbarunt, & rarò quidem antiquæ amicitiæ & consiliorum fundamenta sine periculo & discrimine succutere aut movere successit. Et quod ad Czareæ vestræ Majestatis obligationem attinet (ut omittam Czareæ vestræ Majestatis sub ipsa regiminis sui initia Anno 1645. per Archangeli *Præfectum ad mercatores* Anglos, *declarationem Czaream vestram Majestatem omnia sua Privilegia illis confirmare, quæ Czareus suus beatæ memoriæ Parens illis indulsisset, & non minori clementia illos amplexuram quam sub augustissimo Vestro Patre aut omnibus majoribus vestris experti fuerant) nonne Czarea vestra Majestas me redintegrationem Privilegiorum petente primis suis literis respondit Czareæ Vestræ Majestati in votis & animo esse eandem amicitiam cum Regia nostra Majestate colere, quæ inter Patres nostros beatæ memoriæ coaluerat, & quod ad illa attineret, de quibus Regia nostra Majestas se legatum missurum confirmaverat, Czaream Vestram Majestatem paratam iri quantum in se aut quantum possibile esset de iis Regiæ nostræ Majestati assentiri? Et nonne Czareæ Vestræ Majestatis Legati Extraordinarii, quum de privilegiorum restitutione ipse illos interrogassem in ea erant sententia & ità nobis dixerunt Czaream Vestram Majestatem proculdubio solenni & honorifica Legatione à Regia nostra Majestate ad Czaream Vestram Majestatem missa nostra causa mercatoribus nostris ea præstituram? Nonne etiam Czarea Vestra Majestas, per illos Legatos alteris literis à Secretiori vestro Cubiculo Czareæ Vestra manu munitis bracteata illa aureæ mentis oracula depinxit, quæ ego statim Vestri solius calami & sensus esse posse intellexi, quæque ideo tanquam adamantina cuspide Cordi nostro insculpta reservo, & Legato nostro Extraordinario mandavi, ut illa uti nostræ erga Czaream Vestram Majestatem menti maximè consona & conformia totidem verbis Czareæ Vestræ Majestati rependeret & numeraret, Czaream Vestram Majestatem animadverso florentissimo Ditionum suarum statu, &c. * Eadem amicitia eosdem tractatus proculdubio easdem utilitates includit, adeóque Czareæ Vestræ Majestatis fides prioribus illis verbis ad Privilegiorum restitutionem devincitur, nisi (quoniam illo postea limite Czarea Majestas Vestra voluntatem suam circumscribit) impossibile sit. Impossibile autem esse non potest quum Czarea Vestra Majestas tantum possit polleátque & omnimoda potestate excellat, ideoque meritissimo Autocratoris titulo insigniatur. Si quantum possibile vel quantum in Czarea Vestra Majestate est negationem significet, interpretationem istorum verborum in posterum didicero. Et quoad illa in secundis vestris literis 31. Julii Anno 1661. Quomodo ad propiorem & firmiorem amicitiam pergere possimus nisi ad priorem firmitatem & propinquitatem prius deveniamus? Si quis tamen erga nostram mutuam amicitiam male affectus, diverticulum aliquod ex modo vestro loquendi invenire posset, per quod Czaream Vestram Majestatem salvo promisso se recipere & subterfugere posse videatur; At pace Vestra dixerim Frater amantissime hujusmodi argutiæ utiles forsan & necessariæ fuerint inter Principes confines, cum quibus aperta semper bella aut pacem incertam geritis. Sed Regiæ nostræ & Czareæ vestræ Majestati utpote centum annorum amicis, & ab omni suspicionis causa alienissimis minùs honestum & decorum esset istijusmodi scobes, ut ità dicam in animabus nostris defodere, & per verborum reticula nosmet ipsos percolare. Neque illud mirum aut ab amicitiâ nostrâ absonum videatur, quod ejus vigorem & quasi fatum in privilegiorum conservatione collocaverim; ideoque Legato nostro Extraordinario mandaverim, ut ante ulteriora benevolentiæ & fraterni erga Czaream Vestrum Majestatem amoris indicia eorum petitione Vestram amicitiam prius experiatur, tametsi forsitan ad Mercatores illa potiùs pertinere videantur. Ità enim ab ipso principio privilegia illa sponte concedebantur neque gratum mihi sicuti Deo gratias, neque opus est me Majoribus nostris augustissimis minorem gerere. Quin etiam ea Privilegia nihil aliud sunt nisi constans præmium perpetui fructus & utilitatis quam Czareæ Majestates & suæ Ditiones semper perceperunt, & percipere possint ab Archangeli portu aperto & commercio invecto per Mercatores Anglos, multorum hominum navium & facultatum suarum jactura. Quamvis magni Principes etiam beneficium semel acceptum, & cujus fructus omnis cum ipso illo homine & tempore pereat in perpetuum remunerari soleant. Quod autem præcipuè me in hoc instituto nostro confirmavit, erat honoris & existimationis Vestræ (quam ego semper sanctissimam habebo) cura & reverentia, ut sicuti heroicâ quâdam magnanimitate Privilegia illa propter subditorum nostrorum rebellionem revocastis, ità etiam ea nostro rogatu & redivivâ illorum obedientiâ, renovando toti terrarum Orbi constare posset, quàm justâ proportione actiones Vestras regentis, & quantâ cum gratiâ uti magnum Principem decet collocare apud me beneficium noveritis. Istud enim ego pro beneficio habeo, quod in subditorum meorum emolumentum redundat, & si in ipso exilio nostro quid illis boni accidisset me etiam aliquâ gaudii parte tangere & afficere videbatur, fieri non potest quin post fœlicem meum reditum maximopere commoda sua procurem atque promoveam. Quorsum tot tractatus inter Principes quotidie missi in Subditorum securitatem & commodo contrahuntur? Tractatus pacis commercii auxiliorum imò nuptiarum inter Principes anne idcirco fiunt quoniam Principes illi tanquam amore capti mutuò se depereunt? an verò ad Regnorum Suorum utilitatem omnes diriguntur? Ne tamen uti ego ea pro populi nostri bono peto ità Czarea Vestra Majestas pro ditionum suarum bono abnegaret; experiamur si placet argumentorum aciem eo ordine quo temere occurrunt.*

Subditi mei rebellarunt, *At nimiæ curæ & diligentiæ esset, & Czarea Vestra Majestas negotiorum nostrorum sensum nimis extenderet, si quos ego Subditos nostros in fidem accepi, in illos Czarea Vestra Majestas pergat animadvertere; Et quum ipse Capitis loco unum deinceps cum Regnis meis corpus componam, anne quæ subditi mei peccarunt meipsum luere vultis?* Sed Anglum quendam Nightingale literas à Patre nostro beatæ memoriæ attulisse memorant, & Ejus nomine cum proximis Vestris Magnatibus de abrogandis Privilegiis egisse. *Iste* Nightingale *Proditor & Perduellis & Falsarius illâ in re erat, & novi Czaream Vestram Majestatem pro jure Genium, & uti omnes Principes suæ existimationis causâ in ejusmodi impostoris mutuò solent & debent, quoniam ipse morte pœnas evasit falsas illas, resignatas, erasas, interpolitas literas mihi traditurum. Si verò Pater meus beatæ memoriæ tunc temporis arcanâ ratione Privilegiorum abrogationem postulasset (quum è contrario optimus ille Princeps ad extremum usque spiritum pro Populo suo Deum rogaverit & ejus bono inter ultimas curas adlaboraverit, adeóque etiam literas ad Czaream Vestram Majestatem, quas inter alias suas reliquias religiosè conservo, de hac re exaraverit quibus Privilegiorum instaurationem petit, & illum* Nightingale *ut impudentissimum falsarium detestatur.) Si inquam Pater meus abrogationem, Ego verò jam instaurationem Privilegiorum efflagito.* Postea De Mercatoribus *Anglis* contra conditiones Privilegiorum agentibus multo conqueruntur. *Sed nihil probant; Legato nostro mandavi, ut contra hujusmodi facinora provideret, quorum & ipse severus vindex fuissem, utpote quæ ad existimationem nostram pertinerent.* Publicani & totius *Russiæ* mercatores supplices literas obtulisse dicuntur, quibus exponunt *Anglos* per hæc Privilegia locupletatos, se verò exhauriri & depauperari: *Quum tamen Czareæ Vestra Majestas suis literis suprà memoratis multam felicitatem, pacem &*

1664.

* Sic ut supra hic quoque literæ repetitæ fuerunt; quippe vim insignam ad convincendum habentes: quod inter cætera constat ex perpetuo insignium cum Legato agendarum hac in parte silentio.

1664. *tranquillitatem in utriuſque Imperia redundaſſe affirmet eo tempore quo* Angli *Privilegiis gaudebant, Cur non eam contra* Belgas & Cupſhinos Perſas *ſupplices literas ſcribunt? Horum enim nonnulli gaudent Privilegiis, dum* Angli *omnes illis excluduntur. Procul abſit ut ea petam cum Imperii veſtri calamitate. Gratum mihi eſſet intelligere poſt Privilegia* Anno 1649. *adempta (ſatis prolixo ad experimentum ſpatio) Populum veſtrum divitiis magis abundare. Ex Subditis autem noſtris (qui potius laudandi ſint ſi honeſtâ induſtriâ diteſcere potuiſſent) ad triginta plus minus è Societate* Ruſſicâ *intra triginta annos hoc commercium ſectando ad incitas reducti ſunt, qui tamen magnas fortunas in ditiones veſtras attulerint.* Mercatores quoque omnes quorum nomina Privilegiis inſerta mortuos aiunt, *At unus eorum adhuc in vivis eſt, quod ſatis eſt ſi illud argumentum valeret ad ea conſervanda. Ego verò intellexi Privilegia ad Succeſſores etiam extendi & Legatum juſſi recentia nomina Czareæ veſtræ Majeſtati exhibere.* Sed in aliis Regionibus ubique exteri duplex pendunt Portorium. *Unde ergo ſit quòd in* Hollandiâ *Societas* Anglorum *Adventuraria nullum pendant, domum publicam habeant, & omnibus aliis vectigalibus quæ Incolæ ipſi perſolvunt, illi ſint immunes? Unde ſit quod* Hamburgi *etiam iiſdem Privilegiis utantur, in quibus locis* Angli *multò majorem mercaturam quàm in hoc Imperio faciunt? Unde quod Mercatores* Angli *non ſolùm ipſi Portorio vacent apud* Ormuſii *Portum, ſed etiam cum ipſo* Shagh Perſiæ *aliarum ibi Nationum vectigalia dividant & ex æquo partiantur? Num* Angli *etiam mercatores has omnes Regiones depauperant?* Bellum cum Polono & Tartaro. *Ne miretur Czarea Veſtra Majeſtas ſi ad hoc argumentum poſt alia illa pene ad verbum ex reſponſo ad Tyranni illius* Cromwell *veredarium deſcripta nonnihil commoveor. Nullane ergo bella fuerunt, quum illa Privilegia primò concederentur ſub Czareâ Majeſtate* Johannis Baſilii? *Nulla ſub cæteris Principibus? Si hoſtes illi non contemnendi Czareæ veſtræ Majeſtati videantur, adeone inconſultum eſſet meam amicitiam retinere. Et anne ſex millia Rublarum annua (neque enim* Anglica *vectigalia poſt Privilegia abrogata majorem ſummam conficiunt) tanto Principi ad bellicos ſumptus tolerandos ſunt tam neceſſaria, ut Noſtra amicitiâ & Subditorum Noſtrorum commercio compenſari nequeat?* Ego verò Czareæ veſtræ Majeſtati pecuniam non commodavi. *Spero quidem tantam argenti vim cuicunque vel maximo Principi difficillimam (liceat Czareæ Veſtræ Majeſtati ſecretò illam recenſer) decies mille Podas, hoc eſt, ultra trigeſies centena millia Rublarum non ideo petitam, ut Privilegia honeſtâ aliquâ ſpecie poſſint recuſari, & impoſſibile quæſitum, ut facillima negarentur. Quò minus eſt quod poſtulatur, eo gravior eſt repulſa, & Poſteritas ad cujus tribunal maximorum Principum memoria citatur, non tam me accuſabit, qui tantum excuſaverim, quàm Czaream Veſtram Majeſtatem qui tantillum negaverit. Czarea Veſtra Majeſtas reſponſum hâc de re noſtrum à Legatis ſuis procul dubio accepit.* Mercatores quoque Ruſſiæ Societatis Legatis Veſtris petentibus multò minorem ſummam ad Bellorum impenſas repræſentare noluerunt. *Omnes in Privilegiis, uno excepto, mortui, qui vivunt Privilegiis tam diu ſuſpenſis attenuati & inopes; & Legatus Veſter* Evan Zelobuſhkee *malo ad perſuadendum colore uſus eſt, quum ſe obligaverit nunquam futurum, ut in* Ruſſiâ Angli *à vectigalibus eſſent immunes. Hæc ſunt illa ut videtur argumenta, quibus (ut Czareæ veſtræ Majeſtatis verbis utar) murum illum ahenum quaſſare aggrediuntur, qui tot annos ſtetit Majorum noſtrorum prudentiâ extructus, & nunc Czarei veſtri promiſſi conſtantiæ innititur. Et anne hujuſmodi globulis illud centum annorum opus diruetur? Hoc ergo quod Czarea veſtra Majeſtatis Legatos extra maria noſtra à freto* Ore-ſundico *navi noſtrâ tranſmitti curaverim, quod in palatio nobiliſſimi cujuſdam è noſtris Magnatibus locum illis præbuerim, quod noſtris anleis, noſtris lectis diſcubuerint, & ex Regis auri & argenti vaſis quotidie comederint? Quod honore hactenus inaudito intra dulæ noſtræ portam Regio curru invehi permiſerim, Quod ipſe quoties rogarent privatò illos audierim, & quoties volebant Conſiliariorum Noſtrorum copias illis fecerim? Non pœnitet, non exprobro, parva ſunt illa præ honore quo Czaream veſtram Majeſtatem Fratrem meum amantiſſimum proſequor. ſed ſuſpicor aliquem ex illis multò majora reticuiſſe, & de tot honoris indiciis Czaream veſtram Majeſtatem plura celaſſe. Nonne ſuper hac ad Czaream veſtram Majeſtatem legavi Conſanguineum Noſtrum & (quicquid alii dixerint) à Sanctioribus noſtris Conſiliis & hoc ab ipſo reditu noſtro Carolum Comitem* Carleolenſem *Vice comitem* Howard *de* Morpeth, *Baronem* Dacre *de* Gillesland, *Statæ militiæ Præfectum, & Locum tenentem Regium in Provinciis noſtris* Cumberlandiæ & Weſtmorlandiæ, *qui etiam ſi monitore egerem Memoriæ noſtræ perpetuò ſubjiceret quicquid in rem veſtram eſſe videretur? Nonne arcana pectoris mei illi commiſi in omnibus quibus Czareæ veſtræ Majeſtati potero commodare? Et num Czarea veſtra Majeſtas per illum mihi exiguam & fortaſſis unicam rem negabit, quam à Czareâ veſtrâ Majeſtate unquam petere poſſim, Privilegia? Hoc quidem me pœniteret, utpote magis notum & pervulgatum quàm aut cum noſtrâ aut veſtrâ exiſtimatione poſſit conſiſtere; Et totus terrarum orbis multâ cum admiratione ejusmodi fruſtrationem intuebitur, quum præſertim reputaverint quot & quanta emolumenta ab auguſtiſſimis noſtris Majoribus & ſub ſuis auſpiciis ad Czaream veſtram Coronam redierint. Illi portum veſtrum inveſtigari fecerunt & totius* Europæ *mercaturam ad Archangeli funum deduxerunt. Illi in Orientali mari, quum Principes adjacentes fœdere inter ſe facto de obſtruendâ Narva convenìſſent, Claſſem hoſtilem delerunt & Captivos Præfectis veſtris tradidère. Illi pecunias ad bella veſtra mutuò dederunt & milites & Duces vobis ſuppeditarunt. Illi pacem inter Vos & Principes vicinos conciliarunt. Illi in ſummâ annonæ caritate fruges huc tranſportari ſinebant (quas* Angli *mercatores ſine ullo compendio aut lucro incolis veſtris vendiderunt) & multa alia tam pace quàm bello neceſſaria & omnibus aliis prohibita. Poſſem etiam majus adhuc hiſce omnibus beneficium commemorare uni è Czareis Veſtris Majoribus delatum, ſi adeo dictu tempeſtivum videretur. Et ego qui Legato noſtro mandavi, ut vobis declararet propoſitum mihi eſſe omnes Majores noſtros ſtudio erga Czaream Veſtram Majeſtatem excedere Privilegiis prohibeor ſubditorum noſtrorum induſtriâ redemptis, cum maximis ſuis impenſis, jacturis, maximis in indagando, inſtruendo & hactenus continuando hoc commercium. Ego ipſe à reditu meo D^no^* Johanni Hebdon *ſine ullis Czareæ autoritatis literis in rem veſtram tria millia equitum peditumque conceſſi è flore militiæ Anglicanæ, quæ qualis ſit alii melius dixerunt. Et ſi Legati Veſtri Extraordinarii quicquam præter intempeſtivam illam & impoſſibilem pecuniæ molem petiiſſent, aut rerum Veſtrarum conditionem melius expoſuiſſent, Ego nullo modo Czareæ Veſtræ Majeſtati defuiſſem. Tamen antequam Legatum meum mitterem quam potui rerum Veſtrarum notitiam aliunde comparavi. Comperi* Polonum *adhuc vos infeſtare; Inter Czaream Veſtram Majeſtatem & Suecum pace factâ quædam tamen diſcordiæ ſemina adhuc pullulare. Alia quædam didici de quibus mecum meditando credidi propter cauſas, Majeſtati Veſtræ non ignotas, noſtram inter Czaream Veſtram Majeſtatem & Illum interpoſitionem minus gratam Ei futuram: Præterquam quod & Ipſe mecum reputavi ſolum, cum nullam ad me de lætiſſimo reditu gratulatoriam Legationem adornaſſe, ut neque ego cum dignitate noſtrâ Illum ultro potuerim compellare. Inter Czaream Veſtram Majeſtatem & Regem Sueciæ interventum noſtrum magis opportunum eſſe poſſe & utrobique acceptum ſperavi, ſi operæ pretium videretur latentes contentionum ſcintillas antequam flammam darent comprimere & reſtinguere. Conſideravi præterea quanta nobis copia eſſet & ſemper ſit futura Ducum & militum, navium armatarum, apparatus & inſtrumenti bellici, quantum ſemper autoritatem & influxum habiturus eſſem in pleroſque* Europæ *aut etiam extra* Europam *Principes qui Czareæ Veſtræ Majeſtati nocere aut incommodare poſſent, & de hiſce omnibus mandata neceſſaria dedi Legato noſtro Extraordinario. Et proculdubio quum Ipſe à Czareâ Veſtrâ Majeſtate beneficio affectus fuerim, quum talia in literis promiſerim (quibus Ego ſanè me obligari ſentiebam) quum talem Virum ad Czaream Veſtram Majeſtatem legaverim, Czarea Veſtra Majeſtas neque in rebus hujuſce nec aliis naturæ quæ mihi non potuerunt ſuccurrere me ingratum aut immemorem inveniſſet.*

1664.

Quum hæc tanquam ex ipſo Regiæ Suæ Majeſtatis ore pro noſtrâ tenuitate Czareæ Veſtræ Majeſtati repræſentaverim haud deceat ex noſtro aliquid addere aut ſubtrahere, ſed Czaream Veſtram Majeſtatem ſolùmmodo rogare, ut de hiſce ſeriò & maturatè pro Summâ illâ Prudentiâ quâ Deus Czaream Veſtram Majeſtatem impertivit, Ipſe deliberare & decernere velit, & brevem expeditionem mihi indulgere, ut primâ cum anni tempeſtate, quod Regia ſua Majeſtas mihi injunxit, iter incipere poſſim.

Actum *Moſcuæ*, 22. *Aprilis* Anno Dom. 1664.

CARLISLE.

May

1664.

May it pleaſe Your moſt Potent and moſt Serene Tzarskoy *Majeſty.*

HAving continued here ten weeks ſince your *Tzarskoy* Majeſty appointed me your Boyars and Counſellors Commiſſioners, and finding my ſelf ſtill further off every day from any good Succeſs of my Negotiation, I have been forced, as thoſe who cannot get over the violence or winding of the River, to make up to the Fountain. Your *Tzarskoy* Majeſty is through your ſo great Dominions the only Fountain of Power and Reaſon, and as all your Subjects ought to humble themſelves to your Power, ſo dare I ſubject my ſelf to your Reaſon. Foraſmuch as it ſeems to me that God has given, as to *Solomon*, not only Riches and Honour to your *Tzarskoy* Majeſty, but alſo an underſtanding heart; ſo that as there was none among your *Tzarskoy* Progenitors before, ſo neither can any ariſe after like unto you. Therefore have I deſired and obtained this private Audience from your *Tzarskoy* Majeſty. And even ſo did that firſt and great Founder of the Amity betwixt the *Engliſh* and *Ruſſian* Crowns, and of the Privileges to the *Engliſh* Nation, *Tzar Ivan Baſilovich*. So did He uſe to diſcourſe and converſe in private with the Ambaſſadors of the Kings and Queens of *England*, and by that means, notwithſtanding the ill Offices of ſome of his Counſel, and the then Lord Chancellour, he took ſuch true meaſures of his own Affairs, that ever ſince the mutual friendſhip and commerce hath continued and flouriſhed betwixt the two Crowns and Nations, till your *Tzarskoy* Majeſty now reigning. Neither do I doubt but that I, being come for the ſaid Purpoſe, with as ſincere intentions betwixt Princes mutually profeſſing much greater affection, ſhall by God's bleſſing go away hence from the clear eyes of your *Tzarskoy* Majeſty with as full ſatisfaction.

For whereas all other great Princes without any notice from his Royal Majeſty, took care to follow him into his Kingdoms with Extraordinary Ambaſſages of Congratulation, the King my Maſter out of his ſingular kindneſs and affection did to your *Tzarskoy* Majeſty alone, of all the Princes in Chriſtendom write firſt the tenth of *May*, 1661. before You had ſent your Ambaſſadors to inform You of His happy Reſtauration and acknowledge your *Tzarskoy* Majeſty's brotherly kindneſs ſhewed to Him in His affliction. And further in the ſame Letter ſignified that, though Sir *John Hebdon* had not preſented any Letters of Credence to his Royal Majeſty from your *Tzarskoy* Majeſty, yet in confidence of the Truſt your *Tzarskoy* Majeſty repoſed in him, his Royal Majeſty had upon his deſire for your Service granted the Levy of three thouſand Horſe and Foot under Officers of great Courage, Ability and Fidelity. Adding moreover, that your Enemies ſhould know by the inſtance of his Royal Majeſty's Miniſters, that they ſhould do a thing very gratetul to him in making a good and laſting Peace with your *Tzarskoy* Majeſty, and if by Their default ſuch Peace were not imbraced, that they and all the World ſhould ſee the great affection He hath for the proſperity of your Affairs, which ſhould be always in his particular Care. Alſo in the ſame Letter his Royal Majeſty acknowledges your *Tzarskoy* Majeſty's magnanimity in withdrawing your Protection from the *Engliſh* Merchants during the late Rebellion, and deſires that all his Royal Majeſty's good Subjects being now returned to their Allegiance, your *Tzarskoy* Majeſty would reſtore them their Houſes, Eſtates and Privileges, and that You declare the ſame; upon which your *Tzarskoy* Majeſty's Declaration he would ſend forthwith his Ambaſſadour to expreſs further His ſenſe of your *Tzarskoy* Majeſty's affection, and to make all poſſible Returns of the ſame. Hereupon your *Tzarskoy* Majeſty returned anſwer of the 28. *July* 1661. That your *Tzarskoy* Majeſty deſired to continue with his Royal Majeſty the ſame friendſhip and correſpondency, which had been betwixt both your Fathers of bleſſed Memory, and that as to what his Royal Majeſty ſaid, he would ſend his Ambaſſadour about, your *Tzarskoy* Majeſty would be ready, ſo far as is poſſible, to give Aſſent thereto. After this your *Tzarskoy* Majeſty in your Letter of the 31. *July* 1662. ſent by your late Extraordinary Ambaſſadour's writ alſo, that taking into your princely Conſideration the flouriſhing Eſtate of your *Tzarstva*, and that intire brotherly Love and Amity, and frequent correſpondency, which inviolably was held and continued betwixt both your Fathers of bleſſed Memory, and the Happineſs, Peace and Tranquility accruing thereby to both Dominions, your *Tzarskoy* Majeſty doth moſt heartily and earneſtly deſire not only the Continuation thereof, but a more nearer and dearer and firmer affectionate, bleſſed, brotherly Love and Amity, and frequent correſpondency with his Royal Majeſty, your dear and loving Brother, than formerly with all readineſs and freeneſs on all occaſions to the utmoſt of Your Power to anſwer the deſires of his Royal Majeſty, Your dear and loving Brother. Upon theſe Aſſurances on your *Tzarskoy* Majeſty's part, his Royal Majeſty diſpatched me hither, where what I ſaid in the face of the whole World by his Royal Majeſty's Command in his Name, concerning the mutual and equal affection of his Royal Majeſty, is perfectly known to Your *Tzarskoy* Majeſty. Your *Tzarskoy* Majeſty was then pleaſed to appoint me Commiſſioners, perſons of great Nobility and Experience, for which I give Your *Tzarskoy* Majeſty thanks, and wiſh I could as juſtly give You thanks alſo for their affection (all of them) to the Amity and good Correſpondence betwixt the two Crowns, and for their Expedition in the buſineſs committed to them. But when as I at my firſt Conference according to his Royal Majeſty's order, moved firſt for the Reſtitution of the Privileges, ſignifying in the ſame Writing that theſe being granted, I had other things to prefer on his Royal Majeſties part out of his affection to your *Tzarskoy* Majeſty, I received from my Commiſſioners ſo unexpected an Anſwer, that had Heaven faln as the Windows of the Council-Chamber broke in twice at the recital, it could ſcarce have been more ſtrange or miraculous to me. It amounted in effect to an abſolute denial of the Privileges. Firſt indeed they ſay, that they were taken away upon occaſion of the late Rebellion. But after that they affirm, that his late Royal Majeſty of ever bleſſed Memory by *Luke Nightingale*, deſired that the Privileges might be nulled, then they alledge ſeveral miſ-carriages of the *Engliſh* Merchants, after that a Petition of the *Goſes* and all the Traders in *Ruſſia*, then that the *Engliſh* Merchants are dead. In a ſecond Paper they ſpeak of Your Wars with the *Crim* and the *Pole*, that his Royal Majeſty furniſhed not your *Tzarskoy* Majeſty with Money, that the Merchants of the *Moſcovia* Company refuſed to lend Money towards your *Tzarskoy* Majeſty's Wars, being deſired by your Ambaſſadours. And ſeveral other Reaſons to make up the number; though any one of them would have ſerved, if it be indeed reſolved before hand not to grant the Privileges, but altogether will not compound one ſolid Argument, if weighed by ſo piercing and deep a Judgment as that of Your Majeſty. So that my Commiſſioners, wholly cutting off all Hopes of the Privileges for the preſent, inſiſted only, that I ſhould declare to them what elſe I had to offer from his Royal Majeſty. And I profering to them, that if they had any thing to as that remained on their part, and was proper for them to propound for your *Tzarskoy* Majeſty's Service, I ſhould give them a fitting Anſwer. And only deſiring to be reſolved by them, whether in caſe my Propoſals ſhould ſeem to them Equivalent to the Privileges they had then Power to grant them, they could not, or did not give me any ſatisfaction therein. I appeal to your *Tzarskoy* Majeſty, whether I having a Plenipotential Letter from his Royal Majeſty, to your *Tzarskoy* Majeſty (which is in it ſelf ſufficient) and over and above that a particular Commiſſion under the Great Seal of *England* for the Recovery of the Privileges, it were fit for me further to divulge the Secrets of his Royal Majeſty's ſingular affection, and brotherly Intentions towards your *Tzarskoy* Majeſty, to perſons not impowred, and fully authorized to conclude with me, or that had only a Power to deny, but none to aſſent to my Propoſals. And therefore this being the whole State of my buſineſs, and ſuch being the Anſwers which in your *Tzarskoy* Majeſty's Name I have received from my Commiſſioners, ſo that the matter will now ſhortly return out of our hands, to be decided betwixt his Royal Majeſty, and your *Tzarskoy* Majeſty your ſelves, I ſhall as I have the Honour to repreſent his Royal Majeſty's perſon, ſo take the Liberty to repreſent his words upon this occaſion, as if He and You could meet together, and did in Preſence contemplate both Your unſpeakable Majeſty's in that Glaſs of friendſhip the moſt clear eyes of one another. As far as my weak Judgment can wade into the depths of his Royal Majeſty's Wiſdom, Thus would He ſay.

Had I deſired any new thing of your *Tzarskoy* Majeſty my dear and loving Brother, or to which your *Tzarskoy* Majeſty

1664. Majeſty had not formerly ingaged Your ſelf, I might with leſs unkindneſs have taken Your ſo long Deliberation and perhaps have digeſted the refuſal. But as for the Privileges they have continued above an hundred years, and have by that their Duration approved the ſolidity of that reaſon of State, upon which they were firſt founded, and it has been always dangerous by new Experiments to ſhake the foundation of ancient Counſels and Friendſhips. And as for your *Tzarskoy* Majeſty's Ingagement (to omit your *Tzarskoy* Majeſty's Declaration in the Year 1645. at Your firſt coming to the Crown by the Governour of *Archangel* to the Merchants at *Archangel*, that Your *Tzarskoy* Majeſty confirmed to them all the Privileges granted by your *Tzarskoy* Majeſty's Father of bleſſed Memory, and that You would be as gracious to them as ever Your ſaid Father, or any of Your Predeceſſours) did not your *Tzarskoy* Majeſty in Your firſt Letter, upon my deſire of the Reſtitution of the Privileges anſwer me, that your *Tzarskoy* Majeſty deſired to continue with me in the ſame Friendſhip and Correſpondency that had been betwixt both our Fathers of bleſſed Memory, and that upon my Ambaſſadour's arrival and propoſition You would be ready as far is poſſible to give Aſſent thereto? Did not your *Tzarskoy* Majeſty's Ambaſſadours, being demanded by my ſelf concerning the Privileges, reply as their own opinion, that they queſtioned not, but your *Tzarskoy* Majeſty upon my deſire by an honourable Embaſſy, would for the love You had to me doubtleſs grant them? Did not your *Tzarskoy* Majeſty in Your Letter by them, of the 31. of *July* 1662. written from Your Privy Chamber under your *Tzarskoy* Majeſty's own hand, uſe thoſe Golden words which could indeed drop from no other Pen or Senſe than that of your *Tzarskoy* Majeſty, and which are therefore ingraven in my Heart as with the point of a Diamond, and which being alſo ſo conſonant to mine own intire affection to your *Tzarskoy* Majeſty, I commanded my Ambaſſadour to return in the very ſame Terms, in my Name to your *Tzarskoy* Majeſty, that your *Tzarskoy* Majeſty taking into conſideration the flouriſhing Eſtate of your *Tzarsva*, &c. * Surely the ſame Correſpondency and Friendſhip includes the ſame Treaties and Agreements, and therefore ſo You obliged Your ſelf for the Privileges, unleſs (becauſe your *Tzarskoy* Majeſty indeed limits Your ſelf with that word afterwards) it be not poſſible to grant them. But that cannot be, your *Tzarskoy* Majeſty being ſo great a Prince, and having all Power, and therefore ſo properly ſtiled *Self-upholder*. If, *as far as is poſſible*, ſignifie a denial I ſhall know how to underſtand it for the future. And as to thoſe words in your *Tzarskoy* Majeſties ſecond Letter to me of the 31ſt of *July*, 1662. how can there be a nearer and firmer correſpondency betwixt Us, unleſs firſt it be as near and as firm as formerly? But ſuppoſe any perſon diſaffected to Our mutual friendſhip could pick out ſome Evaſions in Your manner of Expreſſion, to ſeem to diſingage You, yet let me tell You, dear Brother, ſuch Subtilties might perhaps be neceſſary or ſerve the turn with confining Princes, with whom You are always either at open War, or ſuſpicious Friendſhip. But it would be much below You and Me, Friends of an hundred years, free from all reaſon of jealouſie of one another, to leave ſuch Loop holes in our Souls, and to penetrate and ſqueeze our ſelves through our own Words. Neither let it ſeem ſtrange to You, or as an undervaluing of the mutual Princely Amity betwixt Us, that I ſeem to place it upon the reſtoring or not reſtoring of the Privileges, and have therefore commanded my Ambaſſador before any further overture of my good Intentions toward your *Tzarskoy* Majeſty, to deſire the Grant of thoſe Privileges which belong but to my Merchants. For they were ſo from the firſt voluntary Grant, and I do not love to go leſs as (God be praiſed) I need not, than any of my Predeceſſors. And thoſe Privileges are but the Princely, conſtant reward of that perpetual and vaſt advantage, which hath and may always continue to the *Tzars* of *Ruſſia* and their whole *Tzarsva* by the *Engliſh* Merchants firſt diſcovery, and opening of the Trade at *Archangel*, with loſs of many Mens lives, Shipping and Eſtates; tho' great Princes even for an Action once well done, and whereof the Fruit dies with that time and perſon, are uſed to recompenſe to perpetuity. But my chief Motive for ſuch a preliminary Deſire was indeed your *Tzarskoy* Majeſties Honour, of which I ſhall always be moſt tender, that as your *Tzarskoy* Majeſty took away the Privileges out of Your high Generoſity and reſentment of the late Rebellion, ſo it might appear to the whole World, by Your reinſtating the *Engliſh* therein, without any farther reach of reaſon, only upon their return to their Obedience and my Deſire, how juſt and perfect You were in the proportioning of Your Actions, and how like that great Prince you are, you know to place Your Obligations upon me. For that is Amity to me which is the advantage of my Subjects, and if even in my Exile I could not but partake ſome joy in their welfare, certainly upon my happy Return I ſhall by all means ſtrive to procure and advance it. To what purpoſe are ſo many Treaties in the World betwixt Princes, but all for the conſtituting the conveniencies and profit of their Subjects? Treaties of Peace, of Trade, of Aſſiſtance, nay even of Marriage of the Princes are they, becauſe thoſe Princes fall in love with one another, or are not all directed to the ſecurity and proſperity of the People? But leſt therefore as I demand them for the benefit of mine, ſo You ſhould refuſe them for the benefit of your people, let us (if your *Tzarskoy* Majeſty pleaſe) try the Arguments againſt them of ſeveral Natures as they lie before me.

1664.

They rebelled againſt me: 'Tis true, but it would be too much care in your *Tzarskoy* Majeſty, ſhould You purſue the reſentment for ever upon my Subjects after I my ſelf have forgiven them; and I being the Head, and making up henceforward but one Body with my Nations, will your *Tzarskoy* Majeſty undertake to revenge upon me the diſloyalty of my People? *But they ſay, That* Nightingale *brought a Letter from my Father, and treated with the* Boyars *for taking them away.* That *Nightingale* was a Traytor therein and an Impoſtor, and I know your *Tzarskoy* Majeſty will according to the Law of Nations, and as Princes are obliged in Honour to one another upon ſuch Impoſtures deliver me that open, falſe, counterfeit Letter. But if my Father had at that time for reaſon of State deſired the taking of them away, whereas to the contrary, He, bleſſed Prince, even to His laſt breath prayed and laboured for the good of His Subjects, and even as to this matter had prepared a Letter which I yet preſerve among His other Relicks, wherein He deſires of your *Tzarskoy* Majeſty, the Reſtitution of the Privileges, and diſavows *Nightingale* as an Impoſtor; but had He I ſay then deſired they might be revoked, I alſo do now deſire they may be reſtored. *The Merchants are complained of for ſeveral Miſcarriages contrary to the Condition of the Privileges.* None of thoſe miſcarriages are verified, but however, I ordered my Ambaſſador to provide againſt the poſſibility of any ſuch thing for the future, and I my ſelf ſhould alſo have been a ſevere Inſpecter of any ſuch default, as intrenching highly upon mine own Honour. *But the Goſes and all the Tradeſmen of* Ruſſia *petitioned, that the* Engliſh *were become rich by theſe Privileges, and Your* Tzarskoy *Majeſties Subjects were impoveriſhed.* How is it then that your *Tzarksoy* Majeſty ſaid in your Letter abovementioned, that much Happineſs, Peace, and Tranquility had accrued to both Dominions? Why do they not alſo againſt the Privilege, which is enjoyed by the *Dutch*? Why not againſt the *Cupſhins* of *Perſia*, for ſome of theſe in the mean time have privilege while the *Engliſh* are totally debarred it? Did the Privileges impoveriſh the Country? I ſhould be glad to hear that ſince they were taken away (which hath been time long enough to make an Experiment) the Country hath thereby grown richer. But for my Subjects, though if by honeſt Induſtry they could grow rich, they are rather to be commended: Yet to the contrary, near Thirty of them within this thirty years are undone by the Trade, having brought conſiderable Eſtates into your Dominions. *The* Engliſh *Merchants to whom the Privileges were granted are dead.* One of them is ſtill living however, which is enough to continue the Claim of the inviolable *Tzarskoy* privilege: and though all were Dead, I underſtand it to have been granted to their Succeſſors, and I have given my Ambaſſador order to Name new. *In other Countries every where ſtrangers pay double Cuſtoms*: How comes it then, that the *Engliſh* Merchants Adventurers pay no Cuſtom in *Holland*, and have beſides free Houſes given them, and freedom from Exciſe, and all other Immunities denied their own Subjects? That likewiſe they have the ſame Privileges and pay no Cuſtom at *Hamburgh*, in which places the *Engliſh* drive a much greater Trade than here? Do not the *Engliſh* Merchants not only pay no Cuſtom themſelves, but divide the Cuſtoms of all other Nations, with the *Shach* of *Perſia* at His Port of *Ormus*? Do the *Engliſh* alſo impoveriſh all thoſe Countries? *But then your* Tzarskoy *Majeſty hath War with the* Crim *and the* Pole. Your

Tzarskoy

* So the whole Letter was here repeated again as afore, foraſmuch as it carries with it ſo ſtrong a conviction as can receive no excuſe: and indeed it ſeems the Commiſſioners found it to be ſo, ſeeing they never did one word as to thoſe Letters.

1664. *Tzarskoy* Majeſty muſt pardon me if at this reaſon, and conſidering moſt of thoſe before which are in a manner word for word, what was returned by the Meſſenger of that Uſurper *Cromwel*, I find my ſelf ſomething moved. Were there therefore no Wars when the *Engliſh* Privileges were firſt granted by *Tzar Ivan Baſilovich*? Were there never in all the times they have been ſince enjoyed? If your *Tzarskoy* Majeſty hath ſuch Enemies that ſeem ſo conſiderable to you, will it hurt you to continue me your Friend? And is ſix thouſand Rubles yearly (that is Three thouſand pounds) which is the uttermoſt the *Engliſh* Cuſtoms have amounted to, ſince the caſſing of the Privileges, is it I ſay, ſo neceſſary a Summ to ſo great a Prince for the carrying on of his Wars, that the Effects of my friendſhip and the commerce of the *Engliſh* Nation cannot countervail it? *But I denied your* Tzarskoy *Majeſty the Loan of Money.* I hope ſo impoſſible a Summ to the greateſt Prince of of *Chriſtendom* to advance on the ſudden, being I may name it to your *Tzarskoy* Majeſty ten thouſand *Poods* of Silver, to the value of above thirty hundred thouſand *Rubles*, was not demanded on purpoſe to have a Pretext to deny the Privileges, and by propoſing an impoſſibility to refuſe what is rational. The leſs the Courteſie is asked, the greater Diſobligation not granted, and Poſterity which ſits in Judgment upon the Memory of the greateſt Princes, will not ſo much blame Me for excuſing ſo much, as You for denying ſo little. Your *Tzarskoy* Majeſty ſurely received from your own Ambaſſadors my Anſwer to that particular. *And the Merchants of the* Muſcovia *Company refuſed a much leſs Summ to Your Ambaſſadors.* Truly the former Merchants named in the Privileges were dead all except one, theſe now living have been impoveriſhed and diſinabled by the want of the Privileges this ſeventeen years, and *Ivan Zelobuskoy* offered them but ill ſecurity for the money, an Obligation that it ſhould never be that they ſhould trade without Cuſtom.

Theſe it ſeems are the Reaſons, with which they ſtrive to ſhake (to uſe your *Tzarskoy* Majeſties own Expreſſions) that brazen Wall which hath ſtood ſo many years, built by the Wiſdom of our Anceſtors, and now leaning upon the ſtability of Your own Princely Promiſe: and ſhall ſuch Pellets be able to ruin it? Have I for this ſent mine own Ship into the Sound to fetch your Ambaſſadours? Have I lodged them in the Palace of one of my greateſt Princes, laid them in mine own Beds, mine own Hangings, and treated them continually in mine own Veſſel? Have I done them the Honour to enter in my Coach within the Gate of my Court, given them private Audience my ſelf, as oft as they deſired it, and as frequent Conferences with my Counſel as they pleaſed? I repent it not, I reproach it not, I bear more Honour to your *Tzarskoy* Majeſty my loving Brother than to do ſo. But I doubt that ſome of them have not truly informed. You of all the Honour they received much more than I tell You. Have I not after this ſent Ambaſſadour to You my Couſin, and (whatſoever may have been told You to the contrary) my Privy Councellor, and that ever ſince my Return into *England*, one of the principal Noblemen of our Kingdoms deſcended of *Thomas* Duke of *Norfolk*, *Charles* Earl of *Carliſle*, Viſcount *Howard* de *Morpeth*, Baron *Dacre* of *Gilleſland*, Lord Lieutenant of the Counties of *Cumberland* and *Weſtmorland*, having deſtinated him not only for this Embaſſy, but to have been my perpetual Remembrancer, could I have been forgetful of any thing that tended to your Service. Have I committed to him the ſecret of my Heart in all things wherein I might pleaſure you, and ſhall your *Tzarskoy* Majeſty by him refuſe me ſo ſmall, and perhaps the only thing which ever I can have occaſion to ask of you, the Privileges? This indeed would repent me, for the World will take more notice of it than can ſtand with Mine and Your Honour, and it will be the ſubject of much Diſcourſe and Wonder, when Men ſhall conſider what Advantages this your *Tzarskoy* Crown hath received from time to time from my Predeceſſours. They diſcovered the Port, and opened you the Trade and Market of all *Europe* at *Archangel*. They fought your Enemies Ships in the *Eaſtern-Seas*, when the Princes there adjacent had Leagued together to ſhut up the *Narve*, and delivered the Priſoners to the *Ruſſian* Governours at the *Narve*. They lent Sums of Money for the Wars, they furniſhed Souldiers and Commanders to fight your Enemies, they made Peace for you with Neighbour Princes. They ſuffered the Merchants to ſupply the Countrey in the times of great Dearth with Corn, who ſold it to the Nation at the rate it coſt them: and ſeveral other things to be tranſported hither for your Accommodation in Peace or War prohibited to all other Nations. I could mention yet an higher Obligation than all theſe, upon the deſire of one of your *Tzarskoy* Anceſtors, were it ſo ſeaſonable to relate it. And I my ſelf who ordered my Ambaſſadour to tell You, that herein I deſired to exceed all my Anceſtors, yet am refuſed the Privileges, the purchaſe of my Subjects Induſtry, and their vaſt Expenſe and great Loſſes in finding out, and carrying on the Trade to this preſent. I my ſelf, at my firſt coming to the Crown, granted to Sir *John Hebden* without Credentials, three thouſand Horſe and Foot, of the flower of the *Engliſh* Forces for Your Service, which what they can do and are, let the World witneſs. And had your Ambaſſadours either Demanded any thing of me, but an unproportionable and unſeaſonable Sum of Money, or had they but acquainted me with the poſture of your *Tzarskoy* Majeſty's Affairs in any meaſure, You ſhould not have found me wanting. However before I ſent my Ambaſſadour over, I did my beſt to inform my ſelf otherwiſe, I found that the *Pole* was likely ſtill to moleſt You, and that notwithſtanding the late Peace with *Sweden* ſome Points remained yet undecided. Reflecting upon which I thought, for the Reaſon Your Majeſty knows as concerning the *Pole*, that he would not think me a competent Mediator betwixt You, ſeeing beſides that, the King of *Poland* only hath not yet ſent me any Embaſſage to congratulate my happy Return. For the *Swede* I ſaw no Reaſon why mine Interpoſition betwixt your *Tzarskoy* Majeſty and Him might not be acceptable and ſeaſonable on all ſides, if your *Tzarskoy* Majeſty thought it neceſſary to quench any Sparks of Contention before they broke out further. Moreover I conſider the opportunity that I have, and ſhall always of aſſiſting You with Commanders and Souldiers, Ships, Armour, and Ammunition againſt any Enemies You might have for the future, and the Influence and Authority that I ſhould have from time to time with moſt Princes of *Europe*, or out of *Europe* that could annoy You, for the compoſing of any Differences. And upon all theſe things I had given ſuch Order, as I thought fitting, to my Ambaſſador. And doubtleſs conſidering mine own Obligations to your *Tzarskoy* Majeſty, and the Promiſe I had made You in mine own Letter formerly, which I took my ſelf bound to accompliſh, and the Choice of the perſon of my Ambaſſadour, You would not have found me ungrateful in any thing of this or other Nature which could not occur to me. 1664.

Having repreſented theſe words, as from his Royal Majeſty's own mouth to your *Tzarskoy* Majeſty, it becomes me not to continue them with any of mine own, further than to deſire that your *Tzarskoy* Majeſty will ſeriouſly and ſpeedily, according to your great Prudence wherewith God hath inſpired You, reflect upon them, and give me a quick diſpatch one way or other, that I may not loſe the very firſt Seaſon of the Year to depart hence, as his Royal Majeſty hath given me poſitive Order.

Given at Moſco, 22. April 1664.

CARLISLE.

The Ambaſſadour's four Memorials delivered by the Ambaſſadour.

After this the Ambaſſadour delivered four Memorials, three of which were againſt *Pronchiſſof*, who had endeavoured to perſwade the *Czar*, that the King of *England*'s Affairs were but in an indifferent Condition, which his Excellency thought convenient to refute, and to convince the *Czar* of the Falſhood of this Report by his Memorial. The ſaid *Pronchiſſof* having alſo charged the Ambaſſadour to have been bribed by the Merchants in order to recover their Privileges; and refuſing

1664. refuſing to produce the Author of this Report, his Excellency complained thereof to the *Czar* in his ſecond Memorial, deſiring that Satisfaction might be given him by the ſaid *Pronchiſſof* upon that account. He had beſides told the Ambaſſadour ſeveral times to his Face, That he had neglected his Buſineſs, threatning him with the *Czar*'s Diſpleaſure, who would complain of him to the King for having tranſgreſs'd his Commiſſion. In the third Memorial his Excellency acquainted the *Czar* of all theſe things, telling him, That as the Caſe ſtood he muſt take the ſaid *Pronchiſſof* for an Enemy, and, that therefore whatever he might have done before, or ſhould do for the future, to give an ill Impreſſion of his Perſon to his *Czariſh* Majeſty, he deſired might be look'd upon as a falſehood, which he would be always ready to prove for his *Czariſh* Majeſty's Satisfaction. In the fourth Memorial, he put the *Czar* in mind, concerning the ſo long promiſed Reparation, which hitherto he had not been able to obtain from the Commiſſioners.

The *Muſcovite* Commiſſioners Anſwer.

The 24th of *March* the Commiſſioners gave in their Anſwer to the Ambaſſadour's Papers delivered the 22th of *March*; wherein they again had recourſe to their old way of cavilling at his Expreſſions, and further told him, That for the innocent Miſtake of the Meſſengers, as they call'd it, ſufficient Satisfaction had been given before; but as to his Demands, they gave only a ſatisfactory Anſwer to the Second, *viz.* That Paſſes ſhould be given to ſuch Merchants, and their Wives and Families, that had a mind to return home; tho' at the ſame time they ſaid not a word of the *Engliſh* Merchants Debts, for which they had demanded Juſtice; and to the demand, that his *Majeſty*'s Subjects might have liberty to return home when they thought fit, no Anſwer was given at all; and whatever other Favours were requeſted in the behalf of ſome particular Perſons, were either quite rejected or deferr'd.

Their Anſwer to the Ambaſſadour's Speech at his private Audience.

The 27th of *May* the *Czar*'s Commiſſioners delivered another Reply to his Excellencies Speech of the 22d of *April* (when he had a private Audience of the *Czar*) and his Memorials, unto which they gave not any Categorical Anſwer, inſiſting chiefly, as indeed they had done all along, upon the miſ-interpretation of the Ambaſſadour's Words; in ſome of which they endeavour'd to ſhew a Contradiction, in others want of Reſpect to his *Czariſh* Majeſty, eſpecially when he ſaid, That he hop'd, *ſo impoſſible a Summ to the greateſt Prince of* Chriſtendom *was not demanded on purpoſe to have a pretext to deny the Privileges*, &c. And as for the Privileges they thought fit to give no other Anſwer, than that after the time was ended, his *Czariſh* Majeſty would allow ſome Immunities to a certain number of *Engliſh* Merchants, but upon what Terms they did not think fit to declare. They ſeem'd to be extraordinary well pleas'd with the Expreſſions, in which his Excellency had mention'd the Opportunities his Royal Maſter might lay hold on, to aſſiſt the *Czar* in his Wars, and were very deſirous to know, againſt which of his Enemies he would aſſiſt him, and whether with Men and Ammunition, and with what Number and Quantity, for how long, and whether at his own Charge; unto whom his Excellency reply'd, That the Tranſactions of all thoſe Points were lett to his own Diſcretion, provided his *Czariſh* Majeſty would give ſome great Teſtimony of his Love and Friendſhip to the King his Maſter. As to the offer'd Mediation, they anſwer'd, That what had happen'd betwixt his *Czariſh* Majeſty and the King of *Sweden*, ſince the Concluſion of the Peace, they hoped might be amicably compoſed by Meſſages on both ſides. In lieu of a real Anſwer to his Memorials againſt *Pronchiſſof*, they rather excuſed than blamed him, without the leaſt mentioning any Satisfaction to be given either upon this account, or in relation of the Reparation promiſed at his Excellencies entrance into *Moſco*.

Mediation offered betwixt the *Czar* and *Poland*.

Whilſt theſe things were tranſacting, the Ambaſſadour having receiv'd new Inſtructions and Authority from *England*, to offer his Majeſty's Mediation betwixt the *Czar* and the King of *Poland*, he gave notice thereof to the Commiſſioners, offering himſelf to be ready to act in this matter according as his *Czariſh* Majeſty ſhould think it moſt expedient for his Service, provided he would on his ſide make no further Difficulties about his Former Demands. This Offer coming very ſeaſonably, they were extreamly well pleaſed with it, but did not reliſh the Condition of reſtoring the Privileges: However being very deſirous that his Excellency ſhould deliver his Propoſition in Writing at the next Conference, appointed the 1ſt of *June*; new Commiſſioners were choſen by the *Czar* for that purpoſe, in lieu of *Pronchiſſof* and his Aſſociates, who had, notwithſtanding the Ambaſſadour's juſt Complaints, been continued alſo in his place of *Priſtaf*, but was now removed from that place, and another put in his ſtead. The Ambaſſadour delivered the following Propoſition in Writing. 1664.

HIS moſt Serene Majeſty, my Maſter, deſiring to fulfil all parts of a moſt ſincere brotherly Affection towards his moſt Serene *Tzarskoy* Majeſty, according to His promiſe in his former Royal Letters, and by me his extraordinary Ambaſſadour, taking into conſideration the preſent War continued betwixt his *Tzarskoy* Majeſty, and the King of *Poland*, the ſo great detriment of the Common Chriſtian Intereſt, hath therefore, although He knows that his *Tzarskoy* Majeſty doth neither want ſufficient Forces nor moſt prudent Counſels, whereby He may probably bring that War to a Concluſion, yet for the better facilitating of a firm and honourable Peace betwixt his *Tzarskoy* Majeſty and the King of *Poland*, impowred me, (If it may be acceptable and deſirable to his *Tzarskoy* Majeſty) to offer his Mediation toward ſo good a Work, and hath therefore laid aſide all Reſpects to the contrary, believing that ſo laudable a Deſign will ſo much the rather find with his Majeſty of *Poland* all Effect and Acceptance. And this being but as an Earneſt of all thoſe other Counſels and good Offices, which his *Tzarskoy* Majeſty may promiſe himſelf continually from his Royal Majeſty, I do no ways doubt, but his *Tzarskoy* Majeſty will manifeſt a juſt value of his Royal Majeſty's moſt ſincere and conſtant Brotherly Affection. Unto which I ſhall always ſtrive to be in my place inſtrumental, according to my duty to his Royal Majeſty, and my great Devotion towards the Service of his *Tzarskoy* Majeſty, ſo great a Prince, and ſo dear a Friend and Brother of his Royal Majeſty.

Given at Moſco, June 1. 1664.

The Commiſſioners were ſo well pleaſed with this Offer, that they deſired his Excellency to ſend an Expreſs for that purpoſe to *Poland* by the way of *Smolensko*, leaving the management of the Matter to his own Diſcretion; but as not a word was mentioned of the Privileges and other Matters required by his Excellency, he gave them to underſtand, That without theſe Grievances were redreſs'd he could not engage in a Buſineſs of this nature, his Majeſty of *Great Britain*, when he ſent him theſe Orders, taking it for granted, that theſe Matters had been ſettled before; but finding them deaf to this part, he deſir'd his Audience of Leave from the *Czar*; and having left certain Memorials with the *Boyars* of remaining Buſineſs, the Day for his Audience of Leave was appointed the 24th of *June*, when he made the following Speech to his *Czariſh* Majeſty.

Moſt Serene and moſt Potent Tzar,

THE King my Maſter hath commanded me to make haſt from hence about his other Affairs committed to me, and ſince your *Tzarskoy* Majeſty hath not been pleaſed to grant what I was ſent for, the greateſt Kindneſs You can ſhew the King my Maſter, and the greateſt Favour to my ſelf, is the allowing me this Liberty of taking my leave of your Majeſty, and permitting me to depart with ſpeed. I have nothing to deſire of your *Tzarskoy* Majeſty at parting, but that, as is due and right, there may be the ſame Liberty to all

1664. all other his Majeſties Subjects, whenſoever the reſpective time of their Obligations ſhall be expired, and that to thoſe muſt in the mean time remain, ſpeedy and equal Juſtice may be afforded, which hath not been hitherto. I return my Thanks for the plentiful Entertainment I have had in your Country. I ſhall very truly give the King an account of all the Honours and Favours I have received, and with the ſame Truth and Candor give an account of all things that have paſſed in my Negotiation, and ſhall pray to God to bleſs your Majeſty with a long and happy Government.

The *Czar* being ſeated on his Throne, deſired the Ambaſſadour to ſalute his Brother the King of *Great Britain*, and at the ſame time delivered with his own hand the Letter he ſent him; laying the fault of his Excellency's ill Succeſs in his Negotiation, upon the preſent Conjuncture; wiſhing him for the reſt a proſperous Voyage. Immediately after his Excellency was admitted to kiſs his Majeſty's hand, and ſo did all the Gentlemen of his Train, and being detained here were all Entertained with Diſhes out of the *Czar*'s Kitchen. But before we leave *Muſco*, it will perhaps not be beyond our Purpoſe to give a ſhort Account of ſome of the moſt memorable things we obſerved during our ſtay here.

The Ambaſſadour Entertained at a Feaſt by the *Czar*.

The firſt that preſents its ſelf in Order is a Feaſt made by the *Czar* the 19th of *Feb.* for the Entertainment of his Excellency and his whole Train, which laſted from two in the Afternoon till eleven at Night. He was conducted thither with a great deal of Ceremony, and coming into the ſame Hall where he had his Audience before; he found the *Czar* ſitting upon his Throne, but without his Crown, having only his Bonnet on, which however he did not think fit to move. His Excellency was ſo far from being admitted to his Table, that they plac'd him at one on his left hand, ſome ſteps lower than his own, whilſt the *Boyars* had their's on the right, and at a leſs diſtance from his Throne. His Excellency was ſeated alone on one ſide of the Table, having no other Company, but one of the *Czar*'s Councellors, and a *Stolnick* who ſate on the other ſide. At a ſmall diſtance from hence in a direct Line, my Lord *Marpeth* was ſeated at another Table, on which were alſo placed (purſuant to the *Czar's* Orders) the Gentlemen, Pages, nay the Footmen belonging to our Train. After every one had taken his place, the *Czar* laid by his Bonnet of black Furr till we went away again; we were not here a little ſurprized that we had no Napkins laid for us, eſpecially when we perceived, that the Table-cloth was ſcarce ſo wide as the Table. What diverted us a little, was the vaſt quantity of Gold and Silver Veſſels, (ſome of which were curiouſly wrought,) that were hung up for a ſhow round the great Pillar, that ſtood in the middle of the Hall. It was above half an hour, before the *Stolnicks* appear'd in their great Bonnets, and firſt ſerved the *Czar*'s Table, that of the *Boyars*, and then the Ambaſſadours and the reſt. The firſt Diſh was *Caviare*, which was followed by a Pottage, and about 500 Diſhes, (which rather look'd like Lead than Silver) well Dreſs'd with all ſorts of Fiſh, fry'd, baked and boiled; it being Lent time, all theſe made up no more than one Courſe, new ones being brought in continually inſtead of thoſe taken away. The worſt of all was, that notwithſtanding this great Variety of Meat, we had (not excepting the Ambaſſadour himſelf) but one Plate apiece allow'd us, but good ſtore of *Spaniſh* Wine, white and red Mead, *Quas* and ſtrong Waters; notwithſtanding which, we were not urged to Drink, except when the *Czar*'s Health went about; at the Entrance of the Hall attended 12 of the *Gards du Corps* with Halbeards, and on each ſide of the *Czar* two Lords with naked Swords upon their ſhoulders. Night approaching Wax Candles were ſet up round the Room; and not long after the *Czar* having ſignified to the Ambaſſadour, that he was deſirous to Diſcourſe with him, he went and ſtood on the other ſide of the Table juſt oppoſite to the *Czar*. The firſt thing his Majeſty did, was to drink a Cup of Wine to the Memory of King *Charles* I. in theſe words: *To the Memory of that glorious Martyr* Charles I. *who endured great Afflictions here, but now enjoys a greater meaſure of Glory.* After which he drank a Health to his preſent Majeſty, and each time delivered the Cup with his own Hands to the Ambaſſadour; who, after he had in his Turn began the Health of the two young Princes, this Diſcourſe began to run in with the *Poles*. By this time the Deſart coming in, which conſiſted chiefly in ſome artificial Trees, with candy'd and gilt Branches; ſome Fritters, Wafers and ſuch like Trifles made up in Paſte, the Ambaſſadour was deſired by the *Czar* to take his place again at the Table, which he did accordingly, but did not ſtay above half an hour; when riſing again, and turning towards the *Czar*, they drank to one another ſeveral times, the Gentlemen had the ſame Honour, and received the Cup from his *Czariſh* Majeſty's hands; at laſt, the *Czar* falling a bleeding at the Noſe, as he was talking with his Excellency he departed.

1664.

The 17th of *March*, being the *Czar*'s Birth-day he ſent a great Dinner, and 3 or 4 *Boyars* to celebrate the ſame with the Ambaſſadour.

The 3d of *April*, being *Palm Sunday*, we were invited to be Spectators of the great Proceſſion, which is kept every year on that Day, in remembrance of our Saviour's Entrance into *Jeruſalem*; the Seaſon for Sledges being paſs'd, the *Czar*'s Coach with a *Stolnick*, and *Gregory* the *Preſtaff* came to conduct the Ambaſſadour to the Church of *Jeruſalem*, as they call it. But as his Excellency was juſt ready to go into the Coach firſt, the *Stolnick* threw himſelf into it before him, with ſo much haſte that he could ſcarce recover himſelf from falling, which the Ambaſſadour perceiving, without more ado, turn'd back, and was juſt going up Stairs again, which the *Stolnick* perceiving, came out again, proteſting that what he had done, was by Orders from Court, and according to their Cuſtom. The Ambaſſadour reply'd, That he was ſenſible ſuch things were not practiſed in other Places, and that the *Czar*'s Ambaſſadours had met with a quite different Reception in *England*; the *Stolnick* diſpatch'd a Meſſenger immediately to the *Czar*, who being inform'd of his Excellency's reſolution, ſent Orders to the *Stolnick* to give way to him; which done, they departed immediately, but met the *Czar* already coming on Foot from the Church, ſurrounded by a great number of *Boyars* and Clergymen; leaning upon two of his Chief Councellours, with his Crown upon his Head. The Patriarch wore alſo a kind of a Diadem upon his Head, with a great golden Croſs in his hand. The inferiour Clergy appear'd in their Surplices, carrying Books, Banners, Croſſes and Images of divers ſorts upon long Staves, ſome Singing, others fuming the Spectators with Incenſe. They advanced thus upon Cloth ſpread upon the ground to a Platform, where the Patriarch preſented Palms firſt to the *Czar*, and afterwards to the reſt. Then taking off the *Czar*'s Bonnet, (which he laid upon a Silver Plate) he preſented the great Croſs to him to kiſs, which being done with a great deal of Reverence, he bleſſed with the ſaid Croſs, Firſt, thoſe preſent in the Platform, and then the reſt of the People, who caſt themſelves along upon the ground; they concluded the Ceremony in the Platform, with certain Hymns. At the ſame time the Ambaſſadreſſes, Maid, having had the Curioſity to get among the reſt into the place appointed for us to ſee the Ceremony, and having placed her ſelf not far from the Ambaſſadour (though without his knowledge) the *Czar* looking often that way, and obſerving her well Dreſs'd miſtook her for the Ambaſſadreſs, and ſent one of his *Boyars* to enquire of her Health; the Ambaſſadour not a little ſurprized at ſo unexpected a Complement, after having returned Thanks to his Majeſty, gave him notice of the miſtake, and immediately made the Maid withdraw with a good Reprimand. After the Hymns were ended, a Horſe (for want of an Aſs) was brought to the Platform with long artificial Ears, and covered all over with white Linen; and a very rich Saddle and other Covering; upon which he mounted by a Footſtool, and having placed himſelf ſidling, bleſs'd the People on all ſides, with this Croſs, the *Czar* who now had his Bonnet and Crown upon his Head, marching on Foot, and leading the diſguiſed Horſe by the Bridle. Before them was a Chariot drawn by ſix Horſes, likewiſe covered with white Linen, in which ſtood a Tree garniſhed with artificial Apples, ſix Men ſinging *Hoſannah*, being placed betwixt its Branches. About 8 days after, began the *Muſcovite Eaſter*, when 15 days together they preſent one another with Eggs, painted red of a crimſon Colour. As they meet one another they ſay, *Chriſtus wos Chreſt*, i. e. *Chriſt is riſen*, unto which the other anſwers, *Creaſtin wos Chreſt*, i. e. *he is certainly riſen*. then they Salute, and he that gives the firſt kiſs, Preſents the other with one of theſe Eggs. The *Czar* himſelf Preſents them to his Military Officers, who about that time come to kiſs his hand.

The Proceſſion of *Palm-Sunday*.

Their *Eaſter*.

1664. On the 29th of *May* we celebrated the Birthday of his Majeſty of *Great Britain*, and his Happy Reſtauration; he and the *Czar* being both born, 1630. when by a particular Favour from his *Czariſh* Majeſty, his Excellency had the Liberty to entertain the principal of the three Ambaſſadours ſent lately from this Court to *London*, the *Czar* having preſented his Excellency with a good quanty of *Spaniſh* Wine and Mead.

During our ſtay in *Muſco* there happened three Fires, the greateſt of which, though it deſtroyed ſeveral hundreds of Houſes, was ſcarce thought worth taking notice of, they having this advantage here, that as their Furniture is inconſiderable, ſo they buy Houſes ready made, and that at a cheap Rate, in the Suburbs call'd *Scoradom*; which they take to pieces, and ſet them up again where they pleaſe. Much about the ſame time a Lieutenant in the *Czar*'s Service, a *Scotchman* by Birth, ſpeaking vainly of the *Czar*'s Greatneſs in compariſon of the King of *England* in the Company of one of our Family, he Challenged the *Scotchman* and diſarmed him.

The *Czar*'s Preſents refuſed by the Ambaſſador.

About 4 days after his Excellency had his Audience of Leave, the *Czar* thought fit to ſend a Preſent of Sables to the Ambaſſadour and his Train; thoſe intended for himſelf being valued at 2000 Crowns, the Counteſſes Portion at 1400, and my Lord *Morpeth*'s at 1000, the reſt to be divided in proportion to every Mans quality and ſtation in the Family. The Ambaſſadour not thinking it convenient after ſo much neglect as had been ſhewn him in this Court, to receive any Obligations of this nature, would have prevented the ſending of them had he had timely notice of it; but *Golozof* who had the Management of them, in hopes of a conſiderable Reward from his Excellency was ſo haſty in the matter, that he had no ſooner ſent word of it by his Clerk, but he himſelf without acquainting his Excellency's *Preſtaff* with it (as he ought to have done,) came immediately after with 34 men, who carried the Preſents. The Ambaſſadour having told *Golozof* the reaſon of his refuſal, he was ſo enraged thereat, that he leap'd down Stairs, and laying his hands to his Breaſts, exclaimed againſt it, telling us, That ſuch a thing was never heard of in *Ruſſia*, and ſo remounting his Horſe, gave an account of his ill Succeſs to the *Czar*; who being exceedingly ſurprized thereat, call'd together his Counſel of State, the reſult of which was, that *Volinskoy* (one of the new Commiſſioners) ſhould be ſent to his Excellency to render the reaſon of his refuſal. He perform'd his Commiſſion with as much good Temper and Diſcretion, as could be expected, and the Ambaſſadour having given him to underſtand, that nothing elſe but the ill Succeſs of his Negotiation could have induced him, to refuſe ſo great a Favour from his *Czariſh* Majeſty's hands, and that if *Golozof* had not brought the Preſents without any previous knowledge of his *Preſtaff's*, he would have taken effectual care to have prevented the Diſhonour of ſo publick a refuſal. Theſe Arguments had ſo much effect upon *Volinskoy*, that he return'd pretty well ſatisfied to Court, and *Golozof* inſtead of the Reward he had hoped for from the Ambaſſadour, had the Mortification of being well reprimanded for his want of Conduct; ſo that we heard no further of the conſequences of this Affair, except that the *Czar* ſent back the Baſon and Ewer of ſilver, parcel gilt, two wrought ſilver Diſhes, and another ſilver Diſh, parcel gilt, which he had received from the Ambaſſadour at his firſt Audience; who received it with this Complement: *I give his* Czariſh *Majeſty thanks for this, and I receive it with as great Kindneſs, as if it had been a greater Preſent. I ſhall always keep it by me, becauſe it had the Honour to be in the Poſſeſſion of his* Czariſh *Majeſty.*

The Ambaſſadour ſets out from *Muſco* to *Riga*.

The intended mediation betwixt this Court and *Poland* being laid aſide, his Excellency was preparing for his Journey to *Stockholm* in *Sweden*, by the way of *Livonia*, for which reaſon he ſent a Meſſenger to Count *Oxenſtern*, then Governour of *Livonia*, to deſire him to give the neceſſary Orders for his being accommodated with Horſes and Waggons at his Charge.

The 24th of *June*, his Excellency attended by a Regiment of Horſe, ſet out from *Muſco*; and came the 29th to *Twere* the Capital of the Province of *Twerſco*. The 3d of *Jul.* we paſs'd through *Twerſco* to *Budeva*; the 4th to *Wiſny Volſock*, and the 7th to *Zimnogoray* and *Viday*, the 8th we travelled hard by *Rakina* and *Vena*, the 9th we arrived in a ſmall Burrough call'd *Brunitz*. The 10th we travelled 27 Verſts by water in 20 Boats upon a ſmall branch of the Lake of *Ilmin*; into which the River that paſſes by *Brunitz*, falls, and came the ſame Night within 3 Verſts of *Novogorod Veliki*; where the Ambaſſadour made his Entry the 11th, and departed from thence again the 12th. The 13th we made 67 Verſts, 37 upon the Lake *Ilmin*, and 30 upon the River *Sologna* to *Soltza*; which River exonerates it ſelf alſo into the Lake. The 14th we travelled 35 Verſts by Land, the 17th his Excellency made his Entry at *Pleſco*, and left that place the next Evening. 1664.

The 22d we found our ſelves at *Nyhuiſen* a Town on the Frontiers of *Livonia*, the 25th at *Marienburgh* and ſafely arrived the 3d of *Aug.* at *Riga*. Our Journey from *Muſco* to the Frontiers of *Livonia* being near 200 Leagues, two *Preſtaffs* were appointed to take care of our Carriages and Proviſions, one call'd *Juan Stepanovitz Telepniof* a *Stolneck* was to conduct us to *Novogorod*, and the other call'd *Simon Offonaſſewitz*, from thence to *Nyhuiſen*. The greateſt part of our Journey being made on Horſeback, (except from *Brunitz* over *Novogorod* to *Soltza* which was perform'd by water) we had 60 Sadled Horſes, beſides what belonged to the Carriages; we were alſo provided with 3 Coaches, 2 of the *Czars*, and 1 the Ambaſſadours; 200 Waggons, (but very ſmall ones) were appointed for our Baggage; which as well as our Sadled Horſes we changed four times, to wit, at *Twere*, at *Wiſny Volſock*, at *Soltza* and *Pleſco*; and, had it not been for the hardneſs and ill favour'dneſs of their Sadles, this way of travelling might have been pleaſant enough.

Our Lodgings were like a ſmall Encampment, under Tents or in the Waggons, which was the reaſon that among other things the *Czar* had provided a Tent worth 500 Crowns for the Ambaſſadours uſe, another for my Lady, and a third for my Lord *Morpeth*. Theſe were always ſent before with the Kitchen, and the greateſt part of the Baggage, and were pitch'd againſt Night in the moſt convenient place, for the Entertainment of ſo great a number of Horſes; our Victuals were commonly very ill Dreſs'd for want of Chimneys, but our Drink was the worſt, which being generally nothing but Mead and *Quas*, heated with the Carriage, was as dead as Ditch water. We were beſides this much peſtered with Flies; though the advantage of travelling under the ſhadow of the Foreſts and the fairneſs of the Seaſon, together with the Proſpect of ſeveral Lakes and Rivers made us ſome amends for theſe Inconveniences. Amongſt theſe Lakes the *Ilmin*, and the *Sweto Orzero* or *Holy Lake* are the moſt conſiderable. In the laſt is an Iſland environ'd by ſeveral leſſer ones; and a fair Convent in the midſt. The *Ilmin* is above 50 Leagues long and 30 broad, our Sails we uſed whilſt we were upon this Lake, were of Matt made of Bulruſhes. We made one more Obſervation on this Road, which is, that the Inhabitants being not ſo much accuſtomed to Strangers, as they are betwixt *Archangel* and *Muſco*, they would at the firſt ſight of any of us, run to their Cottages and ſhut the Doors againſt us.

Not long after we had left *Muſco* we had another Tryal of the *Muſcovite* Civility; for, one *Calthof*, who had been ſome time in the *Czar*'s Service, having obtained his Diſmiſſion by his Excellencies interceſſion, (his time agreed on, being expired) had put himſelf among the Gentlemen in order to his return into *England*. The *Czar* being inform'd of his Intention, ſent a Meſſenger after us out of the Town, to demand the ſaid *Calthof*, and the Ambaſſadour unwilling to oppoſe the *Czar*'s poſitive Orders, return'd the ſaid *Calthof*, not queſtioning, but that they would ſoon releaſe him again; but having underſtood at his arrival at *Twere*, that upon ſome ſham Pretence they had clap'd him in Priſon, he ſent the following Letter in *Latin*, directed to *Kiravenopoolin*, Chancellour of the Embaſſy Office.

Domine Cancellarie,

NEſcio quo fato aut conſilio factum ſit, quod impreſperæ noſtræ Legationi ultimus hic de Calthofio *cumulus acceſſerit, niſi fortaſſis decorum exiſtimetis, ut exitus introitum noſtrum referret, & poſtrema primis per omnia reſponderent. Sereniſſimus Rex meus diſertis verbis mihi mandaverat ut* Calthofium *mecum reducerem. Domini's Conſiliariis, & Tibi præſertim, Domine Cancellarie, ſæpius declaravi tempus effluxiſſe quo ſe* Calthofius *Czareæ ſuæ Majeſtati devinxiſſet, ideoque petii ut mecum poſſet reverti. Cancellarius etiam Czarei Arcani ſignificavit, nullam moram eſſe quo minus exiret. Quomodo poſtea ſucceſſerit non potes ignorare. Ecce primarius*

Scriba

1664. *Scriba in ipſo itinere accurrit, & Czareæ ſuæ Majeſtatis nomine* Calthofium *poſtulat. Ego qui optimè novi quantum reverentiæ & ſecuritatis Legatorum dignitati debeatur, ne tamen importuno loco cum Czareâ ſuâ Majeſtate altercari viderer,* Moſcuam *illum remiſi, ubi contrà quàm ſperaveram, & contra jus & æquum, falſo prætextu eum in Cuſtodiâ detineri audio. Quorſum hæc vergant neſcio, neque vos ipſi ſcitis qui facitis. Me verò interim omnium infeliciſſimum, qui pro ſummo meo Czareæ ſuæ Majeſtati inſerviendi ſtudio cum tam infauſto nuncio ſim reverſurus. Majus eſt hoc negotium quam primo ituit videtur, & in hoc* Calthofio *omnium Sacræ ſuæ Majeſtatis Subditorum hîc degentium res agitur, num pro liberis deinceps, an verò pro ſervis & captivis ſint habendi. Oro te Domine Cancellarie, pro ſolitâ tuâ humanitate, & pro muneris tui officio, ut hæc Czareæ ſuæ Majeſtati ſine hâc acerbitate (quam tamen ipſa rei natura mihi expreſſit) ſed eâdem cum efficaciâ protinus velis remonſtrare, ut Czarea ſua Majeſtas maturè de hâc re providere & conſulere queat, &* Calthofius *(quod adhuc expectlo) bonâ cum Czareæ ſuæ Majeſtatis gratiâ, me antequam limitem tranſierim, aſſequatur.*

Twere, 30. Junii Anno Dom. 1664.

CARLISLE.

My Lord Chancellor,

BY what deſtiny or deſign the unſucceſsfulneſs of my Embaſſy ſhould be accumulated with this violence to *Calthof*, I cannot imagine, unleſs You eſteem it perhaps decorous, that my Exit ſhould bear reſemblance with my Entry, and my laſt Uſage be as diſobliging as my firſt. The moſt Serene Prince my Maſter gave it me expreſly in command, that I ſhould bring *Calthof* back with me. I have often declared to the Lords of the Council, and to you my Lord Chancellor more eſpecially, that the time for which he had obliged himſelf to his *Tzarskoy* Majeſty was expired, and for that reaſon I deſired his return. The Chancellor of his *Tzarskoy* Majeſties Cabinet acquainted me he might go if he pleaſed, there ſhould be no impediment. But what is happened ſince You cannot be ignorant of. When I was even in my Journey, the principal Clerk of the Ambaſſy-Office purſues me, and in his *Tzarskoy* Majeſties Name demands *Calthof*. Yet though I underſtood well the reverence and ſecurity was due to the dignity of an Ambaſſadour, nevertheleſs leſt I ſhould ſeem upon ſlight occaſions and unſeaſonably to contend with his *Tzarskoy* Majeſty, I returned him to *Moſco*. Where I am ſince informed he is upon a falſe pretence detained in Cuſtody, not only contrary to my hopes and expectation, but to all Law and Equity whatſoever. How far theſe injuries may extend I know not, nor even You your ſelves that contrive them. In the mean time I am moſt unhappy, who notwithſtanding my great Zeal and Affection for the Service of his *Tzarskoy* Majeſty, muſt be conſtrained to return with this unwelcome tidings. This is a greater buſineſs than it appears to be at firſt ſight, and in this *Calthof* the intereſt of all his moſt Sacred Majeſties Subjects living in this Country is at ſtake, and it is a queſtion whether for the future they be to be eſteemed Freemen or Slaves.

I conjure You, my Lord Chancellor, by Your uſual Humanity, and by the Duty of Your Place, that You repreſent theſe things to his *Tzarskoy* Majeſty, not with that ſharpneſs (which notwithſtanding the Nature of the buſineſs extorted from me) but with ſuch Efficacy, that his *Tzarskoy* Majeſty may apply ſome remedy in time, and that *Calthof* (which I expect) by his Majeſties moſt gracious Permiſſion, may overtake me before I am out of his Dominions.

Twere, the 30. of *June*, 1664.

CARLISLE.

This Letter had not the deſired Effect, which in a great meaſure proceeded from the wrong Interpretation of the word *qui*, which they miſtook for *quid*; the Expreſſion *quorſum hæc vergant neſcio, neque vos ipſi ſcitis qui facitis*, being interpreted by the *Muſcovite Boyars* as if thereby they were told, *They did not know what they did*; whereas the true meaning was; *I know not how far this buſineſs may extend, nor you neither who contrive it*; which made the *Czar* immediately take a Reſolution to ſend an Ambaſſadour to *England* to complain of his Excellencies Proceedings, and the Governour of *Twere* ſhut the Gates againſt us, ſo that we were forced to take up our Quarters in the Suburbs, which made us ſtay no longer than two days here; for the reſt this Town lies on the deſcent of a Hill near the River *Volga*, and another ſmall River call'd *Twere*, which has imparted its Name to the place. At *Tarſoen* we were diverted with a Bear dancing; this Bear was ſo tame, that he would ſuffer any Body to ride upon his back. Coming to *Budeva* we received the News of a moſt dreadful Fire, which happened the 29th of *June*, and conſumed one third part of the City of *Muſco*. 1664.

The 10th of *July* we were unexpectedly rejoyced with the ſight of Mr. *Watſon*; who, as we told you, having been recall'd by General *Monck* whilſt we lay in *Burlington Bay*, was come with ſome of the Ambaſſadour's Equipage from *England* to *Riga* by Sea, and ſo farther by Land to *Brunitz*, where he met us. His Excellency met with a very ſolemn and extraordinary Reception at *Novogorod*, which was however ſomewhat diſturbed by a Fall of a certain ancient Perſon, who was thrown by a Horſe and dangerouſly wounded; here it was that the *Priſtaff* which had conducted us hither, left us to the further care of *Simon Oſſo Naſſeritz* his Collegue, earneſtly recommending to him, to bring back the *Czars* Coaches and Tents, as ſoon as we were come to the Frontiers; to the great diſſatisfaction of his Excellency, who relying upon the word of *Volinskoy*, that they ſhould attend him as far as *Riga*, had made no other Proviſion for his Journey thither, which now was likely to prove very troubleſome.

The City of *Novogorod Veliki i. e.* the *Great*, was formerly one of the moſt conſiderable and beſt fortified in thoſe Parts; as the Ruins round about it ſufficiently teſtifie; and though it be now reduced into a much narrower Compaſs, it is very populous by reaſon of its Commerce; The River *Vologda* upon which it is ſituated, ariſes about a League from the Town, out of the Lake *Ilmin*. *Novogorod.*

Our Reception at *Pleſco* was not inferiour to that we had met with at *Novogorod*, the Governour of *Pleſco* having beſides his kind Entertainment taken opportunities of giving us ſome peculiar marks of his Reſpect; for a certain Gentleman, who had the Night before our Entry been ſo raſh, as to ſeize upon two Horſes belonging to the Ambaſſadours Train, he ſent him bound to his Excellency, who upon acknowledgment of his Fault was pardoned by him. The ſecond was occaſioned by a certain Rumour, that a certain Company of *Poliſh* Robbers near 500 ſtrong, under the Conduct of a one Eyed Serjeant had committed great Diſorders in the Province of *Pleſco*, and now laid in wait for us; upon which the Governour allotted us 500 Foot to conduct our Baggage; we ſtay'd for ſome time in this place, expecting the return of a Meſſenger ſent the 14th of *June* from *Muſco*, to Count *Oxenſtern* Governour of *Livonia*, who arriving at *Pleſco* the 19th of *July* brought word, that the ſaid Governour had ſent immediately two Officers to receive his Excellency on the Frontiers, and that he had received poſitive Orders from Court, to provide him with all Neceſſaries at the Kings Charge, as far as *Riga*. The Ambaſſadour had no ſooner received this obliging Anſwer, but he prepared immediately for his Departure; but finding not the leaſt effects of his Letter written in behalf of *Calthof*, he took this opportuntty to write another, wherein after he had made mention of the Courteſie ſhewn him by the two Governours of *Novogorod* and *Pleſco*, he complained of the Deſign of carrying off his Tents before his arrival at *Riga*; the Letter was written in *Latin*, and directed to the Chancellour of the Embaſſy's Office like the former. Our Entertainment at *Pleſco.*

Domine Cancellarie,

QUamvis ea ſit noſtra, & eſſe debeat de æquitate & prudentia Sereniſſimæ Czareæ ſuæ Majeſtatis opinio, ut ſi non antè, ſaltem poſt literas meas 30. *Junij* Tweræ *datas* Calthofium *dimiſſum eſſe ſperemus, quum tamen* Pleſcuam *pervenerim, & nihil adhuc de eo compertum habeam, Veredarium hunc hâc ſolâ de causâ* Moſcuam *remitto. Omnino enim, ſi non vobis (quod ſane oporteret) at mihi tanti eſt, ne Sereniſſimi Regis mei mandata, & hujuſce ſubditi ſui libertatem negligere videar. Iniquiſſimam enim eſſet, & à mutuâ inter Regiam ſuam Majeſtatem & Czaream* The Ambaſſadour's ſecond Letter to the Chancellor.

1664. *ſuam Majeſtatem benevolentiâ alieniſſimum, ut ille quem* Czareæ *ſuæ Majeſtati nullo modo obſtructum ulterius aut addictum eſſe innotuerit, tamen contra voluntatem ſuam, & noſtram interceſſionem, & veſtra promiſſa diutius detineretur. Quapropter te etiam atque etiam rogo Domine Cancellarie, ut ſi* Calthofius *adhuc vobiſcum hæreat Sereniſſimæ* Czareæ *ſuæ Majeſtati hæc exponere velis, ne in re adeo exiguâ tam magnum amicitiæ detrimentum patiatur. Me autem re magis injuriarum quam beneficiorum memorem eſſe Exiſtimetis, hâc occaſione tibi, adeóque* Czareæ *ſuæ Majeſtati ſignificandum eſſe duxi egregiam* Boyarij Knez Juan Borliſſovitz Repenini *erga me in itinere noſtro per* Novogorodam *humanitatem (quam ſemper prædicabo) & Majorem etiam ſi major eſſe poſſet* Knez Pheodor Gregorevitz Romadonoſsky *in hoc loco comitatem, qui ambo omnibus honoris & benevolentiæ indiciis me cumularunt. Neque enim ipſis imputandum eſt, ſi (quòd dicitur) Tentoria (de* Czareo *ſuo curru minus laboro) in limite* Nihuſiano *mihi auferantur, quæ* Czarea *ſua Majeſtas, ſi bene* Ockolnickey Baſilium Volinskoy *intellexi, mihi* Rigam *uſque commodavit, & propter quæ ipſe alia noſtris impenſis mihi comparare omiſi. Dona quidem à* Czarea *ſua Majeſtate mihi oblata, quoniam ita me decebat, recuſavi, non itidem uſum eorum quæ ad itineris noſtri commoditatem faciebant. Et quum ſub Pellibus noluerim, ſub Tentoriis certe pernoctare licuiſſet. Si autem ita omnino decretum eſt, non ſum adeò mollis ut per aliquot dies militari more ſub dio agere nequeam, ne à Præfecto* Succico *petere videar quæ à* Czarea *ſua Majeſtate, ſuppeditandæ eſſe credideram. Cui nihilominus de omnibus beneficiis atque honoribus mihi delatis gratias ago quàm maximas, & ea Domino meo Regi fideliſſimè recenſebo, Vale.*

Pleſcuæ, 14. Julii 1664.

CARLISLE.

My Lord Chancellour,

THough the eſteem I have and ought to have of the juſtice and prudence of his moſt Serene *Tzarskoy* Majeſty, perſwaded me that *Calthof* would be diſmiſt (if not before) at leaſt as Soon as my Letters from *Twere* on the 30. of *June* were arrived, yet being advanced as far as *Pleſco*, and having no Advertiſement thereof, I have diſpatch'd this Meſſenger again to *Muſco* for that very Affair. Which (though to you it may not appear ſo conſiderable as it ought) yet to me it is of that importance it cannot be pretermitted without neglecting the Commands of the moſt Serene King my Maſter, and the liberty of *Calthof* his Subject. And indeed it would be unjuſt and contrary to the mutual Amity betwixt the King my Maſter and his *Tzarskoy* Majeſty, ſhould he who is manifeſtly now under no farther Obligation, or Engagement to his *Tzarskoy* Majeſty, be contrary, to his own will, my interceſſion, and Your promiſes, detained any longer. I do make it my requeſt therefore, my Lord Chancellor, that if *Calthof* be ſtill amongſt You, You would repreſent theſe things ſo effectually to his *Tzarskoy* Majeſty, that the Amity of our Soveraigns may receive no diminution from ſo ſmall and inconſiderable an occaſion. For my own part, leſt you ſhould think me better at remembring injuries than benefits, I have taken this occaſion to ſignifie to You, and by conſequence to his *Tzarskoy* Majeſty the great civility *Boyar Knez Juan Boriſſovitz Repenini* ſhewed me in my Journey by *Novogorod* (which I ſhall always acknowledge,) and the greater (if greater can be) of *Knez Pheodor Gregorevitz Romadonofsky* in this place, both of them loading me as it were with Teſtimonies of honour and reſpect. Nor do I think it imputable to them, if the Tents (for of his *Tzarskoy* Majeſties Coach I am not ſo ſolicitous) be taken from me at the Borders at *Nyhuiſen*, though if I well underſtood *Ockolnickey Baſilius Volinskoy* his *Tzarskoy* Majeſty was pleaſed to ſpare me them as far as *Riga*, and for which reaſon I had neglected to furniſh my ſelf at my own Charges. It is true I did refuſe (as became me) his *Tzarskoy* Majeſties preſents that were ſent me, but not thoſe conveniencies that were neceſſary in my Journey. And though I did not for reaſons fore-mentioned accept of his Furrs, it might have been allowed me to have ſlept under his Tents. However, if it be peremptorily Decreed, I am not ſo ſoft and effeminate, but rather than requeſt thoſe things from the *Swediſh* Governour, that I thought were to have been ſupplyed by his *Tzarskoy* Majeſty, I can like a Soldier for ſome days take my fortune in the Fields. I do notwithſtanding return many Thanks to his *Tzarskoy* Majeſty for all the Honours and Favours, I received from him, and ſhall make a faithful Enumeration of them to the King my Maſter. 1664.

Pleſco, the 14. of *July*, 1664.

CARLISLE.

The next day after we left *Pleſco*, a Town not very large, built conveniently, ſituate upon a River ariſing out of a Lake about half a League from thence, and, by reaſon of the 500 Foot which guarded our Baggage, and a Squadron of Horſe that attended the Ambaſſadour; we arrived ſafely in two days on the Frontiers of *Livonia*, where we ſcarce had been half an hour, but two Officers deputed by the Governour of *Livonia*, and the Governour of *Nyhuiſen* in Perſon came to Complement the Ambaſſadour upon his happy Arrival, in *French*; they intimated at the ſame time, that the King and Queen Mother of *Sweden* being very deſirous to ſee his Excellency, had ordered every thing to be provided for his Paſſage from *Nyhuiſen* to *Riga*. The Ambaſſadour very obligingly reply'd, That, though nothing could be more agreeable to his Wiſh, than to enjoy the Honour of ſeeing their Majeſties, yet that he was willing to continue his Journey without loading himſelf with ſo great an Obligation. But, as we were to paſs through a deſart Country, and ſtood in great need of Proviſions, of which theſe Deputies had brought ſufficient ſtore along with them; the Ambaſſadour ſaw himſelf under an indiſpenſable neceſſity of accepting their Offer.

Some parts of *Livonia* are ſo deſolate, that in our Journey from *Nyhuiſen* to *Riga*, being a Tract of 60 Leagues, we met not with above two or three inconſiderable Towns. The Countrey is not unlike *Muſcovy* abounding in Woods and Lakes, and though it be not ſo plain, yet it produces a great quantity both of Corn and Graſs. The native Inhabitants are a barbarous and blockiſh Generation, who don't approach in ingenuity to the *Muſcovites*; for being by their frequent Wars reduced to Poverty, and an inconſiderable number, their Conquerours have left them nothing to ſubſiſt upon, but the Tilling of the ground; they are indeed *Lutherans* by name, but are ſtill ſo addicted to their ancient *Pagan* Superſtitions, that ſome will ſcarce allow them to be *Demi Chriſtians*. *Livonia.*

But to return to our Journey; it is eaſily to be imagined, that the barbarous uſage we met with among the *Muſcovites*, joyn'd to the deſire we had of ſeeing our native Countrey again, made us leave *Muſco* without the leaſt regret, which made one of our Company, as ſoon as he ſaw the Gentlemen appointed by the Governour of *Livonia* to receive us, cry out with an audible Voice, *Ay marry, theſe are Chriſtians indeed*, which being ſpoken within the hearing of 500 armed *Muſcovites*, might have proved of very ill conſequence, had they been capable of underſtanding his meaning. Dinner time approaching, the *Swediſh* Gentlemen urged the Ambaſſadour to Dine in the Caſtle of *Nyhuiſen*, which being ſtrenuouſly oppoſed by our *Priſtaff*, this *Medium* was pitch'd upon, that we ſhould paſs the Frontiers, and pitch our Tents near a Rivulet under the Caſtle of *Nyhuiſen*. Whereupon the *Swediſh* Gentlemen withdrew into the Caſtle, and the Ambaſſadour mounting on Horſe-back came thither, being accompanyed by the *Priſtaff* and the Captains of his Guards, who, according to the *Muſcovites* Cuſtom dined with his Excellency, and ſo took their leaves; this was no ſooner perceived by the *Swediſh* Gentlemen, but they ſent their Coaches to attend him to the Caſtle, where we were received under the Diſcharge of ſeveral pieces of Cannon; a way of Salutation not uſed among the *Muſcovites*.

CHAP.

CHAP. II.

A Relation of the Second Embassy into Sweden.

1664. THE good Entertainment we met with at the Castle of *Nyhuisen*, gave us no small hopes of meeting with less trouble in our Voyage than we had suffer'd hitherto, which in respect of our Victuals, of which we had Plenty, and tolerably well Dress'd, proved true enough; though on the other hand, we were subject to no small inconveniencies by our manner of Travelling, being not provided with a sufficient number of Horses, and these so miserably Lean and ill accoutred, wanting for the most part Saddles, Bridles and Stirrups, that we were often put to a great nonplus, some being forced to betake themselves to the Waggons, some to Travel on foot for want of Horses, and others constrained to load them; nor were our Lodgings much better, for except the Entertainment we met with in three or four Castles (of which *Marienburgh* was one,) we were forced to look out for our Quarters in a Barn, or some Kitchen, though the Gentlemen had for the most part the Accommodations of their small Calashes they had brought along with them from *Muscovy*.

The honourable Reception his Excellency met with at *Riga*, made us some amends for the Sufferings in our Journey, but the noise of the Cannon which was Discharged at our Entry into *Riga*, being follow'd by most dreadful Thunder Claps, the Superstitious Crew interpreted them as an ill *Omen*, of which we found not the least Effects.

The Ambassadour's Residence at *Riga*.

The City of *Riga* is built upon the very Banks of the River *Dwina*, which arising in the Province of *Twer* or *Twersco*, exonerates it self about 3 or 4 Leagues from this City into the *Baltick*. Its extent is not very great, but it is compactly built with Stone and Brick Houses, surrounded with a strong Wall, large Ditches and Ramparts, especially towards *Muscovy*, it being defended on the River side with a strong Castle, the ordinary Residence of the Governours of *Livonia*. But what is most considerable in this place is their Traffick, which draws thither abundance of People by the way of the *Baltick* Sea, and the River *Dwina*; during the Winter Season they drive a great Trade with *Plesco*, *Novogorod*, and *Musco* by the help of their Sledges. They generally use the *High German* Language here, their Religion is the *Lutheran*; the Countrey on the opposite side of the River is call'd *Courland*, being subject to the Duke of that Name, who resides at a place call'd *Mitaw*, about 6 *German* Leagues from *Riga*. The very next day after our Entry Count *Oxenstern* paid a Visit to his Excellency, who returned the same to him in the Castle, giving him a thousand thanks for the care and trouble he had been at, to facilitate his Journey thither, offering to reimburse the Charges; unto which the Governour reply'd, That the same having been done by express Orders from the King, who was willing to take this opportunity of shewing his Satisfaction at his Excellency's happy Arrival, the same would be look'd upon as a Design to put any new Engagements upon his Majesty of *Great Britain*; after which his Excellency also received the Complements of the place. We were detained here 15 days by the Expectation of a Man of War, that was to carry us to *Stockholm*, and of a fair Wind; at first the double Feather beds which they use at *Riga*, as well as in *Sweden*, *Denmark* and *Germany*, stood us in good stead after the Fatigues we had endured in our Journey, but after a while, we not being accustomed to sleep betwixt two Beds of Down, found our selves much incommoded by being forced to lye thus rowled up in a heap. We were Entertain'd the first 3 days after our Arrival at the Charge of the City; and soon after the weather began to be so rainy and tempestuous, that had it not been for the Comfort we had of finding our selves amongst well civilized Company instead of the barbarous *Russians*, our time would have proved very tiresome to us.

The 10th of *August* Count *Oxenstern* gave a most splendid Entertainment to the Ambassadour, which being over we prepared to Embark on board the *Amaranthe* a Frigat carrying 40 Brass pieces; the Horses being appointed to be transported in a Chaloop hired for that Purpose. The 18th of *August* the Ambassadour left *Riga*, in order to go aboard the Frigat which lay at an Anchor a League and a half below the Town, under the Discharge of the Artillery from the Cast[le] but the Wind being very fierce and contrary, we were forced to take up our Quarters in a Countrey house not far from thence. The next morning two Boats were sent for to carry us aboard; that which the Ambassadour was in coming first, was saluted with 20 pieces of Cannon; the other, which was somewhat more loaden escaped with much ado being broken in pieces for want of slackening their Sails as they were near the Ship; we found this Man of War very neatly and well fitted for our Accommodation, and scarce a Dinner pass'd but they Discharged 40 pieces, whilst at the Ambassadours Table they were drinking the Health of their Majesty's of *England* and *Sweden*. The 22d we set Sail, but scarce had made 2 Leagues, when we were forced to come to an Anchor near the *Dunemund* Fort, where we staid two days for a fairer Wind to carry us over the sand Banks. The 25th we pass'd the mouth of the River with a fair wind; at parting our Ship saluted the Fort with 4 or 8 Guns, and the Fort return'd above 40 all loaden with Bullets; we Coasted it along the *Courland* Shoar till Night, where the Wind turning about we cast Anchor the 26th near the Isle of *Domeznes*, where there is very unsafe Anchorage by reason of the many sand Banks (near which are made great Fires every Night) which surround the Isle; we staid here till we had consumed most of our Provitions, (of which we had taken in only for 6 days) which made his Excellency retrench his own Table, so that he had but once a day, and Beer and fresh Water being become a very valuable Commodity with us, he reserved that small quantity of small Beer that was left for his own Table, and freely bestowed a considerable quantity of *Spanish* Wine among them, but this, instead of relief proved a greater Aggravation to them by its sweetness. Our Chaloop had better Luck, being returned in good time to *Riga*, and so happily escaped the Storm that befel us the 28th. The 29th, the fury of the Tempest being somewhat allay'd, we doubled the Cape of *Domeznes*, and the Wind proving favourable at Night, we pass'd within sight of the Islands of *Runen*, *Abrick* and *Oxzel*; besides several others, which lay scattered on this Coast, and make Navagation hereabouts very difficult and dangerous. The 31st, we pass'd the Rocks call'd *Sharas*, being so strait, that we could scarce pass them without great Danger of striking against them; we were forced to cast Anchor here till such time the Wind should chop about to carry us through the rest to *Stockholm*, which was 7 *German*, or 14 *French* Leagues distant from us. In the mean while, Mr. *Marvel* his Excellencies Secretary, and Mr. *Taylor* his Steward were sent in a Boat to *Stockholm*; the first to give Notice of his Arrival, the second to prepare a convenient House, and all such Necessaries as we stood much in need of.

The 1st of *September*, We pass'd for some Leagues betwixt these Rocks, which being very narrow and dangerous, divide the Sea into several Channels; but what surprised us most was, that upon some of them we saw Trees, but not the least substance from whence they could receive their Nourishment. The next morning early the *Swedish* Master of the Ceremonies came aboard us, to Complement his Excellency in the Name of the King and Queen Mother, the Ship in the mean time being in great Danger of being cast away, as she was tacking about to double a Point, her Poop striking against a Rock; which however, we escaped without any other mischief except a good Fright, and not long after came to an Anchor within a League of *Stockholm*, where his Excellency had News brought him by his Master of the Horse, of the loss of one of his Coach Horses, which they were forced to throw over board the Chaloop. The 8th of *September*, his Excellency made his Entry, which if it was not accompanyed with all the Ceremony, and shew as that at *Musco*, the Frankness, *Decorum*, and singu-

The Ambassadour's Entry into *Stockholm*.

lar

1664. lar Expressions of Civility made an ample amends for the vain Demonstrations of the Grandeur of the *Muscovites*. For no sooner was the Ambassadour and his Train entred the Boats sent him by the King, but our Frigat gave us a whole Discharge of her Cannon, and these being answered from the Shoar, as we were approaching thither, made a most surprizing noise among the Rocks, we landed near a Bridge, which being covered with Tapestry, his Excellency was there received and Complemented by one of the Senators of the Kingdom, and from thence went in the Kings Coach, to a House appointed for the Reception of Ambassidours; his Excellencies Liveries being all New, and trim'd after another Fashion than those he had used in *Muscovy*.

The Ambassadour's Residence at *Stockholm*.

Stockholm being properly the Name of an Island (signifying as much as the *Isle of the Trunck of a Tree*) on which this City was built, it has borrowed its Name from thence; the Derivation of which they relate thus: The Capital City of the Kingdom being laid in Ashes, and a new one to be built, a Trunck of a Tree was cast into the water, with a Resolution that on what *Island* soever this Tree rested, there they would build a City, which was done accordingly. The Town is very populous and close built, but scarce as big as *Roan* in *France*, including all its Suburbs. Most of their Houses are of Stone, and some Wood; they have several magnificent Structures here, among which those of General *Wrangel*, and the Lord Chancellour excell'd all the rest. Some part of the City is built like *Venice* upon Piles, at some distance from the Isle. The only remarkable thing in the Royal Palace, is the fair Prospect into the Harbour, where some of the Kings Men of War lie; but what was most surprizing to us was, that in the midst of Rocks and uninhabited Islands we should meet with so polite a Court, whereas in so plentiful and pleasant a Countrey as *Muscovy*, we found every thing savouring of Rusticity and Barbarity. The Nobility of *Sweden* are (besides their native Tongue) generally well versed in the *French*, which they also affect to imitate in their Humour and Behaviour; they are *Lutherans* as well as in *Denmark*.

His Excellency having been entertained three days at the Kings Charge, had Audience from his Majesty the third being Sunday; of which I will not pretend to describe the Ceremonies, they being the same, as are used commonly in other Courts; but as to the King's Person, who was then scarce 9 years of Age, he was very handsome, with such a Cheerfulness and Alacrity in his Looks, as drew the Eyes of all there present upon him. His Hair and Complexion was very fair, his Habit cloth of Silver, with a Cloak and Sword, and a white Plume of Feathers in his Hat. He stood before his Chair of State under a Canopy, the Regent of the Kingdom, and other great Officers of State being placed on both sides; and was after the usual Reverences Complemented by his Excellency in a short Harangue, which was afterwards translated into *Latin*.

Most Puissant and most Serene King,

The Ambassadour's Speech to the K. of *Sweden*.

THE King my Master has sent me to Your Majesty to cultivate and celebrate the Friendship already happily established betwixt Your Majesties, to congratulate in His stead and partake of Your Majesties present Felicity, wishing You the same for the future, and to assure You, that wherein the affection of the King my Master may add to all Your Blessings, He will no ways be wanting. And when His Majesty saith that He speaks not only of that present Amity of State betwixt You, He thinks Friendship but narrow which is confined in Treaties, but He understands therewith a personal and most particular affection to Your Majesty, an affection large and deep as the hearts of Princes, without condition, without reserve, upon all occasions wherein He may gratifie Your Majesty. And even the seeming lateness of these Professions is so far from any contrariety on his Majesties part, that indeed He hath herein given that precedence to this Embassy, which the end hath over the beginning, to be first in intention though last in execution; and if there be any Fault it must rest wholly upon my misfortune, coming from a Climate and People where it costs so much time to do nothing. But therefore I cannot but so much the more esteem the Honour I now have to contemplate so great a Monarch, who are in so young years so accomplished a Prince, and as he once said of that little *Hercules*,

——— ——— *Parvusque videri*
Sentirique ingens ——— ———

And in so excellent a Model represent all the Magnanimity and Grandeur of Your Royal Ancestors. I congratulate the happiness of Your Kingdom, for which it seems that God's Providence would, to be the more exemplary, alter its usual Maxim: and what he once threatned as a malediction, hath made it the greatest Blessing of Your Subjects to have a Prince in his Nonage to rule over them: And in conclusion, I profess and offer my self to Your Majesty as a most ready, willing, and (I heartily wish) as proper an Instrument in all occasions to witness and approve His Majesties most sincere and constant desires of a most perfect correspondence with Your Majesty, to Your mutual contentments and the further welfare of both Your Kingdoms. 1664.

His Excellence having delivered himself in *English* with his Hat on, his Secretary rendered what the Ambassadour had spoken in the following *Latin*.

Domine Rex,

DOminus Rex meus ad Majestatem Vestram me legavit, ut excolerem & concelebrarem amicitiam inter Majestates Vestras jam optimis auspiciis contractam, ut gratularer, & sua vice parti in rem præsentem Majestatis Vestræ felicitatem (eandem etiam in posterum augurando,) atque Majestati Vestræ confirmarem, quod si quo modo fortunis Vestris superaddere suo affectu, & contribueri possit, nulla in re Majestati Vestræ defuturam. Et quum Majestas sua hæc dicit, non tantum de præsenti publica inter Majestates Vestras & sua Regna societate loquitur, angustiorem illam amicitiam existimat quæ fœderum hactenus & tractatuum velut cancellis circumscribitur. Sed intimam quandam & singularem benevolentiam innuit, benevolentiam quantum ipsa Regum corda effutissimam & profundam, sine conditione, sine limite, quacunque in re Majestati Vestræ gratificare & commodare possit. Si autem alicubi hujus moræ culpa residat, sola mea fortuna argui potest, utpote qui ab illa regione & gente recens adveniam ubi ad nihil agendum non minori tempore opus erat. Sed eò jam impensius mihi gratulor dum Majestatem Vestram tandem contemplor, in tam tenerâ ætate jam consummatum Principem, de quo uti de parvo illo Hercule *meritò dici potest,*

——— ——— Parvusque videri
Sentirique ingens ———

Et in quo tanquam in perfectissimo modulo heroicam omnium Majorum Vestrorum magnanimitatem, Cæteraque Regii tam animi quàm corporis lineamenta recognoscimus & videmus. Nec possum Regni Vestri fortunas satis laudare, quibus ut magis velificetur, ipsa Divina Providentia cursum suum mutavit, & quod suo olim populo interminata est in summam subditorum vestrorum felicitatem convertit faciendo, ut Pupillus *super eos regnaret. De cætero memet ipsum offero & profiteor uti paratissimum, utinam & aptissimum instrumentum ad contestandum & approbandum omni occasione constantissimum & sincerissimum Majestatis suæ votum perfectissimæ, cum Majestate Vestra amicitiæ & societatis ad mutuum Majestatum Vestrarum gaudium & quodcunque ulterius Regnorum Vestrorum emolumentum.*

Corint Magnus de la Gardie returned an Answer in *Swedish* to this effect; That the King his Master thought himself much Honoured by so solemn an Embassy, in which his *Britannick* Majesty had done him the Honour to salute him, and Congratulate the Felicity of his Government; that, as he bore his share in the Prosperity of the King of *Great Britain*, so he should be always ready to enter into a more strict Amity with him. In the conclusion he told the Ambassadour, how great an Esteem the King his Master had for his Person. The next following day, his Excellency being introduced into the Appartment of the Queen Mother, who stood likewise before her Chair, under a Canopy with several Ladies, and Persons of Quality attending her, he addres'd himself bare headed in this manner.

Madam,

1664.

Madam,

His Speech to the Queen.

THE King my Master hath laid a peculiar Command upon me to salute and congratulate Your Majesty on His behalf, both in respect of Your Quality as so great a Queen, and of Your relation to the Government of this Kingdom with which He is at Amity, and of Your happiness of being Mother to a Prince his Friend, who makes already so great a part of the Discourse, and hopes, as He will one day of the History of Christendom. His Majesty my Master rejoyces extreamly in the happy Constitution of all Your Affairs, and under God attributes it much to Your Majesties Prudence, that in the conjuncture of so young a King, yet there is no possibility of other contention here, than that decent contest, whether You or the Kingdom have a greater share in Him. And his Majesty my Master offers himself as a third to foment so amiable a Controversie, being resolved never to hold himself in Neutrality thorough such blessed Wars of Friendship and affection, as in all other things, He saith he shall be most happy to witness the singular esteem and honour, that for all these reasons He bears to Your Majesties Person. The Queen my Sovereign Lady hath charged me with all Commands of the like Nature to express how amorous, and how great an admirer She is of Your Royal person and virtues, and most desirous of shewing by all means the great honour She retains and cherishes for Your Majesty, to whom I beg leave on my own part to present all due honour and Service.

As the principal end of this Embassy was to bring the Amity, and Alliance establish'd betwixt these two Crowns, into a more strict Union; so his Excellency employ'd most of his time in conferring with the chief Ministers concerning those Matters, which might tend to engage them into a firm League with *Denmark*, on which the Security of the three Kingdoms of *England*, *Swedland* and *Denmark* seem'd to depend at this Juncture; and as the King his Master had for that Reason deputed two Envoys extraordinary, one to this, and the other to the *Danish* Court, so he hoped he would bring this intended Alliance to a happy Conclusion; which Proposition was not ill relish'd by the *Swedish* Court, who also were very ready to gratifie his Excellency as to divers Requests, made in the behalf of some *English* Merchants and others, who desired some Favour or other; the Ambassadour had also several Conferences with the Residents of *France*, *Denmark* and *Holland* then residing at *Stockholm*.

Not long after his Arrival there, his Excellency was invited by the King and Queen Mother to a Palace near *Stockholm*, where being first received with a Collation, he Dined with the King and Queen Mother; the King began the King of *England*'s Health, but happening to drink with some eagerness, he spilt part of it upon his Cloaths which put him somewhat out of Countenance. After Dinner the Ambassadour went a hunting with the King in a fair Park, and finding him backward in shooting a fair Deer that was near him, he asked why he would not shoot; and the Ambassadour answering, said a smaller would serve his Turn, the King reply'd amorously, That he was free to kill them all, provided he left but one. After a long Chase they gave over, his Excellency having shot 2 or 3 times before the Doe would fall, which was sent immediately to his House.

Not many days after my Lord was invited to a great Ball, where there was a most glorious Appearance of all the Gallants, and Ladies of the *Swedish* Court; three days after this, he was conducted to take a View of the King's Men of War, and presented with a very fine Collation by Count *Steenbock*, the *Swedish* Admiral. The next following day he was splendidly Treated by the Lord Chancellour, at his Countrey Seat near *Stockholm*, and the next day after his Excellency gave a most sumptuous Entertainment to the Company that was there.

The 3d of *October*, his Excellency was invited to another Feast, by the *English* Merchants residing at *Stockholm*; but this was scarce over, when a fatal Quarrel betwixt two Gentlemen belonging to the Embassy, one of which was a *German* Colonel, made a great Disturbance in our Family. It seems the Colonel had borrowed some Money of the other Gentleman, to put himself into a good Equipage before he left *Muſco*, which the other having demanded again, he gave him foul Language instead of Payment, so that at last it coming to blows, the Colonel received a mortal Wound at the first Pass; his Adversary being the first who gave Notice of what exploit he had done, and his Excellency happening to be asleep he was clap'd up in Prison, but released soon after, it being proved that the Colonel was the person who gave the first Provocation, being for the rest a Person but of a very indifferent Character.

1664.

By this time Mr. *Henry Coventry* being arrived in the Quality of Envoy Extraordinary from his *Britannick* Majesty in a Man of War, which must carry the Ambassadour to *Copenhagen*, he prepared for his Departure, his Lady having had the Honour (at the Queen Mothers particular Desire) to be admitted to a private Visit, where she was saluted by the King. The Ambassadour being also presented from the King with a Medal of himself, and a Sword richly set with Diamonds, he gave a 1000 Crowns in Ducats to the Gentlemen, Pages, Musicians and other of the King and Queens Servants, who had been present at his Entertainment; the Steward of the House had 60 Ducats for his share in a Silver Purse, he that introduced him to the Ceremonies 25 in a Silver Purse; his Cup bearer and Carver, and the principal Gentlemen that attended the Ambassadress at her Table had each of them 20 Ducats in a Purse of Silver, the rest being distributed without Purses. The 11th of *Octob.* in the Evening, his Excellency had Audience of Leave of the King, unto whom he made this following Complement in *English*, which was rendred afterwards into *Latin*.

Mr. Coventry sent to Sweden.

Sir,

HIS Majesty having thus far satisfied by me the obligation due to that sincere Friendship betwixt the two Crowns, hath now commanded me hence. It was necessary He should command me, otherwise like those that observe the Stars, I might have forgot my self in admiring your Luster, so pleasant hath it been to me to see Your young Majesty sparkle among the Regents, and make up with them the proper number of the Northern Constellation. I shall confirm his Majesty in all that he hath heard hitherto of Your Majesties Greatness and Virtues, in which I assure You none doth more rejoyce and take part than his Majesty. And He hath in the mean time commanded me still to reiterate the same Professions of a cordial and universal and affection, and friendship toward Your Majesty. For mine own part I shall only desire this Character from Your Majesty, that seeing the friendship betwixt Your Majesties was so great that it could not be augmented, however I have not diminished it. In Conclusion, I render mine own thanks to Your Majesty, entring however all your Royal Favours upon His Majesties account, and shall heartily pray, that the same Amity may still last betwixt the two Crowns, the same Union may always continue in Your Majesties Counsels, that Your Majesties Felicity and Virtues may still encrease at the same Proportion, and that the Triumphs of your Peace may surmount and outlast the Trophies of all your Ancestors.

The Ambassadour's Speech to the King.

This afterwards was rendred in *Latin* as followeth,

Domine Rex,

QUum Majestas sua Dominus meus clementissimus mutuis amicitiæ inter duas Coronas Officiis hactenus per me satisfecerit, Suo jam mandato accersor. Accersi hinc & revocari opus erat, ne quod Stellarum studiosis usu venit in splendore Majestatis vestræ contemplando semper defixus hærerem, tantæ voluptatis fuit Majestatem vestram admirari, ut inter Regentes scintillet, & justum cum illis Septentrionum suorum Sydus ac numerum implere videatur. Majestati suæ de Prosperitate & Virtutibus vestris omnia fidelissimè narrabo, quo nihil optatius aut jucundius Majestati suæ potest accidere. Ego interim Majestatis suæ jussu eadem quâ prius asseveratione integerrimam & constantissimam suam amicitiam Majestati vestræ confirmo. Et quum ea sit inter Majestates Vestras mutua benevolentia ut augeri nequeat, sperabo saltem eam per me non esse imminutam. Majestati vestræ gratias de regiis suis beneficiis summas ago, quas quoniam ipse referre non possum, Regem etiam spondeo debitorem. Quod reliquum est Deum Optimum Maximum discessurus veneror, & precor ut eadem amicitia inter Majestates vestras & suas Coronas æterna permaneat, ut idem animorum & consiliorum

consensus

1664. *consensus in hoc suo Regimine perpetuetur, ut Majestatis vestræ Gloria & Virtutes paribus incrementis semper eodem modo assurgant, neque pacis vestræ Triumphi Majorum Vestrorum Trophæa excedere possint & superare.*

The Answer given to this in *Swedish* and *Latin* contained in Substance, that amongst all the Marks of Esteem his *Britannick* Majesty had given to his Majesty, he look'd upon his Choice made of the Earl of *Carlisle* for his Ambassadour, as the most particular one; whom in regard of his Prudence and Conduct he had used to unite the Interests of the two Crowns of *Sweden* and *England*, he could have wish'd to have staid longer with them; but seeing he was recall'd by his Royal Master, the King thought himself obliged to give him full assurances of his Affection towards the King of *England*, and of his Favour to the Ambassadour, unto whom he wished a happy Return into his Countrey.

This Audience was no sooner ended, but his Excellency was conducted to the Queen Mother's Apartment, of whom he took Leave in these words;

Madam,

His Speech to the Queen.

BEing now upon my Departure, I ought by commandment of His Majesty and likewise of the Queen, to represent again in the most lively and effectual Expressions, Their great Affection to Your Majesty, and what part They take in Your Majesties Interests, the same with the Interests of the King and Kingdom. But as there are no words sufficient to depaint so real an Affection, and being moreover obliged in his Majesties name to give You thanks for all the Honours which in respect to Him your Majesty hath conferred upon me, I find now a Decency even in my defects, and that my want of Language hath been but a foresight of the King my Master, and a fit Complement upon His part, seeing upon so extraordinary occasions as these, the boldest Eloquence would lose its Speech, and had I an hundred Tongues I should be struck silent. Therefore I shall only pray for Your Majesties Happiness and Prosperity, and as the greatest part thereof for the Health of the King Your Son, upon Whom all the joys and cares of Your Majesty do so worthily center. And whersoever I go, but especially to Their Majesties, I shall make report of Your Majesties unparalleled Virtues, and shall my self preserve an immortal Memory of all Your Royal Favours.

Her Majesty acknowledged her self in her Answer infinitely obliged, for the assurances of Friendship from the King and Queen of *England*, desiring his Excellency to testifie to the King his Master, with what satisfaction she received these Declarations, and how ready she was to make use of all her Power and Interest, to preserve the good Correspondency betwixt her Son, and his Majesty of *Great Britain*; she also desired to acquaint her Sister the Queen of *England*, how much she esteemed her Person and Virtues, and how sollicitous she was for her Prosperity; concluding, that she was highly satisfied with the Ambassadours Conduct, and should ever have a particular Esteem of his Person and Merits. After which his Excellency was conducted into a large Room, where he was entertained with extraordinary Splendour and Magnificence.

The Ambassadour's Voyage to *Copenhagen*.

The 13th of *October*, his Excellency left *Stockholm* with his Train, in order to Embark aboard the Man of War, which lay at Anchor about 10 Leagues from the City; being a Ship of 50 Guns call'd the *Centurion*; we Embark'd the 14th, but our Horses being judged troublesome to be transported by Sea, were sent by Land to *Copenhagen*. We were however detained 4 days longer, because his Excellencies Baggage did not arrive till some days later than was expected. The 18th we set Sail with a pretty good Wind, but it proving Foggy were constrained to come to an Anchor again till the Afternoon, when the Air clearing up, we advanced about 4 Leagues, and were forced to cast Anchor again amongst the Rocks, which was very dangerous here, and extend from *Stockholm* to the main Sea near 25 Leagues: The 19th it was so dark (though the Wind was so fair) that we durst not weigh Anchor till 9 a Clock in the Morning, when the Day clearing up a little we set Sail, but about Noon we thought we had lost our way, and consequently our selves, till at last we discovered *Lands Ort* (Lands End) which we left to the right and entred the main Sea. The 20th early in the Morning passing by *Gothland* to the left, we sail'd within sight of the Isle of *Stockholm*; the 21st, and 22d in the Evening we cast Anchor betwixt two Islands about 12 Leagues from *Copenhagen*. 1664.

During this Voyage we had very good Diversion with a couple of tame Bears, one of which was so gentle that you might play with him like a Dog, and he would wrestle with any of the Ships Crew, with a great deal of Dexterity. The other somewhat bigger than the former, could not be pleased better, than to put one's Finger into his mouth, which he would suck like a Teat; which seems to verifie what has been observed by some, to wit, That the Bears in Winter time will suck their own Paws for want of Food. Two tame Bears.

The 23d we did not Sail till Night, when by the light of the Moon we made 5 or 6 Leagues; but were forced to come to an Anchor the 24th in the Morning, and lye still all that Day and Night, by reason of the sand Shelves, Fogs and tempestuous weather.

The 25th we continued our Voyage, and about 10 a Clock in the morning arrived before *Copenhagen*, which we saluted with 12 pieces of Cannon. About half an hour before we came to an Anchor, we met a *Dutch* Man of War, which not striking her Flag, our Captain ordered 7 or 8 Cannon to be Charged with Bullets, which whilst they were doing, the *Dutch-men* took it down, and in passing by saluted us with 5 Cannon shots, which we having returned with 3, he gave us 3 more, which we answered with 1; soon after his Excellency having sent his Secretary to give notice of his Arrival, the Vice-Admiral of *Denmark* came the same Evening aboard us, to Complement his Excellency in the King's Name upon his happy Arrival; and Sir *Gilbert Talbot* his *Britannick* Majesty's Envoy Extraordinary, who was lately arrived at that Court, came along with the Vice-Admiral in a very fine Barge, to salute his Excellency. They return'd the same Evening, and the Lady Ambassadress being near her time, took this opportunity to go ashore along with them, though we were near 2 Leag. distant from the Harbour. The next day, the Vice-Admiral having sent us two Pilots to Conduct us, we were nevertheless so ill steered, that we had likely to have been lost at the very Entrance of the Harbour, had it not been for the Vice-Admirals Care, who understanding the Danger we were in by the Signal of 2 Cannons we gave to the Town, came to our assistance with some Boats, by the means of which, and a sudden Calm, which proved propitious to us, we were soon after disengaged, and came to an Anchor at seven Fathom water. However this accident, and the Arrival of the *French* Ambassadour, Mr. *de Tressan* some few days ago, who had not yet quitted the House, appointed for the Entertainment of Ambassadours, was retarded till next day. They came before *Copenhagen*.

The 27th of *October*, his Excellency's Entry was performed with a great deal of Splendour; for the contrary Winds preventing our coming up close to the Town, two Gallies and a Galliot, most magnificently equipp'd, were sent to receive the Ambassadour and his Train, aboard our Vessel, which at parting gave us 20 Guns; as we pass'd along we saw a good number of Men of War with the Flags and Streamers display'd, who saluted us with their Cannon. Within the Harbour we were met by 20 Pleasure Boats richly Equipp'd, to receive his Excellency and his Train; into the first went the Foot-men, then the Pages and Gentlemen, after them my Lord *Morpeth*, and last of all the Ambassadour in Company of the Vice-Admiral, and the Master of the Ceremonies. Thus we were conducted through the Harbour, where we Landed at a place covered with Tapstry, and his Excellency being again Complemented in his Majesty's Name, was conducted into the King's Coach, and from thence to the Palace, prepared for his Reception. The Ambassadour's Entry into *Copenhagen*.

The City of *Copenhagen* stands upon the Sea, being well fortified by Art, and strong by its Situation in a large Plain; it has a Canal deep enough to receive pretty bulky Merchant Ships, but has no Current. The Royal Palace has nothing remarkable in its Building, unless it be a high Tower erected for the use of Astronomers, unto which an easie Assent is raised without steps, so broad that a Coach may pass and turn at the top of it. In a Steeple hard by are to be seen the marks of the *Swedish* Cannon of the late Siege in *Copenhagen*, the Holes having been since gilt by the King's Order. As to the *Danish* Court, it bears as much resemblance to the *Germans*, as the *Swedish* does to the *French*; the *Danish* and *Swedish* Languages are understood easie The Ambassadour's Residence at *Copenhagen*.

enough

1664. enough by both Nations, the *French* Tongue being much uled alſo in both thoſe Courts.

His Audience. The Ambaſſadour was magnificently Entertained the firſt 3 days after his Arrival in the Town, at the King's Charge, and the third had his Audience (much with the ſame Ceremonies as at *Stockholm*) of the King, who, though above 60 years of Age, appeared very Vigorous and Majeſtick, large of Stature, in a Scarlet Coat laid all over with Gold and Silver Lace, with a Sword by his ſide, and a Plume of white Feathers in his Hat. He ſtood under a Canopy of State, with only 4 or 5 Miniſters of State ſtanding on one ſide, and about 10 or 12 of his Guards *du Corps* attending in the midſt of the Audience Hall. The Ambaſſadour made him a low ſalute as he entred, which the King returning with a ſalute, his Excellency advanced as far as to the Canopy, where as ſoon as the King put on his Hat, he likewiſe put on his, and Complemented the King with the following Speech.

Sir,

His Speech to the King. AMong ſo many Prerogatives of the higheſt Fortune, yet Princes have one diſadvantage, that They can ſeldom attain to that reality and intimacy which we may ſee among private Perſons. The equality of their Sovereign Power expoſeth them to perpetual Competitions, the Intereſt of their People obliges them to a conſtant Jealouſie, and even the Fidelity and Prudence of their Miniſters ſeems rather made to entertain them in mutual Cautele and Suſpicion, than in perfect Friendſhip. But betwixt the King my Maſter and Your Majeſty it is all otherwiſe, and You are perhaps the only two Princes in Chriſtendom, who in ſo great a nearneſs yet can never juſtle. And having betwixt You all the Endearments of which private Perſons are capable, Your Royalty only inclines and inables You to cultivate and expreſs them in a more honourable manner. What Subjects of one King could ever live ſo peaceably and kindly together as thoſe two Excellent Princes, His Majeſties Grand-Father and Your Majeſties Father, by Whom thoſe Bonds of Hoſpitality and Conſanguinity were ſo cloſely woven betwixt You, viſiting one the other in their Kingdoms as familiarly as Neighbours in the ſame City, and taking Counſel together as confidently as Brothers in the ſame Family. And ever ſince what mutual good Offices, what communication of Counſels have there been betwixt both Kings, both in adverſe and proſperous Fortune (with ſo much conſtancy eſpecially on Your part in that moſt turbulent ſtorm of the *Engliſh* Monarchy, that His Majeſty muſt keep it in a moſt grateful and eternal Memory) and ſo univerſal a ſympathy upon all occaſions, that all Antiquity would be troubled to furniſh a parallel for ſo Golden and real a Friendſhip. And as the Bonds of reciprocal Obligations, and thoſe animated Ligaments of Blood and Nature have knit both Your Majeſties in the moſt refined union, ſo as to the groſſer Intereſt of Commerce and Navigation, I may ſay without a ſimilitude, that it hath moored on both ſides, even with Anchors and Cables betwixt the People. Therefore thoſe Affairs having been regulated and conſtituted at the time time of the Extraordinary Embaſſage ſent by Your Majeſty to *England*, His Majeſty hath now ſent me to return that Honour and Obligation, and to aſſure Your Majeſty, that as He ſhall moſt faithfully obſerve that inviolable League then perfected by the prudence of Your Ambaſſadour, betwixt Your Majeſties, ſo ſhall He moſt gladly approve on all occaſions to Your Majeſty, that ancient radicated and private Affection, which hath from Your Anceſtors hitherto flouriſhed ſo happily betwixt You. His Majeſty is only troubled, that what by the compoſition of his own Affairs and what by my ſlow arrival this Office is performed later to Your Majeſty. But He hopes Your Majeſty will conſider, that however the Embaſſy was then ſent when his Letter was firſt ſubſcribed, and that to recompenſe and excuſe my neceſſary delay, He hath taken care to ſupply it in the mean time by his Extraordinary Envoy, who (I doubt not) according to his great Abilities and Affection hath already herein ſufficiently informed Your Majeſty. So that I need ſay nothing more at preſent than at the beginning, that as both Your Majeſties Soveraign Power is free from all ſhock and competition, and your Peoples mutual Intereſt diſpenſes you from all Suſpicions and Jealouſie; ſo I even out of Fidelity to the King my Maſter, beſide mine own proper inclination, find my ſelf bound to contribute all things toward the Entertainment and certainty of the moſt perfect Friendſhip betwixt Your Majeſties, and ſhall make it my buſineſs to give all the real Proofs and Teſtimonies thereof, during the time allotted me for this Employment. 1664.

This Speech was rendred into *Latin* as followeth,

Domine Rex,

INter tot ſummæ fortunæ Ornamenta hoc tamen incommodi Principibus adhæret, quòd rarò ad intimam illam & apertam animorum communicationem aſpirare poſſint, quam inter tenuioris ſortis homines ſæpius obſervamus. Regii enim illa faſtigii paritas perpetuâ ferè æmulatione concurrit, diverſæ ut plurimum Subditorum rationes ut ſtudia etiam Dominos trahunt, & ipſa miniſtrorum ſuorum prudentia & fides ad cautelam potius & ſuſpicionem quam ad amicitiæ inter Reges ſimplicitatem facere videntur. Inter Regem autem Dominum meum & Majeſtatem Veſtram res aliter omninò ſunt comparatæ, & ſoli forſitan eſtis ex Europæ *Principibus quorum neuter in tantâ vicinitate alterius luminibus obſtruat. Sed quum omnia quæ etiam privatos Conciliant benevolentiæ & charitatis irritamenta, inter Majeſtates Veſtras intercedant, ſuprema Utriuſque Poteſtas hoc tantum efficit, ut majori cum dignitate & fructu mutuam amicitiam exercere & excolere poſſitis. Si enim feliciſſimam Majeſtatis ſuæ Avi & Majeſtatis veſtræ Patris memoriam replicemus, quorum auſpiciis hoſpitalitatis & conſanguinitatis jura inter Majeſtates Veſtras propius coalnere, nullius unquam Principis Subditi tam unanimes & concordes quantum ipſi illi Reges fuerunt. Eâdem familiaritate quâ Cives in eâdem urbe in Regnis ſuis ſe mutuò inviſebant, nec minori cum fiduciâ in commune conſulebant quàm fratres in eâdem familiâ. Quæ deinceps officiorum reciprocatio, quæ communicatio conſiliorum, quæ proſperorum & adverſorum inter* Angliæ & Daniæ *Reges ſocietas permanſit? (Tali præcipuè ex Veſtrâ parte conſtantiâ in turbidiſſimâ illâ Regni* Anglicani *procellâ, ut iſtud gratiſſimâ & æternâ memoriâ Majeſtas Sua retineat) tantus denique animorum undequaque conſenſus, ut neque ex ultimâ antiquitate tam ſinceræ, conſtantis, & aureæ amicitiæ exemplum eruere poſſimus. Et uti beneficiorum mutui nexus & animata illa ſanguinis & naturæ vincula puriſſimâ unione Majeſtates Veſtras illigarunt, ita quoad Populorum communionem utramque Nationem craſſioribus navigationis & commerciorum nodis, tanquam rudentibus & anchoris obſtrictam & inter ſe contextam videmus. Quum autem publicæ illæ utriuſque Populi rationes tempore extraordinariæ à Majeſtate Veſtrâ Legationis optimè conſtitutæ fuerint, Majeſtas ſua Dominus meus clementiſſimus per me eundem Legationis honorem & officium Majeſtati Veſtræ nunc reddere & perſolvere voluit; Et Majeſtati Veſtræ me per teſtatum facere ſe non ſolum ſummâ fide perſeveraturum in ſanctiſſimo illo fœdere inter Majeſtates Veſtras Extraordinarii Veſtri Legati operâ & prudentiâ confecto, ſed etiam omni occaſione Majeſtati veſtræ approbaturum eſſe antiquum, innatum, & ſingularem illum affectum qui ab Auguſtiſſimis Utriuſque Majoribus propagatus inter Majeſtates Veſtras hactenus religioſiſſimè conſervatur. Hoc unicum Majeſtatem ſuam mœrè habet, quòd propter urgentiſſima ſua negotia & tardiorem noſtrum adventum ſerius aliquantò hoc officium reciprocare potuerit. Speret tamen Majeſtatem Veſtram reputaturam Legationem hanc jam inde miſſam, quum primum Literas mihi ad Majeſtatem Veſtram dederit, atque neceſſariam noſtram moram melius compenſare & excuſare poſſet, Se interea per Ablegatum Extraordinarium curaſſe. Neque dubito quin Dominus Ablegatus Extraordinarius pro ſuâ prudentiâ & optimo affectu Majeſtati Veſtræ hâc in re abunde ſatisfecerit. Ità ut ſupervacaneum omnino foret in præſens aliquid addere; niſi, ſicut in Principio orationis dixi, Regiam Utriuſque dignitatem hoc ipſo Majeſtates Veſtras melius conciliare, & communes Subditorum Veſtrorum rationes ab omni invidiâ eſſe ſejunctiſſimas, ità me Majeſtatis ſuæ Miniſtrum præter propriam animi noſtri propenſionem, etiam pro fide quam Majeſtati ſuæ debeo, omnia contributurum ad certitudinem, ad declarationem perfectiſſimæ ſuæ cum Majeſtate Veſtra amicitiæ, & quoad hîc manebo totam in ejus argumentis & teſtimoniis operam noſtram & tempus collocaturum.*

Upon which the *Daniſh* Chancellour in the Name of his Royal Maſter declared, what great Satisfaction he received from theſe Expreſſions of Kindneſs and Amity made to him in behalf of his dear Friend and Ally, the

1664. King of *Great Britain*, and how ready he should be not only to maintain a good Correspondency, but also to embrace all opportunities of uniting their Interests. He concluded with a Complement to the Ambassadour, that the King was extremely well pleased with his Conduct, and that he might assure himself of his Favour and Goodwill. It was observed, that both the King and his Excellency as often as his *Britannick* or *Danish* Majesty's were mentioned they pull'd off their Hats; and put them on again at the same time. After which my Lord *Morpeth* and all the Gentlemen went in order to pay their Reverence to the King, and his Excellency was conducted towards the Queen, unto whom he made this Harangue uncovered.

Madam,

His Speech to the Queen and the two Princes.

THE King my *Master* hath commanded me to wait upon Your Majesty, and in His Majesties Name to make to You all the most entire Professions of Friendship, Affection and Esteem which are due to so Great a Queen, so near a Kinswoman, and so admirably accomplished a Princess. But, seeing it is impossible to execute those Commands worthily, and to the full, unless His Majesty could not only imprint His Character upon me, but inspire me too, with his great Soul and royal Understand, I must beg Your Majesty's Pardon, if I fall short, where His Majesties Sense is so far above Expression, and Your own Perfections are so ineffable. Therefore I shall only in my ordinary and safer way, assure Your Majesty, that no Prince in Christendom doth interest Himself more in Your Majesty's Health and Prosperity than the King my Master. And no less the Queen, who as She makes His Affections the rule and model of Hers, hath yet moreover a singular Affection and Admiration of Her own for your *Majesty*, hath commanded me to express how much She regards and loves you, considering your Heroical Person, as the Example of Queens, and Glory of Women. After which, whatsoever of thoughts or words can remain to my self, wherein to testifie mine own great Veneration and Service to your Majesty, I shall consecrate to your Fame upon all occasions, but present them to your Self involved rather in a most devout and respectful silence.

From thence being introduced to the eldest Prince *Christian*, who was then not above Eighteen years of Age, he made him the following Complement with his Hat on.

Sir,

THE King my Master hath commanded me particularly to wait upon your Royal Highness: And as He professes a Signal Obligation to His Majesty your Father, that according to the old Familiarity and Kindness betwixt the two Kings of *England* and *Denmark*, He was pleased so lately to intrust so great a Pledge as your Royal Highness with Him; so He desires you to believe, That in that your too short stay with Him, He nevertheless took such true Impressions of your Royal Highnesses most Hopeful, Vertuous and Princely Disposition, that, were there not all those other Obligations of Friendship, Kindred, and Confederacy betwixt Him and the King your Father, He should for your own sake have a most Sincere and Personal Friendship, Kindness and Esteem for your Royal Highness, and accordingly wishes you all the Happiness and Health as to Himself, and offers Himself upon all occasions to manifest His Royal Inclinations, and hearty Affection towards your Royal Highness. For mine own part, I shall from this present, as I was from the first minute I had the Honour to see you, desire to be entred into the List of your Highnesses Servants.

Immediately after his Excellency being conducted into the Apartment of the second, Prince *George*, a very handsome and hopeful Prince, but scarce Fifteen years of Age, he Complemented him in the following manner,

Sir,

THE King my Master hath given me particular Order to wait upon your Highness from Him, as well out of Affection as Curiosity. For, whereas your Highness being the second Son of *Denmark*, hath thereby a very just Title to His Majesty's Affection, so he having heard so much of you, as of a most accomplished Prince in so tender an Age, was very curious to know the truth of it. I am most happy in this occasion to be able to certifie His Majesty, with how much reason Fame hath said, what she hath of you, and I assure your Highness, that His Majesty will take great Interest and Pleasure in it, and desire nothing more than to be a witness thereof Himself, by seeing you one day in his Court, as you are already in His heart. For mine own particular, I am perfectly your Highnesses most humble Servant. 1664.

The Ambassadour's Negotiation.

In order to give you the most proper Idea of Matters concerning our stay (of seven weeks) here, I will (as I did in the second Embassy) first give you an account of the Ambassadour's Negotiation, next of his Entertainment, and last of all what happened most remarkable, whilst we stay'd at the *Danish* Court.

Our Embassy happened just at that Conjuncture, where vast Preparations being made in *France*, for those great Enterprizes they undertook afterwards for the general Disturbance of *Europe*, and the *Hollanders* inclining at that time towards the Interest of *France*, were endeavouring to unite the Interest and Forces of *Denmark* with theirs; whilst his *Britannick* Majesty judged it his Interest, to enter into a more strict Union with both the Northern Crowns. Mr. *Coventry* was sent for that purpose into *Sweden*, as Sir *Gilbert* was lately arrived upon the same account at *Copenhagen*, his Excellency's principal Employment, tending towards the accomplishing of this Alliance. Most People at that time, were of Opinion, that after the Signal Obligation the *Danes* had received from the *Dutch*, by the relief of *Copenhagen*, they would scarce be prevailed upon to joyn with others against their Interest, but as the *Dutch* had since that time given no small occasion of Complaint, so, they thought themselves furnish'd with sufficient Reasons, for such a Desertion, if Matters could have been fix'd upon a right Foundation betwixt them and the *Swedes*, which was the true Reason they afterwards sided with the *Dutch*, and rendred our Negotiation unsuccessful; of which I will give you a small Prospect here.

Conditions proposed by the *Dane*.

The *Danish* Commissioners declared, that the King their Master was willing to enter into a more strict Alliance with *Sweden*, and desired that the same might be made as effectual as could be for their mutual advantage, by the interposition of his *Britannick* Majesty, provided it might be done upon these Conditions. *viz.* That the *Swedes* would recede from the Privileges they enjoyed of paying no Customs in the *Sound*; and besides that agreed, That the *Dutch* should for the future pay the said Toll at the same rate they were set at, 1642. by which means the three Kingdoms of *Denmark*, *England* and *Sweden*, might manage their Trade on that side with an equal advantage. They offered however, in case the *Swedes* should not think fit to accept of this Proposal, to give them a proportionable Summ of Money for the Resignation of it, or else to leave it to the King of *England*'s Judgment, what other means might be made use of to bring this Union to a happy Conclusion. They further proposed, That all the Subjects and Ships of these three Kingdoms, should have Liberty to Traffick in all their respective Ports, with the same advantage as the Inhabitants of the same Countrey, without any Restriction; and that neither of the three Kings should afford the least Pretention, to such as had been declared Traitors, or been forbidden to leave their native Countrey, by the other two, or either of them. For the Exemption of the *English* from the usual Toll in the *Sound*, they demanded (according to their Registers as they said) no less than 120000 Crowns *per annum*, and that without the least prejudice to the Soveraignty belonging to the Kings of *Denmark*, in the passage of the *Sound*. To the Proposition made in his Majesty of *Great Britain*'s Name, to turn the Trade, in Conjunction with the King of *Sweden*, from *Archangel* through the *Sound*, it was answered by the *Danish* Commissioners, that the King their Master was ready to declare himself more at large upon that Point, so soon as he could understand, upon what Terms his *Britannick* Majesty was willing to engage with the *Swedes* upon this account, and that in case their before mentioned Proposition about the *English* was accepted, they would not want any further Privilege; but if not, the Payment of the Toll in regard of them, might be adjusted by a peculiar Treaty. They declared further, That the King of *Denmark* was so far from being engaged in any particular

1664. ticular League with the *Muscovites* at that time, that there were some Differences between them concerning the Limits in *Norway*. As to the Summ of Money Demanded by the *Danes*, in case they should be obliged to set out a Fleet for the Service of the Crown of *England*; it was declared by the Commissioners, that since the King their Master intended to set out against the Spring 20 Men of War, with 1000 Cannon, and 5000 Seamen, they expected only a Subsidy of 25000 Crowns besides their own Charges. But in the conclusion they insisted positively upon this Point, that before any further steps were made in the Matter, the King of *Sweden* might be prevailed upon, to declare himself as to this Union, and that nothing should be tranlacted without the knowledge and consent of their Royal Master.

The Ambassadour's Entertainment here.

We will now proceed to say something of our Entertainment here; which was not inferiour to that we had met with at *Stockholm*; for, not to mention that after our Arrival at the Kings Charge, there were several splendid Feasts made by his Excellency, and Mr. *de Treflon* the French Ambassadour, who being lately come to this Court, in order to consummate a League then on foot betwixt the most *Christian* King and his Majesty of *Denmark*, in which the King of *England* was offered to be comprised if he pleased, this produced a more than ordinary Friendship, and uncommon Civilities betwixt these two great Personages. Mr. *de Treflon* being at *Copenhagen* before us, paid the first Visit to his Excellency, who met him at the outward Gate, next the Street, giving him the right hand in his House, the same Ceremony being observed on his side, as often as his Excellency came to visit him.

The 15. of *November*, The *French* Ambassadour parted from *Copenhagen* for *Stockholm*. The most splendid Entertainment was two days after at the Christening of a Son of his Excellency, my Lady being brought to Bed about fourteen days before. The King, and the eldest Prince stood Godfathers, and the Queen Godmother; after it was Christened, the King and the Queen with the Prince, and the two Princesses his Sisters, besides several Ladies of Quality, and the chief Persons of the Court, gave the Ambassadress a Visit to congratulate her upon her happy Delivery. From thence they were conducted into a great Room, where a most splendid Collation was prepared for them, the King standing for half an hour, whilst he continued there on one side of the Table, and beginning several Healths. The Gentlemen and Pages, that attended their Majesties, were entertained in the same Room, and the rest of the Servants in the Court below. Three days after the Royal Prince *Christian* was invited to another Feast by his Excellency, and after Dinner there was a great Ball, after which they went out several times a Hare-hunting. Amongst other things worth taking notice of, his Excellency took a view of the *Arsenal*, where we were diverted by a Coach, which moved forward by means of a Wheel-work and Rudder, guided by two people that were placed within it. In the Kings Chamber of Rarities which consisted of sixty Apartments, we saw divers very curious pieces of Mechanicks, and among the rest a small Ship ready rigged, the Masts, Ladders, Sails and Cannon being all of Ivory; we took also a view of the Royal Palace of *Fredericksburgh*, a most magnificent and exact Structure. Much about the same time, the King coming unexpectedly aboard the Men of War that brought us from *Stockholm*, and having left some Tokens of his Generosity among the Ships Crew, the Captain after his Return from the City fired his great Guns, which made such a thundering noise in the Night time, that they rung the Alarm Bell at *Copenhagen*, and the whole City was in an uproar, which was not appeased, till they discovered the true reason of their mistake. Much about the same time his Excellency received Advice from *Musco*, that *Calthof* had been forced to reingage himself into the *Czar*'s Service for two years longer, and that an Ambassadour had been sent from thence into *England*, to complain of his Conduct. But as he had from time to time sent Copies of what had passed to his *Britannick* Majesty, which he was sensible had been well approved of at Court, he made no great Account of it. Not long before our Departure we were diverted with a mock Engagement betwixt six Men, who had the management of as many portable fire Engines, with several other Men, who supplyed Engines with water, by the means of certain Pumps; they discharged the water with so much Dexterity, at about Fifteen or sixteen paces distance, upon one another, that one of the Engineers lost his Eye in the Combat. 1664.

The 1st. day of *December*, My Lord *Morpeth* with four or five Gentlemen and some Footmen, was sent for *England* by his Excellency, that he might have the advantage of seeing the most remarkable places betwixt *Denmark* and *England*, but especially *Flanders*, his Excellency himself intending to follow with his Train by Sea; but the coldness of the weather obliged him soon after to alter his Resolution, and to prepare for his Departure by Land; and accordingly he took his leave of the King of *Denmark*, the 11th of *December*.

Sir,

BEing now ready to lay off the Publick Character which his Majesty my Master had given me, I am obliged by his Commands to reiterate the Assurances of His most sincere and constant Affection to your Majesty. For the performing of which I shall not need much Oratory, both because his Majesty himself desires rather to fulfil the Friendship in Effects, than to express it in words; neither is it so pertinent to vary that in Language, which is immutable in the Intention, besides that Your Majesty is your Self already sufficiently perswaded of it. So that without affecting any Ornament, I shall only make use of that Force which the occasion naturally gives me, the words of those that are upon departing being always the most real, serious, and weighty. I say therefore, That his Majesty my Master is by Blood, by Alliance, Gratitude, Inclination, and Interest a Friend to your Majesty, and that he will not fail upon all occasions to make good all those Relations to your Majesty. And as beside all those there seems to be so near a similitude in Your Stars and Fortune, that both Your former Adversities kept time together, and had but too great an Influence on each others Affairs; so doth He gladly see and hope, and will always endeavour upon his Part, that His and Your present Prosperity may have as strong a Sympathy and Reflection. Nor will He think himself the less obliged to this, by the great Honours and Favours which Your Majesty hath for His sake shown me, who am by my Employment but his Majesty's shadow, and that too made darker by mine own Imperfections. But therefore I shall not fail to give his Majesty a most exact, and full account of all Your Majesty's affection to Him, and of all Your Royal Graces to my self. Being most obliged and most desirous to perform all Offices whereby I may encrease (as far as that which is perfect can be encreased) the good Correspondency betwixt both your Majesty's. And for mine own particular, I pay, and shall perpetually, my Thanks to your Majesty, and shall always pray for your Majesty's Health, long Life, and Prosperity, and that the Solidity and Strength of your Government may be the delight and pattern of all other Princes.

This Complement was thus expressed in *Latin* by my Lord Ambassadour's Secretary.

Domine Rex,

DEpositurus hanc Legationem Majestati Vestræ iterum sinceriſſimum & constantiſſimum Majestatis suæ Domini mei Clementiſſimi affectum in hac ultimâ salutatione confirmare debeo. Ad hoc autem faciendum non est apparatu & ornatu Oratorio opus, tum quòd Majestas sua amicitiam erga Majestatem Vestram reipsâ potius approbare, quàm verbis adumbrare cupiat, tum etiam quod immutabilem illam Regii sui animi sententiam & tenorem dicendo variare minus decorum videatur, præsertim quum Majestas Vestra jam antea de illâ re abunde sibi persuasum esse testetur. Quapropter neglectis omnibus artis pigmentis eo tantùm utar orationis auxilio, quod ipsa hujus occasionis natura suppeditat. Quæ enim in procinctu & ab abituris verba dictantur, uti simpliciſſima in se atque intentiſſima, ità majorem vim, efficaciam, & pondus apud alios habere & obtinere solent. Dico igitur Majestatem suam sanguinis nexu, fœderum societate, obligatione beneficiorum, spontaneâ animi propensione, & communibus rationibus Majestati Vestræ esse conjunctiſſimam, neque ergo commiſſuram ut in ullo hujus amicitiæ officio suæ partes desiderentur. Et quum præterea occultior quidam Utriusque Syderum consensus esse videatur tantus, ut adverse Alterius res Alterum pariter tanquam ejusdem mali contagione olim afflaverint, ità futurum speret & ipse allaborabit,

1664. *borabit, ut prospera Utriusque fortuna non minùs ad mutuum Amborum ornamentum & utilitatem redunder. Neque imminnetur hæc Majestatis suæ erga Majestatem Vestram benevolentia, quum audiverit quantos honores suâ causâ Majestas Vestra mihi exhibuerit, qui in hoc Legationis munere umbram tantùm Majestatis suæ gero, & illam quidem propter defectus nostros adhuc obscuriorem. Ide que de summo erga Majestatem suam Majestatis Vestræ affectu, deque tot honoris & benevolentiæ erga me ipsum indiciis nihil reticebo, quandoquidem officii mei esse duco & maximè cupio omnia conferre ad augendam (quantum quidem perfectissima possunt augeri) mutuam inter Majestates Vestras amicitiam. Ego autem Majestati Vest æ Serenissimæ gratias nostras & nunc ago, & in posterum semper jam acturo, & Majestati Vestræ prosperam Valetudinem, longam Vitam, perpetuam Felicitatem precor & voveo, atque præsens hæc Regiminis sui spectmina omnibus aliis Principibus exemplo & voluptati esse possit.*

The Ambassador's Audience of the King and Queen.

The *Danish* Chancellour having returned a very obliging Answer, and the Gentlemen of the Embassy being admitted to pay their Reverence to the King, his Excellency was introduced to the Queen, whom he Complemented in the following manner.

Madam,

I Could never answer it to His Majesty, should I not in best manner re-assure Your Majesty of that great Honour and Esteem He hath for You. But Your Majesty having done the King my Master that right as so easily to believe it, hath thereby acquitted me of my Commission, and your own Royal perswasion hath excused the Embassadour; yet nevertheless, I cannot omit to witness how much His Majesty rejoyces to have heard so lately, of the Health and Prosperity of Your Majesty and your whole Family, which as it is without Competition the most flourishing Family of all *Europe*, and worthy only to have sprung from such a Mother, so His Majesty wishes to all of them, as fair and suitable Fortunes, as the Greatness of their Perfections, Vertues, and Extraction doth promise and challenge. And yet, this is but one part of that Happiness, which in all other things He prays for Your Majesty, and which upon all occasions His Majesty himself will endeavour, and count Himself most happy, to promote to the uttermost. For my self, I have so much to acknowledge for all the Honours that Your Majesty hath, in respect to the King my Master, done me, that should I take the time to do it, it would frustrate my Departure, and the Frost or my Thanks would be the same thing. But I assure Your Majesty, that I carry with me an Heart most sensibly touched with Gratitude, and most humble Devotion to Your Majesty, and that I shall not fail to inform the King my Master of all those Obligations.

The Answer given in the Queen's Name was full of affectionate Expressions toward their *Britannick* Majesty's, and favourable Sentiments for the Ambassadour's Person, after which his Excellency was Conducted first to the eldest Prince *Christian* and immediately after to Prince *George*, unto whom he addressed himself in these following Speeches.

Sir,

YOur Royal Highness knows the King my Master so well, that I need no new Credentials when I renew to Your Royal Highness the assurances of his esteem and affection. But if I stood in need of Witnesses, I would use only Your own merits, it being absolutely impossible, that a Prince so clear-sighted as the King my Master, should have an indifference for a Prince of the Qualities and Birth of Your Royal Highness. Or if the Examples of others could prevail herein more with his Majesty, than His own Inclination and Judgment, He could not fail of loving and esteeming Your Royal Highness, seeing all those who have had the Honour to know you do no less. But His Majesty pretends not to imitate others, but rather to set them an Example, and excel them all in all the most Essential Proofs toward Your Royal Highness. In the mean time, He entreats Your Highness to furnish him, as He Himself will constantly search, occasions of expressing it, never finding himself more happy, than when He may in any way oblige You. For mine own part, who can never sufficiently acknowledge the Favours Your Royal Highness hath done me, I desire nothing with more Ardour and Passion than to continue in Your good Grace. And I beseech You to honour me with Your Commands, for I now divest my self of my Publick Character, to enter henceforward into the Quality of the most humble Servant of Your Royal Highness. 1664.

To which the Prince made answer himself in two or three words as he had done before. And from his Highness the Ambassadour departed towards Prince *George* with this Complement.

Sir,

I Am very happy that the last Employment of this Embassage is to salute Your Highness once more in his Majesty's Name; and I assure Your Highness, that I hold it for a Recompence too glorious, and too pleasant of all my Labours, that I am to conclude them in this manner. For in this grand Tour of the North that I here make an end of, I have indeed seen several things very remarkable, but chiefly the King your Father, a Prince of an admirable Generosity, Constancy, and Goodness, the Queen the most adorable Princess of the World, and whose unparalell'd Vertues give no less Courage to Fame, than Despair to Imitation, His Royal Highness who hath travelled through all Hearts, and without any Forces but those of his own merits, hath won himself an universal Empire over the Esteem of all *Europe*, the Princesses wonders of Nature, and Miracles of Education. But after all this I must avow, that I never yet saw a Prince so little and so great as Your Highness, or whose young mind did in his greenest years Promise and Threaten so much and so handsomely. I leave it to Your Highnesses Judgment with how much Pleasure and Contentment the King my Master will hear these News, for I assure Your Highness, that he takes, and will take more and more Interest every day in all that concerns You. And for mine own particular, I beseech Your Highness to retain me in Your Favour, and to dispose always of my Person, as consecrated to Your Highnesses Service.

His Excellency having been the same Night entertained at Court with a Ball, and the Wind being come about to the South, which had melted most of the Ice, he once more changed his Design, and prepared for his Embarkment. Of the two Princes.

Accordingly his Excellency (after he had made a Present of his Coach and Horses to the *Danish* Master of the Ceremonies) embarked the 15th of *December*, and the next day advanced 60 *German* Leagues as far as *Elsinore*; where for want of an Easterly Wind we were forced to lay at Anchor 60 days. Here we received the News of the indifferent Reception, the *Muscovy* Ambassadour had met with at the *English* Court, and as about the same time we made the first Discovery of a Comet, which then appear'd in *Europe*, some of us said jestingly, that it portended no good to the *Muscovites*. The 23d we set Sail from *Elsinore*, but were scarce come 20 Leagues when we were forced back by contrary Winds to *Elsinore*, and the 28th we were afflicted with a most violent Tempest, which drove us 2 Leagues further from *Elsinore*. The 29th the fury of the Winds being somewhat abated, his Excellency resolved to pursue his Journey by Land, with Nine of his Domesticks (of which number I was one) and to leave the rest with the Ambassadress to come by Sea. We pass'd cross the Isle of *Zealand*, and came the last day of *December* to *Corsohr*. The Ambassadour sets from Elsinore.

The 1st. of *January*, we pass'd from thence in a Galliot to the Isle of *Fuhnen*, and advancing 8 Leagues through the Island, came from thence the next day in a Fisher-boat, into *Holstein*; and so by the way of *Alderslevon* and *Flensburgh* to *Hamborough*; from hence we travell'd over *Buxtehude* to *Bremen*, and so through *Westphalia* to *Munster*, where we arrived the 11th of *January*; from *Munster*, we advanced to *Cologn* on the *Rhine*, from thence to *Malines* in *Flanders*, and farther the 22d to *Brussels*. From hence taking our way through *Alost*, *Gaunt*, *Bruges*, *Newport*, *Dunkirk* and *Graveline*, we came in 6 days to *Calais*. From *Calais* we pass'd 7 Leagues cross the Seas to *Dover*, where we took Post to *Gravesend*, and the 30th of *January* arrived safely in *London*. 1665. Comes to London.

By this time Acts of Hostilities having pass'd betwixt the *English* and *Dutch*, his Excellency thought it his safest way to take this Circumference, rather than to expose himself to the Danger of being surprized by them; which was also in some measure the Reason, he pass'd thro' The Ambassadour sets from Elsinore.

1664. thro' most of those parts Incognito; and as the weather, after we left *Copenhagen*, turned very cold, and we were forced to travel all the way from *Elsinore* to *Cologn* in Waggons uncovered, we were almost as sensible of the Rigour of the Season as if we had been in *Russia*; though we appear'd at *Hamburgh* in a very indifferent Equipage, yet the Magistrates having got notice of his Excellency's arrival, would needs Complement him, testifying their Dissatisfaction, of being deprived of the opportunity to shew their Respect and Amity with the Crown of *England*; and the Honour due to his Excellency's Character and Person. His Excellency having return'd them Thanks for their Civilities, set forward on his Journey again the next day, and passing the *Elbe* in Sledges, we arrived the same day at *Buxtehude*, a Town in the Countrey of *Bremen* under the *Swedish* Jurisdiction. Here we met with an odd Accident; for, as we were ready to go forward after Dinner, there happened a Quarrel betwixt the Ambassadour's Secretary and one of the Waggoners, who refusing to go without his Comrade, the Secretary clap'd a Pistol to his Head, to force him to go, but the same being wrested out of his hand, he had enough to do to escape the fury of these Peasants. Whilst he was gone to the Governour to complain and desire redress, we found our selves beset on all sides by the Mobb, who fell to plundering our Baggage, and committed several Outrages, which would not have ended there, had not his Excellency (who was gone before) return'd and found means by his Presence to appease the Tumult. The first News we had after our Arrival at *Bremen*, was, that my Lord *Morpeth* had been seized upon by the *Dutch* at *Wesel*, which being confirm'd to us, three days after when we came to *Munster*, where happening to lay in the same Inn where my Lord had Lodged, we had all the reason in the world to believe, That his coming had been betrayed in this Town, his Excellency thought it highly expedient to hasten his Departure, and so after a stay only of five hours continued his Journey without any Molestation or Danger, except what we might have met with in our passage betwixt *Calais* and *Dover*. At *Rochester* we were rejoyced with the good News of the happy Arrival of our Vessel, (in which was the Ambassadress) 15 days before us, and to compleat our Joy, my Lord *Morpeth* arrived also 3 days after us, he and his Train, after a short Confinement at *Wesel*, having been released by a special Command from the States General. The first thing his Excellency did after his Arrival, was to wait upon his Majesty, unto whom he gave a particular account of his Negotiation with the *Moscovite*, as well as the two other Northern Courts; at which his Majesty shew'd a more than ordinary Satisfaction, commanding his Excellency to draw up in Writing an exact Narrative of all such matters as had any relation to his Transactions in the *Czar's* Court, which he did with so much Exactness, by repeating all the passages and their Objections against them, with his Refutation, that the King was highly satisfyed with his Conduct, to the no small Confusion of the *Czar's* Ambassadour, who being sent on purpose to make his Complaints against the Ambassadour, especially of his having been wanting in the Respect due to his *Czarish* Majesty, had no other Answer, than, That, *If the Earl of Carlisle might not perhaps have been so fully informed of all the Customs in the* Czar's *Court, he had upon several occasions been so ill treated by the* Muscovites, *that his Majesty had more reason to complain than the* Czar, *of whose Affection and Good-will towards him he could scarce be perswaded, till he should see the Effects of it, by restoring the ancient Foundation of their mutual Amity*, to wit, *the Privileges of the* English *Merchants*. So that the *Russian* Ambassadour returned home, not very well satisfyed, and Sir *John Hebdon* having not long after been sent to *Mosco* in Quality of his Majesty's Envoy Extraordinary, had no better Success in his Negotiation; than his Excellency had before him, the *Muscovite* Court standing immoveable as to the Point of the Privileges. 1664.

CHAP. VI.

An Account of a Journey out of Poland *into* Muscovy, *with a Relation of the Expeditions of the* Muscovites *against the* Crim Tartars, *the Tumults and Revolutions, which were contrived and managed chiefly by the Princess* Sophia, *Sister to his present* Czarish *Majesty* Pieter Alexiowitz; *some Observations upon a Journey by Land from* Muscovy *into* China, *made by Mr.* Spatarus, *and upon the present State of* Muscovy, *by the Sieur* Newstad. *Hereunto is annexed a Letter, from a certain Gentleman of* Germany, *written from* Musco *concerning the Siege of* Asoph, *and* Kasikermeen, *and the other warlike Exploits of the* Muscovites *in that War, with some Political Remarks upon the most remarkable Passages that have happened of late in the* Muscovite *Empire. Translated from the* Low Dutch.

1689. HIS Majesty of *Poland* having honoured me with the Title and Quality of his Envoy Extraordinary to the *Czar* of *Muscovy*, I set out from *Warsaw*, the 19th of *July*, 1689. to take my way over *Smolensko*, the Road of *Kiovia* being at that time much infested by the *Tartars*. The Governour of *Smolensko*, received me with more than ordinary Demonstrations of Civility, presented me with some Refreshments, and left it to my Choice, whether I would Lodge in the City or Suburbs, I chose the last, as being the more convenient; for though *Smolensko* is surrounded only with a single Wall, yet as they look upon it, as their chief Frontier place against the *Poles*, they keep a very strict Guard here, and shut up the Gates early every Night. He would needs have me see the Land Militia of that Province, consisting of 6000 Men, perform their Exercises, who were also ranged on both sides of the Streets as I pass'd along in my Coach to the Castle. These are generally Boors who are Registred at 6 years of Age, and being divided into certain Bands, are obliged to appear upon such like Occasions, when they are furnish'd with Cloaths. They have 1689.

four

1689. four Crowns and a meaſure of Salt allow'd them yearly by the *Czar*. The *Waywode* or Governour received me upon the Stairs of the Caſtle, whence he conducted me into his Apartment, where I found the Major General *Maneſius* a *Scotchman* by Birth, who being well vers'd in all the *European* Languages, ſerved for an Interpreter; and was appointed by the Governour to be my conſtant Companion during my ſtay at *Smolensko*. After we had drunk ſeveral Cups of Brandy to the Health of the *Czar* and his *Poliſh* Majeſty, I returned to my Lodgings, where I was very glad to meet with the beforementioned Major General, who being a Perſon of extraordinary merits. I was ſurprized to find ſo polite a Man in the midſt of ſo barbarous a Nation, which made me have the Curioſity to enquire what chance had brought him into *Muſcovy*. He told me; That, having travell'd through the greateſt part of *Europe*, he came at laſt into *Poland* with an intention to return from thence into *Scotland*. But happening to fall into an Intreague with a certain Lady, the Wife of a *Lithuanian* Colonel, the frequent Viſits he made her, created ſuch a Jealouſie in the Husband, that he hired ſome of his Servants to murther him; he had the good Fortune to be timely advertiſed thereof by the Lady, and conſequently to avoid the ſnare, and meeting not long after with the Colonel, and upbraiding him with his treacherous Deſign, they came to handy Blows, and the Colonel was kill'd by him. There being no other way left then to ſave himſelf but by flight, he fell in with a party of *Muſcovites*, who were then engaged in a War againſt *Poland*; having told them who he was, they left it to his Choice, whether he would ſerve in the *Czar's* Army, or elſe be ſent into *Siberia*; as he had a great Inclination to ſee foreign Countries, he pitch'd upon the laſt, but as he was juſt upon his Departure thither, with ſeveral others, the preſent *Czar's* Father having taken a view of them, was ſo well pleaſed with his Aſpect, that he reſolved to keep him near him, and not long after gave him an Allotment of 60 Boors, each of whom is worth about 8 Crowns *per annum*. Having afterwards order'd him to marry the Widow of a certain foreign Gentleman named *Marcellus*, (who was the firſt that introduced the right management of Iron-work into *Muſcovy*, which now brings 125000 pound Sterling yearly into the *Czar's* Coffers) he ſent him his Envoy, 1672. to Pope *Clement*, to endeavour an Union betwixt the *Romiſh* and *Greek* Churches. After his Return from thence he made him Major General, and at laſt by his will made him Governour of the young *Czar Pieter*, in which Station he continued in ſpite of all the oppoſition he met with from the Princeſs *Sophia*, and Prince *Gallichin's* Party, which ſince is turned to his great advantage.

But to return to our Journey, ſcarce had the chief Miniſter of State received Information of my Arrival at *Smolensko* (the Capital City of the Province of that Name, ſurrendred to the *Muſcovites* by vertue of the Treaty made betwixt them and the *Poles*, 1686.) but Orders were ſent to the Governour, to provide me with every thing requiſite for the Proſecution of my Journey to *Muſco*. Accordingly I left *Smolensko* the 20th of *Auguſt*. under the Conduct of a *Priſtaf*, and an Officer with 6 *Strelitzes*; we paſt through a Foreſt about 20 Leagues long, where being overtaken by a moſt furious Tempeſt in the Night time, ſome of our Horſes broke looſe and got out of the Fence we had made with our Waggons; I deſired the Officer to ſend ſome of his Soldiers in queſt of them, unto which they anſwered unanimouſly, That, if they were ſure they could get 100 Ducats apiece by it, they would not go at any diſtance from the Intrenchment, becauſe ſome of their Comrades, who had done ſo ſome years before, were never heard of afterwards; however the next day, the Owners of the Horſes going a little out of the Intrenchment, gave the Signal with a certain Whiſtle to them, which brought them back to the Intrenchment. We met with no remarkable Accident during our whole Journey as far as the River *Muſco*, where we no ſooner arrived, but our *Priſtaf* being gone to give notice of it to Prince *Gallichin* chief Miniſter of State, and returning in two hours with another *Priſtaf* named *Spatarius*, I was ordered to paſs the River, and conducted to the Lodgings prepared for me in the City of *Muſco*; 6 Soldiers under the Command of an Officer, being appointed me for my Guard, who for a week together ſuffered no Stranger to come to my Lodgings. After ſome ſtay at *Muſco*, I was at laſt admitted into the Preſence of Prince *Gallichin*, whom I found in the Lord Chancellour's Office ſitting at the upper end of a long Table, with ſeveral *Boyars* on both ſides of him. Having ordered a Seat to be brought for me, he ask'd by the means of a *Latin* Interpreter what Letters I had brought along with me, upon which I delivered to him divers Letters directed to him from the great Chancellour of *Lithuania*, in which he aſſured him, That, the King having ſent me to negotiate his Affairs at the *Muſcovite* Court, had ordered me to deliver his Letters to the *Czar* in Perſon; he return'd for anſwer, that he would ſpeak concerning the matter with *Czar John*, who was then in *Muſco*, and that he did not queſtion but to procure me a ſpeedy Audience; having afterwards enquired after the great Chancellor of *Lithuania's* Health, he aroſe from his Chair, as I was taking my leave, wiſhing me all imaginable Succeſs in obtaining the Honour to *ſee the bright Eyes of their Czariſh Majeſty*. Not many days after, having deſired a private Audience from him at his own houſe, I was received with as much Ceremony and Magnificence, as could have been expected at the Court of an *Italian* Prince. Our Diſcourſe was (in *Latin*) moſt upon the publick Affairs of *Europe*, but eſpecially upon the War which was then carrying on by the Confederacy againſt *France*, and upon the ſtupendious Revolution in *England*; he ordered divers ſorts of ſtrong Waters and Wines to be preſented to me, but as he was a great hater of ſtrong Liquors himſelf, he told me franckly, That it was rather to accommodate himſelf to the Cuſtom of the Countrey, than to engage me to Drink, promiſing, That he would make uſe of all his Intereſt, to obtain an Audience for me in a few days, which queſtionleſs would have ſucceeded accordingly, had not his ſudden Diſgrace cauſed ſuch ſtrange Alterations in the State of Affairs, that there was nothing to be heard of, but Fire and Murther throughout the City of *Muſco*, and things would have had a much worſe Aſpect had not the *Czar Pieter* with an undaunted Courage ſeized upon the *Partiſans* of the Princeſs *Sophia*, which put ſome ſtop to their bloody Deſigns. Things remain'd in the ſame State thus for 5 or 6 Months, no body knowing what to think of the matter; at laſt I judged it moſt adviſeable to make my Applications to the young *Gallichin* a Favourite of *Czar Pieter*, which I did in a Letter, intimating to him the ſurprize I was in, not to have received the leaſt Anſwer to the Memorial preſented immediately after my Arrival at *Muſco*, to requeſt a ſpeedy Audience. In his Anſwer he laid the whole blame of this delay upon the unſetled Condition the Court was in at that time, aſſuring me, that the *Czar Pieter* would ſuddenly be at *Muſcow*, which proved true in Effect, for he arrived there the 1ſt of *November*. I had no ſooner been inform'd of his coming to *Muſco*, but I deſired to be admitted to give a Viſit to the young *Gallichin*, who received me very obligingly, but in a different manner from what the other had done; for our chief Converſation conſiſted in emptying many Cups of Brandy and Wine, to the King my Maſter, and the *Czar's* Health, and all I could get out of this drunken Miniſter of State, was, that within three days I ſhould be admitted to Audience, and that afterwards I ſhould be at Liberty to go when I pleaſed; but he being alſo faln ſoon after in Diſgrace with the *Czar*, I was forced to take new meaſures.

1689.

At that time one *Euritian* had the management of the Secretary's Office for foreign Affairs, who being a Creature of the juſt now mentioned *Gallichin*, and by him raiſed from a common Notary to this Dignity, was the firſt that gave us a plain Demonſtration, that he valued his Patrons fortune much beyond his Perſon. For being jealous, that I had not rather made my Application to himſelf than *Gallichin*, to obtain either an Audience or Diſmiſſion, and knowing him to be in Diſgrace now with the *Czar Pieter*, he refuſed to comply with the Orders the ſaid *Gallichin* had obtain'd for me, to leave it to my Choice, whether I would ſtay for my Audience, till *Twelfth* day, or, Purſuant to the Orders of the King my Maſter (who had ſome foreſight of theſe Diſturbances) to return to *Poland*. Not ſatisfy'd thus, he inſinuated to the *Czar Pieter*, that it would be convenient to delay my Departure for ſome time longer, till they might be convinced, whether I were not ſent by the King of *Poland* to the Princeſs *Sophia*, and her Favourite Prince *Gallichin* (which he ſaid he ſhrewdly ſuſpected by the many Viſits I had made that Miniſter, contrary to the Cuſtom of the Perſons of my Dignity and Character) to aſſure them of the Kings Protection in caſe of neceſſity. As I was not ignorant of his Proceeding, I thought it the beſt way to obtain my Diſmiſſion by his means, by a good Preſent, for which Reaſon I

gave

1689. gave him a Viſit, and as I know the Stubbornneſs of the *Muſcovites* to be ſuch as not to be bent by Civilities, but rather by Menaces, I told him briskly, That it was my Opinion that the Right of Nations had been violated in my Perſon, that, I now found to my Coſt, that the King of *Poland* had been miſ-inform'd concerning the preſent Miniſtry of *Muſcovy*, whom he look'd upon as much more polite and underſtanding in foreign Affairs, than they were formerly; that, for my own Perſon, I ſhould be willing enough to purchaſe my Diſmiſſion almoſt at any rate, but having the Honour to be ſent in a publick Capacity, by a potent King, an Alley of the *Czars*, I found my ſelf under a ſtrict Obligation to give an account of what Treatment I received, and of my being debarr'd from obeying their Orders, to leave this Court. After we had drunk round twice or thrice of the Brandy and *Spaniſh* Wine we found there, I took my leave of the Secretary of State, ordering a certain *Poliſh* Gentleman of my Retinue to offer him a 100 Ducats, under pretence that they were for his Secretary, but he bravely refuſed to accept of them. By this time the young *Gallichin* being reſtored to Favour with *Czar Pieter*, and not a little ſurprized at the refuſal of *Euritian*, ſent me word that I ſhould have the Honour to kiſs the *Czar's* hand in a few days; and in two days after two *Muſcovite* Gentlemen were ſent to my Lodging, who, after they had made firſt their uſual Bows to the Picture of the Saint that hung in one corner of the Room, and handſomely pledged the *Czar's* Health in Brandy, told me, That the *Czar* intended to ſee me before my Departure, that he would Honour me with the uſual Preſents, and re-imburſe the Charges I had been at during my ſtay at *Muſcow*; unto which I having return'd a Complement, Proviſions were ſent me out of the *Czar's* Kitchin for my Dinner, *viz.* a piece of ſmook'd Beef weighing 40 pound, divers Diſhes of Fiſh fry'd in Oil of Nuts, half a Pig, 12 Paſteys of Meat, Garlick and Saffron, not above half bak'd, and ſome Flaggons of Brandy, *Spaniſh* Wine and Metheglin; I muſt confeſs, that the beſt thing that pleaſed me in this Dinner, was the Honour, that it came from the *Czar's* Kitchin. The next day word was brought me by another Gentleman, that I ſhould be admitted to Audience the next day; but the day coming, I underſtood that the *Czar's* were going an Pilgrimage, and that therefore I muſt have Patience till their return. Finding my ſelf thus diſappointed, I made a Viſit again to young *Gallichin*, and one of his Favourites named *Harthemonerich*, asking me how I lik'd the Dinner ſent me out of the *Czar's* Kitchin, I told him frankly, That our *French* Cooks had ſo ſpoil'd my Palate, that I could ſcarce reliſh any other Victuals, but what was of their Dreſſing; they told me, that they were very deſirous to have a true Taſte of ſome Diſhes dreſs'd after the *French* way, which made me invite them to Dinner, which they accepted of, under Condition that no Body ſhould be preſent but particular Friends; they were ſo well pleaſed with the Entertainment, that they ſent ſeveral Diſhes home to their Lady's, and left nothing of the dry Sweet-meats behind them. Three days after the before-mentioned, *Harthemonerich* invited us to his Houſe to a Fiſh Dinner (their Lent being then begun) he did me the Honour to permit me to ſalute his Lady, who drunk a Cup to me, and I pledged her as freely. She was a very handſome Woman, and the only Lady at Court that ever I heard of, that did not make uſe of Paint. The young *Gallichin* not being preſent at this laſt Entertainment, he having been ſent for the ſame Morning to wait upon the *Czars*, I, after their Return from the Pilgrimage, preſs'd hard upon the ſaid Miniſter, to know the Reaſon of my not being admitted to Audience, then *Gallichin* told me freely, That, the matter having been debated in Council, it had been carried by the Majority, that no Audience ſhould be given me till *Twelfth* day, but that if I did not think fit to ſtay ſo long, I ſhould be free to depart when I pleaſed, and be provided with what was neceſſary for my Journey. I was not a little ſurprized at this ſudden Change, till the *Daniſh* Commiſſary unfolded the whole Riddle to me, *viz.* That the Family of the *Maraskins* being envious at the Honour I had ſhew'd to *Gallichin* without as much as giving them one Viſit, had in Conjunction with the Secretary of State *Euritian* procured this Alteration. As I had diſcharged the greateſt part of what I was ſent about hither, and was quite tired out with ſo troubleſome a way of living among a barbarous ſort of People without any other Society, but my *Priſtaf*, not deſiring to ſtir out of my Lodgings, by reaſon of the continual Alarms and Tumults which at that juncture diſtracted the whole City of *Muſcow*, I joyfully accepted of the laſt Propoſition, and having given notice of my Reſolution to the Miniſters of State, I left *Muſcow* the 16th of *December*, and by the help of the *Muſcovite* Slads came the 20th of the ſame Month to *Smolensko*, where being obligingly entertain'd by the Governour, I purſued my Journey under the Conduct of the ſame *Priſtaf* and Guard of *Strelitzes* that had brought me from *Muſcow*, towards *Vilna*, and from thence to *Warſaw*, where I arrived the 3d of *January*, 1690. 1689.

The *Czar Theodore Alexiowitz*, Son of *Czar Alexis* happening to die in the 22d year of his Age, left two Brothers and one Siſter behind him, *viz. John*, and his Siſter *Sophia*, being both born of the ſame Mother, and *Peter* by a ſecond Adventure, but *John* the eldeſt finding himſelf incapable of taking upon him the burthen of ſo great an Empire, *Peter*, though the younger, was proclaimed *Czar* of *Muſcovy*; but the Princeſs *Sophia* finding her ſelf thus excluded from that ſhare in the Regency, which ſhe had promiſed her ſelf under the Government of her own Brother *John*, ſo far prevail'd by her Intereſt and Intrigues, that *John* was alſo proclaim'd *Czar* of *Muſcovy* by the *Strelitzes*, who were abſolutely at her Devotion. But, as ſhe thought her ſelf not ſufficiently eſtabliſhed in her Grandeur, unleſs ſhe removed *Czar Pieter* and his Party from the Adminiſtration of the Government, ſhe openly declared againſt his being Crown'd, as a thing prejudicial to the Right of his elder Brother *John*. It was in vain for the *Boyars* to remonſtrate to her the incapacity of *Czar John*, who being infirm in body and mind, nay almoſt blind and lame, occaſioned by the many and frequent Epileptick Fits he was ſubject to, was not likely alone to bear the burthen of ſo great an Empire; it was in vain, I ſay, to remonſtrate theſe things to a perſon who intended the ſole Adminiſtration of the publick Affairs for her own ſelf, for which reaſon it was that addreſſing her ſelf to her Friends the *Strelitzes* (ſo they call the *Czars* Guard conſiſting of 18000 Men, divided into 18 Regiments) but eſpecially to the *Boyar Konvanski* Preſident of the Chamber belonging to the Souldiery, who by his Intereſt ſoon prevail'd with them, to riſe in Arms, and to demand the Princeſs *Sophia* to be made Adminiſtratrix of the Government, during the Minority of the two *Czars*; which the Court being forced to conſent to, they were in hopes that by this Condeſcenſion they had put a ſtop to any further Troubles. But the Princeſs looking upon her ſelf as not firmly Eſtabliſh'd in her Greatneſs, unleſs by the removal of ſuch of the *Boyars* as had oppoſed her Deſigns, and were Friends of *Czar Pieter*, ſhe had once more recourſe to *Konvanski*, unto whom it was propoſed, that ſuch perſons as ſhe had mark'd out for the Slaughter, ſhould be Maſſacred by the Souldiery, under pretence of having made away with *Czar Theodore* by poiſon. This Project being not carried on ſo ſecretly, but that the Court got ſome Scent of it, it was thought fit to remove from *Muſcow* to *Troitza*, a ſtrong Monaſtery about 12 *German* Leagues from that City; by this means not a few, who were intended to be ſacrificed to the Reſentment of the Princeſs, eſcaped the Danger, but the Souldiery, headed by the before-mentioned *Konvanski*, under pretence of revenging the Death of the late *Czar Theodore*, committed unheard of Cruelties upon thoſe that had the misfortune to fall into their hands; of this number was the chief Phyſician of the deceaſed *Czar* whom they cut in pieces, and the Chancellour *Urrenimick Delgeronka* with his Son and Servant, and other perſons of Note underwent the ſame fate. The Princeſs *Sophia*, who had follow'd the Court, being ſoon inform'd of what had happened at *Muſcow*, ſent her Thanks to *Konvanski* for the Zeal he had ſhewn in revenging the Death of her deceaſed Brother, upon the Authors thereof (as ſhe pretended) which ſo heightened the courage of this ambitious Man, that he began to think of nothing leſs than to put the Crown upon his own head. To accompliſh which, having brought over the whole Body of the *Strelitzes* to his Devotion, by the Liberty he allow'd them of plundering wherever they came, and having given them a very deſpicable Character of the Perſons of the two *Czars*, one for his Infirmities, the other by reaſon of his Years, he thought he could not lay a more firm Foundation to build his Greatneſs upon, than by propoſing to the Princeſs *Sophia* (from whom he ſuppoſed to have deſerved every thing) a Match betwixt the Princeſs *Catharine* her eldeſt Siſter, and his Son. But this ambitious forwardneſs proved his Deſtruction; for the

Princeſs

1689. Princeſs *Sophia* ſoon gueſſing at his Intention, and looking upon him now as a more dangerous Enemy than any of thoſe ſhe had rid her hands of ſo lately by his means, ſhe reſolved to joyn with the Court to his Deſtruction, the Prince *Baſil Baſilowitz Gallichin* her Favourite (whom we have had occaſion to mention before, and ſhall ſay more of him hereafter,) being one of the chiefeſt who urged his Death, tho' moſt of what had been tranſacted in *Muſcow* by this ambitious Man, had been done with his Approbation. It is a Cuſtom in the *Muſcovite* Court to celebrate the Names-day of the Children of the Royal Family, upon which occaſion the Prince or Princeſs, whoſe day it is, gives a ſplendid Entertainment to all the great Men of the Court, and receive their Compliments upon that account. The Court was juſt then going to celebrate the Feaſt of St. *Catharine* at *Troitza*, being the Name of the ſame Princeſs *Konvanski* had deſired in Marriage for his Son, ſo that being invited thereunto with the reſt by the Princeſs *Sophia*'s ſpecial Order, he thought himſelf now already arrived to the firſt ſtep of his Happineſs, but ſoon found the Effects to be quite different from what he had propoſed to himſelf in his vain Imaginations; for as he was upon the Road, going to *Troitza* to be preſent at the ſaid Feaſt, he was ſeized upon by 200 Horſemen ſent for that purpoſe, and carried into an adjacent Village, where by certain Judges appointed for that purpoſe, he was charged with all the Murther and Rapine, that were ſo lately committed by the *Strelitzes* in *Muſcow*, and thereupon to loſe his Head with his Son, which was put in Execution accordingly. The *Strelitzes* were Thunder-ſtruck at this News, but ſoon after their ſurprize turning into Rage, they met in a tumultuous number, and running through the Streets of *Muſcow*, cry'd out, That they had loſt their Father, but that they would revenge his Death, without Exception of Sexes or Ages, upon every body that might be in the leaſt ſuſpected to have had a hand in it; neither were they worſe than their words, for they ſeized upon the grand Magazine of Arms and Ammunition, threatening to deſtroy all that ſhould oppoſe them. The Court at *Troitza* being put under a great Conſternation, order'd the other regular Troops (who bore an implacable hatred to the *Strelitzes*) to rendevouze near *Troitza*, and as the foreign Forces are the main Bulwark of the *Czariſh* Family, theſe being ſent for, were ſo ready to obey, that they would rather leave their Wives and Families expoſed to the Fury of thoſe barbarous Wretches, than be in the leaſt wanting in their Duty; the ſequel of the Matter ſufficiently ſhew'd, That their Fears were not in the leaſt groundleſs; for no ſooner had the *Germans* left their Quarters in the Suburbs of *Kokouri* (which is allotted them to live in) but the *Strelitzes* were for revenging themſelves upon their Wives and Children, but ſome of the eldeſt among them refuſed to comply, telling them, That the *Germans* being brave Fellows, would certainly not deſiſt till they had revenged themſelves upon them to the laſt Man, if they did ſuch a barbarous thing, and that, ſuppoſing that they were able to make their Party good with them, they were at preſent without a Head, and by ſuch an Action would cut off all hopes of Pardon for ever. Thoſe Arguments were ſo prevailing with them, that they did not only leave that Suburb unmoleſted; but being in great Confuſion, and continual Broils among themſelves for want of a Head, they thought it their beſt way to ſue for Pardon, and finding the Court not averſe to it, they Sacrificed moſt of their Colonels and other Officers to the Reſentment of the *Czariſh* Family, whom they kill'd the eaſier to obtain their Pardon. Things being thus quieted at *Muſcow*, the two *Czars*, attended by the Nobility, and moſt of the foreign Officers, made their Publick Entry in that City, and being met by the *Strelitzes* without their Arms at the Gate, they proſtrated themſelves, begging Pardon for what was paſt, and promiſing new Obedience for the future. The *Czar's* having given the Signal with their hands that they were pardon'd, they aroſe from the ground and follow'd them with Tears in their Eyes to the Palace.

The ſame day Prince *Baſil Gallichin* was made Lord Chancellor, and chief Miniſter of State; he is a Perſon of extraordinary merit and underſtanding, who having a great inſight into the Affairs of *Europe* beyond the reſt of the *Muſcovites*, would fain ſettle the *Muſcovite* Court upon the ſame Foot. He underſtands the *Latin* Tongue, and takes great delight in the Converſation of Strangers, and as he is no Lover of ſtrong Liquors himſelf, ſo he very willingly diſpences with the Cuſtom of the *Muſcovites* in that Point. The firſt remarkable thing of his Miniſtry was the puniſhment of the *Strelitzes*, ſome of whom he cauſed to be executed, and condemned many others to perpetual Baniſhment; theſe were Liſted into four Regiments for that purpoſe, one of which was ſent to *Bialogorod*, a Town on the Frontiers of *Tartary*, the ſecond to *Sibirka* upon the *Wolga* near *Caſan*; and the two others to *Kourſka* and *Sneska* in the *Ukraine*. The next thing he bent his thoughts upon, was to fill up ſuch places as were become vacant of late by the Death of thoſe that were ſlain by the mutinous *Strelitzes*, with ſuch Perſons as he knew to be abſolutely link'd to his Intereſt, and at the ſame time of a Capacity to diſcharge their Truſt, without the leaſt Reſpect to their Quality; and, as moſt of theſe were places of great Dignity, and conſequently had been before in the hands of the chiefeſt *Boyars*, theſe ſeeing themſelves neglected by Prince *Gallichin*, and other Perſons of no Account as to their Birth, put over their heads, conceived an irreconcilable Hatred againſt him; notwithſtanding this he maintain'd himſelf in his high Station, and that to ſuch a Degree, that ſcarce any thing of moment was tranſacted without him. It was he that made up the Peace with the *Swediſh* Ambaſſadours at *Muſcow*, and he had his ſhare in the Peace with the *Poles* made 1686. (by Vertue of which they reſign'd the *Ukraine*, and the whole Province of *Smolensko*) and the Alliance that follow'd ſoon after with the Emperour, and the King of *Poland*, according to which the *Czars* of *Muſcovy* were to attack the *Precopenſe* and *Crim Tartars*, to prevent their Incurſions into *Hungary* and *Poland*. The *Muſcovites* were ſo fond of this Alliance, that they ſent their Ambaſſadors, to give notice of it to moſt of the Courts of *Europe*; upon which occaſion I can't forbear to mention, That *Knez Jacobendrew* which *Dolgoroka Eſpanenick*, being ſent to the Courts of *France* and *Spain*, notwithſtanding the indifferent Reception he met with in the firſt of theſe two Courts, yet was ever after much more for the *French* than the *Spaniards*, and left his Nephew among them to learn the *French* Tongue, he being the only perſon of the *Muſcovites* in my time who underſtood it, as there were no more than four *Muſcovites* throughout that vaſt Empire who could ſpeak *Latin*, for which they were obliged unto their Tutors, who were *Poles*. It was now in the Year 1687. when the *Muſcovites* began to make great Preparations to the Expedition they intended againſt the *Crim Tartars*; one of the main Difficulties they labour'd under, was, where to pitch upon a Subject to be General of that vaſt Body they intended to raiſe for that purpoſe. Prince *Gallichin* propoſed ſeveral for ſo important a Charge, but moſt of the *Boyars*, who were none of his Friends, were of opinion, That the ſame perſon, who had had the greateſt ſhare in making this Alliance, ought to perform the Conditions thereof, and to make Tryal, whether the Conqueſt of *Precop* was ſo eaſie a matter, as he had imagined it to be. He on his ſide, did all what in him lay to remove this Burthen from his ſhoulders, as being ſenſible that it was an undertaking ſubject to many hazards; conſidering eſpecially, That his Army, though very numerous, would be compoſed chiefly of an unexerciſed Rabble, gathered from among the Boors, with whom nothing of moment was to be undertaken, without running a great riſque of being worſted, and that he himſelf being not trained up to Military Exploits, if any ſiniſter Accident did happen, it would be very hard for him, whatever precautions he could make uſe of to maintain his Authority againſt thoſe, who would be ready to put the worſt Interpretation upon every thing in his abſence; he was ſenſible that, as he never had been ambitious of Military Employments, and at this juncture did not ſtand in need of the Generalſhip to maintain his Authority, this was contriv'd on purpoſe by his Enemies as a ſpecious Pretence to ſend him from Court; this obliged him, to oppoſe with his Intereſt the Honour they pretended to do him in conſtituting of him General, but the Majority prevailing, he was to his no ſmall diſſatisfaction declared *Generaliſſimo* againſt the *Tartars*.

1689.

Prince *Gallichin* being obliged to accept of this Dignity, obtained, however, That his Son might be made his Coadjutator in the Chancery, to manage that important Station in his abſence, and the other General Officers that were to ſerve under him, being appointed in their reſpective Stations, the Troops intended for this Expedition were drawing together all that Winter, in order to

be

1689. be at the general Rendevouze, by the 1st of *May*, 1688. Accordingly an Army of 300000 Foot, and 100000 Horse being brought together on the other side of the great River *Marle*, they stay'd there a few days, and thence directed their March to *Poltova*, a City belonging to the *Cosacks* under the *Muscovite* Jurisdiction. Hence they marched to *Scarfin* upon the River *Avit*, where they spent 15 days idlely, in Expectation of a certain Image of the Holy Virgin, which a certain *Muscovite* Monk had told them, had appear'd to him in the Night time, and foretold him, That unless they took her Image along with them in the Camp, they must not expect any good Succes against the *Crim Tartars*. At last, the 15th of *June* they marched on to the River *Samara*, which as well as the other above-mentioned Rivers falls into the *Boristhenes* or *Nieper*; after they had pass'd the *Boristhenes* over Bridges made for that purpose, they continued their March to the River *Samara*, keeping the *Boristhenes* to the Right, and Encamped near *Tartarska Reka*, or the *Tartarian* River; thence they march'd to the River *Musencow*, and so to *Kaminka*, *Komskiourda*, and *Keratchekerra*; where understanding to their great Astonishment, that all the Forage was burnt in the Plains by the great drought and heat of the Sun, they were forced to make a halt, and soon after to change their Resolution, and instead of attacking *Precop*, which was their chief aim, to march back to the *Boristhenes*, where by reason of the overflowing of the River, there was good store of Grass, besides, that it might cover their Retreat, if the *Tartars* should come to attack them in the Rear. Here they Encamp'd for some time, but notwithstanding the great plenty of Grass, they met with here abouts, the vast number of Horses that attended the Baggage, and the scarcity of good Provisions, the Souldiers being forced to feed upon salt stinking Fish in *August*, (during one of the Lents of the *Muscovites*) swept away a vast multitude both of Men and Beast, and rendred many more incapable for Service. I was credibly inform'd by some of the *German* Officers, that were in this condition, that there were above a Million of Horses in the Camp of the *Muscovites*, which would seem incredible to me, had I not been an Eye witness my self, that in the King of *Poland's* Camp, in the Year 1686. which consisted of no more than 24000 fighting Men, there were told above 45000 Baggage Waggons. Things being in this Condition it was thought fit only to detach 30000 Men under the Command of *Evany Romanowitz Nepleuvant* Commander in chief of the *Sirenes*, and another under the Command of *Ivan Samuelowitz Hetman* or General of the *Cosacks*, towards *Zarparogny*, to get intelligence of the *Tartars*, and to march with the gros of the Army to the River *Samara*, where the General having taken an exact view of the Ground, laid the Foundation of a Fortress, to bridle both the *Tartars* and *Cosacks*, which was brought to perfection the next year. From the River *Samara* they march'd to the River *Marle*, where they Encamp'd in Expectation of the Orders from Court, to dismiss the Army.

In the mean while, Prince *Gallichin* left no stone unturn'd to take the Disgrace of this Campaign from himself, and to lay it at the Door of *Ivan Samuelowitz Hetman*, or General of the *Cosacks*, who, tho' a Man of great Authority in the Camp, as Commanding all the *Cosacks* in the *Ukraine* under the *Czar's* Jurisdiction, yet was not able to cope with this great Minister, who being prop'd by the Favour of the Princess *Sophia*, desired an Order from Court to depose him, and to put another in his Place; no sooner had he received these Orders, but he sent a Body of *Strelitzes* (not daring to trust the *Cosacks*) to surprize him in the Night time in his Tent, which they did accordingly, and brought him ty'd Neck and Heels together to the *Chatra*, or place of Judicature, which always is near the Generals Tent, where being the next Morning examined in the Court *Martial* call'd for that purpose, he was accused by some (suborned as it was supposed) *Cosacks* of having kept a Correspondence with the *Tartar Cham*, and having given secret Orders for the burning of the Forage in the Plains, so that this poor Gentleman saw himself in an instant deprived of all his Greatness, some of his own Domesticks calling him no better than a Son of a Whore, and one of his own Colonels, nam'd *Dimitrouki* drew his Cymetar to dispatch him, but was prevented by *Gallichin*. Being remanded to Prison, a Courier was dispatched to *Romanowitz Nepleuvant*, who as we told you, was together with a Body of *Cosacks*, left on the other side of the *Boristhenes*, with Orders to secure the Son of this *Hetman* of the *Cosacks*; this *Nepleuvant*, being willing to ingratiate himself with the General, and to make the best amends he could for the late Defeat he had received from *Neuradin Sultan*, upon the very Banks of that River, was very industrious in discharging himself of this Commission; but the Son of the *Cosack* General, having got some Scent of the matter, was got safely to his own Body, so that *Nepleuvant* was forced to Address himself to the chief of the *Cosacks*, desiring them to deliver him up, pursuant to the Orders he had received from the General; the Horse were soon prevail'd upon to comply, but the Foot having surrounded his Tent, refused a great while to part with their Commander, till being at last overcome by great Promises, they also left him to the Mercy of his Enemies, who carried him away in Triumph. In the mean while, his Father having by a Court Martial been deposed and banish'd into *Siberia*, the chief of the *Cosacks* were call'd together to choose another in his place, and after some Contestations the Choice fell upon one *Mascepa*, who being then Secretary of State, had a greater share of Prudence, than experience in Martial Affairs; being for the rest a *Cosack* by Birth, who had been Page to *Casimir* King of *Poland*, and afterwards served in the Quality of an Officer in his Guards. However, this Choice being not so unanimous, but that a good number of the *Cosacks* opposed it, they rise in several places and fell a plundering the Houses of their Colonels; which obliged their new *Hetman*, or General to sollicite from Prince *Gallichin* a prompt Succour of 3000 Foot, and a 1000 Horse, which were sent to *Baturin*, the ordinary Residence of the *Cosack* General. Soon after, Orders being brought from Court for the dismissing of the Troops, *Gallichin* took care to read to the Heads of the Army, the Letters of thanks from their *Czarish* Majesty, and to distribute among them the Medals which were sent them, as Tokens of the gracious acceptance their Services had met with from the *Czars*; for, as he was sensible that nothing could contribute more to blot out the Disgrace of this Campaign, than the Good-will of those, who had been Eye witnesses of it, so he had taken effectual Care, partly by Presents, partly by Preferments he had procur'd them at Court, to bring them over to his Interest, so that upon his Arrival at *Muscow*, being back'd by the Favour of the Princess, he was received with more than ordinary Demonstrations of Joy, and continued in the Ministry with the same Authority as before. 1689.

The first thing he proposed to the Council, after his Return, was the Erecting of a Fortress on the River *Samara*, to serve for a place of Arms on that side, which being soon agreed to, the management thereof was committed to a certain *Dutch* Engineer named *Vaule*, who brought it in a Months time into a State of Defence, and was named *Novobogrodilla*, i. e. *Our Lady the Widow*. This place proved of no small consequence to the *Muscovites* in their Expedition, the next following Year, *viz.* 1689. as lying very convenient for supplying their Army, with Provisions and Ammunition on that side.

Prince *Gallichin* having found by Experience, in how many Difficulties the Expeditions against the *Crim Tartars* were involved on that side, and that the Party of *Czar Peter* had gathered considerable strength during his absence, left nothing unattempted, to discharge himself of this troublesome Office, but finding no probability to encompass his aim, he thought it more honourable to make an offer of his Service, than to expect the Resolution of the *Boyars*; which done, being resolved to repair, as much as in him lay, the miscarriages of the last Campaign, he ordered the General Rendevouze to be against the 1st of *February* on the River *Marle*, the Reasons of which was, that as he was to cross many Rivers with so vast a Body, he intended they should be met together before the Ice was thaw'd, and the Banks of the Rivers overflown by the melting of the Snow. Accordingly most of the Troops began their March in *December*, and as they arrived at the said River *Marle*, the Foot were encamp'd near a great Wood, and the Horse dispersed in the adjacent Towns and Villages on the other side of the River; the Prince himself, and the rest of the Generals being arrived there the 1st *April*, they march'd the 6th to the River *Samara*, where being joyn'd by all the Troops, and among the rest by *Mascepa* General of the *Cosacks*, they broke up the 13th, directing their March towards *Precop*. The Train of Artillery, which consisted of 700 Cannon, besides Mortars, and other heavy Carriages, hindred them from making any great Marches, so that it was some days before they came to *Karatchoka*. Here they were Alarm'd

1689. on a ſudden by an odd accident; for a good number of Horſes being put a-grazing in thoſe places where the Graſs was not long enough yet to be mow'd, about Midnight there aroſe a ſudden Alarm in the Camp, with the neighing of Horſes, and fearful Out-crys of Men, that every Body thought no otherwiſe, but that the *Tartars* were coming to attack them in their Camp, which made ſome run to their Arms, others to look out for places of ſhelter, till day light diſcovered the meaning of this Diſorder, occaſioned by a Fright that had taken the Horſes at Graſs, ſome of which (to the number of 6000) were run aſtray, and the reſt had forced themſelves in a Body through the Lines of the Camp. Some days being ſpent in looking after the loſt Horſes, moſt of which were recovered, they broke up again, and after a March of ſeveral days came to *Kairka*, upon the Banks of the River *Boriſthenes*. Here they took ſome *Tartars* Priſoners; who reported, that the *Chan* was not at *Budziack*, expecting nothing leſs than ſo formidable an Army; that indeed they had received ſome intelligence of their March, but that it was the general Opinion there, their Deſign was no more than the building of ſome new Fortreſſes near the *Boriſthenes*; and that *Galga Sultan* had ſent them abroad, to get what Intelligence they could. From *Kairka* they march'd to *Kairka Meſcheſna*, where the General ordered a great number of Palliſadoe's to be cut, four of which with a certain quantity of water were to be loaden upon each Waggon; becauſe as they removed further from that River, they were likely to meet with more ſcarcity of both; thus they continued their March towards *Precop*, and notwithſtanding this precaution were forced to make ſhift for two days without water. The 13th of *May*, ſome Horſe that were ſent abroad to be at the Campaign, brought word that the Enemy were not far off, which made the *Muſcovites* put themſelves in as good a poſture to receive them, as the time would permit; which they had ſcarce leiſure to do, before the *Tartars* fell upon the Vanguard, Commanded by *Schien*, and after ſome light Skirmiſhes breaking through the Right wing, attack'd the Left under the Command of *Scheremitaw*, with ſuch fury, that they put them to Flight at the firſt Onſet, and the Horſe likewiſe beginning to Retreat, they had certainly made themſelves Maſters of all the Baggage, had not Prince *Gallichin* ſent a ſtrong re-inforcement of his beſt Troops to the aſſiſtance of *Scheremitaw*, who then returning to the Charge, forced the *Tartars* to Retreat towards *Thorna Oliva* 5 Leagues from *Precop*; whither the whole Army of the *Muſcovites* followed them, and encamp'd there by reaſon of the conveniency of freſh water, which they ſtood much in need of; in their March they were kept in continual Alarm by a flying Body of *Tartars*, under the Command of *Galga Sultan*, who took ſeveral *Muſcovites* Priſoners, from whom they learn'd, what they were very deſirous to know, concerning the ſtrength and condition of their Army; they were conducted to the *Tartar Chan*, who having received intelligence of our March, left *Budziack*, with a Body of 4000 Horſe, and paſſing the *Boriſthenes* at *Aſſenan Kirman*, a place belonging to the *Turks*, had poſted himſelf now near the ſmall River of *Kalantzeek*, which ariſing out of the Deſarts, exonerates it ſelf into the *Black Sea*. The 16th the *Muſcovites* broke up from *Thorna Oliva* to *Zelona Dolina* a League thence, but to their great ſurprize found themſelves in ſight of a Body of about 40000 *Tartars*; it was the general Opinion, that the *Muſcovites*, who were ſo much ſuperiour in number, without any delay ſhould attack the *Tartars*, but inſtead of that they entrench'd their Foot with their *Chevaux de Friſe* and Waggons, placing their Cannon upon all the Avenues, where they were moſt expos'd to that Army; but as the *Muſcovite* Horſe could not be drawn within the Entrenchment, they were attack'd by four ſeveral Bodies of *Tartars* conſiſting each only of 1000 Horſe, who ſoon brought them into confuſion, and would perhaps have put them to the Rout, had they not had the opportunity of retreating betwixt the Baggage, where being ſheltred under their Cannon, they fired ſo briskly upon the *Tartars*, that they were forced to Retreat with the loſs of 400 of their Men, though not without a conſiderable Loſs of the *Muſcovites*, many of whom were kill'd by their own Fire. At the ſame time another Body of *Tartars* under the Command of *Naradin Sultan* attack'd the *Coſacks*, Commanded by *Eritian Ezerecunan Dominiack*, who being a better Pen man than a Souldier, did not ſo much as ſtand the firſt ſhock of the Enemy; they broke in a moment through the Entrenchment made by the Waggons, and having kill'd the Horſe, ſeized upon the Artillery, and had certainly cut all the *Coſacks* to pieces, had not the *Boyar Bonka* come timely to their Relief; however they carried off 20 pieces of Cannon. Much about the ſame time *Scheremitaw* being attack'd by another Body of *Tartars*, they penetrated as far as to the Entrenchment made by the Baggage Waggons, but were ſo gall'd there, that they thought fit to retreat without attempting any thing further; ſo that *Scheremitaw* got the chiefeſt Honour of this day, he being a brave Man, but not much beloved by Prince *Gallichin*; the *Tartars* being march'd away, though not without a good Booty, it was reſolved to follow them to the before mentioned River *Kalantzeek*, for the conveniency of freſh water, and it being found moſt expedient to expoſe the Horſe as little as could be, they were ſo ordered to march within the Entrenchment of the Waggons, which were covered on all ſides by the Foot; the whole Army conſiſting then of 200000 Men. Upon their March, they were again Alarm'd by a Body of *Tartars*, who finding the *Muſcovite* Horſe covered by the Entrenchment retreated immediately towards *Precop*, not queſtioning but that this powerful Army intended to give them a Viſit there. They encamp'd the ſame day near the River *Kalantzeek*, which they paſs'd the next day without the leaſt oppoſition from the *Tartars*; ſeveral of the *Muſcovites* got upon the adjacent Hills to take a view of the City of *Precop*, which by the Fire, which the *Tartars* had ſet to the Town of *Har*, appear'd to be all in a Flame at a diſtance. The 19th the *Muſcovite* Army advanced almoſt within Cannon-ſhot of the City of *Precop*, having the *Black Sea* on the Right, and the Deſart on the Left; they did not as yet make uſe of their Cannon from the City, the Enemy being as yet at too great a diſtance, but play'd warmly upon them from a ſtone Tower which was built upon the Sea ſhore. As there was no long ſtaying in this place for want of Proviſions, and Forage, ſo the whole Army expected every moment Orders to make themſelves ready for the general Aſſault, but were not a little ſurprized to underſtand the next day, that they muſt keep themſelves in readineſs to march back; which happened thus: Some *Nagajan*, and *Calmouc Tartars*, who were ſent abroad for Intelligence, being engaged with ſome *Precopenſe Tartars*, one of the laſt being acquainted formerly with one of the other, ask'd him, *Why they ſhould Fight thus fiercely againſt one another*, unto which the other replying, *That he believed, if the* Chan *could ſend to their General to treat with him; a Peace might ſoon be concluded betwixt them*, the *Precopenſe Tartar* anſwered, That *he was ſure in caſe their General was for Peace, their* Chan *would not be againſt it.* The *Nagajan*, having after his return into the Camp, given an account to the General, of what had paſs'd, he was ſo well pleas'd with it, that he immediately ordered a Letter to be written in the ſaid *Tartar*'s Name, containing in Subſtance; *That he having ſpoken to the General concerning a Peace, he was willing to accept of it, provided the* Chan *would ſend one to ſhew his Pretenſions.* This Letter being given to the firſt *Tartar* they could meet with, was ſoon delivered to the *Chan*, who upon the reading thereof ſent a Meſſenger to know, whether this Letter were written by the General's Order, and being anſwered it was, he ſent *Soilech Myrſa*, as an Hoſtage to the *Muſcovite* Camp, who in his ſtead ſent one *Eſmeyan* to *Precop*. The *Muſcovites* propoſed the Releaſement of all the *Czar's* Subjects, ceaſing of all Hoſtilities, and of all Incurſions under what pretence ſoever; a Relinquiſhment of the annual Tribute of 800000 Crowns the *Muſcovites* were obliged to pay them; and laſtly, That they ſhould not aſſiſt the *Grand Signior* in the preſent War, nor attack the *Poles*. The *Tartar Myrſa* being ſenſible, that the *Muſcovites* could not long ſubſiſt here upon the Sands without great Detriment, cajoled the *Muſcovites* with the hopes of a Compliance with their Demands, but return'd for an Anſwer the next day, That the *Chan* would not make any new Conditions with the *Muſcovites*, and expected that the 240000 Crowns, which were in Arrears ſhould be paid forthwith; which being not at all pleaſing to *Gallichin*, he ordered immediately to decamp, and, for fear of being attack'd in the Rear, carry'd the *Tartar* Hoſtage along with him, as far as the River *Kalantzeek*, from whence he ſent him back to *Precop*, and had his Hoſtage likewiſe reſtored by the *Tartars*; thence he continued his March in three Weeks to the River *Samara*, where having left

1689.

1689. left a flying Body of 6000 Men to cover that place, he march'd in 60 days to the River *Marle*, where having received his Orders for diſmiſſing of the Army, he put an end to this ſecond Expedition, with as little Honour as he had acquired in the firſt; notwithſtanding which, as he had ſent his Expreſſes to the *Muſcovite* and *Poliſh* Courts, in which he vaunted to have routed the *Tartars*, and forced them to retreat into *Precop*, the Princeſs *Sophia* ordered Bonfires to be made throughout the whole Empire, and ſent Letters of Thanks with Preſents of golden Medals to the Officers of the Army; but the Plots in which he ſoon after engaged againſt the *Czar Peter* were evident Demonſtrations, that he did dread the event of theſe miſcarriages, would one time or other fall upon his own Head. What I have ſaid of theſe Expeditions, I have given you upon the Credit of the publick Miniſter of *Poland*, who follow'd the Camp in theſe Expeditions; what I am to tell you for the future being ſuch Matters, of which I have been an Eye witneſs my ſelf, to get into the Knowledge of which I frequently uſed to go Incognito, to the Monaſtery of *Troitza* where the Court then reſided.

The Enemies of Prince *Gallichin*, having notwithſtanding all his Endeavours to cover his Diſgrace, found means to inveſtigate the whole Truth of the matter, had ſo powerful an Impreſſion upon the *Czar Peter* againſt him, that, after his Return, he refuſed to admit him into his Preſence; and though afterwards he obtained that Honour by the preſſing Sollicitations of the Princeſs *Sophia*, he was ſo far from being able to juſtifie his Conduct, that he was not diſmiſſed without very bitter Reproaches. Not many days after, when the *Czar's* Anger ſeem'd to be ſomewhat appeaſed, the Princeſs *Sophia* gave freſh occaſion of Jealouſie to thoſe who long ago were ſufficiently ſuſpicious of her Conduct, by propoſing to beſtow conſiderable Preſents upon ſuch Perſons as had well deſerved of late of the Government, which *Czar Peter* oppoſed, alledging, that as it was a Novelty, unknown before in the *Muſcovite* Empire, where the Preſents the *Czars* uſually made to their Subjects ſcarce ever amounted to any more than a rich Veſt, as a Token of their Favour, the ſame ought not to be introduced upon ſlight occaſions, before the Merits of theſe perſons were well examin'd. But, as the aim of the Princeſs was by this means to bring over to her Intereſt, ſuch of the *Boyars* and Officers of the Army as ſhe judged ſhe ſhould ſtand in need of, for the encompaſſing thoſe Deſigns ſhe had framed, ſhe play'd her Cards ſo well, that ſhe at laſt obtain'd his Conſent, accordingly divers Villages with 1500 Boors were beſtow'd upon Prince *Gallichin*, 300 upon each of her Generals of the Army; to the other Officers in proportion, even to the private Gentlemen, that were in the Service. Prince *Gallichin* thinking himſelf now ſuſtain'd by two ſuch Pillars as were not eaſily to be ſhaken, *viz.* the Princeſs and the Army's Favour, attempted a thing never heard of before in *Muſcovy*; for whereas it had been a conſtant fundamental Maxim among the *Muſcovites* ever ſince the *Coſacks* embrac'd the *Czar's* Protection, not to admit their General into the City of *Muſcow*. Prince *Gallichin*, under Pretence of honouring their preſent General *Maſepa* with the ſight of the *Czar's* Perſons, (but in Effect, for a quite other reaſon, as we ſhall hear anon) he prevail'd ſo far by his Authority, as to obtain leave for him to come to *Muſcow*, which he did accordingly, with at leaſt 800 of his chief Officers, whilſt the *Czar Peter* was diverting himſelf at one of his Countrey Seats call'd *Obrongensko*, upon the River *Yarus* about a League from *Muſcow*; having often, but in vain deſired leave from the *Muſcovites*, to give a Viſit to this *Coſack* General, I ventur'd at laſt to go to his Houſe Incognito, which I did ſeveral times afterwards in the Company of the *Czar's* Phyſician, a *German* by Birth, who had Buſineſs of great conſequence with this *Coſack* General, and by this means got an inſight into the Plot that was contrived by the Princeſs againſt the Life of the *Czar Peter*. The Princeſs *Sophia*, who had long ago foreſeen that the Life of the *Czar Peter*, would one time or other prove an unſurmountable Obſtacle, to that Greatneſs ſhe pretended to, began now every day more and more to repent ſhe had follow'd the Advice of Prince *Gallichin* her Favourite, who had always been againſt offering any Inſolence to his perſon. For being now ſenſible with what trouble ſhe had obtain'd from the ſaid *Czar*, Prince *Gallichin's* being admitted into his Preſence, after his Return from his ſecond Expedition, and the Reproaches he had been forced to ſuffer, (which touched her to the quick) as alſo with what Reluctancy the *Czar* had allow'd her the giving of the Preſents ſhe had beſtow'd upon the Army; theſe I ſay, were convincing Proofs to her, that ſhe was not likely to Act with the ſame abſolute Authority as before, and that by degrees as the youngeſt *Czar's* Authority and Intereſt ſhould encreaſe, hers would diminiſh, till at laſt they might find means to ſend her back into the Nunnery, where ſhe had been before. Theſe Conſiderations were ſo prevailing in a Princeſs ambitious and courageous above her Sex, and who could in no wiſe brook the Loſs of her Authority, that ſhe reſolved to maintain it at any rate, which ſhe did not queſtion to encompaſs by the aſſiſtance of her Friends, whom ſhe had link'd to her Intereſt by her Liberality and Favour; with this Reſolution, ſhe once more apply'd her ſelf to her Favourite Prince *Gallichin*, repreſenting to him the fear ſhe was in, of ſeeing not only her Authority diminiſhed every day, but that by degrees, her Enemies might attempt againſt her ſelf, at leaſt ſo far, as to ſhut her up in the Nunnery, which muſt needs draw after it the utter ruin of himſelf, his Family and his Friends. Prince *Gallichin* being ſenſible of the truth of the Matters the Princeſs propoſed to him, and though always accounted a Man of great wiſdom and underſtanding, and an Enemy to all violent Proceedings, yet could not reſiſt any longer to give his Conſent to what had been long ago propoſed to the Princeſs, which was the Death of *Czar Peter*; but as he was a perſon that always acted with a great deal of Circumſpection, he propoſed, That, before they ventured upon ſo bold a ſtroak, he would ſend his Son in the Quality of an Ambaſſadour into *Poland*, whither he ſhould carry the beſt of his Riches along with him. But the Princeſs, impatient of delays, and thinking her ſelf ſure of the Game, was ſo far from hearkening to this wholſome Counſel, that ſhe abſolutely forbid him to think any more of this Embaſſy. This done, ſhe apply'd her ſelf to one *Theodore Thekelatiraw*, Preſident of the Chamber of the *Strelitzes* a Creature of hers, who had been raiſed to this Office from a poor Clerk, and conſequently, was beholding to her for all his Fortune; this *Theodore* having underſtood the Princeſſes Intention, and promiſed the performance thereof, call'd together in the Caſtle call'd *Cremetina* the Reſidence of the *Czar* and the Patriarch, 600 of the *Strelitzes*, whom he knew to be devoted to his Service under the Command of a Colonel call'd *Bourjanow*, an intimate Friend of his, offering himſelf to Head them in their way to *Obrogensko*, a Country Seat of the *Czar Peter*, where he then was. A certain time was appointed accordingly for the Execution of this Deſign: they march'd towards the before-mentioned place, but were ſcarce got out of the Gates of *Muſcow*, when two of theſe *Strelitzes*, touch'd with remorſe to have a hand in the muthering of their Prince, found means to get away, and with all ſpeed to advertiſe the *Czar* of the Deſign laid againſt his Life, who being then in Bed cauſed his Uncles by the Mothers ſide to be awakened, who after a ſhort Deliberation, reſolved that one of them ſhould go with Prince *Boris* towards the City, to ſee whether the *Strelitzes* had ſpoke truth in what they had reported. They were not gone very far, when ſeeing *Thekelatiraw* advancing that way at the Head of his *Strelitzes*, they hid themſelves in an adjacent Wood, till they were paſt by, and then clapping Spurs to their Horſes, return'd with all poſſible ſpeed through certain by-ways to the *Czar*, who being now put beyond all doubt of the Danger threatened him, had ſcarce time enough left him, to ſave himſelf with his Mother, Wife, Siſter and ſome few of his moſt truſty Servants by flight, taking their way towards the Monaſtery of *Troitza*. *Thekelatiraw* being not long after arrived with his *Strelitzes* at the place, where they were to have Acted ſo diſmal a Tragedy, was much ſurprized to underſtand from the other *Strelitzes*, (who knew nothing of their Deſign) that the *Czar* was ſuddenly departed thence, ſo that finding there was no further Buſineſs for him to do here, he return'd full of confuſion to *Muſcow*, where the flight of the *Czar Peter* had cauſed a great Alarm, no Body knowing what to make of it, till the next Evening it began to be rumour'd about, that he had ſent a Meſſenger to the Princeſs *Sophia*, to upbraid her with her Inhumanity, but that ſhe poſitively deny'd to have the leaſt Knowledge of any ſuch thing, alledging that theſe things were inſinuated into the *Czar* by her Enemies, who would interpret the exchanging of the Guards of the *Strelitzes*, as a Deſign contrived againſt his Life; but this Pretence appear'd very weak to moſt

1689.

1689. People, who were well ſatisfied that the Guards were always exchang'd at certain hours in the day time, whereas this Body of the *Strelitzes* came in the night time to *Obrokensko*, which is not above a *German* League from *Muſcow*. However a few days after, the Riddle began to be unfolded, for no ſooner was the *Czar* arrived at *Troitza*, but he diſcovered the whole Deſign to all the World, ſummoning all the Nobility, and the ſtanding Forces of the Kingdom to join him at *Troitza*, with ſuch good Succeſs, that in a little time he ſaw a good Body of the Nobility ready to receive his Commands there; he ſent alſo his Orders to Prince *Gallichin*, to come and attend him at *Troitza*, but he, who did not care to come there, as long as he could help it, excuſed himſelf, becauſe the *Czar John* had Commanded him to ſtay near his perſon. The Princeſs in the mean while, hearing what a reſort of the Nobility there was at *Troitza*, began to be ſorely afraid of being left at laſt alſo by her Darling *Strelitzes*, for which reaſon having Summoned moſt of the inferiour Officers into the Court, juſt as the *Czar John* and ſhe were coming from Maſs, ſhe prevail'd with him to ſpeak thus to them: "I know not for what reaſon my Brother has taken "his Retreat to the Convent of *Troitza*, but am afraid "it is not without an Intention of raiſing Diſturbances "in the State; I have been credibly inform'd, That he "has required you to come thither to him, but we for- "bid politively to obey his Commands, under pain of "Death. The Princeſs back'd the *Czar John*'s Commands by hers, yet did not the *Strelitzes* think fit to comply therewith, but repaired in great numbers to *Troitza*, to aſſure *Czar Peter* of their conſtant Fidelity.

The Princeſs *Sophia* ſeeing all her Endeavours prove in vain, and that every day more and more of the Nobility came to *Troitza*, thought it her ſafeſt way to make Peace with *Czar Peter* before it was too late; which ſhe hoped to effect by the Interceſſion of two of her Aunts by the Fathers ſide, named *Anna* and *Michalewa*, and one of her Siſters named *Marfa* (*Martha*) *Alexena*; theſe, as well as ſeveral other Princeſſes of the Royal Family, had, after the Example of the Princeſs *Sophia*, quitted the Monaſtick Life and Changed it for that of the Court, which the ſaid Princeſs *Sophia* was willing enough to arrive at, as conſidering, that the ſame Arguments which could be alledged againſt their ſo doing, might be made uſe of againſt her ſelf, and that the fear of returning to a Monaſtery, would infallibly link them to her Intereſt. Beſides the beforementioned *Marfa*, there were ſeven more Siſters of the firſt Adventure, *viz. Avidota*, *Dorothea*, *Catharina*, *Sophia*, *Mary*, *Sadiaſſa* and *Theodora*, their Mother being named *Miraskelawka*, the *Czar Peter* and his only Siſter the Princeſs *Natalia* being of a ſecond Adventure, born of a Lady of the Family of the *Narakins*. The Spouſe of *Czar John* is deſcended of the Family of *Satiskow*, her name being *Martha*, and had only one Daughter. *Czar Peter*'s Wife was alſo nam'd *Martha*, who being big with Child, when the Deſign againſt the *Czar*'s Life was diſcovered, miſcarried ſome days after, but afterwards bleſſed the Empire with the Birth of a Son, and conſequently, overturn'd all the hopes of the Princeſs and her Adherents. Thus much of the Royal Family; it is time we return to our former Theme. The two Aunts and the *Czar*'s Siſter being come to *Troitza*, did make uſe of all their Rhetorick to perſwade *Czar Peter*, that his Suſpicion was ill founded, and that theſe Aſperſions had been contrived by the Enemies of the Royal Family, on purpoſe to raiſe Diviſions, and Animoſities among them, deſiring him not to harbour any ill thoughts of his Siſter, and to come forthwith to *Muſcow*. But *Czar Peter*, having given them ſufficient Demonſtrations, that they intended to have murthered his Mother, Spouſe, Uncle and himſelf, and that by ſo undeniable Circumſtances as were paſt all Contradiction, theſe poor Ladies burſt out into Tears, declaring, That they had not the leaſt ſhare in the Plot, and that they would not return to *Muſcow*, but live and die with him at *Troitza*. The Princeſs *Sophia* finding her hopes vaniſh'd into ſmoke on this ſide, thought it her beſt way to make her Applications to the Patriarch, unto whom ſhe repreſented her Innocence in Tears ſo preſſing and paſſionate, that he was willing to undertake the Reconciliation of the Royal Family. Accordingly he departed from *Muſcow* to *Troitza* the ſame day, and being arrived there, gave the *Czar Peter* to underſtand the reaſon of his coming, not forgetting any thing which he thought conducing to bring about the intended Reconciliation. But it was not long before he was extremely ſurprized to hear from *Czar Peter*'s own mouth, that their Plot was laid even againſt his Life; and the Abbot *Silveſter*, who was among the number of the Conſpirators, was to have ſucceeded him in the Patriarchical Dignities; this did ſo nettle the old Gentleman, that he thought it his ſafeſt way to ſtay at *Troitza* with the reſt, till the whole Riddle ſhould be unfolded. The Princeſs ſeeing her ſelf thus reduced to the laſt ſhift, call'd together the Heads of the Party, to conſult what was beſt to be done in this Emergency, wherein it was reſolved, That, *Thekelatiraw* ſhould ſtay in the Caſtle, the Abbot *Silveſter* ſhould ſave himſelf by flight, and that ſhe and Prince *Gallichin* ſhould go in perſon to *Troitza*, to endeavour to juſtifie themſelves before *Czar Peter*; but ſcarce had they travelled half the way thither, when by a certain Meſſenger ſent by *Czar Peter*, they were ordered to return back, he having reſolved not to admit them into his Preſence. They thought it their beſt way to obey, and were ſcarce return'd to *Muſcow*, when they found the *Strelitzes* and *German* Forces upon a ſecond Summons from the *Czar Peter*, on their March to *Troitza*. They were no ſooner arrived there, but the *Boyars* that were with the *Czar Peter*, finding themſelves now ſufficiently ſtrengthned by their arrival, made a Decree, that the Traitors concerned in this Conſpiracy ſhould be ſeized, wherever they could be met with, and ſent the Colonel *Larque* at the Head of 300 choſen Men to *Muſcow*, to put this Decree in Execution. He no ſooner arrived in that City, but directing his March ſtreight to the Royal Palace, he demanded boldly, that *Thekelatiraw* ſhould be ſurrendred into his hands; the Princeſs *Sophia* at firſt ſeem'd unreſolv'd what to do, but the Colonel perſiſting in his Demands, ſhe was forced to ſurrender the ſaid *Thekelatiraw* and his Adherents to him, who were carried in Chains to *Troitza*. Prince *Gallichin* not queſtioning, but that his turn would be the next, thought it moſt expedient at this dangerous Conjuncture, to repair in perſon to *Troitza* before he ſhould be conſtrain'd ſo to do, for which purpoſe, having taken his Son *Alexis*, his Aſſociate in the Chancellor-ſhip along with him, as alſo *Talachanaw*, Governour of the *Czars*, *Raquenske* the Lord Treaſurer, *Nepleuvan*, Wayvode of the *Syrenes*, *Eſaujaw* Commiſſary General of the laſt Camp, and one *Kaſſantan* his particular Favourite, they went to *Troitza*, where they were no ſooner come, but they found the Gates of the Convent ſhut, and a Guard ready to take them into Cuſtody, with ſtrict Orders not to let them ſtir out of their Lodgings; in the mean while, *Thekelatiraw* was no ſooner arrived at *Troitza*, but was put to the Torture, in the Preſence of the chiefeſt *Boyars* that were there with *Czar Peter*. They call this way of torturing *Kanouſe*, which when it is to be perform'd, they tie the Criminal to the back of a luſty perſon, his hands being extended above his Head, on a board fix'd there for that purpoſe; in this poſture he receives 200 or 300 Laſhes by the Executioners hands, with ſuch violence, that at every ſtroke the Skin and Fleſh is torn from the Bones. *Thekelatiraw* had not received many Laſhes, before he confeſs'd the whole truth, that his Intention had been to murther the *Czar Peter*, his Mother and all his Family, and ſoon after writ a Letter to the *Czar*, wherein having given him a Circumſtantial account of the whole Deſign, and the Names of his Accomplices, he declared, That they had forced him to enter himſelf as an Accomplice into the Deſign they had laid long before. 1689.

The *Czar Peter* being thus ſufficiently convinced of the treacherous and bloody Deſigns of his Siſter, yet was ſo far from inflicting any Puniſhment upon her, according to her deſerts, that he only obliged her to return to the Nunnery, which ſhe her ſelf had built a Mile from *Muſcow*; and at the Interceſſion of *Boris Alexiowitz Gallichin*, Nephew of Prince *Galichin*, he changed his Puniſhment, which could be no leſs than Capital, into Baniſhment into *Siberia*. This done, ſeven more that were concerned in this Conſpiracy were put to the Torture, by dropping boiling hot water upon their Heads, which being ſhaved before, put them to ſo exquiſite a Torment, that they confeſs'd the Fact, and diſcovered all their Accomplices. Prince *Gallichin* with his Wife, Son and neareſt of Kin, being, as I told you, baniſhed into *Siberia*, all his Eſtate was confiſcated to the *Czar*'s uſe; a prodigious quantity of precious Furniture, and moveables were found in his Houſe, 100000 Ducats, which were buried under ground, and 400 *Pontes* of Plate, each *Ponte* containing 40 pound weight. The *Boyar Evanty*, and *Romenawitz Nepleuvan* Wayvode of the *Syrenes* were baniſh'd

1689. baniſh'd to *Paſtozora* one of the moſt Northerly parts of the Empire, and their Eſtates confiſcated. The reſt of *Gallichin*'s Friends were either confined to their Country Houſes, or provided with ſome Governments, at a great diſtance from *Muſcow*. This done, *Thekelatiraw* had his Head cut off upon a Block by the common Executioner, and the two *Strelitzes*, who were to have murthered the *Czar*, underwent the ſame fate; the Colonel their Leader, after being ſeverely whipt, had his Tongue cut out, and was baniſh'd into *Siberia*, and five more *Strelitzes* ſuffer'd the ſame Puniſhment. The Princeſs *Sophia* who would but ill reliſh the Life of a Nun, after ſhe had been ſo long Miſtreſs of a vaſt Empire, was contriving to make her eſcape into *Poland*, but *Czar Peter* having got notice thereof, ſent her into the Convent by force, and ordered a Guard of *Strelitzes* to keep a watchful Eye over her, for fear of an eſcape. Tranquility being thus reſtored, *Czar Peter* made his Publick Entry into *Muſcow* on Horſeback, which was chiefly remarkable by the Homage, the whole Body of the *Strelitzes* (conſiſting of 1000 Men) paid him, and had lined the Streets, through which the *Czar*, his Spouſe, and Mother paſs'd in a Coach to the Palace; here being met upon the Stairs by *Czar John*, the two Brothers embraced with a great deal of Kindneſs, the *Czar Peter* deſiring the other, to continue his Friendſhip towards him, and ſo they parted to their reſpective Lodgings prepared for their Reception. This was the end of the Government of the Princeſs *Sophia*, who after having been the ſole Miſtreſs of the *Ruſſian* Empire for ſeveral years, was ſo intoxicated with Ambition, that not brooking to reſign the ſame to her Brothers, had laid this Plot, to continue Arbitrary in the Government, which drew upon her the Fortune of being forced to end her days contrary to her Inclinations, in the before mentioned Convent.
