If we trace the Origin of all the Troubles that have happened of late years, or are likely to happen, the ſame may chiefly be attributed to the Intreagues and ſiniſter Deſigns of this Princeſs *Sophia*, and therefore deſerve well our particular Obſervation, from their firſt beginning. She was a perſon of a heavy and bulkey ſhape, with a large Head, her Face being full of Hair like that of a Man; her Leggs very unſhapely, and the Structure of her Body of ſo awkward a compoſure, that, what with her Age, and what with her Deformity, ſhe appear'd more like a Monſter than a Lady deſcended from the Royal Blood. But the Perfections of her underſtanding, which benign Nature had beſtow'd upon her, ſeem'd to be intended to make an amends for the Defects of her Body; being naturally ingenious, induſtrious beyond Compariſon, and very active in what ſhe undertook; her State Maxims, were the ſame, as if they had been taken out of *Machiavel* (though it is certain, that ſhe never ſaw him) eſpecially in the point of Government, for which ſhe thought nothing might be omitted, that might tend either to its Eſtabliſhment or Preſervation, as will more clearly appear out of the following Account. For in the latter end of the Reign of *Tedor*, or *Theodore* her eldeſt Brother, ſhe, being ſenſible that his weakneſs would ere long put a period to his Life, took this opportunity to leave the Nunnery, where (according to the Cuſtom of the *Muſcovite* Court) ſhe was ſhut up (for her Life) under Pretence of aſſiſting the *Czar* her Brother in his Illneſs, which ſhe did accordingly, and that with ſo much Zeal, that ſhe gain'd thereby the Favour of the *Czar*, and the Affection of many of the chief Men among the *Muſcovites*. The next thing ſhe bent her Thoughts upon, was how to ſecure her ſelf againſt any Danger, of being forced to return into the Convent; to encompaſs which, ſhe thought nothing could be more expedient, than if by pitching upon an able Miniſter of State, who ow'd his Elevation to that Dignity to her ſelf, ſhe thereby might draw the Adminiſtration of Affairs into her own hands. *Knez Baſili Baſilowitz Gallichin* who was deſcended from the moſt illuſtrious *Jagellonian* Family in *Lithuania*, was both for his noble Extraction, and great Qualification look'd upon as the moſt proper Perſon to diſcharge ſo great a Truſt, which he did with a great deal of Applauſe as long as *Czar Theodore* lived. After his Death, *Kowanski* (being encouraged underhand by the Princeſs, to rid her ſelf of ſuch as ſhe thought oppoſite to her Intereſt,) under pretence of revenging the Death of *Czar Theodore*, but in Effect to entail the Crown upon his Family, having with the aſſiſtance of the *Strelitzes*, murthered many of the *Bojars* that were in the Intereſt of *Peter* the youngeſt of the two *Czars*, this involved the State in great Troubles, which were 1689. ſomewhat appeaſed by the Death of *Kowanski*, and the Princeſs *Sophia* found means by her Intereſt with *John* the eldeſt of the two *Czars*, to obtain not only the Dignity of chief Miniſter of State, but alſo that of Lord Chancellor for *Gallichin* her Favourite, ſo that, what with the weakneſs of one of the *Czars*, and the Minority of the other, ſhe ſaw her ſelf in a manner abſolute Miſtreſs of the whole *Ruſſian* Empire. The next thing that employed her Thoughts was, how to change the unlawful commerce ſhe had hitherto carried on with *Gallichin*, into the Bonds of Matrimony. The greateſt Obſtacle was the Lady of Prince *Gallichin*, for, as he was a Man of Honour, had got a conſiderable Eſtate with her, and divers Children, he could not reſolve to part with her, barely to gratifie another, for whom he had but little Affection, except what proceeded from the bare Conſideration of Intereſt. But at length, as Ambition was his predominant Paſſion, as well as the Princeſſes, ſhe urged the Matter ſo far, that he reſolved to part with his Spouſe, whom he perſwaded to retire into a Convent. The Princeſs *Sophia* having gain'd this Point, began now to bend all her thoughts upon ways and means to ſecure the Crown to her ſelf, her future Spouſe and Family; to Effect which ſhe propoſed to Prince *Gallichin*, the murthering of both the *Czars* her Brothers; but he, who's love was not ſo violent, as to have bereaved him of his Reaſon, and conſequently the apprehenſion of the Danger, that was likely to enſue, even if they ſucceeded in it, knew ſo well how to repreſent to her the dangerous Conſequences of it, that, for that time ſhe was contented to acquieſce in his opinion, which tended towards the ſecuring to themſelves; firſt, The ſole Adminiſtration of all publick Affairs, and afterwards the Crown, by ways, which though not ſo quick, yet ſuch as appear'd much leſs hazardous in the Execution. He propoſed, That a Wife muſt be choſen for *John* the eldeſt of the two *Czars*, who being impotent, ſhe muſt be perſwaded to admit of a Gallant to ſupply the Empire with Heirs; that ſo ſoon as the eldeſt *Czar* ſhould have any Male Heirs, the Authority of *Czar Peter*, the youngeſt Brother, would ſink ſoon after to ſuch a Degree, that it would be no hard matter to force him to embrace a Monaſtick Life, or to find out ſome other means, to rid their hands of him. This done, he adviſed to advertize *Czar John* of the Infidelity of his Spouſe (which would be no hard Task for them to do) who being thereupon thruſt into a Monaſtery and her Children illegitimate, they might provide another Wife for the *Czar John*, but as they were ſure, that he was not in a Condition to beget any Children, ſo, they ſhould have the ſole Adminiſtration of Affairs during his Life, and the Crown, for want of Male Heirs of the Royal Family, would thus without Effuſion of Blood devolve to the Princeſs *Sophia*. She was well ſatisfy'd with this Propoſition, the whole Execution of which ſhe committed to his Care, little thinking that his main drift in the Matter, was to entail the Crown upon his Son by his firſt Wife, by exalting one *Silveſter* a *Poliſh* Fryar to the Dignity of a Patriarch, and procuring an Union betwixt the *Muſcovite* Church, and that of *Rome*, to obtain the Popes Intereſt to back his Deſign. The beginning of the intended Project was made with the Marriage of the eldeſt of the two *Czars*, *John*, for whom they took Care to find out a handſome young Woman, from among his Subjects (according to the Cuſtom received in *Muſcovy*) and to ſupply his impotency furniſh'd the new *Czareſs* with a luſty vigorous *Italian* Chirurgeon, who did his Buſineſs ſo well, that it was not long before ſhe proved with Child, but to the great grief of the Princeſs proved a Girl. The Adherents of the *Czar Peter* were not ſo ſtupid, as not to have ſome Scent of what was tranſacted, but wanted Power to oppoſe that of Prince *Gallichin*, back'd by the Princeſs's Authority with *Czar John*; to counter-balance in ſome meaſure this exceſſive Power, they introduced into the *Czar Peter's* Favour the young Prince *Gallichin*, a Nephew of the old *Gallichin*, but neglected by him, by reaſon of his being addicted to ſtrong Liquors, who in a little time got ſuch an Aſcendant not only over *Czar Peter*, but alſo over moſt of the *Boyars*, that they found means to ſend the old Prince *Gallichin* upon the Expedition againſt the *Crim Tartars*, and whilſt he was in Campaign the ſecond time, perſwaded *Czar Peter* to Marry, which he did accordingly, maugre all the oppoſition of the Princeſs *Sophia*; and the *Czareſs* proving ſoon after with Child, this proved ſo great an Addition to his Party, that almoſt all the young Nobility who

were

1689. were before in the Intereſt of the Princeſs *Sophia*, came over to his ſide. Prince *Gallichin* after his Return out of the Campaign, finding all his meaſures broke by ſo bold a ſtroke, as the Marriage of the youngeſt *Czar Peter*, and her being with Child, began now to repent of not having follow'd the Princeſſes Advice, and ſeeing now no other means left to encompaſs his ambitious Deſign, but conſenting to the making away of the *Czar Peter*, which miſcarrying, as we told you before, he propoſed to the Princeſs, That he would with his Family and Treaſure retire into *Poland*, where he did not queſtion, what with the King's Favour, and the *Coſacks* and *Tartars* he intended to bring over to his Party by Preſents, but he might make a powerful Irruption into *Muſcovy*, and ſo obtain by open force, what he had not been able to accompliſh by Policy. Many are of opinion, That, conſidering the great Party the Princeſs and he had in the Empire, his Deſign was not altogether without ſome probability of Succeſs, but the Princeſs who could not entertain the leaſt thought of loſing him out of her ſight, and ſtill relying upon her own ſtrength, could not be prevail'd upon to hearken to his Advice, but poſitively forbid him to ſtir, not queſtioning but to bring him off by her Authority; but theſe hopes being ſoon after vaniſh'd into Smoke, as we have told you before, *Gallichin* with an undaunted Conſtancy ſubmitted to his Sentence, which was to end his days in Baniſhment in *Siberia*.

No ſooner was *Gallichin* removed, but *Naraskin* Grandfather by the Mother's ſide to *Czar Peter*, aim'd at the chief Miniſtry, and ſuch other Dignities as were become vacant by his removal. The chief Obſtacle that ſeem'd to oppoſe his Deſign was the Nephew of the old *Gallichin*, whom as he had formerly been promoted to the *Czar Peter*'s Favour, to balance the Authority of his Uncle, ſo, now made uſe of the Interceſſion this young *Gallichin* had made to obtain his Uncles Life (which he did) as a ſpecious Pretence to inſinuate into the *Czar Peter*, that he had all along kept a ſtrict Correſpondence with his Uncle, and that therefore he was not to be rely'd upon; the *Czar* repreſented to them the improbability of what they propoſed, alledging to them the Fidelity of a perſon who had no leſs than three times ſaved his Life; but the cunning old *Naraskin* with his Sons and Daughters, throwing themſelves at the *Czar*'s Feet, with Tears in their Eyes, conjured him not to truſt himſelf into the hands of a perſon, whoſe Fidelity they had great reaſon to queſtion, which had ſuch an influence upon the *Czar*, that he reſolved to confine this young Favourite to his Country Houſe, which he no ſooner underſtood, but he went thither immediately, without ſtaying for the *Czar*'s Orders. The *Czar Peter* had ſcarce got notice of his Departure, but repenting of his former reſolution, he ſent Meſſenger after Meſſenger to know the reaſon of it; unto whom the young *Gallichin* gave for an Anſwer, That ſince his paſt Conduct had not been ſuch as to aſſure his Majeſty of his Fidelity, he would end his days at a good diſtance from Court; this Anſwer having touch'd *Czar Peter* to the quick, he ſent away two *Boyars*, to perſwade him to return to Court, and within a few days after, being impatient to ſee him, diſpatch'd two more to Command him to return, which he did immediately. *Czar Peter* received him with a thouſand Careſſes and Embraces, which ſo netled *Naraskin* and his Party, that finding they were not able to cope with him at preſent, thought it their beſt way, to ſue for his Friendſhip till a better opportunity might offer. Neither was it long before this young Favourite (who had little of the Merits of his Uncle) furniſh'd them with one, to accompliſh his ruin; for, as drinking was his moſt admired Paſt-time, ſo, he beſtow'd moſt of the places upon thoſe of the ſame Stamp, without any regard to their Capacity; and theſe being a Company of hot-headed Fellows, did not ſtick over their Caps to enter into Cabals for the Intereſt of the Princeſs *Sophia*, which no ſooner reach'd the *Czar Peter*'s Ears, but being convinced of the Incapacity of his Favourite, he beſtowed the Dignity of Chancellour upon the old *Naraskin*, and that of High-Steward upon his eldeſt Son. Young *Gallichin* being highly exaſperated at his Diſgrace, was ſo far from bridling his Paſſion, that he upbraided the *Czar* in publick with Fickleneſs, which being extremely reſented by the *Czar*, his Enemies were not idle to improve this opportunity to his Deſtruction, which follow'd ſoon after, he being condemn'd to undergo the ſame Puniſhment of ending his days in *Siberia*, with his Uncle the old *Gallichin*.

After the Baniſhment of both the *Gallichin's*, the Family of the *Naraskins* having got the whole Management of Affairs into their hands, even thoſe who not long 1689. before had conceived a ſecret Joy at the misfortune of the old *Gallichin*, began to feel the Effects of the abſence of ſo great a Man; it was he, who had at his own Charge built a very fine College of ſtone, and provided it with 20 *Greek* Profeſſors, and many good Books; it was by his Encouragement, that the Nobility ſent their Sons to the *Latin* Schools in *Poland*, or ſent for Tutors for the Education of their Children, from that Country; and afterwards ſent them into foreign Parts, to be inſtructed in Military Diſcipline, and other uſeful Sciences; it was to him Foreigners of all Religions (not excepting even the Jeſuits themſelves) were obliged, for having free Admiſſion into *Muſcovy*; and to be ſhort, it was he, who had projected no leſs than the turning the Deſarts of this Empire into habitable Places, the reclaiming a barbarous Nation from their wonted Barbarity, making brave Men of Cowards, and converting the nauſeous Huts of the *Muſcovites* into convenient Habitations, there having been above 3000 Houſes of ſtone built by his Encouragement in the City of *Muſcow*. His Palace was one of the fineſt in *Europe*, covered with Copper inſtead of Tiles, the Tapeſtry, Paintings and other Furniture of which were almoſt ineſtimable. He had alſo a Palace built for the Reception of foreign Miniſters, not inferiour in Magnificence to the other, and the Stone-bridge (the only one in all *Muſcovy*) of 12 Arches, which he built at his proper Charge over the River *Moſca*, is an everlaſting monument of his Liberality. No ſooner, I ſay, was this great Man, and his Nephew removed from the Helm, but the *Naraskins* began to receive the old *Muſcovian* Rules of Policy, to wit, to lay the Foundation of that deſpotick Government, which is exerciſed by the *Czars*, upon the ignorance of their Subjects; for which reaſon they began with the Prohibition of admitting Foreigners without peculiar leave into the Empire, and more particularly of the exerciſe of the *Roman Catholick* Religion; with ſo much Severity, that they would ſcarce allow the *Poliſh* Reſident a private Chappel for his own uſe; and poſitively denied the Requeſt he made in 1690. of a paſſage only for Father *Grimaldi* through their Country, having obliged all the Jeſuits in *Muſcow* to quit the Country, the very next day after the Baniſhment of this great Man; it was at that time the Opinion of moſt of thoſe who have any inſight into State Affairs, that had their Miniſtry continued much longer than it did, they would have endeavour'd to re-introduce as much the old Barbarity among the *Muſcovites*, as Prince *Gallichin* had taken Care to root it out. But the *Czar Peter* coming to Age of Maturity, and being ſenſible of the happy Effects of the Deſigns of that great Perſon for the Advancement of his Empire, did after the Death of his eldeſt Brother *Czar John*, ſo cloſely follow his Footſteps in the Management of all Affairs of moment, and has made ſuch conſiderable Progreſs, in reducing his Subjects to a more civilized Temper, that the Memory of this great Miniſter will remain Sacred for ever among the *Muſcovites*, who look'd upon him as the moſt accompliſh'd Perſon, their Country ever produced, before he ſullied his Honour in being engaged in the Conſpiracy againſt the Life of his Prince.

The famous *Ruſſian* Tyrant *Baſili Baſilowitz*, having after the Conqueſt of *Caſan* and *Aſtracan* join'd *Siberia* to his Dominions, and thereby diſcovered thoſe rich Furrs which were before that time unknown in *Muſcovy*, thoſe, who were baniſh'd into that Country, to hunt thoſe Creatures, at laſt opened themſelves the way, through vaſt and before impaſſable Wilderneſſes to the ſhoar of the frozen Seas. The manner of it being ſoon ſpread in *Europe*, the *Dutch* were the firſt who attempted to diſcover the *Muſcovite* Coaſt, but having miſcarried in their Deſign, the *Engliſh* had the good Luck to find out the Gulph or Bay of St. *Nicholas*. The Son and Succeſſor of the before-mentioned *Czar Baſili Baſilowitz*, being over-joy'd at this opportunity to enter into Commerce with foreign Nations, granted them many Privileges, and among the reſt an entire Exemption from all Duties and Cuſtoms. The *Dutch* looking with an envious Eye upon this advantage obtain'd by the *Engliſh*, endeavoured at divers times to obtain alſo an Eſtabliſhment there, but in vain, the firſt remaining entire Maſters of the Trade of *Archangel*, till the Death of King *Charles* I. The *Hollanders* having by that time got a powerful influence upon the *Muſcovite* Court, theſe laid hold of this opportunity, under pretence of revenge againſt a Nation who had Sacrificed their

1689. their King in so abominable a manner, to bring in the *Dutch*, which they actual did, under condition that they should pay 15 *per cent.* for all Commodities imported or exported; notwithstanding which they have made such advantage of the *Russian* Trade, that they have at present above 200 Factors at *Archangel*, who during the Winter reside for the most part at *Muscow*, in one of the Suburbs of which lives above a 1000 Merchants, *English*, *Dutch*, *Hamburghers*, *Netherlanders* and *Italians*, who exchange their Cloaths and other Manufactures and Spices for Corn, Hemp, Pitch, Wax, Iron, *&c.* Their Ships arrive commonly at *Archangel* in *July*, and depart again in *September*, those that stay beyond that time are in great Danger of being lost in the Ice; they Sail commonly from *Archangel* to *Bergen* in *Norway*, in 15 or 20 days. Formerly the *Persian* Merchants used to bring their Commodities to *Archangel*, but during the Ministry of the great *Gallichin* they had Liberty given them to carry their Goods directly to *Riga*, paying 15 *per cent.* Custom to the *Czars*, which saved them a great deal of time, for from *Riga* to *Holland* they might go and come in 4 Months time, and go from *Riga* to *Archangel* in 3 Months by way of the *Caspian* Sea. The *Dutch* obtain'd at the same time, Liberty from the said *Gallichin*, to have some Ships built by their own Carpenters, to transport their Commodities from *Archangel* to *Salamanchia* in *Persia*, which they did with a great deal of ease, till these Vessels being burnt by the *Tartars*, the succeeding Ministers would not allow the *Dutch* to build any New ones; amongst the many other Projects which that great Minister set on foot for the benefit of the Empire, and the no small encrease of the *Czar's* revenue, his setling an easie passage from *Muscovy* to *China* by Land, deserves a particular place here.

To encompass this, he made use of one *Spatarus* a *Wallachian* by Birth, who, by reason of his having discovered a secret League betwixt the King of *Poland*, and the *Hospidar* of *Wallachia* (which proved the ruin of the last) was banish'd his Country, and had his Nose slit; as he was a person of a great vivacity of Wit, and a perfect Master of the *Greek*, *Latin* and *Italian*, so he found a very good Reception at the Court of the Elector of *Brandenburgh*, whither he retired after his Banishment; but at the Intercession of the King of *Poland*, being forced to leave that Court, he retired into *Muscovy*, where he was well received, and entertain'd by the old *Gallichin*; who being resolved to settle a convenient Correspondence for Commerce by Land with the *Chineses*, pitch'd upon this *Spatarus* to undertake that Task. He was 2 whole years taken up in this Journey; but being a person of more than ordinary Sagacity, he had taken so exact a view of all the places thro' which he pass'd, that after his return, he made it plain to *Gallichin*, in what manner the passage from *Muscow* to *China* might be rendred very easie and commodious. For this purpose it was resolv'd to erect certain Huts or small Cottages, from 10 Miles to 10 Miles, betwixt *Muscow* and *Tobolsko*, the Capital City of *Siberia*, and to allot certain Lands for the subsistance of the Inhabitants, and their Horses, each of which was obliged to keep 3 for the conveniency of such Merchants, or other Persons as travell'd that way, who were to pay 3 Pence for each Horse for 10 *Versts*, or Miles, amounting to above 2 *German* Leagues; Orders were also given for the erecting of certain Posts on those Roads, as well as all over *Muscovy* to distinguish the Miles, and be a direction to Travellers to those parts of the Country. Where by reason of the vast height of the Snow, Horses were of no use, he Commanded certain Huts to be erected, the Inhabitants of which were obliged to keep a certain number of Dogs, that were to supply the Defect of Horses to draw the Sleds. He was very careful to have Magazines erected at *Tobolsko*, to supply the *Caravans* with what Provisions they should stand in need of for so great a Journey, and certain large Barks were built to carry them upon the Rivers *Irtish* and *Oby* to the Lake of *Kesilbas*, at the foot of the Mountains, where further Provision was made for the prosecution of their Journey. *Spatarus* told me himself, That in his last Journey he did not spend above 5 Months, and that he perform'd it with as much ease as he could have done in some parts of *Europe*. I was very curious to have Learn'd of him, the Names of the Countries, Rivers and Mountains thro' which he pass'd, but as he was sensible how jealous the *Muscovites* are even in Matters of the least moment, so he desired to be excused upon that Point, for fear lest if it should take vent, and be interpreted to his prejudice, he might be rewarded for his Pains with a good *Bastinado*, a Chastisement the greatest *Boyars* are not exempted from, when the *Czar* is pleased to make them feel the Effects of his Indignation; he only added, That in his third Journey thither, which he was to undertake speedily, he did not question, but to find out still a shorter and easier way. The Succes *Spatarus* had met with in this Enterprize, gave no small Encouragement to several of the *European* Nations to follow his Footsteps; but the *Hollanders* considering, that, if this way was once opened to Foreigners, the *French* would have the best opportunity in the World to vent their Manufacturies, of which the *Chineses* and *Tartars* are excessive fond, at so easie a rate in these Countries, that thereby their *East India* Trade would come to an utter decay in a few years; they knew so well, how to insinuate themselves into the Ministers of the *Muscovite* Court, that succeeded *Gallichin*, that they stop'd the passage by Land into *China* to all the *Europeans*; notwithstanding the many Efforts the *French* Missionaries have made to obtain it. 1689.

An Abstract of a Letter written by a Person of Quality, a Native of Germany *residing in* Muscovy, *concerning the present State of that Kingdom.*

IN Answer to yours, in which you desired me to give you the best account I could concerning the present State of *Muscovy*, and what else I had met with worth Observation during the stay of the late *Muscovite* Embassy in *Holland*, *England* and other parts, I send you here an account of what I have been an Eye witness of in Relation to the said Embassy. But to trace the true State of this Empire, it is absolutely requisite to go back as far as the Reign of *Czar Alexis Michaelowitz*, the Father of his present *Czarish* Majesty, who coming to the Crown in the Year 1645. found the *Muscovites* so deeply involved in Ignorance, in respect especially to Military Affairs, that to remedy this Evil (which they had often experienced to their cost) he thought he could not pitch upon a better expedient, than to invite into his Service a sufficient number of foreign Officers, by whose assistance he might hope to bring his Subjects under a regular martial Descipline. The Encouragement he gave to these Officers, by prompt payment and other Privileges he bestow'd upon them, made his Design succeed so well, that if we may give credit to the *Baron* of *Mayerburgh*, who 1662. went in the Quality of Ambassadour from the present Emperour *Leopold* to the *Muscovite* Court, and who for the rest seldom flatters the *Muscovites*, there were in his time no less than 2 Lieutenant Generals, as many Major Generals, above 100 Colonels, and other Officers in proportion in the *Czar's* Service, who were very punctually paid, and much esteem'd there; it being to them the *Muscovites* were obliged, for the many brave Actions the Troops, that were under their Commands, perform'd against the *Poles* and *Swedes*; besides that these New rais'd Regiments served as a Check to the ancient Guards of the *Czar*, which consisting of 40000 Men, are Commanded by the chief of the Nobilty, and are look'd upon as the constant standing Force of the Empire. This Prince died 1676. being generally lamented by his Subjects, for his mild and generous Disposition; he was succeeded by his eldest Son, *Tedor* or *Theodore* who reigned no longer than 6 years, and bequeathed the Crown to his youngest Brother *Peter*, Born of a second Adventure. *John* the elder, born of the same Mother with himself, being by reason of his Infirmities of Body and Mind, not in a Capacity to bear the burthen of so vast an Empire. Accordingly the said *Peter Alexiowitz*, was proclaimed *Czar* of *Muscovy*, when he was scarce 11 years of Age; but the Princess *Sophia* by raising a powerful Party against him, advanced the elder Brother *John* to the Crown in conjunction with the said *Czar Peter*. Her Cabals and Intreagues with the old Prince *Gallichin*, her Lover, first to Dethrone, and afterwards to kill the said *Czar Peter*, these I say are Subjects of so ample an Extent, as to exceed the compass of a Letter, which obliges me to keep within the Bounds prescribed to my self, and to be satisfied with what relates more particularly to the *Czar Peter's* person. This Prince had from his Infancy given most manifest Demonstrations of his sublime Genius, all his thoughts being bent upon the Knowledge of Sea Affairs, and other Matters in which foreign Nations excel the *Muscovites*? Finding the *Turks* entangled in a heavy War with the Emperour, *Poles* and *Muscovites*, he look'd upon this as the most favourable opportunity in the World, to give some Proof of his warlike Inclinations against the common Enemy of Christendom; for which purpose, having concluded a Peace with the *Chineses*, and engaged in a strict Alliance with the three before-mentioned Powers, he, resolved upon the Siege of *Asoph*, a place of vast consequence to the *Muscovites*, to open their way to the *Black Sea*; he had also another insight in this Project,

viz. so

viz. to humble the Pride of the *Strelitzes*, by exposing them in those Attacks where there was most Danger, and supplying their Places with such as he knew entirely devoted to his Service. According to this Project more foreign Officers were taken into Pay (which I believe amounted in all to 8000) and it was resolved to Act with two separate Bodies, one of which was to be employed in the Siege of *Asoph*, the other against *Kasikermeen*, the better to amuse the Enemy.

The City of *Asoph* was formerly of no large Extent, the Fortifications being no more than a single wall strengthned with some Towers after the ancient way, two sides of which run parallel with the River; in the middle of that side which faces the East, was a very high and large Tower in form of a Pyramid, but flat on the top; besides which it had a large Entrenchment, in the manner of a Cittadel for the conveniency of the Garrison; this was strengthned on the East side, with divers small Demi-Bastions, and to the West with a good Bulwark, these two sides extending to the River side adjoining to the Wall. The *Turks* had of late made some additional Fortifications of Earth which enclosed the rest, defended by four Bastions and a Ditch; the two Bastions which were on the side to the S. E. opposite to the Hill which Commands the place, were near enough to second one another, but the third on the S. W. side, was quite out of reach of the second; and the fourth on the West side, at a much greater distance from the third; the Cortin betwixt these two last Bastions had about the middle an obtuse Angle, as had also the Cortin facing the East; all along the River side it was defended by strong Pallisado's, and at some distance above the City you saw two square stone Towers (one on each side of the River) provided with Cannon, and a Chain cross the River, to hinder the *Cosacks* from passing that way in their Barks in the night time. This was the Condition of *Asoph*, when it was besieged the first time by the *Muscovites*. I can't but stand amazed, when I consider, that the *Turks* whole Empire is founded upon the Conquests they have made of their Neighbours, should be so neglectful of *Asoph*, which is the Inlet into *Muscovy* on that side; whereas according to the true Maxims of their State, they ought to have fortified it in such a manner, as to take away all thoughts from the *Muscovites* for ever attempting to attack it; had they follow'd this Rule, how easie a matter would it have been for them, to make themselves Masters of that advantageous Post, where the *Wolga* approaches to the *Don*, and from thence to carry the terrour of their Arms over the greatest part of the *Muscovite* Empire. For it is to be observed, That there are two Rivers thereabouts of less note, one of which coming from the N. W. falls into the *Don*, the other from the S. W. joins its Current with that of the *Wolga*; these two Rivers are not above a League and a half asunder, though they are not as much as mark'd in our Maps, but instead of this mention a certain Canal they call *Camous*, which is not to be found thereabouts. The Ground betwixt these two Rivers being very easie to dig (a few rocky places excepted) what could have hindred them from making a Communication betwixt the two great Rivers the *Wolga* and the *Don*, by the means of a Canal; which done, a Fortress upon the Banks of the *Wolga* would have opened them the way into the Heart of *Muscovy* on one side, and by the *Caspian Sea* into *Persia*; but the small account they always made of the *Muscovites*, and their want of a sufficient force by Sea, to pursue these Designs seems to have diverted the *Turks* from ever attempting to bend their force that way, but to return to *Asoph*.

The *Turks* finding now too late, themselves in Danger to be attack'd on that side, had provided the City of *Asoph* with a Garrison of 10000 Men, and all other things necessary for a vigorous defence; the *Czar* of *Muscovy* on the other hand had assembled an Army of 100000 Foot, and 20000 Horse of his best Troops, wherewith he invested the place, and whilst they were busie in perfecting the Lines of Circumvallation, he ordered a small Fort to be erected on the South side of the River, betwixt the City, and the two before mentioned square stone Towers, which being thereby deprived of all Succours from the City, soon fell into the hands of the *Muscovites*, who strengthned that on the South side of the River with three Bastions; in the mean while they were advanced with their Trenches to the Hill which commands that place, from whence they play'd most furiously with their Cannon and Mortars, in hopes to terrifie the besieged to a Surrender; but these being all old Troops, who were resolved to defend it to the last extremity, they were forced to carry out their Trenches to the Body of the place; not without the loss of a great number of their best Men, who were slain in the Sallies the besieged made frequently and several attacks; it was a great while before the *Muscovites* could make themselves Masters of one of the Bastions, not without hopes of forcing the Enemy out of the Entrenchment they had made within; but the *Turks* having found means to chase the *Muscovites* thence, they were so discouraged thereat, that what with the advanced Season, and what with the want of Provisions and sufficient Ammunition, it was resolved in a Council of War, to change the Siege into a Blockade for this time, and to reassume it with new Vigour the next Spring. The *Strelitzes* who were the foremost in all the Attacks, suffered most upon this occasion, and it must be confess'd, that the *Czar* gave many proofs of Bravery often exposing his person to the Enemy's shot, several of his Attendance being kill'd near his side.

The Siege of *Kasikermeen* met with much better Success; this place is seated on the South side of the River *Boristhenes*, not above 2 Leagues from the *Black Sea* among the *Tartars* of *Oczacow*; its Fortifications consist of four square Forts of stone, three of which were in a parallel Line, and the 4th was built upon the very River of the *Boristhenes*, being defended as well as all the rest by divers stone Towers; but the 4th being the strongest, has two high Bastions instead of Towers, and a very deep Ditch flanking the River. Just opposite to it is the Isle of *Torna*, which resembles a *Neats-Tongue* in shape; upon this Island the *Tartars* had erected 2 Forts, at each end one; defended by 4 Bastions; that at the upper end they call'd *Monberchkermeen*, and that at the lower end *Kuftikermeen*; besides which they had built another Fort on the opposite side of the River towards the *Crim Tartary*, unto which they had given the name of *Oslonkermeen*. The *Muscovite* Army design'd for the Siege of the place consisted chiefly of *Cosacks*, inhabiting these Frontiers under the *Czar*'s Protection, and were commanded by their General, named *Scheremetoff*; the first thing they did, was the attacking of the Forts, which having been taken without much resistance, they bent their whole force against the Town, and directed their chief Attack against the Bastions; carrying on their Trenches with so much vigour and expedition, that in a very short time they made themselves Masters of them, forcing the Garrison to shelter themselves behind an old Wall where they capitulated, to march out of the place with all the marks of Honour due to Souldiers, who had behaved themselves bravely in their Station: However this Capitulation being but ill observed on the besiegers side, the *Czar* was so sensibly touch'd with these Disorders, that he sent for the General, and gave him a very severe reprimand, who being nettled at so unexpected a Reproach, beg'd leave of the *Czar* to lay down his Command, and to travel for some time into foreign Countries; which being no sooner ask'd than granted, he went into *Italy*, where having taken a view of most of the Courts there, he pass'd over into the Isle of *Maltha* where he was highly caress'd by the Knights of that Order.

The Winter now approaching, the *Czar* bent all his thoughts to repair the disgrace of the late Campaign by the Success of the next; his constant resolution being to carry *Asoph* at any rate; vast Preparations were made, not only of Bombs, Carcasses, and other great Artillery, but especially of the Gallies, *Brigantines* and other Vessels to defend the intended Succours of the *Turks* by the water side. Most of these were built at *Verokewitz* about 200 Miles from *Muscow*, except some of the Gallies of the first Rate, which by peculiar Order from his Majesty were built upon the River *Occa*, near the City of *Muscow*, and so contrived, that they might be taken to pieces, and conveyed upon Land-Carriages to *Verokewitz*, upon the River *Don*. The *Muscovites* who had been employed in the Blockade of the place, all the Winter had so strongly entrench'd themselves, upon the Hill which commands the City, that the *Tartars* had not been able to dislodge them thence, or to bring any considerable Convoy into the place; and every thing being now in readiness, it was resolved to open the Campaign early in the Spring, with the Siege of *Asoph*.

The first Effort was made with Bombs, of which so prodigious a number were thrown into the City, that it was soon reduced into a heap of Ashes and Stones; so that the Garrison, (which was by this time reduced to 2000 Men,) were forced to Shelter themselves in Holes dug under Ground for that purpose; notwithstanding which, they resolved to defend the place, till they saw what Success those Forces had, that were sent to their Relief, should meet with in this Attempt.

These

Theſe Forces were imbark'd on board 12 large Galleys, and a good number of *Saiques*: and no ſooner did they advance towards the Mouth of the *Don*, but the *Czar* having timely notice of it, commanded 7 of his largeſt Galleys, beſides many others of a leſs rank, to be brought into the *Don*, by the means of a Branch of that River which rejoyns the Grand Channel at ſome diſtance above the City. The Water being but ſhallow, this was not perfected, but with a great deal of difficulty, but the *Czar*'s Preſence having encouraged the *Muſcovites* to ſurmount all obſtacles, the Garriſon ſtood amazed to ſee Veſſels of ſuch a bulk (ſome of them being 100 foot long) appear in ſight of their City without knowing from whence they came. The next thing to be done was, to plant good ſtore of Artillery in the Iſland I had occaſion to mention before, lying near the Mouth of the River, which was done unperceived by thoſe in the Town, by reaſon of the Woods which covered the Labourers, which alſo afforded a convenient ſhelter to a good number of the leſſer Galleys and Brigantines, which the *Muſcovites* had placed on the back-ſide of the Iſland. The reſt of the *Muſcovite* Galleys, inferior in number to thoſe of the *Turks*, advanced againſt them in very good Order, and theſe encouraged by this inequality, and not dreaming of the Ambuſh that was laid for them in the Iſle, made all the Sail they could to come up with the *Muſcovites*, who pretending to be ſtartled at their number, retreated before them beyond the Iſland, and were cloſely purſu'd by the *Turks*, who thought themſelves abſolutely ſure of the Victory; but were no ſooner come within reach of the Cannon of the Iſle, when to their coſt, they found that they were not likely to have it at ſo cheap a rate as they had flattered themſelves, the Cannon making ſuch a havock among their Galleys as is almoſt inexpreſſible: During this Conſternation, the *Czar*, who was in Perſon in the Iſle, got aboard a Galley, and being follow'd by the reſt that were placed behind the Iſle, attack'd the *Turks* from behind with ſuch a fury, that they did not know which way to turn themſelves; the *Czar* in Perſon boarded the *Turkiſh* Admiral, and being ſeconded by ſeveral others, made himſelf Maſter of her, the reſt of the Enemies Fleet underwent the ſame Fate, not one Galley eſcaping the *Muſcovites* hands, but what was either taken or ſunk: This Victory was chiefly attributed to the *Czar*'s Conduct, who was the Contriver and chief Manager of the whole Action, and as he was an Eye-witneſs of the behaviour of his Subjects upon this occaſion, ſo he took immediate care to reward their Service, by diſtributing among them 50000 *Ducats*, which were found aboard the *Turkiſh* Admiral, and intended as a Reward for the Beſieged: Theſe having been Spectators of the ill ſucceſs their Fleet met with in relieving the Place, thought it now high time to provide for their own ſafety, by coming to a Capitulation, which was readily granted them upon very honourable Terms; and performed with all exactneſs imaginable.

No ſooner did the *Czar* ſee himſelf Maſter of *Aſoph*, but he diſcovered his Sentiments, of what conſequence he judged this Place to be, by the Fortifications he ordered to be made for its defence. For, he not only ordered the Body of the Place, which was almoſt ruin'd by the Cannon, to be repaired, but alſo a Foundation to be laid for a new Town, reaching as far as the Baſtions of Earth, with the obtuſe Angles we ſpoke of before; this he cauſed to be ſtrengthened with a good Counterſcarp, a Covered Way, divers Half Moons, and a ſtrong Entrenchment. But not ſatisfied thus, he commanded a Draught (which I ſaw) to be made of a Fortreſs to be built juſt oppoſite to *Aſoph* in the Marſhes, which was to be joyn'd to it by a Bridge ſupported by 30 Arches; its Fortifications conſiſting of 60 regular Baſtions, 2 of which flank'd the River, with a Half-Moon betwixt them; as the 2 Bulwarks on the North ſide were ſtrengthened by 3 Half-Moons, the ground upon which it was to ſtand, was to be raiſed to ſuch a height as to command the whole City of *Aſoph*, the ground round about being always under Water, when the Wind blows from the South, at which time there is no Communication left betwixt theſe 2 Places but by the Bridge. Theſe Fortifications would without all queſtion have been ſufficient to bridle the *Crim Tartars*, and the *Coſacks* inhabiting near the *Tanais*, had not the *Czar* had another matter, of much more conſequence, in view, which was no leſs than the eſtabliſhing a Commerce through his Country in the *Paltus Mœotis*, and thence through the Streights of *Caffa* to *Conſtantinople*, and ſo further into *Italy*; He was ſenſible that this could not be effected without making himſelf ſo formidable in the *Black-Sea*, as to be able to coap with the naval Force of the *Ottomans* there; in purſuance of this deſign three things were ſet on foot, by his Orders, which will perpetuate his Memory to Poſterity: (1.) The making of a good Harbour on that ſide. (2.) The Conjunction of the 2 Rivers, the *Wolga* and the *Don*, by means of a Canal; and (3.) the building of 80 Galleys and Frigates, beſides 150 Brigantines. This Harbour could not be erected at *Aſoph*; for, tho' the River *Don* from *Veronowitz* as far as *Aſoph*, is as paſſable for Ships as any River in the World, being without any Sands, Rocks or Shelves, and its Channel very deep, yet is its Mouth ſo choak'd up with Sands and Shelves, that at low Tide there is not above 7 foot Water, and conſequently not fit for the Paſſage of Ships of any great Bulk; which ſhews the error of moſt of thoſe Geographers, who have been ſo forward to deſcribe the Entrance of this River, as one of the ſafeſt and moſt commodious that can be. His *Czariſh Majeſty* having well weigh'd all theſe difficulties, gave ſtrict Orders to ſound the Coaſt thereabouts, and to pitch upon the moſt convenient Place for a Harbour, as near *Aſoph* as poſſibly could be done; but eſpecial command was given, to ſound near the Mouth of the River *Miens*, whereabouts the *Turks* uſed to caſt Anchor, with their great Ships bound for *Aſoph*, where at low Water there is commonly 15 or 16 foot Water. Not far thence is a Cape, whereabouts at low Tide there is 12 foot Water, the bottom being a hard Gravel, the Shoar riſing from the Sea by an eaſie aſcent; which to the Eaſt of the Cape makes a kind of a Bay, and about a Lg to the Weſt a ſmall River comes round the Cape in form of a Semicircle.

The *Czar* having taken an exact view of the Situation of this Place, gave immediate Orders for the erecting a Fortreſs with 5 Baſtions there, and the building of a City below it, leaving a conſiderable Tract of ground betwixt the City and the Bay, which lying upon a level, was to be cut for a Canal, which running parallel with the Cape, was intended for the reception of the bigger Ships; with a leſſer Canal within it for the harbouring of Veſſels of a leſſer ſize; I have ſeen the whole Draught of it, its length was 3750 foot, and the breadth about half as much. Concerning the Conjunction of the 2 Rivers, the *Wolga* and the *Don*, I have before given you ſome account of the ſituation of the ground thereabouts, and of the 2 leſſer Rivers which joyn their Waters with the 2 greater ones; all which conſidered it is more than probable that this Project will come to a good iſſue in a little time, above 20000 Men being employed to cut the Canal, by which this Conjunction is to be effected, by the means of certain Sluices, which are to raiſe the Water to ſuch a heighth as is requiſite for the Paſſage of Ships of any conſiderable bulk. For the Equipment of his Fleet he found out this expedient; as he had taken a full reſolution to root out by degrees the *Strelitzes*, the ancient Eſtabliſhed Forces of the Kingdom, in which the Nobility were generally employed as Commanders, he thought he could find them no better work, than to engage them for the future in the Sea-ſervice; to keep them from being troubleſome at home: To effect this, he recommended to all the *Boyars* and ſuch others of the Nobility as had any relation to the Court or Army, to educate their Sons in the knowledge of Maritime Affairs, as the only means to make the Empire formidable, promiſing them to furniſh them with able Officers, who ſhould inſtruct them in that noble Science; offering at the ſame time, that all Perſons of Note, and the chief Cities of the Empire, ſhould, in proportion to their abilities, contribute towards the conſtant maintaining a certain number of Men of War; which was to be the conſtant ſtanding Naval Force of the *Muſcovite* Empire.

His Majeſty having thus laid the foundation of theſe his Deſigns, ſet out in *Autumn* for *Muſcovy*, leaving a conſiderable Army near *Aſoph*, to cover the Workmen, under the Command of *Alexis Simonowitz Scheremitr*. He was received in his Capital City with all the demonſtrations of Joy and Magnificence due to a Conqueror, many Waggons laden with the Spoils of the Enemy, and a great number of Captives taken in the laſt Sea-Engagement, following his Train through the Streets; the Night was concluded with a very fine

Work, contrived by his Majesty himself, of which I my self saw him make the Draught. But notwithstanding all those Acclamations and other demonstrations of the Love the People bore to this Prince, there was a certain Party among the Nobility, fomented by the Princess *Sophia* (though enclosed in a Monastery) who not able to brook the downfal of their beloved *Strelitzes*, whom they had always look'd upon as the main Pillars to sustain their Authority, had conceived such a mortal hatred against the *Czar*, that they were resolved to take the first opportunity to send him out of the World. To effect this design, they had engaged among the rest, a Captain of the first Regiment of the *Strelitzes* into their Party, who had engaged to undertake this Task, but in the Execution of it found much more difficulty, than they had imagined. Several Projects were proposed to encompass it, and among the rest to fall upon him as he was passing through the City, which he very often did with a small Retinue, but upon second Consideration, this was thought an Enterprize of too dangerous Consequence, considering the Love the Common People bore him, who back'd by those Foreign Officers, that generally attended him, might by the assistance of the foreign Troops quartered in the Suburbs, have made the Conspirators, with their Adherents, pay dear for such an Attempt, before they could be in a condition to second one another. After various Debates, it was at last agreed, that considering the *Czar* used commonly to appear in Person whenever any Fire happens to break out in the City of *Muscow*, the best way would be to set on fire some Wooden Houses in the Night time, thereby to draw him thither, and whilst he was busie in giving the necessary Orders to, and encouraging, by his Presence, those that were employed in quenching the Fire, to stab him: The Day for the execution of this detestable Murther, was to have been the 2d. of *Feb.* 1697. which would, without question, have taken effect, had not 2 of the before mentioned Captains (who, as we told you, had undertaken this Task) touch'd with a remorse of Conscience at so foul a Fact, discovered the whole Design that very Day before it was to be executed, to the *Czar*. He happened to Dine that Day at the House of General *La Fort*; and the 2 Captains, whose Names were, *Largon Gilisarof*, and *Gregory Silexi*, had no sooner made their Discovery, but he arose with an unconcerned look from the Table, and ordering only a few Persons to follow him, went straightways to the House of one Mr. *John Zickler*, one of his Counsellors of State, and the chief Head of the Conspiracy; he left all his Retinue at the Door, and being follow'd only by 2 or 3 Gentlemen, he entred, and under pretence of having occasion for his Advice, ordered him to come out; he had no sooner done so, but was seized, as were immediately after 5 of his Accomplices, *to wit*, The *Boyar Alexis Schounin*, *Fedor Puskni*, the Son of the *Boyar Murifa Puskni*, the 2 Captains of the *Strelitzes*, and a certain *Cossack* of those inhabiting near the *Don*; it being upon the Assistance of those last, the Conspirators had chiefly rely'd, to restore the *Strelitzes* to their ancient State; and Princess *Sophia*, and Prince *Basili Gallishin* to the Chief Management of the Government; their whole design being thus miscarried, and the Criminals confronted with the 2 Captains who had made the Discovery, they ingeniously confessed their Crime, and were sentenced to death, which was executed accordingly the 5th. of *March*, 1697. in the Great Market-place before the Castle, where, after their Hands and Legs were cut off first, their Heads were severed from their Bodies, the last of which were fixed upon a Stone Statue erected for that purpose, and the Arms and Legs hung round about it; the Trunks of their Bodies were also exposed to the view and terror of the Spectators for several Days, and afterwards hung on Gibbets, erected in divers parts of the Country for that purpose. The Conspirators having among other things in their Confession, accused the deceased *Boyar John Miloslafsky*, of having been one of the Chief Managers of the Conspiracy, entred into against the *Czar*, 1687. at the time of his first Accession to the Crown, his Body (which was found very little corrupted) was disinterred and hung upon a Gibbet.

The *Czar* having granted a general Pardon to all the rest that had had a hand in this Conspiracy, began now in good earnest to prepare for his Journey into *Germany*, which he had projected sometime before, but had been pervented hitherto in his laudable design of taking a view of some of the chiefest Courts of *Europe*, by the Siege of *Asoph*, which being now brought to a happy conclusion, he resolved to bestow what time was requisite for the putting that Place into a sufficient Posture of Defence in Travelling. But as his chief aim was to make the most exact Observation that possible could be, of the Politicks made use of in those Courts to maintain their Grandeur, but especially of the Naval Strength of *England* and *Holland*; so he was sufficiently convinced that this design would meet with great obstacles, if he appear'd with that Grandeur as was befitting so great a Monarch, which made him pitch upon this Expedient, to go *incognito*, in the quality of a Private Gentleman, belonging to the Embassy, which he intended to send for that purpose. Monsr. *La Fort*, General of the *Czar*'s Armies, Coll. of his first Regiment of Guards, Lord-High Admiral of his Navy, and *Waywode* of *Novogorod*, was by his Majesty nominated his first Ambassador, with whom was rejoyn'd *Fedor Alexiowitz Gallowin*, *Waywode* of *Siberia*, and *Precofet Bogdanowitz Wochnitzi*, Lord Chancellor of the Empire. The honour his *Czarish* Majesty did to the General *La Fort*, in appointing him his first Ambassador, and the other Dignities he had conferred upon him long before, are undeniable Testimonies as well of his affection he bare to his Person, as of the *Czar*'s generous inclinations, who without the least regard to his Religion, and his being a Foreigner, had exalted him from a private Captain to these Dignities, in reward of his Services.

The second Ambassador was a Person also of extraordinary Merit, and highly esteem'd for his great undertaking in the Management of Publick Affairs, of which he had given many proofs in the several Treaties with the Court of *China*, whither he had been sent twice in the Quality of Ambassador Extraordinary, from his *Czarish* Majesty; he being the same Person, who at last had brought the Treaty of Peace (which was for a considerable time at a stand) betwixt those two Empires, to a conclusion.

The third Ambassador having likewise signalized himself in divers Treaties with the *Ottoman* Court, was in great esteem with the *Czar* before the departure of this Embassy, his Majesty pitch'd upon the most plausible expedient that could be invented to rid his hands, during his absence, of such, as he thought were inclined to Novelties: For, as for several Years before, he had at his own Charge, sent divers of the young Nobility a travelling into *Europe*, to accomplish themselves in such Sciences and other Matters, as are in vogue there; so, he at this juncture made use of the same pretence, to send away most of such, as he thought not much devoted to his Interest, for a certain time, into Foreign Parts, obliging the rest, such as he most suspected, to follow the Embassy, under the same specious pretence of accomplishing themselves abroad, and adding to the Grandeur of the Embassy.

Thus all necessary precautions being taken for the Quiet of the Empire; during the *Czar*'s absence he committed the Management of the Government to three Persons only, *to wit*, to *Soff Kerilwitz Nariskin*, his Majesty's Uncle by the Mother's side; to *Procorofskoi*, the Lord High Treasurer, a Man well advanced in Years, and highly esteem'd for his Candor, and to *Boris Alexiowitz Gallishin*, his Majesty's Favorite and Chief Minister of State; he is Nephew to *Basili Gallishin*, who was banish'd into *Siberia*, and it was to his Care the *Czar* committed his only Son, being then about nine Years of Age, a Prince, who by his early Vertues gives great hopes that he will tread the foot-steps of his Father. General *Gourdon*, a *Scotchman* by birth, and of the *Roman Catholick* Religion, was ordered to Encamp with 20000 Men of the best Troops, near *Muscow*, to bridle such of the Malecontents as might shew the least inclination to a Revolt.

Things being thus settled at home, the said Embassy set out from *Muscow* (his Majesty being with them *incognito*) for *Plescow*, with a very magnificent Train, and taking their way through *Livonia*, *Courland*, and *Samogitia*, arrived at *Koningsberg*, the Capital City of the *Ducal Prussia*, where they were received with a great deal of Splendor, in behalf of the then Elector of *Brandenburg*. Here it was that the *Czar* being advertiz'd of the Election of the Elector of *Saxony* to the Crown of *Poland*, and the disorders that were likely

likely to ariſe about that Affair, betwixt him and the Prince *de Conti*, his Competitor, who was back'd by the Authority of the *Cardinal Primate*; he ſent expreſs Orders to his Ambaſſador then reſiding in *Poland*, to joyn with the Intereſt of the Elector, and to aſſure him, that he had already given his Orders for 60000 Men to advance towards *Smolensko*, to keep the *Lithuanians* in his Intereſt; which piece of Service proved of no ſmall advantage to the Elector's Affairs, for though the *Lithuanians* were for the moſt part for the Prince of *Conti*, yet upon his arrival at *Dantzick*, they durſt not ſtir in favour of him, for fear of the *Muſcovites*.

After a ſtay of ſome Days at *Coningsberg*, they purſued their Journey to *Berlin*, the Reſidence of the Elector of *Brandenburg*, where his *Czariſh* Majeſty was ſo highly ſatisfied with the honour done to his Perſon, and the Embaſſy, and with the Politeneſs of that Court, that he declared, as ſoon as his only Son ſhould be of an age fit for travelling, he ſhould ſpend a conſiderable time there.

The States General of the *United Provinces*, had no ſooner received intelligence that the Ambaſſadors had left *Berlin*, and were advancing towards their Frontiers, but they ſent thither certain Deputies, to receive and Complement them on their behalf, with expreſs Orders to defray their Charges, as ſoon as they were entered the States Dominions; and to give the moſt evident proofs they were able, of the honour they thought done them in ſeeing ſo great a Monarch their Friend and Allie among them, a poſitive Command was ſent to all the Governors of thoſe Places through which they were to paſs, to welcome their arrival by the diſcharge of their great Cannon. After they were advanced a pretty way into the *Dutch* Territories, the *Czar* left the Embaſſy, and continued his Journey to *Amſterdam*, where he arrived in the Company of 2 or 3 Gentlemen only, without being known by any body; and having ſtay'd only one Night in a Publick Houſe of Entertainment, he went the next Day to *Sardam*, a large Village about 2 Lgs from *Amſterdam*, famous for the multitude of Ship-wrights, that are conſtantly employ'd here in building of Ships. Here the *Czar* took his Lodgings at a Private Houſe at ſome diſtance from the Village, his only Diverſion being to ſee the Ship-Carpenters work. He alſo bought a ſmall Yacht of about 25 or 30 foot long, which he uſed to take great delight to manage himſelf, and to Cruiſe up and down the River call'd the *Y*, to take a full view of that prodigious number of all ſorts of Veſſels, which are always to be ſeen in the Road of *Amſterdam*. Scarce had his *Czariſh* Majeſty liv'd thus *incognito* to his ſingular Satisfaction, when a certain Handy-crafts Man, who had lived formerly in *Muſcow*, having accidently got ſight of him, could not refrain from declaring to his Companions, what he really was, which in an inſtant drew ſuch a number of Spectators thither, that the *Czar* for the future was obliged not to appear abroad ſo frequently, to his no ſmall regret, and without Queſtion made him leave *Amſterdam* ſooner than he intended before. For no ſooner had ſome *Muſcovite* Merchants, who had lived in the City of *Muſcow*, notice of it, but they waited upon him in a Body, inviting him to honour them with his Preſence at *Amſterdam*. It was upon their intreaties, that he came ſome Days before the arrival of the Embaſſy from *Sardam* to that City, where the Magiſtrates had, in the mean while, made all poſſible preparations for their reception; a good number of Cannons were planted on the Baſtions near the *Amſter-Gate*, through which they were to enter; a good number of the Young Gentlemen of the City were mounted on Horſe-back, and a much greater number went out in Coaches, to meet their Excellencies at the place where they were to land, being not above an *Engliſh* Mile from thence.

The 3 Ambaſſadors entred the City under the diſcharge of the great Cannon, in the firſt Coach, belonging to one of the Chief Magiſtrates; in the ſecond were the Deputies of the States; and in the following a good number of Gentlemen, among whom it was ſaid, was the *Czar* in Perſon, to be a Spectator of this ſolemn Entrance. The Cavalcade marching before the Coaches, conſiſting firſt in a Body of Horſe, who led the Van, theſe were followed by the Trumpets belonging to the City, and theſe by ſome *Tartars* arm'd with Bows and Arrows, and ſome *Muſcovites* on Horſe-back; after theſe came 20 Pages magnificently clad in Scarlet Coats trim'd with broad Silver Galoons, and went on foot next before the Coach in which were the Ambaſſadors, which was attended on each ſide by 12 Guards, being all very luſty and well made Fellows, dreſs'd in Caſſocks and Cloaks of Scarlet Cloth, trim'd with Silver Buttons, and Plates of the ſame Metal on both ſides, after the *Sclavonian* Faſhion; all which, together with their Silver Hatches, and large Scymetars, (the Handles of which were alſo of Maſſy Silver) made a very glorious appearance; they being follow'd by a good number of Footmen dreſs'd alſo in Scarlet trim'd with Silver Galoons.

The General *La Fort* was that Day dreſs'd after the *French* Mode, but the other two Ambaſſadors after the Faſhion of their own Country.

Thus they march'd in good order towards the Houſe call'd *The Lord's Lodgings*, fitted up at that time on purpoſe for the reception of theſe Ambaſſadors, and taking a circumference through ſome of the beſt Streets of the City, were attended by an incredible number of Spectators, who were crouded thither from all the circumjacent parts, to partake of the diverſion of this ſolemn Entrance, and the Fire-works that were prepared for their Entertainment. This Fire-work was made upon the River *Amſtel*, and fix'd upon flat-bottom'd Boats, in which was, among other things conſpicuous, a Triumphal Arch, of the *Corinthian* Order; but as this Fire-work could not be ſeen from the Ambaſſadors Lodgings, they were conducted thence at Night to another Houſe, from whence they had a full view of it, and were entertain'd there with a moſt ſplendid Collation, which his *Czariſh* Majeſty being pleaſed to honour with his Preſence, this was the firſt time that many there preſent had an opportunity of taking a full view of him. He is very tall, and well made, of a very good Aſpect, and tho' his Eyes, which are black and lively, ſhew ſomething of fierceneſs, eſpecially when he talks with ſomething of eagerneſs, yet is his whole behaviour full of Complaiſance and very engaging, being very affable in his Converſation, and always deſirous to be entertain'd with ſomething or other, worth his Obſervation.

The Fire-works prepared for his Diverſion having had the deſired effect, (tho' not without the loſs of ſome People, who thronging over a Bridge of the *Amſtel*, were unfortunately drowned, by the breaking of one of the Iron Rails, belonging to the ſaid Bridge.) The Deputies of the States came the next Day to ſhew him the Magazines of Naval Stores of *Amſterdam*. I happened not to be preſent at that time, but have it from very good Hands, that the Lords Deputies were ſurpriſed to hear him diſcourſe ſo pertinently of thoſe Matters, of which they ſuppoſed him to have but a very ſuperficial knowledge; and to ask with ſo much exactneſs concerning thoſe that were not as yet come perfectly to his knowledge.

A few days after his *Czariſh* Majeſty made a Progreſs to *Utrecht*, where he had an interview with his *Britannick* Majeſty, and this being the firſt betwixt theſe two great Princes, they received one another with ſuch mutual demonſtrations of reſpect and eſteem, as is ſcarce to be expreſs'd.

The Ambaſſadors continued near 2 Months at *Amſterdam*, for his *Czariſh* Majeſty, being reſolved that upon this occaſion they ſhould appear at the *Hague*, with all imaginable Splendor ſuitable to his Grandeur, abundance of time was taken in preparing their Equipage, augmenting their Train, and eſpecially in providing themſelves with three magnificent Coaches; which done, they ſet out for the *Hague*, where they were received with all the Honour due to their Characters, and ſome days before their Publick Audience, were follow'd *incognito* by his *Czariſh* Majeſty, who appear'd like a Cavalier, dreſs'd in a blue Coat, a light Wig, with a white Feather in his Hat; he went in the Coach of Burgermaſter *Witſen*, who being in peculiar eſteem with this great Prince, accompany'd him thither.

This happening in the Month of *September* 1697. when there was an incredible concourſe of Perſons of all Ranks at the *Hague*, by reaſon of the Treaty of Peace then on foot at *Reſwick*, this added no ſmall luſtre to this great Embaſſy, which was one of the moſt magnificent that ever appear'd in thoſe Parts.

General *La Fort*, the firſt Ambaſſador, was that Day clad in a *Muſcovite* Robe of Cloth of Gold, lin'd with the moſt precious Sables that ever were ſeen, his Veſt being all covered with Diamonds be-

fore, and having on his Bonnet a Bunch of Diamonds of an incredible value; he harangu'd their High and Mightinesses in the *Russian* Language, as did the two other Ambassadors (who were also magnificently Apparel'd) after him; but what is most worth taking notice of is, that his *Czarish* Majesty was placed in a Private Room looking into the Hall of Audience, from whence he was an Eye-witness, not only of the Reception of his Ambassadors, but also could with ease have a full view of all the Ambassadors of the Foreign Princes, sent to the Treaty of *Reswick*, who were present at the Audience of this Embassy. He return'd the next Day streight to *Amsterdam*, and was soon after follow'd by the Ambassadors, who had no other business at the *Hague*, than to renew the Alliance made betwixt their Master and the States, it being beyond all dispute, that the only aim of this so splendid an Embassy was, to shelter the *Czar*'s Journey under this specious pretence, and the design he had of being informed of what he thought most worthy his Private Observation in those Parts, through which they were to pass. Of this he gave a manifest proof; immediately after his return from the *Hague*, when he desired the Magistrates of *Amsterdam* to provide for himself, and some few of his Retinue a Private Lodging in the most remote part of the City near the Harbour, which they did accordingly, near the Store-house belonging to the *East-India* Company, from whence he could see all what pass'd in or out of *Amsterdam* on that side. Whilst he was there he pass'd his time chiefly in attaining to a perfect knowledge of all things relating to building of Ships, and the manner of Bombarding Maritime places, from the Sea-side; unto both which he attained in a very short time, being not only very inquisitive as to all these matters, but also industrious to lay his hand to work, which he would do with an incredible dexterity, he having been seen to handle the Hammer and Ax as well as some of the best Ship-Wrights; I my self have seen two pieces of his own Handy-work, *viz.* a small Frigat about 4 foot long, with all her Tackle, and a Wind-Mill.

Scarce were the Ambassadors come back from the *Hague*, but his Majesty received advice of a smart Engagement betwixt his Army near *Asoph*, under the Command of the *Knez Schein*, and the *Crim Tartars*. These last having found means to pass secretly through the Streights of *Caffa*, and being joyn'd by the *Tartars* of *Circassia*, especially those inhabiting near the River *Cubansky*, had taken a resolution to surprise the *Muscovites*, whom they knew to be divided into several Bodies, for the better conveniency of their Quarters, and covering the Work-men near and about *Asoph*.

They marched forward with long marches under the Command of *Sultan Galga*, yet not so secretly, but that General *Schein* having got intelligence of it, had time enough to draw his Troops together, and to expect them in his Camp.

The *Tartars* finding themselves much Superior in number, made no difficulty of attacking the *Muscovites* in their advantagious Post, who sustain'd the Attack without stiring from their Camp, till seeing their first fury spent, they attack'd them so briskly, that they put them to flight, with the loss of a considerable number of *Tartars*, that were left dead upon the spot, besides those drown'd in the River of *Kalgalnick*, which falls two Lgs above *Asoph*, into that of *Circassia*, which our Geographers place on the North side of the River *Don*, and 30 Lgs from *Asoph*.

The Ambassadors celebrated this Victory with a very splendid Feast, which his Majesty was pleased likewise to honour with his Presence.

Towards the end of *Autumn* he received the News of a second Victory obtained by his Forces near the River *Boristhenes*. The *Crim Tartars*, in conjunction with those of *Budziack* and *Okzakow* had laid Siege to the Castle of *Czikermean*, situate upon the before-said River, and having made themselves Masters of the Isle of *Tomàn*, which lies just opposite to it, were advanced to the Walls of the Place, which was in danger of being lost in a few Days; but the *Muscovites* being joyn'd by a good Body of *Cosacks*, so vigorously attack'd the *Tartars*, that they were forc'd to quit the Siege, and soon after were also beaten from the Island, which his *Czarish* Majesty ordered immediately to be strengthened by erecting a regular Fort upon it. By the same Express he received advice, that the Harbour we spoke of before, about 7 Lgs from *Asoph*, was brought to perfection, and that already above 10000 *Muscovites* had settled there, no other Nation being permitted to live in that Place, unto which the *Czar* gave the Name of *Petruchina Tuba*. It was not long after that his *Czarish* Majesty received an Express, who brought the agreeable News, that all the *Circassian Tartars* had submitted voluntarily under his Protection, and that the *Crim Tartars* inhabiting near the River *Miras*, had been subdued by his Forces, who were erecting a strong Fort, at the Mouth of the said River, to secure the Road thereabouts.

The *Czar* being now desirous to take a view also of *England*, before his return into *Muscovy*, his Majesty of *Great Britain* was no sooner advertised thereof, but he sent a Squadron of Light Frigates to conduct him thither; he went accompany'd only with 12 or 15 of his Domesticks, and was received by his *Britannick* Majesty with the greatest Marks of Esteem that could be express'd; but the *Czar*, who continued in his Resolution of remaining *incognito*, was obliged to refuse those publick honours his Majesty intended for him, chusing rather to take up his Quarters in a Private House, at some distance from *London*, near the River side, where he had the conveniency of pursuing without interruption, his main design of making observations concerning the manner of building their Ships.

Before he left *England*, he was entertain'd near *Portsmouth* with a Mock Engagement at Sea, betwixt two *English* Squadrons of Ships, to his exceeding great Satisfaction; I had forgot to tell you that something of that Nature was shew'd him before near *Amsterdam*, betwixt some Yachts divided into two Squadrons, and that he was very curious in enquiring after every thing relating to each particular of a Sea-engagement.

Being upon his departure out of that Kingdom, the King presented him with a very fine Yacht, carrying 30 Guns, which the *Czar* sent straight to *Archangel*, and he returned to *Amsterdam*, where, after a small stay, he prepared for his Journey into *Muscovy*; which some at that time attributed to a commotion of the *Strelitzes*; true it is, that some of this Mutinous Gang had raised some disturbances in the circumjacent places of *Muscow*; but, as they were soon dispersed by General *Gourdon*, and the Ring-leaders punish'd with death, this had no farther ill Consequence.

When the Ambassadors took leave of the Magistrates of *Amsterdam*, these declared their readiness to give the utmost publick demonstrations they were capable of, to a Prince who had honoured their City for six Months with his Presence, but the *Czar* desired them not to disturb his design, which was to depart privately for the Imperial Court at *Vienna*.

You know, Sir, with what Lustre this Embassy was received at this Court, and what infinite respect and honour was paid to this Prince by his Imperial Majesty, and the reason of his so sudden departure. You remember that *Pristaff Bogdanowitz Wolnitzin* was left there as the *Czar*'s Plenipotentiary to assist at the Conferences which were then on foot, about the Treaty of Peace with the *Turks*. He took his way through *Poland*, and after an Interview with that King at *Limberg*, return'd into *Muscovy*, where he was received with the general Joy and Satisfaction of his Subjects.

CHAP.

CHAP VII.

A Journal of an Embaſſy from Their Majeſties Iwan *and* Peter Alexiowitz, Czars *of* Muſcovy, *&c. over Land into* China, *through the Provinces of* Uſtingha, Siberia, Dauria *and the* Great Tartary *to* Peeking, *the* Metropolis *of* China, *by* Everard Isbrand, *their Ambaſſador, in the Years* 1693, 1694. *and* 1695. *Collected by* Adam Brand, *Secretary to the ſaid Embaſſy, and Tranſlated from the* High-Dutch *Original, Printed at* Hamburgh, 1698.

1693. THE Moſt Serene and Illuſtrious Princes, *Iwan* and *Peter Alexiowitz*, Emperors of *Muſcovy*, having reſolved to ſend an Embaſſy to the Great *Amologda Chan* (or *Chineſe* Emperor) they choſe *Everard Isbrand*, a Native of *Gluckſtad* in the Dukedom of *Holſtein*, to diſcharge ſo important a Truſt.

The Embaſſy ſets out from *Muſcow*. Accordingly he ſet out from *Muſcow* the 13th. of *March*, with a Retinue of 20 Perſons, and travel'd the 14th. to *Troitza*, above 60 *Engliſh* Miles from *Muſcow*, reſembling by its bigneſs and ſtrength rather a great Caſtle than a Monaſtery.

The 16th. we continued our Journey to *Peroſlaw*, a large City ſituate on a Lake 60 Miles from *Troitza*, and famous for the many Salt Pits thereabouts. Thence we travel'd forward the 17th. to the City of *Roſtoff*, the Capital of the Province of the ſame Name, ſeated upon a Lake, whence ariſes the River *Cotorius*, which diſcharges it ſelf into the River *Wolga*. This City is dignified with the Title of an Archbiſhoprick, who reſides here in the Caſtle which is of Wood after the *Muſcovite* Faſhion.

The 18th. we went on to *Jeroſlaw*, the Capital City of the Province, unto which it has given its Name; it is one of the largeſt Cities of all the Empire, and famous for its Traffick, eſpecially in *Ruſſia* Leather, which is dreſs'd here better than in any other part of *Muſcovy*. The Province is extreamly fertile, and was as well as the Province of *Roſtoff* appropriated as an Appennage to the uſe of the Younger Branches of the Imperial Family, who enjoyed it for a conſiderable time with the Title of Princes, till that noted Tyrant *Iwan Baſilowitz* diveſted them of it, and forced them to reſt ſatisfied with a certain yearly Allowance.

We ſtay'd here the 19th. for our Baggage, but ſet forward again the 20th. and came about Mid-night to the City of *Wologda*, ſeated upon a River which has given it its Name, 180 Miles from *Jeroſlaw*. All the Country through which we paſs'd from *Muſcow* to this Place, is ſo populous, that there ſcarce paſs'd a Day, but we ſaw 14 or 15 large Villages or Towns. The River *Wologda* runs from the W. to the N. till it joins its Waters with the River *Dwina*.

The 22d. the Weather being again turn'd to Froſt, we continued to make uſe of our Sledges, and came the 23d. to *Skuskajam*, where being furniſhed with freſh Horſes, we went forward after Dinner upon the River *Sucagna*, (the ſame upon which the Merchants of *Wologda* go to *Archangel*.)

The 24th. we changed again our Horſes at *Tetma*, and came the next Night to *Uſgorndiſtno*, but meeting here with freſh Horſes again continued our Journey all Night, and the following Day being the 26th. of *March*, to the Village of *Bobroſtskajam*; we went forward the ſame Night again, after a little Refreſhment, and arrived the 27th. being the firſt *Eaſter* Holy-day, in the City of *Uſtingha*, the Capital City of the Province of the ſame Name, ſeated upon the Bank of the River *Sucagna*, being a large and populous Place, its Trade conſiſts chiefly in Furs and Skins, eſpecially in thoſe of white Foxes.

The 29th. of *March* we came to *Lolgwitzgoth* upon the River *Witlzeyda*, which joyning its Current with the *Dwina*, the *Ruſſians* travel hence in ſix Days to *Archangel*; we travelled that Day 50 Miles through a vaſt Foreſt, which is counted by the Inhabitants to be 800 Miles in length, and is inhabited by a peculiar People called the *Sirenes*, different from the *Muſcovites* both in Language and Manners, but profeſs the *Greek* Religion. We participated in thoſe Places through which we paſs'd, of the Rejoycings which are made by the *Muſcovites* during the *Eaſter* Holy-days, when they preſent one another with potch'd and boil'd Eggs, and when they meet, ſalute, and ſay theſe words, *Chriſto wos Creſt*, i. e. *Chriſt is riſen*, whereat the other anſwering, *Wois teneros Chreſt*, i. e. *he is certainly riſen*; they kiſs one another, not excepting even the Ladies. Our Journey for ſome Days after proved very troubleſome, by reaſon of the many Rivers, eſpecially the *Siaſella*, the *Chatim*, and *Naſtim Reris*, which we were forced to paſs, the Ice being ſo weak, that our Sledges often fell into the laſt of theſe Rivers. 1693.

Having recovered our ſelves a little from our paſt Fatigues, we purſued our Journey to *Sligorod* upon the River *Kama*, where we arrived the 6th. of *April*. Here the *Czar* keeps a good Garriſon, to keep in awe the *Sirenes* and *Coſaques*. Of the laſt the then Governor of the Place *Iwan Mikielowitz Lopugin*, told us, how that in 1690. 300 of them had the boldneſs to ſurprize the Town by Night, killing all they could light on, till the Governor having taken the Alarm, they were chaſed thence, but under ſhelter of the darkneſs of the Night, eſcaped with a great part of the Booty.

Our Sledges being by this time rendred uſeleſs, we were obliged to ſtay here for the melting of the Ice till the 23. of *Apr.* when Embarking upon the River *Kama*, we had a Proſpect of ſeveral Mountains on both ſides, but very few Villages. The River *Kama* running with a rapid Current from the N. E. exonerates it ſelf on the left ſide of the City of *Caſan*, into the River *Wolga*, being encreaſed by the way by ſeveral leſſer Rivers, and among the reſt by the *Wiſetzca*, which joins with it about 25 Miles from *Solokamsko*. In bigneſs it is much the ſame with the River *Weſer* in *Germany*.

The 26th. we left the River *Kama*, ſteering our Courſe to the River *Uſolsko*, whence we had ſeven Miles to *Solokamsko*, but did not arrive there till the 27th. the Stream being againſt us. This City is built in a pleaſant Plain upon the ſaid River *Uſolsko*, for the conveniency of Travellers; its Inhabitants are partly *Ruſſians*, partly *Tartars*; their Traffick conſiſts in Cattel, but eſpecially in Horſes, which are very excellent hereabouts. This Country is full of Salt Pits.

The 29th. of *April* one of our Retinue, a *Muſcovite* by Birth, being got drunk with *Aqua Vitæ*, had the misfortune to be drowned, and the 2d. of *May* the Ambaſſador, with part of his Retinue were invited by one of the *Czar*'s Factors, named *Alexi Aſtaſſi Philatiff*, to his Country Houſe 20 Miles from *Solok*, whereabouts we ſaw above 20000 Men employed in making of Salt; and the Factor ſhew'd us two Veſſels belonging to himſelf of 400 Tuns each, and Man'd with 500 Slaves a piece, who relieving one another without intermiſſion, at the Oars, perform their Voyage to *Caſan* (whither they carry Salt) in a little time.

The 3d. and 4th. it beginning to freeze again, we were obliged to ſtay here 7 Days, and being by the melting of the Snow diſappointed in our deſign of going by Land to *Wergaturia*, the firſt place upon the Frontiers of *Siberia*, we made uſe of 8 Boats, which carried us as far as *Uskogorod*, but ſcarce were we

got

1693. got within ſight of the Place when the Wind turn'd ſo violently againſt us, that it forced us back down the River *Uſolsko* into the River *Kama*. From *Solokamsko* to *Wergaturia*, is accounted 50 *German* Lgs, but from *Solokamsko* to the ſmall River *Suſowa* (which we entred the 16th.) no more than 30 Miles, and 40 more thence to *Ulko*. Our Paſſage here was not without danger, by reaſon of the overflowing of the River, however we arrived ſafely the 19th. in a ſmall City called *Nieſna Suſowa*, and the 20th. came to another ſmall Town, the Inhabitants of which live chiefly by making of Salt. The Hills and Woods which are on both ſides of this River, afford a very agreeable Proſpect, and in the laſt you find great ſtore of the *Agaricus* Tree, whoſe ſpongeous Subſtance is hence carried to *Archangel*, and ſo further into other parts of *Europe*.

The 25th. we took up our Lodgings in one of the Villages, of which there are ſeveral on both ſides of this River, and whilſt we were refreſhing our ſelves here for ſome time, took the opportunity of enquiring into the Nature and Manners of the Inhabitants of thoſe Parts. They are known by the Name of *Wogultzoi*, and ſubject to the *Czar* of *Muſcovy*. They are all *Pagans*, in Stature not unlike the *Tartars*, but differ in Language both from them and the *Muſcovites*. As to their Faith, they told us, that they believed a Creator of the Univerſe, who reſided in Heaven, and unto whom they paid a great Veneration; but notwithſtanding this, they adore the Heavens, Sun, Moon, and Water, unto which they Sacrifice Horſes, Cows, and Calves, and expoſing their Skins ſtretch'd upon a high Pole, they worſhip them, and eat the Meat afterwards. They know not any thing of Baptiſm, but name their Children after ſome of the moſt ancient Perſons in the Village. Their Dead they interr with their beſt Acoutrements, it being their Opinion, that at the time of their Reſurrection (which they believe, but after a very ſimple manner) they ſhall appear in the ſame Garb they were buried in. They obſerve no Faſts, yet do they abſtain from Fowl, but eat the Eggs as a great Dainty.

The Wogultzoi &c.

If a young Man intends to Marry, all his Courtſhip conſiſts in making the Bargain with her Father, to get her as cheap as he can, ſometimes for 40, ſometimes for 50 *Rubles*, amounting to betwixt 20 and 30 Pounds *Sterling*. The Money being paid, the Bride is carried veil'd to the Bridegrooms Bed-chamber. After they have diverted themſelves the firſt Night, their Friends and Relations come the next Day to make merry with eating, drinking and dancing all the next following Night, and ſo, after having made ſome Preſents to the new married People, they part. Their Child-bearing Women have a peculiar way of retiring into the Woods, when the time of their Delivery approaches, where they ſtay for 2 Months after, their Husbands being forbidden, under pain of death, not to come there during that time, being perſuaded that there are certain Deities reſiding in thoſe Foreſts, who as they preſerve the Women during their ſtay here; ſo they would certainly puniſh with death, ſuch Husbands, as ſhould preſume to meddle with their Wives, whilſt they are under their Protection.

We happened to be preſent at the Burial of one of their Dogs, who having been a good Hunter, they bemoaned his death with moſt dreadful out-cries, and having ſpoken much in his Praiſe, they put him into a Grave dug for that purpoſe, with a piece of Wood inſtead of a Pillow, under his Head; beſides which they erected a Hut near his Grave, to ſerve as a Monument of their gratitude for the ſervice he had done them. We were credibly informed, that it is a very ancient Cuſtom among them, to reward the paſt ſervices of all their Dogs by an honourable Burial. For the reſt, their way of living is miſerable enough, for as they don't apply themſelves to Husbandry, they get their Livelihood by Hunting the Sables and Reen-Deer, the only Commodities this Country affords.

The 26th of *May* we proſecuted our Journey, leaving 2 ſmall Rivers call'd *Silva Reka*, and *Kime*, to the right of us, and the River *Seborena Reka* to the left.

The 28th. we paſs'd in ſight of *Ulko Meſowag*, and *Sallam Reka*, to the left of us.

The 29. we ſaw *Ulkoſerebrena Reka* on the ſame ſide, and the River *Doria Reka* to the left. We ſpent near 3 Weeks upon the River *Suſowa*, its Current, which was againſt us, being very rapid by reaſon of its many windings, beſides that we were frequently ſtopt by the Cataracts, or Water-falls. Coming to *Ulko*, we could not go further up the River, ſo that being forced to ſtay 9 Days, till our Land Carriages could be got ready, we ſet out the 10th. of *June* for *Neva*. 1693.

The 12th. we paſs'd through the Town of *Aſar*, ſituate upon a River of the ſame Name, and the next Day through a Town call'd *Romaſheva* upon the River *Reſh*. As the Grounds hereabouts are very fertile in Corn, and abound in People, we could not ride a Mile without meeting with a Village, where we were provided with every thing we wanted. Here we received Intelligence that the *Calmuck Tartars* had made an inroad into the next Province, which put the Inhabitants under no ſmall Conſternation here.

The 14th. we came to *Newagorod*, a ſmall, but pleaſant Town, ſituate upon the River *Neva*, which on this ſide is the Boundary of *Siberia*. The Fortifications of this Place are but in an indifferent condition, but the Country well Peopled and Cultivated. The Fields produce Roſes, Lilies of the Valley, and many ſorts of ſweet Herbs in great quantities. Our Baggage being arrived the 16th. and having received freſh Advice that the *Calmuck Tartars* having made themſelves Maſters of a certain Frontier Place, were advancing this way, we made what haſte we could to get on board our Veſſel, and after a ſtay of 7 Days at *Newagorod*, embark'd the 21ſt. of *June*, with a Convoy of 12 *Coſſacks* belonging to the Garriſon, ſteering our Courſe for *Tobolsko*. The River *Reſh* falls 5 Miles above *Newagorod* into another River, and is thence forward call'd *Niatzar*. The firſt Town we ſaw upon this River on the 22th. is call'd *Rudna*, and not far thence is another called *Nigniske*, both ſituate in a very fertile Country.

The 23d. we paſs'd by 3 very goodly Towns call'd *Jebitzko*, *Kerginskoi*, and *Suberara*; and the 24th. the Town of *Jalen*, near which this River joyns its Current with the River *Kira*. The ſame Evening we ſaw at ſome diſtance the Town of *Kouſna Hobod* and the 25th. at Mid-night came to the City of *Tumen*, being a large and well fortify'd Place, inhabited for the moſt part by *Tartars*, who are a liberal and well civilized ſort of People, by reaſon of their conſtant converſation with Strangers, by way of Traffick. The next Town we got ſight of, was call'd *Makowa*, ſeated upon the very Confluence of the Rivers *Paſhma Reka*, and the *Tura*, which waſhes the Walls of the City of *Wergaturia*, and the 20th. reach'd *Lutzka*, ſituate at the Confluence of the 2 Rivers *Tura* and *Tobol*.

The 29th. we paſs'd by *Pikda*, *Reka*, and *Turba Reſca*, leaving the 30th. the River *Taſda* to the left of us, arrived the 1ſt. *July*, in the City of *Tobolsko*, the Capital of all *Siberia*, ſituate 3000 Miles from *Muſcow*, not far from the River *Tobol*. It is ſeated upon a large Hill, the Suburbs are inhabited by *Tartars*, and the City by *Ruſſians*, near which the River *Toriſh*, mixes its Waters with the River *Tobol*. Their chief Traffick here conſiſts in Sables, Ermins, Fox-skins, and ſuch like. *Siberia* is full of large Rivers, but the *Oby* challenges the preference before the reſt, being in ſome places half a Lg, in other places a Lg broad, and abounding in Sturgeons, *Belluia*, or *White Fiſh* and others. It has many Iſlands, but are uninhabitable by reaſon of the thick *Woods*.

The Chief Cities of *Siberia*, are: *Wergaturia*, *Japahzeen*, *Tumen*, *Tobolsko*, *Narim*, *Tomskoy*, *Koſnezi*, *Kraſnojer*, *Ker*, *Jenokinsko*, *Ilim*, *Mongaſſy*, moſt of which are very large and populous Places. The *Tartarian* Natives bordering upon *Siberia*, are the *Calmuck* and *Mongul Tartars*, beſides, the *Tungoskoy*, *Bratzkoy*, *Oſtiacky*, and *Barrabinſy*, being certain *Tartarian* Hords, differing in their Languages, and under the Juriſdiction of their own Chieftains.

The Natives of *Siberia* are for the moſt part *Pagans*, but the Cities are fill'd with *Ruſſians*; it was *Ozana John Baſilowitz*, who brought the Kingdom of *Siberia* under the *Muſcovite* Juriſdiction; after the Conqueſt of the *Tartarian* Kingdoms of *Caſan*, and *Aſtrachan*; ſince which time they pay a yearly Tribute of 200000 Rubles, *per Annum*, in Sables, Martins, Fox-skins, *&c.* They catch the Sables in Traps, not unlike our Mice-traps, tho' they have alſo another way of hunting of Sables, by the means of Sledges drawn by Dogs, of which more anon; the *Czar* has the 20th. of all the Sables that are catch'd. We were forced to ſtay for ſome time at *Tobolsko*, to make the neceſſary Preparations, of Proviſions, Forage, and other neceſſaries to be put on Board our Veſſels, enough to ſerve for 3 Months; from hence to *Jenokinsko*, being 600 Miles through a deſolate Country.

The

The 22d. *July*, we embark'd aboard our Veſſels, under a Convoy of 20 Muſqueteers, ſteering our Courſe towards *Jenokinsko*, upon the River *Irtiſh*.

The 24th. we paſs'd by the Town of *Dernjan*, near which the River *Dernjansko* falls into the *Irtiſh* on the right hand; The Inhabitants hereabouts are call'd *Oſtiaky*, of whom more anon.

On the 28th. *July*, we came to the Town of *Samurskojam*, where we ſtay'd till the 29th. in the Morning, when embarking again, we had ſcarce made 2 Miles upon the River *Irtiſh*, but we paſs'd into another leſſer one, which being a Branch of the River *Oby*, we were forced to be towed as againſt the Streams, till the 1ſt. *Aug.* when we entred that famous River, which riſes to the S. W. among the *Calmuck Tartars*, and exonerates it ſelf into the *Tartarian Sea*; it is very boiſterous, by reaſon of the many Rocks, which makes its paſſage alſo very dangerous, they Travel by the way of the Rivers *Oby*, and *Ketto* to *Jenokinsko*.

The 6th. of *Aug.* we came to the City of *Surgut*, there being a Garriſon of *Muſcovites*, we had a new Convoy of 1600 Men alotted us as far as *Narim*. Here abouts you ſee nothing but a deſolate Country, the Inhabitants of which are Miſerable Wretches, who ſpend their Days in Sable hunting. They either ſhoot them with Arrows, or elſe they make Fire under the Trees, where they know the Sables are, ſo, that being ſuffocated by the Smoak, they die, and are catch'd. The Ermins, they catch in Traps, and Foxes with Dogs.

We re-imbark'd the 9th. and the 13th. ſaw the River *Wache* to the left of us, on the 19th. the River *Tim*, and arrived the 24th. at *Narim*, a City ſeated on the left ſide of us, upon the River *Oby*. From *Tobolsko* to *Narim*, they don't make uſe of Horſes for their Carriage in the Winter time; but inſtead of them, they put 3 or 4 Dogs before a Sledge, and manage them as we do our Horſes. When they go abroad a hunting, they put their Proviſions and Tackle, ſuch as Bows, Arrows, Darts, *&c.* in theſe Sledges, and ſo go to their Rendevouz, which being ſometimes 14 or 15 days Journey off, they don't return in three Months. The *Oſtiaky* make uſe of theſe Sledges drawn by Dogs, when they go abroad a Fiſhing. Being provided here with new Barge-men, and a Convoy of 24 *Coſacks* to Conduct us to *Jenokinsko*, we re-imbark'd the 25th. *Aug.* upon the River *Oby*, but left it the 29th. when we entred the River *Ketto*; where having the Current againſt us, we ſpent above a month, before we could reach *Mokuskoy*, whence we continued our Journey by Land to *Jenokinsko*. On both ſides of the River *Ketto*, are abundance of *Cedar*-Trees.

The 1ſt. *Sept.* we came to a ſmall Town call'd *Kerskoy*.

The 16th. it having frozen very hard, we were put under no ſmall Conſternation, for fear of periſhing in a deſolate Country, deſtitute of all manner of Subſiſtence, if it had continued, but a very welcome Thaw having ſoon freed us of this Danger, a favourable Wind carried us againſt the 28th. as far as a Monaſtery, ſeated upon the very Banks of the River, where having repoſed our ſelves for ſome few days, we kept a day of Thankſgiving.

2d. *Octo.* We ſet ſail again, the ſame Evening, and paſs'd by a ſmall Village; thereabouts we ſaw abundance of Red and Black Curran-Trees, which made us believe that the grounds hereabouts were none of the worſt.

The 7th. *Octo.* we at laſt got ſafe to the ſmall City of *Mokuskoy*, where we met with a cool Draught of good Beer. Here we alſo interr'd the Body of one of our fellow Travellers, who dyed ſome days before, being a *German* born at *Goldingen* in *Sileſia*.

After we had refreſh'd our ſelves, after our paſt Fatigues, we ſet out from hence, 10th. *Octo.* in order to purſue our Journey by Land; For 2 Days and Nights together, we ſaw nothing but moſt dreadful Foreſts, and the 12th. came to *Jenokinsko*, where we made our publick Entrance with a great deal of Magnificence.

This City, which is ſeated upon the River *Jenska*, a River very convenient, both for Navigation, and the vaſt plenty of Fiſh it affords. Betwixt this City and *Tobosko*, the *Oſtiaky* have their Habitations. Theſe People are very mean of Stature, and deformed in their Features; beſides, that both Sexes are ſubject to Diſtempers of the Eyes, which is chiefly Attributed to their want of bread, inſtead of which they eat dry'd Fiſh, wherewith the River *Oby* furniſhes them in vaſt Quantities, they ſold us abundance of them, whilſt we were yet upon that River, but refuſed our Money, begging to give them inlieu of it ſome Salt, Bread and Tobacco, which we did. Walking one Day a long the Banks of the River *Ketto*, we ſpy'd ſome of their Huts, and among the reſt, one ſomewhat bigger than the reſt, which raiſed my Curioſity to go and take a view of it, having ſoon got leave of the Owner, by means of a preſent of Bread and Salt, I entred without any further Ceremony, and found 3 Women lying upon the Ground, who at the ſight of me aroſe, and by their Geſtures ſufficiently teſtify'd their Diſpleaſure, but as I had ſecured the Owners good Will, I went forward, and took a view all over the Hut; I was afterwards told that theſe were the Wives of certain of their Chiefs or Princes, but their Equipage appear'd little ſuitable to their Quality, there being nothing worth mentioning in the Hut, except their *Sheitan* or Domeſtick Idol; which was of Wood, about a yard long, of a moſt dreadful aſpect; for its head being covered with a Tin or Iron Platte, appear'd as black as a Chimney ſtock, occaſioned by the Incenſes they offer to it, beſides, that its Garment was nothing elſe but a heap of Woollen Rags patch'd together, of all ſorts of Colours. They are very heavy and lazy Fellows, which we found by our Experience, whilſt we were upon the River *Sergutt*, which is the reaſon they never go abroad a hunting, unleſs forced thereunto by an abſolute neceſſity, and that they change their Habitations ſometimes 14 or 15 times a year, to put themſelves out of the reach of Travellors, who coming that way and oblige them to work at the Oar againſt their will.

The Ambaſſador being in good humour, ordered one of his Servants to bring forth a wooden Drummer, which being moved by Clock-work within, beat the Drum, and made ſome other motions. The *Oſtiaky*, were at firſt ſight ſo ſtartled at it, that they run away, but having recollected themſelves, turn'd back, and having taken a full view of it, proſtrated themſelves before this Wooden Drummer, in the ſame manner as they do before their *Sheitan*. A wooden Bear was alſo brought in made after the ſame Faſhion, and, beating the Drum with his Forepaws, they pay'd him the ſame Worſhip, but were moſt taken with the Drummer, which they beg'd very ſubmiſſively of the Ambaſſador, offering its weight in Mony; But the Ambaſſador did not think fit to beſtow it upon them, for fear of encouraging their Idolatry.

They have a peculiar way of Devotion; for inſtead of ſaying their Prayers, they Whiſtle, clapping their Hands together, and beating their Heads againſt the Ground, nay, proſtrating themſelves before the Idols, they make ſeveral very ridiculous Motions with their Feet. We were aſſur'd, that at certain times they meet in their Huts, where they begin to Whiſtle, and make moſt horrid outcrys by intervals, till a certain Spectre appearing, foretels them the account of future things, which done, they Worſhip the Spectre, and look upon its Predictions as infallible. They alſo pay a certain Veneration to the Bear-skin, and ſwear by it, but never except upon ſome ſolemn occaſion, curſing and ſwearing being a Vice they abhor above all things, as being of Opinion, that he who ſwears either falſly or fooliſhly ſhall not proſper all that Year. Where-ever they make any Entertainment, they ſet a ſhare of the beſt diſh before the *Sheitan*, which if they ſhould not do they believe, that the Victuals they eat, would turn to Worms in their Bowels; and if they ſhould take it away again, they believe they ſhould be puniſh'd with Lameneſs.

Their Cloathings are made of the Skins of Beaſts, with the Fur on the outſide; but in the Summer they wear only the Skins of Fiſhes. Their Huts are made of the Barks of Trees. We alſo made this farther Obſervation, That ſome have their Idols of Wood, ſome of Lead, and others of Braſs, and ſome dreſs them in Sables, others only in Rags, according to their Abilities. For the reſt, theſe *Oſtiaky* are mightily addicted to Tobacco; which they take after a peculiar manner: For having fill'd their Mouth with Water, they ſuck in the Tobacco ſmoak very greedily, and ſo ſwallow it with the Water; which is the reaſon, that at the taking of the firſt Pipe, they commonly fall down drunk, but ſoon after recover. They always take it ſtanding.

After

After a ſtay of 10 Weeks in the City of *Jenokinko* or *Jenoſſay*, we ſet forward again on our Journey.

The 21ſt. *Dec.* taking our way towards *Jokutskoy*, upon the River *Jenoka*, but afterwards leaving the ſame to the right, paſs'd with our Sledges along the River *Tungusko Reka*, or *Tonguſi*, the Boundaries of the *Tongueſes* on this ſide. After having paſs'd ſeveral Villages on both ſides of this River, we lodg'd the 30th. of *December* in the Village of *Buhutſha*, where we reſted our ſelves 24 hours, beyond it being the Great Deſart, where in 8 or 10 days Travel, you meet with not a Houſe fit for Entertainment.

The 1ſt. of *Jan.* 1693. we entred the ſaid Deſart, which proved exceſſive troubleſome to us, by reaſon of the great Foreſt, which ſpoil'd our Victuals and Drink (which was no more than fair Water) beſides, that we met with whole Mountains of Ice upon the River, through which we were forced to cut our way with Axes; However we had the good Fortune to paſs it.

And arrived the 8th. of *Jan.* at the Village of *Kaſma*, where being obliged to ſtay 13 days for freſh Horſes, we took this Opportunity, to take a view of the Habitations of the *Tongueſes*; Theſe were formerly reputed a Warlike Nation, govern'd by their own Princes, and inhabiting a very large Country, but having ſince been forced to ſubmit to the *Czar* of *Moſcovy*, they pay an Annual Tribute to him. They are, generally ſpeaking, well proportion'd and ſtrong limb'd, their Garments being nothing elſe but the skins of Beaſts, with the Furs on the outſide of divers Colours, Men and Women having not the leaſt diſtinction in their Cloaths. They have one thing peculiar to themſelves, which is, to have their Cheeks ſtitch'd (whilſt they are yet very young) with black Thread, through and through in divers Figures, ſome like Croſſes, others ſquare, or which way they like beſt, which they look upon as a Badge of Honour and Antiquity, tranſmitted to them by their Anceſtors, and retain them till their dying Day.

Their Huts are made either of the skins of Reen deer, or ſome other wild Beaſts, or of the Barks of Trees; in which miſerable Cabans they defend themſelves without any great inconveniency againſt the extremity of the Climate, being inured to cold from the firſt of their Infancy, for no ſooner are they born, but are laid in cold Water in the Summer, and in the Snow in the Winter. They are divided into three kinds or *Hords*; The firſt being call'd *Kumy Tungueſis*, who make uſe of Horſes; the ſecond *Aleany*, whoſe livelihood is hunting; the third *Sobalszy*, who have ſcarce the appearance of Men.

Their Idols are all of Wood; every one having his Domeſtick God, or Patron, one being look'd upon as the Manager of hunting, another for the catching of Sables, and another for Fiſhing, unto whom they direct their Devotions accordingly; but if theſe Idols happen to deceive them in their Expectation, they make nothing of throwing them out of Doors, till they have good ſucceſs, when they are received again, and have an offering made them of what they have catch'd. In all places, where 5 or 6 *Tongueſe* Families live together (which however is but ſeldom) they maintain by joint Conſent a certain *Shaman* or Prieſt. At their meetings, this Prieſt makes his Appearance in a habit adorn'd with the Figures of Lyons, Bears, Serpents, Adders, and ſuch like, which being made of Iron, weigh ſometimes 200 weight, whilſt he beats the Drum in a moſt doleful manner, the ſtanders by make moſt Lamentable out-crys, pretending that they ſee Apparitions under the ſhape of Ravens, and ſome other Birds, the Prieſt falling in the mean while into a Trance, is Reverenced by them as a Saint. Notwithſtanding their mean, wretched way of living, they will have ſeveral Wives, the better ſort having ſometimes 10 or 15 at a time; theſe they buy from their Parents for 10 or 15. Reen deer a piece. He that is to take a ſolemn Oath among them, is obliged to ſuck the Blood of a Dog wounded for that purpoſe with a Knife in his Fore-leg, till he dies. They neither bury nor burn their dead Corps, but hang them on Trees, where they putrifie, and Waſte at laſt. The worſt Curſe they uſe among themſelves is, to wiſh them to be forced to live among the *Ruſſians*, to till the Ground, and ſuch like.

We ſet out again from the Village of *Kaſma*, the 24th. of *Jan.* continuing our Journey for ſome time upon the River *Tonguſi*, but leaving it to the right, we paſs'd to the ſmall River *Ilim*; but theſe Rivers are well inhabited on both ſides, near the Banks.

We arrived the 25th. in the ſmall City of *Ilimskoy*, upon this River *Ilim*, being ſeated in the midſt of very high Mountains.

The 27th. we began to enter a great Foreſt, which by reaſon of the badneſs of the ways, employ'd us 3 days and nights before we could paſs it; when coming to the River of *Angara*, we paſs'd in our way by divers other Rivers of leſs note, and the 2 Iſles of *Balagansko*, and *Kamenko*, which are well peopled. It is in thoſe parts the *Boatskoy*, deſcended from the Race of the *Mongul Tartars*, have their Habitations, but are now Tributaries to the *Muſcovites*. The Country 'twixt *Jenokinsko* or *Jenoſſay*, and *Jeknitskoy* produces great Quantities of Martins and Foxes, but about *Jenoſſay* are the beſt black Foxes, the skins of which are ſold from 20 to 30 *Rubles* a piece.

We arrived the 11th. of *Feb.* in the City of *Irkutskoy*, ſeated upon the River *Angara*, where being obliged to ſtay a whole Month, we received abundance of Civilities from the Governor *Knez Jnan Petrowitz Gargaran*, and his two Sons; Here I met with a Saint of the *Mongul Tartars*, who uſed to mutter out very long Prayers, holding all the while in his Hands a long ſtring with red Coral Beads, which he told without Intermiſſion.

The Ambaſſador having the 15th. of *Feb.* diſpatch'd a Meſſenger to the City of *Naun*, on the Frontiers of *China*, to notifie our Arrival into thoſe parts, we left the City of *Irkutskoy*, the 9th. of *March*, and having ſpent the following Night in making good Cheer, with the chiefeſt of the City in an Adjacent Village, we ſet forward on our Journey the next Morning, and came the 10th. in ſight of the Lake of *Baikala*, unto which the River *Angara* owes its riſe, which was then from the City of *Irkuskoy* as far as the entrance into the Lake, quite free from Ice, and had been ſo, as they told us, all the Winter long. To it be 30 Miles from hence to the Lake, which is the utmoſt boundary of the Kingdom of *Siberia*, and is accounted four days Journey in length, but we paſs'd its breadth at this Seaſon, with Sledges in 6 hours, which is not ſo eaſily perform'd in the Summer, when the changeableneſs of the Winds renders its paſſage both tedious and dangerous.

We dined the 11th. upon the ſaid Lake, and in the Evening ſaw 6 Huts belonging to the *Brutskoy*; We found near them a dead Sheep and Goat, fix'd upon a Tree with their Heads upwards; being intended for Sacrifices made to the Heavens. Upon which occaſion I made what enquiry I could concerning their Religion, but could not get any account of it, that was ſatisfactory, except that once a year they uſed to Sacrifice in this manner, a Sheep and Goat to the Creator of the Heavens, and that they adore the Sun. They are very rich in Cattel, but eſpecially in Camels, for the Conveniency of thoſe that Travel that way to *China*. We took up our Lodgings the ſame Evening in a Convent on the other ſide of the Lake, upon the Frontiers of the Province of *Dauri*, a very large and Fertile Country.

The 12th. in the Morning we paſs'd in ſight of *Kabunia*, and *Belsko Sainko*, both ſmall Frontier Towns, pretty well fortified, to hinder the Incurſions of the *Mongul Tartars*.

The 19th. coming within ſight of *Udinskoy*, where we were received for a Mile out of Town, by the Commanding Officer there; this place, though it has not been inhabited above 6 Years, being now accounted the Chief Bulwark of the Province of *Dauria*, by reaſon eſpecially of its Caſtle, which being ſeated upon a Hill, and well fortified after the *Ruſſian* manner, has at ſeveral times repulſed the *Mongul Tartars*, who aſſaulted it. We were obliged to ſtay here 3 Weeks, to provide our ſelves with Camels and Horſes, the firſt of which we bought from 10 to 15, and the laſt at the rate of 4, 5, and 6 *Rubles* a piece; we bought alſo good ſtore of Beef, being now to Travel through the greateſt Deſart, which leads into the Country of the *Mongul Tartars*.

Accordingly we entred this Deſart the 6th. of *April*, our Caravan conſiſting of 250 Men, ſome hundreds of Camels and Horſes, and 400 Waggons, the Camels carrying about 600, and the Horſes 250 weight a piece. As the *Mongul Tartars* are frequently a broad in ſtrong Parties, we were forced to be conſtantly upon our guard, encloſing our Caravan every Night in a Circle, and placing Centinels at a convenient diſtance, to give timely the Alarum to the reſt, if occaſion required. This precaution having put them beyond a probability of doing us any miſchief, they found out another

1694. ther way to be revenged of us, by burning that ſmall Quantitiy of dry Winter graſs that was left, which for the ſpace of 3 Weeks, which we ſpent in paſſing through this Deſart, we were in great want of; ſo that we ſaw great numbers of our Cattle drop for want of fother; which was very agreeable to the *Tongueſes* (certain Hordsof which inhabit here-abouts) who look upon Horſe-fleſh as the beſt dainty in the World. Theſe *Tongueſes* are of the ſame Religion with the *Bratskoy*, they burn with the dead Corps of their Friends all their beſt moveables, and if they happen to become quite decrepit before they die, they burn them upon a high Mountain, and impale their beſt Horſe near it.

The 24th. and 25th. of *April*, we paſs'd in ſight (to the left of us) of the Lake of *Jerawena*, being 20 miles long, and 15 broad; which furniſhed us with abundance of very good Fiſh.

The 26, we came to a place call'd *Jerawena*, there we recruited our ſelves with as many Horſes as we could purchaſe for Money. The Deſarts about *Jerawena*, afford the beſt Sables, of which we bought ſome from 8 and 10, to 20, 30, and 40 *Rubles* a pair. The *Coſacks* who inhabit at *Jerawena*, make uſe of Scates, when they go out a hunting, and ſometimes don't return in 3 or 4 Months.

On the 28th. of *April*, we proſecuted our Journey through the Deſart, which had here and there ſome Woods.

The 29th. we croſs'd the River *Uda* on Horſe-back, which ariſing from a great Lake, is not above 3 fathoms broad in this place. As we loſt every Day more and more Horſes for want of fother, which had been burnt by the *Mongul Tartars*, the Ambaſſador ſent out 10 arm'd Men, in queſt of Horſes, who had the good Fortune to get a good number of freſh Horſes, which they brought to us.

The 3d. of *May*, near the Lake call'd *Schack's Oſer*, and is 4 Miles long and 2 broad, we alſo by great good Fortune met with ſome fother in this place, which made us tarry here till the 5th. when leaving the Lake to the left, we went on to another Lake, in ſight of which we paſs'd the 6th in the Morning, and the ſame Day before Night, reach'd the end of this Troubleſome Deſart, in which we had ſpent near a Month.

The firſt place we came to is call'd *Plotbus*, near a ſmall River, named *Skieta*, it contains not above 6 Families, and theſe having not been ſettled there, but within theſe few years.

From *Plotbus* we continued our Journey by Water, upon floats of Wood towards *Nertzinskoy*. About a Mile from *Plotbus*, the River *Skieta* falls into the River *Ingedia*, as the River *Oxkou* does not far from thence, and is afterwards known by the Name of *Schileka*, the Rivers *Nertza* and *Argun* afterwards joining their Waters with the ſame River, out of the laſt of which ariſes the famous River *Tamour*, which exonerates it ſelf into the Ocean.

We came at laſt the 20th. of *May*, to the City of *Nertzinskoy*, ſeated upon the River *Nertza*, where there is a Colony of 6000 *Tongueſes* ſettled, under the *Czar* of *Muſcovy*'s Juriſdiction, who have fortified this place againſt the *Mongul Tartars*. The Country hereabouts has abundance of *Lucerns* and *Sables*, which being highly valued in *China*, the *Coſacks* hereabouts are very rich, as being exempted from paying any Cuſtoms there. We ſtay'd here 2 whole Months, which we ſpent in providing with Carriages and Oxen, for our paſſage through the Deſart, trading to the Frontiers of *China*; beſides, that we had a Convoy of 50 *Coſacks* allotted us, who were to Conduct us into *China*, and come back with us as far as *Nertzinskoy*.

The 18th. of *July*, when we were juſt ready to leave this City; Letters were brought to the Ambaſſador from the Meſſenger, whom, as we told you, he had diſpatch'd from *Irkuskoy*, to the City of *Naun*, on the Frontiers of *China*, intimating, that he had not been permitted to go himſelf to *Peking*, but that the Letters he brought along with him, being ſent thither, a certain Perſon of Quality was come to *Naun* with a numerous Attendance to expect the Ambaſſadors arrival. That he had been ask'd many Queſtions by the ſaid *Chineſe* Lord, which he had anſwered as he thought it moſt Convenient.

We did not ſet out from *Nertzinskoy* till the 18th of *July* in the Afternoon, and part of our Caravan reach'd the ſame Night the River *Schileka*, where we ferried over; but as this was the general Rendevouz appointed for our meeting, we ſtay'd here 3 Days for the coming up of the reſt belonging to the Caravan, which conſiſted in all of above 400 Men. Every one having his ſhare of Biskuit, Beef and Veniſon allotted him, we left the before ſaid River *Schileka*, and Travell'd for 3 days together through a vaſt, boggy Foreſt, and 3 days more through a Deſart, and then 2 days more through another Foreſt, which brought us to the River *Samur*, which falls into the *Schileka*. We were quartered in the Night time in Tents, of which we had brought 50 along with us. Theſe ways are only paſſable for Camels, and Horſes, the Roads being very bad and boggy, till you come to the River *Argun*. 1694.

We arrived in the City of the ſame name, the 3d. of *Octo.* where we ſtaid till the 7th. to give time to the whole Caravan to paſs that River, which is at preſent famous, for being the common boundary betwixt the 2 Empires of *China* and *Muſcovy* on that ſide, as the City of *Argun* is the utmoſt Frontier place of the Province of *Dauri* as far as it is under the *Muſcovite* Juriſdiction, 'tis true, that not many years ago the Territories of the *Czar* of *Muſcovy* extended as far as the River *Yamour*, where the *Muſcovites* had erected the Fortreſs of *Albazin*, which occaſioning a War betwixt theſe 2 Nations, the *Czars* of *Muſcovy* conſidering the diſadvantage they had lay under, of making War at ſo great a diſtance, ſent *Tedor Alexiowitz* into *China*, who entred into a Treaty with them 1689. by vertue of which all the Country betwixt the Rivers of *Argun* and *Yamour*, together with the Fort of *Albazin*, was granted to the *Chineſes*.

As the *Mongul Tartars* are always roving abroad for booty, we were forced to keep a watchful Eye, where-ever we went, but as they are rank Cowards ſtood not much in fear of them. It was thought fit by the Ambaſſador to diſpatch from hence ſome *Coſacks* to the City of *Naun* upon the Frontiers of *China*, to deſire the *Chineſe* Governor to furniſh us with ſome Carriages at a place appointed for that purpoſe. The River *Denbu*, which falls into the *Argun*, is 4 days Journey at leaſt from the River *Argun*.

The 15th. of *Auguſt*, we came to the large River of *Naun*, the Banks of which being overflown by the late Rains, we could not paſs at that time with our Camels, whereas otherwiſe it is fordable in many places; however we made ſhift to tranſport our Baggage and Merchandices over floating Bridges, made of the Hides of Oxen and ſome Timber; the Horſes after they were unladen ſwiming acroſs the River.

The 23d. of *Auguſt* we came to the ſmall River *Keirar*, which exonerates its ſelf into the River *Argun* we croſs'd the ſaid River the next Day on Horſe-back, and the 26th. the *Saduma*, a ſmall but Navigable River, which falls likewiſe into the River *Argun*.

The 27th. we paſs'd in ſight of the River *Gnar*, which diſcharges it ſelf into the River *Saduma*.

The 28th. we met a *Ruſſian Caravan* conſiſting of 150 Merchants, and 300 Camels in their return from *China* into *Muſcovy*; they preſented ſome *Thee* to us, which was very welcome after we had drunk nothing but Water for ſo long a time. After we had ſtay'd together 2 Days, and entertain'd one another with what we had, we travel'd 2 Days through very fertile and pleaſant Hills and Valleys, whereabouts the River *Jall* has its Source, and by degrees becomes a large Navigable River.

On the 31ſt. of *Aug.* our Meſſenger which had been ſent from *Irkuskoy* to *Naun*, reutrn'd and brought advice, that a *Chineſe Adogeda*, (or Conductor of Ambaſſadors) was arriv'd at *Naun*, and the 1ſt. of *September* another Meſſenger came from the ſaid *Adogeda*, to Complement the Ambaſſador upon his happy arrival, and brought with him ſome *Chineſe* Carriages, and a Preſent of 10 Sheep, and ſome Rice and Oatmeal. Being ſent back immediately, we continued our Journey the 2d. when we reach'd the firſt Out-guard of the *Chineſes* conſiſting of 12 Perſons. The 3d. we came to the ſecond, and the 4th to the third; theſe Scouts being placed at a certain diſtance upon the Hills, give notice by certain Signals from Place to Place, as often as they ſee any Strangers approach that way. We travel'd for ſeveral Days through ſeveral pleaſant Woods, where we ſaw abundance of Oaks, not very high, but ſpreading their Branches in a large circumference. In the Plains we ſaw Filberd Trees, not ſo high nor thick as thoſe of *Europe*, but bore a prodigious quantity of Nuts, of a much larger ſize.

1694. The first Place we came to, was upon the utmost Confines of the Province of *Dauri*, inhabited by the *Tanguts Chinois*, who are *Pagans*, subject to the *Chineses*. The *Muscovites*, as we told you having all that part of the Province of *Dauri* which lies beyond the *Argun* deliver'd up to them, by the Treaty of 1689. They are very industrious here in cultivating the Ground, which produces Oats, Barley, and Tobacco. After we had spent 3 Days more in traveling through the Desart, we came to the Village of *Satteyat*, where being met by the *Chinese Adogeda*, who had with him an Attendance of 50 Persons, he invited us to his Tent the same Evening, where he treated us with Milk-*Thee*, and some Preserves and Sweet-Meats.

The 13th. the said *Adogeda* having invited the Ambassador with all his Retinue to Dinner, he met him at some distance from his Tent, and after a mutual Salute, conducted him thither. The Dinner was served up upon a small Table, without a Table-Cloath; the Ambassador and *Adogeda* having each his own Dish, as had every one of the rest; they were fill'd with Soop and Mutton; the second Course was Pottage with a kind of Pudding in it, long and thick, shew'd like a Gut, there being no Knives or Forks to be seen, we were hardly put to it how to manage it, till we saw the *Adogeda* and some of the rest take 2 streight Sticks of Ebony Wood or Ivory tip'd with Gold and Silver at the end, and of about a quarter of a Yard long, wherewith they took it out of the Dishes, and having bit a good Mouthfull, let it drop into the Dishes again. After Dinner 2 Silver Cups full of Brandy were brought in, one for the *Adogeda*, the other for the Ambassador, which they both took off, and the rest being also presented with Porcelain Cups fill'd with the same Liquor, they were forced to take them off to the bottom, after which we had a Dish of Sweet-meats served in Wodden Dishes.

The 14th. of *Sept.* the *Adogeda* being invited to the Ambassador's Quarters, we perceived plainly that our way of Entertainment seem'd to them as strange as theirs had done to us the Day before; after Dinner the *Adogeda* being desired by the Ambassador to provide us with the necessary Carriages and Passports, he perform'd it accordingly, giving the Ambassador for his daily Allowance 2 Sheep for his own Person, for each of his Secretaries and other Gentlemen one Sheep a-piece; for the rest of the Attendance some 2, some 3, and some 4 to a Sheep, besides *Thee* and other necessaries; so that we wanted nothing but Bread, which is a scarce Commodity as well in *China* as in some other parts of *Asia*.

The Inhabitants hereabouts, as also of the City of *Nuun* 5 Miles distant thence, are *Pagans*, and worship the Devil in the Night-time with most dreadful Outcries. Their Houses are both convenient and neat, and their Livelihood consists most in planting of Tobacco.

On the 16th. the Ambassador sent to the *Adogeda* a Present of 40 Sables, 50 Ermins, 2 fine Looking-Glasses, with some other things, but it was a great while before he could be persuaded to accept of them, it being forbidden to the *Chineses* to accept of any Presents, except they make a double return.

The 21st. the *Adogeda* sent 6 Tables with Sweet-meats, and some Bottles of *Aqua Vitæ* for a Present to the Ambassador, and invited him to Dinner against the 23d. as we did him against the 24th. Our Carriages being got ready by the 29th. we took up the 2 following Nights our Lodgings near 2 Villages where we were well accommodated. For it ought to be mentioned to the honour of the *Chineses*, that they are very nice and obliging in treating of Strangers; For all the while we pass'd through the Desarts, we were never destitute of commodious Lodgings, to every place where our Stage was appointed at Night, being brought a sufficient number of Huts, with Utensils and Servants thereunto belonging, to provide every thing that was necessary before-hand. We were sure to have fresh Horses every other Day, and we were constantly guarded all the Night-time by Persons who were provided with Bells to give the alarm if occasion should require.

Our Discourse with the *Adogeda* and his Retinue often run upon Politicks, which commonly ended with the praise of *China*, enough to stun our Ears.

The chief trouble we had was the want of Water, which was commonly muddy in the Desarts, and if we happend to light of any that was good, we provided our selves with as much as our Leather Bottles would hold.

We frequently diverted our selves with Hunting, for which I was in danger of having paid dearly; for being gone out one Morning with a particular Friend of mine, to shoot some Sheep, we miss'd our *Caravan*, and roved about the Desart 2 Days and Nights, till coming within sight of some of the *Tartarian* Huts, we durst not however approach them for fear of worse treatment, but they having espy'd us, would conduct us to their Cabins, where beyond all our hopes, they entertain'd us very obligingly, and having found means to give them to understand that we belonged to the Ambassador that was coming that way, they sent a Messenger to give him notice of our being there, and that we stay'd for his coming, which we did accordingly, till the *Caravan* pass'd by that way. 1694.

The 15th. of *Octob.* we arrived near the River *Casumur*, which falls into the River *Nuun*; where having refresh'd our selves for 24 hours, we continued our Journey, and the 19th. pass'd in sight of the Ruins of several goodly Cities, the Remnants being strange Monuments, with several Figures very different from what is to be seen of that kind in *Europe*. They told us, that those places were destroy'd by *Alexander the Great*. Hereabouts we also saw divers Stone Pillars, of a very large size, which being hung with Bells, the same made a noise when moved by the Winds. Beyond these we discovered again the Ruins of some Places, and divers Figures cut in Stone, resembling Men, Women, and several sorts of Beasts. We saw abundance of Deer and Hares, and wild Sheep in vast numbers, but these last are not easily catch'd: These Desarts have also great store of Pheasants, but as they scarce ever settle upon the Boughs of Trees, but run very swift upon the ground, it is a hard matter to shoot them, but the *Talcos* which our *Adogeda* had brought along with him, knew how to catch them, and we were much surprised at the dexterity of the *Chineses*, who would with their Arrows shoot any Bird flying. We observed that as we approach'd the *Chinese* Wall, the Country was more populous; and our last 3 Days Journey, before we got sight of it, was by a Road cut very conveniently through the Rocks, in the midst of which was a very good City call'd by the *Russians Schoma Gorod*, or *Kora Katoi*. In this place we had Hogs allow'd us instead of Sheep. The Hogs in *China* have their Bellies hanging down to the ground. These Rocks being full of Tygers, Leopards and Panthers, an Order was issued that no body should go from the *Caravan*, unless they were 3 at least in Company. Having pass'd these Rocks, we had a good Days Journey to the *Chinese* Wall, the Country being inhabited by the *Mongul Tartars*, who acknowledge the *Dalaelama* for the Head of their Religion. They have their Domestick Idols, unto whom they offer a share of their Victuals and Drink.

When they bury their Dead they put a Cock upon the Coffin. We saw a certain *Mongul* Nun frequently at her Prayers, with her Beads in her Hands, who being ask'd by the Ambassador to whom she offered her Prayers? She answered; *To the same God, who being excluded from Heaven by your God, will infallibly return and put your God out of his Place, and then you will see most prodigious Alterations upon Earth.*

It was the 27th. of *Octob.* toward Evening, when we got sight of that famous and so long wish'd for *Chinese* Wall, being 4 fathoms high, and so thick that 8 Persons may conveniently ride upon it a-breast. It is computed to be 500 *English* Miles long in a streight Line, for were you to reckon the Hills, nay, vast Mountains over which it is carried, it would amount at least to 500 more. It is all along provided with Towers which are at a Miles distance from one another; Near the first Gate we entred at, the Wall seem'd somewhat decay'd, and not above a Musquet-shot thence we pass'd through another Gate, which was fortify'd in the nature of a large Bastion. We passed 2 more, these three last enclosing as many large places surrounded with Walls, unto which these 3 Gates served for Bastions. Upon the first Wall was a *Corps de Guard*, where they always keep a Guard; and at some distance without the said Gate, we saw an Out-guard of 20 Soldiers. Scarce were we got a Mile within the Wall, but we pass'd in sight of a very strong Town call'd *Galyna*, and near it we met with the first Idols of the *Chineses*; of which there is a vast number among the *Chineses*, there being not a City nor Village but what is full of Temples dedicated to those Idols which are made either of Wood or Clay, and after gilt, but of a dreadful Aspect, especially their

God

1694. *God of War*, who holds a Scepter in his Hand, and is surrounded with Drums of divers sizes, which are beaten whilst they are at their Devotion.

The 28th. of *Octob.* we pass'd by another *Chinese* City, and arrived the same Evening in the City of *Xantuning*, where, as well as in the City through which we passed we were splendidly entertain'd by the Governors, with Feasting, Musicians, and Plays, in which the Actors shew a marvellous dexterity in *Leger-de-main* and Mimicking, and are very sumptuous in their Apparel, which they change very often.

The 29th. we came to the City of *Xangukou*, where we were again diverted with a Farce in a Play-house built there for that purpose. Here I saw in one of their Temples a Goddess of Stone 128 foot high, with 700 Hands; and I observed in their Temples (of which I used to take a view very often) that their Idols were of different Shapes and Figures, of a terrible Aspect, but very magnificently dress'd. Near this City is one of the most famous *Pagan* Temples of the Empire, built upon a Rock, and near it the Monastery of *Jugangu*.

The 30th. of *Octob.* meeting a great many Men and Women upon the Road, following an Idol, preceded by some Pipers, Drummers, and Cymbal-players, we ask'd the *Adogeda* what they meant by this, he told us, that they were going in Procession to Perform their Devotion at a neighbouring Sepulchre. We got sight the same Day of certain goodly Places call'd the *Red City*, being the Residence of the Sister of the *Bogdegan*, and famous for the Tombs of several of their Princes. We were quartered that Night in a Village, and as some extraordinary business detain'd the *Adogeda* for a little time in that place, we went forward in the Morning, but before we had travel'd 3 hours, were overtaken by his Steward, who desired us to tarry a little in the Place where we then were, his Master being upon the Road to overtake us; we spent this time in taking a view of one of their Temples, where we saw 3 of the *Adogeda*'s Servants prostrating themselves before an Idol which stood in the middle of the Temple, and afterwards to 2 more that stood on both sides of it. About Noon we reach'd the City of *Xangote*, and at Night lodg'd in a Country Town, as we did also the next. We were much surprised to see among a People that have the Reputation of being one of the most refined in the World, such gross Idolatry, there being on incredible number of Magnificent Temples where-ever you pass, dedicated to their Idols.

The 2d. of *Novemb.* we came to the City of *Tunko*, famous for its Traffick in Porcelain, and the same Night being lodg'd in the next Town to the Capital City of *Peking*, we made our Publick Entry there the 3d. of *Novemb.* about Noon, with a great deal of Magnificence, and were lodg'd in the Court, the ordinary Residence of Foreign Ambassadors.

The 12th. of *Novemb.* our *Adogeda* and his *Tawares*, or Associate, came to give notice to the Ambassador that he being to be admitted to his Publick Audience the next Day, he desired him to get his Credentials and other things in readiness, and having ask'd the Ambassador who were to carry the Presents, was answered, that it was to be done by the *Cossacks*, which he seem'd not to like very well, desiring that his People might do it, but the Ambassador refused it, telling him, that after they were brought to the Place where they were to be delivered, he would do it with his own Hands, wherewith the *Adogeda* was well satisfied, desiring only that they might be carry'd under good Coverts.—It was however the 14th. of *Novemb.* before every thing could be prepared for our Publick Audence; and then we went to Court in the following manner. (1.) preceded 15 *Cossacks* carrying the Presents, then came one of the Masters of the Jewel-Office of the *Czars* of *Muscovy*; he was followed by the Secretary of the Embassy, who carry'd the Credentials; after him came the Ambassador, having the 2 *Adogedas* on his right and left; in the Rear marched the rest of the Gentlemen belonging to the Embassy. Coming to the Castle, we were fain to alight from our Horses at the first Gate, through which we march'd on foot, being very long and Arched on the top. Hence we walk'd over a very fine Stone Bridge, 50 or 60 Paces long, having on each side a Wall not above 3 foot high, but adorn'd with a great multitude of Figures cut in Stone; having pass'd the second Gate, we were conducted through a very spacious Court, where we saw 2 large Pillars wrought very artificially with Figures, which led us into a very sumptuous Hall, where we found 2 Tables. We were intreated by the *Adogeda* to sit down upon Bolsters laid upon the ground, and soon after saw the Chief Ministers of the Empire, *viz.* the *Dorgamba*, the *Askamba*, the *Aligamba*, and the *Adogamba* enter the Hall before the *Bogdegan* (Emperor.) The Credentials being delivered to the King himself, the Presents were given to the *Adogeda*, and were laid upon the 2 Tables. Then the *Dorgamba* with the other 3 Lords, advancing towards the Ambassador, made their Complements of Congratulation upon his happy Arrival, and having enquired after their *Czarish* Majesties health, told him, that his Credentials should be translated forthwith, and an Answer given to him. About 3 hours after the Ambassador had been re-conducted to his Lodgings, one of the 2 *Adogedas* came to tell us, that the *Czar*'s Letters having been received with more than ordinary Satisfaction at Court, the King had sent him to desire him and all his Retinue to take share of what was prepared for his own Table. Neither did he forget to tell us by the bye, as we pass'd along the Streets on Horse-back, that we ought to consider this as a particular honour, it being not Customary among them to invite Foreign Ambassadors so soon after the delivery of their Credentials to the *Bogdegan*'s Table. We were no sooner entered the same Hall, where we had been before, but the Ambassador was invited to sit down, and not long after the *Bogdegan*, preceded by the 4 beforementioned Chief Ministers of State, entred the Room, and having welcomed the Ambassadors with a very obliging Salute, 4 Tables were brought in immediately after, 2 of which being covered with 40 Silver Dishes, fill'd with all sorts of Sweetmeats, were for the Ambassador, the other 2 (where there were also some Sweetmeats and boil'd Mutton) fell to our share. 1694.

We were all treated after Dinner with Milk *Thee* in wooden Dishes, which were re-delivered to the Servants with a low inclination of the Head. The Ambassador was no sooner risen from Table, but the Sweetmeats were all given to his Attendants, and the *Cossacks*.

The 16th. *Nov.* the *Dorgamba* with divers other *Chinese* Lords and the 2 *Adogedas* being come to pay a Visit to the Ambassador, they were entertain'd with very good Musick to their no small satisfaction, and before they parted, the Ambassador presented the *Dorgamba* with a large Looking-glass, and 2 lesser ones, 2 Watches, and some other things beside, some Sables, black Fox Skins, Ermins, and other *Siberian* Commodities, which were accepted of in a most obliging manner.

On the 17th. of *Nov.* being invited by 2 Heralds to the *Bogdegan*'s Table, we were conducted to the Castle by the 2 *Adogeda*'s, and so to the Hall, where we had delivered our Credentials before: The Ambassador and 14 of his Retinue, whom he had brought along with him, being presented with Chairs to sit down, it was not long after before the beforementioned Lords entering the Hall, after the first Complements, ask'd the Ambassador whether he could speak *Latin*, and being answered he could not, ask'd further, whether any of his Retinue could, and being told that there was one who had some knowledge of it, but not to perfection, they left us to return our Answer, as we supposed, to the Emperor. We pass'd here near five hours, during which time we were entertain'd with *Milk Thee*, before Orders were given to introduce us to the *Bogdegan*, and an account being taken of our Names and Quality, we were conducted by the *Adogeda* thro' 3 Gates and as many fine spacious Courts. In the midst of these 3 was a Marble Bridge, which rested upon very fine Arches, under which run a Water which being by them call'd the *Emperor's Fish-pond*, resembled a small but fair River, which surrounded the Castle. We were no sooner entered the Apartment, where we found the *Bogdegan* sitting upon his Throne, but the Ambassador was placed on one side of it by the *Adogeda*. The Room which was extraordinary high, and the Walls adorn'd with a prodigious number of Marble Statues, was full of Courtiers carrying the Emperor's Arms upon their Breasts and Backs; just opposite to this Room you might see the Imperial Temple, a very noble Structure; and in another Court on the other side of the Room, the Imperial *Seraglio*. The Ambassador being placed on the left hand of the Throne his Retinue stood on the right hand of him 4 Rods behind, and opposite to the Am- 1694.

1694. bassador the 4 Chief Ministers of State: Near the Throne attended a Guard of 40 Persons, with Half-Pikes and Battle-Axes. We had not sat long before we saw a Table brought in covered very thick with Dishes of Massy Gold, and fill'd with Sweetmeats, which being set down before the Emperor, 2 more were brought in for the 4 Lords, and after them another Table full of Sweetmeats for the Ambassador, and his Retinue had also their peculiar Tables, three belonging to a Table; the *Chineses*, of whom there were at least 100, had each their own Table served with several Dishes of Meat; but what was brought to our Table, *viz.* Sweetmeats, Grapes, Apples, Pears, Chesnuts, *China* Oranges, Citrons and other Fruits, were all served in Plate. Every one took care to observe when the Emperor began to take the first bit, when being obliged to make a profound inclination with the Head, they fall to eating themselves.

After Dinner, which lasted three hours, two very large Cups of Brandy being presented to the *Bogdegan*, he commanded the *Dorgamba* and another of the Chief Ministers of State, to conduct the Ambassador to the Throne, and being come upon the Steps, the *Dorgamba*, gave one of these two Cups to the Ambassador, desiring him to make a low Reverence with his Head, and so drink it off at a Draught, which done, some *Jesuits* appear'd in the Room, who speaking to the Ambassador in *Latin*, he answered in *Italian*, that he was not well acquainted with the *Latin* Tongue; so that one of these Fathers understanding *Italian*, ask'd, by Orders from the *Bogdegan*, several Questions, and among the rest how long he had left *Moscow*, which he having answered accordingly, he was re-conducted to his Place, and we in our turn conducted opposite to the Throne, and presented with a Golden Cup of Brandy each, which, after we had taken off with a profound Reverence, we were carried back to our respective Places; we had afterwards some *Milk Thee* given us, which we took off with the same Ceremonies as before. Then the Tables being removed, we were conducted by the *Adogeda's* into another Room because we should not see the *Bogdegan* descend from his Throne.

He is descended of the Race of the *Mongul Tartars*, of a brown Complexion, and about 50 Years of Age. After having sat here a little while, till the Sweetmeats that were left could be distributed among the Servants, we were re-conducted to our Quarters.

The 18th. of *November* the Ambassador and his whole Train were entertain'd at their Lodgings from the Emperor's Table, and the 8th. of *December* were treated again at Court.

The 11th. we were present at a great Solemnity, where the *Chinese* Lords paid their Homage to the Emperor by several times prostrating themselves bending their Knees, and knocking their Heads against the ground, and at Night were entertain'd with a Play, and some very curious Tricks of *Leger-de-main*.

The 19th. of *December* we were most magnificently treated at the *Dorgamba's* House; and the 6th. of *January* 1694. once more at the *Bogdegan's* Table, as we were likewise the 16th. and at the *Dorgamba's* House once more the 26th.

The 27th. we gave a Visit to the *Jesuits*, of whom there were 8 at that time at *Peking*, they treated us with a very fine Breakfast, and shew'd us their Church, which is a very fine Structure, and has a noble Organ.

1695. The 5th. of *February* we were again magnificently entertain'd at Court, and being told, that according to our desire, we should be dismiss'd in 12 Nights, we were sent for to Court the 16th. of *February*, in order to take our Audience of Leave, and to receive the usual Presents, which were as follows:

For the Ambassador a Horse with all the Acoutrements; a *Chinese* Cap; a Damask Brocaded Turbant, lin'd with Lamb-skins; a Scarf, a Knife, six Hankerchiefs, and two Tobacco Bags; one pair of Leather Boots, and a pair of Silk Stockings; a piece of black Satin of 10 Yards; a piece of *Sudan* of 20 Yards; 16 pieces of *Kitaiks*; 7 *San* of Silver worth about 14 Crowns. Each of the Gentlemen belonging to the Embassy had these following Presents:

A *Chinese* Cap, a *Damask Surtout* lin'd with Lamb-skin, a piece of Satin of 10 Yards; a Scarf, a Knife, two Tobacco Bags and six Hankerchiefs; a pair of Leather Boots, and a pair of Silk Stockings, quilted with Cotten; 16 pieces of *Kitaik*, one *San* and a half of Silver value three Crowns. 1695.

The *Cossacks* and inferior Servants had each for their share a piece of Satin of 10 Yards, 8 pieces of *Kitaik*, one *San* of Silver.

On the 18th. the Ambassador being invited again to Court, was told by the *Dorgamba*, that the Carriages being ready, he might, if he pleased, depart the next Morning. And in this place I am sensible I should enter upon a Description of this vast Empire, but as the same has been done at large by several other Hands, who have had the opportunity of taking a full view of this Country, we will confine our selves to the Journal of our Embassy.

We left the City of *Peking* the 19th. of *February*, towards coming home, and after five Days Journey, were conducted through a ruin'd City, where in one of their Temples I saw an Idol made of Clay, but very richly gilt, *viz.* a Woman of about 15 Yards high, with many Hands and Heads; and not far thence in a Gallery, another Figure representing a Woman lying in a rich Damask Bed, covered with rich *Chinese* Carpets, which they told us was her Daughter.

The 30th. of *May* we took up our Quarters in the Village of *Suttigar*, near the City of *Naun*, where I saw a very surprising Spectacle in my Hosts Daughter, whom I saw sprawling upon the ground, making most horrid out-crys, but having ask'd the occasion of it, was told, that she being accounted a Saint, some of the Neighbourhood had been to consult her about a Child that was ill, and when the Neighbours were all gone, I saw an Aunt of hers put a little Incense upon a few Coals, which soon brought her to her right Senses again.

The 14th. of *April* we set out from *Naun*, and passing the 23d. near a high Mountain, came the 27th. to the River *Chadma*.

The 2d. of *May*, we cross'd the River *Keilar*, where we had almost been consumed by Fire, which the *Mongul Tartars* out of revenge had set among the long and dry Grass, that remain'd after the Winter Season; we had enough to do to save our Tents and Cattle, but were afterwards put to great stress for Fodder.

The 18th. we came to the River *Margan*, where having refresh'd our selves for two Days, we cross'd the River *Gam* the 12th. with our laden Camels and Horses.

The 21st. of *May* we Ferry'd over the River *Argun*, a good Days Journey from the City of that Name.

The 2d. of *June* we arrived safely at *Nartzinskoy*, and our whole *Caravan* the 9th. following.

The 3d. of *July* we set forward again from *Nartzinskoy*, and came the 13th. to *Plothus*; the 15th. to the Lake of *Shock*, and the 19th. to the Lake of *Jerawena*.

The 22d. we forded the River *Ana*, which falls into the River *Uda*, and the 26th. the River *Hurba*, which likewise falls into the *Uda*.

The 27th. we came to *Udinsko*, where having sold our Camels and Horses to a great loss, we Embark'd on board two large Vessels the 28th. upon the River *Selinga*, and the 31st. came to the Entrance of *Baikala*, where being much pester'd with the changeableness of the Winds, but at last making the River *Angara*, arrived the 1st. of *August* at *Irtuskoy*.

The 5th. we set Sail again, and the 11th. went ashore in a Village belonging to the *Boatskoy*, on the left side of the River *Angara*; into which here abouts falls another large River.

We had not sail'd many Miles before we were forc'd to pass a dangerous Cataract call'd *Pegnay*, and soon after another call'd *Pyan*.

The 12th. we came to another call'd *Podma*; and the 13th. another, which continued for four or five Miles.

The 14th. we pass'd the Cataract call'd *Skamansko*, which is near three Miles long.

The 16th. we pass'd in sight of the River *Itim*, which falls into the River *Tunguska*, to the right hand, as the *Angara* does to the left. We pass'd the same Day over another Cataract, and leaving the River *Ketto* to the right of us the 17th. as we did the River *Kama* the 22d.

We came the 25th. to *Jenokiskoy*, or *Genassay*. Thence we continued our Journey by Land the 1st. of *September*

1695. *tember* to *Makoffsko*, where we arrived the 3d. and the 7th. set forward again for *Tobolsko*.

The 23d. we came to *Famkutskoy*, and the 26th. to the City of *Narim*, a Mile distant from the River *Oby*, where we Embark'd the 28th. but the Wind blowing very strong from the North, we advanced but very little till the 13th. of *October*, when making all the sail we could we entred the River *Irtish* the 14th. and the 15th. arrived at *Samorskojam*. Here we continued till the 14th. of *November*, by reason of the Ambassador's indisposition, and the River being frozen over by this time, we had recourse to ordinary Winter Carriages, the Sledges, which brought us the 19th. to *Demjansko*, and the 20th. to *Tobolsko*, which we left again the 17th. of *December*, and arrived the 20th. at *Tumen*. We continued our Journey the 21st. and came the 23d. to the City of *Japanskin*, and the 27th. to *Wergaturia*.

We left this place again the 28th. and the 1st. of *January* 1695. arrived in the City of *Sotokamskoy*, the 5th. at *Kaigorod*, and the 9th. at *Jam Usga*, upon the River *Sisella*. 1695.

The 10th. we pass'd through *Jata Piloldie*, and the 11th. through *Janaspas Ulspilsco*, in both which Places we Din'd.

The 12th. we came to a Place called St. *Sots Wirzogda*, where we refreshed our selves the next Day, and arrived the 14th. at *Ustingha*.

The 18th. we came to the City of *Terma*, where we stay'd till the 19th. against Night, and arrived at *Schusca Jam* the 21st. We reach'd *Jeroslaw* the 25th. and *Peroslaw* the 27th. where we stay'd till the 29th. and the 31st. of *January* came to a Village call'd *Alekeshe* upon the *River Janse*, which being but five Miles from *Moscow*, we safely arrived there the first of *February*, after a most tedious and troublesome Journey of Three Years wanting Six Weeks.

Of

Of the Ancient and Modern

RELIGION OF THE MUSCOVITES,

Done from the *French*, Printed at *Cologne*, 1698.

CHAP. VII.

Of the first Conversion of the Muscovites *to the Christian Faith.*

THE *Muscovites* are very Ambitious to trace their Conversion to the Christian Faith as far as the Times of the Apostle St. *Andrew* Brother to *Simon Peter*; who they say, came out of *Greece*, and crossing the *Black-Sea*, landed near the Mouth of the River *Boristhenes*, and coming to *Kiovia*, then a famous City in those Parts, Preached the Gospel there, and afterwards at *Novogorod Veliki*, then a Principality independant from the *Czars* of *Muscovy*, and after having converted these also to the Christian Religion, he returned to *Rome*, and thence into the *Morea*, where he suffered Martyrdom under the Reign of King *Ægo*: But as the Records of *Novogorod* know nothing of the Apostle St. *Andrew*, and attribute their Conversion to St. *Anthony*, and that it is beyond all dispute that before the Reign of the Princess *Ola*, and her Grand-son *Wolodimir*, the *Russians* were involved in the utmost darkness of *Paganism*, and used (besides those Gods, such as *Jupiter*, *Saturn*, *Mars*, &c. known among the ancient *Pagans*) adore their peculiar Idols under the Names of *Piorun*, *Stribi*, *Corsi*, and *Mocosti*; (the shape of which you may see in the annexed Cut.) Fig. 1.

These pretensions must be look'd upon no otherwise than the effects of their Ignorance; it is beyond all dispute, that in the Year 762. under the Reign of *Rurick*, the *Russians* were all *Pagans*, and that his Son *Igor* married *Ola*, a Native of *Pleskow*, by whom he had a Son named *Stoslaus*.

After the death of *Igor*, his Son being very young, *Ola* had the Management of the Regency during his Minority, and going to *Constantinople* 955. was baptized there and named *Helen*. Her Son, when come to Age of Maturity, did not think fit to follow his Mothers footsteps, persisting in his Idolatry married *Malutha*, the Daughter of a Citizen of *Novogorod*, by whom he had *Wolodimir*, who after his Father's death, having made himself Master of the Circumjacent Country, and received thereupon the Compliments of several Christian Princes by their Ambassadors, he was thereby induced, after the example of his Grand-Mother, not only to embrace, but also to establish Christianity in his Dominions: He had no sooner taken this Resolution, but he sent his Ambassadors to the two *Constantinopolitan* Emperors, *Basil* and *Constantine*, desiring their Sister the Princess *Anne* in Marriage, which being granted, he was baptized in the Presence of the two Emperors, and named *Basil*; which done, the Patriarch of *Constantinople* sent and Consecrated a Metropolitan at *Kiovia*, an Archbishop at *Novogorod*, and divers Bishops and Priests in other places; so that as the first Introduction of the Christian Religion into *Russia*, must be attributed to the Princess *Ola*, so its Establishment was perfected by *Wolodimir*, as is manifest among other things, from the words of that famous Tyrant *John*, or *Joan Basilowitz*, who Reign'd 1570, and says thus in favour to *John Rahita*, a *Polish* Divine, who was sent by the Emperor *Sigismond* with an Ambassador into *Muscovy*, *Our Subjects*, says he, *are baptized in the Name of the Father, the Son, and the Holy Ghost, ever since our blessed Ancestor the Great* Czar Wolodimir, *being enlightned from Heaven, received the Name of* Basil *at the Sacred Fountain, so that from thence to this Day the Name of the* Russian *Religion is turn'd into that of the* Christian Faith.

This is the true Reason, why the *Muscovites*, to this Day, profess a more than ordinary esteem for the *Greek* Religion, and send every Year a Present of 500 Ducats for the Patriarch of *Constantinople*, tho' they differ in several Points from the *Greek* Religion.

The *Muscovites* have the Bible printed in the *Sclavonian* Language, which much Resembles the *German*; and Acknowledge it to be the True word of God, especially the Books of the Evangelists, which they never touch without certain marks of respect and veneration. Though they make the Holy Scripture the Rule of their Faith, yet they adhere also much to the Determinations of the 7 first general Councils, and the *Greek* Fathers, especially to the Works of *Basil the Great*, *Gregory* of *Nazianzena*, *John Chrysostome*, and *Ephrem* the *Syrian*; the following Councils they look upon as infected with Heresie, and among the Doctors of their Church, they put an extraordinary value upon the Writings of one *Nicholas Sudatwitz*, whose Memory is Celebrated twice a year. They also receive the Creed of the Apostles, that of *Nice*, and *Athanasius*, so, that when any point of Religion is to be proved by them, they first have recourse to the Scripture, next to the 7 Councils, and lastly to the before-mentioned Fathers, which is to be determin'd only by the Patriarch of *Muscovy*.

Their Priests (or *Popes*) Read in their Churches the New Testament to the People, but the Old Testament (except the Psalms of *David*) they look upon to contain many things not fit to be known by the vulgar sort. They never pretend to make any explications upon the Text of the Scripture, and consequently allow of no Preaching, it being their Opinion, that these publick and framed Orations in the Pulpit, being full of Subtilties create only Misunderstanding and Misinterpretations, and lead away the People from the true way of Morality. They believe *the Church to be an Assembly of the Faithful, whom God has promised to assist with his Grace, to attain to eternal Salvation*; and they have variety enough

nough to imagine, that without their Communion there is no such Assembly of the faithful.

They look upon the *Turks* and *Jews* as declared Enemies, which is the reason the *Ottoman* Ambassadors are not admitted to kiss the *Czar*'s hand, and the last are forbid to come into *Muscovy*; and as to the other Christians, they consider all as Hereticks, especially the *Roman Catholicks*, which is the reason, that if any Christian, of what Religion soever does embrace the *Muscovite* Religion, he must be rebaptized. The chief points in Question betwixt the *Roman Catholicks* and the *Muscovites*, are their *Fasts*, the *Celibacy* of the *Romish Priests*; the Unction of the Infants in Baptism, the Unleaven'd Bread, and their Opinion concerning the Trinity.

The *Lutheran* and *Calviniſt* Religions are tolerated among them, though they nevertheless look upon them as Hereticks, yet have they their Churches all over *Muscovy* and some Schools; which they constantly refuse to the *Roman Catholicks*; I remember that when, 1684. the present Emperor sent the Baron of *Blumenbough*, and the Baron *Siroffski*, as his Ambassadors to the *Czars Ivan*, and *Peter Alexiowitz*, to Negotiate an Alliance against the *Turks*, they carried 2 *Jesuits* along with them, and there being at that time a considerable number of *Roman Catholicks* in the *Czar*'s Service, they obtain'd leave for them to stay at *Moscow*; but durst not stay long, the aversion of the *Muscovites* against them being such, that they thought it best to retire in time.

The *Lutherans* have at present 3 Churches in the Suburbs, where the *Germans* live, one of which is of Stone, and lately built, the *Czar Peter* having granted them leave to build a Steeple, and make use of Bells, a thing never permitted before in *Muscovy*.

The *Calviniſts* have likewise a very handsome Stone Church in the same Suburb, and it is observable, that the *Czar Peter* with some of his *Boyars* sometimes come to both, a thing that appears very strange to the *Muscovites*.

The *Lutherans* have also another Church and School within 8 Lgs of *Muscow*, and so have the *Calviniſts*: They don't allow to either of them, no more than they do in their own Churches, any Crucifix or Images, unless they be painted either upon Wood or Cloth; as for the other Sects, they don't so much as number them among Christians, but punish them with Death. Of this there was an instance given in our time in one *Kuhlman*, a *Silesian* by birth, who adhering to the Phanaticism of one *Behmen*, a *German*, he came to *Leyden* to propagate his Erroneous Opinions, but being banish'd thence, came into *England*, where also not being able to stay long, he went into *Muscovy*, and getting into the acquaintance of one *Northerman* a *German* Merchant, he instill'd his Phanatical Notions so effectually into the said Merchant, that they jointly resolved to publish their Opinions; One of the Chief of which was, That *Christ Jesus our Saviour, was to return once more upon Earth, to convert all Mankind, and at last to bless them with his Kingdom. Notherman* had the vanity to carry this Treatise to one of the Chief Ministers, who forewarned him of the danger, admonishing him to desist before it was too late, but in vain, for the Merchant went to the Printer, and urging the matter very close to him, prevail'd at last to undertake it; but considering the risque he might run in so doing, he was advised to carry it to the Patriarch for his Approbation, who had no sooner perus'd it, but he caused both *Kuhlman* and *Northerman* to be burnt alive.

They put so vast a difference betwixt themselves and other Christians, that they will not so much as allow them to enter their Churches, or if it be done, they look upon it as a great favour, and the Church is defiled, which must be purify'd, and is performed with very strange Ceremonies.

There is a known Story about *Muscow*, concerning a certain Monky belonging to an *English* Ambassador, residing there, which getting into a Neighbouring Church, and having defiled the Image of St. *Nicholas*, was by a peculiar Order from the Patriarch, carry'd in shew through the Streets, and afterwards put to death.

The *Muscovites* agree in this point with the Protestants, That Christ is the only Head of the Church, and that there is no occasion for any other, which is the reason they look upon the Pope as an Usurper, and that *Basil* in his Letter to Pope *Clement* Stiles him, *Clement the Pope, Pastor and Doctor of the Roman Church*. Neither do they allow any Modern Miracles, it being their Opinion, that these are ceased since the full establishment of the Christian Religion.

Marriage is esteemed among the *Muscovites* as a very sacred thing, for which reason they don't allow any right Marriages within the 3d. or 4th. degree. Polygamy is forbidden under pain of death, the *Czar* himself being allow'd no more than one Wife at a time, tho' if she proves barren, or brings forth no Sons, he may send her into a Monastery, and marry another. Upon second Marriages they look as allowable, but not very commendable, upon which score their Priests are forbidden to marry a second time; a third Marriage is not to be undertaken, but upon very weighty considerations; and a fourth punish'd with death. Divorces are however very frequent among them, but must be obtained with the Bishop's consent. Their Priests are not only allow'd, but oblig'd to marry, and this must be none but a Widow of a good reputation; but are forbidden to marry a second time unless they will quit their Order.

The second thing which is in peculiar Veneration among the *Muscovites*, is their Sovereign, for whom they have such an entire deference, that they look upon his Pleasure as the Will of God, which without doubt has given birth to that Proverb so frequently used among them; *Godknows it and our Czar*; which is also the reason they stile the *Czar God Almighty's Chamberlain*, and that he is invested with a power from God, to execute his Will. This is so firmly engrafted into them from their first Infancy, that even Persons of the chiefest Rank in the Empire, never approach his Person, but with the same Veneration as if they pay'd their Adoration to God, and if he gives them the least mark of his displeasure, they are ready to offer their Lives for the expiation of their miscarriage.

Another thing much regarded among the *Muscovites* is the Clergy, of which they have several degrees; he that bears the first Rank is their Patriarch, who is obliged always to reside at *Muscow*. Formerly the Patriarch of *Constantinople* used to have the nomination of him, but now he is named by the Metropolitans and Bishops, with the *Czar*'s Approbation. He is the chief Person in the Empire next to the *Czar*, and determines all Ecclesiastical Affairs; he wears a kind of long black Robe, and has always a Cross carried before him; next to the Patriarch come the Metropolitans, of which there are 4 in number; The (1.) of *Novogrod*, the (2.) of *Rostoff*, the (3.) of *Casan*, and the (4) of *Sirkenski*; this last must keep his constant Residence at *Muscow*: The next in Rank are the 7 Bishops; (1.) of *Kiovia*, (2.) of *Muscow*, (3.) of *Pleskow*, (4) of *Wolodimir*, (5.) of *Toralsko* in *Siberia*, (6.) of *Casan*, (7.) of *Astracan*. Next to these come the Priests call'd by them *Popes*, who are again subdivided into *Protopopes*, Archpriests, and common *Popes*; of whom there are a vast number in *Muscow*; there being no other qualifications requisite to admit them into this Order, except reading, writing and singing. The chief Badge of Priesthood is a certain Cap or Calot, which is put upon their Heads at the time of their being Consecrated, and they are obliged to wear it as long as they continue to be Priests, and it is no small Crime for a Lay-man to touch it; notwithstanding which as most of the *Muscovite* Clergy are great Drunkards, and constant frequenters of Tipling Houses, they meet with many a hard rub, there being only this difference to be observed in this respect, that if you have occasion to beat a Clergyman, you must first civilly secure his Bonnet, and that done, drub him handsomly, and put it on again afterwards. Another Badge of their Priesthood is the stick they carry in their Hands, being for the rest clad in a wide long Robe, of black, green, blue, or red, which they like best. As they pass along the Streets, the common People ask them their blessing, which they give them with the sign of the Cross. *Muscovy* swarms with Monks, which are either *Benedictines*, or else of the Order of St. *Basil*, or St. *Nicholas*. They make three Vows, like the *Roman Catholicks*, *viz.* Of Poverty, Chastity, and Obedience, tho' for the rest their Rules are very different from the *Romans*, they lead generally a very austere life; The other Orders, such as the *Jesuits*, *Franciscans*, *Dominicans*, *Carmelites*, &c. are unknown in *Muscovy*. They are all clad after the same manner, not unlike our *Dominicans*; they have their Abbots and Priors, the first they call *Archimandrites*, the last *Igumenes*, who are generally very ignorant, there be-

ing

ing scarce one among ten that is able to say the *Pater-Noster*, and the *Apostles Creed*.

Their Nuns live much after the same manner as the Fryars, they are clad in long black Robes, except that Persons of Quality wear white Vests.

There are also Hermits among the *Muscovites*; who live upon what Alms Travellers are pleas'd to bestow upon them, to purchase their Prayers.

Their Bishops and Priests live upon their Tythes, and what else private Persons are pleased to bestow upon them, having no Lands or Houses allotted them for their Maintenance, as is practised among the *Roman Catholicks*. Simony is a thing so current in *Muscovy*, that it is no more frequent at *Rome*, or any other place that I know of in the World.

Their Churches are all built round and vaulted, to bear some resemblance to the Heavens; each of them has 5 Steeples, one larger and higher than the rest, the other 4 being round about it. They use neither Chairs nor Benches in their Churches, because they perform their Devotions either kneeling or prostrating upon the ground. They look upon their Churches as places so sacred, that a new married Couple are not permitted to enter there, before they have well bathed themselves. They will not admit of any Organs, or other Musical Instruments in their Churches, no more than of any Images of Wood or Stone, but only such as are painted. There are about 200 Churches in *Muscow*. Next to their Churches they are very choice of their Church-Yards, which they likewise look upon as sacred Places, and will not allow any impurities to be thrown there, or that a Dog should pass over them. They are great admirers of Bells, looking upon them as an essential part belonging to Divine Service.

The *Muscovites*, as well as the *Roman Catholicks*, excommunicate all such as are not of their Communion, every Year on the *Thursday* in the *Holy-Week*, but if any one makes a Confession of his Sins, and promises amendment, the Excommunication is taken away; their Confession is like that of the *Romans*, a recital of all their Sins. The *Muscovites* profess a Trinity, according to the Apostles Creed, and that of *Nice*, and St. *Athanasius*. They declare, That God the Creator of Heaven and Earth is the first Person, and Father of *Jesus Christ* our Saviour; That *Jesus Christ* the Second Person is really a Man, born of the Virgin *Mary*, and that he never ceases to be the essential Word of God, together with the Father and the Holy Ghost. They also acknowledge the Holy Ghost to be the Third Person of the Divinity, and to be the true God, with the Father and Son. But at the same time are involved in a gross Error concerning this Article as well as other *Greek* Churches, who affirm, that the Holy Ghost proceeds only from the Father, and not the Son. Upon this score they accuse the other Christians with having falsify'd the Words of the Council of *Nice*, by inserting the word *Filioque* after that of *à Patre*; it being, say they, impossible to assign to the Holy Ghost 2 distinct Attributes, 2 different Wills, and 2 different Principles.

There were certain *Greeks* call'd by those of the *Roman* Communion, *Uniti*, at the Council of *Florence*, held by Pope *Eugene* IV. 1439. and among the rest of the *Russian* Metropolitans, one named *Isidore*, who were at last by admirable proofs convinced of the verity of the Holy Ghost proceeding both from Father and Son, but the Decrees of this Council were not received in *Muscovy*; They are sensible of the Corruption of humane Nature by Original Sin, that naturally we are involved in darkness, and that God is not in the least the original of Sin, but an inexhaustible Spring of all that is good. Upon the Doctrine of *Free-Will* they look as a *Chimera*, after the Fall of our first Parents; and upon the *Ten Commandments*, as a thing not having the least relation to them, as being abolish'd in the *New Testament*, except these two, *Thou shalt love the Lord thy God with all thy heart, and thy Neighbour like thy self*; the rest, as they affirm, being quite abolished by Christ's Sufferings; tho' at the same time they consider the Decalogue as a Rule by which to regulate their Manners and Actions in respect of this Life: According to the First Commandment they adore the Holy Trinity, tho' at the same time they worship the Images of their Saints, especially the Virgin *Mary*, as being the Mediatrix betwixt her Son and us; who by her Prayers protects the whole Christian World. They boast to have an Original Picture of the said Virgin, done by the Evangelist St. *Luke*, which is carefully preserved in *Muscow*, and tho' scarce any body will believe St. *Luke* was ever there, yet are they so positive in this point, that should any body publickly contradict it, he would be in danger of paying for it with his Head. They do not only pay a great Veneration, but an absolute Adoration to the Apostles, and prostrate themselves before their Reliques, as also before the Images of the Prophets, holy Fathers, Martyrs and other Saints. These Images are exchanged in the great Market-place of *Muscow*, for to say they were sold, would be an unpardonable Crime. Among all the rest of their Saints they pay a most peculiar Veneration to St. *Nicholas* of *Baris*, whom they acknowledge the Patron and Protector of *Muscovy*. In regard of the Second Commandment, they shew a great deal of Veneration for the Name of God, and never go out of their Houses without having first said their Prayers, and paid their Devotions to their Domestick Saints; nay, if a vulgar Person happens to enter the House of a Person of Quality, he first looks for the Image of the Saint, and does not pay his respect to the Master thereof, before he had address'd himself to the Saint, and after cross'd himself thrice in the Forehead, and once on the Breast, says the usual *Gospodi Romini*, i. e. *Lord have mercy upon us.*

The *Muscovites* also make a great account of Pilgrimages, not even excepting the *Czar* himself, who makes two every Year, one at the Feast of the *Trinity* to the Monastery of *Troitza*, about 12 *German* Lgs from *Muscow*; the second at *Michaelmass*-day to a certain Monastery dedicated to one of their Saints named *Sergius*, of whom the *Muscovites* relate strange Stories, having been first a Souldier and afterward a Hermit, who ended his days in the said Monastery, 1593. of which he was *Igumene*, or Prior.

Besides these, they have divers other Monasteries dedicated to certain Saints famous for their Miracles, whither the Common People flock at certain times, but commonly return loaden with strong Liquors, and all manner of Debaucheries.

When the *Muscovites* are at their Devotions they often knock their Foreheads against the ground; and cross themselves in the following manner. They first make the Sign of the Cross with their Fingers on the Forehead, which intimates, say they, the Ascension of Christ; next on the Heart, to signifie that the heart is the receptacle of the Word of God, then they make a Cross on the right, and next on the left Shoulder, to intimate that at the day of Judgment, those to be bless'd with eternal life shall be placed to the right, and the damned to the left. Not many years ago the Patriarch ordered that the Lay-men should cross themselves only with two fingers, whereas before that time they did it with three; in remembrance of the *Holy Trinity*; but meeting with great opposition in this point, he prevail'd with the *Czar* to send the *Arch-Patriarch* of *Constantinople*, and two other Patriarchs of the *Eastern* Churches, who approving of his Orders, the same was enacted into a Law, notwithstanding which several *Muscovites* would rather lose their Heads than comply with it, and to this day the *Muscovites* make use of three Fingers when they can do it in private, they being very superstitious, and extremely addicted to their ancient Customs; one instance of which is, that even now they have as much veneration for Serpents, as some of the *Eastern Pagans*.

The *Muscovites* take it for no crime to take a false Oath on purpose to injure your Enemy, especially if he be a *Roman Catholick*, tho' otherwise they are very cautious in taking an Oath in any of their Courts of Justice, the same tho' true, being look'd upon among them, as infamous; but if they forswear themselves they are sure to be punish'd by a severe Strapado, and sometimes with banishment into *Siberia*. Some of the richer sort among the *Muscovites*, when they are ill past hopes of recovery, make a vow of turning *Monks*, and are shaven at the same time, which they are obliged to perform if they recover, though they have Wife and Children. In respect to the Third Commandment, they indeed do observe the *Sunday*, yet so, that the richer sort spend their time in Debaucheries, after Divine Service is over, and the Poor in their Employments.

The three great Feasts of *Christmas*, *Easter*, and *Whitsuntide*, are kept with a great deal of strictness among the *Muscovites*, no body daring to work on those days, they have also many other Festivals, the chiefest

chiefest of which were these following; That of the *New-Year*, which is celebrated the 1st. of *September*, according to the Old Stile, with a great deal of Solemnity, in the great Market-place before the Castle, of which Solemnity several of our Modern Voyages having given an ample account, we will not repeat here. Their Feast is on the 8th. of *Sept.* dedicated to *the Nativity of the Holy Mother of God.* The third the 14th. of *Sept.* called *the Feast of the Exaltation of the Cross.* The fourth the 21st. of *Nov.* called *the Offerings of our Lady.* The fifth. the 25th. of *Dec.* being the Feast of the *Nativity of Christ.* The sixth the Feast of the three Kings, the 6th. of *Jan.* when they celebrate the Ceremony of concecrating the Water of the River of *Muscow*, for which Ceremony we likewise refer our selves to the accounts of several Modern Voyages into those Parts. The seventh is celebrated the 2d. of *Feb.* and called *the Feast of the Purification of the Virgin Mary.* The eighth on the 25th. of *April*, being *the Annunciation of the Virgin Mary.* The 9th. is that of *Palm-Sunday*, when they celebrate with the utmost Solemnity the Entrance of our Saviour into *Jerusalem*, at which time the *Czar* makes a Calvacade upon an Ass through the City of *Muscow*, for the description of which we refer our selves likewise to several Modern Authors. The tenth Feast is their *Easter*, which is also kept with a great deal of solemnity, then the *Czar* shews himself in publick to the People, People of any Fashion carry red painted Eggs in their Pockets, for 15 days after, which they present to one another whenever they meet with a Salute, adding these words, *Christ is risen*, unto which the other replys, *He is certainly risen*; no body of what quality soever, whether Man or Woman, dares to refuse the Egg or Salute; the *Czar* himself goes on Easter-day to visit the Prisoners, and orders some Eggs and Meat to be given them. The eleventh Feast is that of the *Ascension*, and the twelfth that of our *Whitsuntide*, which they call *the Descension of the Holy Ghost.* The thirteenth is the Feast of *the Transfiguration of Christ upon the Monot Tabor*, which is celebrated the 6th. of *Aug.* and the fourteenth the Feast of *the Assumption of Mary, the blessed Mother of God*, kept the 10th. of *Aug.* These are the Holy-days the *Muscovites* are obliged to keep, but for the rest as for instance, *Midsummer*, *Michaelmass-day*, and those dedicated to the Memory of the Apostles, Martyrs and other Saints, every one is at liberty to keep them as he pleases, the Priests being only obliged to say *Mass*, and particular Service on those Days. On *Sundays* the *Muscovites* commonly go three times to Church, (1.) before Sun-rising, which they call *Safterini.* (2.) About Noon, this they call *Cleedni*; (3.) At Night this is call'd *Wedsherni*; after which the best sort seldom stir out of their Houses, by reason of the many insolencies that are committed by the drunken Rabble in the Streets.

The *Muscovites*, as I told you before, perform their Divine Service in reading certain Chapters out of the Scripture, the *Psalms* of *David*, the *Gospel*, and perhaps some *Homilies* of St. *Chrysostome*, and St. *Athenasius Creed*, without any farther Explication, Preaching being considered among them rather as a profanation of an addition to their Worship; it being their Opinion that the reading of the *New Testament* is sufficient to instruct them in their Duty; but if it were not, say they, it would be much better (pursuant to the Custom used in the ancient *Christian* Churches) to read the Sermons of the old Fathers, and not to be inveigled by the fram'd Speeches of a Clergy-man, whose chief aim is commonly to shew his vanity by cheating and maintaining Disputes in the Pulipit, contrary to the true intent and simplicity of the Christian Religion. After the reading of the *Psalms*, of the *Gospel*, and some Passages out of the Holy Fathers, they begin to say *Mass*, which is done in the following manner: The Priest attended by his Sacristan approaching the Altar, pays his Reverence to it, which done, he puts some red Wine (for the *Muscovites* use no other in their Churches) into the Chalice, which he mixes with some Water, and having broken a piece of leavened Bread, puts it into the Wine; Then he consecrates them both, by reading and saying certain forms of Prayers, which last near half an hour; after which he takes with a Spoon all at once, that Bread and Wine out of the *Chalice*, and so takes the Communion himself without any other Company, unless they should happen to bring to him at that time a sick Child, unto which he gives a morsel of the Bread steep'd in the Wine.

The chiefest Devotion of the *Muscovites* consists in their being present at these Masses, during which you see abundance of Wax Candles lighted, and the People busie in burning of Incense before, and kissing the Images. They have neither Benches, Chairs, or any Musical Instruments in their Churches; as to the first they say it would be indecent to appear before the Face of God in any other Posture, except on their Knees, and as to the last, they rather believe them to divert their Thoughts from Devotion, than to excite them to the performance of it, which is the reason alledged by them, why they were not in use among the Primitive Christians.

So much for their *Holy-days* and *Sundays*. As to what relates to the 4th. Commandment, that is but ill observed among the *Muscovites*, nothing being to be heard but broils and ill Language betwixt Father and Son, Mother and Daughter, or Brothers and Sisters in *Muscovy*. According to the fifth Commandment the *Muscovites* punish Murther with Death, but at the same time slandering and giving ill Language to one another, is so common a Vice among them, that it passes for current here, even among People of the best Quality, which is not decided by Fighting, but perhaps by the Cudgel or by the Horse-whip.

The *Muscovites* have not much more regard to the 6th. Commandment, Fornication being a common Vice here, and tho' according to their Laws, Adultery is punished as a great Crime, yet the same is frequent enough, among them, because, according to their Opinion, there is no Adultery, unless you run away with another Man's Wife, and defraud him of the use of her; In which case the Adulterer is to undergo the Bastinado, and to be banish'd afterwards into *Siberia*, and the Woman to be lock'd up in a Convent, the Husband being at liberty to marry again when he pleases.

Divorces are also also allow'd upon many other occasions. Fornication is scarce look'd upon as a Crime among them; tho' they allow no publick Brothel-houses. The worst is, that Sodomy it self is connived at, to which they are much addicted in their Drink. The *Muscovite* Women are kept under great restran'd those of Quality being not allow'd as much as to come within sight of the Men, but are obliged to pass away their time in their Chambers with their Maids in Embroidering and such other diversions, the management of the House being left wholly to the Mens disposal on Holy-days they now and then get leave to divert themselves in the Field.

As to their Marriages, their chief aim of a Father who has a Daughter to bestow, is to get her a good Dowry after the decease of her Husband. The Marriage Contract is made up betwixt the Relations, there being no time or opportunity allow'd to the young Folks to be acquainted with one anothers humour before hand, as is practised in other Countries, which is questionless one reason that the *Muscovite* Women, tho' they are kept under constant Confinement, yet often times find means to open their Prison doors, and admit others, who use them more kindly than their Husbands. Their Marriage Ceremonies being so well known now among us, from the several accounts, those that have travelled into those Parts, have given us upon that Subject; that I will not pretend to insist upon them here, but only add, that as at their Weddings they commit most excessive Debaucheries, especially in Drinking, so the Women are cunning enough to make use of this opportunity to make themselves amends for the constraint they lay under at home at other times, which is perhaps the reason, why the *Muscovites* now-a-days are not so nice in observing their ancient Customs of enquiring into the marks of Virginity; but rather look upon them as ridiculous and unpracticable.

It is now time we come to the seventh Commandment; Theft and Robbery is punished, but not with Death, by the *Muscovites*; if what is stole does not exceed the value of 2 Crowns, they lay the Criminal stretch'd upon his Belly on the Ground, and whilst one holds his Head, and another his Legs, the Executioner gives him a certain number of stroaks with 2 Wans upon his Back, and the Calfs of his Legs; which is done in Proportion of the value of the stoln Goods. If the Robbery committed be greater, and the Criminal is not in a condition to repay it, he receives the Bastinado, or rather *Strapado*, has his right Ear cut off, and is committed to Prison for 2 Years, which expired, he is set at liberty, if it be the first Offence he has committed of that Nature. In case he

be in a Capacity to restore what he has stoln, his Punishment is only one Years Imprisonment. But if he be taken a second time in the same Fact, he receives the *Strapado*, has his left Ear cut off, and is banished for his Life into *Siberia*. For the rest, deceitful dealing and over-reaching in way Trade, is rather look'd upon as an accomplishment among the *Muscovites*, than a fault which deserves the least Chastisement. In relation to the Eighth Commandment, the *Muscovites* are so much addicted to false Evidences and wrongful Accusations, that now-a-days Matters are not decided by their Oaths, which they may purchase at an easie rate; and the 9th. and 10th. Commandments are in so little regard with them, that it is their daily Practice to inveigle their Neighbours Servants, and defraud them of their Possessions by clandestine means; and this they do with so much Subtilty, that 'tis past all imagination, how a People otherwise so barbarous, should be so dexterous in these evil Practices.

Concerning their Doctrine of the Holy Trinity, they profess, That God the Father will bless us with eternal Salvation, for *Jesus Christ* his Son's sake; and that ever since the Fall of *Adam*, even the Just was delivered up into the Power of *Satan* till their Redemption was accomplished by the Resurrection of *Christ*. They believe *Jesus Christ* to be both God and Man, and the only Mediator and Foundation of our Salvation, in Conjunction with God the Father, by whom he was sent upon Earth; That he suffered death by his own Will, and by his own Power arose again and ascended into Heaven. That after his Ascension he sent his Disciples and Apostles to Preach the Gospel, and that he will appear again to judge the quick and the dead. They declare the *Holy Ghost* to be in an equal degree with the Father and the Son, in his Glory, Power, Operation, and Will, but that he proceeds only from God the Father, and not from God the Son; They believe that we are all one in *Christ*, the Faithful composing one Body by the Faith and the keeping of the Commandments of *Christ*; That we are justified and saved by his Merits, yet not without the custom of good Works, without which, they say, we cannot hope to enter Paradise, tho no body practise them less than they. In outward shew the *Muscovites* pray with a great deal of Devotion, tho' it be certain, that not one in ten can recite the Lord's Prayer, which they say was instituted for the use of Persons of Quality, and not for Mechanicks, and that it is enough for them to repeat the *Gospodi*, or *the Lord have mercy upon us*. They also pray for the dead, not that they believe a Purgatory, but that it is a means to make the Souls to attend the day of Judgment with the more tranquility.

Upon Baptism they look as a thing absolutely necessary to Salvation, which is the reason the poorer sort have their Children baptized as soon as they are born, but the richer sort are not so very forward. They always baptize their Children in the Church, unless there be some weighty reasons to the contrary. They consecrate the Water first, and chuse no more than two God-fathers for the first Child, who are obliged to stand to all the rest as long as they live; and tho' a Child be in never so much danger of dying, it can't be baptized except by the Priest, which is performed in the Name of *God the Father, the Son and the Holy Ghost*; after the Father and the God-fathers have renounced the Devil and all his Works, and the Priest has exorcised the Child without the Church door; it being their constant Opinion, that the Devil is actually entred into the Child, wherefore they won't have the Church prophaned at his going out. After Baptism the Priest hangs a Cross of Gold, Silver, or Tin about the Child's Neck, which he is to wear to his dying day, and such as are found without it at the time of their Death are denied Christian Sepulture, he also assigns him a certain Saint for his Patron. Those that change their Religion, and are rebaptized, are plunged three times in the next River.

The *Muscovites* receive the Holy Sacrament with abundance of Devotion; they have two sorts of Bread which they use in their Communion, which must be unleavened, and bak'd by a Priests Widow that is past Child-bearing. One of this kind of Bread is for such as are sick, the other for those who receive the Communion at Church. The first they consecrate on *Holy Thursday* only, and is kept all the rest of the Year in a wooden Box till they want it; The other is consecrated at the Mass; they mix, as we told you before, warm Water with the Wine, *because*, says they, *Blood and Water did flow from our Saviours Side*, in this they steep the pieces of Bread, and consecrate them together, after which they believe it to be the real Body and Blood of Christ. They give both kinds at once to the Communicants, the Priest pronouncing these words: *This is the true Body and Blood of Christ, spill'd for thee and many more for the Remission of thy Sins, as often as thou receivest it, do it always in commemoration of Christ. God grant thou may'st receive it for thy Salvation.* They communicate on *Saturday*, after having prepared themselves by Fasting, and making a Confession of their Sins. Some of the *Muscovites* keep their Beds all that day, to avoid the committing of any Sins: they also give the Communion to little Babes, but only half the quantity, unless they are come to the 7th year of Age. They also give it to dying Persons after the Extreme Unction, which they use in the same sense as the *Roman Catholicks*. After the sick Person has received the Communion, they give him neither Food nor any Remedies, unless there be apparent signs of his Recovery. No body is admitted to the Holy Communion, but what has prepared himself by the Confession of all his Sins, and fasting 8 days before; during which, they ought to live upon nothing but Bread and Small-beer. The Rules to be observed in the *Muscovite* Fasts are, (1.) To abstain from Flesh and all that has any relation to it, as Eggs, Butter, Cheese, Milk, and such like. (2.) To abstain from strong Liquors. (3.) To abstain from the Pleasures of Marriage. If the *Roman Catholicks* were ty'd up to such hard meat in their Fasts, the *Muscovites* would have no occasion to ridicule them, as they do. Besides their ordinary Fast-days, they keep four great Fasts in the Year; the first is of 40 days before *Easter*, the same with the *Lent* of the *Romans*: They have also a kind of Carnaval, which lasts 8 days, and is call'd by them the *Butter-week*, because after these are expired, they are forbidden to eat either Butter, Eggs, Cheese, or Milk. The second begins 8 days after *Whitsuntide*, and ends at the Feast of St. *Peter* and St. *Paul*. The third is kept in Honour of the Virgin *Mary*, and begins *August* 1. and holds till the Feast of the *Assumption of the Virgin Mary*. The fourth begins *Novemb.* 12. and continues till *Christmas*. They make this difference betwixt these Fasts, that they look upon the first as commanded by Christ, and upon the other three only as a humane Institution, to mortifie their Bodies by Abstinence. During the time of their *Butterweek*, or Carnaval, they commit almost incredible Excesses in Drinking, which draws them into all manner of Crimes; so that it is not safe for any body to pass the Streets, Murthers being so frequent at that time in the City of *Muscow*, that I have seen some hundreds lying in the place where they expose the dead Carcasses of murthered persons to publick view, that their Friends may take care for their Interments; which are perform'd here with a great deal of very odd Ceremonies, as is evident from the Accounts given us by those who have visited those parts, and therefore needless to be repeated here. As to the state of the Soul, after the same is separated from the Body, they believe, That the Death of a Christian is no more than a Distemper, which having deprived him of this Life, makes way for him to enter into an eternal Paradise without being molested by the evil Spirits dwelling in the Air; who finding the Souls of the Just as bright shining as the Sun by the good Works they have performed upon Earth, have no power to oppose her passage. They believe that this Grace is acquired to us by the Birth and Incarnation of *Jesus Christ*, even the Righteous being before that time involved in eternal misery: This they pretend to prove by St. *Paul's* words, (*Rom.* 5.) when he says, *That Jesus Christ has by his coming upon earth broken the power of death, delivered the righteous out of Hell, and carried them in triumph with him into Heaven.* Upon which Head they say, that the Souls of the Righteous do till the Day of Judgment dwell with the Angels of Peace, and those of the Unrighteous with the Angels of Darkness, the first spending their time in praying for the approach of the Day of Judgment, that they may satisfie themselves in the Contemplation of God, the others living in continual terror of their approaching Damnation: all which sufficiently shews, that they will admit of a Purgatory in the same sense as the *Roman Catholicks* do. We will conclude this Treatise with giving you the main Points in which the *Muscovites* differ

differ from the *Greek* Religion, though they boast themselves to be the true Off-spring of that Ancient Church. (1.) They don't admit the Preaching of the Gospel. (2.) They don't look upon other Christians as such, and therefore re-baptize them, if they embrace their Communion. (3.) They allow divorces upon slender Pretences. (4.) They despise a second and third Marriage, and make the fourth Criminal. (5.) They pay divine Veneration to their *Czar*. (6.) They put too great a value upon a Monastick life. (7.) They have banish'd Musick out of their Churches. (8.) They attribute a secret Vertue to their Bells, in reference to divine Service. (9.) They have too large an Opinion concerning *Free-will*. (10.) They reject the Ten Commandments. (11.) They worship the Images of the deceased Saints. (12.) They don't keep their Holy days with any real Devotion. (13.) They don't punish Adultery. (14.) They deny that the Holy Ghost proceeds at the same time, both from Father and Son. (15.) They maintain a gross Ignorance in their Religion, there being few among them, who learn to say the Lord's Prayer, and the Apostle's Creed. (16.) They pray for the Dead. (17.) In their Communion they make use of leavened Bread, and warm Wine and Water mix'd together. (18.) They give in the Holy Sacrament the Body and Blood of Christ not separately, but all at once in a Spoon. (19.) They give the same also to Infants. (20.) They lay too much stress upon the exercise of good Works. (21.) They maintain, that the Righteous, were condemn'd to Hell before the Birth of Christ. (22.) They believe that the Souls of the Righteous don't see the Face of God, before the Resurrection. (23.) They give to the Dead a certain Testimonial of their good behaviour in this World, sign'd by the Patriarch or Bishop of the place where they die, to serve them as a pass to be given to St. *Peter*.

TRAVELS

Into divers Parts of

ASIA and *EUROPE*,

Undertaken by the *French* King's Command, to discovera New way by Land into *China*; by Father *Averil*, of the Order of *Jesus*. Done out of *French*.

CHAP. VIII.

Father Averil's *Travels into* Armenia.

1685. AMONG all the Eastern Countries, which have received the Gospel, the Kingdom of *China* deserves our particular care, by reason of the great Number of *Proselytes*, who from the darkness of *Paganism*, are brought over to enjoy the Light of the Christian Religion. And as either by Age or other Infirmities, those who labour in the Vineyard of Christ in those Parts, are diminish'd in their number every Year, the vast extent of the Country, in which they have planted the Christian Faith, requires a constant aid and supply for those who are not able alone to bear the Burthen that lies so heavy upon their Shoulders. 'Tis true, no care had been wanting of late years, to supply this defect, by sending from time to time New Missionaries into those Parts, but, what with Pirates, Shipwracks, Diseases and other Inconveniencies attending such long Navigations, it having been found, that (according to the exact Computation of Father *Couplet*, who lived a Millionary 30 years in *China*) of 600 *Jesuits*, who were since the reception of the *Jesuits* in *China*, sent thither by Sea in that quality, not above 100 arriyed safely there; the best expedient, to remedy so great a loss for the future, was thought to find out a Passage by Land into *China*; As every body who had any share in the Conversion of Infidels, was very forward to Contribute what in him lay to promote so good a design, I was one of those who presented my self to Prosecute it, with all my Power, and having receiv'd Encouragement suitable to my endeavours from the Superiour Powers, I have for these 5 years last past, with a great deal of toil Travelled all over *Turky*, *Persia*, *Armenia*, the *Southern Tartary*, *Muscovy*, both *Persia*, and *Moldavia*. After I left *Paris*, I went to *Monmontre* where in Company of Father *Couplet* being got to *Lyons*, I left him there and continued my Journey to *Marseilles*, where having met with a Brother, a Priest, spurr'd on with the same design of propagating the Christian Religion in the Eastern Countries, we both embark'd in a Vessel of St. *Malo's* bound for *Civita Vecchia*, and in a few days, happily arriving there, continu'd our Journey to *Rome*. Father *Charles de Novelle*, then General of the Jesuits, was very ready to grant our request, and having admitted my Brother into the same Society, we made all the haste we could to *Leghorn*, where we embark'd in a

1685. Vessel the 13th of *Jan.* 1685. bound for the East in Company of a Man of VVar, call'd the *Thundering Jupiter*, with so fair a Gale, that the next day we lost sight of the Isles of *Capraja*, *Elba* and *Sardignia*. But this happiness did not last long, for after a calm of some days, we were 21 *Jan.* surprised by a most dreadful Tempest within sight of the Isle of *Candia*, which brought our Vessel into so deplorable a Condition, that the Sea-men being quite tired out with the continual Fatigues, began to give us all over for lost; VVe did all we could to Encourage them, not to despair, and to have recourse both to their Prayers, and usual Labours, which had such an Influence over them, that after many had made their Confession and received the Sacrament in Honour of the Blessed Virgin, they began afresh to make good the Vessel against the Violences of the VVaves, and the Violence of the VVinds abating (which was soon after silenced by a calm) we steer'd our Course towards the Isle of *Cyprus*, with such Success, that within 2 days after we discovered that Coast, and as we had agreed with the Man of VVar, before our Departure from *Leghorn*, to meet in the Road of *Lerneca*, in that Island, we came to an Anchor the 25th of *Jan.* But not meeting there with the *Thundring Jupiter* as we expected, she being the nimbler Sailer, we put into *Lerneca*, not questioning but that we should learn some News from her, ere long. *Lerneca*, (if one may guess by the spaciousness of its Ruins) was formerly of very considerable extent, but is now no more than a Village, seated about a quarter of a Mile to the S. from the Sea-shoar of the Isle of *Cyprus*, being inhabited by some Merchants, who drive a considerable Trade here. There are two Convents here, one belonging to the Fathers of the *Holy-Land*, who were *Spaniards*, and the other to the *Capuchines*, who being *French*, we were kindly Entertained by them, which made us forget part of our past hardship.

1685.

500 Jesuits lost going to *China*.

A design of finding out a way by Land into *China*.

1685. The Author sets Sail from *Leghorn* for the East.

They are surprised by a Tempest.

Come to an Anchor in Road.

Fertility of the Isle of *Cyprus*.

This Island may for Fertility and Plenty compare with any part of the VVorld, their VVines being very Excellent, and the Fruit extraordinary Delicious; Of VVild fowl they have vast store, and among the rest those call'd *Francolins*, or a certain Red-legg'd Fowl, of which they have two kinds, those that live in the high grounds being not unlike our Partridges, the second living near the Rivers, and feeding upon Fish. The only thing that seems to be wanting here for the Necessity or Conveniency of humane Life, is fresh water, of which there is no more than one Spring in the whole Island, and that near the Sea-side, notwithstanding which it has a sweet and agreeable Taste; all the rest are brackish.

Some Passengers put their Curiosity.

The Curiosity some of our Passengers had to take a view of a little Fort, very carelelly guarded by the *Turks* near the Sea-shoar, had like have cost them very dear, for one of the *Turkish* Soldiers perceiving them at a distance to enter the said Fort, call'd to his

and

1685. aid some of his Companions, and fell upon them with Cudgels, with such Violence, that had it not been for some of the *French* Consuls Servants, who by chance, but very luckily, came that way, they had been in danger of having their Brains knock'd out. Some few days after the *Thundring Jupiter* arriving, we reimbark'd, in order to steer our Course in Company of another Vessel from *Marseilles*, we met with in the Road of *Lerneca*, for *Alexandretta*. Having a fair Wind, we soon found our selves at *Nore* just against the Gulph of *Alexandretta*, near the Entrance of which is a Cape or Point of Land which jets out a great way into the Sea, call'd by the *Arabians*, *Canzir*, or the *Wild Boar*, because it resembles a Wild Boars-head. But as we were endeavouring to double the Cape, an unlucky accident befel us by the carelessness of our Pilot, who with an intention to give notice to the other Vessel, what Course they should take, bore up so near to it, that by the Current the 2 Ships ran foul upon one another, and the Rigging being entangled, we were in imminent Danger of being lost, had we not prevented it, by cutting our Masts, Yards, and Tackle; By this means having disentangled our selves, we arrived the next day safely in the Port of *Alexandretta*.

They arrived at Alexandretta

This Town, which is by the *Turks* call'd *Scanderoon*, lies in an unwholesome Air upon the Sea-shoar, by reason of a ridge of Mountains, which enclose it on the Land side, and consequently hinder the free Passage of the Air, to qualifie that which comes from the Sea, and is very thick, which causes malignant Distempers in the Summer. Notwithstanding which we were forced to continue here 3 whole Weeks, the continual Marches of the *Asiatick* Soldiers towards *Constantinople*, rendering the Roads at that time very unsafe thereabouts. The first thing we saw worth our Observation here, was one of the flying Messengers sent immediately after our arrival to *Aleppo*, to give notice of it to the Merchants in that place; which is done thus: Against the time, that the Merchants of *Aleppo* expect any Foreign Ships to come to *Scanderoon*, they send by a Servant a Pidgeon, which has Young ones, to one of their Correspondents there; who having inform'd himself of what Goods the Vessel has brought, and what else is thought necessary to be known, writes Letters of advice about it, which being fastned to the Pidgeons Neck, she is carried to the top of a Hill, whence without fail she goes to *Aleppo*. The Pidgeon we saw let go, soar'd very high, without question, to discover which way she were to fly, and within 3 hours, arriv'd at *Aleppo*, which is 30 Lgs from *Scanderoon*. But all sorts of Pidgeons are not alike useful for this purpose, there being a peculiar kind, which are train'd up for this exercise, in most Factories of the *Levant*, where they are frequently made use of for that Service. We saw at a distance the Pyramid, which not far from this place was erected in remembrance of the miraculous Deliverance of *Jonas*, who as it is supposed was thrown out upon this Shoar; but as the Vagabond *Arabians* make the Roads very unsafe hereabouts, we were contented to see it at a distance.

A Pidgeon sent with Letters to Aleppo.

The first *Thursday* in *Lent* being appointed for our Departure, we join'd with a *Caravan*, consisting of 40 Persons bound for *Aleppo*; and accordingly under the Conduct of a certain *Turk*, whose honesty we were all well satisfy'd of, made the first day only 4 Lgs to the Village of *Beilan*, and the next day cross'd the most Fertile and Pleasant plain of *Antioch*, being near 67 Lgs long, watered with many Brooks, and covered all over with Cattle, the Pasturage being so good and plentiful here, that the Cattle are brought thither from all the Circumjacent places to be fatted. We pass'd the River *Orontes*, the same day, and took up our Quarters the same Night in a Village of the *Curdes*, which as it is said, has given its Name to that Nation, who living upon Rapine and Plunder, we were forced to keep a strict Guard, for fear of a surprise. Our next days journey proved very troublesome, by reason of the raggedness of the Roads, and what increased our grief, was to behold the Ruins of so many goodly Ancient Monasteries, which were in former Ages the Receptacles of so many devout Persons; we also discovered at a distance the famous Pillar, erected in Memory of the rigorous Penance perform'd there by *Simon* the *Stylite*. We arrived in good time at *Aojar*, a large Borough, where the Conducter of our *Caravan* treated us at his own House.

Sunday the 11 of *March*, we arrived at *Aleppo*, where we were received with more than ordinary Demonstrations of joy and kindness by the *Jesuits*, and the Superior of the Missions of *Syria*, having represented unto me the great necessity of sending some Missionaries into *Curdistan*, I was prevailed upon, (notwithstanding the great desire I had, to go into *Persia*, and thence into *China*, and the great grief at the separation from my Brother; who was design'd for the same Mission, but now likely to go another way) to consent to go for some months into that Country, pursuant to which Resolution, I made every thing ready for my Departure, with a numerous *Caravan*, which was just then preparing to depart for *Betlis*, the Metropolis of *Curdistan*; among others that were going with this *Caravan*, one who professing himself a *Roman Catholick*, and a particular Friend to our Society, and being well versed in the Eastern Languages, which I then understood not, offered me all the kindness that lay in his Power, which I being willing enough to accept of, I comply'd with his rigorous Observance of the *Lent*, feeding upon nothing but Biscuit, Dates, and some dry'd Fruits, the whole journey, which is near 250 Lgs. 1685. Come to Aleppo.

We left *Aleppo* the 24th of *March*, on *Thursday* in the Evening, (because the *Turks* look upon it as Ominous to begin a journey upon a *Friday*, and pass'd that Night but very indifferently, by reason of the hurlyburley of the People that composed the *Caravan*, who were busie in setting every thing for their best Convenience, which hindred us from sleeping. But next Morning by break of day every thing being put in good Order, the whole *Caravan* consisting of 200 Persons, left the *Caravansera*, or rather *Caverns*, where we had pass'd the Night, and after we had cross'd divers Desart Plains of *Syria*, in sight of the still famous City of *Edessa* (known to the *Turks*, by the Name of *Orpha*) we came to the Banks of the River *Euphrates*, over against the little City of *Bire* where we cross'd it in a flat bottom'd Ferry boat, being in that place about 300 Paces broad. We no sooner arrived here, but I was convinced by Experience of the Truth of what one of my Acquaintance, who had Travel'd in the *East* told me, that it was more convenient to make choice of a *Turk*, than a Christian for a Conductor, the last having neither so much Honesty nor Courage to protect you against the Impositions put commonly upon Travellers. Leave Aleppo.

The *Roman Catholick Armenian*, I spoke of, gave me I say sufficient proof of this, by combining with the *Turks* belonging to the ferry Boats, (the ordinary places where Customs are paid in *Turky*) and redeeming part of his Goods at my Expence; Besides this the Desart Plains of *Mesopotamia*, which we entred into soon after we had pass'd the *Euphrates*, and the rigorous *Lent* I was obliged to observe, put me so much out of conceit with the use of a *Caravan*, that had not my Intention been fully fix'd to pursue that great Work of the Conversion of Souls, I should soon have been overwhelm'd with the toils of the Journey.

For to give you a true account of the Use of a *Caravan*, you must be on Horse back with break of day, and so Travel till Noon, or till you come to a place, where you meet with some refreshment for Men and Beasts, where perhaps you tarry 2 hours, and Feast in the mean while upon a piece of Cheese, dry'd Fruits, or take perhaps a little Coffee, this done every body gets on Horse-back again, and so on they Travel till Night, when they encamp in a kind of an enclosure or entrenchment, which being surrounded with Ropes, the Horses belonging to the *Caravan* are ty'd to it, and the Baggage being put in the middle, every body gets as near to it as he can, and there having taken his place, eats perhaps a Plate of Rice for his Supper, and so goes to sleep. But, as in those Desarts the *Caravans* are frequently exposed to the danger of being robb'd by the *Arabians*, they have certain Persons appointed, who patrol continually in the Night time, and by hollowing give notice both to the *Caravan* and the Enemy, that they are upon their Guard. After 15 days journey from *Aleppo*, we arrived at *Diarbeker*, the Capital City of *Mesopotamia*, situate in a very pleasant Plain, upon the Banks of the River *Tygris*; It is surrounded by a goodly Wall, built by one of the *Greek* Emperors, and carries on a considerable Trade in Calicoe The use of a Caravan.

1685. lico and Goats Leather, with *Poland*, *Hungary*, and *Muscovy*. It was no small Comfort to me, after the Toil of my Journey, to see the People here to exceed in Affability and Courtesie most of the *Turks* in other Provinces, even their Wives being allow'd to go abroad a walking, and conversing with the Christian Women, a thing not allow'd of in any other Province of the *Ottoman* Empire. According to their wonted Civility, the Receiver of the Customs had no sooner understood that I was a *Frenchman*, and was desirous to take up my Lodgings in the Convent of the *Capuchins*, but he took care to have me conducted thither; and these good Fathers, who for these 15 Years last past have made very considerable Improvements there, by the means of their professing of Physick, received me with so much real Joy and Tenderness, as made me soon forget the Toilsomness of my last Journey. But what added most to my satisfaction, was the sight of Father *Barnaby*, a Jesuit, who being the first Person who by his Letters had instill'd into me those Sentiments I had concerning the Passage by Land into *China*, the Hopes of receiving full Instructions upon that Head from his own Mouth, could not but be infinitely acceptable to me, besides that we had formerly been very good Acquaintance, and belonged to the same College. But what with the change of our Habits, and the alteration of our Countenances after so long a Separation, we had several Meetings before we knew one another, till at last after an intentive Examination of our Features, we with an unexpressible Joy began to recal to Mind one another, and to renew our former Acquaintance. After the first Demonstrations of our mutual Satisfaction, I began to enter into the Discourse concerning his former Proposition of opening a new way by *Land* into *China*. He was so overjoy'd at the good Tidings I brought him, how his Project had been encourag'd in *France*, that upon the delivery of the Orders which I had brought along with me for that purpose, he could not refrain from Tears; and having imparted to me his whole Mind upon this Design, he soon engaged me to be his Companion in so great a Work, whatever Difficulties I might meet with in the Execution of it. But as he was at that time upon his Journey to *Aleppo*, and I was commanded to *Betlis*, we could not proceed any farther during our stay at *Diarbeker*, than to concert the best Measures for the Execution of our Design, with all possible Conveniency; and so each of us rejoining his *Caravan*, he took his way to *Aleppo*, and I, (after having pass'd the Stone Bridge over the *Tigris* a Mile from *Diarbeker*) that of *Armenia*.

The next time we had occasion to cross this River, had almost cost me my Life: For the Ferry-boat which was to carry us over, being a certain Machine composed only of many Goat-skins blown up, fasten'd, and join'd together, and the 4 sides with as many long Poles ty'd very close together, and covered afterwards with many Branches of Trees laid across. The Baggage being ferry'd over first, every one belonging to the *Caravan*, with the Bridle of his Horse (which were all unsaddled for the better conveniency of Swimming) got into the Boat as fast as they could; and as I was one of the most forward, and not forewarned of the Danger there was in pressing these Goat-skins too much, I happen'd to tread with my Foot upon one of them, which was not carefully enough covered with the Branches: But one of the Ferry-men perceiving my Error, without any more ado, threw me backwards upon the Bank of the River, where he made me tast the Effects of his Indignation.

An odd kind of Ferry-Boat.

However after we had pass'd the *Tigris*, we had another difficulty to surmount, which was another Chanel of the same River made by its overflowing its Banks, which being very broad, but fordable, I follow'd the rest on Horse-back; but was scarce come into the middle, when my Horse being none of the strongest, and not able to resist the Impetuosity of the Current, threw me into the Water, the Stream of which carrying me a good way below where the rest pass'd, I had the good Fortune to escape being trod to pieces under the Horses Feet, and by the help of some belonging to the *Caravan*, to be taken in time out of the Water. Having escap'd this Danger, we were threaten'd with another; for no sooner saw we our selves on the other side of the River, but we discovered at a distance a Body of 5000 or 6000 *Curds*, who being no less addicted to plundring and robbing than the *Arabians*, we were under an indispensible Necessity to ride as fast as we could possible for 6 hours to a certain Village for our Security, and I, all wet as I was, to follow them in a cold Season of the Year; which with the violent Shiverings, and divers Swoonings, reduced me to such a condition, that had it not been for the Charity of a Christian, at whose House I lodged the next following Night, and who omitted nothing that might recover my strength, I should not have been in a Capacity to continue my Journey the next Day, when after 2 Lgs Travel, we entred the Mountains of *Armenia*, and saw the Snow lie in some Parts as high as a Pikes length. 1685.

The Author like to be drowned.

Betwixt these Mountains is a narrow passage, thro' which we rode for a certain time, near a River that discharges it self into the Valley which divides the two Hills, where I observed a thing which appear'd to me very singular, but as the Inhabitants assur'd me, what happens every Year. This was a Bridge of Snow; for the Snow being by the Heat of the Sun dissolved in the Mountains, is carried with such Impetuosity into this River, that it makes a kind of a Mound, which stopping the Current for some time till the Water forces its Passage, makes a kind of an Arch; which being harden'd by the Frost, serves for a Bridge even to Beasts of Burthen, as long as the Cold continues. *A Bridge of Snow.*

We were for 8 Days together entangled in these Mountains, the Snow being sometimes so deep, that one or other of our Horses fell every step they took; and the Steepiness of the Rocks being such, that often we were forced to clamber up to them upon all Four, without any Path or Footstep; but at last we arrived safely at *Betlis*, the 22d of *April*, a Month after our setting out from *Aleppo*. I was very kindly received there by Father *Roche*, and spent great part of my time in learning the *Turkish* Language; but soon after received Orders to quit this Place, and to go to *Erzirum*, where there was a great Prospect of making a considerable Progress in our Mission, by the Authority of the *Bassa* of *Van*, who was very desirous to have a Jesuit to attend him as a Physician. I was very willing to submit to the Reasons alledged for this purpose; but as the *Emir*, or Chief Commander here, look'd upon us as very serviceable to himself, we had but little hopes that he would part with us so soon; and therefore saw our selves under an absolute necessity of quitting *Betlis*, without giving the least notice of it to any body: But in this we were prevented by the Christians, who having got some scent of the Matter, they made their Applications to the *Emir*, and told him so many advantageous things of us, that he sent for us, in order to engage us to stay at *Betlis*: But by the means of a Watch which I presented him with, we had the good Fortune to obtain leave to depart; and accordingly engaged with a *Caravan*, which was then ready to go from *Betlis* to *Erzirum*, with Merchandizes design'd for *Persia*. Our Journey which lasted about 8 Days, was not attended by any sinister Accident, except that 5 *Curds* at our passage over the *Euphrates*, surprized and drove away some of our Horses; and no sooner came we to *Erzirum*, but, to my great satisfaction, I met there with Father *Barnaby*, according to the Appointment he made me before in his Letter. *Arrives at Betlis.*

The City of *Erzirum*, or *Arzeron*, belonging to the *Turks*, is situate upon the Frontiers of *Persia*, in a most delightful Plain; which being 7 or 8 Lgs in compass, is inclosed by little Hills, which rising insensibly one after another, contain the Sources of three Rivers that I have seen of the 4 that the Holy Scripture assures us, to have watered the Terrestrial Paradise; which makes the Situation of this City one of the most pleasant in the World. Its bigness is near the same as that of *Marseilles*, fortify'd with a double Wall after the ancient manner, and a small Citadel, which being built upon an Ascent, commands the City. Its Suburbs are large and populous, the Air very wholesome, and they have great plenty of most excellent Water; which has invited thither many Inhabitants of all Nations, and especially *Armenians*, who retain a peculiar Respect for this City, as having been the Seat of their Kings. The Ruine of the Royal Palace, with some beautiful Remains of the Patriarchal Church, dedicated to St. *John*, being to be seen to this Day; and the good Disposition we found in the *Armenians* to quit their Schisms, was none of the least Motives, that made us conceive extraordinary hopes of this our Settlement here, which in effect proved so successful, that by the assistance of a certain Renegade (who had, notwithstanding this, retain'd *At Erzum.*

some

some favourable Inclinations for the Christian Religion, and had given great Recommendations of us to all such as he conversed withal) we were very well considered at *Erzirum*; the *Armenians* especially, to shew their Acknowledgment, ordered our Names, and the Day and Year of our Arrival to be inserted in their Publick Records; many among them renouncing their Schisms, and by their frequent coming to the Sacraments, and other Religious Exercises, giving us sufficient Proofs, that during our stay of 6 Months at *Erzirum*, our Labour had not been bestow'd in vain.

F. Barnaby goes to Irvan.

But as Father *Barnaby* and I were engaged in the great Design of propagating the Gospel among the *Tartars*, he went some time before me to *Irvan*, where his Presence was necessary for some time, for the better Establishment of a Settlement made there a few Years before by some of our Society; and to concert Measures with certain *Indian* Father (which frequently resort thither) for the more convenient Prosecution of our grand Design, whilst I pass'd some Months longer to attain to some Perfection in the *Turkish* Language.

An Earthquake at Erzirum.

At last having received positive Orders to quit *Erzirum*, the City was a few Days before my Departure surprized by a violent Earthquake about Midnight, which however continued not for above half a quarter of an Hour, but return'd tho' with much less violence for 8 Days after, much about the same Hour it began at first. The only Remedy the Inhabitants have against those Earthquakes (which are very frequent in *Armenia*, by reason of the vast number of Mountains) is, to live in Tents in the open Fields as long as these Shakings last; notwithstanding which they are surprized so on a sudden, that whole Villages with all their Inhabitants have been swallowed up by them; an Instance of which was given me in a Village not above 7 or 8 Lgs from that City.

The Earthquake being over, I made all possible speed to meet with *F. Barnaby*; but the Roads being very bad, and the desire I had to come to the Frontiers of *Persia* made me think this Journey very tedious, and had almost proved abortive by the Villainy of the *Turkish* Guards on the Frontiers, who finding by my Equipage that I was no Merchant, and consequently took me for some Person of Note under a Disguise, were resolv'd to satisfie their Avarice by squeezing a good Summ of Money out of me; which I refusing to comply with, they told me, that they would secure me, and carry me for a Spy to the *Bassa* of *Kars*, where I might perhaps pay with my Head for my Stubbornness. But as by this time I was well versed in the *Turkish* Language, and well inform'd of the Customs of these sort of People, I told them that I was not to be bugbear'd by these Menaces; and that as for the *Bassa* of *Kars* I had no great reason to fear him, because I had seen his Head some Days before carried towards *Constantinople*; which so daunted their Courage, that they let me pass with the *Caravan* the next Morning; and we soon after entred the Borders of *Persia*, extremely well satisfied with the Civilities we receiv'd from the Inhabitants there, who congratulated our happy Arrival there, and the good Fortune we had in escaping the Hands of the *Turkish Harpies*. As there is a mortal Antipathy betwixt the *Turks* and *Persians*, founded not only upon Reasons of State, but also upon the different Interpretations these two Nations have received of the *Alcheran*, and some other Religious Ceremonies (too long to be inserted here) these last were so greatly overjoy'd at the News they received from us of the Victory obtained by the Christians against the *Turks*, that they made Illuminations and Bonfires; but what comforted me most, was, that the nearer we came to *Irvan*, I saw several Crosses erected upon the Roads leading to that City, but especially at a certain large Burrough of the *Upper Armenia*, call'd *Ichiriazin*, 4 Lgs from *Irvan*. The *Turks* give it the Name of *Leckliſſe*, i. e. *Three Churches*, because it has 2 other Churches, near the great one from whence the Place takes its Name.

Ichiriazin the Primipal seat of the Armenians.

This great Church, where is the Residence of the Patriarch of the *Armenians*, within a fair Monastery, containing about 50 or 60 Monks, is built within the Enclosure of the said Convent in a very fair Court; the Cells of the Monks, being built round about it in form of a Half Moon. It is dedicated to the *Incarnate Word*, which (according to Tradition) gave the Draught of it to St. *Gregory*, sirnam'd the *Illuminator*, who was constituted the first Patriarch of the *Armenians* by Pope *Silvester*. The other 2 which are not so magnificent, and about 800 Paces each from the former, are consecrated to 2 holy *Roman* Virgins, *Ripsima* and *Cayana*, who flying for shelter into *Armenia* during the 9th Persecution, suffered Martyrdom in the same Places where these Churches stand. The great Church has a great number of consecrated Vessels, Crosses, and Lamps, both of Gold and Silver belonging to it.

In our way from *Ichiriazin* to *Irvan*, we had a sight of the famous Mount *Ararat*, where *Noah*'s Ark is supposed to have rested after the Deluge. *Strays* makes this Mountain not to be above 50 Lgs from the *Caspian Sea*, whereas it is at least 150 Lgs; but the fabulous Relations he gives us of his Passage over this Mountain, which according to the best Account I received of it during my stay at *Irvan*, is inaccessible, gives us great reason to believe that he is frequently upon the Romantick Strain in the Relations of his Travels. Journal of his Travels.

CHAP. IX.

Father Averil's *Travels into some Parts of* Tartary.

NOtwithstanding I was, as I told you, retarded for some time in my main Design of finding out the way by Land into *China*; yet meeting happily again with F. *Barnaby* at *Irvan*, we both left no Stone unturn'd to prosecute our Design; and after diligent Examination of those several Roads which lead into *China*, we at last pitch'd upon that of *Astrachan*, as the safest and most convenient of all the rest, because we were sure to meet there with some *Caravan* or other, which go from thence 3 or 4 times a-year for *Bokara* or *Smarnand*, whither the *Muscovites* and *Toasbees* drive a considerable Trade. Accordingly having made what Preparations we thought fit, especially of such Ornaments, as belong to saying Mass, we left *Irvan* the 23d of *April*, 1686. being clad in *Georgian* Habits (which is in great Esteem among the *Persians*) in the Company of 2 *Armenian* Merchants, who were to conduct us to *Gangea*.

The Author leaves Irvan. 1686.

The Night before our Departure we felt the Effects of a violant Earthquake, about 8 in Evening; but as it lasted but a Moment, it more alarm'd than hurt us, and after having Travell'd 4 Lgs the first Days Journey, we lodged that Night at the House of an *Armenian* Catholick in a goodly Borough, where F. *Barnaby* was stung by a *Scorpion*, as he was asleep upon Carpets laid for us, according to the Custom of the *Eastern Countries*. This Accident put me into an extraordinary fright, which however soon past, when I saw my Companion squeeze the *Scorpion* it self (the most Sovereign Remedy against his own Poison) upon the affected part, which being afterwards covered with a little Treacle, he rested so quietly the remaining part of the Night, that we continued our Journey the next Morning, and without any sinister Accident entred the Province of *Gurgistan*, which being a Country very populous and pleasant, and inhabited by many Christians, we travell'd with a great deal of ease and pleasure for 4 Days successively; when we came within sight of that long Ridge of Mountains, which divide *Persia* from *Georgia*, and on this side of it, with a Lake of about 80 Lgs in circumference, which affords the largest and best Salmon Trouts in the World. In an Island of this Lake, the *Armenians* have a very convenient and pleasant Monastery, whither the *Armenian* Patriarch commonly Gurgistan.

banishes

banishes such Monks, as have been found guilty of some Enormity or other. Having travell'd for a whole day along this Lake, we entred the Mountains, which being covered with little Woods and Groves, and full of Wild fowl, our Passage over them was Pleasant enough, till coming into a Christian Village, we were Alarm'd by the Inhabitants, who advised us to make the best of our way unto an adjacent Hill they shew'd us, to avoid the falling into the hands of certain Tories, who infested these Roads for some-time; Neither was it long, before we found part of what they had told us to be nothing but Truth; for, no sooner were we got to the top of the said Hill, but we saw a good Troop of *Armenians*, some with Slings, others with Clubs, and such like Arms, to advance towards us; but finding us to look unconcern'd without the least shew of being told, that we were Missionaries going to *China*, they strove to out do one another in Civilities towards us; and inform'd us, that some *Georgian* Gentlemen having about 18 days before revolted from the *Chan* of *Tiflis*, were forced to quit their Horses, and keep in the Field, till they could make their Peace. Thus we continued our journey unmolested towards *Gangea*, where we arrived the next day in the Afternoon. The City of *Gangea* is one of the best of all *Persia*, situate in a very Pleasant plain 25 or 30 Lgs long, watered by the Conflux of a great many Rivers. As we arrived there in the very hight of the Spring, so we feasted our Eyes with that Infinite number of Groves and Trees, in the midst of which you see a multitude of Houses, which affords so delightful a Prospect at a distance, that the *Persians* have bestow'd upon it, the name of *the Garden of the Empire*. Its Market places are very spacious and magnificent, Vaulted all about, in which a Chamber is assigned for every sort of Merchandice, and this City by reason of its Advantageous situation for Trade is always crouded with Strangers. Just as we were coming into the place, we found the whole City in a hurlibury, occasioned by the reviling Expressions of a certain *Persian Mollah*, who having inveight against the *Turkish* Prophets, those of that Nation had taken up Arms, and invaded the *Mosques*, with intention to Revenge themselves upon the *Persians*, that were at their Devotions there: but the *Chan* having timely notice thereof took care to stop their fury. After a stay of 3 days at *Gangea*, we departed there with a small *Caravan* of Christian Marchants; towards *Schamachie*, crossing those most Pleasant plains which extend from one City to the other. In our first days journey we pass'd the River *Kur*, which rising in *Georgia*, and passing through several Pains, Disembogoes into the *Caspian-Sea*. The next day we were likely to have met with a stop in our intended journey, by the meeting with a *Persian Chapar* or Messenger sent by the *Chan of Schamachie*; and as these Couriers among many other Priviledges, have the liberty of taking away what Horses are necessary for him, from Travellers upon the Road, so this having surprised us in a Valley were we where baiting our Horses, he took the best of them, and went his way; but being call'd back, a piece of Money, which we slip't into his hands, made him so pliable as to restore it to us without any further trouble; Glad we had got of so well, we continue our journey without any further Obstacle to *Schemachie*, a City which might formerly challenge in rank among the best, and most populous of all *Persia*, till about 12 years ago it was almost laid desolate, by a most furious Earthquake; notwithstanding it is computed to contian as yet about 60000 Inhabitants; one half of which are *Armenians*, the rest *Persians*, *Indians*, *Muscovites*, *Georgians*, *Turks*, and *Circassians*, whom the vicinity of the *Caspian Sea*, and the goodness of the Country has drawn into those parts. It was this great Concourse of Strangers of all Nations, that made us wish heartily, that some Missionaries might be settled here, and we heard since that our Prayers proved not altogether ineffectual, a certain Father of our Society, named *F. Pothier*, being settled there by Count *Syri*, in his return from *Ispahan*. The Father *Pothier*, who was one of the most accomplished Missionaries of all the *East*, had by his exemplary Life, and charming Conversation drawn so many Disciples after him, that a certain *Mahometan* of that place, enraged at this Progress of the Gospel in opposition to his false Religion, found means in the Night time to rush into his Chamber, where he stabb'd and murthered him.

Our maine aim being at this time, the Passage by Land into *China*, we were not a little rejoiced to find our selves within three days journey of it. The *Caspian Sea*, which properly in no more than a great Salt Lake, of about 800 Lgs in Compass, made by the Conflux of above 100 great Rivers, besides an infinite number of lesser ones, which discharge their Waters into it; in return of which this Lake furnishes them with vast plenty of Fish, which in tempestuous Weather, when they commonly croud in Shoales to the mouths of the Rivers. Another Observation I had occasion to make; before we had the Opportunity to embark, was to see some Seamen fetch fresh water at 2 Lgs. distance from the shoar, which I could not Attribute to any other reason, but the discharging of so many fresh water Rivers into this Lake. But what has puzzled the Brains of the most refined Naturalists is, that, notwithstanding the continual access of the Waters of so many Rivers, this Sea is not considerably augmented, or ever transgresses as its Bounds; some have been of Opinion, that the *Black Sea* draws a considerable share of those Waters into its Bosom; but that ridge of Mountains, placed betwixt these 2 Seas by Nature, seems to separate them so far as not to admit if any probability for that Assertion. On the other hand there are 2 reasons, that rather incline me to believe, that this Lake, how far remote soever from the *Persian Gulph*, discharges a great part of its Waters there; The first is; That on the South side of the *Persian Gulph*, opposite to the Province of *Kilan* are dangerous whirlpools, the noise of which as the Water is thrown into the *Gulph* is so great, occasioned by the Rapidity of the Waters, that in calm Weather it may be heard at a great distance, and consequently, these *Abysses* are avoided by the Mariners. The second is, that by the constant Experience of those inhabiting near the *Persian Gulph*, it is confirm'd, that at the end of every autumn, they observe a vast quantity of Willow Leaves thereabouts; and it being beyond all Contradiction, that this sort of Tree is not so much as known in those Southern parts of *Persia*, whereas the Northern parts bordering upon the *Caspian Lake*, and especially the Province of *Kilan* are stor'd with them near the Sea-shoar; it is more than probable, that those Leaves are not carried by the Winds from one extremity of the Empire to the other, but rather with the Waters, that carry them along through the Subterraneous Channels and Caverns to the before mentioned *Gulph*. We embark'd upon this Lake, but slenderly equipp'd but a favourable *East* Wind, and the pleasing Season of the Year, supplying the defect in an ample measure. We set sail from the Road of *Nizzava*, (a very convenient Harbour, by reason of the great plenty of Wood and Provisions, for the refitting and refreshing of Ships) and arrived after six days sail at the Mouth of the River *Wolga*, which we discovered by the freshness of the Water, for which he that discovers it first, receives a certain reward among the *Muscovites*, as in other places the Sea-men, who first discry Land. We had no sooner entred into one of the Channels of the *Wolga*, but we struk upon a sand Bank, which not a little surprised me at first, but the same being repeated several times afterwards, I imputed it rather to the shallowness of the River, than the want of care in the Mariners; However these accidents were so troublesome to us, that we were twice as long coming from the Mouth of the River to *Astracha*, (which lies not above 12 or 13 Lgs thence) than we had been in coming from *Persia* to the River.

A Description of the Caspian Sea.

Coming to the place where the *Muscovites* keep a great Fishery (out of the Revenues belonging to the *Czar*) we had orders to stop for 2 or 3 days, till we heard further from the Governor of *Astrachan*, and in the mean while spent our time in seeing the *Muscovites* catch their Strugeons; which is done in the following manner; They have driven in one of the Channels of the *Wolga*, which affords the most Fish, long Piles of Timber from one side of the Bank to the other, leaving only on one side as much Room, as serves for the Passage of Ships; little above this first row of Piles, they make others in the form of a Triangle, into which the Fish being forced by the violence of the Stream, can't only get out; but scarce bestir themselves, by reason of the narrow Compass of these Triangular Pile-works, and the bulk of their bodies. The Fisher-men who are employed thereabouts

abouts in beating the Water to frighten the Fiſh into the Trap, viſit theſe encloſures twice a day, where they ſeldom miſs of any Fiſh, through the Ears of which they thruſt a great hook, by which having drawn them above the Water, they knock out his Brains with a Hammer, and ſo carry what Fiſh they have got to the Banks of the Fiſhery, where they are gutted, and the Eggs, (of which one Sturgeon has ſometimes 200 or 300 pound) are ſalted and made into a paſte, which being known in *Europe* by the name of *Caviar*, is uſed in many Countries as a Ragou inſtead of Butter, during *Lent* time; The body of the Fiſh is ſometimes thrown away, ſometimes ſquezed for the Oile ſake, and ſometimes pickled in order to be tranſported into Foreign Countries. We were ſufficiently diverted in this kind of fiſhing, and paſs'd our time well enough, had it not been for the Gnats, which are in prodigious quantities upon the *Wolga*, and ſting both Men and Beaſt moſt prodigiouſly; of which we felt the effects more terribly than the *Muſcovites*, as being deſtitute of thoſe little Tents, they make uſe of to wrapt themſelves in, to avoid their Stings.

Caviar, how made.

They come to *Aſtrachan* 20 Jan.

At laſt, after a Plague of 4 days the Governour of *Aſtrachan*, ſent his Deputy aboard our Veſſel with Orders to come aſhoar, in a Chaloop he brought along with him for that purpoſe, which being very light and well managed by the Rowers, we ſoon got ſight of *Aſtrachan*. This City which according to the Opinion of the beſt Modern Geographers, lies at 48 deg. of N. Lit. is ſeated in one of the Iſles of the River *Wolga* about 13 Lgs from its entrance (though *Struys* would make it 50 Lgs remote thence) being fortified with a double Wall and ſome Towers, half Muſquet ſhot from one another. It is well provided with great Cannon, and a numerous Garriſon; the ground upon which the City ſtands being very gravelly. The heats are almoſt inſupportable here in the Summer, but produce great ſtore of excellent Fruits, and among the reſt moſt delicious Melons, eſpecially thoſe Water Melons, they call *Karpous*, which cool and ſquench drowth, without the leaſt fear of ſurfeiting. They have alſo Grapes, which afford them Wine, but is ſomewhat ſowriſh, beſides which they labour under this inconvenience upon this ſcore, that no body dares to gather a Grape from his own Vines, before the Governour of the place has made choice of the beſt for the *Czar*'s uſe. It is for the moſt part inhabited by *Muſcovites*, the *Armenians* and *Nagajan Tartars*, have each of them a peculiar Suburb, where they inhabit ſeparately. That of the laſt is ſurrounded with a wooden Rampart, and commanded by its peculiar Governour, who nevertheleſs receives his Orders from the *Waywode* or Chief Governour of *Aſtrachan*. Within this part ſtands alſo a *Moſque*, but the Houſes of theſe *Tartars*, of which there may be about 1000, are for the moſt part of Bullruſhes.

The *Nagajan Tartars*.

The *Calmuc Tartars*.

Not many Years ago the *Calmuc Tartars*, uſed conſtantly every Winter to make their Incurſions under the favour of the Ice and Snow, upon thoſe *Nagajan Tartars*, but as the *Muſcovites* uſe theſe laſt rather as Confederates, than Vaſſals, they have ſo Powerfully protected them by the help of their Cannon and Fire-arms, wherewith the *Calmucs* are but little acquainted hitherto, that they have of late Years, deſiſted from theſe Hoſtilities, and ſettled a good Correſpondence with the *Muſcovites*; notwithſtanding which they retain their ancient Cuſtoms of viſiting the great Plains between *Aſtrachan* and the *Caſpian-Sea* once a Year, with a body of 100000 Men, to get ſome Proviſions for their Cattle, in the more Southern parts, and to fetch the Preſents, which the *Muſcovites* rather chooſe to give them, than to put themſelves to the Charge of maintaining an Army againſt them; beſides that they are very ſerviceable in furniſhing the *Czar* with Horſes and Men in caſe of need. I happened to be at *Aſtrachan*, when theſe Vagabonds came into the Plains, to give their annual viſit, and to demand the uſual Preſents; which the Governour of *Aſtrachan* ſent forth with to their Commander in Chief, conſiſting in ſeveral Waggons loaden with Bread, *Karpons*, *Aquavitæ*, and Tobacco. Beſides theſe, there are many *Benjans* at *Aſtrachan*, who being a Generation altogether addicted to Traffick, contribute not a little towards the flouriſhing Condition of the City of *Aſtrachan*; where they have their peculiar Quarter aſſign'd them, and the free exerciſe of their Idolatrous Religion, they being *Pagans*; for the reſt they believe the Tranſ-

The *Benjans*.

migration of the Soul, which is the reaſon they will not feed upon any living Creature, but for Cows they have ſuch a reſpect, that there is ſcarce a Family but what breeds and feeds one with the ſame care as they do their Children, and if they know one that is to be kill'd, they will redeem it by buying it of the owner. They ſeem alſo to acknowledge ſome divinity in the four Elements, for before they touch any Victuals they throw ſome ſmall part thereof ſeparately into the Fire, Air, Water, and upon Earth.

A *Bokara* Merchant gives them ſome inſight into the Paſſage to *China*.

As we lodged in the Chief *Caravanſera* of Foreigners, there we met with ſome or other of all Nations in the World; and among the reſt with a certain *Tonsbeck* Merchant of *Bokara*, who having travelled 4 times from that City to *Peking*, was able to give us ſome Light, of what we ſo earneſtly deſired to know. He poſitively aſſur'd us, that the Road from the *Tonsbecs* to *China*, was neither ſo difficult nor ſo vaſtly diſtant as many People were apt to imagine; and though they were to paſs through ſeveral Deſarts, the ſame were no more troubleſome than thoſe Travellors after meet with in *Perſia* and *Turkey*, againſt the Inconveniencies of which the *Caravans*, provide themſelves with Proviſions and other Neceſſaries; He further told us, that we ſhould meet with many Places of refreſhment, and among the reſt with ſeveral *Hordes* of *Tartars*, who not knowing the value of Money, would be ſo far from doing us any injury by plundring or otherwiſe, as is frequently done by the *Arabians* and *Curds*, that they would be glad to furniſh us with what they had. He further told us, that he could not be poſitive as to the exact diſtance between *Bokara* and *Peking*, neither as to the number of Towns and Villages, through which they paſs'd, but I am ſure, ſays he, they did not ſpend above 2 Months in their journey to the Borders of *China*, whether you take the S. E. Road, through the Cities of *Samarcand*, *Kabral*, *Kachemir* and *Barantola*, or go directly E. through the middle of the *Mogul Tartars*, who though *Pagans*, are ſubject to the *Tonsbec Tartars* that are *Mahometans*. If you take the S. E. Road, the firſt City of *China*, you meet with is that of *Soczi*, which affords the beſt Rhubarb in the World; and is a Months journey from *Peking*; If you take the Eaſtern Road, the firſt City you meet with belonging to the *Chineſes* is call'd *Kokuan*, built and fortified by them on this ſide the great Wall; and ſerves as a Bulwark againſt the *Calmuc Tartars*; thence you may travel in 15 days to *Peking*. But what the moſt care is to be taken of, added he, is, to which ever of theſe 2 Cities you come, to gain the Governour by the means of ſome Preſent, without which you will ſcarce get admittance into the Empire, though ſince the *Chineſes* have opened their Sea-ports to Strangers, they are not ſo difficult as they uſed to be formerly in this Point; This is the reaſon, that moſt Merchants to make ſecure work, engage by the way one or other of the *Taiſo's* or *Tartarian* Princes, through whoſe Territories they paſs, by the allurement of ſome inconſiderable Preſent, to ſend a kind of an Envoy or Deputy to *Peking*, under whoſe Protection, the Merchants, as well as others of their Train, paſs unmoleſted, and Trade without the leaſt Moleſtation in *China*. Thus much we learn'd from this *Tonsbec Tartar*, which agreeing in all reſpects with the other Relations we had upon that account afterwards, both at *Aſtrachan* and *Muſcow*, we could not but give Credit to it; And a certain *Muſcovite* Monk of good Repute living at *Aſtrachan*, ſhew'd us the Copy of a moſt curious Journal of 3 Merchants, which had travelled from *Aſtrachan* to *Peking*, keeping the Road over *Bocara* to *Samarcand*, in which journey they had ſpent no more than 111 days; and the Cities thro' which they paſs'd being exactly the ſame mentioned by the Merchant of *Bokara*, we were fully convinced that as to the certain diſtance from hence to *China*, we have been for along time under a groſs miſtake; And this is no more, but what has of late Years been diſcovered by a certain curious Perſon of our Society, well vers'd and very exact in Aſtromonical Obſervations, who by the poſition of the *Satellites* of *Jupiter*, perceived the error of ancient Geographers, who have placed *China* above 600 Lgs farther to the Eaſt than really it is, for, taking the firſt Meridan from the Iſle of *Fez*, they account *Peking* at 165 deg. of Longitude, whereas it ſhould have been only at 132. According to this Calculation (which is ſomewhat corrected in the Great *Planiſphere* in the *Obſervatory* of *France*, it is no very difficult task to compute the true diſtance, at

leaſt within a ſome few Miles, between *Bokara*, the Capital City of the *Tousbecs*, and *Peking* the Metropolis of the *Chineſe* Empire. For taking it for granted, as it really is, that *Bokara* lies at 93 degr. of Longitu. and *Peking* at 132. And that both (according to the general Opinion of the beſt Geographers) lie very near the 40 degr. of N. Latit. it is evident that the difference of the Longitude betwixt one and t'other, is no more than 40 degr. And ſecondly, that as you travel from one to the other, you muſt almoſt go all along in the ſame parallel. Now, ſince each degree of the *Æquator* of the Earth conſiſts of 20 Lgs, and every Lge of 3000 Geometrical paces, it muſt follow, that each degree of the 40th. parallel, containing no more than 15 Lgs, and 959 Geometrical paces, it is evident that the diſtance from *Bokara* to *Peking* in a ſtrait line, can be no more than about 613 Lgs, and to *Kokutan* the firſt City of the *Chineſes* on that ſide, no more than 463. This being Demonſtrable to every ones reaſon, it is eaſie to imagine, that the way by Land into *China* is both more ſafe and ſhort, than to go by Sea, let the Wind prove never ſo favourable; and though I am not inſenſible that unforeſeen Accidents and other Circumſtances, render the practical part much more difficult than the Speculative; yet from what Experience I have had in my Travels in the Eaſt, and what has been attempted by others, before we had ſcarce the leaſt Knowledge of this Paſſage by Land into *China*, as for inſtance by *Paul* the *Venetian* and *Benedict de Goes* a *Jeſuit*, who happily arriv'd in *China*, it may eaſily be inferr'd that at this time this Paſſage is not impracticable, eſpecially if it be conſidered, that the way from *France* to *Bokara* is known beyond all Diſpute, ſo that there remains no more than one 4th. part of the way to *Peking*. For the Voyage from *Marſeilles* to *Conſtantinople* is commonly perform'd in a month, thence to *Teflis* by the *Black-Sea*, about 8 or 10 days ſail more; and from thence to *Erzirum* no more than 7 or 8. From *Erzirum* to *Irvan* the *Caravans* go in 12 or 13 days, and thence to *Tauris* (the *Ecbatana* of the ancient *Medes*) much about the ſame time. From this City which is the ſecond in rank in the *Perſian* Empire, and famous for its Traffick all over the Eaſt, are 2 different ways to the *Tousbecs*; the firſt and ſhorteſt is through the Province of *Kilan* whither you may go in 3 weeks at moſt, and embarking upon the Southern part of the *Caſpian-Sea*, call'd the *Sea of Kilan*, you may enter the *Oraxus*, which waſhes the Walls of *Bokara*. The ſecond Road paſſes through *Iſpahan*, the Metropolis of all *Perſia*, which though the longeſt yet is the moſt Commodious, by reaſon of the many Envoys that are ſent continually from the King of *Perſia*, to the *Tartar* Princes of the *Tousbecs*, and from him again to the *Perſian* Court, to adjuſt the Differences, that ariſe frequently upon the Frontiers; by which means it is eaſie enough to ſlip into the Train of theſe Publick Miniſters, who commonly perform their journey betwixt the two Cities of *Iſpahan* and *Bokara* in 6 weeks time.

The diſtance between *Bokara* and *Peking*.

But to return to *Aſtrachan*; *F. Barnaby* and I having been made ſenſible that there was a Paſſage from *Aſtrachan* to we *China*, reſolved to take the Opportunity of the next *Caravan* of *Muſcovites*, which was preparing to go for *Samarcand*, a journey of 40 days, but as we were upon the point of leaving *Aſtrachan*, the noiſe of a War betwixt the *Tousbecs* and *Calmuc Tartars*, put a ſtop to our Departure for that time to our no ſmall grief; we were however ſome days after reviv'd with freſh hopes, by the Aſſurances of our Friends, who had received advice from *Muſcow*, that a numerous *Caravan* of *Chineſes*, being arriv'd there not long ago, were preparing to return into their own Country by the end of the Winter; As this News was confirm'd to us afterwards by ſeveral hands, all we thought we had to do for Proſecution of our intended journey, was to take the firſt Opportunity of going to *Muſcow*, in order to join the ſaid *Caravan*; which as it could not be done without a paſs from the Governour of *Aſtrachan*, we made our Applications to the *Armenians*, who came along with us out of *Perſia*. who being much eſteem'd in *Muſcovy* by reaſon of the great Traffick they drive there, ſpoke in our behalf to the Governour, and the ſooner to obtain what they deſired, told him many things to our Advantage, among the reſt concerning our extraordinary skill in Phyſick; this produced a quite contrary effect, for the Governour, who was extreamly careful of his Health, having a mind to conſult with *F. Barnaby*, (of whoſe care they had told him wonders) ſent for us to give him a viſit; We were not a little ſurpriſed at ſo unexpected a Compliment, upon divers Conſiderations, but eſpecially in reguard of what we had heard a certain Perſon ſay, who came with us in the ſame Ship to *Aſtrachan*, concerning the Cuſtom of the *Muſcovites* in drinking to a great exceſs, and looking upon it as the beſt Entertainment they can make for Strangers, to ſend them away well loaden with ſtrong Liquor; but as no excuſes would take place to avoid the viſit, we reſolv'd to go along with the Meſſenger, with a reſolution to avoid all poſſible means of committing any exceſs of this Nature. We were not a little amazed when coming into the Chamber prepared for our Audience, we ſaw a good number of Silver Flaggons and Cups ready prepar'd and fill'd with divers ſorts of ſtrong Liquors to receive us, and we began to be ſorely affraid when we ſaw the *Waywode* himſelf after the firſt Compliment, advance to give us the firſt ſalute with a good Cup; we were ſorely put to it, how to come off with decency, when a good thought delivered us from our fear; for knowing his humour, and how careful he was of his own Perſon, we were very careful to inſinuate to him, that theſe hot Liquors would infallibly prove his Deſtruction, and that they had already ſo enfeebled his entrails, that if he continued the uſe of them any longer, no Phyſick in the World would be able to reſtore him. The *Waywode* was ſo ſenſibly touch'd with theſe reaſons, that he not only deſiſted from taking any of theſe Liquors immediately, but being alſo willing to take ſome Phyſick by way of precaution, we ordered him ſome, which having a good effect, he look'd upon us as the only preſervers of his Health, and conſequently would not let us depart from *Aſtrachan*, detaining us for 2 months with ſeveral trifling excuſes, which though we were ſufficiently ſenſible of, and for that reaſon reiterated our Inſtances by our Friends, yet all proved in vain, he perſiſting in his former Courſe of rendring our Captivity tolerable, by divers excuſes, and many Civilities. At laſt finding him reſolutely bent to keep us from our intended great Work, which we valued aboye all things in the World, we took another Courſe, and knowing him to be a Perſon of no great Courage, we began to talk in another Tone, and to upbraid him with ingratitude for the many ſervices we had done him and his Family; this extorted at laſt the deſired Paſſport, which we had no ſooner obtained, but we took 2 places in a Merchants Ship, that was going to *Muſcow*; but ſcarce had we ſent our Baggage aboard, and were juſt ready to embark our ſelves, when an Officer belonging to the Governour brought us poſitive Orders to come aſhoar again, with an Expreſs command to all the Ships in port there, not to receive us aboard. It is eaſie to be imagined into what Conſternation this command put us, but knowing we muſt obey, we return'd to *Aſtrachan*, where, during this ſecond ſtay, we met with nothing but Afflictions, the dreadful Tempeſts which aroſe, and almoſt ſtifled the Inhabitants, with a thick and ſcorching duſt, the reports of the Plague, and a terrible bleeding of my Companion at the Noſe, made me almoſt loſe all hopes of ever coming to our intended journeys end. Knowing the hatred the Clergy of the *Greek* Church bore to the *Roman Catholicks*, we thought it in vain to have recourſe to their Interceſſion; yet, as we were forced to make a vertue of Neceſſity, and to leave nothing unattempted, we made our Application to the Archbiſhop or Metropolitan of *Aſtrachan*, who had ſhewn us great Civilities in the viſits we made him, and to the Superiour of the Principal Monaſtry of the Monks of the Order of St. *Baſil* at *Aſtrachan*, unto whom we had done ſome ſervice in expelling a Worm out of his Body by means of the Emetick Powder, and unburthening our ſelves to them with Tears in our Eyes, this wrought ſo good an effect upon them, that they reſolv'd to be our Mediators with the Governour; they ſo cloſely repreſented the injuſtice done to us, that being affraid of having the matter ill repreſented at Court, he recall'd his firſt Order, and commanded all the Maſters of the Veſſels to receive us, when and where we were inclin'd to go; Being willing not to looſe any time, we immediately agreed for 2 places, with the Maſter of a cloſe bark bound for *Saratof*, and the 9th of *October* was fix'd for our Departure. But within a few day before there happened ſo odd an Accident in our *Caravanſera*, of which being an Eye-

Eye-witness, I cannot pass it by in silence; For a certain *Benjan*, who bore a grudge against one of his Country Men, occasioned by an old Quarrel, taking the Opportunity whilst he was playing at Chess with another, Stabs him with his Dagger 4 or 5 times successively, till the Bowels hung out of his Wounds. This bing done in the Inn or *Caravansera*, where we lodgede, every body who were Eye-witnesses of such an unaccountable piece of Barbarous Treachery, ran towards him to sieze him, but the most forward having received three Wounds in his Reins, and laid for dead upon the Floor, the rest were glad to get out of his Room, and to cry out *Murther*; The whole City being put into an Alarum, by the account they had of so horrid a Murther, ran to assist in the apprehending of the Criminal, but in vain, for he stood his ground at the door with his Dagger, ready to receive any that should come within his reach, which so terrified the Officers of Justice, that not one of them was daring enough to approach him. But at last some Soldiers endeavouring to break in at the Windows, and to barricado the door, to prevent his escape, he retreated to the door of his own Apartment, where whilst he was putting himself in a posture of Defence to receive them; some of his Acquaintance upbraiding him with his inhumanity, told him, that he had fail'd in his attempt, and that there was some hopes of Life in those poor Victimes he had intended to Sacrifice to his Revenge; he was so enraged thereat, that foaming at his Mouth, he opened his bare Breast before all the Standers by, and clapped the point of his bloody Dagger to it, saying with a very loud Voice; *Since my ill Success has deprived me of the fairest Opportunity I ever could meet with of revenging the affront formerly put upon me, I will punish my self without giving the Trouble thereof to Justice*; Then thrusting the Dagger into the lower part of his Belly; *behold*, said he, *in what manner I ought to have deprived my Enemy of the hopes of surviving me*: But notwithstanding this desperate Wound, he was not deprived of his strength for 2 hours after; and what was most remarkable to all the rest of the Spectators as well as to my self, was that only a few drops issued from this Wound, which by its large Orfice, one would have thought should have spouted forth as a Rivulet. The Soldiers being got in by this time, endeavoured to perswade him to surrender his Arms, but he was so far from hearkning to their Advice, that when they presented their Musquets to his Breast, he call'd them *Poor spirited Fellows* and by his daring Expressions so daunted them, that supposing him to be pass'd all hopes of Life, they thought it the most Convenient way, to let his raging Fit pass over, which it did not long after, when a perfect calm succeeding the mad storm, that had siezed his heart before, and finding his strength to decay, he threw away his Dagger, and having reproach'd it, with the ill Offices it had done him, desired he might be carried in a Coach to the Governour; but before he could be brought thither, his Vital Spirits being quite dispersed, he expired in a Moment after he had left the Inn.

They leave *Astracan*.

Within 2 or 3 days after we embark'd upon the *Wolga* for *Muscow*, in hopes of meeting there with the *Chinese Caravan* we spoke of before. As the wind blew very favourably for us from the *East*, so the beginning of our Voyage was prosperous enough, but the wind chopping about near *Ischorrio*, the first Town you come at; after 60 Lgs sailing up the River from *Astracan*, we were forced to put our Boat-men ashoar, to tow the Vessel. It being not my intention to make here any Repetitious of what has been said already by other Authors, I will refer my self in this Point as to the Course of the *Wolga*, to the most exact and faithful Relation of *Olearius*, and proceed in the account of our Journey; which with the change of the Wind, begun to be very troublesome to us; For no sooner were we pass'd this little City, but approaching though slowly towards the *Artick* Pole, we began to be more and more sensible of the difference of the Climate, and being forced to lie upon the Deck of the Vessel, and very ill provided with Convenience against the cold, we were so benumb'd in our Limbs, that we could not stir hand or foot, and an Ague which sized me soon after, reduced me to such a low Condition, that I thought I should have found my burying place in that *Wolga*. After we had endured these Miseries for some time, we were overwhelmed by a more dreadful Accident within 4 or 5 days sail from the City of *Zaritza*, the second City the *Muscovites* are Masters of upon the *Wolga*, after you come from *Astracan*. For the Cook-room, which was in the middle of the Vessel, having taken Fire, the Flame spread it self all over the Ship, with such fury, that notwithstanding all endeavours to quench it, we found our selves under an absolute necessity to shift for our selves in the Long-boat, leaving what was in the Vessel to the Mercy of this Destructive Element, which we had scarce escap'd, but were threatned by a fresh danger from those *Tartars* who living in these Parts for the most part upon Rapine, we had all the reason to fear would be drawn thither by the Flame of the Vessel, which without all question they might descry at a great distance; All we had to do was, to get as close under the Thickets, as we could to defend us against the Cold, till the return of our Seamen, whom we sent to *Zaritza*, to get what Provisions and other things we stood in need of, for the Prosecution of our Journey; whilst we were thus ruminating in this solitude upon our Miseries, providence sent us a sudden Relief; for some of our Company perceiving a Vessel coming up the River, ran to the Bank side, and hailing her, the Commander sent a Boat, to know what was the matter; As good Fortune would have it this Vessel belonged to a *Muscovite* Colonel, whom we had cured of a dangerous Sickness at *Astracan*, who no sooner understood our misfortune, but he was ready to receive us into the Vessel, which we hoped would carry us to *Saratoff*; We went forward with pretty good success for 2 days, when a tempest and violent Wind arising from the N. froze up the River *Wolga*, and consequently left us in a most destitute Condition, above 40 Lgs from the place whither we were bound; what added to our Affliction was, that the cold increasing every day, and we living in perpetual danger from the Neighbouring *Tartars*, 4 or 5 days Journey distant from any City, without Provisions, or Horses to travel by Land, and my Ague had rendred me uncapable of travelling a foot: Amongst these Perplexities, which had almost deprived us of the use of our reason, *F. Barnaby*, who was a Man of a more than ordinary Courage, resolv'd to go himself on foot with some Servants to *Sararoff* to hire sleds, and to leave me and the Seamen with the Colonel to defend us, upon all occasions, against the insults of the *Tartars*; They travelled for 6 days together through very difficult and dangerous ways, having no other Sustenance than a little Bisket, and at last got quite spent to the City where they were to provide our Carriages, which they could notwithstanding all their care, not procure, till 20 days after they had left us, because the Ice not being hard enough, no Body would venture his Horses and Sleds; so that we were reduced to great extremity, for want of Bread, instead of which we were forced to live for some days upon a little Bran, and what wild Apples our Men could gather in the Forests. Whilst we were thus overwhelm'd with misery, our Convoy, which we had almost despaired of, arriv'd at length, so that having refresh'd our selves a little with such Provisions as they brought along with them, we set forward in our Sleds, but had scarce travelled 6 Lgs upon the *Wolga*, when we thought our selves entrapp'd in another Misfortune pass'd all repreive; for a Troop of 60 *Tartars*, mounted some upon Horses, some upon Dromedaries, began to approach our *Caravan* with so much fierceness, as sufficiently discovered their intention, but finding us ready to give them a welcome with our Fire-arms, they thought fit to retreat, without giving us any further trouble. This being the only accident that befel us in our Journey to *Saratoff*, which lasted 5 days, by reason of the ruggedness of the Ice, we safely arrived there, and I who had almost given my self over for lost, had the most reason to admire the Providence of God Almighty, who had once more bless'd me with the sight of my faithful Companion, who having contracted an intimate acquaintance with a certain Monk of the Order of St. *Basil*, during his stay at *Saratoff*, made me also partake of the Fruits of his Friendship, and care, which was such as restored me to my Health in 8 days, which being expired he omitted nothing which might facilitate our Passage to *Muscow*, in providing us with convenient Carriages, and honest Guides thither, being a Journey or 300 Lgs we had still to make; At last having recommended us to the care of our 2 Conductors, no otherwise than if we had

Their Vessel takes Fire, and is burnt.

Are relieved by another Vessel.

Are reduced to great misery.

Likely to be taken by the Tartars.

had been his Children, and paid one half of the Charges of the Carriages, we took our leave from this Charitable Monk, not a little diſſatisfy'd that it was not in our Power to ſhew him our real acknowledgement for all his Civilities.

They quit the Wilga.

At laſt the 10th. of *Dec.* we left *Saratoff* in Company of a good *Caravan* bound for *Muſcow*, and the Ice being very thick by this time, and the Roads ſlippery, we travelled in Sleds with conveniency enough. The Muſcovite Sleds.

These Sleds, which are uſed all over the North, are only 2 ſpars of Timber, carefully plain'd underneath, join'd with ſeveral pieces of Wood, laid a croſs, and ſurrounded on all ſides with a thick bark of a Tree, of ſuch a height as to keep out the Snow. The bottom which is very well plank'd is commonly covered with a Mat or Bears-skin, upon which you may either ſit, or lie at length according to your own conveniency, every one having his own Sled, which being of the bigneſs of a Man to lie in conveniently, you cover your ſelf over Head and Ears, or as far as you beſt like with Carpets, or Furs fitted for this purpoſe, and ſo forward you go, the Horſe which draws you being well provided with freſh Nails, and he that guides it ſitting at the feet of the Sled, which gliding inſenſibly along, over Rivers and Lakes, with a great deal of eaſe to the Horſe, you may travel thus ſometimes 15 or 20 Lgs a day, without any great inconveniency to the Beaſt. In ſuch a Machine we travell'd from *Saratoff* to *Muſcow*, the firſt 3 days through a great Deſart of 40 Lgs long, which being without Houſes or Cottages, we were forced to carry our Proviſions along with us, till we came to a Village called *Pinzer*, a few Lgs beyond this Deſart; after which we had Commodious travelling enough, the ſerene Winter days, which are natural to this Country, adding not a little to our ſatisfaction, which is the reaſon the *Muſcovite* Merchants generally chooſe this Seaſon for the Tranſportation of their Goods from one place to another, which they do at much an eaſier rate than at any other time of the year. It was well for us that our *Caravan* was ſo numerous, being in conſtant danger of the Robbers, who infeſt thoſe Roads, but as it conſiſted, for the moſt part of Merchants, who had often occaſion to ſtay in thoſe parts through which we paſs'd, we ſpent whole 5 weeks in this journey from *Saratoff* to *Muſcow*, which otherwiſe may be perform'd in 20 days. We always took care to get by Night to ſome Town or other, where we might meet with good Reception, but when we happened to be engaged in a Foreſt or Deſart, which could not be paſs'd in one Day, our Sleds were rang'd in good Order round about a large Fire, and being well cloſed up on all ſides, we ſlept as conveniently and warm, nay, rather better, than if we had been in the Country Cottages, where Men and Beaſts lie all Higgledy-piggledy together. The Country between *Saratoff* and *Muſcow* very populous.

In this manner we travell'd forward towards *Muſcow*; the Country through which we paſs'd, being then all covered with Snow, we could give no judgment of its Fertility, except what appear'd by the infinite number of Towns and Villages, which we obſerv'd in our way.

This Country as we were inform'd was not always ſo populous till ſince the laſt War, which the *Muſcovites* had with the *Poles*, they carry'd away thence an infinite number of People, unto whom Lands being aſſign'd betwixt *Muſcow* and the *Wolga*, they have made this part of the Country the moſt populous and fertile of the whole Empire. Beſides thoſe People, who were eaſily diſtinguiſh'd from the Native *Muſcovites*, many Villages and Towns were inhabited by *Tartars*, who are *Pagans*; The City of *Caſſinovogorod* through which we paſs'd, is in the Poſſeſſion of theſe *Tartars*, where they have the free exerciſe of their Idolatrous worſhip, and publick *Moſques*, in the midſt of the *Muſcovites*, who take as little care of their Converſion, as of the *Tartars* call'd *Mordevates*, who live in another Borough, and divers Villages in the very Center of *Muſcovy*. We happened to come to this Borough juſt the Evening before the Feſtival of St. *Nicholas*, which being the Head Patron of *Muſcovy*, they celebrate his Memory with as much Zeal as we do *Chriſtmas* or *Eaſter*, with this difference only, that all their Ceremonies and Devotions end in the lewdeſt Debaucheries that can be imagined, for which when we blam'd them, they gave us no other anſwer, than, that we being Strangers, they found we were ignorant, in what manner they uſed to pay their Worſhip to St. *Nicholas*. As we approached *Muſcow* we flattered our ſelves more and more with the hopes of coming nearer to the end of our grand deſign; full of theſe thoughts we came to the Metropolis of the *Ruſſian* Empire, which for its Largeneſs and Magnificence, appears the moſt beautiful Place at a diſtance, that ever I beheld in my Life. The firſt thing we did was to addreſs our ſelves to thoſe of our Society, who had been ſettled there about 2 years before, by peculiar Permiſſion from the *Czar*, for the Convenience of ſuch *Roman Catholick* Foreign Officers as Command in his Armies. They come to *Muſcow*.

Theſe Fathers received us with ſo much civility and kindneſs, as ſufficiently convinced us that thoſe united in the Spirit embrace their Brethren, without diſtinction of time or place, with the ſame Zeal and Affection. As they had given us notice by their Letters, that if we expected to ſucceed in our deſign, we muſt make our immediate Application to Prince *Gallechin*, who was then Prime Miniſter of State, we follow'd their advice, and tho' as yet in our *Georgian* habit, which we had taken to diſguiſe us, immediately went to pay him our reſpect, and to give him an accounted, what it was that had obliged us to take this diſguiſe; He being a Perſon of more than ordinary Ability and Conduct, was ſo far from being diſpleaſed thereat, that he ſhow'd a great deal of ſatisfaction to ſee us in that Condition, aſſuring us of his favour, and what ſervice he could do us to obtain our ends. But as all Strangers that come to *Muſcow*, (except thoſe of a publick Character) are obliged to undergo a very ſtrict Examination in the Chancery-Office, we were alſo ſent thither, though it was at Night, and our paſt Fatigues had ſo tired us, that we ſtood in great need of reſt. Strangers ſtrictly examined at *Muſcow*.

We were no ſooner entred the Rails of the Hall, where our Examination was to be taken, but 3 or 4 Perſons provided with Pen, Ink and Paper, asked us ſo many croſs and ridiculous Queſtions, as if they did it on purpoſe to Trap us in our own Anſwers, and to Convict us as Criminals; they fill'd ſeveral Sheets of Paper with the Anſwers we had made, which laſted till 11 a Clock at Night, when we were at laſt diſmiſſed to the Jeſuits Houſe, the Fathers whereof being much troubled for our long ſtay, received us with extraordinary Demonſtrations of kindneſs.

The next day we beſtow'd in finding out the *Chineſe* Merchants belonging to the *Caravan*, that were to return into *China*, to inquire of them concerning the Roads, the time, nature of the People through which we were to paſs, and ſome other Circumſtances relating thereunto, which might either further or hinder the ſucceſs of our Deſign; it was no eaſie task to find out thoſe pretended *Chineſes*, in a City which contains 600000 or 700000 Inhabitants, but after we met with them, we found them to be of that ſort of *Tartars*, who inhabit the moſt Eaſtern parts of that vaſt Country, known by the name of *Kitay*, which bordering to the N. W. upon *China*, has been always till now thought a particular Kingdom, whereas the *Muſcovites* properly call all that vaſt Tract of Land, betwixt the Rivers *Oby* and *Wolga*, and ſo as far as to the Borders of *China*, by the name of *Kitay*, and the People inhabiting it *Kitachi*, being a very ſpacious portion of the *Great Tartary*, divided into an infinite number of *Hordes* each under the Government of its own *Taiſo* or Prince, and to diſtinguiſh it from *China*, they imitate the *Turks* in this point, who give it the name of *Ichimma Ichim*, by uſing a Repetition of the firſt word. In like manner the *Muſcovites*, when they ſpeak of the Kingdom of *China*, give it the name of *Kitay*, *Kitay*, to diſtinguiſh it from that part of *Tartary*, which as we told you before, was called *Kitay*. As the *Muſcovites* have made conſiderable Diſcoveries in the laſt, they have alſo been very careful to build ſeveral Cities, and to provide them with Colonies for the conveniency of Trade, which has had this good effect upon many of theſe *Tartars*, that being made ſenſible of the Advantages of a convenient ſettlement before the toils of a Vagabond Life, they have by degrees apply'd themſelves to Trade. The Country of *Kitay*.

Theſe were the *Chineſe* Merchants, we were to confer withal, concerning our intended Journey into *China*, who, though *Tartars*, yet as they Traded both with the *Chineſes* and *Muſcovites*, and had been both at *Peking* and *Muſcow*, they gave us a more clear Idea of all things relating to this journey than ever we had of it before, and the ſame being in each particular confirmed to us by ſeveral *Muſcovite* Merchants, who had travelled from *Muſcow* to *Peking*, I was ſufficiently convinced that there was

no

no ſuch a difficulty in going from *France* to *China*, as ſome have imagined, by making choice of the Road from *Archangel* to *Tobolsko*, where being the general Rendevouz of all the Merchants of thoſe parts Trading to *China*, 6 months would accompliſh the whole journey; as will appear more evidently out of the following Book.

CHAP. X.

An account of ſeveral Roads into China.

THE Ancient Geographers had ſo little knowledge of that vaſt Country lying betwixt the River *Oby*, and the Famous *Chineſe* Wall, that moſt of them thought fit to paſs it by in ſilence, and others, rather than to acknowledg their ignorance in this point, have given us their own inventions for Truth. Neither have the modern Geographers been more ſucceſsful in this reſpect, than when they have fill'd up this vaſt Country with nothing but inacceſſible Foreſts and unpaſſable Deſarts. We are obliged to the *Zaporogian Coſacks*, who live beyond the *Boriſthenes*, for the diſcovery of thoſe Countries. Theſe being ſubdued by the *Muſcovites*, moſt of them took a Reſolution to ſhake off the *Muſcovite* Yoak. To effect which they advanced in great numbers towards the *Wolga*, by the way of *Caſan*, and thence to the River *Irtiſh*, at the confluence of which with the River *Tobol*, they built a City bearing the ſame name with the laſt of theſe 2 River. It was not long before they extended their Conqueſts to the River *Oby*, the adjacent Country of which they call'd *Siberia*, from the word *Sibor*, which in the *Sclavonian* Language implies as much as the *North*. But thoſe parts being deſtitute of many things requiſite, if not for the Subſiſtance, at leaſt for conveniency of humane Life, this defect together with the proſpect of conſiderable Advantages by vending their *Sable Martins*, and other Furs, induced them to ſubmit themſelves to the *Muſcovites*, againſt whom they were ſufficiently ſecured by the Mountain and Rivers that were betwixt them.

The Zaporogian Coſacks diſcover the Country beyond the Oby.

How they ſubmitted to the Muſcovites.

The *Muſcovites* were no ſooner got into the Poſſeſſion of this Country, but they improv'd it to their no ſmall Advantage, by ſending thither their *Tachatchiki* or *Sable Hunters*, the number of which they encreaſe every day by baniſhing thither their Priſoners of State, and ſuch others as have not done their Duty in the Army and other Employments. The eager deſire after gain has by degrees carried theſe *Sable Hunters*, to the River *Tamour*, in an Iſle of which the *Muſcovites* have built a Fort ſome years ago, which proved the occaſion of the preſent War betwixt them and the *Chineſes*.

How they Hunt the Sables.

Their way of hunting the *Sable Martins* is this: Certain Troops of Soldiers are ſent into thoſe parts where theſe precious Creatures are to be met with, which uſually ſtay there 7 years; Theſe are under the overſight of certain Officers, one of which Commands every week a certain number of them; they kill theſe *Sable Martins* (which are for the moſt part found in the little Iſlands) with a Croſs-bow, for fear of ſpoiling the Fur, if they ſhould make uſe of Fire-arms. As the main point in this kind of hunting is the diligence of the Soldiers, the Officers lie under a neceſſity of allowing a certain ſhare to them of the Superplus which belongs to them, out of what they are obliged to kill for the *Czar*'s uſe; whence it comes that one of theſe Officers gets commonly 4000 Crowns in 7 years, and a common Soldier perhaps 600 or 700. This Country alſo affords black Foxes, which are no where to be found but in *Siberia* and *Kitay*, and are valued at ſo high a rate, that he that will purchaſe them muſt fill the skin with as many Crown pieces as they will hold. Formerly the *Muſcovites* were contented with ordinary furs, except the *Ermins*, which were uſed only by Perſons of Quality, but ſince the diſcovery of theſe more precious Furs, they have been ſo eager in the ſearch of them, that they have left no Corner unſearch'd, and by the frequent and different excurſions, at laſt hit upon divers Roads, which led them inſenſibly to the Frontiers of *China*, of the different Roads of which we will give you an Account according to the Relations regiſtred in the Chancery of *Muſcow*.

Divers Roads leading to China.

The firſt way by Land into *China*, is through *India*, and the Country of the *Great Mogul*, but the vaſt Deſarts much frequented by Robbers make this Paſſage very dangerous; We are obliged to the *Jeſuits* for the diſcovery of this Road, and the *Tartars* of *Aſtracan*, and the *Tousbecs* have ſometimes taken that way, but not without very numerous *Caravans*. The ſecond Road, is that commonly uſed by the *Tousbec* Merchants of *Bocara*, who take their way through the Cities of *Samarkan*, *Kabul*, *Kachemire*, *Tourafan*, and ſeveral other Cities of the *Tousbecs*, and ſo to *Barantola*, the moſt conſiderable City of the *Great Tartary*, and the Reſidence of *Dalac-Lama*, of whom more anon. But the ſandy Deſarts, and the *Calmuc Tartars*, who infeſt theſe Roads, make this way very uneaſie, though the *Muſcovites* often chooſe it before that by the River *Oby*. The third is that which is moſt generally made uſe of by the *Tousbecs*, the Trading *Calmucs*, and the *Muſcovites*. They go from *Tobolsko* a long ſeveral Lakes yielding great Quantities of Salt, near the Rivers *Irtiſh* and *Kama*; upon the firſt of which they Travel by Water as far as the City of *Sinkame*, whence they purſue their way by Land through the Territories of the *Calmuc*, and *Mongul Tartars*, to *Kokutan*, which is about 8 or 10 days journey from the Famous *Chineſe* Wall, which divides the *Great Tartary* from *China*. This Road is alſo not quite free from the Robberies of the *Calmucs*, tho' the *Taiſo Ajonka*, which is the chief *Chan* of the Vagabond *Tartars* in theſe parts, will by means of a good preſent ſecure the *Caravans* from being aſſaulted by them. From *Kokutan* divers ways lead to ſeveral Gates of the *Chineſe* Wall. The fourth Road goes likewiſe over *Tobolsko*, upon the River *Oby*, and the *Szelinga*, to the City of *Szelingvi*, and thence by Land through the Country of the *Monguls* to the place where the *Chan* of *Bechroeſaim*, and the *Coutuſta Lama* reſide; from whom you may by the means of a ſmall preſent obtain Guides, Carriages, and a Convoy to *China*; From the before mentioned City of *Szelingvi* to the *Chans* Reſidence, is a journey of 8 weeks. This is the Road the *Muſcovites* have uſed of late years, ſince they have been engaged in a War with the *Chineſes*, upon the River *Tamour*. This way is counted both the ſafeſt and moſt convenient, and though the Roads are alſo ſometimes peſtred with Robbers, they don't appear in ſtrong Bodies; but care muſt be taken to provide your ſelves with Wood and Water at certain places. The fifth is that, which *Spartarius*, the *Muſcovite* Envoy took to *China*; He paſs'd through *Siberia*, to the City of *Nerozinki*, upon the River *Szilcka*, whence you go to *Dauri*, not far from the River *Najunai*, and thence to *Chiria*, that lies upon the entrance into *China*. The diſtance is the ſame from *Narezinski* to *Dauri*, and from *Dauri* to *China*. If we may rely upon this Relation, this Road is both ſafe and ſhort. From *Narezinski* to the River *Argus*, which falls into the *Tamour*, you meet frequently with the *Sable Martin Hunters*, who are well acquainted with all the Paſſages in thoſe parts. After which the Road runs through the Country of the

the *Monguls*, who ſtand much in fear of the *Muſcovites*; tho perhaps the caſe may be altered as to this point now, ſince moſt Travellers at this time take their way a little higher through *Albazin* to *China*, or ſomewhat lower over *Szelingvi*, through the Territories of the *Chan* of *Bechroeſaim*. The ſixth Road leads likewiſe through *Narezinski*, and the Country of the *Monguls*, and thence to the *Lake Dalai*; out of which ariſes the River *Argus*, which is Navigable all along, and joins its current with the *Tamour*. Near the *Argus* are Mines of Silver and Lead, and the *Taiſo* or Prince, named *Sebdenkan*, whoſe Territories border upon it, is obliged to find the *Muſcovite Caravans*, that paſs 3 times a year that way, with Convoys. From *Narezinski* to the *Lake Dalai*, is a Weeks journey, and beyond it you find a People ſubject to the *Chineſes*, who cultivate the grounds along the Lake, who will carry you in 3 weeks to the Borders of *China*, upon Waggons drawn by Oxen. After all theſe Relations it will not be amiſs to inſert here another, relating to the People inhabiting the Countries adjoining to *China*, which as I give you upon the Credit of a Perſon of an unqueſtionable Reputation, who had taken the Copy of it out of the Treaſury of *Muſcow*, and that it agrees exactly with the Annals of *China*, publiſh'd by F. *Couplet* the Jeſuit, at the end of *Confucius*'s Philoſophy, and with the report of ſuch as have Travelled moſt of thoſe Roads, ſo I thought it might not be paſs'd by in ſilence here.

Nations inhabiting near China.

The *Bogdoi*.

The firſt of all are the *Bogdoi*, known to the *Chineſes*, under the name of the *Eaſtern Tartars*, and call'd *Niuchi* or *Nuchi* by the *Monguls*. Their Country being of a large extent, they are divided into ſeveral *Hordes*, and each under its peculiar *Taiſo* or Prince. There is a certain Province in *Bogdoi*, called *Dintchari*, and *Diourski*, by the *Muſcovites*, being encloſed betwixt the *Eaſtern Sea*, and the 2 great Rivers *Ebingala* and *Tamour*. They were in Ancient times Tributaries to *China*, but little known and leſs fear'd by them, till they made an irruption into that Kingdom, and Conquered 6 Provinces; and in all probability would have ſubdued the reſt, had not the *Tonshee Tartars*, under pretence of relieving the *Chineſes*, ſettled themſelves there, and the Family of *Iuena* upon the Throne, which ſway'd the Scepter till 1368. when being expell'd by the *Chineſes*, they enthron'd the Family of *Tayminga*, which maintain'd it ſelf in the Throne till 1644. at what time the ſame *Dintchari* made another Invaſion into *China*, and made an entire Conqueſt of that vaſt Kingdom. Their Prince who was the firſt Emperor of that Nation, was named *Cunchi* of the Family of *Taiſing*, the ſame who Reigns at this time in *China*. Though out of the whole Country of the *Bogdoi*, as alſo in the Province of *Dauri*, you ſee no other houſe but of Earth, their Chief Trade conſiſts in Sables and Black Fox skins, and ſome *Ginſena* roots; being not very well ſtor'd with Cattle, and their Horſes are very ſmall, and never ſhoe'd. In their Features and Proportion of Body, they much reſemble the *Crim Tartars*, but their conſtant Correſpondence with the *Chineſes*, makes them much more civilized. As to their Religion, they either have none at all, or elſe it is unknown hitherto. They wear Croſſes, call'd *Lama*'s, and ſhew a great inclination to the Chriſtian Religion, but much averſion to the *Mahometans* and *Neſtorians*. Notwithſtanding which, ſince their Conqueſt of *China*, there are many *Mahometan* inhabitants at *Peking*, who have 7 *Moſques* there. The *Bogdoi*, both in their Language and Characters come pretty near to the Vulgar ſpeech uſed in *Perſia*; but they have above 60 Letters in their Alphabet, and write and read from the top to the bottom, like the *Chineſes*. The Rivers of *Argus*, *Tamour* and *Chingala*, produce good ſtore of Rubies and Pearls. The *Bogdoi* are not unacquainted with the uſe of Gun-powder and Guns, but as the firſt is but of little ſtrength, and the heavy Artillery too burthenſom for them in their Marches; they are not much in Vogue among them. It has been obſerved that theſe *Tartars*, who have got into the Poſſeſſion of *China*, begin already to degenerate from their former Valour. Next to the *Bogdoi*, is a vaſt extent of Land to the *Weſt*, call'd *Mongul*, beginning at the *Weſtern Sources* of the River *Tamour*, and extending to the W. to the *Calmuc Tartars*, from whom they are ſeparated by great Deſarts; To the S. E. they Border upon *Turqueſtan*, and to the E. upon *Cheta*. They live under the Juriſduction of three *Chan*'s or *Taiſo*'s, but as they are of the ſame Family, they live in unity together, and will aſſiſt one another againſt their Enemies. Their Chief *chan* bears the Title of *Tabetchinga*, whoſe Territories border upon the *Bogdoi* and *China*. As they inhabit neither Towns nor Villages, ſo they live moſt upon Rapine, and make frequent incurſions upon the Inhabitants near the Lake *Dalai*, or near the River *Szelinga*. Among the other *Taiſo*'s, that are under his Juriſdiction, is the *Chan* of *Bechroeſaim*, whoſe Territories likewiſe border upon the ſaid River. It is in the Territories of this *Chan*, that the *Contaſta Lamæ* keeps his Reſidence, who is properly the Vicar of the *Dalae Lama*, or *Lama Lamaton*, the Patriarch-general of the *Tartars*, but eſpecially of the *Monguls*, who Worſhip him like a Deity. As their grounds are watered with a great many Rivers which fall into the *Szelinga*, they are very fertile and fit for Paſturage, and conſequently rich in Cattle, which makes them live in good Correſpondency with the *Muſcovites*, by reaſon of the Neighbourhood of *Siberia*; though they are alſo Naturally of a peaceable diſpoſition, and if any quarrels ariſe among them, they are referred to the *Contaſta*, (who follows them where-ever they ramble) or to ſuch Judges as he appoints for that purpoſe. The *Monguls* bear a conſtant grudge to the *Bogdoi*, ever ſince they have made themſelves Maſters of *China*, but as they are unacquainted with the Management of Fire-arms they are not in a Condition to do them any conſiderable miſchief. There are 2 other *Chans* belonging to the *Monguls*, call'd *Ofticroikan*, and *D'Jano Garli*, who are ſcarce known but only by name. The *Calmuc Tartars* are in Poſſeſſion of all that vaſt Tract of Ground, betwixt *Mongul*, the *Wolga* and *Aſtracan*, and are divided into an infinite number of *Hordes*, each under its own *Chan*. The Chief *Chan* is called *Otchiourtican*, who deduces his origin from the Great *Tamerlen*. As he is very Potent, both the *Muſcovites* and *Tonsbers*, court his Friendſhip by certain Annual preſents; and if we may credit the common report, he lives with a great deal of Magnificence, is always clad in White, and is ſerv'd in Gold plate. A certain *French* Officer, who had the Opportunity to ſee him in his Tent, whilſt he lay encamped with 100000 Horſe, in the Plains near *Aſtracan*, confirm'd every thing relating to his Magnificence, except that he never ſaw him make uſe of either Gold or Silver plate. The *Calmucs*, as well as the *Monguls* have no fixt Habitations, much leſs any Cities, but live in the Fields under Tents made of Felts, both very Commodious and Neat; as they lead a Vagabond Life, and ſeldom reſt long in a place, ſo they are the nimbleſt in the World at Encamping.

The Calmucs.

All the Nations of the *Great Tartary*, as far as the *Indies* are *Pagans*, who acknowledge the *Dalac Lama*, or *Lama Lamaton*, the Supream head of their Religion, except thoſe of *Bokara* and *Samarkand*, who have embraced Mahometiſm. This Impoſtor has his Reſidence in the Fortreſs of *Beatalac*, near the City of *Barantola*, the Metropolis of the Kingdom of *Tanchut*, which extends from the *Monguls*, the *Calmucs*, and *Turqueſtan*, between *China* and *Perſia*, to the *Indies*. It is paſt imagination in what manner this *Dalac Lama* is worſhipped by the *Tartars*, who ſend for his Benediction from the remoteſt parts, and when ever he makes his appearance in *China*, he is received with all imaginable reſpect, and ſent back with great Preſents. According to the Opinion of the *Tartars*, this *Dalac* never dies, but renews like the Moon. To carry on this impoſture, thoſe that are about him, as ſoon as he dies, look out immediately for another *Dalac Lama*, as like him in Perſon as can be found, who is put in his place, and the dead Body concealed; The *Dalac* is not ſuffered to be ſeen by any Body, unleſs they will proſtrate themſelves, and worſhip him like a Deity, what Mr. *Tavernier* Reports of the King of *Thibet*, was queſtionleſs grounded by miſtake upon this Cuſtom concerning the *Dalac Lama*. The *Chineſes* call the *Tartars*, *Totai*, and the *Muſcovites*, *Poles*, and *Tartars*, and themſelves *Tatar*. The Reſidence of this *Dalac Lama*, in the Kingdom of *Tanchut*, ſeems to be a convincing proof, that he is the ſame famous *Preſter John*, concerning whom we have received ſo many fabulous Stories in *Europe*; it being certain, that, whatever they have been pleaſed to tell the World of him, may more conveniently be attributed to the *Dalac Lama*, than any other Perſon yet know, and that therefore he may with much more probability of Truth be look'd for in *Aſia*, than in *Abyſſinia*, where

The Dalac Lama or Patriarch of the Tartars.

The Dalac immortal.

The Dalac Lama is the Preſter John.

where he never was. To make this the more evident, it is to be observed, that when *John* II. K. of *Portugal*, had sent *Peter de Coulan*, to make the discovery of the Passage by Sea to the *East-Indies*, he gave particular Orders to the said *Coulan*, to make an exact enquiry after the famous *Prester John*, so much talk'd of in *Europe*, without being known in what part of the World he Reigned. Pursuant to the King's Commands, *Coulan* advanced a great way into the *Indies*, where with the most Diligent enquiry he possibly could make, he could not hear one word of *Prester John*, but in his return home, coming to *Cairo*, he was told, that in *Æthiopia* beyond *Egypt*, Reign'd a certain potent Prince, a profess'd Protector of the Christians, who whenever he appeared in publick, had a Cross carryed before him; As these Characters had a very near resemblance to those of the Prince he was in search for, he thought himself sufficiently convinced of the Truth of what he so eagerly wish'd for, and believing this Monarch to be the same *Prester John*, King of the *Abyssines*, he gave an account of his discovery, by Letters to the Court of *Portugal*, who infinitely pleased, and easily perswaded of what they so much desired, received this News with great Applause. Those *Portugueses*, who in the following years sailed to *Africa*, prepossess'd with this Opinion, after their return home confirm'd, and spread the same all over *Europe*, where it was received by the vulgar, but always opposed by several learned Persons, the falshood of these Suggestions, being clearly to be disprov'd by what *Damian de Goes*, *Nicolas Godigno*, and *Balthazar Tallez*, have written of it, who having been long Resident in *Æthiopia*, had been perfectly well inform'd concerning all matters relating to that Kingdom. F. *Kircher* very learnedly observes, That the *Latin Chronology* of the *Abyssine* Kings, makes not the least mention of *Prester John*, which is questionless the reason, that such of the Ancient Authors, who have made mention of this *Prester John*, have placed him in *Asia*, though they differ much as to the particular place of his Residence, as well as in the Original of his name. A certain Modern Author would fetches the Etymology of *Prester John*, from *Preste Arkan*, i. e. *the King of the Adorers*; some have been so vain as to fetch it from the *Latin Pretiosus Johannes*; Others have gone another way to work, and tell us, that as *Cæsar* was a Title peculiar to the *Roman* Emperors, so *John* to those Princes: And that the same was bestowed upon them in Memory of the Prophet *Jonas*, unto which they had added the sirname of *Prester* or Priest, not that these Kings were real Priests, but as a pecular Mark of their Protection of the Christian Religion, as was likewise the Cross carried before them. *Scaliger* hits without all question nearest to the Mark, where he derives *Prester John*, from the *Persian* word *Prestegiani*, which signifies Apostolick; it being very probable, that the *Europeans* trading into *Persia*, and perhaps not perfectly acquainted with that Language, hearing that Prince called *Padischah Prestegiani*, might easily mistake it for *Prester John*, it sounding not unlike *Prestigiani*, the true signification of which was unknown to them. As to that part of *Asia* where this *Prester John* is to have his Residence fix'd it will upon true Examination be found, that most Authors have placed him in that vast Country, which extends it self from the *Great Mogols* Country, to the E. and N. as far as *China*.

Hist Tom. III.

St. *Anthony* makes it sufficiently evident, when he says, That the Emperor of the *Tartars* having sent his Son to Conquer the lesser *India*, which he effected, he advanced with his Victorious Armies, against the Christians then inhabiting the *Greater India*, but was over-thrown by their King, call'd commonly *Prester John*. This agrees with what *Paul* the *Venetian* says of *Prester John*, who, as he resided several years in the Court of the *Great Chan* of the *Tartars*, so he was better acquainted with that Country than any body; And if we may rely upon the Credit of those who have travell'd in those parts of late Years, the Kingdom of *Tenduc* or *Tanchut*, where he places *Prester John* is still in being, and lies betwixt the Empire of the *Great Mogul* and *China*. Neither do those who have made *Prester John* Reign in *Kitay*, differ from *Paul* the *Venetian*, it being probable, that the Ancients did not understand by *Kitay China* only, or any one peculiar Kingdom, but that vast tract of Land inhabited by the *Tartars*, between the Rivers *Oby* and *Wolga*, and *China*, in the same sense as the *Muscovites* take it to this Day. The main scruple remaining is, that the subjects of the ancient *Prester John*, are said to have been Christians, whereas the modern *Tartars*, are either *Mahometans* or *Pagans*; but this is soon answer'd, nothing being more frequent, than that in process of time, this as well as many other Countries, formerly illuminated with the Gospel, might be involved in darkness of Idolatry and Mahometism. It is beyond all dispute, that the Apostle St. *Thomas* preached the Gospel in the *Indies*, and that he died at *Meliapour*, and there are not wanting such, as maintain, that he penerated into *China* it self, but whether he did or not, it is very likely, that he might spread the Christian doctrine more to the *West*, because there is a certain Country on that side, call'd by the *Moors* in derision, *Kiafarstan*, i. e. the Country of the Infidels, the inhabitants of which retain the Name of *Christians of* St. *Thomas*, and though they are involved ingross Superstitions now, yet retain some tincture of Christianity; for they baptize their Children, paint their Churches, and in their Foreheads have three Red crosses, made with the juice of *Sanders Wood*. But, supposing the Light of the Gospel did not reach these Barbarous Countries immediately after the Birth of Christ, it was nevertheless carried in succeeding Ages, as among other Demonstrations, is evident from that most famous Monument found near the City of *Siganfu* in *China*, 1625. which is an undeniable proof of it. For it ought to be known, that about 600 Years after our Saviour's Nativity, the Priests of *Syria* did disperse themselves through all parts of *Asia*, and preached the Gospel to the very Extremities of the World.

Hayton a Christian Author, descended from the Royal Blood of the Kings of *Armenia*, positively affirms, That in the 13th Age, *Tartary* was full of Christians, *Cublai* their Emperor, having embraced the Christian Faith, and that his Brother, who was converted before him, was so Zealous for the Christian Religion, that he waged War upon that account, against the *Caliph* of *Babylon*, took *Palestine* for the Mahometans, restor'd the King of *Armenia*, who had been forced to quit his Kingdom, to the Throne, and rebuilt a great many Christian Churches, laid desolate by the Enemies of the Christian name, and this chiefly at the Intercession of the Princess his Wife, who traced her Original from one of the three Eastern Kings that came to adore Christ, when newly Born. This *Hayton* is the same Person who wrote to St. *Lewis*, when he lay in *Cyprus*, at the time of his first Expedition for the recovery of the Holy Land; St. *Anthony* (in whose History you see that Letter of the *Tartar* Prince) affirms, that St. *Lewis* sent to him in the Quality of Ambassadors, 2 Monks of the Order of St. *Dominick*, with rich presents, and among the rest a piece of the true Cross, and a very magnificent Canopy of State, upon which were embroidered in Gold, the chief Actions of the whole Life of Christ. This, I say, was done about the Year 1256. and at the beginning of the 14 Age, several *Franciscan* Fryars were sent to the *Great Chan of Tartary*, and converted a great number of Infidels in the Kingdom of *Thibet*, which is next to that of *Tanchut*. Father *Andrada* a *Portugese Jesuit* travelling into those parts, 1624. observed among the Inhabitants certain Ornaments of Christianity, though involved in their gross Superstitions; and that among the rest they retained a certain form of Confession, out of all which, I think it is apparent, that the Kingdom of *Tanchut*, having not at all times been Idolatrous as it now is, the *Dalac Lama*, whose Residence it is, may probably be the Successor of *Prester John*, who Reign'd there, when Christianity had got the upper hand there, as on the contrary, since that Religion began to be corrupted by degrees, this King changed with the times, and became the Chief of a New Religion, which at last turn'd unto Idolatry. 'Tis true, the *Dalac Lama*, is at present no Temporal Prince, as *Prester John* was, but this change might perhaps be the consequence of such Revolutions as frequently happen in great Empires; when at the same time it is evident, that he continues still the Head of the Religion of all the *Eastern* Pagans, among whom he is in great Veneration. Add to this, that he bears the name of *Lama*, which in the *Tartar* Language signifies a Cross, and the *Bogdoi Tartars*, who as we told you before Conquered

quered *China*, 1644. and acknowledge the *Dalac Lama* for their Head, wear always Crosses about them, which they call *Lama*, and preserve them with more than ordinary care.

Other Tartarian Nations

Besides these before-mentioned *Tartars*, there are others called *Ostiaki*, *Bratski*, *Jacuti* and *Tongueſi*, who inhabit about the Lakes and Rivers betwixt *Siberia* and the *Monguls*. As they have the same Language and Habit of Body with the *Calmues*, so it is probable, that they are no more than some of their Hordes, who having fixt their Habitations nearer to the Frontiers of the *Muscovites*, at last submitted under their Jurisdiction. They are generally of a swarthy Complexion, inclining to an Olive Colour, with broad flat Faces, falling in below, and high in the upper part, with short and flat Noses, little but sparkling Eyes, and little Hair about the Month; They are tall beyond the common Size, well made and strong, stern, and bold, but without savageness. Their Habits are nothing else, but Sheepskins sow'd together, in the Nature of vests close to their Bodies, having about their waste a Cord, instead of a Girdle, whereunto they fasten their Bow and Quiver, which are their constant Companions wherever they go. They shave their Heads all over, leaving on the middle of the Crown, a double lock of Hair, one of which hangs down before the other behind. On their Heads they wear no other Ornament except a round Bonnet, of the same stuff with their Habits, on the top of which is fastned a tuft of red Silk, or any other Colour; this being the mark by which each *Horde* is distinguish'd from another. Those who live in the Countries, where they catch *Martins*, make themselves Cloaths of their Skins, as also of Dogs Skins, of which they entertain vast numbers; sometimes they wear one for a Lining, and the other for the outside; in which case the *Sable Martins*, though much more precious is worn within, and the other without, for, say they, it would be unreasonable, that the Dog who finds out, and catches the *Martin*, should be placed below his vanquish'd Enemy after his Death. From what has been said it is sufficiently Demonstrable, that the *Muscovites* found it no great difficulty to open their way by Land into *China*, for after they had once penetrated into those Countries bordering upon the *Great Tartary*, and either by force or mildness, reduced under their Jurisdiction, several of their separate *Hordes*, who kept Correspondence with them, they might easily by degrees advance towards the Borders of *China*, among a People divided both in point of Government and Interest, and erect Fortresses for the Defence of their Conquests, the furthermost of which is call'd *Albaza*, not above 3 weeks journey from *Peking*, though it be 3 months Travel distant from *Muscow*. It is seated upon the very Banks of the River *Tamour*, which occasioning a difference betwixt the *Muscovites* and *Chinese*, about the privilege of Pearl-fishing, and hunting of Sables, broke out at last into a War; but the *Muscovites* weighing the disadvantage they lay under, to expose an Army to the hazard of so vast a journey for its relief, thought convenient, to accommodate the matter by an amicable Negotiation, the success of which is not known as yet. I know one main Objection against what I have said concerning the shortness and easiness of the Passage by Land into *China*, will be the long and tedious journeys (which have been of 18 months sometimes) made by the several Ambassadors sent from *Muscovy* into *China*, but this Objection is soon resolv'd if it be considered, that, as the chief Aim of the sending so many Envoys and Ambassadors into *China* has been, to observe the Advantage and Disadvantage of the Country through which they pass'd, and the course of their Rivers, with many other Circumstances, it is no wonder if those who travell'd like Adventurers, and that upon the strength of the *Czars* Purse, did sometimes spend 12, nay, 16 or 18 Months in their journey, which the Merchants more sedulous and thrifty in their Affairs, oftentimes going to *Peking*, and coming back to *Muscow*, don't take up above 4 months, of this I was fully assured about three years since, by certain Merchants, who set out from *Peking*, after they had been at Mass in the *Jesuits* house there, upon St. *Peter* and St. *Paul*'s day, and came to *Muscow*, about *All-hollandtide*, where they staid till the end of the Winter, in order to return thither with the *Caravans*, that set out duely every year from *Tobolsko* to *China*. But what contributes most to the easiness of the Passage by Land into *China*, is the convenient Carriages, used in those journeys. They commonly begin their journey from *Muscow* towards the end of *February*, the Snow being well beaten, and the Roads even, they travel in Sleds in less than 3 Weeks time to the Capital City of *Siberia*, which is 800 *Versts*, or 350 *French* Lgs. Here they expect whether it will begin to thaw, in which case, they make use of Vessels, which they meet with both on this and the other side of the River *Oby*, but if the Frost continues, they go on by Land, to the Country of the *Ostiaki*, a *Horde* of *Tartars* under the *Muscovite* Jurisdiction. Here if the Thaw does not overtake them, they send back their Carriages to *Tobolsko*, which they change for other Sleds, drawn by *Reen deer*, which are cheaper kept, and Travel with more swiftness, for which purpose they tie a great Dog behind, who scaring the Beast with barking, makes her run at full speed, so that at this rate they will Travel sometimes 40 Lgs a day. But what is most surprising is, that, whereas the Country beyond *Siberia* lies all upon a level as far as Mount *Caucasus*, the People to ease their Beasts, have a way of putting up Sails in their Sleds, which, if the Wind be favourable, carries them over the Snow and frozen Rivers. Thus they Travel over the Ice to the River *Geneſſai*, where the *Muscovites* have built a City of the same Name; there you take shipping upon the 2 Rivers *Tongueſi* and *Angara*, which arise out of the Lake of *Baikala*; and which are said to be 500 Versts long, and 40 broad, the Water of it is so clear, that notwithstanding its depth, one may discover the Colour of the Stones that lie at the bottom. The Mountains which enclose it on all sides, and are the Rendevouz of various Winds, prove sometimes such a trouble to Travellers, that they are forced to bestow 7 or 8 days in crossing it, tho' it be not above 8 Lgs in breadth. After you have pass'd the Lake, you may embark if you please, upon the River *Schelinga*, which carries you to a City of the same name, situate about 50 Lgs from the mouth of it, built there by the *Muscovites* on purpose for the conveniency of their *Caravans*; But if you intend to go by Land, you may buy of the *Monguls*, which are just by to the S. Mules, and Dromedaries, for the continuation of your journey into *China*, which you may reach in 15 days; This being the Road which most of the *Muscovite* Merchants now trading into *China* take, make it appear, that those Countries, known formerly under the Name of the *Great Tartary* only, are neither so Desart nor unpeopled as some have been apt to imagine, but that they are provided with many good Rivers, and produce abundance of precious Commodities. For, not to mention here the Rhubarb, Azure Stone, and Castors of which the *Tousbees* and *Monguls* have great plenty, the Rivers *Oby*; *Tongueſi*, and *Angara*, afford Sables and black Foxes, and the River *Tamour*, Ginseng Roots, Pearls and *Badian*, as *Argus* is enrich'd with its Silver and Lead-mines. The *Muscovites* have besides this found in those parts a kind of Ivory, which both for its whiteness, and smoothness, surpasses any that is brought from the *Indies*. This they are furnish'd with by a certain Amphibious Creature call'd *Behemoth*, found most commonly in the River *Leka*, or near the shoar of the *Tartarian* Sea. I have seen several of these at *Muscow*, which were about 10 inches long, and 2 in Diameter at the Root; besides that the Elephants teeth are not comparable to them in Beauty, they have a peculiar quality to stanch Blood, being carried about a Person subject to bleeding, which is the reason that the *Persians* and *Turks* prefer it before Gold. If we may give entire credit to a Person of an Eminent rank, accomplish'd Wit and high Reputation among the *Muscovites*, (I mean no less Person than *Mouchim Pouckhim*, then *Waywode of Smolensko*) he told us, concerning this Amphibious Creature, which is as big, and no less dangerous than a Crocodile, that at the Month of the River *Kawvina* lying as beyond the *Oby*, which after it has encreased its Waters by the River *Leka*, falls into the frozen Sea, is a certain populous and spacious Island, the Inhabitants of which were the first, who discoverd this Animal; unto which he added, That it requiring a great deal of labour and assiduity to hunt this fierce Creature, those people used to carry their whole Families along with them, to assist them; and that it often happened, when these poor Wretches had advanced a great way upon that Ice, they were surprised by a Thaw, before they could reach the shoar, and carried upon

Sailing Sleds

The Lake Baikala.

The Beemoth produces Ivory.

hug

huge pieces of Ice, that are broken off by the Thaw, whither chance carries them. He told us that it was his Opinion, that whole Families of those *Behemoth* Hunters had been carried upon those floating pieces of Ice to the most *Northern* parts of *America*, which lie very near that part of *Asia*, which jets out into the *Tartarian* Sea; and the Inhabitants of which, said he, especially near the Sea-side, have the same Physiognomy with these Islanders. This Opinion seems not to be ill grounded, considering that in the Northern parts of *America*, are several kinds of the same Creatures, which are so common in *Muscovy*, and especially Beavers, which it is probable might be transported thither in the same manner; and I my self have been a Witness of vast floating pieces of Ice, which kept whole and entire, from *Warsaw* for a great way into the *Baltick Sea*. If there were any Real affinity betwixt the Language of the Northern *Americans*, and these Islanders, as well as betwixt their Features, this Opinion might pass for more than a Conjecture. Some People, I am apt to believe, will wonder, that considering that great number of Rivers betwixt *Muscovy* and *China*, they should not find it more easie and commodious to carry their Traffick by Water. But, besides that the *Muscovites* are naturally not addicted to Maritime Affairs, there are unsurmountable Obstacles, which oppose that Passage.

How *America* was Peopled at first.

Among the many Rivers that lie beyond *Siberia*, there are 4 Principal ones, known by the Names of the *Oby*, the *Geneslai*, the *Lena*, and the *Tamour*; As to the River *Oby*, the most *Westerly* of all, it is so dangerous by reason of the vast Mountains of Ice, which lie at the mouth of it, almost all the year long, that there is scarce any passage for Ships. Thence to the *East* is the River *Geneslai*, which besides the inconveniency of the Ice it has common with the *Oby*, labours under another difficulty, which are Nine several *Cataracts*, or Water-falls, which, besides the danger, must put the Merchants to vast Charges in loading and unloading their Vessels. The River *Lena* has a more uniform Current, but instead of Ice, it is so much pestered with Rocks and Shelves at the Mouth, that it is not passable except for small Boats. The River *Tamour* the most *Easterly* of all, which Disembogues into the Sea of *Japan*, is indeed not Subject to any of those Obstacles, as the rest, yet where its Waters mix with the Seas, there grow such Prodigious Quantities of Bulrushes, and that of such a bigness, that a Man can scarce grasp them with both Arms, as to render its Entrance quite unaccountable. However, these Rivers are not quite useless to the *Muscovite* Merchants; for besides that they are much more easie to Cross when frozen, than they could Travel by Land, they are tolerably Navigable towards their sources, where they have but few Water-falls. One thing is very remarkable in these *Cataracts*, that they send forth such a fragrant scent, as if all the circumjacent Country had been over spread with the nicest Perfumes; If we may give Credit to such as have Travelled in those parts, this odoriferous scent proceeds from certain sweet-scented Flowers, which grow in great abundance upon those Rocks; that these Water-falls, the circumambient Air of which being kept in continual Agitation by the motion of the Water, disperses the sweet Exhalations of those Flowers all over the circumjacent Country. What I have hitherto imparted to the Reader, concerning the different Roads leading into *China*, and those Countries through which Travellers must pass, may, I hope, conduce something towards forming some right *Idea* of the *Great Tartary*, so little known even to this day; To discover which in a Nation so naturally inclined to jealousie, has cost us no small trouble, and had not we happened to come at a favourable juncture, when the *Muscovite* Court were just upon the point of Courting our King's Friendship, by sending a splendid Embassy thither, to engage him in the League they were then making with the Emperor and *Poland* against the *Turks*, we should perhaps not have succeeded so well in our Informations. But as this Embassy proved favourable to us upon that account, so it served the *Muscovites* for a specious Pretence to deny our Request, of going to *China* by Land. For no sooner were they informed that we were to come out of *Persia* into *Muscovy*, without any Letters of Recommendation, but they told us, that, though they were sorry to Obstruct so good a Design, as the intended Conversion of Infidels, yet that unavoidable Reasons of State obliged them, not to grant Passage through their Territories to Persons unknown to them, that it would be our best way to take the conveniency of going along with the Ambassador, they were sending into *France*, and after having represented to our King the Advantage of a free Passage for his Subjects into *China*, through their Territories (which was that they chiefly aim'd at) to return with such Passports and Recommendations from our King, as were requisite for a design of that Nature. It was in vain for us to Demonstrate the unnecessary trouble they put us to, in a matter which had not the least relation to Temporal interest, for Prince *Gallichin* in the *Czar*'s Name ordered us to depart, so that we were forced to obey; but as we had no small reason to doubt the success of the intended Embassy for *France*, we chose rather to Travel by our selves; but thought it absolutely requisite to wait upon him before we left *Muscow*; he sent us his Sleds about 10 a Clock at Night, (which time had been pitch'd upon as the most convenient to Discourse with us without giving any jealousie at Court) and entertained us very civilly for near 3 hours. Among other Discourses, he ask'd us, what Course he had best to take, to be well received in *France*; we told him franckly, that a free and generous behaviour in a Person of his Character would take better there, than all the intrigues he could invent, and that we were of Opinion, that most of the former *Muscovite* Ambassadors had miscarried for want of that Precaution. This being an advice not suitable to the Genius of a *Muscovite*, we found it had but a small with him, so that at last we took our leave, and as we were passing through the Court, we found abundance of People busie in loading Waggons with Sables and other Furs; for as ready Money is a scarce Commodity in *Muscovy*, so they take all Opportunities to bring it into the Country, this is the reason why so many Merchants, under the pretended Title of Gentlemen, are received into the Trains of such Ambassadors, as they send into Foreign Countries, there to vent their Commodities for ready Money, with the greater profit. Two days after this Interview, we left *Muscow* taking our way towards *Poland* (in hopes of meeting with better success after our next return into *Muscovy*) in the Company of a *Muscovite Boyar*, who was going to his Country Seat upon the Frontiers of *Lithuania*, and having been formerly a *Roman Catholick* himself, retained some kindness for our Religion, which made him Treat us, and a *Dominican* Fryar, who came lately from *Persia*, with Letters from that King to the Pope and Emperour with all imaginable Civility. The Letters were written in Answer to those Letters, sent by these 2 Potentates to the K. of *Persia*, to exhort him to embrace this Opportunity of regaining from the *Turks*, what they had wrested from the *Persians* some years before, but as the *Persian* King was too much addicted to his Pleasures to engage himself in the toils of War, and that the Prime Minister, for what reason, is unknown, shew'd no less aversion to it, these Answers imported no more, than that there was still a veil before his Eyes, which till it were removed, he could not have a clear insight into those Propositions that were made to him in the said Letters. We Travelled in Company with this *German Dominican* Fryar, through part of *Muscovy*, *Lithuania*, and *White Russia*, and did not part till we arrived at *Warsaw* the 12th of *March* 1686. eleven Months after F. *Barnaby* and I had left *Iverum*.

The River *Oby*.

CHAP. XI.

Father Averil's *Travels into* Muſcovy.

UPON mature Deliberation betwixt F. *Barnaby* and I, it was thought moſt expedient, that whilſt he return'd into *France*, in order to obtain the neceſſary Paſſports and Letters of Recommendation from our King, I ſhould ſtay in *Poland*, to be the nearer to *Muſcovy*; Purſuant to which Reſolution F. *Barnaby* went to *Dantzick*, where meeting fortunately with a Ship bound for *Amſterdam*, he ſafely arrived there, and ſo proceeded further to *Paris*. The great Comfort I received during my ſtay at *Warſaw*, was the frequent Opportunity I met with of giving all imaginable encouragement to a great number of our Country-men that inhabit there, and my endeavours for the promoting of our Religion ſucceeded ſo well, that I converted a *Mahometan Tartar*, a Slave to the Prince *Tſartoreſky* to the Chriſtian Religion, and brought a ſeduced *Lutheran* into the Boſom of our holy Church. But theſe Functions of my miniſtry did not cauſe me to neglect any thing that might contribute towards the promoting that Great Deſign, which detained me in *Poland*. And as there was a neceſſity of keeping a Correſpondency with my Companion, whilſt he tarried in *France*, I implored the *Protection* of the Marquis *de Bethune*, his moſt Chriſtian Majeſty's Ambaſſador to the King of *Poland*, who had no ſooner underſtood our intention by my Letter, but he in the moſt obliging manner in the World, not only gave me full aſſurances of his good Inclinations, but alſo as a real proof of it, ſpoke to the King of *Poland* upon that Subject, who was graciouſly pleaſed to make ſuch diſcoveries to him concerning the Paſſage into *China* by Land, which we intended to take, that he adviſed me to come in Perſon to Court, there to receive from his Majeſty's own Mouth thoſe Inſtructions, which might have proved of vaſt conſequence to us, and not the *Muſcovites* by their unaccountable Obſtinacy broken all our Meaſures. No ſooner was it known in *France*, with what Zeal his *Poliſh* Majeſty eſpouſed our Deſign, and of what great advantage the nearneſs of his Territories to thoſe of *Muſcovy*, might prove towards the furthering of our Deſign; but I had poſitive orders ſent me, to implore his Majeſty's Authority to ſecond our projected journey, which was in his Power to do, by reaſon that by the late Peace concluded with the *Muſcovites* his *Poliſh* Majeſty, by vertue of a peculiar Article had reſerved to himſelf a Power of ſending at Pleaſure Religious Men to Preach the Goſpel, in thoſe parts, and that the *Czars* ſhould be obliged to grant them free Paſſage through their Territories. As I was infinitely pleaſed with theſe happy Conjunctures, which ſeem'd to conſpire towards the accompliſhment of our *Great Work*, I forthwith ſet out from *Warſaw* to *Samarow*, where the Court then was, and being ſoon after my arrival preſented to his Majeſty by the Marquis *de Bethune*, he was ſo obliging as firſt to enter upon our Deſign of going by Land into *China*, of which he made me ſuch convincing Diſcoveries, beyond what ever I heard of before, that, I can't without grief Lament the opportunity we have loſt of putting it in execution. The King had received theſe Diſcoveries from the hands of a certain *Muſcovite* Ambaſſador named, *Nicephore*, who had reſided for ſometime in the ſame Country at *Peking*; and the King had the goodneſs to Communicate the whole Secret to me, together with a Map or Book of Roads, which Monſieur d' *Abancourt* had compoſed out of the Memoirs of the ſaid Ambaſſadour. They agree to the higheſt nicety with the Relations of all the Travellers who have taken that way into *China*, both in reſpect of the Roads, and the People inhabiting thoſe Countries through which you muſt paſs; and who in my ſecond journey into *Muſcovy*, I made it my buſineſs to compare with the true Sentiments of thoſe I conſulted upon that account, I found, an exact harmony betwixt them, as to the poſition of all the Cities and Forts mentioned in the ſaid Map, which conſequently would have been very exact, had it not been for the defects in the degrees of Longitude and Latitude, in which as the *Muſcovites* are very irregular, and ſcarce will admit others to correct their Errors by their own Obſervations, ſo it will be very difficult to determine any thing certainly upon that account; And what has been alledged in the preceeding Book, concerning the Paſſage by Land into *China*, being part taken out of theſe Memoirs of the King of *Poland*, and what Information I have received ſince, being no more than a Confirmation of what I had underſtood before, it would be ſuperfluous to inſert them here, which however, I did not think fit to paſs by in ſilence, not queſtioning but that the moſt ſenſible part of Mankind would eaſily be induced to rely upon the Authority of the moſt knowing Prince, and the leaſt liable to be impoſed upon, as to this point, that now Reigns in the World. I ſoon diſpatch'd all theſe inſtructions with what other Informations I had got, to *France*, where they were ſo well received and approved of by our Superiours, that they promiſed themſelves very conſiderable Advantages from this undertaking for the encreaſe of our Religion; The Zeal his moſt Chriſtian Majeſty had ſo lately ſhew'd in promoting the Converſion of the Infidels in the Kingdom of *Siam*, not giving them the leaſt room to doubt, of his Protection in this ſo laudable a deſign. They took care to repreſent to him the vaſt Advantages that were likely to accrue from this diſcovery, which was backed by the hopes of the Converſion of no leſs than the *Great Tartary*, he no ſooner underſtood their Intentions, but readily granted all that they requeſted for the facilitating of this Important work, ordering immediately our Paſſports to be diſpatch'd; and not contented thus alſo granted us his Letters Patents, conſtituting us his Mathematicians, and honouring us with his peculiar Letters of Recommendation to the *Czars* of *Muſcovy*, whilſt F. *Barnaby* left no ſtone unturn'd in *France*, to further our deſign with all poſſible ſecurity, I received Orders from our Superiours, to ſelect ſome of our Society in *Poland*, ſuch as were fitly qualified for the facilitating the Succeſs of our Enterprize. There could not be wanting in ſo ſpacious a Kingdom ſuch as were very willing to have their ſhare in ſo great a Work, and there were a conſiderable number of *Jeſuits*, who offered themſelves to be partakers of this happineſs, out of which we pick'd out only two, whom we look'd upon as the propereſt Perſons for the promoting of our Deſign. The firſt, whoſe name was *Zapolsko*, was deſcended from one of the moſt Illuſtrious Families of *Poland*, out of the Province of *Cracow*, and had for theſe 20 Years laſt paſt ſhew'd a moſt extraordinary inclination to go a Miſſionary into *China*. Beſides that he was well verſed in the Mathematicks, Philoſophy and Divinity, which he taught with great Reputation, being Rector of the Chief Colleges in *Perſia Royal*, he underſtood ſeveral Foreign Languages, and among the reſt the *Ruſſian* perfectly well. The name of the ſecond was *Terpiloweski*, a *Lithuanian* by Birth, who had been Profeſſor of the Mathematicks at *Vilna*, and now reſolved to have his ſhare in the great Work, I was going about; for which he

he was endowed with extraordinary Qualifications, as being of a sweet Disposition, a great Master in playing upon divers sorts of Musical Instruments, and of a most surprizing Address in all kinds of handy-works, especially in engraving. As these two Fathers understood exactly well the *Sclavonian* and *Russian* Languages, as F. *Barnaby* and I did the *Turkish* and *Tartar*, we were sufficiently prepared in that respect to pass through *Siberia*, and the *Great Tartary* to *China*, without the help of an Interpreter; and as these two *Polish* Fathers on their side omitted nothing, which they judged might further our Design; so F. *Barnaby* on the other hand, who was the best judge of what was likely to be most acceptable in those Places, through which we were to pass, took care to provide Toys of all Kinds, and Remedies, to present them to the *Tartarian* Princes, through whose Countries we were to pass, besides Mathematical Instruments to observe the Longitude and Latitude of places.

F. *Barnaby* embarks at *Roan.*

Thus prepared, and back'd by the King's Recommendatory Letters, he went to *Roan*, there to embark with another young Jesuit, who had entred himself lately into that Order, for no other reason, than to make himself serviceable in the Life of a Missionary. It being *November* by this time, I resolved to leave *Warsaw*, and go to *Dantzick*, there to expect my Companion, not without hopes, that we might reach *Muscovy* before the end of the Winter. But God's Providence was pleased to check us afresh; in the full career of our hopes, the Ship in which F. *Barnaby* was embark'd being lost by Shipwrack. This was a most sensible Affliction to us, the loss of so good a Man, together with what he had brought along with him for the promoting of our Design, being irreparable, especially at a juncture, when the indifferent Reception the *Muscovite* Ambassadors had met with at the *French* Court, and the prospect of a War, which soon after ensued, betwixt *France* and *Germany*, with the last of which the *Czar* was entred into a strict League, appear'd to be so many Presages of our future ill success. Notwithstanding I say, all these Obstacles, we resolved not to give over our project, and, as at this time the Diet of *Poland*, was held at *Grodno* in *Lithuania*, whither Count *Syri*, (of whom more anon) was gone to sollicite to obtain the Embassy of *Persia*, I took a Resolution to go thither, not questioning, I having always found him very favourable to our Society, and design, but I might by his Assistance find out some way or other to accomplish our Design.

F. lost by shipwrack.

The Author leaves *Dantzick.*

Accordingly I left *Dantzick* in the beginning of *February*, and in 8 hours time over the *Huffor* Gulph, which is made there by the *Baltick Sea*, which was frozen over at that time, I arrived at *Koningsbergh*, the Capital City of the Ducal *Prussia*, 24 *German* Lgs distant from *Dantzick* by Land. Notwithstanding the trouble the loss of my Companion had put me into, I was not a little delighted with the agreeable Spectacle of so many Magnificent Sleds as were to be seen at that time upon the *Vistula*; they are Machines resembling a Triumphant Car, drawn by one Horse, with a very easie motion and incredible swiftness. Being obliged to bestow some Days in encouraging the Zeal of some *Roman Catholicks*, who have not the free exercise of our Religion here, as living under the Jurisdiction of the Elector of *Brandenburgh*.

Comes to *Koningsbergh.*

I made all the haste I could to recover my lost time, and happily arrived at *Grodno* before the breaking up of the Diet. I met here with abundance of Persons of Quality, from whom I hoped for some Assistance, and among the rest with the Marquess *de Bethune*, and the Count *Syri*, unto whom I made my Applications, remonstrating to them the Difficulties we were likely to meet with in this intended Mission, which were such that I almost began to despair of obtaining a free Passage through *Siberia* from the *Muscovites*, since their Deputies, who were present at the Diet of *Poland*, had upon several occasions spoke very reflectingly concerning the ill Reception their Ambassadors had met with in *France*, and had spread a Rumor of a certain Engagement betwixt the *Chineses*, and their Forces, in which they said had been made Prisoners, two Jesuits belonging to the *Chinese* Army, all which I look'd upon as the Fore-runners of the Denial they intended to give us of passing through *Siberia*. Yet to be satisfied in the matter, and to leave no Stone unturned, I prevailed upon the Marquess *de Bethune*, to write upon that subject to Prince *Gallichin*, to sound his Inclinations, unto which he receiving no Answer, I gave the matter over for lost, in relation to our Passage through *Siberia*. There being then no other means left, than to think of another way, which might not depend on the Capricio's of the *Muscovites*, I proposed to Count *Syri*, that being pitch'd upon to go in the Quality of Ambassador of the *Republick*, to the Court of *Persia*, by the way of *Muscovy*, he might be capable of protecting us, and by the Credit he had gained in his former Embassy, among many Nations of the *East*, to secure our way as far as the *Tousbec Tartars*, being the first, belonging to the *Great Tartary*. This Count *Syri* was a Native of *Armenia*, and his Family being involved in some Troubles, he was carried very young into *Portugal*, where he was Educated among the King's Pages, till he was about 18 or 20 years of Age. Having a more than ordinary desire for travelling (a thing almost natural to those of that Country) he travelled through *France*, *Italy*, *Germany* and *Poland*, and having made himself Master of divers both *European* and *Asiatick* Languages, and among the rest of the *Turkish* and *Polish*, he was looked upon as a fit subject by his *Polish* Majesty, to accompany his Ambassador, who was then going to *Constantinople*. He managed matters so well in this Station, that after his return from thence he was sent Ambassador, first into *Muscovy* and afterwards into *Persia*, where he discharged his Trust so well, that now he was pitched upon by the Emperor, the Republick of *Poland*, and that of *Venice*, (who were engaged in a Lg against the *Turks*) to the King of *Persia*, to remonstrate to him the Advantages he might reap at this juncture, if he would break with the *Turks*. The *Eastern* Embassies have this beyond those of *Europe*, that they are not only honourable, but also profitable; for, besides that their charges are born immediately after they enter the Territories of those Princes unto whom they are sent, the Merchants trading into the *Levant*, but especially the *Muscovites* and *Armenians* are the fondest People in the World, to purchase the Protection of those Ambassadors, at a very good rate, because they enjoy the Benefit of a free Trade, without paying any Customs. For this must be acknowledged to the Vertues of Count *Syri*, that he was a Person, who equally apply'd all his Thoughts to the Advantage of the cause of his Masters, and that of Religion, of which he has given several convincing Proofs, in taking away from the Infidels several unhappy Christians, who had renounc'd their Faith, in settling Missionaries at *Schamachie*, and in now endeavouring to procure new Settlements for them throughout the whole *Persian* Empire, under the King of *Poland*'s Protection. I can't, I say, pass by in silence upon this occasion, the generosity he shew'd us at *Astrachan*, where he offered to Ransome us from the *Calmuc Tartars*, being inform'd that we had been taken by them as we were crossing the *Wolga*. All these great Qualifications being sufficient motives to engage so extraordinary a Person in our design, I told him, that if he had any Thoughts of being known to our great Monarch, this was the most favourable occasion he could meet with by affording us his Protection, and that I did not in the least question, but that such an offer would meet with a favourable acceptance from our King. After a months Consideration, he yielded my Request, and writ a Letter to Father *de la Chaise*, in which he made an offer of his Zeal and Service to our Monarch.

Take New Measures.

Count *Syri*

The Eastern Embassies very profitable

Count *Syri* writes to F. *la Chaise.*

His offer is accepted by the *French* King.

Our Superiors in *France* being over-joy'd at the News of it, obtained without much difficulty his Majesty's consent, who being satisfied in the Character they bestow'd upon the Count *Syri*, order'd his Letters of Recommendation to be expedited to the Kings of *Persia*, of the *Tousbecs* and *China*, the Contents of which being the same, and written in one Style, we will content our selves to insert only the last here.

The King's Letter to the King of *China.*

'Most high, Most excellent, Most puissant, and Most 'magnanimous Prince; Our dearly beloved good 'Friend, may God encrease your Grandeur with a 'happy end. Being assur'd that your Majesty has 'shewn a great Inclination, to have in your Dominions and near your Person, a considerable number of 'learned Men, well instructed in all the *European* 'Sciences, we did some years ago send to you six Mathematicians from among our Subjects, to shew 'your Majesty, whatever might be thought worth 'your curiosity in these Sciences, but especially in the

'Aſtronomical Obſervations, of our Academy eſta-
'bliſh'd in our Capital City of *Paris*. But experi-
'ence having convinced us, that by reaſon of the
'vaſt diſtance betwixt our Territories, the Sea
'Voyages have proved both very tedious and dange-
'rous, as being ſubject to many Siniſter Accidents, we
'have reſolv'd only out of the deſire we have to contri-
'bute to your Majeſty's Satisfaction, to ſend to you
'ſome more of the ſame Father's *Jeſuits* (who are
'our Mathematicians) with Count *Syri*, by Land,
'which being the ſhorteſt and ſafeſt way, we hope
'they may be the firſt near your Majeſty, and ſerve
'as ſo many Pledges of our Eſteem and Friendſhip,
'and that after the return of the ſaid Count *Syri*,
'we may receive the ſatisfaction of having a more
'ample Account of the admirable and moſt extraor-
'dinary Actions of your Life, whereupon we beſeech
'God, to augment the Grandeur of your Majeſty,
'with an end altogether happy. Given at *Marly*.
'*Auſt.* 7. 1688.

Your moſt dear and good Friend.

Lewis.

Whilſt theſe things were preparing in *France* for the furthering of our deſign, I received the welcome News, that F. *Beauvillier* who was to have accompany'd F. *Barnaby*, arriving ſome days too late at *Roan*, had eſcap'd the Shipwrack which loſt us our Companion, and was now coming by Land into *Poland*. This Father being thus preſerved by Providence from that danger which overwhelm'd F. *Barnaby*, I am got at Liberty to give you an account of what great things I have ſeen him do, whilſt I travelled in his Company, but as the Death of the other has put him beyond the malice of any, I am obliged to do that office to his Memory, that ſcarce ever was a Perſon ſent into the *Eaſt* better qualified for the Office of a Miſſionary. For, beſides his skill in Foreign Languages, and undaunted Courage, he had made ſome Progreſs in the Study of Phyſick, that by the Cures he perform'd in *Curdiſtan* and *Armenia*, he eſtabliſhed 2 Miſſions there among a People who are apt to meaſure eternal Bleſſings by Temporal Benefits. His Courage did appear by his Sufferings, he was ſtrip'd divers times by the *Arabians* and *Curdes*, twice impriſon'd, and often abus'd and cudgel'd for the Confeſſion of the Truth of the Goſpel.

But to return to *Grodno*, much about the ſame time that the *Poliſh* Diet of *Grodno*, was upon the point of breaking up, I received notice of F. *Beauvillier*'s Arrival in *Poland*, which made me haſten to *Warſaw*, where we both arrived much at the ſame time; and from that time forward made all the neceſſary Preparations for the Proſecution of our intended journey, with Count *Syri*, which was fix'd againſt the latter end of *Auguſt*. In the mean while the Superior of our Society in *Poland*, being encouraged by the Admonitions of thoſe of *France*, reſolved not only to add ſome other Miſſionaries to thoſe already granted for *China*, but being informed, that the Prince of *Iveria*, who had been baniſhed his Dominions for ſome time, and now was going to reaſſume the Government thereof, was very deſirous to have ſome learned *Jeſuits* with him; they readily agreed to take the Advantage of Count *Syri*'s Embaſſy to ſend ſome into thoſe parts. This Prince, whoſe name was *Archilla*, was Originally a Chriſtian of *Georgia*, but to ſecure the quiet Poſſeſſion of the Kingdoms of *Iveria* and *Mengrelia* was turn'd *Mahometan*, which made the King of *Perſia*, whoſe Tributary he was, uſe him very favourably at firſt; and though he afterwards return'd to his former Chriſtianity, he uſed him not ſo rigorouſly as he did ſome other petty Princes his Vaſſals. But being prompted at laſt by his unſatisfiable Luſt, to injoy the ſpouſe of this Unfortunate Prince, coſt it what it would, he firſt made uſe of fair means and entreaties, to obtain his end, but theſe not ſucceeding he proceeded to Threats, and at laſt to open Violence, ordring a good Body of his Troops to poſſeſs themſelves of his Dominions, which *Archilla* not being able to oppoſe, he retreated with the Princeſs, his Lady towards the uttermoſt Borders of his Kingdoms upon the *Turkiſh* Frontiers, near the *Black Sea*, in hopes of finding ſhelter among them; but theſe being brought into the King of *Perſia*'s ſide, found means to ſurpriſe him, and committed him Priſoner to a Caſtle belonging to the *Turks*; The Princeſs his Lady, being left at Liberty, and exaſperated to the higheſt degree by this violence, without loſs of time aſſembled ſome of the Neighbouring Gentlemen, her Subjects, and putting herſelf at the Head of them, attack'd the Caſtle where her Husband was kept, and in ſpite of all the oppoſition of the Soldiers, carry'd him away, and ſet him at Liberty. After ſo bold an attempt, knowing themſelves not ſafe in their Kingdoms, they took their refuge in *Muſcovy*, where they were kindly receiv'd by the *Czars*, who for three years paſt had aſſign'd them a Palace and honourable maintenance in the City of *Muſcow*. Prince *Archilla* being made ſenſible of the Advantages that accrue to the Commonwealth by a general Uniformity of Religion in the Subjects, and not queſtioning but that if he could eſtabliſh the ſame in his Dominions, which was fill'd up with Chriſtians of different Sects, he might be much better in a Condition to defend himſelf againſt his Oppreſſors, he apply'd himſelf to the Patriarch of *Muſcovy*, but with very little probability of ſucceſs, for tho' *Muſcovy* aboundsin Prieſts, their Genius does not lead them to encounter danger upon a Religious account, ſo that he ſaw himſelf obliged to try his Fortune with the *German* Jeſuits, whom he found not ſo backward as the *Muſcovites*, and divers *Poliſh* Jeſuits were willing to take this Opportunity of ſhewing their Zeal for the Religion they profeſt, and conſequently reſolved to go along with Count *Syri* into *Perſia*. We left *Warſaw* at the beginning of *September*, and advanced to the Frontiers of *Muſcovy* in *Lithuania*, where the general Rendevouz of all our Company was appointed, on a certain day; yet it ſo happened, that one of our Miſſionaries, and as ill Fortune would have it, the ſame Perſon who had all the Mathematical Inſtruments, and whatever was ſent us a ſecond time out of *France* along with him, was faln ill at *Vilna*, ſo that after we had ſtop'd ſome time in vain, it was thought Expedient, to deſire Count *Syri* to go on with his whole train to *Smolensko*, whilſt I ſhould make what haſte I could to *Vilna* to look after our Companion. Accordingly Count *Syri* continued his journey, and being extreamly well ſatisfied with the Civilities of the *Waywode* of *Smolensko*, who promiſed him to take care of us as ſoon as we ſhould come that way, he purſued his journey to *Muſcow*. When I came to *Vilna*, I found the Perſon I look'd for, already recovered and gone to *Minsko*, where I overtook him being above 30 *German* Lgs from *Vilna* in the *Black Ruſſia*; after which croſſing a huge Foreſt betwixt that place and *Cazin* the laſt City on the Frontiers of *Poland*, we entred the Borders of *Muſcovy*. In this Foreſt we obſerved moſt Prodigious quanties of Bees, which make their Hives in the hollowneſs of the Trees, and the Country People take care to ſecure them againſt the Bears, who are great Lovers of Honey, by making a fence with Spikes on the top round the Trees, or making up the holes, through which they enter the hollow Tree with Thorns, beſides which the Foreſts of *Lithuania* afford divers ſorts of Furs, not inferior to thoſe generally found in *Muſcovy*. In our paſſing through theſe Foreſts, the Peaſants related us very ſtrange things concerning the Bears, and eſpecially, that notwithſtanding the Savageneſs as has been found by experience, that they ſuckle Children, but what ſurpriſed us moſt, was what they related to us concerning their Paſſing the whole Winter in a profound ſleep, by vertue of a certain ſtupefying Herb, which they eat at the beginning of that Seaſon. They atteſted to us, that a certain Peaſant, being retired upon a Tree to ſhelter himſelf againſt the danger from a ſhe Bear, whom he ſaw coming along with her young ones, he ſaw her eat a certain Herb, and ſhe being return'd into the Foreſt, and he curious to know, what Herb it was ſhe had eaten, gathered ſome of the leaves, which he chew'd going home, which he had no ſooner done, but fell a ſleep upon a hay cock, and being miſs'd for ſeveral days, was at laſt found there, and awaked not without a great deal of difficulty. But to return to our journey; No ſooner were we arrived upon the Frontiers, but we gave notice of our arrival to the Governour of *Smolensko*, who indeed would fain have performed his promiſe made to Count *Syri*, but that an expreſs order from Court forbid him not to admit us into the *Czar*'s Territories; which put us to the greateſt nonplus that could be, not knowing which way to turn our ſelves, when by good luck a *Poliſh* Envoy, named *Laziński*, in his way to *Muſcovy* paſſing through this place, generouſly afforded us his Protection, and carried us in the quality of his Chaplains to *Muſcow*.

The Princeſs of *Iveria* releaſes her Husband.

Some Fathers Miſſionaries ſent into *Persia*.

Bears in love of honey.

Sleep-warrer-low.

They come to *Muſcow* with a Dr. Envoy.

The

The *Muſcovites* had no ſooner notice of it, but they order'd Count *Syri* to depart *Muſcow* immediately, and in a few days after our arrival there, we were commanded by a *Priſtaff* to depart the *Czar*'s Dominions without delay. Not knowing what to do in this extremity, we made our Applications to *Dominick d'Aumont* the *Poliſh* Reſident at *Muſcow*, who not daring to protect us, adviſed us to produce our King's Letter to the *Czar*, which ſucceeded ſo well, that no ſooner had Prince *Gallichin* notice of it, but he excuſed what was paſs'd and promis'd us a particular Audience; accordingly we were introduced to him by the *Poliſh* Reſident, and as he was a great admirer of Strangers, but eſpecially of the *French*, and above all of our Great Monarch, he received us with all manner of Civility, took the King's Letter with a great deal of reſpect, and promiſed us to have it interpreted, in order to give us a favourable Anſwer. I am very free to acknowledge that it was not Prince *Gallichin*'s Fault, we did not receive it accordingly, but the *Dutch*, and Envoy of *Brandenburgh*, whether upon the account that we were *French-men* or *Jeſuits*, I will not determine, had taken care to put ſo many jealouſies into the Heads of the *Boyars*, who were of the *Czar*'s Council, that they were deliberating whole fourteen days upon a matter, which had nothing further in the bottom, than the either granting or refuſing a Paſſage to a few Miſſionaries, who were to Preach the Goſpel in *China*. Whilſt we were in expectation of the iſſue of the deliberations of the Council, we ſpent much of our time in making an exact enquiring into the preſent State of Affairs in *Muſcovy*, which we will reſerve for a particular Treatiſe in due time; we will only take notice in this place, that the Envoy of *Brandenburg*, we had occaſion to mention juſt now, arrived at *Muſcow*, ſome days before us, being ſent by the Elector his Maſter to *Muſcow* under pretence of notifying his Exaltation to the Electoral dignity, but in effect to enter into an Alliance with *Muſcovy* againſt *Poland*, becauſe that King had ſhew'd ſome reſentments, concerning the affront put upon him and the Kingdom of *Poland*, by the ſecond Marriage of the Princeſs *Radzivil* (Siſter-in-Law to the Elector) with one of the Elector *Palatin*'s Sons, whereas ſhe had been promiſed to *Prince James* of *Poland*.

Prince *Gallichin* gives them Audience.

The Envoy's Name was *Richer*, a rigid *Calviniſt*, and conſequently a ſworn Enemy to the Jeſuits, and as he was careſs'd much beyond the *Poliſh* Miniſter at the *Muſcovite* Court, ſo he let ſlip no Opportunity to improve it, to our diſadvantage as will among the reſt appear out of the following account.

A certain *Roman* Catholick Gentleman, named *du Roville*, a Native of *Brabant*, falling into diſpute with a certain *German*, named *Selims*, who to marry a *Lutheran* Woman, had renounced both his Religious Order and Catholick Faith, the ſaid *German* not being able to endure the Reproaches of the other, drew his Sword; the *Brabander* endeavoured for a conſiderable time to avoid his Thruſts, and to diſarm him, but finding his endeavours in vain he took hold of a Piſtol, that happened to hang in the Room ready charged, and ſhot him through, the wounded Perſon living 2 days after, declaring that he had drawn this misfortune upon himſelf by his own Obſtinacy, the Judges delay'd to give their Judgement againſt the Criminal, till they might receive farther Information in the matter, which gave time to the *Poliſh* Reſident to intercede for this unfortunate Gentleman at Court, which had this effect, that the *Muſcovite Boyars* ſhew'd a great Inclination to ſave him, provided he would embrace the *Greek* Religion, and ſerve in their Armies. But this young Gentleman, who was not above 25 years of Age, ſlighting their offers with an Heroick conſtancy, the *Lutherans* and *Dutch*, (who had engaged the *Brandenburgh* Envoy in their Cabal) did puſh the matter ſo vigorouſly againſt him at Court, that when his Friends were moſt in hopes of a Pardon for him, Sentence of Death was pronounced againſt him, immediately after the Envoy of *Brandenburgh* had had a private Conference with Prince *Gallichin*; nay, they were ſo cruel, as not to allow Father *Beauvillier* who was his Confeſſor, to come to him. We left no Stone unturned to have his Sentence revok'd, and were in no ſmall hopes of obtaining it, when one day, to our great ſurpriſe, word was brought us, that the *Brabander* was going to the place of Execution; near the Houſe where this Misfortune had happened; at which F. *Beauvillier* running out immediately, with his Crucifix in his hand, forced himſelf thro' the crowd of People, and in ſpite of the Oppoſition of the Soldiers that attended upon that Occaſion, threw himſelf into the Sledge, in which this poor Gentleman lay, and afforded him ſuch Spiritual Comforts as he thought were moſt proper for ſo extraordinary an Occaſion. Thus being come to the place of Execution, the *Brabander* came modeſtly out of the Sledge, and after having ſpent near an hour and a half in Devout Ejaculations, he delivered his Brocado Veſt to the Executioner, and declaring that he dy'd a true Son of the Catholick Church, he ſtep'd into a ſmall Entrenchment made for that purpoſe, and laying his Body upon the Ground covered with Snow, and the Head upon the Block, received the fatal Stroak, with a marvellous Conſtancy. The Zeal F. *Beauvillier* had ſhewn for this Gentleman, whoſe Death made ſo much noiſe in *Muſcow*, acquired us no ſmall eſteem in that City; but his Adverſaries not being ſatisfied in their Revenge, unleſs they alſo put ignominy upon his Body after his Death, prevailed ſo far with Prince *Gallichin*, that he ſhould lie expoſed three days to publick view. The *Poliſh* Reſident being highly exaſperated at the malice of the Enemies of our Faith, repreſented the matter in ſo preſſing Terms to the Emperor's Miniſter, that by his Interceſſion, it was removed thence, and carried to the *Jeſuits* Houſe, where it was laid in a ſumptuous Coffin, and buried with all the Ceremonies practiſed in Catholick Cities, in the Church-yard allotted for the Burials of Foreigners. One thing happen'd upon this Occaſion, which ought not to be paſs'd by in ſilence; for as the rigour of the Seaſon is ſuch in *Muſcovy* in the Winter, that whenever they have Occaſion to dig the ground, they muſt for ſometime before heat it by a good quantity of Wood, which they burn near it; this precaution having been neglected out of forgetfulneſs, we found notwithſtanding this the Grave diggers employed at their Work with as much eaſe as if the ground had been moiſtned by the moſt favourable Summers rain.

The Tragical Hiſtory of a Gentleman of Brabant.

The Envoy of *Brandenburgh* not ſatisfied, thus, unleſs he alſo thwarted our Deſign, knew ſo well how to repreſent to the *Muſcovite* Court, the ſlight Entertainment their Ambaſſadors met with in *France*, and ſome other matters relating to the Greatneſs of our Monarch, that the jealous *Boyars* thought fit to refuſe us Paſſage, ordering us by the firſt Secretary of the Chancery to retire with the ſame *Poliſh* Envoy who had brought us along with him, out of the *Czar*'s Dominions. In this exigency we had again recourſe to Prince *Gallichin*, whom we knew to be of our ſide, he did uſe all his Intereſt to obtain what we deſired, but in vain, the *Boyars* perſiſting in their former Reſolution, though if he would have employed his Authority with the eldeſt of the 2 *Czars*, and the Princeſs *Sophia* his Siſter, (whoſe favourite he was) he might without queſtion have forced them into a Compliance, but it being not his buſineſs as the caſe then ſtood, to exaſperate the Court againſt him, he thought it his wiſeſt Courſe not to inſiſt further upon the matter, eſpecially ſince two remarkable accidents which befell him much about the ſame time, ſeem'd to forewarn him, that he ought to be very circumſpect, and conſtantly upon his guard. The firſt was done by a private Perſon, who throwing himſelf into the Sledge of this Prince as he was going along the Street, was going to Stab him with his dagger, had he not been happily prevented by the Prince's Attendants; who having ſeized him, he was ſo far from being daunted, that the only ſorrow he ſhew'd was, of having miſcarried in his deſign; *Infamous Tyrant*, ſaid he, *though I have not been ſo fortunate as to be able to deliver my Native Country from ſuch a Monſter, know that about* 300 *Citizens who groan under thy Yoak, are reſolved to take ſurer meaſures than I have done to make thee a Sacrifice to the injur'd People.*

This was follow'd by another, which ſeem'd to be the Preſage of the ruin of that Great Miniſter; for ſome days before his departure to the Army, a covered Coffin was found at his Palace Gate, with a note in it to this purpoſe: *Gallichin, unleſs this Campaign prove more fortunate than the laſt, thou*

cannot avoid this. These things, I say, proved the forerunners of his misfortune, which ensued soon after; for no sooner was he returned from the *Crim-Tartary*, but he was banished into *Siberia*, where he leads a miserable Life ever since. Thus all our hopes being vanish'd in *Muscovy*, we prepar'd for our return with the *Polish* Envoy, but the *Carnaval* of the *Muscovites* being at hand, during which all manner of excesses were committed by them, the Envoy thought it his safest way to tarry a fortnight, rather than to expose our selves to the hazard of being insulted by the way; About that time, the youngest of the 2 *Czars* being about 18 years of Age, marryed the Daughter of an Officer of the Army, which was proclaim'd by the sound of the Great Bell, which contains 20 foot Diameter, 40 in height, and a Cubit in thickness, tho' since it was first cast they have taken off above 400000 pound of Metal, to make it sound the better; They strike it with a Hammer, which is seldom done but upon very extraordinary Occasions. One thing is observable, that whereas the *Czar* always chooses one out of his Subjects for his Spouse, the Marriage is never proclaim'd till after its Consummation, for fear of putting such as perhaps have aspired to, and been disappointed in obtaining this Dignity upon some desperate attempt or other, especially by Witchcraft, in which point the *Muscovites*, are extreamly Superstitious. The falling Sickness which siezed the young Prince some few days after, was at first attributed to this, but as this distemper is Hereditary to the Family, and that it had no further ill consequences, that rumour vanish'd soon after. The *Polish* Envoy immediately after the Conclusion of the *Carnaval*, set forward on his journey for *Poland*, and we accompany'd him to the Borders of *Lithuania*, whence we proceeded to *Warsaw*, where Heaven was pleased to raise us a Patron, under whose Protection, we continued our journey to *Constantinople*.

CHAP. XII.

Father Averil's *Travels into* Moldavia.

THO' the Dangers which we were likely to Encounter in so long a Journey, when the War betwixt the Emperour and the Infidels, had made those Roads very unsafe, yet as we were resolved to pursue our Design, cost it what it would, we desired Passes from the Emperor's Envoy call'd *Jervoski*, to *Vienna*, from whence we might with ease go to *Buda*, and so further into the Grand Seignior's Dominions. But a certain reason of State having obliged him to refuse it, we made our Applications to the Great General of *Poland*, *Jablonouski*, who Entertained our Propositions with a great deal of Kindness, and promised us forthwith to dispatch two Messengers, one to the *Hospodar* of *Moldavia*, the other to the *Bassa* of *Caminiec*, in order to procure us a free Passage; which he did accordingly, and Entertained us in his own Palace at *Leopold*, till their return, when having received as favourable Answers as could be expected, the Great General thought it our best way to take the Road of *Moldavia*, for which care we had great Reason to Thank him, for no sooner were we arrived at *Jassi*, the Metropolis of *Moldavia*, but we understood that some *Armenians* who had taken their way over *Caminiec* had been strip'd by the *Tartars*. But what surpass'd all the rest of his Kindnesses, was, that he provided us with all necessary charges for our Journey, and allowed us a guard of 30 *Moldavians* to Conduct us to the *Hospodar*. Thus we cross'd part of *Podolia* and *Pokutia* to the City of *Campo Longo*, belonging to the *Moldavians*, but then in the Possession of the *Poles*, but before we reach'd the place, we were forced to pass the famous Forest of the *Bonkovines*, famous for the Signal Victory the Great General of *Poland*, obtained some years ago over the *Turks* and *Tartars*, under the Command of *Sulthan Galga*, who were threatning *Poland* with a Powerful irruption. After we got safe out of this Forest, the ways of which are very troublesome, and much infested by Robbers, we entred the Plains of *Moldavia*, which are perhaps the Pleasantest and Finest in all *Europe*, being watered by many Rivers, and among the rest by the *Moldava*, which would make this Country one of the most fertile in the World, were it not that by the continual Marches of the *Turks* through it, and the frequent Inroads of the *Tartars*, the Inhabitants are discouraged from improving their Grounds to any considerable advantage. Having taken a New Guard at *Campo Longo*, we continued our journey to *Jassi*, the Metropolis of *Moldavia*, where we were received with such Expressions of kindness by the *Hospodar* as is past Expressing. We attributed these Obligations to the recommendatory Letters of the Great General, but found in the Sequel, that there was some Mystery hidden in the bottom; the better to disguise his Design he was then upon in entring into a Lge with the Emperour; For, this *Constantine Cantemir*, *Hospodar* of *Moldavia*, having promised the King of *Poland*, during the Campaign of *Budziac*, to receive him into his Capital City, with his Army, was so far from performing it, that upon the approach of that King, he left the City with the Inhabitants and all their movables, at which the *Poles* being enraged, entred the City and laid it almost desolate. This so incensed the *Moldavians*, that they resolved to enter into a Lge with the Emperour, and to submit to his Protection upon certain Conditions; the chief of which were, that the Emperor should assist the *Hospodar* in driving the *Poles* out of *Campo Longo*; that he should procure the Liberty of the eldest Son of the *Hospodar*, who was detain'd a Hostage at *Constantinople*, that the Principality of *Moldavia* should be Hereditary to the *Hospodars* Family, and finally, that a full Liberty of Religion should be granted in this Principality. After a stay of 8 days at *Jassi* the *Hospodar*, having provided us with Pass-ports and Letters of Recommendation to the *Serasquier*, who then lay encamp'd upon the *Danube*, on the Frontiers of *Moldavia*, so that departing with the Convoy, we arrived in 4 days at *Galatz*, a small Town upon the *Danube*, whence we were conducted in a bark to the *Turkish* Camp, not above 5 hours distant from thence. We were very obligingly received by the *Turkish Serasquier* who gave us Audience in his Tent, with a great deal of Splendour, and as to our business referr'd us to his *Kiaia* or Lieutenant: who tho' an Apostate *Greek* entertain'd us very kindly, being a great Lover of the Mathematicks, and especially of Astronomy. But whilst we were Discoursing upon that Point, an unlucky Accident happened, which once more put us to no small trouble; For some Letters having been taken from a *Polander* near *Caminiec*, disguised, like a *Tartar*, which by the Crown in the Seal, they imagined to come from the King of *Poland*, and knowing us come lately from thence, they supposed we might unravel the Mystery. It was in vain for us, to tell them, that they were Letters belonging to the *French* Embassador in *Poland*, which we Demonstrated by the difference of the Coronets, and shew'd them the impossibility of ravelling the Mystery of those Cyphers in which they were writ; for they sent us to a House in a Borough near the Camp, where we were guarded by some *Janizaries*; We made our Application to the *Kiaia*, who received us with a great deal of Civility, and told us that it not being in his Power to release us without the knowledge of the *Grand Vizier*, we must stay till the return of the Express they had sent for that purpose; which was nevertheless only an excuse, for we were

kept

keep ſtill under the ſame Confinement; till the Abbot *Girardin* being inform'd thereof, obtain'd orders from the *Grand Vizier* for our Releaſement. We croſs'd the *Danube*, and inſtead of going through *Romania*, we embark'd upon the ſame River for *Kili*, where we were told, we ſhould meet with a Veſſel bound for *Conſtantinople*, which proved true. We were no ſooner arrived there, but we took a place for us in the ſaid Veſſel; we weigh'd Anchor the next day, but were kept 24 hours at the mouth of the *Danube*, by contrary VVinds; during which time we were forced to be conſtantly upon our Guards, for fear of the *Coſacks*, who in ſmall Boats, covered with Leather, inſeſt thoſe parts, and attack Ships, by ſurpriſe, unleſs they are conſtantly upon their Guard. The next day a N. E. wind carried us into the *Black-Sea*, and the third day after we got ſight of the Beacon, that ſtands at the entrance of the *Boſphorus* upon the *Aſiatick* Coaſt, but were forced to keep from the ſhoar again by Night, for fear of ſtranding, the Sea being very boiſterous thereabouts, however, the next day we got ſafely into the *Canal*, where we diſcovered the Great and Famous City of *Conſtantinople*. We diſembark'd at *Galata*, where being inform'd that Monſieur *de Chateauneuf* was ſtop'd at *Gallipoli* by contrary winds, we were obliged to ſtay his coming, we having ſome Letters, concerning our paſſage into *Perſia*, to deliver to him from the Great General of *Poland*, to procure us a paſſport from the *Cumacan* of *Conſtantinople*; ſcarce had we obtain'd our wiſh, when I was unfortunately ſeized with a cruel Spitting of Blood, which being the third time in leſs than a year, the Phyſicians and our Father engaged me to return into *France* for the recovery of my Health.

Leave the Camp.

Enter the Black-Sea.

Come to Galata.

A New Accident ſtops my deſign.

Accordingly, the 23th of *Octo.* I embark'd a Board *French-Man* of War, called the *Adventurer*, which was to carry Madam *de Girardin*, after the death of the late Ambaſſadour her Husband into *France*, and at the beginning of the Night paſs'd the 7 Towers with a briſk Gale from the N. as alſo the Sea of *Marmora*, and the 24th. reach'd the Canal of *Gallipoli*. Here we ſaw the *Turkiſh* Fleet, conſiſting of 11 Great Ships only at an Anchor, which made us paſs by them without any Ceremony, (according to the Cuſtom of the *Turks*) and came ſoon after over againſt the old Caſtles, where we ſtaid that Night for a Bark, and Tartan our Ship was to Convoy into *France*. The 25th we ſet Sail again, and ſaluted the old Caſtles with 5 Cannon ſhot, which they anſwered with 9 ſharp; the ſame we did to the two new Ones, who returnd us the ſame number. I then obſerved, That theſe Caſtles were ſo far from being impregnable, as they have been reported to be, that excepting ſome Ramperts, they are without any Defence, and tho' the rebound of the Bullets of the old Caſtles reach beyond the middle of the Canal, thoſe of the new Ones can hardly reach it. We no ſooner left the Canals of which theſe Forts defend the Entrance, but we paſs'd in ſight of the Iſles *Tenedo*, and *Matelin*, and found our ſelves the next day over againſt *Schio*. Here the wind turning againſt us, and being in ſome fear of a Contagious diſtemper aboard us, we made all the Sail we could for the Port of St. *George* of *Schio*, where having drop'd our Anchor, we got ſome freſh Proviſions, and ſome of the Officers of the Ship going aſhoar a hunting, the Commiſſary was ſhot by one of our Store-keepers, who was taken and clapt in Irons; and the deceaſed buried near a little Chappel, upon the Sea-ſhoar. The wind becoming favourable, we put out to Sea again, and doubling the *Golden Cape*, came to an Anchor again, in the Iſle of *Argentiere*, to get ſome News of the *Algerine* Fleet, for which we ſtood in no ſmall fear, as being ignorant that the Peace had been concluded betwixt that Republick and *France*.

The *Dardanel* Caſtles not very Strong.

After a ſtay of 2 days here, we ſet Sail the ſecond of *November*, with a fair Wind, and near the Iſles of *Sapienza*, met the *Venetian* Fleet, taking their Courſe towards *Coron*, and having paſs'd the Gulph of *Venice*, diſcovered in the Evening the point of *Sicily*. We were alarm'd all that Night, by a certain Light which we ſuppoſed to be the Lanthorn of a great Ship, but coming over againſt the Cape of *Paſſaro*, we found them to be Beacons, the *Spaniards* keep there to warn the Inhabitants of the approach of Pirates. Not long after we deſcryed the Iſle of *Malta* 20 Lgs diſtant from *Cape Paſſaro*, and after having been toſs'd here by a Tempeſt advanced to the Iſle of *Pantelleria*, a ſmall, but Fertile Iſland belonging to the *Spaniards*, we were becalm'd for two days in ſight of this Iſland, after which a S. Wind carried us within ſight of the *Cape of Bonn*, a point of *Africk*, where thoſe of *Tunis* keep a Beacon for the ſecurity of their Ships, and to forewarn the Inhabitants of any approaching danger. To the left of this Cape you ſee upon a very high Promontory the Fort of *Gallippa*, well provided with Cannons, which whilſt we were contemplating the *S. E.* Wind encreaſing, ſoon carried us out of ſight of the Iſles of *Sembrow*, and had it continued, would have brought us upon the Coaſt of *Sardinia*, but turning about Midnight to the N. W. toſs'd us ſo violently, that we were obliged to caſt Anchor near the Port and Town of *Portofarina* on the Coaſt of *Barbary*. *Nov.* 14th. This place which is built at the foot of a high Mountain, upon a Ceninſula affords a tolerable good Harbour for Ships, which are ſheltered here againſt the N. VV. and VV. Winds. It is under the Juriſdiction of the *Tuneſes*, whoſe Capital City is not above 7 Lgs thence, there being no other way to it, but through *Goletta*, where the Ancient *Carthage* formerly ſtood, from whence you enter into a fine Lake, upon which *Tunis* is built. Being detained here by the N. VV. winds, the 15th and 16th of *November*, ſome of our Men diverted themſelves with ſhooting of Pidgeons, in a ſmall adjacent Iſland, others with fiſhing, and among the reſt took a Sea-calf, the skin of which with the head to it they brought a Board us, which was as large as that of a ſmall Ox, with thick ſmooth hair, blackiſh on the back and a white ſpot under the Flanks; there was not the leaſt appearance of a Tail, the four Extremities were limited with as many fins, which this Creature makes uſe of both in the Water, and upon the Land; Each of theſe fins was arm'd with five pretty large black Nails, the foremoſt were plainly to be ſeen, whereas the hindermoſt, which were much ſmaller, were hid under the skin. The head is like that of a Leopard, except that you can diſcover no Ears. This made me endeavour to diſcover its Organs of hearing, which I could not do, till I had laid the Head quite bare, when I perceived two ſmall hairy Conduits within 2 or 3 inches of the Eye, which abutt to 2 little holes, almoſt imperceptible, which I could not diſcover upon the skin, but by the help of a Prob. Its Tongue is very ſhort and thick, the Jaws, and Noſtrils like thoſe of a Bull, whoſe bellowing it imitates which I obſerved at a diſtance as it was ſtruggling for Life. Whilſt we were thus employed, we ſaw a Squadron of 4 ſmall Ships belonging to *Tunis*, paſs along the ſhoar towards *Porto farino*, and were informed the next day, that in one of them was *Mezzo Morto* Doge of *Algier*, who being obliged to flie that City, by reaſon of a Sedition among the People, was taken by one of theſe ſmall Barks near the Gulph of *Palma*, and now carrying to *Tunis*. The next day, 17 *Nov.* the wind turning to the S. W. we paſs'd the Iſle of *Fratelly* ſo call'd from its 2 points, which jet out into the Sea, ſteering our Courſe towards *Sardinia*, but the wind turning again towards Night to the N. VV. we made for the Cape of *Poule* near the Gulph of *Cagliari*, where we came to an Anchor that Night, and were forced to continue in the Gulph the next day to refit our Ship, which being done within ſight of the City of *Cagliari*, put us in mind of the misfortune of the Lady of the ſaid *Mezzo Morto*; For She, being the Daughter of the Preſident of *Cagliari*, was as She was going to *Spain* to be married to one of the Grandees of that Kingdom, taken by the *Algerines*, and carried to *Algier*. *Mezzo Morto* being enamour'd with this Young Slave, made his Addreſſes to her, which ſhe ſlighted with a moſt Heroical conſtancy, whilſt her Brother was gone to *Sardinia* to fetch her Ranſom; who being come back, and having paid the ranſom agreed on for his Sister, her maid and himſelf, the young Lady being ready to embark, on a ſudden changed her Reſolution as well as her Religion, and turned *Mahometan*, in order to marry the Doge *Mezzo Morto*. The 20th. we put to Sea again, in hopes of reaching the Iſles of St. *Peter*, from which we were 100 miles diſtant; But it coſt us a great deal of trouble before we could encompaſs it,

We come in ſight of Malta.

The Ancient Carthage

A Sea-Calf

The misfortune of Mezzo Morto

They meet the *Venetian* Fleet.

our Ship being miserably tost'd by the Waves; The 21th. we had the good Fortune to meet with a *Majorcan*, who proved a good prize, after which we made off to the Gulph of *Palma*, where we rid at Anchor pretty quietly all that Night, and the 22th an E. wind arising, carryed us by the three Rocks opposite to the Gulph, known by the Names of the *Cow* and the *Calf*, and made us double the Isles of St. *Peter*, of which we lost sight the following Night, and with break of day found our selves at the Entrance of *Sardinia*. The same day we pass'd the *Mouths of Bonifface*, though not without great trouble, and the wind continuing fair, we doubled the Isle of *Corsica*, and soon after discovered the Coast of *Provence*; The raging N. VV. winds having detain'd us for some few days longer at the Isle of *Yvica*, we at last arrived safely at *Thoulon* the 30th day after our departure from *Constantinople*. The Author returns to *Venice*.

VOL. II. LIB. II.

The Travels of Mr. Joannes Baptista Tavernier Bernier *thro'* Turky *into* Persia, *and the* East-Indies; *with what is Remarkable in Mr.* de Thevenot's *Travels into the* Levant, *and Sir* John Chardin's *into* Persia.

An Account of the Author, and his Travels.

Joannes Baptista Tavernier Bernier being train'd up in Geographical Learning, under his Father, from his Childhood, was inspired early with a Curiosity to see those Countries, which he had with so much Pleasure often beheld in the Maps; and beginning with *England*, where he arrived in the Reign of K. *James* the First, he Travelled over most of the Kingdoms of *Europe*, viz. *France*, the *Low-Countries*, *Germany*, *Switzerland*, *Poland*, *Hungary* and *Italy*, by that time he was Two and Twenty Years of Age, and learn'd the Languages that were most necessary and generally spoken. The Pleasure of seeing these Countries, increased his Desire of Travelling further; and like *Alexander*, of passing into *Asia*, that he might take a View of those Regions, which are so famous in History for the Two first Monarchies, and *Alexander*'s Conquest, that he might reach as far, in his Mind, as they had done by their Words; and with these delightful Regions, he was so much satisfied, that he made Six Voyages into them; and that he might make his Travels as beneficial to the Inquisitive as he could, he took several Ways every time, and making all necessary Observations upon all Things memorable in his Passage, communicated them to the World, with all the Exactness requisite to make them beneficial to the Learned, or Travellers; giving them a Description of all the Roads, and Conveniencies, or Inconveniencies of them.

CHAP. I.

Of his First Voyage from Constantinople *to* Ispahan, *the chief City of* Persia, *through the Northern Provinces of* Turky.

The Roads from *Paris* to *Constantinople*.

BEFORE he gives an Account of this Voyage, he relates the several Roads of travelling from *Paris* to *Constantinople*, and says, That you may go by Land or by Sea: By Land, the most convenient, and safest from the *Algerine* and *Tunisan* Pyrates, is first to go to *Venice*, and from thence to *Ancona*, where you may embark every Week, and sailing by *Ragusa*, pass to *Durazzo*, a Sea-Port of *Albania*, from whence the Way lies by Land through *Albanopoli*, *Monastrier*, *Sophia* and *Philippopoli*, if you take the Left Hand, or *Inquisser*, if you take the Right, and *Silevrea* to *Constantinople*. By Sea, he says, You may embark at *Venice*, and sailing along the Gulph, which is free from Pyrates, double the Cape of *Matapan*, the most Southern Point of all *Europe*, enter the *Archipelago*. There is another Way by *Marseilles*, or *Leghorn*, from whence several Vessels are bound for the East, but the safest Way is to go from the Latter, with the *English* or *Dutch* Fleets in the Spring, or Autumn, which parting over-against the *Morea*, and sailing either between the Island of *Elba* and *Italy*, by the Tower of *Messina*, or below *Sicily* and *Sardinia*, to the several Ports whither they are bound, will bring you to *Constantinople*, *Smyrna*, or *Alexandretta*; from which it is Three Days Journey to *Aleppo*, and from one of which Three Cities you must necessarily begin your Journey for *Persia*. If you will not stay for the Fleets, you may hire a single Vessel at *Leghorn*, and sailing by *Naples* and *Messina*, pass to *Malta*, and there expect a Vessel bound for the East. The Author took this Way, and in his Passage went to *Syracuse*, where are to be seen very remarkable Footsteps of Antiquity. 'Tis like a City under Ground, and near it is a Rock, which has been made hollow by Art, at the Bottom of which, if a Man do but whisper, he is heard at the Top. 'Tis called *Dionysius*'s *Ear*, because by it he discover'd the Councils of his chief Men, whom he imprison'd in it. *Syracuse* hath nothing of the Beauty it had, when it was Mistress of *Sicily*, and waged War with *Greece*. The Soil is very fruitful. By it is a Convent of *Capuchin* Friars, who have a Walk, with certain Cells and Gardens to them, between Two great Rocks, that make it one of the most pleasing Solitudes in the World.

Syracuse described.

Having thus related the Roads from *Paris* to *Constantinople*, he comes to lay down the Road from *Constantinople* to *Ispahan*, in *Persia*, which Journey must be

The Road from *Constantinople* to *Ispahan*.

be performed either with a Caravan of Camels, or Ten or Twelve Men in Company, well mounted and arm'd. From *Constantinople* you must cross over to *Scutari*, upon the Coasts of *Asia*; and from thence, passing through the Fields finely adorn'd with Flowers in their Seasons, and fair Sepulchres, with their Pyramids dress'd up with Turbants for Men, and Head-Attire for Women, you come to *Cartali*, a Village of *Bithynia*; and the next Day to *Gebisa*, called of old *Lysia*, famous for *Hannibal*'s Tomb. From hence the Way lies through *Isnich*, anciently *Nicæa*, where is a convenient Haven, and the Country is excellent for Hunting, good Fruits and Wine, which made Sultan *Amurath* build a *Seraglio* in the highest Part of the Town. The *Jews* inhabit it chiefly, and deal in Corn and Timber. *Chibangi* is next, and has a Lake famous for large Pike, and other Fish; and then you come to *Zacarat*, a River, which falls into the *Black-Sea*; and from these, through the Marshes to *Cancoli*, *Tuskebasar*, *Carguestar*, famous for a sort of Fish called, *Bouxmaz Balouska*, i. e. *The Fish with the long Nose*; 'tis speckled like a Trout, but of a better Taste. From hence you pass over the Mountains to *Polia*, or *Polis*, which bears Plenty of Treas, tall-like Firs, and being a good mellow Soil, and full of Brooks, would be unpassable, had not the Grand Visier *Cuprigli*, at a vast Charge, paved the Roads, and built many Bridges. On these Mountains are Pigeons as big as Hens, and of an excellent Taste. From these Mountains there are above Twenty Church-yards visible, for the *Turks* bury near the High-Way, because they believe the Travellers pray for the Souls of the Deceased. Every Tomb hath a Marble-Pillar upon it, but of several Colours. Beyond these Mountains, you pass through *Cervadour*, *Cargestar*, *Caragaler*, *Cosizar*, which have all Inns for Travellers. *Tocia*, where there is a Fortress, the Residence of a *Bassha*, and very good Wine in great Plenty. 'Tis inhabited by *Christian Greeks*; *Agisensalou*, *Ozeman*, which is a little City, seated on the Foot of an Hill, where there is a strong Castle. The River *Guselarmac*, which is very broad and deep, washes the South side of the City, over which lies a Bridge of Fifteen Arches, made of Free-Stone, the fairest that ever was seen; *Azilar*, *Delekiras*, where the Ways are much infested with Robbers; *Amasia*, where to bring fresh Water into the City, they have cut a League into Rocks, as hard as Marble. The Soil is good, and bears the best Wines and Fruits in all *Natolia*, and *Turcal*. At *Tocat*, which is the next City in the Road, the Way from *Symena* to *Ispahan* meets. It is a fair Place, built upon a Rock, and well inhabited by *Turks*, who are the Governours, *Armenians*, *Greeks* and *Jews*. Here are several Mosques, and one very magnificent, lately built. The *Christians* have Twelve Churches, and here resides an Archbishop, with Seven Suffragans under him. Here are also Two Monasteries, and as many Nunneries; and all the Country, for Fourteen or Fifteen Leagues round, is inhabited with *Armenian Christians*, mix'd with some few *Greeks*: Most of them are Smiths. This is the only Place in all *Asia*, where there grows Plenty of Saffron, the best Commodity you can carry to the *East-Indies*, where 'tis worth Thirteen or Fourteen Franks a Pound, though mix'd with an equal Weight of Wax to keep it. This City, and the Lands about it, are usually the Sultanesses Joynture. It is govern'd by an *Aga*, or *Cady*, and is one of the most remarkable Thorough-fares in the *East*; for the Caravans from *Persia*, *Diarbequer*, *Bagdat*, *Constantinople*, *Synopus*, *Smyrna*, and other Places, lodge here, though, at their setting out, they pay a Quarter of a Rix-Dollar for a Camel, and half as much for an Horse. At *Tocat* also, and the Parts about, are dress'd the fine Blue Goat-Skin Leather, as the Red is at *Bagdat* and *Diarbequer*, and the Yellow at *Moussul*, anciently *Nineveh*, and the Black at *Ourfa*. From *Tocat*, as you go to *Erzerum*, where you discover a Village, so seated under an Hill, as if the Mountain lay a Top of it, you first come to *Charkliqueu*, where the *Armenians*, according to their Custom, met the *Caravans* with fresh Provisions. This Town stands in a fertile Country, and has excellent Wine. The Inhabitants are *Christians*, who are generally Tanners, who dress the Blue Leather. About 2000 Paces from this Town is a vast Rock, out of which are hewn a Chamber, with a Bed, Table and Cup-board, and a Gallery. The *Christians* here affirm, That St. *Chrysostom*, in his Exile, made this his retiring Place, and therefore the *Christian* Merchants usually stop here, to pay their Devotions to this Rock. Over the Mountains you go along to *Almous*, and crossing a large Plain, water'd with the fair River, *Toufanlatsou*, you pass over another large Mountain to a Town called *Adras*, inhabited by all *Armenians*; and from thence you go to *Aspidar* and *Isbeder*, Two small Villages in the Mountains, and so to a large Town, all the Houses and Stair-Cases of which are hewn out of the Rocks; and then to *Zacapa*, where the Passages become so narrow, that the Camels are forced to be unladen, and their Burdens carry'd on Mens Shoulders for Thirty Paces. After this you come to a little Plain, and then pass through *Kourd-Aga*, *Garmeru*, *Leukmen* and *Lourito Chaouqueu*, where liv'd an old Man of 130 Years of Age, who, when Sultan *Amurath* besieged *Bagdat*, gave his Army as many Oats as serv'd them a Day, in Recompence for which, the Sultan exempted him, and his Children, from all Taxes and Tolls for their Lives. Leaving this Place, you pass a craggy Mountain, called, *Aaggidogii*, or, *The Bitter Mountain*, where the *Caravan* being forced to travel single, because the Way is narrow, the *Carvan*-Master counts all the Camels and Horses, and exacts a certain Duty of them, which amounts to a good Sum, if the *Caravan* be numerous: With it he pays Seven or Eight *Armenians*, which guard the *Caravan* all the Way, defrays the Expences upon the Road, and has the Third part for his own Use. Having pass'd this Mountain, you come to a Plain, called, *Giogandereси*, from whence you meet only with Two or Three small Villages in the Way to *Erzerom*. Most of this Journey lies upon the Banks of *Euphrates*, where there grows *Asparagus* in such large Quantities, that you may load several Camels with it. At a League Distance from *Erzerom*, the Officer of the Custom-House, accompanied with the *Bassha*'s Lieutenant, meets the *Caravan*, and tying all the Bales and Chests with Cords, seals them, that nothing may be taken out before they come into the Town. The *Bassha*'s Lieutenant only observes, whether the Merchants be well stor'd with Wine, that he may have some for his Master, for there grows no Wine at *Erzerom*, and what he desires must not be denied him. The Officer of the Custom-House takes a particular Account of all the Merchandizes. This causes the Stay of the *Caravan* for 20 or 21 Days. *Erzerom* is a Frontier Town of *Turky*, towards *Persia*, and stands at the End of a Plain, encompassed with Mountains, and beautified with many fair Villages. The Houses are ill built without any Neatness, or Proportion. The Fortress stands upon an high Ground, with a double Wall, and has square Towers, close one to another, but a pitiful Moat. In the Fortress lie 24 Pieces of Cannon, excellent Guns, but not mounted on Carriages. They are laid here in a Readiness against a War with the *Persians*. This City like *Tocat* is a great Thorough-fare into *Turky*. Tho' it be cold here, yet Barley will grow in Forty Days, and Wheat in Sixty. The Customs here for carrying out Gold and Silver, and other Commodities, are very severe, *viz.* 24 Crowns for a Camel's Load, *i. e.* 800 Weight of Silk, an 100 Crowns for a Load of *Indian* Calicuts, and 6 *per Cent.* for all other Commodities according to their Value. From this Town they go by a Fortress called *Hassan Kala*, where you must pay half a Piaster for every loaded Horse, or Camel; and coming to a Village called *Coban Cupri*, where is a fair Bridge over Two Rivers, the *Kars* and *Binguiel*, that meet here, and fall into the *Aras*, the Road parts, one going on streight forward, called the High-Road, and the other by the *Kars*. The Former is the more direct, and short, but because the Camels and Horses pay a large Duty of Four Piasters for a loaden Camel, and Two for an Horse, and the *Aras* must be several times forded, Travellers usually chuse the Road of *Kars*, where they pay but half the Duty; but the first Four Days Journey thro' Woody Mountains, and Desart Countries, is troublesome, till you come near the City *Kars*, which stands in a very good Soil, and is very large, but thinly Peopled, because the Grand Seignior usually makes it the Rendezvous of his Army, when he intends to recruit it, or sends them to build Villages. From hence to *Erivan* is Nine Days Journey, where, indeed, are the Ruines of several Monastries, and a large City called *Anakagan*, founded by an *Armenian* King, named *Ani*, but

Isnich, or *Nicæa*.

Kars Road.

but there are no Conveniences for Travellers. On the High Road lies a great Mountain called *Mingol*, which is ſo full of Springs, that it gives a Beginning to Two large Rivers, *viz. Euphrates* and *Kars*. The *Aras*, anciently *Araxes*, riſes from other Mountains Eaſtward of *Mingol*, and after many Windings thro' the Upper *Armenia*, diſcharges it ſelf into the *Caſpian* Sea. All the Country hereabout, which is finely watered by the *Aras* and *Kars*, is inhabited by *Chriſtians* only, except ſome few *Mahometans*, who are ſo ſuperſtitious, that they will not uſe the Waters of the Rivers, but have Wells and Ciſterns of their own, becauſe the Chriſtians, as they imagine, defile them. The firſt Village upon this Road is *Comaſour*, and the next *Halicarcera*, a great Town inhabited by Chriſtians, but all the Houſes are built under Ground, like Caves. Mr. *Tavernier* arriv'd here *March* 7. 1655, when the Ways were unpaſſable for the deep Snows. Going from hence, you ford the *Aras* Three Times, becauſe it winds exceedingly, and then come to a Fortreſs built on the Top of an high Mountain, called, *Kagiſguan*, which is the laſt Place the *Turks* poſſeſs on that ſide. Here the Officers exact a Toll of Four Piaſters for a loaden Camel, and Two for an Horſe. In the Mountains which lie in the Road from hence to the Borders of *Perſia*, dwell *Armenian* Chriſtians, who have Biſhops and Prieſts, but are very poor. A Branch of the *Kars* parts *Turky* from *Perſia*, and having paſs'd that, you come to the firſt Town in *Perſia*, called, *Egmiaſim*, or, *The Toree Churches*, which are Three Monaſteries: The biggeſt of them is the Reſidence of the Patriarch of the *Armenians*, and the leaſt of them is a Nunnery. The *Armenians* pay their Devotion always in their Travels to theſe Three Churches, and ſtay ſome Days to confeſs and receive Abſolution from their Patriarch. This Prelate has under him Seven Archbiſhops, who have each of them Four or Five Suffragans ſubject to them, with whom he lives in a Convent, with ſeveral Monks under their Juriſdiction. Theſe all go to Prayers every Morning, about an Hour after Day-break, and then go to Work, to dig and delve for their Living. The Revenue of the Patriarch is 600000 Crowns, which he uſually ſpends in paying the *Carage*, i. e. Annual Tribute, impoſed on them by the *Mahometan* Princes for their Liberty of Conſcience, which, if not duely paid, they, their Wives and Children will be ſold and be forced to turn *Mahometans*, which to prevent the Patriarch parts with all, and is ſometimes behind hand. The Church here is as richly adorn'd as any Church in Chriſtendom. The Quire is hung round with a *Venetian* Tiſſue of Gold: The Pavement of the Quire and Body of the Church, with the Steps to the Altar, is ſpread with rich Tapeſtry; for they put off their Shooes when they go into the Church. They do not kneel at Prayers, as we do in *Europe*, but ſtand all the while upright. They ſit at Maſs, and ſtand up while the Leſſons are reading. All the Service their Heads are covered, unleſs at the Elevation of the Hoſt, when they put off their Bonnets, and kiſs the Earth Three times. Upon the Altar ſtands a Croſs and Six Candleſticks of Gold, and upon the Steps to the Altar, Four Silver Candleſticks, Five Foot high. When they have ſung ſeveral Hymns, and read the Goſpel, they give the Book to be kiſs'd by the whole Congregation, on that ſide where Two Relicks are enchaſed. Ten Leagues from *Erivan*, Northward, appears a great Lake, where there is an Iſland, upon which is built a fair Convent. The Monks in it live a very auſtere Life, never eating Fiſh or Fleſh above Four times a Year, and ſpeaking to one another upon thoſe Four Days only; the reſt of the Year they feed only upon Herbs, gather'd out of their own Gardens, though the Iſland produceth excellent Fruits. On the ſide of this Lake, nearer *Erivan*, lies a Plain, on which are Six Monaſteries one of them entirely hewn out of a Rock; and in the Church called *Kickarti*, the *Armenians* ſay, is kept the Lance, which pierc'd our Saviour's Side. Five Leagues from *Erivan* begin the Mountains of *Ararat*, which are famous for being the reſting Place of *Noah*'s Ark. On the Plain, half a League beyond them, is a Church, built on a little Hill, by which are ſeveral Pits like Wells, into which, they report, that *Cerdo*, an *Armenian* King, threw St. *Gregory*, becauſe he would not worſhip his falſe Gods. Between this Church and *Erivan* are ſeen the Ruines of the ancient *Artaxate*, the Seat of the Kings of *Armenia*, which ſhew, that the City was large, and his Palace fair. *Erivan* lies in 64 Degrees, 20 Minutes of Longitude, and 41 Degrees, 15 Minutes Latitude: It is ſituated in a moſt plentiful Country, which produceth all Things neceſſary for Human Life, and abounds in good Wine. It raiſes the King of *Perſia* a large Revenue by the Fruits it yields, and Paſſage of the *Caravans* through it, as well as 20000 *Tomans*, which is above 60000 *l.* as a Yearly Revenue to the *Kan*, or Governour: But being on the Frontiers of Two mighty Empires, it has had the Misfortune to be taken and retaken by the *Perſians* and *Turks* ſeveral times. The Houſes and Walls are of Earth, and ſo are as ſoon rebuilt almoſt as demoliſh'd. The Suburbs are better inhabited than the City, for there live all the Merchants, Artificers, and *Armenians*, who are Chriſtians, and have Four Churches, with a Monaſtery there: and in the City lives only the *Kan*, with the Military Officers. The Governour is a Perſon of Power, and has always at hand an Army ſufficient to defend his Coaſts. The Summer is very hot, ſo that the Governour, and many Thouſands of the Inhabitants, fly to the Mountains, partly for a cooler Air, and partly for Paſture for their Cattel. If any Ambaſſador comes hither, the Governour is oblig'd to maintain him during his Stay, and convey him ſafely to the next Governour, who is to do the like, ſo that an Ambaſſador in *Perſia* travels to the Court without any Charge. This City, not being far from the Province from whence the Silks come, is a Place of great Traffick for it, and Merchants pay only ſome Duties towards the ſecuring the High-ways, called, *Raderyds*. The Governours of *Perſia*, called *Kans*, are very civil to Strangers. From *Erivan* to *Tauris* is Ten Days Journey, and *Nakſivan* ſtands almoſt in the Mid-way. For Two Days you travel over large Plains, ſown with Rice, having *Ararat* in your Proſpect, which has many Monaſteries at the Bottom, and on the Top is covered with Snow half way down. The next Day's Water grows ſcarce, till you come to the River *Arpaſon*, which muſt be forded, and then you come to an Inn, called *Kara-bagler*, which ſtands upon a Rivulet, whoſe Water being carried into Trenches, where it may ſtand, will turn into Stone in Eight or Ten Months, and of this Stone, though it be ſlight, is the Inn built. From hence to *Nakſivan* is but a ſmall Journey. This City, according to the Opinion of the *Armenians*, is the moſt ancient City of the World, for, they ſay, here liv'd *Noah*, when he came out of the Ark, and there he lies burſ'd; but his Wife's Tomb is at *Marante*, in the Road to *Tauris*. 'Tis now almoſt ruin'd, having not recovered it ſelf, ſince *Sha-Abas*, King of *Perſia*, deſtroy'd all the Country between *Erivan* and *Tauris*, to ſtarve the *Turkiſh* Armies in their Invaſions, yet it retains a *Kan*, and a ſmall Trade in Silk. Among the Ruines of *Nakſivan* is found a ſtately Moſque, built, as ſome ſay, in Memory of *Noah*'s Burying-Place, and a Tower, which is an excellent Piece of Architecture, having Four *Duomo*'s, which ſupport a kind of Pyramid, that ſeems to be fram'd of Twelve little Towers, but, towards the Middle, changes into a Spire, which ends in a Point. The Building is of Brick, but is ſo variniſh'd with Parget, wrote in Flowers, that 'tis like emboſſed Work. 'Tis thought to have been erected by *Tamerlane*, when he conquer'd *Perſia*. Between *Nakſivan* and *Zulfa*, on each ſide the Road, are Ten Convents of Chriſtian *Armenians*, but diſtant Two or Three Leagues one from another. They acknowledge the Pope, and are govern'd by certain Religious Dominicans of their own Nation, follow the Doctrines of the *Roman* Church, but ſing the Office and Maſs in the *Armenian* Tongue, that all the People may hear and underſtand them. Their Archbiſhop, when he is choſen, is ſent to *Rome* to be confirmed. The Monaſteries ſtand all by ſome Town, and one of them is ſeated at *Kiſenk*, on the Frontiers of *Curdiſtan*, or *Aſſyria*, where, the *Armenians* believe, St. *Bartholomew* and St. *Matthew* were Martyr'd, and they pretend to ſhew ſome Relicts of them at this Day. The Monks of theſe Convents are very auſtere, and eat nothing but Herbs, and though they are very poor, yet Two or Three of them entertain Strangers, that come out of *Europe*, very civilly. A League and an Half from the Chief of theſe Convents there is an high Mountain, which riſeth like the Pike of *Tenariffe*, in the Form of a Sugar-Loaf, and hath at the Bottom certain Springs,

Springs that cure the Biting of Serpents.

which cure the Biting of Serpents, and if any be brought to them, they die immediately. When the *Caravan* is ready to set out from *Nakshivan*, the *Armenians* usually go to the Convent of St. *Stephen*, which is Three Leagues, or more, distant from it. In the Way lies *Becilisa*, a great Village, where dwell the richest *Armenians*, who trade much in Silk, and have built them a very fair Church there; and having cross'd a River, which falls into the *Aras*, you ascend a little Hill, and come to a great Village, called, *Shambe*, all the Inhabitants of which, as well Men as Women, grow mad at Eighteen Years of Age, but their Madness is not mischievous. It is believ'd the Punishment of Heaven upon them, because their Forefathers persecuted St. *Bartholomew* and St. *Matthew* there. St. *Stephen*'s is a Convent, built about Thirty Years ago, upon barren Mountains, because St. *Bartholomew* and St. *Matthew* retired thither in the Time of their Persecution, and the latter raised a Well near the Place, which supplies the Monastery with Water. In it are many Relicts, said to be left there by those Apostles, *viz.* a Cross made of the Bason in which Christ wash'd his Apostles Feet, and in the Middle of it a White Stone, which, if laid upon a sick Person, will turn Black, if he be likely to die, and after his Death recover its Whiteness; a Jaw-Bone of St. *Stephen*, the Martyr, St. *Matthew*'s Skull, a Bone of the Neck and another of the Finger of St. *John Baptist*, an Hand of St. *Gregory*, the Scholar of *Dionysius*, the *Areopagite*; a little Box with many Pieces of Bones, which they count the Reliques of the 72 Disciples. The Church is built in the Form of a Cross, as all *Armenian* Churches are, and in the Middle of it riseth a fair *Duomo*, about which stand the Twelve Apostles. Both the Church and Convent are of Free-stone, and much Gold and Silver has been spent upon the Walls. From St. *Stephen*'s there lies a way by the Banks of *Aras* to *Zulpha*, where you return into the High-Road again. In the great Road from *Nakshivan*, half a League from it is a River, which is crossed at a Bridge with Twelve Arches, near which is a Meadow where is a Spring of Luke-warm Water, which being drank purges. Here a Toll-gatherer takes Ten Abassi's for every Camel's Loading, for securing the High-ways, for the Governours of every Province are to answer for every Robbery committed, which makes it safe travelling in *Persia*. From this Bridge to *Zulpha*, is but one Day's Journey. It was once a large City, but never of any great Beauty, but all the Houses and Bridge lie now in Rubbish, but the Land being fertile, some *Armenian* Families live very quietly in it. Half a League on this side *Zulpha*, there are Two Ways that lead to *Tauris*, viz. The Great Road, which the *Caravan* always takes, because the other is full of Rocks and Stones, which spoil the Camels Hoofs. In this latter, which for Variety we travelled, stands *Asstabat*, a neat City, where every House hath its Fountain. The Soil is plentiful in all Things, and especially good Wine. This is the only Country in the World which produceth the *Rems*, which is a Root growing much like our Liquorice, and famous in all the *Indies* for dying Red, and for that Reason 'tis shipped off at *Ormus*, in great Quantities, to all these Parts. The Root is full of Juice, and yields an high Tincture, so that when a Ship was cast away in the Road of *Ormus*, where the Bags of *Rems* floated, the Sea looked Red for several Days. Leaving *Asstabat*, you must pass the Mountains of the *Medes*, which are the most Fertile in all *Persia*, and bear Wheat, and other Corn and Fruits in abundance, and that of a greater Beauty and higher Taste. In the High-Road the Caravan leaves *Zulpha* on the Right-hand, because of the bad Road; and having passed a Bridge called *Sugiac*, it goes through Heaths, encompassed with Rocks and a barren Country, to *Maranie*, the Burying-place of *Noah*'s Wife. This City stands in the Midst of a fertile Plain, adorned with many well-peopled Villages for a League round it; but the Rest of the Country beyond it, is all barren, yet not altogether unprofitable, because here are bred almost all the Camels that furnish the Road, and upon that Account there dwell many Camel-Masters in these Towns. At *Maranie* you must pay Thirteen Abassi's, or Four Crowns, for every Camel's Load, for the Security of the Roads. Leaving *Maranie*, the Caravan lodges in a Bushy Plain, a League from *Sophiaria*, which is an indifferent large Place, but by reason of the great Number of Trees planted in the Streets, and round about it, 'tis more like a Wood than a City; and the next Day having crossed large and fruitful Plains, it arrives at *Tauris*. In the Mid-way between *Sophiaria* and *Tauris* lies a Hill, from whence you may see the Plains, where Sultan *Amurath* encamped with his Army of an 100000 Men, when he besieged and burnt *Tauris*, of which when the News came to *Sha-Sefi*, King of *Persia*, he turn'd the Course of all the Streams before and behind, and famish'd his whole Army for want of Water. *Tauris* lies in 83 D. 30 M. Longitude, and 40 D. 15 M. Latitude, in an open Place, where there is not a Tree to be seen, and is environ'd with Mountains on all sides, but the West. A little River of good Water runs through the midst of it, over which there is Three Bridges. It is a large well peopled City, as being the Mart for *Turky*, *Muscovy*, the *Indies* and *Persia*, and has a mighty Number of Merchants, and vast Quantities of all sorts of Merchandice in it, particularly Silks, brought out of the Province of *Guiban*, and Horses, which are handsom and cheap. Wine, *Aqua vitæ*, and all sorts of Provisions are cheap enough, and Money is more plentiful here, than in any Part of *Asia*. The Houses are built of Brick, bak'd in the Sun, not above One or Two Stories high, the Tops vaulted, and Roofs plaistered and whitned with Lime. Their *Bazars*, or Market-Houses, are always full of Goods, for there are some peculiar to the Handy-craft Trades, as Smiths, Turners and Gold-Smiths. Here are abundance of Silk-Weavers, who are neat Artists; and the *Sagrin* Skins, which are vended all over *Persia*, are dress'd here. About the Great Piazza are seen the Ruines of stately Edifices, *viz.* Four or Five Mosques of a prodigious Height and Bigness, the Palace of the *Cheek-Iman*, or the Chief-Priest, a Colledge, Castle, and an *Armenian* Church, whither, they say, St. *Helena* sent the true Cross. The *Capuchins* have a very convenient House here, built by the Favour and Liberality of *Mirza-Ibrahim*, Governour of the Province, because he had a mind to have his Two Sons instructed in Mathematicks and Philosophy, (in which he took great Delight himself) by *Gabriel de Chinon*, Head of that Order there. When the Sun sets and rises, there are a certain Company of People, who are obliged to make an hideous Noise with Drums and Trumpets, in the *Meidan*, or Great Piazza of the City. Some think, that *Tauris* was the ancient *Echatane*, the Metropolis of the Empire of the *Medes*. Upon the Road from *Tauris* to *Ispahan*, about half a League from the outmost Gardens, upon the Tops of the Mountains, there is a Bridge, built by a *Mollah*, where never any Water did, or can come. *Sha-Abas*, the first *Persian* King of that Name, coming to *Tauris*, wonder'd at such an unprofitable Work, and enquired who built it, and what was the Design? To whom the *Mollah* return'd his Answer, *Sir, I built that Bridge, that when your Majesty came to* Tauris, *you might inform your self from the Mouth of him that built it*: By which it appears, that the *Mollah* had no other Intention, than to oblige the King to speak to him. About half a League from *Tauris*, Westward, there is a River, which comes down from the Mountains, called, *Aggisori*, or, *Bitter Water*, because the Water is bad, and kills all Fish: It empties it self into the Lake *Roumi*, Thirteen or Fourteen Leagues from *Tauris*, which is of the same Quality, so that if any Fish are driven into it by any other Rivers, they presently become blind, and die in a short time. Over it there lies a fair Bridge, by which stands a Sepulchre, covered with a little *Duomo*, where the *Persians* say, that the Sister of *Iman Riza* lies interr'd, and they have it in great Veneration. In the midst of the Lake is a little Hill, in which rise several Springs, which grow wider the further they run. The Earth which they water is of different Natures, the first makes Lime, the next is an hollow spungy Stone, of no Use; but under that is a White transparent Stone, like Glass: 'Tis nothing but a Congelation of the Waters; for sometimes you shall meet with creeping Animals congealed in them; and the Governour of the Province presented *Sha-Abas*, the King, with a Piece, that had a Lizzard of a Foot long congealed in it: He gave Twenty Tomans, and was offer'd a Thousand for it. From *Tauris* to *Ispahan* the Caravan generally makes 24 Days Journey. The Two first Days you pass over dry Mountains, through narrow and rugged Ways, and then, at the Foot of the

St. Bartholomew and St. Matthew.

Rems a dying Root.

Maranie, where Noah's Wife lies buried.

A spring of warm water.

Echatane.

A Bridge over the Water-fails.

Water congealed.

the Mountains, there is a Choice of Two Roads, the one more direct, which is the ordinary Road by *Kom*, and *Kachan*, the other through *Ardevil* and *Cabin*, which are parted by a large Lake. From *Tauris* to *Ardevil* is not above Twelve Leagues. This City lies in the ſame Degrees with *Tauris*, and is famous for being the firſt Market for Silks from *Guilan*, and the Market-place, is very large and convenient. The Avenues to it are very pleaſant, being planted with Allies of large Trees, but the Streets are dirty and uneven, except that where the *Armenians* have a Church. There are many lovely Gardens, watered by divers Cuts from the River, which paſſeth through the midſt of it. They have no Vines, though their Soil be very proper for it, becauſe the *Mahometan* Superſtition will not allow any Wine to be drank here; and though the *Armenians* have Plenty of Wine, they muſt not drink it, nor have it brought publickly: But that which makes this City more frequented, is the Tomb of *Sha-Seſi*, who lies here bury'd in a very fair Moſque, for the People come from all Parts of *Perſia* to viſit this Sepulchre with Devotion. Criminals are ſafe, if they can but touch the Chains that croſs the Gate of the Moſque. Before the Moſque are Two Courts, and in the ſecond ſeveral fair Balconies, which are always full of Pilgrims or Criminals, who are confined to dwell there for their Defence. In this Moſque there is Alms given, Morning and Night, to the Poor, by the King's Order. At the End of the Body of the Moſque is a little Eight-ſquare Monument, in the midſt of which is the Tomb of *Sha-Seſi*: It is only of Wood, but curiouſly wrought and inlaid. It is not above the Height of a Man, and like a Cheſt, having Four Apples of Gold ſet at each Corner. It is covered with Crimſon Velvet, and by it are many Lamps continually burning. The Moſque is painted with Gold and Azure within, and varniſhed finely without. Round about *Ardevil* are many other Monuments well worth the ſeeing, and a Quarter of a League from the City ſtands a Moſque, in which are the Tombs of the Father and Mother of *Sha-Seſi*. From *Ardevil* you go to *Cabin* through a pleaſant Country, watered with many Rivers from the Mountains, and paſs Two or Three Towns, as *Arion*, *Taron*, and *Kalkal*, which are the only Places in *Perſia*, where there grow any Olives, or there is any Oil made. From *Kalkal* is a very bad Road, hardly paſſable, till you come up to the Mountains, and then 'tis a plain Way to *Cabin*. This City is large, but there are not above Seven or Eight Houſes well built, and they are next the King's Gardens. It is inhabited by *Mahometans* chiefly, though the beſt Half of the City be Gardens. The Soil about *Cabin* bears Piſtaches, but not ſo good nor in ſuch vaſt Quantities, as at *Malavert*, from whence they are carried into all *Perſia* and the *Indies*. This City lies Eaſtward of *Iſpahan* Twelve Leagues. The next Place you come at, after Two Days Travel, is *Denghe*, a great Village at the Foot of an Hill, where is Plenty of White Wine and Claret. The other Road through *Kan* and *Kachan*, lies on the Left ſide of a Lake, which is uſually full of large Red Ducks, which are very good Meat: And the firſt Place you aim at, after you come from *Tauris*, is *Karaſhima*, a large Town in a deep Valley, well manured. From hence you go through *Tarcomia*, and ſo over a deſart Country to *Miana*; from which, after you are parted about Two Hours, you come to a Bridge, almoſt at the Foot of a Mountain, called, *Kiplenſon*. Here you ſee Two Mountains, on the South and North, which are ſo full of Springs, that they give Birth to moſt of the Streams that water *Perſia*. Neat this Mountain there are ſeveral Villages that pay nothing to the King, becauſe they are obliged to ſend a certain Quantity of Rice and Butter to the Moſque at *Ardevil*. Theſe Villages have one great Privilege, that if a Man commits a Murther, and flies to any of them, he cannot be apprehended, nor can the King himſelf puniſh him. Leaving this Bridge, you paſs through a barren Country, where you meet with Two Inns only, till yo come to *Zangan*, a great Town, but ill built. From hence you go to an Inn, where you muſt pay a Duty to the Kan of *Sultanie*, a large City, which lies about half a Mile from the Road. It is plain from the Ruines, that here were formerly many beautiful Moſques; and, the *Armenians* ſay, that there were once near 800 Churches and Chapels. The next Town you come at, is *Iſa*, where there is excellent Wine: And from thence you travel to *Habar*, *Partin* and *Saxava*, which is a little City that ſtands in an excellent Soil for Nuts, and has ſeveral ſmall, but convenient Inns. From *Saxava* you have nothing but Inns, till you come at *Denghe*, where the Roads meet, and from whence to *Kom* is Three Days Journey, over a barren, dry and deſart Country. *Sava*, a good City in a fertile Plain, is in this Road. The greateſt Trade of this Town is in little Grey Lamb-Skins, neatly curled, of which they make Furrs. From hence to *Kom* is not above Ten Hours Journey. This is one of the greateſt Cities in *Perſia*, and ſtands in an excellent Soil, which produceth great Quantities of Rice, and other excellent Fruits, as large *Granata's*. The Walls and Houſes are of Earth. The moſt remarkable Thing in *Kom*, is a large Moſque, no leſs in Veneration with the *Perſians*, than that of *Ardevil*, becauſe of the Sepulchres of *Sha-Seſi*, and *Sha-Abas* the Second, as alſo of *Siai-Fatima*, the Grand-Daughter of *Fatima Zahra*, the Daughter of *Mahomet*. Over the great Portal of this Moſque ſtands an Inſcription in Letters of Gold, in Praiſe of *Sha-Abas* the Second. There are Four Courts before this Moſque, the firſt is a kind of a Garden, being planted with Flowers on the Sides of the Allies. In this Court are the little Chambers, where they that receive the Alms, which are daily diſtributed by the Foundation of the Moſque, come and eat their Proportion, and go their Way. Theſe Chambers are an *Aſylum* for inſolvent Debtors, who are maintained at the Charge of the Moſque. In the Third Court are the *Mollah's*, i. e. the Doctors of their Law's Lodgings. The Fourth is raiſed like a Terrace, and has a fair Fountain in the midſt of it, which is continually ſupply'd with Water by Pipes. The Front of the Moſque faces this Court. There are Three large Gates belonging to it; and the Threſhold of the middle one is cover'd with a Plate of Silver. Between theſe Three Gates, and that of the *Duomo*, ſtand ſeveral Doctors, who hold Books in their Hands, and read perpetually. The Tomb of *Sidi-Fatima* is at the farther part of the Moſque, and is encompaſſed with a Silver Grate, Sixteen Foot ſquare. Upon each ſide of the Moſque is an Hall, where the King's Alms are diſtributed to the Poor, which conſiſt of Pilaw, and other Meat well dreſs'd. The Tombs of *Sha-Abas* the Second, and *Sha-Seſi*, his Father, are alſo in this Moſque, and this laſt is cover'd with Cloth of Gold. Leaving *Kom*, you travel over Sands to *Alſchirin*, or, *Freſh-Water*, and from thence through a good Corn Country to *Cachan*, a large City, well peopled, and furniſh'd with all Things neceſſary for Human Life. The *Jews* chiefly make the Wines, for there are ſaid to be in this City 10000 Families of *Jews*, as there are 600 at *Iſpahan*. Theſe *Jews* boaſt themſelves particularly of the Tribe of *Judah*, which the other *Jews* in *Perſia* do not. In this Place are made all the beſt purfled Sattins, mix'd with Gold and Silver, which are carried out of *Perſia*; for here are very skilful Silk-Weavers. Here alſo they coin Money, and make Copper-Veſſels, which they ſell abroad. Their Market-Houſes are very fair, and well vaulted. At a little Diſtance from *Cachan*, in the Way to *Guilan*, are Plains, which for Twelve Leagues together are pure Salt. Leaving *Cachan*, you croſs the Plains and Mountains, and in the Vale meet a great Wall, made by *Sha-Abas*, to ſtop the Waters for his Occaſions, of 100 Paces long, 30 Foot thick, and 50 high, with a Sluce to keep in, and let out the Waters. And having paſs'd this, you come to *Coron*. This Village is large, and well peopled, and the Soil ſtored with Wall-nut-Trees. The Houſes are low, but built with Flint-Stones; but the Street is dirty and inconvenient. About this Village, as about ſeveral Places in *Perſia*, are a great Number of Shacales, which are a kind of Foxes, which make an ugly Noiſe in the Night, and if one of them cry, they will all anſwer, and ſet up an Howling. From this Place there is a continued Plain for Fifteen Leagues, which have, at equal Diſtances, Five Inns to *Iſpahan*.

CHAP.

CHAP. II.

Of the Road from Smyrna *to* Ispahan, *through* Natolia.

Smyrna described.

SMyrna is one of the most celebrated Cities in all the *Levant* for Trade, both by Sea and Land, for from hence all sorts of Commodities are transported out of *Asia* into *Europe*, and out of *Europe* into *Asia*. It lies in 50 D. of Longitude, and 38 D. 45 M. Latitude, at the Bottom of the Gulph of the *Archipelago*, and over-against the Island of *Schio*. It lies in that Part of *Asia*, anciently called by the *Greeks*, *Iconium*. It was one of the Seven Churches, and is at this Day a great City, but nothing so large or beautiful as it was, as may be gathered from the Ruines of a great Tract of Houses, a Castle and Amphitheater, and a great Church, which are now altogether disused. It has been often ruined, either by Earthquakes, which are frequent there, or by Wars. The *English* Merchants have digged among the Ruines of *Smyrna*, and found great store of fair Statues, which they have transported into their own Country; and there are still found some or other every Day; but if the *Turks* find them, they disfigure them. The City is well peopled, containing no less than 90000 Souls, *viz.* 60000 *Turks*, 15000 *Greeks*, 8000 *Armenians*, 7000 *Jews*, for the *European* Christians are but few. The *Turks* have Fifteen Mosques, the *Jews* Seven Synagogues, the *Armenians* One Church, the *Greeks* Two, and *Latins* Three. The *Turks*, *Greeks*, *Armenians* and *Jews* dwell upon the Hills, and the lower part, next the Sea, is inhabited by the *European* Christians, who settle there for Trade, *English*, *French*, *Hollanders* and *Italians*. They are called *Franks*, and have every one their Consul, and the *French* Consul has Two Vice-Consuls under him at *Scalanova* and *Coio*. The Soil about *Smyrna* is very fruitful, and abounds with all Things necessary for Human Life, but more particularly in good Oil and Wine. The Sea also affords good store of Fish and Fowl cheap. About half a League from the City, Northward, are Salt-Pits, down to which there is a pleasant Walk from the City. But it has some Inconveniencies, for the Heats are very excessive in Summer, and would be insupportable, were it not for the Breezes that come off from the Sea; and there is hardly a Year but this City is infested with the Plague, yet 'tis not so violent as in *Christendom*. The *Turks* neither fear nor fly it, believing altogether in Predestination; but the malignant Fever, which succeeds it, is more to be fear'd, because more People die of it, than the Pestilence. This City is not govern'd by a *Bassa*, but a *Cadi*, who is kinder to the Christians, than in other Places, because, upon Complaint to the *Mufti*, he is in danger to be remov'd. The Customs of *Smyrna* yield a great Revenue to the Grand Seignior, though the Merchants study always to deceive the Customers, because they impose such vast Rates upon Merchandices. The principal Merchandices which are transported from *Smyrna*, are raw Silk, which the *Armenians* bring out of *Persia*; Chamlet-Yarn, and Chamlet, or Goats-Hair from *Angouri*; Cotton twisted; Skins or Cordovans of several Colours; Calicuts, white and blue; great Quantities of Wool for Matresses, Tapestries, quilted Coverlets, Soap, Rhubarb, Galls, Valanede, Scammony and Opium. The Caravans generally come hither in *February*, *June* and *October*, and return the same Months. *Ephesus* is but a Day and Half's Journey from *Smyrna*, but it is so ruined, that it deserves not the Name of a City. Its Situation, like that of *Smyrna*, was on the side of a Hill, a small River running at the Bottom. It was very large, as is discernible from the Compass of the Walls, which is seen from the Tops of Gates, which are yet standing. The Temple of *Diana* stood at the Bottom of the Hill, near one of the Gates. There remains nothing of it, but one entire Portal, and some Vaults under Ground. In the Way from *Ephesus* to *Scalanova* is a small River, at the Mouth of which the *Greeks* are always fishing for Sturgeon. Of the Spawn of this Fish they make *Caveare* and *Botargo*, and make a great Trade of it. The Rendezvous of the Caravans is near a Town, called, *Pongarbachi*, where all that intend to go with it meet the Evening before. From *Smyrna* to *Tocat* is 35 Days Journey in the Caravan. In travelling it, you pass over *Pactolus*, whose Sand shining, made it be called *Golden-Sanded*. It falls from Mount *Tmolus*, and watering the Territory of *Sardis*, mixeth with the River *Hermus*, and so falls into the *Archipelago*, thro' the Gulf of *Smyrna*: Then to *Durgout*, where all Christians, that live not in the Territories of the Grand Seignior, and pass that Way, pay a *Carage*, or Tribute, of Four or Five Crowns once a Year; but the *Franks* are free all over *Turky*, as well as here. Then you pass thro' the Ruines of the ancient *Sardis*, the capital City of *Lydia*, and Seat of King *Crœsus*. *Tamerlane* destroy'd it, because it held out a Six Years Siege against him; but there is still to be seen the Footsteps of a large Palace, Two fair Churches, and a great Number of Pillars, and Marble Cornishes. Near it stands a Village of the same Name, where stood the City which was one of the Seven Churches in the *Revelation*. From hence you go by the Walls of the ancient *Philadelphia*, now called *Allachars*, which was one of the Seven Churches of *Asia*. There is something of Beauty in its Walls, and the Ruines of the Amphitheater and Tombs testifie its Antiquity. It was of old one of the principal Cities of *Mysia*, but is subject to Earthquakes, and the Inhabitants often leave it to reside in the Country. After this, you pass over certain Mountains, where those Trees grow plentifully, which bear Galls and Valanede, which is the Shell or Rind of an Acorn, that Curriers make use of to dress their Leather, and so travel over barren Countries for several Days, till you come to *Amphiom-Carasiar*, or, the Black City of *Opium*, because there they sow great store of those Poppies, from which they draw it. It is a great, but dirty and ill built City; it was most probably the ancient *Hieropolis*, because it stands on the Bank of *Meander*. All the *Armenian* Christians, Subjects to the King of *Persia*, must also here pay *Carage*, though they have paid it at *Erzerom*, and other Places. A little beyond this Town, the People bring Fish, very cheap, Barley, and other Things, which the Caravan wants. The first are chiefly Craw-Fish and Carps, catch'd out of the River *Meander*, which are sometimes above Three Foot long. You meet with no Towns in the Road, after this, for several Days, and therefore Water would be very scarce, did not the *Turks*, out of Charity, build Cysterns, and fill them, when it rains, for the Travellers. A little City, *Boulavandi*, is seen at a Distance, where there is some Mosques, built out of the Ruines of the ancient *Greek* Churches, from which also they have taken Pillars of Marble, and other Pieces of Architecture, to adorn their Sepulchres, without any Order at all. These you often meet with upon the High-Road, but at length come to a large Village, called, *Tshacicleu*, where the Inhabitants, during the Summer, leave their Houses, and dwell in the Mountains, with their Cattle, for the cool Air. Here is very good Pasture about it. Departing hence, you travel Six Days in a barren Desart, except some small Valleys, which are fruitful, and come at length to a Plain, which is really nothing but a Lake congealed into Salt. It is Eight or Ten Leagues in Length, and One or Two in Breadth, and furnishes all *Natolia* almost with Salt; and though you buy a Waggon-Load of it for a Noble, yet it brings in to the *Bassa* of *Couchabar* 24000 Crowns a Year. The Way lies now through Desarts, till you come to a great Village, called *Tshekenagar*, which is seated in a pleasant Place, but ill built. From hence you go through Countries full of Liquorice, to a great Town, called *Beserguenlou*; and then, passing over a strong Bridge, called, *Keffre-kupri*, there stands a Village, whose Houses are all under Ground, like Fox-Holes. The next Town in the Way is *Mouchaar*, a large Village, inhabited by *Greeks*, who are constrained ever and anon to turn *Turks*. In this Country is good store of Wine, but it is scented like the

Pactolus. *Tmolus.* *Hermus.* *Sardis.* *Philadelphia.* *Galls, Valanede.* *Opium.* *Large Fish.* *Tshacicleu.* *A Plain of Salt.* *Liquorice.*

the Wine of *Anjou*. After this, you travel through a fruitful pleaſant Country, abounding with Wheat, and in the Way may obſerve little Hills of Earth, raiſed by Art. It is ſaid, they were raiſed during the Wars of the *Greeks*, to build Forts upon for Watch-Towers. In theſe Regions, where, for many Days together, are no Towns or Inhabitants found, the *Turcomans*, a People that live in Tents, like *Arabians*, are obſerved to live in great Numbers, moving often in Carts from one Place to another. The Country is plain for the moſt part, and hath good Meadows and Paſture, and by the Mountains are fat Valleys, and ſo it holds till you come to a Village, called, *Taquibac*. This is the only Place upon the Road, where a Traveller ought to ſtand upon his Guard, by reaſon of the Thieves that haunt theſe Quarters, and are great Maſters in their Trade, coming in the Night, and creeping upon their Bellies to do their Work, with ſo much Silence and Craft, as to be indiſcernible. From *Taquibac* you go to *Kerman*, which is the head City of the ancient *Caramania*. Here are bred thoſe Sheep, which bear the fineſt Wool in the World. They have this peculiar Property, that having fed upon new Graſs from *January* to *May*, their Fleece falls off of it ſelf, and leaves the Sheep quite naked; and the Wool being gathered and beaten, the Coarſe breaks, and the Fine only remains. The *Gaures*, or *Perſians*, that adore the Fire, inhabit this Province chiefly, and have the whole Trade in this Wool, of which they make Girdles, much uſed in *Perſia*, and a ſort of Serges, as fine as Silk. From *Kerman* to *Iſpahan* is 25 Days Journey on Horſe-back. The Road is very dry and ſandy, offenſive to the Eyes, and you meet with very little Water, but at the Inns, which you come to every Night, and meet with a grateful Refreſhment. *Mahomet Ali-Beg*, the Grand Maſter of the King's Houſe and Treaſury, who, from a Shepherd's Boy, was raiſed to this Dignity by the Emperor *Sha-Abas*, and was indeed the greateſt Example of Vertue and Fidelity to be found among the *Perſians*, built theſe Inns, for the Conveniency of Travellers. In the Mid-way between *Kerman* and *Iſpahan*, ſtands *Yezd*, a great Town in the midſt of the Sands, but about the Town is ſome good Ground, which produceth Melons, Grapes, Figs, and other excellent Fruits in great Plenty. There are Three Inns in this City, and ſeveral *Bazars*, or Market-Places, full of Ware-Houſes for Merchants and other Tradeſmen. Here alſo they make ſeveral ſorts of Silk, mixed with Gold and Silver, which they call *Zarcaſte*; others of Silk alone, called *Darai*: They make alſo other Stuffs of Cotton and Silk mix'd, of Cotton alone, like our Fuſtians, and Serges of a particular Wool, which is ſo fine and delicate, that 'tis much better than Silk. The Women here are the handſomeſt in *Perſia*, according to the Proverb, *That to live happy, a Man muſt have a Wife of* Yezd, *eat the Bread of* Yezdecas, *and drink the Wine of* Schiras. From this Town to *Iſpahan* there is nothing remarkable, and therefore our Author, as if he were upon the Road, diverts his Reader with ſome very uſeful Obſervations. 1. About the Caravans, and the Inns for their Reception. 2. About Camels, which are the Beaſts generally made uſe of in Travelling: And 3. About the *Perſian* Coins, and other Things neceſſary for Travellers, in theſe Countries, to know. A Caravan is a great Convoy of Merchants, which meet at certain Times and Places, to put themſelves into a Condition to defend themſelves from Thieves, which ride in Troops in ſeveral deſart Places upon the Road. Theſe Caravans conſiſt moſt commonly of Camels, becauſe they are cheapeſt, and will carry ſome as much as Three, others as much as Four or Five Horſes, but among them are frequently ſeveral Horſes and Mules, which the Merchants themſelves ride on, or carry their Wine, becauſe the Camel-Maſters will not permit you to lade their Beaſts with any ſuch Liquor, becauſe the Liquor is ſtrictly forbidden by *Mahomet*, and the Beaſt is conſecrated to him. A Caravan is like an Army, conſiſting ordinarily of 5 or 600 Camels, and near as many Horſes, and ſometimes more. This makes it the ſafeſt Way of Travelling in *Turky* and *Perſia* with the Caravan, though it goes indeed ſlower, than in leſs Company, or with a Guide alone, as ſome will do. The Journies of the Caravans are not equal, but more or leſs, according to the Convenience of Water for the Beaſts; but they always travel more by Night than Day. To travel with the Caravan, you muſt provide your ſelf with ſeveral Houſhold Goods, as Bottles of Bulgary-Leather, ſmaller for *Aqua vitæ*, and larger for your Water; as alſo, Bottles of Goats Skins, with the hairy Side turned inward, for your Wine, and Rice, and Biſket for your ſelf, as far as *Tocat*. You muſt alſo carry a Tent, with all the Appurtenances, and a Mattreſs and Cloths to cover your Horſes, eſpecially in the time of the deep Snows. The Caravans lie in ſuch Places, as they think moſt convenient, chiefly near a Water-ſide. If it lodges in the Fields, the Merchants ride before to take up a convenient Place for themſelves and Goods, and when they are unloaden, and diſpoſed of in their Places, there are a certain Sort of poor People, called *Shaoux*, who will diligently guard the Field, and take care of the Goods all Night, for a Quarter of a Piaſter. When the Time for journeying is come, theſe Men give Notice to the *Caravan-Baſhi*, or Captain of the Caravan, and he gives Order to load and ſaddle their Horſes, which is done in an Inſtant, becauſe 'tis dangerous to be left behind. But in many Places there are *Caravanſera's*, or Inns for the Caravans. They are not ſo convenient as ours, but have a Court and Building round them, like a Cloiſter. On the one ſide is an Hall for the Perſons of Note, and by it Lodgings for every Man by himſelf, and on the other ſide Stables for the Beaſts, in the Sight of the Maſters: Servants lie and dreſs their Meat in certain Niches in the Stables by their Horſes. You may have Proviſion for your ſelf and Beaſt of the Maſter of the Inn, (if you bring it not your ſelf) but you muſt provide your ſelf a Bed, and Utenſils to dreſs your Meat. In the Night the Inn-Keeper ſhuts up his Gates, and takes Charge of the Goods, being anſwerable for whatever is loſt. The Inns, though incommodious for the Rich, are convenient for the Poor, who are never denied Admittance, for no Man pays for his Chamber, nor is obliged to eat or drink more than he pleaſes, but every one may ſpend according to his Stock, and there is no Grumbling. The Camels, which are the Beaſts uſed in the Caravans, are Creatures beneficial in divers reſpects, as well as that. The Female goes with Young Eleven Months, and her Milk is a Sovereign Remedy againſt the Dropſie, drinking a Pint every Day for Three Weeks together, as ſeveral of our *Engliſh* and *Dutch* Mariners have found. As ſoon as a Camel is foaled, they fold his Legs under him, and make him lie upon them Fifteen or Twenty Days, laying a Carpet over his Back, and Stones upon the Ends of it, which lie on the Ground, that he may not riſe, and in the mean time give him Milk to drink, and that but ſeldom, that he may be uſed to drink little. Thus they uſe him to lie down ſo obediently, that 'tis a Wonder to ſee how they will come to their Maſters, to take up and lay down their Burdens all kneeling round him. When their Burdens are off they turn them on the Commons to eat Furze and Thiſtles, and they will return above half an Hour before Night, and then they give them ſome little Balls of Barley-Meal, kneaded. When a Camel is in the Heat of Generation, he neither eats nor drinks for Forty Days together, but then he is ſo furious that 'tis dangerous to come near him, leſt he bites you for where-ever he bites, he carries away a Piece of Fleſh. Although a Camel be of a large Bulk, he is a very little Eater, and will endure Drought with mighty Patience, for they will ordinarily live without Drink Eight or Nine Days. There are Two ſorts of Camels, one for hot Countries, and the other for cold. The firſt cannot travel if the Ground be dirty or ſlippery, for their Bellies burſt, and their hinder Quarters will rive from their Body. They are ſmall, and though they will carry not above 5 or 600 Weight, yet they are kept for little, and will endure Thirſt a long time. They are called together and driven by Singing and Piping, and the louder the Camel-driver ſings or pipes, the falter they will go, and when he gives over his Muſick, they will ſtand ſtill. They are tender, and muſt be gently uſed, and not put upon long Journies. The Camels of the cold Country are large and ſtrong, able to carry a Burden of 1500 Pound Weight each, but in ſticky and ſlippery Roads, they are in danger of riving; and therefore in bad Roads, they either ſpread Carpets for them, or ſtay till they are dry. As to the Coins of *Perſia*, you muſt take Notice, that the *Perſians* have no coin'd Gold, but Medals,

dals, which are thrown among the People, when a new King ascends the Throne: They are of an uncertain Value, and taken only upon Agreement. The *Persian* Silver is good, whether it be in Bars, Plate, or Money; but it must be coin'd under a great Penalty. They have Four sorts of Silver Coins, *viz.* The *Abassi*, in Value 1 *s.* 4 *d.* $\frac{1}{5}$ Sterling, the *Mamoudi* is half an *Abassi-Shaet*, half a *Mamoudi*, and the *Bisti*, of which they have few, is 6 *d.* $\frac{74}{100}$ Sterling. Their Copper Coins are the Single *Casbeke*, in Value 1 *d.* $\frac{3}{4}$ and the Double *Casbeke* 3 *d.* Their great Coins have Number 1. Number 2. set on them. These have the Names of the Twelve Prophets of *Mahomet*'s Law written on the one Side, and in the Middle this Inscription, *La Illah allah Mahomet, resoul Allah, Ali Veli Allah*; and on the Back-side, *The Conqueror of the World*, Abas II. *gives us Permission to coin this Money in the City of* Cashan. Numb. 1. makes Five *Abassis*, and Numb. 2. Two and an half. The other Coins have no Inscriptions, but the Name of the King reigning, when they were coin'd, and the Name of the City where, and the Year of the *Hegyra* of *Mahomet*. In Traffick they commonly reckon by *Larins*, an *Indian* Money, *Or*'s and *Tomans*, Eight *Larins* making an *Or*, which is in Value 6 *s.* 11 *d.* $\frac{1}{2}$ Sterling, and a *Toman* 3 *l.* 9 *s.* 0. As for Pieces of Gold, the Merchants carry none into *Persia*, but *Alman* Ducats, Ducats of the Seventeen Provinces, or of *Venice*, and they are bound to carry them into the *Mint*, before they go further into the Kingdom; but if they can conceal them, and sell them to particular Persons, they may make more of them, because they rise much when the Caravans set out for the *Indies*, or *Mecca*. Concerning the Corn of *Persia* in general, there is great Difference between that which is produc'd naturally, and that which is raised by Art, by the Help of Water forced into Channels. The former is sound, and will keep well, and therefore much valued, but this last is cheap, and of little Esteem, because it will not keep above a Year, but it will breed a Vermin that eats it; and though it be ground to prevent this Inconvenience, yet it will not remedy it; for there breeds a Worm in the Flour, which makes it so bitter, that 'tis impossible to eat it. Further, 'tis observable, that in most of the Towns of *Persia*, there are a great many ruined and decay'd Houses, and the Reason is, that the *Persians* and *Turks* have that bad Humour, that they will not repair old Buildings, but had rather build new ones; and upon this Account it is, that few Children care to dwell in the Houses where their Parents liv'd, but immediately upon their Decease are covetous to build Houses for themselves.

Their Value and Names.

Of the Corn.

CHAP. III.

Mr. Tavernier's *Second Voyage from* Paris *to* Ispahan, *through the Southern Provinces of* Turky, *and through the Desarts.*

Malta.

THIS Author embark'd at *Marseilles*, in an *Holland* Vessel, and sail'd to *Malta*, where there are abundance of Quails, and passing thro' *Larneca*, a good Road in the Island of Cyprus, to an Anchor in the Road of *Alexandretta*, or *Scanderoon*, about a Quarter of a League from Land. When the People here discover a Vessel, of which they have before had Advice out of *Christendom*, the Vice-Consul of that Nation fails not immediately to give the Consul at *Aleppo* Advice of it, by sending a Pigeon, with a Note ty'd under the Wings, which will carry it in Four or Five Hours, though it be Two or Three Days Journey on Horse-back; and the Pigeon being taught, it never fails, unless it be very dark, in which Case they usually send Two, for fear of Mistake. *Alexandretta* is a confused Heap of paltry Houses, inhabited by the *Greeks*, who keep little Ale-Houses for the Mariners and the meaner sort of People, for the Merchants lodge in the Vice-Consul's House, that belong to their Nation, till they can furnish out to *Aleppo*, which is but Three little Days Journey. The Air is so bad, especially in Summer, that all that do not die, are afflicted with dangerous Distempers, and therefore, when the great Heats begin, the most part of the Inhabitants retire to a Village, called *Belan*, situate upon the Neighbouring Mountain, where is excellent Water, and good Fruits, as also do the Citizens of *Aleppo* in time of Pestilence, though the People here are all for the most part with a Fever, which makes their Eyes look yellow and hollow as long as they live. About half a League from *Alexandretta* is a Tower, built among the Marshes, for the Defence of the High-Way, where are to be seen the Arms of *Godfrey* of *Bullioign*. No Stranger may go from *Alexandretta* to *Aleppo* on Foot, but must hire an Horse, at Six Piasters, thither, and back again as much. This Order was obtain'd by the Merchants, to hinder the poor Mariners Trade. From *Alexandretta* you go first to *Belan*, a Mountain where there is such a wide Gap to the North-East, that when that Wind blows hard, no Ships can ride safely in the Road of *Alexandretta*, but are forced, when it rises, to get out to Sea, for fear of being cast away. Descending from the Mountain, you discover *Antioch*, a City built upon an Hill. The Road once lay through this City, but because the *Janizaries* there exacted a Piaster of all Travellers, it became disused, as also hath the Haven by being stopped up with the Sands. About half Way to *Aleppo*, you meet with a long Causey, with several Bridges, raised in Six Months by the Grand Visier, in the Reign of *Achmet*, for the more easie Carriage of his Ammunition and Provision to the Siege of *Bagdat* and *Balsora*, who had so often revolted from the Grand Seignior. At the End of this Causey lies the Lake of *Antioch*, which is made by the Confluence of divers Rivers into it. This Lake affords a great Revenue, by the Multitude of Eels, which are here taken before *Lent*, and sent to *Malta*, *Sicily*, and several Parts of *Italy*. On the Plain of *Antioch*, which adjoins to this Lake, grow many Olive-Trees, which produce that great Trade of Soap, which is made at *Aleppo*, and sent into *Mesopotamia*, *Chaldæa*, *Persia* and *Arabia Deserta*, and Sallet-Oil, wherewith the *Arabians*, anoint themselves, according to their old Custom, and praise God, the Giver of it. At the End of this Plain, you lie at a poor Village, called *Shaquemon*, where the Horses are terribly tormented with a great sort of Flies, insomuch, that it were impossible to travel that Way, were it not for the Fields of *Tarel*, through which if you ride, the Flies cannot hurt them. In the Road from hence, you travel among Stones, and you see nothing, but the Ruines of ancient Monasteries, some of them built of Free-Stone. One of them is said to be the Monastery of St. *Simeon*, the *Stylite*, and there are some Remains of his famous Pillar; and the *Franks*, when they travel to *Aleppo*, usually go out of their Way to see that Place, and so go to *Angare* to Dinner, where you are handsomly entertain'd, as at other Stages, for your Piaster. From hence you travel to *Aleppo* in Three Hours. Here at the Quassary Strangers are entertain'd well for Half a Crown a Day, and their Servants for a Quarter as much. *Aleppo* is one of the most famous Cities in all *Turky*, not only for the Bigness and Beauty of it, the Goodness of the Air, and Plenty of all Things, but for the great Trade which is driven there by all Nations of the World. It lies in the 71 D. 41 M. of Longitude, and 36 D. 15 M. Latitude. It is thought to be the ancient *Berœa*. The *Arabians* gave it the Name of *Aleb*, when they took it, in the Fifteenth Year of the *Hegyra* of *Mahomet*, *A. C.* 637. in the Reign of *Heraclius*, Emperor of *Constantinople*. The City is built upon Four Hills, and the Castle upon the highest, that stands in the Middle of it, which is large, but not strong. The City is about Three Miles in Circuit, is wall'd about with Free-Stone. It hath Ten Gates, but no Moat, or Draw-

Pigeons carry Letters.

Monasteries

Aleppo, a stately City.

Draw-Bridge. Under one of the Gates is a Place, which the *Turks* have in great Veneration, becauſe they hold, that *Eliſha* the Prophet liv'd there ſometime, and they burn Lamps there continually. There runs a Rivulet by the City, which ſerves to water their Gardens, where grows abundance of Fruit, and particularly Piſtaches, much bigger and better taſted, than thoſe from *Cabin*; but the City is ſupply'd with Water from Two Fountains at ſome Diſtance from the City. The Houſes, neither publick nor private, are handſome, but are well adorn'd within with Marble of ſeveral Colours, Fret-work Cielings, and Golden Inſcriptions. Within the City are 26 Moſques, Six or Seven of which are very magnificent, with ſtately *Duomo*'s, and Three of them are cover'd with Lead. The chiefeſt and largeſt of them is thought to be a Chriſtian Church, built by St. *Helena*, as was that Moſque which ſtands in the Suburbs. There are Three Colleges in *Aleppo*, but very few Students, though there are Learned Men, who have Salaries to teach Grammar, Philoſophy, and the Grounds of their Religion. The Streets of this City are paved, except their *Bazars*, where the Merchants and Crafts-men have their Shops. The chiefeſt Artiſts, and moſt numerous, are Silk and Chamlet-Weavers. The Weights commonly uſed at *Aleppo*, are the *Rottle* and the *Oque*; the *Rottle* containing 600 Drachms, or 5 Pound Weight, and the *Oque* 400 Drachms, or 3 Pound Weight; and the ſame Weights are uſed at *Damaſcus*. The Money current there, is the *Piaſtre* of *Reals*, which is worth 80 *Aſpres*, in Value a Noble Sterling; the *Boquell*, which is worth 70 *Piaſtres*, or 5 *s.* 10 *d.* and the *Schied*, which is 5 *Aſpres*, or 5 *d.* In the City and Suburbs there are about Forty Inns, and Fifty publick Baths, both for Men and Women, by their Turns. Bathing is the Womens chief Paſtime, and they'll ſave all the Week to carry a Collation thither to make merry with. The Suburbs are well peopled, becauſe almoſt all the Chriſtians have their Houſes and Churches there. They are of Four ſorts, *Greeks*, *Armenians*, *Jacobites*, or *Syrians*, and *Maronites*. The *Greeks*, who are about 15 or 16000 in Number, have an Archbiſhop here, and a Church, dedicated to St. *George*. The *Armenians* are not above 12000, but have a Biſhop and Church, dedicated to the *Virgin*. The *Jacobites* are but 10000, and have their Biſhop and Church. The *Maronites* are about 1200, and depend upon the Pope, and their Church is conſecrated to St. *Elias*. The Roman Catholicks have Three Churches, ſerved by *Capuchins*, *Carmelites* and *Jeſuites*, and they reckon, that in the City and Suburbs are 25000 Souls. There is a vaſt Trade at *Aleppo* for Silks, Chamlets, Nut-Galls, Valenede, Soap, and ſeveral other Commodities, which bring thither Merchants from all Parts of the World, *Turks*, *Arabians*, *Perſians*, *Indians*, *Engliſh*, *Italians*, *French*, *Hollanders*, and others, every Nation having its Conſul, to carry on their Intereſts, and maintain their Privileges. The Profeſſion of a Phyſician is of no Value at *Aleppo*, for the *Turks* there will not give above 20 *Sous* (or Pence) for the Cure of any Diſeaſe; and, which is worſt of all, if the Patient be not cured, or dies, the Phyſician is blamed, or puniſhed. Sometimes they'll hang ſuch an one about with little Bells, and carry him through the City to expoſe him, that none may employ him. The City is govern'd by a *Baſha*, who commands all the Country from *Alexandretta* to *Euphrates*, and has a Guard of 300 Men. He was ſome Years ago made a Viſier. There is alſo an *Aga*, or Captain of the Cavalry, who commands 400 Men, and has Power as well without as within the City. There is alſo an *Aga* of the *Janizaries*, who has Charge of the Gates of the City, and to him the Keys are carry'd every Night. There is alſo a Commander of the Caſtle, ſent immediately from *Conſtantinople*, who has 200 Muſketeers under him, and has Charge of the Cannon, which are about Thirty Pieces, Eight great, and the reſt ſmall. There is alſo an *Aga*, or Captain of the City, who commands 300 *Harquebuſſes*, beſides a *Sou-Baſha*, who is a kind of Provoſt of the Merchants, and Captain of the Watch. He goes the Rounds every Night, with the Officers, through the City and Suburbs, and puts in Execution the Sentences of the *Baſha* upon Criminals. In Civil Matters the *Cadi* ſits ſole Judge. He makes and diſſolves all Contracts of Marriage, confirms all Acts of Purchaſe and Sales, creates Maſters of every Trade, who are to ſee there be no Deception in the Work. The Grand Signior's Duties are received by a *Teſterdar*, or Treaſurer-General, who has under him ſeveral Receivers in divers Places. In Matters of Religion the *Mufti* is the Chief: He interprets the Law as well in Relation to the Ceremonies, as Eccleſiaſtical Differences. Among them there is a *Chick*, or Doctor, appointed to inſtruct thoſe that are newly converted to *Mahometaniſm*, and teach them the Maxims and Cuſtoms of their Religion. Not far from *Aleppo* is an Houſe inhabited by the *Dervices*, which are a Religious Order among the *Turks*. It was anciently a Convent of the Monks of St. *Baſil*. It is in good Repair, the Walls of the Chambers, Halls and Galleries being all Marble. Some of theſe Men will turn round Two Hours together with all their Might, till they dazzle the Eyes of the Beholders, thinking this Piece of Folly a great Accompliſhment. Near this College is the Fiſh-Well, which is incloſed in a Court with Walls, and wharfed with Marble. It is a Pleaſure to ſee the Multitudes of great Fiſh playing in the clear Water, but the *Turks* will permit none to touch them, ſaying, that if any eat of them, they fall ſick. From *Aleppo* to *Iſpahan* there are Five principal Roads. 1. On the Left Hand, toward the Summer-Eaſt, through *Diarbeck* and *Tauris*. 2. Directly Eaſt, thro' *Meſopotamia*, by *Mouſſul* and *Amadan*. 3. On the Right Hand, toward the Winter-Eaſt, through *Bagdat* and *Kengavar*. 4. A little more to the South, croſſing a little Deſart, through *Anna*, *Bagdat* and *Balſara*. 5. Through the great Deſart, which is travell'd but once a Year to buy Camels. Theſe added to the Two Roads before deſcrib'd, make Seven Roads. For the Road by the great Deſart the Caravans never ſet out, till the Rains are fallen, that they may not want Water, and that is in *December*. When you have gone Two or Three Leagues from *Aleppo*, you enter the Deſart, where you meet with nothing but Tents, inſtead of Houſes, and large Plains of Sand, hardly paſſable, till the Rains have knit them together. They ſtretch out to the Winter-Eaſt all along the *Euphrates* to *Balſara*, and the Shore of the Gulf of *Perſia*, and upon the South to the Chain of Mountains, which divide it from *Arabia Petræa* and *Arabia Fœlix*. For the firſt Fifteen Days Travel, you meet with Water but once in Two Days, and ſometimes but once in Three; but afterward you ſhall find ſome few Houſes and Water oftner. In theſe Journies you meet ſometimes with the *Emirs*, or *Arabian* Princes, who will ſtop your Caravan, and not let it go any further, till the Sum he pleaſeth to require be paid him. In theſe Deſarts are many Hares and Partridges, but ſometimes you will find no Water for Nine or Ten Days together, in which Time, though the Camels will ſhift well enough, yet the Men are hard put to it for Drink. In the midſt of them ſtands a large Palace, built of burnt Brick, and Three Courts belonging to it, in every one of which are fair Buildings, with Two Stories of Arches, one upon another; but no Body lives in it; and the *Arabians*, who are very ignorant of Antiquity, can give no Account of the Building nor Inhabitants. Before it is a Lake with a Channel, brick'd at the Bottom. From this Palace, after Five Days Journey, you come to a pitiful Town, called *Cuca*, but now *Meched-Ali*, becauſe there *Ali*, *Mahomet*'s Son-in-Law, lies buried in a plain Moſque, and about his Tomb there are Lamps and Tapers burning continually. The *Perſians* have a great Veneration for this Prophet; but becauſe they muſt paſs through *Bagdat*, where the *Turk* makes every Pilgrim pay Eight Piaſters to go in Pilgrimage to this Moſque, the Kings of *Perſia* forbid their Subjects to viſit his Tomb, as ſcorning their Subjects ſhould be tributary to the *Turks*. From hence in Eight or Ten Days you may get to *Balſara*, and ſo to paſs theſe Deſarts it takes up 65 Days, or thereabouts. At *Balſara* there are ſeen ſuch prodigious Numbers of Locuſts flying in the Air, that they appear like a Cloud, and darken the Sun. The Winds, when they are on the Wing, carry them into the Deſart, where they periſh; and had not Providence appointed this Way to be rid of them, there could nothing live for them upon the Earth, in ſome Parts of *Chaldæa*. From *Balſara* you paſs the *Perſian* Bay to *Bander-rie*, in *Perſia*, in 48 Hours, if you have a good Wind. This Town is nothing but Five or Six little Fiſhers Huts, made of Hurdles, ſet one againſt ano-

Eliſha's Gate. *Moſques.* *Colleges.* *Streets.* *Crafts-men.* *Baths.* *Chriſtians.* *The Trade.* *Baſha.* *Command-er of the Caſtle.* *Sou-Baſha.* *Cadi.* *Teſterdar.* *The Mufti.* *Chick.* *Dervices.* *Several Roads from Aleppo to Iſpahan.* *The Road by the great Deſart.* *The Arabian Emirs.* *An empty Palace.* *Ali's Tomb.* *Balſara.* *Locuſts.*

another, and cover'd over, where the People live with their Families. From hence to *Cazerom* is Six Days Journey, through a Mountainous Country, full of Wood, and in some Places pleasant enough, being upon the Banks of little Rivulets, and through verdant Groves, stored with Turtles, which are good Food for Travellers. From *Cazerom* to *Schiras* is Five Days Journey, through very craggy Mountains, which had been unpassable, had not *Ali-Couli Kan*, Governour of *Schiras*, made Ways where there was none, and join'd Mountains together by Bridges, at great Charge, for the Publick. In the midst of these Mountains lies a plain, about Twenty Leagues in Circuit, which is inhabited by *Jews* only, who are Silk-Weavers. The *Chaldeans* come in Summer to these Mountains, for cool Air, and Pasture for their Cattle. From *Schiras* you pass a Country, part Mountains, and part Plains, and in Three Days come to the Mountain of *Mayen*, and, after Two Days more, enter the Country of *Cusestar*, where the King of *Persia* keeps his Race-Horses, and the next Day you arrive at *Tesdecan*, where is made the best Bread in *Persia*: The excellent Corn, of which it is made, grows in the Valley adjoining. From *Tesdecan*, in Three Days, you get to *Ispahan*.

CHAP. IV.

Mr. Tavernier's *Third Voyage from* Paris *to* Ispahan, *through* Mesopotamia *and* Assyria.

1643. MR. *Tavernier* relates, That in this Voyage he left *Paris*, Dec. 6. 1643. and went to *Leghorn*, where finding the *Dutch* Fleet ready to sail for the *Levant*, he embark'd in a Man of War Ship, and sailing thro' the Chanel of *Messina*, and by the *Morea*, arriv'd at *Alexandretta*; and from thence, on Horseback, went to *Aleppo*, according to the usual Manner, and then proceeded on his Journey, *March* 6. in the Company of Two *Capucin* Friars, Father *Raphael*, and Father *Ives*, and *Dominico de Sancta* a *Venetian*. From *Aleppo* you come to *Bir* in Four Days, through a well wooded and manured Country. In the Way there is a Cave, where the *Bedouins*, or Feeders of Cattle, thereabouts often retire, because they live like the *Arabs*, either in Rocks, or poor Huts. It is so large, as to contain 300 Horse; and there are in it several Niches, like little Chambers. The *Bedouins* will rob and disturb the Travellers, if their Goods are not defended. You cross the *Euphrates* in large Ferry Boats to *Bir*, and there pay a Duty of Two Piasters for every Horse's and Mule's Load of Goods, and half a Piaster for every Beast's Load of Provisions. *Bir* is a large City, built like an Amphitheatre, upon the Brow of a very craggy Mountain. It has Two Castles, one by the River under the Hill, which secures the River, and another in the highest part of the Town, where the Governour resides, who is an *Aga*, and has under him 200 *Janizaries*, and 400 *Spahi's*. It affords extraordinary Plenty of all Things, excellent Bread, good Wine, and great store of the best sort of Fish.

From *Bir* you go through part of *Mesopotamia*, which lies between *Euphrates* and *Tigris*, called at present *Diarbeck* to *Searmiy*, a good Town, where is an Inn and Baths round it. About Two Musket-shot from thence is a Mountain alone by it self, on the Top of which stands a Fortress, with a Garrison of 200 *Spahi's*, to oppose the *Arabs*, who sometimes cross *Euphrates*, and make Incursions on that Side. Proceeding on your Journey, you come to *Ourfa*, where the Merchants pay another Toll for their Goods. *Ourfa* is the capital City of *Mesopotamia*, built in the same Place (as they say) where *Abraham* dwelt, and where the ancient City of *Edessa* stood. They shew a Castle, where, they say, King *Abgarus* liv'd, when he sent to Christ; and the *Armenians* hold, that they began to be Christians in his Reign, and were baptized by an Apostle, whom Christ sent to them after his Resurrection. The *Armenians* have Two Churches here; the biggest stands at a small Distance from the City; and a Monastery, enclosed with fair Walls, by it. It was built by St. *Eporem*, who lies buried there; the other stands in the highest part of the Town, in the middle of the Church-yard. They say, that St. *Alexis* liv'd Sixteen Years a private Life under the Portal of it. The City is seated in a good Soil, which produceth good Wine, and affords very pleasant Gardens, water'd by Chanels, brought thither by Art. The Walls of the City are of Free-Stone, with Battlements and Towers, but within, the Houses are small, ill built, and so ruinous, that in some Places it looks more like a Desart than a Metropolis. The City is 1643. govern'd by a *Bassa*, who has under him 150 *Janizaries*, and 600 *Spahi's*, to prevent the Incursions of the *Arabians*, especially in Harvest-time. Here are dress'd great Quantities of *Cordovan* Skins, of a yellow Colour, because the Water of this Place gives them a particular Beauty.

From *Ourfa* you pass to *Dadacardin*. The Way is so rocky, that 'tis dangerous to ride, and there is nothing memorable, but several Caverns and Grott's in the Rocks, where the People liv'd that fed their Flocks, and a City quite deserted by the Inhabitants; not far from which is a Place full of Tombs of Stone, and in the midst of them stands a Cross, with *Armenian* Characters. *Dadacardin* seems to have been a great Town, but 'tis all ruined, and has nothing worthy of Notice, but a long Stone-Bridge, well built. The People of the Country adjoining have no Houses, but dwell in the Hollows of Rocks, yet they sell Hens, Butter, Cheese, and other Provisions to the Travellers, very cheap. The next Town in the Road is *Cara*, built on an Hill. Here the Christians have a pitiful Church, where they make shift to say Divine Service, but dare not make it decent or convenient, because the *Turks*, in foul Weather, break into it, and take away all they find, and burn what they cannot carry away. In the Town is a Pond, wharfed with the Stones taken from the Christian Churches and Tombs. The Country is a large Plain, Twenty Leagues in Length, and might well be manured, to the great enriching of the Inhabitants, were it not subject to the Tyranny of the *Turks*, and Incursions of the *Arabs*, which discourage all Industry. From hence you travel to *Cousasar*, where formerly were Three Monasteries, a Quarter of a League one from another; but Two of them are ruin'd by the *Turks*, all but the Steeples of the Churches, and the 3d, which was the fairest, is made a Mosque. Here you must pay the Customs of *Diarbequir*, which is distant 2 Days Journey, amounting to 2 Piasters and a Quarter for every Load of Merchandice. It is a large Village, inhabited by *Armenian* Christians and *Nestorians*. The former perform Divine Service in their own Language, and the latter in the *Chaldee*. *Mardin* is about Two Leagues from this Town. It is a little City, seated on a Mountain, on the higher part of which stands a Castle, accounted impregnable, which commands it, and is in the Hands of a *Bassa*, which has under him 200 *Spahi's*, and 400 *Janizaries*. The Christians here have a Bishop.

Karasara, a great Town, comes next in our Way. It was formerly, no doubt, inhabited by Christians, because there are still the Ruines of Seven or Eight Churches, of which the Steeples are not much the worse. They stand at a good Distance one from another, and upon every Door of one of them is a Cross. The next Day you come to *Nesbin*, anciently *Nisibis*. The Road from *Cousasar* hither is a large Plain, where no Herb grows but Pimpernel, the Roots of which are some a Foot and half diameter, and the Fields by it are full of yellow, red, and blue Flowers, Tulips, Emonies and Daffadils.

In

1643. In general, *Mesopotamia* is a very barren Country, and capable of Improvement by Art in a few Places only. *Nisibin* is but a Shadow of the ancient *Nisibis*, being only a large Village. It is inhabited by *Armenians* and *Nestorians*, who have a Bishop and several Priests. Here is also a Toll of Two Piasters and an half to be paid for every Horse and Mule's Load; and you must furnish your self with Provisions till you come to *Moussul*, which is Five Days Journey over uninhabited Deserts, where we saw nothing, but the Ruines of a Bridge and Castle. *Moussul* makes a great Show without, because the Walls are all Free-Stone, but within 'tis almost all ruined, except Two blind Market-places, and a little Castle on the *Tigris*, where the *Basha* lives; yet here is a considerable Resort of Merchants from *Arabia* and *Curdistan* to buy Galls, which grow here in great Plenty. There are in it Four sorts of Christians, *viz.* *Greeks*, *Armenians*, *Nestorians* and *Maronites*. It is govern'd by a *Baska*, who has under him, part *Janizaries* and part *Spahi's*, about 3000 Men.

Moussul.

Cross the *Tigris*, which hath a swift Stream and whitish Water, whereas *Euphrates* runs slow and is reddish, you come to the ancient City *Nineve*, which is now an Heap of Rubbish only, for a League along the River, full of Vaults and Caverns. Half a League from *Tigris* stands a little Hill, encompassed with Houses, on the Top whereof is built a Mosque, in the Place where, they say, *Jonas* is buried. The *Turks* have a mighty Veneration for it, and cover it with a *Persian* Carpet of Silk and Silver, and at the Four Corners are great Copper Candlesticks with Wax Tapers, and several Lamps. No Christians are suffered to enter it, but privately for their Money, and then they must put off their Shooes. Two *Dervises* sit always in it reading the *Alcoran*.

Nineve.

Jonas's Burying-place.

Having passed over the *Tigris*, you cross the ancient *Assyria*, now called *Curdistan*, at first through a plain Country, by the Side of a little River, and over the River *Borbus*, which has no Bridge, and is passed with Difficulty by the Caravan, being a rapid and large Stream, but full of Fish, and particularly excellent Trouts; but afterward the Road is very bad for 2 or 3 Days, till you come to a large Stone-Bridge over the River *Zarbe*. They report, that this Bridge was built by *Alexander* the Great, in his March against *Darius*.

Assyria, or Curdistan.

From this Bridge you go on to a Town, called *Sherazoul*, where resides a *Basha*, who must be brib'd with a small Present to let the Caravan pass. Here the Way lies over dry Mountains a while, till you come into the pleasant Plains of *Arbela*, where *Alexander* defeated *Darius*. It is watered with several Rivulets, full of Fruit-Trees, and about Fifteen Leagues in Extent. On a little Hill by it, which is cover'd with the fairest Oaks that ever were seen, are the Ruines of a Castle, where, they say, *Darius* staid, while his Captains fought with *Alexander*. It seems to have been a sumptuous Building. Three Leagues from hence appear the Ruines of another Castle, where *Darius* is said to have secur'd his Wives and Concubines when the Battle was lost. The City of *Sherazoul* is cut out of a steep Rock for a Quarter of a League together, so that you must go up 10 or 15 Steps to every House. They have no Doors to their Houses, but a thin round Stone, like a Mill-Stone, which they rowl away when they go in or out, the Walls of their Houses being so cut, as to receive it like a Case. Here are certain Springs, which have a purgative Quality, and taste like a Mineral.

1643. Sherazoul. Arbela. The Heads. Purging Springs.

Departing hence, we cross'd the Fens and hot Waters, which part the Empires, and so entred into *Persia*, where we found an high Mountain, hardly superable by the Caravan. It was cover'd with Oaks, that bear the Nut-galls and Acorns of which the People thereabouts make Bread, and have none else. From this Mountain you descend into a fertile Plain, over which it is Two Days Journey to a good big Town, where there is a Fortress, and the Governour of the Province has a Lieutenant there, who has about 2000 Men under his Command. It is called *Sneirne*; and from thence over Plains full of Lilies, not white, but of a bright blue Colour, an Infusion of whose Roots, drunk Fifteen Days together, is a most Sovereign Remedy against the Pox, you come to *Amadan* in Three Days. This City is one of the largest and most considerable in all *Persia*: It stands at the Foot of a Mountain, where rise a great Number of Springs, which water all the Country, and make it abound so with Corn and Rice, that it furnisheth the greatest part of the Neighbouring Provinces with them. From hence it is but a small Day's Journey to *Ispahan*.

Amadan.

The End of the Third Voyage.

CHAP. V.

Mr. Tavernier's *Fourth Voyage into* Asia, *viz.* *from* Paris *to* Ormus.

1651. MR. *Tavernier* leaving *Paris* June 18. 1651, arriv'd at *Marseilles* July 16. and setting Sail *August* 26. with a favourable North-West Wind, arriv'd at *Malta* upon the Day of the Nativity of the *Virgin*, (viz. *Sept.* 8.) which is a great Day with the *Maltese*, being a publick Thanksgiving to God, because the *Turks* raised the Siege of their Island that Day. This Festival is performed with great Solemnity, and Devotion, a Procession of the Knights, Ringing of Bells, and Discharging their Cannon, all the Country-men and Citizens being in Arms. In this Island is an Arsenal, where are kept Arms for 20000 Men in good Order, and well look'd after, and an Infirmery, where all the Sick, as well Poor as Rich, are serv'd in Plate.

Malta. The Arsenal and Infirmery.

Departing from *Malta* Sept. 20. he and his Company sail'd by the *Morea*, and saw the City of *Coron*, where there is a great Trade for Sallet-Oil, and on the 25th descry'd *Cyprus*. From the 27th they perceiv'd the Sea to be covered all over with Pumice Stones, which happen'd from an Earthquake, which had swallow'd up the Isle of *Santorini* a little before, and was the Death of above 750 Islanders, that were either bury'd in the Ruines, or died of Fear; and those that surviv'd it became as black as Charcoal, and the Vapours that ascended out of the Abyss, sully'd all the Silver as far as *Constantinople*, and the Noise of the Earth-quake was heard as far as *Smyrna*.

On *Octob.* 1. they came to an Anchor before *Salines*, a Port of *Cyprus*. This Island is one of the most considerable in the *Mediterranean* Sea, lying more East than any of the rest, and bearing the Title of a Kingdom, as being 500 Miles in Compass. It is of a triangular Form, and has several Capes, or Promontories, *viz.* St. *Epiphanio* on the West, Cape *De Gats* on the South, Cape *Diegrega* on the North-East, Cape *Cormacoiti* on the North, and Cape St. *Andrew* on the East. The principal Roads are *Salines*, or *Larneza*, *Papios*, *Cerine*, or *Cerigni*; for the Haven of *Famagosta* will receive only small Vessels. The *Basha's*, who are sent Governours of the Island from *Constantinople*, land at *Cerines*, where all the Barks and Galleots, which come from *Caramania* and *Payasses*, lie, and reside at *Nicosia*, a City almost in the middle of the Island, formerly a very large one, but now of less Compass, yet the Walls are well terrass'd, and in a good Posture of Defence. The City was once adorn'd with many fair Palaces by the *Venetians*, which made it no uncomely City; but the *Turks* pull them down every Day, out of Hopes of finding Treasure hidden in them, and sell the Stones to build new Houses. The Cathedral of *Santa Sophia*, a noble Structure, is made a Mosque, as is also the Monastery belonging to the *Augustine Friars*. The *Greeks* have Four Churches, and the *Franks* Two, *viz.* The *French Missionary Capuchins*, one dedicated to St. *James*, and

1651. Cyprus described. The chief Port. The great Houses pull'd down.

1651. the *Italian Miſſionary Soccolanus*, another conſecrated to the *Holy Rood*. The *Armenians* have another, which was formerly a Monaſtery of the *Carthuſians*. All theſe Chriſtians pay a *Carage* to the Grand Seignior, as ſoon as they are Eighteen Years of Age, the pooreſt Six Piaſters, and the Rich 100. or 150, which Tax is ſo heavy to them, becauſe Money is ſcarce in the Iſland, that many of them turn *Mahometans*, to avoid the Payment. This City is ſeated in a temperate Air and fertile Soil, abounding with Water. It was anciently Nine Miles round, but is now but Three. It was one of the moſt ſtately and exact Fortreſſes in the World, before *Selim* the Second beſieged it. *Famagoſta* is a Sea-Town, and the chief Bulwark of the Iſland. It is kept in good Repair, and the Caſtle is in Form of a Cittadel. The *Turks* have converted all the Chriſtian Churches into Moſques, and will not ſuffer a Chriſtian to dwell in it; but though they are allow'd to come in the Day-time and open their Shops and ſell, yet at Night, when they have ſhut them up, they muſt go to their Houſes in the Neighbouring Villages. It is govern'd by a Bey, who has no Dependance on the Governour of the Iſland, but is obliged to maintain a Galley for the Defence of the Coaſt. *Cerines* is another little City, but without any Walls to defend it, but only it has a little Fortreſs by the Sea, with a Garriſon in it. Here is an handſome Monaſtery of *Greeks*, built ſo near the Sea, that they can fiſh out of ſome of the Windows of the Cells. The Fields about it bear Cotton, which is the chief Revenue of the Monaſtery. The other Forts that defend the Iſland are, *Salines*, *Limiſſo* and *Paphos*. The Inhabitants in the Villages are for the moſt part *Greeks*, clad after the *Italian* Manner, but retaining their ancient Cuſtoms as much as poſſible. The Trade of the Iſland lies in Cotton-Wool, which is the beſt of all the Eaſt; and ſome Silk, which is neither good, nor plentiful. It is fertile enough, if it had Inhabitants to till it: Bread, Wine, Cheeſe and Milk are very cheap; and Oil is produced in a ſufficient Quantity for their own Uſe. The Countries between *Nicoſia* and *Famagoſta*, *Paphos* and *Limiſſo* produce Cotton. The chief Place for their Silk is *Cythrea*, a large Town, watered with a large River, which runs from the Mountains of *Venice*, and turns ſeveral Mills. At *Piſcopi* the *Venetians* made Sugar, but ſince the *Turks* took the Iſland, one of the *Baſha's*, who was Governour, burnt up all the Sugar-Canes in the Country. Towards the Sea-Shore, near *Limiſſo*, is one of the faireſt Gardens in *Cyprus*, a magnificent Houſe, a Grove of Orange-Trees, all raiſed by a rich *Venetian*, who had an Eſtate thereabout. Near the Mountains of the *Holy Croſs*, in the Months of *September* and *October*, the Country People take a vaſt Number of Birds as big as Larks, and pickling them up in Barrels with Vinegar and Salt, ſend above a Thouſand Barrels in a Year of them to *Venice*, where they account them ſo great Dainties, that they will have no Feaſts in Carnaval Times without great Diſhes of them. This Trade furniſheth the poor People with a little Money, who elſe would hardly ſee any. In the Kingdom of *Cyprus* are one Arch biſhop, *viz.* that of *Nicoſia*, to whoſe Juriſdiction belong the Cities and Territories of *Famagoſta* and *Nicoſia*. His Palace ſtands about a League from *Nicoſia*, where his Revenues lie; and Three Suffragans, *viz.* The Biſhops of *Paphos*, *Carnezia*, and *Cerines*. The *Greeks* obſerve their ancient Cuſtoms and Ceremonies, and their Maſſes are very long. On Sundays and Holidays they riſe by 1 or 2 a Clock to ſay Mattins, but the young Women dare not go for fear of the *Turks*. There are 7 or 8 Villages of *Maronites*, who came from Mount *Libanus*, who ſpeak *Arabick* at Home, but *Greek* among the Iſlanders. They follow the *Romiſh* Religion, and have Churches of their own. The Air of it is not good, but ſubject to Locuſts, which ſome Years deſtroy all their Fruit and Corn. They hover in the Air, during the Heats, and darken it like a Cloud, but when the North-Wind blows, it carries them into the Sea. The *Venetians* fetch Three ſorts of Painting Earths out of this Iſland, and there is another that affords Allum.

Famagoſta. *The Bey.* *Cerines.* *Cotton.* *The Product.* *Sugar-Canes burnt* *Birds.* *The Eccleſiaſtical Conſtitution.* *Maronites.* *Painting Earths.*

From *Cyprus* he ſet Sail *Octob.* 3. and arriv'd in the Road of *Alexandretta* Octob. 4. in the Evening, from whence he went to *Aleppo*, and ſtaying there till *December* 13. he, with others, travell'd the former Roads to *Mouſſul*, or *Nineveh*, where they arriv'd *Febr.* 2. and as ſoon as they could have the Kilets, or Boats, ready, went upon the *Tigris* in Nine Days to *Bagdat*, or *Babylon*. In this Paſſage the moſt remarkable Things are, the Hot-Baths within a Musket-ſhot of the Banks of that River, which are continually throng'd with ſick People, who come thither for their Recovery, eſpecially Lepers; an huge Dam, where the Boat falls of a ſudden above 120 Foot, and yet is kept above Water by the Bottles, but the Goods are unloaden, and the Water-men are forced to tie themſelves and their Oars to a Perch. The *Arabs* are all along upon the Sherk, and though they bring Milk-Meats and Butter to ſell the Paſſengers, yet, if they find them aſleep, or can overpower them, they rob and kill them. Several Rivers run into the *Tigris* in this Way, as the *Zab* and the *Altum-ſou*, i. e. *The River of Gold*, whoſe Water has an excellent Taſte. It is uſual for the Paſſengers to lie upon the Banks of the River in their Way; but then they muſt make great Fires, and ſhoot off Muskets often in the Night, to ſcare the Lions, if they lodge near the Woods.

1651. *Bagdat.*

Being arriv'd at *Bagdat*, which, though it be not the ancient *Babylon*, nor ſtands in the ſame Place, yet bears the Name, all Merchants pay Cuſtoms for their Goods. This City is ſeated upon the River *Tigris*, [illegible] on the Coaſt of *Perſia*, and parted from *Meſopotamia* by the ſame River. It lies in 33 D. 15 M. of Elevation, and the Chronicles of the *Arabians* ſay, that one of their Califfs, named *Almanſour*, built it in the 145th Year of the *Hegyra* of *Mahomet*, A. C. 762. They call it *Darat-ſani*, i. e. *The Houſe of Peace*. It is about Three Miles in Compaſs. The Walls are of Brick, and terraſs'd in ſome Places with large Towers, like Baſtions. On all theſe Towers are mounted Sixty Pieces of Cannon, but the biggeſt carry not above 5 or 6 Pound Ball. The Moat is wide, and about 5 or 6 Fathom deep. It has but Four Gates. The Caſtle is in the City, near the North Gate, called *Elmaazan*. It has but a ſingle Wall, a narrow Moat, and the Cannon, which are about 150, are without Carriages. The Garriſon conſiſts of 300 *Janizaries*, commanded by an *Aga*, and the City is commanded by a *Baſſa*, who is generally a *Vizier*, who has 6 or 700 Horſe ready for Service. There is alſo an *Aga* that commands 3 or 400 *Spahi's*, and another ſort of Cavalry, called *Giroguelcer*, i. e. *Men of Courage*, which are commanded by Two *Aga's*, and uſually are about 3000 in the City and Towns adjoining. The Keys of the City Gates are put into the Cuſtody of another *Aga*, who has under him 200 *Janizaries*. There are alſo 600 Footmen, who have their *Aga*, and 60 Cannoneers. As to the Civil Government, 'tis managed by a *Cadi* and *Terterdar* only, who receives the Revenues of the Grand Seignior. The City is ill built, and hath nothing of Beauty in it, but the *Bazars*, or Market-places, which are all Arch'd. In it there are Five Moſques, adorned with *Duomo's*, and varniſh'd Tiles of divers Colours. The City is full of Trade, but not ſo full as it was, when the King of *Perſia* had it, becauſe when the *Turk* took it, he kill'd moſt of the richeſt Merchants, yet 'tis mighty full of People, becauſe many viſit it out of Devotion to their Prophet *Haly*, who liv'd here, as they ſay; and there is a continual Paſſage through it to *Mecha* by the Pilgrims. Here are Two ſorts of *Mahometans*: 1. *Refedi's*, or Hereticks. 2. *Obſervers of the Law*. The *Refedi's* will not drink with a *Chriſtian* or *Jew*, and hardly with a *Mahometan* of another Sect. The chiefeſt of the City are of this Sect. As to their Funerals, when the Husband dies, the Wife plucks off all her Head gear, and lets her Hair fall about her Ears, and then beſmears her Face with the Soot of a Kettle, and friſks and leaps about ridiculouſly. All the Kindred, Friends and Neighbours meet at the Houſe of the Deceaſed, to ſtay for the Funeral, and the Women yell like mad People, beating on Drums. When the Corps is carried to the Grave, an abundance of poor People go before, ſinging moſt diſmal Dirges. The Women muſt not be at the Interment, for they are not allow'd to go abroad, but upon *Thurſdays*, when they go to the Sepulchres to pray for the Dead. If they go abroad upon other Occaſions, as to viſit their Kindred, &c. 'tis by their Husbands Leave, and then they are wrapt up ſo, as none can know them. All, but ſuch as are very poor, will go on Horſe-back, or ſtay at Home all their Lives. They are very richly habited, wearing Jewels not only on their Wriſts and Necks, but Ears and Faces. There are

Bagdat. *The Gover-nour.* *Many Sects.* *Refedi's.* *Their Fu-nerals.*

1651. The Christians. The Funerals.

are Three sorts of Christians, *Nestorians*, who have a Church, the *Armenians* and *Jacobites*, who have none, but go to the *Capuchins* to confess. If a Christian dies, all the rest come to his Burial, and returning home, have a Supper prepar'd for them, and next Day they return to the Grave, and pray for the Deceased, and the Third Day is a Dinner for all Comers. They repeat the same Ceremonies on the 7th, 15th, 30th and 40th Days, whereby the Poor are much impoverish'd, insomuch, that they sell their Children to the *Turks* to pay their Debts. There are also several *Jews* in *Bagdat*, but more come to visit *Ezekiel*'s Tomb, which is a Day and a Half's Journey from the City. In the midst of a wide Plain, almost in the midst between *Tigris* and *Euphrates*, appears a vast Heap of Earth and Bricks, about Twenty Fathoms high. It is called *Nemrod*, and the Vulgar believe it to be the Remains of the Tower of *Babel*; but the *Arabians* say more probably, 'twas built by one of their Princes to set a Beacon on, to call his Subjects in, in Time of War.

Jews.

Bal sara.

From *Bagdat*, March 15. we sail'd to *Balsara*, which is Ten Days Voyage. At the Parting of the *Tigris*, which is but a little Way from *Bagdat*, there is the Foundation of a City, which may seem to have been a large League in Compass. There are some of the Walls yet standing, upon which Six Coaches may go abreast. They are made of burnt Brick, Ten Foot square, and Three thick: The Chronicles of the Country say, here stood the ancient *Babylon*.

Old Babylon.

As you go further down the River, in the Arm that runs by the Coast of *Chaldea*, you meet these Towns, *Amurat*, where there is a Fort of Brick, bak'd in the Sun, *Mansoury*, *Magar*, *Gazer* and *Gorno*, where *Euphrates* and *Tigris* meet. Here are Three Castles to be seen, one upon the Point, which is strongest, and is under the Command of the Prince of *Balsara*; the second is on the *Chaldean*, and the third on the *Arabian* side. All the Country between these Two Cities, which is 160 Leagues, being watered by Dikes, is one of the best for Meadows and Pasture in the Possession of the Grand Seignior, feeding a great Number of Mares and Buffalo's, which yield abundance of Milk, of which such Quantities of Butter are made, as to sell it all along the *Persian* Gulf, on both Sides. The People pay a Tribute to the Grand Seignior, for every Buffalo a Piaster and half, for every Mare Two, and for every Sheep Ten Sous, which, if duely paid, would raise a great Sum; but they are cunning to evade it.

Pasture.

Gorno.

At *Gorno* an Account is taken of all Goods, but the Customs are not taken till you come to *Balsara*. This City stands upon the Side of *Arabia Deserta*, Two Leagues from the Ruines of the City, formerly called *Beredon*, which seems to have been a large City; but now the *Arabians* fetch away the Bricks, and sell them at *Balsara*. It is half a League from *Euphrates*, but the Inhabitants have cut a Chanel up to it, which will bear Vessels of 150 Tun. The Sea is above Fifteen Leagues from it, but the Tide comes up the Chanel. The Country is low, and would be often in danger of drowning, were it not for a strong Dam of Free-Stone, which runs along the Sea-Shore, and breaks the most boisterous Waves. It belonged to the *Arabians*, who had no Commerce with any Nations of *Europe*, till the *Turks* took it; for they eat their own Dates and Fish, and wanted no Foreign Goods. The *Turks* held it not long, but being continually molested by the *Arabians*, *Aiud-Bassa* sold it for 40000 Piasters to an *Arabian* Prince, who took upon him the Name of *Efrasias-Bassa*, whose Posterity hold it to this Day. This Prince holds Correspondence with many Nations, so that whencesoever you come, you are welcome here. There is so much Liberty, and so good Order in this City, that you may walk all Night in the Streets without Molestation. The *Hollanders* bring their Spices hither, and the *English* Pepper and some Cloves; the *Indians* Caliculs, Indico's, and all sorts of Merchandises; and the *Arabians* bring Camels, which invites Merchants from all Parts of the World to it. The Customs of *Balsara* are not above 4 *per Cent.* because the Prince or Customers favour the Merchants, who are oblig'd to pay 5 *per Cent.* The Prince of *Balsara* is so good an Husband, that he lays up 3000000 of Livres a Year. His chiefest Revenue is in Four Things: 1. In Money; for he obliges all Merchants to coin their Reals into Larins, by which he gets 8 *per Cent.* 2. In Horses, which are well shap'd, and fit for Travel, and therefore purchased by the Merchants of him at any Rate. 3. In Camels: And 4. In Date-Trees, for which every one pays Three Quarters of a Larin for each Tree, and his Country is cover'd with these Trees for Thirty Leagues together. The Civil Government is ordered by a *Cadi*, who administers Justice, and is establish'd by the Prince. There are Three sorts of Christians, *Jacobites*, *Nestorians*, and Christians of St. *John*, or *Sabeans*. There is also an House of *Italian Carmelites*. The Christians of St. *John*, or *Sabeans*, are very numerous at *Balsara*, and the Villages round about; their Bishops say, they are above 25000 Families. They anciently lived by the River *Jordan*, where *John* baptized, but since *Mahomet* conquer'd *Palestine*, they have been persecuted, and obliged to flie, first into *Mesopotamia* and *Chaldea*, where they were for some time under the Patriarch of *Babylon*, but separating from him, about 160 Years ago, they remov'd into *Persia* and *Arabia*, and settled in and about *Balsara*. They always inhabit near a River, in which they always baptize. Every Year they celebrate a Feast 4 or 5 Days, during which Time they go in Troops to their Bishops to be baptized, according to the Baptism of St. *John*: But this is done only on *Sundays*, yea, though a Child be in danger of Death. They say, that they have receiv'd their Faith, Books and Traditions from *John the Baptist*. When they baptize their Children in their Infancy, they carry them first to Church, where the Bishop prays over them, and then to the River, with a Train of Men and Women, who all go into the Water up to the Knees, and when the Bishop has read certain Prayers, the God-fathers plunge them all over in the Water Thrice, and the Bishop sprinkles them Three Times, *In the Name of the Lord, First and Last of the World, and of Paradise, the High Creator of all Things*; after which, they go all to the Parents House to feast. They have no Knowledge of the Trinity, only they say, that Christ is the Spirit and Word of the Eternal Father. They believe the Angel *Gabriel* to be the Son of God, begotten upon Light, but will not own the Eternal Generation of Christ, as God; yet they confess that he became Man, to free us from the Punishment of Sin, and that he was conceiv'd in the Womb of a Virgin, without the Knowledge of a Man, by means of the Water of a certain Fountain which she drank of. They believe, that he was crucified by the *Jews*, and that he rose the Third Day, and that his Soul ascending up into Heaven, his Body remained on the Earth: But, like the *Mahometans*, they corrupt their Faith, by saying, that Christ vanish'd, when the *Jews* came to take him, and so he deluded their Cruelty with a Shadow. In their *Eucharist* they make use of Meal or Flour, kneaded up with Wine and Oil, and Wine made of Grapes, steeped in Water and prest; for they say, That the Body of Christ being composed of Flesh and Blood, the Flour and Wine do perfectly represent them. They add Oil, to signifie the Benefit we receive by the Sacrament, and to put us in mind of our Love and Charity to God and our Neighbour. The Words of their Consecration are nothing but certain long Prayers, made to praise and thank God, at the same time blessing the Bread and Wine, never mentioning his Body and Blood, which, they say, is not necessary, because God knows their Intentions. After all the Ceremonies are ended, the Priest takes the Bread, and, having eaten some of it, distributes the rest to the People. When any of their Bishops die, they choose his Son, or, if he have none, his next Kinsman, who is most capable, and best instructed in their Religion, to succeed him; and when he is elected, they consecrate him with Prayer and Fasting, as they also do such as are ordained Priests. The Bishops also and Priests fast themselves Six Days. Both Bishops and Priests marry, and have Two Wives, as well as the rest of the People, but their Wives must be Virgins; for all that are admitted to any Ecclesiastical Function, must be of the Race of Bishops or Priests. All their Bishops and Priests wear their Hair long, and a little Needle-work Cross. Their Marriages are celebrated with much Care and Devotion. The Bishop first enquires of the Bride whether she be a Virgin, and if she affirms it, makes her swear to the Truth of it; but, lest there should be any Deception, he sends his Wife, with some other skilful Women, to make an Inspection, and if they find her a Virgin, they make Oath of it; and the Bishop, carrying the Bridegroom and Bride down

to

1651. to the River, re-baptizeth them, reading certain Prayers all the while these Things are doing; and causing them to return to the House where the Bride lives, he sets them together under a Canopy, makes them to put their Shoulders and Heads together Three times, while he reads Prayers; and then he tells them from his Book of Divination, what Day will be most fortunate to consummate the Marriage, and departs. If the Maid be not found a Virgin, the Bishop will not proceed to marry her; but if the Man still resolves to marry the Woman, he must go to a Priest to do it: But there he will meet with some Difficulty to obtain it; for the Priest, knowing it a Sin to marry a Woman that is not a Virgin, will not do it, unless through Constraint, or to avoid further Inconveniencies; for sometimes in Spite they will turn *Mahometans*, unless they be married. They believe the World to be created by the Angel *Gabriel*, assisted with many Thousand Dæmons, and that he taught *Adam* Husbandry, and all other Sciences. In Reference to another World, and the Life to come, they believe there is no other, but that where Angels and Devils, the Souls of good and bad Men reside: That in that World there are Cities, Houses and Churches; and that the evil Spirits have also their Churches, where they pray, singing and rejoycing with Instruments, and feasting, as in this World: That when any lies at the Point of Death, 360 Dæmons come and carry his Soul to a Place full of Serpents, Dogs, Lions, Tigers and Devils, who, if it be a Soul of a wicked Man, tear it in Pieces: but if it be the Soul of a just Man, it creeps under the Bellies of those Creatures, into the Presence of God, who sits in his Seat of Majesty to judge the World: That there are Angels also that weigh the Souls of Men in a Balance, and, being thought worthy, they are admitted into Glory: That the Angels and Devils are Male and Female, and beget Children. As to the Saints, they hold, That Christ left Twelve Apostles to preach to all Nations; That the Virgin *Mary* is not dead, but lives in a Place unknown; That, next to her, St. *John* is the chiefest Saint in Heaven, and next to them *Zacharias* and *Elizabeth*, of whom they recount several Miracles and Apocryphal Tales; That *John* died a natural Death, but desired his Disciples to crucifie him after his Death, that he might be like Christ; That he was buried in a Chrystal Tomb, which stood in an House near *Jordan*: They highly honour the Cross, and sign themselves with it, but are very careful, lest the *Turks* should observe them, and therefore, during their Ceremony of adorning the Cross, they set a Watch at their Church-Doors, for fear the *Turks* should come in, and lay some unjust Fine upon them. Their chief Festivals are Three: The one in Winter, at *New-Year's* Tide, which lasts Three Days, in Memory of our First Parents, and the Creation of the World. The other in the Month of *August*, that also lasts Three Days, which is call'd, *The Feast of St.* John. The Third lasts Five Days, and is in *June*, in Memory of Christ's Baptism by *John*, in which Time they all are re-baptized once a Day. They observe *Sunday*, doing no Work upon that Day. They neither fast, nor do any Penance. They have no Canonical Books, but many that treat of Witchcraft, in which they believe their Priests to be so great Artists, that the Devils are at their Beck. They hold all Women to be unclean, and that it is not available to them to come to Church. The Ceremony of killing the Hen and Sheep are of great Account among them, and must be perform'd by a Priest, born of a Virgin, at the Time of her Marriage. He puts off his Vestments, and cloaths himself with Linen, and plunging the Fowl into Water, to make it clean, kills it, and while it is bleeding, he repeats these Words, with his Eyes lifted up to Heaven, as if he were in an Extasie, *In the Name of God, may this Flesh be profitable to all that eat it*; and thus they think Fowls and Beasts are consecrated for their Eating. They eat of nothing dress'd by the *Turks*, and if a *Turk* ask them for Drink, they'll break the Cup he drinks in, as soon as he has done; and, to make the *Turks* more hateful, they picture *Mahomet* like a great Giant, shut up in Prison in Hell, with Four more of his Parents; and, they say, that all the *Turks* are carried into the same Place, full of wild Beasts, there to be devour'd. They pretend all to Salvation; for they say, that the Angel *Gabriel*, when he had framed the World by God's Command, thus discoursed him, *Lord God, I have built the World, as thou didst command me, but now it grieves me, that there will come into it a prodigious Number of* Jews, Turks, Idolaters, *and other Infidels, Enemies of thy Name, who will be unworthy to eat and enjoy the Fruits of Our Labours.* To whom God reply'd, *Never grieve, my Son, there shall live in the World, which thou hast built, certain Christians of St.* John, *who shall be my Friends, and shall be all saved.* Upon which the Angel, admiring how that could be, said, *What, will there not be several Sinners among those Christians, and by Consequence will they not be your Enemies?* To whom God reply'd, *That at the Day of Judgment the Good shall pray for the Wicked, and by that means they shall be all forgiven, and obtain Salvation.*

Their Belief concerning another Life.

Their Judgment about the Saints.

Their chief Festivals.

Certain Ceremonies used by them.

Their Hatred to the *Turks*.

1651.

Their Assurance of Salvation how Grounded.

From *Balsara* you go by Sea to *Bander-Congo*. The River of *Balsara* is very dangerous, by reason of the Sands, which lie up and down the *Persian* Gulf, and are prejudicial to Sailing. On both Sides the Gulf dwell a sort of poor People, that follow no other Trade but Fishing, and when they bring any Fish to your Vessel, are content with such coarse Rice, as we feed Hens and Pigs withal, for it. There are many Isles in the *Persian* Gulph, but the chiefest of all is the Isle of *Baharen*, where they fish for Pearls. This Fishing is perform'd by Divers, who being carried down to the Bottom of the Sea, in Five Fathom Water, by the Weight of a Stone fix'd to their Toes, they pick up all the *Nacres* they see, as fast as they can, and put them into a Basket they carry down with them on purpose, and then rise up again to take Breath, and refresh themselves, by taking a Pipe of Tobacco. Those who are in the Boat pull up the Basket. The Divers work but from Eight to Eleven, and from One to Three. They fish for Pearls from the End of *June* to the End of *September*. The largest Pearls are to be given to the King of *Persia*, as his Tribute, and each Bark pays the Governour of *Baharen* Fifteen Abassi's yearly.

Bander-Congo.

Pearl-Fishing at *Baharen*.

From *Bander-Congo*, where there is a *Portuguese* Factory, which receives one Half of the Customs, by Agreement with the King of *Persia*; you pass to *Bander-Abassi*, which is on the opposite Shore to the Island of *Ormus*, at Two Leagues Distance. The safest Way to sail in these Seas, is, to take a Pilot at *Bander-Congo*, or *Ormus*, who, by continual Fishing and Sounding, are skilled in those dangerous Roads. In this Passage is an Island, called *Keckmishe*, which is near Three Leagues about, and Six from *Ormus*. It exceeds in Fertility all the Islands of the East, bearing plenty of Wheat and Barley, with which it furnishes *Ormus*, which could hardly subsist without it. In it is a Spring of good Water, which the *Persians* defend with a Fort. Nearer *Ormus* is another Island, called *Lareza*: It is larger than *Ormus*, and the Soil is sandy. It is well inhabited, and has great store of Stags and Hinds. In this Voyage, in the Months of *June* and *July*, there is such a Malignity in certain South-Winds, that then blow, that if a Man breath in them, he cries out, *He burns, and immediately falls down dead*: And this is the Reason, that in these Months few travel this Way.

Bander-Abassi.

Keckmishe, an Isle.

Lareza.

Dangerous South-Winds.

From *Bander-Abassi* the Passage to *Ormus* is short and easie. *Ormus* lies in the 27th D. of Northern Latitude, and from *Balsara* 180 Leagues. This Island is wholly barren, being all Sand and Rock, so that it bears not one Pile of Grass, nor has one Drop of fresh Water, but what falls from the Sky, and is preserved in Cisterns; yet, in the Time of the *Portuguese*, it had a very populous and rich Town, where all the Trade of the *Indies* was managed; but at present there are no Marks of it, and there is nothing inhabited but the Fort. They catch excellent Oisters about this Island; they are as small as *English* Oisters, but so hard, that 'tis not possible to open them with a Knife, nor is it very easie to break them with an Hammer. The Sand of *Ormus* is reputed very excellent for the Dusting of Writings, and for that End a great deal of it is transported into *Christendom*.

Ormus.

Oisters.

CHAP.

CHAP. VI.

Mr. Tavernier's *Fifth Voyage from* Paris *to* Ispahan.

1657. MR. *Tavernier* departed from *Paris* in the Year 1657, and imbarking at *Marseilles*, sail'd to *Leghorn*, and from thence to *Smyrna*, where he was forced to stay some time for the Caravans, in order to his going into *Persia*. The slow Motions of the Caravans, in the mean time, wore out the Patience of the Travellers; and Two *French* Men, named *Noret* and *Hautin*, getting an Acquaintance with a *Spahi*, a Runagado of *Marseilles*, who promised to carry them through *Mesopotamia* to *Ispahan*, so that they should be there before the Caravan set out, they harkened to his Proposals, and set themselves upon the Road with him. Being arriv'd at *Ourfa*, the *Spahi* goes to the *Bassha*, and informs him, that he had conducted thither Two *Franks*, who could be no other but Spies, whereupon the *Bassha* seized upon them and their Goods, and, among the rest, he finger'd 700 Piasters, of which the *Spahi*, no doubt, had his Share. This may be an Instruction to Travellers to have a care how, and with what Company, they travel in *Turky*, and to shew them, that the speediest Way is not the safest.

The Danger of travelling with Strangers in *Turky*.

From *Smyrna* he travelled to *Taurin*, in the Road before describ'd, and from thence to *Tocat*, where, in regard the Heat was so extream, he left the common Road toward the North, and took the Way through the Mountains, where there is always a fresh Breeze, and various shady Lanes. In many of the Mountains he met with Snow, and an abundance of excellent Sorrel, but that which was most extraordinary, was that upon the Tops of some of those Mountains, there were several sorts of Shells, as if it had been on the Sea-Shore. 1657.

Snow in Summer.

Sea-shells on the Mountains.

From *Erzerom* he went to *Kars*, and from *Kars* to *Erivan*, where the Kan being retired into the Mountains, to avoid the Heat, he found him in a fair Vale, where Winter and Summer are lodg'd together, for there was at his Arrival a great Quantity of Snow, but when it began to melt, there appear'd very beautiful Flowers. Being past *Erivan*, you may safely leave the Caravan, because in *Persia* the Roads are very secure.

From *Erivan* we went to *Ispahan*, in which Road there is little worthy of Observation.

CHAP. VII.

Mr. Tavernier's *Sixth and Last Voyage from* Paris *to* Ispahan; *with a Descript. of certain other less remarkable Roads thither.*

1663. MR. *Tavernier* setting out from *Paris* in 1663, rode with Six Servants, of several Professions, to *Marseilles*. In his Way he bought a Steel Mirrour, round and hollow, about Two Foot and a half Diameter, which would immediately melt an Half-Crown, by the Heat of the Sun-Beams, and if you set a Candle by it in the Night, you might read 200 Paces from it by the Light of its Reflection.

An excellent Mirrour.

1664. From *Marseilles* he sailed, *Jan.* 10. 1664, to *Agaie*, a Port of *Italy*, Two Leagues from *Frejus*. Here is a Garden, the Alleys of which are curiously distinguish'd with Rows of Citron and Orange-Trees, which look as green in the Depth of Winter, as in the midst of Summer, and has many other Rarities.

A fine Garden.

From hence he went by *Villa Franca* to *Monaco*, one of the most considerable Forts in *Italy*, where by the Princess he was shew'd many Rarities of Painting, Clock-work, and Gold-Smiths Work, and, above all, Two Pieces of Chrystal, about the Bigness of Two Fists each, in one of which was above a Glass-full of Water, and in the other a good Quantity of Moss, which were inclos'd in them at their first Congelation.

Two rare Chrystals.

From *Monaco* he sailed to *Savona*, and from thence on Horse-back to *Genoa*, which is but Nine Miles, and a most pleasant Journey, having on the one side most magnificent Buildings and pleasant Gardens all the Way, and on the other a calm Shore.

From *Genoa* he went to *Leghorn*, and waiting on the Grand Duke, saw a Mute with him, who understood him as perfectly by Signs, as if he had his Speech and Hearing.

A strange Mute.

From *Leghorn*, *March* 26. 1664, he departed in a *Dutch* Vessel, called *The Justice*, and passing, *April* 5. by Cape *Passaro* in *Sicily*, saw Mount *Gibello* covered with Snow, as also he did, on the Ninth, the Mountains on the Coasts of *Greece*, as he passed by the Mouth of the *Venetian* Gulph.

On the 19th he sail'd by the Cape *Matapan*, and on the 24th a North-West Wind blew his Ship into the Port of *Smyrna*. At *Smyrna* he tarried Fourteen Days, and in that Time there happened such terrible Earthquakes, as had almost shak'd him out of his Bed.

Great Earthquakes.

From *Smyrna* he went, with a large Caravan of 600 Camels, and near as many Horses, to *Erivan*, and so to *Taurin* in the ordinary Road. At *Erivan* one of his Servants, a Watch-maker, died, and was buried in the Church-yard of the *Armenians*, who, not knowing he was a Protestant, allow'd it, which otherwise they would not have done. His Chamber was sealed up by the Civil Judge as soon as he heard of his Death, that his Goods might be preserv'd for his Kindred, if they came to demand them, which exact Justice is very observable. 1664.

From *Taurin* he went on a Visit over the *Aras*, and then through a Country all planted with white Mulberry-Trees, where the Inhabitants are all Silk-Weavers, to *Shamaqui*, which hath nothing remarkable, but the Kan's Castle, lately built; and that soon after, with the whole Town, was demolish'd by a terrible Earthquake: But the direct Road from *Taurin*, is to *Cashan*, and so to *Ispahan*, in which, tho' it be several Days Journey, yet there is nothing remarkable.

Shamaqui.

Besides the former Roads, which Mr. *Tavernier* travelled himself into *Persia*, he gives us an Account of Two other Roads to *Taurin*, which he pass'd in his Travels homeward; the one through the North part of *Turky*, by *Diarbequir* and *Van*; and the other through the South-parts, by *Anna*, and the small Desart leading to *Bagdat*. In describing the first, he begins at *Bir*, where it joyns with one of the former Roads, and says, from thence you go by the River *Euphrates* to *Cacheme*, and from thence to *Milesara*, where you pay the Customs of *Ourfa*, when you do not go through the City, *viz.* Four Piasters for every Horse-Load.

A Road through the North parts of *Turky*.

From this Place you go to the River *Arzlan-chaye*, or, *The Lyon-River*, from its fierce Stream. It runs into *Euphrates*, and by it you pass in a Road cut thro' a Rock through *Bogazi*, *Deguir-man Bogazi*, and *Mirzatapa*, to *Diarbequir*, which the *Turks* call *Car-ema*. This City stands on the Right-side of the River *Tigris*, and is encompassed with a double Wall, the outmost of which is strengthen'd with 62 Towers, which, the Inhabitants say, were built in Honour of the 62 Disciples of Jesus Christ. This City is very well peopled, and 'tis thought there are about 20000 Christians in it, of which Two Thirds are *Armenians*, and the rest *Nestorians*, with some few *Jacobites* and *Capuchins*, who having no House of their own, lodge

Diarbequir describ'd.

1664. lodge in an Inn. The City has Three Gates, 2 or 3 fair Piazza's, a magnificent Mosque, which was once a Christian Church, and very decent Charnel Houses, where the *Mollah*'s, *Dervices*, *Booksellers*, and all that are concern'd about the Law do live.

Red Marroquins. The making of red Marroquins employs a Fourth part of the Inhabitants. The Soil is very good, and yields according to Expectation. Here is excellent Bread, good Wine, and as good Provision to be had as in any Part of *Persia*. The *Bassha*, who is one of the *Viziers* of the Empire, has a strong Cavalry of 20000 Horse to defend the Country from the Incursions of the *Curds* and *Arabs*, who much infest it, and are all Horse-men.

At *Diarbequir* you must ford the *Tigris*, and so pass to *Shaye-batman*, where you pay a Piaster for every Horse-Load; and from thence to *Chikaran*, *Azou*, where the Toll-Gatherers take Four Piasters for every Horse-Load, *Ziarat*, where also a Duty of Two Piasters is paid for every Horse-Load, and *Zerche* to *Cechakan*, where the Way lies over the Mountains, which are full of Torrents, to *Betlis*, where you pay

Betlis described. Five Piasters for every Horse-Load. This City stands between Two high Mountains, equally distant the one from the other, and is built like a Sugar-Loaf, and the Ascent to it is so steep on every side, that there is no getting up to it, but by turning and winding about the Mountain. On the Top of all is a Castle well built, and a Draw-Bridge before the

The *Bey*. Gate. It is govern'd by a Prince called a *Bey*, who is not Tributary, as others are, either to the Grand Seignior, or *Persian*, but it is the Interest of those Two great Potentates to hold a fair Correspondence with him, because he can easily stop up the Passage from *Tauris* to *Aleppo*, the Streights of the Mountains being so narrow, that Ten Men may defend them against a Thousand, and is able to bring above 25000 Horse into the Field, and has besides a considerable Body of Foot, composed of the Shepherds of the Country, who are to be ready at his Call.

Taduan. From this City you go to *Taduan*, where is a good Port, shelter'd by Nature from all Winds, and able to contain 20 or 30 large Barks.

Van. From hence the Merchants usually convey their Goods by Water to *Van*, which is but 24 Hours Sail, when the Winds serve, whereas by Land 'tis Eight Days Journey through these Towns, *Karmousse*, *Kellat*, *Algiaoux*, where a Piaster is required for every Load; *Spanktrere*, *Souer*, *Argiche*, *Quiarakierpou*, *Perkeri*, *Zuarzazin*, *Sousarat* and *Devan*, where you must pay Two Piasters, unless you will pay it at *Van*, with a greater Duty of Two Tomans, and Four Abassi's, which is here also required for every Horse-Load.

Van described. *Van* is a great City that stands upon the side of a wide Lake of the same Name, to which belongs a strong Fortress, seated on the top of an high Mountain adjoining. There is but one sort of Fish in the Lake, a little bigger than a Pilchard, which being brought into it by a great River *Bendmahi*, which descends from the Mountains of *Armenia*, when the Snows melt, in vast Numbers; The People catch them at their Return in wide mouth'd Baskets, and transporting them pickled into *Persia* and *Armenia*, where at their Feasts they are used for a relishing Bit, raise thereby a great Revenue. The People of *Van*

The Fishery of *Van*. tell this strange Story of their Fishery, that it being common to all, the *Bassha* farm'd it for his own private Profit to a Merchant, and the River that Year brought Serpents for Fish, and so the Fishing has always continu'd common. In this Lake are Two principal Islands, on which are Three Convents of *Armenian* Monks, who live very austerely.

Darcheck. From *Van* you travel to *Darcheck*, and from thence

Nuchar. to *Nuchar*, which stands in the Territories of the *Bey* of *Curdistan*. These *Beys*, who are a kind of Lords upon the Frontiers of *Turky* and *Persia*, being secured by the Mountains, value neither of the Emperors. The *Curds* in general are a brutish sort of

The *Curds*. People, and though they call themselves *Mahometans*, they have very few *Mollah*'s to instruct and teach them. They have a particular Veneration for a black Grey-hound, so that if any one be seen to kill one of them, he will be immediately knock'd on the Head: Nor will they suffer any Person to cut an Onion, but he that useth it, must squeeze it between

Onions. Two Stones. At *Nuchar* there is a Toll to be paid of Sixteen Abassi's for every Horse-Load, besides a Present from the Captain of the *Caravan* of Seven or Eight Tomans to the *Bey*, otherwise he will be sure to way-lay it in some fit Place, and plunder it. 1664.

Cuticlar. From hence to *Cuticlar* is a long Journey through the Mountains, through bad Ways, and over divers Torrents; from whence through *Kalvat*, *Kogia* and *Darkavin*, the Road lies to *Soliman-Sera*, and so to *Kours*, where there resides a *Bey*, who is tributary to the King of *Persia*. To him the Caravan pays Nine Abassi's for every Horse-Load, besides a Present of Marmelade, Treacle or Sugar-Loaves, for he will not take Money. The Wine here is sweet and tart.

Devogli. The next Place in the Road is *Devogli*, between which and *Checheme* lies a Plain, and in it a Rock, in which are several Dens, once certainly the Habitations of such as fed Cattel in those Plains. Under the Rock, which is hollow, appears a Fountain of clear cold Water, wherein there are great store of Fish.

Davasshiler. From hence you travel to *Davasshiler*, and then to *Marand*, where you must pay Sixteen Abassi's for a Camel's Load, and Eight for an Horse's, and so thro' *Sefian* to *Tauris*, in which Places Bread is sometimes so scarce, that it can't be obtain'd for Money. There is another Road from *Aleppo* to *Tauris*, which leaves the common Road at *Biror-Beri*, and so leads you through *Ourfa* and *Diarbequir* to *Gezire*, a little City *Gezire*. in *Mesopotamia*, built upon an Island in the River *Tigris*, where that River is to be cross'd upon a Bridge of Boats. In this City the Merchants meet to buy Galls, Nuts and Tabaco, which grow all along this Country; the Oaks that bear Galls and Acrons on *Galls*. the Hills, and the Tabaco on the Plains, as far *Tabaco*. as *Tauris*.

Amadie. From hence you go to *Amadie*, which is a good Market for Tabaco and Gall-nuts, which the *Assyrians* bring from all Parts. It is seated upon an high Mountain, but has no Water in it, but what is fetch'd from 3 or 4 large Springs in the middle of it. It is of an indifferent Bigness, and has a Piazza in the middle of it full of Merchants Shops. It is under the Command of a *Bey*, who can raise 8 or 10000 Horse, and more Foot than any of his Neighbours, because his Country is more populous.

From this Place, through *Giousmark* and *Alback*, you pass to *Salmastre*, another pleasant City upon the *Salmastre*. Frontiers of the *Assyriani* and *Medes*, and the first in the Dominions of the *Persians*. The Kan is so glad when the Caravan comes that Way, that he presents the Captain with the Garment of Honour, or Calaat, Bonnet and Girdle, which is the greatest Favour that can be done to Strangers.

From hence you arrive at *Tauris* in Four Days, and so the whole Journey thither from *Aleppo* is 32 Days. The other Road through the South Parts of *Turky* lies through *Kengavar*, *Bagdat* and *Anna*, where *Kengavar*. you enter into the *Little Desart*, which is so called with relation to the great Desart of *Arabia Felix*, which is much larger. Mr. *Tavernier* travelled this Road from *Ispahan*, and so gives us the Way from thence to *Aleppo*, *viz.* First to *Consar*, then to *Comba*, *Oranguie*, *Nahouand* and *Kengavar* in Order, which will take up 14 or 15 Days with the Caravan, though not above 5 or 6 on Horse-back. The Country through which you travel all this Stage is very fertile in Corn and Rice, and produces excellent Fruits *Corn, Rice*. and good Wine, especially above *Kengavar*, which is a large Town, and well peopled.

From hence you pass on to *Sahana* and *Polisha*, between which Places you leave a very high Mountain, as steep and streight up as a Wall, and as high as you can see, you may observe the Figures of Men, *Images graven on a Mountain*. clad like Priests, with Surplices, and Censors in their Hands, graven on it; but none of the Natives can tell you what is the Meaning of these Draughts. At the Foot of it is a River, and a Stone-Bridge over it, called the *Royal Bridge*.

From hence you go to *Maidachc*, a little City, but a most pleasant Mansion for its Situation, the Streams that water it, good Fruits that grow there, and excellent Wine which it affords. The *Persians* believ'd, that *Alexander*, when he return'd from *Babylon*, died here, though others have written, that he died at *Babylon*. You pass after this *Erounabad*, *Conaguy*, *Casliciren-Tengui-Conaguy*, *Cafared*, *Charaban* and *Bourous*, to *Bagdat*, which is all the Way a Country full of Dates, where the People live in little Huts, made of the Branches of Palm-Trees.

From *Bagdat* to *Anna* you ride Four Days through *Bagdat*. a desart Country, though it lies between Two Rivers.

Anna

1664. *Anna* is a City of an indifferent Bigness, that belongs to an *Arabian* Emir. It is about half a Lg. round, and the Lands adjoining are well manured, being full of Gardens and Country-houses. The Situation of it is much like *Paris*, being built on both sides the River *Euphrates*, in the midst of which is an Island where stands a fair Mosque.

Anna describ'd.

From hence you go to *Mached-raba*, over the Desart, which you must travel with a Guide, who must take special Care so to order his Stages, as to come every Morning to the Wells by break of Day, for fear of meeting the *Arabs*, that come to fetch Water about Sun-rising, for they are apt to be injurious to Travellers. You come to *Mached-raba* in 5 Days, which is a kind of a Fortress upon the Point of an Hill, at whose Bottom rises a Fountain like a large Vase. It is encompassed with high Walls, defended by certain Towers, in which are little Huts, where the Inhabitants keep their Cattel, of which they have great store, but more Horses than Cows. 1664. Horses and Mares.

Mached-raba.

The next Town is *Taiba*, a fortified Place in a level Country, and looks like an high Bank of Earth, and Brick baked in the Sun. Near the Gate rises a Spring, which supplies a large Pond, and upon the Account of this Plenty of Water, it is, that this Road is so much frequented. *Aleppo* is but 3 Days Journey from this Place, but it is the most dangerous Part of all the Road for Robbers, because it is inhabited by *Bedouins*, or *Arabian* Shepherds, who make it their Business only to plunder and steal. This Journey may be ridden in 30 Days. *Taiba.* *Bedouins.*

CHAP. VIII.

Of several other Roads into Persia, *and the* Indies, *necessary to be known by Merchants and Traders.*

THERE are still remaining Two other Roads from *Constantinople* to *Ispahan*, which tho' not so commonly used, yet, perhaps, might prove more convenient for Travellers, with a little Hazard, than any of the others, and they are by the *Euxine*, or Black-Sea. The 1st is by Land, and that may be either on the sides of *Europe* or *Asia*; but because these are much the furthest, and none can be supposed to travel these Roads, but upon some other particular Considerations, especially upon the *European* Coast, it will be sufficient briefly to name the Places with their Distances, and so pass to the Way by Sea, which is much the shortest Cut into *Persia*, for the whole Voyage may be made in 3 Weeks, all by Sea, till within 60 Leagues.

The Roads by the Black-Sea.

Road by Land.

The principal Cities upon the Black-Sea, in the Road to *Persia*, on the *European* Coasts, and their Distances, are these: From *Constantinople* you go to *Varna*, which is 50 *German* Lgs. or 200 Miles; then to *Balshike*, 36 Miles; thence to *Bangali*, 70 Miles; from whence to *Constance*, 60 Miles; and thence to *Queli*, 25 Miles. Near this City the great Arm of the *Danow* throws it self into the Black-Sea; and here is the grand Fishery for Sturgeon.

Fishery for Sturgeon.

From *Queli* to *Aquerman* is 50 Miles. This City belongs to the *Kan* of the Lesser *Tartary*, and from it to *Kefet*, or *Kaffa*, is 350 Miles. Here are many *Christians*, both *Armenians* and *Greeks*, who all above 15 Years of Age pay a Tribute of a Piaster and half to the G. Seignior, as Lord of the City, though the *Kan* of the Lesser *Tartary*'s Jurisdiction reaches to the very Walls of *Kaffa*. *Kaffa.*

Azac.

From hence you go to *Azac*, which is 70 Miles. This is the last City in *Europe* belonging to the G. Seignior, and by it runs a great River of the same Name, the other side being in the Territories of the Great Duke of *Muscovy*. Down this River come the *Cossacks*, which do the *Turks* so much Mischief; for they come sometimes in 3 or 4 score Barks, which carry some 150, and others 100 Men, and ravage the Coasts about *Constantinople*, and all along *Asia*, as far as *Trebisond*. This Coast is 861 Miles in Length, and meets with the other Road by Land at *Teflis*, the capital City of *Georgia*; for the Road from *Constantinople* on the *Asiatick* Coast lies thus, *viz.* To *Neapoli* 250 Miles. Here lie the most of the G. Seignior's Vessels and Gallies. From hence you go to *Sinabe*, which is 250 Miles, then to *Ouma* 240 Miles, *Krason* 150, *Trebisond* 80, *Rice* 100, and *Guni* 100, from whence the Road lies to *Teflis*, and so to *Erivan*, which is 47 Miles from it, and is the ordinary Road to *Ispahan*. *Cossacks.* *Teflis.*

The Passage from *Constantinople* to *Ispahan* by the Black-Sea is so very dangerous, that 'tis altogether unknown almost, and scarce any dare undertake it, tho' known to be much the shortest Way. The Dangers consist in the Nature of the Sea it self, which is very tempestuous, and has very few, or no Ports to defend the Vessels, and from the Inhabitants of the Coasts, which are naturally barbarous and wicked, without any Religion, and under no Government: Upon which Accounts, it being neither safe by Sea nor Land to travel that Way, few, or none did ever attempt it. But many unfortunate Accidents meeting in the Person of Sir *John Chardin*, who was travelling into *Persia*, he was forced to take this Way, and from him we have a full Relation of the Ports and Roads, that are to be pass'd, with the Countries adjoining, from *Constantinople* to *Ispahan*, which must needs be acceptable to the Curious, because so few have written any thing of these Places. The Way by Sea, and the Dangers of it.

Sir John Chardin's *Travels into* Persia.

1671. SIR *John Chardin*, a *French* Man, left *Paris* Aug. 17. 1671, with an Intention to go to the *East Indies*, and travelling by way of *Milan*, *Venice* and *Florence*, arriv'd at *Legborn* in the End of *October*, and embarking in a Ship, under a *Holland* Convoy, arrived at *Smyrna* March 2. 1672, and 12 Days after at *Constantinople*. He tarried in this City 4 Months, and in the mean time there happening a Quarrel between the G. Visier and *French* Ambassador, which caused a Report, that the G. Visier intended to arrest the Ambassador, and all the *French* Nation, he was afraid, that his Goods, which were very rich, and a considerable Quantity, would be seiz'd, and so sought all Means to get out of *Constantinople*, and proceed on his Journey to *Persia*.

The Occasion of his Travels by the Black-Sea.

1672.

The Caravans in those hot Months did not travel, but the Port being about to send a new Commander, with some Soldiers and Money, as they do yearly, to the Fort of *Azac*, which stands upon the Lake *Maeotis*, he obtain'd Passage in a *Turkish Saick* belonging to that Fleet, and embark'd, *July* 27. at a Port in the *Thracian Bosphorus*. This Chanel, which is about 15 Miles in Length, and about 2 in Breadth, in most Parts, but in others less, so called, because an Ox may swim over it, is certainly one of the loveliest Parts of the World; for the Shores are rising, and covered over with Houses of Pleasure, Woods, Gardens, Parks, delightful Prospects and Wilderness, watered with Thousands of Springs and Fountains; the Passage through it in fair Weather is exceeding diverting, by reason of the great Number of Barks which are continually sailing to and fro, and the Prospect of *Constantinople* from the top of it, which is about 2 Miles distant, is the most Charming that ever Eyes beheld. There are 4 Castles 1672. The *Thracian Bosphorus.* Why so called, and the Pleasantness of it.

1672. Castles standing by it, all well fortified with great Guns, 2 of them 8 Miles from the Black-Sea, and 2 at the Mouth of the Channel, which is the most dangerous Place for Shipwrecks in all the *Euxine* Sea.

Caffa in the *Taurica Chersonesus* described. On the 3d of *Aug.* in the Morning, he arrived at *Caffa*, a Port in the *Tauric Chersonese*, or *Peninsula*, so called, because it was first inhabited by the *Scythians* of Mount *Taurus*. It is 250 Lgs. in Circuit, *i. e.* 35 from N. to S. and 55 from E. to W. which is the Breadth. The *Isthmus*, that joins it to the Continent, is not above a Lg. in breadth. It is inhabited by *Tartars*, which dwell in Cities and Towns, whereas their Neighbours the *Nogays* and *Hordes* dwell in Tents, as the rest do on the Continent. *Caffa* is a great Town built at the Bottom of a little Hill, upon the Sea-shore, and encompassed with strong Walls, that advance a little into the Sea. It hath 2 Castles, the One, which stands on a rising Ground on the South-side, is large, and commands all the Parts thereabouts, and is the Residence of a Basha; the other is not so big, but is well stored with Guns. They reckon about 4000 Houses in it, of which 3200 are *Mahometans*, *Turks* and *Tartars*, and the rest *Christians*, *Greeks* and *Armenians*: The Houses are small and built of Earth, as are also their Bazars, Mosques and Baths. The Soil about it is dry and sandy, bearing little Fruit, and the Water is bad, but the Air is very pure and wholesome. All Provisions are very cheap and good, Mutton being not above a Farthing a Pound, and other Things proportionable. The Road of *Caffa* is shelter'd from the Winds, except on the N. and S. E. sides, and the Ships lie close to the Shore safely in 10 or 12 Fathom Water.

Nogays and *Hordes*.

The People.

The Trade. There is a great Trade driven here in Salt-fish and Caveare, which being taken out of the Lake *Maotis*, which is 26 Miles distant from it, in great Quantities, are transported into *Europe*, and as far as the *Indies*. They also export Corn, Butter and Salt, with which they furnish *Constantinople*, and several other Places, for the *Caffa* Butter is the best in all *Turky*.

Donslow or *Salusi*. From *Caffa* he went in a Ship bound for *Colchis*, Aug. 30. and the next Day arrived at *Donslow*, or the Salt-pits, 50 Miles from *Caffa*, on the Shore. Here are great Marshes of Salt, which is made by letting in the Sea-water, and suffering it to congeal by the Sun. The People say, That 200 Vessels are laden here with Salt Yearly, paying only 3 *s.* a Day to those that load it. About a Mile from the Shore is an Habitation of the *Tartars*, where there is not above 10 or 12 Houses with a little Mosque, and round about it a great Number of Tents, with several Wagons close covered, which serve them instead of Houses. The Tents for themselves are very handsome, being made with Poles, and covered with large light Furs, well-stretched upon them; their inside is hanged with Tapestry, and the Floor is laid with the same. Every Family hath 2 other Tents belonging to them, covered with a great Sarplar of Wool, one for their Servants, and Kitchin, in which is a Pit 5 Foot deep, to make a Fire in to dress their Meat, and the other for their Horses and Cattle. They store up their Corn and Forage in Magazines under Ground, which they cover so exactly, that none can find them but themselves. They can remove their Tents with a small Trouble, and in a very little Time, and carry them away in Carts, drawn by Oxen and Horses, of which they breed a great Number. They profess the *Mahometan* Religion, but mix with it strange, superstitious and ridiculous Opinions of Fortune-telling and Divination. From *Donslow* he sailed all along in the Channel to *Cape Cuodos*, which *Ptolemy* calls *Circondama*, where the Coasts that bound the Lake *Maotis*, which are very high Lands, are seen at about 30 Miles distance.

Tartars Towns, and Way of Living.

Their Religion.

Cape *Cuodos*.

From the Channel of the Lake *Maotis*, to *Mingrelia*, is reckon'd 600 Miles along the Coasts, which consists of pleasant Woods, inhabited by a sort of *Tartars*, called *Circassians*, and by the *Turks*, *Cherks*, but so thinly, that the Country looks like a Desart. The Ancients called them *Zygeans*, or Mountaineers, and *Pomponius Mela*, *Sargacians*. They are neither Subjects nor Tributary to the Port, because their Country producing nothing valuable, the *Turks* think it not worth the Toil of conquering it. The Vessels that come from *Constantinople* to *Mingrelia* trade with this People, but with their Arms in their Hands, and by Hostages, for they are Infidelity and Perfidiousness it self, and will never fail to steal where they find an Opportunity. The Trade with them is managed by exchange, the *Cherks* bringing down Slaves of all Sexes and Ages, Honey, Wax, Leather, Jackals, Zandava,

The *Circassians*.

The Way of trading with them.

and other Beasts Skins, for such Commodities as they want. 1672.

Circassia described. *Circassia* is a pleasant Country, and the Soil is very fruitful, bringing forth great Plenty of all sorts of Fruit without Trouble, as Cherries, Apples, Pears, Wall-nuts; but their chiefest Wealth consists in Cattel, as well-shaped Horses, which are so swift and good, that they will tire the wild Beasts, and catch them in plain Course; Goats, Deer and Sheep, whose Wool is as fine as that of *Spain*, which the *Muscovites* fetch to make Felts. They sow no Grain but Millet for their own Bread, and Barley for their Horses; and their Women till and manure their Ground. Their Drink is Water and Boza, which is a Liquor made of Millet, as intoxicating as Wine: They live in Wooden Huts, and go almost naked. Every one is a sworn Enemy to those that live in the Provinces round about him. Their Beds are made of Sheep-Skins sowed together, and stuffed with Millet-Leaves, beaten in the Threshing as small as Oat-Chaff. They were formerly Christians, but now have no Religion; no not so much as the Light of Nature among them, save what they place in the Observing certain superstitious Ceremonies, borrow'd from the *Christians* and *Mahometans*.

Millet, Barley.

Their Religion.

The *Abca's* border upon the *Cherks*, possessing about an 100 Miles upon the Sea-Coasts, between *Mingrelia* and *Circassia*. They are not so savage as the *Cherks*, but are as much inclined to Thieving and Robbery; but the Merchants trade with them with the like Caution, and after the same Manner.

The *Abca's*.

Isgaour, a Port. *Sept.* 10. he arrived at *Isgaour*, a Port in *Mingrelia*, where all the Vessels that trade thither lie. It is a desart Place, without any Habitations, only the Traders that come thither build themselves Huts and Booths of Boughs for the Time of their abode, which is usually as long as they find themselves safe from the *Abca's*.

Colchis, or *Mingrelia* described. *Colchis* or *Mingrelia* is situated at the End of the Black-Sea: It is bounded on the E. by the little Kingdom of *Imeretta*, on the S. by the Black-Sea, on the W. by the *Abca's*, and on the N. by Mount *Caucasus*. The *Carax* and *Phasis*, 2 famous Rivers in the ancient Histories, now called *Coddours* and *Rione*, part it, the first from the *Abca's*, and the other from *Imeretta*. The Length of it is about 110 Miles, and the Breadth 60. It was once fortified against the *Abca's*, by a Wall of 60 Miles in length, which is long since demolished, and become a thick Forest.

Black Circassians.

The Inhabitants of *Caucasus*, that border upon *Colchis*, are the *Alanes*, *Suanes*, *Gigues*, *Caracioles*, or *Cara-Cherks*, i. e. Black *Circassians*, so called by the *Turks*, not from their Complexion, for they are the fairest People in the World, but from their Country, because it is always darken'd with Fogs and Clouds. They were also anciently Christians, but now profess no Religion, but live by Robbery and Rapine, having nothing that can entitle them to Humanity but Speech. They are very tall and portly, and their very Looks and Speech shew their Savage Dispositions, being the most resolute Assassins, and daring Robbers in the World.

The ancient *Colchis*.

The ancient Kingdom of *Colchis* was much larger than *Mingrelia* now is, extending it self to the Lake *Maotis*, on the one side, and *Iberia* on the other. The Country it self is uneven, full of Hills and Mountains, Valleys and Plains. It is almost covered with Woods, except the manured Lands, which are but few, and those preserved by grubbing up the Roots, that are continually spreading into them. The Air is temperate, as to Heat and Cold, but very unwholsome, by reason of the continual Wet, which being heat with the Sun, breeds Pestilences, and several other Distempers. It abounds with Waters, which descend from Mount *Caucasus*, and fall into the Black-Sea. The principal Rivers are the *Coddours*, of old called *Carax*; the *Soom* called by *Arrian Tersson*, and by *Ptolemy*, *Thassaris*; the *Langur*, of old *Astelphus*; the *Cobi* called by *Arrian*, *Cobo*; the *Cianisgari*, called anciently, *Cianeus*; the *Tacheur* called by *Arrian*, *Sigenus*, and the *Sthenisscari*, i. e. River-horse, called therefore by the *Greeks*, *Hippus*: and the *Abascia*, called by *Arrian*, *Cavius*, and *Ptolemy*, *Canitus*, which two last mix with the *Phasis* about 20 Miles from the Sea. The Soil is very bad, and produceth little Corn, or Pulse, and the Fruits are almost wild, without taste, and unwholsome, unless it be their Vines, which thrive well there, and produce most excellent Wine. The Earth is so moist in Seed-time, that when they sow their Wheat and Barley, they never plow it at all, but sprinkle it upon the

The Rivers no. Note.

The Soil.

1672. the Earth; for they say, that should they plough it, the Land would be so soft, that all their Corn would fall. They plough their Lands for their other Corn with Plough shares of Wood, which make as good Furrows as Iron, because their Land is very moist and tender. Their most common Grain is *Gomm*, which is as small as Coriander Seed, and resembles Millet. Of this they make a Paste, which they use for Bread, and prefer it before Wheat; which is not to be wonder'd at, for it is very acceptable to the Palate, and agreeable to the Health, being cooling and laxative. They have also great Plenty of Millet, some Rice, with Wheat and Barley, but very scarce. The People of Quality eat Wheaten Bread as a Rarity, but the meaner sort never taste of it. The ordinary Food of the Country is Beef and Pig, of which last they have great Plenty, and the best in the World. They have also Goats Flesh, but 'tis lean, and not well tasted. Their wild Fowl is very good, but scarce. Their Venison is the wild Boar, Hart, Stag, Fallow-Deer and Hare, all which are excellent Food. They have Partridges, Pheasants and Quails in abundance, with some River-Fowl and wild Pidgeons, which are good Meat, and as big as a cram'd Chicken. Their Nobility spend their whole Time in the Field, using Lanner-Hawks, Gos-Hawks, Hobbies, and others for their Sports, to catch Water-Fowl and Pheasants; but their most delightful Pastime is the Flight of the Falcon at the Heron, which they catch only for the Tuft upon his Crown, to put upon their Bonnets; for they let him go again, when they have cut it off, that it may grow up anew.

Mount *Caucasus* produceth great Numbers of wild Beasts, as Tigers, Leopards, Lions, Wolves and Jacals, which 2 last make great Havock among their Cattel and Horses, and often disturb their Houses with their dreadful Howlings. They have great Numbers of Horses, and those very good ones, which every Man almost keeps in great store, because their Keeping stands them in little or nothing, for they neither shooe them, nor feed them with Corn. They have no Cities nor Towns, except 2 by the Sea-side; but their Houses are scatter'd so thick up and down the Country, that you can hardly travel a Mile, but you meet with 3 or 4. There are 9 or 10 Castles in the Country, of which the chiefest is called *Rus*, and it is the Court of the Prince. Their Houses are all built with Timber, which is plentiful, and the poorer sort never raise above one Story, nor the Rich above 2. The lower Rooms are always furnish'd with Beds and Couches to lie down on and sit upon, because of the Moisture of the Earth, but are inconvenient, because they have no Windows nor Chimneys. They have but one Room for their whole Family, and so lie all together. The Men are well shap'd, and Women handsome, commanding Love by their charming Features and Graces. They all paint their Eye-brows, and if not handsome, all their Faces abominably. They dress themselves with all the Curiosity they can, their Habit being like the *Persians*, and their Head Attire like the *European* Women, even to the Curling of their Hair. They are witty and civil, but otherwise haughty, deceitful, cruel and impudent. The Men have also as many mischievous Qualities, and there is no Wickedness to which they are not addicted; but that which they most practise and delight in is Theft. This they make their Employment, Pastime and Glory. They justifie it lawful to have many Wives, because, they say, they bring us many Children, which we can sell for ready Money, or exchange for necessary Conveniences; yet, when they have not wherewithal to maintain them, they hold it a piece of Charity to murther Infants newly born, as also they do such as are sick, and past Recovery, because, they say, they free them from a deal of Misery.

The Gentleman's Power. The Gentlemen of this Country have full Power over the Lives and Estates of their Tenants, to sell and dispose of their Wives and Children as they think fit, and every Country-man is bound to furnish his Lord with as much Corn, Wine, Cattel, and other Provisions as he can. The Lords decide the Quarrels of their Vassals; but if they themselves are at Variance, they decide it by Arms, which makes them go all armed with a Lance, Bow and Sword. Their Habit is peculiar; they wear very little Beard, and cover their Heads with a thin Felt Cap in Summer, and a furr'd Bonnet in Winter: Over their Bodies they wear little Shirts, which fall to their Knees, and tuck into a strait Pair of Breeches; but they never have above one Shirt, and one Pair of Breeches, which last them a Year, and in all that Time never wash them above thrice, only once or twice a Week they shake it over a Fire for the Vermin to drop off, with which they are much haunted. The whole Family, without Distinction, eat all together, both Males and Females: The King with all his Train, to his very Grooms, and the Queen with her Maids and Servants. They dine in the open Courts in fair Weather, and if it be cold, they make a rousing Fire, for Wood costs them nothing. Upon Working-Days the Servants have nothing but Gomm, and the Master's Pulse, dried Fish or Flesh; but on Holidays, when they make Entertainment, they kill an Hog, Ox, or Cow, if they have no Venison. They are very great Drinkers, both Men and Women, and at their Feasts provoke their Friends, as much as they can, to Drinking. They drink their Wine pure, and beginning with Pints, proceed to much greater Quantities. Their Discourse at their merry Meetings, is with the Men about their Wars and Robberies, and among their Women obscene Tales of their Loves.

Mingrelia is but thinly peopled, by reason of their Wars, and the vast Numbers sold to the *Persians* and *Turks* by the Nobility. All Trade in it is driven by way of Barter, for they have no set Price of Money among them; the current Money are Piasters, *Dutch* Crowns, and Abassi's, which are made in *Georgia*, and stamp'd with the *Persian* Stamp. The Revenues of the Prince of *Mingrelia* amount at most to no more than 20000 Crowns, which arises from the Customs of Goods exported out of, and imported into his Country, the Slaves he sells, Impositions and Fines, and this he lays up all, for his Slaves serve him for nothing, and his Crown-Lands furnish his Court with more Provision than he can spend. He is not able to raise above 4000 Men fit to bear Arms, and those are all Cavalry for the most part, for he has not above 300 Foot to join with them. His Court, upon solemn Festivals, consists of 200 Gentlemen, but upon other Days of not above 120.

The Religion of the *Colchians* was formerly the same with the *Greeks*, being converted, as the Ecclesiastical Historians say, in *Constantine*'s Time, by a Slave: But the *Mingrelians* say St. *Andrew* preach'd among them, in the Place call'd *Nigivitas*, where now stands a Church, whither the *Catholicos*, or chief Bishop goes once in his Life-time to make the Oil, called *Myrone* by the *Greeks*; but now the *Mingrelians* are fallen into a profound Abyss of Ignorance and Darkness, and have not the least Idæa of Faith and Religion, but look upon Life Eternal, the Day of Judgment, and the Resurrection, as meer Fables, devised by Men: Nor do their Clergy perform any Ecclesiastical Duties, for there is hardly one of them that can either write or read. They have utterly lost the true Knowledge of their Service of God; but the Priests make a publick Profession of foretelling Things to come, and make the People believe, that their Books do show them the Success of future Events.

The *Catholicos* of *Mingrelia* is Head of all the Clergy of that Country, as also of *Abca*, *Guriel*, Mount *Caucasus* and *Imeretta*; but the Prince appoints or deposeth him as he pleaseth. His Revenue is very great, for he has 400 Vassals under him, who furnish his House with all Things necessary for Human Life, and many Superfluities. He sells their Children to the *Turks*; and when he visits the Dioceses under his Jurisdiction, 'tis not to reform the Clergy, nor instruct the People, but to spoil them of their Goods, and rake together great Sums. He will not consecrate a Bishop for less than 600 Crowns, nor say a Mass for the Dead under 800, nor any other Mass under 100. The Sanctity of this Prelate consists in a continual Abstinence from Flesh and Wine in *Lent*, and in long Prayers Day and Night; but he is so ignorant, that he can hardly read his Breviary and Missal. He has 6 Bishops under him, who take no Care of the Souls of their People, nor ever visit their Churches and Dioceses. They suffer the Priests to live in all manner of Errors, and the People to prostitute themselves to the grossest Vices; they understand not the Form of Baptism, let Polygamy be practised, and permit the Mothers to bury their new-born Children alive. All their Business is in Feasting and Banqueting, where they are drunk almost every Day. They are rich, and go very sumptuously apparell'd, oppressing their Vassals, and selling their Wives and Children to maintain their Luxury. They abstain from Flesh, as

1672. the *Greek* Biſhops do, and place the whole Chriſtian Religion in the Practice of Faſting, and think not themſelves obliged to do any other Duty. Their Cathedral is pretty neatly kept, and well adorned with Images, which they deck with Gold and Jewels, believing, that in ſo doing they ſatisfie God's Juſtice, and atone for their Sins. They are cloathed in Scarlet and Velvet, as the *Seculars* are, and differ from them only in this, that they wear their Beards long, and their Bonnets black, round and high.

Their Faſting.

Monks of S. *Baſil.* There are alſo in *Mingrelia* certain Monks, of the Order of St. *Baſil*, who wear the ſame Habit, and live after the ſame manner of the *Greek* Monks, wearing black Bonnets, eating no Fleſh, and ſuffering their Hair to grow; but they mind nothing of Religion, but to obſerve their Faſts exactly. They have alſo Nuns of the ſame Order, who obſerve their Faſting Days, and wear a black Veil, but they have no Nunneries, nor are under any Vows or Subordination, but quit their Habit and Temperance, when they pleaſe.

Nuns.

Their Prieſts The Prieſts of *Mingrelia* are very numerous, but a ſort of miſerable Creatures. They till their own Ground, and the Lands of their Lords, being no leſs Slaves than the *Seculars*; nor have they any Reſpect ſhewn them, but when they bleſs their Food at Meals, or ſay Maſs. Their Pariſh Churches have no Bells, but they call the People together by knocking with a great Stick upon a Board, and they are kept as naſty as Stables, the Images being foul and broken, and cover'd with Duſt. The Worſhip which they pay to their Images is Idolatrous, for they adore them not with a relative Adoration, but pay their Devotion to the Material Subſtance. They worſhip ſuch moſt as are fineſt adorn'd, or fam'd for their Cruelty, and if they ſwear by any of theſe, they will never break the Oath. St. *Gioba* is one of their moſt formidable Images, and him they will not approach nearer than they can juſt ſee him, but pray to him, and leave their Preſent at that Diſtance; for they report, that he kills all that approach him very near. The Chriſtian Saints they have no Value for, unleſs it be St. *George*, whom they account their chiefeſt Saint, as do alſo the *Georgians*, *Muſcovites* and *Greeks*. Their Maſs is after the *Greek* Manner, and the Prieſts celebrate it without any other Sacerdotal Habit, but their Surplices: Their Cup or Chalice is a Goblet of Wood, and the Cover is of the ſame Matter; and their Pattin is a Wooden Diſh. In *Lent* they never ſay Maſs, but on *Saturdays* and *Sundays*, for they hold, that the Communion ſpoils their Faſting. They conſecrate unleavened or leavened Bread, without any Difference, and never mix Water with the Wine, unleſs it be very ſtrong. They laugh at Tranſubſtantiation, and ſay, How can Chriſt get into a Loaf? For what Reaſon ſhould he leave Heaven to come down to the Earth? They anoint the Foreheads of their Children with the Oil called *Myrone*, as ſoon as they are born; but baptize them not till a long time after, and then they waſh them all over with Water; but none will baptize their Children, till he is able to make a Feaſt for the Prieſt, God-fathers and Gueſts, and that is the Reaſon many of their Children die unbaptized. They do not believe, that Ordination imprints a Character not to be defaced, and therefore they ordain anew ſuch Prieſts as have been degraded. Their Marriages are a Contract by way of Bargain and Sale, for the Parents of the Maid agree upon the Price with the Perſon that deſires her in Marriage; the Price of a divorced Woman is the leaſt, of a Widow ſomething more, but of a Maid moſt. When the Bargain is made, the young Man may company with the Damſel till the Money is paid, and 'tis no Scandal if ſhe be with Child. If any one has married a barren Woman, or of an ill Diſpoſition, they hold it not only lawful, but requiſite to divorce her, as a Match not made by God, who only does Good. There is none that underſtands the Bible, or reads it, but the Women will repeat ſeveral Stories of the Goſpel, which they have by Tradition, or have read. They obſerve the ſame Faſts almoſt as the *Greeks*, for they keep the 4 great *Lents*, viz. The firſt before *Eaſter*, which is 48 Days; that before *Chriſtmas*, which is 40 Days; St. *Peter*'s Faſt, which is near a Month; and the laſt, which the Eaſtern Chriſtians obſerve in Honour of the Virgin *Mary*, which continues 15 Days. They make the Sign of the Croſs when they drink Wine and eat Pork, but not as any Mark of Chriſtianity. Their Prayers are all addreſs'd to their Idols for temporal Benefits, *viz.* Their own Proſperity, or Ruine of their Enemies. They offer Sacrifices like the *Jews* and *Gentiles*. They never make Holiday upon *Sundays*, or abſtain from Works, but at the Feſtivals of *Chriſtmas* and *Eaſter*, which they celebrate only in eating and drinking to Exceſs in their Houſes. Their greateſt Feſtivals are when an Idol is carried through their Country, when they put on their beſt Cloaths, make a great Feaſt, and get ready a Preſent for the Idol. Their Mourning for the Dead is altogether barbarous, and like that of People in Deſpair, the Women rend their Cloaths, tear their Hair and Fleſh, beat their Breaſts, cry, yell, and gnaſh with their Teeth, like People mad or poſſeſſed; the Men alſo tear their Cloaths, thump their Breaſts, and ſhave their Heads and Beards, and this Mourning continues 40 Days, but in this Fury only the firſt 10. On the 40th Day the Corps is buried, and then they make a Feaſt for all the Friends, Relations, Neighbours, and all that come to bewail the Deceaſed; and the Biſhop that ſays Maſs, takes for his Right the deceaſed Perſon's Horſe, Cloaths, Weapons and Plate, if he have any, ſo that theſe Mournings undo many Families, and yet they are all obliged to theſe Solemnities.

Mourning for the Dead.

Their Neighbour Nations live and act after the ſame Faſhion almoſt in all Reſpects, only they that live nearer *Perſia* and *Turky* are more civil in their Manners, and more honeſt and juſt in their Inclinations, whereas thoſe that border upon the *Tartars* and *Scythians* are more barbarous, having no Idea, or outward Form of Religion, and obſerving no Laws. On the Confines of *Mingrelia*, lie the Principality of *Guriel*, and Kingdom of *Imeretta*.

The Country of *Guriel* is very ſmall, bordering upon *Imeretta* on the N. Mount *Caucaſus* on the E. *Mingrelia* on the W. and the Black-Sea on the S. It lies all along by the Sea-ſhore from the River *Phaſis* to the Caſtle *Gonie*, which is held by the *Turks*. The Inhabitants are of the ſame Nature and Manners as the *Mingrelians*, and have the ſame Inclinations to Lewdneſs, Robbery and Murther.

Guriel deſcribed.

The Kingdom of *Imeretta* it ſomething bigger than the Country of *Guriel*, and is the *Iberia* of the Ancients. It is encompaſſed with Mount *Caucaſus*, *Colchis*, the Black-Sea, the Principality of *Guriel*, and part of *Georgia*. It is 26 Miles in Length, and 60 Miles broad. The Country is full of Woods and Mountains, like *Mingrelia*, but the Valleys are more lovely, and Plains more delicious, producing Corn, Pulſe, Cattel, and Herbs of all ſorts. There are ſome Iron Mines. They have alſo ſome Money current among them, which is coined in their Kingdom, and ſeveral Towns; but their Manners and Cuſtoms differ little from the *Mingrelians*. The King has 3 good Caſtles, one called *Scander*, ſeated on the ſide of a Valley, and 2 in Mount *Caucaſus*, called *Regia* and *Scorgia*, being both almoſt inacceſſible, as being built in Places that Nature it ſelf has ingeniouſly fortified; the River *Phaſis* running between them. The Fortreſs of *Cotatis* was once in this Prince's Juriſdiction, but the *Turks* are now Maſters of it.

Imeretta deſcribed.

Imeretta, &c. tributary to the *Turks*.

The Kingdom of *Imeretta* govern'd the *Abca*'s, *Mingrelians*, and People of *Guriel*, after they had all freed themſelves from the Power of the Emperors, firſt of *Conſtantinople* and thereof *Trebiſond*: But in the laſt Age, ſetting up for themſelves, and revolting from one another, they maintained continual Wars among themſelves, till calling in the Aſſiſtance of the *Turks*, they were all made tributary to them. The King of *Imeretta* pays 80 Boys and Girls, from 10 to 20 Years of Age. The Prince of *Guriel* pays 46 Children of both Sexes; and the Prince of *Mingrelia* 60000 Ells of Linen-Cloth, made in that Country. The *Abca*'s ſeldom paid any thing at firſt, and now pay nothing. The King of *Imeretta* and Prince of *Guriel* ſend their Tribute to the Baſſa of *Akalzike*, but a *Chiaux* gathers it at *Mingrelia*.

Anarghia deſcribed.

Leaving *Iſgaour*, Octob. 4. he paſſed by the Mouth of the River *Aſtolphus*, called *Langur* by the *Mingrelians*, one of the biggeſt Rivers in *Mingrelia*, and on the 5th came to *Anarghia*, a Village 2 Miles from the Sea, conſiſting of 200 Houſes, but ſo far diſtant the one from the other, that 'tis 2 Miles from the firſt to the laſt. Hither the *Turks* come to buy Slaves, and have Barks ready to carry them away. It is thought, that the fair and large City, call'd *Heraclea*, ſtood in the ſame Place. At this Town there is Plenty of Proviſions, and that very cheap, *viz.* Wild Pigeons, Fowl, Porkers and Goats in abundance, and Wine is plentiful.

From

1672.

From *Anarghia* he sail'd up the River *Astolphus*, and went to a Place called *Sapias*, which is the Name of 2 little Churches, of which the one is a Parish-Church of *Mingrelia*, and the other belongs to the *Theatins*, a sort of Friars, who first came into *Mingrelia* in 1627, and were admitted there as Physicians, and have built themselves several Apartments and Lodgings about it, after the Manner of the Country. They have some Slaves, and 2 Families of Country People their Tenants. They have good Employment as Physicians, but none will embrace their Religion, their very Slaves refusing to communicate in their Services; so that they would have long since left the Country, had it not been for the Honour of the *Roman* Church and their own Order.

Sapias, where are *Theatine* Friars.

Mourning for the Dead.

After a Month's Stay with the Monks, it not being safe to travel, because of the Troubles in the Country, he return'd again to *Anarghia*, and having hired a *Turkish* Feluke, for *Gonie*, Novemb. 10. stay'd till the 27th to take in Loading and Passengers. While he staid here he was invited to 2 Christ'nings, and Curiosity obliged him to be present at them. The Manner was this: The Priest being sent for about 10 a Clock in the Morning, sat himself down in the Buttery, and fell to reading a Book half torn, about the Bigness of a New Testament, in *Octavo*. He read very fast, and with a low Voice, in such a careless Manner, as if he regarded not what he did, no more than the rest did what he said, for the Father, God-father and Child, which was about 5 Years old, went to and again all the time. When the Priest had read an Hour, there was a Bucket of warm Water got ready, into which when the Priest had poured about a Spoonful of Oil of Wall-nuts, he bid the God-father undress the Child; which done, he set him upon his Feet in the Water, and washed his Body all over well, and then the Priest gave him a small Quantity of *Myrone*, or Oil of Unction, with which he anointed the Top of his Head, Ears, Forehead, Nose, Cheeks, Chin, Shoulders, Elbows, Back, Belly, Knees and Feet, the Priest still reading, till the God-father dress'd the Child, and then the Father bringing in Wine, Bread and Pork, they all sat down to eat and drink, and were all drunk before they parted. Their Mass they perform with the same Irreverence and Carelessness.

Two Christenings, how celebrated.

Departing from *Anarghia* in fair and clear Weather, he discover'd the high Lands of *Trebisond* on the one side, and of the *Abca*'s on the other, and came to the River *Kelmhel*, which though not so broad nor rapid as *Langur*, yet 'tis deeper.

On the 30th he came to the River *Phasis*, which, taking its Rise in Mount *Caucasus*, runs at first in a narrow Channel, though swiftly, about *Cotatis*, and sometimes so low, that 'tis easily fordable; but where it discharges it self into the Sea, which is about 90 Miles from *Cotatis*, the Channel is a Mile and half broad, and 60 Fathom deep, being augmented in that Course by divers Streams. The Water is muddy and thick, but very good to drink. There are several Islands at the Mouth of it, which, being covered with thick Woods, make a delightful Prospect. *Arrian* says, That upon one of these Islands stood the Temple of *Rhea*, but there are no Remainders of it now, though there are some Historians who say, it was standing in the Time of the *Grecian* Empire, and was, in *Zeno*'s Reign, dedicated to the Worship of Christ. On this River, and the Black-Sea about it, are Plenty of Pheasants, or *Phasiani*, so called from the River *Phasis*. All the Coasts of this River are a low sandy Soil, cover'd with Woods so thick, that one can hardly see 6 Paces up the Land.

The River *Phasis*.

Pheasants, so called from this River.

On the 30th he arriv'd at *Gonie*, which is about 30 Miles from *Phasis*, the Sea-Coasts being exceeding high Land and Rocks, some being Woody, and others naked. *Gonie* is a large Castle, in the Territories of the Prince of *Guriel*, built 4 square, of hard and rough Stones of a very large Size. It hath no Trenches, but Walls only, and 2 great Guns. In it are about 30 small poor Houses, made of Boards, and without is a small Village of about as many more, all inhabited by Mariners, and other booriish People. There is a Custom-house here, which is very rude, and imperious, and severe to the People of the Country, but extravagant to the *Europeans*, not regarding any Man's Person, nor any Recommendations from the Port, but searching all Things strictly, and exacting what they please.

Gonie described.

From *Gonie* he went to the Castle of *Akalzike*. The Way lies over Mount *Caucasus*, which is one of the highest Mountains, and one of the most difficult to pass over in the World. The Top is always cover'd with Snow, over which the Natives pass in a kind of Sandals, made flat like a Racket, to keep them from sinking. It is usual for the Guides here to make long Prayers to their Images to keep the Winds from rising, for if the Wind be high, it buries all the Travellers in Snow. This Mountain, though not inhabited for some Lgs. together in many Places, yet is fruitful to the very Top, yielding Honey, Wheat, Gom, Wine, Fruits, Hogs, and large Cattel. The Vines are so luxuriant, that they run up to the very Tops of their highest Trees, so that the People cannot gather them. The Country People dwell in Wooden Huts, of which every Family has 4 or 5. The Women grind their Corn as they want it, and bake their Bread on Stones, or upon the Hearth, and yet the Crust is very white, and the Bread good. These Inhabitants are for the most part Christians, after the *Georgian* Ceremonies; they are fresh complexion'd, and their Women are handsome. At the Bottom of the Hill is a very fair Valley, rich and fertile, being water'd by the River *Kur*, which has many Villages, and in them the Ruines of several Castles and Churches, which, the People say, were destroy'd by the *Turks*.

Mount *Caucasus*.

Vines.

Akalzike is a Fortress built upon Mount *Caucasus*, fortified with double Walls, and flanqued with Towers built with Battlements, after the ancient Manner, and defended with a few great Guns. Upon little Hillocks about it stands a large Town of 400 Houses, which have nothing of Antiquity, but 2 *Armenian* Churches. It is peopled with *Turks*, *Armenians*, *Georgians*, *Greeks* and *Jews*, who have their Churches and Synagogues. The River *Kur*, anciently called *Cyrus* and *Corus*, which rises in the Mount *Caucasus*, runs by it. A Bassha lodges in the Fortress, and his Soldiers are quarter'd in the adjacent Villages. It was built by the *Georgians*, from whom the *Turks* took it.

The Castle of *Akalzike* described.

Kur, or *Cyrus*, a River.

From *Akalzike* he went to *Gory*, and passed by *Usker*, where the *Turks* have a Castle, built on a Rock, with a Garrison and Custom-house, under the Command of a *Sanziac*, and 2 Lgs. farther, you cross over the Mountains which part *Persia* and *Turky*, from whence you see several Villages, in which are the Ruines of many Castles, Fortresses and Churches, the Footsteps of the Grandure of the *Georgians*, before the *Turkish* and *Persian* Wars with them. At the Foot of the Mountain lies a Town and Fortress, both called *Surham*. It stands on a very lovely Plain, full of Censes, Villages, Hillocks, Houses of Pleasure and little Castles belonging to the *Georgian* Lords, and has a Fortress containing a Garrison of 100 Men. All the Country is very well tilled, and mighty pleasant and delightful, as far as *Gory*, saving that on the Right Hand lies a great City almost in Ruines, as not containing above 500 Houses inhabited, whereas formerly, by Report, it had 12000.

Gory.

Surham.

Gory is a small City, seated on a Plain, between 2 Mountains, upon the Bank of the River *Kur*, and by it is a Castle on an Hill, garrison'd by native *Persians*. The Houses and Market-places are all built with Earth, but the people are all very rich and wealthy, and it is stored with all Necessaries for Human Life at a cheap Rate.

Gory described.

From *Gory* he departed *Decemb.* 16. and travelling upon the Banks of the River *Kur*, through pleasant Plains, with great Numbers of Villages on all Hands, he passed through *Calicala*, a City almost totally ruined, and came on the 17th to *Teflis*, the Capital City of that part of *Georgia*, lying in the Province of *Cartpueli*.

The Country of *Georgia*, which is under the Jurisdiction of the *Persians*, borders at this Day to the E. upon *Circassia* and *Muscovy*, to the W. upon *Armenia* the Lesser, and to the N. upon the Black-Sea, and the Kingdom of *Imeretta*. It is extended from *Taurus* and *Erzerom* to *Tanais*, and was anciently called *Albania*. It is a Country very Woody and Mountainous, unless in the Middle, where 'tis more even and level. The River *Kur* runs through the Midst of it, and empties it self into the *Caspian* Sea. The *Grecians* are thought by some to have called it *Georgia*, from *Georgos*, Husbandmen; but others will have the Name deriv'd from St. *George* the Patron Saint of all the Christians of the *Greek* Church. The Temper of the Air is very kindly in *Georgia*, being very dry, cold in the Winter, and hot in the Summer. The fair Weather does not begin till *May*, but then it lasts till the End of *Novemb.* The Soil being well watered, produces all sorts of Grain, Herbs and Fruits in abundance, so that a Man may

Georgia described.

The Name.

Air.

Soil.

1672. may live there deliciously and cheap. Cattel are there very plentiful and good, as well the larger as lesser sort; their Fowl is incomparable, especially their wild Fowl; their Boars Flesh is as plentiful and good as any in *Celchis*; and, indeed, the common People live upon nothing else almost but young Pigs, which are excellent Meat, and never offend the Stomach. The *Caspian* Sea, which is next to *Georgia*, and the *Kur*, that runs quite through it, supplies it with all sorts of salt and fresh Fish. There is no Country that drinks more and better Wine, and they transport great Quantities of it into *Media*, *Armenia* and *Ispahan*, for the King's Table. They have great Quantities of Silk, but know not how to wear it, and therefore they carry it into *Turky* to *Erzerom*, and the Parts adjoining, and drive a great Trade with it. The Complexion of the *Georgians* is most beautiful, you can hardly see an ill favour'd Person among them; and the Women are so enamouring, that 'tis hardly possible to look upon them, and not be in Love with them. They are tall, clear limb'd, plump and full, but not over fat, and extreamly slender in the Waste: But this Beauty they spoil with painting and dressing with sumptuous Habits and Jewels. The *Georgians* are naturally very witty, and would be as learned Men and great Artists as any are in the World, if they had the Improvement of Arts and Sciences; but having a mean Education and bad Examples, they are drowned in Vice, are Cheats and Knaves, perfidious, treacherous, ungrateful and proud. They are irreconcilable in their Enmities, for though they are not easily provoked, yet they preserve their Hatred inviolable. Drunkenness and Luxury are such common Vices among them, that they are not scandalous in *Georgia*. The Church-Men will be as drunk as others, and they keep Female Slaves in their Houses, which they use for their Concubines, at which no body is offended, because 'tis so commonly practised, that Custom makes it thought lawful, yea, and they say, he that is not drunk at their great Festivals of *Easter* and *Christmas* cannot be a good Christian, and deserves to be excommunicated. The *Georgians* are very great Usurers, and will lend no Money without a Pawn. The lowest Interest they take is 2 *per Cent* for a Month. The Women are as vicious and wicked as the Men, and contribute more than they to that general Debauchery, which overflows the Country. In their common Conversation they are civil and courteous, grave and moderate. Their Habit is much like the *Polonian*, and their Bonnets like theirs, their Vests are open before down the Breast, and fastened with Buttons and Loops; their Hose and Shooes are like the *Persians*, and their Womens Cloathing is wholly like the *Persians*. The Houses of their Grandees, and all their publick Edifices, are built according to the *Persian* Model, and they imitate the *Persians* in their Sitting at Table, in their Beds, and Manner of Diet. The Nobility exercise an absolute Tyranny over the People, their Vassals, making them labour as long as they please for them, without Food or Wages, challenging a Right over their Estates, Liberty and Lives, and selling their Children, or making them their own Slaves. They were converted to Christianity by an *Iberian* Woman, in the 4th Age, but have nothing left of Christianity, but the Name; for they do not observe the least Precept of *Jesus-Christ*; they place all their Religion in Fasting, and making long Prayers. There are several Bishops in *Georgia*, with a Patriarch, whom they call *Catholicos*, and an Arch-bishop, whose Sees, as often as they are vacant, are disposed of by the Prince, though he be a *Mahometan*, and he generally gives them to his Relations, and the present Patriarch is his Brother. The Churches in *Georgia*, especially in their Cities, are kept something more cleanly than in *Mingrelia*, but in the Villages they are full as nasty. The *Georgians*, and their Neighbours build their Churches upon high Mountains, in remote and inaccessible Places, and bow to them at great distances, but scarce go into them once in 10 Years, leaving them to the Injuries of the Weather, and for the Birds to build their Nests in. They can give no other Reason for all this, but that *it is a Custom*; though, we may suppose, 'tis rather to avoid repairing and adorning them. *Georgia* was made tributary to the *Persians* by *Ishmael* the Great, and though it has several times revolted, yet still continues in Subjection to them.

Cattel. Fowl. Fish. Wine. Silk. The People. Their Wit. Their Drunkenness. Whoring. The Conversation and Habit. The Power of the Nobility. Their Religion. Their Churches.

The City of *Tefflis*, the Capital City of *East Georgia*, is one of the fairest Cities in all the King of *Persia*'s Dominions, though not so big as some. It is seated on the Bottom of a Mountain, and on the Eastern side of it runs the River *Kur*, which rising in the Mountains of *Georgia*, joins it self to *Araxes*. The most part of the Houses built by the Rivers side, stand upon a Rock, and the whole City is encompassed with strong and beautiful Walls, except on the Side next the River, and is defended by a Fortress on the South side, wherein are none but Native *Persians*. This Fortress is a Sanctuary for all manner of Criminals. *Tefflis* has in it 14 Churches, which is very much in a Country where there is so little Devotion. Six of them are appropriated to the *Georgian* Service, and maintain'd by them, and the other 8 belong to the *Armenians*. The Cathedral, called *Sion*, is built all of hewn Stone, and stands on the Bank of the River. It is an ancient Building in good repair, composed of 4 Bodies, and has a great *Duomo* in the middle. The great Altar stands in the middle of the Church, and the inside is full of Paintings, after the *Greek* Manner. The *Armenians* have also several Monasteries here, and in one of them they say, they have S. *George*'s Skull. There is not any Mosque in *Tefflis*, though it be under a *Mahometan* Prince, and though the *Persians* have attempted to build one several times, they could never accomplish their Design; for the People mutiny'd, and beat down their Work; which Action, though very affronting to the *Persian* Religion, yet the Emperor of *Persia* is afraid to come to any Extremities with them, lest they should revolt to their Neighbours the *Turks*, and so *Tefflis* and all *Georgia* enjoy their Liberty to retain almost all the exterior Marks of their Religion; for on the Top of all the Steeples of their Churches stands a Cross, and in them they have Bells, which they often ring. Every Day they sell Pork openly as well as other Victuals, and Wine at the Corners of the Streets, which angers the *Persians* to see, but they cannot help it. Some few Years since they built a Mosque in the Fortress, and the *Georgians* could not prevent it: But when the Priest, after their Custom, came up to the Top, to make Profession of his Faith, and call the *Mahometans* to Prayers, the People so ply'd him with Vollies of Stones, that he was forced to flie down in all Haste, and never dare appear there any more. The publick Buildings, *viz.* Their Market-places, Inns and Magazines are well built of Stone, and kept in good Repair. The Prince's Palace is a noble and beautiful Building, being adorned with Halls and Rooms of State, Gardens, Aviaries and spacious Courts, to which the Vice-Roy of *Caket*'s Palace is not much inferior. The Out-parts of the City are adorn'd with several Houses of Pleasure, and many beautiful Gardens, of which the Prince's is the biggest; but the Trees are such only as serve for Shadow and Coolness.

Tefflis described. The Churches. Monasteries. Pork and Wine sold. The publick Buildings.

The *Capuchins*, who were sent into *Georgia* about the Year 1657. by the Pope, have an Habitation in this City, as also at *Gory*, where they are highly esteem'd as Physicians, which is the Title they give themselves, but they make very little Progress in the Conversion of the *Georgians*; for, beside that that People is very ignorant, and take little Care to instruct themselves, it is so rivetted into their Heads, that Fasting, as they observe it, is the Essential Part of the Christian Religion, that they do not believe the *Capuchins* to be Christians, though they fast as they do, because they are informed, they do it not in *Europe*.

The *Capuchins*.

The City of *Tefflis* is very well peopled, and there are as many Strangers resort thither as to any Place in the World, for there is a great Trade driven there, and the Court is very numerous and magnificent, beseeming the Capital City of a Province. The *Georgians* do not call it *Tefflis*, but *Cala*, i. e. *The Fortress*, which is a Name they give to all Habitations encompassed with Walls, and some Geographers call it, *Tebele-Cala*, or, *The hot City*, either by reason of the hot Baths, or because the Air there is not so cold and boisterous as in other Parts of *Georgia*.

The Trade.

On the 28th he departed from *Tefflis*, and passing through *Sogan-lou*, or the Place of Onions, standing upon the River *Kur*, *Cupri-Kent*, or the Village of the Bridge, because there is a very fair Bridge over the River *Tabadi*, in the Arches of which are made little Chambers and Portico's, with every one a Chimney, on purpose to lodge Strangers, and in the middle ones Belconies, to take the cool Air in the Summer with great Delight; *Melick-Kent*, or, the Royal Village, came to *Dely-Jan*, a Village of 300 Houses, seated upon the River *Acalstapha*, which runs at the Foot of an high and dreadful Mountain, part of Mount *Taurus*.

Dely-Jan.

Here.

1673. Here is Plenty of Water, and the Ground is very fertile, and a great many Villages to be seen on every side, some of which stood so high upon the Points of the Rocks, that they were almost indiscernible. They are inhabited by *Georgian* and *Armenian* Christians, but not intermix'd, because they have such an inveterate Enmity one against another that they cannot live together in the same Villages. The most part of the Houses of these Villages are no better than Caverns, or hollow Places made in the Earth; the rest are built with Timber, and covered with Turf. These sort of Buildings are very convenient, being cool in Summer, and warm in Winter. The Borough of *Dely-Jan*, and all the Country round about for 6 Lgs. is govern'd by its own natural Princes, from Father to Son, and holds of *Persia*, as *Georgia* does. It is called the Country of *Cesac*, the People being stout and fierce, descended from the *Cosaques*, who inhabit the Mountains on the N. E. of the *Caspian* Sea, and is at present under a Prince call'd *Kamshi-Can*: He lodg'd at *Kara-Phisbisha*, a large Borough, seated at the Bottom of the Mountains, which separates *Georgia* from *Armenia*. It stands on the Banks of the River *Zengui*, and passing *Bichni*, where there is an *Armenian* Monastery, arrived at *Erivan*, Jan. 7.

The Houses in the Earth.

Erivan is a great City, but ill favour'd and dirty. The Vineyards and Gardens make the greatest part of it, there being no Ornamental Buildings in it. It is situated on a Plain, encompassed with Mountains on every side, between 2 Rivers, the *Zengui*, and *Queurk-boulack*. The Fortress it self may pass for a small City, containing 800 Houses, inhabited by *Persians* only; for though the *Armenians* have Shops there to work and trade in, in the Day-time, yet they return to their Houses in the Evening. It is surrounded with 3 Walls of Earth, and Brick made of Clay, with Battlements, and flank'd with Towers, and strengthen'd with Ramparts, according to the Custom of the Ancients, and in it is constantly maintained a Garrison of 2000 Men. The Governour of the Province's Palace is within this Castle, and is a very spacious and delightful Place in Summer. The City stands about a Cannon-shot from the Fortress, but the Space between is filled up with Houses and Market-places, which are such pitiful Structures, that they may be remov'd in one Day. There are several Churches in this City, of which the Episcopal See, called *Iram-ye-rizt*, and *Catwiks* are the chief, the rest are small, sunk deep in the Earth. Near the Episcopal See is an old Tower, built of Free-Stone, of Antique Work, with several Inscriptions, but none can read them; nor is it known when, by whom, or for what Use it was built. At a little Distance from it is the *Grand Meydan*, or, Great Market-place, 400 Paces square, where they use all Exercises, both for Horse and Foot, as Carousels, Racings, Wrestling, and Managing of Horses for War. There are many Baths and fair Inns in it. The Air is good, but a little thick and cold, for their Winter lasts long, and they have Snow sometimes in *April*. The Country is very delightful and fruitful, and produces Fruits in great Plenty, especially Wine, which is there good and cheap.

Erivan described.

The Fortress.

The Churches.

Baths. Air.

The *Armenians* have a Tradition, that *Noah* planted his Vine-yard near *Erivan*, and some pretend to shew the Place, about a small Lg. from the City. The River and Lake, which is 25 Lgs. in Compass, furnish the City with excellent Fish of 9 Sorts, of which the Trouts and Carps are famous all over the East. In the midst of the Lake is a small Island, where stands a Monastery, whose Prior is an Archbishop, and takes upon him the Title of Patriarch, refusing to acknowledge the Grand Patriarch. The *Armenians* hold this City to be the most ancient inhabited Place in the World; for they affirm, that *Noah* and all his Family dwelt there, both before the Deluge, and after he came out of the Ark, and that the Earthly Paradise was there: But all this is a Story without Foundation, reported by Persons equally ignorant and vain-glorious.

Noah's Vine-yard.

Paradise.

Two Lgs. from *Erivan* stands the famous Monastery of the *Three Churches*, the Sanctuary of the *Armenian* Christians. The *Armenians* call it *Ecs-miazin*, which Name also the principal Church bears. 'Tis a substantial, but dark Structure, all built of large Free-Stone. The Monks shew several Reliques preserv'd in it, as, a Finger of St. *Peter*, and a of St. *John Baptist*'s, a Rib of St. *James*, Bishop of *Jerusalem*, and an Arm of St. *Gregory*, &c. but they must be very credulous and superstitious that can believe them such. The 2 other Churches that stand near this, are St. *Cai-*

Ecs-miazin, or the *Three Churches*.

ane and St. *Repsima*, the Names of 2 *Roman* Virgins, who fled into *Armenia*, as they say, in the 9th Persecution, and suffered Martyrdom in the same Places where those Churches stand. 1673.

Within the Territory of *Erivan*, which reaches about 20 Lgs. round it, there are 23 Convents for Men, and 5 for Women, which are so poor, that being continually employ'd in getting a Livelihood, they never perform holy Duties, but upon Holidays. They hold the Opinions of the *Monophysites*, but in other Points are very ignorant. Two Lgs. from *Erivan*, Eastward, is to be seen the famous Mountain where *Noah*'s Ark is said to have rested. The *Armenians* hold, that the Ark is still upon the Top of the Mount, called *Mim*, but that no Man can ascend to it. The Governour of *Erivan* is a *Begler-beg*, i. e. a Lord of Lords, and has also the Title of *Serdar*, or General of the Army. His Revenue is 32000 Tomans, which is above 112000*l.* Sterling a Year, besides Fines, Presents, and indirect Ways of enriching himself, which amount to 50000 Pounds more.

Convents of Friars and Nuns.

The Governour of it.

While he staid at *Erivan*, he saw a Wedding of the Governour's Steward's Brother. Matrimony in *Persia* is very expensive, so that only Men of Estates will venture upon it, lest it prove their Ruine. The meaner sort content themselves with a Concubine or Slave. The *Mahometans* that follow the Tenets of *Haly*, take their Wives after 3 Manners, *viz.* By way of Purchase, Hire, or Marriage. All these Ways their Religion allows, and their Civil Law acknowledges the Children born in any of them Legitimate. The Wives, who are Slaves, are called *Canize*: Of these the Law allows a Man as many as he can maintain, and takes no Cognizance how they are used. He is Master of their Chastity, yea, of their Lives, and 'tis their Honour to serve their Master as their Wives. The hir'd Wives are call'd *Mouta*: Of these also a Man may take as many as he pleaseth, and as long as he pleaseth for the Price agreed on, and at the End of the Term they may part with them, or renew the Bargain. A handsome young Maid at *Ispahan* may be hired for 35*l.* a Year, besides Cloaths, Diet and Lodging. If any break off before the End of the Term, he must pay the whole Sum contracted for, and the Woman, after Dismission, must tarry 40 Days before she lets her self to another. These Days they call, *The Days of Purification*. The espoused Wives are called *Nekaa*, and of these the *Mahometan* Religion allows a Man to marry 4; but they never marry above one, to avoid Expence and Disorder, for every one will command, and their mutual Jealousie causes a perpetual Confusion; wherefore, if they cannot content themselves with one Woman, they use their Slaves. In *Persia* they usually marry by Proxy, because the Man never sees his Wife, till after he has consummated the Marriage, which sometimes he does not till several Days after his Wife has been at Home. One would think, that this Way of Marrying should produce very unfortunate Matches, but it doth not, for Marriages are not more happy in any Country than this. If either of the Parties dislike one another, and resolve to unmarry themselves, the *Mahometan* Religion permits a Divorce, and they may separate either before a Judge, or a Church-man, giving each other a *Talaac*, or, *Bill of Divorce*, and then the Parties are at Liberty to marry again where they please themselves. Upon this Dissolution of their Marriage, if the Man has sued the Divorce, he is obliged to return the Woman her Dowry; but if the Woman sought it, she loseth her Portion; but if the Persons repent the Act, they may renew the Marriage again 3 times: Yet, the *Persians* rarely make use of this Licence to part with their Wives, only some Citizens and Tradesmen make their Advantage of it. Persons of Quality count it so dishonourable, that they'll rather die, than divorce their Wives, and the meanest sort cannot part with the Portion, and so if they desire a Divorce, which is rare, they effect it by ill-using their Wives, to force them to sue a Divorce, and sacrifice all to their Liberty.

Marriage in *Persia*, and Three sorts of Wives.

Hired Wives.

Marriage by Proxy.

Divorce.

The *Armenian* Patriarch lives in this City, and has an Episcopal Palace. He, with all the rest of his Clergy, is much addicted to Simony, as are also all the Eastern Sects. Their chief Gain lies in selling the Oil called *Myrone*, at a dear Rate, which, they teach the People to believe, is a Remedy, that Physically cures all the Distempers of the Soul, and confers the Grace of Regeneration and Remission of Sins, saying, That in Baptism 'tis the Oil, not the Water, which is the Matter prescribed. The Patriarch consecrates this Oil,

The *Armenian* Patriarch.

1673. Oil, and sells it to the Bishops and Priests, who get great Sums by it.

April the 8th he parted from *Erivan*, and travelling through a Country something Hilly, but full of Villages, came first to *Daivin*, and then to *Kainer*, leaving the Mountain of *Noah* on the Right Hand.

On the 10th he went on the same Road, which led him through a fertile and fair Country, and leaving *Sederet*, a great Town, and the Capital of the Province of *Armenia*, called *Charour*, where the Sultan resides, came through *Nouratchin*, and over the River *Harpasony*, to *Nacchivan*, which is thought to be the ancient *Artaxate*. It is now little else but a Heap of Ruines, not containing above 2000 Houses which are inhabited, and those in the Heart of the City, with Inns, Baths, and other publick Houses, where they sell Tobacco and Coffee, whereas formerly, the *Persian* History assures us, that it contain'd 40000. Five Lgs. to the N. lies a great City, call'd *Abrener*, i. e. *The Fertile Field*, and 7 others near to it, all whose Inhabitants are Papists, and their Bishops and Curates Dominicans, who perform their Church-Service in the *Armenian* Language. These Towns were brought into Subjection to the Pope by an *Italian* Dominican of *Bologna*. Twenty Villages more acknowledged the same Ecclesiastical Jurisdiction, but are return'd to their first Religion, and their Obedience to the *Armenian* Patriarch; and 'tis not likely that the rest can hold out long, for the Governours of the Province use them violently, and lay heavy Impositions upon them, for withdrawing from their Jurisdiction.

Nacchivan describ'd. *Papists.*

From *Nacchivan* he passed to Old *Julpha*, through a dry Stony Country, where there is nothing to be seen but Hills of Stones. It is a ruin'd City, and thought by some Authors to be the ancient *Ariammene*. It is said to have contain'd 4000 Houses, though the Ruines do not show above half so much. At present there is nothing but Holes and Caverns in the Mountains, fitter for Beasts, than Men to dwell in. This City was ruin'd by *Abas* the Great, for the same Reasons as *Nacchivan*, *viz.* To hinder the Invasions of the *Turks* for want of Provisions. By *Julpha* runs the River *Araxes*, which separates *Armenia* from *Media*. It rises in the Mountain where *Noah*'s Ark is said to have rested, from which, perhaps, it takes its Name, and empties it self into the *Caspian* Sea. It is very large, and of so rapid a Course, especially when it is swell'd by the Thaws of the Snows that come down from the Mountains, that no Bridges can stand upon it, nor Dams resist its Force, and the Noise of the Waters astonishes the Ears of the Beholders.

Old Julpha. *Araxes.*

Media, which formerly ruled all *Asia* with an Imperial Dominion, at present makes but one Part of a Province, though the largest in the *Persian* Empire, called *Azerbeyan*, or *Asapaican*. It borders on the E. upon the *Caspian* Sea and *Hyrcania*, on the S. upon *Parthia*, on the W. upon *Araxes* and the Upper *Armenia*, of which *Assyria* is a Part, and on the N. on *Dagestan*, which is that Mountainous Country, that borders upon the *Cosaque Muscovites*, and part of Mount *Taurus*. The *Persians* affirm, that the Name *Azerbeyan* implies, *The Country of Fire*, by reason of the famous Temple of Fire which was there erected, where was kept that Fire, which the Fire-Worshippers hold to be a God. *Nimrod* is said first to have brought in this Worship, and there is a certain Sect, called *Guebres*, which still maintain it.

Media. *Fire-Worshipers.*

From *Julpha* he travelled through a Country full of little Hills, leaving a spacious Plain upon the Left Hand, where many bloody Battles between the *Turks* and *Persians* were fought, and particularly that between *Selim*, the Son of *Solyman* the Great, and *Ismael* the Great, to *Alacou*, and from thence, through a more even Country, to *Marant*, a good fair Town, consisting of about 2500 Houses, and which has so many Gardens, as take up as much Ground as the Houses. It is seated at the Bottom of a Mountain, at the End of a Plain, water'd with the little River *Zelou-lou*, from which the People have drawn several Cuts into their Grounds and Gardens. In the Places adjoining grow Plenty of Fruits, the best in all *Media*; but that which is most peculiar to these Parts, is this, that here they gather Cocheneel, though in no great Quantities, nor for any longer Time than only 8 Days in Summer, when the Sun is in *Leo*; for before that Time, the People say, it doth not come to Maturity; and after the Worm, from which they draw the Cocheneel, makes an Hole in the Leaf in which it grows, it is lost. The *Persians* call Cocheneel *Querm*, which signifies *a Worm*, because it is extracted out of Worms. The *Armenians* have a Tradition, that *Noah* lies buried here.

Alacou. *Marant.* *Cochineel.*

1673.

From thence he travelled, among the Mountains, to *Sophian*, a little Village full of Rivulets and Gardens, and fruitful to a Wonder, and so he went to *Tauris*, which is 53 *Persian* Leagues from *Erivan*.

This City is very large and potent, being the 2d in *Persia* in Dignity, Grandure, Riches, Trade, and Number of Inhabitants. It is neither Wall'd nor Fortified, and the little River *Spingtcha* runs a-cross it, which sometimes carries away the Houses on the Side of it, and makes dreadful Havock. On the N. side runs the River *Agi*, or the Salt River, whose Water is made salt by the little Rivulets, which passing thro' the salt Marshes, fall into it, and so can nourish no Fish. It is divided into 9 Wards, and has 15000 Houses, and as many Shops in their Market-places, among which are 300 Inns, and some so large, as to lodge 300 People, and many Cabarets for Coffee, Tobacco, and strong Liquors. There are 350 Mosques; 3 Hospitals, which relieve the Poor with Victuals twice a Day; a fair Hermitage, call'd *Hali's Eye*. The Inhabitants may be truely computed to be 550000. This City is full of Strangers, which come hither to trade from all Parts of *Asia*, because it is full of all sorts of Merchandices, and abounds with Artists in Cotton, Silk and Gold. The fairest Turbans in *Persia* are here made; and, 'tis said, there are 6000 Bails of Silk consum'd in this Manufacture. The Air of *Tauris* is good, healthy and dry, but the Cold continues long, because it is exposed to the North, and the Snow lies 9 Months in the Year upon the Mountains, the Winds blow every Day Morning and Evening, and Rains often fall. It abounds with all Things necessary for Human Support, as, Corn, Fish from the *Caspian* Sea, Venison, and other wild Beasts. Bread may be bought there for 3 Pound a Penny, and Flesh at 3 Half-pence a Pound. There are said to grow no less than 60 sorts of Grapes in and about *Tauris*. Near it is a Quarry of white Marble, a Mine of Gold, and another of Salt. There are several Mineral Waters, all sulphurous, of which some are cold, and others boiling hot. Most of our Geographers of best Note, as, *Ortelius*, *Ananias*, *Molets*, &c. are of Opinion, that this City is the ancient and celebrated *Ecbatana*, so frequently mention'd in Holy Writ, and in the ancient History of *Asia*, but there are no Remainders of the magnificent Palace of *Ecbatan*, where the Monarchs of *Asia* kept their Courts in Summer, nor of *Daniel*'s.

Querm, which signifies *a Worm*, because it is extracted out of Worms. The *Armenians* have a Tradition, that *Noah* lies buried here.

Tauris describ'd. The Houses and Mosques. The Air. Grapes of Tauris.

From *Tauris* he travelled first to *Vaspinge*, a great Borough, surrounded with Gardens, and Groves of Poplars and Tylets, and watered with several Brooks, which make it very pleasant; then to *Agi-agach*, by which are the Plains which afford the best Pastures in all *Media*, and, perhaps, in the whole World, where the choicest Horses in the whole Province are put to Grass from *April* to *June*, to purge, refresh, fatten and strengthen them. These Plains are the *Hippoporion* of the Ancients, of which they write and say, that the Kings of *Media* kept there a Breed of 50000 Horses.

Vaspinge. *Agiagach, or Asperchon.*

The Road from hence leads by several Circles of large hewn Stones, which the *Persians* affirm to be the Places where the *Caous*, or Giants, when they made Wars in *Media*, held their Councils, it being a Custom among these People, that every Officer that came to the Council brought with him a Stone, to serve him instead of a Chair, and so carries you over Hills and Dales, all fruitful and delightful, to Admiration, thro' *Turiman*, so called, because that in the Fields about it there is a great Number of Shepherds with their Flocks that are called by that Name, to *Pervare*, an handsome large Village at the Bottom of an Hill, and upon the Banks of a little River.

The Giants Stones.

From thence he proceeded in his Journey, and crossing the River *Miana* several times, by reason of its Windings, passed through the Town of the same Name adjoining, both so called, because they part *Media* from *Parthia*, and ascended a Ridge of Mountains, which are a Branch of Mount *Taurus*, at the Top of which stands a Castle, call'd the *Virgin's Castle*, because *Artaxerxes* is said to have built it on purpose to imprison a Princess of the Blood. As soon as you have passed these Mountains, and the River *Kesil-heuse*, which is at the Foot of them, you perceive a Change of the Air; for whereas *Media* is moist and cloudy, subject to high Winds and much Rain, the *Parthian* Air is dry to the highest Degree, without Clouds or Rain,

Miana, a River. The Virgin's Castle.

Rain for 6 Months often, and the Soil sandy, so that nothing will thrive without good Husbandry and Pains.

Parthia. *Parthia*, which was so long the Seat of the Empire of *Asia*, is now a large Province of the *Persian* Monarchy. It is the proper Demeans of the King, and therefore has no Governour, as the rest of the Provinces. It is extended 200 Lgs. in Length, and 150 in Breadth, being bounded by the Province of *Corassan* on the E. by *Fars*, which is properly *Persia*, on the S. by *Azarbeyan* or *Media* on the W. and *Guilan* or *Mezanderaan*, which compose the Province of *Hyrcania*, on the N. The Air is dry, and though the Mountains produce nothing but Thistles and Briers, yet the Plains are fruitful and pleasant, where there is Water. This Province has above 40 Cities, which is much in *Persia*, because it is not peopled according to its Extent. The *Parthians* took their Original from the *Scythians*, who were the *Lesser Tartars*, who now inhabit the North of *Persia*, called *Tuzbecs*, and formerly *Bactrians*. The first Village you come at is *Zerigan*, which is fam'd for its Antiquity, being founded, according to the *Persian* Records, in the Reign of *Ardechir-babezon*, several Ages before *Christ*, and then passing over delightful Plains, you come to *Sultany*.

The Original of the Parthians.

Sultany described. This City is seated at the Foot of a Mountain. It seems afar off a very neat well built Place, but does not appear so when you are within it; yet, some of the publ. Buildings are very remarkable, both for the Structure and Architecture. It contains about 3000 Houses, and besides, there are very vast Ruines, which make it probable, that it was once the largest City of the Kingdom, as their Histories relate. Provision is very plentiful and cheap there, and the Air wholsome, tho' very changeable, the Mornings, Evenings and Nights being very cold, and Days hot. It is said to be the most ancient City in *Parthia*. The Predecessors of *Ismael Sophi*, and the last *Armenian* Kings, resided there, and then, 'tis said, that it contain'd 400 Christian Churches; but being demolish'd by *Tamerlain*, and several other *Turkish* and *Tartarian* Princes, the Christians have deserted it.

From hence he travelled through a lovely Country, and passing through several Villages, surrounded with Meadows, and Groves of Willow and Poplar, he came

Ebber, or, Barontha. to *Ebber*, a small City for the Buildings, for it contains not above 2500 Houses, but taking up a large Extent of Ground, because they have so many large Gardens. A small River runs through the midst of it. It is thought to be called anciently *Barontha*. The Situation is delightful, the Air wholsome, and Soil plentiful. It is govern'd by a *Darogue*, or Mayor; and the *Mirtsheccar-Bashi* has his *Tahvil*, or Salary, charg'd upon the Revenue of this City. The *Persian* Geographers assert, that this City was built by *Rei-Cosrou*; and that *Darab-Reihoni*, or *Darius*, began to build the Castle; and that *Skender-Roumi*, i. e. *Alexander* the Great, finish'd it. At *Ebber* they begin to speak the *Persian* Language, which is spoken all the Way to the *Indies*, more or less pure, as the People are more or less distant from *Schiras*, where it is spoken in the greatest Perfection.

Cubin described. From *Ebber* he travelled to *Persac*, leaving *Cubin*, 5 Lgs. on the Left Hand. This great City is seated in a delightful Plain, 3 Lgs. from Mount *Alou-vent*, one of the highest and most famous Mountains in *Persia*. It is 6 Miles in Circumference, containing 12000 Houses, and 100000 Inhabitants, of which there are 40 Families of *Christians*, and 100 *Jews*, but all very poor. It was formerly Walled, but they are now all fallen down. The chiefest Ornament and Grace of

The King's Palace. *Cubin*, is the King's Palace, and the great Number of the Seats of the *Persian* Grandees, who attend upon the Court, which has its continual Residence there. There are but few Mosques in *Cubin*; but the Royal Mosque, called *Mosshid-Scha*, is one of the largest and

Water. faires in all *Persia*. This City has no Plenty of Water, but the City is supplied by Subterraneal Channels, called *Kerises*. The Air is thick, and not very healthful, and the Soil dry and sandy, yet it abounds with Meat, and all manner of Provisions, which are brought thither from the Countries adjoining, which having many well water'd Plains, feed a world of Cattel, and produce prodigious Quantities of Corn. The faires

Grapes. Grape in *Persia*, called *Shaboni*, or the Royal Grape, being of a Gold Colour, and transparent, of which the strongest and most luscious Wine in the World is made, grows here. The Air is very hot in Summer all the Day long, but the Nights are so cold, that if a Man expose himself never so little to the Air, after he is undress'd, he is sure to fall sick. Some of our *European* Geographers affirm it to have been the City, which the *Greeks* called *Ragea*, or *Reges*, after *Europa* and *Arsacia*, and now *Cubin*, from a King of that Name. It is govern'd by a *Darogue*, or Mayor, chosen every Year, whose Office is worth to him 600 Tomans, or 2000 Pounds.

Rages of old

Having passed *Cubin*, he came to *Kaiare*, and having lodg'd there, travelled the next Night (for that's the general Way of Travelling all over the East, to avoid the Heat of the Sun, which would melt both Man and Beast in the Day-time) by *Segs-abad*, which signifies, *The Habitation of Dogs*, to *Sava*, a great City, seated in a sandy and barren Plain. It is 2 Miles in Circuit, and Walled round, but so thinly inhabited, that, unless it be in the midst of it, it runs to Ruine for want of Inhabitants. The Historics of *Persia* unanimously consent, that the whole Plain of *Sava* was formerly a Salt-Marsh, or Lake; but how it was dried is not certainly known: Some fabulously report, that *Haly*, *Mahomet*'s Son-in-Law, drain'd it by a Miracle; and to preserve the Memory of it, the People built this City in the midst of it.

Sava described.

Just over-against *Sava*, Eastward, at 4 Lgs. Distance, stands a Place of Pilgrimage, the most famous for the Devotion of the *Persians*. They call it *Ech-muail*, that is to say, *Samuel*; for they believe, that that Prophet was there interr'd, and over his Tomb is built a most sumptuous *Mausoleum*, in the midst of a magnificent Mosque. Over-against it is still to be seen some Remnants of the City of *Rey*, which is reported to have been once the biggest City of *Asia*, next to *Babylon*. The *Persian* Histories relate, that it was divided into 96 Quarters, every one of which had 46 Streets, and every Street 400 Houses, and 10 Mosques; that there were in it 6400 Colleges, 16600 Baths, 15000 Towers of Mosques, 12000 Mills, 1700 Channels, and 13000 Inns, and People almost numberless. The Chronicle of the *Magi* make *Chus*, the Grand-child of *Noah*, to be Founder of it; and *Ptolemy* calls it *Raquaia*; but the vulgar Opinion is, that it was founded by *Hoüsheing Pischdadi*, or the Chief Justitiary, and enlarged by *Marroutsher*, his Successor. It was destroy'd by the *Mahometans*, who being divided into 2 Sects, *viz.* Of *Shia* and *Sunnis*, made War one upon the other for 60 Years together. The Sect of *Sunnis* called in the Assistance of the *Tartars*, and, by their Help, bore down the Sect of *Shia*. In these Wars the *Tartars*, by their frequent Incursions, destroy'd the potent *Rey*, and reduced it to nothing before the 60oth Year of their *Hegyra*. The Soil about it is fertile and pleasant, and produceth Plenty of Fruits; but the Air is unhealthy, making the Skin swarthy, and breeding Agues.

Ech-muail.

By whom founded and enlarg'd

The Soil and Air.

Departing from hence, he passed by an Hill, called *Coub-Telism*, which has this remarkable and peculiar to it; That as you approach nearer and nearer to it, it shews a different Form, and varies both in its Bigness and Figure; that the Top or Point of it is always in Sight, and you would think, that it turned that Side, which Way soever you stood to look upon it, which ariseth from the Variety of the *Optick Medium*, through which 'tis beheld. It consists of a black Earth, that crumbles like the burning Mountains; but it is not known to have vomited Fire. The People of the Country say, that they that ascend that Mountain never come back again.

Coub-Telism, a Mountain.

Having passed it, he came to *Com*, a large City, seated in a Plain, by a River side. It contains 15000 Houses, as the People say, and is surrounded with a Moat and Wall, flank'd with Towers, but half ruin'd. In the River are 2 fair Keys, and at the East of the City a fine Bridge. It contains many large and beautiful Market-places, both for Wholesale and Retail: Though it be a City of no great Trade, yet they export large Quantities of Fruit, dried and raw, and particularly Pomegranates, Sope, Sword-Blades, and Earthen-Ware, both white and varnish'd, which hath this peculiar Property, that it cools the Water in Summer both wonderfully and suddenly, by reason of its continual Transpiration. It contains a great Number of fair Inns, Mausoleums and Mosques, wherein the Grand-Children and Descendants of *Ali*, which are the *Persian* Saints, called *Iman-Zadæ*, Sons of the Apostles, lie interr'd. One of these Mosques is the most celebrated in the East. It has 4 Courts, of which the first is planted with Trees and Flowers, like a Garden, with Terrasses on each side; the second is not so beautiful as this, but the 3d is nothing inferior to it,

Com described.

Earthen-Ware.

A famous Mosque.

being surrounded with Apartments 2 Stories high, and having a Terrass, Portico and Canal. In the 4th are the Chambers and Lodgings for the Priests, Governours and Students, that live upon the Revenues of the sacred Place. Fronting these Courts stands the Body of the Structure, consisting of 3 great Chapels upon a Line. To the Middlemost belongs a Portal, 18 Foot high, of white Marble. The Top is a large Half-Duomo, overlaid without with large square *China* Tiles, painted with *Moresco* Work, and embellish'd within with Gold and Azure. The Folding-Doors are plated with Silver, gilt with Vermillion. In it The Tombs. stands the Tomb of *Fatima* in the midst, which is overlaid also with *China* Tiles, painted *A-la-moresco*, and over-spread with Cloth of Gold, which hangs down on both sides. It is enclosed with a Grate of massie Silver, 10 Foot high, distant half a Foot from the Tomb, and at each Corner are Apples of fine Gold. In the 2 Chapels on each side stand the Tombs of the 2 last Kings of *Persia*, viz. *Abas* and *Sophi*, both very magnificent; but on that of *Abas* are written in large Characters of Gold 7 Elegies upon *Mahomet* and *Haly*, made by the Learned *Hasan-Caza*. They are a rare Piece of Eloquence, and in them may be seen not only the Genius of *Persian* Poetry, but the Transports of Other sumptuous Buildings. the *Mahometan* Devotion. The City contains several other beautiful and sumptuous Edifices, and would be a very pleasant Place, were it not for the Heat, which is excessive, there being no Place in all *Persia* where the Sun scorches more violently, yet is the Air wholesom, and Soil fruitful, especially in Pistachio's. The People are very courteous and civil. The River that passeth by it is but a small Current in Summer, but being swell'd with the Snow-waters that fall from the Mountains, it overflows great part of the City.

From *Com* he travelled 4 Lgs. over very fertile Plains, stored with plenty of Villages, to *Cassem-abad*, a Town consisting of about 300 Houses, belonging to the Queen-Mother, as her Dowry, from whence he passed over a dry sandy Plain, without Villages or Water, to *Abistirin*, or, Sweet Water, because there is a Fountain of fair Water, and went to *Cashan*.

Cashan described. This City is seated in a large Plain, near an high Mountain, 1 Lg. in Length, and a Quarter of a Lg. in Breadth, running out from E. to W. in Form of an Half-Moon. There is no River near the City, but it is supplied with Water by Canals, deep Springs and Cisterns. It is encompassed with a double Wall, flank'd with round Towers, after the old Fashion, and hath 5 Gates. The City and Suburbs, which are the most beautiful, contain 6500 Houses, as the People say, 40 Mosques, 3 Colleges, and about 200 Sepulchres of the Descendants of *Ali*. The principal Mosque stands right against the Market-place, and has a Tower, like a Steeple, of Free-Stone. The Houses are built of Earth and Brick, but are none of them remarkable. The Bazars and Baths are well built and kept, and The Bazars and Baths. the Royal Inn is the fairest in all *Persia*. The Wealth and Trade of *Cashan* consists of the Manufactury of all sorts, Stuffs, and Tissues of Gold and Silver, plain and flower'd, Sattin and Velvet; and there is no City in *Persia* that makes more. *Cashan* stands in a good Air, yet so violently hot, that 'tis ready to stifle you The Air. in Summer, which is occasion'd by the Reflection of a Mountain, that stands on the S. of it; but the greatest Inconvenience that attends this City, is the great Number of Scorpions which infest it, and the Parts adjoining, when the Sun is in *Scorpio*, and therefore there is no body but has by him several Sovereign Remedies against the Sting of this Creature. Cattel and wild Fowl are not plentiful there, but it abounds in Corn and Fruits. They furnish *Ispahan* with Fruits, especially Melons and Water-Melons, all the Season. Several *European* Authors think this City to be *Ambrodux* or *Ctesiphon* of the Ancients. It is said to be founded by a Virgin, who therefore laid the first Stone of it when the Sun enter'd *Virgo*, and nam'd it *Cashan* from her Grand-father. It is governed by a *Darogue*, or Mayor, who holds his Place 2 Years.

From *Cashan* he passed over a Mountain, and then descended into a deep Valley, very narrow, and about a Lg. in length, which is so well stor'd with Houses, Vineyards and Gardens, so close one to another, that they all seem but one Village. Several delightful and clear Streams preserve the Summer so wonderfully cool here, that the Roses were not blown, nor Corn or Fruit ripe, when the Harvest was gotten in at *Cashan*. Several Modern Authors assert, that *Darius* was murthered by *Bessus* in this Valley, and that not improbably, because History says, *Bessus* fled to *Bactriana*, and *Nibarzanes*, his Comrade, to *Hyrcania*, and here the Road begins to these 2 Provinces, and so by *Moutshaçour*, a large Village of 500 Houses, to *Ispahan*, which is so thick encompassed with Villages, that you would think you are in the Suburbs 2 Hours before you come at it.

There are 2 other Roads, which it is necessary for Travellers and Merchants not to be ignorant of, which I shall briefly describe, *viz.* From *Warsaw* to *Ispahan*, The Road from Warsaw to Ispahan. and from *Ispahan* to *Mosco*.

Warsaw, which is seated upon the Left Hand of the *Vistula*, is the Ordinary Residence of the King of *Poland*. Beginning your Travels here to *Ispahan*, you must go to *Lublin*, which is 6 Days Journey, and in 5 more you may get to *Iluove*, where the Customers open all the Bales of the Merchants Goods, and exact 5 by the Hundred.

From *Iluove* you go *Jassovicer* in 12 Days. This is the last City of *Poland* next *Moldavia*. Here, if you sell any Goods, you must pay 5 *per Cent.*

From thence you go to *Yasshe* in 8 Days. This is the Capital City of *Moldavia*, and the Residence of the *Vayvod*, which the G. Seignior sends to govern that Country. Here all Bales of Merchandices are also opened, and there is a Roll of all that the Merchant is to pay, which amounts to 5 *per Cent.*

From *Yasshe* the Way lies through *Ourshaye*, to which you come in 3 Days. This is the last City in *Moldavia*.

From hence to *Akerman* you go in 4 Days, and the Customs amount to 4 *per Cent.* but they take the Merchant's Account.

From *Akerman* you go to *Ozou*, where they take 2 *per Cent.* and so to *Precop*, where they pay 2 and an half *per Cent.* but they trust to the Merchant's Word at both Places.

From *Precop* the Road lies to *Kaffa*, where also the Custom is 3 *per Cent.* And the Journey from *Warsaw* to *Kaffa* is 51 Days by the Waggon, which is the usual Way of Carriage in that Country, and the Customs in all come to 18 and an half *per Cent.* to which you must add the Carriage and Passage by Sea to *Trebisond*, where Trebisond. you pay 3 Piasters for every Mule's, and 4 for every Camel's Load. To avoid something of this Charge, the *Armenians* ship their Goods usually at another Port, called *Onnie*, which is a very good Port, and where they never pay above a Piaster and half for a Camel's Load.

There is another Road from *Warsaw* to *Trebisond*, shorter by 3 Days Journey, *viz.* From *Warsaw* to *Yasshe*, in the former Road, and from thence by *Galis*, a City of *Moldavia*, *Megin* and *Mangalia*, the best Port in the Black-Sea to the W. to *Trebisond*, from whence to *Erzerom* is 5 Days Journey, from which to *Ispahan* you go the usual Road.

The other Road from *Ispahan* to *Mosco* lies thus. You The Road from Ispahan to Mosco. must travel the usual Road before mention'd, to *Shamaquai*, and from thence to *Derbent*, which the *Turks* call *Demir-Capi*. This is the last City in the *Persian* Jurisdiction, by which the River *Shameurkan* runs.

From *Derbent* you may travel to *Terarck* in 8 Days, where hiring Barks with 12 Oars, you may be at *Astracan*, by the Help of a little Sail, which they put up, if the Wind serves, in 4 or 5 Hours, but if you row only, it will take up 9. When you embark upon the *Caspian* Sea, you must provide your self Water for the first 3 Days, because the Water on the Coast is bitter for that Time, but afterwards 'tis very good. At *Astracan* the Merchants are all searched by the Customers, and they take 5 *per Cent.*

From *Astracan* to *Mosco* you take Shipping in great Barks, that make use both of Oars and Sails, rowing against the Tide, and weigh all you carry aboard, for which you must pay 14 Caya, and 3 Abassi's and an half for every Pound.

From *Astracan* you sail to *Courinya*, and so in Order by *Sariza*, *Sarataf*, *Samarar*, *Senuriskat*, *Coulombe*, *Casan*, *Sabouk-sha*, *Godamijan*, *Triguina*, *Mouron* and *Casin*, to *Mosco*, which they count 2950 *Shagarons*, or 590 *Italian* Miles. At *Sarataf* you may go ashore, and so go by Land to *Mosco*, in Waggons, when the Snow is gone, and on Sledges while it lies, and then the Way lies thro' *Inseras*, *Tymack*, *Canquerma* and *Volodimer*, a City bigger than *Constantinople*, to *Mosco*, which Journey may be finish'd in 35 Days; but this Way is never used, but upon Necessity, when the River is frozen, because in the Passage from *Sarataf* to *Inserat*, which is 10 Days Journey, there is nothing to be had for Man or Horse. At *Mosco* the Customs are the same as at *Astracan*, viz. 5 *per Cent.* and all the *Asians*, viz. *Turks*, *Persians*, *Armenians*, and others, lodge in a sort of Inns; but the *Europeans* lie in a Place by themselves all together.

CHAP.

CHAP. IX.

Perſia *Deſcrib'd*, &c.

MR. *Tavernier* having given us an Account of the Roads to *Iſpahan*, the Metropolis of *Perſia*, comes to deſcribe that vaſt Empire, and that City, and ſays, that,

Perſia deſcribed.

Perſia, according to the preſent State of it, is bounded on the N. with the *Caſpian* Sea, on the S. with the Ocean, on the E. with the Territories of the Great Mogul, and on the W. with the Territories of the G. Seignior, and contains in it only *Perſia* properly ſo called, but a great part of the ancient *Aſſyria*, *Armenia* the Greater, *Parthia*, *Media*, and the Kingdoms of *Lar* and *Ormus*, as far as the Kingdom of *Scindi*. The chief Parts of it are, 1. The Greater *Armenia*, which lies between the 2 Rivers *Araxes* and *Cyrus*, now called *Iran*, or *Caran-bag*. This Country is one of the moſt beautiful and richeſt Pieces of Land in all *Perſia*, and has theſe principal Cities, *Erivan*, *Nachſivan*, *Zulpha*, and *Van*. 2. *Diarbeck*, or *Meſopotamia*, between *Euphrates* and *Tigris*; the chief Cities whereof are, *Bir*, *Car-emir*, or *Diarbequir*, *Ourfa*, *Mouſul*, *Gazire*, *Merdin*, &c. 3. *Curdiſtan*, or *Aſſyria*, lying on the E. ſide of the River *Tigris*, from the Lake *Van* to the City of *Bagdat*. The chief Cities are, *Nineve*, *Sheriſoul*, *Amadie*, *Snerne*, *Beelis* and *Salmaſtre*. 4. *Hierack-Arabi*, or the Country of *Babylon*, or *Chaldea*, of which the chief Cities are, *Felougia* upon *Euphrates*, *Bagdat* upon *Tigris*, *Merſhed-Ali*, *Gourno* and *Balſara*; and in the Country of *Bourous*, *Sharaban*, *Eronnabat*, &c. 5. *Hierak-Agemi*, or the ancient *Parthia*, the principal Cities whereof are, *Iſpahan*, *Touſhercan*, *Hamadan*, *Caſhan*, *Kan* and *Casbin*, and, perhaps, *Yesd*. 6. *Shirvan*, which lies along the *Caſpian* Sea, where ſtand the Cities of *Derbent*, or *Demir-Capi*, *Baku* and *Shamaki*, and the Province of *Edzerbaſjan*, which has theſe Cities, *Tauris*, *Ardevil* and *Sultany*. Theſe 2 Provinces are the ancient *Media*, within a very little. 7. *Keilan* and *Mazandran*, formerly *Hyrcania*, wherein are the Cities and Towns of *Firuzouk*, *Sukar-Abad* and *Mionikielle*, at the Entrance of the Mountains, *Giru*, *Talara-peſti* and *Saru*, in the Plains; *Ferh-abad*, *Ciarman* and *Gſeref*, toward the Sea. 8. *Eſtarabad*, or *Margiana*, which extends it ſelf to the River *Ruth-khane-kurkan*, which the Ancients call *Oxus*; the chief Cities whereof are *Eſtarabad*, *Amul* and *Damkam*. 9. The Province of the *Usbecke-Tartars*, comprehending all the ancient *Sogdiana* and *Bactriana*: The chief Cities of it are *Balk*, *Samarcand* and *Boccara*. 10. *Coraſian*, formerly *Aria*, and ſome part of *Bactriana*, of which theſe are the principal Cities, *Eri*, *Meſhed*, *Niſabar*, *Thun*, &c. 11. *Sableſtand*, of old *Peloponneſus*, whoſe chief Cities are *Beksabat*, *Asbe*, *Buſt*, *Sarents*, *Candabar*, with the Territories belonging to it, *Duki* and *Alunkan*, which ſtand upon the Frontiers of the Great Mogul's Dominions. 12. *Sigiſtan*, anciently *Drangiana*, which has theſe great Cities, *Siſtan*, *Shalatz* and *Kets*. 13. *Arachoſia*, which has no conſiderable Cities. 14. *Makran*, bordering upon the Sea of *Mogoſtan*, formerly *Gedroſia*, which has theſe conſiderable Cities, *Makran*, *Firtik*, *Chalak*, and the Port of *Guadel* towards *Guzarat*. 15. *Kerman*, of old *Caramania*, which reaches as far as the Gulf of *Ormus*, and has theſe Cities, *Kerman*, *Bermazir*, the Port of *Kuheſtek*, and the Cape of *Faſques*. 16. *Farſiſtan*, the chief Cities of which are *Schiras*, *Caſaron*, *Benarou*, *Firus-abat*, *Darab-guier*, &c. to which *Laraſtan*, of which *Lars* the head City, is now added ſince the Conqueſt of it by *Sha-Abas*, and the Kingdom of *Ormus*. 17. *Curſiſtan*, anciently *Suſiana*, where *Euphrates* and *Tigris* joining together ſeparate from *Chaldea*: The principal Cities of it are *Suſter*, of old *Suſa*, the Metropolis of the Empire in King *Ahaſuerus*'s Days, *Ahawas*, *Scabar*, *Rambormus*, &c.

It contains the old Armenia, Meſopotamia, Aſſyria, Chaldea, Parthia, Media, Hyrcania, Margiana, Sogdiana, Bactriana, Peloponneſus, Gedroſia, Caramania.

The chief Ports in the *Perſian* Gulph are *Bander*, *Abaſi* and *Bander-Congo*.

The Air.

The Air in *Perſia* varies according to the Situation of it.

The Country of *Edzerbaijan* is very cold, but very healthy.

The Air of *Mazandran* and *Guilan*, are very unwholeſome, becauſe the Country is fenny, and the Water bad; ſo that the People look upon the Perſon that the King ſends to govern them, either to have been a Robber, or a Murtherer.

At *Iſpahan*, which ſtands almoſt in the Middle of *Perſia*, they have 6 Months of hot, and as many of cold Weather, when the Snows ſometimes are ſo deep, that they are unpaſſable, yet they look upon them as Omens of Plenty when deepeſt. They have little Rain but in *April*. In the Southern Provinces the Heats are ſo exceſſive, that they kill abundance of *Europeans*, eſpecially if they drink much.

Rivers.

Perſia abounds with ſmall Rivers and Brooks, but has not one Navigable River but the *Araxes*, which carries only ſome flat-bottom'd Boats, and being water'd by Cuts drawn out of theſe, it is made very fruitful, but they are by that means made very low and ſhallow.

Soil.

The whole Country is very mountainous, and the Mountains for the moſt part are very dry and barren, but yield them Salt and Stone. They have no Trees almoſt but what grow in their Gardens. In ſome of their Plains the Sand is nothing but Salt, but not ſo ſavoury as ours in the North. They have Mines of Gold, Silver, Copper, Iron and Steel, but their Gold and Silver coſts ſo much to dig and purifie, that 'tis not worth the Charge. Their Steel is very fine, but as brittle as Glaſs. The *Perſians* maintain but a ſmall Trade in Silk and wrought Carpets, and therefore Money is ſcarce among them.

Flowers and Fruits.

The Flowers of *Perſia* are not comparable to ours in *Europe*, neither for Variety nor Beauty. The Chief are Lilies and Roſes, of which they make great Quantities of diſtilled Waters, which they ſend into all the Eaſtern Parts of *Aſia*, but their Fruits are far better, and of as many ſorts as ours. Their Melons are moſt excellent and plentiful, and ſo wholſome, that there is no danger of eating them to exceſs. Their Peaches are very large, and Apricots very delicious; but their Apples, Pears, Oranges, Granates, Prunes, Cherries, Apricots, Quinces, Cheſtnuts, Medlars, and other ſorts of Fruits, are not generally ſo well taſted as in *Europe*. They have Almonds alſo and Figs, but few Small-nuts and Wall-nuts. All their Oil comes out of the 2 Provinces of *Mazandran* and *Guilan*.

Grapes of 9 or 10 ſorts.

Their Grapes are of 9 or 10 ſorts; but their Wines are generally made of the white Grapes, and if they will have them red, colour them with their black Grapes ſteep'd in them; for the Wine made of their black Grapes will not keep, except thoſe about *Schiras*, where their red Wine is very good, and pleaſant to the Stomach; but the Wine of *Yesd* is the moſt delicious of all the *Perſian* Wines, and cheapeſt.

Dates.

Their Dates, if eaten during the Heats, make the Body to break out in Botches and Boils. They have a Tree, called the *Kerzerhe*, i. e. The Aſſes Gall, becauſe it is bitter. It is ſaid, that that part of the Root of this Tree that ſpreads toward the E. is Poiſon, and that which ſpreads towards the S. is an Antidote againſt it, and that the Wood of this Plant makes excellent Coal for Gun-powder.

Herbs and Roots.

All Herbs and Roots are very good in *Perſia*, but eſpecially their *Roman* Lettice. They have no Pulſe, nor can Peaſe be made to grow among them. The *Carmelites* carry'd over thither Aſparagus, Artichoaks and Succory, which were never ſeen there before, and they thrive well.

Beaſts.

The Beaſts for Service in *Perſia* are, Horſes, Mules, Aſſes, Oxen and Camels. Their Horſes, which the *Perſians* uſe commonly for travelling, are but ſmall, but ſtrong and light, and will travel great Journies without tiring. They have 2 ſorts of Aſſes, *viz.* Some bred in the Country for Burdens; others a ſort of *Arabian* Aſſes, that are ſwift and very handſome, excelling in Price the common ſort of Horſes. Some Parts of *Perſia* are troubled with wild Beaſts, as, Lions, Bears and Leopards; but they do no great Miſchief. They have alſo wild Boars, Aſſes, Harts and Goats, which they take great Delight in hunting; and for this Sport they uſually make uſe of Dogs, but if their Game outrun them, they let fly one of their Hawks, who preſently ſeizes the Head of the Beaſt, and while he is continually picking and diſturbing him, the Dogs are preſently at his Heels, and ſo he is taken. They have alſo a certain Beaſt, call'd an *Ounce*, which has a ſpotted Skin,

Skin, like a Tiger, but will be, nevertheless, very gentle and tame. This an Horse-man will carry behind him, and when he sees a wild Goat, he sets down the Ounce, which is so nimble, that in 3 Leaps he will be upon the Back of the wild Goat, though he be himself a very swift Creature, and strangles him with his sharp Teeth. They have also Porcupines, that sometimes kill Men. Camels. The Camels of *Persia* are large and strong, and will carry twice the Weight that others do. They make fine Socks and Girdles of their Hair, which are sometimes sold for 2 Tomans apiece, especially when they are white, because white Camels are rare. Their Oxen have a great sharp pointed Bunch on their Back, near the Neck, and some have it bigger than others. The Country People make use of them to carry their Loads and ride on.

Fish. Fish is also plentiful among them. In the River *Aras* there is abundance of Carps, Trouts and Pikes, but in all the other Rivers of *Persia* there is but one sort of Fish, which is a kind of Barbel: Where the white White Mulberries. Mulberries grow by the River side, so soon as they begin to bear Fruit, the Crabs, as big as the Palm of a Man's Hand, come out of the River, after Sun-set, and climb the Trees to eat the Fruit, and then by Break of Day return into the River again. They are delicate Food, far beyond a Craw-Fish, but are an hot provocative Diet. During the Frost they bring from the *Caspian* Sea great Store of Salmon, or Salmon-Salmon. Trouts, 4 or 5 Foot long. The Province of *Media* is Sturgeon. well stor'd with Sturgeon from the Mouth of the River *Araxes*. In the same Sea there is a certain Fish like a Carp, which they salt and dry like our Herrings. Salt Fish is brought from the *Persian* Gulph, and transported over the whole Kingdom.

Birds and Fowls. Their Fowls are much the same with ours in *Europe*, only they have no Quails. Their Pigeons are wild, except some few which they keep tame for Decoys, and because the Christians are not allow'd to keep them, they will sometimes turn *Mahometans* to have that Privilege. There are above 3000 Pigeon-Houses in *Ispahan*, and most of them belong to the King, who draws a greater Revenue from the Dung than the Pigeons. Powltry is very plentiful in *Persia*. The *Armenians* have learned the way to fat Capons from the *Europeans*. They have all sorts of Water-Fowl, and upon the Frontiers of *Media* and *Armenia*, about the Time the Corn begins to appear, there come great Numbers of Birds, like to our Ouzels, which devour the Locusts, with which, at that Time, the Ground is covered, though the *Armenians* attribute the Destruction of them more to their Processions and Holy Water, Processions. which they use at that Time 3 Days together. The Country has many Birds of Prey, as Falcons, Sparrow-Hawks, Lanerets, &c. which they teach to fly at the wild Boar, Ass and Goat; and others at Cranes, Herons, wild Geese and Partridges, and the *Persian* King, who delights much in this sort of Hunting, keeps above 800 of them.

In regard there is little Stone or Wood in *Persia*, all the Cities, except some Houses, are generally built Their Houses how built. with Earth, but so wrought, that it may be cut like Turf, and between every Layer of Earth 3 Foot thick, 2 or 3 Rows of Brick baked in the Sun, and over them pounded Straw, to keep them from cracking with the Sun. The Buildings which are made of Brick bak'd in the Sun, are very handsome; for, after the Wall is raised, the Mason plaisters it over with Morter, and then washeth it over with Lime, mix'd with *Muscovy* Green and certain Gum, to make it more glutinous, and then rubbing it over with a coarse Brush, it becomes damask'd and silver'd, and looks like Marble. But the poorer sort are contented with bare Walls, or some coarse Plaistering, that costs little. The Form of their Houses. Their Houses consist of a large Portico in the middle, and Chambers round it. All their Rooms are arch'd, and the Tops of their Houses terrassed. Within, their Rooms are curiously painted with Birds and Flowers. Their Glass is of various Colours, not only because it is beautiful to the Eye, but because it cannot be so easily peer'd through. The Door and Wainscotting is of *Tebinar* Wood, which is very noble and neat. In the Fore-part of their Dwellings they display rich Carpets, Matresses, Cushions and Coverlets, and all the richest Furniture they have. The *Haram*, or Womens Apartment, is very meanly adorn'd, because they are never visited by any Man, but their Husbands. Their Chimneys are very narrow, because they burn all their Wood upright, to avoid the Smoak, and they make but small Fires, because Wood is scarce. They have no Beds, but in Winter sleep upon a Plank, covered with a Carpet, and in Summer in the open Air. Their Houses have no Ornament in the Front, unless it be in some that are lately built.

Ispahan, or, as the *Persians* call it, *Spahan*, and *Sphaon*, lies in the Province of *Yerach*, which was once a Part of *Parthia*, and is the Capital City of all *Persia*. It is a very large Place, and the King's Court usually resides at it. It was formerly 2 contiguous Towns, nam'd *Haider* and *Neamed-Olahi*, till *Sha-Abas* having conquer'd the Kingdoms of *Lar* and *Ormus*, and observing their Situation to be convenient for his Design to enlarge his Dominions E. and W. enlarged them, and resided there. It is seated in a vast Plain, 15 or 20 Lgs. in Extent. About 2 Lgs. from *Ispahan*, Southward, is a very high Mountain, where are the Remains of a Castle, in which *Darius* kept himself when his Army fought *Alexander*, and in it is a Grotto, where dwells a *Dervis* usually. The Number of People in it is not great, because every Family has an House and Garden to themselves, which being full of Trees, the City appears like a Wood, scarce any thing being visible at the Approach, but the Towers of the Mosques. The Walls are of Earth, with some pitiful Towers in them, and the Moat is always dry. It has 10 Gates made of Planks, rudely joined together, and covered with Iron Plates. The Streets are The Streets. narrow and uneven, and in many Places so dark, by reason of the Arches that go from one House to another, that such as pass them are forced to feel their Way for 200 Paces together. At every Door there are Troughs to receive the Filth and Ordure of the Family, which the Country-men every Morning come for to dung their Ground; and 'tis observable, that they are more covetous to have the Dung of the *Armenians*, *Franks* and *Jews*, that drink Wine, than the *Persians*, that drink none. The Streets are not pav'd, and so are dusty in Summer, and miry in Winter up to the Mid-legs, for which Reason it is, that the *Persians* always ride through the Dirt, with several Footmen, which they call *Chatres*, attending them, which they account a Piece of Grandure. The Fortress of The Fort. *Ispahan* is not considerable, being without any Defence, unless of some sorry Towers made of Earth. The Great *Meidan*, or Market-place, built by *Sha-* The Meidan. *Abas*, is above 700 Paces long, and between 2 and 300 broad. It has Buildings on all the 4 Sides, and the Fronts are all portico'd and terrass'd. The lower parts are Shops for Brokers, Sadlers, Booksellers, Pedlars, &c. and the Chambers are inhabited by the most infamous *Curtisans* of the City. In the midst of it stands a Mast of a Ship, or May-Pole, where the People exercise Shooting at Birds; but if the King comes, they set up a Golden Cup for him to strike down with his Arrow, upon his Horse running full Speed, and turning back upon him to shoot. *Sha-Sefi* in 5 Courses struck down Shooting. 3 Cups. The End of the *Meidan* next the Palace is always kept clean, and without Shops, because the King comes often abroad in the Evening to see the Lions, Bulls, Bears, Rams, Cocks, and other Creatures fight, the Sport of breaking the Egg, and the *Maid-Marrians* tumbling Tricks and antick Postures. The Market-places are very secure and safe for Goods, tho' but slightly lock'd, being guarded both within and without all Night. The King's Palace here has no- The King's Palace. thing of Beauty, either in the Building or Gardens, being nothing but pitiful low Galleries, except the 4 Rooms, which they call *Divans*. The most remarkable Things here are, the Gate of *Ali*, whose Threshold is a Step of a round Stone, to which the *Persians* shew great Respect, for no Body dares tread upon it, and many in Devotion kiss it, and the Gate is always guarded by great Numbers of *Sofi*'s. All Malefactors that can make their escape into a Court beyond this A Sanctuary. Gate, as also into the King's Stables or Kitchin, are in a safe Sanctuary. By the Palace stands the most celebrated Mosque in the City, called the *King's Mosque*, The King's Mosque. because it was founded by *Sha-Abas* the First. Before this Mosque is a Parvis, or Walk, which in the midst of it has a Bason of Water like a *Polygone*, over which is a Porch painted and varnish'd with blue, yellow, and many other Colours, in great Flowers: At the End of it are 2 Gates, plated over with Silver, and emboss'd with Curiosities here and there; through which you pass into a large Court pav'd with great smooth Stones, and before you stands the Mosque with 5 Gates, which have each of them their Porches. The middle Porch is large and spacious, with a vast round *Dome* very well built, painted and varnish'd. The

Ispahan described.

Its Situation

Walls

Walls of the Mosque are of white Marble for a Fathom high; but the rest, like the *Dome*, is painted and varnish'd with divers Colours. The Pavement is large, and made of very smooth Stones, and under the *Dome* is covered all over with lovely Carpets, and the outside of the *Dome* is faced with green Bricks varnish'd.

No Christians to go into the Mosque.

No Christians are permitted to enter into it, and if any one be seen or known to be there, they will cudgel him out like a Dog, but yet many get in in disguise. Some of the finest Things in *Ispahan* are the Street of *Tchebarbag*, the Bridge of *Aliverdy-Can*, and the Garden of *Hezar-Dgerib*.

The Street of *Tchebarbag*.

The Street of *Tchebarbag*, which signifies 4 Gardens, is near an 100 Paces broad, and near 2 *Italian* Miles in length. At the Entry of it is a Pavilion 2 Stories high, adorn'd with many Balconies and painted Windows. It is bounded on both sides with the Walls of Gardens, and little Houses at certain distances, which have all Pavilions and Doors into the Gardens. About 12 Steps from the Garden-Walls are rows of lovely Plumb-Trees on both sides, between which is a Canal of Water continually running. About the middle of this Street the River *Senderou* crosses, and over it is

The Bridge of *Aliverdy-kan*.

built a fine Bridge of pretty singular Structure. It is built of good Brick, with Edges of Free-stones, and supported with a great many little and low Stone-Arches. It is about 300 Paces long and 20 broad, but in the middle where Carts and Horses go, it is not above 4 Fathom abroad, neither is it higher in the Middle, than 'tis at both Ends. On each side it hath a Gallery covered with a Platform very commodious

The Garden of *Hezar-Dgerib*.

for Passengers. At the End of the Street is the famous Garden *Hezar-Dgerib*, which hath 6 Stories of Terrasses, the Earth of which is supported by Stone-Walls, and every Stone is a Fathom, one above another. There are a great many Alleys, which reach from one end to the other very streight and even, but at the Ends you must ascend at every Story 6 or 8 Steps. The chief Walk or Alley is very broad, and that which renders it altogether charming is a Stone-Canal in the middle of it, which receives the Water of the Canal that runs down the Street *Tchebarbag*, but is much more beautiful than that of the Street, because at every 2 Fathoms distance there are Pipes which spurt up Water very high. At each side of the Garden is a large *Divan*, built of Brick, and open on all hands, with a Fountain in the middle, and from every Story of the Terrasses there is a Sheet of Water that falls into a Bason underneath, from whence it runs into the Canal. These Things render the Garden a charming Place to the *Levantines*, whose greatest Delight is in enjoying the Cool; and this, indeed, is all that renders it admirable, for it has no such lovely Grass-plats and Borders of Flowers as are seen in our Gardens in *Europe*, nor close Walks of Honey-suckles and Jasmin, which would be mighty pleasant in those hot Countries; but 'tis furnish'd with abundance of Fruit-Trees and Planes, and 2 or 3 sorts of Flowers, which flourishing long, are a very pleasant Sight.

There are no Burying-places in *Ispahan*, but they are all without the City, as they are all over the *Levant*; *Zulpha*, or as others call it, *Giolpha*, is as it were the Suburbs to *Ispahan*, though it has been so increased for some Years, that it may pass for a large City, being a Lg. and a half long, and near half as much broad. The Inhabitants are a Colony of *Armenians* brought out of *Zulfa* in *Armenia* by *Sha-Abas*, and settled there. They were all at first poor labouring Men, but being employ'd by *Sha-Abas* to trade with his Silk into *Europe*, they soon became so exquisite in Trade, that several of them have left Estates of 2000 *Tomans*, and some of 20000. They have this Advantage above all the Christians in the East, that they enjoy Lands and Privileges, the King not permitting the least Injustice to be done them, nor that any *Mahometan* should live among them, which is the Cause of their daily Increase, by the coming of *Jacobites*, *Cophthites* and *Nestorians* to them. They are allowed to wear as rich Cloaths as the *Persians*, and to use Bridles of Gold and Silver, but the King names their Governour, whom they call *Kelonter*, who judges all their Differences, and taxes them to make up the Sum, which they are to pay the King Yearly. They have 15 or 16 Churches, Chapels and Nunneries, and so obstinately fixed to their Religion, that they will hear of no other, unless it be for Gain, and there they always play the Hypocrites. There are about 10 or 12000 *Banyans* in *Ispahan*, who are known by their yellow Complexions, or rather by a yellow Mark made with Saffron upon the Top of their Foreheads. They are all Bankers, and very knowing in Money, which they almost engross; here the rich Men put it into their Hands for Improvement, for none can get a considerable Sum but from them, and for it they will exact a severe Interest, *viz.* 18 *per Cent.* though *Mahomet*'s Law forbids Usury, and if it be known that they take it, the whole Sum will be confiscated.

Zulpha described.

The Riches and Privileges of the *Armenians*.

The *Banyans* and their Usury.

CHAP. X.

Of the Religion of the Persians *and* Armenians.

The Difference between them and the *Turks*.

THE Religion of the *Persians* is in Substance the same with that of the *Turks*, though no Nations of the World hate one another so much upon the Account of Religion; but the Difference doth not consist in the various Expositions of the *Alcoran*, but in the several Opinions which they hold concerning the first Successors of *Mahomet*. Those who are of the *Turkish* Belief maintain, that *Abou-beker* was the immediate Successor of *Mahomet*, as his Vicar or Vicegerent, and to him *Omar*, and to *Omar Osman*, and to *Osman Mortuz-Ali*, Nephew and Son-in-Law to *Mahomet*, by Marriage of his Daughter. *Osman* was Secretary to *Mahomet*, and was a Person of great Courage, as well as the other 3, who were valiant Soldiers and great Captains, and extended their Conquests more by Force of Arms, than Reason; and from thence it comes, that the *Sunni's* will not allow of Disputes, but propo-

The Sects of *Mahometans*.

gate and maintain their Religion altogether by Force: But the *Persians* affirm, that *Abou-beker*, *Omar* and *Osman*, are but so many Usurpers of the Succession of *Mahomet*, which belongs to *Haly*, his Nephew and Son-in-Law, only.

The *Persians* call themselves *Schiai*, because they think it enough to observe the Commands of their Law; and the *Turks*, *Sunni*, because, besides Matters of Obligation, they follow Councils of Devotion. These 2 Sects over-run the 3 principal Kingdoms of *India*, viz. *Mogul*, *Golconda* and *Visapour*; the King and Lords of the first and last being *Sunni's*, but their Subjects are most of them Idolaters. There are some *Schiai's* in the Courts of both Kings, because the Officers of the Armies are for the most part *Persians*, tho' in outward Shew they may, perhaps, follow the Religion of the Prince they serve; but the King of *Golconda* is a zealous *Schias*. The Months are the same with the *Persians* as with the *Turks*, save that the *Persians*, who know the Speculation of the Stars, and make Astronomical Calculations, regulate their Time according to the Course of the Moon; but the *Turks* begin their Account from its first Appearance to them, and so reckon one Day later than the other.

Their Months.

In *Persia* they call to Prayers but 3 Times a Day, *viz.* As soon as it is light, at Noon, and at Sun setting, and the same they do on *Fridays*; and this Call is not made from the Tops of the Steeples, as the *Turks* is, because from thence they might see the Women in the Houses, but from the Terrasses. The *Turks* and *Persians* make their Absolutions both alike, but in saying their Prayers they have this Difference, that the *Sunni's* hold their Hands one over another upon their Stomach, but the *Schiai's* observe no such Posture, but in time of Prayer lay down a grey Stone before them, which they always carry about them, and every time they prostrate themselves on the Ground, lay their Forehead on that Stone, which is made of the Earth of *Kerbela*, the Place where *Hussein*, the 2d Son of *Ali*, was killed by *Yezed Caliph* of *Bagdat*.

Their Times for Prayer.

The

Their Festivals.

1. That of *Hocen* and *Hussein*, and the Manner of celebrating it.

The Grand Festival of the *Persians* is the famous Feast of *Hocen* and *Hussein*, called *Aaschour*. Eight Days before this Feast begins, all are sad and melancholy, and either are cloathed with Black, or wear a black Turbant or Girdle; some of the more zealous sort black their Bodies and their Faces, and go naked up and down the Streets, with only a Covering over their Privities. They carry a Flint in each Hand, and knock them one against another, and wreathing their Bodies, and making a Thousand antick Faces, cry out, *Hussein Hocen*, *Hocen Hussein*, which they speak with so much Labour, till they foam again at the Mouth. In the Evening the devout People take them into their Houses, and feed them well. During these Days, as soon as Sun is set, they set up Pulpits for certain Preachers, who prepare the People that flock to hear them, for the Devotion of the Feast; no Man shav'd, baths, or companies with his Wife. The Manner of Celebration is this: So soon as the King is seated upon his Throne, which is placed in the midst of the *Dela*, with all his Nobility standing about him, the Great Provost mounted upon a fine Horse, and attended by certain young Lords, advancing with 3 Companies into the Great Piazza at *Ispahan*, every Company having the Thill of a Waggon carried before them, and upon every Thill, which was painted with a Grotesco of Gold and Silver, is a Bier 3 or 4 Foot high, covered with Sattin. When they come before the King, all the Company falls a running and dancing about with the Bier, and every one flings up his short Cassock, Girdle and Bonnet, and put their Fingers to their Mouth to whistle as loud as they can, while the naked People with the Flint-Stones in their Hands, run, knocking them together, and crying out, *Hussein Hocen*, *Hocen Hussein*, till they foam at the Mouth again, wreathing their Bodies, and making antick Faces, as before. After these 3 Companies come 2 more, with a little Bier upon their Thill, and in each Bier a little Child, which lies as if it were dead. They that accompany these 2 Biers, weep and sigh most sadly. These 2 Infants represent the Death of the Children of *Hussein*, as the former did *Hussein*'s Death. At this Solemnity the *Curtisans* weep sore, because they think their Sins are forgiven; and it is usual for the Companies to fight, accounting it a great Honour to shew their Courage in the King's Presence, and further believing, that if any one be killed upon that Occasion, he shall be Sainted, as, indeed, every one gives something toward his Interment. Upon the same side of the Room where the King stands, is a little Scaffold set up, covered with Tapestry, 5 Foot lower than the King's, and in the middle of it an Elbow-Chair, covered with black Velvet, where sits a *Mollah*, with 6 others standing round about him. The *Mollah* makes a Discourse upon the Death of *Hussein* and *Hocen*, about half an Hour long, and then the King gives him a *Calaat*, or Habit of Honour, as he does also to the others, but not so rich. When they have all put on their Habits, the same *Mollah* returns to his Chair, and makes a Prayer for the Health of the King, and the Prosperity of his Kingdom. These Ceremonies last till Noon, and then the King returns to his Palace, but the People carry the Biers up and down the City, and where-ever the Companies meet one another, they fall together by the Ears, and with great Clubs knock one another down.

2. The Feast of the Camel.

Some time after this Feast the *Persians* celebrate another Festival, which they call *Bairam*, or, *The Feast of the Camel*, in Remembrance of *Abraham*'s Sacrifice of his Son *Ishmael* (for they affirm, that *Ishmael* was to have been sacrificed, and not *Isaac*; and that it was a Camel, and not a Ram, which God sent to reprieve him.) They have a great Reverence for this Festival, and chuse out for this Ceremony one of the fairest Camels they can meet withal, and adorn and dress him up with several Plates of counterfeit Gold and Silver, and then leading it to a Place without the City, before a Mosque, the *Doroga*, or Provost (in the Absence of the King, who formerly did it, when he was there) after several *Mollah*'s have pray'd for half an Hour, darts a Javelin at the Camel, and then the Company having Ropes tied to the Ground, throw the Camel to the Ground, and cut off his Head and Neck together, and then divide the rest of his Body into 11 Parts more, to the end that all the 12 Companies of the City may have every one their Share. Every Company carry their Share to the Master of the Company's House, who is generally the ancientest among them. This Part is salted up, and kept till the next Feast, and the Piece which they brought the Year before, and is kept till then, is boil'd with Rice, and is the Foundation of the Feast for the chief of the Company, who take it for an Honour to eat of it. For the rest they boil Rice with Mutton and Hens, in their own Houses, and give Alms bountifully to the Poor; and in other Towns they kill an Ox, instead of a Camel, and the *Dervices* and the People come and take every one a Piece, which they boil and eat with a great deal of Devotion.

3. The Feast called *Sorten*, i. e. *Head-Body*.

Forty Days after their Feast of *Aaschour*, viz. on the 20th Day of their Month *Sefer*, they have another Feast, which they call *Sorten*, i. e. *Head-Body*, because (as they affirm) the Head of *Hussein* being cut off, was of it self joined to his Body 40 Days after. They make great Rejoycing upon this Day, giving Alms generously, and many will not shave their Heads from the Feast of *Aaschour* till this Day.

4. *Aly*'s Death.

The Death of *Aly* is celebrated on the 21st of the Month *Ramazan*, much after the Manner of *Hussein*'s Sons; only it lasts but one Day. They go in Procession through the Town, carrying Standards, Lead-Horses, cover'd with Trophies of Arms, and a Coffin, cover'd with black Velvet, with a Turban upon it, and having said some Prayers, they return home, and so the Feast is ended. On this Day also they burn the Figure of *Ebco-Mouldgom-Mourat*, *Aly*'s Servant, who stabb'd him, as *Aly* was at his Prayers in his Mosque. There are some other Feasts which the *Persians* celebrate, as the Great *Bairam*, *Quamquadir*, the *Neurouz*, or New-Year, with some others of less Note.

Liberty of Conscience given in *Persia*.

Besides the *Mahometan* Religion, there are several others used, and observ'd partly by the *Persians* themselves, and partly by Strangers, to whom the *Persians* give a full Liberty of Conscience. Some Attempts have been formerly made to force the *Jews* and *Gaurs*, or *Guebres*, to turn *Mahometans*, but proving ineffectual, they are now left to practise their own Religion.

The *Guebres* or *Gaurs*.

The *Gaurs*, or *Guebres*, are natural *Persians*, the Descendants of the ancient *Persians*, that ador'd the Fire. They dwell in many Places of *Persia*, but chiefly about *Kerman*, where there are now above 10000. They worship, as the chief Prophet, *Ebrahim-zer-Ateucht*, who, they say, was sent by God to govern Men, and reign in their Hearts; and though *Neubrout* and his Successor sought to destroy him in his Mother's Belly, and after he was born endeavour'd to kill him with the Sword and burn him; yet, not being able to do it, he was accepted by the latter to be sent from God, and the People taking some of the Fire, had it in great Veneration, and still kept it in Honour to their Prophet, who when he had liv'd some Years among his Worshippers, was taken up into Paradise, both Soul and Body together. They hold, that this their Prophet *Ebrahim* shall send his 3 Children, *Ouchider*, *Ouchiderma* and *Sonniet-hotius* into the World, who by their eloquent Preaching and Miracles, shall convince all the World of the Truth of their Father's Doctrine, and cause them to receive it as a Law, and after that there shall be an universal Resurrection, when all the Souls, either in Paradise or Hell, shall return to take Possession of their Bodies; and the World being made level, and fit to inhabit, every one shall have their Apartments, answerable to the Degree and Quantity of the Good which they did in their Life-time; but their chief Delight shall be to behold and praise God, and *Ebrahim*, their Prophet; for they hold, that before the Resurrection none behold the Face of God, no not the Angels themselves. They also say, that God will have Pity upon the Damned, and that they also shall go into Paradise, as having suffered enough for their Sins.

Their Opinions.

They do not worship Fire.

Ebrahim being taken up into Paradise (as they say) sent them 7 Books of Laws from God, to instruct them in the Way of their Salvation, 7 Books of Interpretation of all the Dreams that can be dreamed, and 7 Books of the Secrets of Physick, containing all the Means for the long Preservation of Health. Both the last *Alexander* the Great carry'd away, as they hold, and the other 7 he caused to be burnt, and for this Action God punish'd him with the Disease of which he died. Some of their Doctors and Priests, who fled into the Mountains to save their Lives, after his Death met together, and composed one Book by the Strength of their Memories, which, though it is written in a Language their Priests hardly understand, yet having other Books to explain it, 'tis the only Rule of their Worship and Manners.

Their Laws and Books.

Their Out by Fire.

They never circumcise their Children, but soon after their Birth dip them in Water; wherein certain

Baptism.

Flowers

Flowers have been boil'd, and in the mean while the Priest, who is present, makes certain Prayers. If the Child dies without this Washing, they do not believe, but that it goes to Paradise; but they believe, that the Parents shall give an Account of the Neglect to God, because that Washing encreases his Favour and Merit in the Sight of God.

Marriage and Divorce. Their Law allows them 5 Wives, if they can maintain them, and permits not Divorce, but in case of an evident Adultery, or turning *Mahometans*, and if the Wife repents within a Year, and confesseth her Fault to a Priest, he will enjoyn her 3 Years Penance, and then he re-marries them.

The Way of Marrying. When any are married, the Priest asks them, in the Presence of many Witnesses, whether they both consent, and consecrating a little Water, by saying a few Prayers over it, he washeth both their Foreheads therewith, and then pronounceth them Man and Wife. None are allow'd to marry within the 3d Degree, and though they may have 5 Wives, yet one hath the Pre-eminence, and with her the Husband is oblig'd to lie at least 2 Nights in the Week, *viz. Friday* and *Saturday*. As soon as either Women or Maids perceive the Custom of Nature upon them, they presently leave their Houses, and stay alone in the Fields in little Huts made of Hurdles, and when they are free, they send an Offering according to their Quality, as a Kid, Hen or Pigeon, and then going to the Bath, invite their Friends to a small Collation at home.

Wine and Swine Flesh. They drink Wine, both Men and Women, and eat Swines Flesh, if it be of their own Breeding, for they keep them from Ordure and Nastiness, and will not eat them if they are found to have devoured any thing of that Nature. They neither pair their Nails, nor cut their Hair. They abstain from Meat, Fish, Butter and Eggs 5 Days in a Year, and fast other 3 wholly till the Evening.

Their Holidays. They keep 30 Holidays strictly in Memory of 30 Saints, no Man daring to work on those Days; but the Birth-day of their Prophet is celebrated with an extraordinary Pomp, and large Alms are then given. One Day in the Year all the Women in the Cities and Villages meet together to kill all the Frogs they can find in the Fields, according to a Command of their Prophet, who was one Day much annoy'd with them. Their Priests have several Books full of Pictures, representing the Punishments of Mens several Sins in Hell, especially of Sodomy, which they abominate.

Confession to a Priest. When they are sick they send for their Priests, and make a kind of Confession of Sin to them, and the Priest enjoyns them to give Alms, and do other good Works, to obtain Pardon of their Sins. They neither burn nor bury their Dead, but carry them out of the City, and tying them to a Stake, fall to their Prayers, till the Crows come to pick out his Eyes, which is not long, because they are used to it. If the Crow chances to pull out the Right Eye of the Deceased first, they believe the Person to be happy, and for Joy give large Alms, and make a Feast in the Fields, and put him into the White Pit; but if the Crow fixes upon the Left Eye, they take it for an ill Omen, return home sad, without speaking to one another, give no Alms, nor eat nor drink, and he is put into the Black Pit, as being miserable.

They do not worship Fire. They will not be thought to give Honour to Fire, under the Title of Adoration, for they detest the Name of Idolaters, and say, that they acknowledge but one God only, Creator of Heaven and Earth, whom they only adore. As for the Fire, they preserve it and reverence it in Remembrance of the Miracle by which their Prophet was deliver'd from the Flames. They will not shew it any Man, because, they say, that shewing it to the Kan of *Kerman* at his Desire, when he saw that it did not excel a Chamber or Kitchin Fire in Brightness, he fell a swearing, and spitting upon it, whereupon the sacred Fire flew away, in the Shape of a Pigeon, and could hardly be recall'd with Prayers and Alms, and for this Reason they are shie of shewing it again.

Their Oaths by Fire. When they put any Persons to their Oaths, they swear them before this Fire, which they take as a Witness to them, and the Priests threaten such as swear, that the sacred Fire will leave them, if they swear falsly.

Their Language differs from the modern *Persians*, both in Character, and Manner of Writing. They love to feast, and eat and drink well, being lavish of their Wine and Strong-Water. They never eat Hares, because they have Monthly Purgations like Women, and for the same Reason they never eat Mulberries, believing, that they partake of the Nature of Women and Hares.

Their Purgations and Penance. They purifie themselves from any Nastiness, or superstitious Defilement, with Ox or Cow-Piss, and of it they make a Compound Water, in which they infuse Willow-Bark and certain Herbs. This Water they cause them to drink, who have committed any Sin, after they have been at Confession for it, and so they are absolved; but if the Sin be a crying Sin, the Party must stay 10 Days in the *Cazi*'s House, and eat and drink nothing but what he gives him, walk up and down his House naked, with a Dog tied to his Toe, and the Water must be pour'd 7 times upon his Head.

Another strange Custom they have, that when a Party is at the Point of Death, they set a little Dog upon his Breast, and putting the Dog's Mouth to his, cause him to bark twice in that Posture, that the Soul of the Deceased may enter into the Dog, who, they say, will deliver it into the Hands of the Angel that is to receive it, and upon this Account when any Dog dies, they pray for him to God, as if he could have Benefit by their Prayers.

They pray for Dogs.

Among the Beasts the *Gaurs* mightily respect some, and abhor others. Those which they love and admire, are the Cow, for her Milk and purifying Urine; the Ox, because he plows the Ground that produceth their Food, and the Dog, for the Reasons above-mentioned. The Creatures which they hate, are Adders, Serpents, Lizzards, Toads, Frogs, Crey-fish, Rats, Mice, but chiefly Cats, because, they say, they are the Resemblance of the Devil, who gives them so much Strength, that a Man can hardly kill them, and so they will rather endure the Inconveniences of Mice and Rats, than have any Cats in their Houses; and for the other Animals, if they are sick, they hire poor People to find them out and kill them, and they account it a good Work, because they believe, that the Devils make use of them to torment the Damned, and in destroying them, they mitigate their Pains.

Beasts hated by them.

The Religion of the *Armenians*. As for the Religion of the *Armenians* it may be said, that Fastings are the chief Part of what they profess at present, or at least they make it the most considerable and visible Point of their Religion.

When an *Armenian* confesseth that he hath robb'd, committed Murther, or such like Crimes, the Confessor tells him, God is merciful; but if he accuse himself of eating Butter upon a Day of Fasting, as a *Friday*, or Abstinence, he will enjoyn him a Penance for that Sin, as to fast several Months, to refrain 6 Months from his Wife, or other Austerities.

Their Fasting-Days. They eat no Flesh, Eggs or Fish, nor Milk, Oil or Butter on *Wednesdays* and *Fridays*, but they eat Flesh on *Saturdays*, as all other Oriental Christians do.

Since the *Armenians* traded into *Europe*, and began to be Travellers, their Churches are better set out than they were before; they spare no Cost to adorn the Quire and Altar, you tread upon rich Carpets, and for the building and embellishing them they provide the best Materials, and employ the best Work-men. They never have above one Altar in a Church, upon which they set the Consecrated Bread and Wine.

Their Mass, how celebrated. When Mass is celebrated, they light an abundance of Wax Tapers at the Reading of the Gospel, and when it is done the Ecclesiasticks and Laity sing indifferent harmoniously. When the Sacrament is administred either by the Archbishop or Priest, he sets the Bread upon the Chalice, and having lifted it up before the People, they presently prostrate themselves upon the Ground, beat their Breasts, and kiss the Earth, while the Minister pronounceth these Words, *This is the Lord, who gave his Body and Blood for you:* Then he turns to the Altar, and eats the Bread dipped in the Wine (for they never drink the Wine, but only dip the Bread in it.)

The Bread is dipped in the Wine. When he has received, he turns once more to the People with the Bread and Chalice in his Hand, and then as many as will receive, come, one after another, to the Bottom of the Quire, and receive the Bread dipped in the Wine in the Chalice. The Bread is without Leaven, flat and round, and is consecrated the Day before by the Priest, whose Office it is. They never put Water into their Communion Wine, affirming, that Water is for Baptism, and that Christ, when he instituted the Holy Supper, drank it pure, without any Mixture of Water. At the Distribution of the Bread the Priest repeats these Words several times, *I confess and believe, that this is the Body and Blood of the Son of God, who takes away the Sins of the World, who is not only ours, but the Salvation of all Mankind.* That which

The Sacrament given to Children.

which is moſt wonderful is this, that they give the Communion to Children of 2 or 3 Months old, who are brought in their Mothers Arms, and often put it out of their Mouths again. They never adminiſter the Sacrament in *Lent*, for they never ſay Maſs, but upon *Sunday*-Noon, which they call Low-Maſs, for the Prieſt reads only the Goſpel and Creed aloud, and that with a Curtain drawn before the Altar, that he cannot be ſeen by the People. Sometimes upon *Thurſday* in Paſſion Week they ſay Low-Maſs about Noon, and then they confeſs and adminiſter the Sacrament, but generally they ſtay till *Sunday*, and then the Communicants, after they have received, are permitted to eat Fiſh, Eggs, Butter and Oil, or any thing elſe, beſides Fleſh, which is not lawful to be eaten, till after Maſs on *Eaſter-Day*, on which alſo the Beaſts muſt be killed, and not on *Eaſter-Eve*. After the ſame Manner they obſerve the Feaſts of *Chriſtmas*, *Aſcenſion*, *Annunciation*, and St. *George*'s Day, eating neither Fleſh, Fiſh, Eggs, Butter nor Oil for 8 Days. Before the laſt of them, they ſtretch out their Devotion to the uttermoſt, faſting ſome 3, and others 5 Days, one after another.

Their Feſtivals, how obſerved.

When a Father deſigns his Son for the Prieſthood, he carries him to a Prieſt, who puts his Cope about his Shoulders, and then his Parents take him home again with them to educate him. This Ceremony is repeated 7 times, and at the 4th time (if he be not deſigned for a Monk) he is married (for their Prieſts marry once, but if that Wife die, and they marry again, they muſt give over ſaying of Maſs) and when he comes to the Age of 18 Years, when he is capable of ſaying Maſs, he is inveſted by the Archbiſhop, or Biſhop, with all the Habits that Prieſts wear, and then goes into the Church, where he remains a whole Year, being employ'd all that Time in the Service of God. When a Prieſt or Monk intends to ſay Maſs, he muſt remain 5 Days before in the Church, without either going to Bed, or touching any thing with his Hands, but the Spoon he eats with, not daring to ſpit, or blow his Noſe, and after he has ſaid Maſs, a Prieſt muſt ſtay 5 Days more before he returns home to eat or drink, or lie with his Wife, and muſt eat nothing but Eggs without Butter, and Rice boil'd with Water and Salt. Their Auſterities are ſuch, that many of their Biſhops never eat Fleſh or Fiſh above 4 times a Year, and their Archbiſhops live only on Pulſe. They have 6 Months and 3 Days wherein they keep *Lent*, or ſome particular Faſts, and all that Time, both Clergy and Laity, feed only upon Bread, and ſome Herbs that grow in their Gardens. The poor labouring People feed upon Pulſe, boil'd in Salt and Water; and though they lie a dying, they muſt not eat Fleſh, Butter or Oil, upon thoſe Days on which it is forbidden them. They may only eat Wall-nuts, Small-nuts, Almonds, or Piſtachioes, which afford no Oil, pounded and mix'd with their Herbs or Rice.

Marriage of Prieſts.

The Abſtinence of their Biſhops.

Their Baptiſm.

They baptize their Children on *Sundays* only, unleſs in Caſes of Neceſſity, when they think a Child will not live; and when they are baptized, the Miniſter plunges them naked into the Water, and having tied a Cord of white Cotton and red Silk twiſted together, which, they ſay, repreſents the Blood and Water that flow'd out of Chriſt's Side, when it was pierced by the Spear, he anoints the Child in ſeveral Parts of the Body, and making a Croſs in every Place, ſays, *I baptize thee in the Name of the Father, and of the Son, and of the Holy Ghoſt.* The Oil is made of many ſorts of fragrant Flowers, Aromatical Drugs by the Patriarch, upon the Feaſt of our Lady, in *Sept.* when they keep a ſhort *Lent* of 8 Days, and by him 'tis ſent to all the Convents in *Aſia*, *Europe* and *Africa*, becauſe none can be baptized without it. The Miniſter that baptizeth names the Child, and generally gives it the Name of the Saint, whoſe Memory is celebrated on that *Sunday*, or the next Holiday, if none fall upon the *Sunday*, and ſo they have no affected Names among them. After the Child is baptized, there is a Feaſt made for the Kindred and Friends of the Child, and the Miniſter that baptizeth him, with all the Monks of the Pariſh; but to avoid this Charge, which was wont to undo many, they baptize their Children on the Week-Days, without Ceremony, pretending they are ſick.

The Oil uſed in Baptiſm.

Baptiſm in a River.

If the Women lie-in within 2 Months of *Chriſtmas*, or leſs, they defer the Baptiſm till that Feaſt, if the Child be healthy, and then procuring Boats, which they ſpread with Carpets, and in one of them ſet up an Altar, they carry it to a River or Pond, all the Clergy in the Neighbouring Towns and Villages attending the Baptiſm in their Habits, with the Croſs and Banner, and there dip it 3 times in the Water, anointing it every time with Oil, uſing the ſame Form as before. This Ceremony is performed with ſo much Magnificence, that they will invite the King of *Perſia* to it, and treat him with all his Nobility, which coſts them at leaſt 4 or 5000 Crowns. At the ſame time they baptize the Croſs, in Commemeration of the Baptiſm of our Lord, plunging it 3 times into the Water, after certain Prayers, and every time dropping, ſome of the Holy Oil upon it.

Baptiſm of the Croſs.

They marry their Children very young, and that by the Agreement and Conſent of their Mothers, before the Fathers know any thing of it, yet they muſt have their Approbation before the Marriage is conſummated. Sometimes the Mothers will promiſe their Children as ſoon as they are born; yea, ſometimes 2 Women that are Friends, being both with Child together, will make a Match between their 2 Children before they are born, if the one be a Boy, and the other a Girl, and as ſoon as they are born the Contract is made, but the uſual Method is, to betroth or affiance their Children at 2 or 3 Years old, and marry them at 8. The Parties ſeldom ſee one another till they marry. The Manner of their Affiancing or Betrothing is this: Upon the Approbation of the Father of what is done by the Mothers of both Parties, the Mother of the Boy, with 2 other old Women and a Prieſt, come to the Houſe where the Mother of the Girl lives, and preſent her with a Ring from him, whom they intend to betroth to her. The Boy appears afterward, and the Prieſt reads ſomething out of the Goſpel, as a Bleſſing upon both Parties, and then the Father of the Girl pays him a Sum of Money according to his Quality. When theſe Things are done, they treat the Company with Drink, and ſo this Ceremony concludes.

Their Marriages of Children.

Their betrothing.

After this Contract, though it be 20 Years often before they are married, the Boy is bound every Year upon *Eaſter-Day* to ſend his Miſtreſs a new Habit, with all the Trimming belonging to it, according to her Quality.

When they are married, the Father and Mother of the Boy, 3 Days before, ſend Proviſion for a Feaſt to the Houſe of the Father and Mother of the Girl, where the Kindred of both Parties meet at the Nuptials, and are entertain'd, but the Men by themſelves, and the Women by themſelves. The Night before the Marriage, the Bridegroom ſends the Bride an Habit, and ſoon after comes himſelf to ſee what the Mother of the Bride has provided for him. On the Day of Marriage the Bridegroom and Bride are ſet upon 2 Horſes, ſumptuouſly harneſs'd, with Bridles and Saddles of Gold and Silver, if the Perſons be rich, and if poor, they borrow them of the Rich. The Bridegroom rides before, covered with a Veil of Carnation Tiffany, or Gold and Silver Net-work, which reaches down to his Stomach, and the Bride follows with a white Veil, which covers her all but her Eyes, and both holding a long Girdle at each End. Two Men go on each Side of each Horſe, to hold them on, and if they be Children more. A great Train of Youth, who are the Kindred and Acquaintance of both Parties, follow them, ſome on Horſe-back, and the other on Foot, with Tapers in their Hands, as if they were going in a Proceſſion, and ſo with Drums and Trumpets, Haut-boys, and other Inſtruments of the Country, attend them to the Church-Door, where alighting, they go up to the Altar, holding the Girdle in their Hands ſtill, and when they come there, they meet, and lay Forehead to Forehead. Then comes the Archbiſhop, or Biſhop (for Prieſts rarely celebrate this Office) and turning his Back to the Altar, lays his Book upon their Heads, and there lets it lie, tho' a very heavy *Folio*, till he has read the Form of Matrimony, which is much like the *Roman* Form. Having receiv'd the Matrimonial Benediction, they hear Maſs, and then return to the Bride's Habitation, in the ſame Order as they came, to their Feaſting, at which the Women drink more than the Men. At Night the Man goes to Bed firſt, the Woman pulling off the Man's Breeches, though ſhe doth not lay aſide her Veil till the Candle be put out, and then ſhe always riſeth again before Day, ſo that ſome *Armenians* have not ſeen their Wives Faces, nor heard them ſpeak of 10 Years, for the Women never eat with their Husbands.

The Ceremonies of Marriage and Bedding.

As ſoon as any Perſon dies, the *Mordichou*, or the Perſon that waſhes the Dead, runs immediately to the Church, to fetch a Pot of Holy Water, which he preſently pours into a Veſſel full of Water, and then puts in

Of their Burials.

in the dead Corps. Whatever the deceaſed Perſon has about him, though it be a rich Jewel, belongs to this Officer, for the Eaſtern People lie in their Breeches, Shirt and Waſtcoat, becauſe they never uſe any Bed-cloaths. So ſoon as the Corps is waſh'd, they dreſs it with a clean white Shirt, a Pair of Breeches, Waſtcoat and Bonnet, all new, and ſew it up in a Linen Sack, and then the Prieſts come and carry it to Church, the Kindred and Friends of the Deceaſed attending it. Being come to the Church, they ſet the Corps before the Altar, where the Prieſt ſays certain Prayers over it, and then ſetting up certain Tapers round about it, They leave it ſo all Night. The next Day a Biſhop or Prieſt ſays Maſs, and then carrying it by the Biſhop's Door, who there makes a Prayer for the Soul of the Deceaſed, they bring it to the Church-yard to be interred, the Prieſts ſinging Dirges till the Body is let down into the Grave. When the Corps is laid into the Ground, the Biſhop takes 3 Handfuls of Earth, and throwing them one after another upon it, pronounces theſe Words, *From Earth thou camest, to Earth thou muſt return, and ſtay there till our Lord comes*, and then they fill up the Grave. Such of the Friends and Relations as will go back to the Houſe, find a Collation ready for them, and if they are Perſons of Ability, they allow Dinners and Suppers for 7 Days after to certain Prieſts and poor People, believing no Soul departed can be ſaved, unleſs the Survivers are at that Expence.

Waſhing the Corps.

The Interment.

If a Slave dies before he is made free, his Maſter writes a Note, and puts it into his Sack when he is brought into the Church, to this Purpoſe, *Let him not grieve, I make him free, and give him his Liberty*; for they believe, that his Soul would ſuffer Reproach and Tribulation in the other World for being a Slave. If an *Armenian* makes away himſelf, they never carry the Body out of the Door of the Houſe, but make an Hole in the Wall, where they can moſt conveniently, and carry him to his Grave without any Ceremony.

The Burial of Slaves, and ſuch as kill themſelves.

The Night before the Feaſt of the *Holy Croſs*, Men, Women and Children go to the Church-yard to weep over the Graves of the Dead, but they forget not to carry good ſtore of Meat and Wine to feaſt with, when that doleful Work is ended. The poorer ſort do the ſame the Night before the Feaſt of St. *George*.

Though ſome *Armenians* embrace *Mahometaniſm* for Worldly Intereſt, yet they are generally the moſt obſtinate and firm Perſons in the World to their Principles; and it is their Cuſtom, that when any one of them apoſtatizes, and deſires again to return to the Church, he cannot have Abſolution, but at the ſame City or Village, where he firſt forſook or abjured his Religion. They have many freſh and undoubted Inſtances, both of Men and Children, who having turned *Turks*, have not only, with the greateſt Boldneſs, declared themſelves ſorry for their Apoſtacy, curſing *Mahomet* and his Law in the Face of the *Cadi* and *Mufti* himſelf, but have endur'd the greateſt Torments with unſpeakable Courage and Conſtancy.

The *Armenians* firm to their Religion.

The *Armenians* are all *Eutychians*, believing but one Nature in Jeſus Chriſt, though they condemn the groſſer part of *Eutyches*'s Hereſie, for they do not hold, that the Humane Nature was ſwallow'd up in the Divine, as the firſt *Eutychians* did, nor do they believe the Confuſion of Natures in Jeſus Chriſt, as *Eutyches* himſelf aſſerted, but they will have the Divine and Humane Nature to be united in his ſacred Perſon, as the Soul and Body are in Man, and ſo make but One Perſon; and upon that Account they condemn the Council of *Chalcedon*. They acknowledge not the Pope to be ſuperior to their Patriarch, but only Patriarch of *Rome*. They are great Enemies to all that hold the *Roman* Faith, ſo that ſome of them ſtick not to ſay, that 'tis better to be a *Turk* than a *Papiſt*.

They hold *Eutyches*'s Doctrine.

CHAP. XI.

Of the Kings of Perſia, *their Power and Government.*

Aidar, a famous Cheik, honour'd by *Tamerlane*.

AFTER *Tamerlane* had extended his Conqueſts over *Aſia*, and defeated *Bajazet*'s Army, he came into *Perſia*, where at that Time liv'd a Cheik, named *Aidar*, a Perſon in high Reputation for Holineſs and Knowledge of their Law among the People. He ſhew'd great Reſpect to *Tamerlane*, he did many eminent Kindneſſes for all the Officers of his Army, for which *Tamerlane*, who was a grateful generous Prince, vouchſafed him a Viſit, and preſented him with a great Number of Captives, which he had brought along with him out of *Turky*. The Cheik planted one part of theſe Slaves about *Ardevil*, and ſettled the other about his Perſon, and pretending himſelf of the direct Line of *Mahomet*, he took upon him the Name of a *Caliph*, and encreaſing in Power, he laid a Foundation for the Greatneſs of his Family, which his Son ſo much improv'd after his Death, by obliging the People, that finding themſelves ſtrong enough, they rebell'd againſt *Alamout*, their King, and after many Skirmiſhes, defeated him in a Battel near *Taurus*; and he being ſlain by the Hands of *Iſhmael-Sophi*, the Cheik's 3d Son, was ſucceeded by him: He was the firſt King of the Race that embraced the *Alcoran* according to the Interpretation of *Aly*, *Mahomet*'s Son-in-Law.

Iſhmael-Sophi.

Sha-Tammas.

Sha-Iſhmael

Mahomet-Coda-bende.

To *Iſhmael Sophi* ſucceeded *Sha-Tammas*, his Son; and to him *Sha-Iſhmael*, whom the Nobility depos'd in a ſhort Time, for his Cruelties, and ſet up in his Room *Mahomet-Coda-bende*, his Brother. He was no fit Prince for ſo great a Government, either in Peace or War, and therefore has nothing remarkable ſaid of him, but that he was the Father of *Sha-Abas* I. who for his Valour and Conduct was ſurnam'd *the Great*. He was a Perſon of Wit and Policy, as well as Courage, and recover'd not only ſeveral Provinces Weſtward to his Empire, but conquer'd the Kingdoms of *Lar*, *Ormus* and *Candahar*. He was a paſſionate Lover of Honour, and to that End ſought all manner of Ways to furniſh his Empire with Wealth and good Government. He would not ſuffer an *Indian* or a *Banyan* to trade in his Dominions (though afterwards they crept in in the Reigns of *Sha-Sefi* II. and *Sha-Abas* II. who came young to the Throne) becauſe they are worſe Uſurers than the *Jews*, and it ſeldom happens, but where-ever they are, they get all the Money of the Nation into their Hands, which they take up at 9 or 10 in the Hundred, and let it at 2 and an half *per Cent.* by the Month, and ſo keep the Money-Trade in the Hands of his own Subjects the *Armenians* of *Zulpha*. And as he ſought the Advantage of his own Subjects, ſo he was cautious that no Money ſhould be carried out of his Kingdom, and therefore obſerving, that by the Pilgrimages of his Subjects to *Mecca* an abundance of Ducats were ſpent in Preſents and Charges, he went himſelf in a Pilgrimage to the Tomb of *Iman-rez*, at *Meſhed*, and at his Return gave out ſtrange Miracles about it, to divert his Subjects from going to *Mecca*. He was ſo great a Lover of Juſtice, as finding a Cook and Baker to falſifie in their Weights, he cauſed the Cook to be roaſted alive, and the Baker to be put to Death in a red hot Oven, and had likely to have cauſed the Bellies of the Governour of the City of *Iſpahan*, and ſome other Officers, whoſe Buſineſs it was to prevent it, to be ripped up for eating it.

Sha-Abas had many Sons, but none liv'd to Man's Eſtate, but *Sophi Mirza*, a Prince of great Wit, and dexterous at his Arms, and much beloved of the People, which made his Father jealous of him, that he ſought his Throne, yet diſſembled his Suſpicion, becauſe he was his only Son; he concealed his Paſſion, till *Sophi Mirza* having a Son by a Slave, which pleaſed him, as he grew up, he firſt put out his Eyes, and then reſolv'd upon his Death, and to that End commanded a Lord to go and fetch him his Head: The Lord being amaz'd, refuſed to obey his Command, and was baniſh'd the Court; and the King the next Day gave the ſame Order to another, who immediately put it in Execution, and brought him his Son's Head in a Golden Charger. The Sight of ſo ſad an Object brought the King to himſelf, and upbraiding the Lord with Villainy, he baniſh'd him his Preſence for ever, and ſequeſtred his Eſtate, allowing him only a *Ma-*

Slays his Son.

moudi, i. e. about 7 *d.* a Day; but the other Lord, who had so generously refused to aid him in so bloody an Act, he recalled from his Exile, and gave him one of the best Governments of the Empire. *Sha-Abas* bred up his little Grandson in the *Haram* of the Women, in Ignorance and Stupidity, for he often gave him a Dose of Opium to make him dull and unapprehensive; so that when he came to the Throne, after his Grandfather's Death, the Physicians advised him to drink Wine, to restore his natural Heat, and renew his Vigour. *Sha-Abas* reign'd 40 Years, and died in the End of the Year 1628. but before his Decease gave Command, that he should be buried in some Place unknown to all the World, and that they should set his Grandchild upon his Throne, giving him the Name of *Sha-Sefi*.

Sha-Sefi I.

The General of the Horse, and the chief Captain of the *Harquebusses*, with whom he had left his Commands, immediately upon his Death rode to *Ispahan*, and taking him from his Mother, acknowledg'd him for their Sovereign, and putting on him the Royal Robes and Scimetar, set him upon the Throne, where all the Lords came and did him Homage, and the next Day he was acknowledged by the Acclamations of all the People. *Sha-Sefi* was many Years a Novice in the Art of Government, but Time opening his Eyes, he cut off the Heads of *Ali-Kouli-Kan*, and his 3 Sons, and 7 other principal Lords at Court, and by little and little took the Government into his own Hands, farming it to a Visier, who pay'd him a Rent yearly. His Reign was violent, and he was guilty of excessive Drinking, in which, though he kill'd his Queen, and for that Reason not only desisted for a time from it, but forbad that no Man should drink any Wine in all his Territories, and that his Governours should break all the Wine Vessels, where-ever they found them, and spill the Wine; yet this Order was not kept above a Year, but falling to his wonted Excesses, he died of a Surfeit, when he had reign'd 14 Years.

His Excessive Drinking.

Sha-Abas II. succeeded him, and entred upon the Throne at *Casbin*, in the Year 1642, and made his Entrance into *Ispahan* in great Magnificence the next Year. In the Year 1643, came the Prince of *Usbeckes* in Person, to desire Aid of *Sha-Abas* against his Children, who had caused his Subjects to rebel against him, and depose him. *Sha-Abas* was very young, yet being resolv'd to show, that he looked upon himself as a potent King in the peaceable Possession of his own Dominions, he went to meet him, and generously lent him an Assistance of 15000 Horse, 8000 Foot, and 60000 Tomans, for which the *Tartar* gave him in Exchange one of his Provinces, bordering upon *Persia*, which yielded him a very good Revenue by the Cattel, which the Inhabitants breed in great Numbers. While he reigned, the Governour of *Schiras* made him a Present of a wild Ass, whose Skin was as red as Scarlet, having an Horn growing out of his Forehead, about a Foot long. This King reigned about 24 Years, and died at *Tebron* of an Inflammation in his Throat, which was caused by excessive Drinking, and was buried by his own Order at *Kour*. The Christians who had the Happiness to live under him, lament his Decease to this Day in private, not only as a King, but as a Parent, for his Justice and Goodness would never suffer any Violence to be offer'd them, or that they should be disturb'd for their Religion, which they had free Liberty to exercise during his Reign, though the cruel *Mahometans* were often attempting to molest them, and the *Persians* never speak of him but with all the *Encomiums* of a magnanimous Prince, whose Courage and Conduct had in a great measure restor'd their Country to its ancient Splendor, and would have certainly perfected that Work, had he lived longer. Strangers also will ever bewail his Loss, as one who invited them by his Affability and Courtesie to his Court and Country, and encouraged them by buying their Merchandices, and paying well for them.

Sha-Abas II.

A strange Ass.

Sha-Sefi II. succeeded him, yet not without a miraculous Providence; for his Father dying without a Will, and making no Appointment of a Successor by Word of Mouth, the Great Officers, supposing that *Sha-Sefi* was either dead, or rendred unfit for Government by his Father's Severity, chose his younger Brother *Hamzeh-Mirzah*; but an Eunuch, named *Aga-Mabarek*, Tutor to *Hamzeh-Mirzah*, knowing the Falshood of their Reasons for chusing his Pupil, and charging them with the highest Injustice and Treason, in laying aside the elder Brother, whose Right it was, perswaded them to Elect him, and rather than they should persist in their Choice, threatned to strangle his younger Brother, and force them to it, which so astonish'd them, that they changed their Minds, and made him King. Some time after his coming to the Throne, he fell dangerously sick, not having ever enjoy'd perfect Health. Now the Custom of those Countries is, in such Cases, for the Lords of the Court, and Governours of the Provinces to give a Sum of Gold, and putting it into a Gold Bason, set with precious Stones, shake it 3 times over the King's Head, reciting these Words, *Patsha Bashena Olson*, i. e. *This Money is sacrificed for the Health of the King's Head.* If the King recovers, all that Money is given to the Poor, and the King and his *Haram* add very liberally to it; but if he dies, 'tis all put into the Treasury, and the Poor have nothing. *Aug.* 20. 1667, was the critical Day of his Distemper, and every one fearing he would die, the Grandees of the City went all to the Mosque called *Babaron*, to pray for his Health, and gave near 1000 Tomans to the Poor, and the next Day commanded the *Armenians* also to pray for the Recovery of the King, who also thereupon sent their *Kelonter* with 50 Tomans in Gold, to shake over the King's Head, with these Words, *Berai te Sadduke*, i. e. *Destin'd for Alms*, and then went both Clergy and Laity to their Prayers. It pleased God, that he passed the Danger in a few Days; but remaining still in a languishing Condition, it remain'd, that the Physicians should restore him to a perfect Health. The chief Physician, in the Name and by the Advice of the rest, tried all the Secrets of his Heart, but all in vain, and the Astrologers, who were much depended on, despair'd of his Recovery. The Queen-Mother quarrelled with the chief Physician, and accused him of Treason or Ignorance, because he could not cure her Son. These Things were a great Affliction to him, and brought him almost to his Wits End, whereupon he bethought himself of a peculiar Invention, and by a far fetch'd Piece of Wit, lays the Fault upon the Stars, and the King's Astrologers, saying, That the Cause why the King lay in a languishing Condition, and could not recover his Health, was, that his Astrologers had failed to observe the happy Hour or Aspect at the Coronation, which was confirm'd not only by the Physician's Friends, but the *Mirza Maugum*, one of the Astrologers, who bore a secret Grudge against the Prince of the Astrologers, whose Business it was to find out the happy Conjunction for the Coronation of the Prince. This Contrivance found Credit first with the Queen-Mother and the Women and Eunuchs about the King, who was easily influenced with their Fancies, to which he had ever been accustom'd. The Astrologer used some Arguments to vindicate his Care and Judgment, but not prevailing, was forced to submit, for fear of running into further Danger, and so there was nothing to be done, but to repair the pretended Defect, seek out proper Remedies for the Mistake.

His Sickness and Recovery.

The Physicians thereupon consulting the Astrologers, and using many serious Consultations among themselves, agree upon the happy Hour, which was to be attended with many fortunate Events, which was, according to our Account, on *Tuesday*, the 20th of *March*, 1668, about 9 in the Morning, and accordingly all the former Ceremonies were again repeated, as if he had been a new Person, and because his former Name was thought to carry something unfortunate in it, he assumed the new Name of *Solyman*. Upon this new Face of Things, which History can hardly parallel, the King fansied he grew better, and whether it were that Imagination helped his Physick, certain it is, that the Medicines which the King took had a much better Effect, and the King recover'd a greater Measure of Health, whereupon the Physicians were in great Repute, and the Astrologers all put out of Favour, except 2 or 3 of the most skilful.

Sha-Sefi crowned a second time, and called *Solyman*.

In this King's Reign Scarcity, War and Epidemick Distempers afflicted the most part of the Provinces of the Empire. The Dearth at *Ispahan* was so great, that the Poor cried out against the excessive Price of Things, which daily encreased, not so much from the Scarcity, as the Falshood and Corruption of the Officers, who were to set Prices upon Provisions, and are called *Mochteseck*: These Men being brib'd by the Sellers, set what Prices upon their Goods they pleased. But the King being affected with the Cries of the People, committed the Affair to *Ali-Kouli-Kan*, the General of all his Forces: He soon redressed this Grievance, for he reduced the Price to one 5th less only than it had been all

Famine, War, &c. afflict *Persia*.

all along before, cauſed a Merchant to be drubb'd for offering him a Bribe, and ordering the Provinces to bring their Corn to *Iſpahan*, ſoon reduced Plenty to it.

Toward the latter End of this King's Reign, a People that inhabit the North of *Perſia*, poſſeſſing all the Country between the *Caſpian* Sea and the *Indies*, under ſeveral petty *Sultans* or Princes, abſolute in themſelves, entred the Province of *Coraſon*, or *Bactriana*, and *Margiana*, burning and ſpoiling all before them. The *Perſians* made Oppoſition, and putting them to Flight, kill'd 12 or 18000, and took the reſt Priſoners.

A great Earthquake

About the ſame Time there happened a dreadful Earthquake, which overturn'd the greateſt part of the City *Schivan*, and ruined 4 Villages near adjoining, overwhelming above 30000 in the Fall, as alſo *Shamaki*, in the Southern *Media*, by which above 20000 *Perſians* were loſt.

A Comet.

There appear'd alſo a great and remarkable Comet in *Perſia*, which had been ſeen almoſt over all the Earth. The Aſtrologers called it, *Niazouke*, or the *Little Lance*, becauſe it reſembled that Figure, and ſaid in their *Takuims*, or Almanacks, that it ſignified Wars, Murthers, Seditions, Conflagrations, dangerous Diſeaſes, and Overturning of Kingdoms and States, with all manner of Calamities; but they fixed all theſe dreadful Effects upon the *Sunni's*, or *Cafers*, i. e. Idolaters, among whom they reckon the Chriſtians; but they felt ſome of them in *Perſia*.

The *Perſian* Government; their King is abſolute.

The Government of *Perſia* is purely Deſpotick and Tyrannical, for the King has the ſole Power of Life and Death, independant upon his Subjects, and without any Tryals or Proceedings, nor are the chief Lords of their Kingdom exempted from it. When any King dies, and leaves many Males behind him, the eldeſt aſcends the Throne, and the Eyes of all the reſt are put out, and they are confined to the *Haram*, or Womens Apartment; and if there be the leaſt Suſpicion of any Contrivance againſt the King, they are put to Death forthwith, without any further Examination. He obſerves no Rules or Forms of Juſtice, nor ties himſelf to any Laws or Cuſtoms. He judges of Lives and Fortunes as ſeems beſt to him, and uſeth not the common Puniſhments of his Country, but ſuch as his Fancy ſuggeſts. He meddles in Religion, and they do not begin the *Ramadan*, or any other Feſtival, till they have his Leave, and ſometimes he keeps them back a few Days, though the Moon when they are to be celebrated hath been ſeen. His Subjects never look upon him without Fear and Trembling, and they have ſuch a Reſpect for him, and pay ſuch a blind Obedience to all his Orders, how unjuſt ſoever they be, that they follow them, though againſt all Laws both of God and Man; and if they ſwear by the King's Head, it is accounted a more inviolable Oath, than if they had ſworn by all that is ſacred in Heaven or Earth. Sometimes the King of *Perſia* takes away the Wife of one of his Lords, and gives him a new one out of his *Seraglio*; and ſometimes he will reſtore him his Wife again, and take back his Woman. He is ſo extreamly jealous of his Wives, that if a Man looks upon them, he is put to Death without Remiſſion. When he takes them with him into the Country, there are Eunuchs that with Cudgels keep all out of the Way, while they are in *Iſpahan*, and when they are out of the Town, there is a *Courouk*, i. e. a Prohibition that no Man ſtir that Way.

An Oath by the King's Head.

The Audiences of Ambaſſadors.

In the Audiences which the King gives to Ambaſſadors, both Chriſtians and others, there is high Drinking and nothing elſe, for all Affairs are managed by the Miniſters of State; and if any refuſe to drink, they are diſmiſſed with a kind of Diſtaſte.

The King of *Perſia* is very rich in Gold, Plate and precious Stones, and all ſorts of Arms, for they keep Work-men always at Work to make them, and never ſell any. Beſides, in the *Neurouz*, or Spring, all the Kans and Great Lords preſent him with Things moſt valuable, and the Eſtates of all ſuch as are put to Death are confiſcated to the Crown, which much encreaſe the King's Treaſure. All the Silks of *Perſia* belong to him, and upon that Account all that trade in them pay him a certain Rent, as alſo do the other Companies. He hath many Lands, which he farms out to the Country-men, who plow and ſow them, and pay the King half the Profit, though in ſome Places they pay him a Fifth part only; but one Thing is remarkable of theſe Lands, that the *Moulah's*, or Prieſts, will never ſay Prayers upon the Lands that belong to the King, becauſe they ſay, that they are *Hberam*, i. e. Excommunicated, for the King never bought them, but took them by Force from the poor People, and enjoys them only by Uſurpation.

His Revenues.

The State of *Perſia* is divided, like moſt of the *European* States, into 3 Bodies: 1. The Military, or Sword-men, which comprehends the Nobility, King's Houſhold, Kans and Soldiery. 2. The Civil, or Gown-men, which comprehends all thoſe that belong to the Law and Courts of Juſtice, which alſo includes the Eccleſiaſtical Orders. 3. The Body of Merchants, Handicrafts-men, Husbandmen and Labourers.

The Three States.

The Chief Officers of the King's Court or Houſhold, are theſe:

The *Eatmud-Doulet*, who is the firſt Perſon in the Kingdom, next the King, is the Prime Miniſter: All the Affairs of the Kingdom paſs through his Hands, and in the King's Minority he rules all; but becauſe the King's Conſent muſt be had to all his Orders, the Eunuchs and Sultaneſſes cauſe him much Trouble, by obtaining contrary Orders from the King in the Night. This Officer anſwers the Grand Viſier in *Turky*.

Officers of State.

The *Nazar* has the Charge of the King's Goods, of his Breeds of Horſes, Houſhold-ſtuff, Cloaths and Plate, much like the Grand Maſter of the King's Houſe in *France*.

The *Mehter*, who is the firſt Gentleman of the King's Bed-Chamber, is always a White Eunuch. His Office is to attend the King with a Bag hanging by his Side full of Handkerchiefs, which he preſents to the King as often as he demands any. He is always near the King's Perſon, and has his Lodgings in the King's Palace. He has generally the King's Ear, and can ſerve or miſchieve whom he pleaſes.

The *Mir-Akhar-Baſhi*, or Maſter of the Horſe, has the Charge of the King's Stables, which, as well as the Gate of *Ali-Capri*, are a Place of Refuge, and whoever can eſcape thither, though guilty of Murther or Debt, is ſafe. Under him are divers Officers and Querries.

The *Mir-Shikar-Baſhi*, or the Grand Maſter of the Hunt, who is employ'd as the Grand Falconer, and has the immediate Care of the managed Hawks and Birds of Prey. He commands the *Seguan-Baſhi*, who has the Charge of the Dogs, Lions, Leopards, Panthers, and other Beaſts of Chaſe, with a Thouſand other Under-Officers.

The *Vakanviez*, or Chief Secretary of State, which is an Office always conferr'd upon ſome ſpecial Favourite. He reads all Petitions and Papers preſented to the King.

The *Kaſnadar-Baſhi*, or High-Treaſurer, who keeps all the Money that is in the King's Coffers.

The *Iſik-Agan-Baſhi*, the Grand Maſter of the Houſhold, who has divers Officers under him, and the Steward over-rules them all.

The *Mehmender-Baſhi*, or Maſter of the Ceremonies.

The *Hakim-Baſhi*, or Chief Phyſician, by whoſe Allowance all the Phyſicians of the Kingdom are licenſed.

The *Divan-Bequi*, or Chief-Juſtice, who judges in all Civil and Criminal Cauſes, and keeps his Court either in *Ali-Capi*, or in the King's Houſe, where the King himſelf ſits and judgeth when he pleaſeth. To this Judge, as the ſupream Officer in the King's Courts, do all Criminals bring their Appeals, and he makes out Proceſs againſt the Kans, and other Grandees of *Perſia*, who are in Diſgrace. He is generally very rich by reaſon of the great Preſents given him to quaſh Appeals and Indictments, that they come not to the King.

The *Deroga*, who is like the Lieutenant-Criminal in *France*: Recourſe is had to him in all Robberies, Quarrels and Aſſaults, or Batteries and Murthers, and he can do the Perſons wronged Juſtice. He alſo has Power to ſuppreſs all Houſes of Debauchery, and puniſh all Perſons he finds in them by Baſtinado or Fine, though he uſeth the latter moſt.

The *Aatas*, or Conſtable, is an Officer, who acts under the *Deroga*. His Buſineſs is to go the Rounds in the Streets of the great Cities and Towns in the Night-time, with his Watch-men, to prevent Diſorders, and ſtop thoſe he finds abroad; and in caſe they cannot give a good Account of their being out of their Houſes at unſeaſonable Hours, he can commit them to Priſon, and puniſh them. He is put in by the *Deroga*, and is as it were his Man, but he has a Priſon for himſelf in every City or Town.

The *Chirakgi-Baſhi*, who has Charge of the King's Wine, which is chiefly that of *Schiras*, for he ſeldom drinks any other.

The *Meſheal-Baſhi*, who is the chief Torch-Bearer, and furniſheth the Court with Candles, which are made of Wax only. He has all the Fines of ſuch as play at Cards or Dice, which is forbidden by *Mahomet*'s Law, and to that End, as he has divers Officers under him to ſearch out ſuch Perſons as uſe thoſe Games, ſo he has Power to break open any Houſe, where he ſuſpects any ſuch Perſons are if the Maſter be not of great Quality.

The *Kara-Setaſhe* is the King's Chirurgeon or Barber, who lets him Blood, and ſhaves his Head. He cannot part with his Place to another.

The *Melikultuguear*, who has the Charge of the Stuffs for the King's Houſhold, and puts them out to Taylors. He takes an Account of the Shreds and old Habits, which ſerve to make Cloaths for the Soldiers, deducting for them out of their Pay.

The *Mir-ahe*, or Prince of the Seals, who has the Care and Profit of the Seals. This is one of the beſt Employments in the Kingdom. He has the Sale of the Canal-Water to the Country-men, who buy it of him at a dear Rate.

The *Tuſkemal-Baſhi*, or Clerk of the Kitchin, who orders what ſhall be ſerved up to the King's Table, and when it is clear'd, he ſticks his Knife in the beſt Diſh, and orders it to be ſent home to his own Houſe.

The *Schatcers*, or the King's Foot-men, are the loweſt Officers of the King, but one of the hardeſt to be obtain'd, for to be admitted into this Place one muſt have great Credit, and be an extraordinary Foot-man, and give this Proof of it, He muſt run 12 Times from *Hali-Capi* to the Hills, which is a large *Freneh* League and half, in one Day, and ſo run near 100 *Italian* Miles, drinking nothing all Day, but a little Sharbet. Some of theſe *Schatcers* will travel 30 Lgs. in a Day, with 140 Pound Weight on his Shoulders.

There are many other Officers of leſs Note in the King's Court, which are ſo numerous, as well as conſiderable, that it is needleſs to rehearſe them, and moſt of them have their Diet in the King's Houſe, or have an Allowance for Diet from thence.

The Chief of the Military Officers are as followeth:

The Military Officers.

The *Sepeh-Salar*, or the Generaliſſimo of the King of *Perſia*'s Armies, who is never conſtituted but in time of War, and when that ends, his Office ceaſeth. His Place in Council is next to the *Eatmud-Doulet*. But there are other ſtanding Military Officers, whoſe Places are perpetual, for the King of *Perſia* keeps a ſtanding Army in 3 Bodies, which are called *Corſchi's*, *Goulams* and *Tufenkgis*, and every one has a General and other Officers.

The *Corſchi-Baſhi* is the General of the *Corſchi's*, who are an hardy warlike People inhabiting *Perſia*, but deſcended of the *Turks*, and live in Tents, like the *Turcomans*. They ſend their Youth early to the King's Service, and maintain them 2 or 3 Years, till they are taken into the King's Pay, which is from 10 and 12 to 15 Tomans a Year. They are all Horſe-men, well paid and look'd to, and are many times advanc'd to the ſupreme Dignities of the Kingdom. They are able to ſend 50000 Men into the Field, and the King has 22000 of them always in Pay, all good Soldiers, that do Wonders in a Battel. *Sha-Abas* I. did what he could to aboliſh this *Militia*, becauſe he ſaid, None but they could make any conſiderable Oppoſition to the Royal Power, and to that End he gave away ſome of their Privileges to the *Goulams*, but they again recover'd them. The General ought always to be one of their own Body, and the King cannot put any other over them. His Pay is 150 Tomans a Year. Under him are other Officers, as,

The *Mim-Baſhi*, who commands 1000 Men, and his Pay is 62 Tomans a Year.

The *Yux-Baſhi*, who commands 100 Men, and his Pay is 30 Tomans yearly.

The *Om-Baſhi*, who commands but 10 Men, and his Pay is 15 Tomans a Year.

The Pay of every Horſe-man is from 9 to 15 Tomans; beſides, at the General Muſter which the King makes every Year, he gives them uſually a Third part more than their uſual Pay, though he makes ſome Variations according to Favour or Merit. When the King has reſolv'd to put a Great Man to Death, he commits the Execution uſually to a *Corſchi*. Theſe Men have vaſt Numbers of Cattel.

The *Gouler-Agaſi* is the General of the *Goulams*, or which is the 2d Body of the King's *Militia*. They are Slaves, or the Sons of Slaves of all Nations, but chiefly are *Runagado Georgians*. They are about 18000, all Horſe-men, and they do the King very good Service. Their Pay is from 5 to 8 Tomans a Year. The *Corſchi's* are very good Husbands, and if they have a Piaſter to ſpare, will buy a Sheep with it; but the *Goulams*, as ſoon as they have received their Pay, fall a drinking and ſwaggering, and ſpend all. This Body hath this peculiar to them, that they never revolt, for being all Slaves, and of different Nations, they have no Ties of Kindred. The *Goulams* have no other Arms generally, but a Bow and Arrows, with a Skain, though ſome wear Coats of Male and Head-pieces, others Umbraces and Battel-Axes. They never entrench in the Field, but after their Officers have taken up the beſt Places, the reſt ſet up their Tents as near their General's Pavilion as they can.

The *Tufenkgilar-Agaſi* is the General of the *Tufenkgis*, who makes the 3d Body of the *Militia*. This part of the Soldiery was lately inſtituted, and is made up of Plough-men and *Runagado Armenians*, who have been brought up to Labour. They are Foot-men, and their Arms are the Scimitar and Musket. When they march, they have an Horſe or a Mule allow'd them to every 4 or 5 to carry their Luggage and Proviſions. Their Pay is not above 4 or 5 Tomans a Year. Their Officers have more or leſs according to their Quality and Command. They are of no great Reputation, and being numerous might do good Service, but the King never uſeth them, but in Caſes of Neceſſity. They dwell in Tents upon the Mountains in Summer, and remove into the hot Countries in the Winter. They are all well train'd and diſciplin'd by the Governour of their Province, who ſees them muſter and exerciſe their Shooting, and never fails to reward the moſt diligent and expert. They are always ready provided for any Command given for War, having every one his new Suit, and his Musket and Scimitar well ordered in his Cheſt.

The *Eſhek-Agaſi*, or Captain of the Guards, who is the Chief of the *Caſhek's*, or King's Guards, who carry a Musket with a wide Bore. They were lately inſtituted by the *Eatmud-Doulet*, that he might deſtroy the *Divan-begui*, whom he pretended to ſtir up Sedition among the People. This Officer has about 2000 Men under him, of which he ſets a certain Number every Night round about the Palace. He ſtands with a Battoon in his Hand, while the King ſits in Council, and falls on his Face when the King calls him to give him any Command.

The *Topigi-Baſhi*, who is the Maſter of the Ordnance, and Chief of the Sea-Affairs. His Buſineſs is but ſmall, for the *Perſians* have only a few pitiful Guns in their Frontier Towns, and a few large Barks in the *Perſian* Gulf and *Caſpian* Sea, which they maintain there to prevent the Robberies of the *Usbeck Tartars* and *Kalmuches*. Theſe latter are a ſtrong People, but the moſt deform'd under Heaven. Their Faces are ſo flat and broad, that there is the Breadth of 5 Fingers between their Eyes, which are very ſmall, and their Noſe ſo flat, that there is nothing to be ſeen but 2 little Holes, inſtead of Noſtrils. Their Knees and Feet run inward. When they go to War, they carry their Wives and Daughters with them, who fight as valiantly as the Men. Their Arms are Bows, Arrows and Skains, with a Wooden Mace at the Pummel of their Saddles, their Horſes being the beſt in *Aſia*. Their Captain is of ſome ancient Family among them, who is ſignal for Valour. The Duke of *Muſcovy* courts their Friendſhip with Preſents. Their Religion is particular to themſelves, and they hate the *Mahometans*.

The *Kans*, or Governours, are generally choſen out of the Bodies of the *Corſchi's* and *Goulams*, who are handſome Men, and much more valiant than the natural *Perſians*, whoſe Complexion is bad, and Shape ill, as is evident from the *Gaurs*, who are the original Inhabitants of the Country; for the reſt are mixed with *Georgian* Blood. The Governours of Provinces are as great as petty Kings, and are as much fear'd and reſpected by the People. They are ſeldom depoſed, unleſs upon the repeated Complaints of exceſſive Tyranny. Some of theſe Governments are worth 7 or 8000 Tomans, but their *Neurouz*, or New-Year's-Gift, which they are bound to preſent the King with Yearly, much leſſens it. Under theſe *Kans* are Governours of a leſſer Quality, put in by the King, and can be removed only by him, but the *Kan* may correct them for leſs Abuſes, and for greater, his Complaint to the King ſoon procures a Redreſs.

Their Prayers.

The

The *Kelonter* is another Officer, put in by the King in all Places, where there is a *Kan*, or Governour. He is exactly the ſame with the Tribunes of the People among the *Romans*. It is his Buſineſs to defend the People againſt the Tyranny of the Governours, and to take up their little Differences. He has conſiderable Incomes, for they who have any Buſineſs with the Governour, make him Preſents uſually to ſtand their Friend, for he bears commonly a great Sway with the *Kan*.

The *Aſeghs*, or King's Lieutenants, are the laſt ſort of Provincial Governours: Theſe are ſubſtituted by the King in Places, where he had *Kans* in former Times; and ought to have them ſtill, but that he would ſave the Charge; for, the *Kans*, and their Officers, who are like a King's Court, devour all the Profits of the Provinces, except a Preſent yearly given to the King. By this large Catalogue of Officers in the King of *Perſia*'s Court, as well in his Houſhold as Army, it is plain, that his Court is the moſt Magnificent and Glorious in all *Aſia*, and the moſt Civil and Polite in all the *Eaſt*.

§. *The Second of the Three Eſtates of* Perſia *comprehends the Gown-men, ſuch as are their Eccleſiaſticks, or Doctors of their Law, Officers of Juſtice, and thoſe of the Chambers of Accounts. The Metropolitan or Supream of the Eccleſiaſticks, is*

The *Sedre*, or Chief-Prieſt, who is the Prime Miniſter in Spiritual Affairs, as the *Eatmud-Doulet* is in Temporals, to whom alſo he gives place both in Council and in all Publick Ceremonies; but ſince in *Perſia* Eccleſiaſtical Dignities are no bar to Civil Employments, the *Sedre* is many times made *Eatmud-Doulet*. The Dignity of *Sedre* is not limited to one ſingle Perſon, but is often divided between two, becauſe there are two ſorts of Legacies, the one from the Kings of *Perſia*, the other from private Perſons; and for the greater Care of both theſe there are ſometimes created 2 *Sedres*.

The one is called *Sedre-Kas*, i. e. a peculiar *Sedre*, who manages all the Revenues of the Royal Foundations, and diſtributes them to the *Moullahs*, and Students, according to their Merit. The other is called *Sedre El-man-kouſat*, who has the Management of all the Private Foundations. The *Sedre*, whether the Office be in one, or divided, hath two under him, who decide all Points of Religion, make all Contracts, Teſtaments, and Publick Deeds; they alſo judge of Divorces, and of all Civil Debates and Proceſſes. The one of theſe is entitled, *The Skeik-el-ſolom*, and the other, *The Cadi*. Theſe 2 Dignities are in the King's Nomination, and in all the principal Cities of the Kingdom there are 2 of theſe Eccleſiaſtical Judges for all Matters that concern the Law.

There is a *Pickuomaz*, i. e. a Director of the Prayers in every Moſque, who is always there before the Prayers begin, and teaches the People to pray by imitating, or following him: He ſtands foremoſt, that all may ſee him, and beginning the Prayers firſt, makes the reſt ſay after him: He is the ſame with the *Iman* in *Turky*.

The *Moullahs* are the Doctors of the Law, as the *Hodgia*'s are in *Turkey*: They receive large Salaries out of the Legacies given to the Moſques, for reading and interpreting the Law, or *Alcoran*, to the People every *Friday*, and teaching the Sciences to all Comers. As a Mark of Sanctity, they wear a great white Turbant, with a ſingle Camblet-habit of the ſame Colour; their Gate is grave, and Diſcourſe very ſerious, yet mingled with Hypocriſie. When they light into any conſiderable Company, they preſently riſe and exhort them to go to Prayers, which they perform after this Manner: They firſt waſh their Heads, Hands and Feet, and ſpreading a Felt or Mat upon the Ground, lay a flat Stone at the one end of it, about the Bigneſs of the Palm of a Man's Hand, and kneel at the other. They always turn their Faces to *Mecca* in their Prayers, and to that End have a kind of Mariner's Compaſs to direct them punctually where it ſtands: Their Prayers ſeem to be accompanied with a great deal of Zeal; and while they are at their Devotions, they often kiſs the Stone which lies at the further end of the Mat, or Felt, and is brought from *Mecca*, as a more holy Piece of Earth than the common Ground, for that Purpoſe; for, by their Law they are often to kiſs the Ground in their Prayers: Though they are ſeemingly very zealous, yet they take great Notice, whether the Company be attentive, or no.

Their Prayers.

The *Montevil*, which is an Officer belonging to every Moſque, looks after the Repairs of the Building, and the Proviſion of what belongs to the Moſque; and,

The *Mouazen* cries Morning and Evening from the Top of a Tower, *That there is but One God, and that Mahomet is his Prophet.*

The *Perſians* have divers Colleges, called by them *Medreſe*, where there are a great Number of Scholars bred up at a little Charge, out of the Legacies left to the Foundations. They are allow'd a Chamber, but muſt find themſelves Furniture. They have no certain Maſters, but they go for their Inſtructions ſometimes to one, and ſometimes to another, and ſeldomeſt to the Principal of the College, called *Monderes*, becauſe he is generally an unlearn'd Man; for there are ſeveral Perſons in every good City, who are forward to teach the Sciences to get themſelves Honour, and to that End give Men Money to trumpet about their Name, to get them Followers. Their Manner of Inſtruction is thus: The Student firſt reads 2 or 3 Lines, and then the Doctor expounds it; then another reads 2 or 3 more, and ſo on. Every one riſes up out of Reſpect after he has done reading, and ſtands till the Doctor bids him ſit down again. One Doctor teaches all manner of Sciences at the ſame time; for he is not thought Learned among them that cannot talk of All. And certainly, had the *Perſians* the Advantages of Books, they'd prove Men of great Underſtanding, for with thoſe little Helps they have, they will give a good Account of their own Divinity, Logick, Phyſick and Mathematicks. Their Books for the moſt part are a *Perſian* Author *Kolgia Neſer*; ſome of the beſt Pieces of *Ariſtotle*, *Ptolemy*'s *Almageſt*, ſome Treatiſes of *Euclid*, ſome Fragments of *Archimedes*, the Opticks of *Ebne*, *Heiſler*, and ſome other good Books: They have a great Inclination to Poetry, which they grace with lofty Compariſons, and caſt into Rhyme as we do. Their Phyſick-Books are *Galen*, *Averroes* and *Hermes Triſmegiſtus*, whom they call *Galenous Aboualt*, or great Father, and *Ormous*. Their moſt conſiderable Hiſtorian is *Ronze-Elſapha*, who hath written a Chronology of the World from the Creation of it to his Time, but it hath little Truth in it. Their Books though dear, are very common; for every Tradeſman buys them, being very ambitious to learn the Sciences themſelves, and to encourage their Children to do ſo; for they ſend them to School betimes, or if they are Perſons of Quality, have Tutors for them at Home, who keep them cloſe to their Books till they are 18 Years of Age, never ſuffering them to ſtir out of Doors, unleſs it be to go a Hunting, or Shooting now and then; and of this they find this good Effect, that their Children are Diſcreet, Civil and Modeſt, ſo that you ſhall never hear an ill Word come out of their Mouths.

Their Colleges.

Their Way of Inſtruction.

Their Books.

The Education of their Children.

In their Chambers of Accounts there are alſo many Officers, who receive all the Books, Regiſters, and other Papers which concern the King's Revenue, and convey them to *Iſpahan*, where they are regiſter'd in the Chamber of Accounts there, called *Defter Kroon*. As to the Fee-Lands, called *Moulkerbar*, which belong to particular Perſons, but owe to the King certain Annual Rent; the Governours of the Provinces exact them with a ſevere Extortion.

The *Miſtempti* and *Memaleck*, are the Officers that value the Rents of all Lands in Demeſn, which is one of the principal Charges of the *Defter-Kroon*. They alſo take Cognizance of all the King's Farms, Quit-Rents, Proviſions and Expences of Receivers and Collectors. There is alſo *Miſtempti* to value Legacies.

The *Nazar* controuls the *Miſtempti* and the *Memaleck*, and his Hand is required to all Papers of Diſpatch.

The *Deroga*, or Provoſt of the *Defter Kroon*, is to proſecute and puniſh all that are guilty of falſe Receits or Exactions. Into this Office are delivered all the Grants and Aſſignations of the Wages of the King's Officers, and every Man comes and receives his own, or ſends for it to thoſe Places, upon which the Money is aſſign'd; but in all thoſe Places they muſt not go to the Country-men, for this would ſo terrifie them, that they would run away and pay nothing; but there is in every Village or Borough a *Reis*, or Chief of the Place, to whom the Officers apply themſelves for their Money: But ſince there is much Trouble in thus getting their Pay, the Soldiers will loſe a Share for ready Money, and the *Defter Kroon* and his Officers are greatly enrich'd.

The

The greateſt part of the Land in *Perſia* belongs to the King, and is only farm'd by private Perſons. The reſt of the Lands are meaſured, and pay ſo much a Meaſure. The King has alſo Toll and Cuſtom for all Merchandices, which amounts to a vaſt Sum, for the Port of *Bander-Abaſſi* alone brings him, one Year with another, near 20000 Tomans.

§. *The Third Eſtate of* Perſia *comprehends their Tradeſmen, Merchants and Artiſts, with their Trades, Manufactures and Commodities.*

The Trade of *Perſia.* The Commerce of *Perſia*, as in all other Kingdoms, conſiſts in the Trade of the Country and Foreign Traffick. The Trade of the Country is in the Hands of the *Perſians* and *Jews*, and the Foreign Traffick in the Hands of the *Armenians* only, who are as it were the King's and Noblemens Factors to ſell their Silks. As for their Handicraft Trades, they have great Variety, as Carpenters, Joyners, Shooe-makers, Cutlers, Weavers, Maſons, Smiths, and many others. Theſe Artiſts uſe their Feet in Working as much as their Hands, for their Feet ſerve them for a Loom, an Hold-faſt, and ſeveral other Inſtruments.

The Tax on all Tradeſmen. Moſt of the Corporations of Tradeſmen pay the King a certain Sum of Money, which is raiſed upon all the Artiſts of the ſeveral Trades, by an Aſſeſſment according to their Incomes; but the Joyners and Maſons are free, but they are obliged to do the King's Work *gratis*, or pay a Fine to be excuſed, which is the Reaſon that the *Marmor-Baſhi*, who is their Chief, if the King wants 20, ſummons 40, and excuſes them that will give moſt.

Their Carpenters. Their Carpenters and Joyners are but mean Artiſts, having no other Tools than a Hatchet, Saw and Chizzel, and one ſort of Plane, lately brought among them by a *French* Man. And, indeed the Scarcity of Wood that is among them does not allow them Materials to work upon, their whole Buſineſs being to make only Doors and Frames for Windows, which they do very neatly; for they have neither Tables, nor Bedſteds, nor Chairs. Their Joyners have no *Lathe* or Frame for Turning, but a Boy with a Thong

Joyners. makes the Wood to turn upon a Spindle, till the

Their Glew. Joyner faſhions it: But they have an excellent Glew, made of a Root, called *Scherifchoun*, which they grind like Corn betwixt 2 Stones, till it becomes like Sawduſt, and this they ſteep in Water, and uſe it for Glewing.

Writing. Their nobleſt Art is Writing, for they are wholly ignorant of Printing, and all their Books are written. An *Armenian* not long ſince ſet up a Printing-Preſs at *Iſpahan*, and going about to print the Bible, there was ſuch a Clamour among thoſe People who got their whole Living by Writing, that they ſhould be undone, that he was forced to break his Preſs, to avoid the ill Conſequences of the Invention. The

Their ſeveral Hands. *Perſians* uſe 3 ſorts of Hands, *viz. Neſtalick*, or the Set-Hand. 2. *Shakeſte*, or *Divanni*, Court-Hand. 3. *Neskre*, or the Running-Hand, which is much like the *Arabick*. They write with ſmall *Indian* Reeds, and ſay, that to write well a Man ought to lean ſo lightly upon his Pen, that a Fly may beat it out of his Hand. They turn the Paper about with one Hand, while they write with the other, that their Daſhes may be large and free. Their Paper is made of Cotton-Fuſtian ſleek'd. It is brown and weak, for the leaſt Folding tears it. Their Ink is made of Galls and Charcoal, pounded together with Soot.

Their Books. Their Books are written in the *Arabian* Language, which they call *Teſchiſh*, or the Eloquent or Learned Language, for the *Perſian* Language is in little Uſe among them, the Court ſpeaking the *Turkiſh* Language chiefly; and though the Gentry and common People uſe ſomething of it, yet 'tis either mix'd with ſo much *Arabick*, or Gibbriſh, that it hardly deſerves that Name; yet, in the Courts of the Great Mogul, and

The *Perſian* Language. of the Kings of *Golconda* and *Viſapour*, the *Perſian* Language is in ſo great Uſe, that a Nobleman in thoſe Courts would take it for an Affront to be ſpoken to in the Language of *India*.

As for their Painters, they only paint in Miniature, and though they can draw Birds and Flowers indifferently well, yet they know not what belongs to Figures or Stories. They have a moſt excellent Varniſh

Their Varniſh. made of *Sandarack* and *Linſeed* Oil, which they mix together and reduce to the Conſiſtency of an Ointment, and when they uſe it they diſſolve it in the Oil of *Naphta*, or Spirit of Wine many times rectified.

They make Soap of Greaſe or Taſſow, which cauſes it to ſmell ill, and with ſweating to breed Lice: Their Raſors are very thick and heavy: They whiten Tin, Braſs and Copper with *Sal-Armoniack* purified, and reduced to a white Powder, which mingling with melted Tin, they rub it upon the Veſſel with Cotton all over: This they will do ſo nimbly, that in half an Hour's time they will do 5 or 6 Skillets, and at a little Charge. Soap.

They have many Phyſicians, and ſome of them very skilful: They only preſcribe, and give it to the Nurſe, or other Women who attend the Sick, whom they viſit, and they go to the Druggiſts, and buy the Medicines, and make them up. They uſe cold Seeds, peel'd and put in Water, for a Fever, and *China* infuſed in Brandy 15 Days in the Sun-ſhine for ſeveral Diſtempers, enjoyning the Patient at the ſame time not to ſtir abroad, and to abſtain from Wine and Women; but this Medicine they do not uſe in Summer-time. They let Blood very dextrouſly, only by tying a Ligature of Leather, and without rubbing or veining the Place, prick the Vein with a Lance very skilfully, making a large Orifice, and taking away much Blood, if let alone. Phyſicians.

The *Perſians* are moſt excellent Artiſts for Manufactures of Gold, Silk and Silver, of which their rich Carpets and Tiſſues are made; nor do their Silver and Gold Manufactures ever grow Black, or loſe their Luſtre by long wearing and lying by. They make an Abundance of Silk-ſtuffs of all ſorts, and ſuch large Quantities of Taffata's, that they care not for the Stuffs brought out of the *Indies*, though they be much finer. They make much Linen Cloth of all Colours, upon which they faſten Flowers with Gum-water, and ſome Figures, though their Law forbids it. They are excellent Artiſts at Damasking with Vitriol, or engraving Swords, Knives, and other Inſtruments Damask-wiſe: But this they can perform upon the Steel of *Golconda* only, and not upon their own or ours, and therefore they are under a Miſtake, who think our Scimitars and Cutlaſſes are made of Steel of *Damaſcus*. Carpets and Tiſſues. Linen Cloth.

They are great Proficients at making of Bows and Arrows, and ſuch other Weapons as are uſed in their Country. In making of Bridles and Saddles they far exceed us, eſpecially in their Sewing, which they do ſo neatly, and with ſo much Art, with a kind of black Stitch, that it looks like Embroidery. There are an infinite Number that get their Living by dreſſing Seol-Skins and Goat-Skins, the firſt to make Boots for the Gentry and better ſorts of Merchants, and the latter for the poor People. Bows and Arrows.

There is a ſort of Earthen-Ware made at *Kerman*, which is very fine, and being broken, looks as white within as without, but it will not endure Heat ſo well as *Porcellane*, which has this peculiar Quality, that if you pour never ſo hot Liquor into it, neither the Foot, nor Brim's Top will be the warmer. There is an abundance of poor People that get their Living by mending of Glaſs Tobacco-Pipes, by joyning the broken Parts together with a certain Glew, made of Lime and the White of an Egg, and faſtning them with a kind of Lattin-Wire. The Trade for Velvets, Tiſſues and Taffata's, which formerly were tranſported out of *Perſia* into *Europe* in vaſt Quantities, is now much abated, becauſe now they are made in *Europe* better and cheaper. Earthen-Ware.

There is a vaſt Quantity of flat Silks tranſported out of *Perſia* into *Turky*, *Muſcovy* and *Poland*, which the Women uſe in Embroidery of their Veils, Handkerchiefs, and other Linen, becauſe they are lively. Conſiderable Quantities of Silk are tranſported out of *Guilan*; and Seol-Skins and Goat-Skins, which are dreſt in *Perſia*, are tranſported by the *Hollanders* into *India* and *Japan*, and by others into *Muſcovy* and *Poland*. Flat Silks.

The *Perſians* have alſo a great Vent for the famous Root *Ronas*, Fruits pickled in Vinegar, and ſweet Waters, into *India*. Great ſtore of Candied Quinces, and Boxes of Marmalade, made at *Balſora*, are from thence carried into *India*, where they are bought up by the *Mahometans* and *Portugueſes*; for the *Banyans* will eat none, for fear of eating Flies. Plenty alſo of dry'd Fruits are brought out of *Media*, and carried to *Tocat*, *Diarbequir*, *Nineveh* and *Bagdat*, and among the reſt, a ſort of ſmall Apricots, very pleaſing to the Taſte, which being boil'd in Water, makes a pleaſing Syrup, and are the only Diet for the Sick in thoſe Parts. There are alſo a great many painted Calicuts made in *Perſia*, but being coarſe, are only bought and made uſe of by the Poor; ſo that there is very little of it car- Ronas, &c. Dry'd Fruits. Painted Calicuts.

Camels. carried any further than *Turky*. The *Persians* make a great deal of Money of their Cattel; for first, they sell great Numbers of Camels into *Armenia* and *Natolia*, though the *Persian* Governours are unwilling to part with them, and so do in some measure hinder the Trade; for the *Turks* esteem the *Persian* Camels very highly, as being stronger than their own. They also sell great store of Horses and Mules, but their Trade is not so considerable as the former, because they send them only into *India*.

Horses and Mules.

The Provinces of *Media* and the Higher *Armenia* breed prodigious Numbers of Sheep, which the Foreign Merchants come as far as *Tauris* and *Hamadan* to buy, and drive them as far as *Constantinople* and *Adrianople*; and the greatest part of the Mutton, which is spent in *Natolia* and *Romania*, comes out of *Persia*, which enriches that Country much with ready Money. Formerly the Jewellers brought some *Turquoises* of the Old Rock out of *Persia*, but for these 15 Years last past there have been none found, and those of the New Rock are of little Value, because they lose their Colour in a little time, and turn Green.

Sheep.

Turquoises.

CHAP. XII.

Of the Justice and Policy of the Persians; *wherein their Money, Weights and Measures are considered.*

The Justice of the Persians. THE Justice of the *Persians* is very exact and very speedy: Suits are determined upon the Place, without any need of Advocates and Proctors, not but that the Officers of Justice are easie to be corrupted; but in their unjust Exactions, which they carry as secret as possibly they can, they are sooner satisfied than the *Turks*, and if their Injustice be discover'd, upon Complaint to the King, they are punish'd without Mercy. The *Kans* are to do Justice in their Provinces, as representing the King's Person, but lest they should wrong and oppress the People, the King places a *Kelonter*, who is only responsible to the King in every City, and his Business is to defend the People from the Injustice and Oppression of the Governours. In every City the King has a *Divan-Begui*, and the *Kan* places a *Deroga* under him, who appoints an *Aataï*, or Captain of the Watch, who goes about the Streets a Nights to hinder Disorders, and carries every one to Prison that he finds abroad at unseasonable Hours, unless he can give a very good Account of himself.

The *Kelonter's* Office.

Murther how punish'd. Murther is always severely punish'd, and no Money will save the Criminal, for when the Murtherer is taken and brought before the *Divan-Begui*, he delivers him to the Parents, or Kindered of the Person slain, who carry him directly to the Place of Execution, and without Compassion torture him to Death: Nor will the King upon the Importunities of the Kindred of the Murthered deny Justice for Favour or Affection to any Man, unless they will be bought off with Money, which, though sometimes offered, is very rarely accepted. Nor are the *Persians* more severe in the Punishments of Murther, than Debauchery. The King being inform'd, That a Woman had prostituted her own Daughter, commanded the Mother to be thrown Headlong from a Tower, and the Daughter to be thrown to his Dogs, which he keeps on purpose for such Chastisements.

Debauchery how punished.

The High-ways well kept. Above all Things, there is extraordinary Care taken for the Security of the High-ways; and for that Purpose, there are certain Guards, called *Radars*, set at convenient Distances all over *Persia*, who are ready to pursue upon the least Noise of a Robbery, and who examine all Men whence they come, and whither they are going; and if any Man answers not, as he ought, or is found to trip in his Account, they carry him before the next Governour. If any Person commits a Robbery, there needs no more than to send to the Places where the *Radars* have their Station, to know what is become of the Person, and they'll find him out, for all Places are so guarded, that it is impossible for him to escape. If any one endeavours to travel through the Mountains, or unfrequented Roads, the *Radars* seize him upon Suspicion for not taking the direct Road. When any one is convicted of Theft, he is immediately condemn'd, for there is found no Mercy in *Persia*. The Punishments inflicted upon such Felons, are of divers kinds; sometimes they are tied to a Camel's Tail by the Feet, and their Bellies are ript open; sometimes they are buried alive all but their Heads, and starved to Death, in which Torment they will desire the Passengers to cut off their Heads, though it be a Kindness forbidden by the Law; but the most cruel Punishment of all is, when they set a Thief on Horse-back, with his extended Legs fasten'd to a long Stick behind, then larding him with lighted Candles, they suffer the Candles to burn into his very Bowels. As for those that steal in Cities, they tie them by the Heels to the Tail of a Camel, and rip up their Bellies, and while the Beast drags the poor Creature along the Streets, one goes before him, crying, *The King thus punishes this Man for such a Crime*; and if he be not dead by that time he is dragg'd through the City, they hang him upon the next Tree. The *Radars* have but little Wages for securing the Ways, and therefore they'll use great Rhetorick with the Travellers, to get something of them for their Labour and Care. If a Merchant be robbed, the Governour of the Province must make good whatever he has lost, according as he can make it out by his Oath, or Book. The most unjust Thing that Travellers meet withal in *Persia*, which is rather an Abuse than a Thing allow'd, is from the King's *Shappars*, or Posts, who carry the King's Dispatches to the Governours of Provinces. When they are sent any whither, the King's Esquire is to find them an Horse and a Man to run to the End of the Stage, and bring him back again, but if the Courier's Horse be tired, or not so good as another's, he has a Power to dismount any Horse-man he meets upon the Road, and he must not resist him. This Privilege they often abuse, by changing Horses without just Cause, or making Travellers pay them Money to save their Horses.

Theft how punished.

In Cities.

The *Radars* beg.

In the Distributions of Inheritances in *Persia*, the Sons have 2 Parts, and the Daughters one; so if there be but one Son and one Daughter, the Son has 2 Parts and the Daughter one; and if there be 2 Sons and one Daughter, the Sons have each 2 fifth Parts and the Daughter one, and so in other Cases: But as to the Right of Inheritance, they have a very unjust Law devised for the Propagation of the Faith of *Mahomet*, and that is this: If a *Christian* turns *Mahometan*, when any of his Kindred dies, all the Estate of the Deceased belongs to him, and his Children shall be excluded, tho' he be no nearer than to the 5th Generation: The Author of this Law gave it out, that he was commanded it by *Dgiafer*, one of the 12 *Imams*, who affirm'd, that it was revealed to him from God; but the Christians have found out a Knack to evade this Law, by making a pretended Sale of their Goods to trusty Persons, and then disposing of them by Will, which the *Mahometan* Judges for a little Money will confirm, and so their Estates remain in their Families.

Inheritances how divided.

They have a singular Way of binding Criminals, by putting a forked Piece of Timber before their Throat, and the 2 Pronks of the Fork going on each side of the Neck, and the Hand of the Prisoner being shut into an hollow Place at the End. Their ordinary Rack to extort a Confession of Robberies, and other Crimes, is for Men to pinch off the Flesh with hot Pinchers, and to give them Blows on their Feet with a Cudgel; for Women, they put a Rat into their Drawers, which being next their Flesh, torments them grievously. The usual Punishments which they inflict upon Malefactors, which they would not put to Death, is to pluck out their Eyes, or else to pierce the Nerves of their Ankles, and hanging them up by their Feet, give them a certain Number of Blows with a Cudgel, and sometimes cut the Nerves short off, but such as they put to Death, they do to them as is above-men-

Their Way of binding Criminals.

Their Juſtice in Selling.

mentioned. The *Perſian* Government, in relation to Proviſion, is the beſt in the World; for there is a *Mechteſek*, who ſets a Rate upon all ſorts of Proviſions every firſt Day in the Week, and if any Seller be diſcover'd to ſell by falſe Weights or Meaſures, they are led about the Streets with a *Taklekolas*, or a Bonnet like a Bee-hive upon their Heads, and a Bell about their Necks to expoſe them firſt to the Laughter of the People, and then they are fined, and receive ſo many Drubs upon the Soles of their Feet. This is done to ſecure the poor labouring Tradeſmen from being injured and wronged, and there is ſo good Order preſerved, that you may ſend the leaſt Child to Market.

The moſt current Monies of *Perſia*, are,

The moſt current Coins.

Abaſſi's,	which are worth	18 *Sous*, 6 *Deniers*,
Mahmoudi's,		8 *Sols*,
Schai's,		4 *Sols* and half,
Cabeghi's,		2 *Deniers* and half,

0	0	1	

The Abaſſi's are the beſt Money in the World, they are the fineſt Silver, and the Officers of the Mint dare not coin them, till they have refin'd the Silver appointed for the making of them. The Piaſter weighs 13 Schai's, and the Toman 50 Piaſters. The *Man* of *Iſpahan* is a Weight of 12 Pounds. In Geometry the *Perſians* make uſe of a certain Meaſure, which they call the *Parſange*, or *Paraſang*, which is as much as 3 Miles, or a *French* League, their Mile contains 1000 Cubits, and the Cubit 24 Fingers, and the Finger 6 Barley-corns laid ſide-ways by one another, 6 Barley-corns ſo laid make an Inch.

The Paſs.

Jang.

CHAP. XIII.

Of the Manners, Cuſtoms and Habits of the Perſians.

THE Manners and Cuſtoms of the *Perſians* are correſpondent to their Religion. They never bear the Names of their Predeceſſors, but, like the *Jews*, for Diſtinction ſake, ſay, *Such an One, the Son of ſuch an One.* When they circumciſe a Child, and give him a Name, they write 3 or 4 Names in a Paper like Lots, which are drawn by a Child, and which of them is drawn, that's the Name of the Child. The Women that are barren ſwallow that which is cut from the Child at its Birth, believing, that it will make them conceive. They are very inquiſitive about the Time to come, and conſult Aſtrologers like Oracles for that Purpoſe. The King has always 2 or 3 with him to tell him the good and bad Hours; for he will undertake nothing, till firſt he be inform'd by them of the lucky Minute of ſome favourable Conſtellation, when he is to ſet about it, for if the King has bad Succeſs in any Affair, wherein he hath not conſulted the Aſtrologers, all attribute the Cauſe of it to the Negligence of the Prince, who omitted to enquire for an happy Minute. This ſuperſtitious Opinion has made Aſtrologers as neceſſary at the *Perſian* Court, as other Officers, and coſt the King large Sums to maintain 'em; for if the King have Senſe enough not to give Credit to all their Raveries, yet he muſt ſeem to rely much upon them, becauſe under the Pretence of a good or bad Minute, he orders all Affairs as he pleaſes, and no body murmurs at it, no not ſo much as Strangers, to whom if they complain of a Denial of their Deſires, he returns an Anſwer, That it is the ſuperior Power of the Stars that oblig'd him to act ſo or ſo.

Their Names, how given.

A Medicine againſt Barrenneſs.

Aſtrology much uſed.

The general Study of it.

From this Humour at Court it is, that there is a general Inclination of all ſorts of People to Aſtrology; not only the Learned and Men of Letters ſolicitouſly apply themſelves to it, but even the common People and Soldiers tamper with it. If a Man can but read, he fails not daily to obſerve the Diſpoſition of the Planets, their Aſpects, and their Conjunction and Oppoſition, that he may be thought to be ſome body. In Converſation all their Diſcourſe is about the Spheres, Apogees, Perigees, Excentricks, Epicycles, and ſuch Names, by which they ſeek to diſtinguiſh themſelves from the Vulgar.

Their Almanack.

There is an Almanack ſold every Year in *Perſia*, which is called the *Tacuim*, containing the Longitudes and Latitudes of the Planets, their Conjunctions and Oppoſitions, with ſuch like. It is alſo full of Predictions about War, Sickneſſes and Famine, and fixeth the proper Seaſons to put on new Cloaths, let Blood, purge and travel, with many ſuch like Inſtructions. They give great Credit to this *Tacuim*, and they that can get one, govern themſelves in all Things according to the Rules that are ſet down in it; and ſuch as have not that, go to know the Succeſs of their Affairs to a Doctor of the Law, and deſire him to open the *Alcoran*, and tell them the Iſſue of their Buſineſs. Thereupon the Doctor muttering ſome ſtrange Words, opens the Book, and if he meets with affirmative Commands, he declares the Undertaking ſhall proſper, if negative, he diſſwades from the Enterprize. They uſe alſo a certain ſort of Divination called *Rambe*, by Even or Odd, caſting Dice, or opening a Book called *Faal*, to prognoſticate good or bad Fortune, by Numbers Even or Odd. They alſo interpret Dreams, and uſe many other ſuch like Tricks, but principally about the Court, where there are Flocks of idle People continually.

Divinations by the *Alcoran*.

The *Perſians* are mightily addicted to ill Language, and foul-mouth'd Reproaches, ſo that when they fall out, inſtead of fighting with their Fiſts, they fight with their Tongues, and curſe one another, but they never blaſpheme God, or ſwear, or wiſh themſelves at the Devil, becauſe they ſay, *He is a Fool that gives himſelf up to the Devil.* Their Oaths of Affirmation are, *Sera-a-zire-ſha*, i. e. By the King's beloved Head, or, *Ervat Pigumbir*, i. e. By the Spirit of the Prophet. In their evil Wiſhes, they'll ſometimes ſay, Let thy Soul have no more Reſt in Paradiſe, than a *French* Man's Hat has in this World.

The *Perſians* are naturally Diſſemblers and Flatterers, and they make it their Study to acquire Eſteem and Applauſe. They love to give and receive Preſents, and eſpecially to preſent their King. Their Luxury and Expence is exceſſive, and though it be againſt *Mahomet's* Law to uſe Gold or Silver-Plate, unleſs in Commerce or Money, none but the Poor obſerve it.

Their Luxury.

The *Perſians* are very much accuſtom'd to mutual Viſits at their ſolemn Feſtivals, and the more noble ſtay at home, to expect the Viſits of their Inferiors, who ſtay in the Great Hall, till they come out of their *Harams*. When the Noble-man comes to them, he ſalutes the Company, by laying his Hand upon his Stomach, and bowing. After ſome Compliments, he gets on Horſe-back, and being attended with all his Viſitants, goes to the King's Court, to expect ſome Kindneſs by Virtue of their Favour. The King uſually ſends them to the Governours of Provinces with an Hawk, or *Calaat*, giving Order that the ſaid Governours ſhould remember the Serjeant-Porter. The Kan, to whom the *Calaat* is ſent, hearing of its Coming, meets it with all his principal Officers, and chief Inhabitants of the City, with Drums, Trumpets, and all ſorts of Muſick, and as ſoon as he perceives the Meſſenger, makes a low Obeyſance and a Prayer for the King, giving God Thanks, that he is in his Mind, and having put it on, returns to the City with all his Retinue, and makes a great Feaſt at his Houſe for the Company, ſhewing them the *Calaat*, who, by way of Compliment, cry, *Moubrek Baſhet*, i. e. May it be bleſſed and prove a good Omen.

Their Viſits.

The Manner of their Viſits.

The *Perſians* are not much addicted to Gaming, not only becauſe their Law forbids it, but becauſe the *Meſhaldar-Baſhi* puniſhes all Gameſters; but the richer ſort laugh at them, and regard them not. Among the *Perſian* Games there is one which they call *Gengeſte*, which is upon the Cards. They have 8 Suits of Cards

Their Averſion to gaming.

Their Games.

Cards. They also play at Chess, and Ticktack, which are most in use with them. The Shop-keepers also play in the Streets with little Bowls like our Marbles with which Children play. But they have no Bowling-Greens nor Tennis-Courts, nor do they know what those Sports mean. Neither the *Persians*, nor any of the Eastern People use walking as we do, but are amazed to see us do it so long together. They always sit upon a Carpet in their Gardens for Air, or Pleasure, and if they rise, 'tis to gather some Fruit from the Trees, not caring to eat what another has handled. Their Men never dance, but their Curtisans at their Feasts dance open-faced, and shew a 1000 Postures to divert the Company. Their Jugglers are every jot as good as ours, and their Rope-Dancers surpass them.

Walking asham'd.

Dancing.

The *Persians* are as superstitious as the *Turks*, and wash their Heads, Mouths and Foreheads always before they go to Prayers. Their Law also appoints another Washing, which is to go to their Baths after they have been with their Wives; and some are so superstitious as to go to them every Day; but these common Baths are very dangerous, for many have gotten the foul Disease by going into them.

Their Washings.

Their Barbers, who are very neat, and surpass ours for lightness of Hand, for one can hardly feel their Razors, have also a Knife to pare the Nails of the Hands and Feet, which they do very dextrously. Their Lawyers cut their Beards with Scissors, but do not leave them so long as the *Turks* do by much, but the Courtiers and Soldiers shave off all, except what grows upon the upper Lip, for they hold long Mustaches to be a great Ornament to the Face.

The *Persians* are extreamly vain, and much given to Luxury, which puts them to vast Expences, not only in Apparel and Furniture, but in Servants, of whom they keep great Numbers, and at their Tables, which they fill with a great many Dishes. In their Travels they carry a world of Baggage, because they will have as great Conveniencies as if they were at Home, and their Tents are very magnificent. Persons of Quality lead a very idle Life in *Persia*; in the Morning they go to Court, and return home at Noon, where they spend the rest of their Day in smoaking Tobacco; and, if they visit any of their Friends, that is the greatest part of their Conversation. Their Pipes are Glass, and they smoke through a Vessel of Water, and these they carry with them in their Visits. They will not eat any thing that a Christian hath but touched, thinking it to be polluted; and therefore will not suffer them, to touch any Flesh, or any other Thing sold for Food in their Markets, till they have bought. If a Christian drink in their Pot they break it immediately. They will not suffer any Christian to enter into their Coffee-houses or Bagnio's, because they account them *Medgu*, i. e. impure. If a Fire break out in any of their Houses, they will not put it out, only save what Goods they can, but let it burn down as many Houses as it can, till others, who are not of their Law, put it out.

Their Luxurie in Apparel.

The Nobility are very idle.

Their Aversion to Christians.

The Habit of the *Persians* is a Robe or Vest, which they call a *Kaba*, that comes down a little below their Knees. It is made commonly of fine Cotton Cloth, dyed red, yellow, green, or any other Colour they fancy, and so sleek'd, that it seems to be Sattin. It is quilted with Cotton for Winter, but made thinner for Summer. These Linens would be very cheap, but the Persons of Quality change their Robes every Day. Their Sleeves are long, close to their Arms, and reach as far as their Wrists. It is fitted to their Bodies as far as the Waste, but then 'tis wide and loose. Over this they wear a noble Girdle of Silk, adorn'd at the Ends with Flowers of Gold, over which they wear another Girdle of fine *Kerman* Wool. The richer sort are so vain, as to wear 3 Girdles, 2 Silken ones, and a 3d of *Kerman* Wool, which is tied uppermost. Under their Robe or Vest they wear a short Wastcoat of flower'd Fustian, quilted, and set thick with Oylet-holes, which comes down to the middle of the Thigh. They call it an *Acarlick*. Their Shirts are for the most part of Calico (for they have no Linen in *Persia*, nor in the *Indies*) and sometimes of Silk of divers Colours; they have no Necks, but only an Hem like Womens-Smocks. Their Breeches, or Drawers, come down to their Ancles, without any Codpieces. Their *Sefir*, or Bonnet, which we call a Turban, is made of a fine Piece of Silk, mingled with Gold, being in Form much like our large Pumpions, and the Tops of them are a little flat, and the Ends of the Silk being garnish'd with Gold and Silver, make a kind of Posie. These Bonnets are for the most part very heavy, especially the Noblemens, which are nothing but Gold and Silver, the meanest of which are worth 200 Crowns; but there are some worth 4 or 500, which are worn by the greatest Lords. There is scarce any Officer of Quality that doth not wear a rich Jewel in his Bonnet. The more inferior *Persians* cover their Heads with a little *Calot*, or Stuff, over which they wreath a Turban of white Cloth, and over that a Turban streak'd with several Colours, which hath so many Casts round as makes it look very big. The *Moullah's* always wear their Turbans white. The meanest sort of People wear long and sharp pointed Caps of white Felt, with a little Slit before and behind, like *English* Caps, and sometimes they put a sorry Turban about it. Within they wear nothing but Caps lined with Lamb-skin. The Courtiers and Soldiers wear their Daggers upon their Stomachs, stuck in their Girdles; the meanest Soldier inlays the Handle and Sheath of his Dagger, and the Grandees have them all beset with Pearl. In *Sha-Abas*'s Dagger was a Diamond, and some other Stones, valued at above 20000*l*. Over their Vest they wear a Justacor, fasten'd at the Top with a Button, and most usually they have 9 tufted Buttons before, set by 3 and 3, at an equal Distance, for Ornament. This Garment is made of Cloth or Tissue, which in Summer time wants Sleeves and Fur, but in Winter is lined with Martins, or a grey Lamb-skin, which comes from *Koraſan*. All these several Garments are of several Colours. Besides all these, in Winter they wear a long Cloak down to their Heels, with Sleeves of the same Length, lined with rich Fur. The Persons of Quality, and some of the meaner sort, make no more of Gold and Silver, than we do of Druggets; for a Man that has but 7 or 8 Tomans (or 30*l*.) a Year shall spend 5 in Cloaths, which Excess in Habit is so imitated by all, that a Man can hardly tell the Servant from the Master: And hence it is a Proverb among the *Persians*, *Carbebe Leban*, i. e. *Fine Cloaths make a Man esteem'd at Court*; but in the Reigns of *Sha-Abas* the First and Second, this Disorder was not allow'd, but Men were obliged to go clad according to their Condition, and drubb'd if they exceeded it. Because it is very cold in *Persia*, they make use of 3 sorts of Fur, Lamb or Cats-Skin, and Fox-Skin for the meaner sort, and Martins for the Grandees at Court and Persons of Quality. Their Shooes are much like Womens Slippers, the Heel is about 2 Inches high, and no thicker than Womens Shooes, they are peak'd, and made commonly of Chagrine of a green Colour, or Carnation. They wear them so short, that all the Heels hangs over almost. Their Stockings are made of Cloth, very wide, and all alike big; they reach up to the Knee, but are tied below it; and that they may not be worn out by their Slippers, they sew a Piece of Leather to the Heel.

Three Girdles.

Their Turbans.

Jewels in their Bonnets.

Their Daggers inlaid, or set with Pearls.

Their Cloaks.

Their Vanity of Cloathing.

Their Furs.

Their Shooes.

The Women in *Persia* are very richly habited, but their Garments are all of a Piece, though little different in Shape from the Mens, open before, and comes no lower down than the Calf of their Legs. Their Girdle is not tied fast, but hangs carelesly, their Sleeves also are close to their Arms, and reach to their Wrists. Upon their Heads they wear a little Bonnet, raised like a little Spire, adorn'd with precious Stones according to their Quality, and from it falls down a Veil behind, which is very graceful. They wear Breeches like Men, and their Shooes are almost like theirs. They gather their Hair into a Tress, and sometimes add false Hair to it to make a long Lock, which they put in a Velvet or Sattin Case, embroidered, which hangs down behind to the Waste. They put Rings through their Noses, which they pierce with Needles, and though within Doors they have their Face and Breast uncover'd, yet when they go abroad in the Streets, all, both Rich and Poor, are cover'd with a great Veil, or Sheet of very fine white Cloth, of which one

Their Neatness in their Cloaths.

The Womens Habit.

Their Hair.

Their Veils

one half like a Forehead-Cloth, comes down to the Eyes, and going over the Head, reaches down to their Heels, and the other half muffles up their Face below the Eyes, and being fastned with a Pin to the Left side of the Head, falls down to their Toes, covering their Hands, with which they hold the Cloth by the 2 Sides, so that they are covered all over, except their Eyes. When they travel it is commonly upon Camels, on which they are placed in *Caschares*, which are a sort of cover'd Panniers, which they put on each side of the Camel, that they may not be seen; for, indeed, the *Persian* Women are seen by no Man, but their own Husbands. They are very idle in their Houses, not concerning themselves with any sort of Housewifry. Indeed, every thing is at the Husband's Disposal, so that the Women are rather Slaves than Wives. They spend their Time in taking Tobacco after several Fashions.

Women not seen by Men, but their Husbands.

When they go to the Baths, happy is she that has the finest Cloaths, and bringeth the best Collection. They that have Slaves cause them to rub their Arms, Legs and Thighs till they fall asleep, having no other Divertisement in their voluptuous Prison. The higher a Man is in Dignity, the more he glories in having a great Number of Wives and Slaves, and his absolute Power keeps them in Order, either willingly, or by Constraint. Within Doors the Women, as well as the Men, sit as our Taylors do in *Europe*: They lie also as do all the Eastern People, upon a Quilt on the Ground, without Sheets. They have always on a Smock and a Pair of Drawers, and many times also an *Acardicke*, or Waistcoat. They cover themselves with a quilted Coverlet, set with Oylet-holes, and over it a Cloth painted with Flowers and other Fancies.

Their Bathing.

Their Lying.

The Nobility keep 2 sorts of Eunuchs to guard their Sultanesses, or Wives, *viz.* The White, who never come near the Women, but guard the Doors of the *Haram*, the Black, who are flat nosed, and frightful to look upon; these attend only upon the Women, and if there be a Necessity of the Womens going abroad at any time, they go behind and before with Battons in their Hands, to drive the People out of the Way.

Their Eunuchs.

When they wear Mourning for any Relation deceased, it consists in a Girdle, the 2 Ends whereof hang down to their Stomach, where they cross them. The Women mourn a long time for the Dead, as they do also in *Turky*, and all over the *Levant*; for during several Months, when any Woman comes to see them, they renew their Lamentations, weeping with a loud Voice, and sighing, but in such a Tone, as one would think they were singing; and every time they go to the Grave of the Party deceased, though it be more than a Year after, they renew their Cries, as if he were but just dead; but the Men, when any of their Relations die, they rend their *Caba* before, as a Sign of Grief, and for 7 Days together give Alms to the Poor, as do also the Women.

Their Mourning.

The *Persians* divide the Natural Day into 4 Parts, *viz.* 1. From Sun-rising to Noon. 2. From Noon to Sun set. 3. From Sun-set to Mid-night: And, 4. From Mid-night to Sun-rise. At Mid-night, Morning and Sun-set they make a most hideous Din in every great City with Kettle-Drums, Haut-boys, Lattin-Basons, and other Instruments, upon which there are some Men hired to play for a Quarter of an Hour together in some Place, where they may be heard all over the City; and in the Cities where the Governours reside they have Cornets, above 7 Foot long, with deep Mouths, which may be heard half a Lg. These Instruments are employ'd always at their great Solemnities, as also when the King creates any new Officer or Governour; and they have also a Privilege to play at any House where they understand there is a Male Child born; but the Nobility value it not, though the meaner sort dare not refuse it.

Their reckoning of Time.

Their great Cornets.

The *Mahometans* in the Computation of Time make use of Lunar Months, which they thus call, 1. *Moubarren*, 2. *Cepher*, 3. *Rebia-el-Avel*, 4. *Akner*, 5. *Gamadil-Avel*, 6. *Gamadil-Akner*, 7. *Regeb*, 8. *Shaabon*, 9. *Ramezan*, 10. *Shaval*, 11. *Zikade*, 12. *Zilhagge*, and every Month begins from the first Appearance of the Crescent; but in their Astronomical Accounts, and the Calculation of the Long. and Lat. of the Planets for composing their Almanacks, they make use of Solar Months, thus nam'd, *Azar* 31 Days, *Onzon* 30, *Ajar* 31, *Harizon* 30, *Tamouse* 31, *Ab* 31, *Eclout* 30, *Techrion-el-Avel* 30, *Techrion-el-ilanis* 30, *Kanon-el-Avel* 31, *Kanon-Elsani-Shaabas* 28 or 29, answering to our *February*, and so this Account accords exactly with the *Julian* or *Roman* Account. The Day of the *Vernal Æquinox* is the first Day of the Year, which they call *Neozooze*, and is one of their principal Festivals; for on that Day all their Grandees appear at Court, and present the King according to their Quality; and if they can meet with nothing rare they do it in Ducats of Gold; and some present him with 10000. They also give God thanks for preserving them to see the New Year, and securing the Fruits of the Earth from bad Seasons, for the Corn is well come up by this time. Upon this First Day of the Year if a *Persian* has not where-with-all to buy him a new Habit, he will Mortgage his own Body to have one, so proud and luxurious is the Nation from the Highest to the Lowest.

Their Months, Lunar.

Solar.

Their New-Year's-Gift to the King.

The *Persians* desire not Delicacies, or Dainties, both the Nobler and Meaner sort being very temperate in Diet, in regard that Wood is so dear about *Ispahan*. They never eat boiled Meat above once a Day, and as for their Dinner, which they call *Shate*, it consists of Bread, Cheese-curds, Milk, burnt Wine, Melons, and other Fruits in season, to which the Rich add wet and dry Sweet-meats. At Night their usual Food is *Pilaw* and Roast-meat. They buy their Provisions from Hand to Mouth, especially the *Mahometans*, which is a double Charge; but the *Armenians* live thriftily, and buy at once a good Quantity of Provisions, which will serve them for a time. Mutton, Kid, Pullets and Pigeons are the usual Diet of the *Persians*, for they very rarely eat any Beef. The King and great Lords will sometimes eat a Piece of an Hare, when they have been a Hunting; but when they have kill'd a wild Boar, they send it always to some Christian, in Expectation to be presented for the Honour done him. They have no Diversity of Victuals, or Made-Dishes in *Persia*, their Diet being more to satisfie their Hunger than please a nice Palate. They understand not how to roast Meat, and therefore seldom do it, and if they do, it is by Bits. They usually bake their Meats in an Oven, and this is the Roast-meat, sold in certain Shops at *Ispahan* in what Quantity one pleases to buy; and there are other Cooks that sell boil'd Meat or Rice. Their Sauces are only certain Fruits pickled up with Vinegar. They have 2 sorts of Broth, the one call'd *Schilao*, and the other *Cangi*, the first is made of Rice boil'd in Water with Salt till it is pretty thick; and the other is made of Rice boil'd in Water, but strain'd out and thicken'd with Flour, and the Yolks of 2 Eggs, and sweeten'd with Sugar: This last is a pleasant Food, easie of digestion, and very nourishing: It is given much to the Sick, who scarcely are allowed any other Food.

Their Diet.

The sorts of Food.

They line no part Meat.

Their Broths.

The *Persians* are immoderate in the excessive Eating of Fruit, some eat 4 Mans of Melons at a time (a Man is 12 Pound) and many die of it. Their Bread is very white, for they have Wheat enough to furnish the whole Kingdom. They bake every Day, and making up their Bread in thin Cakes, strow them with *Sesamum*, or Poppy-seed. They bake their Bread in Ovens made in the Ground, and at *Ispahan* in an Earthen Pot.

Their eating of Fruit.

Their Bread.

The *Armenians* make a sort of Bread as thin as Paper, and bake it upon a thin Iron Plate, made of red Copper tinn'd within side, for by the Law of *Mahomet* they may not make use of Silver, but the King useth Gold Plate. To eat their Broths they use Wooden Spoons, but take up their Rice with their Fingers, because that is thick. They make great use of Earthen-Ware, which is very pretty, because of the pretty Varnish they put upon it. It is made in *Kerman*, and the *Dutch* learn'd their Art of making Earthen-Ware from thence.

Earthen Ware.

At their Debauches the first Thing they set upon the Table is a Pipe, Tobacco, and a Dish of Coffee. They smoak all Day long, which they are enabled to do, because they draw the Smoak through a long Glass-Bottle of Water. They sing very little in their Cups, but make themselves merry by reciting a vast Number of wicked Verses with a great deal of Gravity. Many of them will confess, that their taking of much Tobacco is hurtful, but they plead, *'Tis the Custom*. Some of them also take Opium, which is made of Poppy-Juice, made into Pills. They take no more than the Head of a Pin at first, but encreasing their Doses by Degrees, come at length to take the Quantity of half a Wall-nut; and when they are come so that Pitch they dare not give over, because they endanger their Lives, unless they fall to drinking of Wine.

Taking Tobacco.

Opium us'd.

Wine. In their Youth theſe *Theriaks*, or *Takers of Opium*, appear with pale, penſive and dejected Countenances, and the Uſe of their Speech is almoſt loſt, and they are ſhort lived, ſeldom arriving at 40, and if they do, they complain heavily of Pains. They that have a Mind to kill themſelves, ſwallow a large Piece, and drink Vinegar after it to prevent any Relief by any Counterpoiſon. They have another ſort of Drink with which they make themſelves very merry, which they call *Kokemaar*, made of Poppy-Seed boiled; they take it in Broth, and it is ſo intoxicating, that it cauſes them that take it to ſhow many antick Tricks and Poſtures, which cauſes a great Diverſion. There are Houſes called *Kokemaar-Koone*, where this Liquor is ſold, and many go to ſee the ridiculous Actions of ſuch as drink it with Pleaſure. They uſe not Butter of Cows-Milk alone, becauſe it is not good, but mingle with it Butter of Ewes-Milk, which is much better.

An intoxicating Liquor.

Their Butter.

The *Perſians* by their Law are prohibited to drink Wine, as well as the *Turks*, but they are not ſo ſcrupulous as to that Point: They drink it without any Mixture, according to the Cuſtom of the *Levantines*, who never drink Water with it, but have Pots of Water ſtanding by them, of which now and then they take a large Draught. The *Perſians* alſo make great uſe of Ice in their drinking, but never uſe Snow.

They drink Wine.

The Way of ordering their Feaſts is after this manner: The Gueſts come according to Invitation in the Morning to the Houſe, and ſpend the whole Day in taking Tobacco, and telling Stories. Between whiles they have Sweet-meats, Coffee and Fruits ſet before them. In the Evening the *Sofra* is ſpread, and the Table ſerv'd with boil'd and roaſt; and if the Perſon that treats be of any Quality, he has a Governour of the Feaſt, who ſits upon his Heels with a Ladle and Wooden Spoon in his Hand, and puts the Rice and Meat upon little Plates, which the Servants preſent by equal Portions to every one of the Gueſts, and then they fall to taking up the Rice by Handfuls, and Meat with their Fingers; ſometimes they mingle curdled Milk with their Rice and Meat, and then they make up all into a Lump, as big as a Tennis-Ball, and put it into their Mouths at once, which is the Reaſon they have ſoon dined; and if there be more Gueſts than their Table will hold, he that has dined gives his Place to another, and ſo their Meals are ſoon finiſh'd, though many be preſent. They drink no more at their Meals than juſt ſerves to quench their Thirſt and drive down their Meat. When all is done, they bring a Baſon with an Ewre full of hot Water to waſh their Hands and Faces, and then after ſome few Compliments, the Gueſts return home, their Servants bringing them their Shooes to get a ſmall Piece of Silver.

Their Way of ordering their Feaſts.

Their Manner of eating.

Their drinking at Meals.

The *Armenians* treat after the ſame Manner, only they begin their Feaſts with a Cup of Strong-water, and ſome Sweet-meats, and give every one of the Gueſts a Couple of hard Eggs, and after they have taken away they fall to drinking to Exceſs; he that gives the Entertainment never thinking he has done well till his Gueſts are not able to go out of the Room, but tumble up and down in it, and then he thinks he has not ſpent his Money in vain.

The *Armenians* drink to Excels.

In fine; The *Perſians* are very gentile, and at their Entertainments freely receive and welcome all Comers, wondering at the *Franks* for the Shutting the Doors at their Meals.

CHAP. XIV.

Of the Diſeaſes in Perſia, *with their Cures; as alſo of their Death and Burial.*

THE *Perſian* Children are ſeldom ſick of the Small-Pox, but in lieu of that they are very ſubject to ſcald Pates till 10 or 12 Years old, which, 'tis probable, proceeds from their ſhaving their Heads ſo young, and ſo often, *viz.* at 5 or 6 Months old, and 2 or 3 times a Week. They would be troubled with the Pox more, were it not for the Drineſs of their Air, and their ſo often Bathing, by which they ſweat out the Venom, for they never lie with the ſame Woman twice without Bathing. The *Perſians* are never troubled with the Gout or Gravel, but the *Armenians* are much troubled with the latter, eſpecially ſuch as in their Youth have allow'd themſelves to drink more Wine than Water. In the Cholick the uſual Medicine is Horſe-fleſh, and many have eaten it with Succeſs.

Scald-Pates.

Pox.

Cholick.

Generally the *Perſians*, eſpecially the richer ſort, who have wherewithal to live handſomely, are much leſs ſubject to Sickneſs than the People of *Europe*, which ſome impute to the *China* Drink which they uſe in the Spring every Year, boiling an Ounce in 3 Pints of Water, and continuing the Doſe 10 or 12 Days together, all which Time they uſe a very moderate Diet, and eat no Fruit for a Month after. This Drink cauſes them to ſweat mightily, and the Sweat being wiped off, dyes their Linen; nay, the Effluvium's dye the very Walls of their Chamber of a yellow Colour. For a Dyſentery they take ſowre curdled Milk, with boiled Rice and a little Rhubarb. Their uſual Diet in Sickneſs is Rice boil'd in Hen-Broth, or a little Water; and they account a moderate Diet, as indeed it is, a great Thing in all Diſeaſes, and while any one is ſick, he is never ſuffer'd to change his Linen.

Dyſentery.

When any Perſon lies dangerouſly ill, 'tis the Cuſtom among the *Perſians* to light many Fires upon the Terraſs of the Houſe, to give the People Notice to pray for him. As ſoon as the Breath is out of his Body, the whole Houſe rings with Cries and Lamentations, eſpecially of the Women, who tear their Hair, and ſhew ſuch antick Poſtures, that one would think them poſſeſs'd. In the midſt of their Tears they make long Repetitions of the worthy Actions of the Deceaſed, and every Foot they ſet up a Yelling. Then they go to advertiſe the *Cadi*, that ſuch an one is dead, who anſwers, *Sorcheamet Salamet-Baſhet*, May your Head be in Safety, and then ſeals a Licence to the *Mourdercheur* to take the Body and waſh it in an Houſe that is built for that Purpoſe near a running Water.

Their Grief for the Dead.

When this is done, a great Number of *Moullahs*, with their long Staves, which are the Enſigns of the Moſque, go down to the Houſe, where they tear their Throats with crying, *Alla*, *Alla*, *Alla*, repeating nothing elſe. When the Body is carried out to Burial, it is the Cuſtom, that every one that meets the Bier, offer their Shoulders to help to carry, while the other eaſe themſelves, and for that the Kindred of the Deceaſed make ſome Acknowledgement. If it be a Perſon of Quality, all his Horſes are bridled and ſadled, and others perhaps borrow'd, to attend the Corps, one carrying his Turban, another his Scimitar, another his Bow, another his Arrows, and another his Buckler, and whatever elſe is of any uſe to ſet forth his Quality and Courage.

The *Moullahs* Mourning.

Their Burials.

The biggeſt Church-yard in *Iſpahan* is *Calreſton*, but there is not one handſome Tomb in it. The *Armenians* lay a great Stone over their Graves, and the Rich ſet up an Arch with 4 Pillars, under which they eat and drink in the Shade, when they viſit the Tombs of their Anceſtors. Their Graves are 6 Foot deep, and 6 Foot long, and 2 Foot wide, and in them they lay their Bodies with their Faces towards *Mecca*, and ſet up 2 Tiles on each ſide his Head, to keep the Earth from falling upon it. If he be a rich Man, or have been a ſtout Soldier, they bury him with his Turban, Scimitar, Bow and Arrows, and ſet Victuals by him in a Place made up on purpoſe for it, with Bricks, while the reſt is filled up with Earth. After the Interment the *Moullahs* only return to the Houſe of the Deceaſed, where they have Meat ſet before them, and are paid for their Singing and Bawling, and they that have bawl'd the loudeſt, get the moſt Money, which makes them ſtretch their Throats with all the Force they have. A while after the Kin-

Their Monuments and Graves.

The *Moullahs* paid.

dred of the Heir come to visit him, and discourse him upon the Contempt of the World, telling him, that it is but as a Caravan, which sometimes arrives sooner, and sometimes later at its Journey's End. Eight Days after the Heir returns their Visits. Their Grandees generally in their Wills order, that their Bodies shall be either carried to *Mecca* or *Mosbed*. The *Persians*, as well as the *Turks*, believe, that as soon as the Grave is fill'd up, the 2 Angels *Noguir* and *Manguer* revive the Dead, as far as his Waste, ask him the Reason of his Faith, and how he said his Prayers, and according to his Merits they use him well or ill.

The Grandees buried at *Mecca*, or *Mshed*.

The State of the Souls before the Resurrection they hold to be this: Their Torment consists in a Grief for not having arriv'd to those Perfections and Sciences to which they might have attained, and consequently for not having arriv'd at that Perfection which God requires of them. Others hold, That the Souls of the Miserable are tormented with Dreams and Visions; but that the Souls of the Happy always enjoy the Sight of pleasant Objects, till the *Saheb-el-Zaman*, or Master of Time shall come to confirm the Law of *Mahomet*, who shall kill *Dedgar*, i. e. *Antichrist*, with his own Hand, at which Time all then alive shall die in an Instant, and then shall happen the General Resurrection, which they call *Moavedet-bechre*: Then shall the same Bodies and Souls unite to appear at the Day of Judgment before the Great Judge of the World: To go thither they must pass over a Bridge call'd *Pol-serat*, which is sharper than the Edge of a Rasor, but all the *Mussulmen* shall pass over it without any Danger, with the Swiftness of a Bird, but Misbelievers as soon as they set their Feet upon it shall fall into a Torrent of Fire, among a Thousand Devils, armed with Cramp-Irons, Pincers and Tenter-hooks. The Porter of Paradise, whom they call *Rursuen*, shall open them the Gate: There they shall sit upon the Banks of the great *Kausier*, which is a Fountain, where their Prophet shall give them of the Water to drink out of a Ladle, and that afterward they shall have a great Number of Women created on purpose for them, with all sorts of most delicious Food, but that this Place of Recreation shall not be defiled with any Excrements by their Eating and Drinking, but that all their Evacuations shall be in a perfum'd Sweat, and so they always remain in an happy Condition: But others that are more refined, and do not believe material Enjoyments, affirm, That the Happiness of Paradise consists in the perfect Knowledge of the Sciences, and that their Senses shall have a Satisfaction according to their Quality.

The Happiness of Paradise.

Their Opinions about the State of the Dead and Resurrection.

CHAP. XV.

Of the Roads from Ispahan *into the* Indies.

§. 1. *To* Ormus *and* Bender-Congo, *and so by Sea to* Surat.

FROM *Ispahan* you travel first to a Place where the *Radars* keep Guard, half a Lg. from a Town called *Ispshanecke*, which you pass through to *Mahiar*, but the Land all along is barren and without Wood, till you come within a Lg. of a great City, called *Comsse*, where there are several Inns, and tho' they are built of Earth, yet they are pretty neat. About 2 Miles from this City stands a neat Mosque, with a Pond full of Fish by it; but the *Moullah's* will not let you catch them, because they say of it, they belong to the Prophet to whom the Mosque is dedicated, but Travellers for the Coolness of the Air chuse to lodge by it.

Comsse.

From hence, through a well till'd Plain, abounding with store of Grain, you come to an Inn, called *Makfonbegui*, and from thence, over a barren Country, to *Tesdecas*, a little City built upon a Rock, having but one Street, but the Houses are 3 or 4 Stories high. This City is in such Danger of falling from the Rock, that the Inhabitants are building them another City at the Foot of it. The Land about the City bears the best Corn in *Persia*, and the Inhabitants make most excellent Bread of it, mingling a few Pease with the Corn.

Tesdecas.

The best Bread of *Persia*.

Passing by a neat House, with fine Gardens, you travel over a ruggy craggy Mountain, called *Kotel-Irmel-tebekeni*, i. e. *The Hill that pulls off the Horses Shooes*, and going by a Castle, called *Gombesiala*, you arrive at a Village, call'd *Debigherdou*. Here the Weather is sometimes very cold, and the Country is covered with Snow, so that it is bad travelling. The Inhabitants of this Town, and the next that you come at, which is called *Asepos*, are *Circassians*, transplated hither out of *Georgia* by *Sha-Abas*, who took that Country, and gave them good Lands here to cultivate. They make Wine here, but their Grapes come from *Mazain*, and have Fish, because of the many Rivulets hereabout.

Debigherdou.

Ongdioun.

In the Way onward you come to *Ongdioun*, which is a large Village by a River, over which there lies a Stone-Bridge of 7 Arches, and so passing over a craggy dirty Mountain, you arrive at *Iman-shade*, so called from one of their Prophets, who lies buried there. This Country abounds with Butter, Almond-Trees, and Alder-Trees, which give it a pleasant Verdure. The Prophet lies in a Mosque, which has a Portico 6 Arches in Length at the Entrance, and a *Dome* rough-casted in the middle. The Town has many Gardens, watered by a lovely Brook that runs by it. Beyond this Town lies the River *Bendimir*, which is the 2d *Araxes* of Q. *Curtius*, *Diod. Siculus* and *Strabo*, and when you have gotten over it by 2 Stone-Bridges, you come to *Abgbern*, which signifies, *Hot Waters*, because the Waters are something hot here, yet they have Plenty of Fish in them.

Iman-shade.

Abgbern.

Leaving this Town, you travel over a fair Causey, about 2 Fathom broad, and 2000 Paces long, all well pav'd, with Arches in several Places, and in the middle a Bridge about 100 Paces in Length. This Causey is called *Pouligar*, and at the End of it stands an Inn built very commodiously, and adorn'd with many Pieces of Marble with Inscriptions, but unfrequented, because it is so infested with Gnats.

Pouligar.

Two Lgs. farther is the City of *Schiras*. This is the neareſt Way by 2 Days Journey from *Ispahan* to *Schiras*, but the Mountains are unpassable in Winter, and therefore you must take the Left-Hand Road, Eastward, with a Guide, if you travel in that Season, and pass the great Road, over several well water'd Plains and Mountains, to *Tche-elminar* thither. At the Point of the Mountain, upon the Right-hand of the Road, at about a Lg. Distance from this Place, are to be seen 12 Pillars still standing, the Form a kind of a Square, and opposite to them a great many Niches in the Spaces of the Mountain, which certainly were the Places where the ancient *Persians* set their Idols. At *Tche-elminar* are to be seen a great many old Columns, some standing, and others lying upon the Ground, and some ill shap'd Statues, with little 4 square dark Rooms, which, to any one that has consider'd the Pagods of *India*, seem to prove, that that Place was only a Temple formerly dedicated to Idolatrous Worship, the dark Rooms being the Chambers where the Priests, and where the Rice and Fruits, which are the feigned Nourishment of the Idols, are the better secured from the Gnats and Flies.

Tche-elminar. Some Ruines here.

From thence to *Schiras* is an hard Day's Journey, especially when the Snow melts, for then the Road is like a Sea. The City of *Schiras*, which many will have to be the ancient *Cyropolis*, the Metropolis of the Province of *Persia*, lies in 78 D. 15 M. Long. and 29 D. 36 M. Lat. It is seated in a Plain, about 4 Lgs. in Extent from N. to S. and about 5 Lgs. from E. to W. Upon the S. E. is a Lake of salt Water 4 Lgs. in Compass. The Soil about it is very good and fruitful, and is famous for the best Wines in *Persia*. The City it self has nothing handsome in it, for it looks more like a ruined Town than a City. It has no Walls, but a bad Ditch, and the Houses are built of Earth dried in the Sun, and whitned over with Lime, so that when they are well moisten'd with Rain they often

Schiras described.

The Soil.

often fall down of themselves, only the College which *Iman-Kouli-Kan* built, and some of the Mosques are of Brick, and the best of those Mosques, which is called *Sha-shiraque*, is kept in something better Repair than ordinary out of a particular Devotion; but there is nothing worth taking Notice of in it. On the N. E. stands an high Mountain, which is covered with several sorts of Fruit-Trees, of which there are some Orange, Limons and Cypresses, and at the Foot of it a Stone-Bridge, from whence there is a Street, which goes in a strait Line quite through the City. This Street is Wall'd on both sides, and at certain Spaces, are several great Gates, which have neat little Houses built upon them, from which is a pleasant Prospect into the Gardens, planted with Rows of Cypresses. The Streets of *Schiras* are somewhat narrow, but there be some fair ones, having in the midst of them lovely Canals and Basons of Water very pleasant. There are a great many fair cover'd *Bazars*, with great Shops, well furnish'd with all sorts of *Indian* and *Turkish* Commodities, and every Commodity has its particular *Bazar*. In the College there are Professors, who have Salaries for teaching Theology, Philosophy and Medicine, and 'tis said, it has sometimes 500 Students in it. There are in this City 3 or 4 Glass-Houses, where they make great and small Bottles, to transport the Sweet-Waters made in the City in, as also several other Vessels to put their pickled Fruits in, which they send in great Quantities into *India*, *Sumatra*, *Batavia*, and other Places. They make their Glass of a white Stone, almost as hard as Marble, which they fetch from an Hill 4 Days Journey from *Schiras*, and 'tis as clear and delicate as any Glass in the World. It is wonderful how they blow their great Bottles, called *Caraba*, which are a Finger thick, and hold near 30 Quarts of Wine. They have no Manufacture at *Schiras*, but a few coarse painted Cloths, and used only by the meaner sort. On the N. W. side is the King's Garden, called *Bay-sha*, which is indeed well planted with Fruit-Trees, Roses and Jasmins; but for want of Order it looks like a Wilderness. From this Garden to the Hills is a Vineyard belonging to several Persons, 2 Lgs. long, and one broad, which is watered with the River *Bendemir*, which is sometimes dry in Summer, because it never rains there but in the Spring and Autumn. The Wines made here are the best in all *Persia*, but they make no great Quantities of them, because they dry and pickle good part of their Grapes. 'Tis an excellent Stomach Wine, but very strong, so that, without spoiling the Taste of it, it will carry 2 Thirds of Water. They sell their Wine by Weight, and not by Measure, and putting it in Chests, send a great deal yearly to *Ispahan* and the *Indies*.

The College.

The Mountain by it.

The *Bazars*.

Glass-houses.

Large Glass Bottles.

A large Vineyard.

The People of *Schiras* are very witty, and most of the best Poets in *Persia* were born here. In an ancient Mosque here lies *Scheich-sadi*, one of the best of their Poets, whom they honour as a Saint. The Soil about this City is very good, and produces Plenty of all Things. They have all the Fruits that we have, and Oranges and Limons in abundance. They have vast Quantities of Roses, from which they draw such Plenty of Rose-Water, that they furnish all the *Indies* with it. They have a great deal of Corn, but give much to their Horses to be eaten in the Blade, because they say, that for want of Water it would never come to Maturity. There is a great deal of Opium made at *Schiras*, for round about the Town are large Fields sown with white Poppies. They have also store of Capers, which they send into all Parts.

The People.

Their Fruits.

Opium made here.

In former Times *Schiras* was governed by a *Kan*, who was the first in all *Persia*, and his Government reach'd as far as *Lar*, *Bendir*, and the Isle of *Ormus*. *Iman-Kouli-Kan*, who was so great a Benefactor to this City, by cutting a Road through the Mountains to it, and building the biggest Street of it, was *Kan* of this City, and lived as magnificently in all respects, as the King himself, insomuch, that *Sha-Abas* the Great commanded him to spend a *Mahmoudi* less a Day, that there might be some Difference in their Expences; but *Sha-Sefi*, his Grandson, did not treat him so kindly, but fearing his Power might endanger his Crown, put him and his whole Family to Death; and though he still continued the Governour a while, yet at length he put in a Visier to farm it, and the King receives of him 1000 Tomans. On the S. W. a good Lg. from the City, upon a little Hill, divided from the great Mountain, are 3 Gates to be seen, and one is fallen, which seems to be the Remainders of an Idolatrous Temple; and about 2 Musket-shot from thence is a large Pond full of Fish, where the ancient Idolaters wash'd themselves before they entered into the Temple, to say their Prayers and make their Offerings; some high Trees grow by this Pond-side, which shade the Habitation of a *Dervis*.

A Visier governs it.

An Idol-Temple.

Near a Lg. from the City is a Lake of Salt-water about 10 Lgs. in Compass, which is filled by several Springs that fall from the Mountains; here the People make a great Quantity of Salt. Not far from hence are 2 remarkable Wells, the one upon the Top of a Mountain, and the other upon the Descent cut out of the Rock, which is so deep that one may say a *Pater-Noster* before a Stone, that is cast into it, can reach the Bottom. It is dry, and the Mouth is a Square of 2 Fathom in Length and one in Breadth. It is said, that heretofore they threw Adulterous Women into this Well.

Salt made.

About half a Lg. on the North-side of the City, upon the Brow of an high Mountain, stands a little Mosque like an Hermitage, and about 15 Foot below is a fair Spring the best thereabouts. Near to it is a little Place encompassed with Pales with 4 Pillars, that uphold a Cieling. Here a *Dervis* sits and entertains all that come to visit him with Tobacco, according to the Custom of the Country. Here is the best Prospect in all *Syria*, for one way you may see all the Plain of *Schiras*, and all the City from one end to the other, with all the Gardens; but that which is most admired and visited is a large Cypress-Tree, which 4 Men can hardly fathom, and proportionably high: It is look'd upon as the fairest Tree in all *Persia*.

A *Dervis* that treats all Comers.

A large Cypress-Tree.

Two Lgs. on the S.W. at the Foot of a great Mountain, stands an Hermitage, called, *Pir Boumo*, in which 3 or 4 *Dervises* live. 'Tis a pleasant Place, as all the *Dervises* pick out the pleasantest Places to pitch their Tents in. Here they sit smoaking their Pipes with that Gravity, that if the King should come by, they would not stir to give him Reverence.

The Humour of the *Dervises*.

Leaving *Schiras* you pass through a fertile Country, by an Inn called *Badaadgi*, where the Water being bad, because 'tis lukewarm, few Travellers stay, but go on to another well-built Inn called *Mouzafferi*, where grow *Saligots*, or Water-Nuts, as large and good as those in *Dauphiny*; but the Country breeds only Goats and Sheep.

Saligots or Water-Nuts.

The Way from hence to an Inn called *Paira*, which stands by a River, is very stony, yet cover'd with Bitter-Almond and Turpentine-Trees.

Turpentine and Bitter-Almond-Trees.

From hence you must travel through a Valley, where there are many Villages, till you come to an Inn of an Octogonal Form, called *Kaffer*. Here the cold Weather ceases; but being a Country much cooler than *Gamron* and *Lar*, the *Arabian* Shepherds with their Wives and Children on Camels, and their Flocks of Sheep and Goats, come hither in the Heat of Summer for Coolness, and feed them about *Caubouzer*, till Winter draws nigh, and then they return back again to the hot Countries.

The *Arabian* Shepherds.

From *Kaffer*, if you would see one of the richest Parts of *Persia*, and some Antiquities, you must leave the Caravan-Road, and take the Left-hand Way by a River, which leads you over a Rock, where there are many Caverns, some of which are so large, that they will contain 2 or 3000 Men, and brings you to a Plain 4 or 5 Lgs. in Circuit, called *Dadivan*, which is planted with Citron-Trees, Granates, and Oranges, some of which are so large, that 2 Men can hardly fathom them round; which being passed, you arrive at an Inn called *Mousbek*, after which, within 3 quarters of a Lg. there are 2 Roads that lead to *Lar*, the one for Camels, which is through the Desart, and is the longest by 3 Days Journey. In this you meet only with Herdsmens Tents, and a sort of large Partridges, with Legs and Feet like Wild-Ducks. The other for Horses over the Mountain, and City by it, called *Farron*. The Mountain is very steep and dangerous, but the Town is pleasant, being full of Gardens of Palm-Trees, which grow so thick, that they look like a Forest. *Tamaricks* grow also plentifully about this Place. Upon the Mountains is a Bridge of one Arch, built by *Iman-Kouli-Kan*, for the Conveniency of Travellers, which is a Piece of Architecture never to be admired. Over these you go to an Inn called *Shakal*, which is inhabited by 9 or 10 *Radars*, who guard the Road, and treat you with Kid or Partridge, which are very plentiful in the Mountains.

Dadivan.

Large Partridges.

A Bridge on the Mountains.

From hence you travel over the Mountain of *Husben*, and meet with an Inn called *Mouzere*, which stands in a Grove, and has a good Spring by it, but because

Dehidombe. because there is no Food to be had at it, you must go on to *Dehidombe*, a Village surrounded with Palm-Trees. Leaving this Place you go through a Plain, and come to *Banarou*. The Frontier Town of the Province of *Fars*, and bordering upon the Province of *Lar*, and then over the Plains and Mountains to *Bibri*, where is

A fair Inn. one of the loveliest Inns in all *Persia* for the Solidity of the Fabrick, Neatness of the Portal, Largeness of the Court, Spaciousness of the Rooms, and Loveliness of the Gardens, which are well planted with Tulips, Roses, and abundance of Flowers of divers kinds, and kept in very good Order. It was built by *Aivaz-Kan*, the Governour of *Lar*, which Town is but little more than a Day's Journey farther.

Lar described. *Lar* is the chief Town of the Province of the same Name, which formerly bore the Title of a Kingdom. It was formerly the Residence of the King of that Country, when the *Guebres* were Masters of it. The Great *Sha-Abas* took it from them, and now a *Kan* resides there, which commands the whole Province, which is called *Ghermes*, and reaches to the very Gates of *Gamron*. The Town is but small, hath no Walls, and but a sorry Ditch, but beyond it are some Houses pretty well built, which make a kind of Suburbs to it, and among these the Ditch-House is one. The

Things most remarkable Things best worth seeing are the *Kan*'s House, Market-place, Bazars and Castle. The *Kan*'s House hath high Walls, and a cover'd *Divan* to take the fresh Air in, a Porch with 7 Fronts jetting out, and a large Gate, over which there is also a cover'd *Divan*. The Market-place is very pretty, being a Square, with Arches all round, and Terrasses on the Top, with Rails and Ballisters. The Bazars are very fair and large, well cover'd and pav'd with broad smooth Free-Stone, and one of them is cover'd in the middle with a large handsome Dome, which hath many well

The Jews in it. furnish'd Shops. The *Jews*, who are very numerous in this Town, have a Quarter to themselves near the Hill, on which the Castle stands, which is built all of Stone. They are famous for a Silk Manufacture, and especially for making Silk-Girdles. The Walls of it seem to be good, and have Towers at some little Intervals. This Castle commands all round about it, and is strong, considering the Country. It was built

Tamarisks. by the *Guebres*. All the Country is full of Tamarisks, which are very large, and more numerous than in any Place else. The whole Country is very hot, and has no Water, but Rain-Water, which they preserve in Cisterns. The Mountains are full of Orange-Trees. The Inhabitants of the City, as also of the Province, are accounted the best Musketeers in *Persia*, and the best at the making Barrels of Muskets, all but the Breech, which they cannot order so well as we. They

Muskets and Gun-powder. make very good Gun-powder, and the Governour has in his Palace a Magazine of Bows and Arrows, Bucklers and Muskets enough to arm 1500 Men. Their Drink is very bad, for they have only Cistern-Water, which is very unwholesome by standing, for it breeds Worms, and though you filter it through a Cloth, will be very foul. It is good to quench a red hot Iron in the Water before you drink it, lest you swallow any

Worms Seed in the Body. Seed of Worms, or small ones, which have been known to breed in some Men to an Ell long and more in divers Parts of the Body.

From *Lar* you travel through a Stony Country, except near the Inn *Teberkah*, where there is Corn-Land, and some Palm-Trees, to another little Inn, called *Shemzengi*, which is low built, like a Cross, with 4 Doors to receive the cool Wind every way, as all the Inns are between this and *Bender*.

Carmout. From hence, through barren Plains, and over most fearful Rocks, you go to *Carmout*, a great Village well stor'd with Palm-Trees.

From this Place to the new Inn, called *Tenguidalen*, the Way is bad, full of great Stones and filthy Puddles; but after you pass an uninhabited Country to a good Village, called *Caucrestan*, where there is Plenty of

The best Water-Melons. Barley. This Place is famous for Water-Melons as big as Pumpkins, the best in all *Persia*. The Meat is very red, and as sweet as Sugar, which is a great Refreshment to Travellers. The Road after this is very sandy, not possible to be travelled without a Guide, till you come to a Bridge near the Inn *Guitchi*, which is one of the most pleasant Countries in all *Persia*, being a continued Grove.

A League and half from *Guitchi* you meet with 2 Roads one upon the Left-hand, which seems most beaten, and the other upon the Right, which is the best; but being the one among the Sand, and the other among the Rocks, you must have a Guide to conduct you to *Bander-Abassi*.

Bander-Abassi described. This Town, so called, because the Great *Sha-Abas* brought it into Reputation, is at present a Place reasonably well built, and stored with large Ware-Houses, over which are the Lodgings of the Merchants. The Situation of it is very advantageous for Trafick. It is governed by a *Kan* and a *Shah-Bender*, or Customer, who gathers the Customs, which are worth much to the King of *Persia*, though one half of them of right belong to the *English*, by Virtue of an Agreement which they made with that Prince, when they assisted him in taking *Ormus*; but they receive not the 4th part, because the *Persians* put them off with as little as they can. There is not much worth observing in the Town, for there is but one publick Gate, a Bazar and a small Fort to the Sea-side, with 2 Cannons only,

The *English* and *Dutch* Houses. though there be 6 Port-holes. The *English* and *Dutch* have each of them their Houses by the Sea-side, with the Flag of their Nations upon the Terrass of their Houses.

While the *Portuguese* kept *Ormus*, though they liv'd in that City, all the Trade was at *Bander-Abassi*, as being the most secure Landing-place upon the Coast. It has lately been Wall'd in, because while it was open the Custom-house was robb'd in the Night. To this Place come all the Ships that bring Commodities from *India* for *Persia*, *Turky*, *India*, or any other Part of *Asia*, or *Europe*. And, indeed, it would be much more frequented by the Merchants from all Regions and Countries, but that the Air is so unwholesome and hot, that

It is unhealthy. no Strangers can live there with Probability of Health, unless it be in the Months of *December*, *January*, *February* and *March*, and though the Natives may, with some Safety, venture to the End of *April*, then they retire to the Mountains 2 or 3 Days Journey off for 5 or 6 Months, where they eat what they have gained before. They that will venture to stay during the hot Weather get a malignant Fever, which is hardly cured, and if they do escape, they have the Yellow Jaundice ever after. When the *March* Wind

A stifling *March*-Wind. changes, and blows W. S. W. in a short time it grows so hot and stifling, that it takes away a Man's Breath, and sometimes it burns like Lightning. The *Arabians* call it *El-Samiel*, i. e. The Poisonous Wind, and the *Persians*, *Bade Sambour*, The Suffocating Wind.

As the Air of *Bander-Abassi*, or *Gamron*, is so bad and dangerous, so the Soil is worth nothing, for 'tis nothing but Sand, and the Water is not good, and therefore some fetch their Water 3 Lgs. from a Fountain, called *Issin*. Formerly there was no Herb to be seen, but now by watering the Ground, Lettice, Radishes and Onions begin to grow.

The People are swarthy, and wear nothing about them, but one single Shirt. Their usual Diet is Dates and Fish, and they feed their Cattle with the Guts and Heads of the one boiled, and Stones of the other, when they come home from browsing the barren Bushes.

The Fish in the Sea at *Ormus*. The Sea of *Bander* produces good Soles, Smelts and Pilchards. They have excellent Oisters, but the People eat none, and so they must catch them that will have them. Upon Land they have Wine from *Schiras* and *Yesd*, and their ordinary Diet is Mutton, Pigeons and Partridge. There are 2 Fortresses on the E. and W. Ends, and the Town daily encreases with Trade and Inhabitants, which may be wonder'd at, because *Bander-Congo* is near, and has a good Air and excellent Water; but the Reason is, because the Passage to *Congo* for Ships is dangerous, and there is not Water for a Vessel of above 25 Tun, and the Way from *Lar* to *Congo* is bad; but at *Bander-Abassi* both are good, and there are good Inns.

The Island of *Ormus*. Two Lgs. to the Southward from the Main Land is the so fam'd Island of *Ormus*, lying in the 92 D. 42 M. of Long. and 25 D. 30 M. Lat. It lies at the Mouth of the *Persian* Gulf, which reaches from thence to *Bacsora*, which is 180 Lgs. It is all cover'd with a white Sand, so that neither Tree nor Herb grows in it. It was long held by the *Portuguese*, but was taken from them by the Great *Sha-Abas*, by the Help of the *English*, in 1622.

Ormus a Kingdom, and Populous under the *Portugueses*. Before the *Portugueses* came to *Ormus*, it was the Habitation of a King, who also governed *Lar*, but the City was ill built; and when they became Masters of it, they made it very magnificent, according to the Humour of their Nation, for the Bars of their Windows and Doors were all gilt, the Fortress in very good Repair, and they had a stately Church, dedicated to the Virgin.

Virgin. It was very populous and exceeding rich, for all the Trade of the *Indies* was managed there; but now the *Persians* have it, there is no Marks of all this, but the Fort, which is in very good Repair.

Upon this Island grows a *Banian* Tree, being the only Tree that grows upon the Isle. It is so called, because the *Banians* commonly make Pagods under them. The *Portuguese* called it the *Tree of Roots*, because Roots come out of every Branch, and fastning to the Ground, grow up again as other Trees, insomuch, that one of these Trees may make a whole Forest.

Bander-Abassi described.

The Way to the Indies.

At *Bander-Abassi* you embark to the *East-Indies*, either in *Dutch*, *Armenian* or *Mooriſh* Ships, and usually in the Voyage come to Anchor in the Road of *Bander-Congo*, which is 30 Leagues from *Comeron* or *Bander-Abassi*.

Bander-Congo described.

Bander-Congo is a little Town in the Kingdom of *Persia*, lying in 27 D. 15 M. Northern Lat. It is sheltered from the N. Winds by a blackish Rock, and has a little Castle, defended by 3 Pieces of Cannon. It has a safe Road for Ships, though they be often tost'd by high Winds. The Territory of the Town is of small Extent, but produces good Fruits, as Figs, Grapes, good Quinces, Pears, Oranges, Limons, very large Pomegranates, Melons, Water-Melons, and plenty of good Turnips, as also Palm-Trees, Mango-Trees, and the *Arbor de Reyzes*, (as the *Portuguese* call it) *i. e.* The Tree of Roots. They have also *Schiras* Wine, but dear, and good Brandy of Dates. Near the Town are Sulphur-Hills, of which the Ships take great Quantities in Cakes of 2 or 3 Pound apiece, and transport them to the *Indies*. It is very hot in this Town, and the Air is good, but the Water brackish. It depends upon the *Kan* of *Lar*, and is governed in his Absence by the *Shah-Bender*, or King of the Port, who receives the Customs, which of late are much encreased, by reason of the Exactions and Extortions of the Governour of *Bender-Abassi*, for most of the Goods of *Persia*, either exported to, or imported from the *Indies*, are loaded or unloaded here. The *Portuguese* have half the Profits of the Customs, and therefore the King of *Portugal* keeps an Agent always there, who has the *Portuguese* Colours upon the Top of his House.

The Fruits.

Its Growth in Trade.

The Island, in the Persian Gulf.

From *Congo* you sail by several small Islands, *viz.* *Queschimo*, which is the largest, but low Land. It has a Fort, and affords a great Conveniency to the Ships that pass by, *viz.* Good fresh Water. *Nabgion*, or *Pitombo*, which is a little low Desart Island: *Tonbo*, another little flat Island, abounding with Antilopes and Conies, but not inhabited. Here are also 15 or 20 Wells of good Water. *Angom*, over-against which is a Port of *Arabia Felix*, call'd *Julfar*, which is a good Harbour, where many *Indian* Barks carrying Money come to buy Dates and Pearls, which are fish'd all along that Coast from *Mascat* to *Bahrem*. It has a good Castle, and from thence to the Cape of *Mosandon* is all Mountainous, but there are many good Ports, convenient for the Wintering of Ships, between them, though not set down in the Maps.

Julfar.

Angom is a little low Island to the S. of *Queschimo*. No body lives in it, but 2 or 3 Fisher-men, who keep Goats to sell to the Ships that come to take up Water there; the Isles of *Selame*, which are 4 Rocks over-against Cape *Mosandon*, and nourish only wild Goats; *Larreca*, where there is a small Fort, which the *Dutch* began to build, under Pretence of settling a Factory there, but the *Persians*, fearing another Design, drove them out, and finishing it, keep a small Garrison in it. They say, there is in this Island a fair Salt-pit, dug under Ground in Form of an Hill, so spacious, as to hold 1000 Men easily. Hereabouts sometimes rise from the Sea Spouts in divers Forms and Figures, which are very dangerous to Sailors, for if they come upon a Ship, they intangle the Masts, so that sometimes they will lift it up, if it be small, and then letting it fall down again, sink it to the Bottom, and if it lift not up the Ship, they at least split all the Sails, or empty all their Water into it, which sinks it to right. The humane Means against these Spouts is to furle the Sails, and shoot a Cross-Bar-Shot at the Pipe, to cut it in Two, and this has been found successful in the *Mediterranean* Sea.

Angom.

Selame.

Larreca.

A Salt-pit.

Spouts.

Means to be used against them.

Having past'd these Islands, you sail by a very good Port of *Arabia Felix*, called *Lima*, where several Ships may Winter secure from all Winds, and there is good Water, and soon make a low Point of Land belonging to *Persia*, called *Nzaly*, and so sail by a very high square white Rock, call'd *Bombareca*, to Cape *Fasques*, anciently called *Carpella*, which lies in 25 D. of Northern Lat. Here, at about a Mile up-land, is a sorry Fort, with about 40 Houses, inhabited by a sort of very poor People, who live on Barley, and drink nothing but brackish Water. They have 2 sorts of Barks, or *Taranquins*, wherein they carry Wood to sell at *Mascat*. It is under the Governour of *Comeron*, who sends whom he pleases to command it. Here it is the safest Course to put to Sea, lest by keeping on the Coast of *Persia* you fall into the Hands of the *Zinganes*, a sort of *Indian* Pirates, who rob most part of the Barks that come in, or go out of the *Sindy*.

Lima.

Nzaly.

Cape *Jasques*, c. *Jasques*.

The *Zinganes*.

These Thieves have a pretty odd Way of taking Prizes. When they see any Merchant's Bark coming, they get to the Windward of him, and being come up pretty near, before they lay him on Board, they throw in a great many Pots full of Lime, reduc'd into very small Powder, which the Wind driving against the Men on Board, blinds them so, that they are unable to make any Defence, and in the mean-time they leap into the Bark, and kill all, till they are wholly Masters of the Vessel, and are sure of the Prize. What Prisoners they take, they cut the Tendon above their Heels, to disable them from running away; and carrying them to their Habitations, set them to keep their Flocks, without any Hopes of ever being deliver'd from their Bondage, which is worse than Death it self. Being in open Sea with a tolerable Wind you may in 8 or 10 Days make the Cape and Isle of *Diu*, which is near the main Land of the Country of *Cambaya*, in the *Indies*.

Their Way of Piracy.

Cape and Isle of *Diu*.

In this Passage you may catch *Dorado*'s, or Dolphins, some of which are a Fathom and half long: They are good Meat, and of easie Digestion; the Flesh is firm and delicate, and they feed on the small flying Fish; and you also meet with those Birds, which the *Portuguese* call *Rabo de Junco*, or Rush-Tails. They are a kind of Sea-Mews, only bigger, and have a Tail of a Piece, and pointed like a Rush, from whence they take their Name. Near the Coasts of *Diu* there appear in the Water a great many little yellow Snakes, about a Foot long, and as big as one's little Finger, which is a good Sign you are near those Coasts, for on the other Coasts of *India* the Snakes are large. Just upon the Shore there riseth, especially against a Storm, a kind of Excrement of the Sea, called *Camasse*, or, *Pitta Manna* by the *Italians*. It is like a frothy Flesh, that if a Man touches it, it sticks to him like Glew, and puts him to an hot stinging Pain. The *Malabar Corsairs* and *Zinganes* have their Rendezvous about *Diu*. The Island was anciently called *Alambater*, and lies in 20 D. 40 M. Lat. and 21 D. Long. The *Portuguese* are Masters of it, and have a Town and Fort so well defended with 2 large Ditches, fill'd with the Sea-Water, and Stone-Bastions, mounted with many great Guns, that 'tis thought impregnable. All the Trade of the *Indies* was heretofore managed here and at *Chaoul*, another Port belonging to the *Portuguese*; but now the *Dutch* have wholly removed it to *Surat*, where 'tis at present, and thither if you intend to sail, you coast and first make the Land of *Bassarin*, which lies in 19 D. Northern Latitude.

Yellow Snakes.

Sea Excrements.

The *Portuguese* are Masters of it.

Bassarin.

This Town is held by the *Portuguese*, and is situate near very high Mountains, and so passing by the Town of *Daman*, which belongs to the *Portuguese*, and being made very strong, has a very good Fort in it, you come to the Bar of *Surat*, where the Custom-house Officer comes immediately on Board to take in all the Passengers and their Goods, and carry them up the River to the Custom-house to be search'd.

Daman.

§. *But the most usual Road from* Ispahan *into the* Indies, *is to* Candabar, *which the Merchants chuse, because it affords them plenty of Water. It lies thus:*

From *Ispahan* to *Sakunegi* 7 *Agats* (an *Agat* is a large Provence League;) and from thence to *Mouchena de Rhadar* 10; from thence to *Nanni* 8; from thence to *Danaraquie* 15; from thence to *Basabad* 15; from thence to *Aliger* 9; from thence to *Biabanais* 5; from thence to *Caseui* 5; from thence to *Samagi* 10; from thence to *Sadarou* 15; from thence to *Chechme-cha* 8; from thence to *Karte* 14; from thence to *Tabas* 4; from thence to *Espaque* 7; from thence to *Teoque* 7; from thence to *Talkzau* 6; from thence to *Cors* 10; from thence to *Tesaitan* 9; from thence to *Berjan* 7; from thence to *Moti* 7; from thence to *Sarbicha* 5; from thence to *Mont* 7; from thence to *Daurat* 12; from

The Road thro' Candahar into the *Indies*.

from thence to *Checchmeband* 6; from thence to *Zela* 10; from thence to *Tura* 10; from thence to *Tecaurmazetan* 6; from thence to *Siabe* 6; from thence to *Bacon* 4; from thence to *Dilaram* 6; from thence to *Chaquilan* 4; from thence to *Dexkak* 4; from thence to *Grichs* 12; from thence to *Rauckienogous* 19; from thence to *Candabar* 12. All this Road the Men ride upon Horses, and the Goods are carried on Camels.

Candabar described.

Candabar is one of the chief Cities of the conquer'd Provinces of *Persia*, having been often the Occasion of War between the Kings of *Persia* and *India*. At length *Sha-Abas* became Master of it, the Prince of it chusing rather to put himself under the Protection of the King of *Persia*, than of the Great *Mogul*; but upon this Condition, that the Governour should always be of his Race; and therefore *Alimerdan Kan* was the Son of the last Prince of *Candabar*. This Prince left behind him such a vast Treasury, that all his Plate was of Gold; and he had so much Gold in his Coffers, that when he went to the Great *Mogul*, he would not accept of any Thing for his Maintenance, but was contented with one of the highest Dignities of the Empire, which he enjoy'd till Death. The Grand *Sha-Abas* left the peaceable Possession of *Candabar* to *Sha-Sefi* his Grand-child, but in his Time *Alimerdan Kan* deliver'd it up to the Great *Mogul*. *Sha-Abas* II. retook it in 1650, and *Sha-Jehan* sent to drive him out with an Army of 300000 Men, but he came off with bad Success, having lost almost all his Army, and the same Fortune had Sultan *Sugab* the next Year. *Aureng-zeb* was after all sent by his Sister, who then ruled all under her Father's Favour, and was loved to Incest, and was likely to have recovered it; but being told by his Captains, that his Sister would have the Honour of the Conquest after all his Hazard and Pains, flagged in his Courage; and having the Pretence of a Rainy Season, he raised the Siege, and so left it in the Hands of the King of *Persia*.

Taken by *Sha-Abas*.

Deliver'd up to the Great Mogul.

The Conclusion.

By this Description of *Persia*, the Reader may perceive, that travels into *Persia*, are necessary more for Merchants than Scholars or Artists, unless a vain Curiosity will lead a Man so far to see the Footsteps of Antiquity there, which are so far worn out by reason of many Wars, and the Neglect of a barbarous People, that unless he carry a great Deal of Fancy, and a large Stock of Credulity, he will find his Labour lost; for there remains nothing of all the ancient Buildings, or Men, but some improbable Traditions, and they reach as far as *Noah*. There is no probability here, that any Man can improve his Knowledge, since here Books are rare and few, and learned Men very scarce; or his Experience in any of the Noble Arts, Painting, Graving, Goldsmiths Work or Turning, since here they are very little known. *Persia*, indeed, was once famous for their Gold and Silver Tissues, Coverlets, Carpets and Embroideries; but now the *Europeans* so much out-do them, that the *Persians* admire their Work above their own; and good Profit is made by carrying the Tapestry Carpets, Silver and Gold Stuffs made in *Europe* into *Persia*; because the King and Nobility buy them up immediately. Profit may be made in these Travels by Merchants, who trade this Way to the *Indies*, but little can be learned by the Ingenious in these Parts, especially such as carry any Stock of Knowledge from Home.

How to Travel to the Court of the King of *Golconda*; and to the King of *Viſapour*; and to many other Places in the *Indies*.

CHAP. I.

The Road from Surat *to* Agra.

The Roads out of *Perſia* into *India*.

THough the *Indies* ſtretch themſelves upon the Coaſts of *Perſia* for the Space of above 400 Leagues together, from the Ocean to Mount *Caucaſus*, or *Taurus*, yet there are not ſo many Ways to go into the *Indies*, out of *Perſia*, as there are of travelling into *Perſia* out of *Turky*, by reaſon, that between *Perſia* and the *Indies* are nothing but vaſt Sands and Deſarts, where there is no Water to be found; ſo that you have but 2 Roads to chuſe in going from *Iſpahan* to *Agra*, the one by Land through *Candahar*, and the other partly by Land and partly by Sea, taking Ship at *Bander-Abaſſi*, or *Ormus*. Both theſe I have deſcribed, as far as the Limits of *Perſia* reach, and ſhall only add concerning this Latter, That ſailing is not ſafe at all times upon the *Indian*, as it is upon the *European* Coaſts. You muſt obſerve the proper Seaſons, which being paſt there is no venturing. The Months of *November*, *December*, *January*, *February* and *March* are the only time in the Year to embark for *Surat*, to *Ormus*; but from *Surat* you muſt not ſtir after the End of *February*, for then the Weſtern Winds, that bring Rain along with them into *India*, begin to blow; but during thoſe 4 Months there blows a N. E. Wind, which carries the Ships from *Surat* to *Ormus* in 15 or 20 Days; and this Wind veering a little to the North ſerves alſo for thoſe that are bound for *Surat*; but it takes them up 30 or 35 Days, for which they are made amends in *March*, and the Beginning of *April*, for then the Weſtern Winds blowing full in their Stern carries them thither in 14 or 15 Days.

Seaſons of Sailing, or Monſons.

The Port of *Surat*.

The Veſſels that ſail to *Surat*, which is the only Port in the Empire of the Great *Mogul*, paſs within Sight of *Diu*, and the Point of St. *John*, and come to an Anchor in the Road of *Couali*, which is 4 Lgs. from the Town and 2 from the Mouth of the River, called the Bar of *Surat*; for the great Veſſels cannot get into the River of *Surat*, till they have unladen, by reaſon of the Sands that choak it up; and the Wares ſo unladen, are carried to the Town, either by Wagons or Boats; yet, becauſe the Cuſtoms were often ſtollen, when the Ships unladed, generally at *Couali*, therefore there is now a Prohibition, that none ſhall come to Anchor there, but the *Engliſh* and *Dutch*, who, indeed, land many Goods Cuſtom free, yet 'tis made up by the Veſſels that come to the *Bar* from *Perſia*, *Arabia Felix*, and all Parts of the *Indies*. When your Commodities are unladen at *Surat*, you muſt carry them to the Cuſtom-houſe adjoining to the Fort, where the Merchants pay for all ſorts of Wares from 4 to 5 *per Cent.* unleſs it be the *Engliſh* and *Dutch*, who, indeed, pay leſs, but are forced to make it up in Preſents to the Court and Deputations; and leaſt any valuable Goods ſhould be conceal'd, they ſearch every Perſon in the Ship exactly. Gold and Silver pays but 2 in the Hundred, and when it is brought into the Cuſtom-houſe, the Maſter of the Mint comes and takes it and coins it into the Money of the Country, which though it be to the Loſs of the Merchant, yet can't be avoided as to the Silver, but the Merchants have ſo many Ways to hide their Gold, that it ſeldom comes to the Knowledge of the Cuſtomers. If they bring any Money ready coin'd out of other Countries, as Piaſters, or Abaſſi's out of *Perſia*, they are melted down and refined to make Roupies, becauſe the Silver-Money of the Great *Mogul* is finer than any others. The *Indian* Money is the Silver Roupie, the half, quarter, 18th and 16th part. The Roupie is as big as an Abaſſi of *Perſia*, but much thicker; it paſſes commonly for 30 *French* Sols, or 2 *s.* 3 *d.* Sterling. This Money is coined every Year, and the new ones during the Year they are coined in, are valued a Pecha more than thoſe of the foregoing Year, becauſe the Coiners pretend that the Silver wears daily. They have alſo another Silver Coin, called Mahmoudi, which is worth about 10 Sols and an half, or 8 *d.* Sterling; but it goes no where but in *Surat*, and the Province of *Guzarat*. Abaſſi's, brought out of *Perſia*, go alſo in the *Indies*, but for leſs than in their own Country, *viz.* at 19 Pecha's, or 16 *French* Sols, which is 1 *s.* 2 *d.* The Pecha (of which they have Halfs, Double and Four-fold) is a Piece of Copper-Money as big and thick as a Roupie, but in Value about half a Sous, or ſomething leſs than an Half-penny *Engliſh*. A Roupie is worth more or leſs of theſe Pecha's, according as you are nearer or farther from the Copper-Mines. At *Agra* and *Gehanabat* they are worth 55 or 56 Pecha's, and at *Surat* ſometimes but 46, and ſometimes 50, becauſe it is at a Diſtance from the Copper-Mines.

The Cuſtoms at *Surat*.

The Money of *India*, Name and Value.

Inſtead of ſmall Money they uſe certain Shells, which they call *Cori*, brought from the *Maldives*, of which they give 50, or more, for a Pecha, or if near the Sea-ſhore where they are brought in, 60.

In the Province of *Guzarat*, the chief Cities whereof are, *Surat*, *Cambaya*, *Boudra* and *Amadabat*. Mahmoudi's, Half-Mahmoudi's and Almonds are accounted a current Money. A Mahmoudi is about 9 Sous, 3 Deniers, or 8 *d. Engliſh* in Value. The Almonds, which they call *Baden*, are brought from *Ormus* and grow in the Deſarts of the Kingdom of *Lar*; they give 68 Almonds for a Pecha, and 20 Pecha's for a Mahmoudi. There is no Fear that the Children ſhould crack theſe Almonds, and ſo deſtroy their Money, for they are as bitter as Colloquintida. Some Years the Almond-Trees do not bear, and then their Price is much raiſed, for then you will not have above 40 or 44 for a Pecha. The Roupie of Gold is valued in the Country at 14 Roupies of Silver, and the Half and Quarter-Roupies proportionably. Great Sums of Money are reckoned by Leks, Crouls, or Courous, Padans and Nils. 100000 Roupies make a Lek, 100000 Leks a Courou, 100000 Courous a Padan, 100000 Padans a Nil. If you bring Gold into the *Indies* in Ingots, or *European* Ducats, you ſhall always have 7 and an half

Shell-Money.

Great Sums.

Profit, if you can escape paying the Customs, but if you pay them, your Gain is lost.

Surat described. The City of *Surat* lies in 21 D. and a few M. of Northern Lat. and is watered by the River *Tapty*. It is inhabited by 3 Orders of Men, as they distinguish themselves, *viz. Moors*, under which Name they comprehend all *Mahometans*, though they differ in their Opinions, being some *Sunni*'s, and others *Chiai*'s, viz. *Moguls*, *Persians*, *Arabians* and *Turks*. 2. Heathens, who adore Idols, of whom there are several sorts. 3. *Persies*, who are also called *Gaurs*, or *Atech-pereſt*, i. e. *Adorers of the Fire*, which was the Worship of the ancient *Persians*. These Men retreated into the *Indies* when *Califf-Omar* reduced the Kingdom of *Persia* under the Power of the *Mahometans*. Among these, indeed, there are some *Franks*, and other Christians; but as they are not accounted among the Inhabitants, because their Number is inconsiderable in Comparison of the other Parts. There are some Men in *Surat* vastly rich: One *Vargivora*, a *Banian*, was reckoned worth at least 8 Millions. The City is but of an indifferent Bigness, and 'tis hard to know the Number of the Inhabitants, because the Seasons render it unequal: There are a great many all the Year round, but in the Time of the *Monson*, i. e. The Seasons for Sailing, *viz.* in *January*, *February* and *March*, it is so full of People, that Lodgings can hardly be had either in the City or Suburbs. The Generality of the Houses are built of Reeds, plaister'd over with Cow-dung, to make them private, for in all *Surat* there is not above 9 or 10 good Houses, of which the *Cha-bender*, or Chief of the Merchants, has 2 or 3, the *English* and *Dutch* also have some of them, and the rest belong to the *Mahometan* Merchants; but the *Franks* are only allow'd to hire Houses, lest if they should have any of their own, they should make it a Fortress. The *Capuchin* Friars have built them a very convenient Convent, according to the Model of the Houses in *Europe*, and a fair Church by it, but they purchased the Ground in the Name of one *Chelebi*, a *Maronite* Merchant of *Aleppo*. The Walls of the Town were formerly of Earth, and that very ruinous, but of late they have built them of Brick, a Fathom and half thick, and fortified them better, to secure it from the Irruptions of a Neighbouring *Raja*. The Castle is built upon the side of the River, at the S. End of the Town, and is so placed, that you must pass by it at your entring into the Town, whether you go by Land or Water. It is a Fort of a reasonable Bigness, square, and flank'd at each Corner with a large Tower. The Ditches on 3 sides are filled with Sea-Water, and the 4th is wash'd by the River. There are several Pieces of Cannon, but because there are no Platforms on the Wall, they are planted upon Wooden Scaffolds. The Governour of it can only command his Soldiers within the Fort, for he has no Power in the City, which has a distinct Governour, who receives the King's Customs, and his other Revenues in his Province, but he lays them in the Castle till they are sent for by express Orders to the Court.

Very rich Men at *Surat*.

The Houses.

Capuchin Friars.

The Castle.

The Streets. The Streets of *Surat* are large and even, but not pav'd, and there is no considerable publick Building in it.

Food. The *Christians* and *Mahometans* there commonly eat Cow-Beef, not only because 'tis better, but more plentiful than Ox-Beef, their Oxen being almost all employ'd in Plowing and carrying Burdens. They have also pretty good Mutton, and good store of Pullets, Chickens, Pigeons, Pigs, and all sorts of wild Fowl.

Oils. They use 2 sorts of Oil with their Food, *viz.* of *Crocus Sylvestris*, or Wild Saffron, and *Sesamum*. This last is most common, but the first much the best.

Grapes. They eat Grapes from the Beginning of *February* to the End of *April*, but they have no good Taste, and the Wine made of them is sowre.

A black Sugar. They have several sorts of Strong-waters, which they draw from *Jagery* and the Bark of the Tree *Balorel*, steep'd in Water, 2 sorts of Palm-Trees, the one called *Cadgiour*, and the other the *Coco* Tree, Rice and Dates, but they are none of them so good as Brandy. Their Vinegar is made of *Jagery* and decay'd Raisins, and to their best they put in a little *Tari*, which is the Juice of the Palm-Trees above-mentioned.

Their Merchandize. At *Surat* are sold all sorts of Stuffs and Cotton-Cloths that are made in the *Indies*, all the Commodities also of *Europe* and *China*, as Porcellane, Cabinets and Chests, adorn'd with Torquoises, Agats, Cornelians, Ivory, and other sorts of Embellishments. Here are also sold Diamonds, Rubies, Pearls, and all other precious Stones, which are found in the East, as also Musk, Amber, Myrrh, Incense, Manna, Sal-Armoniack, Lac, Quicksilver, Indico, the Root *Renas* for dying Red, all sorts of Spices, Fruits and Drugs, which are produced in the *Indies* and the *Levant*, and are bought up by Foreign Merchants to transport into all Parts of the World.

The Officers there. There are several great Officers at *Surat*, *viz.* a *Mufti*, who inspects and rules all Matters of Religion among the *Mahometans*; and a *Cadi* to judge of all Civil Matters; a *Vaca Nevis*, or Secretary of State, who keeps a Register of all that happens in his Province, and gives the Great *Mogul* Notice of all Things that happen of Importance. Two Governours, or *Nabad*, who command the one the City, and the other the Castle, and have no Dependance one upon another, nor will they encroach upon one another's Offices, or Duties. The Governour of the Town judges in Civil Matters, and commonly renders speedy Justice; but he meddles not with Criminal Causes, for they belong to an Officer appointed on Purpose, called *Cotoual*, who is much the same with *Souſsbaſſa* in *Turky*, and *Deroga* in *Persia*. He orders Criminals to be punish'd in his Presence, by whipping or cudgelling, and this he doth either in his own House, or in the Street, near the Place where the Fact was done. When he goes abroad, he rides on Horse-back, and has several Officers who attend him, carrying Battoons, Whips, Lances, *&c.* before him. But neither of these 2 Judges can put any Man to Death. The King reserves that Power to himself; and therefore, when any Man deserves Death, a Courier is dispatched to know his Pleasure, and they fail not to put his Orders in Execution, so soon as the Courier is returned. The *Cotoual* goes his Rounds in the Night to prevent all Disorders, and if he finds any Man abroad at unseasonable Times, he commits him to Prison, and rarely dismisses them without being bastinado'd or whipt. This Officer is to answer for all the Robberies committed in the Town, but by their Cunning they usually evade it. When any one is robb'd this Officer apprehends all the People of the House, both Young and Old, where the Robbery hath been committed, and causes them to be beaten severely. They are stretched out upon the Belly, and 2 Men lash the Patient with long Whips, till he has receiv'd 2 or 300 Lashes, and be all in a Gore Blood. If at first he confess not the Theft, they whip him the next Day, and so for several Days more, till he confesseth all, or the Thing stolen be recover'd again; but he never searches the Houses or Goods of Robbers.

The *Cotoual*.

Capital Crimes how punished.

Robbers how dealt with.

There is also a *Fourſdar*, or Provost, who is bound to secure the Country round about the Town, and to answer for all the Robberies committed there.

The Burying-places. The Burying-places of *Surat* are without the Town, about 3 or 400 Paces from the *Baroche* Gate. The Catholicks have theirs apart, and so have the *English* and *Dutch*, as well as some religious *Indians*. The *English* and *Dutch* adorn their Graves with Pyramids of Brick, whitened over with Lime. The religious *Gentiles* make their Tombs square, and of Plaister, cover'd some with a Dome, and others with a Pyramid a little more than 3 Foot high. The *Banians* burn their dead Bodies by the River side, and leave the Ashes there to be wash'd away by it, because they account it sacred. They believe, that it contributes much to the Soul of the Deceased, to burn his Body immediately after his Death, because they say, his Soul suffers after the Separation from the Body, unless it be burnt; but they burn not the Bodies of Children under 2 Years old, because they hold them innocent, nor of the *Vartia's* or *Jogues*, who are a kind of *Dervices*, because they follow the Rite of *Madeo*, who is one of their great Saints, and ordered their Bodies to be interr'd.

Bodies burnt.

Curiosities about *Surat*. The Things most observable about *Surat* are, a large Well, built by a *Banian*, with divers thin Arches over it, to which they go down by certain Stairs. On the Outside is a Figure of a red Face, but the Features are not discernible. The *Gentiles* say, 'tis the Pagod of *Madeo*, and pay a great Devotion to it. Towards *Daman-Gate* begins the loveliest Walk in all the Country, and by it is a great Reservatory of Water, called the *Tanquie*. It hath 6 Angles, and every one of them 100 Paces long, and it is at least a Musket-shot in Diameter. The Bottom is paved with large Free-stone, and there are Steps all round in Form of an Amphitheatre from the Brim to the Bottom of lovely Free-stone, brought from *Cambaya*. It was made at the Charges of a rich *Banian*, named *Copy*, to catch the Rain-Water to supply the Town, and is certainly

a

a Work worthy of a King, being equal to the best of the *Roman* Aquæducts made for publick Use. About a Quarter of a Lg. from the Reservatory is the *Princess's Garden*, so call'd, because it belongs to the Great Mogul's Sister. It is a large Plat of Trees of several kinds, as Manguiers, Palms, Mirobalans, Wars, Maisa-Trees, and many other Plants and Shrubs, some of them rare, set in a direct Line, and it is cut into many long and very fair Walks. In the midst is a Building with 4 Fronts, having each of them a *Divan*, and a square Bason full of Water before it, from whence run several little Brooks through the chief Walks, which make it fine and delightful, but short of the Princes Gardens in *Europe*.

The Princess's Garden.

About 150 Paces from the Garden is a War, or Ber-Tree, which the *Portuguese* call, *The Tree of Roots*. It is very large and high, being round, and 80 Paces in Diameter. The Branches which have taken Root are so skilfully cut, that one may walk every where under it. The *Indians* account it sacred, and the *Banians* have planted Banners on the Top and higher Branches of it. By it is a Pagod dedicated to an Idol, called *Mameva*, which is thought to be *Eve*.

A War-Tree.

The Soil about *Surat* is brown, and so rich, that they never dung it, but sow their Corn after the Rains in *September*, and reap it in *February*. It bears also Sugar-Canes, Rice, Manguiers, Palm-Trees, and many other sorts of Trees, which yield great Profit. They water their Gardens, but the great Dews yield sufficient Moisture for their Corn-Lands. The River *Tapty* is always brackish at *Surat*, so that they use it only for washing their Bodies, which they do every Morning, as do also the other *Indians*.

The Soil about Surat.

In travelling up and down *India* there are divers sorts of Carriages, both for Merchandice and Travellers, and when you leave *Surat* you must make use of one, or both these. For Goods they make use of Oxen, Camels or Waggons. Upon their Oxen they will lay 300 or 305 Pound Weight; and 'tis no wonderful Thing to see 10 or 12000 Oxen at a Time laden with Rice, Corn and Salt, carrying the Rice to the Place where Corn grows, and Corn where the Rice is, and Salt to the Places where there are none. These numerous Caravans are very inconvenient to Travellers, because when they meet with them, they are forced to stay 2 or 3 Days, till they pass by. This is the most speedy Carriage for Merchants Goods, and they commonly make use of it when they are in haste to ship them off at *Surat*. They that drive these Oxen follow no other Calling, nor have any Houses, but carry their Wives and Children along with them. Some of them have 100 Oxen of their own, and they have a Captain of the Caravan, who wears a Chain of Pearls about his Neck, and takes as much State upon him as a Prince. All that follow this Trade of Carrying are divided into 4 Tribes, called *Manari's*, and consist each of them of 100000 Souls; they live always in Tents, and are maintained by transporting of Merchandice from Country to Country; the first of them carries nothing but Corn, the 2d Rice, the 3d Pulse, and the 4th Salt, and they are distinguish'd by certain Marks made by the Priests in the Face of every one of 3 of the Tribes by a different colour'd Gum, and some Grains of the Thing they carry pourtray'd in it; the 4th carries a Bag of Salt about their Necks of 8 or 10 Pounds, and with it they thump their Breasts every Morning before they say their Prayers in Token of Repentance. They love their Oxen and Cattel as tenderly as Children, especially if they have none. Their Women wear only a Piece of Calicut, painted or white, 5 or 6 times double from their Waste downward, and upwards they cut their Bodies into several Forms of Flowers, which they paint in various Colours with Grapes. They have Priests that go along with them, who every Morning set up an Image of a Serpent in Wreaths upon a Pole 6 or 7 Foot high, and when every one has paid his Adoration to it, the Women going 3 times about it, they load it upon an Ox appointed on purpose for carrying it, and accompany the Caravan. They use Camels sometimes, but very rarely, they being particularly appointed to carry the Luggage of great Personages.

Their Carriages and Way of travelling.

Ox-Drivers.

Their Tribes.

Their Carriage.

Their Priests.

Camels.

The Caravan or Waggon seldom exceeds 200, and is most commonly not above 100. Every Waggon is drawn by 10 or 12 Oxen, and attended by 4 Soldiers, which the Person that owes the Merchandice is obliged to pay. Two of them march on each side of the Waggon, over which there are 2 Ropes, thrown acress, the Ends whereof they hold in their Hands, that if the Waggon leans too much to either Side in the bad Way, the contrary Side may keep it from overturning, by pulling the Ropes with all their Strength.

Waggons.

The Manner of Travelling in *India* is upon Oxen, instead of Horses, so that if any Merchant carries an Horse out of *Persia*, 'tis only for Show, or to walk in his Hand, or to sell to some *Indian* Prince. Some of these Oxen will pace as easie as our ambling Nags. They manage them as Horses, but instead of a Bit, they have a Rope drawn through the mussely part of the Nose: Only in riding them you must take care that the Horns be not above a Foot long, for if they be longer, when the Flies begin to sting, he will chase and toss back his Horns, and sometimes strick them into the Stomach of his Rider. They never Shooe them, but in rough Places, where the Stones and Heat are apt to waste and chop the Hoof. They use also little Coaches for Travel, which will hold 2 Persons, but generally they ride but one in them, when they carry their necessary Cloak-bags and Provisions, for which there is a proper Place under the Coach. They are drawn by 2 Oxen, and some of them are so strong, that they will travel upon the Trot 12 or 15 Lgs. a Day for 60 Days together. When they have got half their Day's Journey they give them 2 or 3 Balls, as big as one of our Two-penny Loaves, of Wheat-Flour, kneaded up with Butter and black Sugar. The Hire of one of these Coaches is a Roupie a Day, or a little more, for from *Surat* to *Agra* is 40 Days Journey, and you pay for the whole not above 45 Roupies. They who have more to spend may make use of a Palanquin for their Ease, wherein they travel very commodiously. 'Tis a little sort of Coach, 6 or 7 Foot long, and 3 broad, with Ballisters round about it. It has a kind of Tilt over it of Satin, or Cloth of Gold, and when the Sun lies upon either side, there is a Slave that goes by the side to pull down the Covering, and another carries a Target of Oziers, cover'd with some genteel Stuff, to keep the Traveller from the Heat of the Sun. Three Men for the most part apply themselves to each of the Ends to carry the Palanquin upon their Shoulders, and they go swifter than our Sedan-Men, and with more Ease, because they practise it from their Youth. You give to every one 4 Roupies a Month, but if the Journey exceeds above 60 Days Labour, they'll have 5. Whether it be in a Coach or a Palanquin, he that will travel honourably in the *Indies* must take along with him 20 or 30 arm'd Men, some with Bows and Arrows, others with Muskets, who have every one the same Rate as those that carry the Palanquin. Sometimes, for more Magnificence, they carry a Banner, as the *English* and *Hollanders* do for the Honour of their Companies. These Soldiers watch and keep Centinel for your Defence, and are mighty careful to give Content, that they may deserve the Good-Word of the Chief of the Town where you take them, for he is responsible for their Fidelity, and has 2 Roupies apiece of them for his Recommendation.

Oxen to ride on.

Coaches drawn by Oxen.

The Fare for them.

Palanquins.

The Pay for Carriage.

In the Villages where a *Mahometan* commands, you may have Mutton, Pullets or Pigeons, but where there are only *Banians*, there is nothing to be had but Flour, Rice, Herbs and Milk-Meats.

Provision.

In the *Indies*, where the Heats are very excessive, 'tis more commodious to travel by Night than Day, and therefore when you come into any fortified Towns, you must be gone before Sun-set, if you intend to travel the Night following, for the Gates being shut the Commander of the Place is to answer for all the Robberies committed within his Jurisdiction, and will suffer none to go out, telling them 'tis the King's Order, to which he must be obedient. The Measure of Distances in *India* is by *Costes*, which is a Lg. and *Gos*, which is 4 of our common Leagues.

In travelling from *Surat* to *Agra*, there are 2 Roads, one through *Brampour* and *Seronge*, and the other through *Amadapat*. In the first of these you go from *Surat* to *Barnoly*, a great Borough Town, where you ford a great River. This first Day's Journey lies through a Country something Woody, yet having many Fields of Rice and Wheat.

One Road from Surat to Agra.

From *Barnoly* you travel altogether through Woods to *Babor*, a large Village upon a Lake, about a Lg. in Compass. Three quarters of a Lg. before you come at this Town you must ford a small River, but with great Difficulty, because it is full of Rocks and Stones, which are ready to overturn the Coach.

Barnoly to Babor.

Kerkoa. From *Babor* the next Stage is through a Woody Country to an Inn, called *Kerkoa*, or *De La-Begum*, becauſe it was built by the Charity of *Begum-Saheb*, the Daughter of *Sha-Jehan*, for the Eaſe of Travellers, who before were forced to travel to *Navapoura*, which, beſides that it was too great a Journey, being upon the Frontiers of thoſe *Raja's*, who often revolt from their Obedience to the Great Mogul, the Caravans were generally abuſed. This Inn, or *Caravan-ſera*, is large and very commodious. In the Road from hence to *Navapoura* you ford 2 Rivers.

Navapoura. *Navapoura* is a great Town, full of Weavers, but Rice is the greateſt Commodity there; for not only the River that runs through the Country makes it very fruitful in that Grain, which requires Moiſture, but the Rice that grows there has a peculiar Excellency, for which it is much eſteem'd. It is, indeed, leſs by half than the Grain of the common Rice, but when it is boil'd no Snow is whiter, and it ſmells like Musk. This Property makes the *Indian* Grandees ſo fond of it, that they will eat no other, and when they would make an acceptable Preſent to any one in *Perſia*, they ſend them a Sack of this Rice.

Belt Rice.

From *Navapoura* you paſs through *Naſarbar*, *Dolmedan* and *Senquera*, to *Tollener*. Here you paſs the River which runs to *Barock*, where it grows very large, and empties it ſelf into the Gulf of *Cambaya*.

Tollener. From *Tollener* your Way lies by *Choupre*, *Senquelis* and *Nabir*, to *Badelpoura*. Here the loaded Waggons pay the Duties of *Brampour*, but the Waggons that carry nothing but Paſſengers pay nothing; and when this is done, you go on to *Brampour*, which is a great City, but very much ruined, and moſt of the Houſes are thatch'd with Straw. In the midſt of it is the Caſtle, where the Governour lies. The Government of this Province is a very conſiderable Command, and is only conferr'd upon the King's Son, or Uncle, but ſince they have underſtood the Strength of the Province of *Bengal*, which was formerly a Kingdom, that Province is thought the moſt conſiderable in all the Mogul's Country at this Day.

Brampour described.

Calicuts. There is a great Trade in this City, as well as in the Province adjoining, in Calicuts, of which there are prodigious Quantities made here, very clear and white, which are tranſported into *Perſia*, *Turky*, *Muſcovy*, *Poland*, *Arabia*, *Grand Cairo*, and other Places. Some of them are painted with Flowers of various Colours, and the Women make Veils and Scarfs of them, and of ſome Coverlets of Beds and Handkerchiefs. They make another ſort of Linen, which they never dye, and hath a Stripe or two of Gold or Silver quite through the Piece, and at each End from the Breadth of one Inch to 12 or 15, they fix a Tiſſue of Gold, Silver and Silk, intermix'd with Flowers: Both ſides are alike. Some of theſe Linens are made on purpoſe for Saſhes, and are called *Ornis*, and contains from 15 to 20 Ells. Some are of 2 Ells only, and ſerve the Ladies of Quality for Veils and Scarfs. and vaſt Quantities of theſe Goods are vended into *Perſia* and *Turky*. They make alſo other ſorts of Cotton-Linen at *Brampour*, becauſe there is no Province in all the *Indies*, which has greater Quantities of Cotton.

Linen called Ornis.

Cotton-Linen.

Leaving this City, there is a River, which, when ſhallow, is forded, and if ſwell'd by the Rains, there are always Boats attending to carry over Travellers, and then you come to *Piombeſera*, which is an Incloſure of Walls and Hedges, within which are 50 or 60 Huts covered with Straw, where dwell certain Men and Women that ſell Flour, Rice, Butter and Herbs, and make it their Buſineſs to bake Bread and boil Rice to ſell to the Travellers; and theſe Perſons cleanſe the Hut they take up and put into it a Bedſtead, with Girths to lay a Mattreſs or Quilt upon, which the Travellers uſually carry along with them. This is ſignified by the Word *Sera*, which is added to ſuch Places. If any Traveller have a mind to a Fowl, or piece of Mutton, any *Mahometan* in the Place will go to the City and buy it for him.

Piombeſera.

Andy. From hence you go forward through *Pander*, *Balkiſera*, *Nevilkiſera*, *Conſemba*, *Chenipore*, *Charava*, and *Bichola* to *Andy*, where you paſs a River, that falls into the *Ganges*, between *Banaras* and *Patna*, and ſo take the Way by *Onjuena*, *Tiquery*, *Tool-meden*, *Nova-ſera*, *Ichavour*, *Signor*, *Chekaipour*, *Douray*, *Aſer-kair*, *Telar*, and *Sankaira* to *Seronge*.

Seronge described. This City is large, and the moſt part of the Inhabitants are *Banian* Merchants and Handicraft-Tradesmen, from Father to Son; and for that reaſon there are in this City ſeveral Houſes of Stone and Brick. Here is alſo a great Trade for all ſorts of painted Calicuts called Chites, of which the Cloathing of all the meaner Sort of People in *Perſia* and *Turky* is made; and the ſame are uſed in other Countries for Coverlets for Beds, and Table Napkins. The ſame ſort of Calicuts are made in other Countries, but the Colours are neither ſo lively, nor laſting, but wear out with often waſhing; whereas thoſe made at *Seronge* grow the fairer, the more you waſh them. This ariſeth from a peculiar Virtue of the Water of the River, that runs by the City, when the Rains fall, for the Workmen having made ſuch Prints upon their Cottons, as the Foreign Merchants give them in ſeveral Patterns, dip them in the River often, and that ſo fixeth the Colours, that they will always hold. There is alſo made at *Seronge* a ſort of Calicut ſo fine, that when a Man puts it on, his Skin ſhall appear as plainly thro' it as if he were naked; but the Merchants are not permitted to tranſport it, for the Governour is obliged to ſend it all to the Great *Mogul's* Seraglio, and the principal Lords of the Court, to make the Sultaneſſes and Noblemens Wives Shifts and Garments for the hot Weather, and the King and the Lords take great Pleaſure to behold them in thoſe Shifts, and ſee them dance with nothing elſe upon their Bodies.

Chites.

A Water that fixes Colours.

Superfine Calicuts.

From *Seronge* you go to *Madalki-ſera*, and paſſing through *Paulki-ſera*, *Kaſariki-ſera*, and *Chaldolki-ſera* you come to *Callaba*.

This is a great Town, which was the Reſidence of a *Raja* formerly, who paid a Tribute to the Mogul, but the laſt Emperor *Aureng Zeb*, when he came to the Crown, not only cut off his Head, but the Heads of many of his Subjects, which he cauſed to be ſet up in ſo many Holes dug in the Ground round about the 2 Towers, which ſtand upon the High-way near the Town.

Callaba described.

From hence the Way lies to *Akmate*, and from thence to *Collaſar*, whoſe Inhabitants are all Idolaters. Without the Town all along the High-way there grew a vaſt Number of great Trees, which they call *Mangues*, and in many Places near the Trees are many Pagods, with every one an Idol at the Door. They belong'd to the *Banians*.

Collaſar.

Departing from this Town, you travel through *Sanſell* and *Dongry* to *Gate*. This is a ſtrait Paſſage of a Quarter of a Lg. long, between the Mountains, and is unavoidable by all that come from the South, as *Surat*, *Goa*, *Viſapour*, *Golconda*, *Maſlipatan*, and other Places, to *Agra*, for there is no other Road but this. At the Entry of it are the Ruins of 2 or 3 Caſtles, and the Paſſage is ſo narrow, that 2 Waggons can hardly go a-breaſt. Formerly there was a Gate at each End of the *Streights*, and at the End next *Agra* there are 5 or 6 Shops of *Banians*, that ſell Flour, Butter, Rice, Herbs and Pulſe. Not far from hence is a Magazine of Rice and Corn, kept by Serpents 13 or 14 Foot long, and of a proportionable Bigneſs. The People hereabouts get their Living by the Paſſengers, from whom they extort as much as they can for ſhowing them the Way, there being none but they that know it, becauſe is lies through intricate Rocks, till they come at the River, which being forded, the Road leads to *Nader*, which is a great City upon the Deſcent of a Mountain, upon whoſe Top there is a Fortreſs, and all the Mountain is encompaſſed with Walls. The greateſt part of the Houſes, as in all other Cities of *India*, are thatch'd with Straw one Story high, but the rich Mens Houſes are 2 Stories, and terraſs'd. Round about the City are ſeveral Ponds to be ſeen, which were formerly encompaſſed with hewn Stone, but now are decay'd for want of looking after; but there are ſtill very fair Monuments about them. The River, which you paſs before you come at this City, encompaſſes the Mountain like a Peninſula, and after a long winding Courſe, falls into *Ganges*. At *Nadar* are made a great Number of quilted Coverlets, ſome white, others embroider'd with Flowers of Gold, Silk and Sattin.

Gate.

Serpents to guard a Magazine.

Nader described.

Large Ponds.

From *Nader* you go to *Barqui-ſera*, and ſo by *Trie*, to *Gonalcor*. This is a great City, but ill built, as all the other *Indian* Cities are. It is built at the ſide of a Mountain, that lies on the W. ſide of it, and at the Top is encompaſſed with Walls and a Tower. In the Incloſure are ſeveral Ponds, made by the Rains, with which they water their Grounds, ſown with Rice, and ſo raiſe Corn enough to maintain their Garriſon, and upon that Account 'tis eſteem'd the beſt in the *Indies*. Upon the Deſcent of this Hill, which looks

Gonalcor.

looks towards the North-East, *Cha-Jehan* built an Houſe of Pleaſure, from whence there is a delightful Proſpect over all the City. It is ſo contriv'd, that it may ſerve for a Garriſon. Beneath the Houſe are to be ſeen ſeveral Idols cut out of the Rock, repreſenting the Shapes of their Gods, and one of them is of an extraordinary Height. The *Mahometan* Princes make this Fortreſs of *Goualcor* a Priſon for their Great Princes and Noblemen that offend them. *Cha-Jehan*, who came to the Crown by foul Play, impriſon'd all the Princes and Lords, whom he ſuſpected to be Male-contents, in this Caſtle, but ſuffered them all to enjoy their Eſtates; but *Aureng-Zeb* his Son takes contrary Meaſures, for when he impriſons any great Lords, he orders them to be poiſon'd within 10 or 12 Days, that ſo he may be rid of his Enemies, and yet not be thought a cruel Prince for his bloody Executions.

The Fortreſs.

Morat Bakſh's Death and Monuments.

Thus he ſerved his own Brother *Morat Bakche*, whom he had engaged to join with him in a Rebellion againſt his Father; but having made him Governour of *Guzarat*, he took upon him the Name of a King, whereupon he ſeized him, and ſending him to this Fortreſs, he died there. They have made him a moſt magnificent Monument in the City in a Moſque, built on purpoſe, with a great Piazza, ſurrounded with Vaults and Shops over them, where they keep their Markets, and a Foundation for the Poor, to whom they give Alms every Day, to pray for the Founder, according to the Cuſtom of the *Indians*.

The Road.

Leaving *Goualcor*, you ford a River called *Lantke*, and come to *Paterkiſera*, where paſſing over a Bridge, conſiſting of 6 wide Arches, and which carries you over the River *Quarinado*, you arrive at *Quaraquiſera*, and ſo to *Dolpoura*, where there is a River called *Chammel-nadi*, to which there belongs a Ferry-boat. The River falls into the *Gemena*, between *Agra* and *Halabas*.

From hence you paſs to *Minaſqui-ſera*, where there is a River called *Jagounagi*, but you do not paſs it, till you come 8 Lgs. farther, and then there is a very long Bridge built with Stone, called *Jaoulcapoul*. Not far from this Bridge they view the Merchants Goods, that when they come to *Agra*, they may not be cheated of their Duties, and more particularly obſerve, whether there be any Flasks of Wine among the Casks of pickled Fruits. From this Bridge you come to *Agra*, which from *Surat* is 339 Lgs, *viz.* From *Surat* to *Brampour* an 132 Lgs. from thence to *Seronge* an 101 Lgs. and from thence to *Agra* 106 Lgs. In theſe 2 laſt Stages the Country is full of Fields of Corn and Rice, being a lovely Champain, where you meet with very little Wood, and the Villages as thick, that you may reſt when you pleaſe.

The diſtance from *Surat* to *Agra*.

The other Road from *Surat* to *Agra*.

The other Road from *Surat* to *Agra*, through *Amadapat*, lies firſt through a Country full of Corn, Rice, Millet and Sugar-Canes, where having ferried over the River, which runs to *Cambaya*, and falls into the Gulf, you come to *Bareche*, which is a great City, and has a Fortreſs belonging to it, but there is no uſe made of it at preſent.

Baroch deſcribed.

This City is made very famous for Trade upon the Account of the River, which has a peculiar Quality to whiten their Cottons, and which are therefore brought from all Parts of the *Mogul*'s Territories thither for that End; beſides, here are made a great Quantity of *Baffa's*, or long and large Pieces of Cotton, very fair and cloſe woven: The Price of them is from 4 to 100 Roupies. You muſt pay Cuſtoms at *Baroche* for all Goods carried in and out. The *Engliſh* Preſident has a very fair Houſe in this City.

Mountebanks ſtrange Tricks.

In this City are a ſort of Mountebanks, who do ſtrange Tricks, *viz.* They will heat a Chain red hot, and wind it about their naked Bodies ſeveral times, and though they make as if they felt a great deal of Pain, yet, in Truth, they receive no Harm at all: But what is moſt miraculous, they will thruſt a dry Stick into the Ground, and in leſs than half an Hour's time, make it a Tree 4 or 5 Foot high bearing Leaves and Flowers as in the Spring-time. An *Engliſh* Miniſter ſeeing this Witchcraft, declared it unlawful to be a Spectator of ſuch Deluſions, and proteſted he would not give the Communion to any that ſhould hereafter do it. Theſe Mountebanks wander up and down the Country to ſhew theſe Tricks, with their Wives and Children, and get a Livelihood by it.

Thoſe who are curious to ſee *Cambaya*, leave the direct Road which goes to *Broudra*, and paſs through that City, which is not above 4 or 5 Lgs. out of the Way, and is the ſafer Road.

Cambaya is a great City at the Bottom of the Gulf of the ſame Name on the South of it. It lies in the Province of *Guzarat*, and though it be not ſo populous as *Surat*, 'tis as big again. It hath very fair Brick-Walls about it, 4 Fathom high, and Towers ſtanding at certain Diſtances. The Streets of it are large, and have all Gates at each End, which are ſhut every Night. The Houſes are very high, and built of Bricks dried in the Sun, and were once furniſhed very richly after the *Portugueſe* Manner, but now many of them fall to decay. Here it is, that they ſhape thoſe fair Agats that come from *India*, into Cups, Hafts of Knives, Beads, and other ſorts of Workmanſhip. Theſe Agats are fetched out of the Quarries by a Village called *Nimodra*, 4 Lgs. from *Cambaya*, in Pieces as big as a Man's Fiſt. The Shops here are ſtored with Aromatick Perfumes, Spices, Silken and other Stuffs. Moſt part of the Inhabitants are *Banians* and *Raſpouts*. The Caſtle where the Governour reſides is large, but not beautiful. There are ſo many Monkies in the Town, that ſometimes the Houſes are covered over with them, and they often do Miſchief in the Streets, by throwing down ſuch Things as they find upon the Roofs. The Out-parts of the Town are beautified with a great many fair publick Gardens. Here is a Marble Sepulchre, raiſed by a King of *Guzarat*, in Honour of a Governour of this City, but it is decayed. It contains 3 Courts, and in one of them are ſeveral Porphyry Pillars. Anciently there was in this City an Hoſpital for ſick Beaſts, but there are only Ruines of it now. The Suburbs are almoſt as big as the Town, and in them they make Indico of the ſame Nature as that of *Sarqueſſe*. It was famous for Traffick when the *Portugueſe* flouriſhed in *India*, but now the Trade is almoſt loſt, becauſe the Sea that once came up ſo cloſe to the Town, that little Veſſels could Anchor by it, is now become half a Lg. diſtant from it, and near the Coaſts is ſo ſhallow, that great Ships can come no nearer than 3 or 4 Lgs. There are great Numbers of Peacocks in the *Indies*, eſpecially in the Territories of *Baroche*, *Cambaya* and *Broudra*, and in the Day-time they walk about the Fields, but in the Night rooſt upon the Trees. The Fleſh of the young ones is white and well-taſted. In thoſe Parts where the *Mahometans* govern, you may catch them without Danger, but in thoſe Territories where there are idolatrous *Rajah*'s Maſters, it is very dangerous to kill them, or any other Bird, or Animal, for the *Banians* count it Sacrilege, and will ſeverely puniſh any they can ſeize. They whipt a *Perſian* Merchant to Death, and took all his Money to the Value of 300000 Roupies for ſhooting a Peacock.

Cambaya deſcrib'd.

Streets and Houſes.

Agats.

The Caſtle.

A Marble Sepulchre.

Indico.

Peacocks.

From *Cambaya* you go through a little Village, where there is a Pagod, where the *Indian Curtiſans* make their Offerings, and among divers naked Images, there is one that reſembles *Apollo*, with his privy Parts uncovered. The young Girls, who are train'd up to this wicked Art by the old *Curtiſans*, when they are 11 or 12 Years old, ſurrender themſelves up to this Idol, believing that it will bring them good Fortune: And about 6 Lgs. further you come to *Chidaba*, which is one of the faireſt Houſes of the Great Mogul, being in a wide Incloſure, wherein he has vaſt Gardens and large Ponds, with all the Pleaſures and Curioſities whereof the Genius of the *Indians* is capable; and from this Palace you travel to *Amadabad*, to which City you come from *Broudra* by *Neriade*.

A Pagod for the *Curtiſans*.

Amadabad, which is probably the *Amadariſtis* of *Arrian*, is 82 Lgs. from *Surat*, and lies in 23 D. and ſome M. of Northern Lat. It is built in a lovely Plain, watered by a little River, called *Sabremetty*, which is not very deep, but ſwells prodigiouſly by the Rains. Without the Town are many large Gardens, encloſed with Brick-Walls, and every one of them have a kind of Pavilion at the Entry. By them there is a Refervatory of Water, which has in the midſt of it a lovely Garden, 80 Paces ſquare, into which one enters over a Bridge 400 Paces long, and at the End of the Garden are pretty convenient Lodgings. By theſe you ſee many Houſes, which make a kind of large Village, and a great many Tombs indifferently well built. From hence you paſs through a Street, which leads you into the Town. The Town is encloſed with Stone and Brick-Walls, which at certain Diſtances are flank'd with great round Towers and Battlements all over. It hath 12 Gates, and is about a Lg. and half in Length, if you take in the Suburbs. All the Streets are wide, and the *Meidan* is 400 Paces in Breadth, and 700 in Length, with Trees planted

Amadabad deſcribed.

Gardens.

Walls.

Meidan.

planted on all sides. The Gate of the Castle is on the W. side, and there are 6 or 7 Pieces of Cannon mounted. In the Market-place are the Tribunals for the *Cotoreal*, or Criminal Judge, and in the midst is a very high Tree, which has a Ball fix'd on the Top of it, for those to hit, who exercise themselves there to shoot with Bows and Arrows. This Castle is Wall'd about with good Walls of Free-stone, and is as spacious as a little Town. Near the *Meidan* is a large Palace belonging to the King, which hath over the Gate a large Balcony for the Musicians, who play there every 6 Hours. The Apartments are adorn'd with Gold Paintings. The *English* Factory is in the Middle of the Town. It is well seated, and hath very fair Courts. Their Ware-houses are commonly full of Cloths of *Labors* and *Dehly*, with which they drive a great Trade; but the Trade of the City is in Silk-Stuffs, Hangings of Gold, Silver and Silk, but with Woollen Grounds, Salt-Petre, Ginger, candied and and raw, Lac, Cummin, Opium, Tamarins, Mirobalans and flat Indico. There are many Mosques great and small in it, but that which is called *Juma-mesgid*, or *Friday*'s Mosque, because all the devout People of the Town flock together on that Day, is the chiefest and fairest. It hath a large square Cloister, 2 fine Gates with high Steeples, from whence the *Muezims*, or Beadles of the Mosque, call the People to Prayers. It hath several Domes, and 2 Minarets, and 'tis pav'd with Marble, so that all together 'tis a pleasant Sight. It is inhabited by many Heathens, as well as *Mahometans*, who have their Pagods, or Idol-Temples there. The Pagod of *Santidas* was the Chief, before *Aureng-Zeb* converted it into a Mosque. It hath 3 Courts pav'd with Marble, and encompassed with Galleries, and into the 3d none must enter, till they have pull'd off their Shooes. The Inside is adorned with *Mosaick* Work, and Agats of divers Colours. In it are several Sepulchres of the ancient Idolatrous Kings of *Mosaick* Work, which look like little Chappels; but the Tomb of *Chaalem*, whom the *Indians* report to have been a Magician, but the *Mahometans* believe him to have been a great Saint, is most honoured, being daily visited by a great many out of Devotion.

The Castle and King's Palace.

The Great Mosque.

Santidas, a Pagod made a Mosque.

The *Banians* have a great Veneration for Apes, and there are some that breed them up in their Pagods to worship, and if any one kills any of them, complain of it as a great Injustice. There are 3 or 4 Hospitals for Cows, Oxen, Camels, Apes and Birds, and other sick and maimed Beasts, where they are look'd after, and well fed. They buy them from *Christians* and *Moors*, to deliver them, as they say, from the Cruelty of Infidels, and if they are incurable, they keep them there as long as they live, but if they recover, they sell them to *Gentiles*, and none else. This is also very remarkable, that every *Tuesday* and *Friday* all the Apes in the Country adjoining come into the City, and lie upon the Tops of the Houses during the excessive Heats. Upon these Days the People never fail to set ready in their Terrasses Rice, Millet, Sugar-Canes, and such like Things; for if they do not find Provisions, they'll break the Tiles, and do a great deal of Mischief. About *Amadabad* are a great many Forests, where they catch Panthers, which they tame, and send to the King for his Hunting.

Apes worshipped.

An Hospital for Beasts.

From hence you go to *Panser*, and so by *Masana* to *Chitpour*, a very good Town, so called from a sort of painted Calicuts, called *Chites*, made and sold here. They have an Art here of taming Lions, by tying them in a large Plain, and making them a Sport to the People. Hereabouts it is common to meet the Companies of *Faquirs*, or *Mahometan Dervises*. They have a Superior, and some Assistants, who have some Cloaths better than the rest, *viz.* Some Ells of Calicut about their Middles, to cover their privy Parts, and a Tyger's Skin about their Shoulders; but the rest have only a Cord for their Girdle, and a little Bit of Calicut fastned to it to cover their Privities. Their Hair is tied about their Head like a Turbant, and they are arm'd with Bows, Arrows, Muskets, Half-pikes, &c. When they travel they carry their Luggage, which is some Houshold-stuff and a pretty many *Arabian* and *Persian* Books, on Oxen. When they come to any Place, the Superior sends some of his Crew a-begging into the Towns and Villages, and what Alms they get is presently distributed equally among them, every one of them taking care to boil his own Rice, and what is over and above they give to the Poor in the Evening, for they reserve nothing till next Day.

Chitpour described. *Faquirs*. Their Begging.

From *Chitpour* you pass through *Balampour*, and so through *Dantivar* to *Bargant*. This Town is in the Territories of a *Raja*, to whom you must pay some Duties, and all the Way through these Countries is dangerous to be travelled, because the *Raja* lives altogether upon Robberies; and therefore unless you hire many People for a Guard, you will go near to have your Throat cut, for there is no likelihood of escaping these Free-booters.

Bargant described.

From thence the Way lies through *Bimal* and *Modra* to *Chalaour*, an ancient Town upon a Mountain, encompassed with Walls, and very difficult to come to. There is a Lake upon the Top of the Mountain, and another below, and between them lies the Road to the Town.

Chalaour.

From *Chalaour* you pass on to *Cantap*, *Sestana*, *Palavaseny*, and *Pipas* to *Dantivar*; from whence to *Mirda* is 3 Days Journey, being a mountainous Country that belongs to *Raja's*, or Petty-Princes, who pay Tribute to the Great *Mogul*, but in Recompence of it the Great *Mogul* gives them Commands in his Army, which affords them much more Gain.

Mirda is a great City, but ill built. This City having offended the King's Sister *Begum*, the Wife of *Cha-Est-Kan*, in not waiting on her, and making her a Present in her Journey through that Place, when she went to marry her Daughter to Sultan *Sujah*, she let loose 20 Elephants, who tore down their Trees, and did them damage.

Mirda.

From *Mirda* the Road lies through *Borondo*, *Cetchiel*, *Bander-Sonnery*, *Ladonia*, *Chasou*, *Nouali* and *Hindoo* to *Baniana*. These 2 last Towns are famous for Indico-Plate, which is round, and being the best of all the Indico's, is double the Price.

Hindoo. *Baniana*.

Vettapour, a Town famous for weaving Woollen Hangings, is the next Town; and from thence you go directly to *Agra*, to which from *Surat* is 415 Lgs. and 33 Days Journey, if they could be equally divided, but because you stay in some Places, it usually takes up 35 or 40 Days.

Vettapour.

CHAP. II.

The Road from Candabar *to* Agra.

The Distances of the Roads.

FROM *Candabar* there are 2 Ways to *Agra*, either through *Caboul* or *Multan*. The latter is the shorter by 10 Days Journey, but the Caravan never goes that Way, because it lies almost all through the Desarts, where there is no Water to be met with for 3 or 4 Days together, so that their most ordinary and beaten Road is through *Caboul*. Now from *Candabar* to *Caboul* is 24 Days Journey, and from thence to *Labor* 22, from *Labor* to *Dehly*, or *Gehanabat*, 18, and from thence to *Agra* 6, which, with the 60 Days Journey from *Ispahan* to *Farat*, and 20 from *Farat* to *Candabar*, makes in all from *Ispahan* to *Agra* 150 Days Journey; but the Merchants that are in haste ride 3 or 4 in a Company upon Horses, and finish it in 60, or 65 Days at most.

Multan described.

Multan lies in 29 D. 40 M. Northern Lat. and is the Capital Town of the Province of the same Name, though some Geographers place it in the Province of *Sinde*. It hath many Towns in Dependance upon it, as *Cozdar*, or *Cordar*, *Candavil*, *Sandur*, and others. In this City is made a vast Quantity of Linen-Calicuts, for which heretofore there was a very great Trade, because, it not being far from the River *Indus*, they could easily transport them to *Tatta*, where the Merchants of several Countries bought them up; but because of late the Chanel of the River is spoil'd in some Places,

Places, and the mouth is quite ſtopt up with Sands, they are forced to ſend all their Goods to *Agra*, and ſo to *Surat*, which ſo inhances the Price by the Carriage, that the Merchants do not care to deal in them, by which Means the Trade is much leſſen'd there, and the Workmen have deſerted the City, ſo that the King's Revenues are much leſſen'd in thoſe Provinces: Yet there is ſmall Trade for Sugar, Opium, Brimſtone, Galls, and Camels, which are tranſported into *Perſia*, *Gazna*, *Candabar*, and the *Indies*, by *Labors*. It furniſhes *Indoſtan* with the fineſt Bows that are to be ſeen in it; and here are bred the great Numbers of Dancers of both Sexes, that ſpread themſelves all over *Perſia*. The Commander and Officers of this Town are *Mahometans*, and conſequently it may be ſuppoſed, that the moſt part of the Inhabitants are of the ſame Religion, yet there are a great many *Banians*, who come to trade, and exerciſe their Arts and Broakage and Uſury, in which they much out-do the *Jews*; for they are ſo watchful and cunning, that no Opportunity of Gain ſlips them, and they have ſo wound themſelves into all Buſineſs, that hardly any Body can be without them. They take Commiſſions of all kinds, and though it be known that they make a Profit of every Thing, yet the Merchants chuſe to make uſe of them rather, than do their Buſineſs themſelves, for they will buy cheaper and better than any Man can for himſelf. They are of a pleaſing Humour, and refuſe no Service, whether honourable or baſe, and are always ready to ſatisfie thoſe that employ them, and therefore every one has his *Banian* in the *Indies*; and ſome Perſons of Quality entruſt them with all they have, though they are not ignorant of their Hypocriſie and Avarice. The richeſt Merchants of the *Indies* are of this Claſs, or Tribe. They are commonly very jealous of their Wives, who are fairer than the Men, though of a brown Complexion, and love to paint. They have a particular Law among them, which permits them to eat Fowl upon certain Days of the Year, and to have one Wife among 2 or 3 Brothers, and the Eldeſt of them is accounted the Father of the Children begotten among them.

From *Candabar* you travel to *Chariſafar*, and then through *Zelate*, *Betazy*, *Mezour*, and *Carabat* to *Chakonicouze*, which is a Frontier Town of the *Indies*, and the Country about it is under the Command of ſeveral Princes, that acknowledge the *Perſian* Emperor. From this City to *Caboul* is 40 Lgs. and in the whole Journey there are but 3 pitiful Villages, where you can rarely get Bread and Barley for your Horſes, and therefore you muſt carry Proviſion for your ſelf. In the Months of *July* and *Auguſt* there blows an hot Wind in theſe Parts that takes away a Man's Breath, and kills him upon the Place. It is the ſame with that which blows about *Babylon* and *Mouſſul*, at certain Seaſons.

In this Road dwell a certain People called *Augans*, towards the Mountains of *Balch*, they are a ſturdy ſort of People, and great Robbers in the Night-time. Theſe People, as the reſt of the *Indians*, have a Cuſtom to cleanſe and ſcrape their Tongues every Morning with a crooked Piece of a Root, which cauſes them to avoid a great Quantity of Flegm and Rheum, but not to vomit, as it doth the other *Indians*; nevertheleſs, when they come to eat, as ſoon as they have ſwallowed 2 or 3 Bits, their Lungs begin to ſwell, and they are conſtrain'd to go forth and vomit, after which they return again to their Victuals with a very good Appetite; ſhould they not do ſo, they would not live above 30 Years, and beſides, would be troubled with the Dropſie.

Caboul is a large City, the Metropolis of the Province of *Abouliſtan*, or *Caboul*, and hath 2 Caſtles well fortified; and becauſe ſeveral Kings have held their Courts there, and many Princes ſucceſſively have had it for their Portion, there are a great many Palaces in it: It lies in 33 D. of N. Lat. The Mountains about it produce Plenty of *Mirobalans*, which from thence the Eaſtern People call *Cabuly*, ſeveral ſorts of Drugs, and ſome Spices, which with the Iron-Mines in them yield a great Profit to the Inhabitants. In this Town they maintain a great Trade with *Tartary*, the Country of the *Usbecks*, and the *Indies*. The *Usbecks* alone ſell yearly in this Town above 60000 Horſes; and the *Perſians* bring hither great Numbers of Sheep and other Cattel, by which means they are much enriched. Wine is to be had, and Proviſions are cheap, though the Country about it is but cold and barren, unleſs in ſome Places which are ſhelter'd by the Mountains, being render'd little the more fruitful by the 2 Rivers that water it, and have their Source in the Mountains. From this Province, eſpecially, come the large Canes, of which they make Halbards and Lances, and they have many Grounds planted with them. The Inhabitants of the City and Province are moſt of them Heathens, and therefore in all Towns and Villages are many Pagods. They reckon the Months by the Moons, and with great Devotion celebrate the Feaſt called *Houly*, which laſts 2 Days, at the Full-Moon in *February*. At this Feaſt they are all cloathed in a dark Red, and after they have pray'd in the Temple, and made their Oblations, they ſpend the reſt of the Time in Dancing by Companies in the Streets, to the Sound of Trumpets, viſiting their Friends, and eating together every Tribe by it ſelf. The Great *Mogul*'s Revenue from this Country is 4 or 5 Millions yearly.

From *Caboul* the Road lies through *Bariabe*, *Nimela*, *Alibona*, *Taki*, *Kiemri*, *Chaour* and *Nouvchaar* to *Atek*, a City ſituate upon a Point of Land, where 2 Rivers meet together. 'Tis one of the beſt and ſtrongeſt Garriſons the Great *Mogul* has, and no Stranger is permitted to enter into it without a Paſs port from the King.

From hence you paſs to *Calapane*, and ſo to *Roupate*, *Toulapeca*, *Keraly*, *Zerabad* and *Imiabad*, to *Labors*. This City is the Metropolis of a Kingdom, built upon the River *Ravy*, which is one of the 5 Rivers, which deſcending from the Mountains, fwell the River *Indus*, and give the Name of *Peniab*, or 5 Rivers, to all the Region they run through. It lies in 31 D. 50 M. Lat. The River having a very flat Channel is fallen off from the Town above a League, and being ſubject to overflow, does a great deal of Miſchief in the Country. The City is large, and extends it ſelf above a Lg. in length. It was a very pretty Place when the Kings kept their Courts there, having many Moſques, publick Baths, Caravanſera's, Squares, Tanquies, Palaces and Gardens; but all theſe with the greateſt part of the Houſes are fallen to ruine, by reaſon of the exceſſive Rains, which have waſhed down a great Number of them. The Caſtle remains ſtill, for it is ſtrongly built. It hath 12 Gates, 3 towards the City, and 9 towards the Country, and the Palace, which is within it, hath not yet loſt its Beauty. There are a great many Pictures upon the Walls, repreſenting the Actions of the Great *Mogul* and his Forefathers, all pompouſly painted; and on one Gate is the Picture of the Crucifix, and on another the Virgin *Mary*, not out of any Kindneſs to the Chriſtian Religion, but to flatter the *Portugueſe*. The Inhabitants are moſt of them Gentiles, and ſo there are many Pagods in the Town, of which ſome are adorn'd well, and all are raiſed 7 or 8 Steps from the Ground.

The Province about it is one of the largeſt and moſt plentiful in the *Indies*, the Rivers that run through it rendring it moſt fertile, in Rice, Corn and Fruits: The Wine alſo is pretty good, and the Sugars the beſt of all *Indoſtan*. All ſorts of painted Cloaths, and other *Indian* Manufactures are wrought here; and it is ſaid, that this Province yields the *Mogul* a Revenue of 37 Millions yearly, which is a Sign of its great Trade and Fruitfulneſs. From *Labors* to *Agra* there is one continued Walk of Trees, called *Acly*-Trees, which have long and thick Branches, which cover the whole Way, though theſe Cities be 150 Lgs. diſtant one from the other. It was planted by King *Gehanguir*, but is not kept up.

At *Tanaſſar*, a Town in this Province, is a Convent of Gentiles, who are called *Nartia's*. They have a General, Provincial, and other Superiors, and ſay, that 'tis above 2000 Years ſince they were founded; they vow Obedience, Chaſtity and Poverty; they obey the leaſt Signal of their Superiors, and will not look a Maid or Woman in the Face. They live on Alms, which is begged for them every Day at the Houſes of the Gentiles of their Tribes, and will leave nothing till the Morrow. They make but one Meal a Day, and that is about Noon; and though they are never ſo thirſty or hungry, muſt not eat or drink till the ſame time next Day. They wear nothing on their Bodies, but a Cloth to cover their Privy-parts, which they bring up over their Heads like a Woman's Quoif. The main Point of their Inſtitution, is not to do to others what they would not have others to do to them; and they obſerve it even to the Beaſts, which they will never kill. If any Body beat them, they do not reſiſt; and if they are reviled, they make no Anſwer.

swer. They employ themselves wholly in Prayers and Reading, but conclude the Day with the Sun-set, for they never light a Candle. If any break their Orders, he is severely punished; and if they break their Vow of Chastity, they are expelled. They have above 10000 Monastries in the *Indies*. Some of them think it sufficient to worship God in Spirit, and have no Idols nor Pagods: There are also Religious Nuns of the same Order, who live very exemplarily.

Nuns.

The Road.

From *Lahors* the Way lies by *Menar-kan*, *Faty-abad*, *Sera-dakan*, *Sera-balour*, *Sera-dourai*, *Serinde*, *Sera-Mogoul*, *Sera-Chabas*, *Dirauril*, *Sera-Crindal*, and *Guienaour* to *Debly*, or *Gehanabad*.

Debly, or *Gehanabad*, described.

This City is a large Place, and stands near the River *Gemna*, which runs on both sides of it, and after it has passed *Agra* and *Kadione*, empties it self into the *Ganges*. It is divided into 3 Parts, or Towns: The first is almost entirely destroyed. The *Indians* say, 'tis very ancient, and that it was the Capital City of the States of the King *Porcy*, who opposed *Alexander* the Great. The *Indians* say, it had 52 Gates, and there are still remaining a large Stone-bridge, and a Way with lovely Trees, leading to the 2d Town by the Sepulchre of *Cha-Humayen*. The 2d Town was at the Conquest of it, beautified with many stately Sepulchres of the *Patan* Kings, and other Monuments, which rendred it a very lovely Place; but *Cha-Jehan*, the Father of *Aureng-Zeb*, the present King, demolished it, and left nothing but a Pyramid or Obelisk of Stone, which by its unknown Characters shews a great Antiquity. The 3d Town is joined to the Ruines of the 2d, and was built by *Cha-Jehan* out of the Ruines of it, and from him it had its Name of *Gehan-Abad*. This City lies in an open Champain, upon the Bank of the River *Gemna*, and is encompassed with a single Wall. All the Houses of particular Men consist of great Inclosures, in the Midst of which is a Place for Lodgings. The greatest part of the Lords have their Houses without the City, for the Conveniency of Water, for the King chuseth to keep his Court here rather than at *Agra*, for the Conveniency of Water. As you enter into *Gehanabad* from *Debly*, you come into a long and broad Street, which has Vaults on each side, where the Merchants keep their Shops. This Street ends in the great Piazza where the King's Palace stands: There is another Street which leads up to the King's Palace, where the Merchants live who keep no Shops. The Fortress of it is half a Lg. in Circuit, and has good Walls, with round Towers in them, and Ditches about them full of Water. The King's Palace, where are all the Ensigns of Royalty, is in this Fort. There is a Place by the Water-side for the fighting of Elephants, and other Exercises; and nearer the Town is a large Square, where the Markets are kept, the Puppet-players, Jugglers and Astrologers shew their Tricks, and the *Raja's*, who are in the King's Pay, keep guard, encamp, and perform their Exercises. The King's Palace is encompassed with Walls of fair, red, cut Stone, with Battlements. The Gate and first Court have nothing of Magnificence, for the great Lords may enter into it with their Elephants. Out of this Court you go through a long and large Passage, with fair Portico's on both sides, into a great Court, where the *Omra's*, *i. e.* the great Lords of the Kingdom keep guard in Person, having their Lodgings round about the Court, and their Horses tied at the Doors. From this 2d Court you pass into a 3d, through a great Portal, where on the one side is the King's Wardrobe, out of which he bestows the *Calaat*, or whole Habit of a Man, which he gives to any Stranger or Subject in Honour to them; the Place where the Drums, Trumpets and Hautboys are laid, which are sounded when the King goes upon the Judgment-Seat; and right forward is the *Divan*, where the King gives Audience and Sentence. In the middle of the Hall is the Throne where the King sits, erected upon a kind of a Theatre. It has a little Bed with 4 Columns, a Canopy, Back-piece, Bolster and Counterpoint, all embroider'd with Diamonds, and cover'd with a Cloth of Gold, when the King sits on it. Below the Throne is a Place 24 Foot square, encompassed with Balusters sometimes of Silver, and at other times Gold-Plates. At the 4 Corners of it sit the 4 Secretaries of State, who are the only Advocates in all Causes. Many Lords stand by the Balustrade, and some of the greatest, with his Children, stand by the Throne. While the King is on his Throne, none may stir out of the Palace, nor any that have Business come nearer than the Channel in the middle of the Court, till they are called, no not Ambassadors themselves. From the *Divan* the King passes over a Terrass, where the River is to be seen, into the *Haram*. Upon the Left-hand of the Court stands a little Mosque, neatly built, having a *Cupulo* cover'd with Lead perfectly gilt. Hither the King goes every Day to hear Prayers, except *Fridays*, when he goes to the Great Mosque, which is a very fair one, and raised above the Houses of the City. On the Right-side of the Court are the King's Stables, which are full of stately Horses, the worst of which stands the King in 3000 Crowns, and some cost 10000. On the River the King has several small Brigantines to take his Pleasure in.

The Divan.

The Throne.

Four Secretaries.

A little Mosque.

From *Debly* you travel to *Badelpoura*, and so by *Pelvel-ki-sera* and *Cotki-sera*, to *Chike-sera*, where is one of the greatest Pagods of the *Indians*, together with an Hospital for Apes, as well for those that are bred thereabouts, as for those that come from the Neighbouring Parts, which the *Banians* are very careful to feed. The Pagod is called *Matura*. It was formerly in greater Veneration than now it is; and the Reason is this, because the River washing the Walls thereof, was convenient for the Washings of the *Banians*, before they went to their Devotions; but since the River has left it above a Lg. many have deserted, but still it wants not some Resort of the *Indians*, who always bring with them some Food for the Apes.

The Road.

Chike-sera described.

Between this Place and *Goodkisera* is but 5 Lgs. and you come to *Agra*. This City lies in 27 D. 31 M. of Lat. and in a Sandy Soil, which causes extream Heat. It is the biggest City in *India*, and was formerly the Residence of their Kings, till *Cha-Jehan* bearing the great Heats uneasily, sought a more temperate Air, and so removed to *Gehanabad*. The Houses of great Persons are fair and well built, but the Houses of the Meaner sort are as plain as in other Cities of *India*, being low and thatch'd. It is not very populous, unless it be when the Court is there, but at that time it is throng'd, the King being attended with an Army for his Guards, and a great Number of *Raja's*, *Omra's*, *Mansepdars*, and other Nobles, with their Retinues, besides Merchants and Tradesmen that follow the Court for Trade. The People are most of them *Mahometans*, and these have all the Power in their Hands, though there are a considerable Number of *Christians*, some few *Heathens* and *Persies*. The *Dutch* have a Factory here, but the *English* have left theirs, because it did not turn to Account.

Agra described.

Christians.

The most remarkable Things in *Agra*, are the King's Palace, and some Monuments near and about the City. The King's Palace is in the Castle, which is begirt with a Wall of Stone and Brick, terrassed in several Places, which is 20 Cubits high. Between the Castle and the River is a large Place left on purpose for the Fighting of Elephants, for the King's Diversion. It is near the Water to allay the Fury of the conquering Elephant, who presently returns to himself, if he be but 2 or 3 Foot deep in the Water. Before the Palace is a wide Piazza: It contains 3 Courts, adorn'd with Porches and Galleries, that are painted and gilt; nay, some Things are cover'd with Plates of Gold. Under the Galleries of the first Court are the Lodgings for the King's Guards; in the 2d are the Officers Lodgings; and in the 3d, the stately Apartments of the King and his Ladies. Out of these, the King goes commonly to a lovely *Divan*, which looks to the River, to please himself in seeing Elephants fight, his Troops exercise and play upon the Water, or in the open Place. By this Palace stand 25 or 30 very large ones in a direct Line, which belong to the Princes and other great Lords of the Court, and all together afford a most delightful Prospect to those who are on the other side of the River.

The King's Palace.

The Court.

A Divan.

Besides, these Palaces the Beauty of *Agra* consists in the *Caravansera's*, which are above 60 in Number, and some of them have 6 large Courts with their Portico's, which lead to very commodious Apartments, where the Merchants, Strangers have their Lodgings. There are above 800 Baths in the Town, and a great Number of Mosques, of which some are Sanctuaries. There are many magnificent and stately Monuments in and about *Agra*, for several Great Men, and especially the rich Eunuchs belonging to the King's *Haram*, are ambitious to build their own in their Life-time, and to erect Monuments to the Memories of their Forefathers, and this the Great Mogul encourages them in, that he may keep his Money in his Kingdom, and divert them from going to *Mecca*, whi-

Caravanseras.

800 Baths.

Eminent Monuments.

whither their blind Devotions often leads them to ſpend it. The 2 moſt eminent Monuments are, that which King *Gehanguir* cauſed to be built for *Ecbar*, his Father, upon an Eminence in the Town. It ſurpaſſes in Magnificence all thoſe of the G. Seignior's; but the faireſt of all is that which *Sha-Jehan* erected in Honour of one of his Wives, called *Tadge-Mehal*, whom he tenderly lov'd, and whoſe Death had almoſt coſt him his Life. It was built by all the moſt able Architects of the *Indies*, whom the King called together in a Council to contrive it, and having ſettled Salaries upon them, order'd them to ſpare no Coſt to make it the fineſt *Mauſolæum* in the World, if they could. The *Indians* ſay, 'twas 20 Years in building, that 20000 Men were always employ'd about it, and 'twas finiſh'd at length to Satisfaction. It ſtands on the Eaſt ſide of the City, by the River ſide. It is a kind of a Garden, with Compartments like our Garden-Plots, but the Walks, inſtead of Gravel, are black and white Marble. You enter into it through a large Portal, and on the Left-hand is a fair Gallery, which looks toward *Mecca*, and in which are 3 or 4 Niches, wherein the *Mufti* comes at certain Hours to pray. About the middle of the Garden are 3 great Platforms, one raiſed above another, with 4 Towers at the Corners of each. On the Top is a *Cupolo*, cover'd within and without with black Marble. Under it is an empty Tomb (for the Sultaneſs is buried under the loweſt Platform) adorn'd with Tapeſtries, Candles, and other Ornaments, where there are always *Moullahs* attending to pray. The Sepulchres of the Eunuchs have only one Platform, with 4 little Chambers at the 4 Corners.

Tadge-Mehal, the fineſt in the World, deſcribed.

The Apparel of the *Indians*.

The *Indians* are pretty uniform in their Apparel, only the *Mahometans*, or *Moors*, diſtinguiſh themſelves by a particular ſort of Coif, or Head-Attire, but in all Things elſe they are cloathed as the reſt. Their Breeches are commonly of Cotton-Cloth, and ſometimes of Silk, and come down to their Legs or Ankles. Their Shirts hang over their Breeches, as the Faſhion is all over the *Levant*, and open before. In cold Weather they wear over their Shirts an *Arcalick*, or Juſtico, of painted Stuff, quilted with Cotton, and pink'd, and over that a *Caba* of white Cotton Cloth, for Lightneſs and Neatneſs; but if it be hot they lay aſide their *Arcalick*. They uſe but one Girdle, and that is of white Cloth. None uſe the lovely Girdles of *Perſia*, but the moſt wealthy, and Perſons of Quality. In cold Weather they wear a Veſt, called *Cadeby*, lined with Sables. At all Times when they go abroad they wear a *Chal*, which is like a Scarf of ſeveral Colours. Their Turban is commonly little, and the *Mahometans* were it always white. The Rich have them of ſo fine Cloth, that 25 or 30 Ells of it put into a Turban will not weigh 4 Ounces. They are made at *Bengal*, and are dear. They wear their Hair for Ornament, contrary to the *Mahometans*, who all ſhave their Heads. They uſe no Stockings, but put their Shooes on their naked Feet, which are of *Maroquin* or Turky-Leather, like Slippers; only the *Banians* wear Heels to their Shooes, that they may ſtir more freely in their Buſineſs. The rich *Banians* cover theirs with Velvet, embroider'd with Silk-Flowers, but the Poor are ſatisfied with red Leather.

Hair worn.

The *Mogul* Women are cloathed almoſt like the Men, but the Sleeves of their Smocks reach no lower than the Elbow, that they may have room to adorn their Arms with Carkanets and Bracelets of Gold, Silver and Ivory, or ſet with precious Stones, as they do alſo the Small of their Legs. The Smocks of the *Indian* Idolatrous Women reach down only to the Middle, as does the Waſtcoat of Sattin, or Cloth, which they wear over it, becauſe from the Waſte downward they wrap themſelves up in a Piece of Cloth, or Stuff, that covers them to the Feet like a Petticoat. For Shooes they have high Pattins. They wear little flat Rings of Gold or Silver in their Ears, with Engravings upon them, and adorn their Noſes with Rings put through their Noſtrils. They wear Rings alſo on their Fingers for Ornaments, and have generally one with a Looking-Glaſs ſet in it an Inch diameter, to ſee themſelves. If the *Indian* Women are Idolaters they go bare-fac'd, if *Mahometans* they are veil'd. In ſome Countries of the *Indies* both Men and Women go naked to the Waſte, and cover only themſelves from thence to the Knees.

Womens Cloaths.

Ear and Noſe Rings.

At *Agra* they are curious in breeding up Beaſts to fight for Pleaſure, *viz.* He-goats, Weathers, Rams, Cocks, Quails, Stags and Antilopes, for ſuch as cannot reach Lions and Elephants, are dextrous Fowlers and Hunters.

Beaſts bred for fight.

Pictures alſo in this City are drawn with Art, but being for the moſt part laſcivious, are rarely bought up by *Europeans*.

They have a Way in this Town of working in Gold, upon Agat, Chryſtal, and other brittle Matters, which our Goldſmiths and Lapidaries have not.

CHAP. III.

The Road from Agra *to* Patna *and* Daca, *Cities in the Province of* Bengal.

The Road.

LEaving *Agra* in your Journey to *Bengal*, you come firſt to *Beruzabad*, then to *Serail Morlieles*, and ſo through *Serail Eſtanja*, *Serail-Haimal*, and *Serail Sekandera*, to *Sanqual*. A Lg. from hence you paſs over the River *Sangeur*, upon a Stone-Bridge, where thoſe that are paſſing from *Bengal*-ward to *Surat*, may leave the Road to *Agra*, and ferrying over *Gemma*, ſhorten their Journey 10 Days, but ſince ſome of that Way is very ſtony, Travellers generally chooſe to go the Way by *Agra*.

From this Bridge you go on by the Inn *Cheyourabad*, and the Towns *Serail Chajeada*, and *Serail Atakan* to *Aureng-abad*.

Aureng-abad deſcribed.

This is a great Town, the Capital of a Province, but it has no Walls, the Governour, who is commonly a Prince, has his Reſidence there; and *Aureng-Zeb* commanded there, as he did at *Candich*, in the Reign of his Father: His firſt Wife (whom he loved dearly) died in this Town, and as a Monument to her, he erected a lovely Moſque, covered with a Dome, and beautified with 4 Minarets, or Steeples. It is built of white poliſh'd Stone, which looks almoſt like Marble. It has ſeveral pretty Moſques, Inns and Baths. The Buildings are for the moſt part of Free-ſtone, and pretty high; before the Doors grow a great many Trees in the Streets; and the Gardens are well cultivated and pleaſant, affording the Refreſhment of Fruits, Grapes and Graſs-plats. They have Sheep without Horns, that are ſo ſtrong, that being bridled and ſaddled, they'll carry Children of 10 Years of Age, where-ever they pleaſe. It is a good trading Town, and well peopled, with excellent Ground about it. It took its Name, by which it is now called, from the preſent King *Aureng-Zeb*, who overcame Sultan *Sujah* his Brother, who was Governour of all the Province of *Bengala*, in that Place.

Moſques, Streets and Gardens.

Sheep ridden.

From hence you paſs to *Alinchan*, and 2 Lgs. farther croſs the River *Ganges*, which, though famous in Hiſtory, is ſo ſmall from *March* to *June*, or *July*, when the Rains fall, that it will not bear a Boat. The Water being drank, cauſeth the Gripes; and therefore the *Hollanders*, that live upon the Banks of it, never drink of it till they have boiled it; but the Natives are ſo accuſtomed to it, that the King and Court drink no other, becauſe they account it lighter than any other Water. The Heathen *Indians* account the Water of this River to be Sacred, and have many Pagods by it the faireſt in the *Indies*; ſo that it may be ſaid, that here Idolatry is moſt triumphant. The 2 chief Pagods are at the Towns of *Jaganat* and *Benarou*. Nothing can be more magnificent than they are, by reaſon of the great Quantity of Gold and many Jewels, with which they are adorned. In theſe Pagods they keep their Feſtivals many Days together, and Millions of People repair thither from all Parts of the *Indies*, where they carry their Idols in triumph, and act all manner

Ganges deſcribed.

Its Water Sacred.

of Superſtitions by the Encouragement of the *Bramins* who are numerous thereabouts, and find much Profit by it. The *Ganges* is full of pleaſant Iſlands, covered with lovely *Indian* Trees, ſo that it is moſt delicious ſailing upon it. In theſe Iſlands, and ſome other Places of *Bengal*, is a Bird called *Meina*, whoſe Colour is like a Blackbird, but as big as a Raven. It will learn to ſpeak like a Starling, and imitates the Neighing of an Horſe exactly. This River having received an infinite Number of Brooks and Rivers from the N. E. and W. into it, diſcharges it ſelf by ſeveral Mouths into the Gulf of *Bengal*, which is 800 Miles over, and reaches from the 8 D. of Lat. to the 22th.

The Iſlands in it.

Meina, a talking Bird.

Having paſſed *Ganges*, you arrive at *Halabas*, a great City, built upon the Point of Land, where *Ganges* and *Gemma* meet.

Halabas deſcribed.

It is the chief Town of a Province which bears the ſame Name. It was for a long time one of the Bulwarks of the Kingdom of the *Patans*, and is the ſame Town which *Pliny* calls *Chryſobacra*. It was ſubdued to the Kingdom of the *Mogul* by King *Ecbar*, who built a ſtrong Citadel in it begirt with 3 Walls, of which the outmoſt is of very hard red Stone. It is adorned with a very ancient Obelisk, above 60 Foot high, that has many Inſcriptions, but the Letters are not legible. The King has a fair Palace here, and under it are certain arched Places, where the Pagods of *Adam* and *Eve* are kept, whoſe Religion they pretend to follow. Hither at certain times come an incredible Number of Pilgrims from all Parts of the *Indies* to viſit thoſe Pagods, becauſe they ſay *Adam* and *Eve* were created here; but before they approach the Place (which they eſteem holy) they all waſh themſelves in the *Ganges*. The Province of *Halabas* pays the *Mogul* yearly 14 Millions. At *Halabas* there are uſually Troops of *Faquirs*, who call themſelves a Religious Order among the *Indians*, and many of them practiſe the Life of Penitents, forbearing to eat many Days, ſtanding conſtantly upon a Stone for ſeveral Weeks, or Months, holding their Arms a-croſs over their Heads as long as they live, and burying themſelves in a Pit for a certain Time, but others wander up and down the Countries like Gypſies, committing Robberies, and all ſorts of Rogueries. Some of them will threaten to kill themſelves, (and ſome have done it) unleſs the *Banians* will give them what they demand, and ſo obtain conſiderable Sums of them, for the *Banians* abhor Murder, and will give any thing to prevent it. The Penitents are extreamly honoured by the Gentiles, and the Rich think that they draw down Bleſſings upon themſelves when they give to them.

An Obelisk.

Faquirs.

The Road.

From *Halabas* you paſs over a River, where ſtands a *Deroga* on each ſide, to take Notice of what Goods are tranſported (there being due for every Waggon-Load 4 Roupies, and every Coach one) and ſtop all that paſs without a Paſs-port, and then go through *Yakedel-ſera*, *Sadeu-ſerail* and *Bouraki-ſera*, to *Benarau*.

Benarau deſcribed.

This is a large City, and handſomely built, the moſt of the Houſes being of Brick or Stone, and higher than in any other *Indian* City, but the Streets are narrow. There are many Inns in the Town, and among the reſt one very large and handſomely built. In the midſt of the Court are 2 Galleries, where are to be ſold Calicuts, Silks, and other Merchandice, and under them are Cellars, where the Workmen live. All the Goods are ſtamp'd with the King's Seal before they are expoſed to Sale. The *Ganges* runs by the Walls on the S. ſide, and in it is one of the principal Pagods of the Idolaters. About 500 Paces from the City, Northward, there is a Moſque, where are many *Mahometan* Sepulchres, encloſed with a Wall'd Garden, but there are Holes through the Walls half a Foot ſquare, for Travellers to look into them. The moſt conſiderable is ſaid to be that of one of the Kings of *Boutan*. It is a 4 ſquare Pedeſtal, 40 Paces wide, and in the midſt of it a Pyramid, 32 or 35 Foot high, with a great Bowl at the Top. All the Fronts are full of Figures of Animals cut in Stone: It was once very high, but within 50 Years it is ſunk above 30 Foot into the Earth.

A Pagod-Moſque.

The Road.

From *Banarou* you paſs on to *Baterpour*, and ſo by *Satragur-ſera* to *Maniarkr-ſera*. In the Road from thence you foard 2 Rivers, called *Carnaſar-ſou* and *Saode-ſou*, and come to *Gourmabad*, which ſtands upon the River *Goudera-ſou*, which you croſs over a Stone-Bridge to *Sanſeron*. This City ſtands at the Foot of certain Mountains, near which is a great Lake, and in the middle of it a ſmall Iſland, with a fair Moſque built upon it, wherein is the Sepulchre of a *Nabad*, or Favourite, called *Selim-Kan*, who built it for himſelf when he was Governour of the Province. There is a fair Free-Stone Bridge to croſs over into the Iſland, and on the ſide of the Lake is a great Garden, in the middle of which is a fair Sepulchre of the ſaid Governour's Son, who ſucceeded his Father in the Government of that Province.

Sanſeron deſcribed.

Leaving *Sanſeron*, you ferry over the River *Sonſou*, which deſcends from the Northern Mountains. Here all Merchandice pays a certain Toll, and ſo you go to *Daoud-Nagarſera*, and ſo by *Halva-ſera*, and *Agaſera*, to *Patna*. This is one of the biggeſt Cities of *India*, being 2 Lgs. long, and ſtanding on the Banks of *Ganges*, Weſtward, but the Houſes are no better than in the greateſt part of the other Cities, being cover'd with *Bambou*, or Straw. The *Dutch* Company have an Houſe there, becauſe of their Trade in Salt-Peter, which they buy up here, and refine at *Choupar*, a great Town upon the *Ganges*, 10 Lgs. diſtant from *Patna*. The People of this Town having a *Mimbachi*, or Colonel of 1000 Foot, ſlain for Sodomy by his Boy, whom he had forced, juſtified the Fact againſt the Governour, ſo that he durſt not puniſh him for the Murther, but diſmiſſed him after 6 Months Impriſonment.

The Road.

Sodomy.

From *Patna* you ſail down the River to *Daca*, paſſing by ſeveral Towns, where you may lodge a-nights, viz. *Sera-Beconcour*, which is beyond the River *Pomponſou*, which comes from the S. falls into the *Ganges*, *Sera-Enjah*, between which and the City *Monger* 4 Rivers, *viz.* The *Kaoa*, *Chanan*, *Erguga* and *Aquera*, fall into the *Ganges* on both ſides.

The Road.

Leaving *Monger* you ſail by the Mouth of the *Ganges*, a large River, and arrive at *Zangira*, beyond which the *Ronova*, *Tae* and *Chanan* empty themſelves into the *Ganges*, and after you arrive at *Baquelpour*, and paſſing by the River *Kasare*, you come to *Pongangel*, which lies at the Foot of certain Mountains, which come down to the *Ganges*. Beyond this Place you meet the River *Mart-Nardi*, and by it ſail to *Rage-Mehale*, a City upon the Right-hand of *Ganges*. If you go by Land to it, the High-way is pav'd with Brick for a Lg. or 2 to the Town. Formerly the Governours of *Bengal* reſided here, partly becauſe 'twas a Place of great Trade, and partly becauſe 'tis an excellent Country for Hunting; but the River having left the City above half a Lg. as well as to keep the King of *Aracan* in awe, and ſuppreſs the *Portugueſe Banditi*, who have retired to the Mouths of *Ganges*, and do make Excurſions as far as *Daca* it ſelf, the Governour and Merchants are remov'd to *Daca*, which at preſent is a large City and full of Trade.

Ganges.

Rage-Mehal deſcribed.

The Road.

From this Town in Sailing, you come firſt to *Denapour*, then to *Toutipour*, where there are abundance of Crocodiles in the River, as alſo at *Aceras*, which is in the Way. The vulgar Report is, that a Musket-ſhot will not pierce the Skins of the Crocodiles, but upon Trial it is found falſe: Then you ſail to *Douloudia*, and paſſing the Mouth of the River *Chativor*, you come to *Dampour*, and ſo to *Jatrapour*, near which the *Ganges* divides it ſelf into 3 Arms, and then by *Bagamara* and *Kaſiasa*, having paſs'd the Mouth of the River *Laquia*, 2 Lgs. before you arrive at *Daca*.

Crocodiles.

This Town runs altogether in Length, becauſe every one ſtrives to have his Dwelling by the ſide of *Ganges*. 'Tis 2 Lgs. long, but the Houſes are but ſorry Huts, made of *Bambou's*, and daub'd over with Earth. The Governour's Palace is a Place encloſed with high Walls, in the midſt of which is a pitiful Houſe built of Wood. He generally lodges in Tents, which he cauſes to be ſet up in a great Court of that Incloſure. The *Hollanders* have here a very fair Houſe, which they have built for the Safety of their Goods, and the *Engliſh* have another, but not ſo handſome. The Church of the *Auguſtin Friars* is all of Brick, and is a very comely Pile.

Daca deſcribed.

CHAP.

CHAP. IV.

Of the ſeveral Roads from Surat *to* Golconda, *and ſo to* Maſlipatan, Gandicot *and* Golconda.

The Road.

THERE are ſeveral Roads from *Surat* to *Golconda*, as by Sea by *Goa* and *Viſapour*, and by *Agra*. Theſe 2 Roads by Land meet at *Dultabat*, and therefore I will ſpeak firſt of the Road from *Surat*, as the moſt common, and then of that by *Goa* and *Viſapour*.

From *Surat* you travel by *Cambari*, *Barnoli*, *Beara*, *Navoupour*, where grows the beſt Rice in the World, which ſmells like Musk, *Rinkula*, *Pipelnar*, *Nimpour*, *Patane*, *Seccura*, *Bequela* and *Diſcon* to *Dultabat*. This Town is one of the beſt Fortreſſes in the Kingdoms of the Great Mogul, being ſeated upon a Mountain every Way ſteep, the only Way being ſo narrow, that but one Horſe or one Camel can go at a Time. The Town ſtands at the Foot of the Mountain, very well Wall'd with a natural ſmooth Rock, and has Battlements and Towers mounted with Cannon, but it is the Citadel on the Top of the Hill that is accounted the main Strength of it, for in it are a great many excellent Pieces of Cannon, and the Cannoneers are generally *Engliſh* or *Hollanders*.

Dultabat deſcribed.

The Road.

From *Duitabat* you go to *Aurenabat*, before deſcrib'd, and ſo through *Pipoli*, *Aubar*, *Guiſemner*, *Aſti*, *Sarver* and *Leſona*, to *Nadour*. Here you croſs a River which runs into the *Ganges*, and muſt pay for every Waggon-Load of Goods 4 Roupies, and have a Paſs from the Governour.

Nadour.

From *Nadour* you travel to *Patouta*, and ſo by *Kakeri*, *Satapour*, *Satanaga*, *Satanagar*, where you begin to enter upon the Territories of the King of *Golconda*, *Melvari*, *Garballi*, and ſo to *Golconda*.

The Road from Goa.

The other Road through *Goa* and *Viſapour* to *Golconda* lies thus: You may go from *Surat* to *Goa* partly by Land, and partly by Sea; but the Road being very bad by Land, generally Travellers go by Sea, and hiring an *Almadier*, which is a Bark with Oars, ſail by the Shore to *Goa*, and ſo they paſs by theſe Towns, convenient to lodge in, or Victual at, *viz. Daman*, *Baſſain*, *Chaoul*, *Daboul*, *Rejapour* and *Mingrela*, to *Goa*. From *Surat* to *Goa* is 240 Lgs. The great Danger in this Coaſting Voyage is of falling into the Hands of the *Malabars*, or *Indian* Pirates, who are violent *Mahometans*, and very cruel to the Chriſtians, whom they put to barbarous Tortures, if they take them, to make them ſeek their Ranſom the ſooner. Theſe *Malabars* ſometimes carry 200, and ſometimes 250 Men, and ſail together in Squadrons of 10 or 15 Barks to attack a great Ship, for they care not a Ruſh for the great Guns. They come aboard on a ſudden, and caſt ſuch a Quantity of Pots of artificial Fire upon the Decks, that if there be not a ſpeedy Remedy apply'd, they'll preſently do a world of Miſchief. Generally our Sea-men, knowing the Cuſtom of theſe Pirates, when they come within Sight ſhut up the Scuttles, and fill the Deck with Water, to hinder the Fire-pots from doing Execution.

The Malabar Pirates.

Goa deſcribed.

Goa lies in 15 D. 32 M. Lat. in an Iſland 6 or 7 Lgs. about, upon the River *Mandoua*, 10 Lgs. from the Mouth of the River. This Iſland abounds in Corn and Rice, and bears ſeveral ſorts of Fruit, as Manga's, Anana's, *Adam's* Figs, and Coco's, but all of them are inferior to a Pippin. The Port of *Goa* is very commodious. The City is very large, and the Walls are of good Stone. The Houſes for the moſt part are very magnificently built, eſpecially the Vice-Roy's Palace, but being cloſely inviron'd with Hills, the Air is made unwholeſom, and ſo exceſſively hot, that the Inhabitants are not ſo many as otherwiſe they would be. Beef and Pork are the ordinary Diet, and they have ſtore of Poultry and Pigeons, but Fiſh is ſcarce, though they are near the Sea. They have abundance of all ſorts of Sweet-meats, and feed upon them very much, and plenty of good Water.

The Port.

Unwholeſome Air.

The Proviſion.

Before the *Dutch* brought down the Power of the *Portugueſe* in *India*, there was nothing to be ſeen at *Goa* but Magnificence and Riches; they made vaſt Profits without any Loſs, and every Man was a Trader, except the Governour; but now the *Dutch* having got the Trade every where out of their Hands, though they are ſtill Maſters of *Goa*, they have loſt their Mines of Silver and Gold, and are fallen from their former Splendour. The Natives of the Country, whom they call *Canarins* or Blacks, are not permitted to bear any Offices among the *Portugueſe*, but only in reference to the Law, *viz.* as Advocates, Sollicitors, or Scriveners, and they keep them very much under. If one of them happen to ſtrike a white Man, or *European*, there is no Pardon for him, but his Hand muſt be cut off. The *Spaniards* and *Portugueſe* make uſe of them to tranſact their Buſineſs, and receive their Money, and many of them by that Means are grown very rich, and have many Slaves to attend them in good Habits, but they all, both Maſters and Servants, go Bare-foot; for the *Portugueſe*, though they have been offered great Sums to ſuffer them to wear Hoſe and Shooes, yet will not allow them. They are very couragious, and good Soldiers, and quick and apprehenſive at learning of Sciences, but they are Idolaters, and worſhip ſeveral ſorts of Idols, which they ſay are the Reſemblance of ſeveral that have done good Works, to whom they give Honour by adorning their Pourtraitures. There are ſome of thoſe Idolaters that worſhip Apes, and have built Pagods to theſe Beaſts.

The *Portugueſe* command it.

The Servitude of the *Indians*.

Idols how worſhipped.

In the Iſland of *Salſete*, there was a Pagod whom the Idolaters kept in a Cheſt the Bones and Nails of an Ape, that had been ſerviceable to their Anceſtors, by bringing Intelligence when any Prince, their Enemy, ſought their Ruine. The *Indians* came in Proceſſion from ſeveral Places to this Pagod, and made Offerings to it; and when the Clergy of *Goa* took away the Tomb, they offered a great Sum of Money for their Reliques, but the Clergy not thinking ſuch groſs Idolatry ſufferable, cauſed it to be thrown into the Depth of the Sea.

The River of *Mandoua* alſo is had in as great Veneration by the *Bramins*, and the other Gentiles, as *Ganges*, and at certain Times and upon certain Feſtivals they flock thither from ſeveral Parts to perform their Purifications. The Town hath good Walls with Towers and great Guns, and the Iſle is Wall'd round with Gates toward the Land, to hinder the Slaves from running away. The *Portugueſe* have a Vice-Roy reſiding here, with an Arch-biſhop, Inquiſitor-General, and an abundance of Clergy-men, as *Dominicans*, *Auſtin-Friars*, *Franciſcans*, *Bare-foot Carmelites*, *Jeſuits* and *Capuchins*. The *Carmelites* are ſeated in a fine Air and healthy Ground. The *Jeſuits* have a ſtately College, which being dedicated to St. *Paul*, gives them the Name of *Pauliſts*, with a Seminary, Profeſſor's Houſe, Noviciate, and an Houſe called, *The Good Jeſus*, where they paint admirably. There are alſo many fair Churches and beautiful Palaces. In this City lies buried Mr. *Alberquerque*, who conquer'd it for the *Portugueſe*, and S. *Francis Xaverius*, the famous *Indian* Miſſionary. The Hoſpital of *Goa* was formerly the moſt famous in all *India*, both in regard that the Revenues were very great, and the ſick Perſons were very carefully look'd after, but ſince the Change of Goverment, there is but very bad Accommodations, and ſeveral *Europeans*, who have been put in, have never come out, but in their Coffins; but of late they have found out a Way to ſave ſome by frequent Blood-letting, ſpare Diet, and drinking Cow-piſs.

Mandoua.

Popiſh Monks and Friars.

Alberquerque. *Xaverius*.

From *Goa* you go to *Bicholi*, which is upon the Main-Land, and ſo to *Viſapour*.

This City is the Metropolis of a Kingdom of the ſame Name, whoſe King is the moſt potent of all the Kings of *Decan*, and is therefore called King of *Decan*, having the 2 *Naiques* of *Madura*, whoſe Territories reach to Cape *Comori*, and of *Tanjaher*, who has ſeveral Towns on the Coaſts of *Coromandel* tributary to him. It is a great ſcambling City, above 5 Lgs. in Circumference, fortified with a double Wall, a great many Cannons mounted, and a flat bottom'd Ditch. The King's Palace is a vaſt one, but ill built, and the

Viſapour deſcribed.

The King's Palace. Access to it is very dangerous, in regard there are an abundance of Crocadiles in the Ditch with which it is encompassed, but in the City it self there is nothing remarkable, as to the publick Edifices or Trade, tho' in the Suburbs, which are large, there are many Gold Smiths and Jewellers. The King of *Visapour* hath 3 good Ports in his Dominions, *Rajapour*, *Dabouls* The Ports. and *Carapatan*. This last is the best, having 14 or 15 Fathom Water near the Land, and upon the Top of the Mountain adjoining a Fort with a Spring of Water in it. It lies about 5 Days Journey to the N. of *Goa*. The Kings of *Visapour* and *Golconda* were formerly tributary to the Great Mogul, but now they are absolute of themselves. The present King of *Visapour* is The present King. only the adopted Child of the former King, who died without Children. He succeeded in his Minority under the Regency of the Queen, but being disturb'd by the Revolt of *Raja Sevagi*, the Son of the late King's Captain of his Guards, he was forced to come to a Composition with him to establish himself, and so lost all the Coasts of *Malabar*. The great Market, where the King of *Visapour* sells his Pepper, is at *Rabaque*.

Mingrela described. In the Territories of *Visapour* is *Mingrela*, a large Town, extended half a Lg. in Length upon the Sea-Coast. It is one of the best Roads in all *India*, where all the Vessels that come from *Batavia*, *Japan*, *Bengal*, *Zeilon*, and those that are bound for *Surat*, *Ormus*, the *Red-Sea*, *Balsara*, &c. both coming and going come to Anchor, and take in Provisions, because there is both excellent Water and Rice. This Town is also Of Cardamums. very famous for Cardamums, which the Eastern People esteem the best of all Spices, but not being to be had in any other Country, is very scarce and dear. There is also made great store of coarse Calicuts, that are spent in the Country, and great Quantities of coarse Matting, which serves for packing up of Goods. The Dutch Factory. *Hollanders* have a Factory for Trade and Provisions here to Victual their Ships when they block up *Goa*, which is 8 Months in the Year.

Golconda described. From *Visapour* you pass to *Golconda*, which is 400 Lgs. cross the Promontory. The most powerful of the Kings of *Decan*, next to the King of *Visapour*, is the King of *Golconda*. His Kingdom is bounded on the E. by the Sea of *Bengal*, on the W. by the Mountains of *Orixa*, on the S. by *Bisnagar* and *Narsingue*, which belongs to the King of *Visapour*, and on the W. by the Empire of the Great Mogul. This whole Kingdom, take it in general, is a good Country, abounding in Corn, Rice, Cattel, Sheep, Poultry, and other Necessaries for Human Life; and because there are a great many Lakes, there are also many Fish, and among others a sort of Smelt, which has but one Bone in the middle, which is most delicious Food. The Lakes, being caused by Nature, and lying in Places somewhat raised, contribute much to the Fertility of the Country, because, after the Rainy Seasons, they let them down by Sluces into the adjacent Fields.

The City continued. The Capital City of this Kingdom is *Bagnagar*; the *Persians* call it *Aider-abad*, but the most common Name is *Golconda*. It is about 14 or 15 Lgs. from *Visapour*, situated in 17 D. 10 M. Lat. in a very long Plain, hem'd in with little Hills at some Distance from it. The Air is very wholesom, and a great River washes the Walls of it on the S. W. side, which near to *Masliparan* falls into the Gulf of *Bengal*. The City is well built and full of Windows: In entring into Suburbs. it, you must first pass through a large Suburb, but the Houses are only built of Earth, and thatched with Straw, so low and ill-contrived, that they can be reckoned little better than Huts. It is at least a Lg. in length, and in it dwell all the Merchants, Brokers, Handicrafts-men, and all the meaner Sort of People. These Men are allowed to go into the City from 10 or 11 in the Morning, till 4 or 5 in the Afternoon to trade with the Foreign Merchants, and then they return to their Houses. In these Suburbs are 2 or 3 fair Mosques, which serve for Inns for Travellers, and several Pagods in the Neighbourhood. The Way to the Fortress of *Golconda* lies through these Suburbs. Out of them you go into the City over a beautiful Stone-Bridge, and enter into a large Street that leads to the King's Palace. On the Right-hand are some Houses of the Lords of the Court, and 4 or 5 Inns 2 Stories high, with fair Halls and large Chambers to lett in the fresh Air. At the End of this Street is a large Piazza, on which the Palace fronts, and in the Middle of the Building is a Balcony, wherein the King sits, when he pleaseth to give Audience to the People. The Gate of this Palace stands not upon the Piazza, but upon another near adjoining. Through it you enter into a large Court surrounded with Portico's, under which lie the King's Guards. Out of this Court you pass into another built after the same Manner, and surrounded with several Apartments with terrassed Roofs, on which are very fair Gardens, and Trees in them, Gardens on the Roofs. of a great Bigness. The whole Palace is 380 Paces in length, and ends in a very lofty Pavilion. The Walls are built of great Stones, and have at certain Distances half Towers. It is very pleasant within, and the Water rises up to the highest Apartments. No Man enters into the Palace, but by an express Order from the King, who grants it very seldom, so that no Body almost comes near it. At the End of the Palace is a Building called, *The Four Towers*, which is the most The Four Towers. lovely Outside of any thing in the Town, being adorned with Roses and Festons pretty well cut. In each Tower is 4 Galleries, which serve to make the Water mount into a Reservatory on the Top, from whence it is conveyed into the highest Apartments of the King's Palace through Pipes. There are several *Meidans* in the Town, but the fairest is that before the King's Palace. It hath 2 *Divans*, which serve for the *Cotoual*, who has his Prisons under them. The Palace is on the N. of it, and there is a Portico over-against it, where the Musicians play several times a Day, while the King is in Town. In the Middle of it, and in Sight of the Palace is a Space for the Fighting of Elephants.

The City for the most part is inhabited by Persons The People. of Quality, Officers of the King's House, Officers of Justice and of the Army; and their Houses are pretty enough. Upon 3 Sides of the City stands a very fair Mosque, wherein are the Tombs of the Kings of *Golconda*; and about 4 a Clock in the Afternoon there is a Dole of Bread and Pilau given to all the Poor that come. Upon Festival-Days all the Tombs are hung with rich Tapestry, and then they are a most glorious Sight.

Fair Gardens. There are many fair Gardens in the Town, and near it, but their Beauty consists not in Flowers, or Water-works, but in long Walks, lovely Fruit-Trees, and several fair large Basons of Water. The Government of this City is this: When a Stranger comes to the Gates, a Soldier searches him, whether he has any Salt or Tobacco about him, that the King may not be defrauded of the Duties for them, and then sends to the *Deroga* about his Admission, which causes a Delay of a Day or 2 sometimes. When the King The Court. sits to do Justice, all that have Business stand below, just against the Balcony, but the People are kept back with a Row of Poles, about the Height of an Half-Pike. Every *Monday* the Nobility mount the Guard, and continue 8 Days: Some of them have 5 or 6000 Men under their Command, with 10 or 12 Elephants, and 30 or 40 Camels. The Soldiers have no Cloaths but 3 or 4 Ells of Calicut, with which they cover their Bodies half way behind and before. They wear their Hair long, and tie it in a Knot on the Crown as the Women do. They wear broad Swords like the *Switzers*, as well for a Thrust as a Blow, and hang them in a Girdle. Their Musket-Barrels are neater and better than ours, because their Iron is better. Their Cavalry carry Bows and Arrows, a Buckler and Cavalry. a Battel-ax, an Head-piece and a Jacket of Mail, which hangs down from their Head-piece over their Shoulders. There are 20000 Common Women allowed by Women allowed. the *Deroga* to profess Lewdness. They pay no Tax, but being a Means of spending much *Tari*, which is a sweet Drink on which the King lays a great Impost, they are encouraged in their Practices. They are to dance every *Friday* before the King's Balcony, if the King be present; if not, an Eunuch dismisses them. They stand well dressed at their Doors in the Day-time, and set up a Candle or Lamp for a Signal in the Night to draw in Men, who are not minded, if they turn in to them. The common People give their Wives great Liberty, being obliged by Promise at their Marriage to let them walk in the Streets, visit their Neighbours and drink *Tari*, a Liquor which the *Indians* very much love.

Theft punished. When any one is found Guilty of Theft, he is punished by cutting off both his Hands, which is a Punishment used almost all over the *Indies*. The Tradesmen of the Town, and Husband-men that cultivate the Lands are Natives, but the Trade is chiefly maintained by the *English* and *Dutch* Factories, who buy up for the Companies Chites, and other Cloaths, which they vend in other Parts of the *Indies*. They bring

bring also from *Maslipatan* upon Oxen, Cloves, Pepper, Cinnamon, Silver, Copper, Tin, Lead, and other Goods, which they know to be most marketable.

The People. All Men and Women at *Golconda* are very well proportioned, and of comely Statures, and fair enough in their Countenances, but the Country People are swarthy.

The Coins. The most current Monies of this Kingdom are the Pagods, Roupies, and Pecha's of *Mogul*. The Pagods are Pieces of Gold, of which there are 2 sorts, the Old and New, the Old are worth 5 Roupies, and the New not above 4. The Roupies and Pecha's are also worth more at *Golconda* than in *Mogulistan*.

Diamonds. The greatest Plenty of Diamonds is in this Kingdom, and therefore it may be called the Country of Diamonds.

The Castle. The Castle of *Golconda* is 2 Lgs. from the City; it is of a large Compass, and the Walls of it are built of Stones 3 Foot in length, and as much in breadth, and it is surrounded with deep Ditches, divided into Tanquies, which are filled with fair and good Water. All the Strength it has consists in 5 round Towers, which have a great many Cannon mounted upon them for their Defence. It has several Gates, but 2 only are opened, and those are guarded by *Indians*. No Stranger may go into it without a Permission from the Governour, unless he be acquainted with some Officer of the Court. The King has a large Palace in it, and well situated for a good Air and lovely Prospect, and most part of the Lords have Houses near it. There are several Bazars in it, where all Things necessary for Life may be had.

The King's Palace.

The King. The King of *Golconda*, who now reigns, is a *Shias* by Religion, and bears the Name of *Abdoul-Coutou-Sha*. He was the Son of a *Bramen* Lady, and succeeded his Father, though not the eldest Son, because he was more loved by the Queen, who caused his Brother to be imprison'd, and at length poison'd. He keeps 500000 Soldiers in Pay, yet is tributary to the Great Mogul. He hath only 3 Daughters, the eldest of which is married to one of the Kinsmen of the Grand Cheik of *Mecca*, the 2d to Sultan *Mahomet*, eldest Son of *Aureng-Zeb*, and the 3d to *Mirza-Abdeul-Cosing*, the King's Coulin, who has Male Children by her.

The King's Revenues. The King of *Golconda* has vast Revenues, for he is Proprietor of all the Lands of his Kingdom, which he rents out to those that offer most, except such as he gives to his Favourites for a certain Time. The Customs of Merchants Goods that pass through his Country, and of the Ports of *Maslipatan* and *Madesspatan* yield him much, and there is hardly any sort of Provisions in his Kingdom from which he hath not some considerable Dues.

The Diamond Mines. The Diamond Mines raise him a great Revenue, and all they that he allows to dig in them. Those that are towards *Maslipatan* pay him a Pagod every Hour they work there, whether they find any Diamonds or not; but his chief Mines are in divers Places of *Carnates*, towards *Visapour*, where he has 6000 Men continually at Work, who daily find near 3 Pound Weight, and no Body digs there but for the King. This Prince wears upon the Crown of his Head a Jewel almost a Foot long, which is said to be of inestimable Value:

Jewel on the Crown. It is a Rose of great Diamonds, 3 or 4 Inches diameter, in the Top of which there is a little Crown, and out of it issues a Branch, fashioned like that of a Palm-tree, but it is round, and the Palm-branch, which is crooked at the Top, is a good Inch in diameter, and about half a Foot long; it is made up of Sprigs, which are (as it were) the Leaves of it, and each of them have at the End a lovely long Pearl, shap'd like a Pear: At the Foot of this Rose there are 2 Bands of Gold, in the Fashion of Table-Bracelets, in which are inchased large Diamonds, set round with Rubies, which, with great Pearls that hang dangling on all sides, make an exceeding rare Show, and these Bands have Clasps of Diamonds to fasten the Jewels to the Head.

His Riches in precious Stones. Besides this Jewel, he hath other considerable Pieces, and such Numbers of precious Stones, that if there were Merchants who could give him the Worth of them, he would have prodigious Sums of Money, and be the richest King of the *Indies*.

The Omra's. The *Omra's* are the Great Lords of the Kingdom, who are *Persians*, and all rich, for they have not only great Pay of the King yearly, but large Gifts of Lands and Villages from him, besides the Advantages by the Soldiery, for they do not list half the Number they have Pay to maintain.

Their Equipage. They generally make a very handsome Figure, for when they go through the Town, an Elephant or two goes before them, on which 3 Men carrying Banners are mounted; 50 or 60 Troopers, well mounted and accoutred, follow them; and after these Trumpeters and others playing on Fifes on Horse-back: After these comes the *Omra* on Horse-back, with 30 or 40 Foot-men about him, and his Palanquin carried by 4 Men, with other Porters for Change, and all this Pomp is brought up with a Camel or 2, with Men beating on Timbrels on their Backs. Sometimes the *Omra* will take his Palanquin, and then his Horse is led.

The Palanquins. The Palanquins are sometimes covered with Silver, and the *Bamboue's* are tipt with Silver at both Ends. They lie at Ease in them, smoaking Tobacco, or chewing Betle and Areca, according to the Custom of the *Indians*, who hold them to be excellent for the Stomach, and the Sweetness of the Breath. The lesser *Omra's* have not so great an Equipage, but all have a Train proportionable to their Revenue.

The Winter. The Winter in *Golconda* begins in *June*, with Rains and some Thunder, and great Winds, and lasts to the End of *Oct.* in which Time the Air is cold only in the Night and Morning, the Days are as warm as 'tis in *May* in *France*; but the Rains cause prodigious Floods, which beat down the Houses, and destroy many People. The hot Season begins in *February*. The Rains make the Land very fertile. They have abundance of Fruits and Vines, and 2 Crops of Rice and other Grains every Year. The Wines they make are usually White.

From *Golconda* there are 2 Roads to *Maslipatan*, the one more direct, which the Merchants usually take, and the other by the Diamond Mines, called *Coulour*, or *Gani*, which those Merchants generally take, whose Curiosity or Business leads them thither, though it be the farthest Way by 12 Lgs. In the more direct Road you meet with not above 4 Towns, besides 15 or 16 Villages, *viz. Elmas-Kepentch*, *Panguel*, *Sarchel* and *Penguet-coepoui*. You pass also several Rivers, the most considerable of which are *Kachma* and *Mouchy*. All the Country as you travel this Way is always green and pleasant to the Eye, though the Road be bad; and there grow all kinds of Trees that are in the *Indies*, even *Cassia* Trees, though they be scarce in other Countries. This Way you come to *Maslipatan* in 10 Days.

The other Way by the Diamond Mines lies first to *Tenara*, where the King has a stately Palace, consisting of 4 large Piles of Stone-Building, to every one of which belongs a large Garden: One of them standing upon the Left-hand, along the High-way, is much more beautiful than the other 3. It is built of Free-Stone, 2 Stories high, and has in it several fair Galleries, Halls, Parlours and Lodging-Rooms, which are the Royal Apartments. Before this Building is a large square Piazza, and in the other 3 Fronts is a great Portal, with a fair large Platform, raised 4 or 5 Foot high, and well arch'd, where Travellers of Quality are lodg'd; and over each Portal is a strong Baluster, and a little Chamber for the Ladies. One of

The Queens Lodging. these Buildings belongs entirely to the Queen, and though no Body may lodge in it in the Queen's Absence, yet any one may see it, and walk in the Garden, which is a lovely Place, and well stor'd with Water. The whole Piazza is encompassed with several Chambers for the Lodging of poor Travellers, who every Day towards Evening have an Alms bestow'd upon them of Rice and Pulse ready boil'd, and for this there are unalienable Rents settled; but for the Idolaters, who will eat nothing that is poudred by other Hands, they give them Flour to make Bread, and a little Butter to dip it in, when it is bak'd like a broad thin Cake.

From *Tenara* the Road lies through *Jatenagar*, *Patengi*, *Penguel*, *Nagelpar* and *Lakabaron*, to *Coulour*, or *Gani*. This last part of the Way is very Rocky, and among these Rocks, where there is any good Earth, you find the *Cassia* Trees, that bear the best and most laxative *Cassia* of any in the *Indies*. By *Coulour* runs a River, which falls into the Gulf of *Bengal*, near *Maslipatan*.

From hence the Road lies through *Kah-Kaly*, *Bezouar*, where you pass the River of *Coulour*, *Vochir-Nillimor*, where you must cross a great River upon a Float-boat of Timber, and so by *Nilmol* to *Maslipatan*.

This is a great City on the Coast of *Coromandel*, lying in 16 D. and half Northern Lat. It stands upon the Gulf of *Bengala*, E. S. E. from *Golconda*, and though it be but small, yet it is well peopled. The Streets are narrow, and it is intolerably hot there from

Air.

March

Houses. *March* till *July*. The Houses are built of Wood, and all separated one from another, and the Water is brackish, because the Tides come up to it. There is great Trading in *Chites*, because, besides those that are made there, a great many are brought from St. *Thomas*, which are much finer and better Colours than The Port. those of the other Parts of *India*. The Coast is excellent, and the Road for Ships is the best in all the Gulf of *Bengal*, and therefore Ships come thither from all Nations, and go from thence to *Pegu*, *Siam*, *Aracan*, *Bengal*, *Cochinchina*, *Mecca* and *Ormus*, and for the Islands of *Madagascar*, *Sumatra*, and the *Manille's*. This Country of *Maslipatan*, as all the rest of the Coasts, is so full of Idolaters, and their Pagods are so full of the lascivious Figures of Monsters, that one cannot Pagods dewith lascivious Pictures. go into them without Horror. It is exceeding fruitful, and Provisions are very cheap there: A Sheep is bought for 12 Pence, a Partridge for an Half-penny, and a Fowl for Two-pence, and 'tis the same almost every where upon the Coasts of *Coromandel*.

The Road. From *Maslipatan* to *Gandicot* the Way lies thus: You pass *Nilmol*, *Wochir* and *Paremet*, 3 small Villages, and the last of them a very pitiful one, to *Bezouare*, a great Town, where all the Inhabitants, except the Governour, and some of his Domesticks, are Idolaters. In this Town is a very large Pagod without Walls, consisting of 52 Pillars 20 Foot high, which uphold a flat Roof of Free-Stone; they are adorn'd with several emboss'd Figures of ugly Devils, and several sorts of Creatures, some with 4 Horns, others with many Legs and Tails, others lolling out their Tongues, and others in several other ridiculous Postures, and between the Pillars stand the Statues of their Gods upon Pedestals. The Pagod is built in the middle of a Court encompassed with Walls, and adorn'd within and without with the same Figures as the Pagod, and a Gallery upheld with 60 Pillars runs round the Wall. You enter into this Court through a Portal, with 2 Niches, one above another, upheld with Pillars, which have certain *Indian* Characters upon them, but the Priests themselves hardly know the Meaning. By this Town is another Pagod, built upon an Hill, to which there is an Ascent of 193 Steps, every one a Foot high. It is 4 square, with a *Cupolo* at the Top, adorn'd with the like Figures as that at *Bezouare*. In the middle of it is an Idol sitting cross-legg'd, after Idol. Form described. the Manner of the Country, and in that Posture is about 4 Foot high. Upon the Head is a triple Crown, from which 4 Horns extend themselves, and it has the Face of a Man, turn'd toward the East. The Pilgrims that come out of Devotion to these Pagods, when they enter clasp their Hands together, and raise them up to their Foreheads, and then advancing to the Idol, cry out, *Ram, Ram*, i. e. *God, God*: Then having anointed it with Oil, or besmear'd the Face with Paintings, they ring a little Bell, that hangs upon the Idol, after which they make their Offerings of Their Offerings. Sugar, Oil, and other Eatables, the richer sort adding Pieces of Silver. These Offerings, though the People are made to believe the Idol takes them, yet maintain the Priests, with their Wives and Children, except that they relieve the poor Pilgrims with them. There is a great Feast made in this Pagod in *October* for 3 Days together, at which Time there is a great Concourse of People from all Parts.

A Cow at Bezouare. Leaving *Bezouare*, you cross the River that runs to *Gani*, and 3 Lgs. farther come to a Pagod, built upon a large Platform, with an Ascent of 15 or 20 Steps. In it is the Figure of a Cow, of black Marble, and several other deform'd Idols 4 or 5 Foot high, some with many Heads, and others with many Hands and Legs, and the most ugly are most ador'd, and receive most Offerings.

Kab-Kabi. The next Town in the Road is *Kab-Kabi*, near to which is a small Pagod, wherein are 5 or 6 Idols well made, and having passed that, you come to *Condevir*, a great City, closed in with strong Walls, with a Ditch and a Moat, pav'd at the Bottom with Free-Stone. Eastward it stretches out to a Mountain, about a Lg. in Compass, and surrounded with Walls, with Half-Moons. Within them are 3 Fortresses.

Adanquige. From hence you travel to *Capenour*, and so to *Adanquige*, a very fair Town, where there is a very large Pagod, with abundance of Chambers for the Priests, and several Idols, but they are fallen to Decay, yet are superstitiously ador'd by the People. You go on to *Nosdrepar*, and so over a large River, which is dry in Summer, to *Condicour*, *Dakije*, *Nelour*, where there are many Pagods, and so crossing a River to *Ganderon*, *Sereple*, *Ponter* and *Senepgond*, to *Palicate*, to which the Way lies for a Lg. through the Sea. It is a Fort that Palicate Fort. belongs to the *Dutch* that live upon the Coast of *Coromandel*, and within it are usually 200 Soldiers. It is the chief Factory that they have in the *Indies*, where lives the Superintendent of all the rest which are in the Territories of the King of *Golconda*. The Trade managed there by the *Dutch* is in Cotton-Cloth, of which they have large Ware-houses full. Here also The Dutch Factory. they refine their Salt-Peter, which they bring from *Bengal*, and make the Gun-powder with which they furnish their other Factories.

The Fort of *Palicate*, called *Gueldria*, is at a good The Fort. Distance from the Town, that it may not be annoy'd by Shot from thence. The Bastions are well stored with good Guns, and the Sea comes up to the Walls of it. The Governour has 50 Crowns a Month for his Pay, and as many for his Table and Cloaths. The current Money here are Roupies and Pagods, which Money. last are 4 times the Value of the former, Fanons, which are half Gold and half Silver, with the same Stamp as the Pagods, but the 7th part of a Roupie in Value, and Gazars, which are Pieces of Copper as big as a Fanon, but 40 of them are but the Worth of it. The *Dutch* coin this Money. The Water of this Town is fetch'd out of Holes dug in the Sand, when the Sea is quite out, and it is fresh.

From hence you go to *Madrespatan*, or Fort St. *George*, Fort St. George. which belongs to the *English*, (here is a Convent of *Capuchins*) and so to *Meliapour*, or St. *Thomas*'s Town, where, they say, St. *Thomas* was Martyr'd, and the *Austin Friars* there pretend to have the Iron-Lance which kill'd him, (the *Jesuits* also have a Church there:) *Serravaron*, and then to *Oudicot*. The Way between these Towns is through a flat Sandy Country, and on both sides of it are Copses of *Bambous* very high and thick, which breed prodigious Numbers of Apes. Those of one side are inveterate Enemies to those of Apes Enemies to one another. the other, and 'tis very good Sport to the Travellers to set some Baskets of Rice between them, with Cudgels by them, to make them fight for it, and batter one another with the Cudgels.

The Road holds the same to *Naraverou* and *Gazell*. Hereabout there are Gates, and strong Guards at them at every 2 or 3 Lgs. who examine all Passengers whence they come, and whither they go, so that Men may travel there with their Money in their Hands.

The next Place you arrive at is *Courva*, a celebrated Pagod, where there is little to be had for Man or Beast; but the Country about it being full of Elephants, the King's Officers come hither often to take them. The Way of hunting them is thus: They cut The Way of Hunting and taking Elephants. out several Alleys or Walks in the Woods where they are, and having digged them full of Pits, which they cover with Hurdles and Earth, force them by Hollowing, beating Drums, and pursuing them with Pikes, with Wild-fire tied to the Ends, into those Walks, where being tumbled into the Holes, the Hunters bind their Feet and Trunk with Ropes and Chains, and so take them: Yet some will escape the Snare, and are ever after so mistrustful, that with a Bow they will examine every Step they take, whether there is not an Hole in the Way, and 'tis almost impossible to take them again. Such as they How to tame them. catch they couple to 2 tame ones on each side, and set 6 Men about them with lighted Torches, at the End of an Half-pike, to talk to them, and give them Meat, which is brown Sugar, boil'd Rice and Hay. If the wild Elephant will not eat, the Men order the tame ones to bear him with their Trunks, and so constrain him to learn Obedience. After an Elephant is tamed, he never meddles with the Female, yet is sometimes taken with a lustful Rage, which never ends but with some Mischief, as the Death of his Rider, or some body else. Though the Elephant's Skin be very hard while he is alive, 'tis like melted Glew when he is dead.

There are Elephants in several Parts of the *Indies*, Places where Elephants are found. as in the Islands *Ceylon* and *Sumatra*, the Kingdoms of *Cochin*, *Siam* and *Boutam*, on the Frontiers near the *Great Tartary*; but they are said to be in the greatest Numbers on the Coast of *Melinda*, Eastward of *Africa*, where the Blacks of the Country hunt them to eat the Flesh, but are obliged to give the Lord of the Place the Teeth, insomuch, that there are several Parks empal'd with Elephants Teeth a Lg. round. 'Tis observable of the Female Elephant, when she grows hot, that she makes her self a great Bed of Herbs and Weeds 4 or 5 Foot high from the Ground, on which, con-

contrary to the Custom of all other Creatures, she lies upon her Back, in Expectation of the Male, whom she calls to her by a peculiar Cry, and thus they take the Males in *Ceylon* by a tame Female. This is also peculiar to the Elephants in *Ceylon*, which though the smallest are the most couragious, yet only the first Elephant which the Female produces has any Tusks: and 'tis also observable, that the Ivory which comes from *Achen*, when it is wrought, never grows yellow, as that does that comes out of the Continent and *East Indies*, which makes it more esteem'd than any other. It is hard to find how long an Elephant will live, nor can the Keepers and Governours of them tell you more, than that such an Elephant was their Great Grandfathers, and so that it may be conjectured, that they have liv'd 120 or 130 Years. The Great *Mogul* keeps 500 Elephants for his Houshold, to carry his Women, their Tents and Luggage, and about 80 or 90 for his Wars; and to the chief of them he allows 500 Roupies a Month, but to the rest from 50 to 20. The chief have Men to attend them and fan them, and they are maintain'd out of it.

Their Teeth and Bell Ivory.

The Life of Elephants how long.

From *Conrva* you pass through *Rogia-peta*, a large Town, and *Ondecour*, to *Outemela*, where there is one of the greatest Pagods in *India*. It is built of large Free-stone, and has 3 Towers, where there are several deform'd Figures of embossed Work. It is encompassed with many little Chambers for the Priests Lodgings. Hard by it is a wide Lake, upon the Banks of which are built several Pagods 8 or 10 Foot square, and in every one of them an Idol representing some Devil, with a *Bramin*, who takes care that no Stranger, that is not of their Superstition, shall come to wash in, or take any Water out of the Lake; but if any Stranger desires Water, they give it him in an Earthen-pot, but if it touch the Stranger's Vessel, they break it, and say, if a Stranger should wash in it, it must be drain'd. They are very charitable, and will give any thing they have to eat or drink to Persons in Necessity. There are several Women among them, who having made a Vow to do Acts of Charity for 7 or 8 Years, more or less, sit upon the Road continually for that End with Fire, Tobacco, Rice boil'd with *Quiken*, a sort of Grain like Hemp-seed, or Beans, and to every Traveller they give some of their Beans, Rice-Water, an handful of Rice, Tobacco, if they have none, and Fire. Other Women live continually on the High-ways and Fields, having made a Vow to eat nothing, but what they find undigested in the Dung of Oxen, Cows or Horses, which they feed with an hard sort of crooked Pease, and these feed the Cattel with Grass all Day.

Outemela described.

Their Charity.

A strange Vow.

From *Outemela* you travel through *Goulupale* and *Gogeron*, to *Gandicot*. This Place is one of the strongest Cities in the Kingdom of *Carnatica*, being situate upon the Top of an high Mountain or Rock, to which there is but one Ascent, not above 25 or 30 Foot broad at most, and in some Places not above 7 or 8 Foot wide at most. On the Right-hand of it there is a most hideous Precipice, and at the Bottom of it runs a vast River. Upon the Top of the Mountain is a small Plain, but a Quarter of a Lg. broad, and about half a Lg. long: This is sow'd with Rice and Millet, and watered with many little Springs. The City stands on the S. side of this Plain, and is so encompassed with Precipices, at the Bottom of which run 2 Rivers, that it has but one Gate to the Plain-side, and that too fortified with 2 good Walls of Free-stone. Here is a Pagod, which is said to be the fairest in all *India*, wherein are several Idols, some of Gold, others of Silver, and 6 very large ones of Brass, of which 3 sat upon their Heels, and 3 stood, yet were 10 Foot high apiece. These Statues, when the *Nabab* of the King of *Golconda* took the Cities from its own *Raja*, he took out of the Pagod to make him some Cannon, but with all the Art the Artificer had, who was a *French* Man, he could not melt them, and so he was forced to leave his Work unfinished. It is a Custom in this City never to put any Man in Prison, but as soon as the Offender is taken, he is examined, and Sentence is pronounced upon him according to his Crime, which is immediately executed, and if he be innocent, he is as soon acquitted. The Punishment is usually inflicted at the Discretion of the *Nabab*, or Governour. One that had broken into an House, and had kill'd the Mother, and 3 Children, was condemned upon the Spot to have his Hands and Feet cut off, and to be cast into the High-way, there to end his Days in Misery. Another who had robbed upon the High-way had his Belly ripped up, and was ordered to be cast upon the Dunghil.

Gandicot described.

A very fair Pagod.

No Man imprison'd for any Crime.

In these Parts of *India* they have a very quick Way of sending Letters by Foot-posts, which are more speedy than Horse-men, and the Reason is, because at the End of every 2 Lg. there are little Huts, where there are Men always ready to run as soon as any Letters come. The High-ways are planted with Trees like Walks, and where there are no Trees, there are Heaps of Stones white wash'd, that these Posts may not miss their Way in dark and rainy Nights.

Foot-post very quick.

From *Gandicot* to *Golconda* the Way lies first to *Colepale*, and then to *Coteeri*. Here you must ferry over a River. The Boats are like Wicker-Flaskets, covered on the Out-side with Ox-hides, and fill'd with Faggots in the In-side, over which they spread some old Tapestry, to secure the Goods from Wet. Horses and Oxen they swim over, and Coaches and Waggons they carry between 2 Boats. Their Oars are broad Pieces of Wood like Shovels.

Boats and Oars.

Being past the River, you must go to *Morimal*, *Santisela* and *Gonmeda*, and so to *Kaman*, a Frontier Town of the Kingdom of *Golconda*, till the Conquest of *Carnatica* by *Mirgimola*; and from thence you travel to *Emilapata*. Between these 2 last Places pass the Pilgrims, who go from *Brampour* to visit the Great *Ram*, i. e. Their Chief God, which stands in the Kingdom of *Carnatica*. They go 4000 Persons, Men and Women, in a Company, and in Palleki's, cover'd with Velvet or Sattin, purfled with Gold, and hung with Gold and Silver-Fringe, they carry their Idols. On each side of every Palleki went a Man with a large Fan, made of Ostriches and Peacocks Feathers of various Colours, and the Handle overlaid with Gold and Silver, with which they keep the Flies from the Idol's Face; and on the same side there goes one with a Fan like a Target, which is adorn'd with Feathers as the former, but has little Bells of Gold and Silver round about the Edges: This is to keep off the Sun from the Idol; and sometimes they shake it, to please the Idol, as they imagine, with the Sound of the Bells. This Multitude of Pilgrims, 'tis said, being on their Way, were so stopt by sudden Rains, that they were reduced to great Streights for Food, especially for their Children, which caused great Lamentations among them. In this Extremity the Chief of their Priests sat down in the midst of them, and covering himself with a Sheet, called such as desired Victuals to him, and asked them what they would have, and for how many; and when they had answered him, he gave them with a great Ladle what they wanted from under the Sheet, and so the whole Multitude of 4000 Souls was fully satisfied.

A Pilgrimage.

A Magical Wonder.

The next Town in the Road is *Doupar* and then *Tripante*, where there is a great Pagod upon an Hill, to which there is a circular Ascent of Free-stone every Way, the least Stone being 10 Foot long and 3 broad. In the Pagod are the Figures of several Dæmons, and among others there is a Statue of *Venus* standing upright, with several lascivious Figures about her, all cut out of one Piece of Marble, but the Graving is very ordinary.

Tripante.

The Statue of *Venus*.

From *Tripante* you travel to *Mamli*, then to *Macheli*, after which you pass over a River in Boats like Panniers, where you must give the Water-men such Money as will please them, or they will not carry you over, nor Goods. They generally burn all the Money they take to try it, and if it turns black in the least, will refuse it; and then you arrive at *Dabirpinta*, and so by *Halcora*, and *Pondera* to *Atenara*, which is an House of Pleasure, built by the King's Mother, with a large Piazza, and many Chambers for Strangers. In the Kingdoms of *Carnatica*, *Golconda* and *Visapour*, there are no Physicians, but such as attend Kings and Princes, and therefore the common People, after the Rains are fallen, go out every Morning into the Fields to gather Herbs proper for such Diseases as are common in their Families; and in great Towns such as have some common Receipts, sit in certain known Places of it to give them to such as enquire after them, but *gratis*.

Physicians.

From *Atenara* you come to *Golconda*. Here, besides what has been before observed in the Description of this City, the Way of Washing the Kings and Great Mens Elephants is not to be passed over. The Elephants go up to the Belly in the Water, and lying down upon one side, throw the Water several times with their Trunks upon that side that lies out of the Water, and when he has soaked himself sufficiently, the

Washing Elephants.

the Master comes with a kind of Pumice-stone, and rubbing the Elephant's Skin, cleanseth it from all the Filth that clings to it; and when he has cleansed that side well, he commands the Elephant to turn the other, which the Beast immediately does, contrary to the vulgar Opinion, that an Elephant, if he lies down can't rise again. When both Sides are well washed, he comes out of the River, and stays awhile upright upon the Bank-side to dry himself: Then the Master with some red, or yellow Colour, streaks the Beast on the Forehead, and about the Eyes, upon the Breast, and all behind, rubbing him with Oil of Coco's to strengthen his Nerves; and sometimes, when all this is done, fastens a gilt Plate upon their Foreheads.

The Road from *Golconda* by *Amadabat* to *Surat* is above described.

CHAP. V.

Of the Empire and Kings of Indostan, *called, The Great* Moguls, *with their Court and Wars.*

The Bounds of Indostan.

THE potent Empire of the *Moguls* contains the greatest Part of *Indostan*, and extends from the Mountains on this side the River *Indus*, to the Mountains on the other side of *Ganges*, bordering Eastward upon the Kingdoms of *Arakan*, *Tipra* and *Asia*; Westward on *Persia* and the *Usbeck* Tartars; Southward on the Kingdoms of *Golconda* and *Visapour*; and Northward on the Mountains of *Caucasus*. They are called *Moguls* from their white Complexion, because they are Whites, whereas the Natives are Brown, or Olive Colour.

The Emperors.

Tamerleng, i. e. The Lame Prince, as he is commonly called, *Tamerlane*, the Extent and Renown of whose Conquests from *China* to *Poland* has exceeded all the Actions of the greatest Captains of former Ages, laid the Foundation of it, though it was not fully conquer'd, but by his Successors. *Miram-Cha*, his Son, succeeded him, and left his Throne to his Son *Sultan Mahomet*, who again left it to *Sultan Abousaid-Mirza*. *Hameth Sheike*, his Son, succeeded him, and left it to *Sultan Babur*, i. e. The Valiant Prince, who was the first *Mogul* that was of greatest Power in *India*. He died in 1532, and left his Kingdom to his Son *Hamajon*, i. e. The Happy, who held it till the Year 1552. *Abdul Feta Gelal Eddin Mahomet*, his Son, succeeded him. He was commonly called *Akabar*, i. e. The Great, and reigned 54 Years, and died in 1605. *Sultan Selim* assum'd the Throne after his Father *Akabar*, and took the Name of *Jehan-guir Patsha*, i. e. The Victorious Emperor of the World. He reigned very peaceably during the Space of 23 Years, equally belov'd both by his Subjects and Neighbours. He had 4 Sons, the eldest of which was named, *Sultan-Kosrou*, the 2d *Sultan Courom*, the 3d *Sultan Perviz*, and the 4th *Cha-Daniel*. The 2 first of these being married, and having several Children of some Age, were weary of the long Life and Reign of their Father, and not waiting the Course of Nature, ambitiously sought to possess themselves of his Throne. *Sultan Kosrou*, his eldest Son, raised a powerful Army near *Labor*, and thought to have surpriz'd his Father, and seiz'd his Empire by Force; but the King having timely Notice of it, raising a considerable Army, resolv'd to chastise his Insolence, and meeting him, defeats him, and takes him Prisoner, with many of the considerable Nobility that adhered to his Party. His natural Affection to him would not suffer him to put him to Death, but putting out his Eyes, kept him near his Person, intending to prefer his eldest Son *Boulaki* to the Crown. But *Sultan Courom*, his 2d Son, believing it his Right to be preferr'd before his Nephew, resolved to settle himself in the Throne before his Father's Death, but concealing his Design, carried himself with great Submission to his Father, that he might more effectually bring it about; and to that End he perswaded his Father to let him carry his elder Brother, the blind Prince, into *Decan* with him, pretending, that it would be better to remove so afflicting an Object out of his Sight, and that his Brother would live more comfortably in such a Retirement. The King, not perceiving his Intention, granted it, and *Sultan-Courom* having him in his Power, made him away with all imaginable Secresie, and taking upon him the Name of *Cha-Jehan*, i. e. King of the World, raised an Army to uphold his Title, and dethrone his Father. The King being incensed for the Death of his Son, as well as at the Attempt against his Person, sent a considerable Army to chastise him. The rebellious Prince finding himself too weak to oppose his Father's Force, left *Decan*, and fled into *Bengal*, to raise a larger Army to give the King Battle. The King pursued him in Person, and the Prince having accomplish'd his Design, march'd to meet him in the Kingdom of *Labor*; but *Jehan-guir* being old, and wearied with the Troubles that his Sons had put him to, died by the Way, leaving *Cha-Jehan* at Liberty to pursue his own Designs, yet recommending his Grand-child *Boulaki* to *Asouf-Kan*, his Generalissimo, and Prime Minister of State, and making all the Officers of his Army to acknowledge him for King. The News of the King's Death being known at Court, caused a general Lamentation, and presently all the Grandees of the Kingdom agreeing to execute the King's Will, acknowledged *Sultan Boulaki* for Emperor; but *Asouf-Kan*, who had married his eldest Daughter to *Cha-Jehan*, by whom she had 4 Princes, and 2 Princesses, took himself obliged through natural Affection to raise *Cha-Jehan* to the Throne, and having a great Interest both in the Army and Empire, he soon brought over to *Cha-Jehan*'s Interest the greatest part of the Commanders and Lords of the Court, and caused him by a Stratagem to be declared King. The young Prince *Boulaki* hearing this, and perceiving himself to be deserted of all, thought of nothing, but to save himself by Flight, and wandred a long time in *India* like a *Faquir*; but at length retiring into *Persia*, he was magnificently received by *Sha-Sefi*, who allow'd him a Pension fit for so great a Prince. *Cha-Jehan* having thus usurped the Crown, the better to secure himself, and stifle all Factions that might arise upon the Account of the lawful Prince, put to Death by Degrees all that had shewn any Kindness to his Nephew, so that the first part of his Reign was remarkable for many Acts of Cruelty, but the remaining part, which was above 40 Years, was very mild and peaceable, not so much a King over his Subjects, as a Father over his Family and Children, for there was such Strictness in the Civil Government, and particularly for the Security of the High-ways, that there was not any Occasion to put any Man to Death for Robbery. But though his Kingdom was at Ease, his Family was not, for he was much perplex'd and troubled with his 4 Sons, *Darab-Cha*, *Sultan Sujah*, *Aureng-Zeb* and *Marad-Bakeke*, all of them of several Dispositions; *Dara-Cha* was witty, brave, genteel and liberal, but mighty opinionated of his own Judgment, and very passionate. He courted the Favour of the Heathens, Christians, and Tributary *Raja's*. *Sultan Sujah* was much of the same Disposition, but more close and settled, and had better Conduct and Dexterity. He cast himself into the Religion of the *Persians*, to oblige the Great Officers of the *Mogul*'s Court to be of his Party, being most of them *Persians*. *Aureng-Zeb* appear'd serious and melancholy, but was really judicious, reserv'd and crafty; he pretended to renounce the World, and, like a *Faquir* or *Dervice*, spend his Days in Prayer and Devotion, not regarding a Crown; yet he failed not to make a Party at Court, but with such Secresie, as it was not discernible. *Marad-Bakeke*, the youngest, was the least dexterous and judicious, giving himself up to Mirth and Pastime, to drink, hunt and shoot; but he was very brave and couragious, and had certainly outdone all the rest, if his Conduct had been equal to his Boldness. The 2 Sisters, *Sahab-Begum* and *Rauchenaru-Begum*, were not less concern'd in these Things. *Sahab-Begum* was witty, and managed all under her Father, whose Humour she pleased even

Jehan-guir's Sons rebel against him.

Sultan Courom's Cruelty.

Cha-Jehan.

His Cruelty at first.

His Children, and their Character.

His Two Daughters.

even to Inceſt, and was wholly in the Intereſts of her Brother *Dara*, but *Rauchenara-Begum*, tho' ſhe had no great Share in publick Affairs, yet wanting not Wit, and addicting her ſelf wholly to *Aureng-Zeb*, was a Spy upon what was done in the Palace, and adverti-ſed her Brother of it, hoping to riſe with him to the Throne, becauſe he had promiſed her Marriage. Theſe Princes being all of Age, all married and having Children, pretended to the Crown, and ſo were Enemies one to the other. The King was ſenſible of all theſe Things, and fearing Danger to his own Perſon, conſulted with himſelf what was fitteſt for him to do. To ſhut them up in *Goualeor*, which is a Fortreſs where the Princes were ordinarily kept cloſe, becauſe it is ſituated upon an inacceſſible Rock, he found impracticable, becauſe they were already too potent ſo to be managed. If he removed them from Court, he thought himſelf obliged to give them ſome Government fit for their Birth, and there he feared they would become independent Kings; yet obſerving their Enmity one to another, he choſe rather to run the Hazard of ſuch an ill Event, than have them cut one anothers Throats before his Eyes, and ſo he reſolved to ſend them away: To Sultan *Sujah*, his 2d Son, he gave the Kingdom of *Bengal*; to *Aureng-Zeb*, *Decan*; and to *Morad-Bakcke*, *Guzurate*. Theſe 3 went away contented with their Governments, and there acted as Sovereigns, keeping back all the Revenues, and maintaining great Armies under a Pretence of bridling their Subjects and Neighbours. As to *Dara-Cha*, the eldeſt Son, to whom he gave *Multan* and *Cabal*, and deſign'd for the Crown, he kept him at his own Court, and tho' he ſhew'd him a particular Obſervance and Affection, yet he had ſome Diſtruſt of him, and kept a Correſpondence with *Aureng-Zeb*, whom he knew fit for Government; and had therefore employ'd him in his Wars againſt the King of *Golconda*, ſending him a great Army under the Command of *Emir-Jemla*, who had put him upon it to gain the Mines of Precious Stones there. *Dara-Cha* oppoſed this Expedition exceedingly, as knowing it would add great Strength to *Aureng-Zeb*; but not being able to break his Father's Reſolution, he yielded to it, upon Condition, That the *Emir* ſhould leave his Family at Court to be Pledges of his Fidelity, and that *Aureng-Zeb* ſhould keep in *Doulet-Abed*.

Affairs ſtanding in this Poſture, *Cha-Jehan* fell dangerouſly ill upon this Occaſion: In his declining Years he fancied a young Lady of an extraordinary Beauty, not above 13 Years of Age, and becauſe the Strength of Nature would not permit him to ſatisfie his Paſſion, he took certain Provocatives, which were ſo hot, that they brought him into a Diſtemper, that almoſt killed him. This obliged him to ſhut himſelf up in his *Haram* with his Women for 2 or 3 Months, during which Time he diſregarding the ancient Cuſtom, that the King ſhould ſhew himſelf to the People 3 times a Week, or at moſt in 15 Days, appear'd ſo very rarely to the People, and that at a great Diſtance too, that it was generally believed he was dead, and that *Dara-Cha* concealed his Death to gain Time to provide for himſelf, and ſecure the Empire. This News alarm'd and troubled all *Indoſtan*. Mighty Armies were levied in *Dehly* and *Agra*, the chief Cities of the Empire. Sultan *Sujah* did the ſame in *Bengal*, *Aureng-Zeb* in *Decan*, and *Morad-Bakcke* in *Guzarate*, all 4 aſſembling to themſelves their Allies and Friends. Sultan *Sujah*, who had gathered great Treaſures in *Bengal*, by ruining ſome of the *Raja*'s in thoſe Parts, and extorting great Sums from others, took the Field firſt with a puiſſant Army, and not doubting but that all the *Perſian Omrahs* would join with him, becauſe he had declared for their Sect, boldly marched towards *Agra*, giving it out, that *Cha-Jehan* was dead, being poiſon'd by *Dara-Cha*, and that he reſolved to revenge the Death of his Father, and reign in his Stead. *Cha-Jehan* by the Perſwaſion of *Dara-Cha* wrote to him, to forbid his Advance, and aſſure him, that his Sickneſs was not dangerous, but that he was much better; but he ſtill proceeded, ſaying, He was ſure *Cha-Jehan* was dead, and if not, he was deſirous to kiſs his Feet.

Aureng-Zeb alſo ſoon after takes the Field in *Decan*, and making a great Noiſe, prepares to march to *Agra*; and though he received a Prohibition to the ſame Effect as *Sujah* had, yet he ſtill held to his Deſign, giving the ſame Anſwer; but finding his Treaſure low, and his Soldiers few, he writes to his Brother *Morad-Bakcke*, 'That he had ever been his true Friend, and 'having made Profeſſion of a *Faquire*, he could lay no 'Claim to a Crown, no more than his Brothers *Dara* 'and *Sujah*, who had made themſelves uncapable, by 'being the one a *Kafer*, or Idolater, and the other a '*Rafezy*, or Heretick; and ſo there was none but he 'that could reaſonably pretend to the Succeſſion; and 'if he would come and join with him, he would put 'his Army into his Hands, and aſſiſt him with his 'Counſel and Friends to gain it: And as a Pledge of 'his Friendſhip he ſent him 100000 Roupies, adviſing 'him with all poſſible Speed to ſeize on the Caſtle of '*Surat*, where he knew all the Treaſure of the Land 'was. *Morad-Bakcke* received both the Preſent and Propoſals with Joy, and ſending 3000 Men under the Conduct of *Ghah-Abas*, a valiant Eunuch, to beſiege *Surat*, haſted himſelf with the reſt of his Army to *Aureng-Zeb*, who renew'd his Proteſtations to him, and gave him the Title of a King. Thus he encreaſed his Forces to a formidable Army, and that he might not want Money, he (after he was diſappointed of the Treaſure of *Surat*, either becauſe it was convey'd away by the Governour, or 'twas only a common Fame) contriv'd to get all the Riches of *Emir-Jemla*, who had amaſſed a very great Treaſure to himſelf by the Adminiſtration of Affairs in the Kingdom of *Golconda*, where he was General of that King's Forces, farm'd his Diamond-Mines, and drove a great Trade at Sea. He knew that this Great Man dare not join with him openly, becauſe *Dara-Cha* retained his Wife and Children at Court, as Pledges of his Fidelity, wherefore he perſwades him to counterfeit a Quarrel, and go into Priſon, as if he was under his Diſpleaſure, and then to lend him all his Treaſure, which he might do without Suſpicion. *Emir* conſented to it, either out of Friendſhip or Fear, and all his Forces joining with *Aureng-Zeb*, through large Promiſes, every thing ſucceeded according to his Will; and *Morad-Bakcke*, ſuppoſing all this done for him, cauſed himſelf to be declared King of all his Fathers Dominions, coin'd Money, and ſitting upon his Throne, created Governours of all Cities.

Morad-Bakcke joins with him.

He gets *Emir-Jemla*'s Treaſure.

Morad-Bakcke declares himſelf King.

The Union of theſe Brothers, and their Armies, cauſed great Noiſe at Court, and created many Thoughts in *Dara-Cha*'s Mind, but more particularly diſturbed *Cha-Jehan*, who knew the ſubtle Parts and great Conduct of *Aureng-Zeb*, and Courage of *Morad-Bakcke*; but Sultan *Sujah*, who was more powerful, and was already advanced into the Kingdom of *Labor*, called for his more ſpeedy Care, and therefore he ſent his eldeſt Son *Soliman Chekouh*, with a puiſſant Army, againſt him. *Soliman Cockouh* was about 25 Years of Age, a Prince of a very proper Body and good Parts and Conduct, generous, liberal, and univerſally beloved, eſpecially of *Cha-Jehan*, who therefore ſends with him an ancient *Raja*, called *Jeſſeigne*, with ſecret Orders to prevent a Battle, if poſſible; but the young Prince being full of Heat and Courage, was deſirous to ſignalize himſelf by ſome great Action; and Sultan *Sujah*, fearing leſt *Aureng-Zeb*, gaining a Battle, ſhould make himſelf Maſter of *Agra* and *Dehli*, the 2 Capital Towns of the Empire, was ſo furiouſly bent upon fighting, that the *Raja* could not prevent it. The firſt Onſet was very ſharp and reſolute on both Sides, but at length *Soliman* ſo urged *Sujah*, that he made him flee, and had the Raja ſeconded him, 'tis thought *Sujah*'s Army had been utterly ruin'd, and himſelf taken, but the *Raja Jeſſeigne*, obeying *Cha-Jehan*'s Order, gave *Sujah* Time to retreat, ſo that he ſaved moſt of his Army, and *Soliman* only got the Field and ſome Cannon.

Soliman Chekouh ſent againſt Sultan *Sujah*.

Fights him, and puts him to Flight.

In the mean time, *Aureng-Zeb* and *Morad-Bakcke* kept on their March, and approached *Agra* with great Reſolution, to make themſelves Maſters of it. They paſſed the River of *Brampour*, and the difficult Paſſages over the Mountains, before it was known at *Agra*, and as ſoon as the News of it came thither, it cauſed no ſmall Conſternation; and *Dara* hearing it, ſent ſome Troops under the Command of 2 of his choiceſt Captains, *Kaſem-Kan* and *Jeſſomſeigne*, to diſpute their Paſſage over the River *Eugenes*, which was at that Time fordable, becauſe of the great Heats. *Aureng-Zeb* ſeeing this Oppoſition, play'd his Cannon upon them, partly to amuſe them, and partly to keep them from paſſing the River themſelves, while he refreſh'd his Army 2 or 3 Days after their tedious March, and then appointing his Cannon to play more furiouſly from an advantageous Ground, he ordered his Army to paſs the River. *Kaſem-Kan* and the *Raja* did all they could to hinder their Paſſage, which cauſed a ſharp Diſpute, but at length *Aureng-Zeb*'s Men

Aureng-Zeb's March to *Agra*.

forced their Way, with the Loss of all the *Ragipous*, *i. e.* the *Raja's* Soldiers.

Dara-Cha's Army, and his Fight with *Aureng-Zeb.*

In the mean time, *Dara-Cha* had gathered together a gallant Army, *viz.* 100000 Horse, 20000 Foot, and 4000 Pieces of Cannon, big enough to cut in Pieces 2 or 3 such as *Aureng-Zeb's* was, *viz.* 30 or 40000 Men, tired and harassed, and a small Number of Cannon; but *Dara* was not beloved by the *Omrah's*, who were his Captains, nor Soldiers, and therefore he was advised both by his Father and others to delay the Fight till his Son *Soliman Chekouh* came up with his victorious Soldiers, and more faithful Leaders; but *Dara-Cha* would hearken to no Propositions, being almost sure of a Victory over his Brother's weak and tired Army, and desirous to have all the Glory of it, and so resolved to give Battle presently, and go against *Aureng-Zeb* in Person. The 2 Armies met at *Samonguer*, now called *Fatehabad*, i. e. The Place of Victory, and being drawn up in Order of Battle, *Dara-Cha*, who was mounted upon a proud Elephant of *Ceilon*, commanded to make an Onset on all sides, and himself undauntedly encouraging his Men, and bravely fighting before them, puts *Aureng-Zeb's* Men to flight, and notwithstanding their General did all he could to recall them, saying, *Delirane Kodahe*; Courage, my old Friends, God is with us; he could hardly effect it, till he had given Order, that his Elephant's Legs should be chain'd, to shew his Resolution never to flie, and then they promised to live and die with him. *Dara* in the mean advanced towards *Aureng-Zeb* to encounter him, which he looked upon as the most probable Way to gain Victory, as, indeed, it was; and had he kept to his Resolutions, he must have ruined him: But hearing that *Resinseigne-Routle* with his *Ragipous* were in great Danger, he diverted his Course to relieve them, and resolved to rush thro' all to *Morad-Bakcke*, which had he done, he had repaired his Fault, in leaving *Aureng-Zeb*; but *Calil-Ullah-Kan*, who had treacherously all the while kept back his Men, which were 30000, accosts him thus: *God save your Majesty, You have exposed your Person long enough; Come down from your Elephant, the Victory is yours.* The good Prince not perceiving the Treachery, dismounted his Elephant, and took his Horse. The Army, who were animated all along by *Dara's* Presence, immediately missed him from his Elephant, and supposing he was killed, were struck with such a Terror, that every one thought of nothing, but to save himself, and escape *Aureng-Zeb's* Hands, and thereupon disband and flie. *Aureng-Zeb* encouraged by this wonderful Success, employs all his Art and Dexterity to improve it for his own Advantage. *Calil-Ullah-Kan*, who came over to him with all the Troops he could be Master of, he received with infinite Acknowledgments, and a Thousand fair Promises, yet not in his own Name, but carried him to *Morad-Bakcke*, whom he treated as King, and extolled his Valour, as the only Cause of the Victory; nevertheless, he did not omit with his Uncle *Chah-Hest-Kan*, who came over at the same time, to advance his own Affairs, and secure himself the Favour of the *Omrah's*. *Dara*, after this Battle, fled to *Agra*, and was afraid to see his Father, whose Advice he had despised; but the good old Man, tho' he bad him never see his Face again, if he were overcome, yet sent an Eunuch to him to comfort him, and bid him not despair, since there was so good an Army with his Son *Soliman Chekouh*, but retire to *Debli* to recruit. *Aureng-Zeb* was aware, that his Hopes wholly lay in this Army, and therefore contrived either to take it from him, or make it useless; and to that End, wrote Letters upon Letters to *Raja Jesseigne*, and *Delil-Kan*, the chief Heads of his Army, *That* Dara *had lost the Battle, and his Army had abandoned him, and submitted to him; and tho' he was fled to* Debli, *he could not escape his Hands, Orders being given every where to secure him; That they should take heed what they did, and if they followed his Fortune, and served* Soliman Chekouh, *they should be his Friends.* These Letters stagger'd the Fidelity of *Jesseigne* and *Delil-Kan*; and tho' they durst not attempt to serve *Soliman*, yet he perceived them not to be trusted; and so for his Security, was forced to flie with some of his faithful Friends to the Mountains of *Serenaguer*; and the *Raja* to shew his Barbarity, sent some of his Men underhand to fall upon his Baggage, and to take among other Things an Elephant laden with Roupies, which caused many of his Men to desert him, and return to that *Raja*, and incited the Country People to pillage and kill his Men, yet he made a Shift to get to the Mountains with his Wife and Children, and was civilly received by the *Raja* of *Serenaguer*. Three or 4 Days after the Battle of *Samonguer*, the victorious *Aureng-Zeb* and his Brother *Morad Bakcke* came to *Agra*, and sent an Eunuch, his greatest Confident, to the Castle to *Cha-Jehan* his Father, to salute him with fair Protestations of Affection, and Submission, and assure him, That he was sorry Things had gone so far, but that he was obliged to it to curb *Dara's* Ambition; that he rejoyced to hear that he began to be better, and was come thither to receive his Commands. *Cha-Jehan* was not wanting to express to the Eunuch great Satisfaction in *Aureng-Zeb's* Proceedings, and accepting his Submissions with joy, assured him, that as he had always had a particular Affection for him, so he desired now to see him and embrace him, and that he had Matters of Importance to advise with him about. *Aureng-Zeb*, who was a Crafts-Master at Dissimulation, was not to be outdone in that Art, and therefore, though he gave it out that he would go and see his Father, yet 'twas plain by his Delays he never designed it; but on the contrary, after he had consulted the *Omrahs*, and disposed all Things for Success, sends his eldest Son, Sultan *Mahmoud*, to the Castle, under Pretence of visiting *Cha-Jehan* in his Name, who falling on the Guards that were at the Gates, drove them before him, and got Possession of the Walls, and demanding the Keys of the Castle, at length obtained them, and carried them to his Father. *Aureng-Zeb* thereupon made his Eunuch *Ethar-Kan* Governour of the Fortress, who presently shut up *Cha-Jehan*, together with *Begum-Saheb*, his Sister, and all his Women, causing divers Gates to be wall'd up, that they might not go out of their Apartments, or write, or see any Man. *Aureng-Zeb* having thus assured himself of *Cha-Jehan*, and all his *Omrahs*, took what Sums of Money he pleased out of the Treasury, and leaving *Cha-Hest-Kan*, his Uncle, Governour of the Town, went away with *Morad-Bakcke* to pursue *Dara*.

He puts to flight *Aureng-Zeb's* Army.

His Letters to *Raja Jesseigne* and *Delil-Kan.*

Conquered by Treachery.

Aureng-Zeb improves the Victory.

Raja Jesseigne's Treachery.

The Day that the Army was to march out of *Agra*, the particular Friends of *Morad-Bakcke*, and especially his Eunuch *Cha-Abas-Kan*, who knew that Excess of Civility and Respect is a Sign of Imposture, advised him, That since he was King, and every Body treated him with the Title of Majesty, not excepting *Aureng-Zeb* himself, that he should send him with his Army to pursue *Dara*, and stay himself with some Troops about *Agra* and *Debli*. And, indeed, *Morad-Bakcke* himself began to see his Error in having trusted *Aureng-Zeb* so much, and therefore sending to his Brother for half the Treasure he had seized, desired to return to *Guzurate*. But *Aureng-Zeb* for Answer assured him, that he had no other Design than to advance him to the Throne, and to that End desired to confer with him. *Morad-Bakcke* finding himself pretty well recover'd of the Wounds received at the Battle of *Samonguer*, goes to visit his Brother, who kindly welcomed him, extolled his Courage, and told him, he deserved one of the best Empires in the World, and so charm'd him with this sweet Language, that *Morad-Bakcke*, entirely confided in his Oaths and Promises, and so they marched together to *Debli*. When they were come to *Maturas*, 3 or 4 Days Journey from *Agra*, *Aureng-Zeb* invites *Morad-Bakcke* to a Feast, and was so importunate, that notwithstanding he used all the Excuses he could, he would accept of no Denial, till he had promised him to come. His Friends, smelling out the Plot, endeavoured to perswade him to beware, assuring him, that *Aureng-Zeb* had ill Designs, and that some Mischief was upon the Anvil; but *Morad-Bakcke's* Ears were deaf to all Advice, and so he went to Supper with him. As soon as he was come, *Aureng-Zeb*, who had contrived all Matters with *Mirzah*, and 3 or 4 more of his intimate Captains, and expected him, received him with Embraces and redoubled Courtship and Submission, treating him with the Titles of King and Majesty. The Table being served in, they Sup, and discourse of various Things, as was usual with them; and after all was removed, there was brought in an huge Bottle of excellent *Cirras* Wine, and some other of *Caboul* Wine, for a Debauch. *Aureng-Zeb*, like a strict *Mahometan*, invites him to drink freely, and departs; and *Morad-Bakcke*, loving a Glass of Wine, drank to Excess, and being drunk, fell asleep, which was the Thing wish'd for, and immediately his Servants were commanded away, under a Pretence of giving him no Disturbance, and his Zabre and Poniard were taken away. Not long after came in *Aureng-Zeb*, and waking him with a Kick,

Kick, said, *What a Shame is it for such a King as you are to be drunk? What will be said both of you and me? Take this Drunkard, and tie him Hand and Foot, and throw him into that Room to sleep out his Wine.* This was no sooner spoke but it was executed by 5 or 6 Persons provided on purpose, notwithstanding his Outcry and Appeal. Some of the Men that heard it, mutiny'd, but were calm'd by *Allah-Couli*, one of the chief Captains, who was before gain'd to his Side, and to prevent any further Commotions in the Army, Gifts were carried about all Night, and every Man's Pay advanced: and so all was quieted by the next Morning. *Morad-Bakske* was the next Night shut up in a little close House, and carried on an Elephant to the Castle of *Slimager* at *Dehli*, and from thence to the Castle of *Gonaleor*.

Aureng-Zeb receives the whole Army of *Morad-Bakske* into his Service, and went after *Dara-Cha*, who was got into *Lahor*, and intended to fortifie it, and draw his Friends thither to him; but *Aureng-Zeb* followed him so fast, that he could do little there, but was forced to take the Road to *Multan*, and so came to *Tatanaker*, where having put in a gallant Eunuch for Governour, and a good Garrison of *Patans* and *Sayeds*, and for Cannoneers a good Number of *Franks*, he hasted to *Amadavat*, where he was entertained by *Cha-Navaze-Kan*, the Father-in-Law of *Aureng-Zeb*, very friendly, either through Fear or Design, but his Friends supposing the latter, warned him not to trust him. *Aureng-Zeb* was disturbed when he heard, that *Dara-Cha* was in *Amadabat*; but because Sultan *Sujah*'s Army had passed the *Ganges*, and was coming towards him, he was forced to let *Dara-Cha* rest at *Amadabat*, and put a Stop to Sultan *Sujah*'s Progress. Sultan *Sujah* was encamped at a little Village, called *Cadjoue*, and had seiz'd of a large *Talab*, or Reservatory of Water. *Aureng-Zeb* was no sooner arrived, but, being impatient to end the War, he fell upon *Sujah* with an Effort unimaginable. *Emir-Jemla* now, not fearing *Dara*, because his Family was in Safety, came hither to assist him, and did it with all his Force, Courage and Dexterity. Sultan *Sujah* had so well fortified himself, and placed his Artillery so advantageously, that it was not possible for *Aureng-Zeb* to force him; yea, he was so vigorously repulsed, that he was forced to retreat. At the same time *Raja Jessomseigne* falls upon his Rear, so that he was reduced to very great Extremity, his Army being put into great Disorder, and himself forced to lead his Elephant, because the Driver was shot. Here it was that Fortune seem'd to abandon *Aureng-Zeb*, and 'twas almost impossible to escape; but a stronger Fate attended him, and he must still be victorious, and be King of the *Indies*, which thus came to pass: One of *Sujah*'s Captains, named *Allah-Verdi-Kan*, who (as some say) had been gain'd to *Aureng-Zeb*'s Party, seeing his Army in Disorder, ran to Sultan *Sujah*, and told him, as *Calil-Ullah-Kan* did *Dara*, *That he was Victor, and besought him to come down from his Elephant, and expose himself no longer to Danger. Sujah*, not considering the Counsel, comes down from his Elephant, and his Army, supposing him either slain or taken, was striken with Terror and fled, the Sultan himself in the Confusion hardly escaping. *Jessomseigne*, seeing the Mishap, contented himself with what Spoil he had gotten, and marching streight to *Agra*, fled into his own Country.

The News at *Agra* was, that *Aureng-Zeb* was defeated; and had *Jessomseigne* acted vigorously and threatned boldly, he might have easily freed *Cha-Jehan* from his Imprisonment, but his Fears paul'd both his Wit and Courage, and all his Thoughts were to secure himself: Yet *Aureng-Zeb* was not without some Jealousie of such an Attempt, and therefore stopping Pursuit, he hasted to *Agra*, where he staid a good while with his whole Army. While he abode here he received Intelligence, that Sultan *Sujah* had lost but few of his Men in the late Rout, and that having gather'd them together, and having gotten more Forces out of the Countries of the *Raja's* thereabouts, he had fortified himself in *Elabas*, an important and famous Passage of *Ganges*, which, with its Fortress, is the first Inlet into *Bengal*, whereupon he sent Sultan *Mahmoud*, his eldest Son, and *Emir-Jemla*, with a puissant Army, against him. Sultan *Sujah* fear'd nothing more than to have to do with *Emir-Jemla*, and had no sooner received the News, but apprehending that the *Emir* would pass the *Ganges* higher or lower, he left *Elabas*, and going down to *Benares* and *Patna*, he took himself to *Mogiere*, a small Town on the *Ganges*, but the Key of *Bengal*; but when he heard here, that the *Emir* and Sultan *Mahmoud* was coming against him with all the Flower of the Army of *Aureng-Zeb*, he left *Mogiere*, and fortified *Rage-Mehalle*, and staid there for the Coming of the *Emir*, who so battered his Fortifications with his Cannon, that he was forced to leave it; and Winter coming on, the *Emir* was confined for 4 Months there, while *Sujah* provided himself.

In the Current of these Affairs, Sultan *Mahmoud* being grown fierce and aspiring, claimed the Command of the Army absolutely, and that *Emir-Jemla* should follow his Orders; speaking insolently, as if his Father were beholding to him for the Crown, and threatning *Emir-Jemla*. These Things displeased his Father, and fearing lest he should order the *Emir* to seize his Person, he fled to Sultan *Sujah*, to whom he made Promises of Fidelity; but he not daring to trust him, because of *Aureng-Zeb*'s and *Emir-Jemla*'s Snares, *Mahmoud* was disgusted, and returned to the *Emir*, who had promised to make his Peace with his Father; but *Aureng-Zeb*, who was jealous of him, and wanted a specious Pretence to put him in a Place of Surety, would not let this Opportunity pass, and therefore sending him a severe Letter to come to *Dehli*, ordered him to be surprized by the Way, and carried into the Castle of *Gonaleor*, where 'tis thought he will remain for his Life.

Aureng-Zeb having kept himself about *Agra*, going to and fro hitherto, at length, after he had sent *Morad-Bakske* to *Gonaleor* to his Son, he removed to *Dehli*, and there took upon him publickly to act the King, and order all Affairs of the Kingdom, contriving how to catch *Dara-Cha*, and establish himself firmly, which he happen'd to do on this Occasion: *Jessomseigne* being retired into his own Country, raised a strong Army, and wrote to *Dara*, who by this time had muster'd together many of his Friends to meet him at *Agra*, where he need not doubt of further Assistance. *Dara-Cha* liking the Proposal, and not doubting of Success so long as *Jessomseigne* was with him, immediately left *Amadavat*, and marched with all Speed to *Asmire*, which is within 7 or 8 Days Journey of *Agra*; but before they could get together, *Raja Jessomseigne* interposed, and representing the Danger of the Action to *Jessomseigne*, by telling him, 'twas fully to espouse *Dara*'s Party, who was in Extremity, and fall under the Displeasure of *Aureng-Zeb*, to the Ruine of himself and his Family, so wrought upon that *Raja*, that he returned into his own Country, and left *Dara* to shift for himself with *Aureng-Zeb*'s Army, which in the mean time was come in Sight of him. *Dara* being left in this Strait, that he was neither able to fight *Aureng-Zeb*'s Force, nor yet safely retreat, resolved rather to fight, than expose his Men by Flight. The Fight began the next Morning, and though his Cannon were well placed, yet they did no Execution, because they were charged without Bullets. The Battle lasted not long, but *Dara* was forced to flie with his Wife and Family, and leave his Army to shift for it self. He made a Shift to get as far as *Amadabat*, and hoped there to refresh himself, and repair his Misfortunes; but the Governour in his Absence having received menacing Letters from *Aureng-Zeb*, denied him Entrance, so that he was forced to flie through Sundy Desarts in the hottest Season, where no Water was to be found, to *Raja Katche*. He lost in this Journey many of his Camels and Oxen, and some of his Women, besides many of his Retinue, partly by the Tediousness and Length of it, and partly by the *Koulli*, who robb'd and plunder'd them in the March, and happy had it been for him that he had met with the like Fate; for though this *Raja* gave him a very good Reception, and promised to assist him with all his Forces, provided he would give his Daughter in Marriage to his Son; yet being tampered with by *Raja Jessegne* soon after, his Kindness so visibly cool'd, that *Dara* found 'twas no longer safe to trust his Person there, and so fled to *Tatabakar*: But Misfortune still pursued him, for finding this Place besieged, and ready to be taken by *Mirbaba*, one of *Aureng-Zeb*'s Generals, he thought it in vain to try to raise the Siege by his small Forces, though the Besieged bravely attempted to get him in, and put forth extraordinary Strength to further his Designs, which possibly might have succeeded, if he had dared to try; he bethought himself of a safe Retreat with a *Patan* Prince, *Gian-Kan*, whose Life he had twice saved, when his Father had ordered him to be cast to the Elephants for rebelling, and so he resolved to go to him, hoping to get such Assistance from him, as might en-

enable him to raiſe the Siege of *Tatabakar*, where his Treaſure was, by which he might get more Friends and Help. His Grand-Child *Sepe-Chekoub*, with his Wife and Children, beſought him not to venture himſelf in the Hands of the *Patan*, but rather endeavour to gain *Caboul*, where he might hope for more Friends and good Help from *Mohabet-Kan*, the Governour of it, who was both powerful and valiant, and had been preferr'd to that Station by himſelf; but *Dara-Cha* rejected this Council, and would try *Gion-Kan*'s Kindneſs, which proved indeed fatal; for tho' this Robber receiv'd him civilly at firſt, becauſe he thought he had numerous Troops following him, yet when he found his Retinue not above 300, he fell upon *Dara-Cha* and *Sepe-Chekoub*, ſeized upon their Money and Jewels, and having killed thoſe that ſtood up in their Defence, tied them on an Elephant, with an Executioner behind them, to cut off their Heads at the leaſt Sign, if they ſhould rebel, and ſent them to *Mirbaba*, who lay with his Army before *Tatabakar*, and by him he was ſent in the ſame Poſture to *Dehli* to *Aureng-Zeb*. When he was at the Gates of *Dehli*, it was deliberated by *Aureng-Zeb*, whether he ſhould be ſent immediately to *Goualeor*, or being carried through the City, to ſatisfie all the People that it was he, be put to Death to ſtop all Commotions, the latter was agreed upon and reſolved, becauſe *Aureng-Zeb* had been informed, that the People much pity'd *Dara*'s Condition, and curſed the *Patan* Prince for betraying him; and ſo his Execution was committed to a Slave, called *Nazer*, who had been ill treated by *Dara*, and being accompanied with 4 or 5 more Parricides, cut off his Head in Revenge. His Head was carried into the Fortreſs to *Aureng-Zeb*, who commanded it to be waſhed and put in a Diſh, that he might ſee that 'twas his; and when he was ſatisfied, he ſaid, *Ah Bed-Bakt!* i. e. *Ah! Unfortunate Man!* and then had it be taken away, and buried in the Sepulchre of *Houmayon*. After this, *Sepe-Chekoub* was ſent to *Goualeor*, *Dara*'s Daughter was brought to the *Seraglio*, but after was ſent to *Cha-Jehan* and *Begum-Saheb*. *Dara*'s Wife, foreſeeing the Calamities coming upon her Family, had poiſon'd herſelf at *Labor*. *Gion-Kan* was ſent for to Court, and rewarded for his Treachery, but was killed in the Woods as he went home.

Gion-Kan betrays him to Aureng-Zeb.

There now remained none of the Family of *Dara-Cha* alive, or to be fear'd, but *Soliman-Chekoub*, who remained in *Serenaguer*, and could not be taken from thence, if the *Raja* continued his Protector; but by the Art of *Raja Jeſſeigne*, who was ſent to win him either by Promiſes or Threats, his Faith was ſhaken, and he agreed to reſign him: But *Soliman-Chekoub* being advertiſed of it, fled through the Deſarts towards *Tibet*, but being purſued by the *Raja*'s Son, was taken and carried to *Dehli*, where *Aureng-Zeb* cauſed him to be brought before him in the Preſence of all the Grandees at Court, who beheld him with Tears, and then ſent him to *Goualeor*, where he was ſoon after diſpatched, with *Sepe Chekoub*, by drinking the *Pouſt*, i. e. a Potion made of Poppies, ſqueez'd and infus'd in Water, which being drunk, emaciates and makes Men die inſenſibly, by taking away their Strength and Underſtanding.

Soliman-Chekoub betrayed to Aureng-Zeb.

Morad-Bakeke put to Death.

Morad-Bakeke's Death was more violent, becauſe the People were inclined to him, and much extolled his Valour and Courage; and therefore the Children of a certain rich *Sayed*, whom *Morad-Bakeke* had cauſed to be put to Death, to get his Eſtate, when he firſt made Preparations for War, were encouraged to appear in a full Aſſembly, and demand Juſtice for the Blood of their Father. None of the *Omrahs* durſt contradict it, becauſe he was a *Sayed*, i. e. One of *Mahomet*'s Kindred, and becauſe they knew *Aureng-Zeb*'s Deſign, and ſo his Head was granted to them without any further Proceſs, and was immediately cut off in *Goualeor*.

And now there remained no other Thorn in *Aureng-Zeb*'s Foot, but Sultan *Sujah*, who kept himſelf in *Bengal*, and held out a long time againſt the Forces of *Emir-Jemla*, but at laſt ſeeing it impoſſible to hold out any longer, he fled with his Son Sultan *Banque* to the King of *Aracan* or *Moy*, who, tho' an Idolater, gave him a kind Reception, and promiſed him at the Seaſon to lend him a Ship to carry him to *Mecca*; but being either taken with *Emir-Jemla*'s large Promiſes of great Sums, if he would deliver him up to him, or offended at his Denial of his Daughter to be given in Marriage to his Son, he became unkind, and denied him a Veſſel; ſo that he was forced to provide for his Safety by flight into *Pegu*; but being purſued, his Son Sultan *Banque* with his Mother, 2 little Brothers and his Siſters were taken, and he with one Woman, an Eunuch and 2 other Perſons eſcaped to the Mountains, where, 'tis probable, he was ſtarved, or torn in pieces by the Lions and Tigers, which abound there, for he has never been heard of ſince; and ſo *Aureng-Zeb* after 5 or 6 Years War, *viz.* from 1655, to 1661, was left in quiet Poſſeſſion of the Throne. Some Days before his enthronizing, he ſent to his Father to ſend him ſome of his Jewels, to the End he might appear before his People with the ſame Magnificence, as his Predeceſſors had done; but *Cha Jehan* taking this Requeſt of his Sons as an Affront put upon him in Priſon, fell mad, and in the Exceſs of his Vexation, would have beat all his Jewels to Powder, had not *Begum-Saheb* prevailed with him to ſave them, more for her ſelf than *Aureng-Zeb*, whom ſhe mortally hated; ſo that *Aureng-Zeb* was forced to aſcend the Throne with but One Jewel on his Bonnet. The Throne, which he was to ſit on, was ready prepared by *Cha-Jehan*, who finiſhed it juſt before his Impriſonment: It was begun by *Tamerlane*, and being compleated, was the richeſt and moſt magnificent One that ever was ſeen; but in his Aſcent to it, he met with ſome Difficulty; for the Grand *Cadi* of the Empire, and Chief of the Law, whoſe Office it is to proclaim the new King, told him, *That the Law of* Mahomet, *as well as that of Nature, equally forbad him to declare him King while his Father lived, who had beſides made his Way to it by putting his elder Brother to Death, whoſe Right it was after the Death of* Cha-Jehan *their Father.* This ſtout Reſiſtance of the *Cadi* perplexed *Aureng-Zeb*, but calling together the Doctors of the Law, he told them, His Father was through Age and Infirmity unfit to govern, and that *Dara-Cha* was put to Death becauſe he was a Breaker of their Law, and favoured Infidels, and therefore the Empire belonged to him, from which ſince the *Cadi* obſtinately refuſed to inaugurate him, he ought to be removed as a Diſturber of the publick Peace, and another choſen for the Honour of the Law: The Council either convinced or terrified, yielded, and a Perſon elected, proclaimed him King, *Octob.* 20. 1660. It was made in the Moſque, and then *Aureng-Zeb* ſeated himſelf upon the Throne, and received the Homage of all the Grandees of the Kingdom.

Aureng-Zeb proclaimed King.

When *Aureng-Zeb* had thus gotten Poſſeſſion of the Throne, he would not eat any Wheaten-Bread, nor Meat, nor Fiſh; but fed upon Barley-Bread, Herbs and Sweet-Meats, and lay on the Ground on a Tyger's Skin, as a kind of Penance which he impoſed upon himſelf for ſo many Crimes committed in the obtaining it, and held in this Reſolution ſo long, that he much impaired his Health by it.

When *Aureng-Zeb* was thus ſettled in the Empire, ſeveral Ambaſſadors came to *Jehanabat* to congratulate him on the Behalfs of the Kings their Maſters, as from the 2 *Kans* of the *Usbec Tartars*, the Son of *Mecca*, the Prince of *Balſora*, and the Kings of *Arabia Felix* and *Æthiopia*, preſenting him with the Rarities of their Countries. He, though he was not pleaſed with ſome of them, yet received them kindly, and diſmiſs'd them well ſatisfied. The *Hollanders* alſo ſent M. *Adrican*, Chief of their Factory in *Surat*, who was kindly received, and diſpatched firſt, though 'tis a Piece of State in the *Indies* to keep Ambaſſadors a good while at Court, and *Aureng-Zeb*, affecting to appear a zealous *Mahometan*, deſpiſes the *Franks*, or Chriſtians.

Ambaſſadors from the Kings of Arabia, the Great Mogul.

Before all theſe Ambaſſadors were departed from *Dehli*, *Aureng-Zeb* fell exceeding ſick with a violent Fever, which diſordered his Underſtanding, and ſo affected his Tongue, that he could hardly ſpeak, ſo that the Phyſicians for a time deſpaired of his Recovery, and it was bruited abroad, that he was dead, but that his Siſter *Rachemera-Begum* conceal'd his Death out of Deſign. Sultan *Mazum* made his Intereſt with the *Omrahs*, and 'twas thought that *Jeſſomſeigne* and *Mohabet-Kan* would releaſe *Cha-Jehan*; and 'tis certain, *Rachemera-Begum*, and *Teday-Kan*, the Great Maſter of the Artillery, with many *Omrahs*, declared for the young Prince Sultan *Ekbar*, the 3d Son of *Aureng-Zeb*, tho' not above 7 or 8 Years old. But tho' *Aureng-Zeb* was very ſick, yet he ordered all Things, and particularly ſecured that his Father *Cha-Jehan* ſhould be kept ſafe, and to prevent all falſe Reports of his Death, and ſuch Tumults as might proceed from it, he cauſed himſelf on the 5th Day, in the Height of Sick-

Aureng-Zeb falls ſick.

Sultan Sujah flying thro' the Deſarts is ſtarved.

Aureng-Zeb shews himself to his Subjects.

Sickness, to be carried in a full Assembly of the *Omrahs*, and so he did on several other Days, till he recovered. Soon after his Recovery, he sought to marry Sultan *Eckbar*, his 3d Son, to *Dara*'s Daughter; but not only *Cha-Jehan* and *Begum* rejected the Proposition, but the young Princess protested she would kill her self an Hundred times over, rather than marry the Son of him that had murdered her Father.

About the same time one of *Aureng-Zeb*'s considerable *Omrahs* addressed himself to him, desiring him to avoid the Variety of perplexing Affairs, which took up his Mind too much, and would alter his Temper, and incommode his Health: But he replied, *That the same Providence that raised him to the Crown, engaged him to procure the Good and Safety, Tranquility and Happiness of his Subjects, so far as it may be obtained by Justice and Power; Kings cease to be Kings, when they do not govern their Kingdom themselves; and then advised him to take Care of the faithful Discharge of his Place, and not meddle again so far as he had done.*

A Eunuch in Love with a Maid.

Not long after this happen'd an Accident that made a great Noise at *Dehli*, and especially in the *Seraglio*. *Dilar-Kan*, one of the Chief of the Eunuchs of the *Seraglio*, fell in Love with a beautiful Woman, a Scrivener's Sister, that was an Heathen, and growing very familiar, the Scrivener's Neighbours rally'd him for it, who thereupon threatned, that if they continued their Commerce he would kill them; but they not regarding his Words, he not long after found them in Bed together, and stabb'd the Eunuch out-right, leaving his Sister for dead. The whole *Seraglio*, both Men and Women, made a League to revenge his Death; but *Aureng-Zeb* prevented them, by accepting it, that he should turn *Mahometan*: Yet 'tis thought he cannot pass the Power of the Eunuchs, who are more vicious for being gelt, and insolent, though sometimes they shew admirable Fidelity. *Aureng-Zeb* also conceived some Displeasure against *Raebenara-Begum*, who was suspected of an unlawful Conversation with 2 young Men in the *Seraglio*, but having no full Proofs, he passed it by without any great Resentment.

Ambassadors from divers Places.

Some Months after this there arrived several Ambassadors at *Dehli*, *viz.* from the *Xeriff* of *Mecca*, King of *Hyeman* and Prince of *Balsora*, who brought a great Present of *Arabian* Horses; but these were not much regarded, because 'twas thought they came under that Pretence to merchandize without paying any Customs or Impost; but the Ambassie from the King of *Æthiopia*, a Christian King, was more respected, for *Aureng-Zeb* not only presented them richly with Roupies and Vests for themselves, as also a rich one, 2 great Silver and gilt Trumpets, Two Silver Tymbals, a Poynard covered with Jewels, and 20000 *Franks* in Gold and Silver Roupies for their Master; but sent for them twice to inform himself of the State and Government of their Country, and principally to learn something about the Source of the *Nile*, which they call *Ababile*, of which they gave so clear an Account, that none could doubt of their Knowledge of it, *viz.* That it had its Origin in the Country of *Agaus*, and rose in 2 large bubbling Springs near one another, which formed a small Lake of 30 or 40 Paces long; that coming out of this Lake it made a considerable River, and being further encreased by several small Rivers falling into it, it circled about, and made as it were a large Isle, till it tumbled down some steep Rocks into another large Lake, in which are divers fruitful Islands, store of Crocodils, and an abundance of Sea-Calves, which have no other Vent for their Excrements, but their Mouths; and that this Lake is in the Country of *Dambra*, 3 small Days Journey from *Gondar*, the Metropolis of *Æthiopia*, and 4 or 5 from the Source of it. From this Lake it breaks out very large, because augmented with many Rivers and Torrents falling into it, and so runs through *Sonnar*, the Capital City of the King of *Tunis*, or *Barbary*, a Tributary Prince to the King of *Æthiopia*, and so making *Cataracts*, passeth into *Ægypt* through the Plains of *Mesor*. The Cause of its Inundation is the Rainy Season, which regularly begins in the *Indies* about *July*, and filling the last Lake, causeth the Overflowing of the *Nile*, which by Computation agrees to the Time. He also enquired after the State of *Mahometanism* in their Country, and finding it to encrease, gave them an *Alcoran*, and 8 others Books, the best reputed of in the *Mahometan* Religion, with 2000 Roupies for their Interest with the King of *Æthiopia* to rebuild an old Mosque, which was built for the Tomb of a great *Dervis*, who had propagated *Mahometanism* in *Æthiopia*.

Of the Source of Nile.

The Cause of its Inundation.

Very strange Things for the Ambassadors of a Christian King to do; but the Truth is, Christianity in *Æthiopia* is a very odd Thing, and favours much of *Mahometanism*.

Christianity in Æthiopia, what.

While these Ambassadors remain'd in *Dehli*, *Aureng-Zeb* called together a Council of the greatest and most learned Men of his Court, to chuse a new Master for his 3d Son Sultan *Eckbar*, whom he designed for his Successor; and here he shew'd a mighty Passion for the good Education of Princes, and that Kings, who surmount others in Greatness, should also exceed them in Vertue and Knowledge, because it is to be imputed to the Want of this Education, that the Kingdoms of *Asia* are so unpeopled and miserable, the Kings being brought up usually among Women and Eunuchs, of whom they learn nothing but Luxury and Vice, and so when they come to reign know no Way to rule but by Cruelty, which he lamented in himself, and was resolved to prevent it in his Son. How much he regreted the want of Learning in himself may appear from this remarkable Story. *Mullah-Sale*, his Tutor, hearing of the great Fortune of *Aureng-Zeb*'s Conduct, came in haste to Court, swell'd with the Hopes of being presently advanced to no less than the Dignity of an *Omrah*. He made his Court, and had the Interest of *Raebenara-Begum*, the King's Sister, but the King would not for 3 Months regard him; but at length, being tired with his Attendance, he took him apart with 5 or 6 of his most learned *Omrahs*, and thus spoke to him, *What would you have of me, Doctor? Can you reasonably expect that I should make you one of my chief* Omrahs? *Had you instructed me as you ought, nothing had been more just; for a Child well educated owes as much to his Master as Father: But you have taught me only a little false Geography,* (viz. *That* Frangestan *(i. e.* Europe*) is but a little Isle, possessed by a few petty Kings like our* Raja's, *and that* Indostan *was far above them altogether) and the* Arabian *Tongue, to read and write, as if it were an Accomplishment to a King to be a Grammarian, neglecting the Instructions about the Religions, Governments, Customs and Interests of other Nations, the Duty of Princes to Subjects, and Subjects to Princes, with other most important Points; so that I lost my Time only with you, and learnt nothing profitable. Go Home therefore and retire to the Village from whence you came, and let no Body know who you are, or what's become of you*; and so he departed.

Aureng-Zeb loves Learning.

Other most memorable Actions which *Aureng-Zeb* did in the Time of Peace, may be reduced to 5 or 6 Particulars, which follow:

His Treatment of his Father.

1. How he used his Father *Cha-Jehan*, whom he still kept in Prison, and had him kept with all imaginable Care and Caution. He treated him with the Respect of a Father, and some of the Honour of a King; for he left him in his old Apartments with his Daughter *Begum-Saheb*, his other Women, Singers, Dancers, Cooks, and others, and suffered him to want nothing convenient for his Greatness and Power, but a Power to govern. He allow'd also certain *Mullahs* to go to him, and read the *Alcoran* to him (for he was grown very devout.) He ordered also, that when he thought fit, he might have some of his finest Horses brought before him, and likewise tame Gazels (which are a kind of Goat) to fight one with another to divert him, as also divers sorts of Birds of Prey, and several other Animals, to divert him: He also sent him many Letters, full of Respect and Submission, consulting him as an Oracle, and expressing a Thousand Cares for him, and now and then sending him some pretty Present; by all which Things he conquer'd the Obstinacy of *Cha-Jehan*'s Temper, which he retain'd a long time even in Prison, and gain'd so much upon him, that he often wrote to *Aureng-Zeb* about the Government and State of Affairs, and of his own Accord sent him some of those Jewels, which he threatned to break in Pieces with Hammers, if ever he ask'd for any of them again. He likewise consented, that the Daughter of *Dara*, which he had so peremptorily denied, should be delivered to him, and granted him at length that Pardon and Benediction which he had so long sued for in vain, being contented with his own Confinement and Son's Greatness.

Cha-Jehan reconciled to *Aureng-Zeb*.

Of *Emir-Jemla*.

2. How he dealt with *Emir-Jemla*. This Great Man, after he had dispatched the Affairs of *Bengal* with Sultan *Sujah*, like a great Captain and dexterous Politician, pursuing him to the Sea-side, and making him flie to escape his Hands, sent an Eunuch to *Aureng-Zeb*, desiring Leave that he might settle his Wife and Children in *Bengal*, and spend the Remainder of his

his Days in Quiet. *Aureng-Zeb*, knowing in how great Credit and Reputation the *Emir* was, both in *Bengal* and in the Army, and being ſenſible of his ambitious Deſign, if not of aſpiring to the Crown, yet of ſecuring *Bengal* at leaſt to himſelf and Son, which is one of the beſt Kingdoms of *Indoſtan*, and upon theſe Accounts it was almoſt as unſafe to deny him, as grant him, contrived this Way of managing him. He maketh the *Emir* a *Mir-Ul-Omrah*, which is in that Empire the greateſt Degree of Honour that a Favourite can be raiſed to, and his Son *Mahmet Emir-Kan* the Great *Backſi*, i. e. Great Maſter of the Horſe, both which Offices oblige the Poſſeſſors of them to be always at Court, and attend, unleſs upon very extraordinary Occaſions, the Perſon of the King. The *Emir* ſoon perceived, that the Emperor had skillfully put off his Stroïk, and being loth to give him Offence, he reſolved to reſt content with theſe Teſtimonies of his Friendſhip, with the Government of *Bengal*; only at the ſame time to be upon his Guard, that ſince he could not outwit *Aureng-Zeb*, the King ſhould not over-reach him. Thus Things remained for a whole Year, till the King conſidering, that ſo great a Captain could not lie ſtill, propoſed to him to make War upon that rich and potent *Raja* of *Acham*, whoſe Territories are upon the North of *Dake*, upon the Gulf of *Bengal*. The *Emir*, who had deſigned the ſame Thing, thinking that he might thereby make his Honour immortal, and hoping to carry his Arms as far as the Kingdom of *China*, declared himſelf ready for the Enterprize; and embarking at *Dake* with a puiſſant Army, arrived at a Caſtle called *Azo*, which the *Raja* of *Acham* had taken from the Kingdom of *Bengal*, and unjuſtly detained many Years, and took it in 15 Days by Force. Then he marched to *Chamdara*, which is the Inlet into the *Raja*'s Kingdom, where the *Raja* received him with an Army, which joined Battle with the *Emir*'s immediately, but was worſted, and the *Raja* himſelf was forced to flie to *Guerguon*, the Metropolis of the Kingdom. The *Emir* and his Men pillaged *Chamdara*, but purſued the *Raja* with ſuch Expedition, that he had no Time to fortifie himſelf in it, and ſo was forced to leave it, and retire into the Mountains of the Kingdom of *Laſſa*. *Guerguon* thereupon became a Spoil to the *Emir* and his Men, and they found great Riches in it; but the Rains coming on ſooner than uſual, by which the Country was overflow'd, his Army was reduced to ſo great Straits for Lodging and Proviſion, that he was forced to give over his Deſign, and go home again the ſame Way he came, and that with ſo much Difficulty, that had not his Patience and Conduct been incomparable, he had periſh'd himſelf and his Army; but, notwithſtanding all theſe Difficulties, he made a Shift to come back again with great Honour and vaſt Riches. The next Year he reſolv'd to purſue his Undertaking; but he was no ſooner arrived there, but Fluxes began to rage in his Army: Neither had he a Body of Steel more than the reſt, for he fell ſick and died, which not only put an End to the Apprehenſions of *Aureng-Zeb*, who was hardly accounted King of *Bengal* ſo long as he lived, but eaſed him of all his Jealouſies, which he thus expreſſed to his Son, *Mahmet Emir-Kan, you have loſt your Father, and I the greateſt and moſt dangerous Friend I had:* Yet he comforted him with the Aſſurances of his Favour, and left him Heir of all the Eſtate of his Father, although the Cuſtom of the Country empower'd him to ſeize on all.

He prefers him and his Son.

He is ſent againſt the King of Acham.

He wanquiſhes the Raja.

He dies.

3. Concerning *Cha-Heſt-Kan*, whom *Aureng-Zeb* made firſt Governour of *Agra*, when he went to the Battle of *Cadjoue*, then General of his Army in *Decan*, and laſt of all Governour of *Bengal*, and *Mir-Ul-Omrah* after *Emir-Jemla*'s Death. He was Uncle to *Aureng-Zeb*, and one that had much contributed to his Happineſs by his eloquent and skilful Pen, as well as by his Intrigues and Counſels, and in his Government atchieved a great Thing, for which he will be ever renowned, and ſo much the more, becauſe *Emir-Jemla*, whether out of Policy, or any other Cauſe, never dare attempt it. It was this: In the Kingdom of *Rakan*, or *Moy*, there had been for many Years a great Number of Chriſtian Slaves, *Portugueſes*, *Franguis*, and other Runagadoes from *Goa*, *Ceilan*, *Cochin*, *Malague*, and other Places, who had abandoned their Monaſteries, Men twice or thrice married, Murtherers, and led a moſt deteſtable Life, butchering and poiſoning one another, and aſſaſſinating their own Prieſts, who were not much better than themſelves. Their ordinary Trade was Robbery and Piracy. The King of *Rakan* made them a Guard for his Frontiers, and giving them Lands, allowed them Liberty to live as they pleaſed in a Port Town, called *Chategan*: They had ſome ſmall light Gallies with which they coaſted about that Sea, and entring into *Ganges* and other Rivers, took whole Towns of the poor *Gentiles* Captives, and depopulated many Iſles, ſelling ſome of the People for Slaves to the *Portugueſe* at eaſie Rates, and keeping others for their own Service, in Rowing and other Drudgery. Theſe were the Pirates for whoſe ſake *Cha-Jehan* demoliſh'd the Jeſuits Churches at *Agra* and *Labor*, becauſe he was very angry with the Chriſtians of *Ogouli*, that they connived at theſe Pirates, and by their Means filled their Houſes with Slaves of his Subjects; for, after he had with many fair Words, and Menaces drawn from them, as much Money as he could, he waſted and utterly ruin'd them, carrying them Captives to *Agra*, where he put their handſome Women into the *Seraglio*, given their old Women to their *Omrahs* and others, cauſing their young Lads to be circumciſed and made Pages, and the Men of Age Slaves, and all to renounce their Faith; being either terrified by Threatnings, that they ſhould be trampled upon by the Elephants, or invited to it by large Promiſes. Theſe are the ſame Pirates, who ſometime before the Deſtruction of *Ogouli*, offered the Vice-Roy of *Goa* to betray the whole Kingdom of *Rakan* to the *Portugueſe*, but he refuſed it, leſt a certain *Baſilian Conſalve*, who was Head of them, and was become ſo conſiderable, that he married one of the King's Daughters, ſhould have the Honour of that piece of Service. Theſe were the Pirates that took the Iſle of *Sondiva* much about the ſame Time, which lies at the Mouth of the *Ganges*, where an *Auguſtine* Fryar acted the King over them for many Years. Theſe Robbers took Sultan *Sujah* at *Dake*, and carrying him to the Galeaſſes at *Rakan*, open'd his Coffers and plunder'd him of his Jewels, which they ſold privately to the *Hollanders*, under the Name of ſoft Diamonds at cheap Rates. Laſtly, Theſe Pirates were a great Charge to the *Mogul* in *Bengal*, obliging him to keep a ſtrong Militia, and a Fleet of Galeaſſes to prevent their Ravaging, and all with little Succeſs, becauſe they were more skilful at their Weapon, and dextrous at Piloting their Galeaſſes than his own Men, ſo that they did much Miſchief to his Subjects. *Cha-Heſt-Kan* caſt his Eyes upon theſe Pirates, as ſoon as he came into *Bengal*, and took up a Reſolution to deliver the Country from this Plague of People, that had ſo long waſted it, deſigning to attack the King of *Rakan* afterward, according to the Order of *Aureng-Zeb*, to puniſh him for his cruel Uſage of Sultan *Sujah* and his Family. To effect this Deſign of his, he found it neceſſary to engage the *Hollanders* in it, becauſe it was impoſſible either to carry ſufficient Forces by Land, and tranſport them by Sea out of *Bengal* to *Rakan*; and upon that Account he ſent a kind of an Ambaſſador to treat with the General of *Batavia*, upon certain Conditions, jointly to ſubdue the whole Kingdom of *Rakan*, as *Cha-Abbas* did *Ormus* by the Help of the *Engliſh*. The General finding the Thing poſſible, and that it would not only weaken the *Portugueſe*, but turn to the Advantage of his Company, diſpatched away 2 Men of War to *Bengal*, to aſſiſt *Chab-Heſt-Kan* in tranſporting his Forces in ſpight of the Pirates, but in the mean time he had equipped a great Number of Galeaſſes, and other Veſſels, to tranſport his Army, and threatned them with Deſolation, unleſs they would abandon the Service of the King of *Rakan*, and aſſiſt *Aureng-Zeb* in taking his Kingdom, which if they would do, he would procure them very good Conditions, and diſtribute among them as much Land in *Bengal* as they deſired, and give them double Pay. It happen'd about the ſame Time that theſe Pirates had aſſaſſinated one of the chief Officers of the King of *Rajan*, and fearing to be puniſh'd for his Crimes, they eagerly embraced theſe Promiſes, and ſhipped themſelves, their Wives, Children, and every Thing that they had valuable, in 40 or 50 of their Galleaſſes, and ſailed over to *Bengal* to *Cha-Heſt-Kan*, who received them with open Arms, courted them exceedingly, and gave them very conſiderable Pay, and without letting them cool, he made them, jointly with his whole Army, to attack and take the Iſle of *Sondiva*, which was fallen into the Hands of the King of *Rakan*, and thence to paſs with all his Horſe and Foot to *Chatigan*, which having alſo poſſeſſed himſelf of, he diſmiſſed the *Holland* Veſſels, with a Compliment and ſome Preſents, with which they were hardly pleaſed, and having

He is ſent againſt the King of Acham.

He wanquiſhes the Raja.

He dies.

He reſtores Chatigan to the Mogul.

He diſmiſſes the Hollanders.

He reſtores Chatigan.

He drives the Country of Robbers and Pirates who did much Miſchief.

ving now little need of the Pirates Help, he treats them as they deserve, like Rogues and Traitors, leaving them without Pay for whole Months together, and looking upon them as vile Creatures, not to be trusted or employed. What his Success against the King of *Rakan* will be Time must shew.

Of Sultan *Mahmoud* and Sultan *Mazum*.

4. An Account of the 2 Sons of *Aureng-Zeb*, Sultan *Mahmoud* and Sultan *Mazum*. The former of these, who is the eldest Son, is kept in the Castle of *Goualcor*; but (if the common Report be true) without making him take the *Pousk*, which is the ordinary Drink of such as are put into that Place. As to the other, tho' he has been always a Pattern of Reservedness and Moderation, yet no Man knows what Causes of Jealousie he hath given his Father, or whether he hath a Mind to make an authentick Proof of his Obedience and Courage, which last may be probable from these Actions towards him. One Day he commanded him in a full Assembly of his *Omrahs*, and without much Unconcern, to go and kill a Lion, which was come down from the Mountains, and had made great Havock and Waste in the Country, and that without ordering him the usual strong Nets made for that Purpose, saying, When he was Prince he minded not those Formalities. It was the good Fortune of Sultan *Mazum* to prosper in the Attempt, and to kill the Lion, with the Loss only of 2 or 3 Men, and some Horses which were wounded. *Aureng-Zeb* was so delighted with this Testimony of his Son's Courage, that he hath often expressed great Affection to him, and hath given him the Government of *Decan*, though with so little a Revenue and Power, as that he has no Cause to fear him.

The last Lion a Lion.

Of *Mohabet-kan*.

5. Touching the Governour of *Caboul*, *Mohabet-Kan*, who was so firm a Friend to *Cha-Jehan*, even in his Adversity. *Aureng-Zeb* was loth to lose so brave a Captain, and therefore pardon'd him; and though he took from him the Government of *Caboul*, yet he made him Governour of *Guzurat*, in the Place of *Jessomseigne*, whom he sent to the Wars in *Decan*. It was supposed, that the great Presents he made to *Rauchenara-Begum*, and a good Number of exellent *Persian* Horses which he presented to *Aureng-Zeb*, with 15000 or 16000 Roupies in Gold, contributed much towards his Peace.

How he rewarded such as had served him faithfully.

6. As to such Persons as had faithfully serv'd *Aureng-Zeb* in obtaining the Throne, he has raised them all almost to Places of Trust. *Cha-Hest-Kan* he made first Governour of *Decan*, and then of *Bengal*; *Mir-Kan* he made Governour of *Caboul*; *Kalil-Ullah-Kan* of *Lahor*; *Mirbaba* of *Elabas*; and *Lasker-Kan* of *Patna*. The Son of that *Allah-Verdi-Kan*, the Betrayer of Sultan *Sujah*, he appointed Governour of *Scimdy*; and *Fazel Kan*, who had considerably served him, both by his Counsels and Dexterity, he raised to the Dignity of *Kane-Saman*, i. e. Great Steward of his Royal Household, and *Danech-Mend-Kan* Governour of *Debli*, with this particular Favour and Privilege, that since he is perpetually employ'd in his Studies and Foreign Affairs, he dispenseth with him for not coming twice a Day (after the ancient Custom) to wait on the King in the Assembly, so as not to retrench any thing of his Pension for his Absence, as he doth other *Omrahs*, if they fail. To *Dianet-Kan* he has given the Government of *Kitcib-mer*, or *Cassimere*, the Earthly Paradise of the *Indies*, which was once a Kingdom by it self, and had Kings so powerful, that they subdued the Country as far as *China*. 'Tis true, *Aureng-Zeb* dismissed *Nejabat-Kan*, who acted very well for him in the 2 Battles of *Samonguer* and *Cadjeue*, but 'twas because he reproached the King with his own good Services. *Jessomseigne* he made Governour of *Decan*, after *Cha-Hest-Kan*, but after recalled him from thence, because he was thought to have held Correspondence with that stout and bold Heathen *Seva-Gi* in his Robbing the Town of *Surat*, from whence he brought Millions of Gold, Silver, Pearls and Silken-Stuffs, fine Linen, and other rich Merchandize, and used great Cruelty in cutting off the Legs and Hands of the Inhabitants to make them confess where their Treasure was. The Boldness of a *Jew* upon this Occasion was very remarkable. He had brought some Rubies of very great Value from *Constantinople* to sell them to *Aureng-Zeb*, and falling into the Hands of *Seva-Gi*, he was brought thrice upon his Knees, and the Knife held up to cut his Throat, to oblige him to confess where his Jewels were, but he in all this Danger held so stoutly to his Principle of Avarice, that he saved both his Jewels and his Life. As for *Jessegne*,

A Jew's Courage.

King *Aureng-Zeb* made him content to go General of his Army into *Decan*, sending Sultan *Mazum* with him without any Power. He presently besieged the principal Fortress of *Seva-Gi*, and being well experienced in Matters of Negotiation and Treaty, he so ordered the Business, that *Seva-Gi* surrender'd it before it came to Extremity, and joyn'd with *Aureng-Zeb*'s Party against *Visapour*, whereupon *Aureng-Zeb* declared him a *Raja*, took him into his Protection, and gave the Pension of a very considerable *Omrah* to his Son. Some time after, *Aureng-Zeb* designing to make War upon *Persia*, invited him to *Debli*, and by his Commendations of him for his Generosity, Ability and Conduct, so prevailed with him, that upon the Faith of *Jessegne* he went to him; but the Wife of *Cha-Hest-Kan* importuning *Aureng-Zeb* to arrest him, because he had murthered her Son, wounded her Husband and sack'd *Surat*, made his Abode unsafe for himself and uneasie to the King, whereupon the King, pretending to apprehend him, so contrived the Matter, that he made his Escape by the Assistance of *Raja Jessegne*'s Son; yet *Aureng-Zeb* pretended to be angry with the *Raja* and his Son, whereupon he fled to his own Lands to possess himself of them, and guard them, and died at *Brampour*; but after his Death the King was so far from expressing any Resentment to his Son, that he sent to condole with him for the Death of his Father, and continued his Pension.

Jessegne's Actions.

Seva-Gi invited to *Debli*.

7. Concerning the Death of *Cha-Jehan*, who ended his Days in Prison in the Fortress of *Agra*, in the the Year 1666. *Aureng-Zeb* was exceedingly affected with it, and discovered all the Marks of Grief that a Son can express for the Loss of a Father. At the very Hour that he received the News he went towards *Agra*, where *Begum-Saheb* had caused the Mosque and a certain Place where he was at first to stop, before he entred the Fortress, to be hung with richly embroidered Tapestries, and at his entring in at the *Seraglio*, she presented him with a large Golden-Bason, wherein were all her own and her Father's Jewels; and in fine, received him with that Magnificence, and entertain'd him with that Dexterity and Craft, that she obtained his Pardon, gained his Favour, and grew very confident with him.

Cha-Jehan's Death.

Of the Extent of the *Mogul*'s Empire.

The Empire of the Great *Mogul* is of a very large Extent, yet doth not include all *Indostan*, but there are several Governments, and those not inconsiderable, who keep themselves, though with some Difficulty, out of his Hands. The greatest of them are in *Decan*, and can hardly be understood, but by relating the State of Things a little higher. All that great Peninsula of *Indostan*, crossing it from the Bay of *Cambaya* to that of *Bengal*, near *Jaganrate*, and from thence to Cape *Comory*, was, scarce 200 Years since, entirely (except some of the Mountainous Countries) under the Dominion of one only Prince, who was a very great and potent Monarch; but now it is divided among many different Sovereigns, and those of different Religions. The Cause of this Division was, that King *Ramras*, who was the last that possessed this mighty State entirely, and did imprudently raise 3 Slaves, or *Gurgs*, which he had about him, too high, by making them Governours of Countries; the 1st of those, of which the *Mogul* is Master in *Decan* at present, the 2d of the Lands, now comprehended under the Kingdom of *Visapour*, and the 3d of the Countries now under the King of *Golconda*. These 3 being grown rich and powerful agreed upon a Revolt, and having killed King *Ramras*, possessed themselves of their Governments severally, and assumed the Title of *Cha*, or King. The Heirs of King *Ramras* not finding themselves strong enough to recover their Right from them, kept themselves in *Karnatek*, now called *Bisnaguer*, where they are *Raja's* to this very Day, and several other *Raja's*, *Naiques*, and other petty Kings, seized upon other Parts of his Kingdom. The Posterity of the Slaves defended themselves very well against the Power of the *Moguls*, so long as they held together, and assisted one another against him; but when they divided, and thought to defend their Countries apart, the *Mogul* improved their Disunion to his own Advantage; and about 35 or 40 Years since seized the Country of *Nejam Cha*, the 5th or 6th of the Family of the 1st Slave, and made him Prisoner in *Daulet-Abed*, the Capital City of his Kingdom, where he died; but the Kings of *Golconda* and *Visapour* still maintain their Ground against him, and keep their Kingdoms independant from him.

The Division of *Decan* into Three Kingdoms.

The

The Kingdom of *Visapour*.

The Kingdom of *Visapour* is continually in Wars with the *Mogul*, but being assisted by the King of *Golconda* with Money underhand, and with many Forces from the petty *Raja's* round about it, who join with it for their own Defence, and the Country being not only difficult of Access for an Army, but destitute of Water and Forage, tho' the *Mogul* hath an Army continually against it, they suffer little Harm. The King of *Golconda* is the more secure, while the *Mogul* is busied against *Visapour*, tho' he keeps an Army always upon his Frontiers, to shew him that he is ready to defend him, and so he continues an absolute Prince. On the Frontiers of *Persia* there are also several petty Sovereigns, who are independent upon him, and pay him no Subjection, no more than they do the King of *Persia*. Such are the *Balouches* and *Augans*, and other Mountaineers, who, when the *Mogul* sent his Army to besiege *Candahar*, so stopt the Waters, that they could not march forward till he had made them some Presents. Such are also the *Patans*, a *Mahometan* People, very Fierce and Warlike, who being seated in the Mountains, despise the *Indians*, *Heathens*, and chiefly the *Moguls*; and tho' they are of small Strength of themselves, yet upon the Account of their Situation, they are very absolute and independent. There are also more than 100 *Raja's*, or considerable Heathen Sovereigns, dispersed thro' the whole Empire, among whom there are about 15 or 16 very rich and puissant, *viz.* *Rana*, who was formerly the Emperor of the *Raja's*, and is said to be descended of King *Porus*; *Jessoigne* and *Jessomseigne*, who are so great and Powerful, that if they should combine together, they would hold the *Mogul* Tack, being each of them able in a very short time to raise and bring into the Field 25000 Horse, better Troops than the *Mogul's*. These Chavaliers are called *Ragipouts*, or the Children of the *Raja's*. They are Sword-men from Father to Son, for the *Raja's* allot them Lands on Condition to be always ready to appear on Horse-back whenever they command. They will endure much Hardship, and want nothing to make them good Soldiers, but good Discipline and Order.

The *Balouches*, *Augans*, and *Patans* independent People.

Rana's very potent.

The *Mogul's* Religion and Court.

The present *Mogul* is a *Mahometan*, not of the Sect of the *Chiais*, the Followers of *Haly*, as the *Persians* are, who make up the greatest part of his Court, but a Follower of *Osman*, as the *Turks* are. He is a Stranger, being of the Race of *Tamerlane*, who headed those *Moguls*, who in 1401. over-run and conquer'd *India*; so that he is in a Country full of Enemies, because for one *Mogul* or *Mahometan*, there is 100 Gentiles or Heathens, which obligeth him to entertain purely for his Defence, as well against these Domestick Enemies, as against the *Persians* and *Usbecks* his Neighbours, very great Armies, both in time of Peace and War, as well about his Person as in the Field, which much exhaust his Treasure, by the vast Charge he is at to maintain them.

The *Raja's* employed in his Army.

The chief *Raja's* employ'd by him are *Jessoigne* and *Jessomseigne*, with some others, to whom he allows very great Pensions, to have them always ready with a certain Number of *Ragipouts*. These *Raja's* are obliged, like the *Omrah's*, to keep Guard about him, but without the Fortress in their Tents, and he useth them to keep the other *Raja's* in Order, as well as to oppose the *Persians*, *Patans*, and Governours of Provinces, when they rise against them. The *Mogul* also entertains some Strangers for the same Reasons.

His Militia of Strangers.

Besides these he hath Militia, both Cavalry and Infantry made up of Strangers only. The chief Officers of the Cavalry are the *Omrahs*, who are but Adventurers and Strangers of all sorts of Nations, which draw one another to this Court for Preferments, Men of mean Descent, some of them Slaves, and most of them without Instruction, whom the *Mogul* raises and degrades as he pleaseth, and if they hold their Places for Life, he seizes upon their Estates, when they die, allowing their Widows and Children only some small Pension.

The Commands of the *Omrahs*.

Among these *Omrahs* some are *Hazary*, i. e. Lords of 1000, other *Dou-Hazary*, i. e. Lords of 2000, others *Penge*, *Hecht* and *Deh-Hazary*, i. e. Lords of 5, 7, or 10000. The Command of *Devaz-Deh-Hazary*, i. e. 12000, is thought so considerable, that the King's Son has accepted this Honour. Their Pay is more or less in Proportion to the Numbers of Horses, not Horsemen, who in those hot Countries are hardly thought compleat without their Led-Horse. The Number of Horse-men under those *Omrahs* is not according to their Names, but as the King limits them, which is many times not a Quarter of what their Names import.

Their Pay.

Their Pay is sometimes by Lands appointed them for that End, and sometimes out of the King's Treasure, and is generally very considerable; but they are most of them poor and in Debt, not from their ill Husbandry, but by the Presents they are forced Yearly to make to their King. The Number of these *Omrahs* is very great; for besides those that are always in the Field, there are seldom less than 23 or 30 about the King at his Court. These are called the Pillars of the Empire, who are entrusted with the Governments and principal Offices both of the Court and Army, and keep up the Grandeur of the Court, never going abroad but richly deck'd, sometimes riding on Elephants, and sometimes on Horse-back, and sometimes they are carry'd in a *Palely*, or Chair, being attended with a good Number of Horse-men and many Foot-men, who march before to make way, drive away the Flies, wing off the Dust with Peacocks Tails, and carry Water for drink, or their Books of Accounts. All the *Omrahs* about Court are obliged to go and salute the King twice a Day, *viz.* about 10 or 11 a Clock in the Morning, when he renders Justice, and at Six at Night, to keep Guard once a Week in the Castle for 24 Hours, and to follow the King on Horse-back whithersoever he marcheth in any Weather, none being exempted, unless upon the Account of Sickness, or Age, or some special Business.

Their Grandeur.

The *Mansebdars* are the next Officers at Court to the *Omrahs*, and very little inferior to them. They acknowledge none for their Head but the King, and are obliged to almost all the Services of the *Omrahs* about him. They have certain Horses under their Command, but no Horse-men, and their Pay is from 6 or 700 Roupies a Month. Their Number is not fix'd, but much exceeds the *Omrahs*, there being usually about the Court 2 or 300, besides what are in the Provinces and Armies.

The *Mansebdars* Office.

Rouzindars are also a sort of Chavaliers, but have their Pay by the Day, which is indeed sometimes greater than the *Mansebdars*, but not so honourable; but then they are obliged to take the Tapestry, and other Houshold-Stuff that have been used in the King's Palace for it, at a Price not very reasonable. Their Number is very great, for they execute all the meaner Offices at Court, of Clerks, Under-Clerks, Signet-men, &c.

Rouzindars.

Simple Chavaliers are such as are under the *Omrahs*, and the most considerable of them, are such as have 2 Horses, mark'd on the Legs with the Marks of the *Omrah*. Their Pay is not fixed, but depends upon the Generosity of the *Omrahs*, but the Pay which the *Mogul* allows is 25 *Roupies* a Month. The Pay of the Foot is the least, and their Musketeers are pitiful Men, and cannot discharge their Musket, unless upon a Prop, and then they are afraid of singeing their Beards, burning their Eyes, or that some *Dgen*, or evil Spirit should burst their Barrels. They have from 10 to 20 Roupies a Month, but the *English* and *Dutch*, who are better Gunners, have more. Their Artillery is of 2 Sorts: 1. The great and heavy of cast Brass, which is carried to all the Places where the King intends to reside any time. 2. The light, which consists of 50 or 60 Field-Pieces, all of Brass, mounted on a fine Chariot well painted, with a small Coffer behind and before for the Powder, drawn with 2 very fair Horses, and driven by a Coachman like a *Calache*, and adorn'd with little red Streamers. Some of this light Artillery is also mounted upon Camels, who carry a Man behind it to discharge it. This light Artillery is inseparable from the Person of the King, and marches before as soon as the King comes out of his Tent in the Morning to meet him at the Rendezvous, where they always give a Volley upon the King's Arrival. The Militia of the Field hath the same Officers and Artillery, as that about the King, only their Numbers are greater; for the Army which the *Mogul* is constrained to maintain perpetually in *Decan*, to bridle the potent King of *Golconda*, and to make War upon the King of *Visapour* and the *Raja's* that assist him, must consist of 25 or 30000 Horse. The Kingdom of *Cabout* has for its Guard ordinarily against the *Persians*, *Augans*, *Balouches*, and other Mountainers, 15000, and the Kingdom of *Kackmire* above 4000, and the Kingdom of *Bengal* many more, besides those that are maintain'd in War, and are kept up by the Governours for their Defence; so that all the Forces maintain'd by the *Mogul* about his Person, and in the Field, amount to 200000, and better, and all those are certainly paid every Month.

Chavaliers.

The Foot.

The Artillery.

Some on Camels.

The great Armies the *Mogul* is forced to maintain.

CHAP.

CHAP. VI.

Of the Commodities, which are brought as well out of the Dominions of the Great Mogul, *as out of the Kingdoms of* Golconda, Visapour *and other Parts of* India.

Silk of Bengal.

KAsembasar, a Village in the Kingdom of *Bengal*, sends abroad every Year 22000 Bales of Silk, every Bale being 100 Weight, which are bought up either by the *Dutch*, or Merchants of *Tartary* and *Moguliſtan*, to make up their Carpets, some all Silk, and others mix'd with Silver and Gold, which being for the most part made in the Province of *Guzurat*, are sold either at *Amadabat* or *Surat*. The Worsted-Carpets are made at *Vettapour*, 12 Lgs. from *Agra*; Sattins, some plain, other streaked with Gold; Taffata's of the same Fashion; Patoles, a very thin Silk-Suff, painted with all sorts of Flowers. The Raw-Silk of *Kasembasar* is yellowish as that of *Sicily* and *Persia* is, but they can whiten it with a Ley made of the Ashes of a Tree called *Adam*'s Fig-Tree, that it shall be like that of *Palestine*.

Worsted Carpets.

Calicuts, and painted.

In the Kingdom of *Golconda* are made the painted Calicuts, called *Chites* by the Merchants, but *Calmender* by the Natives; because they are painted with a Pencil. There are Chites made in *Moguliston*, but they are all printed, and nothing so fine or beautiful as the former: These serve for Coverlets of Beds, Table-Cloaths, Pillowbeers, Handkerchiefs, but especially for Wastcoats, both for Men and Women. The finest Calicut-Chites made at *Brampour*, are used all over *Asia*, for *Ormis*, or Womens Vails. The Basta's, or Calicuts painted Red, Blue and Black, are carried White to *Agra* and *Amadabas* to be dyed; some they dye like water'd Chamlets, which encreaseth their Price. The White Calicuts are woven in several Places of *Bengal* and *Moguliston*, and are carried to *Renoxsary* and *Baroche* to be whitened, because of the large Meadows and Plenty of Lemmons that grow thereabout, for they are never so White as they should be till they are dipt in Lemmon-Water. They are of 2 sorts, wide and narrow, but of various Lengths. Some Calicuts are made so fine, you can hardly feel them in your Hand, and the Thread when spun is scarce discernible. Cotton twisted and untwisted comes from the Provinces of *Brampour* and *Guzurat*; but the latter is seldom transported, unless it be to *Ormus*, *Balsara*, or the *Philippine* Isles.

The finest.

Cotton.

Indigo comes from several Parts of the *Mogul*'s Country, but differs in Quality. The best comes from the Territories of *Biana*, *Indoua* and *Corsa*, a Day or two's Journey from *Agra*. That which is made flat of this sort comes from *Sarqueste*, a Day's Journey from *Surat*. The Indigo which is made in *Golconda* is inferior in Goodness, as also that which is made up at *Baroche* and *Agra*, though this last is most sought for, because it is made up in half Balls. The worst sort is that made at *Bengal*, *Brampour* and *Amadabat*. It is made of an Herb much like our Hemp, which is sown every Year after the Rains. They cut it 3 times a Year, but the 1st Cutting makes the best Indigo, and 2d better than the 3d. 'Tis known by the Briskness of the Colour. When they have cut it, they cast it into Pits half full of Water, which they raise to the Brim with the Herb put into it, and then pound it about, till it becomes as thick as Mud. Then they let it settle for some Days, and afterwards drain the Water out of it, which done, they take it up in Baskets, and making it up flat at the Bottom and sharp at the Top, like an Egg, set in the Sun to dry.

Salt-Peter.

Great Store of Salt-Peter comes from *Agra* to *Patna*, but that which is refined is 3 times the Value of that which is not.

Cardamum.

Cardamum, which is the most excellent of all Spices, grows in the Territories of *Visapour*, and because there is no great Store of it where it grows, it is only made use of in *Asia*, at the Tables of the greatest Princes.

Ginger.

Ginger grows in the Dominions of the Great *Mogul*, and is brought in great Quantities from *Amadabat*, where it grows more than in any other Part of *Asia*; and 'tis hardly to be imagined how much is transported candied into Foreign Parts.

Pepper.

Pepper is of 2 sorts, the Small and the Great. The Small comes from *Bantam Asken*, and some other Parts of the East: It is seldom or never carried out of *Asia*, where it is spent in great Quantities, especially among the *Mahometans*, for there is double the Grains of this small Pepper in one Pound to what is in the Great, and besides, 'tis not so hot in the Mouth. The great Pepper comes from the Coasts of *Malabar*, and some from *Visapour*.

Nutmegs.

Nutmegs come from the *Moluccа* Illands, as also from the Illands of *Banda*, but the biggest grow in the Island of *Damme*: 'Tis observable of the Nutmeg-Tree 'tis never planted, but when the Nutmegs are ripe several Birds come from the Illands toward the South, and devour them whole, but are forced to throw them up again before they be digested, the Nutmeg then besmeared with a viscous Matter, falling to the Ground, takes Root and produces a Tree, which would never thrive if planted.

Cloves.

Cloves grow at *Amboyna*, *Ellias*, *Seram* and *Bouro*.

Cinnamon.

Cinnamon comes at present from the Island of *Ceilon*: The Tree that bears it is very like the Willow, and has 3 Barks. The 2 uppermost may be taken off, and is the best Cinnamon. The 3d must not be meddled with, because then the Tree will die, and therefore great Art must be used to take off the 2 uppermost, lest the 3d be hurt with the Knife. The *Hollanders* are at a great Charge in *Ceilon*, to gather their Cinnamon, because the King sends his Forces upon them, when they are gathering, to surprize them, and take it from them, so that they are forced to have a Guard upon their Work-men of 7 or 800 Men; and this makes Cinnamon dearer, and so much the more, because the *Dutch* have spoiled the Trade for it from the Countries of the *Raja's* about *Cochin*.

Cinnamon of Ceilon.

Drugs.

The Drugs brought to *Surat* from all Parts of the *Indies* are, Salt Armoniack, Borax, Gum-Lac, Gum-Lac wash'd, Gum Lac in Sticks of Wax, Saffron, Cummin white and black, Arlet, Frankincense, Myrrh, Gilet and Bolti, Cassia, Sugar candy, Asutinat, Anise-Seed gross and small, Oupelote, Cointre, Auzerout, Aloes Succotrine, Lignum Aloes, some in great other in large Pieces, Liquorice, Vez-Cabouli. Out of Gum-Lac the Natives extract that lively Scarlet Colour, with which they paint their Calicuts, and for that End 'tis carried into *Persia*. That which remains after the Colour is drawn out is only fit to make Seal-ing-Wax of, and the Women of *Surat* get their Livings by cleansing and colouring it for that Use.

Sealing-Wax.

Sugar.

Powder'd Sugar is brought in great Quantities from the Kingdom of *Bengal*, and there is a great Trade for it at *Ougeli*, *Patna*, *Daca*, and other Places. The People of *Bengal* say, that there is no Poison more dangerous than Sugar kept 30 Year. Loaf-Sugar is made at *Amadabat*, where they have the perfect Art of refining it.

Opium.

Opium comes from *Brampour*, where Tobacco also grows in such Quantities, that the Inhabitants, having no Vent for it, let it rot upon the Ground.

Diamonds.

Diamonds, which is the most precious of all Stones, are found partly in Mines, partly in Rivers.

Diamond-Mines at Raolconda.

At *Raolconda*, a Town 5 Lgs. distant from *Golconda*, and 8 or 9 from *Visapour*, in the Province of *Camatica*, is a Diamond-Mine discovered not above 200 Years ago. In it are found the cleanest Stones, with the whitest Water; but being forced to fetch them out of the Rocks with a great Iron-Leaver, and many Blows, they often flaw the Diamonds, and make them look like Chrystal, and this is the Reason there are so many soft Stones found in this Mine, though they make a great Shew. If a Stone be clean, they give it only a Turn or two upon the Wheel, that it may lose as little as possible of the Weight; but if it have any Flaws, Points, or black Specks, they cut it into Fossets and work the Flaw into a Ridge to hide it. The Trade at the Mines is free and just, and transacted without any Talking on either side, the Buyer and Seller expressing themselves by taking each other by the Hands,

Soft and flawed Stones.

and ſo in the ſame Place where there are many People, a Parcel of Goods ſhall be ſold 7 or 8 times, and no Man know it.

Coulour. At *Gani* or *Coulour*, 7 Days Journey from *Golconda*, Eaſtward, is another Diamond-Mine. It lies between the Town and a Mountain, and the nearer they dig to the Mountain, the larger Stones they find, but there is none at the Top. This Mine was found not above 100 Years ago by a Country-man, who digging his Ground to ſow Millet, found a large Diamond of 25 Carats Weight. Upon this the rich Men in the Town fell to digging in the Place, and found, as they do ſtill, bigger Stones than in any other Mine, *viz.* Some above 40 Carats, and one of 900, which *Margimola* preſented to *Aureng-Zeb*; but the Miſchief of theſe Stones is, they partake of the Quality of the Soil, and are few of them clean, but ſome are black, others red, and others green and yellow.

The biggeſt Stones.

Soumelpour. Near *Soumelpour* in the Kingdom of *Bengal*, is a River called *Gouel*, where there are Diamonds found, mix'd with the Sand. The Way from *Agra* to this Town lies through *Halabas*, *Banarous* and *Saſeron*, from whence you paſs by the Fortreſs of *Rodas*, which is one of the ſtrongeſt Places of all *Aſia*, being ſeated upon a Mountain fortified with 6 Baſtions, 27 Pieces of Cannon, and 3 Moats full of Water, in which are good Fiſh, to *Soumelpour*, which is a great Town, but the Houſes are built of Earth, covered with Branches of Coco-Trees. The Road from the Fort lies through dangerous Woods, becauſe much peſter'd with Robbers. The *Raja* in whoſe Juriſdiction it is lives half a Lg. from the Town, in Tents, ſet upon a fair riſing Ground, at the Foot whereof runs the River *Gouel*, where Diamonds are found. This River deſcends from the Southern Mountains, and being filled with the great Rains, brings down in *December* vaſt Quantities of Sand, which the People in great Multitudes ſearch for 50 Lgs. together, and find all thoſe Points, which are called Natural Points, in it, but ſeldom find any large Stone.

The Way to it from Agra.

Gouel, a River.

Borneo, an Iſland. In the Iſland of *Borneo*, which is the largeſt Iſland in the World, there is another River, called *Succadan*, in the Sand whereof they find Diamonds, as hard as any in the other Mines; but the Queen of the Iſland will permit none to be carried out of it, ſo that all that come from thence are convey'd out by Stealth. In this Iſland it is remarkable, that the Queen, and not the King, has the Sovereign Command, as have alſo the inferior Women the Rule over the Men; for the People are ſo curious always to have a lawful Heir upon the Throne, that the Husband not being certain, that the Children he has by his Wife are his own, but the Wife being always certain, that the Children ſhe bears are her's, they rather chuſe to be governed by a Woman, to whom they give the Title of Queen, her Husband being only her Subject, and having no Power, but what ſhe permits him. At the Mine of *Raolconda*, they weigh by *Mangelins*, which are each a Carat and 3 Quarters, and pay in new Pagods, as they do alſo at *Coulour*. At the Mine of *Soumelpour* in *Bengal* they weigh by *Rab's*, which are each 7 Eighths of a Carat, and pay in Roupies. The Roads to the Mines, though ſome fabulous Relations have made them very dangerous, full of Tigers, Lions and cruel People, are not only free from all wild Beaſts, but the People are very loving and courteous. The Price of Diamonds is thus to be known: If it be a thick Stone, well ſquar'd, and have all its Corners, and the Water be white and lively, without Specks or Flaw, ſuch a Stone is worth 150 Livers, or 10*l.* 15*s.* Sterling; and of the ſame Value it is if cut in Facets, which they call a Roſe-Diamond, if it be a fair Breadth, and of the ſame Perfection; and as a Stone weighs more Carats, it riſeth in Price. Imperfect Diamonds are not above half the Value as perfect.

The Queen rules.

A Carat is 4 Grains Troy.

The Way of Trading at the Diamond-Mines

The biggeſt Diamonds in the World. The 2 biggeſt Diamonds in the World, for cut Stones, belong, the one to the *Mogul*, which weighs 279, and and 9 16th Carats, and the other to the Duke of *Tuſcany*, which weigh 139 Carats, both clean and well-ſhaped. The Miners call a Diamond *Iri*, and the *Turks*, *Perſians*, and *Arabians*, Almas.

Coloured Stones where found. There are but 2 Places in all the Eaſt, where coloured Stones are found, and they are in the Kingdom of *Pegu*, and Iſland of *Ceilon*. The 1ſt is a Mountain 12 Days Journey, or thereabouts, from *Sireri*, towards the N. E. It is called *Capelan*: In this Mine are found great Quantities of Rubies, and *Eſpinels*, or Mothers of Rubies, yellow Topazes, blue and white Saphires, Jacinths, Amethyſts, and other Stones of different Colours. Among theſe Stones which are hard, other Stones are found of different Colours, but being ſoft they are of no Eſteem. All theſe ſort of Stones the Natives call Rubies, and they are the only Commodity of the Country, which makes it very poor. From *Ava*, which is the chief Port of *Pegu*, you muſt go by Water to *Sireri*, becauſe the Roads by Land are almoſt unpaſſable, by reaſon of the Lions, Tigers and Elephants, which abound in the adjoining Woods. The King of *Pegu* keeps all the choice Stones for himſelf and Subjects, and ſuffers few of them more than 3 Carats Weight, and clean, to be exported. Rubies are ſold by *Rab's*, and the Payment is made for them in Pagods: A Ruby of above 6 *Rab's* Weight is almoſt invaluable. There are ſome Rubies, but moſt of them are *Ballas* Rubies, and abundance of Baſtard Rubies, Saphires, and Topazes found in the Mountains that run along from *Pegu* to the Kingdom of *Cambaya*.

Rubies, how ſold, and at what Value.

The other Place, where Rubies are found, is a River in the Iſland of *Ceilon*, which deſcends from certain high Mountains in the Middle of the Iſland: It ſwells very high when the Rains fall, and when it becomes low again, the People make it their Buſineſs to ſearch among the Sands for Rubies, Saphires and Topazes. All the Stones that are found in this River are generally fairer and clearer than thoſe in *Pegu*. In *Hungary* is a Mine of Opals, a Stone no where found in the whole World, but there. Turquoiſes are of 2 Sorts, *viz.* the Old Rock and the New, and are only found in *Perſia*: The Old Rock lies near a great Town called *Micabourg*, and is reſerved only for the King's Uſe, to adorn Hilts of Swords, Knives and Daggers, inſtead of enamelling. The New Rock is of a pale blue, inclining to white and little eſteem'd.

Opals where found.

Turquoiſes.

Emeralds. Emeralds, though ſaid to be Oriental, are not found in any Part of the Eaſtern Continent, but are brought from *Peru* to the *Philippine* Iſlands, and ſo tranſported into *Europe*. The Fiſhery for Pearls is in divers Places, as in the *Perſian* Gulf, round about the Iſland of *Bakren*, it belongs to the King of *Perſia*, who has a Fort there, and in it a Garriſon of 300 Men. Every one that fiſhes here pays to the King 5 Abaſſi's, whether he gets any thing or no, and the Merchants pay at a certain Rate for every 1000 of Oiſters.

Pearl-Fiſhing in the Perſian Gulf.

There is a Pearl-Fiſhery likewiſe upon the Coaſts of *Arabia Felix*, right againſt *Bakren*, near the City of *Catifa*, which, together with all the Country, is under the Juriſdiction of an *Arabian* Prince. The Pearls that are taken here, are ſold to the *Indians*, who will give a good Price for all, as well the uneven as round ones. Over all *Aſia* they chuſe ſuch as are of a yellowiſh Water, inclining to white, before the pure white, becauſe they ſay, they will never change Colour, as the white will, both by Time and conſtant Wearing. There is a wondrous Pearl in the Poſſeſſion of *Iman-beſt*, Prince of *Maſcate*, which is the beſt in the World, not ſo much for its Bigneſs, for it weighs not above 12 Carats and one 16th, nor for its perfect Roundneſs, but for its tranſparent Clearneſs, for you may ſee almoſt through it. The Great *Mogul*, by a *Banian*, offered 40000 Crowns for it, but it would not be accepted. There is another Fiſhery for Pearls in the Sea, that waſhes the Walls of *Manar*, in the Iſland of *Ceilon*: For their Roundneſs and Water, they are the Faireſt that are found, but rarely weigh above 3 or 4 Carats. There are excellent Pearls of a very good Water, and large, found on the Coaſt of *Japan*, but are rarely fiſhed for, becauſe Jewels are of no Eſteem among the Inhabitants. In the *Weſt-Indies* are divers Places for Pearl-fiſhing, *viz.* All along the Iſland of *Cubagna*, but the Pearls are ſmall, ſeldom weighing above 5 Carats: In the Iſland of *Margerita*, a Lg. from *Cubagna*, but a larger Iſland, the Pearls are not found here ſo plentifully, but are of an excellent Water, and very big, ſome weighing 55 Carats: *Camogete*, near the Continent, *Rio de la Hachia*, and *S. Martha*, produce weighty Pearls, but ill-ſhaped, and inclining to a Lead-colour. *Scotch* Pearl and *Bavarian*, tho' a Neck-Lace of them is of Value, yet they are not to be compared with the Eaſtern or Weſt *Indian* Pearl. Theſe ſorts of Pearl do all grow in an Oiſter, like Eggs in the Belly of a Pullet, and there are many in ſome, but none in many. They fiſh in the Eaſtern Seas twice a Year, the 1ſt time in *March* and *April*, and the 2d time in *Aug.* and *Sept.* and the Fairs are kept in *June* and *Nov.* Before they fiſh in any Place, they try beforehand, whether it will turn to any Account, by ſending 7 or 8 Barks, which are

The biggeſt Pearl in the World.

Pearl is bred in Oiſters.

to

to bring them each 1000 of Oisters, which they open, and if the Oisters *per* 1000 yield 5 Fano's, or above, as some will yield 7, then they know the Fishing will turn to an Account. They fish in 12 Fathom Water, and 5 or 6 Lgs. off at Sea: They are guarded with some small Men of War to defend them from the *Malabars*, to which every Diver pays 8 Piasters for their Attendance. The more Rain falls, the more profitable the Fishery happens to be.

Coral-fishing, where. Coral, though of little Esteem in *Europe*, yet is much valued in the other 3 Parts of the World. There are 3 Places where they fish for it upon the Coasts of *Sardinia*, viz. *Anguerrel*, *Boza*, and the Island of St. *Peter*. On the Coasts of *France* also they fish for it, near the Bastion of *France* and *Tabarque*, and on the Coast of *Sicily*, near *Trepano*; but the Coral is small and ill colour'd. Near *Cape de Quiers*, on the Coast of *Catalonia*, the Coral is large, and of an excellent Colour, but the Branches are short. At *Majorca* and *Corsica* there is a Fishery for it. These Places are all in the *Mediterranean* Sea, for there is none at all in the main Ocean. Some think that Coral is soft in the Sea, but 'tis really hard, though 'tis true, that in certain Months in the Year, there is a Milky Substance which issues from it, and if it falls upon any thing produces Coral, and there are certain Worms in the Seas that eat it. They fish for Coral from the Beginning of *April* to the End of *July*, but never above 40 Miles from Land, and that in such swift Barks, that no Gallies can overtake them, for the Pirates lay wait for them. In *Japan* they value nothing so much as a good Grain of Coral, wherewith they pull the String that shuts their Purses, and in this they seek to excel one another; so that a Piece of Coral as big as an Egg, fair and clean without any Flaw, will produce as much as a Man can in reason ask for it. The *Portuguese* have sold such Pieces for 20000 Crowns. All over *Asia*, and especially in the Northern Parts of the *Mogul*'s Dominions, and all along the Mountains, as you go to the Kingdom of *Assen* and *Boutan*, the meaner sort of People wear it for Bracelets and Neck-Laces.

Time to fish for it.

Amber. Yellow Amber is only found upon the Coast of *Prussia*, in the *Baltick* Sea, for the Sea throws it upon the Sand, when certain Winds blow. The Elector of *Brandenburg* farms it out for 20, and sometimes for 22000 Crowns a Year, and the Farmers keep a continual Guard on both Sides of the Sea, that it be not stole. It is nothing else but a certain Congelation made in the Sea like Gum; for sometimes Flies and Gnats are congealed in it. In *China* 'tis a Custom for the great Lords at their Feasts, for Grandeur and Magnificence, to set 3 or 4 several sorts of perfuming Pots on the Table, and to throw into every one of them a vast Quantity of Amber, and the bigger the Pieces, the more Magnificent is the Entertainment accounted. This Waste of Amber makes it the best Commodity that can be carried into *China*, but the *Hollanders* have engrossed it.

Amber-grease. As for Amber-grease, there is no Man in the World knows what it is, or where, or how it is produced. It is most probable that it must be in the Eastern Sea, tho' some has been found on the Coasts of *England*, and other Nations of *Europe*; the greatest Quantity of it is found upon the Coast of *Melinda*, at the Mouth of the River *Rio-de-Sena*. A *Portugal* sailing from *Goa* to the *Manilles*, after he had passed the Streights of *Malacca*, found a Piece of 33 Pound Weight, and a *Middleburgher* a Piece of 42 Pound upon the Coast of the Island of S. *Maurice*.

Musk, what it is, and whence it comes. The best Sort and greatest Quantity of Musk comes from the Kingdom of *Boutan*, and from thence it is brought to *Patna*, the chief City of *Bengal*, where the Natives truck it away with the Merchants for Coral, yellow Amber, and other Commodities, rather than Gold or Silver. It grows in a Bladder on the Belly of a certain Creature, between the Genitals and Navel, which the People, who sell it, cut off after it is killed. It looks like clotted Blood when 'tis new cut off: None of these Creatures have above one Bladder, which is not bigger than an Hen's Egg, and will not yield above half an Ounce of Musk, and sometimes 3 or 4 will not yield an Ounce. The Scent of the Beast is so strong, that it makes one's Head ach to come near it: The Creatures must certainly be very numerous, considering the great Quantity of Musk that is to be sold.

Bezoar, what it is. Bezoar comes from a Province of the Kingdom of *Golconda*, toward the North-East: It is found in the Paunch of a wild Goat, which browzes upon a certain Shrub, and having eaten the Buds, or Tops of the Boughs, the Bezoar engenders of them in the Maw of the Goat, and is of divers Shapes, according to the Form of the Bud. The Natives by feeling on the Belly of the Goat, know how many Stones he has within him. The Excellency of the Bezoar is in the Bigness, although the Small has the same Virtue with the Larger, for if 5 or 6 Stones weigh an Ounce, they are worth no more than 15 or 18 Franks, but if one Stone weighs an Ounce, 'tis worth 100 Franks, and one of 4 Ounces and half was sold for 200 Livres. In what Part of the Body the Bezoar is bred, none can tell. As well in the East as West there are great Quantities of Bezoar that breed in Cows, and of a great Bigness, *viz.* 17 or 18 Ounces, but they are little esteem'd, 6 Grains of the former working more powerfully than 30 of this. The Bezoar which breeds in Apes is so strong, that 2 Grains will work as powerfully as 6 Grains of Goats Bezoar, but it is very scarce, as being only found in the Apes of the Island of *Macassar*: The Scarcity as well as Strength makes it dear, so that a Piece as big as a Nut is worth 100 Crowns.

Bezoar in Cows and Apes.

The Porcupine-Stone. The Porcupine-Stone, which is bred in the Head of that Creature, is more precious than Bezoar against Poison. If it be steep'd in Water a Quarter of an Hour, it makes the Water as bitter as possible. There is another Stone taken out of the Belly of the same Creature, as good as the other, but being steep'd in Water, it loseth nothing of its Weight or Bulk, as the other does.

The Serpent-Stone. The Serpent-Stone, which is about the Bigness of a Double, is almost Oval, thick in the Middle and thin about the Sides; the *Indians* say, 'tis bred in the Head of certain Serpents, but 'tis more probable, 'tis a Composition of certain Drugs, because they are to be had of the *Bramines* only; but however it be, it is of excellent Virtue to drive away Venom from such as are bitten by venomous Beasts, for being laid to the Wound, 'twill not come off till it has drawn out all the Poison, and being steep'd in Womens or Cows Milk it recovers its former Virtue, making the Milk like Corruption. There is another Stone, called the Serpent-Stone, with the Hood, because that kind of Serpent has an Hood hanging down behind the Head, in which this Stone is found: It is many times as big as a Pullet's Egg, but is not found in any less than 2 Foot long. This Stone being rubb'd against another Stone, yields a Slime, which being drank in Water by the Person that is poison'd, powerfully expels the Venom. These Serpents are found only on the Coasts of *Melinda*, but the Stones are bought of the *Portuguese* Mariners and Soldiers that come from *Mozambique*.

Gold in *Japan* and *China*. Gold is found in the greatest Quantities in the Islands of *Japan*, which lie Eastward of *China*, tho' some think 'tis brought from *Formosa* thither. The *Chineses* also exchange a sort of Gold produced in their Country for Silver, Weight for Weight, because they having no Silver-Mines, prefer it before Gold; but it is the coarsest of all the Gold in *Asia*. In the Island of *Celebes*, or *Maccassar*, there is found Gold among the Sand of their Rivers; and in *Achen*, or *Sumatra*, after the Rainy Season, when the Torrents are wasted, they find Flints wash'd down from the Mountains with Veins of Gold in them, and the Inhabitants of the West side of the same Isle bring the *Dutch*, when they lade their Pepper, great store of Gold, but as bad, if not worse, than their *China* Gold. Towards *Thibet*, which is the ancient *Caucasus*, in the Territories of a *Raja*, beyond the Kingdom of *Cachemire*, there are 3 Mountains close one by another, one of which produces excellent Gold, the other Granats, and the 3d *Lapis Lazuli*. There is also Gold which comes from *Tipra*, but is as coarse as the *Chinese* Gold, and these are all the Places in *Asia* that yield Gold. In *Africa* Gold is more plentiful than in *Asia*. Out of the Empire of *Monomotapa*, which extends it self as far as *Prester John*'s Country, comes the finest and purest Gold of all *Africa*, where they dig it with Ease out of the Earth, not being constrained to dig above 2 or 3 Foot deep; and in some Places, not inhabited for want of Water, the People find Lumps of Gold upon the Surface of the Earth, of an Ounce Weight, or more. The King of the *Abyssins* sent the *Mogul* a natural Tree, all of Gold, 2 Foot 4 Inches high, and 6 Inches about in the Stock, with 10 or 12 Branches, some half a Foot long and an Inch about, and some smaller. In some Branches appeared Bunches like Buds, and the

Rock-Crystal, Granats, Lapis Lazuli.

Fine Gold plentiful in *Africa*.

Roots were thick and ſhort. The Province where the River *Sene* has its Head, called *Monkaran*, has a King of its own, and is very healthy. There the People find great ſtore of Duſt-Gold in the Rivers that fall into the *Sene*, but is much coarſer than the other. The *Cafres* alſo of the other Provinces bring great ſtore of Gold yearly to *Sofala* and *Chepon-Goura*, which are under the *Portugueſe*, to buy ſuch Commodities as they want, when the Ships come. Some Years there are *Cafres* that come from the Cape of *Good Hope* to *Sofala*, which is 4 Months Travel, and bring very fine Gold in Pieces, like that of *Monomotapa*, which they ſay they find in the Mountains, by digging 10 or 12 Foot deep. They alſo bring great Quantities of Elephants Teeth, for they abound ſo with Elephants, that the Palizadoes of their Fortreſſes and Pales of their Parks are all made of Elephants Teeth. Their uſual Diet is Elephants Fleſh. In the Kingdom of *Beroe* grows a Root of a yellow Colour, very bitter, and about an Inch thick, which cures all ſorts of Fevers by Vomiting. Elephants Teeth.

There are no Silver-Mines in *Aſia*, unleſs it be in *Japan*; but a few Years ſince there have been diſcovered plentiful Mines of Tin at *Delegora*, *Sangora*, *Bordelen* and *Bata*, which have ſpoil'd the Trade of the *Engliſh* thither for that Commodity. Tin found in *Aſia*.

CHAP. VII.

Of the ſeveral Religions practiſed in the East-Indies, *and Things relating to them.*

Chriſtianity in the *Indies*

CHriſtianity for many Ages had been the Religion of the *Indians*, ſaving that there ſtill remain'd a conſiderable Body of the People, who ſtuck to their old Idolatry; for it could not be ſuppoſed, that ſuch vaſt Tracts of Land, under divers Kings, and lying in Places almoſt inacceſſible, could all be converted to Chriſtianity. *Mahometaniſm* had over-ſpread the greateſt part of *Aſia*, before it reach'd the *Indies*; and tho' it was uncertain who was the true Follower of *Mahomet*, *Ali*, or *Oſman*, yet ſo ſucceſsful was that falſe Religion, as to engage the *Perſians* to be Followers of the one, *viz.* *Ali*, calling themſelves *Chiais*, and the *Turks* of the other, *viz.* *Oſman*, calling themſelves *Sunni's* or *Oſmanlys*. When it firſt appeared in the *Indies*, there was ſuch an Exceſs of Pride and Vice, and ſo great a Want of Piety and Devotion among the Chriſtians, that 'twas equal almoſt to them what Religion they embraced, who practiſed none; and the Idolaters were an effeminate People, able to make no Reſiſtance; ſo that it was eaſie for the *Mahometans* to ſubdue both the one and the other by Force of Arms, and as eaſie to wean or fright them from their Religion, which they did ſo advantageouſly, that many, as well Chriſtians as Idolaters, embraced *Mahometaniſm*, and there appears no Footſteps of Chriſtianity, but *Mahometaniſm* and Idolatry muſt be reckoned all the Religions of the *Indies*. The Great *Mogul*, with his Court, follow the Sect of the *Sunni's*, the King of *Golconda* that of the *Chiais*.

Mahometaniſm, overſpreads the *Indies*.

In the King of *Viſapour's* Territories, the *Sunni's* and *Chiais* are mingled together, which may be ſaid alſo of the Court of the Great *Mogul*, becauſe of the great Numbers of *Perſians* that flock thither to ſerve in his Armies; but becauſe *Aureng-Zeb* teſtifies, above all things, an extraordinary Devotion for the Sect of the *Sunni's*, of which he is ſo zealous an Obſerver, that he ſurpaſſes all his Predeceſſors in outward Profeſſion, which was the Cloak under which he uſurped the Crown; for when the took Poſſeſſion of the Throne he gave it out, That he did it only out of a Deſign to cauſe the Law of *Mahomet* to be more ſtrictly obſerved, which had been very much neglected in the Reign of *Cha-Jehan*, his Father, and *Jehan-guir*, his Grandfather; and to ſhew himſelf the more zealous for the Law, he turn'd *Faquir*, or *Dervis*, i. e. poor Voluntier, and under that falſe Pretence to Piety he cunningly made way to the Empire; they are contented to conceal their Belief, and ſubmit to his Orders, as if they were of his Religion; for as he will not permit them to keep holy the Day conſecrated to the Memory of *Hoſen* and *Heuſſin*, the 2 Sons of *Hali*, who were put to Death by the *Sunni's*, ſo to pleaſe him they are willing enough to conform. *Routcoub-Cha*, the preſent King of *Golconda*, is very zealous in maintaining the Law of the *Chiais*, becauſe the Grandees of his Court are almoſt all *Perſians*.

The greateſt Zealots of *Mahometaniſm* among the *Indians* are the *Faquirs*, of which they reckon that there are 800000, which is a prodigious Number; they are all of them Vagabonds and lazy Drones, that dazzle the Eyes of the People with a falſe Zeal, and make them believe that whatever comes out of their Mouths is an Oracle. There are ſeveral ſorts of *Mahometan Faquirs*: One ſort go almoſt naked, like the idolatrous *Faquirs*, having no certain Abode, but giving themſelves up to all manner of Uncleanneſs. There is another ſort, whoſe Garments are made up of Patches of all Colours, and reach half way their Leg; they go in Troops, and have a Superior of their Gang, whoſe Garment is generally poorer, and more patch'd than all the Reſt, and draws after him a great Chain tied to his Leg, 2 Ells long; and when he ſays his Prayers, he doth it with a loud Voice, and rattling his Chain, putting on ſuch an affected Gravity all the while, as draws the Veneration of the People, and in the mean time the People prepare a Dinner for him and his Company. In the Place where he makes his Stand, his Diſciples ſpread Carpets for him to ſit down on to give Audience, and then go up and down the Country publiſhing the Vertues of their Maſter, what Favours he receives from God, who imparts his greateſt Secrets to him, and gives him Power to relieve Perſons in Affliction by his Counſel. The People who give Credit to him, and believe him to be an holy Man, come to conſult him with profound Devotion, and ſitting down by him propound their Queſtions, which he anſwers, as he pretends, by a Prophetick Spirit; and chiefly he boaſts to teach barren Women to have Children, and to be beloved of whom they pleaſe. He calls his Diſciples together (which are ſometimes 200) with an Horn or Drum, and in his Travels they fix a Standard where he repoſes. The 3d ſort of *Faquirs* are thoſe that being born of poor Parents, and deſirous to underſtand their Law, and become *Moullahs*, or Doctors of it, retire to the Moſques, where they live on the Alms given them, and employ all their Time in reading the *Alcoran*, which they get by heart; and if they can but acquire beſides the Knowledge of ſome natural Things, and an exemplary Life, they come to be Chief of the Moſques, and obtain the Dignity of *Moullahs*, and Judges of the Law. Theſe *Faquirs* not only have Wives, but out of their Zeal to imitate *Mahomet*, have 3 or 4, thinking they do God great Service in begetting many Children to be Followers of their Law.

The *Mahometan Faquirs*, of 3 ſorts.

The Idolaters among the *Indians* are ſo numerous, that they are reckoned 5 or 6 to one *Mahometan*, which might make it miraculous that they ſubmit to the *Mahometan* Princes, were it not that they are at ſuch Enmity among themſelves, their Superſtition having introduced ſuch a Diverſity of Opinions and Cuſtoms, that they can never agree one with another. An Idolater will not eat Bread nor drink Water in the Houſe of any one that is not of his Caſte, tho' it be more noble and ſuperior to his own, unleſs it be with the *Bramins*, whoſe Houſes are open to all the World. Idolaters.

A Caſte among theſe Idolaters is much the ſame thing as a Tribe among the *Jews*; and tho' it be vulgarly believed, that there are 72 Caſtes, and ſome ſay 84, yet there are but 4 principal ones, from whom the reſt take their Original. Their Caſts or Tribes.

The firſt Caſte is that of the *Bramins*, who are the Succeſſors of the ancient *Brachmans*, or *Indian* Philoſophers, that ſtudied Aſtrology. They have ſtill ſome of their Books, which are very ancient, and in reading of which they ſpend all their Time, and are ſo ver- 1. The *Bramins*.

verſed in their Obſervations, that in foretelling the Eccliplſes of the Sun and Moon they will never fail a Minute. To preſerve this Knowledge they have a kind of Univerſity at *Benarez*, where their Doctors expound their Law, and they perform all their Exerciſes in Aſtrology; but becauſe they are too numerous to ſtudy all there, many are very ignorant and ſuperſtitious, and the moſt refined Wits among them are the greateſt Sorcerers.

2. *Raſpouts.* The 2d Caſte is the *Raſpouts*, or *Catry's*, *viz.* Warriors and Warlike People. Theſe are the only Idolatrous *Indians* that have any Courage to ſignalize themſelves in War. All the *Raja's* are of this Caſte. They are ſtill petty Kings, but 'twas their own Differences among themſelves that made them Tributary to the *Mogul*; but becauſe moſt of them are continually in his Service, they are ſufficiently recompenſed by the great Salaries they receive for the Tribute they pay. Theſe *Raja's* and the *Raſpouts* their Subjects, are the chiefeſt Supports of the *Mogul's* Dominions, and 'twas 2 of the greateſt of them, *Jeſeigne* add *Jeſſomſeigne*, that raiſed up *Aureng-Zeb* to his Throne; but the *Raſpouts* only at this Time are the Warriors, and that Horſe-men only, for the *Katri's* are degenerated into Merchants.

3. The *Banians*, or Bankers. The 3d Caſte are the *Banians*, or *Ouens*. They wholly addict themſelves to Trade, and are ſome of them *Sheraffs*, or Bankers, and others Broakers, who are employ'd between Merchant and Merchant for Buying and Selling. They are ſo ſubtle and nimble in Trade, that a *Jew* may be Apprentice to them. They accuſtom their Children betimes to flee Idleneſs, and ſo early teach them Arithmetick, that they will in their Age caſt up the moſt difficult Account without Pen or Counters. They live with their Fathers to be inſtructed in Trade, and do nothing but what they ſhew them. If any Man flie at them in the Heat of his Paſſion, they'll hear him patiently, without making any Reply, and parting coldly with him, not ſee him again for 3 or 4 Days, till they think his Paſſion is over. They never eat any thing that has Life, and will rather die themſelves, than kill the leaſt Animal or Vermin that crawls. They never fight nor go to War, nay, they will not ſo much as eat or drink in the Houſe of a *Raſpout*, becauſe they kill the Victuals they eat, all but Cows, which they never touch.

4. The *Charadis*, or true Soldiers. The 4th Caſte are the *Charado's*, or *Soudras*, who go to War, as well as the *Raſpouts*, but with this Difference, that the *Raſpouts* ſerve on Horſe-back, and the *Charado's* on Foot. Both of them account it an Honour to die in Battle, and moſt infamous to retreat in Fight, inſomuch, that a Wife, tho' ſhe loves her Husband never ſo well, will not receive him into her Houſe, who has this Mark of Cowardize upon him, till he has regained his Reputation.

5. The *Pauzecour*, or Handicrafts. The reſt of the Natives, which are not reckoned in the Number of theſe Caſtes, are called *Pauzecour*, and are ſuch as employ themſelves in Handicraft Trades. Theſe, in Imitation of the former, have ranged themſelves into ſeveral Bodies, like Caſtes or Tribes, and bring up their Children, and marry them only to their own Tribe. Thus the *Colis*, or Cotton-Dreſſers, are one Tride, the Bow-Makers and Fletchers another, and ſo of moſt Trades. Among all theſe Caſtes, the moſt mean and contemptible are the *Piriaves*, who are employ'd in taking off and carrying away the Skins of ſlain Beaſts, and ſome of them are Curriers; the *Alacor*, whoſe Employment is to clean Houſes, for which every Family pays them ſomething once a Month; for if a Perſon of Quality have never ſo many Servants, not one of them will ſweep a Room, but attend upon his own Office only, but the Slaves are to do any thing. Theſe Men make uſe of Aſſes to carry the Filth of the Houſes into the Fields, and therefore no *Indian* will touch that Animal. Theſe Men will eat all ſorts of Meat, prohibited or not prohibited, and will feed on the Leaving of all the other Caſtes.

Baragny, a Caſte of Gentiles. There is a Caſte of Gentiles in *India*, called *Baragny*, who damn the Yellow Colour, and put White on their Foreheads, contrary to the Cuſtoms of the other Caſtes, who have Red put there by the *Bramins*, to whom they preſent Rice and Cows, and when 'tis done they bowe their Heads thrice, and as many times lift up their join'd Hands to their Foreheads. All the Caſtes or Tribes, go to their Devotions at the ſame time, but adore what Idol they pleaſe, and if it be not in the Temple they go to, they carry it. They have an Order of Subordination among themſelves; the *Bramins* are firſt, the *Raſpouts* next, and then the *Courmi* and *Bamans*, and theſe Places they willingly yield to each other.

The Learning of the *Bramins*. The *Bramins* are the Doctors and Prieſts of the Law and apply themſelves chiefly to Theology and Philoſophy, but they underſtand alſo Aſtrology, Arithmetick and Phyſick, and ſometimes practiſe this laſt, but then they muſt pay a Tribute to their Caſte for a Licenſe. All the Gentiles reſpect them, and believe them in all Things, becauſe they have been told, that God ſent the 4 *Bets*, which are the Books of their Religion to them, of which they are the Keepers. Concerning their Adoration of Images, they ſay, *That they worſhip them not, but their Attention is always fix'd upon God; That they honour them only, becauſe they put them in mind of the Saint they repreſent; That the Ignorant believe, that many great Men (under whoſe Shape God hath made himſelf known) are Gods, but that for their part they believe no ſuch thing; and that if God hath pleaſed to act ſo, that it was only to facilitate the Salvation of Men, and to condeſcend to the Capacity and Humour of every Nation.*

Their Doctrine about the Adoration of Images.

The Idolatrous Kings of *Aſia*. The chief of the Idolatrous Kings of *Aſia* are, the King of *Aracan*, Kings of *Pegu*, *Siam* and *Cochin-China*. The King of *China*, ſince the *Tartars* have ſeized his Dominions, is neither *Mahometan* nor Idolater, but part of both. In the Iſlands, the Kings of *Japan*, *Ceilon*, and the petty Kings of the *Malucca's*, are Idolaters, as are alſo all the *Raja's*, as well in the Empire of the Great *Mogul*, as in the Neibouring Kingdom of *Viſapour* and *Golconda*, and the People in all thoſe 3 Kingdoms, as alſo in the Iſlands of *Achan*, *Java* and *Macaſſar*, tho' their Kings are *Mahometans*, are all themſelves Idolaters. One of the Kings of *Ceilon*, about 50 Years ago, became a Chriſtian, and was baptized by the Name of *John*; but as ſoon as it was known that he had embraced the Chriſtian Faith, the Princes and Prieſts of the Country ſet up another King in his Room.

The King of *Ceilon* depoſed for turning Chriſtian.

Tho' the Idolatrous *Indians* attribute to the Creatures, as Cows, Apes, and ſeveral Monſters, thoſe Divine Honours, which are only due to God, yet they acknowledge only one Infinite God, Almighty and only Wiſe, the Creator of Heaven and Earth, who fills all Things with his Preſence, whom they call *Permeſſar*, and repreſent by an Oval Figure, as the moſt Perfect. They have a Deity called *Ram*, to whom they give a wonderful Veneration, becauſe of the Miracles which they believe he wrought while he was upon Earth. They relate of this *Ram*, That he was the Son of *Deſeret*, a potent *Raja*, and the moſt Vertuous of all his Children, and therefore deſigned to be his Succeſſor, but his Mother being dead, his Father was prevailed with by a 2d Wife to baniſh him, his Wife and Brother *Lakeman*, that her Son might be his Succeſſor. Being thus driven from home, as they paſſed through a Wood, *Ram* purſuing a Bird, ſtray'd from them, and *Sita* his Wife ſent *Lakman* to find him; while *Sita* was thus left alone, *Rhevari*, another of their Idolatrous Gods, appears to *Sita* in the Form of a *Faquir*, or poor Man, and ſeizing on her, carried her away. *Ram* being return'd, and miſſing *Sita* his Wife, fell into a Swoon, but being recovered by his Brother, they went to ſearch for her, and not finding her, employed all Creatures to diſcover her, and *Harman* the Monkey found her out in *Rhevari's* Court in great Affliction, and gave an Account of it to *Ram*, who raiſing Forces, ravaged his Kingdom, took his Wife, and made *Rhevari* flie to the Mountains, where he ſpent his Days like a poor *Faquir*, in unſpeakable Sorrow, and wandering up and down poor, ſtript of all, and quite naked. From hence they deduce the Original of the *Faquirs*, for he found enough to follow him in a Courſe of Life, that gives them ſo much Liberty, and being honoured as Saints, they were zealous of ſuch a Life. Theſe *Faquirs* wander generally in Troops, every one having a Superior, as the *Mahometans* have, and becauſe they go quite naked Winter and Summer, and lie upon the hard Ground; when it is cold, the young *Faquirs*, and others moſt devout, go every Afternoon to ſeek for the Dung of Cows and other Creatures, to make them Fires, becauſe they fear that in burning Wood, they ſhall kill any living Animal, which is wont to breed there: Of this Dung they make large Fires, according to their Company, and all the *Faquirs* ſit round it, and when they grow ſleepy, they lay themſelves down upon the Aſhes ſpread abroad. As for the *Faquirs* that

Ram, an *Indian* God.

The Original of the Heathen *Faquirs*.

Their Fires of Cow-dung.

that do Penance, they alſo kindle a Fire on each ſide of them, becauſe otherwiſe they were not able to endure the Cold. The rich Idolaters count themſelves happy, and their Houſes to be filled with the Benedictions of Heaven, when they have any of theſe Religious *Faquirs* for their Gueſts; and they honour 'em the more, by how much they are the more Auſtere. The Crews of *Faquirs* many times join together to go in Pilgrimage to the principal Pagods, and publick Waſhings, upon certain Days in the Year in the River *Ganges*. Some of the moſt auſtere *Faquirs* live in little pitiful Huts, near the Pagods, where once in 24 Hours they have ſomething beſtowed upon them to eat for God's Sake. They generally build their Pagods under a certain Tree, called *a War*, or near it, which they have in great Veneration; the *Franks* call it the *Banian* Tree, and the *Portugueſe*, *Arbor de Rizes*, the Tree with Roots.

Their Penance.

Their Penance conſiſts in ſtrange and unnatural Poſtures of the Body, and long Faſts. Some carry their Arms a-croſs continually above their Heads, inſomuch, that they can't bring them down again; others will not ſuffer themſelves to ſleep for ſeveral Years together, and others faſt 8 or 10 Days ſucceſſively, with many other Hardſhips very grievous to Fleſh and Blood; and tho' they are ſtark naked, and Women commonly approach them, yea, will touch and kiſs their Privy-Parts, yet there appears no Carnal Motions, but rather they ſeem to be in an Extaſie.

The Doctrine of the *Bramins*.

The Doctrines which the *Bramins* teach, and are moſt firmly believed by theſe Idolaters, are, That every Man may be ſaved in his Religion and Sect, provided he exactly follow the Way which God hath ſet before him, and that he will be damned if he take another Courſe. They make no doubt but that their Religion is the very ſame which was eſtabliſhed by *Adam*, and preſerved by *Noah*: They believe an Heaven and Hell, but affirm, that none ſhall enter into either before the Day of Judgment. They ſay alſo, that no Body ought to find Fault with them for the Honour they ſhew to the Cow, for they prefer her before all other Animals, only becauſe ſhe furniſhes them with more Food by the Means of her Milk, than all the Reſt put together, and ſhe brings forth the Ox, which is ſo uſeful to the World, for he makes it ſubſiſt by his Labour, and feeds Men by his Pains.

The Honour they give the Cow.

Their Tranſmigration.

'Tis an Article of the Idolaters Faith, That the Souls of Men departing out of the Body, are immediately preſented to God, who according to the Lives they have led in the World, orders them another Body to inhabit; ſo that one and the ſame Perſon is born ſeveral times into the World, and muſt make many Tranſmigrations, but how many, they do not determine, according to the Doctrine of *Pythagoras*. The Souls of the wicked and vicious Perſons they hold, That God diſpoſeth into contemptible Beaſts, ſuch as Aſſes, Dogs, Cats, and the like: to do Penance for their Crimes in thoſe infamous Priſons; but they believe, that thoſe Souls that enter into Cows are happy, preſuming, that there is a Divinity in thoſe Creatures, for if a Man die with a Cow's Tail in his Hand, they ſay, 'tis enough to render him happy in another World; and if any Men in their Life-time are famous for their vertuous Deeds, they hold, that their Souls paſs into the Bodies of ſome potent *Raja's*, where they enjoy the Pleaſures of this Life, as the Reward of their good Works. Theſe Opinions of the Tranſmigrations of Souls make them cautious of killing any Creature whatſoever. for fear they ſhould be guilty of the Death of ſome of their Kindred or Friends, who are doing Penance in thoſe Bodies, and for this Reaſon ſome of them will never kindle a Fire, or light a Candle, for fear ſome Gnat or Butter-fly ſhould burn it ſelf thereat, and the Soul of ſome Man be diſlodged from the Body allotted it. In proſpect of ſaving living Creatures, they often ſollicit the *Mogul* Governours to forbid Fiſhing upon certain Feſtivals, and to procure a Prohibition, will give them Preſents; but above all, they labour moſt to hinder the killing of Cows, but can never attain it, becauſe the *Mahometans* will eat Fleſh, and that of the Cow is the beſt in the *Indies*. 'Tis alſo from this Opinion, that the *Faquirs* put them to ſuch horrible Penance, and that ſuch as are not able to endure ſuch Torments in this World, labour to ſupply the Defect by good Works as long as they live, and when they die, charge their Heirs in their Wills to give Alms to the *Bramins*, to the End that by the Power of their Prayers, their God may aſſign them the Body of ſome Noble Perſonage after their Death; and to facilitate this honourable Tranſmigration, ſuch as are Rich burn the Body of their Relations with Sandal-Wood and Lignum-Aloes mixed with the common Wood, hoping that by this Means their Souls will paſs into ſome great Lord in another Country. There are ſome alſo of them ſuch Fools, as to bury much Treaſure in their Life-time, eſpecially the rich Men in the Kingdom of *Aſen*, to the End, that if they ſhould be condemned to the Body of ſome poor miſerable Perſon, they might have wherewithal to ſupply their Neceſſities. Theſe are great Errors in theſe poor Idolaters, but it is impoſſible to convince them of 'em, becauſe they are ſo much wedded to their old Forms and Cuſtoms, that they will hear no Reaſon.

The Reaſon why they will kill no Creature.

The Reaſon of their ſtrange Penance and good Works.

The *Indian* Idolaters have a great Number of Temples, ſmall and great, which they call Pagods, where they pray to their Gods and make their Offerings; but the poor People, that live in Woods and Mountains, remote from Towns, are contented only with ſome Stone, on which they make a rude kind of Noiſe, and paint with a Vermilion Colour, which ſerves for the whole Neighbourhood to worſhip. The 4 moſt celebrated Pagods, are *Jagrenate*, *Banarous*, *Matura* and *Tripeti*. *Jagranate* is one of the Mouths of the *Ganges*, where is built the great Pagod, where the *Arch-Bramin*, or Chief-Prieſt, hath his Reſidence. The Idol which is worſhipped here is called *Reſora*. His Image is very magnificent, having 2 Diamonds for his Eyes, and another hanging about his Neck, the leaſt of which weigh about 40 Carats. About his Arms are hung Bracelets of Pearls, and ſometimes Rubies. It ſtands upon an Altar in the innermoſt part of the Pagod. The Revenues of this Pagod are ſufficient to feed 15 or 20000, and ſuch Numbers are often ſeen there, becauſe 'tis the greateſt Place of Devotion in all *India*, it be ſcituated upon the *Ganges*, whoſe Water theſe Idolaters believe to have a particular Quality to cleanſe them from their Sins. That which makes it ſo rich (for it maintains above 20000 Cows) is the vaſt Alms which is beſtowed by all that reſort thither, not as they will, but as the Chief-Prieſt taxes them, who has an Information of their Ability. Thus he collects vaſt Sums, of which he makes little or no Uſe himſelf, but gives them to feed the Poor and repair the Pagod. To the Pilgrims he gives Milk, Wheat, Butter and Rice daily, but to the Poor he gives it ready dreſſed. They boil the Rice in Earthen-Veſſels, and give a Pot to a certain Number, which a *Bramin* carrying to them, lets it fall before them, and it will break into as many Parts as the Company is. The Idol is covered with a great Mantle of Tiſſue of Gold or Silver, according to the Solemnity, that hangs down upon the Altar, and covers all but his Hands and Feet. At the Right Hand of this Idol ſits his Siſter *Sotora*, and on his Left ſtands his Brother *Bethadar*, both well clad, and before him ſtands *Remiri*, his Wife, all of maſſie Gold. On each ſide of this Pagod ſtands another much leſs, where the chief *Bramin*, and the other *Bramins* who officiate in the great Pagod reſide, and where the Pilgrims make their leſſer Offerings, which they have vow'd in Sickneſs, or for Succeſs in any Buſineſs. All the *Bramins* go with their Heads bare, and for the moſt part ſhaved, having no Cloaths but one Piece of Calicut, with one Half whereof they cover their Bodies, and the other part ſerves them inſtead of a Scarf. Near the Pagod is a Tomb of the Prophet *Cabir*, to whom they give great Veneration, and the Idols in it are encompaſſed with great Iron Bars, that none may touch them, but the *Bramins* appointed by the chief *Bramin*.

Next to that of *Jagrenate* is the famous Pagod at *Banarous*, a City ſeated alſo upon the *Ganges*. From the Gate of this Pagod to the River is a Deſcent all of Stone, and by it Lodgings, and other Rooms to dreſs Victuals for the *Bramins*, for they ſuffer none to touch their Victuals but themſelves, leſt it be defiled. Here the *Bramins* drive a great Trade in Bottling *Ganges* Water, which being ſeal'd by the Chief-Prieſt, they carry it up and down the Country to ſell, or preſent it to the Rich, who think it cleanſeth them of all their Sins, and drink it at their great Feaſts. The Body of this Pagod is made like a Croſs, as the other Pagods are, in the midſt is a Cupulo, raiſed very high like a Pyramid, and at the End of the 4 Parts a Tower, to which there is an Aſcent on the Out-ſide, and on the Sides ſeveral Niches and Balconies to take the Air, and round them are many leud Figures. Under the Duomo, in the middle of the Pagod, ſtands an Altar 8 Foot

Foot long, and 6 Foot broad, and 2 Steps before it, which is sometimes covered with rich Tapestry, and sometimes with Silk, Cloth of Gold or Silver, according to the Solemnity of the Feast. The Idols stand upon the Altar. The chief Image, which is made in Honour of *Banima-Dou*, a great and holy Person among them, whose Name they have often in their Mouths, is placed upright, 5 or 6 Foot high, but nothing is visible but his Head and Neck, all the rest being cover'd with a Robe that reaches to the Bottom of the Altar, His Neck is set out with some rich Chain, either of Gold, Rubies, Pearl or Emeralds. Upon the Right side of the Altar stands a *Chimera*, part Elephant, part Horse and part Mule, of massie Gold, called *Garou*, which they say is a Resemblance of the Beast on which he travell'd while he was upon Earth, to see whether the People did their Duty, and did no Wrong one to another. Upon the Left Hand of this Altar is another little Altar, where stands an Idol of black Marble, sitting cross Legg'd, about 2 Foot high. 'Tis called *Morli-Ram*, and was the Brother of him that stands upon the great Altar. This Idol alone stands stark naked. Under the Portal of this Pagod sits one of the principal *Bramins*, who marks all that have washed in the *Ganges* with a Yellow Colour between the Eyes, upon the Arms and Stomach, to shew that they are perfectly purified.

Near to this Pagod upon the Summer West stands a kind of College, built by *Raja Jesseigne* for the Education of the Youth of the better sort, under several *Bramins* their Masters. The *Raja's* send the young Princes their Children to be educated there. In it is a Pagod dedicated to a Goddess, called *Ram-Ram*, Sister of *Morli-Ram*. Upon her Right Hand she has a Child made like a *Cupid*, which they call the God *La-Kemin*, and in her Left Arm a little Girl, which they term the Goddess *Sita*. The Women, both Married and Maids, call this Goddess their Patroness, and flock thither mightily to invoke her. The Way of Worshipping it, is to fall on the Ground, and laying their Hands upon their Heads, prostrate themselves 3 times to it, and when this is done, they present the Idol with great store of Rice-Meal, Butter, Oil and Milk-Meats. The Goddess *Ram-Ram* has 2 Diamonds for her Eyes, a Collar of Pearl about her Neck, and a Canopy over her Head, supported with 4 Pillars. Over-against this College stands another Pagod, where the Idol *Richourdû* and his Brother *Guipaidû*, which stand upon 2 distinct Altars, are worshipped.

Eight Days Journey from *Banarous*, Northward, is a Mountainous Country, which opens it self sometimes into large Plains, very fertile in Corn, Rice, Wheat and Pulse, but it abounds so much with Elephants, that they ruin the People and destroy their Harvest, yea, the Caravans can hardly keep them by great Fires, Hollowing and Shooting of Guns from taking away their Provisions. In this Place is a Pagod well built and very ancient, adorned with many Figures of Maids and Women both within and without. In the middle of it upon an Altar stands an Idol of massie Gold, representing a Maid standing upright, 5 Foot high, called *Ram-Marion*. Upon her Right Hand stands a Child about 2 Foot high in massie Silver, whom in 2 or 3 Years time she instructed so in her Belief, that her Company was desired by all the *Rija's* in the Country, so that they stole her from her, but was never after seen. On her Left Hand stands another Idol of an old Man, who was her Servant. The Women come hither once a Year in Devotion in great Numbers, and the Men but few and rarely, upon the 1st of *Nov.* and for 15 Days fast and wash themselves 3 times a Day, taking every Hair from all Parts of their Bodies with a certain Earth, and then upon the Full of the Moon the Pagod is opened, and all present their Devotions.

The Pagod of *Matura* is most considerable next to those of *Ingrenate* and *Banarous*. It stands about 18 Lgs. from *Agra*, in the Way to *Debli*, and is one of the most sumptuous, lofty and magnificent Edifices in all *India*. It was formerly resorted to by the greatest Number of Pilgrims, but the People have left all their Reverence for it, because the River *Gemena*, that formerly ran by it, is receded from its old Course, and gone a Lg. further. It is built in a Valley, but being very high, is visible 5 or 6 Lgs. before you come at it. The Stones are of a red Colour, and make very fair Pillars. The Platform is 8 square, and paved with Free-Stone, being adorn'd on the Out-side round about with Figures of all sorts of Creatures, especially Apes. There are 2 Ascents to it 15 or 16 Steps high, at the Portal and Chancel. In the midst is a great Duomo, and 2 smaller of each side, which are full of Niches, where stand the Figures of Demons, some with 4 Arms or Legs, others with Mens Heads on Beasts Bodies. In it is a great Altar covered with Tissue of Gold and Silver, upon which stands the great Idol *Ram*. His Head is of black Marble, and seen only, and his Eyes are made of 2 Rubies. All the Body is covered with a Robe of Purple Velvet. They say of this God, that he was produced out of the Light, and tho' they assign him a Father and Mother, yet 'tis for Form's sake only, seeing he was not born, and therefore they render him Divine Honours, and salute their Friends in his Name, saying, *Ram, Ram*. Their Adoration of him consists in joining their Hands, as if they pray'd, letting them fall very low, and then lifting them up again gently to their Mouths, and lastly, raising them over their Heads. They call *Chita* the Wife of *Ram*, and seeing what Respect the *Portuguese* gave the Image of the Virgin, they take it for a Representation of their *Chita*, and going to *Bassaim*, a Town belonging to the *Portuguese*, worship it by saluting it, pulling off their Shoes, making many Reverences, putting Oil into the Lamp that hangs before the Image, and casting some Money into the Box, if they are able. They would have also anointed it, and offered a Sacrifice of Fruits to it, but the *Portuguese* would not suffer them.

The 4th famous Pagod is at *Tripeti*, in the Province of *Carnatica*, toward the Coast of *Coromandel* and Cape *Comori*. It has a great Number of Lodgings for *Bramins* in it, so that it seems like a Town. It has several Ponds about it, but the *Bramins* will allow none to take any Water out of them, but what they give them. All the *Indian* Idolaters, both on this side and beyond *Ganges*, go at least once in their Lives in Pilgrimage to one of these Pagods, but usually to *Ingrenate*, as being the Chief, and the *Bramins* and rich People oftner, some every 4 Years, others every 6 or 8 Years. They put the Idols of their Pagods upon *Pallekies*, covered with Tissues, and so go in Procession. They go whole Towns together, the Rich in *Pallekies*, or Chariots, and the Poor on Foot, or upon Oxen, the Wife carrying the Child, and the Man the Kitchin Implements, the poor being supplied by the Rich, who are very liberal upon this Occasion. The *Bramins* distribute Flabels to the most considerable of the Company, made with Tissue, adorn'd with Peacocks Feathers, to gather more Wind, and sometimes with Bells, to make a little Tingling. Six of these Flabels are employ'd together to keep the Flies from their God, and the better sort of People take the Office by Turns, that the Honour of waiting upon their God may be more equally divided.

The Idolaters have many other odd superstitious Customs. Before an Eclipse of the Sun, which the *Bramins* exactly foretell, all the People, both Men, Women and Children, wash themselves in the River *Ganges*, and all that time labour Day and Night in providing all sorts of Rice, Milk-Meats and Sweet-Meats. At the Time of the Eclipse the *Bramins*, who have every one their Magick-Book, find out the good Hour, and cry aloud to the People to feed the Fish, and then they cast all they have provided into the River to the Fish and Crocodiles, and then they all go in to wash and rub themselves till the Eclipse is over, while there is an horrible Din of Drums, Bells and sounding Mettal struck one against another. At the Time also of the Eclipse's appearing, the Idolaters break all the Earthen Pots and Dishes in their Houses, which make an hideous Noise together. While they are washing there is nothing to be seen in the River for some Lgs. together, but Heads. The *Bramins* stay ashore to receive the richer sort, who give them most to dry their Bodies, and seat them down in a Chair, where they have provided Rice, Pulse, Meal, Butter, Sugar and Wood.

When the Moon is at the Full in *March*, they keep a solemn Festival for their Idol, which is the Form of a Serpent, 9 Days; not only Men, but Beasts keeping Holy-day, which they adorn by making Circles of Vermilion about their Eyes, colouring their Horns also with the same, and hanging them with Leaves of guilded Tin. Every Morning they worship the Idol and the Maids dance about it for an Hour together to the Noise of a Flute and Drums, and then they eat, drink and are merry till the Evening, when they worship and dance about their Idol again. The Idolaters never

never drink any ſtrong Drink at other Times, but at this Feſtival they drink Palm-Wine, and ſtrong Water made of it. When a Chief *Bramin* dies, their Great Men voluntarily die with him, that they may be ready to ſerve him in another World.

Tho' theſe Idolaters know not the true God, yet they underſtand Morality by the Light of Nature. When they are married they are ſeldom falſe to their Wives; Adultery is very rare among them, and Sodomy never heard of, for they marry their Children between 7 and 8 Years old to prevent thoſe Vices. Their Marriages are performed with much Ceremony, and if the Perſon be rich or noble, with much Pomp and Expence (the Bridegroom riding on an Elephant, the Bride in a Chariot, and the Company on Elephants, or prancing Horſes) *viz.* Preſents, Feaſtings and Fire-Works, and, which is moſt expenſive, the Water of *Ganges*. The Chief of the *Bramins* preſent celebrate the Solemnity after this Manner: He firſt lays the Head of the Bride to the Bridegroom, and pronouncing ſeveral Words, ſprinkles their Heads and Bodies all the while with Water. Then they bring him upon Plates, or Fig Leaves, ſeveral ſorts of Meats, Cakeuts and Stuffs, and then the *Bramin* asks the Bridegroom, Whether ſo long as God ſhall make him able, he will let his Wife ſhare with him; and whether he will endeavour to maintain her by his Labour? And if he ſays, *Yes*, they all ſet themſelves down to the Feaſt prepared for them, every one eating by himſelf.

On the 8th of *April*, the Idolaters make a Feaſt at *Malle*, a City of *Bengal*, at which, according to a particular Cuſtom they all go out of the City, and faſten Iron Hooks to the Bows of ſeveral Trees, on which many poor People hang themſelves by their Fleſh, till with the Weight of their Bodies they fall off. 'Tis wonderful to ſee, that the Fleſh never bleeds, nor hangs on the Hooks, and in 2 Days is cured by a Plaiſter the *Bramins* give them. Others will lie on Beds of Nails, whoſe Points enter a good way into the Fleſh, while their Friends preſent them with Money and Linen, but they will make no Advantage of ſuch Gifts, but diſtribute them the Poor. This Feaſt and Penance, they ſay, they celebrate in Memory of the firſt Man, whom they call *Adam*, as we do.

The Cuſtom of burning the Dead is very ancient among theſe Gentiles, which Ceremony they moſt commonly perform by the Banks of a River, where they waſh the Dead, which they account the laſt Purgation from their Sins. Sometimes they will carry the ſick Perſon, Death approaching, to the Bank of ſome River or Pond, and putting his Feet into the Water, dip him more and more as Nature fails, till at length they hold him expiring up to the Chin in the River, and then they reckon the Body and Soul of ſuch a Perſon is cleanſed fully from all Defilement. After the Perſon is dead, they plunge him over Head and Ears in the River, and then pitch upon ſome Place for his Burning, which is uſually near a Pagod. The Wood is generally provided by ſuch as make it their Buſineſs upon that Occaſion, and are at an Agreement for their Pains. When an Idolater is to be burnt, all thoſe of his Caſte, or Tribe, aſſemble together at the Houſe of the Deceaſed, and laying the Body upon a Bier, covered with clean fine Linen, according to his Quality and Eſtate, they follow the Bier to the Place where the dead Man is to be burnt. As they go along they ſing certain Prayers to God, pronouncing ſeveral times the Words, *Ram, Ram*, while another going before, ſounds a Bell, to advertiſe the Living to pray for the Dead. The Body being brought to the Place of Burning, they waſh it all over in a River or Pond juſt by, and then burn it. According to the Quality of the Deceaſed they alſo mingle with the ordinary Wood, Sandal Wood and other ſweet Woods. With the Bodies of the deceaſed Husbands, they count it a meritorious Thing for the Wife alſo to burn her ſelf, and the *Bramins* make them believe, that in dying after that manner, ſhe ſhall revive again with him in another World, with more Honour and Advantages than they enjoy'd before: nay, the Prieſts tell them, That while they are in the midſt of the Flames, before they expire, their God *Ram* will appear to them, and reveal wonderful Viſions to them, and that after their Souls have tranſmigrated into various Bodies, they ſhall at length obtain an high Degree of Honour to Eternity. But all this prevails not ſo much with the Women, as the ill Treatment of Widows after their Husband's Deceaſe; for ſo ſoon as the Man is dead, the Wife retires to bewail her Husband, and ſome Days after they ſhave off her Hair, and having laid aſide all the Ornaments of her Apparel, ſhe takes off from her Arms and Legs the Bracelets which her Husband put on when he eſpouſed her, in Token of her Submiſſion and of her being chain'd to him, and all the reſt of her Life ſhe lives ſlighted and deſpiſed, and in a worſe Condition than a Slave in the very Houſe whereof ſhe was Miſtreſs before. This unfortunate Condition cauſes them to hate Life, ſo that they chuſe rather to die with their deceaſed Husbands, than to live in the Scorn and Contempt of the World: However, no Woman can burn her ſelf with the Body of her Husband, till ſhe have the Leave of the *Mahometan* Governour, who abhorring the execrable Cuſtom of Self Murther, is very ſhy to permit it them, unleſs finding that no Perſwaſions will conquer the Woman's Reſolutions, he does it ſometimes in a Paſſion, ſaying, *The Devil take thee and all thy Relations.* But none but Widows that have no Children lie under the Reproach, which will force them upon a violent Death; for Widows that have Children are by no means permitted to burn themſelves, but commanded to live for the Education of their Children; and as for thoſe Women who have no Children, and are not permitted to burn themſelves, they ſpend the reſt of their Lives in doing Penance and performing Works of Charity. Some make it their Buſineſs to ſit upon the Road, boiling certain Pulſe in Water, and give the Liquor to Travellers to drink; others ſit with Fire always ready for them to light their Tobacco; others make Vows to eat nothing, but the undigeſted Grains which they find in Cow-Dung.

When any Woman has got Leave to die with her Husband, the Muſick ſtrikes up, and ſhe goes with Drums beating and Flutes playing before her to the Houſe of the Deceaſed, where all the Kindred and Friends of the Widow that is to die come to her, and congratulate her for the Happineſs ſhe is to enjoy in another World, and for the Honour the Caſte ſhe is of receives by her generous Reſolution. When the Day for her Burning is come, ſhe dreſſes herſelf as fine, as if ſhe were going to be married, and ſhe is conducted in Triumph to the Place of Execution with Muſick, as before, the Women that follow her ſinging Songs in her Honour. The *Bramins* that accompany her, exhort her to give publick Teſtimonies of her Courage and Conſtancy, and ſome think, they give her a certain Beverage to take away the Apprehenſions of Death, for 'tis the *Bramins* Intereſt to make them hold to their Reſolutions, for their Bracelets about their Legs and Arms, and the Pendants in their Ears, which are uſually Gold or Silver, are theirs, for none may touch the Aſhes but the *Bramins*, and they ſearch them for ſuch Booty.

In *Guzurat*, as far as *Agra* and *Delli*, they ſet up a little Hut made of Reeds, or ſmall Wood, about 12 Foot ſquare, upon the Bank of ſome River or Pond, and placing the Woman in the middle of it, with her Back to a Standard, to which the *Bramin* ties her about the Middle, that ſhe may not eſcape, when ſhe feels the Heat of the Fire, with her Husband's Head in her Lap, the *Bramins*, with her Kindred and Relations, ſet the Pile on Fire, and caſt Oils upon it to encreaſe the Flame, and deliver her the ſooner out of her Pain. All along the Coaſts of *Coromandel*, when a Woman is to be burnt with her Husband, they make a great Hole in the Ground 9 or 10 Foot deep, and 20 or 30 Foot ſquare, into which they throw a great Quantity of Wood and Drugs, which will burn moſt fiercely. When the Fire is kindled, they ſet the Body of the Man upon the Brink of the Pit, and then preſently up comes the Woman, dancing and chewing Beetle, and accompanied with her Friends, with Drums beating and Flutes ſounding. Then the Woman takes Three Turns round the Hole, and every time ſhe has gone round ſhe kiſſes her Friends and Kindred. After the 3d time the *Bramins* caſt the Carcaſe of her Husband into the Flame, and then the Woman ſtanding with her Back to the Fire, is puſh'd in by the *Bramins* alſo, and tumbles backward. Then her Kindred and Friends caſt Oil and other combuſtible Drugs upon the Fire, to make it burn more vehemently, that the Body may the ſooner be conſumed. Sometimes the Women Slaves, out of Tenderneſs and Kindneſs to their Miſtreſs, will burn themſelves with her to attend her into another World.

This

This barbarous Custom, tho' not so much used as formerly, hath yet several Instances of it, tho' the *Mahometans* do all they can to hinder it. It is true, that the Sight of the Pile is so affrighting, that some Women will run away, and endeavour to escape; but for the most part 'tis too late, the *Bramins* that are there usually with long Poles, if they cannot perswade them, will thrust them into the Fire by Force. Some indeed have escap'd by Chance, but then they are forced to flie to the *Mahometans*, *Gadous*, or *Portugueses*, for none of the Gentiles will receive them, or live with them, because they repute them infamous for committing such a Fault, and bringing Disgrace upon their Religion. In some Places where Wood is scarce, they do no more than broil, as it were, the Bodies of the Dead, and the Wife that dies with him, and then from an high Bank cast them into the River to be devoured by the Crocodiles and Fish; but in most Parts of the Coasts of *Coromandel* the Women are not burnt with their deceased Husbands, but are buried alive with them in Holes, which the *Bramins* make a Foot deeper than the Tallness of the Man and Woman. Usually they chuse a Sandy Place, so that when the Woman to and Man are let down together, all the Company with Baskets of Sand fill up the Hole about half a Foot higher than the Surface of the Earth, and then they jump and dance upon it, till they believe the Woman to be stifled. Some Idolaters about the same Coast, when their Friends are upon the Point of Death, carry them to the fattest Cow they can find, and laying the sick Party behind the Cow, provoke her to piss. If she pisses, and it lights upon the Face of the sick Party, all the Company are over-joy'd, saying, His Soul is happy; but if none fall on him, they burn him with Sadness. If a Cow be sick, the Owner must be careful to lead her to a Pond or River, for if she die in his House, the *Bramins* will fine him, and enjoin him a severe Penance. Many other Superstitions they have, almost too numerous to be counted.

Women buried with their Husbands.

The Peoples Practice at an Eclipse.

When there is an Eccliplse to be, they stand Men and Women in the Rivers up to the Waste in the Water, having their Privities only covered with a thin Cloth or Scarf, looking up to the Skies to discover the first Appearance of it; and as soon as they discern it, raise a great Cry, and plunge themselves all over in the Water many times one after another, and standing up with Hands and Eyes lifted up to Heaven, pray with great Devotion, and throw up the Water with their Hands towards Heaven, bowing down their Heads very low, and so continue till the Eccliplse is over, and then withdraw, casting some Pieces of Silver a good way off into the Water, and giving Alms to the *Bramins*, or Men of the Law. Most of them at their coming out of the Water have new Cloaths laid ready to put on, most of the Devouter of them leaving their old Cloaths for the *Bramins*.

The Great *Mogul*, tho' he be a *Mahometan* himself, suffers these Heathens to go on in their Superstitions, not only because he thinks it not safe to cross them, in the Exercise of their old Customs, but because they present him upon these Occasions, by the Hands of the *Bramins*, as their Commissioners, with a *Leck*, or 100000 Roupies, which are worth about 500000 Crowns, for which he usually gives them nothing, but a few Vests and an old Elephant. The Reasons which they alledge for these Ceremonies are these, That in their 4 *Beths*, or Books of their Law, given them by God thro' the Hands of a *Bramin*, they are taught, That a certain *Deuta*, which is a kind of Corporeal Divinity, black, malign and mischievous, seizeth on the Sun, and blackens it like Ink, and so darkens it; that tho' the Sun be also one of the most benefícent and perfect Divinities, 'tis at that Time in very great Pain and terrible Anguish, and 'tis a general Duty to endeavour to deliver him, which cannot be effected but by the Force of Prayers, Washings and Alms, and these Actions are of so great Merit at this time, that an Alms now given is worth 100 at another time.

The *Mogul* reverences the Heathens, and why.

The Cause of an Eclipse.

In the Town of *Jagenate* there is celebrated a Feast to the Deity of the same Name 8 or 9 Days, at which there are said to be sometimes 150000 Persons. At this Feast they make a stately Engine of Wood, painted with Monsters, Apes and Devils, moving on 14 or 16 Wheels, and drawn by 50 or 60 Persons, and on it they set the Idol of *Jagenate*, richly dress'd and adorn'd, and so transport him from Place to Place. Some of these, Pilgrims throw themselves under the Wheels as it moves, and are bruised to Death, being

A Procession at *Jagenate*.

made to believe, that it is a meritorious Action, for which *Jagenate* will receive them as his Children, and cause them to be born again in a State of Felicity and Glory. The *Bramins* also taking a young Maid and very beautiful, put her into *Jagenate's* Temple, for his Bride, telling her, that *Jagenate* will come and embrace her, and tell her what Processions, Feasts Alms and Prayers he demands of them, and whether the ensuing Year will be fruitful. The Priests act this Comedy, and deflowring her, instruct her in the Answers, and setting her upon the Engine, cause her to deliver what they please to the People. Before the Chariot and also in the Temple, certain publick Women dance in several indecent Postures.

The Marriage of a God.

Among the vast Number of *Faquirs*, *Dervices*, or Religious Heathens above-mention'd, there are abundance of them that have Convents, in which there are Superiors, and wherein they make Vows of Chastity, Poverty and Obedience, going stark naked, their Hair hanging down to the middle of their Legs, and Nails above an Inch long, and lying Nights and Days upon Ashes under the large Trees by their *Talabs*, or Ponds sides, or in the Galleries of their Idol Temples. Some of them go long Pilgrimages, not only altogether naked, but loaden with such huge Chains as they put about the Legs of Elephants. Others, who are believed to be true Saints, illuminated and perfect *Faquirs*, entirely united to God, have altogether abandon'd the World, and sequester'd themselves into some narrow Corner or Garden, like *Eremites*, and never come into the Town. If you carry them Meat, they receive it, if not, 'tis belived, they live by the sole Favour of God, in Fasting, Prayers and profound Meditations. They sink themseves into deep Raptures, and give out, that they behold God himself like a bright and inestimable Light with unexpressible Joy and Satisfaction, and some of them will affirm, that they can go into these Raptures when they please. Others there are that are almost perpetually travelling up and down, taking Care for nothing, and deriding all. These brag of great Secrets and seem to be endow'd with a strange Power, for they can make Gold, divine what one thinketh, make the Branch of a Tree blossom and bear Fruit in less than an Hour, hatch Eggs, and bring forth Birds, which shall fly about the Room, in less than a Quarter of an Hour, restore one to perfect Health immediately by a Dose of Mercury prepared after their Manner, or at least seem to do all these Things to the People. But lastly, there are others, whose Life and Devotion is very meek and well polished, and who go bare-foot and bare-headed, and cover their Bodies with a white Sheet. They are very neat and clean, and commonly go 2 and 2 with great Modesty. They go freely into any Houses of the Gentiles, and are welcomed there as a great Blessing to the House. They have certain Books of their Law and Sciences, written in the *Hanscrit*, i. e. the Learned Language of the ancient *Bramins*, which they say were sent by the Immovable and Immutable God: They call them by the Name of *Beths*, and they say, there are 4, *viz.* the 1st *Athenhabed*, the 2d *Zager-bed*, the 3d *Rek-bed*, and the 4th *Sama-bed*. By these Books they are taught the *Metempsychosis* of *Pythagoras*, and commanded not to kill or eat any Animal, especially Cows and Peacocks. They are obliged to say their Prayers 3 times a Day, in the Morning, at Noon and Night, with their Face turn'd toward the East, as also to wash their whole Body as often, or to be sure before they eat, and they believe it more holy to wash in running Water, than in a standing Pond, and tho' they are in great Danger of Death by their Washing in Winter in the cold Countries, yet they will not forbear it. They pretend not their Law to be universal, but that God made it only for them, and therefore they could not receive a Stranger into it. They do not assert the Christian Religion to be false, but say, It may be good for us, and that God may have appointed several different Ways to Heaven; but they will not allow that our Religion is the general Religion of the whole Earth, and that their own is a Fable and a pure Device. Their Books also teach, That God having resolved to create the World, would not execute the Decree immediately, but first made 3 perfect Beings, the 1st *Brachma*, i. e. Penetrating into all Things; the 2d *Beschen*, i. e. Existing in all Things; and the 3d *Mehab-den*, i. e. Great Lord; and that by *Brahma* he created the World, by *Beschen* he preserveth it, and by *Mehab-den* he will destroy it, and that it was *Brahma* who by the

The Books of their Law, and their Doctrine.

Their Opinion of Christian.

Three Deities.

Command of God did publish the 4 *Beths* of their Law, and therefore in some of their Pagods he is represented with 4 Heads. They also hold, that *Beschen*, the 2d of these Beings, hath been incarnate 9 times, the first in a Lion, the 2d in a Swine, the 3d in a Tortoise, the 4th in a Serpent, the 5th in a *Bramin* She-Dwarf, the 6th in a Monster Man-Lion, the 7th in a Dragon, the 8th in a Man; for they hold, that the World being enslaved under the Power of Giants, one of which flew in the Air, and obscured the Sun, this 2d Being became incarnate, and was born of a Virgin at Midnight, the Angels singing in the Air, the Heavens pouring down Showers of Flowers all Night; that this God incarnate first of all kill'd the Giant that darken'd the Sun, who by his Fall made the Earth to quake, and by his Weight sunk as low as Hell; that he was wounded in his Side in the Conflict, and fell, but by his Fall put his Enemies to Flight; and that after, he had raised himself again, and redeemed the World, and ascended into Heaven; that his 9th Appearance shall be in an Ape, and the 10th in a great Cavalier. They say also, That the 3d Being hath manifested himself to the World in the Form of Fire, and marry'd a King's Daughter. The *European* Missionaries in the *Indies* will have these Things to favour of Christianity, and will have it, that these Gentiles do hold a Trinity, and that there are Three Persons in One Godhead; for tho' indeed some of their *Pendets*, or Doctors say, they are Creatures, yet the most knowing assert, that these 3 Beings are indeed nothing but One, and the same God considered 3 Ways, *viz.* as he is the Producer, Conservator and Destroyer of all Things.

The 2 d Deity becomes incarnate.

A Trinity own'd by them.

Concerning their Studies and Sciences this is observable. The Town of *Benares* which is seated upon the *Ganges*, in a very fine and rich Country and pleasant Place, is as it were the *Athens* of the *Indies*, where all the *Bramins* and Religious, who addict themselves to Study, come together, and the Gentry are educated. They have no Colleges, but the Masters are dispers'd up and down in their Houses and Gardens. Of the Masters some have 2, and others more Scholars, and the most eminent 14 or 15, but never more. Here they spend 10 or 12 Years, for they go on lazily and slowly, according as the Heat and Diet of the Country inclines them. Their first Study is of the *Hanserit*, i. e. the Divine and Holy Language, which they believe to be the Tongue in which God gave them the 4 *Beths*, or sacred Books, and certainly 'tis very ancient, because they have none that can understand it, but their *Pendets*, and 'tis very different from the common *Indian*. Father *Kircher* hath published the Alphabet of it (which he had from Father *Roa*, a *German* Jesuit, and Missionary into the *Indies*) in his *China Illustrata*. After they have learn'd the *Hanserit*, they apply themselves to read the *Purane*, which is the Interpretation and Sum of their *Beths*, which are very large; which done, they proceed to Philosophy, in which they have 6 famous Sects, which pretend to excel each other much in the Soundness of their Doctrines conform to their *Beths*. There is a 7th Sect, called *Baute*, but is so infamous, that few join to it in Comparison of the rest, yet are divided into 12 Sects. They speak of the Principles of Things very differently. Some hold, that all is composed of little, solid, indivisible Bodies, something like *Democritus* and *Epicurus*; others say, that Matter and Form is the Origin of the Universe, others make the 4 Elements, others nothing, others Light and Darkness, the first Principles, and all agree that they are eternal. As to Physick, they have some little Books, which are rather Collections of Receipts than any thing else, and their chief one is in Verse. Their Practise is grounded on these Rules, That in a Fever there needs little Nourishment; That Abstinence is a main Remedy in Sickness; That Flesh-Broth is hurtful to a sick Person; That no Blood is to be let but in great and evident Necessity, as in Inflammations of the Chest, Liver or Kidneys, and these Rules are very successful. When they let Blood, they do it 18 or 20 Ounces, which chouks the Disease in the Beginning. They know nothing of Anatomy, because they never open any Body of Man or Beast; yet they say, there are 5000 Veins in Man's Body, as if they had counted them. They have their Astronomical Tables, by which they find out Ecclipses, and come pretty near, tho' they are not so exact as our *European* Astronomers. They believe, that the Ecclipses of the Sun and Moon proceeds from the *Rali*, a mischievous *Deuta*, who seizeth on them, and blackens them. They hold, that the Moon is 50000 Lgs. above the Sun, is lucid of herself, and disposeth a certain vital Water from our Brain into all our Members: They hold, that the Sun and Moon and all the Stars are *Deuta's*, *i. e.* Numens, Demons or Spirits, and that 'tis Night when the Sun goes behind the *Sumeire*, or imaginary Mountain, which they place in the midst of the Earth, and make it many Thousand Lengues high. Their Geography is very erroneous; they believe the Earth to be flat and triangular, having 7 Stories, all differing from each other in Beauty and Perfection, and 'tis all sustain'd upon the Heads of Elephants, which when they stir causeth an Earthquake.

Their Studies and Sciences.

1. Of the Hanserit or Holy Tongue.

2. The Purane.

Their Natural Philosophy.

Their Physical Learning.

Concerning the Worship of their Idols, the more Learned and Refined give this Account, That they have indeed in their Pagods store of Images, of *Brahma*, *Mebaden*, &c. who are the chiefest and most perfect *Deuta's*, as also many others of less Perfection, to whom they pay great Honour, by prostrating themselves before them, and presenting them with Flavers, Oils, Rice, Saffron, and many other Things with great Ceremony, but they do not believe those Statues to be the Beings themselves, but only their Images and Representations, and that they give them no Honour, but upon the Account of what they represent. They are in the Temples, because 'tis necessary for Praying to have something before their Eyes to fix their Mind upon; and when they pray, 'tis not the Statue they pray to, but he that is represented by it; for the rest they acknowledge, that 'tis God that is absolute, and the only Omnipotent Lord and Master. They will not say, that the World is eternal, but they make it so old, 'tis hardly to be distinguish'd from it, for they say, it has continued 4 *Dgugue's*, every *Dgugues* containing 100 *Leeques*, i. e. 100 times 100000 Years. Concerning the Nature of their *Deuta's* they say, that there are 3 sorts of them, Good, Evil and Indifferent; that they were *Biapek*, as God and the Soul is, incorruptible, depending neither on Time nor Place, Portions of the Deity, and a certain kind of Divinities severed and dispersed over the World. Concerning the Seeds of Plants and Animals, they hold, that they are not formed a-new, but were contrived in the first Production of the World, and dispersed abroad every-where, and mixed in all Things; that they are not only potentially, but actually the entire Plants and Animals, tho' so small, that their Parts can't be distinguish'd, but when being put into a convenient Womb they are there nourished, extend themselves and increase into a Plant or Animal, able at length to subsist by it self. Lastly, The great Mystery of all, is this, That God, or that Sovereign Being, which they call *Acnar* (or Immutable) hath produced, or drawn out of his own Substance not only all sorts, both of Men and Animals, but whatever is Material and Corporeal in the Universe, and that this Production was not made by way of an efficient Cause, but as a Spider draws his Web out of his own Bowels; and so Creation is nothing but an Extraction and Extension, which God maketh of his own Substance, and Destruction is a Reprizal or Taking back of it, so that there is nothing real or effective in the World; and the Multiplicity and Diversity of Things which appear to us, are nothing but one and the same Thing, God himself. These are very extravagant and odd Doctrines, but if you enquire the Reason, they can give you none, but will put you off with some pretty Simile to explain it, which will please tho' not satisfie; and they take it for Demonstration, and will never be convinced.

How Blood-letting.

CHAP.

CHAP. VIII.

Of the Fruits, Beasts, Birds, and other Things remarkable in Moguliſtan.

THE great Extent of the vaſt Empire of the *Mogul*, as well as the various Temperature, and Productions of the Soil and Climate, makes as much difference between one Province and another, as if they were ſeveral Kingdoms, and therefore there can be no way to give an exact Account of all Things remarkable, but conſidering the ſeveral Provinces diſtinctly, and what is peculiarly obſervable in them.

Kachemire. We will begin with the Kingdom of *Kachemire*, commonly called, The Paradice of *Indoſtan*, a Country, tho' mountainous, yet ſo fruitful, that you would take it for an ever-green Garden, being full of Trees, and Paſtures, with all ſorts of Cattle, as Cows, Sheep, Goats, Horſes, Partridges, Hares, Gazels, and the Musk-Animals. There are abundance of Bees, but no Serpents, Tigers, Bears or Lions. The Fields produce Rice, Corn, Pulſe of divers ſorts, Hemp and Saffron, being interlaced with Ditches, Lakes and Rivulets, to advance their Plenty: Up and down every where alſo are ſeen ſome of our *European* Plants, Flowers, and all ſorts of Plants, as Apples, Pears, Prunes, Apricots, Nuts and Vines, and their Gardens are full of Melons, Water-Melons, Skirrets, Beets, Radiſhes, and all ſorts of our Pot-herbs, and ſome that we have not, but their Fruits are not ſo many, nor ſo good as ours.

No Serpents, &c. in it.

The People are very induſtrious as well as intelligent, and make Pallekies, Trunks, Bedſteds, Standiſhes, Boxes and Spoons, with many other Pieces of handſome Workmanſhip, ſending them all over the reſt of the *Indies*, and to ſome of theſe they give ſuch a Varniſh with counterfeit Veins and Gold ſtreaks, that nothing is finer. They make alſo a kind of Stuff an Ell and half long, and about an Ell broad, called *Chales*, and embroidered at each end for about a Foot, ſo ſoft and fine, as is not imitable, tho' 'tis attempted at *Patna*, *Agra* and *Lahor*. The *Moguls* and *Indians*, both Men and Women, wear of them in Winter upon their Heads, and bring them over their Shoulders like a Mantle. They are made of their own Wool, which is finer than *Spaniſh*, or of the Hair taken from the Breaſt of a wild Goat in great *Tibet*, called *Touz*; ſome of theſe are ſold for an 150 Roupies to the Great *Omrahs*.

Chales, a Stuff.

The People. The People are of a fair Complexion, and eſpecially the Women are very beautiful, and of as fair Faces as in *Europe*. Between *Bember* and *Kachemire* are ſome Mountains that ſeem to part 2 Worlds rather than 2 Provinces, for on the one ſide it was ſcorching and hot, as in the *Torrid-Zone*, and full of *Indian* Plants proper to it; on the other ſide it was a temperate, gentle and freſh Air, and the Soil produced Hyſſop, Thyme, Marjoram and Roſemary, Oaks, Elms, Pines and Plane-Trees. Between theſe Rocks are admirable Caskata's of Water, and among others one not to be paralell'd, which running in a Channel between the Trees on a ſudden precipitates it ſelf into the Bottom of a ſteep Rock, with a Noiſe able to make one Deaf, like a Cataract. In the Month of *May* here is a Fountain, that for 15 Days regularly flows and ſtops thrice a Day, *viz.* at Break of Day, Noon and Night, its flowing fills a Square of 10 or 12 Foot broad, and as many deep, and then it ſlacks by degrees, till about the End of the Month, and then quite ſtops for the reſt of the Year. By it the Gentiles have a Temple of the Idol *Brare*, and from thence the Fountain is called, *Send-Brari*, i. e. The Water of *Brare*, and hither many Pilgrims come to bathe and ſanctifie themſelves. In the Royal Garden at *Achiavel*, in this Province, is a Pond, where there are Fiſhes that will come when they are called, and when you caſt Bread to them, the biggeſt of which have alſo Rings in their Noſes, with Inſcriptions in them.

Admirable Caskata's of Water.

Brare, an Idol.

Miracles pretended. At *Baramoulay* is a Moſque, in which is a Tomb of one of their *Pires*, or Saints, where 'tis ſaid the Sick are cured every Day which flock thither, and 11 *Moullahs* with one Finger each lift a huge Stone, which the ſtrongeſt Man can hardly raiſe eaſily; but theſe Things are miraculous only to the Credulous and Careleſs; but the bubbling Fountain, which riſes gently and with ſome little Force, making ſome ſmall Bubbles, and bringing up Sand with it, which goes away with it again, and the Water becomes ſtill, and ſo remains a while without Bubbles, and then riſes again, is certain. In the Mountains near this Fountain is a Lake that hath Ice in Summer, and looks like an Icey Sea; and a little further is a Place where making a great Noiſe will preſently cauſe a Shower of Rain. Among theſe Mountains is a People which eat no Fleſh, counting it unclean, yet they have no Religion.

Ice in Summer.

The City of *Azmer* is famous for the Tomb of *Cogea Mondy*, who was in great Reputation for his Sanctity, and therefore they come from all Places in Pilgrimage to it. It is a fair Building, with 3 Courts paved with Marble, and hath in it a Reſervatory of Water walled about; and in the Province adjoining there is a Beaſt, like a Fox in the Snout, but no bigger than a Hare, of the Colour of a Stag, and Teeth like a Dog, it yields moſt excellent Musk, for at the Belly is a Bladder, full of Matter like corrupt Blood, which is the Musk. They cut off the Bladder for it, but the Beaſt never lives long after it. There are alſo Pullets, whoſe Skins are all over black, as are alſo their Bones, but their Fleſh is very white, and their Feathers of another Colour. The Women in this Country are marriageable at 8 or 9 Years old, and bear Children at 10; the Children go naked only with a Bit of Cloth to cover their Privities. The People are rude and uncivil, and the Men great Clowns and impudent. When they quarrel they make a great Brawling, but never come to Blows. There are venomous Scorpions in this Country, and the People have ſeveral Remedies to cure the Stinging, but the beſt of all is Fire, for by applying a burning Coal to it, they draw the Venom out, and perfectly cure it. The Ways of this Country being very Stony, they Shoe the Oxen, and Bridle and Saddle them like Horſes, and if they be but a little ſpurr'd, they go as faſt as a good Horſe. With them alſo they draw their Carts and Coaches, for white Oxen are extraordinary dear. The chief Trade of this Province is Salt-Petre, for the Soil being black affords it plentifully, when 'tis made they carry it to *Surat*, to ſell it to the *Europeans*, and others, who buy it to ballaſt their Ships, and ſell elſewhere.

The Musk Creature.

Women marry at 8 or 9 Years old.

Oxen uſed for Horſes.

In the Province of *Sinde*, which was anciently the Kingdom of *Diul*, the Inhabitants are wonderful ingenious in all kinds of Arts, and make abundance of Curioſities, for which they have a great Trade. The fineſt Pallanquins in *India* are made at *Tatta* in this Province, and there is nothing neater and more convenient than the Chariots made here; but their Waggon-Wheels are one Piece of ſolid Timber like a Mill-Stone.

Sinde.

The Province of *Multan* yields Plenty of Cotton, Sugar, Opium, Brimſtone, Galls, ſtore of Camels, which are tranſported into *Perſia*, and other Parts of the *Indies*. It furniſhes alſo all *India* with the fineſt Bows that are to be ſeen in it, and nimbleſt Dancers. The chief Town of it of the ſame Name is the Rendezvous of the *Banians*, becauſe of the great Trade managed there, which cannot be carried on without them; for tho' 'tis known that they make their Profit of every thing, yet moſt Merchants chuſe rather to uſe them, than do their Buſineſs themſelves, becauſe they will buy their Goods much cheaper, and they refuſe no Service, be it never ſo baſe or vile.

Multan.

The Country of *Candahar* produces abundantly all ſorts of Proviſions that are neceſſary for Human Life, unleſs it be on the ſide next *Perſia*, where it is barren. The Inhabitants are great Lovers of Wine, tho' they are prohibited to drink it, and if any be found drunk, or doing any ſcandalous Action in Drinking, they are ſet upon an Aſs, with their Face to the Tail, and led about

Candahar.

A Puniſhment of Drunkenneſs.

about the Town, attended by the Officers of the *Cotoual*, who beat a little Drum, and all the Children follow him, hooping and Hallowing. There are many *Perſians* in this Province, but they are poor, and employ'd by the *Mahometans* in the meaneſt Offices. The King of *Perſia* will not allow the Gentiles Wives to burn themſelves in that Part of his Dominions. In the Mountains of *Cabouliſtan* grow Mirobalans, and many other ſorts of Drugs. The Country alſo is full of Aromatick Trees, which turn to good Account to the Inhabitants, as do alſo the Mines of a certain Iron fit for all Uſes. Out of this Province come thoſe large Canes of which are made Halbards and Lances, for they have many Grounds planted with them. They reckon their Months by Moons, and with great Devotion celebrate a Feaſt called *Houli*, which laſts 2 Days, firſt in praying and making their Oblations, and then in dancing by Companies in the Streets to the Sound of Trumpets, making Bonfires, and deſtroying the Figure of a Giant. Their Charity conſiſts chiefly in digging Wells and building little Houſes on the Roads for Travellers, and by them is a Place for ſuch as are heavy loaden to put off and take up their Burthens without any body's Help. This Country ſupplies the whole *Indies* with Phyſicians, which are all *Banians*, and ſome of them very skilful in Medicines, and among other Remedies make great Uſe of Burning.

In the City of *Lahors* the Great *Mogul* has a Palace, on one Gate of which is a Crucifix, and on another the Picture of the Virgin *Mary*. Some have thought them Marks of Chriſtianity, which was anciently profeſſed in thoſe Countries, but it is really nothing but a Piece of Flattery and Hypocriſie of King *Jehan-Guir*, to oblige the *Portugueſe* to be his Friends. There are many Gentiles in this City, who have ſeveral Pagods, all raiſed 7 or 8 Steps from the Ground, and ſome of them are well adorn'd. This is one of the largeſt and moſt fruitful Provinces in the *Indies*, the 5 Rivers, which make up the River *Indus*, from whence the *Moguls* call it *Pangeab*, making it very fruitful, for it yields all Proviſions neceſſary for Life, as Rice, Corn, and ſeveral ſorts of Fruits. The Wines made here are pretty good, and in the Towns are not only all ſorts of painted Cloaths wrought, but all the other Manufactures uſually made in the *Indies*.

In the Provinces of *Atioud*, or *Hioud*, and *Varad* or *Varal*, there are many *Raja's*, that own not the Authority of the *Mogul*. At *Nagarcut* in this Province is the Paged of the Idol *Matta*, to which the Gentiles that come to pay their Devotion to her, are ſaid to ſacrifice always ſome part of their own Bodies. At *Calsmas*, where the Gentiles have alſo another famous Pagod, there is a Spring of very cold Water, which iſſues out of a Rock, that continually belches out Flames, and the *Bramins* make great Advantage by the People who come to ſee the Miracle.

In the Province of *Oxiaſſer* is the famous Temple of *Jagannate*, where one of the *Fagnirs* undertook to meaſure the whole Kingdom of the *Mogul* with his own Body, and being about to perform it, was loaded with Charity, and had much Reſpect given him. The People of this Country, as well *Mahometans* as *Gentiles*, are extraordinary voluptuous, have a captious and ſubtle Wit, and are much addicted to Stealing. The Women are very bold and laſcivious, and uſe all Arts to corrupt and debauch young Men, eſpecially Strangers, whom they eaſily trapan, becauſe they are handſom and well dreſs'd. In this Province are above 20000 Chriſtians, who lived in great Uniformity under the *Pagan* Kings, but the *Mogul* becoming Maſter of it, and bringing in *Mahometaniſm*, a general Diſorder and Corruption of Manners invaded them. The Country is full of Towns, and the People live in much Eaſe, becauſe it it is very fruitful, producing Corn, Rice, Sugar, Ginger, Long-Pepper, Cotton and Silk, with ſeveral other Commodities, as alſo Fruits, eſpecially Ananas, as big as Melons, and pleaſant to the Taſte, having ſomething of the Flavour of the Apricock. In this Province the *Mogul* hath a Caſtle, whither he ſends ſuch Traitors as are condemned to perpetual Impriſonment, and to that end 'tis always ſtraitly guarded.

In the Province of *Malva* are the Territories of *Raja Ranes*, who deduces his Pedigree from King *Porus*, tho' he is now Tributary to the *Mogul*. *Ratiſpore* is the Capital City of it, and a Place of great Trade. It ſtands upon a Mountain, and hath a Caſtle belonging to it, to which the Grand Seignior ſends ſuch Traitors as are condemned to die. They are kept Priſoners for ſome time, and always ſome body is preſent with them, and the Day that they are to die they make them drink a great Quantity of Milk, and then throw them down from the Top of the Caſtle, upon the declining ſide of the Hill, which is full of ſharp pointed craggy Stones, that tear the Bodies of the Wretches to Pieces before they can reach the Bottom of the Precipice.

At *Chitor*, once a famous Town, but now almoſt ruin'd, are the Remainders of 100 Temples, or Pagods, and many antick Statues to be ſeen. In this Country are 2 kinds of Bats, one like ours in *Europe*, but the other is much differing. It is 8 Inches long, and the Body is covered with yellowiſh Hair, the Body round, and as big as a Duck's, the Head and Eyes like a Cat's, a ſharp Snout like a Rat, prickt black Ears without Hair, no Tail, 2 Teats as big as the End of one's little Finger under the Wings, 4 Legs, Wings almoſt a Foot long, and 7 or 8 Inches broad, of a black Skin, like wet Parchment, the 2 Fore-Legs end in 5 Fingers like a Man's Hand, black and without Hair, but it has Claws inſtead of Nails, with which it hangs upon the Branches of the Trees. They fly high, and are ſaid to be good Meat.

The Province of *Candich* is the moſt plentiful for Cotton of any part of *Indoſtan*, and of it the People make abundance of Cloth. They paint ſome, but the white are moſt valued for the lovely Mixture of Gold and Silver that is in them, for the Rich make their Veils, Scarfs, Hankerchiefs and Coverings of them, but they are dear. Here is alſo Plenty of Rice and Indigo growing. In the Country of *Balagate* are a great many Warrs, Manguiers, Mahova, Quieſau, Caboul, and other ſorts of rare Trees. Here are vaſt Numbers of Antelopes, Hares and Partridges, and towards the Mountains are Merons, or wild Cows. Towards *Naopoura* grows the beſt Rice in all the *Indies*, for it has an odoriferous Taſte, which that of other Countries has not. Cotton abounds here alſo, and in many Places they have Sugar-Canes, with Mills and Furnaces to make the Sugar. The Ways here are always ſafely guarded. The Pagods of *Elora* in this Province are ſo numerous, and ſo full of Pillars and Pilaſters, and have ſo many Thouſand Figures, all cut out of the natural Rock, that they may be ſaid to be Works ſurpaſſing Human Force.

In the Province of *Daitabad* are bred the moſt active Tumblers in the World, who do all the Tricks of ours in *Europe*, and many more. They are as ſupple as an Eel, and will turn their whole Body into a Bowl, which others may roul about with their Hands, but the moſt active are Girls.

In the Province of *Coitanagar*, which is diverſify'd by Hills and Plains, the Hills afford Iron, of which at the Town of *Indelvai* chiefly, the People make a great many Swords, Daggers and Lances, which are vended all over the *Indies*. All the Plains are good Ground, ſome ſow'd with Rice, and the reſt planted with Cotton-Trees, Tamarins, Warrs, Cadjours, Manguiers, Quieſau, and others, and all water'd with ſeveral Rivers, which turn and wind every way, with fair Tanquies, out of which they draw the Water with Oxen; but thoſe Parts are much troubled with Thunderings, Lightnings, Whirl-Winds, Rains, and Hailſtones as big as Pullets Eggs.

In the Province of *Telenga*, as there are many Gentiles, ſo there are none more ſuperſtitious than they. They have abundance of Pagods, with Figures of Monſters, which can excite nothing but Horror inſtead of Devotion, unleſs in ſuch deluded Souls. They uſe frequent Waſhings: Both Men, Women and Children, as ſoon as they are out of their Beds in a Morning go to the River to waſh, and the Rich have Water brought them, and ſo again as often as they eat. Women who have loſt their Husbands, are conducted to the River by their Friends, that comfort them, to waſh, and ſo are Women as ſoon as they are brought to Bed, for in no Country are Women ſo eaſily delivered as here. They will eat nothing but what is dreſs'd by themſelves, or their own Caſte, and buy all their Food of the *Banians*. They drink nothing but Water, wherein they put Tea or Coffee, nor uſe any Diſhes but Leaves of Trees, for fear any Perſon of another Religion ſhould have eaten out of it. They eat no Fleſh, except Pork on a certain Day of the Year, and that very privately; but the *Rajpoutes* eat any Fiſh or Fleſh, except the Cow. They uſe Faſting very much. Their ordinary Faſt is 24 Hours, and there are a great many that will faſt, eſpecially

cially Women, 6 or 7 Days, and ſome will faſt a Month, eating no more than an handful of Rice a Day, and others will eat nothing at all, only drink Water, in which the Root of Criata has been boil'd, which is good againſt many Diſtempers, and ſtrengthens the Stomach. When the Faſt is at an End, the *Bramin* goes with a Drum to the Houſe of the Penitent, and gives him or her Leave to eat.

Baglana. Laſtly, In the Province of *Baglana*, as all the People on the Sea-Coaſt are much given to Sea-faring, ſo the Gentiles offer many Sacrifices to the Sea, eſpecially when any of their Kindred or Relations are abroad upon a Voyage. *Sacrifices to the Sea.* The Manner of Sacrificing is thus: They make a Veſſel of Straw about 3 Foot long, and cover it with a Veil, and carrying it down to the Shore with a Basket or two of Meat and Fruits, throw it into the Sea, and having made ſome Prayers, leave the Basket on the Shore, that the Poor and others may come and eat it. At the End alſo of *September*, when the Sea, after the tempeſtuous Seaſon from *May*, becomes again navigable, they offer another Sacrifice, but with no great Ceremonies, for they only throw Coco's into the Sea, and every one throws one, the Boys plunging themſelves into the Sea to catch them, and ſhewing many Tricks in the Water, which are very pleaſant to behold. In this Province the *Indians* marry their Children very young, and make them cohabit ſooner than in any other Part of the *Indies*; they marry them at 4, 5 and 6 Years old, and ſuffer them to bed together when the Boy is 10, and Girl 8, but they leave bearing by 30, and grow extreamly full of Wrinckles, and therefore in ſome Parts of the *Indies* they do not marry till 14 Years of Age. The Women are very fruitful, becauſe they live very frugally, as well as their Husbands, and their Children are brought up very eaſily: They go naked till they are about 7 Years old, and when they are about 2 or 3 Months old, they let them crawl about till they are able to go, and when they are dirty they waſh them, and ſo they come to go as ſtrait as ours, without the Torture of Swaddling-Bands or Clouts. *Early Marriages.*

CHAP. IX.

Of ſeveral ſmall Kingdoms in the Indies, *which do not depend upon the* Mogul.

Bengal. *Rice.* *Sugar.* *Preſerved and candied Fruit.* *Pulſe.* *Flesh.* *Christians.* *Cotton and Silks.* *Salt-Petre.* *Air not healthy.*

Bengal is one of the moſt fruitful Countries of the World, ſuperior to *Egypt* it ſelf. It bears Rice in ſuch Abundance, that it not only furniſhes its Neighbours; but very remote Countries, as *Ceilon*, and the *Maldives*. It abounds ſo in Sugar, that it furniſhes the Kingdom of *Golconda* and *Karnates* with it, as alſo *Arabia*, and *Meſopotamia*, by the Way of *Moka* and *Baſſora*, and *Perſia* it ſelf by *Bander-Abaſſi*. The *Portugueſe* make excellent Comfits here, with which they drive a great Trade, and the People preſerve and candy Pome-Citrons, a Root long like Sarſaperilla, very delicate, Amba's, Anana's, Mirobalans, Lemmons and Ginger, which are many of them ſent to us in *Europe*. It is true, it breeds not much Corn, becauſe the People feed ſo much upon Rice, but it produces ſufficient for their Uſe, and to accommodate the Ships of *Europe* with excellent Biſcuits very cheap. Three or Four ſorts of Puiſe, which, together with Rice and Butter, are the uſual Food of the poor People, are there to be had for nothing almoſt. For a Roupy, which is about Half a Crown, you may buy 20 good Pullets and more, and Geeſe and Ducks in Proportion. Kids and Sheep are very plentiful, and there is ſuch ſtore of Pork, that the *Portugueſe* live on nothing elſe almoſt, and the *Engliſh* and *Dutch* victual their Ships with it. There is alſo Plenty of all ſorts of Fiſh, both in the freſh and ſalt Water, and want of nothing. For this Reaſon it is, together with the Liberty that all Men enjoy for the Exerciſe of their Religion there, that all the Chriſtians are fled hither from all Parts taken by the *Dutch*, ſo that in *Ogouli*, 'tis ſaid, there are 8 or 9000 Chriſtians, and in other Parts of the Kingdom above 25000 more. It is the general Magazine for Cotton-Cloths and Silks, not only for *Indoſtan*, but all the Neighbouring Kingdoms, and *Europe* it ſelf. The *Hollanders* tranſport vaſt Quantities of both, ſome fine and others coarſe, both died and white, into *Japan*, *Europe*, and other Places, beſides what the *Portugueſe*, *Engliſh* and *Indian* Merchants ſell elſewhere. 'Tis true, the Silks are not ſo fine as thoſe of *Perſia*, *Syria*, *Said* and *Bantu*, but then they are cheaper, and very good of their Price. Salt-Petre is found in ſuch Quantities in this Country, that the *Engliſh* and *Dutch* load whole Ships full to carry it into many Places of the *Indies* and into *Europe*. From *Bengal* alſo there comes good Lacca, Opium, Wax, Civet and Long-Pepper, and even their Butter is tranſported into other Places. The Air indeed is not healthy, eſpecially near the Sea, for Strangers, ſo that the *Engliſh* and *Dutch* many of them die at their firſt coming there, but now by reſtraining their Intemperances, and uſing a little *Bardeaux* Wine, *Canary*, or *Chirras*, they preſerve a tolerable Health among them. The whole Country is well water'd by Channels cut out of the River *Ganges*, which contributes as much to their Traffick as Plenty. It is well peopled, and has abundance of Villages full of Gentiles, and the Fields produce, beſides Sugar, Rice, Corn and Pulſe above-mention'd, Sezamum for Oil, ſmall Mulberry-Trees to feed Silk-Worms, Anana's, and other Fruit-bearing Trees. *Mulberries.* In the *Ganges* alſo are many fruitful Iſles, covered with continual Verdure, but towards the Mouth ſome of them are abandon'd, becauſe they were much infeſted by the *Corſairs* and the *Franks* of *Racan*, ſo that they have no other Inhabitants but Tigers, Gazels, Hogs and Poultry. Nature in this Country produceth Miracles to us far diſtant. It is not uncommon in Rainy Seaſons to ſee Rainbows of the Moon in the Night, when the Moon is at the Full; and in ſome calm Seaſons the Buſhes will be covered ſo thick with little ſhining Flies, that they ſeem all on a Fire, and there ariſe friglitful Flames in great Globes, which the Ignorant look upon as Devils. *Rainbows of the Moon.*

Boutan. The Kingdom of *Boutan* is of a large Extent, and 'tis hard to come to a perfect Knowledge of it, the Merchants that trade from thence into the *Indies* being able to give but a very imperfect Account of it. *The Road from Patna into it.* The Caravan is 3 Months travelling from *Patna* into it, ſetting out in the End of *Dec.* and in 8 Days arriving at *Gorrochepour*, which is the laſt Town in the Great *Mogul*'s Dominions, and there is a ſevere Cuſtom of 25 *per Cent.* impoſed upon all Merchandize, but the Merchants uſually bargaining with the Cuſtomers before they proceed farther, bring it down to 7 or 8. In the Way from *Gorrochepour* for 8 or 9 Days Journey the Caravan ſuffers very much Hardſhip, for the Country is nothing but Foreſts full of wild Elephants, ſo that the Merchants inſtead of taking their Reſt, are forced to watch, keep Fires, and ſhoot off their Muskets all the Night long; for the Elephants, who make no Noiſe in treading, will otherwiſe come upon them unawares; not that they will do any Miſchief to the Men, but will plunder the Caravan of their Victuals. *Elephants.*

The Kings of Nepal. Five or 6 Lgs. beyond *Gorrochepour* you enter into the Territories of the *Raja* of *Nupal*, which extend to the Frontiers of the Kingdom of *Boutan*. He is a Tributary to the Great *Mogul*, and is to pay him every Year an Elephant for his Homage. The Metropolis, where he reſides, is of the ſame Name, but there is little either of Trade or Money in his Country, becauſe it is all Woods and Foreſts.

Having paſſed his Territories, you come to certain Mountains, which are upon the Confines of *Boutan*. All this Way you may travel in Palleki's, but generally the Travellers ride upon Oxen, Camels or Horſes, bred up in the Country, which, tho' very ſmall and dear, yet are ſtrong, and will travel 20 Lgs. an end without Baiting; and, indeed, you can uſe no other

other ſort of Carriage croſs theſe Mountains, becauſe of the Narrowneſs and Ruggedneſs of the Paſſes. When the Caravan arrives at the Foot of theſe Mountains, called *Naugrocot*, abundance of People come from all Parts of them, but the greateſt Part of them are Women and Maids, who agree with the Merchants to carry them, their Goods and Proviſions over the Mountains, which is 8 Days Journey. Theſe Women carry upon each Shoulder a Woollen Roll, to which is faſten'd a large Cuſhion, that hangs down upon their Backs, upon which the Man whom they carry ſits. There are 3 Women to carry one Man, relieving one another by turns, and for their Luggage and Proviſion they lay them upon Goats, that will carry 150 Pound Weight apiece. Thoſe that will ride, are forced many times to have their Horſes hoiſed up with Cords. The Women that carry the Men get for their 8 Days travel 2 Roupies apiece, and as much for every Burden which the Goats carry, and for every Horſe which they lead. Having paſſed over theſe Mountains, you may go the reſt of the Journey to *Boutan* upon Oxen, Camels, Horſes, or Palleki's, as you pleaſe. The Country is good, abounding in Rice, Corn, Pulſe, and ſtore of Wine. All the People, both Men and Women, are clad in the Summer with a large Piece of Fuſtian, or Hempen Cloth, and in the Winter with a thick Cloth, almoſt like Felt. Both Men and Women wear upon their Heads a kind of Bonnet, much like drinking Cans, which they adorn with Boars Teeth, and with round and ſquare Pieces of Tortoiſe-ſhell. The Richer ſort mix with them Coral and Amber-Beads, of which their Women do make themſelves Neck-laces. The Men, as well as the Women wear Bracelets upon their Left Hands only from the Wriſt to the Elbow. The Women wear them ſtrait and the Men looſe. About their Necks they wear a Silver Twiſt, at the End whereof hangs a Bead of yellow Amber, or Coral, or a Boar's Tooth, which dangle upon their Breaſt. Upon their Left Sides their Girdles are button'd with Beads of the ſame. Tho' they be Idolaters, yet they feed upon all ſorts of Food, except the Fleſh of the Cow, which they adore as the common Nurſes of all Men. They are great Lovers of Strong-water. They obſerve alſo ſome Ceremonies of the *Chineſes*, burning Amber at the End of their Feaſts, tho' they do not worſhip Fire as the *Chineſes* do. Upon theſe Accounts Amber and Coral are good Commodities at *Boutan*. A Piece of yellow Amber as big as a Nut, bright and clean, is worth 45 Roupies, and a Piece of 9 Ounces 250 or 300 Roupies. Coral rough, or wrought into Beads, yields a proportionable Advantage, but they had rather have it rough, to ſhape it into what Figure they pleaſe themſelves. The Women and Maids are generally the Artiſts among them as to thoſe Toys. The moſt excellent Rhubarb comes from this Country of *Boutan*. It is a Root which they cut in pieces, and ſtringing them by 10 or 12 together, hang them up a drying; being dryed, the Merchants muſt carry it very carefully, for if it takes wet, 'tis utterly ſpoiled, and they had need to carry it the moſt ſpeedy Way, for it is apt to corrupt, or if not, 'twill by time eat out its own Heart. This Kingdom alſo produces ſome Musk, and Plenty of Furs. They have good ſtore of Martins in their Country, which yield a very rich Fur, but not having the Skill that the *Muſcovites* have to take 'em, they loſe the Profit of that Commodity, which the *Muſcovites* have; for, no ſooner does that Creature peep out of his Hole, but the *Muſcovites*, who lie upon the Watch, have them preſently, ſhooting them either in the Noſe or Eyes; for ſhould they hit them in the Body, the Blood would quite ſpoil the Skin. From hence alſo is brought the Seed which is accounted ſo good againſt Worms, called therefore Worm-Seed. 'Tis the Seed of a certain Herb that grows in their Fields, but muſt not be gather'd till the Plant is dead, which is the Reaſon that the Wind ſcatters the greateſt part of it before it can be gathered, which makes it ſcarce. When they gather the Seed, they take 2 little Hampers, and as they go along the Fields, they move them backward and forward, as if they were moving the Herb, and ſo bowing it at the Top, the Seed falls into the Hampers.

The King and all his People are Idolaters, and worſhip Monſters, as the other Heathen *Indians*. There is no King in the World more fear'd and reſpected by his Subjects, than the King of *Boutan*, being in a manner ador'd by them. When he ſits to do Juſtice, or give Audience, all that appear in his Preſence hold their Hands cloſe together above their Fore-heads, and at a Diſtance from the Throne proſtrate themſelves upon the Ground, not daring to lift up their Heads. In this humble Poſture they preſent all their Petitions to the King, and when they retire they go backwards, till they are quite out of Sight. 'Tis affirm'd for a certain Truth, that when the King does the Deeds of Nature, ſuch as are about him preſerve it, and dry and powder it, like Sneezing-Powder, and ſell it to the rich Merchants and Farmers, who buy it as a great Rarity, and at their Feaſts ſtrew it upon their Meat. This King has conſtantly about him 7 or 8000 Men for his Guard; their Weapons for the moſt part are Bows and Arrows, but ſome of them carry Battle-Axes and Bucklers. They have had the Uſe of Muskets and Cannon a long time: Their Gun-Powder is long, but of an extraordinary Force. Some of their Cannons have Letters and Figures upon them, by which it appears that ſome of them are above 500 Years old. No Man may ſtir out of the Kingdom without the Governour's Leave, nor is any allow'd to carry a Musket along with him, unleſs their next Kindred will undertake for them that they ſhall bring them back. Their Guns are poliſhed within as ſmooth as a Looking-Glaſs, and garniſhed without with embоſſed Wires, and Flowers of Gold and Silver inlaid, and carry large Bullets. There are always 50 Elephants and 25 Camels, with each a Piece of Artillery mounted upon his Back, which carry half a Pound Ball. Behind it ſits a Cannoneer to manage and level it as he pleaſes.

The Natives of *Boutan* are ſtrong and well proportion'd, but their Noſes are ſomewhat flat. The Women are bigger and more vigorous than the Men, but are more troubled with Swellings in the Throat than the Men are, for few of them eſcape that Diſeaſe. They know not what War is, having no Enemy to fear, but the *Mogul*, and from him they are fenced with high, ſteep, craggy and ſnowy Mountains, which he never thought it worth his Trouble to paſs. Northward there are nothing but vaſt Foreſts and Snows. E. and W. no Water but what is bitter, and as for the *Raja's* near them, they are Princes of ſmall Force. They have a Silver-Mine in the Kingdom of *Boutan*, for their King coins much Silver in Pieces of the Value of a Roupy; but they have little Gold, and what they have is by the Merchants brought them out of the Eaſtern Countries.

The Kingdom of *Tipra* lies on the N. W. of the Kingdom of *Arakan*, 12 Days Journey from *Daca*. It is about 15 Days Journey croſs it. They ride upon Oxen and Horſes, which are very low, but very hardy. The King and Nobility ride in Palleki's, or upon Elephants of War. The People are as ſubject to Wens on their Throats, as thoſe of *Boutan*, inſomuch that ſome of their Women have them hanging down to their Nipples, which proceeds from the Badneſs of the Waters. There is nothing in *Tipra* which is fit for Strangers. There is a Mine of Gold, but the Metal is very coarſe, and there is a ſort of coarſe Silk, which is all the Revenue the King has, for he exacts no Subſidies of his Subjects, but only that they who are not of the prime Nobility ſhould work 6 Days in a Year in his Mine or Silk-Works. He ſends his Gold and Silk into *China*, and for them they bring him back Silver, which he coins into Pieces of the Value of 10 Sous, and others of 22 Sous. In the Language of his Country he is called *Dieu-Aragari*, which is ſtamp'd upon one ſide of the Money, and on the other *Chaterman: Roy de Tipoura*. He alſo makes thin Pieces of Gold, like the Aſpers of *Turky*, of which he has 2 ſorts, 4 of the one making a Crown, and 12 of the other.

The Kingdom of *Aſem* is one of the beſt Countries in all *Aſia*, for it produces all Things neceſſary for Human Subſiſtance, without any Need of Foreign Supply. There are in it Mines of Gold, Silver, Steel, Lead, Iron, and great ſtore of Silk, but coarſe. There is a ſort of Silk found under the Trees, which is ſpun by a Creature like to our Silk-Worms, but rounder, and which lives all the Year long under the Trees. The Stuffs that are made of this Silk gliſter very much, but they fret preſently. This Country alſo produceth great ſtore of Gum-Lac, of which there is 2 ſorts, one grows under the Trees, of a red Colour, with which they paint their Linen and Stuffs, and when they have drawn out the red Juice, the remaining Subſtance ſerves to varniſh Cabinets and make Wax, being the beſt Lac in *Aſia* for thoſe Uſes. As for

Gold. for the Gold they never ſuffer it to be tranſported out of the Kingdom, nor do they make any Money of it, but preſerve it in Ingots, which paſs in Trade among the Inhabitants, but the Silver the King coins into Money of 3 Drachms, 4 Grains Weight, which makes 25 Sous. Tho' their Country be very plentiful in all Things, yet there is no Fleſh that they eſteem ſo much as Dogs Fleſh, which is the greateſt Delicacy at their Feaſts, and is ſold every Month in every City of the Kingdom upon their Market-Days. They have alſo great ſtore of Vines and very good Grapes, but they never make any Wine, but dry the Grapes to make *Aqua vitæ*. They have no Salt, but what is artificial, which is made 2 Ways. 1. They raiſe great Heaps of that green Stuff that ſwims on the Top of ſtanding Waters, which the Ducks and Frogs eat. This they dry and burn, and the Aſhes thereof being boil'd in a Cloth in Water, become very good Salt; but the moſt uſual Way is to take the Leaves of *Adam's* Fig-Tree, which being dry'd and burnt, the Aſhes thereof make a Salt ſo tart, that it is impoſſible to eat it, till the Saltneſs be taken away, which they do by putting the Aſhes into the Water, and ſtirring them up and down 10 or 12 Days together, and then they ſtrain the Subſtance through a Cloth, and boil it, for as the Water boils away, the Bottom thickens, and when the Water is all boil'd away, they find at the Bottom a very good and white Salt. Of the Aſhes of theſe Fig-Leaves they alſo make a Ley, with which they waſh their Silks, which makes them as white as Snow, but they have not Leaves enough to whiten half the Silk that grows in the Country.

Grapes.

Salt made of Herbs.

Ley to whiten Silk.

In the City of *Kenneroofe* the King of *Aſem* keeps his Court. This King requires no Subſidies of his People, for all the Mines in the Kingdom are his own, and for the Eaſe of his Subjects he has none but Slaves that work in them, ſo that all the Natives of *Aſem* live at their Eaſe, and every one has his Houſe by himſelf, and in the midſt of his Ground a Fountain encompaſſed with Trees, and moſt commonly every one an Elephant to carry their Wives, for they have 4 Wives, and when they marry them, they ſay to them, *I take thee to ſerve me in ſuch a Thing*; and to another, *I take thee to do ſuch a Buſineſs*; ſo that every one of the Wives knowing what ſhe has to do in the Houſe, there is no Difference among them. The Men and Women are generally well complexion'd, only thoſe that live more Southerly are ſwarthy and ſubject to Wens in their Throats, nor are they ſo well featur'd, and the Women are ſomething flat noſed. In the Southern Parts the People go ſtark naked, only covering their private Parts, with a Bonnet upon their Heads like a Blue-Cap, hung about with Swines Teeth. They make large Holes in their Ears, that you may thruſt your Thumb in, and hang in them Pieces of Gold and Silver. Bracelets alſo of Tortoiſe-Shells and Sea-Shells as long as an Egg, which they ſaw into Circles, are in great Eſteem among the meaner ſort, as Bracelets of Coral and yellow Amber are among the Richer. When they bury a Man, all his Friends and Relations muſt come to the Burial, and when they lay the Body in the Ground, they all take off their Bracelets from their Arms and Legs and bury them with the Corps. In the City of *Azoo* are the Tombs of the Kings of *Aſem*, and of all the Royal Family, for tho' they are Idolaters they never burn their dead Bodies, but bury them. They believe, that the Dead do all go into another World, and that they that have liv'd well in this have Plenty of all Things, but they who have been ill Livers ſuffer the Want of all Things, being in a more eſpecial manner afflicted with Hunger and Drought, and that therefore 'tis good to bury ſomething with them to ſerve them in their Neceſſity. For this Reaſon their Kings build themſelves in their Life-times Chappels in the great Pagod to be buried in, wherein they ſtore up great Sums of Gold and Silver, and other Movables of Value. Beſides, when they bury any of their Kings, they bury with him likewiſe whatever he eſteem'd moſt precious in his Life-time, whether it be an Idol of Gold or Silver, or whatever elſe, that being needful in this, is alſo neceſſary in the Life to come. But that which favours moſt of Barbariſm is this, that when any King dies, all his beſt beloved Wives and the principal Officers of his Houſe poiſon themſelves to be buried with him, and to wait upon him in the other World; as alſo, they bury one Elephant, 12 Camels, 6 Horſes, and a good Number of Hounds, believing, that all thoſe Creatures riſe again to ſerve their King. 'Tis thought, theſe were the People that firſt invented Guns and Powder, and that the Invention ſpreading it ſelf firſt into *Pegu*, and then into *China*, where it became known in the World, the *Chineſe* were thought to be the Inventors of them. Their Powder is very ſmall, and round like ours in *Europe*, and very ſtrong.

Guns invented.

This Kingdom enjoy'd a profound Peace for 500 Years, till *Margimola*, General of *Aureng-Zeb's* Armies, knowing that when his Maſter was ſettled on his Throne in Peace, he ſhould be in no Requeſt, undertook to conquer it for his Maſter. The greateſt part of the Kingdom of *Siam* lies between the Gulf of *Siam* and the Gulf of *Bengal*, bordering upon *Pegu* toward the N. and the *Peninſula of Malucca* towards the S. The ſhorteſt and neareſt Way for the *Europeans* to go to this Kingdom, is to go firſt to *Ijpahan*, the chief City of *Perſia*, and then by *Ormus*, *Surat* and *Golconda*, to *Maſulipatan*, there to embark for *Denouſerin*, which is one of the Ports belonging to the Kingdom of *Siam*, from whence to *Siam*, the Capital City of the Kingdom, is 25 Days Journey, part by Water and part by Land, which you may travel either by Waggon or Elephants. Both Ways are very dangerous, for by Land you muſt be always upon your Guard, for fear of Tygers and Lions; and by Water, by reaſon of the many Falls of the River, they are forced to hoiſe up their Boats with Engines. All the Country of *Siam* is very plentiful in Rice and Fruits, the Chiefeſt of which are Mango's, Durions and Manguſtans. The Foreſts are full of Harts, Elephants, Rhinoſeros's, and Apes, in which alſo there grow large Bambous in great abundance: Under the Knots of theſe Bambous are Emmets Neſts as big as a Man's Head, where every Emmet has an Apartment by himſelf, but there is but one Hole into the Neſt. They make their Neſts in theſe Canes to preſerve themſelves from the Rains, which continue there 4 or 5 Months together. In the Night-time the Serpents are very buſie: There are ſome 2 Foot long, with 2 Heads, but one of them has no Motion. There is another Creature in *Siam* like our Salamander, with a forked Tail and very venomous.

The King of Siam.

The neareſt way thither.

Dangerous Ways.

Emmets Neſts.

Serpents.

The Rivers of this Kingdom are very large, and that which runs by *Siam* is of a proportionable Bigneſs. The Water is very wholeſome, but is very full of Crocodiles of a monſtrous Bigneſs, that devour Men if they be not mighty careful of themſelves. Theſe Rivers overflow their Banks, while the Sun is in the Southern Tropick, which makes the Fields to be very fertile as far as they flow; and 'tis obſerved, that the Rice grows either higher or lower, as the Flouds do more or leſs increaſe.

Great Crocodiles.

Siam the Capital City of the Kingdom, and Reſidence of the King, is Walled round, and is about 3 Lgs. in Compaſs: It is ſituate in a kind of Iſland, the River running quite round it, and might eaſily be brought into every Street of the Town, if the King would lay out as much Money upon ſo good a Work as he ſpends in Temples and Idols. The *Siameſe* have 33 Letters in their Alphabet, but they write from the Left Hand to the Right, as we do, contrary to the Cuſtom of *Japan*, *China*, *Cochin-China* and *Tunquin*, who write from the Right to the Left. All the Natives of the Kingdom are Slaves, either to the King or great Lords. The Women as well as the Men do cut their Hair, and neither of them are very Rich in their Habits. Among their Complements, the chiefeſt is never to go before a Perſon whom they reſpect, unleſs they firſt ask Leave, which they do by lifting up of both their Hands. Thoſe that are rich have ſeveral Wives. The King of *Siam* hath ſeveral ſorts of Coin, as one in Gold, which weighs 18 Grains more than an half Piſtole, and much of the ſame Goodneſs: Another of Silver of the Bigneſs of a large Hazle Nut, flatted on the 4 Sides like a Semi-Circle, 3 Sides whereof are open like an Horſe-Shooe, and upon 2 Sides are certain of their own Letters. There is no Money in the Eaſt ſo ſtrangely coined as this: It weighs 3 Drachms and an half, and 25 Grains, and is as good Silver as ours. A 3d ſort of Money is Copper; of theſe Pieces they give 200 for one Piece of Silver: The ſmalleſt Money they make uſe of, is, certain Shells, which they gather up upon the Sea-ſhore, about the *Maldives*.

The City of Siam.

Native Slaves.

The C

The King of *Siam* is one of the richeſt Monarchs in the Eaſt, and ſtyles himſelf *King of Heaven and Earth*, tho' he be Tributary to the King of *China*. He ſeldom ſhews himſelf to any of his Subjects, and never gives Audience to any but the principal Favourites of

King of Siam.

of his Court, truſting the Management of his Affairs to his Miniſters of State, who make very bad uſe ſometimes of their Authority. He never ſhews himſelf in publick above twice a Year, and then it is with extraordinary Magnificence; the 1ſt is, when he goes to a certain Pagod within the City, which is gilded all over, both within and without; in it are 3 Idols between 6 and 7 Foot high, all of Maſſie Gold, which he believes that he renders Propitious to him by the great Store of Alms, which he diſtributes among the Poor, and the Preſents which he makes to the Prieſts. Then he goes attended by all his Court, clad with the richeſt Ornaments he hath. One part of his Magnificence conſiſts in his Train of 200 Elephants, among which there is one White, which he ſo highly eſteems, that he ſtyles himſelf King of the White Elephant. The ad time that the King ſhews himſelf, is when he goes to another Pagod 5 or 6 Lgs. above the Town, and up the River, but none muſt enter into it, but the King and his Prieſts. The People as ſoon as they ſee the Door open'd, muſt preſently fall upon their Faces to the Earth. Then the King appears upon the River with 200 Gallies of a prodigious Length, 400 Rowers belonging to every one of the Gallies, moſt of them being gilded and carved very richly. Now becauſe this Appearance is in *Nov.* when the Waters begin to abate, the Prieſts make the People believe, that the King by his Prayers and Offerings ſtops the Courſe of the Water, and cutting the Waters with his Sabre or Skain, cauſes it to retire into the Sea. Theſe 2 Pagods, to which the King goes publickly, are adorn'd with ſeveral tall Pyramids well gilded: In that Pagod in the Town to which the King goes once a Year, there is 4000 Idols, and that which is ſome Lgs. off is adorn'd with Pyramids all round it, ſo beautiful, that they make the Induſtry of the Nation admirable. The King alſo goes, but *incognito*, to another Pagod in an Iſland where the *Dutch* have a Factory. At the Entry of it is an Idol ſitting croſs-Legg'd, with one Hand upon his Knee, and the other Arm a kimbo. It is above 60 Foot high, and round about this Idol are 300 others of ſeveral Sorts and Seizes, all of them gilt. And indeed there are almoſt innumerable Pagods in the Country, becauſe every rich *Siameſe* cauſes one to be built in Memory of himſelf. Theſe Pagods have Stiples and Bells, and the Walls within are painted and guilded, but the Windows are ſo narrow, that they give a very dim Light.

Idols.

The King's Elephants.

Pagods very numerous

When the King comes abroad, all the Doors and Windows of the Houſes muſt be ſhut, and all the People proſtrate themſelves upon the Ground, not daring to lift up their Eyes; and becauſe no Perſon is to be in an higher Place than the King, they that are within Doors are bound to keep their loweſt Rooms. When he cuts his Hair, one of his Wives performs that Office, for he will not ſuffer a Barber to come near him. This Prince hath a paſſionate Love for Elephants, which he looks upon as the Ornament of his Kingdom. If any of them fall ſick, the Lords of the Court are careful to recover it, and if it die, they bury it with the ſame Ceremonies and Pomp, as one of the Nobles of the Kingdom, *viz.* They burn it to Aſhes with ſweet Woods in a *Mauſoleum*, or Tomb made of Reeds, and the Aſhes they preſerve in Gold and Silver Urns. As for Offenders, they never burn them, but bury them.

His Love of Elephants.

The Prieſts and Bonzes

The Prieſts of this Kingdom, called *Bonzes*, are thought to be above 200, and are highly reverenced, as well at Court, as by the People. The King himſelf hath ſuch a high Value for ſome of them, as to humble himſelf before them, which extraordinary Reſpect makes them ſo proud, that ſome of them have aſpired to the Throne; but when the King diſcovers any ſuch Ambition in them he puts them to Death, as he did one lately.

Their Cloathing.

Theſe *Bonzes* are cloathed in Yellow, with a little Red Cloth about their Waſte like a Girdle. Outwardly they are very modeſt, and are never ſeen to be angry. About 4 in the Morning, upon the Tolling of their Bells, they riſe to Prayers, which they repeat again towards the Evening. Upon certain Days in the Year they retire from all Converſe with Men, ſome of them live by Alms, others have Houſes with good Revenues. While they wear the Habit of *Bonzes* they muſt not marry, but if they will, they muſt lay that aſide. They are generally very ignorant, not knowing what they believe, yet they hold the Tranſmigration of Souls into ſeveral Bodies. They are forbid to kill any Creature, but they will eat what others kill, or is found dead, without any Scruple. They ſay, that the God of the Chriſtians and theirs were Brothers, but theirs was the eldeſt. If you ask them where their God is, they ſay, that he is vaniſh'd away, and they know not where he is.

Their Diverſion.

Their Dotrines.

The chief Strength of the Kingdom is their Infantry, which is pretty Good, their Soldiers being uſed to Hardſhip by going quite naked, except their Privities; yet their Skins are ſo cut and carved into the Figures of Beaſts and Flowers, into which they have put ſuch Colours as they pleaſe, that will never come out, that at a Diſtance you would think that they are clad in ſome flower'd Sattin or other. Their Weapons are Bows and Arrows, Pike and Musket, and an *Azagaya*, or Staff, 5 or 6 Foot long, with a long Iron-Spike at the End, which they very dexterouſly dart at the Enemy.

Their Infantry.

The Kingdom of *Macaſſar*, otherwiſe called the Iſle of *Celebes*, begins at the 1 5 D. of Southern Latitude. The Heats are very exceſſive all Day, but the Nights are temperate enough. The Soil is very fertile, but the People have not the Art of Building. The Capital City bears the ſame Name with the Iſle, and lies by Sea. The Port is free, and the Veſſels that bring great Quantities of Goods from the adjacent Iſlands pay no Cuſtom. The Iſlanders have a Cuſtom to poiſon their Arrows with the Juice of a certain Tree in the Iſland of *Borneo*, and they will temper it ſo, as to work ſlow or ſwift, as they pleaſe, and they can make it ſo ſtrong, as that no Art can ſave the Perſon or Beaſt wounded with them, unleſs by a Remedy, which their King only knows, and keeps as a great Secret.

The King of *Macaſſar*

Poiſon

The King of *Macaſſar* is a *Mahometan*, but it muſt be imputed to the Fault of the Jeſuits; for the King being willing to leave his Idolatry, and not knowing well which part to take, being ſollicited by the *Jeſuits* and *Mahometans* at the ſame time to come over to their Religion, commanded the *Mahometans* to ſend for 2 or 3 of their moſt able *Moullahs*, or Doctors of their Law, from *Mecca*, and ordered the *Jeſuits* to ſend him as many of the moſt learned among them, that he might be inſtructed in both Religions, which they both promiſed to do. The *Mahometans* were more diligent than the *Chriſtians*, for in 8 Months they got 2 learned *Moullahs* from *Mecca*, and the King ſeeing the Jeſuits ſent no Body to him, embraced the *Mahometan* Law, and ſo he continues a *Mahometan*, and now will not ſuffer his Subjects to embrace Chriſtianity. Indeed, in the Year 1656. the Chriſtians obtained a Permiſſion of him to build a fair Church in *Macaſſar*, but in the next Year he cauſed it to be pull'd down, with another belonging to the *Portugueſe*; yet the Secular Prieſts kept up their Pariſh-Church, till the *Dutch*, being angry with the *Portugueſe* Jeſuits in *China*, for defeating their Embaſſie to that Emperor, made War upon *Macaſſar*, to hinder their Trade there, and forced the King to expel all the *Portugueſe* out of the Iſle, ſo that now the whole Kingdom are *Mahometans* or Idolaters.

The King of *Macaſſar*

The Kingdom of *Tunquin* is bounded on the E. by *Canton*, a Province of *China*, on the W. by the Kingdom of *Brama*, on the N. by *Junnan* and *Quanſi*, 2 other Provinces of *China*, and on the S. by *Cochinchina*. The Air is mild and temperate, tho' it lies in the *Torrid Zone*, and the Ground ſo fertile, that there is a continual Spring. Froſt and Snow are never ſeen there, and the Gout, Stone and Peſtilence are Strangers in it. The N. and S. Wind, which continually blow, and divide the Year between them equally, ſo moderate the Heats, that they are not troubleſome; yet once in 7 Years they have hideous and terrible Tempeſts, which make ſtrange Deſolations, pulling up Trees, and blowing down Houſes. Theſe Exhalations are thought by their Aſtrologers to proceed from the Mines in *Japan*.

The King of *Tunquin*

Air.

Tempeſts.

The whole Kingdom is divided into ſeveral Provinces, which together contains, as 'tis ſaid, above 20000 Cities and Towns, tho' many Families, with their Cattel, live always upon the Water in Boats, after the Manner of the *Cochin-Chineſe*. The Country is for the moſt part level, ſave that in the N. there are ſome Hills. It is watered with ſeveral Rivers, ſome of which will carry Veſſels of a good Burthen, and ſo are commodious for Trade. In all the Country grows neither Corn nor Vines, becauſe they never have any Rain but in *June* and *July*, but Rice is produced in vaſt Quantities, which ſupplies the People both with Meat and Drink. They have alſo good *Aqua vitæ*, or

The Cities and Towns.

Rice.

or Strong-Waters. Their Fruits are excellent, but all different from ours. Their Palms bear bigger Nuts than in any Part of *Asia*. They are as bigg as a Man's Hand, and shaped like a Coco, the Pulp is as white as Snow, and tastes like our Almonds, and every one of them yields a considerable Quantity of Liquor, very pleasing and refreshing to the Palate. The Gogovier, which resembles our Lawrel, is of 2 sorts, the one bears a Plumb, green without and red within, but the other a yellowish Fruit, which is in much more Esteem. The Papager bears a Fruit like a small Melon, whose Taste is very delicious. The Arager, which grows upright and tall like the Mast of a Ship, bears Branches only at the Top, and the Fruit is like a Nutmeg. They bruise it with Betle and Chalk, to chew to make their Teeth white, Lips vermilion and Breath sweet. They have Figs of 2 sorts, the one like ours, the other like those called *Adam's* Figs, as long as a Man's Finger. They have a Tree like our Willow, called the Powder-Tree, because of the Wood burnt into Charcoal they make Gun-Powder. The Jambager grows very high, and bears a Fruit resembling a Citrul-Cucumber, which has a Pulp like a Granate, and is very pleasant in their hot Seasons. Their High ways are planted with Warr-Trees, which are a great Convenience for Travellers, for some of them are so big, that 2 or 3000 Men may shelter themselves under them, some of their Branches being 300 Paces long, and supported at every 12 Foot with certain Under-Branches, which having taken Root, uphold them like a Pillar. The Nuts of them, which are no larger than a Wall-nut, have a Kernel like Millet, which serves only for Food for the Rere-Mice, which make their Nests there. They have Bodies as big as a Pullet, and the *Portuguese* prefer them before it. They have a certain sort of Birds-Nests, as big as a Swallow's, which they dissolve in Water for Sawces to all their Delicacies. They give a Flavour above all the Spices of the *East-Indies* put together. They are found only in the 4 Islands belonging to *Cochin-china*. The *Tunquinese* also catch abundance of Tortoises in the Sea adjoining, which they not only count excellent Food, and think they cannot treat their Friends as they ought to do without them, but pickle them up, and send them abroad, which causes a Trade among them.

Tunquin affords great store of Anana's and Orang-Trees, which are of 2 sorts, the one no bigger than Apricocks, the other bigger than *Portugal* Oranges, both well tasted alike, and plentiful for 6 Months. Their Citrons, which are both green and yellow, are too tart to be eaten, but the Juice is made use of to cleanse Copper, Tin and Iron for Guilding, as also to scour Silks, whiten Linen, and take out Spots. In *Moguliſtan* they will make their Calicuts so white with the Juice of these Citrons, as to dazzle your Eyes. Great Quantities of Silk are made in this Country, of which both Rich and Poor make their Garments, and the *Hollanders* transport many into *China*. They have but one sweet smelling Flower, called the *Bague*, which grows like a Nosegay. They have great store of Sugar, and eat very much after their Meals for Digestion, but they eat it out of the Cane, not having a true Art to refine it.

Thro' the whole Kingdom there are neither Lions, Asses, nor Sheep, but their Forests are full of Tigers, Harts and Apes, and their Fields of Oxen, Cows and Hogs. Hens, Ducks and Turtles, which are the general Provisions of their Feasts, are numberless. Their Horses are well shap'd, and the King always keeps 5 or 600 of them in his Stables. Their Elephants are of a prodigious Bigness, there are none so tall and nimble as they in all *Asia*: The King keeps 5 or 600 of them for his Service in his Palace and Wars. They have no Cats, but their Dogs destroy their Rats and Mice, which are very large and mischievous. They have very few Birds, but such Multitudes of Gnats, that they are very troublesome at Nights, as well by their Noise as Stinging. They drive them away with the Smoke of Rice-Chaff. But the greatest Inconvenience of the Country are the white Emmets, whose biting raises Blisters on the Skin, for their Teeth are so sharp that they'll gnaw a Post in two in a little time, and eat thro' a Bale of Silk in 24 Hours, as if it were cut in two.

They have no Mines of Gold or Silver in *Tunquin*, neither do they coin any Money. The chief Commodities of this Country are, besides the Silk above-mention'd, Lignum Aloes, of which there is some worth 1000 Crowns the Pound, being oily and good. All the *Mahometans* use it to perfume their Beards and Rooms at Visits; and therefore the *Portuguese* of *Goa* sent, as a rare Present to the Emperor of *Japan*, a Piece of Lignum Aloes 6 Foot long and round, worth 54000 Livres. The *Tunquineses* are very faithful and frank in their Dealing, very unlike their Neighbours the *Chinese*, who will cheat you if they can; and if they are at any time over reached, will pay in light Money, for they are blunt and plain. Having no Money they make use in Trade of Ingots of Gold, and Bars of Silver, which they have from *China* and *Japan* for their Silks. They are worth from 300 to 600 Livres, and therefore in small Payments they either cut them in Pieces, or pay in *Spanish* Reals.

The Forces of this King for War are prodigious, his usual Army is 12000 Horse, 2000 Elephants, as well to carry the King's and Nobility's Tents and Baggage, as for the Service of the Wars; 300000 Foot, and 300 Gallies, and sometimes it amounts to 500000 Men. The Condition of the Soldiery is very toilsome and laborious, they are always upon the Guard, or attending their Captains in looking after the King's Elephants, and so breeding them that they may not be afraid of Fire; or in building Places of Shelter for the King's Gallies in Winter; yet their Wages are so small, that they can't maintain their Wives and Families, but their Wives are forced to follow some Trade to support them. Their Companies consist of 100, or 130 Men, and all the Soldiers are obliged to keep all their Arms very neat and bright.

The People of *Tunquin* are naturally mild and peaceable, submitting easily to Reason, and condemning the Transports of Choler. They esteem the Manufactures of other Countries more than their own, yet love to live at Home to honour the Memories of their Ancestors. Their Speech is soft and pleasing, they have good Memories, and are fluid in their Discourse. They have good Poets among them, and their People generally love Learning. Both Men and Women are well proportion'd, but of an Olive Complexion, and therefore much admire the Whiteness of the *Europeans*. Their Hair is black, and they wear it very long, but well combed, and tied upon the Crown of their Heads, or about their Necks to keep it from fluttering in their Faces. The blackest Teeth and longest Nails they accounted fairest: Their Habit is grave and modest, being a long Robe for both Sexes, girt about with a Silken Girdle, mixed with Gold and Silver. The Soldiers wear an upper Garment which reaches no farther than their Knees, and Breeches that go down to the Mid-Leg, but have neither Hose nor Shoocs. The vulgar People, except in the City, where the King's Court is, work 3 Months at the King's Palace, and 2 Months for the *Mandarins*, or great Lords: The rest of the Year is left to themselves to work for themselves and Families: One Day in the Year they are also obliged to lop Trees to feed the Elephants.

Their Rivers are free from Crocodiles and other dangerous Animals, which haunt the Waters of the *Nile* and *Ganges*, but yet once a Year they overflow their Banks after the Rains, with that terrible Violence, that they carry away whole Towns and Villages along with them.

The *Tunquineses* cannot marry without the Consent of their Parents, or if they be dead, the Permission of their nearest Kindred, and the Allowance of the Governour of the Place, where the Marriage is made, for which the Man must pay a certain Sum limited by Law. The People are very industrious here, and all the Money the Maids get before Marriage, is to buy them 2 or 3 handsome Garments, a Neck-lace of Coral, or yellow Amber, and Beads to garnish their Locks, and for their Portions. There is no Wedding without a great Feast, the poorer Sort for 3 Days at least, if they are able, and others for 9. The Law of the Land permits the Man to divorce his Wife when he pleases, which they many times do for slight Causes; but the Woman has not the same Privilege, and if she desire it, obtains it with Difficulty, but the Man is bound to restore the Woman what she brought with her, and keep the Children begotten between them; but now Divorces are not half so frequent as formerly. Adulteresses are punished here very severely, the Offender being cast to an Elephant bred up for that Purpose, who throws them up into the Air, and then tramples them under Feet till they are dead.

Of all the Eastern People the *Tunquineses* are most sociable, and most frequently visit one another. Generally they make their Visits about Noon, with a Train suitable to their Condition. The Princes and *Mandarins* ride on Elephants, or are carried in Pallekies, and their Train is 50 or 60 Persons. The ordinary Gentry and Officers of Court ride on Horseback, and are not allow'd above 7 or 8 Servants to attend them. They chew Betle continually where it is to be had, and at their Visits always present their Friends with some at taking Leave, and the richer the Box is the greater is the Present esteem'd.

Their Visits.

Chewing Betle.

Among the *Tunquineses* it is a great Dishonour to have the Head bare, for they shave all Criminals; and if any Person be found without Hair, they apprehend him, and carry him to the Governour, who causes him to be nail'd to a Cross immediately. They sit cross-legg'd, as the rest of the *Asiaticks*, but instead of Carpets they use Matts, made of Reeds, as fine as Threads, and as soft as Velvet, which they lay upon Beds, and not on the Ground, as the *Persians* and other *Indians* do.

They are not curious in their Diet, but very neat in dressing it. The common People are contented with Rice boil'd in Water, dry'd Fish and salt Eggs, (for they eat Flesh only at their Festivals) but the Great Lords are serv'd every Day with Flesh and Fish, but they know not how to bake any thing. All their Meat is cut in little Pieces, and serv'd up in little lacker'd Plates, less than our Trenchers. They use no Napkins or Table-Cloths, Knives, Forks or Spoons, but only 2 Sticks to take up their Meat, for they never touch it with their Hands. They wash their Hands, Mouths and Faces before they sit down to Meat, but never after their Meals. They are usually silent at Table, but if they have a mind to discourse, the eldest begins first, for they much honour the Aged. When they would know whether any Person has eaten sufficiently, they ask him, whether he has eaten his Rice, meaning thereby the whole Repast, as the Scripture does by Bread. They never ask any Man how he does, but how he eat his Dinner; for the more a Man eats, the better they suppose him to be in Health.

Their Diet.

Their Manner of Eating.

Their Salutation.

They take much Delight in Comedies, which are usually acted upon the New Moon, and last all Night. They set up their Theatres in great Halls, and adorn their Stages with beautiful Machines and Scenes. They have seldom more Actors than 8, either Men or Women, and they are very magnificently clad. They act their Parts perfectly well, and observe an exact Time in their Dancing. Their ordinary Pastimes, especially for the Lords and *Mandarins*, are Fishing and Hunting. In the former they take the greater Pleasure, because their Rivers are full of Fish; but they never follow their Sports but upon certain Days, when they may be spared from their Business.

Their Comedies.

The *Tunquineses* are Lovers of Learning, and apply themselves to their Studies with Diligence. Their Learning consists in the Knowledge of the Laws of their Country, Mathematicks and Astronomy. They are Admirers of Poetry and Musick, and are accounted the greatest Artists in them of all the People of the East. To acquire Nobility by Learning they study hard for 8 Years in the Office of a Notary Proctor, or Advocate, and if upon a strict Examination they are found to understand their Office so well, as to answer all Questions about it, their Names are presented to the King, who grants them a Title of the *Synde*. Having arrived at this Degree, they are order'd to study Musick, Astrology, Poetry and Mathematicks 5 Years, and if upon a second Examination they answer all Questions put to them in those Sciences, they are raised to the Dignity of a *Doucan*. After this they must spend 4 Years more to write and read the *Chinese* Character to such a Number of Words (for to know or write it fully is almost impossible, 'tis so copious) and understand the Laws and Customs of the *Chinese*, and after a strict Examination by all the *Mandarins* of Learning and *Tansi's* or Noblemen, for 8 Days, if they answer well, they arrive at the Degree of a *Tansi*, and are received into the Rank of the Nobility, and the King gives them certain Towns to take the Rents, but to some more and others less, according to their Merit, or the Prince's Favour, and the King gives them a Vest of Sattin. Then they go to visit their Towns given them by the King, where they are received in a guilded *Branquar* with Musick, and they stay 3 Months for their Recreation, and then they return to Court to instruct themselves in the Affairs of the Kingdom and Palace, and arrive at the Dignity of a *Mandarin*. In the mean time, their Names being written upon large Tables, are set upon the Gate of the Kings Palace 8 Days, that all the People may know who are received into the Rank of the Nobility.

Their Learning.

Nobility acquired by Learning.

The Physicians of *Tunquin* study Books but little, but spend their Youth in searching into the Vertues of Roots and Simples, and how to apply them to every Distemper, which they judge of by the Beating of the Pulse and its Diversity of Measure, as by the Pulse of the Right-Hand they guess at the Condition of the Lungs, and by that of the Arm of the Distemper of the Stomach and Kidneys; by the Pulse of the Left-Hand they judge of the Condition of the Heart, and by that of the Arm of the State of the Liver, and by the Pulse of the Temples, both Right and Left, they give a more exquisite Judgment of the Kidneys. They carefully count how many times the Pulse of a sick Person beats in the Space of one Breathing, and according to these several Pulses they will tell you which Part of the Body is particularly distemper'd, whether the Heart, Liver or Lungs, or whether it proceed from any outward Cause. They generally give Decoctions of Herbs and Roots, with a little Ginger. They use *China* Ink to stop a Dysentery and for the Cure of Wounds, and give the Powder of Crabs in Dysenteries and Fevers in Water, sometimes in *Aqua vitæ*. They prescribe Tea, which comes to them from *China* and *Japan*, as an excellent Remedy against the Head-Ach and Gravel, and with a little Ginger for the Griping of the Guts. That is accounted the best Tea which colours the Water greenest, for that which colours it red is little accounted of. Against the Afflictions which proceed from the bad Airs and cold Winds they use a Counter-poison, mix'd with *Aqua vitæ*, in which also they dip a Cloth, and rub the Patient well. But in this they boil a little Ginger, and for a more speedy Cure they sweat the Patient in a Cloud of Frankincense. They never use Blood-letting, and in the Purple-Fever they use Fire, and sometimes pricking every Spot. The Spot being burnt will give a Whiff like a Squib, which is an infallible Sign that the Venom is gone out of the Body; but the Physician must take care it doth not enter his own, for then Death certainly follows. If the Spot be prick'd to let out the Pestilential Blood, they burn it and then rub it with Ginger, nor permitting the Patient to take Air in 20 Days, or eat any Flesh or Butter. These Remedies are effectual to a Wonder, and cure in a short time.

Their Sickness.

The Kingdom of *Tunquin* was anciently a part of *China*, but has been for 600 Years governed by its own Kings. The first that assumed the Title of King was a Robber, named *Din*, who heading a great Number of Male-Contents, gain'd several bloody Battles over the *Chinese*, and seiz'd the Province for his Kingdom. The People did not permit him to reign long in Peace, but rising against him, slew him, and tho' he left 2 Sons, yet they reigned but a few Years successively, and died without Issue. The Kingdom after their Death was miserably distracted with Civil Wars, till the *Chinese* being called in to assist the weaker Party, brought Things to a Settlement, and a *Mandarin* of the Family of *Lelequel* was advanced to the Throne. He being a valiant and prudent Prince, restored Peace and Order to the Kingdom, and after he was establish'd built an admirable Palace of Marble of divers Colours, and very large. He left one Daughter to succeed him, and she, to secure herself, married a powerful *Mandarin* of the House of *Tran*; but she being deposed and slain by her rebellious Subjects, the *Chinese* again seized the Government, and held it 20 Years. They set Governours over every Province, and laid heavy Tribute upon the People; so that being weary of the Oppression, they joined under a valiant Captain of the House of *Le*, and vanquished the *Chinese* in 3 Battles, seated him on the Throne, and in his Family the Government continued above 80 Years. The last of this Race having given an Affront to a great Lord of the House of *Marr*, which had formerly enjoy'd the Scepter, he being assisted by a great Number of Male-Contents, fought to regain the Kingdom, and in one bloody Battle became Master of it; but he enjoy'd it not above 2 Years, being deposed by one of the Family of *Trin*, who refusing to ascend the Throne, restored it to the Family of *Le*, yet reserving to himself and Family the whole Command of the Army and Disposal of all the Revenues of the State.

The King's Kingdom.

An admirable Palace.

Chinese Governours.

State, and all publick Affairs, ſo that the King, whom they call *Boua*, has the Name, Title and State, but the General, whom they call *Choua*, has the Power. The King hears Cauſes almoſt every Day, but makes no publick Edict which is of any Effect, till it is ſign'd by the *Choua*. He lives ſhut up in his Palace, and ſtirs not out but upon certain Days. He has generally 2000 Soldiers for his Guard, and keeps ſometimes 20000 quarter'd upon his Frontiers, eſpecially towards *Cochin-China*, and with them 50 Elephants. Upon the Rivers alſo of the Kingdom where any Enemy can damage him, he keeps uſually 100 great Gallies, with a vaſt Company of ſmall Galliots. The eldeſt Children here do not always ſucceed their Father in the Throne, but by the Influence of the *Choua* and Counceſſors his Creatures, he is obliged to name which of his Sons he will have to reign after him, if he has many, and him they promiſe to eſtabliſh, ſhutting up all the reſt in the Palace, as in a Priſon, and not ſuffering them to meddle with Affairs of State, yet 4 times a Year they are allow'd to go out under an Officer appointed by the *Choua*, and have Liberty to ſtay 6 Days. On the firſt they are to viſit the Temples and Prieſts, and give them large Alms; the next 2 Day's they hunt, and the 3 laſt fiſh.

Their King called *Boua*.

His Gallies.

Their Succeſſion to the Throne.

The Kingdom of *Tunquin* is divided into Eight large Provinces, every one of which has its Governour and Magiſtrates, but there lies an Appeal from their Sentence to the King, his 32 Counſellors and 100 Aſſiſtants. Their Nobility attain that Degree by Merit only, *viz.* By their Valour in the Wars and Learning, and as theſe latter go thro' a long Courſe of Studies and ſtrict Examinations, as is above ſhewn, ſo the former are inſtructed in Warlike Exerciſes betimes, *viz.* To handle their Swords, to aim with their Bows, to fire a Musket, to ride the great Horſe, to ſhoot running, to manage their *Zagays*, which are long Staves cheek'd with Iron like a Half-Pcke, and make all ſorts of artificial Fire-Works, which they uſe againſt Elephants in War; for tho' ſome Elephants may be taught not to regard them, tho' they go off under their Noſes or Bellies, yet one in 10 cannot be brought to it, ſo that, unleſs the Governours take great Care, inſtead of running upon the Enemy, they'll turn upon their Friends, and put a whole Army into a diſmal Confuſion, if not deſtroy it, as they did *Aureng-Zeb*'s at the Siege of *Daman*.

The Provinces and Governours.

Elephants hated by Fire-works.

The Kingdom of *Tunquin* paid a Tribute to the *Chineſe* till the Year 1667. when the *Tartars* invaded their Country, and then they concluded a Peace with them, that they ſhould ſend every Year an Ambaſſador to *Pequin*, to do Homage to the Emperor of *China*.

They obſerve an exact Order in adminiſtring Juſtice and regulating Affairs all over the Kingdom. They are very exact in puniſhing Murther, and none can eſcape, but ſuch as have killed one that has no Relations to revenge his Death; for the King can pardon no Man for this Crime, and all the Favour he can ſhew, is to leave him to the Kindred of the Slain. They have great Care for the publick Good, to repair Bridges and High-Ways, and every Quarter of a Lg. there is Water and Fire provided for Travellers that want them. Tho' the King has not much Power in his Kingdom, yet he is highly honoured by his Subjects, and keeps a very ſplendid Court. The 1ſt and 15th Day of every Month all the *Mandarins*, except the General, who is allowed to ſend his Deputy, come in their *Chineſe* Habits to kiſs the King's Hand, as the inferior *Mandarins*, who are Governours of Provinces, Juſticiaries and Military Officers do the *Choua's* on the 1ſt Day of the Year. All that deſire to ſee the King are obliged to put on Violet Robes, both themſelves and their Servants, and if they beg any Favour muſt carry a Preſent. On the 1ſt Day of the New Year the King diſtributes ſeveral Largeſſes and Gifts to his Courtiers, and the Children of ſuch as have done him any important Services, which are Panes of Gold, worth 600 Livres each, and Bars of Silver of 46 Livres value each. He alſo releaſes all Priſoners, both Criminal and Debtors, provided their Crimes do not deſerve Death, and the Debts do not exceed 2 Bars of Silver. The 3 laſt Days of the Year the 4 *Mandarins*, who are the chief Councellors of State, take Oaths of all the Lords and Officers of the Court, and their Wives, to be faithful to the King, and diſcover any Treaſon againſt his Perſon and Government; and the Governours of Cities and Countries the ſame to the Lords, Gentlemen, Citizens and Inhabitants of their Juriſdictions; and every one that diſcovers any Treaſon, never fails of a Reward according to his Quality, and mean People are ennobled and gratified with a Reward of 50 Panes of Gold, and 500 Bars of Silver, which amounts to 53000 Livres, but they eſteem Nobility above Money.

Their Juſtice.

The King much reſpected.

His Gifts on New-Year's Day.

Oath of Allegiance.

They have a Muſter of the Youth every Year, and all ſuch as are found not to be either of the Nobility, or not to have learnt a Trade, are immediately enrolled for the King's Service, to be of his Guards, or defend his Frontiers: Some will endeavour to get off by Money, but if they be diſcovered, both Officers and Soldiers are puniſhed without Redemption; for they hang a little Bell about their Necks, and fetter their Arms, and ſo ſend them to the General, who preſently orders their Heads to be ſtricken off, or upon Interceſſion of Friends, that they ſhall be hang'd, becauſe they are very averſe to Blood-ſhed, and believe that Death moſt honourable that is free from it.

The Youth muſtered.

When the King goes at any time out of his Palace to take his Pleaſure, he is ſeated upon a moſt magnificent Palanquin, carried by 8 Men, where he is ſeen by all the People, the Lords and Officers of the Court attending on Foot, if he goes no further than the City, but if he goes into the Country, he rides on an Elephant, and the Lords attend him on Horſe-back. When the Queen-Mother, or his 1ſt Wife go abroad, they are likewiſe carried upon a cloſe Palanquin, with Lattice-Windows, that they may ſee and not be ſeen, and the Maids of Honour follow it on Foot.

How the King goes abroad.

The *Mandarins* and great Princes ſolemnize their Birth-days every Year with great Feaſtings, Paſtimes, Comedies and Fire-works, and at the ſame time give large Alms, eſpecially to poor Widows and Priſoners.

Their Birth-days kept.

When the King dies and leaves ſeveral Sons, he is ſet up, whom the King has appointed his Succeſſor; and on the 3d Day after his Deceaſe, the General with all the Military *Mandarins*, Lords of the Council, and Governours of Provinces repair to the Prince's Apartment, where they preſent him with a *Chineſe* Habit, and mounting him upon an Elephant, bring him into one of the great Courts of the Palace, which is cover'd with Cloth of Gold and Silver, as a Tent, and place him upon a magnificent Throne, where being ſeated, all the *Mandarins* proſtrate themſelves to him upon the Earth, with their Heads downward, in which Poſture having lain ſometime they riſe, and cloſing their Hands together, with their Arms and Eyes lifted up towards Heaven, they ſwear to be faithful to him till Death. The new King to requite this Loyalty orders 4 Panes of Gold and 6 Bars of Silver to be given to every one; but to the Conſtable or General he gives 2 Panes of Gold, and 40 Bars of Silver, and to the Preſident of the Council half as much: After theſe Preſents are given, ſeveral Pieces of Artillery are fired about the Palace, with ſome Volleys of Small-ſhot by the Soldiers then in Arms, which are 30000 Horſe and Foot. Then the King ſet upon a magnificent Palanquin carried by 8 Military *Mandarins*, and 8 of the Council, the Conſtable and Chief of the Council riding before upon lovely Horſes, is carried to the Apartments of the deceaſ'd King, where the Lords are retired, the Princeſſes, Ladies of the Court, and chief Wives of the *Mandarins* come to kiſs the King's Hand, and congratulate his Advancement to the Throne, which done, the Lords return to a noble Feaſt, prepared for them after the Manner of the Country. Colts Fleſh and Dogs are in moſt Eſteem with them, and the Birds-Neſts, which gives their Meat a Taſte of almoſt all ſorts of Spices, is their chief Sauſe. The Feſtival is concluded with Comedies and Fire-Works, which laſt all Night. The next Day the 30000 Soldiers are drawn up in the Field, and the King appearing on his War-Elephant in the midſt of his Troops, takes an Oath of Fidelity of all the Officers, and then beſtows his Gifts upon them, *viz.* To every Colonel 2 Panes of Gold and 40 Bars of Silver, to every Captain half as much, and to every Soldier a Month's Pay, which being receiv'd, the whole Army diſcharges 3 Vollies, and then they retreat to their Huts, where they have a Feaſt prepared, as the King has alſo in a Wooden Palace, erected for the ſame Purpoſe, and ſo they ſpend the Night in Feaſting, Dancing and letting off Fire-Works. This Ceremony being ended, they ſet on Fire the Palace and Huts, and the King returning to his Palace, beſtows his Liberality on the Comedians and Dancers. Then he gives Acceſs to all his People by their Commiſſioners, *viz.* To the Merchants and Tradeſmen of *Checo* who aſſure him, that their City acknowledge him

His Gifts to the Soldiers.

The Feaſt upon that Occaſion.

Gifts to the ſoldiery.

him for their King, and will be faithful to him unto Death, and he gives 50 Panes of Gold and 300 Bars of Silver to the Merchants, and 20 Panes of Gold and 100 Bars of Silver to the Tradesmen, and then to the Commonalty of the whole Kingdom, whom he discharges from Taxes a whole Year, if they have never taken up Arms against their King, and but 6 Months if they have.

The Gifts to the People.

All Prisoners for Debt, after he has compounded with the Creditor for half, he frees by paying the rest. 'Tis said, that the King upon this Occation sends above 100000 Beasts to the Temples of the false Gods to be sacrificed for him, besides the Value of a Million of Panes of Gold in Tissues and Silks to adorn the Idols, Orange-coloured Calicuts for the *Bonzes*, and Blue Calicuts for the Poor that are kept in the Pagods, as Hospitals. Sometime after these Ceremonies are over, the King at the New of the Moon goes to give his Deities Thanks for his coming to the Crown, and remains for a Week with the *Bonzes*, living in common with them, visiting the Hospitals to see how the Poor, and especially the Aged, are used, and to them he gives new Alms, and orders the Building of a new Pagod in some fair Situation, which he dedicates to some Idol. The second Quarter of the Moon is spent in seeing the Galleys row one against another, the King and Court having Houses built on the Plains by the River for that Purpose, which Diversion being over, the Captains come ashore to kiss the King's Hand, and they that have behaved themselves most stoutly and nimbly carry the Marks of his Bounty, and he gives all the Soldiers 2 Months Pay extraordinary; during 7 Days there are such vast Numbers of Fire-Works thrown about, that you would think the Air and Water all on Fire. Then the King returns to his Palace, and spends the other Half of the Month with his Princesses, diverting himself and his Ladies with Fire-Works, Comedies and Mummeries.

Prisoners for Debt released.

The King's Devotion.

Gifts to the Soldiers on [illegible]

When the King of *Tunquin* dies, he is presently embalmed and laid in State 65 Days, all which time his Table is served as if he were alive, and when the Meat is taken from before the Body, half is given to the *Bonzes*, and the other half to the Poor. So soon as the King hath breathed out his last Gasp, the Constable gives Notice to the Governours of Provinces, and orders them how long they shall mourn. The Military *Mandarins* mourn generally 3 Years, the King's Houshold 9 Months, the Nobility 6, and meaner sort 3, and all the 3 Years there is a Cessation from all Divertisements, except those that are used at the King's Elevation to the Throne. All the Meats that are serv'd up to the new King are varnish'd with Black, and his Hair is cut off, and his Head covered with a Straw-Bonnet, as are also the Heads of all his Princes and Counsellors of State; nor do they leave this Habit, till the deceased King's Body is put into the Galley to be carried to the Interment, and the 3 Bells which hang in one of the Towers of the Palace never cease Tolling all that time. The 3d Day after his Decease, all the *Mandarins* repair to Court to testifie their Sorrow for the deceased King; and 10 Days after, all the People are allow'd to see the Body lie in State, till it be put into the Galley. During the 65 Days which the King's Body lies in State, the Constable prepares for the Funeral, which is thus performed. The King and all the the Court march on Foot to the Gallies, which they make 17 Days March, tho' 'tis not really above 2 Days Journey, and all the Way is spread with Velvet-colour'd Calicuts, which is the King's Colour. The Order of their March is thus: First go the 2 Ushers of the King's Bed-Chamber with Maces of Arms, the Head of them being full of Fire-Works: They proclaim the Name of the deceased King. Next go 12 Officers of the Gallies, drawing a Tomb, whereon the King's Name is written. Then proceed 12 Elephants, of which 4 carry the King's Standards, Four 6 arm'd Men apiece in Turrets, and 4 were those the King rode on in his Wars. After these rides the Master of the Horse, with 2 Pages after him on Horse-back. Then are led 12 Horses richly harnessed with Bits, Bridles and Saddles. After follows the *Mausoleum*, or Herse, drawn by 8 Stags, train'd up for that Service, every one of them being led by a Captain of his Guard. Then goes the new King, with his Brothers, if he have any, and the Princes of the Blood, all clad in white Sattin, which is their Mourning-Colour. They are attended with Musicians, which play upon Hautboys and other Instruments. After them go 6 Princesses in white Sattin, carrying Meat and Drink for the deceased King. These are attended by as many Ladies of Honour in Purple Garments. Then go 8 Princes of the Royal Blood in Purple Garments, with Straw-Hats. Next proceed 4 Governours of the chief Provinces of the Kingdom, carrying on their Shoulders certain Bags full of Gold and Perfumes, hung on Sticks, which are Presents made by their Provinces to be buried with their King for his Use in the other World. Then follow 2 Chariots, drawn by 8 Horses apiece, led by a Groom each, in which are 2 Coffers, full of Panes of Gold, Bars of Silver, rich Tissues, and other Riches, to be buried with the King's Body for his Use in the other Life: Lastly come a great Croud of the King's Officers and Nobility, some on Foot, others on Horse-back, according to their Offices and Qualities. When the deceased King's Body is put into the Galley, the new King and the Company return home, and the Calicut being taken up, is given to the *Bonzes*. The Galley wherein the King's Body is, is committed to 6 of the chief Eunuchs, who are sworn never to reveal the Place where the King is buried. It is attended with 3 other Gallies, one carries the Lords and another the Ladies who are to be buried alive with the King, to attend him into the other World, and the 3d carries the Treasure that is to be buried with the King for his Use. The King is buried in inaccessible Mountains and Deserts.

The King's Death.

The Mourning [illegible]

The Funeral Pomp and Order.

Music.

As for the ordinary Funerals of the *Tunquinese*, they are more or less pompous, according to the Quality of the Person deceased. At their Interments they use great store of artificial Fire-Works, which they use also in their Times of Joy, as well as Grief. They also set upon the Tomb good store of Victuals and Sweet-Meats, believing that the Dead are the better for them, and the Priests, who nurse them up in the Error, dispose of them before the next Morning. The *Dutch* Soldiers at *Batavia* robbed the Priests of these Dainties several times, but at length paid dear for their Liquorishness, for the Priests finding no Redress by complaining to the Governour, poison'd the Meat and Drink, and so destroy'd many of them.

The Religion of the *Tunquinese* is divided into 3 Sects. The 1st is derived from an ancient Philosopher, called *Confutius*, whose Memory is famous over all *China*, and the Neighbouring Countries. Their Doctrine is, That Man is compos'd of 2 Parts, one fine and subtile, and the other material and gross. When a Man dies, the subtile Part vanishes into the Air, and the gross returns to Earth: They use Sacrifices, and worship the 7 Planets: The chief Idols are *Rauma*, *Betolo*, *Ramonu* and *Brama*; the Women chiefly worship the Goddess *Sarabanti*, and the King, *Mandarins*, and Learned Men adore the Heavens. The 2d Sect was founded by one *Chacalous*, an Hermite, and most of the Common People are of this Sect: He taught his Followers the Transmigration of Souls, and enjoin'd them Commandments, *viz.* That they should not Kill. 2. That they should not Steal. 3. That they should not defile their Bodies. 4. That they should not Lye. 5. That they should not be unfaithful to their Words. 6. That they should restrain their inordinate Desires. 7. That they should do an Injury to no Man. 8. That they should not be great Talkers. 9. That they should not give way to their Anger. 10. That they should labour to their utmost to get Knowledge. As for them that design to lead a Religious Life, they must renounce the Delights of this Life, be charitable to the Poor, overcome their Passions, and give themselves up to Meditation. He taught also, That after this Life there were 10 distinct Places of Joy and Torment, and that the Contemners of his Law should feel Torments proportionable to their Offences without any End. That if they endeavour'd to fulfil his Law, and fail'd in any Point, they should wander in divers Bodies for 3000 Years, before they entred into Happiness, but such as had perfectly obey'd his Law should be rewarded without suffering any Change of Body. He says of himself, That he was born 10 times before he could come to Bliss, because in his Youth he, for want of Knowledge, had sinned. This Impostor's Opinions are spread all over the Kingdom of *Siam*, several Provinces of *Japan*, and all *Tunquin*, where he died. The 3d Sect is that of *Lantsiu*, a great Magician. He gave out, that his Mother carried him in her Womb 70 Years, without losing her Virginity, that by this Miracle he might gain Credit to his Impostures. He taught most of *Chacabaut*'s Doctrin; and to gain the

the People's Hearts, enjoin'd the Grandees to build Hospitals in all Cities where there was none before, and to look after the Sick in them.

Their Houshold Gods.

The *Tunquineſe* adore 3 Things in their Houſes, *viz.* The Hearth of their Chimneys, made of 3 Stones. 2. The Idol *Tieuſa*, who is the Patroneſs of all Handicrafts-men, and to her they ſacrifice when they put a Child to any Trade, that ſhe may infuſe an Aptneſs to learn into it. 3. The Idol *Buabin*, to which they pray and ſacrifice when they build an Houſe, that he may not ſuffer any Misfortune to befal the Houſe they are going to build; but they ſend for the *Bonzes* and *Says* to offer it, for whom they make great Preparations.

Their Gods.

There are ſome among them that adore the Heavens, others the Moon, and others the Stars. Some adore the Earth in 5 Parts, and that in 5 ſeveral Colours, *viz.* The Northern in Black, the Southern in Red, the Eaſt in Green, Weſt in White, and Middle in Yellow; and others ſacrifice to Trees, Elephants, Horſes, Cows, and almoſt all other ſorts of Animals.

Sacrifice to the Souls of the Dead.

They that ſtudy the *Chineſe* Characters ſacrifice every 5 Months to the Souls of the Dead, that were never buried, believing that their Underſtandings ſhall be more enlightned to apprehend Things.

At the Beginning of every Year they have a great Solemnity in Honour of the Dead, who were in their Lives renouned for their noble Actions and Valour, reckoning Rebels among them. They ſet up ſeveral Altars, ſome for Sacrifices, others for the Names of the Perſons they deſign to honour, and the King, Princes and *Mandarins* are preſent at them, and make 3 profound Reverences to the Altars, when the Sacrifices are finiſh'd; but the King ſhoots 5 times againſt the Altars where the Rebels Names are: Then the great Guns are let off, and the Soldiers give Vollies of Small-Shot to put the Souls to Flight; the Altars and Papers made uſe of at the Sacrifices are burnt, and the *Bonzes* and *Says* go to eat the Meat made uſe of at the Sacrifice.

Their chief Holy-days.

The 1ſt and 15th Days of every Month are more eſpecially Holy-days for the Worſhip of their Gods, and the *Bonzes* and *Says* redouble their Prayers, and repeat a kind of Charm 6 times. The People on theſe Days bring Meat and Drink to the Sepulchres of their Kindred to ſacrifice for the Good of their Souls to eat. The *Bonzes*, when they have paid their Worſhip, fall to, and what they can't eat give the Poor. For this Greedineſs the King and *Mandarins* make no Account of the *Bonzes* and *Says*, tho' they lead auſtere Lives, and ſo they are in no Credit, only with the common People.

Their Pagods and Revenues.

In *Tunquin* the great Cities have ſeveral Pagods, and every Village and Town almoſt has one. Every Pagod has at leaſt 2 *Bonzes* and 2 *Says*; but ſome maintain 40 *Bonzes*, and as many *Says*, who live in common under a Superior, and keep to the Doctrine of *Chacabout*, and a Goat is the Idol which they adore. They wear about their Necks a Neck-lace of 100 great Beads made of Wood. They beg for their Living with great Modeſty and Humility, taking no more than is needful, and if they have any thing to ſpare, they give it to the poor Widows and Orphans that cannot get their Living.

Their Priests marry.

Their Orders permit them to marry, but then they muſt leave their Monaſtery. They aſſiſt at the Funerals of Great Men, where they make a kind of Orizon, ſounding their Trumpets and Cornets, while the Bells in their Pagods go at the ſame time.

Wizards honoured.

They have a great Veneration for 2 Magicians and one Witch: The firſt Magician is called

Viz. Tay-ſan

Tay-bou, who pretends to know the Events of all Things to come; ſo that when any is about to marry their Children, build an Houſe, buy Land, or undertake any Buſineſs of Conſequence, they conſult him, who inſpecting his Book, makes them believe what he pleaſes. The other is *Thay Pou-Thou*, to whom they have Recourſe in their Sickneſs. When he is conſulted, after ſeveral Apiſh Tricks, which he acts before the ſick Perſon to amuſe him, he ſometimes affirms, that the Diſtemper comes from the Devil, and then he himſelf and the ſick Perſon, and his Friends that brought him, do Homage to the Devil; but if he do not recover, all the Friends and Kindred of the ſick Party, with as many Soldiers as they can get, ſurround the ſick Perſon's Houſe and ſhoot off their Muskets 3 times, to drive the Devil away. If the ſick Party be a Waterman, or other Perſons belonging to the Water, then he tells them, 'tis the God of the Waters that is the Cauſe of the Diſtemper, and then he orders him to ſpread Carpets, and furniſh Tables in Huts with all ſorts of Meat, down to the next River, to invite him home to his Habitation. If theſe Things fail, he ſends him to *Tay-bou*, the chief Magician, to enquire if the Souls of the Dead have cauſed the Diſtemper, and he anſwers, Yea, then the Magician employs his Tricks to get the miſchievous Soul into a Bottle, where he keeps it till the Party is cured. The Magicineſs is called *Bacoti*. She keeps a great Correſpondence with the Devil, and to oblige him, offers her own Daughter, if ſhe has one, as ſoon as ſhe is born. Mothers that have loſt their Children, and are deſirous to know the Condition of their Souls, conſult her, go to her, and ſhe by beating of a Drum, pretends to ſummon the Soul to her, and cauſe it to tell her the Condition of it. She generally tells them, that the Soul is happy, and bids 'em be of good Cheer.

They have innumerable Superſtitions, but the moſt remarkable are theſe: The more ſtudious People learn to foretel Things to come, by looking in a Mirrour; others ſprinkle the Aſhes of their dead Anceſtors with *Aqua vitæ*, and beg of them Health, Honour and Riches; others upon their New-Year's-Day make divers Figures upon the Steps and Threſholds of their Doors, to drive away Evil Spirits; others in Travelling, if they ſneeze but once, return back, and if they ſneeze twice, purſue their Journey without fear of Danger. Some, if at going out of their Houſes they meet a Woman, retire again for 2 or 3 Hours, but if a Man, 'tis a good Omen. The firſt Fruit which they gather in the Beginning of the Year is the Araguer, and they poiſon one and give it to a Child, believing, that by taking away the Child's Life they ſhall thrive the better all the Year after. When the Moon is eccliplſed, they ſay, a certain Dragon endeavours to devour her, and therefore to aſſiſt the Moon, and put the Dragon to Flight, they diſcharge their Muskets, ring their Bells, beat up their Drums, and make an hideous Noiſe, till the Eccliplſe be over, and then they think they have reſcued the Moon, and rejoyce as much as if they had obtained a great Victory over their Enemies. They divide the natural Day into 12 Hours, and give them the Name of ſome Beaſt, as a Tiger, Lion, Bear, Horſe, &c. and ſo the Months and Days have their particular Names. When a Child is born, preſently the Father and Kindred go to ſee the Name of the Beaſt by which the Hour is call'd when the Child was born, believing that Animal will prove fatal to it. The preſent King of *Tunquin* was born in the Hour of the Horſe, and he would never give Audience nor ſtir out at that Hour, for fear ſome Miſchief ſhould befal him at that Time; and the ſame Prince having a Child that died in the 5th Month, which is called by the Name of the Horſe, would not ſuffer him to be buried, but cauſed him to be burnt, and ſcattered his Aſhes in the Air.

Unlucky Hours and Days.

THE

THE TRAVELS OF Monsieur *THEVENOT* into the *Levant*

Faithfully ABRIDG'D:

WITH

What is further taken Notice of by *Du Mont*, or *Le Brun*.

CHAP. I.

Of the Way to Constantinople, *and the Description of the City.*

MOnsieur *Thevenot*, a *French* Gentleman of a good Family, having accomplished his Studies in the College of *Navarre*, in the University of *Paris*, and furnish'd himself with all other Breeding usual in *France*, resolved to compleat himself by Travels. He visited *England*, *Holland*, *Germany* and *Italy*, and tho' he kept Memoirs of all Things remarkable in those Countries, yet he thought them not useful to the Publick, because there are so many Relations of them made by others. He staid at *Rome* sometime by reason of the Death of Pope *Innocent* X. being desirous to see the Ceremonies of a new Election, and so left not that City till *Alexander* VII. was seated in the Papal Chair. The Manner of Electing a new Pope is this: As soon as the Pope is dead, and his Body is carried into St. *Peter's* Church, where it is laid in the Chappel of the *Holy Trinity*, exposed to the View of all Comers for 3 Days, the Body being shut up within the Grates, but his Feet, covered with Slippers of Crimson-Velvet coming thro', that all that pass by may kiss them, which they do with a great deal of Devotion. Orders are given for every thing to be got ready that is necessary for the Conclave, and the Chambers are fitted up for the Cardinals, and in that time all are allow'd to see the Place. When the Cardinals are once entred the Conclave, they have no Liberty of going out again, till they have made Choice of a new Pope; nor is it lawful so much as to open the Doors of it, unless it be to admit the Foreign Cardinals, or let out the Sick. Before they proceed to the Election, every Cardinal is obliged to take an Oath before a Crucifix, to this Effect, *Testor Christum Dominum, qui me Judicaturus est, eligere quem secundum Deum Judico eligere debeam, & quod idem in Accessu præstabo*, i. e. *I swear by the Lord Jesus Christ, who is to be my Judge, that I will chuse him, whom I think in my Conscience I ought to chuse; and this I will do when it comes to my Turn to Vote.* The Election is usually managed and performed one of these 3 Ways, as they speak at *Rome*. 1. By Inspiration, when the whole Conclave vote unanimously for one Person, which they think could not be done by so many Persons, unless by the Direction of the Holy Ghost. 2. By Com-promisal, when the Election is left by the Conclave to certain Select Persons. 3. By Suffrage, which is by counting the Votes, which is now the only Way of Electing a Pope; and he that is thus chosen, as they call him, Head of the Church must have at least 2 Thirds of the Votes of the Conclave, and he that is thus elected is accounted and obey'd as Pope.

As soon as this Ceremony was over he left *Rome*, and on *June* 2. he embark'd at *Civita-Vecchia*, and came to an Anchor before the Port of *Messina* in *Sicily* in 7 Days. This Town lies opposite to *Rhegio* in *Italy*, from which it is distant about 60 Miles. It was built by the *Messinians* of *Peloponnesus*, and from them took its Name, being anciently called *Zande*. It is a safe Harbour made so by Nature, and round it are several fair Palaces built very uniform, which yields a pleasant Prospect. The Mole, which shuts in the Port, has a Tower by it to secure the Entry, and another in the midst of it. This Town is but a melancholy Place, tho' the Streets are fair and large. Over the Door of the Cathedral Church is written, *Gran-Mercy a Messine*, in Memory of the Surrender of that City to the *French*, when they took *Sicily*. Before it is a great Piazza, with a Theatre in the middle of it, where the Victory of *Lepanto* is represented in Brass, and a Brasen Statue of *Don John* of *Austria* stands by it. The Novitiate of the Jesuits stands upon an Hill that over-looks the Town. There are 18 strong Castles in it, but 4 of them only are in the Hands of the *Spaniards*. The *Messineses* have the rest. The Town is very rich, by reason of the great Trade in Silk driven there. There are no Inns for Strangers, so that they are obliged to lodge in a wretched Tavern by the Harbour. All Things are cheap, the Wines strong, but bad. It is an Archiepiscopal See. The *Streight* is made dangerous by *Scilla* and *Charybdis*, tho' anciently they were much more so than now, because Navigation is much improved. *Scilla* is a Rock near the Castle *Scylio*, on the *Italian* Shore. *Charybdis* is the Meeting of 2 contrary Eddies, which by beating and clashing one against another, make a Noise like the Barking of Dogs, and by causing Vessels to turn round about, suck them down to the Bottom without Remedy; nor is the Harbour it self safe from it, for the Currents will sometimes carry the Ships out into it, and therefore the *Messineses* have always a great many Pilots in a Readiness to assist Vessels in Danger.

Sicily is of a Triangular Form, each Angle making a Cape, which are now called *Difaro*, anciently *Pelorus*, *Passaro*, *ol. Pachinus*, & *Bocbo*, *ol. Lilibæum*. It is but 3 Miles distant from *Italy*, being separated from it by a dangerous Streight, called, *The Phare of* Messina. 'Tis the most considerable Island of the *Mediterranean* Sea, both for Bigness (being 700 Miles in Compass) and Fruitfulness. It produces Plenty of Corn excellent Wines, Olives, and many other Necessaries of Life, insomuch, as that it was called one of the Granaries of *Rome*. It contains a great many fair rich Towns, but it is much annoy'd by Mount *Gibello*, *ol. Ætna*, which continually casts forth abundance of

of Flames, and covers the Land about it with Ashes for a great Way. It is also much infested with Earthquakes. It has been under the Dominion of many Nations, *viz. Greeks, Carthaginians* and *French*, but now is subject to the King of *Spain*, who has always a Vice-Roy there, that has his Residence half a Year at at *Palermo*, and the rest at *Messina*. From all these Nations the *Sicilians* have derived some Vice, which makes them very ill-natur'd. They are revengeful, haughty and jealous, especially of the *French*, whom judging by their vindictive Temper, they suspect not to have forgotten the *Sicilian Vespers*, and for that Reason always wear their Daggers by their Side even in their Shops and Work-Houses. They are of a subtle and malicious Wit.

Agousta. From *Messina* he sailed to *Agousta*, which is but an ordinary Town with one Street, but the Country about it produces excellent Wine, which has a strong Flavour of Violets: Then coasting along by *Syracuse*, *Syracuse.* now corruptly called *Saragousa*, formerly the Metropolis of *Sicily*, and Native Place of *Archimedes*, the Muscadine. Country about which produces excellent Muscadine, he made the Isle of *Malta*, anciently called *Melita*, from the Plenty of Honey (called *Meli* in *Greek*) which it yielded. It lies in 38 D. of Northern Lat. and 34 D. of Long. being about 20 Miles long, 12 broad, and 60 round. It was at first governed by its own King, *Malta described.* called *Barus*, but after fell into the Hands of the *Carthaginians, Romans, Saracens* and *Spaniards*, by whom under *Charles V.* it was given to the Knights of *Rhodes*, whom *Solyman the Magnificent* had 8 Years before expell'd from their Seat there, from whence they have bore the Name of the Knights of *Malta*. The Isle is low, and the Soil a soft Chalky Rock, yet it produces The Fruits. very good Fruits, as Figs, Melons, which grow so easily, that they require no Care, but to preserve them; Grapes good to eat, but not for Wine; Cotton, but little or no Corn, for that is brought from *Sicily* thither. The Air is so hot, that there is no walking in the Sun; and the Nights are as intolerable, if not thro' the Heats, yet thro' the Stinging of Muskettoes; yet 'tis so wholsome for old Men, that they can hardly die. They drink their Wine with Ice. Head-Aches and sore Eyes, caused by the Whiteness of the Earth, are there common and dangerous. There are No venomous Creatures. no venomous Beasts in the Isle, nor can any live in it, which the People attribute to St. *Paul*'s Benediction, and they give the Earth of the *Grott*, where he lived, for an Antidote against Poison, with greater Success than *Terra Sigillata*. The Island is populous: The People are of a brown Complexion and revengeful. The Women are beautiful, pretty and familiar, for tho' they hide their own Faces with their Mantle, they see every Body's else. They speak *Arabick*, but *Italian* The Ports. is common. Here are several Ports and Creeks, but the chief Havens are the Great Port, and that called *Marsamouchet*. In the Great Port are all the Gallies of the Order laid up, and all the Vessels that are to make any Stay at *Malta*, either to load, careen, or refit, put in there, it being shut with an Iron Chain: The Port of *Marsamouchet* is for Ships to perform their Quarantine in, before they have Access to the Town, and for such as by reason of foul Weather can't get into the Great Port, as also for the *Corsairs*, who come only for a little time, and so will not go into the Great Port, because 'tis hard to get out again from thence. *Malta* taken by the Turks. As soon as the King of *Spain* had given the Island of *Malta* to the Knights of St. *John*, Sultan *Solyman* resolving to extirpate them, who had given him so much Trouble, sent a powerful Army to take it. The *Turks* landing near the Mount *Pelegrino*, attack'd the Castle of St. *Erme*, kill'd all that defended it, and took it. Then they turned against the Isle *de Sangle*, but were assaulted so furiously by the Castle of St. *Angelo*, who firing their Cannon, which they had laid level with the Water, upon them, sunk their Boats and drown'd their Men, which being repeated several times, the *Turks* despairing of Success, and finding Recruits come to them out of *Europe*, drew off, and left the Isle in the End of *September*, 1565. After the *Turks* were gone, the Monks resolved to build a new Town, where the Great Master with all the Order might conveniently dwell. They pitched upon the Tongue of Land where the Castle of St. *Erme* stands, from whence the *Turks* had so furiously driven them. The Great Master Valetta built. Friar *John la Valette* laid the first Stone of it, *March* 28. 1566. and from himself called it *Valetta*; and it has been so fortified since, that few Places can match it. The Entry into the Port is defended by the Castle of St. *Erme*, the *Baraque*, which has 9 Pieces of Cannon, and the Bastion of *Italy*, and on the other side by the Castle of St. *Angelo*, and a Tower, which has 2 or 3 Pieces of Cannon. The Town is no less strong by Land than towards the Sea, being begirt with good Walls, built upon very high Rocks, with several Bastions and other Pieces of Fortification, which are no less goodly than good. The *Baraque* is very delightful, being covered with lovely Orange and Lemmon-Trees planted in Rows, and having a great many Fountains, where the Water-works playing very high, give a mighty Diversion. The *Baraque.*

From the Port you go up an Hill to the Town, which is but small, but very pretty. It hath but 2 Gates, one leading into the Port, the other into the Country. There are several Churches in it, but that of St. *John* is the Chief. On one side of it is a lovely Piazza, and at each Angle a Fountain. It is a large Building, and pretty high, paved with lovely Marble, and adorn'd above with many Colours taken from Infidels. In this Church they pretend to have many fine Reliques, *viz.* St. *John Baptist*'s Right-Hand, and many others. The Town described.

There are several lovely Buildings in the Town, and among others the stately Palace of the Great Master, in which is a Magazine of Arms for 35 or 40000 Men, kept very clean and in great Order, and among them the Arms of such great Masters as have been wounded in any Action, are to be seen with the Marks upon them. This Palace looks into a large Square, in the middle of which is a lovely Fountain, which throws up Water in great Quantities, and very high, and supplies the whole Town with it. The Palaces of the Conservatory and Treasury are fair Buildings, and so are the Inns. The Hospital is very well built, and the Hall for the sick Knights is hung with Tapestry, where they are attended by Knights, and serv'd in Plate. Poor Travellers find Entertainment here, till they can get Passage to the Place they are bound, and then they are furnished with Provision, and their Charges are born thro' their Voyage. The Jesuits have a very well built House and a College there, and even the meanest Houses make a good Show, being built of a large square white Stone, which retains its Colour long and seems new: They are all flat Roof'd. The Streets of the Town are incommodious, because one goes always up Hill and down Hill, but they are wide and straight. The fairest reacheth from the Castle of St. *Erme* to the *Royal Gate*, which is almost a Mile long, and in it they make the Horses and Asses run the *Pallio* upon their Days of Rejoycing. The Country about it is full of Gardens and very agreeable Places of Pleasure. About 12 Miles into it the Grand Master hath a Palace, built in Form of a Castle, and very uniform, the Halls of which are adorn'd with excellent Paintings, and it has very neat Gardens full of Orange, Citron and Olive-Trees, with several lovely Fountains. At a little Distance from the House is a Grove stock'd with Game for the Diversion of the Great Master. The Palace of the Great Master and Magazine. The Hospital of the Knights of St. *John*. The Streets of *Malta*.

Five Miles from *Malta* is the Isle of *Gozo*, which is 30 Miles in Circuit, 12 in Length, and 6 in Breadth. It is a very wholsome Air, and tho' it be mountainous, is almost all cultivated, for the Inhabitants delight more in tilling the Land for Corn, than any other sort of Husbandry, tho' it has many Places well water'd, and so fit for Gardening and Pasture. On our *Lady-day, Sept.* 8. the Knights keep a Rejoycing Yearly for the *Turks* raising the Siege of *Bourg*, with Mals, Shooting, Feasting, Races of the *Pallio*, and many other Rejoycings. The Isle of *Gozo*.

Leaving *Malta*, *Thursday, Nov.* 1655. he sail'd by the Isle of *Sapienza*, and having weather'd the Cape *Matapan*, came to an Anchor in the Bay of St. *Nicholas*, in the Isle of *Cerigo*. Cape *Matapan* is a Promontory of the *Morea*, formerly called *Tenarus*, where *Arion* carried by a Dolphin was put a-shore. This Country is inhabited by the *Meinotes*, a People who liv'd in the Mountains without Law or Government, and are subject to those who have most Power in the Country, sometimes the *Venetians*, and sometimes the *Turks*. All their Business is to rob Travellers. Cape *Matapan*.

Cerigo was anciently called *Porphyris*, because of the great Quantity of *Porphyrian* Marble found there, and *Cythera. Venus*, who is fabled to have been born of the Froth of the Sea, first dwelt here, and had a Temple near the Sea-side, the Ruins of which are still shewn. It is the first Island in the *Archipelago*, or *Ægean* Sea, 60 Miles in Compass, and 5 from the The Isle of *Cerigo*.

main

main Land. The *Venetians* are Masters of it, and keep a good Garrison there, because 'tis a Pass of great Importance.

From *Cerigo*, where the Ship paid the Consul a Piastre for Anchorage, he sail'd to *Zia*, leaving many inconsiderable Islands on the Right Hand, as *Melo*, *Antimelo*, &c. This Isle was anciently called *Ceos*, or *Cea*, it is shaped like an Horse-Shoe, and 50 Miles in Circumference. The Soil is pretty good, producing Corn, Wine, Grass, and a great many other good Things, and the Harbour is full of Fish. The Inhabitants pay a Tribute to the *Turks* of 3400 Piastres, and to the *Venetians* 2600, besides the Extortions and Robberies they meet with, which so impoverish them, that they are forced to leave their Habitations. They are good People, and deserve to be pitied, because of the Miseries they suffer both from *Christians* and *Turks*. The chief Town of the same Name is 5 Miles from the Port, it is a large Place, containing 700 Houses, but there is not above 400 of them inhabited, the rest being forsaken since the War of *Candia*. The Houses are built of Stone and Earth, rank'd on the side of an Hill like the Benches of an Amphitheatre. The Castle is ruinous, but strong, so that 60 *Turks* with 2 Muskets only held it out against the whole *Venetian* Army, under General *Morosini*, till Want of Water forced them to yield.

From *Zia* he sailed to *Andra*, anciently called *Andros*, 60 Miles from it, and 80 in Circuit. It is reckon'd the most fertile Island of the *Archipelago*. It produceth almost all Things, and Silk most especially, for which they have a great Trade, and make a mighty Gain of it, and Backs. The Port is pretty good, and the Town adjoining to it hath about 200 Houses. In the whole Island are about 60 Villages, of which the most considerable are *Arni* and *Apsalacos*, inhabited by the *Arnauts* or *Albanians*, who are about 1200 Souls, and all of the *Greek* Church, and differ in Language and Customs, yet all without any Discipline. Near these Villages is a large Monastery of 100 Monks, called *Tagia*, who have a neat small Church, which they supply, but they are very ignorant, and 6 lesser ones. There is a great Number of *Greek* Churches in the Isle, which are under the Government and Discipline of a *Greek* Bishop. The *Latins* also have a Bishop there, and 6 Churches, of which the Cathedral is dedicated to St. *Andrew*. The *Capuchins* preach in them, and teach a School, to which the *Greeks* send their Children as far as *Athens*. The *Turks* dispose of the Temporal Affairs of this Isle, and are but uneasie Neighbours to the Christians. The Jesuits have a Church called St. *Veneranda*, and an House near the Valley *Monites*, with a Garden full of Fruit-Trees of all sorts, which yield them considerable Profit. The Houses in this Isle are ill built, and both the Air and Water Bad. The Inhabitants are civil; their Women are chaste, and speak well, but their Apparel is unbecoming. The Inhabitants of the Towns love good Cheer and Diversions, and care not much to labour, but the Peasants are very industrious. Their Food is Goats Flesh for tho' in their Woods there is good Venison and wild Fowl, yet they have neither Huntsmen nor Fowling-Pieces to catch them. The Sea affords them no Fish. They have neither Physician nor Chirurgeon, but when they are sick, betake themselves to the Mercy of God.

From *Andra* he sail'd by the *Negropont*, *Sciro*, *Ipsicera*, *Chio* and *Tenedo*, to *Troy*, where there are still remarkable Ruins of that ancient and famous City, and that of great Extent, viz. An Harbour, Pieces of large Pillars, and the Remains of a great Temple; but the Learned say, that they are only the Ruins of some Buildings erected there by the *Romans*, long after the Destruction of *Troy*. From hence he passed the Mouths and entred the Channel of *Hellespont*, where the *Turks* first passed over into *Europe*, and sailing betwixt the Castles of the *Dardanels*, came to an Anchor. The *Dardinels* are 2 Castles, built on each side the Channel of the *Hellespont* by *Mahomet* II. the Son of *Amurath* II. The one stands in *Europe* in *Romania*, in the very Place where *Sestos* formerly stood. This Castle is Triangular, and besides 2 Bastions, hath 3 Towers covered with Lead, and 20 large Guns, which carry Stone-Bullets of 60 Pound Weight. The other is in *Anatolia* in *Asia*, in a Plain, where anciently *Abidos* stood. These 2 Forts are the Keys of *Constantinople*, tho at 2 to Miles Distance, for they can hinder any Ship, Friend or Foe to pass them without Leave, unless they will run the Hazzard of being sunk. All Ships that come from *Constantinople* are searched here for Counterband Goods and fugitive Slaves. These Places are famous for the Love of *Hero* and *Leander*, and *Xerxes*'s Bridge into *Europe*, which was made hereabouts. From *Andra* to this Castle is 280 Miles.

From thence he sail'd to *Gallipoli*, which is reckoned 35 Miles. This Town was built by *Callias*, Prince of the *Athenians*, from whom it was called *Calliopolis*, and now is corrupted into *Gallipolis*. This Place is but thin peopled: The *Greeks* that dwell in it sell *Raki*, or Brandy, for the most part, and their Houses have Doors not above a Foot high, to keep out the *Turks*, who will ride in else when they are drunk, and turn all Things upside down. It has a Tower and Arsenal, where are laid up several Gallies.

Departing thence he passed the Isle of *Marmora*, which gives Name to the Sea, that was formerly called the *Propontis*, and sailing along by the *Seraglio* and *Constantinople*, came to an Anchor at *Galata*, where is the Harbour of that City. The Sea of *Marmora*, or the *Propontis*, which is about 120 *German* Lgs. in Compass, lies between the 38 and 41 D. of Northern Lat. and the 55 and 58 D. of Long. which makes the Clime so temperate, that it has neither the Inconveniences of sharp Cold, nor burning Heats, which is the Reason that both sides of it has been so well adorn'd with famous Cities: For on the *Asian* side stood *Chizico*, a Town anciently famous not only for being built by the *Argonauts* 500 Years before *Rome*, but for its lofty Towers, magnificent Buildings, large Arsenals and Magazines, fine Amphitheatre and convenient Port, though nothing now remains of all these Things but frightful Ruins, which are the Habitations of Owls.

2. *Nice*, called by the *Turks Isnich*, famous for the 1st General Council. It is almost square, and stands at the Extremity of a Bay in a fine Plain. On the N.E. is a Ridge of Hills, which abound with Wood, Vines, Fruits and Fountains. It is encompassed with Walls full of round Turrets, and had a Covert-Way that ran by them, but 'tis now ruined. The City is pretty large, the Streets neat, and has at least 10000 Inhabitants, as well *Greeks* as *Jews* and *Turks*, who trade in Corn, Fruit, Cotton, fine Cloth, &c. to *Constantinople*. There are here many Remains of Pagan and Christian Antiquities, but are so defaced by the *Turks*, that nothing admirable is to be discerned.

3. *Montagna*, or *Nicopolis*. It stands on a Bay anciently called *Cianus Sinus*, from the City of *Cium*, which once stood there. This Town is small, but by means of the Bay drives a great Trade to *Constantinople*, for its Nearness to *Bursa* brings all the Traffick of *Bithynia* to it. The Inhabitants, are about 5 or 6000 *Greeks*, *Turks* and *Jews*, and are all Merchants, and live of their Trade in Fruits, which they send to *Constantinople*.

4. *Nicomedia*, which, next to *Constantinople*, has the pleasantest Situation of any City in the World. It stands at the Bottom of a Bay, and runs up the side of an Hill, which is stored with many Fountains, Fruit-Trees, Vineyards and Corn. Their Garden-Fruits are extraordinary, and their Melons are thought by some to equal those of *Cachan* in *Persia* for Goodness, which are reckoned the best in the World. Here are abundance of Remains of Antiquity, enough to satisfie the Curiosity of Travellers. It was built by the Nymph *Olbia*, but has its Name from *Nicomedes*, King of *Bithynia*, who enlarged it. It is famous for the Death of *Hannibal* and *Constantine* the Great, and its early Conversion to Christianity and the many Martyrs who seal'd the Faith with their Death. It is called *Ismit* by the *Turks*, and is a large and populous City, having about 30000 Inhabitants, *Greeks*, *Armenians*, *Jews* and *Turks*, who most of them live by trading in Silks, Cotton-Wools, Linnen-Cloths, Fruits, Earthen and Glass-Wares, and several other Commodities, which make it a City of great Traffick. There are a great many *Greek* Churches and fair Mosques, with several Inns and neat *Bazaars*, or Market-Places, in this Town. Most of the Ships and Vessels which belong to *Constantinople* are built here, but they are sorry Artists at it. On the right side of the Bay of *Nicomedia* is a Fountain of Mineral Water, which the *Turks* and *Greeks* say, cures all Distempers, and therefore flock to it mightily.

5. *Chalcedon*. This Town was once famous for the Temples of *Venus* and *Apollo*. Many Christian Churches, and among them one dedicated to St. *Euphemia*, where

where the 4th General Council ſate, and in part of which, as it ſtill remains, the *Greeks* have their Religious Worſhip, and ſtrong Fortifications, and other fine Buildings, is now reduced to a Village of 1000 or 1200 Houſes, and thoſe all ruinous. This City gives Name to the Streights adjoining, which are called, *Fretum Chalcedonicum*, *Boſphorus Chalcedonius*, as well as *Boſphorus Thracius*, and near it is a Light-Houſe and a Pleaſure-Houſe belonging to the Grand Seignior, called *Finari Kioske*, which Sultan *Soliman* II. built for his Retirement with the Ladies of the *Seraglio*. On the *Thracian* ſide ſtands *Rodoſto*, or *Radiſto*, a Town pretty well ſituated at the Extremity of a Bay, which accommodating it with an Haven, fills it with Inhabitants, who drive a Trade all over *Thrace*, the *Propontis* and *Black Sea*. In it are 3 or 4 large Moſques, and ſome ſmall ones, ſome Chriſtian Churches belonging to the *Greeks*, and 2 *Jewiſh* Synagogues. The Town lies along the Sea-Shore, where the Trade is, and toward the Land are many Gardens, but the Fruit is not very good, becauſe the Gardiners of *Turkey* are unskilful in their Art.

Rodoſto.

2. *Perinthus*, or *Heraclea*, which once gave Law to *Byzantium*, but now is ſubject to it. This Town hath 2 good Havens belonging to it, but one of them is ſo dammed up with the Rubbiſh and Filth of the City, that it ſerves only for Barks and Saicks. The Amphitheatre of *Heraclea* was one of the 7 Wonders of the World, but now there are only ſome ſhatter'd Ruins of it. There are alſo ſeen many Pedeſtals with *Greek* Inſcriptions to *Severus*, *Trajan*, and others, who had done any ſignal Services for the City, but the Statues which once ſtood upon them are thrown down and demoliſhed. The Town at preſent is but thinly inhabited, and drives but a ſmall Trade, tho' they have great Quantities of Cotton, Olives, Fruits, both green and dry, Skins and Wool. The Cathedral is one of the fineſt in all *Greece*, having a handſome Roof, and being very neat in the In-ſide, and better contrived than the Patriarchal Church of *Conſtantinople*. There are 5 or 6 Churches beſides, but none of them in ſo good a Condition as the former, and 2 of them are wholly diſuſed. But tho' the Buildings and Trade of this City daily decay, and Time may blot it out of the World, yet the Sufferings of many Chriſtian Martyrs in it will keep up its Memory as long as the World endures.

Perinthus.

In the *Propontis* are ſeveral Iſlands, *viz.* *Marmora*, which gives Name to the whole Sea, and is about 10 Lgs. in Compaſs. The chief Towns in it are *Galioni* and *Craſtia*. The *Caloyers*, or *Greek* Monks, have ſeveral Convents or Hermitages in it. They are very auſtere in their Way of Living. 2. *Avoſit*, whoſe chief Town is of the ſame Name. It hath 2 other Villages, called *Aloni* and *Arabi Kieny*, becauſe 'tis inhabited by *Arabians* only. 3. *Conradi*, which has a Town of the ſame Name: And, 4. *Gadoro*, which has only ſome Houſes and Cloiſters for Monks. Theſe 4 Iſlands go all by the Name of the firſt, and lie on a Cluſter abounding with Cattel, Corn, Wine, Fruits, Cotton, &c. Their Fiſhery is alſo good, but they regard it only for their own Uſe, becauſe *Conſtantinople* is ſupplied nearer hand. Nearer to *Conſtantinople* lies another Knot of Iſlands, called by the *Turks*, *Papas Adaſſi*, by the *Greeks* *Papa Douiſſi*, or the Iſlands of the Monks; and by the *Europeans*, *The Pope's Iſles*. Were *Conſtantinople* in the Hands of the Chriſtians, they would be a perfect Paradiſe, and every one would have his Houſe of Pleaſure there, but being ſubject to the Ravages of the *Turks*, who often go thither to be drunk, and in their Heat ruffle their Gardens and Vineyards, they lie uncultivate, and only a few *Caloyers* manure a little Bit of Land by their Monaſteries for Herbs and Roots for their own Uſe. Theſe *Caloyers* are Monks of St. *Baſil*, who retain the ancient Way of Living and Habit, without any Alteration. They lead a very retired and poor Life, and never eat any Fleſh. They obſerve 4 *Lents* in the Year, beſides ſeveral other Faſts, and ſome among them are ſo abſtinent, as that they are ſatisfied with eating a little Bread and Pulſe dreſſed with Salt and Water once a a Day, and others by Cuſtom have brought themſelves to eat once in 2 or 3 Days, during their *Lents*; and 'tis ſaid, ſome will eat but 7 times in the 7 Weeks of their longeſt *Lent*, tho' this ſeems improbable, but theſe are only the moſt devout, which are but few. The reſt order Matters ſo cunningly, that they obſerve nothing leſs than Faſting, for tho' indeed they eat no Butter, Fiſh, Eggs, nor Oil, and drink no Wine, yet they uſe other Things luxuriouſly, as Oiſters, Caviar and Shell-Fiſh for Fiſh; Almonds, Piſtachio's and Nuts for Butter; *Aqua vitæ*, Coffee and Sherbet for Wine, &c.

The Caloyers.

Their Faſts.

Conſtantinople is the beſt ſituated City in the World. It lies in *Europe* upon a Point of the Main Land, jetting out towards the *Boſphorus* of *Thrace*, from whence 'tis but half an Hour's Paſſage into *Aſia*. On the Right Hand is the *White-Sea*, or *Propontis*, by which there is an eaſie Paſſage into *Aſia*, *Egypt* and *Africa*, whereby it is ſupplied with all the Commodities of thoſe Places. On the Left Hand it hath the *Black* or *Euxine* Sea, and *Palus Mæotis*, by which it is furniſhed with all the Commodities of the North; inſomuch, that there is nothing that can be neceſſary, uſeful and pleaſant which is not brought plentifully to *Conſtantinople*, the Winds always ſerving to bring in Commodities from one of thoſe Parts. The Port is by Nature the loveliſt in the World, being 6 Miles in Compaſs, and a Mile over, and ſo deep in all Places, that a Ship may lay her Head aſhore without Danger. It was anciently called *Byzantium*, and was built by *Pauſanias*, King of *Sparta*. The Emperor *Severus* demoliſh'd it, to puniſh the Rebellion of the Inhabitants, and *Conſtantine the Great* rebuilt it, calling it *New Rome* firſt, and then *Conſtantinople*, and being dedicated to the Virgin ſometimes bears the Name of *Parthenopolis*, the *Turks* call it *Iſtambol*. After the Diviſion of the Empire, it was the Seat of the Eaſtern Emperors, from whom in 1209. it was taken by the *Venetians* and *French*, but recovered by the *Palæologi* 50 Years after, and fell into the Hands of the *Turks* on *Whitſunday*, 1453. who have kept it ever ſince. The Air in Summer would be very hot and incommodious, were it not cool'd by a Breeze, which comes every Afternoon from the Mouth of the Port, yet is very healthful, ſo that no Diſeaſes are known here, but the Plague, which makes a great Havock every Year. It is very ſubject to Earthquakes, ſo that ſometimes 2 happen in a Day. The Figure of it is Triangular, one Side lying toward the *Propontis*, the other on the Port, and the 3d toward the Land. It is all encompaſſed with good Walls, and to the Land-ſide they are double, being built in ſome Places of Free-Stone, and in others of Free-Stone and Brick. It hath 22 Gates, 6 toward the Land, 11 along the Port, and 5 on the Streight of the *Propontis*, which have all Landing Places and Stairs, and is about 12 Miles in Compaſs.

Gates.

The Caſtle of the 7 Towers.

The Caſtle of the 7 Towers joins the double Walls on the Continent ſide to thoſe that lie upon the *Propontis*. It was anciently one of the City, called, *The Gilded Gate*, from the gilt Ornaments of it, and had 4 Turrets; but *Mahomet* II. becoming Maſter of *Conſtantinople*, added 3 new ones, and made it a Caſtle ſtrong enough to keep the Treaſures of the Empire, and for that Purpoſe it ſerv'd a long time; but at preſent it is only uſed as an honourable Priſon, where the G. Seignior ſhuts up ſuch Perſons of Quality and Slaves of Note as have incurred his Diſpleaſure. If any Chriſtians be confined in it, their Prieſts are allowed to come and ſay Maſs to them in a little Chappel, and if they are Knights of *Malta*, or other Perſons of Quality, they are allowed to go out, if an Ambaſſador, or other Perſon of Note will be engaged for their Return. Sultan *Oſman* and *Haſſein Baſha* were ſtrangled in this Caſtle. Without the Walls, hard by one of theſe Caſtles, are 2 large Statues of white Marble in Baſſe-Relief; the one ſeems to be *Endimion*, and *Diana* coming down to ſee him, and the other the 9 Muſes, with the Horſe *Pegaſus*. They are done by a good Hand, but inferior to ſome Pieces in *Europe*. In going by Sea from this Caſtle to the *Seraglio*, there is a ſquare Tower ſtanding in the Sea, at about 200 Paces from the City Walls, where, they ſay, *Juſtinian* impriſoned *Belizarius*, his famous General, out of meer Jealouſie, and having ſtript him of all forced him to beg his Subſiſtence of charitable Paſſengers. Not far from this Tower is a Fountain, to which the *Greeks* always pay a great Veneration, and upon the Day of Chriſt's Tranſfiguration carry their Sick to it, to whom they give ſome of the Waters, and cover their Bodies a while with the Sand; and they ſay, wonderful Cures had been thus done by it. The *Greeks* have abundance of theſe miraculous Fountains, which they ſuperſtitiouſly honour, and the Prieſts encourage them in it for their own Gain. Near this Fountain ſtands the *Kioske*, or Pleaſure-Houſe of the *Boſtangi Baſha*, or Overſeer of the Gardens. It is a Tent covered over,

A Tower in the Sea.

A Fountain honoured.

just without the Walls of the *Seraglio*, and overlooks the *Propontis* and *Bosphorus Thracius*, but he being in the 4th Post of the Empire, has no Time almost to take the Air. Beyond this *Kioske* are a great many Cannon planted between Wind and Water, to hinder the Entrance into the *Seraglio* or Port, if any should attempt it by Force. These Pieces are always charged, but never discharged, unless it be upon the 1st or 2d Day of the Month *Bairam*, to give the *Mussulmen* Notice of that solemn Feast, or upon the Account of publick Rejoycings as the Taking of a City or Province. In the middle of these Pieces of Cannon is one of the 4 Posterns of the *Seraglio*, called *Bostan Capi*, or the Gate of the Gardens. It is fortified with 2 large Turrets, and guarded by 2 Companies of *Bostangi's*, or Gardiners, who keep all from entring at this Gate, but the Sultans and Officers of the *Seraglio*. After you have passed the Cannon and doubled the Cape, where you pass a Fountain, from which most of the Ships take in their fresh Water, you come to 2 *Kiosks*, built by Sultan *Soliman* to view the going out and coming in of the Men of War, and divert himself with his Women, of which he had Plenty. Both of them are well adorn'd and furnished with guilded Cupalo's, Alaves, Sophas, Quilts, Cushions, Carpets, and all other Things fit for so great a Prince, but nothing can be imagined more noble than one of them. At these Pleasure-Houses always attend some small Galleys and Caicks ready to attend the G. Seignior and his Train whenever he pleases to divert himself. These Galleys and Barks are very neatly guilded and painted all over, the Oars and Grappling-Irons not excepted. These are all the remarkable Things without the Walls, both of the City and *Seraglio*. We must now go into the City to find more.

It stands upon 7 little Hills, as old *Rome* did, and the Houses are so disposed, that one takes not away the Sight from the other. The Streets are narrow for the most part, but there are several goodly Buildings in them. There are many stately Mosques in it, of which the most magnificent is that of *Santa Sophia*, which was anciently a Christian Church, built by the Emperor *Justin*, enlarged, enriched and adorned by *Justinian*, and dedicated to the Wisdom of God, *Hagia Sophia*. The *Turks* have changed it into a Mosque, but retain the Name. This Fabrick is 114 Paces in Length, 80 in Breadth, and as many in Height, square without, but round within. The Mosque is very spacious, hath a Dome in the middle, in the Form of a squatted Globe, which is a singular kind of Architecture. It is paved with fine Marble, and Matted, that the Cold may not hurt such as come to worship without Slippers, and squat down in their Service. There is a Tomb, which, the *Turks* say, is *Constantine's*, and a Stone on which, they believe, the Virgin wash'd our Lord's Linen, and they bear a great Reverence to it. The Church was painted after the *Mosaical* Way, with Circles and Images of Christ, the Holy Ghost, the Virgin, and other Saints, which yet appear, tho' the *Turks* have endeavoured to deface them, for they suffer no Images. Within are 2 Galleries, one over another, that go round the Church, and are supported by 62 Pillars, which, 'tis supposed, were for the Women, when it was a Church. On the Out-side of the Church are 4 Steeples, very high and slender, on which are several Balconies, from whence the *Muezins* call to Prayers. It's big enough to hold 5000 People, which Number usually meet in it at their *Bairam* or Passover. In a little Street on the Back of this Church are 2 large thick Pillars, where, they say, Justice was wont to be administred, and by them an old Tower, where the G. Seignior's Beasts are kept, *viz.* Lions, Wolves, Foxes, Leopards, a spotted Lynx, the Skin of a Giraff, and other rare Creatures.

Besides this Mosque, there are 7 others, called Royal ones, of which the Chief is called *Solimania*, because it was built by Sultan *Soliman*, whose Coffin remains in it, adorned with Carpets, a Turban set with Heron-Tops and precious Stones, and Lamps burning. Several *Alcorans* are chain'd to it, that the People may read them, and pray for the Defunct's Soul, and some are hired to do it, for the G. Seigniors take care to leave a Fund for continual Prayers to be said for them after their Death. Near this there is another, where lies the Body of a Sultan, whom *Soliman* loved extreamly, as also of Sultana *Selim*, his 2d Son. This Mosque hath a most lovely Cloister, with Bagnio's and Fountains. The New Mosque, built by Sultan *Achmet*, is one of the fairest and most magnificent in *Constantinople*. The Entry into it is through a large Court. It is a great Mosque, hath a stately Dome, and is full of Lamps, and many Curiosities in Glass-Balls. The fairest of all the rest are the Mosque of Sultan *Mehemmet*, Sultan *Selim*, and that which is called *Chahzadeh Mesdgidi*, i. e. The King's Son's Mosque, being built by one of *Soliman's* Sons, and *Bajazet's*. All these Mosques have Hospitals and Schools, where a great many poor Scholars are maintain'd and educated. Most of the ancient Statues, Obelisks and Pillars, set up by *Constantine* and his Successors, are entirely ruined, yet the large *Hippodrome*, called by the *Turks*, *Atmeidan*, where they exercised their Horses in Racing, is still to be seen. It is a large Square, 550 Paces long, and 150 broad. In the midst of it is an Obelisk pretty entire, mark'd with Hierogliphick Letters, and at a little Distance from it a pretty high Pillar, made of large Stones, laid one upon another without Cement, and towards the End of it is a Pillar made of 3 Brazen Serpents twisted together, and the Heads make the Capital. It was said to be the *Talisman* or Spell, raised by *Leo Isauricus* the Emperor against Serpents, so that none would come near, till *Mahomet* II. when he took *Constantinople*, beat off the under Jaw of one of them with his *Zagaye*, and now they do more Hurt, because it is standing. The Occasion of erecting it is as fabulous as the Vertue, and so the Relation may be spared.

The *Grand Beziстan*, or *Exchange*, is a noble Building and a glorious Sight. 'Tis a great round Hall, built all of Free-Stone, and surrounded with a thick Wall, by which are Shops full of the richest Commodities. It hath several Gates, which are shut fast a Nights, and because no Body lies in it, it is guarded with several Watchmen, till it is opened again. Each Body of Merchants or Tradesmen have an Apartment by themselves, and no Man may sell the same Commodities in another Place. All Manner of Goods are here sold.

There is also another *Beziстan*, but neither so large nor so well stocked with Goods. There are also several *Bazaars*, or publick Markets, in one of which, called the *Aurec Bazaar*, or Womens Market, is a Pillar of an extraordinary Height, called, *The Historical Column*, because from the Top to the Bottom, which is 147 Foot, are represented in *Basse-Relieve*, several Expeditions, Battles, and other remarkable Events, during the Empire of *Arcadius*. 'Tis all of Marble, but much defaced, and the Houses stand so near to it, that one can't have room to find out the Figures of it. There are Stairs in it to ascend up to the Top, but the *Turks* will suffer no Man to go up them. In the Quarter of the *Janizaries*, near the Baths of *Ibrahim Bassha*, in the Court of a private Man's House, stands the Column of the Emperor *Marcian*. It is all of spotted Marble about 15 Foot high, and its Capital of the *Corinthian* Order. On the Top is a Square hollow Stone, adorned with 4 Eagles at each Corner. It is reasonable to think his Heart was put in this Stone, and his Body is buried under the Column. Ex. *le Brun*. The other is called, *The Burnt Pillar*, because it has been lately burnt by a Fire that happen'd near it, which has so shatter'd it, that they have been forced to keep it tight with Iron Bars. It is 8 Paces of *Porphyrian* Marble, so neatly join'd, that they seemed but one Stone, till the Fire damaged it, but now they are all seen.

The G. Seignior's *Seraglio's* are also remarkable Buildings. They are the Palaces where the *Ottoman* Princes ordinarily keep their Courts. The Word is taken from *Serrai*, which signifies a Noble House. There are 2 *Seraglio's* belonging to the G. Seignior, *viz.* The Old, and the New, which being much the more noble Building, tho' nothing so magnificent as the Palace of so great a Prince ought to be, is called, *The Grand Seraglio*. It is of a Triangular Form, 2 Sides whereof are encompassed by the *Thracian Bosphorus*, and the other divides it from the Town. It stands in the Place of the ancient *Byzantium*. It is 3 Miles in Compass, and is enclosed within a very strong Wall, upon which are divers Watch-Towers, on which the *Agliam-Oglams* watch Night and Day. It hath many Gates both to the Sea and Land-side, but the chiefest is toward the City, and that is used daily, but the rest are never opened, but upon some special Occasion, those to the Sea-ward, when the King or some chief Officer of the *Seraglio* open them for Pleasure, and those to the Land-ward, when the King orders some

Great

Great Man to be put to Death, or upon some other great Design. The chief Gate above mention'd is guarded Day and Night by the Companies of *Capoochees*, or Porters, under the Command of the *Capoochee-Bashaa's*, or Captains of the Porters. A Company of *Janizaries* watch without the Palace, who are to give Notice of any Accident without. And by the Sea-side the *Agliam Oglams* watch in Towers upon the Wall, and if any Shipping attempt any Mischief, they have Ordnance ready charged, and the Gunners lying close by them. In this *Seraglio* are many stately Rooms, suited to the Seasons of the Year, the greatest part whereof are built upon plain Ground, and some upon the Hills and Sea-side, which are called *Kiosks*, or Banqueting Houses. Among these is the Chamber where the Grand Seignior gives Audience to Ambassadors, Basha's, &c. This Room stands in a Court adorn'd with many very delicate Fountains, and is furnished with rich Carpets and Crimson-Velvet, embroidered with Pearls, and the Walls covered with fine white Stones, and by it is a small Room covered with Silver Plate, larch'd with Gold. To these Lodgings of the King belong fair Gardens, with all sorts of Flowers and Fruits, pleasant Walks and Marble Fountains. There are also Lodgings for the Women like a Nunnery, wherein the Queen, the other *Sultana's*, and all the King's Women-Slaves do dwell, in which are Bed-Chambers, Dining-Rooms, Bagnio's, and all other Buildings necessary for the Service of the Women. There are also divers Rooms for the principal and inferior Officers, all well furnished, among which are the *Hazineh*, or King's private Treasury and Wardrobe, both strong Buildings with Iron Doors, which are kept continually shut, and the former is seal'd with the King's Seal. In the *Seraglio* are also Rooms for Prayer, Baths, Schools, Butteries, Kitchins, Distilling Rooms, Places to swim in, run Horses, Wrestling and Shooting at Buts, and all other Conveniences for a Prince's Palace.

The chief Gate.

The several Rooms.

Gardens.

The first Court of the Seraglio

At the Entrance into the *Seraglio* is a very large and stately Gate, where there is a Guard always standing of 50 *Capigies*, which leads into a very spacious Court, of near a Quarter of a Mile square, but it is not paved. The *Basha's* and other Great Men may ride into it, and near the Gate is a Shelter for Men and Horses. On the Right side of it is an Hospital for all that fall sick in the *Seraglio*, and an Eunuch, called *Hasteler-Agasi*, looks after them. On the Left side is a Place where they keep their Timber and Carts, to be ready for the Service of the Palace, and over it an Hall, where are hang'd Weapons of Antiquity, as Cimitars, Javelins, Bows, Head pieces, Gantlets, &c. which are lent to the Soldiers, when the G. Seignior, or chief Visier makes any solemn Entry into *Constantinople*.

Having passed thro' this great Court, you come to another Gate, less than the former, but more neat and costly, in which there is also a stately Porch, and a Guard of *Capoochees*. This leads into another Court less than the former, but far more beautiful and pleasant, by reason of the delicate Fountains and Walks, Rows of Cypresses and Gras Plats rail'd in, where the Gazels, or Row-Deer feed, and bring forth Young. It is near 300 Paces square, and the Walks are paved. In this Court all must walk on Foot, except the G. Seignior. On both sides of this Gate is an open Gallery, where the *Chiaushes*, or Pursuivants, the *Janizaries*, or Foot-Guards, and *Spahi's*, or Horse-Guards, do stand in their Ranks, very well apparell'd, when any Ambassadors enter, or on other solemn Occasions. In this Court are 7 Kitchins, with their Offices and Larders, for the King, Queen, *Sultana's*, and other Officers of the Court. On the Left side is the King's little Stable for about 35 Horses for his Majesty's Use, and over it Rooms for their Furnitures, which is very rich, set with Jewels, to the Admiration of all Beholders. Next the Stable are Rooms for the Officers of the *Divan*, or Court of Justice, and by them the Chamber, where the *Divan* sits, and a little behind that is the Gate that leads to the Womens Lodgings. At the End of this Court is the King's Gate, which leads to the King's Lodgings, and may not be entred by any, but such Gentlemen as attend him, and others that serve him, without Leave from the King himself. This Gate is kept by the *Capee-Aga*, or chief Chamberlain, and a Company of white Eunuchs. The Court is paved with fine Marble, wrought with *Mosaick* Work, and adorn'd with curious Fountains, and a Lake where the G. Seignior has a Boat to swim in for his Recreation. In the Buildings, which are sumptuous, are a Chamber of Audience, a Row of Summer-Rooms standing on a little Hill, and looking toward the Sea, a large Hall standing on Pillars, and opening towards the East, and by it the King's Bed-Chamber, whose Walls are covered with Stones of the finest *China* Metal, and the Floors with very costly *Persian* Carpets of Silk and Gold. The Posts of the Bedsted are Silver, the Canopy, Bolsters, Mattresses and Pallets all of Cloth of Gold. Behind the Hall is a Place to shoot in, where are laid up many Bows and Arrows.

The second Court.

The third Court.

The *Divan* sits 4 Days in a Week, *viz. Saturday*, *Sunday*, *Monday* and *Tuesday*, upon which Days the *Visier-Azem*, or chief Visier, who is the supream Judge, and represents the G. Seignior, with all the rest of the Visiers, the 2 *Cadileschers*, or Judges of the Armies in *Greece* and *Natolia*; the 3 *Defterdars*, or Treasurers; the *Reiskitaub*, or Chancellor; the *Nesbaungee*, or Keeper of the Mark, with their Secretaries and Clerks; the *Chiaush-Basha* and his Officers are to be at the *Divan* by Break of Day: All Causes are determined by the *Visier-Azem*, if he pleases, for the *Basha's* do not speak, but only hearken and attend till he refers any thing to their Judgment, as he often doth for Expedition, reserving the Causes of the greatest Consequence, and Importance to himself, as doth also the *Caimekam*, or his Deputy in his Absence. The Petitioners speak for themselves, or desire the Help of a *Chiaush*, for they have no Pleaders, or Attorneys: When the chief Visier hath heard their Suits, he taketh Council with the *Basha's*, and then resolves and determines them, as he will himself. This he doth usually after Dinner, and then he repairs on *Sundays* and *Tuesdays* to the Chamber of Audience, to give an Account to the King of what Business he has dispatched. Sometimes the G. Seignior will come privately to a little Window, which is covered with a Lattice, and looks into the *Divan*, to hear the Causes, and this forceth the chief Visier to act circumspectly and justly in managing Affairs, while he sits in the *Divan*, tho' at other times his Hands are open to Bribery, and he will carry Business as he pleaseth, but all Things are dispatched without Delays.

The *Divan* and its Judges.

How Judgments are given.

When an Ambassador from any great Prince is to kiss the G. Seignior's Hand, the Grand Visier calls a great *Divan* of all the Grandees of the Port, and all the *Chiaushes*, *Mustafarraka's*, *Spahi's* and *Janizaries* are ordered by their Captains to apparel themselves in the best Manner they are able, and stand in their Places in the 2d Court. When the *Divan* is set in their Order, the chief Visier sends a *Chiaush-Basha* with many of his *Chiaushes* on Horse back, to conduct the Ambassador to the *Divan*, where he is placed Face to Face, close to the Visier, who having complimented him a while, entertains him at Dinner, and then conveys him to a Room by the King's Gate with his Attendants, till the King is ready to receive him. In the mean time the Ambassador's Present is carried about the 2d Court, in the Sight of all People, and then is brought to the King, and the Grand Visier sends the Ambassador several Vests appointed by *Canon* for himself and his Gentlemen, to put on for that Ceremony. The Vests for the Ambassador are of Cloth of Gold of *Bursia*, but for the rest, are of little or no Value, yet the Ambassador must make a Present to the G. Seignior of more than the Worth of them. Then is the Ambassador conducted by the Master of the Ceremonies to kiss the King's Hand (which is, indeed, but his Hanging-sleeve) which done, the *Druggaman*, or Interpreter, declares the Ambassador's Commission; to which the King makes no Answer (for he disdains to speak to a Christian) but speaking to the chief Visier, refers all Proceedings to his Discretion, and so the Ambassador departeth, bowing his Head to the King, but pulls not off his Hat at all. Other Ambassadors of Petty Princes, or States, tho' they have Vests given them also by the G. Seignior, yet come not to the *Divan*, but go privately with their Presents to the King. All Ambassadors are maintain'd by the G. Seignior, except those from the States of *Venice*, during their abode at the Port, but 'tis hard to get his Allowance thro' the Baseness of the Officers.

How Ambassadors are received

Vests given them.

All Persons that live in the *Seraglio*, are the G. Seignior's Slaves, as are all that are subject to his Empire; for they all acknowledge, that whatever that they enjoy proceeds from his Good will, and that their Estates and Lives are absolutely at his Disposal.

The Inhabitants of the *Seraglio*.

1. Women.

There are in the King's Court about 1200 Women old and young. The King's Concubines, who are kept up for their Beauties, are all young Virgins, ſtollen from Foreign Nations, who being inſtructed in good Behaviour, Dancing, Muſick, Singing and curious Sowing, are given to the G. Seignior as Preſents of great Value by the *Tartars*, *Baſha's*, and other Great Men, and ſo their Number is uncertain. Theſe Virgins immediately upon their coming into the *Seraglio*, are made *Turks* by uſing this Ceremony: They are to hold up their Finger and ſay theſe Words, *Law illa-wheh illaw Allawh, Mahammed reſoul Allawh*, i. e. *There is no God but God alone, and* Mahomet *is the Meſſenger of God*; and then being examined by an old Woman, called *Kabiyah Cadun*, i. e. The Mother of the Maids, they are placed in a Room with their Equals in Age and Diſpoſition. All the Women live like Nuns, but have large Rooms to dwell in. Their Beds are coarſe and hard, made of Flocks, and by every 10 Virgin lies an old Woman, and there are Lamps always burning by them. By their Rooms they have Baths and Fountains for their Uſe, and above their Bed-Chambers Places to ſit and ſew in. They feed in Companies, and are waited upon by other Women, wanting nothing that is neceſſary for them. There are alſo Schools for ſuch as will learn to read or ſpeak the *Turkiſh* Tongue, ſew, or play, and ſome Hours are allow'd them for Walking and Recreations. The King never ſees theſe Virgins, unleſs when they are firſt preſented to him, or when he deſires to have one of them for his Bedfellow, and divert himſelf with Muſick, or ſome other Paſtime. When the King deſires a freſh Mate, he gives Notice to the *Kabiyah Cadun*, who, like an old Baud, picks out the faireſt and moſt pleaſing, and having placed them in 2 Rows in a Room, brings in the King, who walking 4 or 5 times in the midſt of them, views them all well, and as he goes out, throws his Handkerchief into the Virgin's Hand, which he chuſeth to lie with. This Choice is accounted a great Favour, and the *Cadun* uſes all the Art ſhe can to prepare her for it, by attiring, painting and perfuming her, and at Night ſhe is brought to ſleep with the G. Seignior in certain Chambers ſet apart for that Buſineſs in the Womens Lodgings. By the Bed they have great Wax-Tapers burning all Night, and *Mooriſh* Women ſitting by them. In the Morning when the King riſeth, he changeth all his Apparel, and leaves them to her he lay with and the Money in the Pockets, and then departs to his own Lodgings, from whence he ſends her immediately a Preſent of Jewels, Money and Veſts of greater or leſs Value, according to the Satisfaction he received from her that Night. If any of them conceive by him, and bring him forth his firſt begotten Child, ſhe is called, *Sultana* Queen, and if it be a Son, ſhe is confirm'd and eſtabliſh'd Queen by great Feaſts and Solemnities, and forthwith hath an Apartment, Servants, and a large Revenue appointed her, and all Perſons in the *Seraglio* muſt pay her the Reſpect of a Queen. The other Women that bear him Children are called *Sultana's*, but not Queens, yet live in Rooms apart, are well ſerved and attended, and have no Want either of Money or Apparel, according to their Degree. But if it happens that the firſt begotten Son of the Queen, Heir to the Empire, dies, and another of the *Sultana's* have a Son to ſucceed the deceaſed Heir, the former is deprived of her Revenue and Royalty, and remains a *Sultana*, and the latter is made Queen, and ſo the Title runs from one *Sultana* to another by Virtue of the Son's Succeſſion.

How made *Mahometans*.

Their Beds.

How the King uſeth them.

His Preſent to them.

How any is made Queen.

The G. Seignior not married.

In Times paſt the G. Seignior was married to the Queen, but now ſhe paſſeth without celebrating any Nuptial Rites; yet the Mother of the Heir enjoys all the Prerogatives of a Queen, and has a Guard of 30 or 40 black Eunuchs, under the Command of the *Kuzlar-Aga*, their Maſter, to be employ'd on her Occaſions. Theſe *Sultana's* never go out of the *Seraglio*, but in the King's Company, and are never ſeen by any but ſuch as attend them, which are black Eunuchs, which have all cut off clear to the Belly, that there may be no Danger from them.

The King's Daughters, Siſters and Aunts have their Lodgings alſo in the ſame *Seraglio*, and being Royally ſerv'd, and ſumptuouſly apparell'd, live by themſelves in continual Pleaſures, until ſuch time as, at their Requeſt, the King ſhall be pleaſed to give them in Marriage, and then they come forth, and carry each of them a Cheſt along with them, which the G. Seignior gives them full of rich Apparel, Jewels and Money, to the Value of 30000 *l.* Sterling, beſides what they have hid for themſelves before, which amounts ſometimes to a great deal, and if the G. Seignior be diſpoſed to deal Royally with them, they are ſuffer'd to carry with them 20 Women-Slaves, and as many Eunuchs, and he continues their Allowance of 1000 or 1500 Aſpers a Day, which they had in the *Seraglio*, to them, and furniſhes their Houſes; and if her Husband have not an Houſe fit for her, the King will give her one of his own. Now for the Husband's Part, he is to make her a Bill of Dowry of at leaſt 100000 Checquins of Money, beſides, Veſts, Jewels, Brooches, and other Ornaments, which amount to a great Sum. Being thus married, they do not at all converſe with Men more than they did before, except their own Husbands, but only with Women, viſiting their old Acquaintance in the *Seraglio*, yet not without the G. Seignior's Leave. The *Sultana's* thus married are for the moſt part their Husbands Maſters, inſulting over them, and commanding them as they pleaſe, wearing an *Hanjar*, or Dagger, in token of their Power over them, and ſometime they will put them away and take others, and ſuch a Divorce commonly proves the Death of the Husband, whom the King leaves to their Will.

The other Women either grow old in the *Seraglio*, and ſo are made Miſtreſſes of the young ones, or are ſent forth into the old *Seraglio*, which they count their beſt Fortune, becauſe from thence they may be married, with the Conſent of the Miſtreſs, and carry away the Riches they have gotten, which is very conſiderable, partly by their ſaving out of the King's Allowance, and by the Preſents made them by the King upon their *Byram*, and by the *Baſha's* Wives. Hither alſo, after the King's Death, are all the *Sultana's* ſent, except the *Sultana* Queen, and if they are wealthy, they marry to Men of reaſonable Quality, yet with the good Will of the Miſtreſs, and Conſent of the G. Seignior. The Women of the *Seraglio* are puniſhed for their Faults very ſeverely, and extreamly beaten by their Overſeers, and if they prove diſobedient and incorrigible, they are by the King's Order ſent into the old *Seraglio*, and the beſt part of what they have, taken from them; but if they are found guilty of Witchcraft, Whoredom, or any ſuch notorious Crime, they are bound Hand and Foot, and being put into a Sack, are in the Night caſt into the Sea. The *Seraglio* may be rightly termed the Seminary or Nurſery of the beſt Subjects, for in it all have their Education, who afterwards become the principal Officers and ſubordinate Rulers of the State and Affairs of the Empire, and theſe are they which are called the *Agliam-Oglans*, i. e. Unexpert and untutored Youths. There are ordinarily about 6 or 700 of them, from 12 to 25 or 30 Years of Age at moſt, being all of them Chriſtians Children, gather'd up every 3 Years in the *Morea* and throughout all the Parts of *Albania*. They are taken from ſuch Families as are ſuppoſed to be the beſt Spirit and moſt warlike Diſpoſition, and as ſoon as they are brought into the *Seraglio*, they are circumciſed and made *Turks*. They are at firſt put to very baſe and ſlaviſh Employments, as to ſerve in the Stables, Kitchins and Gardens, for Digging and Cleaving Wood, and are made to row in *Caicks*, or Barges, and to lead the Greyhounds a-courſing, or whatever elſe they are commanded to do by the *Oda-Baſha's*, or Captains. They are allow'd from 2 to 5 Aſpers a Day, but afterward ſuch as have a Deſire to learn, are taught to read and write, and generally all of them are taught to wreſtle, leap, run, throw the Iron-Weight, ſhoot the Bow, diſcharge a Piece, and all other Exerciſes beſitting a *Turkiſh* Soldier. The G. Seignior makes uſe of them when he intends a Journey to any Place for pitching his Tents, removing or carrying his Cheſts and Baskets, and ſuch like Services, for which Employments the King never takes with him leſs than 300 of them. The *Baſtangee-Baſha* always takes with him good ſtore of them, when by his Majeſty's Order he is to put ſome Great Man to Death, which is commonly done by the Hands of 4 or 5 of theſe *Agliam-Oglans*. They are capable of being made Stewards to the *Baſtangee-Baſha*, and may riſe to that great Office it ſelf, which is an eminent Place, for he hath the Keeping of all the G. Seignior's Gardens, Houſes and Steers, the King's *Kaike*, and wears a Turbant in the *Seraglio*, and if he be in the King's Favour, he is preferr'd to higher Dignities, *viz.* to be *Captain-Baſha*, *Baſha* of *Cairo*, *Damaſcus*, *Aleppo*, &c. and ſometimes he comes to be *Viſier-Azem*.

The Marriage of the King's Siſters, &c.

The Uſe of the old *Seraglio*.

Their Puniſhment.

There

The *Itchoglans*, their Education.

There are other Youths educated in the *Seraglio*, called *Itchoglans*, but in far better Fashion than the former. They are brought up in Learning, in the Knowledge of the Law and Military Exercises for the King's and Country's Service, and to perform those Things, which belong to the Government of the whole Empire. By the ancient Institution they should be always made of Christian Runagado's and Captives of the most civil and noblest that can be found; but the *Capee-Aga*, or chief Chamberlain, brings in some natural born *Turks* of the best Aspects, and who promise a great deal of Worth, with the King's Consent. The Number of them is uncertain, but 'tis said, they are commonly about 100. As soon as they come into the *Seraglio* they are exceedingly well tutor'd, and daily taught, as well good Fashion as comely Behaviour, and the Rites and Ceremonies of the *Mahometan* Law, and whatsoever may tend to the enriching of their Minds, and for this Purpose there are 4 *Oda's*, or Schools, being so many Degrees, the one higher than the other. In the first, called the *Chaukou-Oda*, they all come but Children, and there learn Silence, the Postures of holding down their Heads and looking downwards, with their Hands before them join'd a-cross, which all betoken singular Reverence, and are used by such as are before the King: Then they learn to write and read, read and practise the *Turkish* Tongue, and are taught their Prayers by Heart in the *Arabian* Tongue, and that they may learn these Things well, they are look'd to to Admiration. In this School they stay about 5 or 6 Years, and such as are dull stay much longer. In the 2d School, called *Quilar-Oda*, they are taught by more learned and sufficient Tutors the *Persian*, *Arabian* and *Tartarian* Tongues, and to that End take great Pains in reading divers Authors in those Languages. Here they begin to wrestle, shoot the Bow, throw the Iron-Mace, toss the Pike, run and handle their Weapons, &c. and in these Exercises in several Orders and Places they spend certain Hours daily, and are severely punished if they are found negligent in the leastwise. In this *Oda* they also spend 4 or 5 Years, and being become strong Men fit for any thing, they are removed to the 3d, where forgetting nothing they have already learned, they are taught further to ride, and how to behave themselves in the Wars. Moreover, every one of them learns a Trade necessary for the Service of the King's Person, as to Shave, make a Turbant, fold up Apparel handsomly, pair Nails, attend at the Bath, keep Hawks, to be Sewers, Querries of the Stables, Target-Bearers, wait at Table, &c. While they are in these 3 Schools they are but meanly apparell'd, having yearly 2 Cloth-Vests, somewhat fine, but their Linen is coarse. In this *Oda* their Punishments are severe, for their Masters will give them 100 Blows upon the Soles of their Feet or Buttocks, insomuch, that they are oftentimes left for dead. In this School none is suffered to be familiar with any but themselves, so that none may speak with them, but by Leave from the *Capee-Aga*, and that in the Presence of an Eunuch. When they go also to the Bath, or any other Business, they have Eunuchs attending them, to keep them from any Lewdness, and for the same Reason they have Eunuchs lying by them always in their Bed-Chambers. Here also, before they are raised to the 4th *Oda*, the Eunuchs use all Arts to try whether they are firm to *Turcism*, and have no Inclination to Christianity, and being thus proved, they are preferr'd to the 4th *Oda*, called, *Haz-Oda*, or, *The Prince's Chamber*. Now all Punishments cease, and they may freely converse with all the Great Men of the *Seraglio*, and being cleanly and neat in their Apparel, the G. Seignior takes them along with him when he goes abroad upon Pleasure, if none of his Women be with him. Out of the young Men thus perfected and compleated the King chuseth his *Aga's* and *Basha's*, viz. the *Selibter-Aga*, the King's Sword-Bearer; the *Chiahadar-Aga*, he which carries his Yagmoorlick; *Rechiubter-Aga*, Yeoman of the Stirrup; *Mataragee-Aga*, he which brings him Water to wash his Hands and Face; *Talbenter-Aga*, he that brings his Turbant; *Kembasir-Aga*, he that looketh to his Apparel and the Washing of his Linen; the *Chestangir-Basha*, the chief Sewer; the *Doganjee-Basha*, the chief Falconer; the *Zagargee-Basha*, the chief Huntsman; the *Turnackgee-Basha*, he that pairs the King's Nails; the *Hamaumgee-Bashi*, the chief Accomptant; and the *Teskeregee-Basha*, his Majesty's Secretary. All these are created out of the Eldest of the *Itchoglans* of the 4 *Oda*. They are always in the King's Presence, holding their Heads down, and Hands a-cross, never speaking; but whatever the King commands, are wonderful ready to obey. They wait at the King's Table, and he is well pleased with their Service and Company. He will ride with them and play at the *Jeerit*, and other Sports when he is well disposed. He often gives them Presents of Vests, Swords and Bows, and sometimes ready Money; yea, he entrusts them with the Dispatch of Embassies, and tho' they must not go themselves, yet finding out what Presents the Prince, to whom the Embassie is to be sent, uses to give to Ambassadors, they sell it to a *Chiaush*. And this he doth to enrich them, against the time he shall send them out of the *Seraglio*, to be Generals at Sea, or *Basha's* of some great City, as *Babylon*, *Aleppo*, &c. or *Beglerbegs* of *Graecia*, *Natolia*, &c. When any is thus sent out, the Next in standing succeeds, unless his ill Behaviour has made him uncapable, and so all live in Hopes of Greatness and Riches. Before their Departure they stay a-while till their Beards are grown (for they are always shaved in the *Seraglio*) and then they receive their Presents of the *Sultana's* and *Basha's*, and when their Beards are grown, they pay their Visits to all the Great Men of the Court.

The King's familiarity with them.

Their Schools in 4 Degrees.

1. *Oda*, or School, and what is taught in it.

2. *Oda*, and what is taught in it.

3. *Oda*, and what is taught there.

In the *Seraglio* there are also other Ministers for necessary Services, as also Buffoons, Tumblers, Musicians, Wrestlers and Mutes. These last are in great Request, because the G. Seignior thinks it below his Greatness to speak to any about him familiarly, and therefore he makes himself merry with these Mutes, who, tho' being deaf and dumb, will reason and discourse of any thing by Nods and Signs, as others By-words, nay, many of them can write very sensibly and well, which is admirable.

Other Officers of the *Seraglio*.

There are also White Eunuchs, who attend the King and his Gate. The chief of them is the *Capee-Aga*, or Chamberlain, who is in greatest Authority with the G. Seignior; for he alone is allow'd to speak to him, and present all Petitions, Messages and Writings, and accompanies the King wherever he goes. His Salary is 8 *Sultana's* a Day, *i.e.* 3 *l.* Sterling, besides Presents from all that have any Business with the King. 2. The *Hazinehdar-Basha*, or the Inward Treasurer, who keeps an Account of all the Treasure brought into this Inward Treasury, which is only the Wealth of ancient Kings, and the Revenue of *Egypt*, and the adjacent Provinces, and takes it out upon occasion: He hath the Custody of all the King's Jewels, which he wears, or are presented him, and keeps a Registry of them, when received and when given away. He succeeds the *Capee-Aga*, when he dies. 3. The *Keelergee-Basha*, i.e. Master of the Wardrobe, into which are brought all the Presents of Cloth of Gold, Plate, Silks, Woollen Cloths, Furs of all sorts, Swords, Brooches, Raw-Silk, Carpets, and whatever else serves for his Majesty's Use, of which he keeps particular Inventories, as well as to what is received as given: This Eunuch has many Servants under him, and his Salary is 1000 Aspres a Day, *viz.* 50 *s.* Sterling: He is much in Favour with the King, and is to succeed to *Hazinehdar-Basha*. 4. The *Serai Agasee*, i.e. The Keeper of the *Seraglio*. He sees that all Things be prepared for the Service of the Palace, and that the Rooms be kept well, and that all the Officers do their Duty: He is allowed to ride up and down the *Seraglio*, in the Courts, Gardens, and by the Sea-side, as the 3 former are: His Pension is 800 Aspres, or 40 *s.* a Day, besides Vests and Furs, he succeeds the *Keelergee-Basha*. The 3 last may not speak to the King, unless it be in answer to any thing he asks them. The Number of these Eunuchs is about 200, and they are all not only gelt, but have their Yards cut off when they are very young, and that with their own Consent, which is obtain'd by assuring them what Great Men they will be, for otherwise they would be in Danger of Death (as the Workmen in that Business affirm.) They are brought up with the *Itchoglans*, and are taken from the 4th *Oda* to serve the G. Seignior, who employs them in the Government of his other *Seraglio's*, and his Seminaries of Youth at *Constantinople*, *Adrianople*, and other Places, makes them *Basha's* of *Cairo*, *Aleppo*, and other Cities, and sometimes Visiers of the Bench. They are also trusted by the *Capee-Aga* to keep the King's Curiosities and valuable Rarities, as great Pieces of Ambergreese, Musk, Balsom, Cups of Agat, &c. for tho' they are not of great Courage, yet they are counted of great Judgment and Fidelity. The Black Eunuchs and Black

White Eunuchs.

Inward Treasurer.

The Keeper of the *Seraglio*.

The Black Eunuchs.

Black *Moor* Wenches ſerve the *Sultana's* and the reſt of the Queen's Women. Theſe Eunuchs, while they are Boys, are taught as the White ones are, and after are ſet to ſerve and wait at the *Sultana's* Gate, under the Command of the *Kuſtar-Aga*. They are allow'd a Penſion of 50 or 60 Aſpers a Day, and 2 Veſts, with Linen and other Neceſſaries, yearly, beſides Preſents given them by ſuch Women as come to the King's Women. They are never ſent abroad in any Employment, but ſerve for ever in the *Seraglio*. They are called by the Names of Flowers, as Roſe, Narciſſus, *&c.* Their Buſineſs is to carry Meſſages and Notes from the *Sultana's* to the *Capee-Aga*, to be delivered to the King, and attend upon the Women in Sickneſs and Health.

Their Names and Office.

The King's Sons by the Queen are brought up by themſelves, by choice Nurſes, which are found out of the *Seraglio*, and if he has Sons by other *Sultana's*, they are brought up alſo by themſelves, but may play with them till they are 6 or 7 Years old. They live with the Women 9 or 10 Years, and about 14 are circumciſed with great Pomp, as Weddings are kept among Chriſtians. The Sons from 5 to 10 Years of Age are taught to write and read by an *Hojah*, or School maſter, who for that End is admitted into the Womens Apartment for certain Hours, but ſees them not, unleſs 2 or 3 old ugly black *Mooriſh* Women; but Daughters are little regarded. When the *Shawzawdeh*, or King's Son, who is Heir to the Crown, is circumciſed, he is ſometimes ſent abroad with a ſuitable Equipage, and under the Care of his principal and truſty Eunuchs, to be Governour of *Magneſia*, and the Provinces about it, but as Deputy to his Father. The Eunuch is bound to give continual Adviſe to the G. Seignior of his Son's Deportment, ſo that if he tranſgreſſeth the Limits of his Commiſſion in the leaſt, he quickly falls into Diſgrace, and into a Suſpicion of Rebellion.

Circumciſion, how celebrated.

The Victuals in the *Seraglio* is dreſt by ſuch of the *Agliam-Oglans* as are brought up to Cookery, called *Aſkees*, or Cooks. They wear white Caps for Diſtinction, and are about 200 from the higheſt to the meaneſt Officers of the Kitchin. They begin their Buſineſs early in the Morning, for the G. Seignior riſing betimes, they muſt have always ſomething ready for his Breakfaſt. He dines at 10 a Clock in the Forenoon, and ſups about 6 in the Evening, both in Summer and Winter. He ſits down with his Legs a-croſs, according to the *Turkiſh* Faſhion, and has a rich Napkin laid before him. He carves for himſelf, but uſeth neither Knife nor Fork, for his Meat is ſo tender and delicately dreſt, that he eaſily pulls it in Pieces with his Fingers. He hath 2 Wooden Spoons, the one to eat his Pottage with, and the other to ſup the Syrups with, which he uſeth to quench his Thirſt. He uſeth no Salt nor Antipaſt. He taſteth of all the Diſhes one by one, and cloſeth up his Stomach with a *Beciat*, or Tart, and when he has dined or ſupp'd waſheth his Hands in a Golden Baſon, ſet with precious Stones. His uſual Diet is Pigeons, Geeſe, Lamb, Hens, Chickens, Mutton; and ſometimes wild Fowl, and uſually as much boil'd as roaſted of all of them, with Broths, Preſerves and Syrups in Porcelane Diſhes, and ſome Tarts and Pyes. When he has done eating, he concludes with a Draught of Sherbet, and ſeldom drinks more than once at a Meal. He ſeldom or never ſpeaks at Table, but to favour ſome *Aga*, to whom he ſpeaks a Word or two, and throws him a Loaf as a Mark of it. The King's Diſhes are all Gold or yellow Porcelane, ſcarce to be had for Money, in which he eats chiefly in their *Ramazan*, or *Lent*, which laſteth a whole Moon, and only by Night, as all the *Turks* do; but they make no Difference of Meats, excepting Swines Fleſh and Things ſtrangled, which are forbidden by their Law at all Times. The King ſeldom eats Fiſh, unleſs when he is by the Sea-ſide with his Women, where he ſees it taken. The Meat which is left at the G. Seignior's Table, is carried to the *Aga's* that wait; and after Dinner the King diverts himſelf with the Mutes and Buffoons. The *Capee-Aga* hath a Table by himſelf, dreſt in his own Kitchin, and with him the *Haznebdar-Baſha*, *Sarii Agaſee*, the King's Phyſicians do eat, and what he leaves ſerves all the White Eunuchs. The Youths in the *Oda's* have 2 Loaves a-piece and boil'd Mutton, with Pottage made of Rice, Butter and Honey allow'd them daily.

The Victuals how provided.

The Queen and *Sultana's* are at the ſame time ſerved by the Black Eunuchs, but in Copper-Diſhes, unleſs the King be with them. They drink their Sherbet with Snow, which coſts dear to bring it from the Hills, and keep it under Ground. They eat no Cheeſe, but *Parmeſan*, ſent by the *Bailo*, or Reſidentiary of *Venice*. All theſe Things are done in ſuch Order, that all is finiſhed in leſs than 2 Hours time. The G. Seignior's, *Sultana's* and *Baſha's* Bread is made of Wheat, brought from *Burſia*, and ground there, and is very white and ſavoury; the reſt of the Bread for the *Seraglio* is made of Corn brought out of *Velo* in *Græcia*. There is vaſt Quantities of Bread ſpent in the *Seraglio*, becauſe every one has a large Allowance made by the chief Viſier. The Rice, Lentiles, and other Pulſe, is brought twice a Year out of *Ægypt* in Galleons. There is a vaſt Quantity of Sugar ſpent in Sherbets and Boclava's, but they eat little Spice, but Pepper. This is brought out of *Ægypt*, with a great Quantity of Conſerves, Dates, Prunes, pickled Meats and dry'd Plumbs, tho' 400 *Halvagi's* are continually at Work to preſerve others. The Honey uſed at the King's Table comes from *Cio*, but the reſt comes from *Walachia*, *Tranſilvania* and *Moldavia* in great Earthen Jars. The Oil is brought from *Modon* and *Coron*, in *Greece*, and is much uſed in Meats and Lamps; but the King eats only what comes from *Candy* and *Zante*, which is the deareſt and beſt. Their Butter comes by Shipping out of the *Black Sea* from *Bogdiana* and *Caffa* in Ox and Buffalo's Hides. They eat very little or no freſh Butter, nor eat much Milk, unleſs it be *Yoghurd*, i. e. Sower, or clouted Cream. In the *Seraglio* are ſpent in dry'd Beef of Cows of *Boſturnia*, killed when they are great with Calf, becauſe they ſay their Fleſh is more tender and ſavory, 400 yearly; and the daily Proviſion is 200 Sheep, 100 Lambs and Kids in their Seaſon, 10 Calves, 50 Geeſe, 100 Hens, 100 Chickens and 200 Pigeons. In the *Seraglio* there is little Fiſh eaten, tho' the Sea yields plenty, and therefore the Chriſtians buy it cheap. The *Seraglio* is plentifully ſerved with Fruit from the King's Gardens, and Preſents ſent to the King from all Parts; ſo that they ſell a great deal, and the Money is given to the King for Pocket-Money.

Fruit.

The Furniture of the King's Kitchins are of Braſs, but ſo well kept and ſo large, that they are as brave a Sight as can be ſeen. The G. Seignior's Cloaths differ little in Faſhion from other Mens; only in Length and Richneſs. His Turbant is like the *Baſha's*, only he wears Plumes and Brooches, which they do not. He ſleeps upon Mattreſſes of Velvet and Cloth of Gold covered in Summer with Sheets embroider'd with Silk, and in Winter with Luſerns, or Sables. When he lies alone in his own Lodgings, he is watched by the Pages of his Chamber, 2 at a Time, and 2 old Women wait on him with burning Torches to light him, if he pleaſes to ſay over his Beads, which they pray by at the Hours of Prayer in the Night, *viz.* at Midnight, and 2 Hours before Day. The Women's Habit is much like the Men's, for they wear *Chaelſhirs*, or Breeches, and Buskins, and ſleep in them; but they have thin ones for the Summer and thick for the Winter.

The G. Seignior's Cloaths.

The ſeveral Stipends of the Officers of the *Seraglio* are paid by the *Defterdar*, out of the outward Treaſury, who ſends them their Veſts againſt the *Cernival*, and if he fails at the Times appointed, upon any Complaint he will be utterly ruined, or at leaſt diſplaced. If any of the *Itcheglans* or *Agliam-Oglans* die, his Chamber fellows are his Heirs, and ſo it is with the young Women, that never lay with the the King; but if an Eunuch, who are generally very rich, dies, all comes to the G. Seignior himſelf, except he be out of the *Seraglio*, for then the King has only 2 Thirds, and the reſt he may diſpoſe of by Will, if the King will conſent to it; but to ſecure his Parts, there is an Officer, called the *Beytel-Mawlgee*, who, as ſoon as any one dies, enquires after their Eſtates, and certifies the *Defterdar* of it, that he may ſeize it for the King; yet the *Beytel Mawlgee*, for his own private Gain, doth often conceal a great part of the Eſtate of the Deceaſed to divide it privately beween the Kindred and himſelf. If any falls ſick in the *Seraglio*, they are immediately carried in a Cart, covered with Cloth, and drawn with Hands from their Chamber to the *Lazaretta*, or Hoſpital belonging to the Palace, where they are kept ſo cloſe, that none can ſpeak with them without great Difficulty, but the Phyſician and Apothecary, and being recovered, they are carried back in the ſame Manner to their Chambers.

The Women.

The Inhabitants of the *Seraglio*.

The G. Seignior is at vaſt Expences in Gifts to the *Sultana* Queen, chief Viſiers, *Serdars*, or Generals, and Captains

Swines Fleſh and Things ſtrangled not eaten.

The Queen and *Sultana's*, how ſerved.

The G. Seignior's Way of Eating.

tains of his Forces by Sea and Land, *Defterdars* and others, in Veſts, Bows, Swords, Plumes, &c. and he allows the Queen and *Viſier-Azem* in the Wars to be very generous, according to their Grandure. He may go out of the *Seraglio* when he pleaſeth, either by Water or Land. When he goes abroad by Water he is carried in his *Kaik*, or Barge, cover'd with Crimſon-Velvet, richly embroider'd, under which he ſits, his *Aga's* ſtanding all about him, and is row'd by the *Agliam-Oglans*, the *Baſtangee-Baſha* ſteering. When he goes forth by Land, he always rides on Horſe-back, and commonly goes out at the great Gate of the Palace. When he goes to the Moſque on *Fridays*, he is accompanied thro' the City by all the *Baſha's* and Grandees of the Port, beſides a large Retinue of Servants, who go by his Stirrup. The People in his Way follow him with repeated Acclamations of Happineſs, which he returns by a Nod, and ſuch as are wronged preſent to him their *Arzes*, or Petitions, which orders to be received, and being read at his Return, he gives Command for the Redreſs, to make good the Title he gives himſelf, that he is *Awlem Penawh*, i. e. *The Refuge of the World*. The G. Seignior at *Conſtantinople*, by the Sea-ſide, hath a large Stable of 1000 Horſes, for the Uſe of his Houſhold, of which the *Imrahor-Baſha*, or Maſter of the Horſe, hath Charge, and leſſer Stables at his Houſes of Pleaſure in the Country, of 10 Horſes each. He hath alſo Stables in *Burſia*, *Adrianople*, and divers other Places for Stallions, which furniſh him with very ſtately Colts, beſides ſuch as are daily ſent him from *Cairo*, *Damaſcus*, *Bagdat*, and other Places, by the *Baſha's*. For his meaner Servants he hath Horſes from *Walachia*, and for his Baggage 5000 Mules to carry Pavillions, Cheſts, Water, and other Neceſſaries for Travel, of which alſo the *Viſier-Azem* makes uſe when he goes General in any Expedition.

Upon the firſt Day of their *Biram*, or *Carnival*, the King ſhews himſelf publickly, to let all the great Men and better ſort of his Servants kiſs his Veſt, and then he is richly clad with all his beſt Jewels, and ſits down on a *Perſian* Carpet, where his *Taht*, or Throne is ſet, the chief *Viſier* telling him the Names of the Persons, that he may take Notice of them, and chiefly he reſpects the *Mufti*, *Cadeleſchers*, and other Doctors of the Law of the higheſt Degree. The Ceremony being ended, he goeth to the Moſque of *Santa Sophia*, the Company attending him, and hears the *Mamaz*, or Divine Service, and a Sermon, which being ended, tho' he retires to his own Lodgings, and dines alone, as upon other Days, yet he orders a ſumptuous Banquet in the *Divan* for the *Baſha's* and Grandees, and a great Dinner in the Court-yard for the reſt of the Company, and after Dinner ſends them a *Biram-Lick*, i. e. a New-Year's-Gift, to all according to their Qualities. During the 3 Days of the *Biram* he cauſes Shews of Fire-Works to be made all Night, and a Drum to be beaten all the while, the King with his *Sultana's*, as well out as in the *Seraglio*, diverting themſelves with them, with other Sports and Tricks, which the King tolerates all the time. But as the G. Seignior gives, ſo alſo he receives Preſents at the ſame time from the *Baſha's* and Great Perſons, who ſtrive to exceed one another in the Value of their Gifts, that they may gain Favour. The *Biram* is celebrated alſo in all the G. Seignior's Dominions at the ſame time, as well as at *Conſtantinople*, the Streets being ſet out with pretty *Deviſes* and *Salunjacks*, or Swings very artificially made to ſolace both Old and Young: But in this Fit of *Turkiſh* Mirth 'tis dangerous for *Jews* or *Chriſtians* to ſtir out, for the *Turks*, putting off all their wonted Sobriety, are very inſolent, and will do them a Miſchief, if they will not give them what Money they demand.

Beſides the *Seraglio* we have been all along deſcribing, there is another in *Conſtantinople*, commonly termed, *The Old Seraglio*, ſo called becauſe it was the firſt built by *Mahomet* II. when he took *Conſtantinople*, to be his own Palace. It is a large Place about 3 Quarters of a Mile in Compaſs, and ſeated in the nobleſt Part of the City. It is environ'd with an high Wall, and the Buildings are fair. It hath but one Gate belonging to it, and that is of Iron, which is kept by a Guard of White Eunuchs. The Inhabitants of it are all Women and Eunuchs. The Women are only ſuch as have been put out of the King's *Seraglio*, *viz.* the *Sultana's* of the deceaſed G. Seigniors, ſuch as are fallen into Diſgrace with the King for their ill Conditions, or rude Behaviour, or ſuch as are infirm, and defective in ſomething that ſhould fit them for the King's Bed. They are governed by an old Woman, called *Kahiya-Cadum*, i. e. *The Woman-Overſeer*, who is to take care that they have all Things neceſſary for them, according to the Cuſtom of the Houſe. The *Sultana's* have Lodgings apart, and are reaſonably well ſerv'd, tho' far ſhort of what they had in the King's *Seraglio*. If they are rich when ſent thither, they make it known, and that procures them a good Husband and Joynture. The King will ſometimes go thither to viſit his Grandmother, Siſter, or other Relations, or when he is melancholy.

The Gover-nour of it.

There are other *Seraglio's* in *Conſtantinople*, which belong to private Perſons, but built with an ugly Appearance for fear of giving Jealouſie to the G. Seignior, tho' within the Walls, which are high, there are lovely Apartments, adorned with Gold and Azure, and the Floors cover'd with fine Carpets, the Walls faced with fine Tyles like *China*. In the Halls and Chambers they have a Riſing about a Foot higher than the Floor, which they call a *Divan*, covered with richer Carpets than the reſt of the Room, and embroidered Cuſhions ſet againſt the Wall. Here they reſt, receive Viſits, and ſpend moſt of the Day.

The *Seraglio's* of private Perſons.

There are alſo many great Buildings in the City, like the Monaſteries of the Monks, which they call *Hans*, with Galleries and Chambers, where Merchants have Lodgings and Ware-Houſes at eaſie Rates, *viz.* one or two Aſpers a Day. They bring in a great Revenue to the Owners. They are built of Free-Stone round a Court, which has generally a Fountain in it. The Walls are ſtrong, and wondrous well barr'd to ſecure the Goods. The faireſt of them in *Conſtantinople* is the *La Valide*, built by the G. Seignior's Mother. The Houſes of *Conſtantinople* are all of Wood, very ordinarily built, and very ſubject to Fires from their taking much Tobacco. The Streets are crooked and narrow, up and down Hill. The *Caravanſera's* are built as the *Hans*, but are uſed only to lodge poor Travellers and the Servants of the Caravan, who have Rooms there for little or nothing.

The *Hans*.

Galata is the Suburbs of *Conſtantinople*, parted by the Port only, over which there are *Caiks*, or ſmall Boats, and *Hermes*, or Wherries, to carry you at all times for a ſmall Matter. You may go by Land, but it is a little about, and you paſs by the *Acmeidan*, or Field where the *Turks* exerciſe their Archery, and go in Proceſſion to make Prayers to God for the Succeſs of their Arms, and whatever they want. Then you go to *Caſſumpaſha*, a great Village, where is the Arſenal for building Galleys, Maones and Ships: It has 120 Docks, and a Magazine of Arms for 60000 Men, but it is inacceſſible to Chriſtians. In it are, beſides the *Capoudan-Baſha's*, or Admiral's Lodgings, a ſpacious *Bagnio* for the G. Seignior's Slaves, who are many Thouſands, and live very miſerably. This Town is parted from *Galata* only by the Burying-Places.

Galata.

Galata deſcribed.

Galata is a pretty large Place, the Houſes are good and well built. Many *Greeks* live there, and the *Franks*, who cohabit with them, have 5 Monaſteries and as many Churches. It has a large Tower in it, and by the Sea-ſide the fineſt Fiſh-Market in the World, where is great Plenty of all ſorts of Fiſh to be had cheap. The *Greeks* keep many Taverns, which draw the *Turks* from *Conſtantinople* thither, who are very inſolent in their Drink, and dangerous then to be met with.

Pera.

Beyond *Galata* lies *Pera*, a large Borough, which is ſeparated only by Burying-Places. In this Town dwell the Ambaſſadors from Chriſtian Princes, for only the Emperor's, King of *Poland's*, and the Republick of *Ragouſa* may reſide at *Conſtantinople*. The Houſes are high and handſome, being inhabited only by *Greeks* of Quality. Over-againſt the *Seraglio*, on the Right ſide, ſtands the *Topkana*, i. e. the Place where all the Guns and Artillery are caſt, and it gives the Name to all the Quarter. The Houſes of theſe 3 Places ſtand ſome higher and ſome lower, like an Amphitheatre, and are a pleaſant Proſpect in the Port or Sea.

The *Topkana*.

Scudaret.

In *Aſia*, a-croſs the Sea, which is about a Mile over, you come to *Scudaret*, paſſing by *Leander's* Tower. It is a large Town, and there the G. Seignior has a ſtately *Seraglio* and lovely Gardens. A little lower lies *Chalcedon*, once a City famous for the 4th General Council, but now is a pitiful Village. *The Prince's Iſle*, which is 4 Hours Sail from *Conſtantinople*, and contains 2 little Towns of *Greeks*, is excellent Air, and the Channel of the *Black-Sea*, called the *Thracian Boſphorus*, is a rare Place to take the Air upon, being

Leander's Tower.

Chalcedon.

Turkiſh Proceſſion.

12 Miles long, affording a delightful Prospect of stately Houses and lovely Gardens. This Channel affords plenty of Fish, especially Sword-Fish and Dolphins. Six Miles from *Constantinople* are 2 Forts, built to hinder the Inroads of the *Cossacks*, who would otherwise seek their Booty in that City. At the Mouth of the *Bosphorus* is a Rock, about 50 Paces from the Land, where stands a Pillar of White Marble, called *Pompey's* Pillar, because raised by him (as 'tis said) in Memory of his Victory over *Mithridates*. Over-against this Rock in *Europe* is a Village by the Sea-side, called *Fanare*, where is a Tower, with a Light on it always for the Convenience of Vessels to keep them from the Rocks, on which they are in Danger from frequent Tempests and Currents, caused by the *Danube*, *Boristhenes*, *Tanais*, and other Rivers, to suffer Shipwracks, and from thence the Sea is called *Mauro-Eustra*, i. e. *The Black Sea*; and by the *Greeks*, the *Euxine*, or *Axene* Sea, *i. e. Inhospitable*. Near the Channel of the *Black Sea* there are a great many *Siacalles*, or wild Dogs, something like Foxes, but supposed to be engendered on Wolves and Dogs. They howl dreadfully in the Evenings and Nights, especially in cold and bad Weather. They are very mischievous, and as fierce as Wolves. The Land on *Europe* side is a fine Country, full of Gardens and good Pasture, and Villages inhabited by *Greeks*. A little further are the fine Aquæducts that supply *Constantinople* with Water

Pompey's Pillar.

CHAP. II.

Of the Shape, Strength, Cloathing, Customs and Manners of the Turks.

The Turks Shape and Habit.

THE *Turks* are commonly well shap'd, and have none crooked or cripple among them, but are robust and strong for the most part. Their Habit is very fit to make them seem proper, and to cover all Defects; for next their Skin they wear a Pair of Drawers, and over them a Shirt and Doliman, reaching down to their Heels, like a close body'd Caffock, made of Sattin, Taffata, or other neat Stuff, which is quilted in Winter, and this they gird about with a Sash, or Leathern Belt, adorned with Gold or Silver-Buckles. At their Girdles they commonly wear 2 Daggers, or *Cangiars*, their Handles and Sheaths being garnished with Gold and Silver, and sometimes precious Stones, and their Pouch for Tobacco. Over the Doliman they wear a *Foregi*, or Night-Gown, which in Winter-time they line with rich Furs, if they are able. Their Stockins are of Cloth, and the Feet are Socks of red and yellow Leather sew'd to them. Their Shoes, which they call *Paloutches*, are of the same Colour, like our Slippers. Their Heads are covered with a Crimson-Velvet Cap, without Brims, about which they wreath a white or red Turbant, which is a Scarf of Linen or Silk-Stuff, many Ells long, and by the Fashion of it the Quality of the Man is known.

The Attire of the Ladies of *Constantinople* hath a particular Air of Grandure and Magnificence in it, and far surpasses the Dresses of the other Women of that Country. Their *Turpan*, or Head-Dress, is made up of many Handkerchiefs of various Colours, all wrought with Gold and Silver, beset with all manner of precious Stones, and adorn'd with divers sorts of Flowers. They can put it on or off without undoing it, and usually wear it several Days, and then put it into another Fashion, but it is often so heavy, that it is a Burthen to them. They wear outward a white Gown, edged at the Bottom with Gold-Laces and Fringes, and lined with Furs in Winter, as the Mens. The Ladies of the *Seraglio* wear sometimes on their Heads a *Calpak*, or Fur-Cap, others a round *Platine*, as the *Jewish* Women, with a Feather on each side, and Plumes at their Ears. The *Janizaries* wear upon some special Occasions a *Sorcola*, or Cap of Ceremony, which hangs down behind, and has a Pipe of gilt Leather before, half a Foot long, and reaches to the middle of their Foreheads, otherwise they wear a Turbant of white, red, or other Silk, as the other *Turks* do. They shave their Heads, and say the Devil nestles in long Hair, but they suffer their Beards and Mustacho's to grow, and have a great Esteem for a Man with a lovely Beard, and account it a great Affront to take a Man by the Beard. They swear by the Beard or Head of their Father, G. Seignior, or the like. They salute one another by laying their Hands upon their Breasts, and bowing a little, say, *Sela meon Aleicom*, i. e. *Peace be with you*, and the Person saluted returns the like Answer, which was the ancient Way of Salutation, as appears by Scripture, and is very grave. The Left-Hand is the most honourable with the *Turks*, because 'tis the Sword side, so that the *Christians* and *Turks*, tho' neither will give the upper Hand one to another, agree well in walking together, thro' Difference of Opinion. The *Turks* make a great Use of Bathing, both for keeping their Bodies neat and clean, and for their Health's sake, and in every Town they have many fair Bagnio's, the least Village not wanting one. They are all made of the same Fashion, differing only in Bigness and Ornaments. All that go into them shave off all the Hair of their Body, and go in naked, all but their Privities, which are covered with a Napkin. A Servant also embraces them behind and before to supple their Bones, before they go in. Such as cannot shave themselves, fetch off the Hair with the Powder of a certain Mineral, call'd *Rusma*, which being mingled with Lime, and hot Water, and laid upon any Place, will fetch off the Hair in half a Quarter of an Hour's time. In *Mecca* they use Orpiment for the same End. Having bathed, a Servant with Soap and Cloths cleanses the Body from all Filth, and then they are dry'd with warm Cloths, and so dress. The Price of the Bagnio is 2 Aspers for the Master, and as many to the Man, if he will be well served. The poorest Person that is, Man or Woman, goes to the Bath at least once a Week. The Women go in by themselves, and are served by Women only. It is a capital Crime for a Man to go into the Bath where the Women are, and a Bastinado to shew one's Privy Parts, or see another's. Great Persons have them in their Houses for themselves and Wives.

The *Turks* have no sumptuous Feasts, but are contented with a small Matter. They cook their Meat themselves, for they have no Sauces, but what are made at first Sight, as Oil, Pepper, &c. Their usual Food is Pilau, which is Rice boil'd with a Pullet, a Piece of Mutton, Beef, or the like, and for want of Meat, with Butter. Their Bread is light, but coarse like our Biscuit, and flat. They spread a Carpet of *Turky* Leather on the Ground, called a *Serrir*, and squatting down upon the Ground like Taylors, eat it with Wooden Spoons, and instead of Napkins they use a long blue Cloth cast round about the Table. They say, *Bismillah*, i. e. *In the Name of God*, before they eat, as we do *Benedicite*. They pull their Meat in Pieces (for they use no Knives) and then every one takes his Share. They seldom drink at their Meals, but having eaten, rise and fill their Bellies with Water, and then say, *Handillah*, i. e. *God be praised*. Having finish'd their Meals, they wash their Hands. They drink Water usually, because Wine seems to be forbidden by the *Alcoran*; but the Good-Fellows say, 'tis a Council, not a Precept, and so drink it plentifully; but few do it in publick, except the *Janizaries*, or some Desperadoes. They never mingle Water with their Wine, and laugh at the Christians for so doing. It is plentiful at *Constantinople*, and all over the *Archipelago*. The poorer sort for Cheapness drink a Liquor made of Barley and Millet, somewhat like our Beer, but not so pleasant. This Drink will make them drunk. They also drink Coffee all Hours of the Day. They make it of a Berry parch'd and pill'd. This Liquor they hold to be good to cure the Head-Ach, and keep down Vapours from the Head, it comforts the Stomach and helps Digestion; nay, they say 'tis

good

good against all Maladies. To mix any thing with it makes it less wholsome and useful. All, Rich and Poor, drink at least 2 or 3 Dishes a Day in *Turky*. At the Coffee-Houses the Master hath Musick to divert his Customers, and draw others in. They have also Sherbet, which is a very good Drink, made in *Egypt*, of Sugar, Lemmon-Juice, Musk, Ambergrease and Rose-Water. At their great Treats they give Coffee, Sherbet and Perfume for their Beards. They spread Quilts on the Ground for their Bedding, and every one lies on his own, and the Masters lay them on their *Divans*. Their Recreations are either to sleep, smoak a Pipe of Tobacco, or play on the *Tambour*, which is a kind of Lute, and tho' it be no pleasant Musick, they'll play all Day on it, but Schollars read or write. They laugh at the *Franks* for walking backward and forward. They entertain their Company with Discourse, or a Game at Chess, Draughts, Tables, or such like Plays; but they never play for Money, or any thing of Value, because they account it sinful, and yet will spend whole Afternoons at their Games; but their most usual Game is *Mancala*, at which they play with Shells in Boxes, like our Tables. The Recreations of Soldiers are their Military Exercises, *viz.* Shooting at Marks or Butts with Bows and Arrows, darting the *Zagaye*, shooting with an Harquebuse running. The other *Turks* make a great Diversion of Poppet Shews, which, tho' perform'd a different Way from ours, yet are more pleasing, their Songs are pretty, but very obscure, and so are many of their Postures.

Sherbet.

Beds.

Musick.

Military Exercises.

CHAP. III.

Of the Learning and Religion of the Turks.

The Turkish Language and Learning.

THE *Turkish* Language is a Primitive and Original Tongue, and tho' not very copious, yet 'tis grave and pleasant, and with a little Supply from the *Arabians* and *Persians*, is rich and large enough. The *Turks* are not much addicted to Sciences, yet have Doctors of their Law, who explain it in all the Senses that can be given it. Some affect Astrology and Poetry, in which they have pretty Conceits, but they generally use the *Persian* Languge, and the Tone they sing in is agreeable enough thro' Custom.

Their Musick and Divination.

Their Musick is a little Lute with 3 Strings, and the Flute. Many among them pretend to Fortune-telling, and have good Luck at it. They divine by the *Alcoran*, and 4 Arrows, which they call doing the Book, and naming 2 of the Arrows *Christians*, and the other 2 *Turks*, make them fight by reading the *Alcoran*; if the *Christians* overcome, they look upon the Action, whether in War or Peace, which they are to undertake, to be unlucky, and so will not enterprize any thing. They will never go out to War, but they will make this Experiment. They also divine with Beans, by taking out an uncertain Number, and then counting them, consult the Book to see what the Number signifies; and by a Piece of Timber almost square, which they call *Kiipi*, which having Letters written on each side, he that seeks his Fortune, takes it, and rolling it 3 times, puts the Letters together, and then consults the *Fal*, or Fortune-Book, what the 3 Letters signifie. They have few or no Physicians, being very healthy, because of their frequent Bathings and Temperance. When they are sick, they make use of their common Receipts, and if they fail, consult the *Jews*, or some Runagado Christians, who learn their Skill at the Cost of many. When they have the Head-Ach, they scarifie, lance or sear the Place, and that cures them. In the other Distempers they also use Burning, and endure a live Match applied to the Place with Patience. Doubtless, Physicians might do them more Service, and help them at an easier Rate, but they are such bad Pay-masters of Men for their Skill, and besides, if a Physician should be unsuccessful, and a Patient die under his Hands, they will accuse him of killing him, which is a Discouragement to the Art among them.

Their Physicians and Medicines.

Their Religion.

The Religion of the *Turks* is full of Fopperies and Absurdities, of which it would be no hard Matter to convince them, but that *Mahomet*, to prevent any better Information, hath commanded, that whosoever contradicteth it should be put to Death. *Mahomet* was an *Arab*, and illiterate, a Driver of Camels, and a Man of no good Morals; but striking in with a *Greek* Monk, who had forsaken his Monastery, and had some Smattering of Learning: He was by him enabled to lay the Foundation of that great and damnable Sect, which hath hitherto infected so great a Part of the World. He made use of the Old and New Testament in composing the *Alcoran*, that he might draw both *Jews* and *Christians* to submit to it, tho' both are confusedly applied; but the *Turks* hold, that it was written in Heaven by God himself, and brought Chapter by Chapter to *Mahomet* by the Angel *Gabriel*. No Christian may touch it, and the *Turks* by reading it merit Paradice. It is written in pure *Arabick*, and the *Turks* believe it cannot be turn'd into any other Language, and for that Reason they count the *Persians* Hereticks, because they have translated it into their Tongue. The Book contains all their Laws, both Canon and Civil, but is full of *Rabbinical* Fables.

Mahomet an Impostor.

The Alcoran.

The Doctrines of the Alcoran.

According to this Book the *Turks* believe in and worship God, the Eternal and Almighty Creator of Heaven and Earth; but they will not acknowledge a Trinity, nor allow any Images in his Worship, either painted or graven. They have a peculiar Fondness for Predestination which they extend even to the most indifferent Actions. They are firmly perswaded, that under the Reign of every Emperor the State will infallibly and perpetually have either a disastrous or happy Fate. That Death is fatal, both in War and Peace, and therefore as they willingly take up Arms, believing that if they are killed by their Enemies, they should some way or other have died at home, so they take no care to keep themselves from the Plagues, or other infectious Diseases, and are offended at Christians for it. They believe, that Jesus Christ was conceived by the *Rauah*, i. e. The Breath or Spirit of God, in the Womb of the Virgin; but they deny him to be the Son of God, who is One, and hath no Companion; That he was a great Prophet, and wrought many Miracles among the *Jews*, and foretold the Coming of *Mahomet*, under the Name of the Comforter, but they deny that he was crucified; That Jesus Christ shall come to judge the World, and shall reign 40 Years in *Damascus*, marry and have Children, at which time *Antichrist* shall arise, and deceive many, setting a Mark on their Foreheads; but Christ shall destroy him, and then shall ascend up into Heaven, and then the Day of Judgment shall come. In short, they give great Honour to Jesus Christ and the Virgin *Mary*, and if they hear any Man speak ill of them, they will chastise him as severely as if he spake against *Mahomet*; for they believe that the Gospel was sent to Jesus, as the Law was to *Moses*, and the Psalms to *David*. They believe all the Prophets, and that Paradice shall be filled with the Just, and Hell by the Wicked. They say moreover, That the Power of God is such, that at the Creation of the World he prefix'd and appointed a set Time for every Man's End, that the Wit or Device of Mortals cannot divert nor prevent, which makes them not only very resolute and courageous in the Wars, and upon all other Occasions, but they laugh at and scorn all Means to drive away Diseases and prevent Death, as if they opposed God's Will in so doing. They deny a Purgatory, but hold, that there is a Place called *Araf*, between Paradice and Hell, where they shall be that have done neither Good nor Evil. In Paradice *Mahomet* promises the Blessed delicious Gardens, full of pleasant Fruits and Fountains, Rivers of Waters, Milk, Wine and Honey, Scarlet and Green Cloathing, and lovely Virgins, with Skins as white as a new-laid Egg, and black Eyes, always young and Virgins; That God shall appear to them every Week on *Friday*: That those that are in Hell shall drink scalding hot Water, and eat of the Fruit of the Tree *Zacum*; That if they have

Their Honour to Christ and the Virgin.

Faith, after all their Sins shall be consumed and wash'd in the Water *Solzabeul*, they shall be admitted into Paradice, where they shall receive and enjoy as much Happiness, as those that entred at first; but such as have no Faith, and are meer Atheists, shall burn everlastingly in Hell-Fire.

They pray for the Dead, as the Papists do, and invocate their Saints to recommend them to God. They acknowledge Guardian Angels, not only to every *Musfulman*, but to every Affair and Member, and attribute all that befals any Body to them, because they wait upon them in all Places, but when they go to do their Needs, and then they leave them at the Door. They also believe, that when a Man is buried, his Soul returns to his Body, and 2 Angels, called *Munker* and *Gemerair*, come to him, and if he has lived ill, they bring him an ugly Creature, that represents his Sins and bad Deeds, to torment him till the Day of Judgment; but if he hath lived well, they bring him a lovely Creature, which represents his good Actions, and which gives him a great deal of Content, and stays with him till the Day of Judgment.

They believe, that not only the good *Musselmans*, but some Beasts and Fowls shall enter into Paradice, *viz.* The Prophet *Saleh*'s Camel, which he raised to Life in *Persia*; *Abraham*'s Ram, *Moses*'s Cow, whose Ashes are mingled with the Water of Purification, *Salomon*'s Ant, the Queen of *Sheva*'s Parrot, which brought her the first News of *Salomon*; *Ezra*'s Ass, which, they say, was raised to Life many Years after it had been dead, to prove a Resurrection; *Jonah*'s Whale; the little Dogg *Catmer*, who attended the 4 Sleepers, who slept 372 Years; and *Mahomet*'s Camel, that carried him from *Mecca* to *Medina* to his Friends House by a certain Instinct.

They circumcise their Children, as the *Jews* do, but not at 8 Days, but 11 or 12 Years old, that they may make a Profession of their own Faith in these Words, *La illah illallah Mahomet rasoul allah*, i. e. *There is no God but God, and* Mahomet *is his Prophet.* The *Turks*, as well as *Jews*, make great Rejoycings at the Circumcision of their Children; for upon the Day fix'd for the Ceremony the Child is set on Horse-back, and carried about the Town with Timbrels and Musick, and being circumcised in his Father's House, he makes a Feast for all his Relations and Friends, at which they are merry, dance and sing, and the next Day the Guests make Presents to the Child according to their Quality. When a Christian turns *Turk*, he is circumcised after the Manner aforesaid; but if a *Jew* turns, his former Circumcision is sufficient, and he only is obliged to make the aforementioned Profession, for which the *Turks* have such a Reverence, that if any *Jews* or *Christians* pronounce them inconsiderately, they must turn *Turk*, or be burnt. This Circumcision, called by the *Turks Sebounnet*, is only a Mark of their Obedience to *Mahomet*'s Example and unwritten Command, for there is no Mention of it in the *Alcoran*, but they take it to be such a Token of Disobedience to their Law not to be circumcised, that such as are uncircumcised, whether Children or Christians, are not allow'd to be present at their publick Prayers, and tho' there be no Persons to keep such out of their Mosques, yet if any are so bold (as some have been) and are taken, they are burnt alive, or impaled. Upon some special Occasions some are admitted to circumcise at 7 or 8 Years old; but in case of Poverty it is more usual to stay till 14 or 15, till either the Parents of the Person to be circumcised, or the Person himself is able to defray the Charges of it; or if neither are able, they wait till some rich Person is circumcised, that they may shelter themselves from the Charge by his Purse. Men of Estates at the Circumcision of their Children make many Presents to the Youths that are circumcised with them, and give liberal Alms to their poor Neighbours, that by their Prayers the Grace of God may descend upon the new *Musselman*, and their whole Family. When any poor Runagado Christian is circumcised, 2 Basons are carried after him to gather the Alms, which the Spectators freely give them, tho' they have a common Proverb among them, *That he that has been a bad* Christian, *will never make a good* Turk. The Time and Place for Circumcision is not fix'd, for it may be done by a Priest or Chirurgeon, either at the Bath or Parents House. They name their Children as soon as they are born, and do not stay till they are circumcised, by putting some Grains of Salt into their Mouths, and so lifting them on high, as dedicating them to God, say, *God grant*, N. N. *that God's holy Name may be as savoury in thy Mouth, as this Salt is, and that he may preserve you from being too much in Love with the World.* As to those that die young, before they are circumcised, they belive that those are saved by the Circumcision of their Father.

The *Turks* receive the Ten Commandments of *Moses*'s Law, and cause them punctually to be observed by all, and to them *Mahomet* has added 5, *viz.* 1. To believe One Only God, and worship him as such. 2. To fast the *Ramadan*. 3. To pray at the Hours appointed. 4. To give the Poor yearly the 40th part of their Substance: And, 5. To go in Pilgrimage to *Mecca* once in their Lives.

The 1st of these they observe very punctually, shewing great Reverence to God and his Name, which they never pronounce, nor hear pronounced, but with great Reverence, and will not set about any Action, but they first say, *In the Name of God*; yea they swear much by God, when they would be believed.

The 2d Commandment is to keep *Lent*, or *Ramadan*, in Fasting, whereby the Flesh is mortified, Concupiscence subdued, and the Soul purified. This Fast lasts a Month, and is kept in the Month called *Ramadan*, because (as they say) the *Alcoran* came down from Heaven in that Month. This *Lent* begins as soon as such People as are set on Hills and high Places on Purpose, can discover the New Moon, and the first Messenger of it, if a credible Person, hath a Reward given him for publishing it, and then the *Ramadan* is appointed all over the Town by publick Proclamation. The Manner of keeping it is thus: It is said in the *Alcoran*, That they may eat and drink all Night long, till they can discern a white Thread from a black by the Morning-Light, but after that it is unlawful for them to eat, drink or smoak Tobacco, yea, to touch their Wives; and thus their Nights are turn'd into Days, their Minerets being all hung with Candles, and their Coffee-Houses are full all Night. In Summer-time this Fast is very troublesome, for tho' they are burnt up with Heat they may not drink. Every one is obliged to keep this *Lent*, and some are so strict as to keep it in their Travels, and in the Army, tho' they may defer it to a more fit Opportunity. There are many that do not keep it, but they must eat and drink privately, for if it be known, they will be at least Bastinado'd. The Punishment of drinking Wine in *Lent* is to have melted Lead pour'd down their Throats, and it hath been executed, tho' rarely. None may marry in *Lent*. When the *Ramadan* is ended, the *Biram*, or *Easter*, begins with the next New Moon, which is publish'd by firing of Guns and publick Bonfires and Rejoycings. At this Feast the Houses and Shops are adorn'd with fine Hangings, Tapestries and Sopha's, the Streets are full of Swings, adorn'd with Festoons, in which they sit down, and are toss'd in the Air, while Musick, both of Instruments and Voices, hired by the Masters of the Swings, pleases their Ears. They have many other Diversions, as Mills, Fire-Works, &c. which they get ready some Days before the *Biram*. Many Women, who never stir abroad the rest of the Year, have Liberty to walk about these 3 Days; but it is dangerous for the *Franks* to appear, because the *Turks*, being got drunk, will stab them with their *Cangiar*, or to be sure make them pay dear for their Passage, by exacting Money from them. One Thing very commendable is done at this time, which is, That they pardon all their Enemies, and are reconciled to them; for they have made a bad *Easter*, if they keep Malice in their Hearts against any Body; and for this Reason, when they meet any of their Acquaintance in the Streets they kiss one another, wishing a good *Easter* and mutual Happiness one to another. This they call the Great *Biram*, to distinguish it from the Little *Biram*, which they keep 70 Days after. Their other Festivals are the Night between the 11th and 12th of the Moon called *Rebiul Ewell*, wherein *Mahomet* was born; as also the Night between the 26th and 27th of the Moon *Rebiul Ahhir*, when they believe that *Mahomet* ascended up into Heaven upon the *Alboraob*, as he tells them in his *Alcoran*; and on *Thursday*, the 4th of the Moon *Regeb*, they have Prayers in their Mosques till Midnight, and then return home and feast. On all these Festivals the Steeples of the Mosques are deck'd with Lamps in several Figures, which make a very pretty Sight.

The

The 3d Command of the *Turks* is, To pray at the Hours appointed; but because they always wash before they go to Prayers, 'tis necessary to speak of their Ablutions. They are of 2 kinds, one is called *Gousl*, which is a general Washing of the whole Body, and this they are obliged to use after they have lain with their Wives, or after Nocturnal Pollutions, or when any Urine, or any other unclean Thing, hath fallen upon them. The other is called *Abdest*, which is performed by turning their Face to *Meccha*, and washing the Hands, Nose and Mouth 3 times. This they use after their Needs, or when they have handled any thing that is unclean, and for both these they have Baths and Fountains near all their Mosques. If any one happens to break Wind upwards or downwards, or any Blood or Filth issue from their Body, if they vomit, fall into a Passion, faint, are drunk, laugh at Prayers, embrace a Woman, or touch any naked Part of her, sleep at Prayers, touch a Dog, or any unclean Beast, all these Accidents make void the *Abdest*, that it must be renew'd before they go to Prayers. The Places of Prayer are their Mosques, which on the Outsides are like our Churches. They have by them Towers or Minerets, which have a Balcony round them, from whence the *Muezin* call them to Prayers. In the Inside there is nothing written, but the Name of God. When they pray they turn toward the South, because *Meccha* lies on that side. They have a Pulpit for the *Imam* to preach in, and the whole Mosque is covered with Matts for the Ease of the People's Kneeling, and Carpets for the better sort. Their Prayers are in an unknown Tongue. They have Prayers 5 times a Day, *viz.* at Break of Day, at Noon, between 3 and 4 a Clock in the Afternoon, and at Sun-setting, and an Hour in the Evening. On *Fridays* they have Prayers at 9 a Clock besides, and in the *Ramadan*, or *Lent*, at Midnight, and all are present at them, and then they may go to work, or open Shops, but most of them rest and make merry, or visit their Friends. When the Hour of Prayer is come, the *Muezin*, going up to the Minaret, sings and cries these Words with all his Force, putting his Fingers in his Ears, *Allah Ekber*, &c. i. e. *God is great, God is great, God is great; shew there is but One God, and that* Mahomet *is his Prophet; Come and present your selves to the Mercy of God, and ask Forgiveness of your Sins; God is great*, &c. and this he does toward the 4 Corners of the World, beginning at the S. and ending at the W. While he is crying, every one goes to the *Abdest*, and then goes to the Mosque, or if they cannot go, say their Prayers at home. They leave their Shoes at the Door of the Mosque, or carry them in their Hands with them. When they are entred they bowe to the *Keble*, i. e. a Nich in the Southern Wall, and then go to their Seats, and wait till the *Imam*, or Prelate, begin Prayers, and then join with him. In praying the Men lift up their Hands to their Shoulders, and then lay them upon their Navels, and the Women lift up their Hands but half way, and clap them on their Breasts. When Prayers are ended, they bowe both to the Right and Left side, as to the 2 Angels, *Kerim*, *Ki-atib*. When they are at Prayers they are so affectionate, that they will turn neither this nor that way. They never talk in their Mosques, but carry themselves always with great Reverence. They are but few who go not every Day to Prayers at Noon, Afternoon and Night, for if they observe not these 3 Hours they are punish'd severely, and this they must do in Travelling. All their Prayers do not last above Half an Hour at most, and seldom above a Quarter. They are commonly of a very ordinary Composure, especially in the lesser Mosques, and upon ordinary Days; but during the *Ramadan*, and upon high Days they are something better. The *Mahometans*, during the time of their Prayers, observe a grave Silence and a modest Deportment, kneeling till the Prayers begin, and then joining with the *Iman* in repeating the Prayers softly after him, and imitating his Gestures with Kneeling and Prostrations, which are more or less, according to the Hours, for in the Morning and Afternoon they use but 6, but at Noon, Night and Evening 8. When these are finished, some Choristers get up into the Galleries, and sing in Parts a sort of an Anthem of an indifferent good Air. On *Mondays*, *Wednesdays* and *Fridays*, a Preacher mounts the Pulpit, to explain some Point or other of the *Alcoran*, which he understands and expounds as he thinks fit. Any one may be present at these Sermons, as well as those made in the Market-place. They conclude all with some Prayers for the Sultan and the Success of his Armies; to which all the People say, *Amen*.

The 4th Command is Charity, to give the 40th part of their Goods to their Kindred, if they have any, and if not, to their poor Neighbours, and for want of them, to the first they meet. This Command is well observed by them, so that Beggars in *Turky* are rare. And, indeed, they perform great Acts of Charity in Founding Hospitals, building Bridges, and Inns for the Caravans, bringing Water into the High ways, setting Slaves at Liberty; and they that have not Ability to do these Things, mend the High-ways, fill the Cisterns with Water, and shew Travellers the Foards; and if they be offered Money, they refuse it, for they say, they do it for God's Sake, and not for Money. Their Charity also extends to Birds and Beasts, for some will buy Birds in the Market to let them fly, and they believe, that the Souls of those Birds will one Day testifie their Kindness to God. Others will leave considerable Means to maintain so many Dogs and Cats. To this Command of Charity may be reduced that of forgiving Enemies, not of their State and Religion (for those their Law obliges them to hate) but their particular and private Enemies. And indeed they observe this Law so well, that there are few Enmities among the *Turks*; for if there happen any Quarrel, they are obliged to use their utmost Endeavour to pacifie it, and commonly they do not desist till it is adjusted; and that the Reconciliation may be firm, the Persons at Difference are obliged before they pray to God on *Friday*, which is the Weekly Sabboth, to protest, as in the Presence of God, that they freely pardon their Enemies, or else they are taught, that their Prayers will not be heard. If the Persons at Variance will no be reconciled, they part them by Force, and carry them before the *Cadi*, or some other Judge, who will give them 2 or 300 Drubs on the Bottom of their Feet, and make them pay 2 or 3000 Aspers. The Severity of these Punishments generally keep the *Turks* so much within the Bounds of their Duty, that they seldom quarrel, or injure one another; yea, they do not suffer themselves to be transported with Passion, or swear.

The 5th Commandment of the *Turks* is to go to *Meccha*, which is the worst obey'd of any of them, because several for want of Money, and others by their Affairs are hindered from going so tedious a Pilgrimage; yet many go thither yearly, and such are reverenced ever after under the Name of *Hagoes*, or Pilgrims, and others get ready to do it.

Next to these Commandments they have several Prohibitions, which they cannot break without Sin, as, 1. To make, or have any Figures of Man, Woman or Beast; and this they observe so strictly, that they are angry at the Sight of any; and tho' they are great Lovers of Watches and Clocks, yet if they have any Figure on them, they will not accept of them, tho' given. 2. To lend Money upon Usury, and they are careful to abstain from it, but they will make Bargains that differs little from it. 3. To forbear unclean Meats, as Hogs, and such Creatures as the *Jews* accounted unclean; and this they strictly keep, and some will rather starve than eat of them. 4. Not to drink Wine, but this, they say, was only a Council of *Mahomet*, and so they often drink it, and are drunk; yet if any Wine be spilt on their Cloaths, the greatest Drunkard will labour to get out the Stain, and the most scrupulous will wear them no more, lest they be found guilty of Sin.

The *Turks* have their Clergy, as all Religions have, to resolve their Doubts, and celebrate Divine Service. They continually study the *Alcoran*, and are most of them knowing Men. The chief Ecclesiastick is the *Mufti*, whom they reverence as much as the *Romanists* do the Pope. He is chosen by the G. Seignior, and is always a Learned Man in their Way, *i. e.* much versed in the *Alcoran*, for he resolves all Matters of Conscience, and gives his Decisions in little Writs, called *Fetua*, to which even the King himself must stand but by adding these Words, *God is the best Judge, he shews that he pretends not to Infallibility*. He is married, and had in so great Veneration, that the G. Seignior rises to meet him and salute him, when he comes to Court. 'Tis unlawful by their Law to put the *Mufti* to Death, yet some Emperors have done it. There is but one *Mufti*, and his Residence is ordinarily at *Constantinople*, where finding Business enough, the *Cadilesquers*, *Moullah's* or *Cadi's*, or Justices and Naibs perform his Office in other Places. The *Sultan* con-

consults with the *Mufti* about State-Affairs, as when he designs to put any Prime Minister to Death, disgrace the Prime *Visier* or *Bassha*, or undertake any other Business of Importance, because 'tis a Notion among the People, that there is more Equity in a wise and pious Person's Judgment, than in the absolute Power of a Prince, tho' as it is now used, 'tis meer Formality, for the *Mufti* must comply with the Will of his Prince. Every *Mufti* must have been a *Cadileſquer* first, and have discharged that Office well before he is raised to that Dignity. He has no Power over the *Imans*, or Priests, because the *Turks* have no Hierarchy. Those who officiate in their Mosques, and read Prayers there daily, are the *Danischmend*, or as the *Franks* call them, *Talismans*, and the *Iman* is the Chief of them. The *Muezims*, or Church-Clerks, call them to Prayers from the Minerets of the Mosques, and the *Hodgia's* are old Men of Integrity, very knowing in the *Alcoran* and Civil Affairs. These are consulted in Affairs of Importance, and sometimes preach on certain Festivals. They have several sorts of Monks, of which the *Dervices* are the chief. They live in common, and have their Superior, as Popish Monks have. They go very mean in their Apparel, and wear on their Heads a Cap of white Felt, like our Night-Caps. Every *Tuesday* and *Friday* they make a Dance in the Middle of an Hall, rail'd in square, where are 2 Pulpits, the one for the Superior, and the other for the Vicar. At the other End of the Hall is a Scaffold, where several *Dervices* are placed to play on the Flutes or Drums. When they have sung some Prayers the Superior makes a Sermon upon some Words of the *Alcoran* in *Turkish*, which are read to him by the Vicar in *Arabick*. When the Sermon is ended, the Superior with the Vicar, come down from the Pulpit, and having, with the rest of the *Dervices*, taken 2 Turns about the Hall, all the Instruments play in Consort, and then begins the Dance. They pass before the Superior, and salute him humbly, and then making a Leap, fall a-turning upon their Left Foot as a Wind-Mill, driven by the strongest Wind, and tho' they stretch out their Arms, and sometimes shut their Eyes, they never touch one another, but keep time to the Musick, and never make the least false Step. The Author of this Dance was one *Hazreti Mewlana*, a *Dervice*, who is reckoned a Saint among them, but all their *Dervices* and *Santo's* are Hypocrites.

Turkish Monks, and their Cells.

The *Turkish* Marriages. The Marriage of the *Turks* is of 3 sorts, and so they have as many sorts of Wives. 1. Lawful Wives, and these they take after this Manner: The Man that desires to be married agrees with the Parents or nearest Relations of the Maid about the Dowry they will give their Daughter or Kinswoman befor a *Cadi*, who writes it down. This done, he gets an *Iman* to bless his Marriage, and then the Bridegroom on the Marriage-day leads the Bride to his House, her Baggage being carried on Horses or Camels before them, and there they feast and are merry, the Men and Women by themselves, and commonly they have Musick and Poppet-Shows, as also the Women called *Tchinghene*, to shew Tricks for the Diversion of the Company. These Wives the *Turks* may divorce when they please, by going before the *Cadi*, and saying, *Alei talac be talati*, i. e. *I part with her for 3 times*: But if a Man put away his Wife wrongfully, he must give her her Dowry, but if he does it upon just Grounds, or she forsakes him, he gives her nothing. When a Woman is thus divorced, she may not marry another Man till 4 Months be past, that she may know whether she be with Child, for if she be, the Husband that divorced her must keep it, and if she be not, sometime such Matches are made up in that time. A Man that hath divorced his Wife cannot marry her again, till she hath been first married to another Man, and then he may take her back. When they are thus married, if the Husband happen to die, the Wife takes her Dowry, and no more, and if the Wife dies, and leaves Children, they may constrain their Father to give them their Mother's Dowry. Of these Wives the *Turks* can have but One, tho' some have said 4. 2. They may also have Wives of *Kebin*, which they take with less Ceremony than the former; for they only go to the *Cadi*, and tell him, that they take such an one to be their Wife, promising to give her so much if they divorce her. This the *Cadi* writes down, and gives the Man a Copy, and he may keep her or divorce her as he pleases, performing his Promise, and maintaining the Children he hath by her. The *Turks* may have 7 of these Wives, nay, as many as they can keep, but to save Charges, few of them will have more than 1 or 2. 3. Their other Wives are *Haylaykes*, i. e. Women-Slaves, and of these every Man may have as many as he pleaseth, and the Children begotten of them are held as legitimate as those of the former Wives, and have as much Title to the Inheritance of what their Father leaves behind him, if by his Will he infranchizeth them, otherwise they remain Slaves to the eldest by the lawful Wife; but if a *Turk* takes a Slave for his Bed, he may not sell her again if she have Children, but she is become a Member of his Family; but if she proves barren, she may be sold as often as her Master will. The *Turks* may buy all sorts of Slaves of every Religion and Nation, but *Christians* and *Jews* may not buy a *Turk*. At *Constantinople* is a Market for Slaves in a Place near the *Bezistan* every *Wednesday*, and every one may buy freely for their several Uses, their Lust not excepted. These Slaves are bought and sold like Horses, view'd, review'd, and felt all over their Bodies, and their Mouths look'd into, being also examined of their Country and Age. A beautiful Virgin at these Markets is held at an high Rate, but the Seller is answerable for her Virginity, for if she prove otherwise, he must restore the Money she was sold for, and bear a sharp Fine for his Fraud.

Slaves sold.

Divorces how used among them.

Polygamy allowed in *Turkey*.

The Slaves of the *Turks* are not so miserable as they are commonly supposed. They are frequently the Under-Masters of Families, for if they light of a good Master, or are endued with any Talent, their Masters will love them, and will seldom hinder them from going to Church to pay their Devotion: They are very frequently also in Favour with their Mistresses, who thro' a tender Compassion, natural to their Sex, do give them Presents. Their Masters, indeed, are obliged by their Law to exhort them 3 times a Day to embrace the *Alcoran*, but they seldom force them to renounce their Faith. These Things have made some Slaves to refuse their Liberty, and being made free to return again to their Servitude. Ex. *Le Brun.*

Turkish Slaves very well treated.

The *Turkish* Women are commonly beautiful, streight and well-shaped, for they never go abroad without their Veil to cover their Faces. They paint their Eye-brows with *Sarmee*, which gives them a blackish Colour, and their Nails with *El-hanna*, which is a Reddish brown. They are very cleanly and neat, for going to the Bath twice a Week they have neither Hair nor Dirt upon their Bodies. Their Cloathing and Shooes are much like the Mens, but their Head-Attire is different, for they make a very long Tress of their Hair, which hangs down to the Small of their Back, and if they want Hair, they use an artificial Tress, or a Case of Sattin. In the House they cover their Heads with a Cap of Red Cloth, like our Night-Caps, but with 4 Horns or Points on the Tops, to the Middle of which they stitch a Round of Pearls, and tie it below with a Handkerchief of fine Stuff wrought with Flowers of Gold and Silk, but when they go abroad, they change it for one made of gilt Paste-board, and muffle up their Head so in a Linen-Cloth, that nothing but their Eyes is uncovered, yea, their Smocks Sleeves cover their Hands, because 'tis a Thing of ill Repute so much as to shew any Part of their Bodies; yet in a Corner of the Streets, they'll venture to uncover their Face to a Friend, or a young Man they like, tho' if they be discovered, they are bastinado'd. The *Turkish* Women are very haughty, and extreamly lazy, and tho' they do nothing but sit on their *Divans* embroidering an Handkerchief, yet they must go fine and have their Slaves, tho' their Husbands be never so poor. This Idleness makes them vicious, and seek only ways of having their Pleasure, of which the Husbands are so jealous, that they will not suffer them to shew themselves to Men, and if they do, they are sure to receive the Bastinado on their Buttocks. Upon these Accounts no Women are suffered to go to the Mosques, Markets, or appear in their Husbands Shops.

The *Turkish* Women.

Women Habits.

Their Gait and Jesture.

The Wives have not the Privilege of Divorcing their Husbands, as their Husbands have of them, unless they deny their Wives the Things which they are obliged to furnish them withall, as Bread, Pilcou, Coffee, and the Use of the Bed once in 8 Days, and Money to go to the Bagnio twice a Week; for, if they fail in these Things, they may go to the *Cadi* and demand a Divorce, which if the *Cadi* upon going to the House, finds true, he grants her Suit; as also if she complains, that he hath offered to use her contrary

Women cannot divorce their Husbands but in some Cases.

to

to the Course of Nature, which she expresses by turning up the Soal of her Slipper, without saying a Word.

When any one is sick, the *Imans* go and pray with him, and if he dies in *Turky*, all the Neighbours know it by the Howling of the Women, who cry out, as if they were in Despair. The Friends and Neighbours go immediately to condole with them, weeping and mourning in a doleful Tone, but yet as if they were singing, they rehearse the Praises of the Dead, *viz.* The Wife will say of her dead Husband; *He loved me so well, he gave me Plenty of every Thing; I stood in need of*, &c. and all present join with her, repeating her Words and imitating her Gestures. This lasts several Days, as often as any new Visits are made, nay, sometimes these cries are renewed at the Year's End. After these Lamentations comes the Burial, for which the Relations wash the Body and shave off all the Hair, and then they burn Incense about it to scare away evil Spirits and Devils; and then praying God to be merciful to him, they wrap him up in a Sheet, and put him into a Coffin and Beer, like ours, but with his Face downward, and cover'd with a Pall, which is Red; if the Person dead be a Soldier, Green; if a *Scheriff*, *i. e.* one of *Mahomet*'s Relations, Black, with a Turban; which is Red if he be a *Janizary*; Red and White if a *Spahi*; Green if a *Scheriff*; and White if any other Man. As he is carried to the Burying-place, which is with his Head foremost, the Priests go before, saying certain Prayers, and often calling upon the Name of God: After the Corps which is carried by 4 Bearers on 2 Sticks, follow the Relations and Friends, the Women come last howling like Mad-folks: Being come to the Burying-place, they take the Body out of the Coffin, and bury it in the Earth, and leaving the Women to mourn, depart. When the Grave is filled up, the poorer Sort erect a Stone over the Head of the Deceased, for the Angel that examines them, to sit on; but the richer Sort have Tombs of Marble, and both with a Turban of Stone like that of the Deceased. Their Burying-places are always without their Towns, that the Air may not be infected by the corrupt Vapours of the Graves, and this was the Custom of the Ancients. The *Turks* Burying-places are commonly by the High-way-sides, that Travellers may pray for them, and always distinct from the Christians. After the Dead is interred, the Relations and Friends for several Days come and pray upon the Grave, that God would deliver the Soul of the Deceased from the Torture of the Black Angels, exhorting him not to be afraid. The Women also do the same with so much Passion, that one would think them mad. Many on *Friday* bring Victuals and Drink to the Graves, and leave it there for all Travellers, that they may pray for the dead Person, for whose Sake 'tis given them.

In fine, Tho' in Christendom the *Turks* are accounted Barbarous, yet, in Truth, they are good People, and love honest Men, whether *Turks*, *Jews*, or *Christians*. They do not think it lawful to cheat or rob a *Christian* more than a *Turk*, but carefully observe that excellent Command of Nature; *To do to others, only what we are willing others should do to us.* They are, indeed, guilty of great Extortion from the *Franks*, but it is thro' the Instigation of the *Jews* and *Christians*, who envy one another, and seek each others Ruine.

The *Turks* good and honest People.

Usury is esteem'd a very great Sin by the *Turks*, and is very little practised. They are very devout and charitable, very zealous for their Religion, which they seek to propagate all over the World; and whenever they love a *Christian*, they pray him to turn *Turk*.

Usury.

They are ever Loyal to their Prince, whom they highly reverence and blindly obey, and are never known to betray him, but willingly die for him, whenever he commands it: They never quarrel or fight among themselves, and know not what Duels are, which may be said to proceed from *Mahomet*'s wise Policy, who has forbad them Wine, and Gaming for Money; and the good *Turks* so religiously observe these Laws, that they will not drink a Drop of Wine, and always play for Diversion. They are very temperate, and never commit any Excess in Quantity or Quality of Victuals, so that it may be truly said of them, *They eat to live, and not live to eat*: Yet are they not without their Vices, for they are so proud, that they think themselves above all other Nations, and that the World was made for them. They despise the *Jews* and *Christians*, whom they call Dogs very much, and the Rabble think they do a good Act in flouting and jeering them. Some of them are so superstitious, that if at their first going out in a Morning they meet a *Christian* or *Jew*, they return home again, *God preserve us from the Devil.*

Their Loyalty.

Their Vices.

The *Turks* love not Sciences, and think it enough to learn to read and write. They often study the *Alcoran*, which comprehends all their Law, both Canon and Civil, and some apply themselves to Astrology and other Sciences. They are very amorous, but their Love is brutish, for they are the greatest Sodomites, and boast of this infamous Vice. They are very covetous, so that Money will do any thing among them, both at Court and in the Country. They are very friendly and civil, if they can gain by it; but common People are purchased at a cheaper Rate, for let them have but Drink enough, and they'll do any thing for you.

CHAP. IV.

Of the Government of the Turks.

THE *Turks* are subject to one Prince, called by them, *The Sultan*, and by other Nations, *The Grand Seignior*, or Emperor of the *Turks*. He comes to the Empire by Inheritance, and is always of the *Ottoman* Family, for which the *Turks* have so great a Veneration, that they will not submit to any other. When the G. Seignior dies, his Son succeeds him, or if he have none, his Brother, who pitches upon a Day when he will go by Water to the Mosque of *Esoup*, where being seated upon a Tribunal of Marble, raised upon Marble Pillars, the *Mufti* says some Prayers, girds him with a Sword, and then he makes his Entry into *Constantinople* with a Cavalcade to the *Seraglio*, and this Ceremony serves instead of a Coronation. The Emperor is no sooner settled on the Throne, but he takes care to secure to himself the Possession of it, by first shutting up all his Brothers so close, that none can tell where they are, and if he has Children, putting them to Death by strangling them, making a Scruple of Conscience to shed the Royal Blood. The chief Reason of this Fratricide is to secure the Militia to himself, for so long as he has a Brother alive, they are ever threatning him with a Revolt, unless he will augment their Pay as they please. When the G. Seignior is settled on his Throne, he minds nothing but his Pleasures, being attended with a great many Buffoons, *viz.* Mutes and others, who study nothing but to invent some new Pranks to divert him, and his *Bassa's* send him plenty of the finest Women to gratifie his Lusts. His Power is absolutely and entirely Despotick, and his Will is the only Law, by which he rules. He is not curb'd by any written Law or Custom, so that the Oppressed have not so much as a Right to complain. He may take away any Man's Estate, prefer the meanest Person to the highest Dignities, and send for the Heads of whom he has a mind, without Trial or Justice, and none has Right to enquire the Cause of either. This unlimited Power of their Sultan is founded on the *Mahometan* Religion, which enjoins a blind Obedience to all his Commands under Pain of Damnation, but the *Turks* are freed in a great measure from the Effects of it, by his retiring so much from Civil Affairs to his Pleasures; for as to all publick Business he refers that to his Ministers, who have the whole Management of his Affairs, yet are obliged on certain Days every Week to give him a summary Account of them. When the G. Seignior is weary of staying in the *Seraglio*, he will go abroad to take the Air, either by

The Turkish Emperor of the Ottoman Race.

He strangles his Brethren if he have Children.

The G. Seignior going abroad for Pleasure.

by Water or Land. When he goes by Water he has little Attendance. His Galliot comes to the *Kioske* of the *Seraglio*, and from thence he goes to *Scudaret*, or the *Black-Sea*, to take the Air, being row'd by 2 *Baſtangi-Baſha's*, and 24 others, being their Favourites, on each ſide. When he goes by Land it is either in Pomp, as he does thro' *Conſtantinople* to the Moſque; but then he has ſo many Petitions put up to him againſt the ill Management of his Miniſters, that they hinder it all they can; but he will often go abroad *Incognito* in Diſguiſe, to ſee if his Orders be punctually obſerv'd, and the Chriſtians are glad of it, for by this means they are free from Affronts. Sultan *Amurath* went often out thus in Diſguiſe, and one Day cauſed a Butcher's Head to be cut off, for ſelling Meat above the Price fix'd, and 2 Men more to be beheaded at another time, for ſmoaking Tobacco, which he had ſtrictly forbidden, becauſe by taking it in their Beds ſeveral great Fires had been kindled in *Conſtantinople*, which had burnt down great part of the City.

Their Order.

Miniſters of State.

1. The Gr. Vſier.

The chief Miniſter of State is the *Grand Viſier*, who is called *King* by the *Turks*. He it is that receives Ambaſſadors, hears their Propoſals, and gives them an Anſwer, the 2 Audiences which the G. Seignior allows them being only for Ceremony at their firſt Coming and Departure. He takes care to pay the Army, decides Law-Suits, condemns Criminals, and manages the Government, having in his Cuſtody the Imperial Seal, and diſcharges the Office of the G. Seignior. This is a very heavy Charge, and requires a great deal of Sagacity and Prudence, and yet for all that few can hold it above 6 Months before they are ſtrangled, they create themſelves ſo many Enemies, and they that do eſcape muſt by their Gifts make great Friends at Court, and have the Protection of the Mother of the G. Seignior, the moſt beloved *Sultana's* and others.

2. Viſiers of the Bench.

Next to this Great Officer are the 6 *Viſiers*, called, *Viſiers of the Bench*, who are properly the chief Counſellors of State, but intermeddle not with the Government, being only conſulted upon the Points of Law by the G. Seignior.

3. The Cadileſquers.

The other chief Charges are the *Cadileſquers*, or Judges of the Army, which are as it were Chief-Juſtices, or Sovereign Judges, both of Civil and Military Affairs. They have under them *Cadies*, or inferior Judges, being Bailiffs or Provoſts, before whom ordinary Cauſes are tried, Marriages made, Liberties given to Slaves, and the Writings called *Heudgets*, or Decrees, are ordered.

4. Cadies.

5. The Caimacan.

The *Caimacan* is the Captain and Governour of *Conſtantinople*, Lieutenant of the Grand Viſier, but has no Authority but in his Abſence, and then he performs all the Offices of that important Charge.

6. Baſha of the Sea.

The *Baſha* of the Sea is the Admiral of the Naval Forces of the G. Seignior; and the *Beys* are the Governours of the Maritime Provinces, and are obliged to keep the G. Seignior's Galleys in good Order.

7. The Beys.

8. The Aga of the Janizaries.

The *Aga* of the *Janizaries*, who is the Colonel-General of that formidable Body of the Soldiers, called *Janizaries*, is a conſiderable Station. He is allow'd to come into the G. Seignior's Preſence with his Arms at abſolute Liberty, and with a confident Deportment, whereas all the other Grandees of the Port appear with their Arms croſs their Bodies, in token of profound Submiſſion.

The *Baſha's* are a kind of Vice-Roys in the Provinces; their Office is to adminiſter Juſtice exactly, and to keep the People in Subjection to their Government. They are obliged to pay a Tribute of Money and Slaves yearly to the G. Seignior, beſides the *Carache*, and other Impoſts. But they generally abuſe their Authority, and are more arbitrary than the G. Seignior himſelf, their Aim being to raiſe a Fortune ſpeedily by their Spoils and Oppreſſions. The Sultan is forced to diſſemble his Knowledge of theſe Diſorders, for want of Power to ſuppreſs them, who have the Soldiery more at their Service than he.

9. The Five chief Baſha's.

The 5 chief *Baſha's* are thoſe of *Babylon*, *Cairo*, *Buda*, *Natolia* and *Romania*, who have a Privilege of having Horſe-Tails carried before them.

10. Beglerbeys.

The *Beglerbeys* are next to theſe, and are as it were ſo many Sovereigns in the General Government of the Empire, which the G. Seignior gives them to command. Under the greateſt of theſe are ſeveral *Sangiac-Beys*, who govern ſmall Provinces.

11. Sangiac-Beys.

The *Spahi's* are a Body of about 15000 Men, maintained out of the Revenues of the G. Seignior's Mannors, or *Timars*. They paſs for the Nobility or Gentry of the Country, and ſtand much upon their Honour. The *Zaims* differ not much from them.

12. Chiaux-Baſha.

The *Chiaux-Baſha* is the Chief of the Purſuivants, or Meſſengers, who carry the Prince's Commands to all Places, are ſent of Ambaſſadors, and have the Cuſtody of all Priſoners of Quality.

The Government of Cities is managed by 5 kinds of Officers; the *Baſha*, who judges Criminal Cauſes; the *Sub-Baſha*, who is his Deputy; the *Vaivod*, who regulates Affairs in the City, walks the Rounds twice a Week, examines Weights and Meaſures, ſuppreſſes unclean tippling Houſes, puniſhes Drunkards, and all ſuch as commit any Diſorders, ſeverely; the *Cadi*, who is the Judge of all Civil Suits, and the Receiver of the Cuſtoms, and not only receives the publick Duties, but takes Cognizance of all fraudulent Practices relating to Pecuniary Duties, and judges as he ſees fit. Theſe Officers make it their Buſineſs to ruine and diſcredit one another.

They have no written Laws, but what are contained in the *Alcoran*, which they hold to be the Rule of Faith, and Standard of Juſtice, and every thing that it forbids is eſteemed unlawful and puniſhable. Nevertheleſs, the *Baſha's* and *Cadies* judge as they pleaſe, for the Book is ſhort, has but few Laws and Moral Precepts, and thoſe it has are ſo ambiguouſly expreſs'd and deliver'd in ſo looſe a Manner, that thoſe greedy Officers cannot deſire a more favourable Opportunity to ſatisfie their Avarice, for they judge without Appeal, and cauſe their Sentence to be executed upon the Spot. 'Tis true, ſome injured Perſons have appeal'd to the *Divan*; but 'tis ſo hard, as well as chargeable to carry a Cauſe thither, that few will attempt it.

The Divan, and the Juſtice adminiſtred there.

The *Divan* is the great Council and Aſſembly of the Nation, where all Affairs of State are debated, all Suits are ſupreamly decided, for any Body may be heard there, of what Country, Quality or Religion ſoever he be, and the pooreſt Man has Liberty to ask Juſtice of the G. Seignior in Perſon, and deliver him his Petition, which as ſoon as he has read he gives Sentence according to Equity. If it be for Debt, the Viſier upon Supplication ſends a *Chiaux* to fetch the Debtor into Court, and the Creditor bringing his Witneſſes, the Priſoner is condemned to die, and the Sentence is immediately put in Execution; for all Things are diſpatched with ſo much Expedition that a Matter no ſooner comes to an Hearing, but it is preſently conſulted, judged and determined. No Trial, unleſs in a difficult Caſe, will laſt above 4 or 5 Hours without Sentence given one Way or other, ſo that no Man is weary'd and ruin'd by Lawyers and Delays, as in other Places: Nor is there any Fear that wrong Juſtice will be adminiſtred, becauſe at the End of the Hall where they ſit, is a Window cover'd with black Crape, where the G. Seignior hears and ſees when he pleaſeth, without being diſcerned, and the Judges, fearing he may be there, dare not adminiſter partial Juſtice, for if he finds it out, it would immediately coſt them their Lives.

It's ſpeedy as well as impartial.

The Treaſury is opened upon all *Divan* Days, but firſt the *Chiaux-Baſha* looks whether the Seal be whole, and then takes it off, and when they have taken out or put in what they pleaſe, he ſeals it again with the Grand Viſier's Seal.

Officers give an Account of their Charge to the G. Seignior.

While the *Divan* is ſitting, the *Aga* of the *Janizaries*, the *Spahilar-Agaſi*, the *Cadileſquers*, the Officers of the *Divan* and the *Viſiers*, being introduced by the *Capidgi-Baſha* and *Chiaux-Baſha*, are brought before the G. Seignior, to give an Account of their ſeveral Charges, and what they have done, and none of them can promiſe themſelves to bring back his Head again, becauſe the G. Seignior for a ſmall Offence will cauſe them to be ſtrangled on the Spot. In all Things the *Turks* are great Lovers and Obſervers of Order. They take a ſpecial care of Proviſions, that all Things be had in Plenty and at reaſonable Rates, and he that has taken Pains to bring Fruit to the Market firſt has no Advantage, but to take his Money firſt; for he muſt not exact a great Price, or ſell dearer, unleſs he has a mind to be ſoundly drubb'd, baſtinado'd and fined. They have Officers to examine every Man's Weights and Meaſures, who daily go their Rounds, and if they find any Man's Weights too light, or that he ſells his Goods too dear, they fail not to order him ſo many Blows with a Cudgel on the Soles of his Feet, and make him pay a Fine; ſo that moſt Sellers are ſo afraid of offending, that they'll give you ſomething above Weight, and they dare not cheat the leaſt Child.

Proviſions reaſonable.

Weights & Meaſures.

Every

Quarrels prevented.

Every one is obliged to hinder any Quarrels or Disorders that happen in the Streets; for there is a Law, that if a dead Man be found before any Man's Door, he must pay for his Blood 500 Piastres, or 45000 Aspers; so that every Man is obliged to see, that no Noise be made before his Door, and hinder all ill Effects of it: If he who committed the Fact be taken, and convicted of it, he is discharged of the Sum, and the Murtherer is punish'd, unless the Relations of the Deceased will hearken to an Accommodation, for then the Murtherer is allow'd to ransome himself, which is usually done by paying 3 or 400 Crowns. Duelling is never heard of among the *Turks*, which must be ascribed to the Precautions of their Prophet, who by forbidding Wine and Gaming for Money, has cut off the Causes of it, Drunkenness and unlawful Gain. To prevent any Accidents in the Night-time, all Persons whatsoever are prohibited to go abroad after the Evening is shut up, except in the *Ramadan*, or *Lent*; and if the Under-Basha, who is Captain of the Watch, and walks his Rounds all Night, as our Constables do, meets any Man, he is carried before the *Cadi*, who examines him, and if he cannot give a good Reason for his being out late, he is fined and bastinado'd, and if he be dismissed without Fining, 'tis a Disgrace to him.

Not to be abroad in the Night.

Money of the Turks.

The Money current at *Constantinople*, is, the *Mangour*, which is half a Quadrin, which is a Copper-Money, and 6 of them make an Aspre, which is a little Piece of Silver, stamp'd with the G. Seignior's Name, and worth 8 Deniers, or 3 *q.* Sterling. The *Isolette* is worth 55 Aspres. The *Aslani*, or *German* Rix-Dollar, so called because it is stamp'd with a Lion, in *Turkish Aslan*, is worth 80 Aspers, and the Piastre, or *Picade*, 90. The *Turkish Chequin* is worth 2 Aspres, and the *Venetian* 12. The Aspres are many of them Counterfeit.

Their Weights.

Their Weights are the *Quirat*, which is 4 Grains, and 16 of them make a Drachm; the *Medical* is a Drachm and an half, 12 Drachms make an Ounce; the *Rotte* is 12 Ounces; the *Oque* is 3 *Rottes*, or 400 Drachms; and the *Cantar* is 150 *Rottes*.

Their Punishments for Offenders.

The *Turks* use several sorts of Punishments for Offenders; those for smaller Faults are Blows upon the Soals of their Feet, or Buttocks, with a small Stick or Switch. The Feet of the Sufferer are so held up by 2 Men in a *Falacca*, or Wooden Instrument, that they cannot stir them, and then 2 more with Switches lay on Blows upon them, as upon a Smith's Anvil, till he that is to see to the Execution say there is enough. Such as have received many Blows (as sometimes they inflict 3 or 400) are not able to go for 3 or 4 Months after, but they'll bear 30 without any great trouble. Masters may give no other Correction to their Servants and Slaves than this, and they are usually so severe, that for fear of Punishment, they are wonderfully well served: You may see their Servants stand before them a whole Day together like Statues, with their Hands upon their Bellies, expecting their Master's Command, which at the least Wink of an Eye is readily obeyed. School-Masters do not whip their Scholars as we do in Christendom, but chastise them on the Soals of their Feet. When they chastise any Person on the Buttocks, the Party is laid on his Belly, and the Blows are laid on over his Drawers: Sometimes they give 5 or 600 Blows, but that's the highest, and if any Man hath been thus handled, a great deal of mortified and swollen Flesh must be cut off with a Razor from his Buttocks, to prevent a Gangrene, and he must keep his Bed 5 or 6 Months before he is able to go about his Business.

The Correction of Servants.

Women are only chastised this Way, when they deserve it: Such as deserve Death for their Crimes are punished with Strangling, Hanging, Drowning, Beheading, Burning, Empaling, or Throwing upon Spikes of Iron. When any Man is to be hang'd, which is done for Robbery or Murder, they will make a Christian to be the Executioner, if they can light of any. In Beheading, which is done for Rebellion or Sedition, they are so dextrous, that they never miss cutting them off at one Blow. The *Gauche*, or throwing upon Spikes or Hooks, which is performed by letting the Malefactor fall upon them, and hang there several Days, till he expire with Hunger, Thirst and Pain, is accounted so cruel a Death, that the *Turks* very seldom practise it. The *Turks* that turn *Christians*, are burnt alive with a Bag of Powder hang'd about their Necks, and a Pitch'd Cap upon their Heads; but *Christians* that do or say any thing against the Law of *Mahomet*, or are taken with a *Turkish* Woman, or go into a Mosque, are empaled, unless they will turn *Turks*; for they are so zealous for their Religion, that a *Christian* may redeem his Life by turning *Turk*, whatever Crime he has been guilty of; but in these, as well as many other Cases, if he will not turn *Turk*, he is put to Death; but a *Turk* has no Way to save his Life.

Women how chastised.

Capital Punishments.

Punishments for *Christians*.

CHAP. V.

Of the Grand Seignior's Forces by Land and Sea.

The G. Seignior's Dominions and Armies.

THE Grand Seignior's Arms have gotten him that vast Power, and large Dominions he holds, but by their Means took from his Neighbours, for he always maintains a Standing Army, both in War and Peace, to defend himself and surprize others: His whole Army, which consists of Horse and Foot, are punctually paid once in 2 Months. The Infantry are of several Orders, as *Capigi's*, or Porters, who keep the Gates of the *Seraglio*, and stand round the G. Seignior when he gives Audience to Ambassadors: They are in all 3000, and have a Captain, called the *Capigi-Bassa*: They execute Death upon such as are fallen into the Sultan's Displeasure: They wear a Cap with a Cone half a Foot long. *Solaques*, which are the G. Seignior's Life-guard, and attend him when he goes abroad in the City: They wear a *Doliman* with Hanging-Sleeves, and a Cap stuck with Feathers in Form of a Crest, their Bow always hangs on their Arm, and their Quiver is always full of Arrows ready to draw, if need requires; but the Chief of their Infantry are the *Janizaries*, who are either Children taken for Tribute, and educated in the *Oda's* of the *Seraglio*, or Runagado *Christians*, and some few *Turks*: This Order was instituted by *Ottoman* the First, Emperor of the *Turks*. They call one another Brothers, and will not endure the Meanest of their Body to suffer the least Injury, and none but their Officers dare lift up an Hand against them upon Pain of Death: They can beat any Man, and no Body dare touch them; but no Love or Money can save the Life of him that has beaten a *Janizary*; and upon this Account Ambassadors take them into their Retinue, and Travellers hire them for their Guides: They are distinguish'd from other *Turks* by their Caps, called *Tarcola's*, which being made like the Sleeves of a *Casaque*, hang down behind, and have a Cone on the Forehead half a Foot long, gilt with Silver, and embroidered. Their Pay is from 2 to 6 Aspres a Day, and a Piece of Cloth every Year. The *Janizaries* of the Port are 12000 in Number, and live in 2 Inns or Colleges, containing 160 Chambers, in every one of which are 30, 40 or 50 Soldiers. Every Chamber has 3 Officers, *viz.* The *Chobargi*, or Captain; *Oda-Bassa*, the Chief; and the *Vikil Hardge*, i. e. the Steward. Over these is the *Kiaya-Bey*, or Lieutenant-General of the *Janizaries*; and over all the *Aga*, or General, who is always a *Muteferaca*, or Person of Quality. He has not Power to punish any Soldiers by himself, but upon Complaint he delivers him to the *Oda-Bassa* to be punish'd, which can be done only in the Night, for Soldiers can neither be beaten or put to Death in Publick. They are beaten on the Soals of the Feet for ordinary Crimes, and if they deserve Death, they are strangled, and thrown into the Sea in a Sack, a Cannon being discharged for every one that suffers. The other lower Orders of Infantry are, *Azapes*, or Pioneers; *Dgebegi's*, or Curassiers; *Topidgi's*, or Gunners; and others.

The *Janizaries*, and by whom instituted.

Their Pay, Number and Lodgings.

Their Punishment.

The

The G. Seignior's Cavalry.

The G. Seignior's Cavalry are the *Chiaux*; their Employment is very honourable, for they execute most of the Commands of the G. Seignior and his *Basha's*, and are sent on Ambassies to Foreign Princes: Their Caps are a Foot in Diametre, and are long and flat above: The G. Seignior and his *Basha's* wear them.

The *Muteferaca's*

The *Muteferaca's* are all Persons of Quality, and their Captain is the G. Seignior himself, and therefore they never go out to War, but when the G. Seignior goes in Person.

The *Spahi's* of 2 sorts.

The *Spahi's* are the ordinary Troopers, or Light-Horse, and are of 2 Sorts. Some receive their Pay every 2 Months, which is from 15 to 40 Aspres. They are divided into 6 Regiments, and have each a several Commander, called *Buluk-Agasi*, and different Colours. The others have, instead of Pay, a *Timar*, or Pension, from the Conquer'd Territories, where they reside usually, and obey the *Sangiac-Bey*, or Lord of the Mannor, that rules that Quarter. They are very numerous, being dispersed all over the Empire, and being required by the G. Seignior, bring him many Horse to his Wars. The G. Seignior is Heir to all in his Pay, if they die without Children, but he takes but 2 Thirds if any leave Daughters.

A great Army soon raised by the G. Seignior.

Things being thus ordered, it is easie for the G. Seignior to raise an Army of 2 or 300000 Men in a very little time, by sending his Orders to the *Basha's* and *Sangiacs* only, who come in with their Servants, Soldiers of their Governments, and *Timar-Spahi's* instantly. Nor is he at more Charge in War than Peace, for all maintain themselves and Servants; and so good Order is kept in their Camps, that where-ever they are, they are made a Market, because they exactly pay for all they have; nay, Merchants travel securely by or thro' them, without Fear of being plunder'd. All their Soldiers are both strong and courageous. They live on a small Matter, and are so hardy, as never to be wearied with Travel. They ever fight like Lions, chusing rather to be cut in Pieces than retreat, unless the Enemy exceed them much in Number. That which makes them so courageous is the Confidence they have in Destiny, believing, that they can't die before their Time is come tho' 100000 Men seeks their Lives, and if they die in the Field, they should also have died at Home, which makes them fearless of all Diseases and Dangers of Death. They are also so zealous for their Religion, that they will chearfully die in fighting against the Enemies of their Law, believing, that they die Martyrs, and shall after Death enjoy the Delights that *Mahomet* hath promised them.

Their Courage caused by their Religion.

Their Obedience to their Commanders.

Moreover, they will blindly obey the Order of their Commanders, running into the greatest Dangers of War as chearfully as to a Feast; and besides, they are well arm'd with a good Musket and a handsome Sword, with other suitable Habits and Accoutrements, insomuch, that it is not to be thought strange, if they are very strong by Land, and bring almost every Thing to pass that they undertake. But tho' the *Turks* are very strong by Land, and succeed well in their Wars there, yet they are neither fortunate nor stout by Sea, and always worsted, unless they be Six to One; and the Reason is, because they have neither good Ships nor good Men. They are very unskilful in Building their Ships, and when they have done, they not only want good Sea-Officers to manage them, but Soldiers to man them; for even those *Janizaries*, who know not what it is to give Ground on Shore, always go to Sea against their Wills, and if they can get off for Money, never fail to do it; and no Wonder, if their Navy can never be victorious, when all Things are so unfit for Battle. And hence it is that the *Venetians* gain great Advantages over them, and particularly in 1656. gave them such a signal Defeat at the *Dardanelles*, where they lost 27 Ships, 37 Galleys, and 8 Maones, that all the *Turks* were put into Consternation by so great an Overthrow, and imagined themselves to be Slaves to the *Venetians*, who, had they pursued their Victory, would certainly have driven the *Turks* out of *Constantinople*, and, perhaps, out of *Europe*; for the G. Seignior was preparing to flee into *Asia*, and the *Turks*, believing that God had decreed that Time for their Expulsion out of *Europe*, as one of their *Imans* had foretold, would easily have departed; but the *Venetians*, neglecting the Advantage, suffered the *Turks* to resume their Courage, and thereupon they grew more terrible to the Christians, whom they could not see without Regret, and threatned them with Destruction at their *Biram*.

The Venetians defeat the Turkish Fleet.

But as the *Janizaries*, when obedient to the G. Seignior, render him one of the formidablest Princes upon Earth, so they strangely limit his Power when they lose that Respect to him, and revolt, which they pretty often do; and then, slighting all Commands, they follow the Dictates of their own furious Passions, and run down all that comes in their Way, for they have strangled several G. Seigniors, and among others Sultan *Osman*, because they smelt out his Resolution of dissolving their Body, as the only Curb to his unlimited Power, and set up his Uncle *Mustapha* in his Place; and in the next Succession Sultan *Ibrahim*, his Brother, and Father of *Mahomet*, who now reigns in the Year 1655. And this present Prince they reduced to such Streights, that he was forced to grant them all that they demanded, and put many of the chief Officers of the Court to Death to appease them; but whoever they attempt against, yet they always so respect the Royal Blood, and have so great a Veneration for the Race of their first *Ottoman*, that they never so much as dream of altering the Succession from that Family.

CHAP. VI.

Of the Christians *and* Jews *that are subject to the Grand Seignior.*

The *Greeks* in Turky.

THE Subjects of the G. Seignior who are not *Mussulmans*, are either *Christians* or *Jews*. The *Greeks* are the chief of the *Christians*. They wear the same Habit with the *Turks*, save that they may not wear Green on any part of their Bodies, without Danger of being soundly bastinado'd and fined, nor a * Turban all White, lest they be forced to turn *Turks*, or die for it; but all other Colours they may wear, tho' it be better not to use all Red or Yellow, for fear of offending the Soldiery. The *Papa's*, or *Greek* Priests, are always clad in Black, but their Cap has a List of White. They wear long Hair, and so do their Monks.

* Mr. *Le Brun* says, 'Tis a Mistake, that *Christians* may not wear White or Green Turbans among the *Turks*; for, he adds, That he himself wore a White One at *Ephesus* and *Constantinople*, and was never so much as called in Question; and he knew others wear Green Ones; but he confesseth, 'tis the safest Way not to meddle with them, to prevent the Trouble that may happen on that Score.

The Greek Priests are their Orders.

As for their Religion, they differ from the Church of *Rome* in these Points: 1. They maintain that the Holy Ghost proceeds only from the Father, and not from the Son, but at most by the Son; yet they believe him to be God, and the Spirit of the Son. 2. They deny the Pope to be Head of the Church, and have 4 Patriarchs of equal Authority, to whom they submit in their several Jurisdictions, *viz. Constantinople*, *Antioch*, *Alexandria* and *Jerusalem*; but they are all raised by Bribery to their Dignities by the G. Seignior, and confirmed by the G. Visiers and Basha's of those Countries, as the G. Seignior's Deputies, from whom they receive a *Caftan*, or Vest, at their Confirmation. They have several Archbishops and Bishops under them; but they must first have been *Caloyers*, or Monks, and observe their Rule during their Lives. The Priests are regular, who are not married, and Seculars who marry. 3. They admit of no

Their Monks in Orders.

no Purgatory, but hold a 3d Place, where the Bleſſed remain in Expectation of the Day of Judgment, before which Time, tho' they believe not the Saints to be admitted into Paradiſe, yet they pray to them to intercede for them. 4. They uſe Leavened Bread in the Sacrament, ſuch as they commonly eat, and communicate in both kinds, as well Laymen as Prieſts, and Women and Children as Men, and condemn the *Latins* for debarring the Laity of the Cup. 5. They have 4 *Lents*, but the firſt, which begins 6 Weeks before *Eaſter*, and laſts till that Feaſt, they keep moſt ſtrictly, calling it the Great and Holy Faſt; for they eat nothing that hath Blood, nor Oil, but only Herbs and Shell Fiſh, as the Cuttle-Fiſh and Oiſters. In the other 3 *Lents*, one of which is kept in Honour of the Bleſſed Virgin, and the other of St. *Peter* and St. *Paul*, they may eat Fiſh and Oil.

The *Armenians* keep their *Lent* ſtricter than the *Greeks*, for they eat no kind of Fiſh nor Oil, nor drink any Wine, but live only on Bread, Water, Herbs and Roots. Their Churches are like ours, ſave that the high Altar is divided from the reſt of the Church by a Wooden Partition with 3 Doors, which make a kind of *Sanctum Sanctorum*. They have no Images, but Pictures only. They never kneel in their Churches, no not ſo much as at the *Elevation of the Hoſt*, but lean upon Crutches, of which they have plenty for that end. No Man can be admitted into Prieſts Orders till he is full 30 Years old. Prieſts are allow'd to marry but once in their Life-time, and that to a Virgin, who is alſo under an Obligation not to marry, if her Husband dies.

Their Maſs is much the ſame in Subſtance with the *Latins*, ſave that it is much longer, for it takes them 5 Hours in a Day to read it over only, which occaſions ſo many of the Clergy to omit it, that there is ſcarce any Place where it is regularly read, unleſs it be in Mount *Athos* and *Neomagni*, a City of the Iſland of *Scio*, and in ſome few well regulated Monaſteries. Their whole Liturgy is contain'd in 7 Books. 1. *Triodion*, which contains the Office for Faſt-Days. 2. *Euchologion*, which is a General Office for all Days, and all Occaſions. 3. *Paraclitiske*, which contains all the Hymns compoſed in Honour of the Virgin *Mary*. 4. *Pentecaſterion*, which is the Service of the Church from *Eaſter* to *Whitſuntide*. 5. *Menæon*, an Office belonging to each Month. 6. *Horologion*, the Service for all the Canonical Hours for every Day. 7. *Antoicion*, which comprehends all that uſeth to be read in the ordinary Service of every Month throughout the whole Year. This Part of their Liturgy, they ſay, every Prieſt ought to have, and it ought to lie in every Church; but as to the reſt the Length of them is ſo tedious, and the Price ſo great, that moſt of the Biſhops, Prieſts, yea, even their *Caloyers*, never trouble themſelves with it.

Their *Caloyers*, or Monks, lead a very auſtere and exemplary Life. They make 3 Vows: 1. Of renouncing the World. 2. Abſtaining from Fleſh: And, 3. From Marriage; which they very ſtrictly obſerve, eſpecially in the larger Monaſteries of Mount *Athos*, *Neomagni*, Mount *Sinai*, St. *Saba* and St. *Michael* of *Jeruſalem*, which are beſt governed. Their Food is the Product of the Earth, and Fiſh, except on Faſt-Days, when they will not eat any thing that hath Life. Some of them, who are called *Aſcetai*, live only on the Fruits of the Earth, and to that End leave their Cloiſter to live on the Mountains, and never return but on great Feſtivals, to aſſiſt at the publick Service. All their Monks are divided into 3 Orders, *viz.* St. *Baſil*, *Elias*, and St. *Marcellus*; and in all of them they have 3 ſorts of Monks, Superiors or Elders, called *Egoumenoi*, the Profeſſed and other Fathers, and the Novices, with the Lay-Brethren; but the Superiors, tho' had in great Veneration, have little Authority, except in oppoſing ſome trivial Penances; for they are afraid leſt by Severity the Monks ſhould turn *Turks*, as they have had many Inſtances, and therefore their Monaſtick Diſcipline is almoſt loſt; yet they ſtill retain the Prerogative of ſtripping ſuch Monks of their Habit who have been guilty of ſome notorious Crimes, and will not ſubmit to their Rules. The Profeſſed alſo take the ſame Liberty alſo to lay down their Habits when they pleaſe, yet not without ſome Scandal to the others, and rendring themſelves contemptible; however, upon their Repentance, and undergoing ſome ſlight Penance, they are re-admitted. Theſe profeſs'd Monks, ſo long as they are in the Convent, take care of the Fruit, Corn, Sheep, and other Things that belong to the Cloiſter. The Novices and Lay-Brethren work in the Fields, and tho' they return never ſo weary from their Labours in the Evening, yet they muſt attend at a long Prayer, and make many Genuflexions, which they call *Netaniai*, before they eat their Supper, or go to their Reſt. Over all theſe Monks are placed Provincials, or *Viſitors*; but inſtead of reforming the Abuſes of the Monaſteries, which ſhould be their Buſineſs, they only gather up the Money which the Patriarch exacts of them. And, indeed, theſe *Viſitors* come ſo often, that they are miſerably poor, and are thereby made very ignorant and illiterate, becauſe the Time they ought ſpend in their Studies, they are forced to employ in labouring for a Subſtenance. But, notwithſtanding this general Poverty of the Monks, ſome few Monaſteries are ſo well endow'd, and their Monks are ſo rich, as to be able to raiſe great Sums of 50 or 60000 Crowns to purchaſe the Patriarchate; yea, ſometimes before the preſent Poſſeſſor is dead, for the G. Seignior never refuſeth Money. Their Secular Prieſts, called by them, *Coſmicoi Ieres*, are thus made: Firſt they take the Tonſure upon them, *i. e.* are ſhaven on their Crowns the Breadth of one's Hand, and are thus taken into the Service of the Church. Then after ſome Months they are created *Anagnoſta's*, or Readers, becauſe 'tis their Buſineſs to read the Mattins, Pſalms, and ſome other Things, which the Clerks uſe to ſing. When they have ſerved the Church ſome Months in this Office, the Biſhop confers upon them Deacons Orders, and a Power of waiting at the Altar and chanting the Epiſtle. When they are Deacons, if they have a mind to marry, they are allow'd it, provided they give Notice to the Biſhop of the Woman and her Abode, that he may enquire after her; for if ſhe be not chaſte, wiſe and handſome ſhe is not a fit Wife for a Prieſt, nor will the Biſhop ſuffer their Marriage. And, indeed, the *Greeks* are ſo ambitious to beſtow their Daughters on the Prieſts, that if it be known that a Prieſt deſires to marry, all are forward to ſeek out the greateſt Beauty for him, as if they were to conſecrate it to God, and to court ſuch Women they are diſpenced with in their Service, and upon their Return into it are made Prieſts.

The Under Miniſters of the *Greek* Church are, 1. *Seruophylaces*, or Sextons, who look after the conſecrated Plate, and other Utenſils of the Church. 2. The *Colonarchai*, who inform the Singers what Tunes to ſing. 3. The *Tyrroroi*, or Porters, who open and ſhut the Church-Doors. 4. The *Candilaphthi*, who take care of the Tapers.

The Service of the *Greek* Church is ſaid ſeveral times a Day. In the Monaſteries they riſe at Midnight to perform a particular Form of Devotion, called, *Meſonuction*, and to prepare them for ſome great Feſtival; they turn it into an *Holonuction*, or an All-night's Service. After this they celebrate a Service at Break of Day, called *Oortos*; another at the firſt Hour, called *Protiora*; and ſo again at the 2d Hour, called *Tritiora*; and at 9 a Clock in the Morning, called *Ekteora*: Then follows the *Ennati*, the Liturgy and the Euchariſt at 3 a Clock in the Afternoon, and *Eſperines*, or Evening-Service; after which they uſe ſome ſlight Exerciſe till they go to Supper, and when that's done, they return again to Church, to perform the Service called *Apodipho*, or, The Service of the Night, which in the *Romiſh* Church is called the *Complines*.

The Miniſters of Churches follow the Example of the Monks as near as poſſible, ſo that in all Churches, be they rich or poor, there is every Day performed the *Hagia Koinonia*, or Celebration of the Euchariſt, and ſome Churches more than once, but at different Altars. None of theſe Ceremonies or Uſages are performed in Conformity to the Church of *Rome*, for they abominate both them and all their Cuſtoms, and if a *Latin* Prieſt ſhould ſay Maſs at any of their Altars, they would waſh them, as polluted. At the Cloſe of every *Thurſday* they excommunicate the Pope and all the *Latin* Biſhops, and damn them as ſo many Hereticks and Schiſmaticks. They have ſo great a Number of Holidays, that there is no Day in the Year but is conſecrated to ſome Saint; but thoſe they have in greateſt Veneration are, beſides the Feaſts of Chriſt and his Apoſtles, the Invention and Exaltation of the Holy Croſs in *Sept.* the Feaſt of St. *Demetrius* in *Octob.* St. *John Chryſoſtom* and the Virgin's Entrance into the Temple in *Nov.* St. *Nicholas*, St. *Spiridion* and St. *Ignatius* in *Decemb.* the Feaſt of St. *Baſil*, St. *Anthony*, St. *Athanaſius*, St. *Cyril*, St. *Gregory Nazianzen* and

Christ's Baptism in *Jan.* St. *Simeon*'s Meeting with Jesus and St. *Blasius* in *Febr.* the 40 Martyrs in *March*; St. *George* in *April*; St. *Athanasius*, *Constantine* the Great and *Helena*, and the Invention of St. *John Baptist*'s Head in *May*; St. *Marinus*, *Elias* the Prophet, St. *Parasaua* and St. *Pantaleon* in *July*; Christ's Transfiguration, the Death of the Virgin *Mary*, and the Beheading of St. *John Baptist* in *August*. On these Days they read in the Church the Life and Actions of these Saints in the vulgar Tongue, out of their *Synaxarion*, or Martyrology, and conclude the Service with the Distribution of the *Eucharist*; and generally the People who come to hear, bring an Offering of Bread, Wine, Oil, Tapers, and the like, for the Use of the Priests, and give liberally to the Poor, even beyond their Abilities. They celebrate *Easter*, which they call, Πάχα ανεστασίμον, *i. e.* the Passover of the Resurrection with great Demonstrations of Joy. By the Laws of their Church, they are obliged to confess themselves 4 times a Year, but not so particularly as the Church of *Rome* requires, and after they have done some Penance, or promised, they are absolved in Form of a Prayer: Let thy Sins be forgiven. They look upon Baptism indispensibly necessary for Salvation, and tho' they baptize not till 8 Days are past after the Birth, unless in case of Necessity; yet when a Child is in Danger, they allow *Laicks* of both Sexes to baptize, because they dare not hope well for Children who die unbaptized. They rebaptize Hereticks and Apostates, when they repent and desire to come into their Church. Among the former, they reckon the Papists. They have a great Aversion to Images in *Basse-Relief*, and say, the Papists imitate the Heathens in the Use of them, but the Pictures of Christ and the Saints they account Holy, and pay a Reverence to them, and to that End set them up in their Churches on their Festivals.

Christians once try'd for eating Things strangled.

They condemn all the Western Christians for eating Things strangled, and count them Hereticks for so doing. They follow the Doctrines of the Ancient Fathers, and the Canons even of the first General Councils, very exactly, and think all others of no Force. The *Turks* make them pay very severe Capitations for their Religion sake, and which is worst to them, take their Children from them often by Force, to educate them in the *Mahometan* Faith, and make them *Ichoglans*. Tho' they have many Churches, yet they are obliged to take great Care to keep them in repair, lest they have no Churches at all, for the *Turks* very rarely will suffer them to rebuild them, if they fall, but they are allow'd to repair them. In their Churches they have a Candlestick which holds Three Candles, by which they say, is represented the Holy Trinity; and another Two, which signifie the 2 Natures in Christ. Their Sacerdotal Vestments have also the like Mysteries. In giving the Blessing, they make the Sign of the Cross from the Right to the Left, contrary to the *Latins*.

Maids shew not themselves before they are married, no not so much as to their Relations, and therefore go not to Church for fear of being seen. They are married by a Priest, and give a Ring like the *Latins*, but take Godfathers and Godmothers, which they do not. The Bride and Bridegroom being come before the *Papa's*, or Priest, he says some Prayers over them, while the Godfathers and Godmothers hold a Garland of Flowers, mix'd with *Orpine*, over their Heads, and a Pall over it. The Father and Mother of the Bride give her; and when Prayers are done, the Bride and Bridegroom drink to one another, and the Glass being given to the Priest, he merrily drinks it off, and then breaking the Glass, says, *So may this Bridegroom break the Virginity of the Bride.* Their other Rites are like the Papists. Their Marriages.

Their Way of ordinary Living is much like the *Turks*, only they are more wicked, for they are covetous, perfidious, treacherous, *Sodomites*, revengeful to the highest Degree, very superstitious, and great Hypocrites, for which Qualities they are so much despised by the *Turks*, that they do not value them, tho' they turn *Mahometans*. They are greater Enemies to the Papists than the *Turks* are, and none would hinder them from being Masters of *Turky* more than they, if Providence should favour them to recover *Europe*. Their Women are beautiful, and a little too fat, and very proud. Their Way of Living.

The *Jews* in *Turky* use the same Habits with the *Turks*, but may not wear Green, a White Turban, and Red Vests, and so are obliged to wear their Mestes, Pabouches and Caps, which are shaped like an Hat, of Violet Colour only. Their Religion is contain'd in the Old Testament and *Talmud*. As to their Manners, they are great Cheats in all Places, and their only Contrivances are to vex both *Christians* and *Turks* with their Taxes and Tricks, which is the Reason they are hated and despised in all Places. All the *Jews* and Male *Christians*, which are subject to the G. Seignior, pay the *Karadge* Yearly, which is a Tribute of 4 Piastres and an half, beginning to pay it about 9 Years old, but the *Christian* Priests and Monks are exempted from it, and so are the *Jewish Rabbi's*; the Women also pay nothing: This Tax brings in a great Revenue to the G. Seignior, and no Body can avoid it by frequently changing their Habitation, for at whatever Place they come in their Travels, their *Karadge* is demanded, and if they have paid it in any other Place, they must shew their Acquittance, and if they can't produce one, they must pay it, and take a Note or Acquittance to serve them in other Places; but such as are not subjected to the G. Seignior, do not pay this Tribute, and to shew that, they wear an Hat, and have a Certificate of their Abode from a Consul. The Jews.

CHAP. VII.

Of the Author's Voyage from Constantinople *to* Alexandria, *and* Grand Cairo, *in* Ægypt.

Bursa described.

MR. *Thevenot* left *Constantinople* Aug. 30. 1656. and sail'd in a Caique to *Montagna*, from whence he rode to *Bursa*, which was called by the Ancients *Prusea*, the Metropolis of the ancient Kingdom of *Bithynia*, and was the Capital City of the *Turkish* Empire in the Reign of *Orcan*, the Son of *Osman*, the first Sultan who took it in the 726th Year of the *Hegyra*, and in the Year of our Lord 1325. but it was taken from *Bajazet* by *Tamerlane*. It is about 10 Miles distant from Mount *Olympus*. It is pleasantly situated, and Water is so plentiful, that besides what they have in all their Dwellings, they have Fountains in their Houses of Office for their Ablutions. They have some Waters that run thro' the Town so hot, as to boil an Egg, of which they have made several Bagnio's, which serve for the Cure of many Distempers, and People come above 100 Miles to wash in them. There are many fair Houses in the Town, and above 200 Mosques; many *Hans*, very magnificently built and constantly inhabited, because the Caravans from several Places pass thro' this Town; but the most remarkable Buildings of this City are the Sepulchres of the first *Turkish* Emperors and their Sultana's, in so many Chappels built Dome-wise. Among them is said to be a *French* Sultana, who being taken Captive, and presented to the G. Seignior, so much ravished his Affections, that he enjoy'd her, but permitted her to exercise her Religion to her Death. The *Christians* after her Death desired to have the Care of her Burial, but it was not granted them, and so she lies in a little Chappel, arch'd and inclosed with Walls among the rest. This Town is about half a *French* Lg. in Length, not entirely wall'd, and has a Castle standing in the middle on a little Hill, which has a Bastion that renders it impregnable; but the Water that supplies it runs through the Town, and so may

Hot Waters.

The Sepulchres of the first Turkish Emperors.

may be cut off. No Christian is allow'd to go into it, lest they should endeavour to regain it, because it was taken from them, and that by stopping the Water. Within this Castle was formerly the *Seraglio* of the first Sultans of the *Ottoman* Family, but it is now demolished. It is said to be built by an Emperor's Daughter, who was cured of a Leprosie by washing in the hot Waters of this Town, being taught the Experiment by a measly Hog, who washing in it was cured. Close by the Town is an Hill, where a *Turkish Hermite* lives in a Chappel, which is enclosed with good Walls and Iron Gates. In it are the Tombs of one *Roland*, or *Orland*, and his Son, with his Sword and Mace lying on a Table just by, who valiantly defended this Castle against the *Saracens* in the Life of the Foundress and slew many of them.

A Leprosie cured.

From *Bursa* he went to *Smyrna* with the Caravan, and because nothing is to be met withal upon this Road, but Water, Travellers must carry all their Provisions and Household-stuff along with them, or want both. The Way lies thro' *Tablitalie*, *Loubat*, *Soufurluc*, *Dgelembe*, *Palamout* and *Manasia* to *Smyrna*. This Town is a noted Place in *Ionia*, built at first by *Tantalus*, named so from an *Amazon*, who took it, and when it was demolished by an Earthquake, rebuilt by *Mark Antony* nearer the Sea, to make the Harbour more commodious. It brags that it was the Native Place of *Homer*. The *Turks* call it *Ismyr*. It is a large Town, and well inhabited, both by *Turks* and *Christians*, but is neither pleasant nor strong. It is commanded by a Castle, at the Bottom of which in the Way to the *Greek* Church, called *Santa Veneranda*, is a great Amphitheatre, where St. *Polycarp*, St. *John*'s Schollar and Bishop of *Smyrna*, suffered Martyrdom. Near it are the Ruines of St. *John*'s Cathedral Church, which had several large Chappels, and in one is still a Tomb, which, the People say, is St. *Polycarp*'s; but it seems rather to be some *Turk*'s. The Port is but small, but the Road is spacious and safe, and has a Castle lately built, to hinder what Ships they please from coming in, or going out. By the Road stands the Custom-House, and the Houses of the Consuls and Merchants *Franks*, who have for the most part a back Door towards the Sea. In it is a *Cadi* to administer Justice.

Smyrna described.

St. *Polycarp*'s Martyrdom and Tomb.

Besides *Turks*, there live in it *Christians* of all Countries, *Greeks*, *Armenians* and *Latins*. The *Greeks* have 2 Churches, *viz.* St. *Veneranda*, where their Archbishop officiates, and St. *George*, which belongs to their Monks. The *Armenians* also have 2 Churches, and the *Latins* as many, one of them belonging to the *Capuchins*, which is over-against the *French* Consul's House, and the other to the *Jesuits*, which has a lovely House adjoining to it. The Country about it is plain and fertile in Olive-Trees, and full of Gardens. All Things there are in abundance, and their Wine is most excellent. It is very much subject to Earthquakes, which happen every Year, and often ruine the Town; but 'tis soon rebuilt again, because of the Convenience of its Situation. The Air in Summer-time would be very hot, were it not for the low Wind, or North Breeze, as they call it, which blows regularly every Day, and much qualifies the Air. About *Smyrna* are found that remarkable Animal, called a *Cameleon*, of which tho' many Things that are related are fabulous, yet these are found true by Mr. *Brun*, who kept 4 of them 6 Months on purpose to know the Nature of them. They live upon the Air, and never eat nor drink; yet do catch and swallow Flies. They often change Colour, sometimes 3 or 4 times in the Space of half an Hour. The Colours which they usually change themselves into are a fine Green, mix'd with yellow Spots, and sometimes brown Spots, a brown Colour, like Moles, and their ordinary Colour, which is like a Mouse-grey; but they never assume a Red, nor many other Colours. What the Naturalists say of them, That they assume the Colour of all Things on which they lie, he could not find true, yet once his best *Cameleon* being laid on a white Night-Gown, appear'd so very white, that he could hardly discern it. It is a small Animal, has no Intrails, but the Belly is full of small Eggs. Their Tongue is as long as their Body, and at the End of it is a viscous Humour, which takes the Flies. Their Eyes are as black as Jet, and, what is most peculiar to them, they can turn their Eyes 2 several Ways, and with the one look up, and with the other down at the same time. Their Skin is thin and transparent, but they are short lived, not living above 5 or 6 Months.

Christians, and their Churches.

The *Cameleon*.

Ephesus lies not above 14 or 15 Lgs. from *Smyrna*. In the Way is a Village called *Sedequi*, about 3 Lgs. from *Smyrna*, situated in a very pleasant Country, for which Reason the *European* Consuls of *Smyrna* have their Country-Houses there, and do frequently retire thither to divert themselves with Hunting. The rest of the Way from *Sedequi* to *Ephesus* is over a very pleasant and large Plain. *Ephesus*, once a noted City, is now nothing but a confused Heap of Rubbish, Pieces of Marble, demolish'd Walls, broken Columns and Chapters. That Part which is at present inhabited, is bounded on the East with a large Plain, which reaches as far as the *Archipelago*, and on the Sides with high Hills. The most remarkable Things in it are, 1. The old Church of St. *John* the Evangelist. It had anciently 4 Gates, but 2 of them are wall'd up. You enter into the Church by a Descent of 16 Stairs, at the Bottom of which is a Fountain. Within it are 4 Pillars of Porphiry, spotted with Black and Red, 12 Foot and half in Circumference, and 36 Foot high, being one entire Piece of Stone, which bears up the Roof. There are also 2 other Pillars of *Samian* Stone, and round about the Church on the Outside is a Gallery having 4 Pillars a breast, and 6 in Length, set off in the middle with an *Octagon* Fountain, each of whose Sides are 10 Foot long, and one Foot thick. The Church hath 2 Domes, and is covered with Lead. The *Turks* having converted it into a Mosque, have added a Mineret, and adorn'd it after their Fashion; but the greatest Rarities of it, when it was a Church, were carried to *Constantinople* to Sultan *Soliman*, to adorn the Mosque he had erected there. 2. The Castle stands on an Hill just by it, and has a very ancient Tower still standing, on the Top of which is a very curious Piece of Sculpture, or *Basse-Relieve*, which, as some say, represents the History of the famous *Roman*, *Marcus Curius*; but others say, the Destruction of *Troy*: The Truth is, none dare come near enough to take an exact View of it, and so they only guess at it. In passing it you may discern 3 Pieces of Marble, one represents a *Bauhmal*, the 2d a Man fallen dead from his Horse, and a Person in a Senator's Habit standing by seems to lament the Accident, and the 3d is the Figure of a dead Body laid out ready for Interment. 3. Two Aquæducts. 4. A large Inclosure, where anciently stood the Temple of *Diana*, but there is nothing remarkable of it, but one large Gate, much ruined and defaced. Within it on the North side is engraven on a Stone a Man on Horse-back, with a Dog by him, and a Serpent twisted round a Tree. On the South-side are 2 Inscriptions, the one within, in these Words, *ACCENSO. RENSI ET ASIÆ*: And the other, *M. P. VEDI NICERH. VEDIAE. PAVILLIMX. M. HIÆ VXORIS EI.* But the Learned cannot tell what they mean. On the Front of the Gate are these Words graven, *UNIOR CANTUSIUM*; but they are so mingled, that their Meaning is not to be guess'd at. 5. Two Amphitheatres, where Prizes used to be anciently fought, but nothing now remains of them, but part of the Walls of one of them, built after the Antique Manner of large Free-Stones. Hard by these Amphitheatres is a large Square, where are a great many Pieces of broken Columns, Chapters, Frizes and Pedestalls, of a wonderful Bigness. Upon some of them are Arches of a prodigious Bigness, and in the Body of one of the Columns are a Pair of Stairs, which lead a great way under Ground. Among the Ruines are met some Remains of the ancient Baths. 6. The *Grotto*, called, *The Cave of the 7 Sleepers*, who flying into that Place to avoid the Persecution in the Reign of *Decius* the Emperor, 250 Years after Christ, fell into so found a Sleep, that they did not awake again till the Reign of *Theodosius* II. who was a zealous Protector of the Christians, and supposed they had slept but one Night, tho' it was near 200 Years. 7. A Tomb, or Monument, on which are several *Greek* Characters, and 4 little Children in *Basse-Relieve*, with several Marble Statues buried under Ground, yet so carelessly, that the Feet of some of them appear'd above.

A Journey from *Smyrna* to *Ephesus*, out of M. *Corn. Le Brun.*

Ephesus described.

Things most remarkable

About a small Hour's Journey from *Ephesus* are to be seen the Fonts, where, they say, St. *John* the Evangelist baptized the Christians. 'Tis a grey Jasper-Stone, 16 Foot in Diameter, but a little mangled by Travellers, who usually carry away a Piece of it. The *Greeks* have many like them. About half a Lg. further, upon the Top of an Hill, is a Fabrick, said to be the Place where St. *Paul* was imprison'd. There

The Fonts where St. *John* baptized.

are 4 Rooms curiously wrought in Marble still ſtanding. From this Caſtle is a pleaſant Proſpect over the Plains and Meadows, where the River *Meander* makes ſo many Windings and Turnings, as raviſhes the Spectator with Wonder and Delight at once. The Water of it is very pleaſant, and the Current is ſo ſtill, that one can hardly diſcern which way the Stream runs, unleſs it be at the Mouths where it empties it ſelf into the Sea.

Not far from *Epheſus* lies an Iſland, called *Scala Nova*, but by the *Turks*, *Cous-Adaſi*, or the Iſland of Birds. Here are the richeſt *Muſcadine* Wines made of all the Iſlands of the *Archipelago*. *Brun.*

The Iſland of *Chio* deſcribed.

From *Smyrna* he went for a Diverſion to ſee the Wonders of *Chio*, ſo much talk'd of throughout all *Aſia*. The Iſland which may be called the Paradice of *Greece*, is govern'd by *Chriſtians*, tho' under the Authority of the *Turks*, who command in ſmall Matters. They chuſe themſelves COSS, one half *Greeks*, and the other half *Latins*, who during the Time of their Continuance, take Care of all Affairs. The People obtain'd theſe Privileges by ſubmitting voluntarily to *Mahomet* II. when he conquer'd *Greece*, and the *Turks* ſuffer them to enjoy them without controul. Up and down the Country are ſeveral Churches belonging either to the Popiſh Biſhops or Monks, but the *Greeks* have many more in ſeveral Places of it, the *Latin* Churches being reckon'd but 301, but the *Greeks* 500: They are all very well ſerved, and Divine Service is perform'd with as many Ceremonies, as if it were in the Heart of Chriſtendom, for the *Turks* moleſt them not, but they have a free Exerciſe of their Religion, inſomuch that on *Corpus Chriſti*-Day the holy Sacrament is carried about the Streets, under a Canopy, without any Fear, or Indignity offered by the *Turks*, tho' nothing is more odious to them than that Ceremony.

The Puniſhment of Murther.

When any Man is found killed in this Iſland, whether *Chriſtian* or *Turk*, the Author of the Murther is diligently ſought for, but if he be not found, the Town muſt pay the Price of his Blood, at the Rate of 12000 Aſpres, which is aſſeſſed upon every Houſe by the COSS, but if the Murtherer be found, his Blood pays for all, and no Money is paid. The *Cadi* and *Turkiſh* Officers make Advantage of theſe Fines. In the Iſland are 22 Villages that have Maſtick-Trees, which are in all an 100000. They are Lentisks, crooked like Vines, and creeping on the Ground. They prick theſe Trees in the Months of *Auguſt* and *September*, and the Maſtick, which is their Gum, ſweating out by the Holes made in the Bark, runs down the Tree and falls upon the Ground, where it congeals into flat Pieces, which they gather ſometime after, and lay it in the Sun to dry, and then range and ſhake them in a Sieve to ſeparate the Duſt from them, which ſo ſticks to the Faces of thoſe that do it, that it cannot be got off but by rubbing their Faces with Oil. Theſe Villages produce above 1000 Cheſts of Maſtick, of which they pay to the G. Seignior Yearly 300 Cheſts, or 300 Weight, containing 90 Oques apiece, every Village being aſſeſſed according to their Quantity of Trees, and the reſt they are obliged to ſell at a certain Rate, to the Farmer of the Cuſtoms.

Maſtick-Trees.

The beſt Maſtick, and Uſe of it.

This Maſtick is by *Dioſcorides* allow'd to be the beſt in the World, tho' it grows alſo in other Places. 'Tis a white Gum uſed in the Compoſitions of Ointments, and the *Greeks* uſe to chew it much, becauſe it makes them ſpit, whitens their Teeth, and ſweetneth their Breath. They put it alſo in their Bread, to make it more delicate.

The Maſtick Towns in *Chio*.

The Chiefeſt of theſe Maſtick-Towns is *Callimacha*, which hath 2 Gates, which ſtand open always, 6 *Greek* Churches, and a Nunnery. It is well peopled, and round it are ſaid to be 30 *Greek* Churches.

Niamoni, a famous Convent.

Some Miles from this Town lies *Niamoni*, i. e. the Old Virgin, where is a Convent of *Caloyers* or *Greek* Monks: It ſtands among Woods and Rocks, being built by *Conſtantine Monomachus*, Emperor of *Conſtantinople*, in 1050. The Church is adorn'd with a great many Pieces of Marble and Porphyry, and among others with 32 Marble Pillars. The Dome is full of Pictures of *Moſaick* Work, and the Church is kept in good repair. The Convent is very ſpacious, and built in the Form of a Caſtle; no Woman may enter into it. There are commonly 200 Monks in it, under the Government of an Abbot, and it muſt never exceed that Number. When any Places are vacant, ſuch as will ſupply them, and become *Caloyers*, muſt pay 100 Piaſtres, and carry what Eſtate they have into the Convent, which they enjoy for Life, and then leave it to the Convent, unleſs they have a Kinſman who will become a Monk, and then he may give one 3d to him, on Condition that at his Death it go the Convent: The Convent gives to the Monks every Day black Bread, Wine, but not good, and rotten Cheeſe, and if they will have any thing elſe, they muſt provide it as well as they can; and ſome live well on their own Eſtates, and keep an Horſe to take their Pleaſure, the reſt muſt make a Shift with their Commons, yet on *Feſtivals* and *Sundays* they eat altogether in their Hall, or Refectory. This Convent pays the G. Seignior 500 Piaſtres a Year, for their Yearly Revenue is above 60000 Piaſtres, and in their Treaſury they have above a Million of Gold, for two 3ds of the Iſland belong to them. The Monks that die among them are laid in the Church of St. *Luke*, juſt without the Convent. They have 2 Bells, and there are little ones in every Village, but the *Turks* allow them no where but here.

The chief Town of this Iſle is of the ſame Name: It hath good Houſes, and the Streets are wide enough for Coaches: It is not large, but well peopled, and moſt part of the Inhabitants are *Chriſtians*, either *Greeks* or *Latins*, who have each of them a Biſhop, and ſeveral Churches, but the *Greeks* have moſt by far. They have alſo many Convents of Nuns, but not ſo ſtrictly ſhut up, but that Men may come at them, and they will be kind to them, ſometimes beyond the Bounds of Chriſtian Charity. They may leave their Convent when they pleaſe, and their Buſineſs while they are in it, is to embroider in Gold, Silver and Silk upon Handkerchiefs, Purſes, &c. and they are very skilful in it. The *Latins* have 5 Churches in the Town, the 1ſt is the Biſhop's, which is fair and large, but built ſince the *Turks* have been Maſters of *Chio*, according to an Agreement made between the *French* King and the G. Seignior. To this Church belongs a Burying-place, where all the *French* that die in this City are interred, which was given to it by Mr. *John Dupuis* of *Marſeilles*, the *French* Conſul there. The *Capuchins* alſo have a large and ſpacious Church, which ſtands over againſt their Convent, which is neatly built, and has a large Garden, but it wants Water. They are forced to keep their Gate continually ſhut, becauſe of the *Turks*, who if they get in ſpoil their Gardens, and commit many other Inſolences. They teach Humanity and Chriſtianity to all Children that are ſent to them. The Jeſuits alſo have a Church and College, and are of 3 Congregations. The *Jacobins* and *Cordeliers* alſo have fair Churches. The *Turks* have their Moſques, and *Jews* their Synagogues. The Town is but ſmall, and not ſtrong, but hath 8 Gates, and a pretty good Caſtle to defend it. The *Turks* live in it, and are generally about 800 Men. No *Chriſtian* may lodge in it; but the *Jews* for their Security pay a certain Sum yearly to dwell in it, for they would find but bad Entertainment among the *Chriſtians*. It was built by the *Genoeſe*, when they were Maſters of the Iſle, and commands the Port. Four Miles from the City near to the Sea-ſide, is to be ſeen a Vaſt Stone, which was cut out of ſome Rock: it is almoſt round, but the upper part is flat, and ſomewhat hollow. On the upper part are Places like Seats cut in the Stone, of which there is one higher than the reſt, like a School-maſter's Chair, whereas Tradition reports, was *Homer*'s School, where he taught his Schollars. M. *du Mont* ſays, He ſaw nothing but a ſquare Altar cut out of a Rock, with the Figures of an Ox, Wolf, Sheep and Rabbit in *Baſſe-Reliefe*, and thinks, that in all Probability there were no Schools there, but that it was a Place where Sacrifices were offered to the God *Pan*, or ſome other Rural Diety. The Iſle of *Chio* is 80 Miles in Circuit, and very populous, containing, beſides the chief Town *Chio* already deſcribed, 60 Towns and Villages, inhabited for the moſt part by Chriſtians.

The Town of *Chio*.

The Capuchins Convent and Church.

The Caſtle.

The chief Villages are, *Cordomolo*, which contains about 500 Inhabitants: The Country about it is very fertile and well watered; yielding yearly 160 or 170 Tun of Wine. Some Years ago ſeveral Pieces of Gold, Silver and Copper-Money of the Emperor *Conſtantine* were found there. Five Miles from it is a lovely Valley, Half a Mile long, where is a Spring of Water, to which there is a Deſcent by 25 lovely Marble Steps. At the End of it was a Temple of fine Aſh-coloured Marble, but it is pull'd down, and the Stones broken only to get the Iron and Lead that joined them together.

Cardomolo.

Be-

Vichi. Beyond it is *Vichi*, a Village inhabited by 300 Souls, having a Church dedicated to the Virgin.

Cambia. Beyond it is *Cambia*, which has 100 Inhabitants, and lies among Rocks, Hills and Woods of wild Pine-Trees, which they fell for Timber to build their Galleys. Among the Mountains are several Churches. Below this Village is a Valley, where stands a little Castle, built upon a Rock, which is almost inaccessible.

St. Elias's Mount. Over-against this Castle is the Mount of St. *Elias*, which is the highest Place of all the Island, and is seen from *Tenedo*, which is above 100 Miles distant. It has a Church dedicated to that Saint built on it, but is usually cover'd with Mists and Snow. In the middle of this Mountain is a large Spring, which Waters the Fields about it, and makes them very fertile in all sorts of Fruit.

Spartonda. In a Wood hard by lies *Spartonda*, a Village inhabited by about 50 Shepherds, but very pleasant, affording plenty of good Water and Fruits. Between *Calandre* and *Coronia* there is a Bath of Sulphur by the Sea-side, under extraordinary big Oaks. It is called, *Hagisma*, *i. e.* The Holy Water, because the Water being drank, cures many Diseases, but by the violent Operation it has killed many.

St. Helena. Three Miles from the Sea, at the further End of the Island, is a Town called St. *Helena*, built on a Rock, containing 200 Inhabitants, 2 Churches and a Chappel. The Inhabitants of this Place firmly believe, that if a dead Body does not corrupt in 40 Days; it turns *Zorzolacas*, or a *Nomolacas*, *i. e.* an Hobgoblin. The Chappel is highly esteem'd by the Villages round about.

Volissa. From hence one goes to *Volissa*, which is a great Village with about 300 Houses, and 1500 Inhabitants. It is seated on an Hill, and has a Castle built by *Belisarius*, the Emperor of *Constantinople*'s General, who was forced ashore there by a Storm. The Country about it is very pleasant, spacious and fruitful, and the Inhabitants raise 5000 Weight of Silk yearly, with which they pay their Tribute. They are vicious, and 'tis thought they lie under a Curse of being always destitute of Bread.

Varvarisso. Near this Place is *Varvarisso*, where there is a a Church dedicated to St. *Marcella*, to whom they keep a solemn Feast, called *Panagirie*, and the Priests sing Praises to her all Night long.

Firta. Three Miles from this Village is the Monastery dedicated to St. *John*, and by it a Village, called *Firta*, near which is a great Village, where there is a running Water, that drives 8 Miles, which serve the Villages about, for the Peasants have Hand-Mills, and their Wives grind their Corn.

Sieronda. From hence you go to *Sieronda*, which is an ancient spacious Tower, inhabited by 50 Shepherds, who have a Church in it.

Lecilimiona. A little farther is *Lecilimiona*, a Village of 150 Inhabitants, and a Church. There begin the Mastick-Trees.

Elata. Two Miles from thence is *Elata*, whose Inhabitants are addicted to the Taming of Partridges.

Armolia. At *Armolia*, which is a little further, is made all the Earthen-Ware used in the Isle. It lies in a Plain full of Mastick-Trees, and contains 500 Inhabitants, and several Churches. Over-against this Village stands a Castle, called *Apollieno*, very strong to resist the *Corsaires*. It was built in 1440. by *Nicholas Justiniani*, and

Musta. has a Church in the midst of it. The Village *Musta* exceeds all the rest in Strength and good Building, and contains 300 Inhabitants and several Churches. By it are 2 Harbours, named *Ayadinamy* and *San Nichita*,

Pergi. but this last is neerest *Pergi*, a great Village with a Tower, containing 2000 Inhabitants, and 30 Churches. The rest of the Villages have the like Number of People and Churches, and in many of them are Castles

Many Towers round the Isle. and Towers, built to defend their Towns and Mastick-Trees from the Ravages of the *Turks* of *Natolia*, who crossing the Sea in Boats, or Galleys, come and carry away both the People and their Goods, for which Reason they have built Towers all round the Island, at 4 Miles Distance one from another. The Island is very subject to Earthquakes, yet would be very fertile, were it not so Stony, and had more Water, for it rains so little there, that every Spring both the *Turks*, *Greeks*, *Latins* and *Jews* are forced to make Processions to obtain Rain. But, notwithstanding the Hilliness and Driness of the Island, it has all Things necessary and good in sufficient Quantities. It yields Corn and plenty of good Wine, but being thick, some do not like it, because, they say, they must both eat and drink it. All Things are cheap there, and excellent Partridges may be had for little or nothing, for they keep them tame like Turtles, and have Keepers, who drive them out in the Morning, and whistle them in at Night, which they always obey. The Inhabitants of this Island are the only People, who have preserved their Liberty under the *Turks*, living as they think fit, and exercising their Religion with all imaginable Freedom, only paying them a Tribute. They are generally Christians, many of them are Papists, and the rest of them of the *Greek* Church. They are apparell'd after the Fashion of the *Genouese*, and have much of their Humour. They are so ugly as would scare a Man, tho' their Persons are proper, and well shaped. They are very proud, yet their Gentlewomen go to Market to buy Provisions, and carry them openly in the Streets. They love the *Spaniards* better than the *French*, but had rather be under the Government of *Turks* than *Christians*.

Tame Partridges. *People free.* *Ugly.*

The *Chiots* make much Damask, Sattins, Taffata's, Fustians, and other Silk-Stuffs, and drive a Trade in many Places with their Saiques, *viz.* to *Grand Cairo*, and the Maritime Cities of *Barbary* and *Natolia*. Such as are not obliged to work or follow Business, sit whole Days under the Trees talking together. Learning is of no Vogue in this Country, but profound Ignorance reigns among them, yet they have naturally a sharp Wit, so that to avoid their Cheats in Dealing a Man had need of all his Eyes about him. They are much given to Pleasures, and love excessive Drinking. The Women are very beautiful and well shaped, their Faces are as white as the Jasmin, they wear on their Head, and are very charming, but their Breasts are scorched with the Sun, which is much to be wonder'd at, because they take as little care of their Faces as Breasts. They are always very neat in their Dress, wearing on their Heads very white Linen. They have a very brisk and merry Wit, which renders them the most talking Women in the World, but are extreamly vain in their Apparel, wearing the finest Stuffs they can get; but whereas they used formerly to load themselves with Rings and Jewels, especially upon the Vigil of St. *John*'s Day, they now are forbidden it under the Pain of Excommunication by the Pope, because the *Captain-Basha*, seeing this Finery, imposed a Tax of 50000 Piastres upon them, and made them pay it, so that they wear no Gold, Silver nor Jewels about them.

Their Trade. *Their Ignorance.* *Their Women.*

The *Chiots*; both Men and Women, are much given to Dancing, and on *Sundays* and *Holidays* they dance all Night promiscuously, both in the Cities and Villages, and a Stranger is allowed to put in with them. They are not at all jealous, but their Women and Maids are allow'd to stand at their Doors to see and talk with such Men as pass by; and they will be as merry and familiar with Strangers, as if they had been acquainted with them all their Days.

Their Dancing.

Another Isle of the *Archipelago*, bordering upon *Asia*, is *Patino*, or *Patmora*, anciently called *Pathmos*. It is but 18 Miles in Compass, and has but one well built Town in it, with a Castle in the middle of it, called, *The Monastery of St.* John, where 200 *Greek* Monks live. St. *John the Evangelist*, being baniss'd into this Isle, where he is said to have wrote his Revelations, They carefully keep in their Church a Body shut up in a Case, which, they say, is the Body of St. *John*, and shew a Grotto, where, they say, St. *John* wrote the *Apocalypse*. There are about 3000 Souls in the Isle, who have much ado to live, the Isle being very dry and rocky. No *Turks* live in the Island, but they are all *Christians* that live there; but they pay Tribute to the G. Seignior. The *Corsairs* put into this Island to Careen, and take fresh Water.

The Isle of Patmora, or Pathmos. *St. John's Body and Grotto.*

The Isle of *Nixia*, anciently *Naxos*, is 120 Miles in Compass. It was subject to the *Sanudi* and *Somarigi*, *Venetian* Dukes, till the *Turks* took it under the Emperor *Selymus*, yet there are still in it several Noble Families descended of the said Dukes. The Land is fruitful in all Things, but especially the Valley of *Darmilla*, which has 18 Villages: They feed many Cows, Sheep and Goats, and their Country yields many Vines, of which they make great Store of Wine and Cheese, which they send to *Alexandria*, *Smyrna* and *Chio*. Near the Town, by the Sea, are Salt-pits and a Pond, which they Farm out to Fisher-men. In the Marshes of the Valley of *Plicori*, they catch great Store of Eels. Their Woods are full of Rocks and solitary Dens, where there lie large Stags. The Peasants catch Partridges by stalking with an Ass, train'd

The Isle of Naxos. *Salt-Pits.*

up

The Monasteries. up to it, and they have Plenty. There are many Monasteries in this Isle, and one of them which is built in Form of a Tower, is very ancient. There is also another called *Fanaromeni*, dedicated to the Virgin, which has 70 Rooms, and a small Church, but the Monks are extreamly ignorant, and by their Viciousness one would judge they served, *The Unknown God.* By the Sea-side, over-against the Island of *Nicaria*, is to be seen upon a very steep and rugged Mountain some Ruines of the Castle of *Apollo*, and 'tis a Wonder how Stones could be gotten up so high to build it. By it are 4 little Towns well inhabited. On the Hills hereabout many Goats feed upon an Herb, called *Ledum*, which leaves a kind of viscous Dew upon their Beards, that turns into a kind of Gum of a very good Smell, called *Ladanum*, or *Laudanum*, and is gathered by cutting off their Beards. As you go to the Town, there is a Castle upon a very high Hill, which commands the Villages of *Darmilla*. Near the Town, upon the Rock *Strongyle*, is the Palace of the God *Bacchus*, built of very white Marble, but the *Turks* and others carry it away daily for their private Uses. *Bacchus* may well have a Palace at *Naxos*, where they are so great Drunkards. The Tower and Ducal Palace are still in being in the Town. There are Two Archbishops in it, a *Latin* and a *Greek*. The Cathedral Church of the *Latin* Archbishop dedicated to the Assumption of our Lady, is very handsome, and very well served by 6 Canons and 7 Priests, but their Revenue is inconsiderable, for the Archbishop has no more than 20 Piastres of yearly Rent. He hath a Seat in the Country with a Church, at a Place called *San Mamma*; the Church is paved and lined with Marble, but not kept in good Repair. In the Castle the Jesuits have a sorry House, and the *Greeks* a Chappel, that belonged formerly to the Dukes. Without the Town are *Recollets* and *Capuchins*, who make many Proselites to the *Roman* Faith. The Inhabitants have such great Feuds among them, that they will not speak to one another as long as they live; but the Women are more obstinate than the Men, and are great Meddlers in other People's Business. The Women wear so many Coats one over another, that they are hardly able to go, and their Shooes are so strait, that they can hardly get their Feet in, but they are pretty honest and chaste. From the Sale of their Wine, Cheese and Silk they raise their Tribute.

Laudanum, how made.

Bacchus's Palace.

Jesuits and Monks.

The Isle of *Paros*. About 6 Miles from *Nixia* is the Isle of *Paro*, anciently called *Paros*, which hath 3 Castles, several Villages, and a good Harbour for all sorts of Vessels, fair Churches, and many *Greek* Priests and Monks. The Antiquities of this Isle, consisting in Statues, Marble-Chests, &c. were carried away by an *English* Gentleman, who took all he could find here, as well as at *Delos*, now called *Sedrille*, where was plenty of them; but now there remains but one of a Woman so large, that it cannot be stirr'd. This Isle was famous for the Oracle of *Apollo* heretofore, but now it is the Resort of the *Corsairs*.

The Isle of *Delos*.

Myconc. The Island of *Mycone*, anciently *Myconus*, was once a well peopled Isle, but now is almost forsaken, because of the rigorous Persecution of the *Turks*. It is about 3 Miles round.

Tenes. Over-against this Island is the Isle of *Tine*, formerly *Tenes*. It belongs to the *Venetians*, is well peopled, and hath a very strong Castle built upon a Rock, and the Houses stand one above another. It is 40 Miles in Circuit, and yields plenty of Provisions and Silk, but 'tis so over-stock'd with People, that many are obliged to go out of it, and dwell at *Smyrna* and *Chio*. There is a *Latin* Bishop in it, and the Women are handsome and courteous enough.

Nio, or *Nixia*. By *Nio*, called of old *Oliarus*, which was not long since inhabited by the *Albanians*, a barbarous and warlike People, who used to go all Night arm'd by the Sea-side, and is a fruitful Country in all Things, especially Woods of Oaks, and other Trees, which they cut down and sell to other Places, you sail to *Santorini*, formerly called *Therasia*, which is 30 Miles about, and 60 from *Candy*, from which it may be seen. There are several Castles in this Isle, *viz.* 1. That of St. *Nicholas*, the Houses of which are built upon a black Rock, that is frightful. A *Greek* Bishop has his Residence there, and about 500 Souls about him; but they live most of them in Caves made in Pumice Stone, and 'tis pleasant to see them come out of the Ground like Conies, while others are plowing over their Heads. 2. *Scaro*, built on a frightful Mountain, so steep, that those who go up to it must climb with their Hands and Feet. It contains 150 Houses, and the *Greeks* have a Church there, in which are 2 Images of massie Silver, one of our Lady, and the other of St. *Michael*. It formerly belonged to the *Latins*, who have still a Bishop there. 3. *Pirgo*, near which is a Chappel of our Lady; with many large Caves, where about 200 People live. Between these Castles lies an Hill, from whence one may see the whole Island, which is planted with Vines, but has no Trees, but Fig-Trees and white Mulberries. They make more Wine than they spend, which their Neighbours fetch from them to carry to *Chio*, *Smyrna*, and other Places. They make all sorts of Stuffs, and by the Sale of them they raise Money to pay their Tribute. In this Place are 1000 Souls, almost all *Greeks*, and the *Cadi* resides here. Their Houses are well built, all white, and wall'd in, so that they look like a Tower. At *Scaro* there is an House of the Nuns of St. *Dominick*, but their Lodgings are ill and Air bad: Their Church is kept in good Order, and served by a Chaplain. On St. *Stephen*'s Hill, between *Pirgo* and *Nebrio* lived a Woman, that in ancient times gave Victuals to all the People for a whole Year that a Plague and Famine lasted, and there are still remaining several Statues of her. 4. *Crotiri*, inhabited by 150 Souls, and about it there are 7 Villages, but ill peopled. The Inhabitants of the Isle live very meanly: Their Bread, called *Schises*, which is made of Wheat and Barly, is as black as Pitch, and so harsh, that one can hardly swallow it; for they bake it but twice a Year, because they have no Wood, but what they buy by the Pound from *Nio*. They have no Fish nor Flesh, but feed only on Beans, Pease, Eggs and Biscuit. They have little or no Fruit, but Grapes, which are plentiful. They know not what Physicians, Chirurgeons and Apothecaries, and Men of that Profession are. They are stout, and can defend themselves from their Enemies with Stones. The People live a beastly Life, doing nothing but eat, drink, sleep, and play at Cards.

Their Product and Manufacture.

Nuns of *Dominick*.

Santorini, or *Therasia*, and its Castles.

The Isle of *Thera*. The Isle looks like Hell, being on the Shores all black and scorched by an Eruption of Flames, which happen'd about 60 Years ago. About the Year 1638, there was another Eruption of Fire in the Port, which with an incredible Noise, heard 200 Miles, cast vast Numbers of Pumice-stones out of the Sea, like Bullets, and so infected the Air, that many on the Isle died, and several lost their Sight, but recovered it some Days after; and all Silver turned Red, even in Mens Chests and Pockets, but in a few Days came to it self. *Seneca* says, this Island stands upon Mines of Sulphur from whence these Fires proceeded. It is said, that *Alexander* sounded the Sea in this Place, but could find no Bottom, yet a Ship may come to an Anchor at *Tiresia*, a little Isle by it.

The Isle of *Policandre*. The Isle of *Policandre* is 8 Miles in Compass, and a pleasant Place: There is but one Village of 100 Houses, and 300 Souls in it: It has 3 well built Churches, and 2 Monasteries, one of Men and another of Women. The Convent of Monks is well situated, and dedicated to the blessed Virgin. It has a little Garden, and a Fountain of excellent Water in it. The Nuns observe no Rule, but live as Nature teacheth them; their Church is dedicated to St. *John*, and a Monk says Mass in it on all *Sundays* and Holy-days. The Castle stands upon a very high Hill, but all the Houses are ruinous, except a Chappel dedicated to St. *Michael* the Arch-Angel. From it one may see all the Isles of the *Archipelago*. The Inhabitants of this Isle are honest, civil and courteous People, especially the Women, that are very handsome. They have good Bread, Fowl, Sheep, and other Things necessary, but no Wine; so that what they drink comes from *Santorini*, which is but 30 Miles distant. They have no Trades among them, because their Port, which is indifferent good, is infested by the *Mainots* and *Corsairs*, who lodge in a Church by the Sea-side.

The Isle of *Milo*. The Island of *Milo*, which is so called from *Mylos*, a Mill, because they have many Wind-mills in it, and it affords Mill-stones, is 36 Miles about. It is fruitful in all Things, and exports Yearly to *Candy*, *Venice*, and other Places, between 3 and 400 Tun of Wine. They have a Mine of Brimstone, and another of Pumice-stones, which they Farm to one of the Inhabitants for 1500 Piastres Yearly. Three Miles from the Town are certain hot Baths of Sulphur, where diseased People from several Places wash and recover their Health. The Port is 6 Miles long, 3 over, and has a good

good Depth of Water, and 2 Miles from it in a Grotto is a Fountain of Luke-warm Water, which gives so much Heat, that an artificial Bath cannot make one sweat more. In this Isle is a Town where 2500 Souls live, and an old Castle inhabited by 500 more. They have a *Latin* and *Greek* Bishop. The *Latin* Cathedral is without the Town, dedicated to St. *Peter*, but without Ornaments, and the Bishop celebrates in a Chappel that joins to a *Greek* Church. He has many Tithes, of which he gives to the *Greek* Bishop one Third part. He has many well built Churches in good Repair under him, and many Priests to officiate in them. Most of the Inhabitants are *Greeks*, who live much at their Ease, and are civil, but very wicked and perfidious. Their Women go in a very ugly Dress, speak very ill, and cannot pronounce the Letter *L*. They are very charitable and kind to Strangers. They have all Necessaries for Life, but no Physicians or Chirurgeons. There are no *Turks* in the Isle, but it is governed by 4 Deputies of the Town.

The Inhabitants.

Half a Mile from *Milo* is the Isle called *Chimolo*, or *Argentava*, which hath a good Harbour, and a Village containing about 200 Souls, which was burnt by the *Corsairs* in 1638. These poor People live in great Misery.

The Island Chimolo, or Argentava.

The Isle of *Sifano*, or *Sifanto*, anciently *Sifanus*, is 36 Miles in Circuit, and has a Castle upon a Hill, with double Walls, inhabited by 3000 Souls, and there are no other Houses in all the Island, unless it be some Country-Houses of private Men. The Harbour is not good. There is upon it a *Latin* Bishop, and a good *Greek* Vicar, but the Bishop's Chappel is little and very poor. There is also a Monastery of *Greeks* built upon an Hill. The Isle produces not Provisions for above 2 Months in the Year, and for the rest of the Year the People fetch it in Barks from other Places. They are very great Rogues, but their Women are very honest, and go with their Faces cover'd. There are no Trades, but Weavers, Shoe-makers, Joiners, and the like.

The Isle of Thermia.

The Isle of *Thermia*, so called from the *Thermæ*, or hot Springs in it, which give great Relief to sick Persons, is 36 Miles in Circuit. The Town contains about 300 Houses, inhabited by about 2000 Souls. The *Greeks* have 15 Churches in it, and a Bishop, who resides 6 Months here, and as many at *Zia*. There is also a Castle and a pretty Village, called *Mesi*. The Isle is almost all plain, has few Trees, yet is fruitful and abundant in all Things. The Inhabitants are honest People, and trade in Stuffs, Thread and other Commodities, raising thereby Money to pay their Tribute. The *Venetian* Coin goes only in this Isle, as it doth in all the others, except *Naxia*, *Andro* and *Scyra*, where *Turkish* Money goes. Their Women are vertuous, handsome, and wear a neat Dress. The People live pretty well there, and a *Cadi* commands, with 4 Procurators, chosen out of the Citizens of the Town.

The People and Trade.

The Isle of *Ajora* is an Isle 18 Miles about, and depends on the Isle of *Scyra*, who keep some Shepherds there to feed their Sheep. There are 4 Churches in it, but Divine Service is perform'd in them at *Easter* only, when the Shepherds communicate. The *Corsairs* hinder its being cultivated, because they take away the Oxen, and sometimes the Sheep.

The Isle of Ajora.

The Isle of *Scyra*, which in the vulgar *Greek* signifies *Signora*, or Mistress, is so called, because it stands in the midst of the other Isles, and by its Height commands them all. It is 36 Miles in Compass, and having a dry Soil, but few Trees, abounds with Plenty of Provisions, as Flesh, Fish and Venison. The Water is good. They have no Villages of Note, but only some scattering Houses in the Country. The People are much addicted to Devotion, and especially the Women, who are very silly. There is much Hatred and Envy always among them, by reason of the Oppression they suffer from the *Turks*, and the common Poverty. They are almost all *Latins*, and have several Churches. The Cathedral stands in the Top of the Town, and is dedicated to St. *George*, and served by several Priests, who have a Bishop for their Superior, who lives on his Revenue and Tithes. The *Capuchins* are diligent in Preaching, Catechizing, and hearing Confessions, by which they do much Good.

The Isle of Scyra.

The People devout.

The Isles of Samos and Icaria.

From *Chio* he sail'd into *Ægypt*, and in his Passage being left before the Isle of *Samos*, he took a View of it. It is a very barren Country, tho' famous for having been the Native-place of *Pythagoras*, *Polycrates* and *Sibyl*. It is 80 Miles in Circuit. Over-against *Samos*, and pretty near it, is the Isle of *Nicaria*, anciently called *Icaria* from *Icarus*, the Son of *Dædalus*. It is of a long Figure, and the Land is very dry and full of Rocks, in which are the Houses of the Inhabitants, who are in all about 3000 Souls, very poor and ill clad. They are much addicted to Swimming and Fishing up Sponges and Wrecks, and the richest Men, or *Papa's* in the Isle, give their Daughters to the best Swimmer, which is tried before the Damsel and her Father. He that can tarry longest under Water wins the Maid in Marriage. They pay the Grand Seignior's Tribute in Sponges. They have Vineyards among the Rocks here and there, and they make of the Grapes a sort of White Wine, as clear as Water, which passes away by Urine as soon as it is drunk. The Wine, as also Wax and Honey, they trade with to *Chio*. The Women are Mistresses there, and as soon as the Husband is arrived from any Place, the Wife goes to the Sea side and takes the Oars, and carries them home, after which the Husband can dispose of nothing without her Leave. The Inhabitants are well shaped and strong. The Emperors of *Constantinople* banish'd Persons of Quality that had offended to this Isle.

Swimming much used.

Women rule their Husbands.

Leaving *Samos*, he came to the Isle of *Stanchio*, otherwise called *Isola Longa*, 90 Miles distant from it. It was anciently called *Cos*, is 70 Miles in Circuit, and very fruitful, especially in good Wine. On the Port by the Sea-side is a pretty good Castle, where the *Turks* keep Garrison. The Town lies behind it, where there is a prodigious Tree of that vast extent, as to cover 2000 Men easily, for the Branches being supported with many Stones and Wooden Pillars: there are several Barbers Shops, Coffee-houses, and such like Places, besides Benches to sit on under it. It was anciently famous for the Temple of *Æsculapius*, and the Births of *Hippocrates* the Prince of Physicians, and *Apelles* the Prince of Painters. The Knights of *Malta* held it, when they were Masters of *Rhodes*, and there are still many of the Monuments remaining in it. Strangers are here more regarded by the Women, than is grateful to them.

The Isle of Stanchio, or Cos.

From hence he sailed to the Castle of *Bodrou*, which lies over-against *Stanchio* at 12 Miles distance. There is a good Port, but so shut up with Dirt that great Ships can't get into it. You enter this Castle through 7 Gates, over which are several Coats of Arms, which belonged to the Knights of *Rhodes*, that commanded there, for in some of them are Crosses of *Malta*. There is above 300 of these Escocheons. Beyond the 6th Gate is a Platform, where there are 6 Cannons that play towards the Sea. The last Gate is made of Iron, and there stands a Guard of 15 or 20 Men continually. The Castle is strong, and the Walls high, both built of a sort of Stone, which great Guns cannot hurt. The Sea beats upon one side of it, which has Port-holes, with great Guns mounted, which can easily hinder Ships from approaching it. It is also very strong towards the Land, the Walls being so sound as if they were lately built. No Horse can approach it, and yet it may be easily taken, by cutting off the Water that is brought to it by an Aqueduct. The Houses in it are ruinous, and there are many Pieces of Pillars found among them. The Country about it is fruitful in Grapes, Figs, and such like Fruits.

The Castle of Bodrou.

Its Strength.

From *Bodrou* he sailed to *Rhodes*, which is 100 Miles from *Stanchio*. The Isle of *Rhodes* hath *Lycia* on the North, being parted from it by the Sea, which is 20 Miles broad, the Isle of *Cyprus* on the East, *Candy* on the West, and *Ægypt* on the South. It is 100 Miles in Circuit, lying in a temperate Climate. The Soil is fruitful, and hath several Villages in it well inhabited, besides a small City which is strong. This Island has been under the *Greeks*, *Saracens*, who lost it to the Knights Hospitallers of *Jerusalem*, in 1309, who held it 200 Years, and now is in the Hands of the *Turks*, who under *Solyman* II. took it in 1522. by Composition, and that more thro' the Treachery of *Andrea d'Amaral*, Chancellor of the Order (who being angry that he was not chosen Great Master at the last Election, inform'd the *Turks* of their Weakness, by a Letter shot to them on an Arrow) than by Force, tho' his Army consisted of 200000 Men. The Town hath 2 Harbours, of which the Great Port, being square and spacious enough, is not very safe, when the Wind blows from the E. N. E. or S. E. On the Right-Hand at the Entry of this Port is a new Tower, built by the *Turks*, in a Place where the old Tower of St. *Nicholas* stood.

The Isle of Rhodes.

How taken by the Turks.

The Town and Ports.

ſtood. It is well furniſhed with Cannon, hath a Baſtion behind, and Curtine reaching to the Walls of the Town. Over-againſt this Tower ſtands the Caſtle of St. *Angelo*, but ſomewhat ruinous. This Caſtle and Tower were built in the Place where ſtood the Feet of the great *Coloſſus*, one of the 7 Wonders of the World, between the Legs of which a Ship under Sail might paſs. It repreſented the Sun, and was caſt by *Chares* the *Lyndian*. It was 70 Cubits high, ſtrided 50 Fathom, and carried a Light-Houſe in one Hand. It was overthrown by an Earthquake, and being broke to Pieces by the *Saracens*, was ſold to a *Jew*, who loaded 900 Camels with the Metal, and carried it to *Alexandria* in the Year 954. and 1461 Years after it was made. The Port of the Galleys, which is covered by the Caſtle of St. *Erme*, is a good Harbour, and able to contain many Galleys, but the Mouth of it is ſo narrow, that one Galley only can enter at a time. It looks to the E. N. E. and is every Night ſhut with a Chain. A little up-land above the Port is a Burying-place, and in it 15 or 20 Domes of Free-Stone well built, and ſupported moſt of them by 4 Arches. Theſe are the Sepulchres of the *Beys*, or other Perſons of Quality in *Rhodes*, who have been killed in the Wars. On the ſide of this Port is a Piazza with ſome Trees and a Fountain in it, and at the Bottom of it the Arſenal, where the Galleys and Saiques are built. The Town is ſmall, but ſtrong, having high and well built Walls, planted with Faulcons on the Top, and below there are Port-holes for great Cannon. It hath 3 Gates, one to the Sea, where Corn is ſold, and 2 to the Land-ſide. Over the Water-Gate is ſet up the Dragon's Head, which is 33 Foot long, waſted all the Country round, and was ſlain by *Deodate de Gozon*, one of the Knights of St. *John*. The Streets of the Town are pretty broad, all paved with little Stones, and for the moſt part covered with Pent-houſes on each ſide. There are ſeveral fair Buildings in it. St. *John*'s Church is ſtill ſtanding, but is turned into a Moſque. Over the great Gate in a Nich, which hath a round Cover, are the Figures of our Saviour and the Bleſſed Virgin, and St. *John* holding the Croſs, cut in *Baſſe-Reliefe*. No Chriſtian is now ſuffered to go into it. The Street of the Knights lay juſt as you come out of the Church, as the Arms upon the Houſes ſhew; but now *Rhodes* is inhabited only by *Turks* and *Jews*, for tho' the *Chriſtians* are permitted to keep Shops in Town in the Day-time, yet in the Night they muſt retire to the Villages in the Country about it. *Lindo*, the Country of *Chares*, who made the *Coloſſus* of *Rhodes*, is a little Rock at a Point of the Iſle of *Rhodes*, 60 Miles from the Town. It has a ſmall Town on it, with a very good Fort.

The *Coloſſus* of *Rhodes*.

Du Mont makes it probable, that the Story of the *Coloſſus* of *Rhodes* is a Fable, *p.* 156 to 159.

The Burying-places of the *Beys*.

The Gates.

Du Mont alſo calls this Story to be falſe.

St. John's Church.

The Inhabitants.

From *Rhodes* he ſailed to *Ægypt*; but croſs Winds bringing the Ship to *Cyprus*, he put in there. *Cyprus* is an Iſland as big as *Rhodes*. The Air is ſo ſweet, clear and temperate, that the Weather is perpetually fair. It produces great abundance of Sugar, Cotton, and delicious Wines. 'Tis the beſt Country in the World for Hunting, and Proviſions are ſo cheap, that the greateſt Epicure in the World can't ſpend 40 Piaſtres a Year in Eating and Drinking. The Town is neither neat nor large; inhabited by *Turks* and *Chriſtians*, as all other Places under the G. Seignior's Dominions are. Here he ſaw a Man that had 4 Arms, 2 on each ſide, but only the under ones were uſeful.

The ſtate of *Cyprus* when.

As ſoon as the Wind favour'd, he left this Iſle, and came to an Anchor in the Port of *Alexandria*, *Monday* the 1ſt of *Jan.* 1657. ſtaying ſome time there, he ſaw all Things remarkable in that City, and gives us this Account. *Alexandria*, called by the *Turks*, *Skeuderia*, which was heretofore a lovely, rich and famous Place, is at preſent ſo ruined, that little elſe is to be ſeen in it but ſhatter'd Houſes, and heaps of Stones and Rubbiſh. It is inhabited, as all the reſt of *Ægypt*, by *Turks*, *Moors*, *Arabs*, *Greeks* and *Jews*. The *Arabs* are generally Free-booters, infeſting the Road, and rifling the Paſſengers without Mercy; yet ſome there are that are more civil, and live in Cities; but all pretend to be Magicians. They have ſeveral Ways of Divination: Some pretend to Inſpiration, others to Viſions, and others divine by throwing Beans in a Bag, and then telling of them. The moſt Skilful are the Viſionary Tribe; and our Merchants have had ſuch Proofs of their Skill, as may ſeem wonderful. The *Arabians* were formerly very Learned in Medicines, and our *European* Surgeons have found very uſeful Secrets in their Books; but now they apply themſelves wholly to Divination, which they account the moſt ſublime Science. They have no Religion, and Robbery is their only Trade, but they kill none but *Turks*, and them only, when they are at War with the G. Seignior. They are divided into 2 Tribes, who are commanded by their particular Captains, who are ſubject to a Prince called the *Sheick* of *Kebir*. They encamp in the Deſarts, and when the Graſs is conſumed in one Place, remove to another. They are lean and black, and their Aſpect is grim and terrible; their Cloathing is the Skins of Beaſts, and they feed on Milk, Butter, Honey, and a little Camels Fleſh, which they uſe moſt in their Expeditions, and laying it under them on their Horſes Backs, till it grows hot and tender, ſo eat it. They have the beſt Horſes in the World, which tho' they always ride a Gallop, yet will never tire from Morning to Night. They are very ſwift, and they feed them as they do themſelves. They value a good Horſe above all Things, and are careful to keep up a good Breed, and therefore keep the Pedigree of their Horſes in Writing. The G. Seignior pays a kind of Tribute to them, which if he does not pay without Delay, they burn and pillage his Countries. The *Turks* of *Ægypt* are ſo ſuperſtitious, that if in the Morning they meet a *Chriſtian* firſt, they go home and waſh themſelves, and will not come out all Day, leſt ſome Misfortune befal them. They hate all Chriſtians, and caſt a Thouſand Indignities on the *Franks*, which are almoſt intolerable. The Men are black, but the Women are not in the leaſt tann'd, becauſe they are careful to keep themſelves from the Reach of the Sun. One Thing is ſaid of them, That they have Schools where the Maids learn to give and receive the Pleaſures of Love with more than ordinary Delight, ſome Women acting the Part of Men, to make their Schollars exerciſe the moſt laſcivious Poſtures. *Du Mont*.

The *Engliſh*, *French*, *Dutch* and *Venetians*, who come there for Trade, and are generally Factors, are lodged in ſeveral *Fondicks*, or Inns, each of them by themſelves, for which they pay no Rent, but the G. Seignior allows Money Yearly to keep them in Repair. Theſe *Fondicks* are lock'd up every Night, and the Keys carried to the *Aga* of the Caſtle, who ſends them again every Morning, and ſo they are alſo on every *Friday* during the Noon-Prayer, becauſe they have a Propheſie, that the *Franks* ſhall become Maſters of them on a *Friday*, in the time of the Noon-Prayers.

Inns.

Hardly any thing of the ancient *Alexandria* is now ſtanding, but the Walls, and ſome Buildings about the *French Fondick*, which is almoſt ruined; all the reſt is built by the *Turks*, and the Houſes are low, and ill contriv'd. There are 3 Ports belonging to it. 1. The Old Harbour, which is pretty large, but the Entry into it being difficult, few Veſſels put into it. It hath 2 Caſtles on each ſide of it to defend it, and both well keept. The other 2 Ports are higher up, and are parted one from another by a little Iſland, anciently called, *The Pharos*, which is join'd to the Land by a Stone-Bridge of ſeveral Arches. This Iſle runs a great way in *Meo*, and has a great Tower in the midſt of it, called *Farillon*, where the G. Seignior keeps his Powder, Artillery, and a Garriſon of 300 Soldiers, and tho' it be a Building neat enough, yet 'tis not comparable to the *Pharos*, which was anciently one of the Wonders of the World, that ſtood in the ſame Place. It is commanded by a *Mutefericca*, but it has no Water in it, but what is brought to it on Camels from the *Nile*. The firſt of theſe 2 Ports divided by the *Pharos* is the Harbour of the Galleys, ſo called, becauſe having no Depth of Water, it ſerves only for Galleys and ſmall Veſſels. 2. The Great Port, or New Harbour, the Mouth of which is defended by the *Farillon* on the one ſide, and a little Caſtle on the other, which are ſufficient to guard it, but lying open to N. E. and N. Winds, it is not ſo ſafe as the former.

Old Harbour.

Pharos.

Farillon.

The Water.

The Great Port.

The Cuſtom Houſe of *Alexandria* is upon the ſide of this Port, and is farm'd out to a *Turk*, who is therefore called *Multezin*, or the Farmer, who pays the G. Seignior for it 300 Purſes a Year, which make 227272 Piaſtres and 80 Maidens; but he diſcharges the Office by a *Jew*, called *Maalem*, to whom he gives a Purſe for his Pains. The *Jew* employs many other *Jews* under him, and ſo the Cuſtom-Houſe is never open on *Saturdays*, which is the *Jews* Sabboth, and yet no Veſſel muſt unload, unleſs the Cuſtom-Houſe be open. The Officers are exact in ſearching all Perſons that arrive in their Port for Silver and Gold, becauſe they

The Cuſtom Houſe.

pay

pay a conſiderable Import, called the Gold Duty. There is another Cuſtom-Houſe, called, *The Old Cuſtom-Houſe*, near the Water-Gate. It is now 80 Paces from the Sea, tho' heretofore the Water waſh'd the Walls of it. Some *Janizaries* ſtand ſtill at the Door of it, and exact ſomething of all Goods, that they may not loſe their Rights.

Two little Mounts. There are alſo 2 little Mounts made of Ruines, on the Top of one of which is a ſquare Tower, where a Man always ſtands Centinel, and puts out a Flag as ſoon as he ſees any Ship, and every Veſſel pays ſomething to this Guard.

The Gover. *Alexandria* depends on the *Beglerbeg*, or *Baſha* of *Ægypt*, who has his Reſidence at *Cairo*, but has no *Aga* for his Deputy there. There is alſo a Great *Cadi*, or *Moullah*, who has many other *Cadies* under him, and 2 *Sous Baſha's*, one for the Sea, and the other for the Town. The *Aga's* of the Caſtles alſo are under the *Baſha* of *Ægypt*, who puts them in or out as he pleaſeth.

The Walls. The Walls of the Town, tho' much ruin'd, yet ſhew much Magnificence. They have good falſe Brays, and are flank'd with great ſquare Towers, at 200 Paces Diſtance one from another, and a little one between, and under them Caſemates, which ſerve for Galleries and Walks. The Towers, which are all built after a different Model have each of them a large Hall, and ſeveral Chambers, and are large enough to hold 200 Men apiece, and in them are ſeveral Ciſterns, or Wells. The Walls are 20 Foot thick throughout, and every where have Port-holes in them. There are 6 Gates, but 3 of them are ſhut up. About 300 Paces from the Town is a fine Piece of Antiquity, called *Pompey's* Pillar. It ſtands on a riſing Ground and Pedeſtal 7 or 8 Foot high, which reſts upon a ſquare Baſis of big Stones, about 20 Foot broad, and 2 Foot high. The Body of the Pillar is one entire Piece of Gamet, 18 Canes or 90 Foot high, and 6 Fathoms or 38 Foot round, with a lovely Capital on the top. It is ſaid, that *Cæſar* erected this Pillar in Memory of the Victory obtain'd over *Pompey*, and 'tis thought, that it muſt be caſt or made of a certain Cement, compoſed of Sand and calcined Stone, upon the Place, becauſe 'tis almoſt impoſſible to carry or erect ſuch an high Bulk. At ſome Paces Diſtance was *Cæſar's* Palace, but all ruin'd, except ſome Pillars of Porphyry, and ſpotted green Marble, and the Frontiſpiece, which are lovely Pieces. About 80 Paces from this Pillar there is a *Khalis*, or Canal of the *Nile*, dug by the ancient *Ægyptians*, to bring Water from the River into *Alexandria*, which is underneath one entire Ciſtern, and ſupplies every Houſe with Water all the Year, which they fetch up by *Pouſeragues*, or Wheels, into the private Ciſterns. They fill their great Ciſtern in *Auguſt* and *September*, but the Water is unwholſome for their Drink till ſome Months after. Beſides this Inconvenience, the Air of *Alexandria* is ſo bad, during the Months of *July*, *Auguſt*, *September* and *October*, that many who lie upon the Ground at that time fall into Quartane Agues, which hold them ſeveral Years, but they that lodge in the Ships, eſcape the ill Effects of it, and the Heat is ſo violent, that it makes all the Inhabitants tawny. On the ſides of the *Khalis* are Gardens full of Lemmon and Orange-Trees, *Gaſſian* or *Corrob* Trees, and the like, moſt of them bearing Fruits fit only for Sauces and Conſerves. The Fields about *Alexandria* are full of Palm-Trees and Caper-Shrubs. By the Gate of *Roſſetto* are many lovely Pillars of *Porphyrian* Marble. In the Church of St. *Catherine* is a Stone, on which, 'tis ſaid, that holy Virgin's Head was cut off, which is hollow, and ſtain'd within with Blood. In the Church of St. *Mark*, held by the *Cophti*, is a Pulpit, wherein St. *Mark* uſed to preach, and a Picture of St. *Michael*, ſaid to be drawn by St. *Luke*. St. *Mark* was the firſt Patriarch of *Alexandria*, and ſuffered Martyrdom in the Year 64. His Body was kept in this Church, till the *Venetian* Merchants carried it to *Venice*. In the Way from *Roſſetto* are many fair *Porphyrian* Pillars, and 2 lovely Obelisks of Garnet, or, The Baick-Stone, with Hieroglyphick Figures on them, as on thoſe at *Rome*. Near theſe Pillars is the Palace of *Cleopatra*, which is utterly defaced, yet the Ruines prove it to have been a noble Structure. Among the Ruines of the Town are ſome very curious Stones found, like little Medals, and are Agats, Garnets, Emeralds, and the like, engraved with an Head, or Images, which ſerv'd of old for *Taliſmans*, or Charms, and that ſo curiouſly, that ſuch cannot be made now-a-days, and tho' ſome of them are ſo ſmall, that one has much ado to finger them, yet they are graven to Perfection, which ſhew'd the Excellency of the Artiſt. About 1000 Paces from the Gate *Del-Pepe*, are Grotto's cut in a Rock, wherein are Sepulchres 4 Story high, and in them dead Mens Bones as freſh and hard, as if they had died the Day before; but ſuch as have been caſt out of the Grotto, and lie in the Air, are rotten, and will break like dead Elder, tho' they are moiſt.

Grotto's and Sepulchres.

From *Alexandria* he went to *Roſſetto*, which is 60 Miles from it. The Way is Sandy, but defended by the Caſtle of *Bouquier*, and you croſs a Lake in a Ferry-Boat, which is called *Madie*, near it. *Roſſetto*, anciently called *Canopus*, lies upon a Branch of the *Nile*, which falls into the Sea 5 Miles below the Town, next to *Cairo*. It is reckon'd one of the neateſt Towns in *Ægypt*, not for its lovely Piazza's only, but the fair *Hans* it contains, and yet they are daily building more, becauſe 'tis a Town of great Traffick, and very pleaſant, being encompaſſed with lovely Gardens. The Houſes are high, Victuals plentiful, eſpecially Water-Fowls; but yet it labours with this Inconvenience, that in the Months of *July* and *Auguſt* the Sea ſo mixes with the *Nile*, that they have no Water to drink, but what they catch in their Ciſterns. Saiques can come up to the Town, but no great Ships, yet they maintain a great Trade to the *Archipelago*. It is carefully kept by a *Sous-Caſha* from the Diſorders that may happen, and 60 Men go up and down the Town continually in the Night to catch the *Arabs*, who ſwim over the *Nile* to rob it.

Roſſetto or *Canopus* deſcribed. Hans. Houſes. Trade.

From hence he departed to *Cairo*. He took a Saique, and ſailing up the *Nile*, came to an Anchor at *Boulac*, which is the Port of that Town, and has many Gardens and Country-Houſes about it. It is about as big as the *Hague* in *Holland*. Here Travellers pay a Piaſtre to ſome *Jews*, according to Cuſtom, and uſually take Aſſes to ride to *Cairo*, which is about half a Lg. from it. The Country all along the ſides of the *Nile* is exellently good, ſo that *Ægypt* may be ſaid to be an Earthly Paradiſee, but inhabited by Devils, the Inhabitants being vicious Robbers, and ſo cruel, as to kill a Man for a Penny.

Boulac.

Cairo, the Capital and Metropolitan City of *Ægypt*, before it fell under the *Turkiſh* Dominion, was in the latter Times govern'd by *Mamalukes*, who were *Circaſſian* Slaves, bought by the Merchants, and being train'd up in all Military Exerciſes, were afterwards raiſed according to their Merit (the Cowards and Unhandy being left behind) and the braveſt of them were made Sultans; and as none was received to be a *Mamaluke*, who was not a Chriſtian by Extraction, ſo none could be Sultans that were not *Mamalukes*. Theſe Men were driven out of *Ægypt* by Sultan *Selim*, who, conquering that Country, cauſed *Thomambey* to be hang'd at one of the Gates of *Cairo*, called *Babzuaila*, and cut off all the *Mamalukes* in the Year 1517. from which time the *Turks* have been Maſters of it. The City ſtands ill, lying at the Foot of an Hill, on which the Caſtle is built, and which intercepts the Wind and Air ſo, that it makes it ſtifling hot, and ſubject to many Diſeaſes, and tho' it has no Water for the greateſt part of the Year, but what is brought from *Boulac* in Borachio's upon Camels, or from their ſtinking Ciſterns and Pools for Nearneſs, yet it is full of People. It lies in the Form of a Creſcent, but is narrow, and is little more than 3 *French* Lgs. in Compaſs. It is not ſo big as *Paris*, but more populous, for tho' the Women and Children, according to the *Turkiſh* Cuſtom, never ſtir out, yet the Streets are always full of People, eſpecially on the Market-Days, when 'tis hard to crowd thro' them; and when the Plague ſweeps away 200000 it is not perceived. The Inhabitants, as almoſt in all Parts of *Ægypt*, conſiſt of *Turks*, *Moors*, which are very black, *Jews* and *Chriſtians*. There are very few *Europeans*, and thoſe are *French*, who have a *COSS*. The *Cophti*, who are properly the Chriſtians of *Ægypt*, have 2 Churches, the one dedicated to the Virgin *Mary*, which ſtands in the *Haver Zueile-ſtreet*, and the other to St. *Barbus*, and is in the *Greek-ſtreet*. They had many more Churches and Monaſteries anciently in *Cairo*, and a Biſhop, but they are demoliſh'd.

Cairo deſcribed. The *Mamalukes* deſtroyed. Bad Air and Water.

It is encompaſſed round with very fair and thick Walls, built of good Stone, which is yet ſo white, that they would be taken for new, did not the Cracks prove them ancient, and having handſome Battlements at leſs than 100 Paces Diſtance, lovely Towers able to contain many People, and tho' they were built

Walls.

high, yet in many Places the Ruines cover them. It has 7 Gates, and in the Circumference of the Ramparts 8 large Moſques, about which are very ſtately Houſes. In many Places are great Church-yards full of Sepulchres, adorned with fair Stones, that yield a pleaſant Proſpect, and would ſerve for building a Town. There are 23000 Precincts in *Cairo*, which have in each of them ſeveral Streets, and at leaſt one Moſque, and in ſome of them more; but as all the Streets are ſhort and narrow, except thoſe of the *Bazar* and *Khalis*, ſo a good many of the Moſques are little Holes, or Chappels, not 10 Paces ſquare, but ſome of them are very fair and magnificent Buildings, adorn'd with lovely Frontiſpieces and Gates, and very high Minerets, of which the greateſt is *Dgemiel Azem*. This is looked upon at preſent as the Cathedral, or Mother-Church, and the 4 *Mufti's*, or *Mahometan* Prieſts, have their Reſidence there. It is had in ſo great Reverence, that it ſerves as an *Aſylum*, or Sanctuary for Criminals, and it maintains 800 *Mahometans* out of its Revenue.

The Streets and Moſques

The Houſes. The Houſes of *Cairo* are built of Stone, ſeveral Stories high, with flat and terraſs Roofs, where they take the Air when the Sun is down, and ſome lie upon them all the Summer. The Inſides of them, eſpecially the Houſes of Perſons of Quality, are nothing but Gold and Azure, tho' they make no Shew without: Their Halls have generally a ſpacious Cupulo, or Lanthorn, to let in the freſh Air.

The Caſtle. The Caſtle of *Cairo* is one of the fineſt Things in *Egypt*: It ſtands upon the Hill without the Town. It is founded on a Rock, and encompaſſed with very high and thick Walls, flank'd with ſtrong Towers, and is 2 Miles round. The Aſcent up to it is by a Pair of Stairs cut out of the Rock, ſo eaſie to mount, that Horſes and Camels may go up them with their Loads. Before the Caſtle is a large Square, called the *Romeſle*, by which ſtands the Moſque, called *Sultan Haſan*, from the Builder of it in the Time of the *Mamalukes*. It is all of Free-Stone, extraordinarily well built, and prodigiouſly high. *Thomambey*, the laſt King of the *Mamalukes*, fled to this Moſque, leaving the Caſtle to Sultan *Selim*, who fired ſeveral Guns at it, and the Holes of the Bullets are ſtill ſeen. The greateſt part of the Caſtle is ruined, yet ſeveral Vaules and Buildings are ſtill remaining, but the moſt curious of them is *Joſeph*'s Well, which is certainly a Wonder. This Pit is divided into 2 Stories. The firſt is almoſt ſquare, and the Deſcent hardly to be perceived, for the Convenience of the Oxen, who go down to labour, and from thence you go down 220 Stairs to the Bottom of the firſt Story. The 2d is narrower than the former, but deeper, and both are cut out of the hard Rock with Stairs, ſo that one may go down to the Bottom. Water is drawn out of the Bottom of them by Wheels, hung round with Buckets, turn'd with Oxen, and proceeds from a Spring, which is the only one in *Ægypt*. *Joſeph*'s Hall is to be ſeen in the Caſtle, but much ruin'd, yet it hath 30 great lovely Pillars of the Baick-Stone, and a good deal of Gold and Azure on the Ceiling ſtill to be ſeen. Near it is the Hall of *Joſeph*'s Steward, which is more curious than his Maſter's, but the 10 or 12 Pillars that remain are like his. It is to be obſerv'd, that all the fine ancient Things in *Ægypt* are ſtill attributed to *Joſeph*, and the ugly to *Pharaoh*. In the Caſtle alſo is an old Hall, well built and gilt, and painted in the Ceiling with *Moſaick* Work, where the Veſt of *Mahomet*, that is yearly ſent to *Meccha*, is embroidered. There you have many high Terraſſes, from whence you may ſee all the City of New and Old *Cairo*, *Boulac*, and a great way into the Deſarts. *Joſeph*'s Dungeon, where, 'tis ſaid, he was caſt when he interpreted the King's Butler and Baker's Dreams, ſtill remains. It is a naſty Place, and the Priſoners, who are uſually *Chriſtians* or *Jews*, are uſed cruelly, being put in the Stocks, and chain'd to the Wall. In Truth 'tis an Hell upon Earth. An *Aga* of the *Janizaries* lives in it, and commands it. The *Baſha's* Apartment and *Seraglio*, which is very near, joins to the Caſtle, as the *Kiaya's* does alſo, from both which you may ſee the Old and New *Cairo*, *Boulac*, and the Deſarts.

Joſeph's Hall.

Joſeph's Dungeon.

The Hall of the *Divan*. The Hall of the Great *Divan* is in the *Baſha's* Apartment, but the Ceiling is too low for the Length. Againſt the Wall of this Hall hangs 10 Bucklers, a Finger's Breadth thick, pierced thro' with one Spear, thrown by Sultan *Amurath*, and kept as a Proof of his Strength. In this Apartment alſo is a large Court, called *Cara Meidan*, at the End of which are the *Baſha's* Stables, to which the Water of the *Nile* is convey'd from *Boulac* by an Aqueduct. This Caſtle may paſs for a large Town, and is one of the fineſt in World for its Strength, ſtately Buildings, and a good Proſpect and Air, and appears a Work worthy the Labour of the *Pharaoh's* and *Ptolomy's*, who built it. The Fountain of Lovers is in the City. It is a great Oval Trough or Baſon, made of one entire Piece of black Marble, 6 Foot long, and 3 Foot high, and all round it are Figures of Men and Hieroglyphicks rarely well cut: The People ſay, that Sacrifices were offered of old to it. Not far from thence is the *Calaat el Kabb* i. e. The Caſtle of Turpitude, which ſeems to have been formerly a large and neat Palace, but now 'tis fallen to Decay, and there remains nothing obſervable, but ſeveral large Pillars. Sultan *Selim* when he became Maſter of *Cairo* is ſaid to have lodg'd in it. By it is the Garden of Lovers, and they ſay, that 'twas with the Urine of this Gardiner's Wife that *Seſoſtris* waſh'd his Eyes to recover his Sight, according to the Direction of the Oracle, when his own Wife's and many others fail'd, and therefore he married her, and put them to Death.

The Fountain of Lovers.

The Gardiner's Trouble.

There are many lovely Moſques and ſtately Palaces in *Cairo*. The *Beys* Houſes have brave Apartments, large Halls, paved with Marble, and adorn'd with Water-Works and Ceilings ſet off with Gold and Azure, but the Frotiſpieces are ugly. Their Locks and Keys are all of Wood, and may be eaſily open'd without a Key. The *Bazar-ſtreet* is very long and broad, and on *Thurſdays* and *Mondays*, the Market-Days, are mightily throng'd. Here are all ſorts of Goods to be ſold. In the *Han Kalil*, or Little *Han*, which is a ſhort broad Street at the End of the *Bazar*, are Shops full of rich Goods; and in the Great *Han*, which has a large Piazza and high Buildings, are white Slaves of all Sexes and Ages ſold, and in another *Han* near it black ones of all ſorts.

The Markets, &c.

The Hoſpital and Moſque of mad People is nigh the Han *Kalil*. They are led in Chains to the Moſque at Prayer-time. Sick People are alſo well entertained in it, and well look'd after.

The Hoſpital of mad People and Sick.

The Turky-work Carpets made at *Cairo*, and that by the Help of little Boys, who are marvellouſly dexterous at that Work, is a great Curiority to ſee, and the Hatching of Chickens in Ovens, made ſo temperately warm, as to imitate the natural Heat of the Hen, is a Wonder, and yet is done for 4 Months together at *Cairo*, and ſome Hundred Thouſands of Chickens are ſo hatch'd, and ſold commonly by the Buſhel to any one that will buy them. They put about 8000 Eggs into an Oven, and in 22 Days the Chickens are produced. The Great Duke of *Florence* ſent for one of the Men that drove this Trade in *Ægypt* into his Country, and he did the ſame there, and it may be done by the ſame Art in any Place.

When the *Hazna*, or G. Seignior's Revenue, which amounts to 600000 *Venetian* Chequins, or 1500000 Piaſtres, is brought down from the Caſtle of *Cairo* in *June*, it is carried under the Guard of a *Sangiack-Bey*, with a mighty Train, *viz.* all his Servants well mounted, the *Seraf-Baſha*, and his Son, each with a *Caftan* given them by the *Baſha*, 8 Clerks, and other Officers of the Cuſtom-Houſe, all the *Chiaux's* with their great Turbants, then more of the *Sangiack's* Servants, and behind them 30 Mules loaden with the Treaſure, attended with ſeveral *Janizaries* on Foot, and above 2000 more following them 2 by 2, having Muskets on their Shoulders, and Sabres by their Sides; and laſt of all the *Sangiack-Bey*, and ſo they go thro' the *Bab Naſra*, or Gate of Victory, to *Conſtantinople* in admirable Order, without the leaſt Noiſe, all well arm'd, which is a pleaſant Sight.

The Caſtle in carrying the Grand Seignior's Treaſure.

Other Things remarkable in *Cairo* are, 1. The great Number of blind People, and ſuch as have ſore Eyes, which amount to one Quarter of the City at leaſt. Infants from the Womb are afflicted with them. The Natural and Philoſophical Reaſon which the Natives give for it is this, That the ſubtle Particles of the Lime, with which the Houſes are built, being carried about by the Wind in a ſmall Powder, ſtick ſo cloſe to the Eyes, that they not only cauſed Pain, but inſenſibly mixing with the Blood, made the Diſtemper Hereditary to Infants; and, indeed, Experience will ſoon convince any Man of the Truth of it, who continues any conſiderable time in the Streets when the Wind blows, for they will find their Eyes very ſore upon it.

Many People in *Cairo*.

Their *Devoto's*, or Saints.

2. A sort of *Devoto's*, who by the *Ægyptians* are looked upon as Saints. They are sometimes all naked, or have only a Coverlet cast loosely round their Bodies. They look upon Strangers as Infidels, with a scornful angry Look. The *Ægyptians* have so great a Veneration for these holy Men, that they press in Throngs to kiss the Robes that is round about them.

Women with Nose-Rings.

3. Women, who wear as an Ornament a large Ring run thro' their Nostrils, as Women among us wear them in their Ears, but not of Gold, as our Womens are, but of Brass, or some other base Metal.

The *Jews* and *Arabians* Habits.

4. The Habits of the *Arabians* and *Jews*. The *Arabians* wear a Vail of black Silk, strip'd with Gold Thread, about their Heads, and the End hangs down upon their Breasts. It is commonly set off with Tufts of the same. The Women wear a sort of Sugar-Loaf Hats, about which they wind a Piece of black or brown Stuff, strip'd with Gold and Silver. Their other Habit is like the *Turks*, save that their Vest is button'd before with a Row of great and small Buttons mix'd. The *Jews* Turbant is mix'd with blue Stripes, and their Habit is all of a Velvet Colour, to distinguish them from the *Turks*, and their Women wear on their Heads a very long black Cap, about which they wind a white or brown Handkerchief, strip'd with Gold and Silver.

The antick Tricks of Apes.

5. The antick Tricks of Apes, which are met commonly in the Streets of *Cairo*. They are train'd up by the *Moors* to all sorts of Merriments to divert the Caravans, and will shew many pleasant Tricks. The *Moors* also bring Parrots.

The *Turks Carnaval*.

6. The *Turks Carnaval*, which is on *July* 12, and begins their *Ramadan*. It is celebrated in the Night, and they call it, *The Night of Power*, because they believe that the *Alcoran* descended from Heaven that Night. The Manner of celebrating it is thus: So soon as the Night Lamps are lighted up in all the Streets, and more especially in the *Bazar*, they hang up Iron-Hoops and Baskets upon Ropes full of Candles, because the Procession is to pass thro' it. The Minerets also of the Mosques are all deck'd with Lamps. About Evening shut all the *Santo's*, *Chiaux*, and such as are concerned in the Cavalcade, meet at the *Cadelesquer's* House, who telling them, That the Moon hath been seen, and that the *Ramadan* begins that Night, the Solemnity commences within an Hour or 2. First go a great many *Santo's* on Foot, arm'd with Clubs, and Torches in their Hands, accompanied with many People, who carrying Links, march up and down dancing, singing, roaring and making a Noise. In the midst of them rides a *Scheikh* of great Reputation upon a Mule, and as he passes the People shout and make great Acclamations. After him come several Men mounted on Camels, playing on Timbrels, Drums, and other Instruments, which make a sad Noise. Then follow Men in Masquerade, who carry Links, Hoops full of Fiery Launces, and discharge many Squibs and Serpents. After them come the Officers of the *Bey*, with their *Harquebusses*, and the *Chiaux*, all on Horse-back. Next go several *Janizaries*, with their Muskets and Cimiters, and after them the *Sous-Basha*, *Muhtesib*, and many publick Magistrates well attended by *Janizaries* and Link-Men, and the whole is concluded by a great many *Santo's*, who sing some joyful Songs for the Coming of the *Ramadan*. The Shops and Coffee-Houses are kept open, and full of Lamps, and tho' the whole is performed by a Company of Rogues got together, yet 'tis a pleasant Sight.

The Caravan to *Meccha*.

7. The Caravan, which goes every Year to *Meccha* and *Medina*, which brings such a mighty Concourse of People to *Cairo*, from all Parts, that the Streets are hardly passable. When the Time is come, that the Caravan sets out for *Meccha*, the Presents are brought in great Pomp from the Castle, where they are wrought in the old Hall, thro' the City to the House of the *Emir-Adge*, i. e. the Captain of the Caravan of the Pilgrims. The Presents are Ornaments for the adorning the *Kiabe*, or Mosque of *Meccha*, and are made up of 4 long Pieces of Crimson Velvet, embroidered all over with *Arabick* Letters of Gold, as long, broad, and thick as one's Finger; a large and long Door-piece of Velvet embroidered in the same Manner; a great Pavilion of Crimson all embroidered with Golden Letters, carried on a Camel; and a lesser Pavilion carried by a Man; 8 Pieces of Searge, and a Man's Burden of Ropes. All these Things were carried by the Families of the *Beys*, *Chiaux's*, *Azapes* and *Janizaries*, the *Emir-Adge* having a *Caftan* given him by the *Basha*, as had the other *Beys* and Officers, who were to attend them. The Presents are called by the *Franks*, *Mahomet's* Vest, and the Procession is attended with Banners, Santo's, Drums and Timbrels. The People press and croud mightily to touch the Presents, which they do with much Respect and Devotion, and those that can't come near, undo their Turban to throw one End upon them, for if they touch them with any thing they can kiss, they are satisfied. This Solemnity was celebrated, *July* 21. 1657. Two Days after the *Emir-Adge* went out of the Town, and encamped abroad to prepare for his Journey to *Meccha*. He had in his Cavalcade, which was much like the former, 6 Field-pieces for his Expedition, several Camels and Horses laden with his Provisions, and Servants, with their Children. These marched first, and after them the *Beys*, *Emir-Adge* and *Santo's*, clad in divers Fashions, and making many odd Mouths and Faces. At length comes the blessed Camel, bearing the Pavilion, wherein all the Presents are laid, and another following empty, to relieve him when he is weary. This Caravan was very numerous, many *Ægyptians* and *Turks* from *Greece*, coming to *Cairo* to perform this Journey. 'Tis said, it consisted of 100000 Persons, and 8000 Camels, 4 *Beys*, 1 *Janizar-Agasi*, 1 *Bistangi-Basha*, and several other mighty Lords. There are 3 other Caravans that yearly travel to *Meccha*, *viz.* That of *Damascus* from the *Syrians*; that of *Magrebins*, comprehending all such as go from *Barbary*, *Fez* and *Morocco*, who meet at *Cairo*, but go a Day after the Caravan of *Cairo*; and that of *Persia*, to which the *Indians* and the Great *Mogul's* Subjects join themselves. It takes up about 6 Weeks, or 45 Days to bring the Caravan to *Meccha*, and they are forced generally to travel by Night to avoid the Heat. The Stages, which are about 40, are usually at Places where there is plenty of Water to refresh the Beasts.

Meccha described.

Meccha is had in so great Veneration by all the *Mussulmans*, or *Mahometans*, not only because *Mahomet* was born there, but for his Temple, called *Kiaabe*, *i. e.* The House of God, which stands there, that they think none worthy to come there but themselves, and therefore they suffer none but themselves to come near it within some Days Journey, and if a Christian should be apprehended within the Compass which they call the Holy Land, he would be burned without Mercy. *Meccha* is an ancient Town, situated among the Mountains of *Arabia*, a Day's Journey from the *Red-Sea*, and built all of Stone. The *Kiaabe* is in the middle of the Town, and is surrounded with a Wall to keep People from approaching it, there being a void Space between the Temple and the Wall. It is about 15 Foot in Length, 12 in Breadth, and 5 Fathom high. The Threshold of the Door is as high above Ground as a Man can reach, and the Floor is even with it. The Door is a Fathom and half high, and a Fathom wide, of beaten Silver, and opens with 2 Leaves. Men go up to it by a Ladder. The House has a flat Roof, covered with a Dome, supported by Three Pillars of Aloes-Wood, as big as a Man's Body, and 3 Fathom and half long, of one entire Piece. It is hung with red and white Stuff, and by the Door is the black Stone, called *Hidgiar Asuad*, which is had in so great Veneration. There is a Court about the House, called by the *Turks*, *Haram*, encompassed with Walls, with 3 Rows of Pillars in the Inside. The 4 Sects of *Mahometanism*, called *Hanifi*, *Chafii*, *Maliki* and *Hambeli*, have each their Places of Prayers, in which they always turn their Faces to the Temple. The House is girt about with 2 Belts of Gold, one below and another above, and has a Spout of Gold to carry off the Rain-Water. In it is a Fountain of pretty good Water, and at the Door lies a black Stone, as big as a Man's Head, which, they say, came from Heaven, and was at first white, but thro' the Sins of Men it became black. He that kisseth at the time when they give one another the *Salam*, after the Prayer of *Kouschlouk* on *Friday*, that falls within the 3 Days they sojourn there, is held to be a Saint, and every one strives to kiss his Feet, so that he is frequently stifled upon the Spot. They never go into this sacred Place but 4 times a Year, and one of them is in the *Ramadan*, when they wash it with Rose-Water; but a Person of Quality for 100 Chequins may go into it at any time. This House is covered all round on the Outside with Stuffs, which the G. Seignior and other *Mahometan* Princes offer to it yearly, and the old ones belong to the

G. Seignior, when the Little *Biram* falls on a *Friday*, who gives Pieces of them to new Moſques; but on other Years the *Scheriff* of *Meccha* takes off the Gold, and cutting them in Pieces, ſells them for Relicts at the Rate of ſeveral Chequins. He has other Devices to ſqueeze Money out of the Pilgrims, out of ſome religious Pretences. When the Pilgrims are met at *Meccha*, there is a great Fair kept for all ſorts of Commodities brought from the *Indies*. The Caves in the Mountains are the Shops of the Merchants. The Reaſons of this Pilgrimage are divers; ſome go out of Devotion and Obedience to the Law; others to trade, and ſell or buy Commodities; others to atone for ſome great Crime, for if a Man be guilty of never ſo great Crimes, if he can eſcape and go this Journey, he is reckoned an honeſt Man. All perform it with a great deal of ſeeming Devotion, ſinging ſome Verſes of the *Alcoran*, and beſtowing ſome Charity all the Way. Two Days before they arrive at *Meccha*, they ſtrip themſelves at *Rabacke*, and ſo remain ſtark naked 8 Days, all but their Privities and Necks, which are covered with Napkins, and wear Sandals, that they may not touch ſo holy Ground. In this time they may not be ſhaven, buy nor ſell any thing, kill any thing, quarrel with a Servant, or ſpeak an unſeemly Word: If any offend in theſe Things, they muſt give conſiderable Alms. When the 8 Days are over, ſick Perſons do not ſtrip, but only give Alms. When they come to *Meccha*, they ſtay but 3 Days there, and in that time viſit the Holy Places. On one of them every one goes round the *Kiaabe*, ſaying certain Prayers. An *Iman* goes before them to ſhew them what to ſay and do. Firſt they walk ſoftly, muttering their Prayers, then they run, skip and ſhrug their Shoulders ſeveral ways, and then fall to their gentle Pace again, and from that go again to their Running. After 3 Days they go to *Minnet* upon the Little *Biram*, and every one ſacrifices Sheep, according to their Abilities, giving a good part of them to the Poor, and that Day they put on their Cloaths, ſhave themſelves, and appear as they were before the 8 Days. Then they go to Mount *Arafat*, to throw Stones at the Devil, who tempted *Abraham*, when he went to ſacrifice his Son *Iſmael* (for they will not allow that *Iſaac* was the Perſon to be ſacrificed.) Here a *Skeikh* preaches to the whole Multitude from the top of a Rock. When theſe Ceremonies are over, the Sultan *Scheriff* having ſaid ſome Prayers, diſmiſſes the People with his Benediction, to which the People ſay, *Amen*, and then depart; and the next Night after the Pilgrims are gone, ſo much Rain falls, that one would think it were a Deluge, which makes a Torrent that waſhes away the Blood of the Sacrifices, and carries along with it all the Bones that remain'd in the Plain, and tho' the *Biram* fall 10 Days ſooner every Year than formerly, yet the Rain always falls the ſame Night the Pilgrims depart. The Infidels are perſwaded, that God ſends it to ſhew their Sacrifice is acceptable to him; but whatever be the Will of God, 'tis wonderful,

From *Meccha* they go to *Medina*, which is 10 Days Journey from it in the Road to *Damaſcus*, to viſit *Mahomet*'s Tomb, which is placed in a Corner of a Moſque in the middle of the Town, encompaſſed on all ſides with great Iron-Grates, becauſe the *Turks* tell a Story, That a Chriſtians, under the Habit of *Dervices*, deſigned to ſteal it; which we may ſuppoſe is as ridiculous a Story, as 'tis to the *Turks*, That the Temple in which *Mahomet*'s Shrine is, is faced with Loadſtone, which by its Vertue holds it up in the Air, becauſe 'tis made of Iron. The Sepulchre is in a little Tower, covered with a *Turbe*, or Dome, and round it is a little Gallery, of which the Outſide Wall has ſeveral Windows with Silver-Grates, and the Inſide Wall is adorn'd with a great Number of precious Stones at that Place, which anſwers to the Head of the Tomb, of inеſtimable Value, given by the *Mahometan* Kings in ſo many Ages. Among others there is a Diamond half a Finger long, and 2 Fingers broad, and over it another ſent by Sultan *Oſman*, equal to that which the *Turkiſh* Emperors wear on their Fingers. Lower is an Half-Moon of Gold, ſet with Diamonds of great Worth. The Pilgrims ſee not *Mahomet*'s Tomb, but content themſelves to ſee the Tower where it ſtands, but Strangers, when the Multitudes are gone, may have Liberty to ſee and undeceive themſelves, that it does not, nor never did hang in the Air. The *Turbe*, or Tower is hang'd all round with red and white Damask, which cover all the Wall, but at the Place where the Diamonds are. All round the Hangings are written, *La Illah*, &c. *God is God, and* Mahomet *is his Prophet*. Theſe Hangings are renew'd every 7 Years, and ſooner if there happen a new Emperor. The Doors of the Gallery are of Silver. Many Pilgrims do not viſit *Mahomet*'s Tomb, becauſe he never commanded it, but only adviſed, that if they did, they ſhould ſay a *Fatha*, or Prayer for his Soul.

When the Caravan is about to return from *Meccha*, an *Aga* goes from *Cairo* to guard the freſh Proviſions, which the People ſend their Friends and Relations in the Caravan, which delivering ſafely, he is well rewarded for it. At their Return there is a great Mixture of Joy and Sorrow, the People kiſſing their Relations that are come home ſafe, or lamenting ſuch as have died in the Journey, which are uſually many, for they meet often with ſuch hot Winds, as ſtifle their Breath, and kill them immediately, and in this Journey died always 6000, and thoſe who return alive are ſo alter'd, that they can hardly be known, and yet many, both Men, Women and Children, make it yearly. The Pilgrims are called *Adgi*, and are much reſpected as long as they live. The Goods of all the People that die in this Journey fall to the *Emir-Adge*, who is abſolute Maſter of this Multitude, and adminiſters Juſtice to them.

8. The Cutting or Opening of the *Khalis*, which at *Cairo* is perform'd with great Ceremony and Rojoycings. The *Khalis* is a low Street, which goes quite thro' the City of *Cairo*, beginning at the *Nile*, towards Old *Cairo*, and ending in the Fields, towards St. *Michael*'s. When the River *Nile* begins to ſwell, they caſt up a Bank of Earth at the End of the Street, which is near the River, to keep the Water from running into the *Khalis*, and when it is high enough, they cut thro' the Bank of Earth, and give the Water Paſſage into the *Khalis* thro' the Town. This is performed by the *Baſha*, or *Sous-Baſha*, with great Ceremony, in *Auguſt*, being attended by his Guards, and 2 Men mounted on Camels, beating upon Timbrels, marches along the *Khalis* on Horſe-back, and being come to the End of it, alight, and having with an Hammer given the firſt Blow to the breaking of the Bank, he takes Horſe again, and rides back, leaving ſeveral *Moors* to break it down, who do it ſo leaſurely, that he is gone near an Hour before the Water comes. In his Return he receives a Due of ſome Piaſtres of the *COSS* of the *Franks*. After him come a Rabble, ſinging and peltring one another with Cudgels. Then comes the Water, which a Company of Roguiſh *Moors* and Boys accompany, keep Pace with, ſome ſwimming, and others throwing one another into it, and ſhewing a Thouſand fooliſh Tricks. The *Khalis* was filled 15 Foot high, and all the time it was running there came Boats full of merry Sparks, ſinging and playing upon Inſtruments, as they paſs along. This Mirth is to teſtifie their Joy for the Fruitfulneſs that the *Nile* brings along with it. When the *Khalis* ceaſeth to run, which is in *October*, when the *Nile* decreaſeth, they take no more Water out of it, and when it has done running, there is a moſt noiſome Smell comes from it, which ariſeth not only from the Corruption of the Water when it ſtands, but from the Filth of the City caſt into it. The Infection is ſo great, that it tarniſhes all Silver, and ſpoils the Pictures near it, and tho' the *Sous-Baſha* might remedy this Inconvenience by draining the Water out, yet he will not, becauſe he ſells it to the Gardiners to water their Grounds; yet they take care it be levelled and dry by *May*, becauſe otherwiſe the Houſes would be laid under Water.

The Cutting of the Khalis.

9. The *Eſine*, which is a publick Rejoycing for a Victory obtained by the *Turks* over their Enemies. It is proclaim'd 7 Days before the chief Crier in a *Caſtan* advertiſes the Beys and Conſuls of it. It begins at Evening-Prayer, and in the Morning the Guns fire from the Caſtle, and ſo continue every Morning as long as the *Eſine* laſts. As ſoon as it is begun every Man provides Lamps and Stuffs to hang before their Doors, ſo that the Streets are full of Lamp-Lights, and hung with lovely Hangings of Cloth of Gold, Tapeſtry, and other rich Stuffs, to which the Beys add Shews of all ſorts of Arms and Armour at their Gates. The Figures of Chriſtian *Franks* ſet up among theſe Shews are to the *Turks* a pleaſant Diverſion. The Conſuls of *Europe* muſt join in this Solemnity, tho' it be for a Victory over their Country, elſe they will have an Avarice laid upon them. They uſually expoſe, beſides Lamps and Tapeſtry, ſeveral excellent Pictures of

The Eſine, or Day of Rejoycing for a Victory.

of the beſt Faces, which the *Turks* look on with Admiration, thinking it impoſſible that there ſhould be any ſuch Beauties in the World, and all that come to ſee them they muſt treat with Coffee and Tobacco, and if Perſons of Quality with Serbet and Sweet-Meats, ſo that theſe Solemnities are expenſive to the Conſuls.

Old *Cairo*. Old *Cairo*, though it be ſeparated from the New *Cairo* by ſeveral Meadows and Paſtures, yet by ſome is reckoned as the Suburbs of it, and ſo may well enough be join'd with it in the Deſcription. It is a ruinous Town, but has in it ſome good Houſes, and is pretty well inhabited. The Places moſt remarkable in it are, The Church of *Abouſargis*, i. e. Father *Sergius*, becauſe it is dedicated to St. *Sergius*. Under it is a Chappel, which was formerly a meer Grotto, where 'tis believed the Virgin ſtaid a pretty while with her Son *Jeſus*, when ſhe fled from *Herod*'s Anger. The Monks celebrate Maſs in it. This Church is held by the *Cophti*. The Monaſtery of St. *George*, which has a Church belonging to it, where, the *Greeks* ſay, is an Arm of that Saint preſerved, and a Pillar, to which they chain mad Men for a Cure. This Monaſtery is inhabited by *Greek* Nuns, who allow the *Franks* for a Chequin each to bury their Dead in their Churchyard. This Building is ancient, well made, and exceeding high, ſo that from the Top is a far diſtant Proſpect. 3. *Joſeph*'s Granaries, which, they ſay, he built and filled with Corn againſt the Famine, which was to happen after 7 Years Plenty. They are very ſpacious Halls, and at preſent there is Corn kept in them. 4. The Ruines of an ancient Palace, which they ſay was the Reſidence of the Kings of *Ægypt*; but it is more probable 'tis the *Faſtade*. It ſeems to have been a very ſtately Building. 5. The Aquæduct, which carries Water from the *Nile* to the Caſtle. 'Tis ſupported with 350 Arches, which ſeem narrow, becauſe they are very high. The Water is raiſed by 8 *Saki*'s, turned by Oxen, which diſcharge the Water into a Baſon, from whence it runs thro' a little Conduit-pipe into the Aquæduct.

Joſeph's Granaries.

The Aquæduct.

CHAP. VIII.

The Author's Travels into other Parts of Ægypt, *and what he obſerv'd moſt remarkable.*

FROM *Cairo* Mr. *Thevenot* went firſt to ſee thoſe magnificent Works of the ancient Kings of *Ægypt*, which as they have been reckon'd among the 7 Wonders of the World, ſo ſome of them have out-brav'd the Injuries of Time hitherto, *viz.* the Pyramids. They are 3 Lgs. diſtant from *Cairo*. They are called by the *Turks*, *Pharaon Daglary*; and by the *Arabs*, *Dgebel Pharaon*, i. e. *Pharaoh*'s Hills. There are but 3 that are conſiderable, and they are ſeen from *Cairo*, and a great way beyond it; the reſt are not worth a Man's Notice, tho' there are many more. The biggeſt of theſe Pyramids is always open, and being of the Matter and Form of the reſt, a Deſcription of that will be ſufficient. There is an Aſcent both within and without to the Top of it, and 'tis ſo tireſome to go up both Ways, that few have Strength enough to do it. The outward Aſcent is the moſt eaſie and uſual, and yet 'tis convenient to take a Guide, who hath been upon it, otherwiſe you may miſtake the Way, and come to ſuch Places, where you can neither go up nor down, without Danger of tumbling headlong. The eaſieſt Place of Aſcent in this large Pyramid is at the Angle, which looks betwixt the E. and N. It has 280 great Stone-Steps about 2 Foot and half or 3 Foot high, and the Height of the Pyramid is 520 Foot, and 616 broad, upon a Baſis 682 Foot ſquare, and 704 broad. About half way up is a ſquare Room, where, if you be weary, you may reſt, and refreſh your ſelf with a Bottle, if you pleaſe, and is common. On the Top is a fair Platform, from whence you have a pleaſant Proſpect: It is framed of 12 lovely large Stones, 16 * Foot and 2 Thirds ſquare, tho' from the Bottom it ſeems a ſharp Point. The N. ſide of the Pyramid is much ruin'd, being expoſed to the Wind of that Quarter. The Door of the Pyramid, by which you go into it, is at the 16th Step, and you muſt go upon an Hill of Sand to go in at it, and often it is filled up with Sand, that it muſt be removed before any one can enter. The Lintel over the Door is a Stone 11 Foot long, and 8 Foot thick. The Entry is ſquare, and all along of a like Dimenſion, being 3 Foot 3 Inches both wide and high. The Paſſage goes ſloping down 76 Foot, and then you find an Aſcent of the ſame Wideneſs. About 111 Foot up in this Aſcent is 2 Paſſages, one leads to a Room, and the other to an Hall 32 Foot in Length, 19 wide, and 16 broad, and having a flat Roof of 9 Stones. At the End of the Hall is an empty Tomb, that ſounds like a Bell, 3 Foot 4 Inches high, 3 Foot 1 Inch wide, and 7 Foot 2 Inches long. It is like Porphyry well poliſh'd, and very beautiful. It is thought to have been built for that *Pharaoh* that was drown'd in the *Red-Sea*, when he purſued the *Iſraelites*. At the Right-Hand of the firſt Paſſage is a Well 123 Foot deep, but ſuch as have deſcended into it found nothing but Sand and a Multitude of Bats, which are ready to eat a Man up. The 2d Pyramid is ſhut up, and has no Steps without. It ſeems at a Diſtance to be higher than the firſt, but 'tis becauſe 'tis built on higher Ground, for coming near it, it appears otherwiſe; yet 'tis 631 Foot ſquare at the Baſis. The 3d is but little and inconſiderable. It is probable, that at firſt it was faced with the ſame Stone, of which *Pharaoh*'s Tomb is made, but they are tumbled down, and lie at the Foot of it. *Pliny* ſays, That the biggeſt of theſe Pyramids was 20 Years in building by 370000 Men, and that 1800 Talents were ſpent in that Time in Turnips and Onions. They are built of prodigious great Stones, and were raiſed by the *Ægyptian* Kings to be buried in.

The Pyramids of *Ægypt*.

The Entry into it.

Pharaoh's Tomb.

Near theſe Pyramids are ſome Grotto's, or Caves, which have formerly, which have formerly ſerved for Places to bury the Dead in. They are cut in the Inſide of a Rock, without any Order, but are all ſquare, and even within. The Walls of ſome of them are full of Hieroglyphick Figures cut in the Rock, ſome ſmall, but others as big as the Life, and one had 16 Men and Women holding Hand and Hand.

Caves for Burying, or Catacombs.

At ſome Diſtance, toward the E. from the biggeſt Pyramid is the *Sphinx*, ſo famous among the Ancients. It is the Buſt of a Body cut out of the natural Rock, from which it was never ſeparated. It repreſents the Face and Breaſt of a Woman, but is prodigiouſly high, *viz.* 26 Foot in Height, and 15 from the Ear to the Chin. The People ſay, That a King of *Ægypt* cauſed this Image to be made in Memory of a *Corinthian* Woman, named *Rhodope*, whom he loved; and *Pliny* ſays, 'Twas *Amaſis* Tomb. Authors report, That this *Sphinx*, as ſoon as the Sun was up, gave Reſponſes to any thing it was conſulted about, and ſuch as go into the Pyramids ſay, That the Prieſts conveyed themſelves into it by the Well found in the Pyramid, but without any Probability, as by Search is found; for neither is there any Paſſage diſcernible in the Well, nor is the Image hollow, or has any Holes at the Mouth, Ears, Eyes or Noſe. The Conjecture therefore of an *Arabian* Author ſeems reaſonablels, who tells us, That to expreſs the Fertility occaſion'd by the Overflowing of the *Nile* the *Ægyptians* built this great Statue. Before each of the Pyramids are the Marks of certain ſquare Buildings, which to ſome ſeem to have been ſo many Temples, and ſo much the rather becauſe of this *Sphinx*, which was placed there to ſhew the Myſteriouſneſs of Theology, but they are rather the Ruines of leſſer Pyramids, which were ſet about theſe great Ones, according to the Cuſtom.

The *Sphinx*.

Ruines of Buildings.

Having viewed the Pyramids, he went to the Village of the *Mummies*, or embalm'd Bodies, called, *Sacara*, which is 3 good Lgs. from the Pyramids. A little

The *Mummies*, or embalm'd Bodies.

little Distance from the Town is the Church-yard, or Plain, where the *Mummy* Pits, or Caves for Sepulture were. They were heretofore full of the Bodies of the ancient *Ægyptians*, so skilfully embalm'd, that they were preserved entire, perhaps, for above 4000 Years, with their Epitaphs, Coffins, and curious and magnificent Dresses. *Du Mont.* The Coffins were enrich'd with Hieroglyphicks, and the Figure of the Deceased in *Relievo*, and sometimes there were Idols, and Jewels laid up in them. Some of them are made of Wood, and chiefly of a kind of Sycamore which is in *Egypt*, called, *Pharaoh*'s Fig-Tree, because it doth not rot so soon as other Wood. Others are made of several Pieces of Cloth pasted together, which are as strong as the Wooden ones, and others are made of Stone, with the Face of the Person within cut in Bosse and Hieroglyphicks all along the Length of it. The Caves of the *Mummies*. Caves are built with Care of the Stone, or cut into the Rock it self. They are divided into several Apartments, Roof'd like great Halls, and with so many Windings, which go from one to another, that they resemble true Labyrinths. According to the Report of the ancient *Ægyptians*, there was such a great Number of these subterraneous Apartments, that they extended some Miles in length, so that those Sandy Plains of *Egypt* are all hollow underneath, and divided into numberless Apartments, and Places for dead Corps. The *Mummies* hard to find. 'Tis now very hard to find any of these Mummies fresh and entire, not only because the Curiosity of the *Franks* has almost exhausted them, but chiefly because the *Moors*, who are Masters of the *Mummies* understand the Worth of them so well, that they reserve all the fresh Pits to themselves, that they may sell the *Mummies*, Medals and Idols to the *Franks*, who now make a Trade of them at *Cairo*. Mr. *Thevenot* had the good Fortune in his Travels to find one Body entire, and saw several Coffins and Idols, which he knew to be genuine, of which he gives us this Description, that we may guess at the rest of them. As to the *Mummy*, or embalm'd Body, he says, it lay in this Manner: *A Mummy described.* The Face was covered, as commonly all the rest are, with a kind of Head-piece of Cloth fitted with Plaister, on which the Countenance of the Person is represented in Gold. If you take it off, you will find nothing of the Face remaining, but it is reduced to Ashes. Some of the Heads of *Mummies* may be kept entire, but they are covered with Fillets of Cloth neatly fitted, which shew only the Shape of the Face. The rest of the Body was swaddled with little Bands of Cloth, very neatly made, but wrapt about with so many Casts and Turnings, that there could be no less than 1000 Ells in it. The Way of doing it is so curious, as none can imitate it. Along the Breast and Belly was a Band of Cloth 3 Fingers broad, and a Foot and half long. It was fasten'd to the other Bands, and upon it were drawn several Hieroglyphicks, done in Gold. *The Embalming.* The Balm, which is now quite lost among them, is black, and shines like Pitch, but has a more pleasant Smell. Upon one of the Coffins was represented in Figures the Manner of Embalming the Bodies. There is a long Table, shaped like a Lion, on the Back of which the Body that is to be embalmed is laid at Length, and hard by there is a Man with a Knife in his Hand opening the Body. The Man hath a Vizard-Mask on, shaped like the Beak of a Sparrow-Hawk, as was the Custom for Embalmers, that they might not breathe in the Corruption which evaporated out of the dead Bodies many times. On the Table also stood 4 Vessels without Handles, wherein the necessary Drugs are kept, both for Embalming, as Balm, Cedria, &c. and for wrapping up and Incrustation of the Body, as Bitumen, and other Things. On the Inside of this Coffin was the Figure of a naked Maid, with her Arms stretch'd out. In the Coffin he hop'd to have found some Idols, or in the Belly, but upon Search he was disappointed; yet he saw several that had been taken out of such Coffins, which he thus describes. *The Idols.* These Idols are of several sorts, and in many Postures, they are made some of Copper, others of several sorts of Stone and Earth. These Idols cannot be counterfeit, because the People have not the Art to do it; and besides, they are sold so cheap, that the Materials are worth more.

Le Bruyn ex Milton. Among these Sepulchres or Caves are found some Places like great Chambers, full of Earthen-Pots, with Covers to every one of them, in which they preserved embalm'd Birds of all sorts, but there was no more but one Bird to a Pot. *Embalm'd Birds.* There are also some empty Hen-Eggs found among them. Some of these Caves have such a Stink as is not sufferable, and such Vapours issue out of them, as puts out all Lights. Such as go down into them out of Curiosity are let down by Cords, fasten'd under their Arm-Pits, as into a deep Well, and with Candles and Flambeau's they search into the Caverns. The *Moors* will often deceive Travellers, by letting them down into Pits which have been already open'd, and where the *Mummies* are batter'd and broken; for Travellers will often take a Limb, as an Hand, Head, &c. or a Coffin-Lid, or Inscription, to carry away with them. There are also Stone-Tables of a large Sieze often found in opening the Ground, which are engrav'd with Cyphers and Ænigmatick Figures, which represent Chymistry, and other Sciences of the ancient *Ægyptians*, as also other extraordinary Characters, which are not Hieroglyphical. *Stone Tables.*

Not far from these *Mummies*, in the Entrance of the Plain towards the *Nile*, are some Remains of a large Town, which was *Memphis*, whose Inhabitants were buried there, for the Ancients never buried their Dead in Towns for fear of infesting the Air, tho' Christians mind it not. *Memphis.*

Beyond *Memphis* there are several Pyramids in the Plain for several Miles together: Three of them are of an extraordinary Sieze, and so little endamaged, as if Time had Respect to their Preservation. The most remarkable of these is the Pyramid of *Rhodope*, so called commonly, but from a Mistake, because *Pliny* says, the Pyramid built by that Courtizan with the Money she gain'd by prostituting her Body was small, tho' very fine. The Stones are put together without Order, which shews it was not finish'd, and it has 143 Steps of large Stone on the Outside, and in the Inside it has 3 Halls in several Places, but no Tombs in them. The Platform is 642 Foot square, but not even, so that it is on the E. side 316 Foot, and on the W. 327 Foot high. The lesser Pyramids in this Plain Time has quite defaced them, for they are at present only Heaps of Sand, which have nothing more, but the Form of what they were formerly, being covered with Heaps of Sand. There is also a great square Pile of large Free-stone, which the *Arabians* call *Mazenbet Faraoun*, on which they say, the *Pharaohs*, Kings of *Ægypt*, mounted, when they would give some new Law to their Subjects.

Having seen all these Things, he returned to *Cairo*, and remaining there, had the Pleasure of the *Franks* to go to *Matharee*, a Place about a large Lg. distant from the City, where they enjoy delicious Shades, and Water in the Gardens there, for it is full of Orange and Lemmon-Trees, which so overshadow the Walks with their thick Boughs, that the Sun cannot pass at all through them. Among the Trees is an old Sycamore, or Fig-Tree of *Pharaoh*, which Yearly bears Fruit; and they say, that our Lady passing by it with her Son *Jesus*, and being pursued by *Herod*'s Men, it open'd and receiv'd the blessed Virgin with her Child into it, till the Men were past, and then it open'd again, and so continued always till the Year, 1656, when a Piece which was separated from the Trunk broke off. In this Garden is an Hall, almost square, but small, built over the *Grotto*, where the Virgin is said to have resided with our Lord in his Flight into *Ægypt*. *The Place where the V. Mary lived.* As you enter into the Hall, there is on the Left-Hand a Bason, which by the Turning of a Wheel in the Court adjoining, is filled with Water from a Spring, as are also all the Channels in the Garden. In the Bason the V. *Mary* is said to have washed her Linnen, and in the mean while set our Saviour in a little Window hollowed in the Wall, where the Monks sometimes say Mass. In this Hall the V. *Mary* is said to have dwelt with her Son *Jesus*, while she was in * *Ægypt*; but the Story savours too much of Legend, to deserve Credit. Near the Garden is a lovely great Obelisk, like to that which stands at *Alexandria*, which makes some Conjecture, that heretofore there has been a Town in that Place, for 'tis not likely that such a Piece would have been erected in the open Fields, and besides there are found some Ruines about it. *An Obelisk.*

Upon the River *Nile*, which runs from *Cairo* to the Sea, are some considerable Towns, besides many Villages, which standing on both sides, opposite one to another, make a pleasant Prospect. *Towns on the Banks of the Nile.*

1. *Mansoura*, which is pretty large, and is situated on the East of the *Nile*.

2. *Se-*

2. *Semenut*, which is indifferently large, lies on the West. This Town is built in the Form of a Triangle on the River-side, and all the Vessels that are bound for *Cairo* are obliged to stop here to pay a certain Duty.

L. Bruyn.

3. *Mitgannir*, which is also a pretty large Town on the E. side of the River, and has a fair *Bazar*, or Market-place, and several fine Houses. Over-against this Town there is a great Borough, called *Siefe*.

Damietta is next the Sea, and is a considerable Port. All the Way by the *Nile* between these 2 Cities there is an incredible Number of Dove-Houses, built of Earth, with a pick'd Roof, and the Inside is furnish'd with a sort of Pots, in which the Pigeons build their Nests, and producing plenty, they are very cheap thereabouts. *Damietta* is a well built Town, long, but handsome, but the Streets are dirty; yet 'tis very populous, and one of the principal Cities in *Egypt*. It was anciently called *Pelusium*, and lies upon a Branch of the River *Nile*, which discharges it self into the Sea 2 Miles below it. All Persons that arrive at the Port are strictly search'd at the Custom-House, and pay the usual Custom, which is about 2 *s.* 6 *d.* a Man. There is nothing remarkable in this Town, but some Mosques with fine Towers. Without the City are to be seen the Ruines of an high Tower, which formerly serv'd as a Light-House for the Ships, and hard by it on the same side is a round Tower. The *Nile*, which runs close to the Town, and *Dead Sea*, which is not far off, affords such plenty of Fish, that it is hard to get them off, and the Country round the Town abounds with such good Pastures, which feed great Numbers of Cattle, that Provision of all sorts is brought in great Plenty to *Damietta*, where it is sold at reasonable Rates; but whatever is brought from Foreign Parts, as Wood, Raisins, and many other Things, and especially Wine from *Cyprus*, is very dear.

Damietta described.

The Steeples with Two Towers.

Birds about the Nile.

About the *Nile* are to be seen many extraordinary Birds, as Eagles, large and fine White Birds, which are sometimes on the Land, and sometimes in the Water, as also a sort of Lapwings, which are white about the Neck, grayish on the Back, and black every-where else; and there are others that always keep in the Waters. About 2 *Italian* Miles Eastward from *Damietta* is the *Mare Morto*, or the Dead Sea, which bears the Name, because it is on all sides surrounded with the Land, and has no manner of Outlet.

A delicious Wood described.

In the Way to the Sea from *Damietta* there is a Wood so fertile, delightful and pleasant, that the whole World cannot shew a finer. In it grow a great many large Orange and Citron-Trees, as also several sorts of Fig-Trees, and among the rest one called, *Adam*'s Fig-Tree, whose Fruit is very large and long, but the Leaves are about a Fathom long, and about 2 Spans broad. There is also another sort of Fig-Tree, whose Leaves are round and very thick; the Figs hang like Branches of Grapes, and are as sweet as Sugar. There is also a 3d sort with a large Trunk and small Leaves. Sugar-Canes grow likewise there, and a great many Cassia-Trees. There are likewise many Pomegranate-Trees; but the Palm-Trees are the most numerous and remarkable. There are also many Trees of a lesser sort, as Cherry-Trees, Plumb-Trees and Apricot-Trees, which being confusedly mix'd one with another, make a very pleasant Prospect to the Eye. All the Wood is run into several Parterres, or Walks, like those in Gardens, proportionably to the Share which each particular Man has therein, and each of these Plats is surrounded and separated from the rest by Trenches.

Mare Morto.

As to the *Dead Sea*, it is very full of Fish, especially Cods and Eels. The Fowls in those Parts are as good as the Fish, and among others there are Pelicans, which swim by the Water-side, like Geese, and other kinds of River-Fowl in so great Numbers, that one cannot count them. In the Winter-time also they take a great many Fowls, which they call, *The Fullers of Damietta*, which are of a very fine Colour, for their Necks and Breasts are very like Peacocks, and they are at least as big as a Pheasant.

The Trade of Damietta.

The principal Traffick of *Damietta* consists in Rice, which grows thereabouts in great Abundance, and is carried into all *Turkey*. They deal also in Coffee, Linen-Cloth, and several fine Stuffs, which are made there. The City is govern'd by an *Agi*, sent thither by the *Bassa* of *Cairo*. In *Damietta* liv'd in 1611. a Druggist, then about 60 Years old, who was born in a Vault, which is a Burying-place still to his Family, after his Mother was dead and interr'd in it.

The Deserts of St. *Macharius* are the most remarkable Places in *Ægypt*, not yet observ'd, and well worth the Observation of Travellers, for there are 4 Monasteries in it. The Way to them from *Cairo* is by Water to *Terrana*, taking a *Janizary* and a Monk or two that belong to the Monasteries along with you, who will convey you both cheap and safe. From *Terrana* it is a Day's Journey by Land to the first of these Monasteries, called St. *Macharius*'s. The Building is ancient, and the Walls are high, but much decay'd.

The Deserts of St. Macharius, and the Monasteries in it.

Within the Precinct of this Monastery there is a kind of big square Tower, into which you enter by a Draw-Bridge, and wherein there is a Church, where lie the Bodies of St. *Macharius*, and several other Saints, and besides there are 5 or 6 Altar-Tables of lovely Marble, a Wall, and all other Things for the Service of the Church. Here also they keep whatever they have of Value in the Monastery, and Provisions, but especially their Books, which they so esteem, that no Monk dares to sell or put out of the Way any of them, upon Pain of Anathema; for when the Monks find themselves abused or pursued by the *Arabs*, they betake themselves to this kind of Strong-hold, and pull up the Bridge to secure themselves. The other 3 Monasteries have the like Towers for the same Purpose. This is the biggest of the 4, but the most ruinous, and especially the Church, which seems once to have been fair. There is no Garden belonging to it, and their Water is brackish. Three or Four Hours Journey beyond this Monastery lies another, called,

St. Macharius.

The Books how valued.

2. *Ambabicheye*. In the Way to it you meet with several little Risings, which, the Monks say, were made by the Angels for a Path to lead the *Hermites* to it on *Sundays* and *Holidays* to hear Mass, for these religious Men being scatter'd up and down the Deserts, could hardly find the Way to the Monasteries without such Directions. By the Way also you see many old Walls, which are the Ruines of several Monasteries, or little Houses, built by Seculars, who retired into the Deserts for a religious Life, to celebrate Divine Service on *Sundays* and *Holidays* in. These Monasteries had an Abbot, with a certain Number of residing Monks, who when they had a Mind to lead a more austere Life, and were found by their Superior to be sufficiently qualified for it, were suffer'd by him to leave the Convent, and go live solitarily in the Mountain, where they built little Hermitages, and spent their Lives in great Austerities, Silence and continual Meditation. Among these old Buildings you see the Ruines of an old Monastery, built in Honour of St. *John the Little*, and is called, *Johanna el Kasir*, where there is still a Dome, and by it a fair Tree, called by the Monks thereabout, *Cadgeret el Taa*, i. e. *The Tree of Obedience*, into which they say a dry Rod, which was water'd by that good *Hermite*, at the Command of his Superior, was changed, as a Monument of the Merit of his Obedience. This Monastery of *Ambabicheye* is the pleasantest of all the 4, for it has a fair Church, a lovely Garden, and good Water, with a large Tower in it. There were formerly a great many holy Bodies therein, but on *Palm-Sunday*, 1656. they were burnt by a Spark of a Taper left burning in it, yet the Monks have got others instead of them, which they make the Credulous believe are the same.

2. Ambabicheye.

The Monastery of St. John the Little, and the Tree of Obedience.

3. The Monastery of *Syrians* is a Quarter of a Lg. distant from the former. It is but small, but very pleasant, has good Water, and is kept in Order the best of all. In it are 2 fair Churches, the one for the *Syrians*, and the other for the *Cophti*, which has many Reliques, and particularly the Staff of St. *Ephrem*, who coming to visit a Monk, set his Staff at the Door, and it took Root, and became a Tree, and is now the only one of the kind in *Ægypt*. From this Monastery in the Way to the 4th, you pass by the dry Sea, which (the Monks say) was dry'd up at the Prayers of the *Hermites*, whom the Pyrates of the Sea much infested. It is called, *Bahr el Malame*, i. e. *Mare Concilii*, The Sea of Railing. In it are found a great many Petrifactions of Wood, and some Bones converted into Stones, which are pretty curious. Going forward on the W. side of the Sea, you come to the Mountain of Eagles Stones, called, *Dgebel el Masque*, where digging in the Earth, especially in the time of Heat and Dearth, they find a sort of Stones of different Bignesses, which, the Monks say, have many Vertues, and particularly defend from venomous Creatures. They are cal-

3. The Syrians.

St. Ephrem's Tree, and the Dry Sea.

Eagles Stones. called Eagles Stones, becauſe the Eagles, which dwell and breed much thereabouts, carry them to their Neſts, to preſerve their young ones from Serpents. From this Mountain you go, making a Triangle, to the 4th Monaſtery in one Day, called,

4. Our Lady's. 4. *Dir el Saydet*, or, The Monaſtery of our Lady. It is ſpacious, but a little ruinous. It hath a fair Church and Garden, but the Water is brackiſh; yet there are more Monks in this Monaſtery than in all the other 3, becauſe the Revenue of it is greater, and they have ſome Reliques alſo. Two Lgs. from this Mo-

The Lake of Natron. naſtery is the Lake of *Natron*, called, *Berquet el Natroun*. It looks like a large Pond frozen over, and the Ice covered with a little Snow. It is divided into 2 Parts, ſupply'd by 2 Springs, and ſtanding at leaſt Knee deep with Water, which immediately as ſoon as it comes out of the Earth congeals and makes as it were great Pieces of Ice, for 6 or 7 Fingers thick:

Natron, what it is. There is a red Salt on the Top, then a black Natron, which the *Ægyptians* uſe for Lee, and laſt of all is the true Natron, which is much like the firſt Salt, but more ſolid. A great many Camels come every Year to be loaded with this Natron. From this Lake, about *Whitſunday*, there is a ſort of Salt made, in form of a

Pyramidal Salt. Pyramid, which they call *Pyramidal Salt*, and the *Arabians*, *Melh el Meſtaoun*. Theſe are all the Places remarkable, or at leaſt which Travellers generally take Notice of. All that is farther obſervable Mr. *Thevenot* reduceth to 2 Heads: 1. The particular Nature of the *Nile*, which produceth all the Fruitfulneſs of *Ægypt*, with the Senſitive Creatures nouriſh'd in it, and through the whole Country. 2. The ſeveral Sorts of Inhabitants, with their Manners and Cuſtoms.

The *Nile* deſcrib'd. As to the *Nile*, it is a River that hath not its Equal in the World, whether you conſider the Source, or its Effects. It hath its Original from 2 Springs in the Mountains of the Moon, 12 Degrees Southern Latitude, where the Snow of theſe Mountains melting, make ſeveral Rivulets, which form 2 great Lakes, one towards the E. and the other toward the W. diſtant from each other about 80 Miles. The Waters of theſe Lakes having made each of them a diſtinct Channel, are join'd together in *Æthiopia*, at about 2 D. of Northern Lat. where they make but one River, which running thro' a vaſt Tract of Ground, *viz.* beyond the 11 D. parts again, and makes the

The Iſland of *Meroe*. Iſland of *Meroe*, which reaches almoſt to the 17 D. of Northern Lat. where theſe 2 Branches again unite in one River, which after many Turnings and Windings comes to a great Mountain, acroſs which it runs with a violent Torrent, and afterwards falls down with a furious Caſcade into *Ægypt*, thro' which having paſſed it divides again about *Memphis*, where it forms an Iſland, after which joining again, it divides a little below *Memphis*, and makes 2 Rivers, one of which running Weſtward is called, *Agathodæmon*, and the other which runs Eaſtward is called, *The River of Bubaſtis*.

The Iſle *Delta*. The Land which lies between theſe 2 Rivers and the Sea having the Form of the *Greek* Letter Δ. *Delta*, bears that Name, and is called the *Delta* of *Ægypt*. Theſe 2 large Arms of the *Nile* are parted into ſeveral other leſſer Streams, ſo that at laſt it throws it ſelf into the *Mediterranean* at 9 Mouths, about 31 D. of Northern Lat. Indeed, the Ancients mention but 7 Mouths, and *Ptolomy* aſſigns their ſeveral Names, but it might be becauſe 2 of them were bank'd up with Sand, as ſometimes more of them are. The 2 biggeſt are at *Roſetto* and *Damietta*, and Ships of great Burden may ride in them, but the reſt are ſmall Rivulets.

The Flood of the *Nile*. As to the Swelling of the River, and the great Plenty of Waters which it affords from *Mid-May* to the End of *October*, in which time it overflows the whole Country of *Ægypt*, it is certain that the melted Snows and great Rains, which fall for 5 Months together in *Æthiopia*, *viz.* from the Beginning of *April* to the End of *Auguſt*, is the Cauſe of it: for it firſt flows in *Æthiopia*, and then afterwards falls into *Ægypt* with that Plenty, that what was at firſt but a large River becomes, by overflowing its Banks, a little Sea, or large Lake, and ſo continues till fair Weather returns in *Æthiopia* at the Beginning of *October*, when it begins to abate, and diſcharges it ſelf into the Sea time enough for their Sowing. By this Flood of *Nile*,

The wonderful Effects of it. God's Providence ſeems to do Wonders for *Ægypt*; for whereas there falls little or no Rain in that Country, and the Soil is naturally ſandy and barren, the River not only plentifully waters the Ground, but brings ſuch a rich Mud along with it, as meliorates the Ground, and makes it very fruitful, which that it may more certainly effect, the N. E. Winds riſe about the Beginning of *June*, and continuing for 4 Months, keep back the Water, and hinder them from running off too faſt into the Sea, and ſo cauſe by their Stop that rich Sediment to ſettle upon the Land.

The Cataracts of Nile. The *Nile*, when it is come again within its own Banks, is not much broader than the *Seine* in its wideſt Places, and it is not very rapid, unleſs it be at its *Cataracts*, where it falls from ſo great an Height, that the Noiſe of it is heard at a very great Diſtance. The Water, by which all *Ægypt* is ſupplied, as is before obſerv'd, is very thick and muddy, but they have an Art to clarifie it; for in that Country they make uſe of great Veſſels of white Earths, holding about 4 Buckets full of Water. When they are full of Water, they rub the Inſide of the Veſſels with 3 or 4 Almonds, until they be diſſolved, and in the Space of a Quarter of an Hour the Water becomes very clear, and for that End, ſuch as bring Water to the Houſes have a Paſte of Almonds to rub the Veſſels with: The Water is very wholſome to drink af-

The Water wholſome. ter it is thus purged, ſo that it never does any Man harm, tho' he drinks never ſo much, becauſe running ſo long a Courſe, and through ſo hot a Country, as *Æthiopia* is, the Sun corrects and cleanſeth it from all Crudities; and, indeed, one ſweats it out almoſt as ſoon as one drinks it. 'Tis all the Drink almoſt that they have in *Ægypt*, and therefore moſt of the Cities, Towns and Villages are built by the River's ſide, but the Houſes of the Latter are built of Earth. This River abounds not much in Fiſh, there is but one ſort of Fiſh taken out of the *Nile*, ſold at *Cairo*, which is called *Variole*, and that is not very common; but there are vaſt Numbers of Crocodiles in it, which, perhaps, is the Cauſe of their Scarcity of Fiſh. The Croco-

Crocodile deſcribed. diles are an amphibious Animal, and live as well by Land as Water. They have an Head flat above and below, darkiſh big Eyes, and a ſharp long Snout, full of ſharp Teeth, but no Tongue. The Body is large, and all of a Bigneſs; the Back is covered with high Scales, like the Heads of broad Nails, and of a greeniſh Colour, and ſo hard that an Halbert can't pierce them. The Tail is long, and covered with the ſame Scales as their Body; their Belly is white, and pretty tender; they have 4 ſhort thick Legs, with 5 Claws on their Fore-Feet, and 4 on their Hand; they grow as long as they live, and ſome of them come to be above 24 Foot long. In eating they move the upper Jaw only, contrary to all other Creatures, except the Hippopotamus; they are very ſtrong, and ſo long liv'd, that after they are flea'd, and the Throat cut and Belly ripp'd open, they catch hold of any thing with their Mouths, and never part with it again. The Fleſh of a Crocodile is not poiſonous, The Fleſh eaten. but inſipid. The Barbarians will eat it heartily, and make a Feaſt of it. They are great Lovers of Man's Fleſh, and therefore are very terrible all along the *Nile*, not only to little Boys, who come to the River-ſide to do their Needs, and are catch'd by theſe cunning Creatures, who will hide themſelves on purpoſe in the Sand, but alſo to Men, whom in the Night they will ſurprize in their Boats, by riſing upright in the Water, and putting their Snouts into the Boat to lay hold on them. If they can pull them into the Water they ſoon maſter them, and therefore no body will willingly venture to ſwim in the *Nile*. It is an erronious Fable, that the Crocodiles weep, for 'tis a Thing altogether unknown in the Country. To catch them the *Ægyptians* make many Pits by the River-ſide, covering them with little Sticks, into which falling, they can't get out again, but are taken, after they have faſted ſeveral Days. They never come into the *Khalis*, becauſe they are too narrow.

The Hippopotamus deſcribed. There are alſo Hippopotamus's, or Sea-Horſes in this River. They are of a tawney Colour, and their Hinder-parts are much like to a Buffler, but its Legs are ſhorter and bigger. They are, at their full Bigneſs, as large as a Camel, have a Muzzle like an Ox, a great Head like an Horſe, but ſmall Eyes, a very thick Neck, a little Ear, wide and open Noſtrils, thick large Feet, and almoſt round, with 4 Toes on each like a Crocodile, a little Tail like an Elephant, and little or no Hair on their Skin. In the lower Jaw they have 4 great Teeth, half a Foot long, 2 of which are crooked, as big as the Horns of an Ox, ſtanding on each ſide of the Jaw, the other 2 are as big, but ſtrait. It feeds by Land.

In

The Air. It is a Fable which is reported by some Writers, That there is no Rain in *Ægypt*, for it rains much at *Alexandria* and *Rosetto*, but less at *Cairo*, and further up the Country, and with the Rain sometimes there is Thunder. In *December* the Air is also something cold, but never so sharp as to need a Fire. In other Seasons it is extream hot, and especially in Summer.

Fowling in *Ægypt*. From *January* till *March* they catch Snipes in *Ægypt*; in *May* Yellow-Birds, or Nitrials, which are nothing but a Lump of Fat, and wild Turtles, which are very good; but the House-Pigeons are good for nothing. In *September* also the Yellow-Birds and Turtles come again, and at the same time Larks, which last till the Year's End.

Trees and Herbs. The Country produces a great deal of Corn and Herbs of all Sorts, but no Fruits or Wine, for the Grapes which grow there are red, and of a large Size, but have a thick Skin, and yield little or no Juice. Many fair Trees grow there not found in *Europe*, *viz.* Palm-Trees, *Pharaoh*'s Fig-Tree, which are the true Sycamores; they bear Figs that stick to the Stock, which are not good, yet the *Moors* eat them; Cassia-Trees, which are very lovely, bearing always Blossoms and Fruits together; the Blossoms are yellow and well scented, and may be smelt at a great Distance.

Besides other Birds which are found about the Banks of the *Nile*, and those above-mentioned, there are a great many Ostriches, which keep in the Deserts and Wildernesses, whose Feathers are sent to *Constantinople*, and other Places, to make Fans, and other Knick-knacks for the Women, who are very skilful in making such Things. 'Tis common also for the *Franks* to carry the Eggs of these Birds home with them, as Rarities.

Ostriches.

Their Eggs.

The Inhabitants of *Ægypt*. The People of *Ægypt* (generally speaking) are all swarthy, exceeding wicked, great Rogues, Cowardly, Lazy, Hypocrites, Buggerers, Robbers, Treacherous, so very greedy of Money, that they will kill a Man for a *Maidin*, or 3 Half-pence. They are of 2 sorts, *Mussulmans*, who are *Moors*, and *Cophti* who are *Christians*; but besides these there are *Christians* Strangers, both *Franks* and *Greeks*, *Turks* and *Jews*. The *Moors* are vicious in the highest Degree, and no Wickedness comes amiss to them. They are Cowards and are very loth to fight, but when they fall out, they huff and scold and make a Noise, as if they would cut one another's Throats; yet they will refer their Controversies to the next Man they meet, who makes them presently Friends again, at which all the Spectators say the *Fatha*, and all is ended. The *Turks* use them like Dogs, and yet they dare not resist. They Till all the Land, yet they are neither allow'd good Bread, nor sufficient of it to fill their Bellies. They are of so ill a Nature, that they will neither be subject nor labour, except they are well cudgell'd, and then they'll be both loving and diligent. They are great Eaters of Melons and Water-Melons, and the like, of which they have Plenty, and many which we have not, and that very cheap. They are apparell'd like the *Turks*, when they are able, but most of them are half naked, and many of them have no more but a blue Shirt upon their Bodies. They are a very ignorant sort of People, and yet have some Secrets among them very surprizing, which some count Magical. They'll take up Vipers without Hurt and bring whole Sacks full of them into the City to sell to the Apothecaries. A *Moorish* Woman, by pulling Worms out of Childrens Ears stops their Crying. They speak the *Arabick* Language, which is a Dialect of the *Hebrew*, and very copious. It is difficult to be pronounced, because it has so many Gutturals, and the *Turks* make themselves merry with an *Arabian* to hear him talk, tho' their *Alcoran* and all their Prayers are in that Language, and they have a Proverb, *That the* Turkish *Language serves in this World, the* Arabick *shall be spoken in Paradise, and the* Persian *in Hell*; for though it is a fine Tongue, the *Turks*, hating *Persians*, revile all that belong to them.

Moors.

Their Labour.

Their Apparel.

Their Language.

Their Religion. The *Moors* are *Mahometans*, but have Superstitions which the *Turks* have not, for they circumcise their Daughters, by cutting off a little Bit of the Nymph; but this Circumcision is performed by Women. They have many *Santo's*, besides the Dancing *Dervices*, spoken of in my Description of *Constantinople*. The Dancers are pleasant, but they have one sort very horrible. They wear Felt-Caps, as they do, but say their Prayers oftner than the tother *Mussulmans*, and upon *Tuesdays* and *Thursdays*, at 11 a Clock at Night, when meeting at their Mosque at the Call of the *Muezim*, they continue singing some Verses out of the *Alcoran*, and saying certain Prayers till Day. They say their Prayers so loud, and use such Gestures in them, that one would think them possess'd. They also play on Drums and other Instruments when they sing. In their Processions some of these Men foam at the Mouth like mad Men and with shut Eyes pronounce the Word *Hou*, having a Man on each side to support them for fear of falling, and they that can hold the longest in this Extasie are accounted the greatest Saints. Other *Santo's* there are that go stark naked both Winter and Summer, and suffer their Hair to grow to its full Length for Mortification. These are very highly honour'd, and if they go into the Houses of any of their chief Persons to Dinner, they are allow'd to sit down and dine, and so they go away, and they think that House blessed. They are lascivious Fellows, and that for both Sexes. Many Women who could not be got with Child have kiss'd their *Priapus* with great Veneration and have procured a great Belly by it. One of these *Santo's* hung a large Stone upon his Glans; and another, who was called the *Scorik* of the Serpents, eat Serpents; another had a Turbant as broad as a Mill-Stone, and weigh'd above 50 Pound Weight. It was made up of Patches of Cloth of different Colours. He went very softly, and every one that passed him kissed his Hand. The *Turks* have no great Veneration for them, being nothing so superstitious as the *Arabs*, and one of the *Bassa's* formerly sent as many of them as he could find to the Galleys.

1. Naked.

2. Dead. They have also dead *Santo's*, whose Memory they much reverence. Some of them are interr'd upon High-Ways and Bridges, and when the *Moors* find any of these Sepulchres, they ask Leave of the inclosed *Santo* to pass them. The most ador'd *Santo* among them is *Sadi Ahmet el Bedoui*, who is interr'd at *Meintaganir*, in the Island or *Delta* of *Ægypt*, by the Channel of *Rosetto*. Here is a Fair yearly held, because the People come from all Parts of *Ægypt* at that Time to pray at his Grave. They say, that he always delivers 3 Slaves from *Malta* at that time, and 3 *Moors* never fail to be there to assert that the Night before they were freed from Slavery there, tho' 'tis a foul Lye. They relate many Vertues of this *Santo*, as, That he never knew a Woman, but lay with his own She-Ass. That being denied a Privilege by the *Bassa*, which he had before enjoy'd he by moving his Cap on one side caused his Castle to lean on one side ready to fall, which affrighting the *Bassa*, he granted him his Privilege, and he by putting his Cap to rights by little and little set the Castle upright again. The Pilgrims of *Mecca* passing by this Place, leave the Caravan to adore the Saint. From this Fair the *Moors* go to visit other Saints for a Month together.

Their greatest *Santo*.

His Vertues.

The *Cophti* are Christians, but *Jacobites*, who follow the Heresie of *Eutyches* and *Dioscorus*; yet some few are Orthodox, and they are called *Melchites*. They have a Patriarch at *Alexandria*, who has not only a large Diocess himself, but chuses the Patriarch of the *Abyssins* in *Ethiopia*. They are very ignorant and unpolish'd inso much, that 'tis hard for them to find a Man of Learning enough to be their Patriarch, and when they have, 'tis as hard to find Money enough to give the *Bassa* to settle him. They have many Apocriphal Relations of *Christ*, as, That during his Minority the Angels brought him Victuals down from Heaven and that he spent his Time in making little Birds of Clay which breathing upon, he threw up into the Air, and they flew away; That at the Lord's Supper, which *Christ* celebrated just before his Passover, they had a roasted Cock, and that when *Judas* rose up to betray his Master, *Christ* ordered the Cock to follow him, and brought him Word, that *Judas* had sold him, and therefore he was admitted into Paradise. They say Mass in the *Coptick* and *Arabick* Tongues, and when they sing the Passion, and when they come to the Place where *Judas* is said to betray him, all the People cry, *Arsat*, i. e. *Horned Beast*, or *Cuckold*, reviling *Judas* to avenge our Lord; and when they hear, that St. *Peter* cut off the Ear of the High Priest's Servant, all the People again cry, *Asia Boutrous*, i. e. *Well fare you for that, Peter*; as if that would encourage him by their Applause. These *Cophti* serve for Clerks to the *Divan* of the Beys and Villages.

2. The *Cophti*.

Their Legends of *Christ*.

Their Service.

Their several sorts of *Santo's*.

1. Living praying.

3. The *Franks*.

The *Franks* live in several Parts of *Ægypt*, have Consuls at *Cairo*, and Vice-Consuls in *Rosette* and *Alexandria*, and sometimes at *Damietta*. The *French*, *English*, *Dutch* and *Venetians* have each their Consuls; but all other Nations of *Europe* trade in *Turkey*, under the Protection of the *French* Consul. These Consuls have a yearly Pension of 200 Piastres from the G. Seignior, except the *Venetian*, who has not much above 60, yet is obliged to present every new *Basha* with 2000, whereas the rest are excused for about half as much, for which they receive some Presents in Vests, and have the Favour of an Audience. Heretofore the Consuls had the Honour of Beys, but now they are of little Esteem, and much abused by the *Turks* and *Jews*, who bearing a great Sway in *Ægypt*, because they farm the Customs, and are the only *Serafs*, or Bankers, squeeze many *Avenies*, or Fines, from them by false Accusations, and various Pretences, as walking in the Streets at unseasonable Hours, blaspheming *Mahomet* or his Law, lying with a *Turkish* Woman, &c. all which must be compounded for large Sums, or the Person wronged must suffer cruel Imprisonment.

Their Consuls.

4. The *Greeks*.

The *Greeks* are numerous in *Ægypt*, and have a Patriarch, who resides at *Cairo*, but bears the Title of the Patriarch of *Alexandria*, as well as the Primate of the *Cophti*. Besides what is remark'd before about the *Greeks* in the *Turkish* Dominions, which differ little from these in *Egypt*; he gives us only an Account here how the Patriarch celebrated the Sacrament at *Cairo* on *Holy Thursday*. He was cloathed in the same Vestments as other Patriarchs are, only he had a Stole over them, which they have not. This was given him by some Pope. Over the Stole he wears the *Pallium*; but it is bigger and longer than that of the *Latin* Archbishops. On his Head he had a *Tiara* set thick with Pearls and Jewels; but it has not 3 Crowns, nor is so rich as the Pope's. It was given them by the Duke of *Muscovy*, for whom they always pray. The Patriarch celebrates the Mass, as all other *Greek* Priests do, only the *Epistle* and *Gospel*, with some Prayers, which he reads in *Greek* are after read in *Arabick*. As to the Communion, when the Patriarch has consecrated some Pieces of Bread, and then the Wine in a very great Chalice, because of the great Number of Communicants, he crumbles some Pieces of the consecrated Bread into it; then having publickly asked Forgiveness of all that are present, he receives the Element of Bread, and taking the Cup, says some Prayers: and then repeating the *Gloria Patri*, at the Recital of each Person, drinks a little of the Wine. After this he gives the Bread to the Priests that are present, who take it with one Hand, and hold the other under it to catch any Crumb that may fall in the eating, and then going up to the Altar, ask Forgiveness of all present, and then communicate of the Wine, as the Patriarch did. The People communicate without the Chancel from the Hands of the Priest, who gives them the Bread in a gilt Silver-Spoon, crumbled into the Wine. The People receive with little Reverence. Mass being over, the Patriarch went to the Body of the Church, to a Place rail'd and raised 3 Foot high, where stood a Chair for himself and 6 others, on each side of it, where 12 Priests in their Copes sat down by him. These represented the 12 Apostles, and the Patriarch, girding himself with a Towel after he had put off his Patriarchal Vestments, imitates our Lord's Action in washing his Disciples Feet, the last of them seeming unwilling, as St. *Peter* was, that his Master should do that Office for him. During this Ceremony the Church is filled with such loud Groans of the People, as would fill the stronger Hearts with Grief. When the Patriarch had put on his Habits again, he was almost stifled with the People, crouding upon him to dip their Handkerchiefs in the Foot-Laver, which was by that means made dry in an Instant. Then the Patriarch reads and expounds the Gospel in *Greek*.

The Patriarch of *Alexandria*'s Way of celebrating the Sacrament.

The Manner of his receiving the Elements, and giving to the Priests and People.

Washing of Feet.

5. The *Jews*.

The *Jews* are very powerful in *Ægypt*, and govern almost all the Affairs of the Kingdom, having all the Money in their Hands. They live in a Quarter by themselves at *Cairo*, which contains many Streets, but they are short, narrow and nasty. In other Things they differ nothing from the *Jews* in the other Dominions of the G. Seignior.

6. The *Turks* govern it by a *Basha*.

The *Turks* have the supream Government of *Ægypt*, which is administred by a *Basha*, sent thither by the G. Seignior. It is the 2d Basha-ship in Place, but first in Profit in all the *Turkish* Empire; for at his Entrance he has 100000 Piastres given him, and 7 Purses a Month as long as he continues, besides casual Profits. Indeed, the *Basha* buys this Government, paying for it 2 or 300000 Piastres, and must pay yearly 5 *Harna's*, each *Harna* consisting of 1200 Purses, which are valued each at 909000 Piastres and 30 Maidins, and must now and then pay 2 or 300000 Piastres for Continuance, and yet by squeezing the People, he makes himself a vast Gainer. Every *Basha* brings his *Charavalla* to collect all the Customs of *Ægypt*, and *Seraf* to manage his Money, from *Constantinople* with him. The *Cadelesquer* at *Cairo* is of as great Power as the *Mufti* at *Constantinople*, and is put in only by the G. Seignior.

Cadelesquer.

In *Ægypt* are 25 *Sangiack-Beys*, who take care of the Country to defend it from the *Arabs*, and above 40 *Charkish-Beys*, who guard the City. These *Beys* purchase their Places at the rate of 100000 Piastres, and have a Purse a Month allow'd them. These *Beys* are Lords of the Country, and are very powerful, for they can some of them command 10000 *Arabs* at an Hour's Warning. There also are at *Cairo* 2 Custom-Houses, a *Sous-Basha*, who is Major or Provost, and hath 3 Officers under him, *viz.* the *Aser-Basha*, who is a *Chorbagi*; the *Devedar*, who is his Lieutenant; and the *Oda-Basha*. There is 2 *Sous-Basha* also at *Boulou*, and another at Old *Cairo*.

Beys and their Officers.

There is 12000 *Janizaries* in *Ægypt*, of which 7000 are at *Cairo*, and 35000 others in the Country. The Officers of the *Janizaries* are the *Aga*, or General, the *Kiaya*, or Lieutenant; the *Basch Chaousch*; the *Chorbadgi*, or Captain of a Company; and the *Oda-Basha*, who is the Chief of a Division. No *Moors* are made *Janizaries*, that they may be always kept under; nevertheless, the Strength of *Ægypt* consists chiefly in the *Arabs* of the Country, who will get together several Thousands in a Body in the Twinkling of an Eye.

The *Janizaries* and their Officers.

The usual Punishments in *Ægypt* are, 1. Beheading, which they perform so dexterously with their Sabres, by drawing them their whole Length, that they never fail at the first Blow to sever the Head from the Body, and yet they seem not to strike with their whole Force neither. This is usually inflicted upon Robbers, or such as the *Sous-Basha* suspects to be such, and them he will command his Officers to execute immediately, by making them kneel down only.

Their manner of Execution.

2. Impaling, which is done in this manner: The Executioner lays the Malefactor upon his Belly, and his Hands being ty'd behind him they rip up his Fundament with a Razor, and thrust into his Body a very long Stake, as big as a Man's Arm, taper and greasie, driving it, till it comes out at his Breast, Neck or Head, which kills them immediately; but in others they drive it not so far, and then they will talk, smoak Tobacco, and live 2 or 3 Days upon the Pale after it is erected. This Punishment is inflicted upon such as are great Cheats and Robbers. The *Arabs*, who suffer this Punishment, and are carried to it on Camels, with Candles put into the Flesh of their Arms, will go chearfully to it, and glory that they deserve it, saying, That had they not been brave Men they had not been so put to Death. This is a common Punishment in *Ægypt*, but is rarely practised in *Turky*; and even in *Ægypt* none but the Natives are so executed, for the *Turks* are strangled in Prison.

The Use of Camels.

The ordinary Inconveniences or Distempers common in *Ægypt*, and especially about *Cairo* are these, 1. Excessive Heat, which is so intolerable, that one can neither do any thing by Day, nor sleep by Night, for your Sheets are as hot as if they had been warm'd with a Pan, and your Drink is Blood-warm; putting it into a Pot of white Earth, or setting it in a Window where comes a Breeze of Wind, will cool it a little, but not much.

The Inconveniences of *Ægypt*.

2. The Musketto's, or little Flies, who are continually buzzing about Men in Swarms, and stinging them much. A Cloth hung about your Bed will prevent something of the Trouble from them, but not altogether, for where-ever you go in, some will follow you.

3. A Pain in the Stomach, with Fevers and Bloody-Fluxes, caused by going naked breasted, because 'tis pleasant by reason of the Heat, yet chills the Bowels, and produces those Inconveniences.

4. The Swelling of the *Scrotum*, which will sometimes be as big as one's Head. 'Tis cured by an Incision made into it, to let out the Water got into it.

5. Sore

5. Sore Eyes, caused by the Burning of the Sun, and a little Salt Dust blown into their Eyes by the Wind. Most Men have sore Eyes, and some lose them, but 'tis partly thro' Negligence or Ignorance, for it has been found, that frequent washing the Eyes does prevent them.

6. Pains of the Legs are also very bad in *Cairo*, and many have their Legs swollen to a prodigious Bigness.

7. A kind of Inflammation, or Wild-fire, which happens about the Time that the *Nile* begins to rise, and runs over the whole Body, and exceedingly torments People by the Pricking and Stinging; and when you drink to ease and refresh your self, you feel such Prickings and Stingings, as if an Hundred Needles were stuck into you. This Distemper they call, *Des Arelles*. All these, and other accidental Diseases, which often happen in *Ægypt*, are more dangerous during,

8. The *Hamsbin*, which is a bad Wind that blows for 50 Days together, and begins about the 7th of *April*. This Wind brings a great deal of Sand into the Town, so that it gets into the Chambers, let the Windows be never so close shut, and when you go to Bed you find your Sheets full of it; yea, it will get into the Trunks, tho' they be never so close shut. These Winds are so hot, that they will stop the Breath, and kill many People in the Caravans.

9. The Plague, which happens generally once in 7 Years, in which Time it takes its Circuit about the *Turkish* Empire. It sweeps away commonly 100000 Souls; but when the Drop or Dew falls about the 14th of *June*, it ceases to be mortal, as all other Diseases do.

The Medicines used by the *Moors*.

The *Moors* make no great do in providing Medicines, when they are sick, and never think of sending for a Doctor, not only because it would cost them Money, but because they count it a Sin to use a Physician, when they should leave themselves only to Almighty God; yet they make use of some plain Receipts, *viz.* For a Bruise they apply Gun powder, covered with Cotton, and it is sufficient. When they are stung with a Scorpion they eat a Radish, and imagine they are in no Danger by it. They let Blood in the Forehead to make Men more watchful, and cure sore Eyes, and ease them of Pains of the Head, &c.

The Money and Weights of *Ægypt*.

In *Ægypt* they reckon Money by Purses. A Purse consists of 25000 Maidins, which make 157 Piastres Ryal, and 19 Maidins, or 833 Boquels, and 10 Maidins. The *Turkish* Chequin, which they call *Scheriff*, is worth 70 Maidins, and the *Venetian* 75. The Piastres are worth 33 Maidins, and the Boquels 30. The Maidin is a thin Piece of Silver, about the Bigness of a *French* double, and is worth 2 Aspers and half, which is something more than 3 Half-pence *English*. In a Maidin are 8 Forles or Bulbes, which are Pieces of Copper as big as *French* Doubles, but thicker, and are in Value something less than a Farthing. There are Half Forles also.

The Weights of *Cairo*.

The Weights of *Cairo* are the same as those of *Constantinople*, viz.

The *Quintal*,	Which contains	150 *Rottes*.
The *Rotte*,		12 *Ounces*.
The *Ounce*,		12 *Drachms*.
The *Drachm*,		16 *Quirats*.
The *Quirat*,		3 *Grains*.
The *Medical*,		1 *Drachm and Half*.
The *Oque*,		400 *Drachms*, or 3 *Rottes*.

While Mr. *Thevenot* remain'd in *Ægypt*, there came an Ambassador from *Æthiopia* to *Cairo*, as he was in his Voyage to the G. Seignior at *Constantinople*. His Name was *Michael*, a Native of *Tripolis*, in *Syria*: He spoke *Italian*, which gave him the Advantage of his Conversation. Of him he received an Account of *Æthiopia*, which he gives us in this Manner:

A Relation of *Æthiopia*.

Æthiopia, or the Country of the *Abyssins*, called in *Arabick*, *Abesch*, is a great Empire, being above 7 Months Travel in Circuit. On the E. side it is bordered by the *Red-Sea* and *Zanguebar*, on the S. with *Seila*, *Avousa*, *Naria*, &c. On the W. by the *Negros* and *Nubia*, and on the N. with the Country of *Nubia* and *Bugia*, because to come from *Æthiopia* to *Ægypt* one must cross *Nubia* down the *Nile*.

The present King.

The present King and all his Subjects are of the *Cophtish* Religion, and none can live in this Country who is not, or pretend at least to be of it; for he is a profess'd Enemy of all *Franks* in general, and more especially of the Papists, whom he accuses of being Hereticks, and, imagining that they assisted his Enemies, prosecutes them severely, promising a Bag of Gold-Dust to all the Governours round his Dominions that will send him the Heads of any Religious *Franks*, as several have done, and received their Reward.

The Religion of the *Æthiopians*.

The Faith of the *Abyssins* is this: They believe but One Nature in *Jesus Christ*. They circumcise, as the *Jews* do, at 8 Days old, and of late baptize a Fortnight after; but this last Custom was introduced by the Jesuits in the Reign of the present King's Father, who was a good Catholick, and encouraged those Religious Men; for before they baptized none till they were 30 or 40 Years of Age. They say Mass, as the *Cophti* do, but their Church-Books are in the *Æthiopick* Language. Their Patriarch depends on the Patriarch of *Alexandria*, who after any is dead, sends them another, chosen out of the fittest of his Clergy; but after he is sent he is obliged to give no Account of his Charge to him. The Ambassador said, Most of the People of the Country are Catholicks in their Hearts, tho' they profess openly another Doctrine.

The Kings that are tributary to the King of *Æthiopia*.

There are 4 Kings that pay Tribute to the King of *Æthiopia*, *viz.* The King of *Sennar*, who sends his Tribute in Horses. His Country is very hot. The King of *Naria*, who pays his Tribute in Gold. The King of *Bugia*, and the King of *Dangala*.

Naria is a good Country, and from thence is brought the Gold which passes on the Coasts of *Soffola* and *Guinea*. The Mines are not deep, as in other Places. In this Country are those Beasts from whence the Civet is taken, and are called Civet-Cats. It is a Beast almost as big as a Dog, having a sharp Snout, small Eyes, little Ears and Mustachio's like a Cat. The Shin of it is all spotted black and white, with some yellowish Specks, and hath a long bushy Tail almost like a Fox. It is a very wild Creature, and the Bite is dangerous. The Civet lies in a kind of Cod of Flesh, which being opened is shap'd like a split Gizzard. The Males have it between their Stones and Yard, and the Female betwixt their Fundament and Privities. It is a kind of Excrement or Sweat, and in several Cats it is of divers Colours, as whitish, grayish, or yellowish, but by little and little it turns to a very brown Colour. The People take them in Snares, but the *Jews* keep them tame, and twice a Week empty the Cod, by scraping it with an Iron Spatula; but they will never let any of the *Frank* Merchants see them do it, because they will never sell any pure Civet, but always mingle it both bad and good together, and add some Oil, or other Ingredient, to increase the Weight. They hold the Beasts themselves so very dear, *viz.* 100 Chequins apiece, that none will venture to buy them. They are kept in Wooden-Cages, and fed with Mutton and Beef, cut into small Pieces.

Civet-Cats.

Civet what.

None sold pure.

Dangala, and the King of it.

Dangala is the Capital City of *Nubia*, and the King of it is King of the *Berberins*, who are a kind of Blacks of the *Mahometan* Religion, and come in Crouds to *Cairo* to get Services. They are something silly, and serve for a small Matter, *viz.* 2 Maidins a Day, or a Maidin and their Diet, and you may make them do whatever you please. They wear a blue Shirt, plat all their Hair in Tresses, and rub it over with a certain Oil, to keep it from being Lousie. When they fall out, they go before a *Skeick* of their own Nation, who makes them Friends, and if he sees Cause, adjudges them to pay a Fine, with which they feast and are merry together. When a *Frank* has got a Crocodile for the Skin, they'll beg it to eat, and dress it with a pretty good Sauce. When they have scraped together 10 or 12 Piastres, they'll return home with it to their own Country, as sufficient Wealth, and go in Companies, that they may not be robbed by the *Arabs*. The King of *Dangala* pays his Tribute to the King of *Æthiopia* in Cloth.

The Provinces of *Æthiopia*.

The Provinces of *Æthiopia* are *Gouyan*, where the King has a Vice-Roy, *Beghander*. *Dambia*, *Amara*, which is a large Province full of Mountains, and good Castles, *Damoud*, *Tegre* and *Barnegas*: Besides, there are several Provinces govern'd by Princes, who are Vassals to the King of *Æthiopia*. In short, the Kingdom of *Æthiopia* comprehends 24 *Tambours*, or Vice-Roys. The Capital City is called *Gonthar*, and is in the Province of *Dambia*. *Æthiopia* is as cold as *Aleppo*, or *Damascus*, only the Countries by the *Red-Sea* and *Sennar* are hot. The King of *Æthiopia* has above 100 Wives, and keeps no Eunuchs to look after them, because they look upon it a Sin to geld a Man,

The King of *Æthiopia*.

and ſo the Women have as much Liberty there, as in Chriſtendom. He is a King very eaſie of Acceſs, and the pooreſt Man may come to ſpeak to him when he pleaſes. He keeps all his Children on a Mountain, called *Ouohhni*, in the Province of *Oinadaga*, 2 Days Journey diſtant from *Gonthar*. There is a Place like a Ciſtern on the Top of the Mountain, into which they are let down every Night, and taken up in the Day-time, and ſuffered to play and walk about. When the King dies they chuſe out one of the wittieſt of them to ſucceed, without any Regard to a Birth-Right; and when he comes to have Children, he ſends his Brothers Priſoners to ſome Place, and places his own Children at *Ouohhni*. The Place where the Kings are buried is called *Ayeſus*. 'Tis a kind of Grotto, where the Aged are laid on one ſide, and the Young on the other. In the Time of the Jeſuits there was a Church of the ſame Name in that Place, and there is ſtill an excellent Library, where all ſorts of Books in all kinds of Languages in great plenty may be ſeen by ſuch as have the Curioſity. This is probably the old *Æthiopian* Library.

The Product of *Æthiopia*.

Æthiopia is a good and fertile Country, producing Wheat, Barley, &c. Their greateſt Deſarts are not above 3 or 4 Days Journey, and yet the King, when he makes any Progreſs, lodges always in Tents. The Houſes of the greateſt Lords are mean, in Compariſon of the Houſes in *Europe*, and the reſt are only of Mud. They have all Trades, but Watch-makers. They have no Camels, but Mules, Aſſes, Oxen and Horſes.

Their Food and Drink.

The common People eat raw Fleſh, and drink Wine made of Millet and *Saraſin* Wheat; but the King's Meat is dreſt, and he drinks Wine of Grapes. They are cloathed after the Faſhion of the *Franks*, and wear Cloth, Velvet, and other Stuffs, imported to them by the *Red-Sea*. They have Harquebuſſes from the *Turks*, and other People, but there are not above 3 or 400 that uſe them in their Armies. In trading they uſe no coin'd Money, but Pieces of 15 or 20 Pieces of Cloth of Gold, which they weigh, and ſquare Pieces of Salt like Soap, made at *Arho* by the *Red-Sea*, paſſes for Money.

Their Money.

Among them is the Nation of the *Gauls*, whom they call *Chava*. They are a vagabond People, like the *Arabs*, and are in continual Wars with the *Æthiopians*, but fight only with Targets and Lances. They ſpeak almoſt all the Languages of *Æthiopia*.

This Ambaſſador ſaid, That the Head of the *Nile* is a Well that ſprings out of the Ground in a large Plain, where there are many Trees growing. The Fountain is called *Ouembromma*, and is in the Province of *Ago*. It is a delightful Place, and caſts up the Water high in ſeveral Places. It is 12 Days Journey from *Gonthar*, and running Northward paſſes 7 Cataracts, and croſſing *Ægypt* falls into the *Mediterranean* Sea. The Cauſe why the *Nile* flows ſo regularly in *Ægypt*, is becauſe 'tis Summer in *Ægypt* when 'tis Winter in *Æthiopia*, and Rains and Snows falling for 3 Months ſwell the River. There are no Mountains near the Spring-Head. The *Jews* Mountains are 3 Weeks Journey from it, and yet they are the neareſt. Their Names are *Semani* and *Salleme*, and they were inhabited by the *Jews*; but having grown powerful under one *Gidhon*, their Captain, the King of *Æthiopia*, grew jealous of them, and marching againſt them with an Army, ſubdued them, and diſpoſſeſſing them of their Poſt, placed *Chriſtians* in their Habitations, who dwell there, though their is always Snow upon them.

The Nile.

The Jews Mountains.

CHAP. IX.

Mr. Thevenot's *Travels from* Cairo *into the Deſarts of* Arabia, *and to the* Red-Sea.

MR. *Thevenot* having a Deſign to ſee the *Red-Sea* and Deſarts, departed *Jan.* 17. 1658. to *Suez*, and having made *Haly*, the *Bey* of *Suez* his Friend, by a Preſent of Sweet-meats at *Cairo*, he was aſſured of his Protection, and admitted to go with the Caravan, which was carrying Timber to build a Ship for the G. Seignior on the *Red-Sea*. In his Way to *Suez*, he firſt encamped at the *Birque*, which is ſpacious, and always has Water in it. There are ſome Perſons who pay the G. Seignior a certain Rent yearly, for a Liberty to catch Wild-Ducks and Fiſh in it. Juſt before his Departure from the *Birque*, there fell ſo great a Tempeſt (for there are dangerous Tempeſts in theſe Deſarts, as well as by Sea) that they thought that all their Tents would have been carried away with the Winds, which drove before them ſuch Clouds of Sand, that there is great Danger of being buried in it. At ſuch times none can ſtir abroad, becauſe their Eyes and Mouth will be filled with Sand. All are forced to lie under their Tents, and a good Tent at that time is a great Advantage. As ſoon as the Tempeſt was over (which laſted about 4 Hours) the Timbrels or Kettle-Drums (which are uſed to chear up the Camels in their travelling, for they delight much in that Noiſe and Singing) beat up for the March of the Caravan; and ſo leaving the *Birque*, they paſſed by a Sepulchre of a *Kiaya*, who was killed there, fighting in the Defence of the Caravan, againſt the *Arabs*, who ſet upon it. There is a Ciſtern of Free-ſtone, which is filled by Rain-water, an Hour's Journey from it, and another fair Well, but the Water is not good; and ſo they came to *Suez*. Ever ſince the fore-mention'd *Kiaya* was ſlain, the Veſſels of the *Red-Sea* are obliged to pay 5000 Piaſtres at *Suez*, to maintain 100 Soldiers, half to abide in the Caſtle of *Suez*, to guard the Country about it, and the other half to wait upon the Caravans, and defend them under a *Kiaya*, who is the Lieutenant-Governour of *Suez*.

The *Birque*.

A Tempeſt in the Deſarts.

Drums to chear the Camels.

Suez.

From *Suez* he went to ſee Mount *Sinai*, which is called by the *Arabians*, *Dgebel Mouſa*, or *Moſes*'s Mountains. It is in *Arabia the Stony*, but becauſe thoſe Deſarts are peſter'd with *Arabs*, therefore he put himſelf under the Guard of 2 *Arab Skeiks*, who having a Command among them, will upon the Payment of ſome *Coffairs*, to be given to the *Arabs* in the Way, ſecure Men from all Robberies, and other Injuries from them. The *Skeiks* are maintain'd, and you muſt pay them both for their Time and Camels, that they carry themſelves and Proviſions on, and ride on. They uſe 2 ſorts of Camels, *viz.* Dromedaries and Camels, for they are ſo like, that they may be both ranked under one Kind. The Camels have one Bunch of Fleſh upon their Backs, are great and high, go conſtantly one Pace, which is faſt, but hard, and travel with their Loads of 7 or 800 Weight, 30 good Lgs. a Day. The Dromedaries have 2 Bunches of Fleſh on their Back, which are ſhap'd naturally like a Saddle, but are leſs, ſmaller and lighter than Camels, and are only for carrying Men. They have a good ſoft Trot, and will travel with Eaſe 40 Lgs. a Day; but it requires ſome Skill to ſit them well, and therefore ſome tie themſelves on, that they may not fall. In all Things elſe the Camels and Dromedaries agree. They have both a ſhort Ear and Tail, a cloven Foot, as ſoft as a Sponge, a long Neck, and Hair alike; both kneel when they are loaded and unloaded, and riſe as they are bid; their Food is the ſame, and both endure thirſt well, continuing upon Occaſions 5 Days without Drink; yet Camels will abſtain longer than Dromedaries.

Camels and Dromedaries.

Leaving *Suez*, *Jan.* 26. the Caravan went on thro' the Deſarts at a great Rate. In the Way they met with ſeveral Waters, called *Ain el Mouſe*, *i. e.* The Wells of *Moſes*, where they filled their Borrachio's with Water. They frequently ſaw the *Arabs*, but having 2 *Skeiks* with them, they dare not hurt them, but either civilly deſired a little Bread and Tobacco, and if they were eating, would eat with the *Skeiks*, and ſo departed, and if none came, the *Skeiks* would hallow to call ſome of them when they went to Meat. Paſſing by ſome Hills he ſaw a great many Antelopes, but nothing elſe, tho' there be abundance of wild Beaſts

Moſes's Wells.

Mount *Sinai*.

Antelopes.

Beasts in those Deserts, as Wolves, Bears, wild Boars, Foxes, Hares, Chacales and Estridges. The Chacales are engender'd of a Dog-Wolf and Bitch-Fox, or a Dog-Fox and Bitch-Wolf. Estridges are some of them of a prodigious Bigness. They have a Neck, Head and Bunch on the Back like Camels, with which they agree in so many Things, that the *Turks* call them, *Deve Cousch*, *i. e.* Bird-Camels. They go in the Fields always in even Numbers, as 2 and 2, 4 and 4, *&c.* They always beget a Male and a Female, and run swifter than an Horse, but tire sooner. While they run they throw back the Stones they meet with upon their Pursuers with such Force, that if they hit a Man, they'll do him much Hurt. The *Arabs* catch them by pursuing on Horseback gently at first, and as they tire they ride faster; when they see the Fowl almost spent they put on full speed, and taking it, kill it, which they do by making a Hole in the Throat of it. Under the Hole they tie it strait, and then 3 or 4 of them take hold of it, and tossing it from side to side a good while, untie the Throat, and let out a great deal of a sort of Stuff like Butter, called *Mantegue*, into which all the Flesh by the Motion is turned. They say, this *Mantegue* is very delicious Food, but is apt to cause a Laxity.

Chacales. Estridges. Way of hunting them. Mantegue, or Butter.

Then he travell'd among the Hills, and came to a Place, called *Corondel*, thought to be the ancient *Shur*, where the Children of *Israel* landed when they came thro' the *Red-Sea* out of *Ægypt*. Here are a great many fair Trees, and a Cistern to preserve the Rain-Water that falls from the Mountains. A little Distance from hence are hot Waters in a Grot, which the *Arabs* call, *Haman el Pharaon*, i. e. *Pharaoh*'s Bath. They say, that whatever is put into these Baths, one part is lost, which the Devil takes for his Share; as also, that the Sea is always tempestuous where *Pharaoh* and the *Ægyptians* were drown'd.

Corondel or Shur. Pharaoh's bath.

From hence he came in 3 Days to *Tor*, having met with nothing but Palms, and a Well of very bad Water in the Way. *Tor* is no considerable Place, but has a good Harbour for Ships and Galleys. The Port is guarded by a little square Castle, which has 2 Guns at the Gate, and an *Aga* is Governour of it, who has only *Turks* under him. Near to it is a Convent of *Greeks*, dedicated to St. *Catherine* and the Angel that appeared to *Moses* in the Bush. This Monastery is fair and spacious, and supplied with plenty of Fish from the *Red Sea*. It holds 30 Monks, who gather Stone Mushrooms, small Stone Shrubs and Branches of Rock, which they call White Coral, with many sorts of Shells, very pretty to make artificial Works of them, and sell them to Travellers. In the *Red-Sea* also is taken a Fish called a *Seaman*, about certain little Isles not far from *Tor*, which has 2 Hands like the Hands of a Man, saving that the Fingers are join'd together with a Skin, like the Foot of a Duck. It is a strong Fish, and those that kill them stick them with a Harping-Iron, as a Whale. The Skin of it is like that of a wild Goat, or Chamois, and is used for Bucklers, which are Musket-Proof. At *Tor* you pay a Duty of 4 Piastres.

Tor. St. Catherine's Convent. The Seaman, a Fish.

From *Tor* he went *Jan. Ult.* to see Mount *Sinai*, with a Monk to shew it them. By the Way he saw the Garden of the Monks of *Tor*, which contains the Place, in Scripture called *Elim*, where, when the *Israelites* journied that Way, were only 70 Palm-Trees, and 12 Wells of bitter Water, which *Moses* made sweet by casting a Piece of Wood into them. These Wells are still in being, and near one another, being most of them within the Reach of the Garden, and the rest of them are hard by. They are still bitter and hot, and one of them is called *Hamon Mousa*, i. e. *Moses*'s Bath. The 70 old Palm-Trees are long since gone, but there are many more in their Room, and the Monks have a Rent for them.

Elim. Moses's bath.

Then he travell'd over a Plain, which in H. Scripture is called, *The Desart of Sin*, where the *Israelites* longing after the Onions of *Ægypt*, God sent them *Manna*. In this Plain grow the *Acacia*-Trees, from which the *Arabs* gather the Gum so named, and sell it at *Tor*. The Acacia-Trees in *France* yield no Gum, and the Acacia sold in the Shops is the inspissated Juice of wild Plumb-Trees, brought out of *Germany*. These Trees are neither bigger nor higher than ordinary Willows, but the Leaves are very thin and prickly. They yield their Gum without pricking. Coming into the Mountains, they found many Cottages of *Arabs*, which were well filled with little Children and Women. Their Provision was chiefly Milk. Having got over the Hills, he came to a Place called *Rephidim*, where there were a few little Houses pretty well built, inhabited at present by the *Arabs*. A little further were several Gardens belonging to the Monks, very well Wall'd round, and full of all sorts of Fruit Trees, and Vines too, very well kept. Then he found the Rock, out of which *Moses* brought Water, when he had smitten it twice with his Rod. It is a Stone of a prodigious Height and Thickness, and on 2 sides of it are Holes, where 'tis easie to perceive that Water hath run, tho' there be none at present. This Rock in Scripture is called, *The Rock of Strife*. The same Day he came to the Monastery of the 40 Martyrs. *Greek* Monks inhabit it. 'Tis a neat Building, hath a fair Church, and a lovely large Garden belonging to it, in which are Apple-Trees, Pear-Trees, Walnut-Trees, Orange-Trees, Lemmon-Trees, and all other Trees which are found in this Country; and, indeed, all the good Fruit eat at *Cairo* comes from Mount *Sinai*. Besides that, there are fine Vine-yards and very good Water there. The Gardens are dress't and kept by some *Arabs*, who willingly serve the Monks.

Rephidim. The Rock of Strife.

From this Place he went up to the Mountain of St. *Katherine*, which lies just before it. It costs 3 Hours to ascend it, being full of sharp cutting Stones, and many steep and slippery Places to be climb'd, which hinder People from going fast. There are many Stones found in this Hill, on which Trees are naturally represented, and being broken retain the same Figure within. Some of these Stones are prodigiously big. About the middle of the Mountain is a lovely Spring of clear Water, with a great Bason in the Rock; but it is for the most part frozen hard, for the Snow always lies in many Places of it. It is called the Mountain of St. *Katherine*, because that H. Virgin beheaded in *Alexandria*, is storied to have been buried there by Angels, and lay there 40 Years, till she was removed into a Monastery adjoining, dedicated to her by the Monks, to one of whom it was reveal'd, that her Body was there interr'd. He lodged at the Monastery of the 40 Martyrs that Night, and on the next Day went to see the Mountain of *Moses*, which is not so high, nor so hard to ascend as the former, but there is much Snow upon it, and several Cisterns. On the Top of it are 2 Churches, one for the *Greeks* and another for the *Latins*, dedicated to our Lord's Ascension. Near this latter is a little Mosque, and by the side of it a little Cave, where *Moses* is said to have fasted 40 Days, when he received from God the Ten Commandments, written upon 2 Tables. On the side of the *Latin* Church is the Grot, where, 'tis said, *Moses* hid himself, when having desired to see God's Face, the Lord told him, *That he could not see his Face and live*; and that when He passed by he should see his Back-parts. From this Mount you may easily see down into the Convent of St. *Katherine*, which is at the Foot of the Mount. There you see a fair large Church, covered with Lead, where, they say, the Body of St. *Katherine* is in Pieces, and before the Door of it is a beautiful Mosque, within the Precinct of the Monastery. Coming down again, he found by the Way a great Stone, to which, the *Greeks* say, the Prophet *Elias* came when he fled from *Jezebel*. A little lower is the Print of a Camel's Foot, made on a Rock as exactly as if it were done upon the Sand. The *Moors* and *Arabs* say, 'tis the Print of the Foot of *Mahomet*'s Camel, and they kiss it with great Devotion; but 'tis probable the *Greeks* made it to oblige them to reverence those Places. Up and down the Mount are several little Chappels, dedicated to several Saints, as St. *Elias*, where there is an Hole behind the Altar, in which *Elias* is said to have hid himself from the Persecution of *Jezebel* all the while he staid in the Mount; the Blessed Virgin, St. *John*, St. *Ann*, St. *Pantaleon*, the Baptism of *Jesus Christ*, and St. *Anthony*; and to every one of them belongs a little House and a Garden full of Fruits and good Water. These Places were inhabited by *Hermites* in so great a Number, that 'tis said, that in the Mountain of *Moses* there were in ancient times above 14000 *Hermites*. Afterwards the *Greeks* had Monks in all these Cells, but at present there are none, because the *Arabs* so tormented them. From these he went down to the great Monastery at the Foot of the Mountain, called St. *Katherine*'s, by the Steps which reached from the said Monastery up to the Top of the Mount, and were in Number 14000; but at present some of them are broken. Those that remain are well made, and easie

Rephidim. St. Katherine's Mount and Monastery. Strange Stones. The Mountain of Moses. Elias's Stone. Several Chappels. St. Katherine's Monastery.

easie to go up and down. In the Way he passed by a fair Portico's, where, the *Greeks* say, the Pilgrims paid a certain Duty heretofore. The Monastery is at the Bottom of the Mountain, and is built of good Free-Stone, with very high smooth Walls. On the East side is a Window, where by letting down a Basket they took up the Pilgrims, and dispensed Victuals to the *Arabs*. 'Tis now shut up, and no Monks inhabit in it, and the Reason is this: The *Greeks* were in Possession of this Monastery 1000 Years, *viz.* from the Days of *Justinian*, who gave it them. *Mahomet* was their Camel-Driver, and being weary with fetching in their Provision one Day, fell asleep before their Gate, and while he lay asleep an Eagle came and hover'd a long time over his Head, which the Porter of the Monastery observing, ran with Amazement to the Abbot, and acquainted him with it. The Abbot went immediately, and seeing it, after he had consider'd it, ask'd *Mahomet*, as soon as he awoke, Whether, when he was a Great and Mighty Lord, he would be kind to them? *Mahomet* reply'd, He neither was, nor like to be such: But the Abbot still desiring his Answer, he said, He need not doubt but he would do them all the Good he could. The Abbot desired him to give it them under his Hand, but *Mahomet* not being able to write, he wetted his Hand all over with Ink, and making the Impression of it upon a clean Sheet of Paper, gave it them, as a Confirmation of his Promise. *Mahomet* sometime after arriving at the Grandeur presaged by the Eagle, and remembring his Promise, confirmed them in their Monastery and the Lands belonging to it; yet on this Condition, that they should give Victuals to all the *Arabs* of the Neighbourhood. This Condition proved so burthensome to the Monks (for the *Arabs* would come 400 in a Day, and sometimes robb'd them of their Corn, when it was brought in) that they forsook the Convent, Wall'd up the Gates, and fled to the Monastery of *Tor*. To this Monastery belong'd a Bishop, who presided over all the Convents and Chappels thereabouts as far as *Tor*, and did not depend on the Patriarch. He resided at *Cairo*.

Mahomet a Servant to it.

Mahomet's Grandeur foretold and effected.

Going round the Monastery, he saw at some Distance Mount *Horeb*, on which *Moses* fed *Jethro's* Flocks when he saw the burning Bush, and near to that are the Mountains upon which *Aaron* pray'd for the People. They are all but little ones. There is a fair Garden adjoining to the Monastery, and within the Walls of it a lovely Chappel, dedicated to the Holy Virgin. About half a Quarter of a Lg. from this Garden is the Place where (the *Greeks* say) the Golden-Calf was molten, and there is the Head of a Calf cut by them to the Life, as a Monument of it. Near this Place is a great Stone, with some Characters not legible. The *Greeks* say, 'twas there *Jeremiah* hid the Vessels of Gold and Silver, and other costly Furniture of the Temple of *Salomon*, when the *Jews* were carried captive to *Babylon*.

Mount *Horeb*.

The Golden Calf calf.

Having seen these Things, he return'd to the Monastery of the 40 Martyrs, where having staid a little to see the Churches of the 12 Apostles, St. *Cosme* and St. *Damian*, and the Place where the Earth swallow'd up *Corah*, *Dathan* and *Abiram*, with their Families, because they mutiny'd against *Moses*, he hasted to *Suez*, where he and his Company hop'd to refresh themselves. In the Way, which is very pleasant and even, they overtook a Caravan of *Arabs*, with whom he not only diverted himself in having the Stories of their Lives, but learned much of their Customs, which he imparts to us in this Manner.

Corah, *Dathan* and *Abiram* swallow'd up.

The *Arabians* and their Country descri-bed.

The *Arabs* are of the Race of *Ismael*, and his 12 Sons are the Patriarchs of the Tribes of the *Arabs*, as *Jacob's* were of the Tribes of *Israel*. Some of them dwell in Towns, and others in Deserts, which the Ancients called the *Scenitæ*, or Dwellers in Tents, and Moderns the *Bedouins*. These, who are very numerous, live a most wretched Life, but think themselves most happy. They rob the Caravans when they can, stripping the Travellers, unless they make Resistance, but do them no other Hurt; but when they catch any *Turks* they seldom spare their Lives, especially if of late they have abused any of their Country-men in their Towns. Their Cloathing is a long blue Shirt, sew'd up to the Bottom on both sides like a Woman's Smock, and a long Piece of white Serge over it, which they bring over their Shoulders and under their Arm-pits several times. Some of them have Drawers, and a kind of Furr'd Vest, or a great many Sheep-Skins sew'd together, the Wool of which they turn inward in cold, and outward in hot Weather. Several wear a kind of *Pabouches*, or Slippers. The Women are very ill cloathed. All cover their Faces with a Linen-Cloth, which has Holes for their Eyes, and wear great Rings of Lattin in their Ears. Most of 'em have Flocks of Camels, Sheep and Goats, which they feed here and there as they find Grass, and there they pitch their ugly Tents of Goats Hair, in which their Women and Children live. When it is eaten up, they pack up Bag and Baggage, and loading their Camels with all they have, House, Goods, Wives and Children, they seek more Pasture elsewhere. They live on Camels and Goats Milk, and Camels Flesh, with Water for their Drink. They eat also a sort of Cakes or Buns, but their Mafrouca is their most delicious Fare. It is made of Flour, knead up into a Paste with Water, Butter and Honey, and bak'd in the Embers, which breaking into Pieces, they eat with great Delight.

Their Cloathing.

Their Habitations.

Their Food.

Mafrouca.

Their Governments.

Their Deserts are divided into Tribes, and their Tribes into Families. Each Tribe hath a *Scheik el Kebir*, or Great *Scheik*, who presides over all the other *Scheiks*, or Captains of every Family, who administer Justice to them, and may punish either with Fine or Death, as their Crimes deserve. The Office of *Scheik* is Hereditary, descending from Father to Son, and if the *Scheik* of a Family dies without Children, all the Family assembles and chuse the most vertuous Man among them, and then entreat the Great *Scheik* to approve their Election. The same Method is observ'd in chusing the *Scheik el Kebir* by the whole Tribe, if they die Childless. The *Bassha's* generally give the Great *Scheiks* some Pay to keep their Tribes at Peace with them, and the Caravans allow them a yearly Sum for a quiet Passage; yet to the other *Scheiks* they give Provisions, Money, Vests, and Cloth for Shirts in certain Proportions; and these Blades think themselves in their Tents happier than Kings. Sultan *Amurath* would have confined them to live in Towns, but they would not hear of it. They keep constantly Spies to observe if there be any Plots against them, that they may either defend themselves, or flee, which is their most certain Security; for no Enemy can pursue them, but they will be oppressed with 3 irresistible Enemies, Hunger, Thirst and Barrenness, besides great Danger of Tempests, which will overwhelm them with Sand.

Scheik.

A Tribute paid to them.

The Arms of the *Arabs* are Lances, Sabres or Swords, and long Daggers. Fire-Arms they have none, and indeed they are afraid of them. They have Bucklers made of the *Seaman's* Skin. They have pretty Horses, and tho' they are small, yet they are so swift, that they seem to fly, and are almost indefatigable. They will stand still where-ever they leave them. They feed them, as they do themselves, with Camels Milk and Flesh dry'd in the Sun, Butter and Wheat, which make them very strong; but because Camels are swifter, they all keep a Camel (which they feed as they do their Horses) to save their Lives in time of Danger.

The Arms of the *Arabs*.

Their War.

The different Tribes are many times at War one with another, and the *Scheik el Kebir* marches at the Head of them. When one of them kills another in time of Peace, the Friends of the Deceased carry the Malefactor before the *Scheik el Kebir*, who either condemns him to Death, or lays such a Fine on him as they desire; but generally they revenge his Death, and they'll keep it in mind 100 Years, till they have done it.

Their Marriages.

If an *Arab* marry a Maid, he kills a Camel or 2, and makes a Feast according to his Ability, giving the Maid so much; but if afterwards any Relation of the Maid's dislike the Marriage, and pay back the Husband what he has expended, he will break the Marriage, tho' the Maid be deflower'd.

Their Religion.

Tho' they are all *Mussulmans*, yet they make no other Prayers but the *Bismillah*, i. e. *In the Name of God*. They have a wonderful Art at Stealing and doing Mischief, notwithstanding all Care used to prevent it. One of them stole the *Bassha's* Signet at *Suez*, when he was using it; another of them got into his Kitchin, and carried away every thing; and a 3d got to his Bed-side, and had not a little Child that lay with him cry'd out, and waken'd him, he had killed him, who thereupon apprehended the Rogue, and impaled him.

Pa-

The Red-Sea described.

Its Name.

Their Habitations.

Their Food.

Their Manners.

Fishes and Fish in it.

Suez described.

Being arrived at *Suez*, he ſtaid a while for a Caravan, and ſpent his Time in conſidering the *Red-Sea*. Authors ſay, that it had its Name from the Red Sand, which cauſes the Water to look Red; but 'tis no ſuch Thing, for 'tis no Redder than other Seas, neither in the Water nor Sand: But being called, *Mare Erythræum*, from an ancient King called *Erythra*, Writers, ignorant of the Derivation of the Name, render'd it by *Red*, as, ἐρυθρὸς, *Erythræus* ſignifies in *Greek*. The Scripture gives it a more proper Name, calling it *Jam Suph*, i. e. *The Sea of Ruſhes*, of which the Banks are ſtill full. The *Arabians* call it, *Buhr el Calzem*, i. e. *The Sea of Cluſma*, from a Town ſo called ſtanding on the Northern Point of that Sea. 'Tis but narrow, *viz.* not above 8 or 9 Miles over in many Places, and being full of Rocks, many Ships are loſt in it, but ebbs and flows like the Ocean. It was formerly a Sea of great Trade, before the Paſſage of the *Cape of Good Hope* to the *Eaſt-Indies* was diſcover'd by the *Portugueſe*, for then all the Drugs, Spices, precious Stones, Pearls, and many other Commodities, came either by *Aleppo* or the *Red-Sea* to *Alexandria*, from whence it was convey'd into all Parts of *Europe*. There are very good Oiſters and other Shell-Fiſh taken in this Sea, as alſo the *Seaman*, *Chagrin*, which is like a Sea-Dog, and ſeveral other extraordinary Fiſh.

At the Beginning of this Sea (which is ſo famous for the Paſſage of the *Iſraelites* thro' it) ſtands *Suez*, anciently called *Arſinoe*, from the Siſter of *Ptolomy Philadelphus*, who built it. It is a little Town of about 200 Houſes, hath a pretty Harbour, but the Water is ſo ſhallow, that Ships cannot put into it, nor Galleys, till they are half unloaded, but the Road is ſafe. The Galleys are ſmall, and carry no Guns, but a *Fanfera* to ſalute the Ports. Cloſe by the Harbour is a Baraque, rail'd with a great Wooden Palizado, where are 9 Culverins, and 13 Pieces of Cannon, but theſe laſt are not mounted. There is a little *Greek* Church in the Town, but it is in bad Order. The Houſes are pretty well built, and the Market-place is indifferent good. It is full of People, when any Ship arrives, or the Galleys are in the Harbour; but at other Times it is very deſolate, becauſe there is no good Water within leſs than 2 Lgs. of it.

He departed from *Suez* with a Caravan of 200 Camels, which the *Emir-Alge* had provided to carry the Coffee brought in by the Galleys to *Cairo*. The Caravan was guarded by *Arabs*. In his Way he ſaw the Caſtle *Adgegoud*, and one Day they had ſo hot a Wind, that they were forced to turn their Backs upon it to take Breath. It heat their Water ſo extreamly hot, that they could not drink it. This Wind infected the Camels ſo much, that they could not feed, and filled the Mens Mouths with Sand, ſo that had it continued the whole Day (as it continued about half of it) one half of the Caravan had periſhed; for the ſame ſort of Wind killed 2000 of the Caravan that was going to *Mecca* in one Night. All the Way is ſtrew'd with Camels Bones, which are of uſe to the Caravan; for the Drivers anoint the Feet of their Camels, which are cut or gall'd, with the Marrow they take out of them. Such as travel to Mount *Sinai* ought to make Proviſions at *Cairo* of all they ſtand in need of; for one Camel will carry all, otherwiſe they will be troubled with Lack of Meat and bad Water; for the Water on the Mountain is ſo cold, that it begets a Rheum ready to choak one.

Adgeroud, a Caſtle.

A deadly Wind.

CHAP. X.

Mr. Thevenot's *Travels to* Jeruſalem, *and ſeveral other Parts of* Judæa, *from* Cairo *in* Ægypt.

Apart of the Way of Carriage.

Their Manner of Marriage.

Bad Water at Salahia.

Catie.

Salt made of Rain-Water.

THERE being little to recommend the Land of *Judea* to the Curioſity of a Traveller, but the Birth, Life and Death of our Bleſſed Saviour *Jeſus Chriſt*, acted upon the Stage, Mr. *Thevenot*, having reſolved to viſit that Country, ſtaid till *Lent*, when the Church there celebrates the Memory of his dolorous Paſſion, at which time there is a Caravan goes yearly to *Jeruſalem* from *Cairo*. They have a peculiar Way of Carriage in this Caravan from others, which is more commodious and eaſie, and that is by *Counes*, which are a kind of Hampers like Cradles, carried upon Camels, one on each ſide, and have a Back, Head and Sides, like the great Chairs uſed by ſick People. A Man rides very eaſily in them, and by a Covering over them, is defended both from Rain and Sun. The Fare of them, and the Dues paid by the Way is 18 Piaſtres for each *Coune* but the Church-men have ſome Favour, and may go for 16 Piaſtres. The Travellers muſt carry their own Proviſions, and Conveniences for dreſſing it and carrying Water. The Caravan in which he was conſiſted of 520 Camels, beſides ſeveral Horſes, Mules and Aſſes. The firſt Stage of the Caravan it at a little Town called *Hanque*, where Travellers uſually meet it, and ſo it goes on to *Balbeys* and *Corede*, and ſo to *Salahia*, where are very pleaſant Woods of Tamariſks. The Caravan lies not in theſe Towns, but lodges in the Fields under their Tents like a Camp and are guarded by certain Muſqueteers to keep it from Robbing.

In the Way from hence you paſs over a fair Bridge, laid over a part of the *Sirbonite* Lake, and you go to *Catie*, where are 2 Wells of Water, one of which is not pleaſant for drinking for its Sweetneſs, and the other, which is 2 Miles from the Town, is good Water, but it muſt ſtand a little. Here are ſold a Fiſh as long as one's Arm, as big as a Carp, and of as good a Reliſh, for a Maidin, or 5 Farthings apiece. At this Town the Caravan is preſs'd for the G. Seignior's Service, which cauſes a Delay of a Day, or more ſometimes.

Leaving *Catie*, they paſſed by a ſhallow and narrow, but long Pit, full of very white Salt, made by the Rain-Water falling upon a brackiſh Sand, and congeal'd by the Sun, as is done at *Alexandria*, and came to *Birlah*, from whence departing, they came to a Well of freſh Water, lately made by a *Sangiack* of *Ægypt* for all Travellers; but all the Way is full of quick Sands. About a Day's Journey from thence is another Well, covered with a Dome and ſupported by 4 Walls of Free-Stone, built ſquare, and the Ciſtern is alſo Free-Stone. It was built by an *Aga*, who left a Fund to maintain ſo many *Arabs*, who are daily to bring ſeveral Camels Load of Water to it. It is called, *Sibil el bar Acat*, i. e. *The Place where all may Water for God's Sake.*

Birlah.

Having paſſed this Well, they came to *Riche*, a Village not far diſtant from the Sea. It hath a Caſtle well built of little Rock Stones, as all the Houſes are. The *Cachef* of it, as alſo that of *Zaka* is ſubject to the *Cachef* of *Catie*. They have ſo many ancient lovely Marble Pillars at *Riche*, that the Coffee-Houſes and Wells are made up of them, and all their Burying-places are full.

Riche.

From *Riche* they went to *Zaka*, which is in the Deſart, and without any Habitation, but has 3 Wells of bad Water, yet the *Corſairs* uſe it. Going on they met with 3 Marble Pillars, 2 ſtanding, and 1 lying along, and a little further a Well of good Water, where there are *Saki's*. There begins a very pleaſant Country, and ſome Corn-Land, and ſo came to *Cauniones*, under the Guard of 8 *Turks*, who went with them from *Riche* to ſecure the Caravan againſt the *Arabs*. Here are alſo ſo many Marble Pillars, that their Coffee-Houſes ſtand upon them, abundance of Trees, and a great deal of good Meadow-Ground. As well the Inhabitants of the Place as the Cattle are extreamly fat. Here is alſo a large Caſtle, with a large open Place in it. The *Turks* inhabit it, and have a *Saki* of very good Water within it, and the *Moors* and *Fela's* live without. It is commanded by a *Muſeferaca*, who depends on the *Baſha* of *Cairo*, who pays him, but has but a few Soldiers under him, and thoſe paid by the *Cachef* of *Catie*. *Cauniones* is the laſt Town of *Ægypt*, and from thence to *Gaza* is not half a Day's Journey thro' a fruitful Country, abounding with

Zaka.

Cauniones.

The Caſtle.

with all Fruit-Trees, Meadows and Cattle, and several Sibils, or Wells.

Gaza described. The City of *Gaza* is about 2 Miles from the Sea, and was anciently very famous, as may be guess'd by the Ruines, *viz.* Many Marble Pillars and Tombs. It was one of the 5 Lordships of the *Philistines*, to whom *Sampson* did so much Hurt, and carry'd their Gates away, leaving them upon an Hill a Mile from it. The Castle is near the Town, and tho' small, is kept in good Order. Hard by the Castle is the *Seraglio* for the *Basha's* Wives, and above it some Ruines of an old Wall of a *Roman* Castle, made of so compact a Matter, that it cannot be broken with an Hammer. The Town is very small, but hath a good *Bezisten*, and a pretty large *Greek* Church, the Roof of which is supported with 2 great Pillars of Marble, with Cornishes of the *Corinthian* Order. The *Armenians* also have a Church there. There is an Heap of Earth near the Castle, which the People say, was the *Philistines*, which *Sampson* pulled down upon himself and the Company within it; but there are no good Signs of it. Without the Town are several good Mosques, faced with Marble, which seem to have belonged formerly to the City. From *Cairo* to this Place you can light of no Wine or Brandy, but here you find pretty good of both sorts.

The Churches.

From *Gaza* to *Rama* is 2 Days Journey thro' a lovely Plain, full of Corn, Trees and Flowers, which yield a pleasant Smell. The Villages by the Way are but sorry, but there are several Wells and Sibils, and 2 good Bridges.

Rama described. *Rama*, by the *Arabians* called *Ramala*, was anciently a City, but it's now an open Borough, and is subject to the *Basha* of *Gaza*; however, 'tis pretty large, and yields a good Prospect on the Outside. In it is the House of *Nicomedes*, which affords a Convent, a Church, and Lodgings to the *Franks*, who come hither on Pilgrimage. The Doors of all the Houses in the Town are not above 3 Foot high, to keep the *Arabs* from riding in on Horse-back. Here is a Church with a very high Steeple (which yet the People say, was as high again as it is at present) dedicated to the 40 Martyrs, who suffer'd in *Armenia*, and another to St. *George*. Heretofore was a stately large Convent here, and the Cloister seems to be pretty entire, but Christians are not permitted to enter into it. All round about the Town are a great many Wells, which served, as they say, to keep Wheat and Oats in. Some of them are very deep. Hard by the Town is a fine Cistern made with a great deal of Art upon 2 Rows of Piazza's. It was built doubtless to supply it with Water, but is not now used. Here dwell several *French* and *Dutch* Merchants, who trade in Oil, Soap Cotton, Threads and Cloth. Some Years the S. E. Wind coming from the Wilderness a-cross *Jordan*, causes a violent Heat for several Days, and brings such a prodigious Number of Locusts along with it, as cover the whole Face of the Earth, and devour all the Grass and Herbs. Most Birds eat them, and, as if Providence had put an Instinct into them to destroy them, they make a great Slaughter, more than they can eat. These Creatures lay their Eggs in Holes of the Ground a Foot deep 80 in a Bunch, which they hatch in 15 or 16 Days, and then come out in such Numbers, as would affright one. They come not to fly in less than 3 Weeks, and they will be as big as Grass-hoppers. The Sports used about this Town by the *Basha*, are hunting the wild Boar, and *Jackals*, or wild Dogs, which last they catch with a Leopard train'd up for that Purpose. The Women of this Town, according to the Custom of the *Turks*, go on certain Days in Companies out of the Town to the Tombs of their Relations, to mourn over them, and setting themselves upon their Sepulchres, make a very great Lamentation.

A fine Cistern. Locusts. Sports used.

Lydda. *Lydda*, mention'd *Acts* 9. is about 3 Miles from this Town. In the Apostles Time, when St. *Peter* cured *Æneas*, there was a flourishing Church of Christians, and it was reckon'd one of the 3 Governments in *Judæa*, 1 *Macch.* 11. 34. but 'tis at present only a small Village, seated in a Woody Country very pleasantly. There are some Remains of a Church dedicated to St. *George*, which appear'd pretty neat, in which the Christians have a small Place for their Devotions.

From *Rama* he went thro' the Mountains which are covered with thick Woods but the Road is bad, to *Jerusalem*, which by the *Turks* is called *Coudscherif*. On the Road you see at a Distance several Villages, and other Things remarkable, as *Dgib*, or the Town of *Samuel*, where, they say, that Prophet is interr'd, and the *Jews* still visit it out of Devotion. It stands upon an high Hill, and in it is a Mosque covered with a Dome, an old ruined Castle, called *Soud*, and the Natives say, that the *Maccabees* dwelt there; *Sabiea*, fruitful Places for Vines.

Dgib, or Samuel's Town.

You enter *Jerusalem* by this Road, at the *Damascus* Gate; but all *Franks* must not enter the Town before the Religious have obtain'd a Permission for them from the *Basha*, or Governour, lest they have an *Avanie* put upon them, who usually sends a Servant or two with the *Trucheman* of the Convent to search their Baggage, to see if they have no Arms, and other Things prohibited in it. After Admission, they are carried to the Convent of S. *Saviour*, where they are received with great Civilities, and all Signs of an hearty Welcome, washing their Feet and kissing them, and lodging them in convenient Apartments. One of the Monks is to take care of the Pilgrims, and conduct them to the Places to be visited. They shew them the Judgment-Gate, thro' which our Saviour passed, bearing his Cross to Mount *Calvary*; the House of *Veronica*, who wiped our Lord's Face, besmear'd with Sweat and Spittle, with her Veil, as he passed by loaden with his Cross, and for that charitable Office received his Image upon it; the House of the rich Glutton, and the Place where our Saviour said to the Women of *Jerusalem*, *Weep not for Me, but for your selves and your Children*; the Place where *Simon* the *Cyrenean* relieved our Saviour from bearing the Cross; a large Arch, where *Pilate* set our Lord, when he said, *Behold the Man*. In it are 2 Windows, separated only by a Pillar of Marble, under which is written, *Tolle, Tolle, Crucifige eum*; *Herod's* Palace, where our Lord was cloathed with a white Robe in Derision, and sent back to *Pilate*; *Pilate's* Palace, where the *Basha* lives; but the Stairs of it, which, 'tis said, our Saviour went up and down, are at *Rome*, being sent thither by St. *Helen*: They are called, *Scala Sancta*. The *Basha's* Kitchin is the Place where *Pilate* wash'd his Hands. From a Window in this Kitchin you have a Prospect of *Solomon's* Temple. The Coal-hole to this Kitchin is thought to be the Prison into which our Lord was put; *The Place of Flagellation*, which was once a Chappel so called because our Lord was scourged there; but the *Turks* make it now a Stable. Here begins the Dolorous Way, which reaches from *Pilate's* House to *Calvary* about a Mile in Length; St *Stephen's* Gate, anciently call'd, *Porta Gregis*, or the Sheeps Gate, where the Virgin at her Ascension (as they tell you) let fall her Girdle to St. *Thomas*; the Church of St. *Sepulchre*. All *Franks* pay 24 Piastres, and Monks but 12 at their first Entrance into it; but after they have been once in, they may go in again as often as it is open'd, giving only a Maidin to the *Turks* that open the Door. Before it is an open Place, pav'd with large Free-Stones, which the *Jews* dare not tread upon. It has a large Steeple, which stands on the Left Corner of the Front of the Church. It has 3 Stories of Windows, and heretofore had 18 Bells in it. It is above 70 Paces high. The Door is stately and magnificent, having over it many Figures in *Basse-Releife*, representing several Histories. It is always shut, and seal'd with the the *Basha's* Seal, unless it be open'd to some Pilgrims or Religious Persons. This Church is very spacious, and the Body is round, requiring no Light but from the Dome on the Top, which is covered with Lead, and Wainscotted with Cedar, which rots not. Under the Door is the Sepulchre, and as you go into it there is a Marble Bench for the Monks, who assist at the Celebration of the Mass of the Holy Sepulchre, to sit on. The Church is 120 Foot long, and 168 broad. The *Latins* are in Possession of half of it at least, but the Quire is in the Power of the *Greeks*. The Building in general is of *Gothick* Work, but the Chapters of the Pillars seem to be *Corinthian*, tho' the Proportions are not duely observed. The Quire is encompassed with 32 great Pillars, and shut in with Walls. Behind the Pillars all round the Church the *Orientai* Christians have made their Lodgings. These Pillars bear up a second Story in Form of a Gallery, that ranges about the Church, which was formerly in the Possession of the *Latins* altogether, but now the *Armenians* have obtained a good Part of it, and have separated it by Partitions. All the Roof is done in *Masaick* Work, but most of it defaced. Over the high Altar stands the Image of *Jesus Christ* on a great Cross, and above it are the Figures of several Angels sound-

Jerusalem described. *The Chappels about the Church.* *The Pillar of Flagellation.* *The Inscription of Christ's Cross.* *X. P. Sign. Christi.* *The Tombs of Baldwin's Children.*

ing

ing their Trumpets, done in the same sort of Work, but much damaged and defaced. Before the Altar hangs a large Basse-Branch Candlestick, and round about it several Chrystal Lamps. The Quire hath 3 Doors, *viz.* One over-against the Entry into the Holy Sepulchre, and 2 other on each side toward the high Altar. Round the Church are many Chappels: 1. The Chappel of the Angel which told the 3 *Maries*, That our Lord was risen. It is about 14 Spans in Length, 6 in Breadth, and 9 Foot high. In it is a little Altar, and 3 little Windows for Light. It was built for Ornament too. 2. The Chappel of the Sepulchre, the Door of which is 3 Foot high, and 2 Foot wide. All enter into it bare footed, and it is so little, that it will not hold above 3 kneeling. On the Right-Hand as you enter is the Place where the Body of our Lord was laid upon a Table. There are 44 Lamps in it, sent by the Emperors, the Kings of *France* and *Spain*, and the whole Place is faced within and without with white Marble, and encompassed on the Outside with 10 lovely Pillars of the same Stone. 3. The Chappel of the Apparition, where the *Latin* Monks do commonly celebrate Service. It is so called, because 'tis said, that our Lord appear'd to his Mother soon after his Resurrection there. It is a large Place, paved with Marble, Jasper and Porphyry, adorn'd with Tapistry, and furnished with Desks and Pulpits. In it are 3 Altars, and behind one of them lies a large Piece of the Pillar of Flagellation, so called becaufe our Saviour was tied to it, when he was scourged in *Pilate*'s House. It is kept in a Window made in the Wall, but so defended with an Iron-Grate, that 'tis easie to be seen, but none can touch it. There was also a Piece of the true Cross kept a long time, but the *Armenians* have stollen it away. The Lodgings of the Monks is just behind this Chappel, and above it in a Gallery are little Chambers for the Pilgrims. Before the Door of this Chappel are found 2 round Marble-Stones set in the Pavement, which are set the one in the Place where our Lord stood when he appear'd to *Mary Magdalene*, and said to her, *Noli me tangere*, Touch me not; and so is the Stone called: The other shews the Place where *Mary* stood. Over them both are Silver-Lamps burning. 4. The Chappel our Lord's Prison, which was formerly a Dungeon, where our Saviour was put, while they set up the Cross on Mount *Calvary*. It belongs to the *Greeks*. 5. The Chappel of St. *Longinus*, who was the Soldier who pierced our Saviour's Side with the Spear, but after mourned there for his Sin. 6. The Chappel of parting the Garments, because 'tis built on the Place where the Soldiers cast Lots upon our Saviour's Garments, and divided them amongst them. It belongs to the *Armenians*. 7. The Chappel of the Inscription of the Cross, because they say the Inscription of our Lord's Cross was long kept there, till it was removed to *Rome*, where it now is in the Church of the Holy Cross *in Atrio Sellerians*. This Chappel belongs to the *Abyssins*. 8. The Chappel of Invention of the Holy Cross. It was anciently a Ditch at the Foot of Mount *Calvary*, called by the Prophet *Jeremiah*, Chap. 31. *The Valley of the dead Bodies*, because here the Bodies of such as had been executed were cast, with the Instruments of their Sufferings. It belongs to the *Latins* and *Greeks*, and therefore has 2 Altars in it, and every Altar has a Dozen of Lamps belonging to them. In this Place one may easily see the Cleft of the Rock that parted when our Saviour gave up the Ghost. 9. The Chappel of St. *Helen*, which is spacious, has a Dome supported with 4 Pillars of white Marble, which being kept always wet with the Dampness of the Place, the Christians of the Country say, they weep for the Death of our Lord. In this Chappel are 2 Altars, which have many Lamps continually burning before them, and a Marble-Chair of an ancient Form, and engrav'd, wherein, 'tis said, the Holy Empress sat, while they search-ed for the Cross of our Lord below. This Chappel belongs to the *Armeniani*. Crossing the Church you come to an Altar raised in Memory of the penitent Thief, near which is, 10. The Chappel of Exprobration, or Mockery, in which there is an Altar supported by 2 Pillars and under it the Pillar of Exprobration, which is of grayish Marble, and is about 2 Foot long. It may be seen through an Iron-Grate that shuts it in. It is so called, because after the Soldiers had buffeted our Lord, they made him sit down in *Pilate*'s Hall upon the Pillar, and crown'd him with Thorns, and mock'd him, saying, *Hail King of the Jews*. This Chappel belongs to the *Abyssins*, and has 5 Lamps in it.

Going from hence, you by 18 Steps ascend Mount *Calvary*, where stands, 11. A very neat Chappel, with 2 or 3 Altars, before the first of which is an Hole, in which the Cross of *Jesus Christ* was fixed. The Hole is about 2 Foot deep, and half a Foot Diameter, dug in the Rock. It is laid round with a Silver Plate, on which are described in *Basse-Relieve* all the Parts of the Passion. On the Right-Hand is shewn the Place where stood the Cross of the penitent Thief, and on the Left the Place where stood the other Thief's. Hard by it is a round Stone to denote the Place where the Virgin *Mary* was, when *Christ* was nail'd to the Cross. This Chappel is called, *The Chappel of Crucifixion*. It is 18 Paces long, and 16 broad, and has a square Pillar in the middle that bears up the Roof, which parts it between the *Greeks* and *Latins*. The Pavement, as well as the rest of the Chappel, is very fine, being the neatest *Mosaick* Work. 12. The Chappel of the Virgin *Mary* and St. *John*, who discoursed together there when *Christ* was crucified. It belongs to the *Latins*, and the Entrance into it is on the Outside of the Church. 13. *Adam*'s Chappel, because (they say) that in that Place there was found the Skull of the first Man, from whence it was that *Calvary* was called, *The Place of a Skull*. 14. The Chappel of our Lady of Pity, because 'tis built in the Place where the B. Virgin took our Lord in her Arms, when he was let down from the Cross. It is in the Possession of the *Georgians*, who keep a Lamp always burning in it. In this Chappel are the Tombs of *Godfrey* of *Bulloign* and his Brother *Baldwin*, Kings of *Jerusalem*. They have each an Epitaph written in *Gothick* Characters:

The Chappels about the Church.

The Pillar of the Exprobation.

The Pillar of Flagellation.

The Inscription of Christ's Cross.

The Tombs of *Godfrey* of *Bulloign*, and his Brother *Baldwin*.

X. P. Sign. Christi.

Rex Baldewinus, Judas alter Machabæus,
Spes Patriæ, vigor Ecclesiæ, virtus utriusque,
Quem formidabant, cui dona tributa ferebant,
Cedar & Ægyptus, Dan, ac homicida Damascus,
Proh dolor! in modico clauditur hoc Tumulo.

The Tombs of *Baldwin*'s Children.

At the Bottom of the same Chappel on the Right-Hand is a Tomb of curious *Porphyrian* Marble about 3 Foot high, which, they say, is the Tomb of the High Priest *Melchisedeck*. As you go out of that Chappel, you see on the Right-Hand before the Church-Door, along the Wall, 4 fair Sepulchres of white Marble, which are the Children of King *Baldwin*. On one of them is an Epitaph fairly cut, but of such Characters and Abbreviations, as may be pleasing to the Curious.

Stone of Unction.

Near to this Tomb is the Stone of Unction, upon which *Joseph* of *Arimathea* anointed the Body of our Lord after it was taken down from the Cross, it is almost 7 Foot broad, and is now covered over with grayish Marble, because the Pilgrims broke off Pieces from it; it is adorned with a chequer'd Border of little white and red Marble Stones; and that no body should tread upon it, it is inclosed within an Iron-Grate. There are 8 Lamps burning over this Stone, which are maintained by all the 8 Nations that belong to the Church of the Holy Sepulchre, *viz. Latins*, *Greeks*, *Abyssins*, *Cophti*, *Armenians*, *Nestorians*, and *Jacobites*; but the Stone belongs to the *Latins*. A little farther, near the *Armenians* Stairs is a round white Marble Stone even with the Pavement, where, they say, the Blessed Virgin and our Saviour's Relations sat when he was embalm'd. Going up the Stair-Case, which has 37 Steps, you enter into the Church of the *Armenians*, where you find 49 Lamps and 2 Candlesticks of 6 Branches apiece; and at the side of the Quire is a Chappel, which has 43 Lamps and a Candlestick of 8 Branches within it. Being come down from thence, you find the Chappel of the *Abyssins*, and then of the *Jacobites*, which hath its Entry at the Back of the Holy Sepulchre, in which are 35 Lamps, and at the End thereof there is a Grot, in which there are the 2 Sepulchres of *Nicodemus* and *Joseph* of *Arimathea* cut in the Depth of the Rock; for this good Man having laid our Lord's Body in the Sepulchre, which he had prepared for himself, caused another to be made for his own Body, as judging himself unworthy to be laid where his Lord had been. Before each of these Sepulchres stands a Lamp. From these Tombs you go up a few Steps into the Lodgings of the *Greeks*; and thus you have seen all Things remarkable in the Church. It belonged formerly to the *Latins* wholly, but now the other Christians for Money have obtain'd their Shares in it; so that there are belonging to this Church and always resident to officiate there 9 *Latin* Priests, who have the greatest Authority, 7 *Greek*, 5 *Armenians*, and 1 *Cophtish*. It is very pleasant to see this Church upon Festival Days, when the whole Church shines with an infinite Number of Lamps, but then 'tis so crowded, that one can hardly do his Duty with any Satisfaction.

Nicodemus and *Joseph* of *Arimathea*'s Sepulchre.

The *Greeks*, *Armenians* and *Cophti* have a particular Ceremony, which they use upon *Holy Saturday*, and that is by Prayers and Processions to bring down Holy Fire from Heaven, at which they light all the Candles and Lamps that belong to the Holy Places. It is done with many ridiculous Ceremonies, and tho' even the Archbishops and Patriarchs countenance them with a formal Procession in their Pontificals, yet 'tis all meer Juggle, and the Fire which they pretend comes down from Heaven, is probably striken out of a Flint by the Priests privately; and this the *Turks* have found out, and would have punished them for it; but the Patriarch representing it to them, that he could not pay them so much Money as he did, if they took from him the Profit of the Holy Fire, they are suffered to carry on that Cheat.

The Holy Fire.

The Description of the City of *Jerusalem*.

Other Things remarkable in *Jerusalem* are: 1. The 6 Gates, *viz.* *The Sheeps Gate*, but called now by the Christians, St. *Stephen*'s Gate, because St. *Stephen* was stoned without the City near this Gate. *Herod*'s Gate, called also, The Gate of *Jeremiah* and *Ephraim*, retains this Name either because it was built by this King, or stood near his Palace. The Valley of *Jehosaphat* ends at this Gate. The Gate of *Damascus*, because it opens into the Road to that City. The Gate of *Hebron*, or of *Joppa* and *Bethlehem*, because the Road to those Cities lies through it. The Gate of *David*, or Mount *Sion*, because it is the Way to that Mount. *The Dung-Gate*, because through it the Filth of the City they carried out. Our Lord was carried out at this Gate. This is said to be the ancienter Gate, and *David*'s and *Herod*'s next; the others are more modern. There is a 7th Gate, called, *Porta Aurea*, or, The Golden-Gate, from the Gilding that is about it, and renders it more observable than all the rest; but it has been brick'd up a long time, because the *Turks* have a Propheſie, that the Christians shall recover *Jerusalem* through that Gate, which to prevent, the *Turks* keep it brick'd up, as they also shut up all the Gates of the City, to avoid the Force of a Propheſie, on *Friday* till Noon, which says, That the Christians shall become Masters of *Jerusalem* on a *Friday* before Noon. It was through this Gate that our Saviour entred *Jerusalem*, when he rode on the Ass.

Porta Aurea, or the Golden Gate.

The Walls.

The Walls of the City are pretty handsome, and built with Free-Stone, having at convenient Distances several square Towers with Port-holes. These Walls are about 12 Foot high, and 3 Foot thick. The Emperor *Solyman* in 1559. finish'd the Rampart, which was begun by his Father *Selim*, when he took it from the Sultans of *Ægypt* in 1517. Mount *Sion* is upon the same Level with the City, and is part of it inclosed, but the highest part lies without the City. The Circumference of the City is about a Lg. the Houses stand close, and it is pretty populous, but all the Streets are narrow and crooked.

The Inhabitants.

The Inhabitants are partly *Mahometans*, and partly Natives of the Country, and *Jews*, but the first are most numerous. The *Jews* often come to settle here in their old Age, that they may be buried in the Valley of *Jehoshaphat*, and so be ready to appear at the Universal judgment first, which they believe will be in that Vale.

The Temple of *Solomon*.

The Building, which they call, The Temple of *Solomon*, is now a Mosque, which they say is built upon the Foundation of the old Temple, and the Inside is of the same Form, but in a much narrower Compass. No *Jews* or *Christians* are permitted so much as to look into the Court before it.

A Description of the Monastery of S. *Saviour*, and the Way of the Monks living in it.

The Monastery of St. *Saviour*, which is obliged to take Care of Strangers, and if any commit an Error, is fined for them, is situated between the Gate of *Bethlehem* and that of *Damascus*. The Monks are usually between 30 and 40, and have a Guardian over them. He is generally an *Italian* or *Spaniard*, and has as great an Authority as a Bishop, wearing on great Festivals a Mitre and Crosier, as one. Next to him is the Father Sollicitor, whose Business it is to maintain Correspondence with all the States of Christendom, and write Letters to them, and receive Letters from them. He likewise is to manage their Money. He ought to be a *Spaniard* born. The next Person in Authority is the Father-Vicar, who ought to be a *French* Man, and the other Monks are part *Italians*, part *Spaniards*, some *French* and a few *Germans*. The Monks are absolutely under the Command of the Guardian, who disposeth them either in this Monastery, or others in any Part of the Holy Land, as he pleaseth. Their Way of Living is very frugal, and eat little Meat thro' the whole Year, by reason of the many Fasts they are obliged to keep. They have little Fish, by reason of their Distance from *Joppa*. All Travellers which come from *Europe*, of whatsoever Religion they be, take up their Quarters with these Monks, but more through Custom than Obligation, as the *Greeks* and *Armenians* usually do with theirs. They give a civil Reception to all they entertain, though, by reason of the *Turkish* Exactions from them, they are not very rich. The Charges of the Pilgrims who visit the Holy Land are these:

The Charges of Travellers in the H. Land.

Upon your Arrival at *Joppa*, the neareſt Port in the Holy Land, you pay the *Aga*, or Governour 14 Crowns, half of which he gives to the *Drogemans*, or Guides of the Monastery, to find you an Horse, and conduct you to *Jerusalem*.

When you come to *Jerusalem* you must pay 2 Crowns and half for going through the Gate, Half a Crown to the Officer, 2 Crowns and half to the chief *Drogeman* of the Monastery, and one Crown to the 2d *Drogeman*.

The first time you go into the Church of the Holy Sepulchre you must give 15 Crowns, and afterwards every time the Door is opened for you 2 Crowns and half, and 30 Sols to a *Turk* that lives hard by, and 15 Sols to the Porter.

For visiting the Holy Places, which are out of *Jerusalem*, with what is given to the *Drogeman*, will amount to about 3 Crowns. For visiting the Sepulchre of *David* the *Turks* will have 2 Crowns and half, and the Charges of going to *Bethlehem* with a *Drogeman* amounts to 4 Crowns, but if you will visit some extraordinary Places, it will cost you a great deal more, for there are no Prizes fixed.

For making the *Jerusalem* Mark on the Arm, there is commonly given to the Maker of it a Chequin of Gold, which is 2 Crowns and half, but the *Turks* will have more of such as they see fond of it.

At the Passover each Pilgrim, who is then at *Jerusalem*, is obliged to give 10 Crowns for going to *Jordan* to the *Basha*, who sends some of his Men for a Convoy to you, but at any other Time it will cost you 100 Crowns.

When

When you depart from *Jeruſalem*, you muſt make a Preſent to the Convent for your kind Entertainment; but this is left to your Generoſity. The *Engliſh* and *Dutch* Merchants give generally 50 Crowns a Man; but to any particular Monk, yea, to him that ſhews you all the Places, or to any with whom you have a particular Friendſhip, you muſt give nothing; and for this the Convent gives you a Certificate of your having viſited the Holy Places.

Rarities purchaſed in the H. Land.

The greateſt Rarities which the Pilgrims purchaſe about *Jeruſalem*, are Roſes and Shell'd Olives of *Jericho*. The Roſes are a curious Plant, and have this Thing peculiar to them, that when they are put into Water by Night or Day, they will blow a-freſh, but being taken out they cloſe again inſenſibly. Of the Olives the Skin is green, but when that is taken off, the Fruit is nothing but Wood, which being crack'd, has a Kernel within it, as big as that of a Pine-Apple, or Piſtacho. It is ſoft, and of a Cheſnut Colour, but has no Taſte.

The Burying Place of the Kings of *Jeruſalem*.

From *Jeruſalem* he travell'd to *Bethany*, and firſt view'd the Burying-places of the ancient Kings of *Jeruſalem*, which are juſt without the City. They are like a fair Palace for the Dead. You enter firſt into a large Court made in the Rock, which ſerves for a Wall to it, and on the Left-Hand there is a Gallery cut out of the Rock with ſeveral Pillars, well beautified with many Figures cut out in the Stone. Then you paſs through a Door into a fair Room, where there are ſeveral fair Tombs cut out of the Rock. Near this Rock is a Cave, where the Prophet *Jeremiah* is ſaid to have compoſed his Lamentations.

Bethany.

From theſe he paſſed on his Way to *Bethany*. In the Way he ſaw the Place where *Judas* hang'd himſelf, after he had betray'd his Maſter, and a little further that where *Jeſus Chriſt* curſed the Fig-Tree. Drawing near to *Bethany*, he ſaw the Houſe of *Simon the Leper*, where *Mary Magdalene* pour'd the Box of precious Ointment on our Saviour's Head. *Mark* 14. 3. At *Bethany*, which is not above 3 *Italian* Miles from *Jeruſalem*, he ſaw upon a little riſing Ground the Ruines of the Houſe or Caſtle of *Lazarus*, and at the Foot of the Hill his Sepulchre, where *Jeſus Chriſt* raiſed him to Life, after he had been dead 4 Days. 'Tis a little Grot, with a Table, whereon the Body of *Lazarus* was laid, and on which all the Prieſts that come to *Jeruſalem* are privileged to ſay Maſs. The Borough of *Bethany* conſiſts only of a few ſmall Houſes and Huts, inhabited by *Arabs*, who are Husband-Men. Some Olive-Trees grow about this Town that bear good Fruit, and a little out of it are the Foundations of the Houſe of *Mary* and *Martha*, the Siſters of *Lazarus*, and hard by the Well where *Martha* ſaid unto *Jeſus Chriſt*, *Lord, if thou hadſt been here my Brother had not died.*

Lazarus's Houſe and Sepulchre.

Jericho.

From *Bethany* he travell'd to *Jericho* all along the Mountains, through a very Stony Road. *Jericho* is about a Quarter of a Lg. from *Bethany*. It was formerly a famous City, but at preſent conſiſts only of 30 or 40 Brick-Houſes, inhabited by *Arabs*. Near to theſe Dwellings he ſaw the Houſe of *Zacheus*. In the Plains of *Jericho* grow the famous Roſes before-mention'd, as alſo in the Deſarts of Mount *Sinai*.

Jordan.

From hence he departed to the River *Jordan*, which is a River not above half as wide as the *Seine* at *Paris*, but is deep, very rapid, and the Water very thick, but the People ſay, 'twill not corrupt. It has its Sourſe from 2 Springs near Mount *Libanus*, called *Jor* and *Dan*, from whence it takes its Name, and running from E. to S. paſſeth through the Sea of *Tiberias*, and loſeth it ſelf in the naſty Lake *Aſphaltites*. It is full of Fiſh, and on both ſides beſet with thick and pleaſant Woods, which ſound with the wrabbling Notes of Thouſands of Nightingales. Here all perform their Devotions, and the *Armenians*, *Greeks* and *Cophti*, the Men naked, and the Women in their Smocks, waſh'd themſelves and their Linen in it, having ſome Water pour'd on their Heads in Memory of our Lord's Baptiſm, and when they go away they carry along with them Jars and Bottles of Water, and Sticks to keep as Relicts.

The Dead Sea.

The *Dead Sea*, into which *Jordan* empties it ſelf, is the Place where *Sodom* and *Gomorrha*, with the other Cities, which were deſtroyed by Fire from Heaven, ſtood. The Water is very clear, but very ſalt, and in ſome Places they find congeal'd Salt, as tranſparent as Chryſtal. They that go into it cannot ſink, tho' they neither move Hand nor Foot. There are no Fiſh in this Sea, by reaſon of the Saltneſs of it; for if any are carry'd into it by the Violence of *Jordan*, they die immediately. It is 100 Miles in Length, and 25 over. The Land within 3 Lgs. round is white, and mingled with Salt and Aſhes, that it is not capable of Tillage. 'Tis ſaid, that there are Apple-Trees growing on the ſide of this Sea which bear a fair Fruit, but within-they are full of Aſhes. There are many Camel-Loads of Bitumen got daily out of this Lake. About a Lg. from the Town of *Jericho* is the *Mount of Faſting*, where our Lord, after he came out of *Jordan*, paſſed 40 Days and 40 Nights in a Grot faſting, being all the time tempted of the Devil. It is ſmooth in ſome Places like Marble, and hard to aſcend. On the Top of it the Devil ſhew'd our Saviour all the Kingdoms of the World; and formerly a Monaſtery ſtood there. At a little Diſtance from the Hill is *Elias*'s Well, which being naturally bitter, *Eliſha* ſweetned it by caſting Salt into it.

The Apples of Sodom.

Eliſha's Well.

Having ſurvey'd theſe Things with much Patience, he return'd to *Jeruſalem*, where having tarry'd a few Days, he went to *Bethlehem*; and that he might ſee every Thing, he took the Way of the Wilderneſs. Next to *Jeruſalem* is *David's*, or rather *Solomon's* Fiſh-Pond, becauſe it was made by one of thoſe Kings for their Diverſion. It is 150 Paces long and 60 broad, but at preſent it has no Water. Juſt by it is the Place where *Solomon* was Crown'd, A little further in the Valley is the Monaſtery of the *Georgians*, which is painted all over after the *Greek* Faſhion. Near the high Altar is an Hole covered with Silver, in which hangs 10 Lamps always burning. The Natives ſay, that there ſtood the Cypreſs, of which the Croſs of *Jeſus* was made, and the *Greeks* have a Church dedicated to it, which is very neat, and not far from it. They have a little Croſs made of the ſame Wood. At a little Diſtance from the Road, upon a very high Hill, is the Place where the *Maccabees* lie buried, and the Ruines of their Houſe. *Simon* built their Monuments very magnificent, as you find 1 *Macch.* 13. 25, 26, *&c.* and there are ſtill 7 Arches remaining under which the Bodies were laid.

A *Georgian* Monaſtery.

The *Maccabees* Tombs.

The firſt Village you meet with is St. *John*'s, where that holy Man was born, and in the Place, which is ſaid to be the Cave of his Birth, was once a Church built, dedicated to him, and belonging to the *Franciſcans*. There is a little Dome belonging to it. The Village is inhabited by *Arabs*. The Country hereabouts is very Stony. Going on, you come to a Place, where the Virgin *Mary* went to viſit her Couſin *Elizabeth*. There are ſtill ſeen the Remains of a large Edifice, ſuppoſed to be the Ruines of a Church built here by *Helena*, the Mother of *Conſtantine*, in Memory of her.

Then having paſſed by a very fine Well, which falls from the Neighbouring Hills, he came to *Modin*, which is ſituated on a very high Hill. It was anciently a very conſiderable Place, but is now a ſmall Village, as are almoſt all the Places mention'd in Holy Writ. Then he came to the Wilderneſs of St. *John Baptiſt*, where they ſhew you a Cave whether *Elizabeth* carried her Son to protect him from the Fury of *Herod*, a Story not mentioned in Scripture. Above the Cave are the Remains of a large Building, ſuppoſed to be a Monaſtery. A little further is a Plain, where *David* ſlew *Goliath*, and near it at the Foot of a Mountain a Fountain, where *Philip* baptized the Eunuch to Queen *Candace*. The Monks ſay, this was the Valley of *Eſchol*, and 'twas near this Fountain the *Iſraelitiſh* Spies cut the wonderful Cluſter of Grapes, which they carried between 2 of them. After this you paſs by the Place where, 'tis ſaid, the 50 Pillars, which are to be ſeen in the Church at *Bethlehem*, were cut out of the Rock with Hammer and Chizzel. Next you arrive at a Borough called *Bertieta*, near which is the Plain of *Sennacharib*, ſo called, becauſe his Army was there deſtroy'd by an Angel in one Night, as *Iſaias* relates, *Chap.* 37. 36. and then you arrive at *Bethlehem*.

Modin.

The Valley of *Eſchol.*

Bethlehem deſcribed.

This Place is famous in Scripture for *David*'s and our Saviour's Births there. 'Tis at preſent a pretty big Village, and the Inhabitants get their Livelihood by making Chaplets and Croſſes, *&c.* There is a fair Convent in it, inhabited by *Latin* Friars. It has 2 large Courts, and in the ſecond are 3 Ciſterns, and a Place vaulted over, whoſe Arch is ſupported by 6 Pillars of Garnet, where St. *Jerom* read and taught the Holy Scriptures; but the *Turks* have made it a Stable. On the Left-hand of a 3d ſmall Court, which

A Convent.

has a small Door 3 Foot high, and 2 Foot wide, you go to the Cloister, where are the Lodgings of the Monks. It has also a very strong Door for the same Reason as the former, *viz.* To keep out the *Arabs*. In the same Court is the Church dedicated to St. *Catherine*, which is in the Possession of the *Greeks*. Here are to be seen the 50 Pillars above-mention'd. Under this Pillar they shew the Place where *Jesus* was born, and where the Virgin *Mary* laid him in the Manger, and where the Wise Men (which, they say, were 3 Kings) worshipped him, while the Virgin *Mary* sat upon a Stone that lies hard by. The Cave is cut out of the solid Rock, and is large enough to walk handsomely in. There is also to be seen St. *Joseph*'s Altar, and the Sepulchre of the Innocents, who lie there buried with their Mothers, who were slain with them, in hiding themselves with them. Here is also the Oratory of St. *Jerom*, where he translated the Bible out of *Greek* into *Latin*, and by it a Chappel, wherein stands his Tomb and 2 Altars, the one on his Tomb, and the other on that of St. *Paula* and her Daughter *Eustochium*. St. *Jerom* made the Epitaph on *Paula*'s Tomb in these Terms:

The Church.

St. *Jerom*'s Epitaph on *Paula* and *Eustochium*.

Obiit hic Paula *ex nobilissimis Romanorum Corneliis & Gracchis orta, cum Viginti annos vixisset in Cœnobiis a se institutis, cui tale Epitaphium posuit Hieronymus*

Scipio quem genuit, Paulæ *fudere Parentes*
Gracchorum Soboles, Agamemnonis inclita Proles.
Hoc jacet in tumulo, Paulam dixere priores.
Eustochii Genetrix, Romani prima Senatus.
Pauperiem Christi, & Bethleemiti rura secuta.

The Great Church, which was built by St. *Helena*, is a beautiful and spacious Building. It is in the Possession of the *Greeks*; but they wronged the *Latins* of it, by giving the *Turks* Money. It has an high Roof of Cedar-Wood extraordinary well wrought and Leaded over, with many fair Windows, that make it very light. The Body is supported on both sides with 2 Rows of high and great Marble-Pillars, on every one of which is the Picture of a Saint, and over them all the Wall is painted with lovely *Mosaick* Work of Green upon a Ground of fine Gold. Formerly the Inside was lined with beautiful Marble, but the *Turks* have taken it away to adorn their Mosques. The *Greeks* have a very fine Font in it. The Quire is very large, and inclosed by a Wall. The *Armenians* have almost a 3d part of the Church, which they separate from the rest by Rails. At the farthest End of the Quire almost stands the high Altar, and on each side of it 2 Chappels, which make a kind of Cross. On the Right side of the Altar is a Pair of Stairs, which lead up to a Tower, which was once the Steeple to the Church, but now is the Lodgings of the *Greeks*. There are several Pillars in the Quire, which make up those in the Body 50. Under the great Altar of this Church also there is a little Church, or Chappel, where the *Greeks* pretend that our Saviour was born, and there are 2 Figures of a Woman on her Knees, and a little Boy lying by her, which is said to be the Virgin *Mary* and her Son *Jesus*. In this Chappel are always about 30 Lamps burning. In a Chappel 3 Steps lower is the Place where, they say, the Manger stood, where our Lord was laid, but the Manger it self is at *Rome* in the Church of *Santa Maria Majora*. But whether these be the real Places may be a Dispute with such as have their Minds clear'd from the Fumes of Superstition and Covetousness, which are very predominant in such as shew and view these Curiosities. But what is most certain, is the Marks which all the Christian Pilgrims have made upon their Arms by the *Latins* at *Bethlehem*. They have several Marks made in Wooden Molds, of which the Persons who desire them make Choice of such an one, as he pleases. Then they fill it with Coal-Dust, and applying it to the Arm, leave the Mark of it there. Then stretching out the Skin, they prick it exactly in the Lines with 2 Needles fasten'd in the End of a Cane, which they dip as they are doing it in Ink mingled with Ox-Gall. This they repeat 2 or 3 times before 'tis finished, which makes it very painful, and all the Arm will swell 3 times as big as ordinary, and cause a slight Fever; but all is over in 3 or 4 Days, and when the Crust is off, the Mark appears as lively, as if it were painted, and will continue fresh as long as a Man lives. Such as have these Marks upon their Breasts, as some will, undergo much greater Pain, and run a greater Hazard.

The Great Church de-scribed.

Little Church un-der it.

The Jerusalem Marks and the Way of making them.

When he had taken a View of *Bethlehem*, he went to the Holy Places which are about it, *viz.* *Boticilla*, a Town where none but *Greeks* do or can live; for, they say, if a *Turk* offer to live in it, they die within 8 Days. 2. The Church of St. *George*, which is a *Lg.* distant from it, where there is a great Iron-Ring fasten'd to a Chain, thro' which the People, both *Moors* and *Christians*, pass, when they are troubled with any Infirmity, and (as they say) they are immediately cured. 3. The Seal'd Fountain, made by *Solomon*, as is supposed, and mentioned in Holy Scripture, *Cant.* 4. 12. It is in an Hole under Ground, thro' which you must be let down with a lighted Candle, where you find 3 Reservatories of Water very large and deep. They are filled with a Spring, which comes cross the Rocks from the adjoining Mountains. From this Fountain the Water is convey'd by a Aqueduct to *Jerusalem*, but the *Arabs* have broken it down to get the Water. 4. Near to this Place is a pretty Castle, built about 50 Years since for taking the *Caffares*, or Customary Tribute of the Caravans of *Hebron*. A little further are the 3 Fish-Ponds of *Solomon*, which are cut out of the Rock, and lie one a little lower than the other to receive the Current, which proceeds from the highest. *Solomon*'s Concubines lived near them, and in the Valley not far from them is the Garden of *Solomon*, called *Hortus Conclusus*, because 'tis shut in on both sides with 2 high Hills, that serve it for a Wall. 5. The Mountain *Engedi*, where *David* cut off *Saul*'s Skirt, and about half a Lg. from it is a Castle upon an high Hill, called *Bethulia*, which the *Franks* maintain'd 40 Years after they had lost the City of *Jerusalem*. 6. The Well, where the Virgin desiring to drink, when she fled from the Persecution of *Herod*, and the People of the Country refusing to draw Water for her, it swell'd of it self up to the Mouth. 7. The Place where the Shepherds watched over their Flocks, when the Angels brought them the glad Tidings of *Christ*'s Birth. There are the Ruines of an old Church, built by St. *Helen* in that Place. All the Inhabitants thereabouts are Shepherds to this Day, because it is a fertile Country.

Boticilla. St. George's Church. The seal'd Fountain. A Castle. Solomon's Fish-Ponds. Engedi. Bethulia. The Virgin's Well.

Returning to *Jerusalem* a different Way from that he came, he saw *David*'s Well, of which *David* desir'd to drink, but when certain of his Men had fetch'd Water for him with Hazard of their Lives, he would not drink of it. It is a large Well, and hath 3 Mouths. It is now at some Distance from the Town; but 'tis said in Scripture to be at the Gate, which shews, that it was of much greater Extent than now it is. About a Quarter of a Lg. further is *Rachel*'s Sepulchre, mentioned *Gen.* 35. 19, 20. 'Tis cut out of a Rock cover'd with a Dome, supported with 4 square Pillars. Northward of this Tomb is a Piece of Ground, called, *The Pease-Field*, because there are little Stones like Pease, which, they say, were made upon this Occasion: The Virgin *Mary* going one Day from *Bethlehem* to *Jerusalem*, saw an Husbandman sowing, and she asking him what he sow'd, he reply'd, Stones; which rustick Reply, by God's Judgment, cost him dear, for the Pease which he was sowing produced nothing but Stones, and ever since the Field has yielded nothing else.

David's Well. Rachel's Sepulchre. The Pease-Field.

The next Thing remarkable is *Jacob*'s Tower, said to be built by him, when he return'd out of *Mesopotamia*, where he dwelt 23 Years, because the Plains were convenient for his Flocks. Here *Rachel* died. There are nothing now remaining of it but the Ruins. Round about this Tower are the Foundations of some ancient Houses, which, the Natives say, are the Ruins of the City *Rama*.

Jacob's Tower.

About half way between *Bethlehem* and *Jerusalem* the *Greeks* have a Monastery, dedicated to the Prophet *Elijah*, whom they pretend to have been born there, and they shew you a Stone with the Print of a Man's Body on it, which, they say, is the Form of the Prophet's Body, who lay on it when he fled from *Jezebel*. From hence there is a neat Prospect both toward *Jerusalem* and *Bethlehem*. Near this Monastery is the Place where, they pretend, the Prophet *Habakkak* was, when the Angel took him up, and carried him with Provision to *Daniel* in the Lions Den at *Babylon*. There are some Remains of an House here, and the *Latins* say, they are Parts of that Prophet's House. A little further on the Road is a Well, where they say, that the 3 Wise Men of the East rested themselves when

The Greek Monastery of Elijah. Habakkuk.

when they return'd from *Herod*, and the Star appear'd to them afresh. They shew also hard by, the Place where anciently stood the Turpentine-Tree, which, they say, stoop'd to the Virgin *Mary*, when going to *Jerusalem* to present her Son in the Temple, she sat down under it. A Quarter of a Lg. further is the House of *Simeon the Just*, who held our Saviour in his Arms when he was presented in the Temple. Part of it is still standing. Going on you come to a Village, called, *The Village of the Evil Council*, because there *Caiaphas* is said to have given that ill Advice, That 'twas expedient that *Christ* should be put to Death. Drawing near to *Jerusalem* is a Pond, said to be the Bath of *Bathsheba*. It is of the same Form as *Solomon*'s Fish-Pond. It was 308 Foot long, 244 broad, and the Depth is 88 Paces. It is at the Foot Mount *Sion*, where *David*'s House formerly stood, so that he might easily from it see *Bathsheba* washing her self. Just by this Bath is the Valley of Giants, who lived to the Time of *David*.

The House of Simeon the Just.

The Valley of Giants.

Being at *Jerusalem*, he at Leisure saw several other remarkable Things in and about the City, *viz.* The Grot where the 8 Apostles hid themselves, when our Saviour was taken, where are some Pictures of those Apostles still to be seen; then the Place where the *Greek* Strangers are interr'd, and the Place where the *Jews* hid the Fire of the Altar by *Jeremy*'s special Order, when they were carried Captives to *Babylon* by *Nebuchadnezzar*. When *Nehemiah* return'd from Captivity with his Brethren he sought for it, but could find nothing but an unctious Clay, which laying upon the Altar, it took Fire and was consumed. Close by this Pit there is a Mosque, with a Reservatory of Water.

The Pool of Siloam.

Then he went to the Pool of *Siloam*, whither our Lord sent the blind Man to wash, after he had anointed his Eyes with Clay and Spittle, which restor'd his Sight to him. Then he came to the Place where the Prophet *Isaiah* was sawn alive in two by the Middle with a Wooden-Saw, by the Command of King *Manasses*; and after that the Virgin's Fountain; where, 'tis said, she wash'd our Saviour's Clouts. You go down to it by 30 Steps, and they say, that such as are sick of Fevers by bathing in it and drinking the Waters are perfectly cured. It comes from the Pool of *Siloah*. Not far from thence is the Mount of *Scandal*, where the Concubines of *Solomon* made him commit Idolatry in Sacrificing to the Idols of *Moloch* and *Chemosh*. Another time he went to *Bethphage*, where he saw the Place where the Ass stood when our Saviour sent for him to ride into *Jerusalem* on *Palm-Sunday*; as also the Grot where St. *Peter* wept bitterly for his Sins in denying his Lord, after the Cock crow'd, together with the Place where the *Jews* endeavoured to take away the Body of the Virgin from the Apostles, as they were going to bury her, but were immediately punished for it.

The Mount of Scandal.

Mount Sion.

Then he went to Mount *Sion*, about 5 or 600 Paces distant from the City, where he eat his last Supper with his Disciples, wash'd their Feet, and instituted the Holy Sacrament, appear'd to his Disciples 8 Days after his Resurrection the Doors being shut, and said, *Peace be unto you*, and the Holy Ghost descended on the Virgin and 12 Apostles at *Pentecost*. In this Place are the Sepulchres of *David* and *Solomon*. About 100 Years since this Mountain was within the Town, and possess'd by the *Latin* Monks of the Order of St. *Francis*; but since Sultan *Solyman* rebuilt the Walls of it, 'tis excluded the Town, and the Monks dispossessed of it. The *Turks* have built a Mosque upon it, into which no *Christians* are suffer'd to enter, close by which is shewn the Place where the Virgin *Mary* died, and on the Left-Hand toward the City the Place where St. *John* said Mass. About 150 Paces from the Mount toward the City is a Church, held by the *Armenians*, which is built in the Place where *Caiaphas*'s House stood, and upon the Altar lies the Stone, which shut the Door of our Saviour's Monument, which is 7 Foot long, 3 Foot broad, and as many thick, and on the Right-Hand is the Prison where *Caiaphas* put our Lord, while he consulted with the Priests and Elders what to do with him. As you go out of the Church, on the Left-Hand in a low Court there is an Orange-Tree, which stands in the Place where *Peter* warm'd himself when he denied his Lord and Master thrice, and 7 or 8 Steps from it a Pillar, where the Cock roosted when he crow'd.

Caiaphas's House.

The House of Annas.

Going into the City by the Gate of *Sion*, you come to the House of *Annas* the High Priest, which is now an *Armenian* Church, who have another dedicated to St. *James the Less*, built by St. *Helena*, in the Place where he was beheaded by *Herod Agrippa*. All the Light which this Church has is let in by a Dome on the Top, which has only a Grate of Iron to keep Things out. Over-against this Church is the House of St. *Thomas* the Apostle. No *Turk* dare enter into it, because (they say) that all that go into it die there. Then he went into the House of St. *Mark*, where the Apostles and Disciples met together to pray St. *Peter* out of Prison. The *Syrians* have a Church there, built by St. *Helena*. Then he was led to the House of *Zebedee*, the Father of *James* and *John* the Evangelist, which was the Place of their Nativity, and is now made a Church by the *Greeks*. From hence he went to see 2 Churches of the *Abyssins*, and then a Chappel with a Dome to it, under which *Mary* the *Egyptian* did Penance, when she could not get into the Holy Sepulchre. This Chappel is the Place where the Holy Virgin and *John* the Evangelist were when our Lord was crucified. Then he went through the Ruins of a great Pile of Building, where heretofore the Knights of St. *John* of *Jerusalem* lived, and having view'd the Prison where *Herod* had put St. *Peter*, when the Angel delivered him, he return'd to the Convent.

St. Mark's House.

The House of Zebedee.

Having staid a few Days with the Monks, he resolved to leave *Jerusalem*, and so giving them not only Thanks, but a Reward for their many Civilities and Entertainment, he departed with their Blessings toward *Emmaus*. He went thro' the Gate of *Bethlehem*, and in the Way was shewn the Place where our Lord met the 2 Disciples going to *Emaus*, which, they say, were *Cleophas* and St. *Luke*, as also a Well, where they drank together, and coming to the Castle of *Emaus*, the Place where they knew our Saviour by breaking of Bread; but the Castle is little else but Ruines. Here he and his Company hired Horses and a *Drogeman* for 14 Piastres apiece to conduct him to *Jaffa*, and from thence by Water to pass to *Acre*, and so to *Nazareth*. The Road is bad to *Rama* a good Way, but then good. It is 8 Lgs. from *Jerusalem*.

Emmaus.

After a short Stay here he departed to *Jaffa*, which is but 4 Lgs. further. *Jaffa*, anciently call'd *Joppa*, was of old a considerable City, but hath nothing of its former Splendor now remaining. It is built upon the Top of a Rock by the Sea-shore, and the Port, which with some old Towers is all that is remarkable in it, is at the Bottom of the Hill, though there are great Remains of Buildings. The House where all Pilgrims lodge is on the Sea-shore, and in the Possession of the Monks, who make Advantage of them, by letting them have Horses, a *Drogeman* and a Passport to *Jerusalem*, and no Man must stir without these. The Tax is 14 Crowns a Man. The House is said to be that which of old was the Dwelling of *Simon* the Tanner, where St. *Peter* lodged when he raised *Tabitha* from the Dead, and from whence *Cornelius* fetched him to preach the Gospel to himself and Friends. It was here that *Jonas* took Ship to flie from the Presence of the Lord, when he commanded to go and preach Repentance to the *Ninivites*. This Place is also noted among the Heathens for the fabulous Story of *Andromeda*, who was hereabouts tied to a Rock to be devoured by the Sea-Monsters, but *Perseus* falling in Love for her Beauty, delivered her, by killing the Monster. Into this Port came the Cedars which *Solomon* caused to be cut in Mount *Libanus* to build the Temple of *Jerusalem*. It was also in the same Place that *Mary Magdalene* and her Sister *Martha*, with their Brother *Lazarus*, were by the *Jews* put on board an old shatter'd Vessel without Rudder, Sails, or Oars, and left to the Mercy of the Seas and Winds. The Town is but thinly inhabited, and the Port serves only for small Vessels, because it is so shallow.

Jaffa, or Joppa.

Simon the Tanner's House.

Acts 9. 11.

The Story of Andromeda.

From *Jaffa*, after some Days, he took Ship for *Acre*. By the Way he had a Sight of *Antipatris*, *Cesarea*, *Tortosa*, called by the *Franks*, *Castel Pelegrino*, and Mount *Carmel*, which runs out a great way into the Sea. Here he was taken by a *Corsair* of *Malta*, and being stripp'd of every thing valuable, was set ashore in a very bad Equipage at *Acre*. On the side of Mount *Carmel* near the Sea is seated a famous Monastery, inhabited by the *Carmelite* Monks. There are but 3 Monks belonging to it, it is so small. They observe a very severe Rule; for besides that they are removed from all Worldly Conversation, they go bare-footed, and may neither eat Flesh nor drink Wine, and if they need either, must go to some other Place.

Mount Carmel described.

The Monastery of Mount Carmel described.

Place. Nor will they ſuffer Pilgrims to eat Fleſh in their Convents, but allow them to drink Wine. They are poor, and could not ſubſiſt, did not the *French* Merchants of *Acre* give them ſome conſiderable Alms. The Chriſtians had a better Convent upon the Top of it, before they loſt the *Holy Land*, but being driven out of it, are forced to content themſelves with this. Here they ſhew a Grot, where the Prophet *Eliſha* dwelt, and 2 Fountains, which, they ſay, he made to ſpring out of the Earth, both very good Water. Not far from them are ſtately Ruines of a Monaſtery of St. *Bernard*, who was ſent by St. *Albert*, Patriarch of *Jeruſalem*, to gather together the *Hermites*, who lived diſtinctly in the Mountain, and bring them under ſome Rule. A little lower alſo they ſhew a Grot, where the Prophet *Elias* lived and inſtructed the Faithful. It is fine cut out of the Rock, and the *Turks* have a ſmall Moſque near it. On the Mountains are found petrified Melons and other Fruits, as Olives, Grapes, *&c.* yea, and Oiſters. The Fruits retain the ſame Shapes, both within and without, as the true ones. This Mountain, and all the Country about it, are commanded by a Prince, named the *Emir-Tharabec*, who pays yearly to the G. Seignior a Tribute of 12 Horſes.

Acre. *Acre* is a Town of *Paleſtine*, lying on the Sea, anciently called *Acco*, and after *Ptolemais*. It was long held by the Knights of *Malta*, and has been a very large and ſtrong Place, as appears by the Ruines, but at preſent 'tis almoſt wholly ruin'd, and the Harbour of it, though very great, is near filled with Rubbiſh, becauſe the Sea has ſwallowed up a great part of the Town. It depends on the *Baſha* of *Sephet*. Hiſtory mentions, that heretofore there were as many Churches in this Town, as there are Days in the Year, and at preſent there appear the Ruines of about 30. There are ſtately Remains of one, which they ſay belonged to the Knights of *Malta*, who had a Treaſure there marked with a Piece of Marble, which they fetched away not many Years ſince in a Ship that came purpoſely for it, though under a Pretence of buying Goods. The Palace of the Great Maſter is to be ſeen there ſtill, but very ruinous; but the Back-Gate towards the Sea, by which the Knights abandon'd the Town, and went a Shipboard, when they could no longer defend it, is ſtanding ſtill. There is alſo ſtill remaining a fair Stair-Caſe, and ſome Buildings made by the *Emir Far-Eddin*, with ſeveral other very lovely Ruines. There is alſo a ſquare Tower in *Acre*, which ſerves for a Caſtle, with an Houſe cloſe by it, which the *Baſha* uſeth for his *Seraglio*, when he is in the Town, which is not often, becauſe 'tis but little inhabited, having not above 50 Huts, rather than Houſes. The *Europeans*, which are moſt *French*, live in an *Han*, which is a large round Building of 2 Stories, divided into ſeveral Apartments, whereof the lower Story ſerves for Magazines, or Ware-Houſes to lay their Merchandizes in, and the upper is for Lodgings.

The Knights of *Malta*.

Many Churches.

The Palace of the Knights of *Malta*.

A Tower.

Han.

From *Acre* he departed to *Nazareth*. In the Way he paſſed through ſuch rich Grounds, that the Graſs was up to the Horſe's Belly, being little travelled, becauſe of the *Arabs*, who infeſt the Ways. *Nazareth* is an ancient Town, ſtanding upon a little Height at the End of a large Plain, called *Eſdraelon*. St. *Matthew* and *Luke* call it a City, and doubtleſs then it was a large and ſtrong Place, but now 'tis a mean Village, conſiſting only of ſome Peaſants Houſes. The Inhabitants are moſt of them *Arabians* and *Turks*, but among them are a few *Greeks* and *Maronites*. According to the ancient Deſcription of it, it was a very fertile and pleaſant Country, which by reaſon of the Temperature of its Air, produced many Herbs and Flowers, but at preſent there is none of them to be found about it. The *Jews* have a Synagogue here, and the Monks of the *Holy Land* have a Monaſtery almoſt new built, being given by *Emir Farr-Edden*, and commodious enough for the Number, which is not above 20. Within the Compaſs of the Monaſtery is the Cave of the Annunciation, where the Angel told *Mary* of the Incarnation of our Lord, by her Conception, and over it is built a ſmall Church. There are 2 lovely Pillars of grayiſh Stone in it, which is believed St. *Helena* placed there, one where the Angel ſtood when he delivered, the other where the Virgin ſtood when ſhe received the Meſſage. One of them has 2 Foot broke off from the Bottom, ſo that it remains hanging to the Roof by its Chapiter. The

Nazareth deſcribed.

The Inhabitants.

A Synagogue of the *Jews*.

Cave is 15 Foot long, and 6 broad, and is well adorn'd and lined with carved Work, and by it is a Place, which, they tell you, was the Virgin's Chamber. The Place where St. *Joſeph* dwelt is ſhewn, and his Shop is cut out of the Rock. There are alſo many Holy Places, as they are accounted, about *Nazareth*, which the Pilgrims viſit with a blind Devotion, *viz.* a great Hill, called the *Precipice*, 3 Quarters of a Lg. diſtant from *Nazareth*. It is very rough and craggy, and is ſaid to be the Place from whence the *Jews* would have thrown down our Saviour headlong, *Luke* 4. 21. but he making himſelf inviſible, made his Eſcape from them; but the Monks ſay, he retreated into the Cave within it. From the Top of this Hill you have a fine Proſpect over the Plain of *Eſdraelon*, which is judged to be 6 Lgs. long, and 4 broad, and on the one ſide of it lies *Nain*, where lived the Widow, whoſe Son our Lord raiſed from the Dead, and which lies at the Foot of the Hill *Hermon*, mentioned in the *Pſalms*. On the other ſide of the Plain lies the Borough of *Endor*, where *Jael*, the Wife of *Heber*, who killed *Siſera*, lived, and near which runs the River *Kiſon*, in the Valley. Betwixt the Precipice and *Nazareth* there are ſome Ruines of a Nunnery, where was a Church dedicated to our Lady of Fear, becauſe they tell you, that there the Virgin, fearing the *Jews* would precipitate her Son, fell down, and left the Impreſſion of her Knees, which is indeed well marked, in the Rock. The Monks ſay, they ſaw'd off the Piece of Rock in which it is, but they were not able to carry it away. Upon a little Hill 600 Paces diſtant from it, they ſhew a great Stone, called our Lord's Table, becauſe, as Tradition goes among them, our Lord and his Diſciples often eat upon it. Cloſe by it is a Fountain, called St. *Peter's* Well, becauſe our Lord returning back to the Town with his Apoſtles, and St. *Peter* being a-dry, our Saviour made that Well to ſpring out of the Ground.

Joſeph's Houſe and Shop.

Nain.

Hermon.

Our Lord's Table.

Having viſited the Places near the Town, he gratified his Curioſity in ſeeing the Country a-round, and obſerved many Things worthy of Notice, *viz.* The Fountain where 'tis ſaid the Virgin *Mary* uſed to draw Water, which has ſome Steps down to it. 2. *Jonas*'s Tomb, whoſe Foot alſo is found 4 times upon the Rock. Above the Cave wherein he lies the *Turks* have built a Moſque, and have ſo great a Veneration for it, becauſe 'tis in the Place of that Prophet's Repoſe, that they will not ſuffer a Chriſtian to come nigh it.

Jonas's Tomb.

Paſſing over the Plains of *Galilee*, he came to *Cana*, which by the Ruines ſeems to have been a large Place, but now has only a few ſmall Houſes. On the Hill there is Church, where, they ſay, the Wedding was kept, at which our Lord turned the Water into Wine, and there is a Fountain juſt by from which the Servants filled it. St. *Helena* built the Church, and a little Convent to it; but the *Moors* have now got them for a Moſque.

Having ſeen theſe Things he travelled a pretty while in the Plain of the *Ears of Corn*, becauſe 'tis ſaid, that there our Lord's Diſciples on the Sabbath-Day pluck'd the Ears of Corn, when they were an hungry, and rubb'd them in their Hands. There is a Turpentine-Tree ſtanding in the very Place. The Plain is 2 Lgs. long, and pretty wide, and has ſome Villages in it.

Coming to a riſing Ground, he ſaw *Bethulia*, at the Siege of which *Judeth* cut off *Holofernes*'s Head, *Judeth* 13. 9. and the Top of Mount *Libanus* all white with Snow. Then he came to the Plain of *Nepthali*, in the midſt of which is the Mount of the *Beatitudes*, ſo called, becauſe our Saviour delivered from that his Sermon, which begins with the 8 Beatitudes. From the Top of this Mountain there is a moſt pleaſant Proſpect of the Sea of *Galilee*, beyond which appears the Hills of *Arabia Deſerta*, and *Jordan* emptying it ſelf into the Sea lies on the Left-Hand. About half a Lg. further is the Place where our Lord fed 5000 Men with 5 Loaves and 2 Fiſhes, *Matt.* 14. 19. and yet 12 Baskets of Fragments remained. There is a Stone on which, they ſay, our Lord bleſſed the Bread and Fiſhes.

Cana.

Bethulia.

From hence paſſing through the Borough *Maven*, he came to *Tiberias*, which being repaired by *Herod*, was called ſo in Honour to *Tiberius*. It ſtands in a very pleaſant Soil, near the Sea of *Galilee*, and has been a large Town, as the Ruines ſhew, which are above a Lg. in Compaſs; but now 'tis but ſmall, and

Tiberias.

the

the Houſes are mean. It has 2 Gates, but one of them is always ſhut. The Remains of Antiquity are St. *Peter*'s Church, which ſtands ſtill entire, being built, as they ſay, by the Empreſs *Helena* in the very Place where Chriſt ſaid to St. *Peter*, *Tu es Petrus & ſuper hanc Petram ædificabo Eccleſiam meam.* It is ſmall, being 25 Paces long, and 15 broad. There are alſo the Ruines of a great Building, which has been a Caſtle, and ſeems to have been a ſtrong Place. The Walls of it having been ruined, a *Jewiſh* Widow repaired them, that the *Jews* might live quietly in it, but about 30 Years ſince the Extortion and Tyranny of the *Turks* forced them to abandon it, ſo that there is not a *Jew* found there. Within the Precincts of the Town, among the Ruines, grow abundance of Palm-Trees, as alſo between the Walls and Sea-ſide.

Le Bruyn ſays, 21 Foot long, and 9 broad.

The Sea of *Galilee*, called alſo the Sea of *Gennezareth* and *Tiberias*, lies near the Town. The Water is ſweet, and very good to drink, and has plenty of Fiſh in it. Formerly there were many Chriſtian Fiſhermen, who got their Living by it; but the Tyranny of the *Turks* has obliged them to leave it. It is about 12 Miles long, and 5 over. It was on this Sea that *Peter* and *Andrew*, *James* and *John* were fiſhing when Chriſt called them to make them Fiſhers of Men; that Chriſt walked on the Water, when *Peter* asked Leave to come to Him, and for fear of ſinking, cry'd out, *Lord, ſave me.*

The Sea of *Galilee.*

From *Tiberias* he went to a Village called *Sabbato*, and ſo to the Caſtle of *Eunegiar*, where there is an Han for Travellers and Merchants, and here they ſay, *Joſeph* was ſold by his Brethren to the *Iſmaelite* Merchants. They ſhew you the Pit or Well where he was put ſtill. The Caſtle is commanded by a *Sous-Baſha*, and all Travellers muſt pay him a Coffair of a Piaſtre, half for himſelf, and half for the *Arabs*. Then paſſing the Valley of *Iſralon*, over the Brook *Sihon*, he came to the Mount *Tabor*, which is about 12 Miles from the Sea of *Galilee*, called by the *Arabs Gebeltour*. It is very high, cragged and ſteep, almoſt like a Sugar-Loaf, yet ſo eaſie of Aſcent, that one may go up on Horſe-back. On the Top of it is a Grot, which ſeems to be part of an old ruined Building. It is caſed with great Stones, and has ſeveral ſmall Arches, and in the Bottom of it is an Heap of Stones, which ſerves inſtead of an Altar. It is believed, that our Lord was transfigured there, and that the Chapel was erected in Memory of it, and that with wonderful Labour, becauſe the Stones could not be dug out of the Mountain, which is not ſtony; but covered with Wood. The Arches are ſuppoſed to ſtand in the Places where our Lord, *Moſes* and *Elias* ſtood.

Joſeph ſold.

Mount *Tabor.*

Chriſt's Tranſiguration.

At his Return into *Nazareth* he ſaw the Synagogue where our Saviour taught the *Jews* when they went to precipitate him. One may travel from *Jeruſalem* by Land to *Nazareth*, and ſee many Curioſities; but becauſe the *Arabs* exact ſo unreaſonable *Coffairs*, or Taxes, few do; yet ſome that do not value the Charge may deſire to know it, and ſo he ſets it down.

From *Jeruſalem* the Way lies to *Elbir*, a curious Village ſtanding on a riſing Ground, but thinly inhabited. There has been a fair Church, but 'tis now much decay'd. The Walls are yet ſtanding, and are made of great Flints. Here, they ſay, *Mary* having long ſought for her Son among her Kindred in vain, reſolved to return again to *Jeruſalem*, when ſhe found him among the Doctors, hearing them and asking them Queſtions, which he did to their Admiration.

Elbir.

Then you go to *Naplouſe*, or *Sichem*, over Hills and Dales, but very fruitful, and in many Places bearing Olive-Trees. This Town ſtands partly on the ſide and partly on the Bottom of an Hill. The Soil is very fertile, and abounds with Olives. *Jacob* and his Family moſt frequently lived near it. The Gardens are full of Orange and Citron-Trees, water'd by a River and ſundry Brooks. About half a Mile from the Town is the Well where the *Samaritan* Woman met our Saviour, as the Chriſtians thereabout ſay. 'Tis covered with large Stones, leſt the *Turks* ſhould fill it up. 'Tis 16 Fathom deep; and by it is the Portion of Land which *Jacob* gave to his Son *Joſeph*. It is a very pleaſant Place, and his Sepulchre is in it. Mount *Gerizim* is on the Right Hand as you go to the Well. There is a Chapel at the Foot of the Mountain, where the *Samaritans* worſhipped. On the S. ſide of the Town is another Hill, called *Elmaida*, where they ſhew a Stone on which are the Marks of *Chriſt*'s Hands and Feet, and they ſay it had formerly the Mark of his whole Body. From hence you have a full Proſpect of the Town. To the W. ſtands a Moſque, which was formerly a Church, and is built in the Place where *Jacob*'s Houſe ſtood. On the other ſide there is a ruinated Church, dedicated to St. *John the Baptiſt*. In this Town Travellers pay a Coffair.

Naplouſe, or *Sichem.*

Mount *Gerizim.*

About half a Lg. out of the Road ſtands the Town of *Sebaſte*, upon a fair Hill. The Walls are ruined, and ſo is the Church; but the Marble Pillars, fine Altar and *Moſaick* Paintings ſhew that it has been a ſtately Building. It is divided between the *Mahometans* and *Chriſtians*. The *Mahometans* Part is paved with Marble, and has a Chapel under it, where lie buried *Eliſha* and *Abdias*, and *John the Baptiſt* in the midſt of them. The 3 Tombs are incloſed with a Wall, and are ſeen only thro' ſome Holes by Lamp-lights. The People ſay, *John the Baptiſt* was beheaded in the ſame Place; but others ſay, 'twas at *Macherus*, a Caſtle of *Herod*'s.

Sebaſte, or *Samaria.*

Eliae, Abdias and St. *John the Baptiſt*'s Tombs.

From *Sebaſte*, which was anciently called *Samaria*, he went to *Genny*, the Place where our Saviour heal'd the 10 Leapers. There is a Moſque there, which was a Chriſtian Church, a large Han to lodge in, which ſerves alſo for a Fort, and a *Bazar* for Proviſions. The Soil hereabouts is good, and produceth plenty of Palm-Trees and Fig-Trees. Here is a large Caffair to be paid.

Next Day he entred into a large Plain, called *Eſdrellon*, *Eſdrellon*, which is about 4 Lgs. in Length. In the middle of this Plain is the Brook *Kiſon*, where *Jabin*, King of *Canaan*, and *Siſera*, his Lieutenant, were ſlain by *Deborah* and *Barak*, and ſo you come to *Nazareth*.

Eſdrellon, a Plain.

From *Nazareth*, if you have a mind to ſee *Damaſcus*, the Way lies thus: You come firſt to a Caſtle called *Aain Ettudgiar*, where you may lie. It is about 3 Lgs. from *Nazareth*. Then you go to *Menia*, a Town upon the ſide of the Sea of *Tiberias*; and as you paſs on, you may ſee at a Diſtance *Sephet*, the Town where Queen *Eſther* was born, becauſe it ſtands on an Hill, and croſs *Jacob*'s Bridge, where that Patriarch met his Brother *Eſau*, as he was returning with his Family and Cattle from *Laban* his Father-in-Law. This Bridge has 3 Arches, thro' which the *Jordan* runs. When you have paſſed this Bridge you are out of *Galilee*, and pay a great Coffair. Then you come to *Conceitra*, a little Village where there is a large Han, which has 3 Culverines like a Fort, a *Bazar* and Coffee-Houſe, and here alſo you muſt pay a Coffair. The Way here is bad to *Saxa*, where is a pretty Han, having a Moſque in the middle, and a Fountain by the ſide of it. Near it is a Caſtle, by which runs a River, which divides it ſelf into 34 Branches, and over it 3 Bridges, at which you pay a Coffair. Then you paſs a Village, called *Caucab*, i. e. *Star*, which is the Place where Chriſt appear'd to St. *Paul* in his Journey to *Damaſcus*, and then you come to that City.

Aain Ettudgiar.

Conceitra.

Saxa.

Damaſcus has 8 Gates, *viz.* *Eaſt Gate*, *South Gate*, *Weſt Gate*, *Saphies Gate*, *North Gate*, *Paradiſe-Gate*, *Gate of Peace*, and St. *Thomas*'s *Gate*, becauſe near it ſtands an old Church dedicated to that Apoſtle. The Compaſs of the City is not much above a Lg. and half; but the Suburbs are as big again as the Town. The Walls are double, well built, and very high, having fair Battlements, flank'd at ſeveral Diſtances with good Towers, for the moſt part round, but ſome few are ſquare. The inner Walls are about 4 Fathom, and the outward 3 Fathom and half high; the Space between them, which is about 5 Foot, is filled up with Earth. Before theſe Walls is a Ditch about 5 Fathom broad, and 2 Fathom and half deep. The moſt remarkable Places and Things worth the Obſervation of Travellers are:

Damaſcus deſcribed.

the Walls.

1. The *Bezeſtein*, which is very beautiful, and hath 3 Gates.

The *Bezeſtein.*

2. The Caſtle built of Stones of a Diamond-Cut, where is a Court of Guard with ſeveral Arms hanging upon the Wall, and 2 Pieces of Ordnance, each 16 Spans long; the *Mint*, where the *Jews* work, a Dome of no great Workmanſhip, but very large, *viz.* above 3 Fathom round; a large arch'd Hall, through which you go into the *Divan*, where the Council is held, painted with Gold and Azure after the *Moſaick* Way, and in it are 3 Baſins of excellent Water. The Ditches without the Caſtle are half a Pike's

The Caſtle.

Pike's Depth, and 20 Paces over, and tho' there uſually runs only a ſmall Current of Water through them to water the Gardens, which are full of Orange, Lemmon, Pomegranate, and ſeveral other Trees, on the Town-ſide; yet there is a Branch of a River which runs through the Caſtle, with which they can fill the Ditches upon any Occaſion. On the Outſide of the Walls of this Caſtle hang 2 Chains of Stone, one of which contains 16 Links, and the other 14, cut one within another by matchleſs Art, each Link being about 2 Fathom long, and one and half wide, and both of them were cut out of one entire Stone. Near the Caſtle is a fair Moſque, about 20 Paces ſquare, painted all over with *Moſaick* Work in Gold and Azure, in the middle of which is the Sepulchre of *Melec Daer*, Sultan of *Egypt*.

Stone-Chains.

The House of the *Teſterdar*.

3. The Houſe of the *Teſterder*, in which is a little Marble-Moſque of moſt lovely Architecture. There are alſo ſeveral lovely Rooms in it of the ſame Faſhion, at each Window of which you have a little Fountain of very clear Water, brought thither in Pipes. In this Houſe there is a Door and ſeveral Windows with Copper Lattices, which look into the great Moſque, and from thence a Chriſtian, to whom 'tis Death to enter, may ſee it without Moleſtation. It is 300 Paces long, and 60 wide. The Court is paved with lovely Stones ſhining like Looking-Glaſſes, and round it are ſeveral Pillars of Marble, Jaſper and Porphyry incomparably well wrought, which ſupport an Arch painted with ſeveral Pieces in *Moſaick* Work. The Porch, which faces the Court, has 12 large Copper-Doors, emboſſed with Figures, and ſeveral Pillars of Porphyry with gilt Capitals. The Walls are painted with lovely Figures in Gold and Azure. The *Turks* have ſo great a Veneration for this Moſque, that they always pull off their Shooes when they paſs through the Court; and certainly 'tis one of the moſt lovely Moſques in all the *Turkiſh* Empire. 'Twas heretofore a Chriſtian Church, built by the Emperor *Haraclius* in Honour of St. *Zacharias*, the Father of St. *John Baptiſt*; and they ſay, here he lies buried.

The Great Moſque.

Zacharias's Church.

4. The Fountain where St. *Paul* recovered his Sight, and was baptized by *Ananias*. By it is the Houſe of *Judas*, with whom St. *Paul* ſojourned when he was inſtructed by *Ananias* in the Chriſtian Religion and baptized; and there you may ſee the Chamber where that Saint faſted and pray'd, being blind for 3 Days and 3 Nights.

St. Paul's Fountain.

5. *Ananias*'s Houſe, which is now inhabited by an *Arabian Sheick*, who for a few Aſpers will give an Admittance to Travellers. Under Ground 14 Stairs is a Moſque now, which was anciently the Chamber where *Ananias* lodged, when God commanded him to go to *Saul*. 'Twas heretofore a Church, and was well ſeil'd and pav'd with *Moſaick* Work, of which there are ſtill ſome Remains in the Pavements, and in it they ſhew you *Ananias*'s Tomb, which the *Turks* much reſpect.

Ananias's House.

6. The Eaſt Gate, called alſo St. *Paul*'s Gate, at which begins the Street called *Streight*, mentioned in the *Acts*. It is ſo called, becauſe in former Times there was a great Church, built in Honour of St. *Paul* ſtanding near it; but the *Turks* have made it an Han: The Steeple remains ſtill, and is very ancient Work. Near this Gate alſo is the Place where that Apoſtle was let down by the Walls in a Basket, to avoid the Hands of the perſecuting *Jews*. A few Paces from the Gate is a ſquare Tower in the City-Walls, in which are 2 Free-ſtones, on which are 2 *Flower de Luces* very well cut, and on the 3d an Inſcription in the *Lingua Franca*, but the Characters are not legible. On 2 other Stones at the ſide of each *Flower de Luce*, there are 2 Lions cut, and near each of them a great Thiſtle. Some think, that theſe Figures are a Mark that the *French* built the Tower; but 'tis more probable, that the *Turks* brought them from ſome Place in thoſe Parts once poſſeſſed by the *French* to build it.

St. Paul's Gate.

Some Flowers de Luces on the Gate.

7. Not far off is the Burying-place of the Chriſtians, and by it that of the *Jews*; for every Religion has a Burial-place by it ſelf in the Fields. Over-againſt the Weſt Gate is the Sepulchre of St. *George* the Porter, who was beheaded upon Pretence that he was a Chriſtian, and had ſaved St. *Paul* out of their Hands. His Tomb ſtands in the middle of a kind of Court. It is built with Free-Stone, and covered with a little Pavilion in form of a Pyramid. The Chriſtians of the Country reckon him a Saint, have commonly a Lamp burning at his Tomb, and pay a great deal of Devotion to it, which even the *Turks* imitate, becauſe they, as well as the Chriſtians, affirm, that Miracles are daily wrought there, and that ſeveral ſick *Turks* having ſpent the Night there, have return'd in the Morning in perfect Health. On this Saint's Day Men, Women and Children, as well *Turks* as *Chriſtians*, repair to that Tomb. In the Court on the Left Hand there is a Burying-place for ſuch Chriſtians as die for the Faith of Chriſt, and when any Chriſtian departs, his Body is firſt brought to that Place, where after the Office for the Dead is repeated, it is carried to the Place appointed for the Burial.

St. George's Tomb and Festival.

8. In the *Streights-ſtreet* is a large fair *Bazar*, covered with an high ridged Timber-Roof, and full of Shops on both Sides, where they ſell nothing but Stuffs, as they do alſo in another *Bazar* hard by. The greateſt *Bazar*, called *Sinanie*, built by a *Baſha* of *Damaſcus*, called *Sinan*, is the largeſt of all. Here they ſell Wooden Boxes.

The Bazar of Stuff.

9. The *Green Moſque*, ſo called, becauſe it hath a Steeple faced with green glazed Bricks, which renders it very reſplendent, and is covered on the Top with the ſame Stuff. It has a large Court paved with lovely Stones, with a Fountain of Water in the middle. At the End of the Court is a Portico ſupported by 8 Marble Pillars of the *Corinthian* Order, which uphold ſo many little Domes, all leaded over. It was built in that Place, becauſe, they ſay, *Mahomet* came ſo far, and no farther, becauſe he ſaid the Town was too delicious, and it is covered with Green, becauſe they hold that to be that Prophet's Colour.

The Green Moſque.

10. The Moſque of *Haſan*, who being *Baſha* of that City, left Money to build that Moſque, and the Tomb in it. The Tomb is a fair Building, made in Faſhion of a Dome, ſeveral Fathom high, and covered with Lead. The Moſque ſtands at the End of a Court, and you enter into it by a Portico ſupported by 6 Pillars, and covered with one very large Dome, and 2 little ones on each ſide.

The Moſque of Haſan.

11. The *Baſha*'s *Seraglio*, which ſeems very pretty. Over the Gate is a Pavilion in form of a Pyramid, but it is only of Earth not faced.

The Baſha's Seraglio.

12. The Caſtle, 2 ſides of which ſerve for Walls to the Town. It is a large, ſquare, well-built Fabrick of Free-Stone, Table-Cut; the Walls of it are very high, and at certain Diſtances are large high ſquare Towers, built as the reſt, but very near one another. On the Wall is a very large Stone-Chain hanged up very high. There are ſome Cannon planted at the Gate to defend the Entry.

The Caſtle.

13. Two Moſques in which are the Sepulchres of ſome Kings of *Damaſcus*, having been formerly Chriſtian Churches. There is no ſeeing into one of them, but there is a Proſpect into the other thro' lovely Grates of well poliſh'd Steel. It is compleatly round, and covered with a lovely Dome of Free-Stone, in which are ſeveral round Windows. It is faced in the Inſide with Marble of various Colours 3 Fathom high from the Pavement, and from thence to the Windows there are ſeveral fair Paints of Churches and Trees after the *Moſaick* Way. In the middle of it are 2 Tombs 4 or 5 Foot high, upon a Pavement raiſed above a Foot high from the Floor. They are made of Cedar, well wrought, and contain the Bodies of 2 Kings, and one of them was King *Daer*, who becoming a *Turk* of a *Chriſtian* perſecuted the *Chriſtians* ſeverely. The *Turks* ſay, no Candle or Lamp will burn near his Tomb. Near them are ſeveral *Alcorans* chain'd on Desks to read for the Souls of thoſe Kings, according to the Cuſtom of the *Mahometan* Princes and Great Lords, who commonly at their Deaths leave great Eſtates for performing ſuch Prayers.

Two Moſques.

14. The Great Moſque. The Doors are of Braſs, 4 Fathom high, and well wrought with odd Figures. It is about 18 Fathom wide, and has 2 Ranges of large thick Pillars of gray Marble of the *Corinthian* Order, which divide it into 3 Iſles, 18 of a Row. The Pavement is of lovely Stones, which ſhine like Looking-Glaſs. It is covered with a ſharp ridged Wooden-Roof, and has a large Dome in the middle, which on the N. ſide has little arch'd Windows, and is faced above them with green Stone, which make a lovely Show. On each ſide of it is a ſquare Steeple with Windows like our Churches (for it was one). And one of the Steeples is called, *The Meſſias's Steeple*, becauſe the *Turks* hold, that *Jeſus* ſhall return into the World by that Steeple. There are many Lamps con-

The Great Moſque.

The Meſſias's Steeple.

continually burning in it, and in the *Keblay* is an Hole grated over with gilt Bars of Iron, where they say, the Head of St. *Zachary* is kept. On the W. side are 3 Brazen-Gates embellish'd with several Works, and before this Gate is a Portico divided into 2 Alleys by 8 great Pillars, leading into a Court which is very large, and paved with great shining Marble-Stones. Towards the End of the Court is a little Chapel covered with a Dome, which, they say, was the Font. On the S. E. and N. Sides there are also fine Brazen-Gates, and on the 2 last Courts.

St. Thomas's Church.

15. The Church of St. *Thomas*, which stands by the Gate denominated from it. This Church is always shut up, because 'tis all ruinous in the Inside, and looks like a Garden, being uncovered and full of Herbs: Yet there are a Portal and 3 Ceintures supported by 3 Pillars of Marble, chamfered.

The Mosque of Serapis.

16. The Mosque which, they say, was the Temple of *Serapis*. The *Turks* pretend, that the Body of St. *Simion Stylites* lies buried there, being brought thither from *Antioch*, and they keep his Tomb enclosed with Iron-Grates ever since a *Venetian* endeavoured to steal it away. They have a great Veneration for this Mosque, and say, no *Muezim* can call to Prayers there; for when he begins to cry, his Voice fails him.

The Spittle of Lepers.

17. *The Spittle of Lepers*, which, the People say, was built by *Naaman* the *Syrian*, Lieutenant of the King of *Damascus*, for *Gahazi*, the Servant of *Elisha*, of which we have the History in the Second Book of *Kings*.

There are 3 Rivers that run thro' *Damascus* and meet at the End of the Town, and many lovely Fountains, and one of them is covered with a flat Dome. It is a round Basin 2 Fathom in Diameter, and in the middle of it is a Pipe, that throws up a great deal of Water a-time, and very high.

The Cave of the 7 Sleepers.

Half a Lg. from *Damascus* is a rough and barren Hill, but natural Rock, where some *Dervices* live in little Hermitages. They shew you the Cave where the 7 Sleepers hid themselves when they were persecuted by *Darius*, who would have made them renounce the Christian Faith, and are said to have slept till the Time of *Theodosius* the Younger. There is also an House where a *Skeick* dwells, by which is a Grot hollow'd in a Rock, where they say that *Elias* dwelt when the Ravens fed him, and in an Hole hard by the 40 Martyrs are buried, who were put to Death by the King or Basha of *Damascus* for leaving some Excrements in a Mosque, tho' it was done by a *Jewish* Child; these 40 Christians taking it upon themselves to deliver the rest, who suffer'd much for it in Prison. From the Top of this Hill you have a full Prospect of *Damascus*, which stands in a spacious Plain, surrounded on all sides with Hills, but at a great Distance, which is filled up with pleasant Gardens and Pastures.

The Situation of Damascus.

Three Lgs. further, towards the Way of *Baal Bel*, is the Place where, they say, that *Cain* slew his Brother, and where also they sacrificed. At a Village called *Jobar*, half a Lg. from the City, the *Jews* have a Synagogue, at the End of which is a Grot, where *Elijah* hid himself from the Persecution of *Jezebel*; and a Lg. further is the Place where the Patriarch *Abraham* gave Battel to the 5 Kings, who carried away his Nephew *Lot*, and overcame them. The *Turks* call *Damascus Cham*: 'Tis encompassed almost round with 2 Walls and little Ditches. The Houses are built of Brick and Earth, and shew ugly, but are beautiful within, having Fountains generally. The Mosques, Bagnio's and Coffee-Houses are very fair, and well built. On the other side of *Damascus* is a Mosque, which has formerly been a Church dedicated to St. *Nicholas*, and was a very spacious and large one, having a fine Court and Cloister, the Arches of which were supported by large Marble Pillars. Since it has been changed into a Mosque they have demolished these, and have brought the River *Banias* into it, and planted many Trees, which makes the River and Mosque very pleasant. Some *Dervices* dwell hard by it, who are well lodged, and have good Gardens by the River-side. A little further is the Green of *Damascus*, which is a large Grass-plat, which they call a *Meidan*, and is encompassed on all Hands with Gardens, the River *Banias* running through them. About the middle of it is a Pillar in the Ground about 4 Foot high, which, as they say, shews the Place where God made the First Man. On one of the sides of this Field is the *Moristan*, or Hospital, for Pilgrims. It is a great Cloister covered with little Domes, and has many Chambers for receiving Pilgrims, of whatever Religion they be, who are maintained there during their Stay. It has a Mosque and fair Gardens belonging to it. It was built by *Solyman* II. who took *Rhodes*. It has a Cloister belonging to it for poor Schollars, and a Stable for Pilgrims Horses. At *Damascus* is a great House, where they make the Bisket for *Mecha*, which the G. Seignior gives to the poor Pilgrims at his own Charge, *viz.* 200 Camels Load, and as much Water. There is a Stone in *Damascus* of which they have this Opinion, that when it is covered with Water it shall be taken from the *Turks*, but it has proved false lately. There is a *Bazar* in this Town, called, *The Bazar of Horse-Saddles*, because that's the only Commodity sold there.

Bisket for Mecha.

Monks, &c. at Damascus.

At *Damascus* are *Capuchins* and *Monks* of the *Holy Land*, whose Houses are near to one another in the Quarter of the *Maronites*, and just over-against the Church where they say Mass. There are also *Jesuits*, but they live in the Quarter of the *Greeks*, and celebrate Divine Service in their own House. There are moreover 3 or 4000 *Capicoules*, or *Janizaries* here, as there are at *Constantinople* 12000, and at *Bagdat*, *Cairo* and *Buda* 6000 each, and in other Places as many more, as make up 50000, which are yet but part of 300000 which the G. Seignior keeps in constant Pay. In *Damascus* they'll suffer none to ride with both his Legs on one side of the Horse, but they will stone him till he alters his Posture, because they say, the Giants *Gog* and *Magog*, who were Rebels against God, rode so. When they white their Walls with Lime, they mix Hemp with it, to make it stick, because their Walls are of Earth. On the Top of their Tombs they leave a Column of Earth over the dead Body, on which the Women go every Week to pour Water to cool the Dead, and for the same Reason they stick a large Bunch of Box at the End of the Grave. The Women also that have lost their Husbands go to their Graves to consult them, and complain to them, and the next Night they never miss of an Answer according to their Desires.

Gog and Magog.

Their Mourning.

The Mourning of the Women of *Damascus*, yea, even of the Christians, at the Death of any of their Relations, is very ridiculous. They make a great deal of Noise, some singing, others crying and knocking their Breasts with their Hands joined together, sometimes casting themselves into a Ring, and snapping their Fingers like Castanets against one another's Noses, keeping Time to the Songs they sung, as if they rejoyced, while others howl'd and cry'd like mad Women.

Yogourt much drank.

At *Damascus*, and all over *Turky* they do not thresh their Corn, but cut the Straw in pieces with Iron-Pinsons fasten'd on Wood-Rowlers, which they draw over the Corn with an Horse; the Corn by cutting slips thro' the Teeth whole, and then they separate it from the Straw and Chaff, by throwing it up into the Air. The cut Straw and Chaff they give their Horses with Barley twice a Day, and that's all they have. They drink much *Yogourt*, or Butter-milk, which they separate partly from the Butter, or make of Milk, by putting Rennet into it, and sometimes of Water, by mixing a kind of Curd which comes from the *Yogourt* with it.

The Wines of *Damascus* are treacherous and strong, and *Smirnium Creticum* grows commonly on the Tops of their Houses.

Tyre.

From *Acre* Travellers go usually by Sea to see several Places, as, 1. To *Sour*, or *Tyre*, and in the Way by the Shore you see a Well 8 Foot square, and 15 in Diametre. You may reach the Water with your Hand, but the Bottom cannot be fathomed. It is taken to be the Well of Living Waters, mentioned in the *Canticles*, c. 4. 15. and the Water is so good, that the Neighbouring Villages fetch a great deal from it. As you pass by a Tower near the Sea, the *Aga* will make you pay a *Caffar*, or Tribute of 4 Crowns, tho' the Merchants say, 'tis not due. The Town of *Sour*, anciently called *Tyre*, has nothing remarkable but Ruines, tho' once a famous City. There are several Pillars whole, and an infinite Number broken. The Mariners rub their Backs usually against one which stands near a little House or Chapel of the *Greeks*, because they say it cures all Pains in the Back and Reins. The most considerable Thing among the Ruines are the Remains of a Temple, which is almost entire on one side, with a fair Stair-Case not much defaced. Before it lies a Pillar composed of 3 others of an extraordinary Bigness, and very odd Form.

A Pillar that cures all Pains in the Back.

The Town contains not above 12 or 15 very mean Houſes, inhabited by *Turks* and *Arabians*, for there are no Chriſtians. It was once the chief City of *Phœnicia*, being very ſtrong, and much celebrated for Trade, by which it grew very rich, *Iſa.* 23. 12. In *Solomon*'s Days the *Tyrians* fetched the Cedars from *Lebanon* to build his Temple, and aſſiſted that King to build him a Fleet at *Ezion-Geber* to fetch Gold from *Ophir*. St. *Paul* was here, and tarried 7 Days in his Paſſage to *Jeruſalem*, but the Diſciples diſſwaded him from going, *Acts* 21. 4. Many from this City followed our Saviour to hear him, *Mark* 3. 8. *Luke* 6. 17. and here he cured the *Canaanitiſh* Woman's Daughter, *Matt.* 15. 21. 28. *Mark* 7. 24.

1 Kings 5. 2...

Saide, or Sidon.

From *Sour* you have but a Day's Journey to *Saide*, or *Sidon*; but there is a Tower upon the Road where a *Caffair* muſt be paid. *Soide* is a pretty Town, and one of the beſt Towns of the Coaſt, having a great many Gardens full of Oranges. They ſhew a Tomb without the Town in one of the Gardens, which, they ſay, is *Zebulan*'s, one of the 12 Patriarchs. It is pretty well inhabited, is about a Mile in Circumference, and the W. ſide borders upon the *Mediterranean* Sea, where there is a ſmall Fort to defend it.

Moſques.

There are ſeveral ancient Moſques, which were doubtleſs Chriſtian Churches formerly, and contribute much to it's Beauty.

Bazar.

The *Bazar* is pretty regular, and well ſtored with Goods; and there are many commodious *Hans* for Merchants and their Goods. The Scripture ſhews it was once a conſiderable City, by calling it *Sidon the Great*, Joſ. 11. 8.

Hans.

Gie.

From *Saide* you ſail to a little Village, called *Gie*, which is the Place, as they ſay, where the Whale caſt out *Jonas*, after he had been 3 Days in her Belly.

Baruth.

Here you pay a *Caffair*, and then paſs to *Baruth*, where you pay another. The Soil about *Baruth* is pleaſant and good, bearing abundance of white Mulberries for the Silk-Worms. Near it are the *Caſtrewan* Hills, where a *Maronite* Prince has the Sovereign Command. About half a Lg. from *Baruth* is an Hole, which was heretofore the Den of an huge Dragon; and 200 Paces further is a *Greek* Church dedicated to St. *George*, who is ſaid to have killed the ſaid Dragon in their Plain, when he was about to have devoured the King of *Baruth*'s Daughter.

St. George's Church.

Travelling on to *Tripoli*, you paſs *Baruth-Bridge* of 6 Arches, where a *Caffair* muſt be paid; and a little further over another Bridge, which lies upon a River, called in *Arabick*, *Naor el Kelb*, i. e. The Dogs-River, becauſe on a Rock is carved a great Dog, chain'd, which, they ſay, would bark by Enchantments; and a little above it is this Inſcription, *IMP. CÆS. M. AURELIUS ANTONINUS PIUS FÆLIX AUGUSTUS PART. MARI BRITANNIUS*, and ſo you travel to *Abrahim*, and to *Tripoli*, which is a very pretty Town, with a neat Caſtle, at the Foot of which a little River runs. Several Gardens of Orange-Trees and white Mulberry-Trees encompaſs the Town, which is a Mile from the Sea. By the Shore are ſeveral Cannons planted in Towers to defend the Coaſt.

Tripoli.

St. Marina's Penance.

Here it was that St. *Marina* being accuſed of Incontinence, did Penance in Man's Apparel.

Mount Libanus.

Mount *Libanus* is about half a Day's Journey from hence, and you lodge at a Viliage called *Cannobin*, which is juſt by it. The Patriarch of *Libanus* dwells in it, and there is beſides a Church and a Monaſtery. There is but 23 Cedars in the Mount, which is inhabited by *Maronite* Chriſtians.

If you have a mind to go to *Aleppo* from *Tripoli*, you muſt take the following Road: You come firſt to the *French* Caſtle, which ſtands on an high Hill, and was built in the Time of *Godfrey* of *Bulloin*.

From hence you go to *Ama*, which was heretofore a large Town, but at preſent is half ruined; yet there are ſtill ſome lovely Moſques and Houſes built of black and white Stone intermingled. At the End of the Town is a Caſtle upon an Hill almoſt ruin'd, but what remains ſhews it was once ſtrong and beautiful. There is an Oratory on the S. ſide of it, where the *Turks* ſay their Prayers. There are ſeveral Grots and Magazines in it, which ſerved to hold their Proviſion and Ammunition. The River *Aſſi*, or *Orontes*, runs by the Walls of this Caſtle, and fills the Ditches, that are cut in the Rock, very deep, and ſo paſſes through the whole Town, where it turns 18 Wheels to raiſe the Water into the Gardens. Near the River ſtands a Moſque, before the Door of which is a lovely Pillar of Marble, erected with Figures of Birds, Men, and other Animals upon it in *Demi-Releiſe*. To it belongs a very pleaſant Garden.

Ama.

Ama Caſtle.

Orontes.

From *Ama* you go to *Marra*, where there is nothing remarkable but a large Han, cover'd over with Lead, which will hold 800 Men with their Horſes. In the middle of it is a lovely Fountain and Well 42 Fathom deep, with a Moſque. It was built about 120 Years ago by *Mourah Chelebs*, Great *Teſterdan*, when he went a Pilgrimage to *Mecca*. There is another old ruin'd Han, about 50 Paces diſtant from it, having a Door of black Stone 7 Spans long, and 4 and half broad, and one thick, all one Piece. On it are 2 Croſſes like thoſe of *Malta*. The Town is commanded by a *Sangiac*, tho' it be a ſorry one.

Marra.

From hence you go to *Aleppo*. But the Caravan goes a different Way for Largeneſs of Roads and Conveniency of Water; and ſo you go to *Tortoſa*, which is a ruinated Town, yet has a fine Caſtle, and the Remains of a Church of an extraordinary Bigneſs, and adorn'd with a pretty Number of Pillars in 2 Rows, which ſupport the Roof, which is very high. Going from hence you meet with a Caſtle in the Water a pretty Diſtance from the Shore, which doubtleſs belonged once to the Town. Then you go to *Caffaar Bajan*, which is a Brook of good ſweet Water, and ſo by *Jebelyn* to *Baloye* and *Badana*, where you paſs over a Mountain, and come to *Iſſer-Sioor*, where there is a very fair Han lately built. Before this Town runs the famous River *Orontes*, which has a Bridge of 9 Arches lying over it; and ſo you come to *Aleppo*. Thoſe who have never ſeen *Damaſcus* may take that in their Way, and then the Way lies thus: In 3 Days you arrive at *Damaſcus*, and from thence you go to *Cotaipha*, and one half of the Way is over pleaſant and fruitful Plains abounding with Fruit-Trees, Olives and Vines. They are water'd by 7 Rivers, and ſeveral Brooks, and you ſee many Villages, the People ſay, 350. There is the lovelieſt Han that is to be ſeen in the whole Country. It has a Foutain in the middle, which feeds a large Pond; 1000 Men may commodiouſly lodge in it, and be ſupplied with all Neceſſaries. It has a large Court, and at the Gates are 3 Culverines planted to defend the Paſſage. There is a *Caffair* to be paid here. It was built about 80 Years ſince by *Sinan Baſha*, the Grand Viſier.

Tortoſa.

Iſſer-Sioor.

Cota...

The Han.

From *Cotaipha* you travel to *Nebk*, and in the Way ſee an old Caſtle, called *Hanel Arous*, or, The Bride's Han. It ſtands on a barren Soil, environ'd by Mountains. *Nebk* ſtands on an Hill, at the Bottom of which are the Gardens full of Fruit-Trees, and watered by a little River, which has a Bridge of 4 Arches over it. Your Way then lies to *Cara*, which contains 2 Hans, and a *Greek* Church dedicated to St. *George*; and ſo you go by *Coſſeitel* and *Aſſia*, to *Hems*. This is a pretty Town, indifferently big, wall'd with black and white Stones, half a Pike high, and fortified with 26 round Towers, and begirt with Ditches formerly, which are now filled up with Ruines. It hath 6 Gates, and 5 Churches. The firſt is very great, and ſupported by 34 Marble-Pillars, being for the moſt part Jaſpers. It is 70 Paces long, and 18 broad. On the S. ſide in a little Chapel is a Stone-Cheſt 5 Spans in Length, and 3 in Breadth, wherein both the *Moors* and *Chriſtians* ſay, that *John Baptiſt*'s Head is contain'd, and upon that Account make great Eſteem of it, and keep a Lamp commonly burning before it; and in the Walls are many Pieces of Marble with *Greek* Characters, and very artificially engraven with Roſes and other Figures. St. *Helen* built this Church, and the Chriſtians held it a long time, till about 160 Years ſince, when it was uſurped by the *Turks*, and ſerves now for the chief Moſque. Chriſtians are permitted to go into it, and beſide it is a Pond, which the *Turks* make uſe of for their Ablutions. St. *George*'s Church is alſo held by the *Moors*; but the Chriſtians may pay their Devotions in it, allowing for half the Oil conſumed in the Lamps: The 3d is dedicated to the Virgin *Mary*, and ſtill enjoy'd by the Chriſtians of the Country. The 4th, called, *Arbaine Chouade*, i. e. 40 Martyrs, is a very neat Church, and held by the *Greeks*; it has 4 Marble Pillars, and one of Porphyry in faſhion of a Screw. The fifth Church is called St. *Merlian*, or St. *Julian*, and the Natives ſay, his Body lies buried there in a Sepulchre of moſt excellent Marble, ſtanding behind the Altar, made like a Coffin, and having 12 Croſſes round it in *Demy-Releiſe*. By the *Jews* Gate, called *Bab Jeoundy*, is a pretty big Pyramid, in which the Natives believe that

Nebk.

Hems.

Aarc... Chriſtians there.

St. John Baptiſt's Head.

St. George's Church and others.

Julius Cæsar's Pyramid. that *Julius Cæsar* was buried. On the Hill is a Castle, held anciently by the Christians, but now all in Ruins. The Han for the Travellers is 15 Paces without the Walls of the Town.

From *Hems* you pass by an Oratory, built by the *Franks*, but now inhabited by a *Skeick*, and over a Bridge, called, *Degoser Rustan*, i. e. *Rustan's* Bridge, which has 10 Arches, and come to *Ana*. The Natives say, that in this Country dwelt *Job* and his Family; but half of it is not cultivated. *Job's Country.*

From *Ana* you go to *Scasicon Han*, which is a very old one, and so by *Marra*, to *Han Serrajb*. Upon this Road you see some ruinous Villages of which the most entire is *Han Marey*, which is built in form of a Castle. By it stands 5 great Sepulchres in one of which a *Basha* is interr'd, having his Turbant cut in Marble in one End of his Tomb. From this *Han* you have a Day's Journey to *Han Touman*, which within 40 Years has been repair'd by a *Basha* of *Aleppo*, called *H. Souf-Basha*, who put into it 50 Soldiers and 10 Culverines to keep it from the *Arabs*, who formerly committed great Robberies thereabouts. The River *Singa* runs hard by, and turns 2 Miles. From *Touman* to *Aleppo* is not above 4 Hours Travel. From *Aleppo* 'tis 6 Days Journey to *Tadmor*, all thro' the Deserts, in which you encounter great Dangers from the *Arabians*, so that few have ventured upon it, which makes a Relation of it more desirable, and this you have from Dr. *Hallifax's* Pen, in this Manner. *Han Marey.* *Singa*, a River.

A Description of *Tadmor.* This City is mention'd in H. Scripture, 1 *Kings* 9. 18. About a Mile from the Town is a Castle, which is so situate, as to command the Passes into the Hills and City. It is so old a Building, that it retains no Footsteps of exquisite Workmanship or Ingenuity, and the Access to it is so difficult, that 'tis not worth the Pains to go to it. On the Top of the Hill is a prodigious deep Well, and from thence we have a fair Prospect of *Tadmor*, and all the Country round about. *Tadmor* is enclosed on 3 Sides with long Ridges of Mountains, and to the S. stretches a vast Plain beyond the Reach of the Eye, in which you see a large Valley of Salt, where *David* smote the *Syrians*, and slew 18000 Men, 2 *Sam.* 8. 13. The Air is good, but the Soil is so barren, that there is no green Thing to be seen, but some few Palm-Trees in the Gardens, from whence the City is called *Tadmor* in *Hebrew*, which signifies a Palm-Tree; and in *Latin*, *Palmira*; and the Country, *Syna Palmyrena*. The City appears by the Ruines to have been of large Extent, but there are no Footsteps of the Walls, nor any Marks of the Figure of it. The present Inhabitants are poor miserable People, about 30 or 40 Families, who dwell in little Huts of Dirt within the Walls of a spacious Court, which inclosed a magnificent Heathen Temple. They are govern'd by a *Skeick*, and the Building seems to have been the Temple of *Jupiter Belus*. The Court is 220. Yards square, encompassed with an high and stately Wall, built of large and square Stones, adorn'd with Pilasters and Cornishes, but demolished by the *Turks*. The Gate hath something of Statelines still remaining, having 2 Stones which support the Sides still entire, 35 Foot high, artificially carved with Vines and and Clusters of Grapes; but the Gate is wall'd up to a narrow Door, over which is an Inscription in *Greek* and *Latin*, but not to be understood. The Court seems to have had a Piazza quite round it, and there are the Remains of 2 Rows of very noble Pillars 37 Foot high, with their Capitals of most exquisite Work, as were also the Cornishes between. The Temple in the middle seems to have extended 33 Yeards in Length, and 13 or 14 in Breadth, and by the Remains of it, it seems to have been one of the most glorious Structures in the World; for it has Vines and Grapes cut most natural, Eagles, Angels or Cupids very exact. The Windows are narrower at the Bottom than the Top, and all adorn'd with excellent Carvings. The *Turks* have converted part of it into a Mosque, and added some Ornaments of their own sorts, but the N. End, which is shut out, is of much greater Beauty and Artifice of curious Fret-works and Carvings. The Inhabitants. The Temple of *Jupiter Belus.*

Going from hence, your Eyes are accosted with an amazing Sight of Multitudes of Marble-Pillars standing scatter'd up and down for above a Mile together. Advancing toward the N. you have a very tall and stately Obelisk or Pillar, consisting of 7 large Stones, besides its Capital, which is wreathed Work about it, and Carvings extraordinary fine. The Height of it is 50 Foot, and the Circumference about the Pedistal 12 Foot and half. On each Hand of you stand 2 other Pillars at a Quarter of a Mile Distance, which seem to answer one another, as if there had been a whole Row of them. Upon these Pillars, and others, you find many Inscriptions, but 'tis lost Labour to endeavour to spell out of the Meaning. But in general, we may be satisfied from them, that the People were a free State under the *Parthians* and *Romans*, till *Aurelian* demolish'd it, and carried *Zenobia*, the Wife of *Odenatus*, Captive to *Rome*. From this Pillar you come to a magnificent Entrance, which leads you into a noble Piazza, of more than half a Mile long, and 40 broad, enclosed with 2 Rows of stately Marble Pillars 26 Foot high, and 8 or 9 about. There are 129 remaining, and 'tis probable there were 560 at first. On all the Pillars almost there are Inscriptions, both in *Greek* and the Native Language, but not instructive to us. At the upper End of this Piazza the Pillars stand closer than they do on each side, and there are the Ruins of a Building of better Marble, and more exquisite Work than the rest, which seems to have been a Banqueting-House. Here are some *Latin* Inscriptions, but so imperfect, as little can be made of them. On the W. side of the Piazza are the Openings of 2 Gates into the Palace, which were doubtless most glorious. Each Gate had 4 Pillars, but there are but 2 remaining. They are of Porphyry, being 30 Foot in Length, and 9 in Circumference. The Palace it self is so entirely ruin'd, that no Judgment can be made of its ancient Splendor, either for Figure or Workmanship. Some Pieces of Walls and Pillars, some plain, and others wrought and channell'd, are still remaining, and upon them several Inscriptions. On the E. side of the Piazza is a Wood of Marble Pillars, some perfect, others wanting their Capitals, and all so confused, that none can tell what to make of them. At a little Distance from them stands the Ruines of a small Temple, which seems to have been of curious Workmanship; but the Roof is wholly gone, and the Walls much defaced. But as great a Curiosity as any were their Sepulchres, being square Towers 4 or 5 Stories high, standing on both sides of an hollow Way, and stretching out in Length the space of a Mile. They are all of the same Form, but of different Splendor and Greatness, according to the Circumstances of the Founders: Some of Marble, with Statues, and others of common Stone, but Marble within. Many have Inscriptions, but not legible, unless in 2 or 3, which only discover the Names of the Interr'd. A tall Obelisk. Many Inscriptions on the Pillars. A noble Piazza. A Banqueting-House. The Sepulchres.

CHAP. XI.

Mr. Thevenot's *Travels from* Alexandria *in* Ægypt *to* Leghorn, *and so Home.*

MR. *Thevenot* having travell'd thro' most Parts of the *Holy Land*, turn'd his Mind Homeward, and taking Ship at *Acre*, sail'd to *Damietta* in *Ægypt*, and finding Passage at *Alexandria* for his Design, he took Ship at *Bouquer*, and having made the Cape of *Rasazarra* in *Barbary*, came to *Lampedosa* and *Pantalaria*, 2 Islands which lie between *Tripoli* and *Malta*. *Lampedosa* is a little Isle or Rock of small Circumference, about 100 Miles distant from *Malta*. It produceth nothing, and is inhabited only by Conies; but because there is good Water, and safe Harbour, Ships often put into it. In this Isle there is *Lampedosa* and *Pantalaria*.

A Chapel in it. a little Chapel, wherein is an Image of the bleſſed Virgin, which is much reverenced by both the Chriſtians and Infidels, which put aſhore there, and every Veſſel always leaves ſome Preſent in it, and if any takes away any Gun, Oil, &c. which has been offered, he muſt leave Money for it, which the Galleys of *Malta* come once a Year and take away to carry to our Lady of *Trapano* in *Sicily*. It is ſaid, that of 6 Chriſtian Ships that came into this Port to Water, and departed with a fair Gale, one of them which ſet Sail with the reſt could not get out, at which the Maſter wondered, but uſing Patience, waited for another Wind, which having gain'd, he attempted to get out again, but could not; whereupon ſearching his Ship, he found that one of his Soldiers had ſtollen ſomething, which when he had cauſed to be carried back again, he ſet Sail, and got eaſily out of the Harbour. Many Miracles are here wrought by the Interceſſion of the Bleſſed Virgin, which are not ſo much as doubted of either by *Chriſtians* or *Turks*.

Miracles wrought here.

Pantalaria. *Pantalaria* is a little Iſland about 12 or 14 Miles in Circuit, and diſtant from *Malta* 130. It is fruitful in Wine, Fruits and Cotton. It is ſubject to the King of *Spain*, who keeps a Governour there that reſides in the Caſtle, which is ſo ſtrong, that 20 Galleys could not take it.

Having paſſed theſe Iſles, he ſail'd by Cape *Bona*, and the Caſtle of *Galippa*. It is very hard to double this Cape, by reaſon of the Currents and high Seas, ſo that ſometimes they are 3 Weeks a-doing it, and 8 or 10 Days is uſual.

The Iſle of *Zimbre*. Having doubled the Cape, he ſail'd between the Iſle of *Zimbre* and the Rock, which lies between that Iſland and the Main-Land, about the Mid-way. *Zimbre* is inhabited, has convenient Anchorage by it, and good Water in it; and ſo entred the Road of *Goletta*. The Ship came to an Anchor near a Point of Land, where the Sepulchre of *Dido* is, and a *Marabout*, or *Skeick*, is interr'd there. *Goletta* is no more than 2 Caſtles, whereof the one was built by the Emperor *Charles* V. and the other by *Ahmet Dey*, who perceiving that the Galleys of *Malta* came and took Ships in the Road, without any Damage from the Guns of the Caſtle, built this laſt, which is very low, and has the Guns ſo platted, that it can play them even with the Water. This Caſtle is round on the Side next the Sea, and the other is almoſt ſquare. Between theſe 2 Caſtles are 3 Pillars of *Don Philippo*, the *Bey*, and *Schelebi*, the Son of *Hiſouf-Dey*.

Goletta.

Tunis. From *Goletta* he went to *Tunis* in a Boat by the Canal, or Lake, which in the Beginning is narrow, but after grows very wide. On the Way he ſaw an Hill to the Left-Hand near the Sea-ſide, where there are ſeveral natural Baths of Water almoſt boiling hot. Here is a Bagnio built, called *Hamarmulfe*. A little further is an Hill, called *Zagouam*, which has a Town of *Tagarins*, or *Andalaous*, called by the ſame Name. When the Chriſtians poſſeſſed that Country there were Aqueducts that brought Water from thence to the City of *Carthage*, but at preſent there are nothing but ſome Arches and Fountains remaining. As he came near to *Tunis* he ſaw a great many Olive-Trees, and abundance of other Trees, which ſhew it to be a good Country. By Land it is 18 Miles from *Goletta* to *Tunis*, which is capable of being made a good Port; but then it would not be ſo ſafe and ſecure. The Town is a Mile from the Place where you land.

Zagouam.

Magerda.

The Country-Houſes about *Tunis*. The Country about *Tunis* is full of Country-Houſes. In all of them there are ſeveral fair Apartments, with lovely Gardens full of Orange and ſeveral other ſorts of Fruit-Trees, with lovely Fountains, planted in as good Order as in Chriſtendom, with many neat Beds, and Borders of Flowers at the Ends of the Walks, made by the Chriſtian Slaves. Theſe Houſes are called *Bardes*, from the *Moreſco* Word, *Berd*, which ſignifies, *Cold*, becauſe there is a freſh cooling Breeze about them. From theſe Plains the Water is brought for 4 or 5 Miles by 2 Aqueducts into the City.

The *Cantre*. Being at *Tunis*, he went to ſee the *Cantre*, which belongs to *Schelebi*. The Way is over large Fields, planted with Olive-Trees, ſome Steps diſtant one from another, and in ſo good Order, that they look like Walks, which would be very pleaſant, but that the Ways are very dirty. The *Cantre* is a Bridge, which *Hiſouf-Dey* built over the River *Magerda*, which is neither broad nor rapid, but deſerves the Name of a fair River. It runs by the Houſe of *Schelebi*, and the Bridge is ſo built as to make a very pleaſant Caſcade at every Arch. Upon the River are ſeveral Iron Mills, for grinding Corn, and fulling Caps, called *Fez-Caps*, and made at *Zogouaro* by the *Tagarins*. All that work in theſe Mills are the Slaves of *Schelebi*. At the End of the Bridge is the Houſe of *Schelebi*, built in form of a Caſtle. It hath one very large Court, and ſeveral ſmall ones; the Rooms are beautified with Gold, Azure and Plaiſtering, with Fountains, every where all pav'd with Marble; ſo that they are the moſt magnificent in thoſe Parts.

About 3 Lgs. from *Cantre* is a Place called *Tabourbe*, where there are ſome ancient Ruines, and chiefly an ancient Temple. There is alſo a little Iſland in the Kingdom of *Tunis*, called *Tarbarque*, within a Musket-Shot of the Main-Land, but 3 Days Journey from *Tunis*. This Iſland belongs to the *Genoeſe*, who have a very good Fort in it, and drive a great Trade there in ſeveral Things, but eſpecially in Barbel. At *Suze* alſo, which is a Day's Journey from *Tunis*, there are many Antiquities more than in any Place of the Kingdom, eſpecially relating to St. *Auguſtine*.

Tabourbe.

Tarbarque, an Iſle.

Tunis is a Capital City of the Kingdom of the ſame Name in *Africk*. It lies in a Plain, is pretty large, and the Houſes are indifferently well built. They make, indeed, little or no Show on the Outſide, but are all Marble, Gold and Azure within. The City is all paved, yet ſo dirty after Rain, that one can hardly go in the Streets. The Suburbs are as large as the City, and well paved. There is a Caſtle within the Town upon a riſing Ground, which commands it, and makes a very pretty Show. There are ſome Guns before the Gate, and the Front of it looks well. Over-againſt the Gate is a Burying-place. Not far from the Caſtle is a *Bazar* for Drapers, which is a long broad Street full of Shops on both ſides; but none but Drapers keep Shop there; for there are ſeveral other *Bazars* for other Commodities. There are 13 Baths in *Tunis*, where all the Slaves lodge, except ſuch as are kept in their Maſter's Houſes. They are in all 10 or 12000, and moſt of them Chriſtians by Profeſſion, and they carry every one a great Ring of Iron at their Feet; but the Knights of *Malta* have an huge Iron-Chain of 20 Pound Weight added to the Ring, which is very troubleſome to the poor Slaves. In theſe Baths is a great Hall, where they are all ſhut up a-Nights, and lodge miſerably hard, either on the bare Ground, or in Huts of Wood. In the Day-time they are uſed in all manner of Labours in Building, or other Works. Even the Knights of *Malta*, who are of noble Families, are forced to ſerve Labourers, to carry Sand and Stones, and they are the more ſevere upon them, to oblige them to redeem themſelves the ſooner, and at the higher Rates. Such as have any Art or Trade to bring in Money may have their Liberty to exerciſe them, provided they either pay their Maſters a certain Salary daily, or let them have a Share in their Gains. Many of them keep Taverns (for none but Slaves will condeſcend to it) and live well. All their Wine is white, and they mingle Lime with it to intoxicate. They ſell their Wine cheap, and generally treat ſuch as buy it of them with Variety of Meat and Sallads into the Bargain. They reſtrain the Rudeneſs of the *Turks* by beating them, and if they refuſe to pay their Reckoning, will take their Turbants. The Slaves that cannot work muſt never ſtir out of the Bath without Leave from the Keeper, who ſends a Man with them, but they muſt pay him 3 *d.* for his Pains.

Tunis is governed by a *Dey* ſince the *Moors* turn'd out the *Turkiſh Baſha*, who is almoſt abſolute, and obeys the G. Seignior no further than he thinks fit; nay, ſometimes puts to Death thoſe whom the G. Seignior ſends, if the Buſineſs they come about diſpleaſes him. He coins Money, which conſiſts in little ſquare Pieces of Silver of the Value of Maidins, and adminiſters the Government in all Things. Indeed, the G. Seignior has a *Baſha* there and a *Bey*, but the former is ſo much a Slave, that he cannot ſtir out of his Houſe without Leave from the *Dey*, and that under the *Dey's* Guards, to whom he muſt give above 100 Piaſtres. The *Bey's* Buſineſs is to go into the Country and gather the *Caradge*, and other the Grand Seignior's Dues, for which he has a Part himſelf, and pays a Part to the *Dey*, the reſt he pays into the *Baſha*, who ſends it to *Conſtantinople*. When a *Dey* dies, his Children conceal his Death, till they have choſen ſome other, who is commonly their Father's *Kiaya*, or ſome other Friend of theirs, with whom they may make a good Bargain for themſelves, and then they tell the People, who, according to Cuſtom,

Tunis deſcribed.

The City.

The Baths and Slaves in them.

The Government of *Tunis*.

A *Baſha*.

A *Bey*.

The Succeſſion of the *Deys*.

Custom, come every Morning to wish the *Dey* a good Day, that their Father declared to them such an one to be his Successor, and then his Friends join with him, and the *Imam* going up to the Top of the *Minaret* of the Mosque in the Castle, publishes the Death of the *Dey*. When it is known that the *Dey* is dead, a Man speeds through the City on Horse-back, crying, *God save* Dey *such an one*, and all shut up Shop, and stand to their Arms, until the Forts be put into the Hands of the Officers of the new *Dey*, for fear any other should usurp the *Deyship*. When the *Dey* is fully settled, all the Cadies, and others who need his Favour, bring him Presents, but in the Night, and in great Dishes covered with Fruit or Meat, under which they lay Purses, more or less, as they think fit, and so he receives perhaps the first Night above 200 Purses in Presents. If these Presents were carried in the Day-time he would refuse them with great Passion, that it may not be thought, that he would be guilty of Bribery. The *Dey* keeps no great Court, nor carries it out with any great Majesty, but shews himself familiar with every Body. The *Dey* cannot obtain that his Son shall succeed him after his Death, because the People fear that young Men will be debauch'd and insupportable to them; so that if a *Dey* would settle his Son in his Power, he must do it in his Life-time, which is hardly possible. At *Tunis* they have an *Aga* of the Customs, who has a vast Revenue, and is a Man of great Authority.

The Proclamation of him, and his Prefects.

His Court.

The *Aga* of the Customs.

Their Apparel.

The *Moors* of *Barbary* are not apparell'd like the *Turks*; for instead of a *Deliman* and a Vest they wear a *Gillet*, or Wastcoat, and over it a Justicore, which reaches down to the Knee, girt about with a large Girdle, and on their Heads they wear a Fez-Cap, shap'd like a Bell, and a thick Turbant round it. All are thus apparell'd, except some Officers, *viz.* the 6 *Chiaux*'s of Justice, who wear a sharp-pointed Cap, with a Turbant about it, and a kind of hanging Sleeve, that is interlaced with it behind their Back. The *Oda Bashaw*'s go much after the same manner, save that their hanging Sleeves end in a kind of Pair of Horns. They have no *Janizaries*, but the Soldiers in Pay are generally Renegado's. *Italian* is commonly spoke at *Tunis*, and *French* is well understood.

Particular Garbs.

The Punishment of Offenders.

The Punishment inflicted on Men for their Crimes at *Tunis* differ according to the Quality of the Criminals, as well as the Offences themselves. When a *Turk* in Pay deserves Death, he is never executed publickly, but in some Chamber. They set him down in a Chair, and 2 Christian Slaves pulling at each End of a Cord, which is about his Neck, quickly strangle him. The *Turks*, or *Moors* of mean Condition are hang'd upon the Outside of the Walls, the Halter by which they are strangled being put thro' an Hole of it, and the Malefactor being push'd down. Maids and Women which deserve Death are choak'd in the *Ooze* by the Sea-side, their Heads being put into it, and a Man setting his Feet upon their Necks. They have very cruel Punishments for such Renegado's as turn Christians again. They wrap them up in a pitched Cloath, put a Cap of the same upon their Heads, and then make a Fire round them; or otherwise they put them to a crueller Death, by walling up their whole Body, that nothing but their Heads are left out, which they smear over with Honey, and leave them so exposed for 3 Days and as many Nights to the Discretion of the Flies, which sting them to Death in less time. The Slaves are punished with Bastinado's, or they cut off their Ears or Noses, according to the Quality of their Offences. If a Slave kill his Master, or any other *Turk*, they break his Legs and Arms, then tie him to an Horse's Tail, and after they have dragg'd him about the Town, strangle him, and give him to the *Franks* to be buried; but most commonly the Boys take him from the Executioner (for there are no ruder Boys in the World) and drag him about as long as they please, sometimes roast his Body, and then throw him into the Town-Ditch.

1. Of Men.

2. Of Women.

3. Apostates

4. Slaves.

The *English* dwell by themselves, and have a Burying-place of their own, and lately the *Franks* have built them an *Oquelle* for that End.

The *English*.

From *Tunis* he went on Horse-back to see *Carthage*, which is about 3 Lgs. from *Tunis*. It is now nothing but Ruines, yet there are visible the Remains of stately Aqueducts, which convey'd the Water from *Zagouan* to *Carthage*, great Cisterns made of Marble and other Stones; but the People are daily almost carrying them away to build Houses at *Tunis*, and in the Country between.

Carthage.

Here he took Ship and sailing between *Sardinia* and *Corsica*, came to the Isle of *Elba*. This Island is divided between the *Spaniards* and the Duke of *Tuscany*. It hath 2 Ports; the one, which is called *Porto Ferraro*, belongs to the Great Duke of *Tuscany*; and the other, which is called *Porto Longone*, belongs to the *Spaniards*. The *French* took it in 1646. but lost it again 4 Years after.

The Isle of *Elba*.

Then he sail'd by a little Isle, called *Caprara*. This Island belongs to the *Genoese*, is not above 10 Miles in Circumference, but bears good Wine plentifully. On the S. side of it there is a little Tower, and a Castle on the N. side, which has 50 Soldiers in Garrison, and about 100 Inhabitants, who are so much given to Shooting (there being store of Game upon the Island) that for 5 or 6 Pound of Powder they'll give you a Barrel of Wine, and Thanks to boot. Here, and before the Island of *Gorgona*, they fish for Anchovies, and in the Season for this Fishing there are so many Boats come, that about *May* there are above 500 Men lodged in the Castle.

The Isle of *Caprara*.

The Isle of *Gorgona*.

From hence he sail'd, and was in his Way attack'd by a *Spanish Corsair*, and 2 other Vessels, over which having attain'd a signal Victory, his Ship arriv'd safe, and with Joy, at *Leghorn*, a Port in the Dominion of the Great Duke of *Tuscany*.

A N

AN Historical Account OF THE Island of *CEILON* in the *EAST-INDIES*:

Written by *Robert Knox*, a Captive there near Twenty Years.

IMPROVED

With all necessary Additions taken out of the History of Capt. *John Ribeyro*, a *Portuguese*, who has also written about the said Island.

Ceilon inaccessible by *Europeans.*

THE Island of *Ceilon* being inhabited for the greatest part by *Barbarians*, which will not allow any Trade or Commerce with any *European* Nation, and inaccessible by any Travellers, it will be convenient to relate the Occasion how the Author of this History happen'd to go into this Island, and what Opportunities he had of being fully acquainted with the People, their Laws and Customs, that so we may the better depend upon the Account, and value it as it deserves, for the Rarity, as well as the Truth of it, and both these the Author gives us a brief Relation of in this Manner.

1657. The Occasion of the Author's going to *Ceilon.*

In the Year 1657. the *Ann* Frigat of *London*, Capt. *Robert Knox* Commander, on the 21st Day of *January* set Sail out of the *Downs*, in the Service of the Honourable the *East-India* Company of *England*, bound for Fort St. *George*, on the Coast of *Cormandel*, to trade for one Year from Port to Port in *India*, which having performed, as he was lading his Goods to return for *England*, being in the Road of *Matlipatan*, on the 19th of *November*, 1659. there happen'd such a mighty Storm, that in it several Ships were cast away, and he was forced to cut his Main-Mast by the Board, which so disabled the Ship, that he could not proceed in his Voyage; whereupon *Coriar*, in the Island of *Ceilon* being a very commodious Bay, fit for her present Distress, *Thomas Chambers*, Esq; (since Sir *Thomas*) the Agent at Fort St. *George*, order'd, that the Ship should take in some Cloth and *Indian* Merchants belonging to *Porta Nov*, who might trade there, till she lay to set her Mast, and repair the other Damages sustain'd by the Storm. At her first coming thither, after the *Indian* Merchants were set on Shore, the Captain and his Men were very jealous of the People of the Place, by reason the *English* never had any Commerce or Dealing with them; but after they had been there 20 Days, and going ashore, and returning again at Pleasure, without any Molestation, they began to lay aside all suspicious Thoughts of the People that dwelt thereabouts, who had kindly entertain'd them for their Monies.

Sir *Thomas Chambers* Agent at Fort St. *George.*

King of *Ceilon*'s Messenger to Capt. *Knox.*

By this time the King of the Country had Notice of their Arrival, and not being acquainted with their Intents, he sent down a *Dissauva*, or General, with an Army to them, who immediately sent a Messenger on purpose to the Captain on Board to desire him to come ashore to him, pretending a Letter from the King. The Captain saluted the Message with Firing of Guns, and ordering his Son *Robert Knox* and Mr. *John Loveland*, Merchant of the Ship, to go ashore and wait on him. When they were come before him, he demanded, *Who they were, and how long they should stay?* They told him, *They were* English *Men, and not to stay above 20 or 30 Days, and desired Permission to trade in his Majesty's Port.* His Answer was, *That the King was glad to hear that the* English *were come into his Country, and had commanded him to assist them, as they should desire, and had sent a Letter to be delivered to none but the Captain himself.* They were then 12 Miles from the Sea-side, and therefore reply'd, *That the Captain could not leave his Ship to come so far, but if he pleased to go down to the Sea-side, the Captain would wait on him to receive the Letter:* Whereupon the *Dessauva* desired them to stay that Day, and on the Morrow he would go down with them, which, rather than displease him in so small a Matter, they consented to. In the Evening the *Dissauva* sent a Present to the Captain of Cattle, Fruits, *&c.* which being carried all Night by the Messengers, was delivered to him in the Morning, who told him withal, That his Men were coming down with the *Dissauva*, and desired his Company on Shore against his coming, having a Letter from the King to deliver into his own Hand. The Captain mistrusting nothing, came ashore with his Boat, and sitting down under a Tamarind-Tree, waited for the *Dissauva*. In the mean time the Native Soldiers privately surrounded him, and the 7 Men he had with him, and seizing them, carried them to meet the *Dissauva*, bearing the Captain in an Hammock on their Shoulders.

A Present sent to him.

Capt. Knox taken Prisoner.

The next Day the Long-Boats Crew, not knowing what had happen'd, came ashore to cut down a Tree to make Cheeks for the Main-Mast, and were made Prisoners after the same Manner, tho' with more Violence, because they were more rough with them, and made Resistance; yet they were not brought to the Captain and his Company, but quarter'd in another House in the same Town.

The *Dissauva* having thus gotten 2 Boats and 18 Men, his next Care was to gain the Ship; and to that End, telling the Captain, That he and his Men were only detain'd, because the King intended to send Letters with a Present to the *English* Nation by him, desired him to send some Men on Board his Ship to order her Stay, and because the Ship was in danger of being fired by the *Dutch*, if she stay'd long in the Bay, to bring her up the River. The Captain did not approve of the Advice, but dare not own his Dislike, and so sent his Son with the Order, but with a solemn Conjuration to return again, which he accordingly did, bringing a Letter from the Company in the Ship, *That they would not obey the Captain, nor any other, in this Matter, but were resolv'd to stand on their own Defence.* This Letter satisfied the *Dissauva*, who thereupon gave the Captain Leave to write for what he would have brought him from the Ship, pretending that he had not the King's Order to release them, tho' it would suddenly come.

Mr. *Knox* obtains a Bible miraculously.

The Captain seeing he was held in Suspence, and the Season of the Year spending for the Ship to proceed on her Voyage to some Place, sent Order to Mr. *John Burford*, the chief Mate, to take Charge of the Ship, and set Sail to *Porta Nova*, from whence they came, and there to follow the Agent's Order.

He Zeal to buy it.

And now began that long and sad Captivity they all along fear'd. The Ship being gone, the *Dissauva* was called up to the King, and they were kept under Guards a while, till a special Order came from the King to part them, and put them one in a Town for the

the Conveniency of their Maintenance, which the King ordered to be at the Charge of the Country.

Capt. *Knox* and his Son placed at *Bender Coos-wat*, where he died.

On *Sept.* 16. 1660. the Captain and his Son were placed in a Town, called *Bender Coos-wat* in the Country of *Hotcurly*, distant from the City of *Candi* Northward 30 Miles, and from the rest of the *English* a full Day's Journey. Here they had their Provisions brought them twice a Day without Money, so much as they could eat, and as good as the Country yielded. The Situation of the Place was very pleasant and commodious; but that Year that Part of the Land was very sickly by Agues and Fevers, of which many died. The Captain and his Son after some time were visited with the common Distemper, and the Captain being also loaded with Grief for his deplorable Condition, languish'd more than 3 Months, and then died, *Feb.* 9. 1660.

Captain *Knox*'s Burial, and his Son's Trouble about it.

Robert Knox, his Son, being now left desolate, sick and in Captivity, having none to comfort him but God, who is the Father of the Fatherless, and hears the Groans of such as are in Captivity, began alone to enter upon a long Scene of Misery and Calamity, oppressed with Weakness of Body and Grief of Soul for the Loss of his Father, and his remediless Trouble that he was like to endure. And the first Instance of it was in the Burial of his Father; for he sent his black Boy to the People of the Town to desire their Assistance, because he understood not their Language; but they sent him only a Rope to drag him by the Neck into the Woods, and told him, *That they would afford him no other Help, unless he would pay for it.* This barbarous Answer encreased his Trouble for his Father's Death, that now he was likely to lie unburied, and be made a Prey to the wild Beasts in the Woods, for the Ground was very hard, and they had not Tools to dig with, and so 'twas impossible for them to bury him; but having a small Matter of Money left him, *viz.* a Pagoda and a Gold Ring, he hired a Man, and so buried him in as decent a Manner as their Condition would permit.

His dead Father being thus removed out of his Sight, but his Ague continuing, he was reduced very low, partly by Sorrow, and partly by his Disease. All the Comfort he had was to go into the Woods and Fields with a Book (*viz.* either *The Practice of Piety*, or Mr. *Roger*'s *Seven Treatises*, which were the only 2 Books he had) and meditate and read, and sometimes pray, in which his Anguish made him often insert *Elijah*'s Petition, *That he might die*, because his Life was a Burthen to him. God, tho' he was pleased to prolong his Life, yet he found a Way to lighten his Grief by removing his Ague, and granting him a Desire, which above all things was acceptable to him. He had read his 2 Books over so often, that he had them both almost by Heart, and tho' they were both pious and good Writings, yet he long'd for the Truth from the Original Fountain, and thought it his greatest Unhappiness that he had not a Bible, and did believe he should never see one again: But, contrary to his Expectation, God brought him one after this Manner. As he was fishing one Day with his black Boy to catch some Fish to relieve his Hunger, an old Man passed by them, and asked his Boy, whether his Master could read, and when the Boy had answer'd, *Yes*, he told him, *That he had gotten a Book from the* Portuguese *when the left* Columbo, *and if his Master pleased he would sell it him.* The Boy told his Master, who bad him go and see what Book it was. The Boy having served the *English* some time, knew the Book, and as soon as he had got it into his Hand, came running to him, calling out before he came at him, *'Tis the Bible.* The Words startled him, and he flung down his Angle to meet him, and finding it true, was mighty rejoyced to see it, but yet was afraid he should not have enough to purchase it, tho' he was resolv'd to part with all the Money he had (which was but one *Pagoda*) to buy it; but his black Boy perswading him to slight it, and leave it to him to buy it, he at length obtain'd it for a knit Cap.

Mr. *Knox* obtains a Bible miraculously.

His Zeal to buy it.

This Accident he could not but look upon as a great Miracle, that God should bestow upon him such an extraordinary Blessing, and bring him a Bible in his own Native Language in such a remote Part of the World, where his Name was not known, and where it was never heard of that an *English* Man had ever been before. The Enjoyment of this Mercy was a great Comfort to him in his Captivity, and though he wanted no bodily Convenience that the Country did afford (for the King immediately after his Father's Death had sent an expres Order to the People of the Town that they should be kind to him, and give him good Victuals; and after he had been some time in the Country, and understood the Languge, he got him good Conveniencies, as an House and Gardens, and falling to Husbandry, God so prosper'd him, that he had Plenty not only for himself, but to lend others, which being, according to the Custom of the Country, at 50 *per Cent.* a Year, much enrich'd him; He had also Goats, which serv'd him for Mutton, and Hogs and Hens. Notwithstanding this Plenty, I say (for he lived as finely as any of their Noblemen) he could not so far forget his Native Country, as to be contented to dwell in a strange Land, where there was to him a Famine of God's Word and Sacraments, the Want of which made all other Things to be of little Value to him; and therefore as he made it his daily and fervent Prayer to God in his good time to restore him to both, so at length he, with one *Stephen Rutland*, who had lived with him 2 Years before, resolv'd to make their Escape, and about the Year 1673. meditated all secret Ways to compass it. They had before taken up a Way of Peddling about the Country, and buying Tobacco, Pepper, Garlick, Combs, and all sorts of Iron-Ware, carried them into those Parts of the Country, where they wanted them: And now to promote their Design, as they went with their Commodities from Place to Place, they discoursed with the Country-People (for they could now speak their Language well) concerning the Ways and Inhabitants; wherre the Isle was thinnest and fullest Inhabited; where and how the Watches lay from one Country to another; and what Commodities were proper for them to carry into all Parts, pretending that they would furnish themselves with such Wares as the respective Places wanted. None doubted but that they did upon the Account of Trade, because Mr. *Knox* was so well seated, and could not be supposed to leave such an Estate, and run away. By Enquiry they found, that the easiest and most probable Way to make an Escape was by travelling Northward, because that part of the Land was least inhabited; and so furnishing themselves with such Wares as were vendible in those Parts, they set forth, and steer'd their Course towards the N. Parts of the Isle, knowing very little of the Ways, which were generally intricate and perplex'd, because they have no publick Roads, but a Multitude of little Paths from one Town to another, and those often changing; and for white Men to enquire about the Ways was very dangerous, because the People would presently suspect their Design.

His Prosperity in his Captivity.

His Desire of the Gospel and Sacraments and Love to his Country.

His Trading, and for what End.

His Traffick Northward.

At this time they travell'd from *Candi Uda* as far as the County of *Neurecalava*, which is in the furthest Parts of the King's Dominions, and about 3 Days Journey from their Dwelling. They were very thankful to Providence that they had passed all Difficulties so far; but yet durst not go any further, because they had no Wares left to traffick with, and it being the first time they had been absent so long from Home, they fear'd the Towns-men would come after them to seek for them, and so they return'd Home, and went 8 or 10 times with their Wares into those Parts, till they became well acquainted both with the People and the Paths.

In these Parts Mr. *Knox* met his black Boy, whom he had turn'd away divers Years before. He had now got a Wife and Children, and was very poor; but being acquainted with those Quarters, he not only took Directions of him, but agreed with him for a good Reward to conduct him and his Companion to the *Dutch*. He gladly undertook it, and a Time was appointed between them; but Mr. *Knox* being disabled by a grievous Pain, which seiz'd him on his Right-side, and held him 5 Days, that he could not travel, this Appointment proved in vain; for tho' he went as soon as he was well, his Guide was gone into another Country about his Business, and they durst not at that time venture to run away without him.

Mr. *Knox* meets his Black.

These Attempts took up 8 or 9 Years, various Accidents hindring their Designs, but most commonly the dry Weather, because they fear'd in the Woods they should be starv'd with Thirst, all the Country being in such a Condition almost 4 or 5 Years together for lack of Rain.

Drought frequent in *Ceilon*.

On *Sept.* 22. 1679. they set forth again, furnish'd with Knives and small Axes for their Defence (because they could carry them privately) and several sorts of Wares to sell, as formerly, and all necessary Provisions, the Moon being 27 Days old, that they might have Light to run away by, to try what Success

Mr. *Knox* and his Friend attempt an Escape.

ceſs God Almighty would now give them in ſeeking their Liberty. Their firſt Stage was to *Anarodgburro*, In the Way to which lay a Wilderneſs, called *Parroah Mocolane*, full of wild Elephants, Tigers and Bears; and becauſe 'tis the utmoſt Confines of the King's Dominions, there is always a Watch kept.

Their Fears and Way of Flight.

In the midſt of their Way they heard, that the Governour's Officers of theſe Parts were out to gather up the King's Revenues and Duties, to ſend them up to the City; which put them into no ſmall Fear, leſt finding them, they ſhould ſend them back again; whereupon they withdrew to the Weſtern Parts of *Eepoulpot*, and ſat down to Knitting till they heard that the Officers were gone. As ſoon as they were departed they went onwards of their Journey, having gotten a good Parcel of Cotton-Yarn to knit Caps with, and having kept their Wares, as they pretended, to exchange for dried Fleſh, which was ſold only in thoſe lower Parts. Their Way lay neceſſarily thro' the Governour's Yard at *Collinila*, who dwells there on purpoſe to examine all that go and come. This greatly diſtreſſed them, becauſe he would eaſily ſuſpect that they were out of their Bounds, being Captives; however, they went reſolutely to his Houſe, and meeting him, preſented him with a ſmall Parcel of Tobacco and Betel, and ſhewing him their Wares, told him, That they came there to get dry'd Fleſh to carry back with them. The Governour did not ſuſpect them, but told them, He was ſorry they came in ſo dry a Time, when no Deer could be catched; but if ſome Rain fell he would ſoon ſupply them. This Anſwer pleaſed them, and they ſeem'd contented to ſtay, and accordingly abiding with him 2 or 3 Days, and no Rain falling, they preſented the Governour with 5 or 6 Charges of Gun-powder, which is a Rarity among them, and leaving a Bundle at his Houſe, they deſired him to ſhoot them ſome Deer, while they made a Step to *Anarodgburro*. Here alſo they were put into a great Fright, by the coming of certain Soldiers from the King to the Governour to give him Orders to ſet a ſecure Guard at the Watches, that no ſuſpicious Perſons might paſs, which tho' it was intended only to prevent the Flight of the Relations of certain Nobles whom the King had clapp'd up, yet they fear'd they might wonder to ſee white Men here, and ſo ſend them back again: But God ſo order'd it, that they were very kind to them, and left them to their Buſineſs, and ſo they got ſafe to *Anarodgburro*. Their Pretence was for dry'd Fleſh, tho' they knew there was none to be had; but their real Buſineſs was to ſearch the Way down to the *Dutch*, which they ſtaid 3 Days to do: But finding that in the Road to *Jafnapatan*, which is one of the *Dutch* Ports, there was a Watch which could hardly be paſſed, and other Inconveniences not ſurmountable, they reſolved to go back, and take the River *Malwatoyah*, which they had before judged would be a probable Guide to lead them to the Sea; and that they might not be purſued, left *Anarodgburro* juſt at Night (when the People never travel for fear of wild Beaſts) on *Sunday*, *Octob.* 12. being ſtored with all Things needful for their Journey, *viz.* Ten Days Proviſion, a Baſin to boil their Proviſion in, 2 Calabaſhes to fetch Water in, and 2 great Tallipat-Leaves for Tents, with Jaggory, Sweet-meets, Tobacco, Betel, Tinder-Boxes, and a Deer-Skin for Shooes, to keep their Feet from Thorns, becauſe to them they chiefly truſted. Being come to the River, they ſtruck into the Woods, and kept by the ſide of it, yet not going on the Sand, leſt their Footſteps ſhould be diſcern'd, unleſs forced, and then going backwards.

Their Fear of Anarodgburro.

They follow the River and the Sand of the Woods.

Being gotten a good way into the Wood, it began to rain, wherefore they erected their Tents, made a Fire, and refreſh'd themſelves againſt the Riſing of the Moon, which was then 18 Days old, and having tied Deers-Skin about their Feet, and eaſed themſeves of their Wares, they proceeded in their Journey. When they had travell'd 3 or 4 Hours with Difficulty, becauſe the Moon gave but little Light among the thick Trees, they found an Elephant in their Way before them, and becauſe they could not ſcare him away, they were forced to ſtay till Morning, and ſo they kindled a Fire, and took a Pipe of Tobacco. By the Light they could not diſcern that ever any Body had been there, nothing being to be ſeen but Woods, and ſo they were in great Hopes, that they were paſt all Danger, being beyond all Inhabitants; but they were miſtaken, for the River winding Northward, brought them into the midſt of a Parcel of Towns, called *Tiſſea Wava*, where being in danger of being ſeen, they were under a mighty Terrour (for had the People found them, they would have beat them, and ſent them up to the King) and to avoid it, they crept into an hollow Tree, and ſat there in Mud and Wet till it began to grow dark, and then betaking themſelves to their Legs, travell'd till the Darkneſs of the Night ſtopt them. They heard Voices behind them, and fear'd that 'twas ſome Body in Purſuit of them; but at length diſcerning 'twas only an Hollowing to keep the wild Beaſts out of the Corn, they pitched their Tents by the River, and having boiled Rice and roaſted Meat for their Suppers, and ſatisfied their Hunger, they commended themſelves to God's Keeping, and laid them down to ſleep.

Many Difficulties they encounter.

Their great Fears.

The next Morning, to prevent the worſt, they got up early, and haſten'd on their Journey, and tho' they now were got out of all Danger of the tame *Chingulays*, they were in great Danger of the wild ones, of whom thoſe Woods were full; and though they ſaw their Tents, yet they were all gone ſince the Rains had fallen from the River into the Wood, and ſo God kept them from that Danger; for had they met the wild Men they had been ſhot.

They are in great Danger of the wild Chingulays.

Thus they travell'd from Morning to Night ſeveral Days thro' Buſhes and Thorns, which made their Arms and Shoulders, which were naked, all of a Gore-Blood. They often met with Bears, Hogs, Deer, and wild Buffaloes; but they all run away as ſoon as they ſaw them. The River was exceeding full of Allegators. In the Evenings they uſed to pitch their Tents, and make great Fires both before and behind them, to affright the wild Beaſts, and tho' they heard the Voices of all ſorts, they ſaw none.

On *Thurſday* at Noon they croſs'd the River *Coronda Oyah*, which parts the Country of the *Malabars* from the King's, and on *Friday* about 9 or 10 in the Morning came among the Inhabitants, of whom they were as much afraid as of the *Chingulays* before; for tho' the *Wanniounay*, or Prince of this People, payeth Tribute to the *Dutch* out of Fear, yet he is better affected to the King of *Candi*, and if he had took them, would have ſent them up to their old Maſter; but not knowing any Way to eſcape, they kept on their Journey by the River-ſide by Day, becauſe the Woods were not to be travell'd by Night for Thorns and wild Beaſts, who came down then to the River to drink. In all the *Malabars* Country they met with only 2 *Bramins*, who treated them civilly, and for their Money one of them conducted them till they came into the Territories of the *Dutch*, and out of all Danger from the King of *Candi*, which did not a little rejoyce them; but yet they were in no ſmall Trouble how to find the Way out of the Woods, till a *Malabar* for the Lucre of a Knife conducted them to a *Dutch* Town, where they found Guides to direct them from Town to Town, till they came to the Fort, called *Arrepa*, where they arriv'd *Saturday*, *Octob.* 18. 1679. and there thankfully ador'd God's wonderful Providence in thus compleating their Deliverance from a long Capivity of 19 Years and 6 Months.

They enter the Country of the Malabars.

Their Acceptable Dutch Entertainment.

The *Hollanders* much wonder'd at their Arrival, it being ſo ſtrange that any ſhould eſcape from *Candi*, and entertain'd them kindly that Night, and the next Morning, being *Sunday*, ſent a Corporal with them to *Manaar* to the Governour there; but he being abſent, they were brought to the Captain of the Caſtle, who received them with a great deal of Kindneſs, and ſet them down at his Table, tho' they were in ſuch an Habit, as they ſeem'd not fit to eat with their Servants or Slaves. After Dinner the Captain enquired of them concerning the Affairs of the King of *Candi* and his Country, and the Condition of ſome *Dutch* Ambaſſadors detain'd there. To all which they gave him ſatisfactory Anſwers.

Their Eſcape wonder'd at by the *Dutch*.

Their Entertainment among the *Dutch*.

The News of their Arrival being ſpread in the Town, the People went flocking to ſee them, as a ſtrange and wonderful Sight, and ſome to enquire about their Husbands, Sons and Relations, which were Priſoners in *Candi*. The *Engliſh* alſo in the Caſtle entertain'd them nobly with Rack and Tobacco. Ten Days after their arrival at *Manaar*, the chief Governour arriv'd, who carried them the next Day to *Columbo* with him, where they were joyfully welcom'd by all the *Engliſh* out of their long Captivity, and the next Day were called before the Governour, whoſe Name was *Ricklof Van Gons*, the General of *Batavia*'s Son. He alſo welcom'd them from their Captivity, and enquired of them many Things concerning

cerning the King of *Candi* and his Country; what Parts of the Land they had lived in, and how they eſcaped, and what was their Intereſt? And when they anſwered, *To have Paſſage at Fort St. George to their own Nation*, thereupon the Governour gave them Money, and order'd them to be cloathed, and carried them along with him to *Batavia*, where he arrived *Jan.* 5. 1679. Here they alſo met with kind Entertainment, and were again cloathed. The ſame Queſtions alſo were put to them about *Ceilon*, and Paſſage was offer'd them with the General's Son: but there happening to come 2 *Engliſh* Merchants thither from *Bantam*, the General permitted them to go along with them, where being arrived, the *Engliſh* Agent kindly entertain'd them, and not being willing they ſhould return again to the *Dutch* for their Paſſage, ſince God had brought them to their own Nation, he order'd their Paſſage in the good Ship *Cæſar*, lying then in the Road bound for *England*, their long wiſh'd-for Port, where they arrived ſafely *Sept.* 1680.

Their Return Home, and Mr. Knox made Captain.

Mr. *Knox* being thus return'd Home by God's miraculous Providence, was not long after employ'd again in the Service of the *Eaſt-India* Company, being made Captain of the *Tarquin* Merchant; and being ſollicited by his Friends, and eſpecially the ingenious Mr. *Robert Hooke*, F. R. S. to give an Account of the Country where he was ſo long a Captive, he, tho' unwillingly, wrote the Hiſtory following.

CHAP. I.

A general Deſcription of the Iſland, with the Cities and Towns of greateſt Note in it.

Mr. Knox refers us to the Sea-Charts for its Situation, as needleſs to be let down.

THE Iſland of *Ceilon*, known to the ancient *Romans* and *Greeks* by the Name of *Taprobana*, and to the Authors of the middle Age, *viz. Ammianus Marcellinus*, *Coſmas Monachus*, and all other Eaſtern Writers by the Name of *Serindib*, or *Serindiul*, is extended from the 6th D. of Northern Lat. to the 10th, being in Length from *Point de Galle* to the Point *Das Pedras* 62 Lgs. and in Breadth from *Chilauw* to *Taiquinimal* 47 Lgs. and in Circumference 190 Lgs.] *Ex F. Rib.*

The Portugueſe inhabit the Coaſts, and invade the reſt of the Iſle.

The Sea-Coaſts round about the Iſland were formerly under the Power and Government of the *Portugueſe*, and ſo held for many Years, in which time many of the Natives became Chriſtians, and learned the Language of the *Portugueſe*, which to this Day is much ſpoken in the Country, and the King himſelf underſtands it, and talks it very well. The *Portugueſe* often make Invaſions thro' the whole Iſland, even as far as *Candi*, the Metropolis of it, which they burnt more than once with the Palace and Temples, and at length became ſo formidable, that the King himſelf was forced to pay them 3 Elephants a Year for Tribute. But the middle of the Iſland, *viz. Candi Uda*, ſtanding upon the Mountains, and ſo being well fortified by Nature, could never be brought into Subjection by them, but has always been in Subjection to their own Kings. *Conſtantine Sa*, General of the *Portugal* Army in *Ceilon*, was very ſucceſsful againſt this preſent King, and run quite thro' the Iſland into the Royal City it ſelf, which he burnt, and all the Temples in it. The King, affrighted with this Succeſs, ſent a Letter to him, ſignifying, *That he was willing to become his Tributary*; but he proudly return'd him Anſwer, *That that ſhould not ſerve his Turn, for he ſhould not only be Tributary, but a Slave to his Maſter the King of* Portugal. This haughty Return ſtirr'd the King's Choler, and he preſently ſaid, *That he would fight to the laſt Drop of his Blood before he would ſtoop to that*; and thereupon firſt bringing over ſome Commanders, who were natural *Chingulays*, by Promiſes of great Rewards, he came to a Battle with the *Portugueſe*, and gave them ſuch a total Overthrow, that the General ſlew himſelf, and all the reſt were killed in the Purſuit, ſo that not one eſcaped, as the Report of the Country goes.

Conſtantine Sa's Succeſs.

His total Overthrow.

Lewis Tiſſera General for the Portugueſe.

After him *Lewis Tiſſera* was the General of the *Portugueſe*. He bragg'd of great Things he would do, and ſwore, That he would make the King eat *Coracan Tallipa*, which is a kind of Haſty-Pudding, made of Water and the *Coracan* Flour, which is reckon'd the worſt Fare in the Iſle; but Fortune did not anſwer his Boaſts with a ſuitable Succeſs, for the King took him Priſoner, and put him in Chains in the common Goal, where he made him eat of the ſame Fare he had threatned to give the King.

Simon Carce.

Their next General was *Simon Carce*, a natural *Chingulays*, but baptized. He is ſaid to have been a great Commander, but very cruel; and tho' he was ſucceſsful, yet he knew not how to uſe Succeſs humanly; for he made the *Chingulays*, when he had taken them, to pound their own Children in the Mortars where they beat their Corn.

Gaſpar Figari.

To him ſucceeded *Gaſpar Figari*, who had a *Portugueſe* Father and a *Chingulays* Mother. He was the laſt General they had in this Country, and a brave Soldier, but degenerated not from his Predeceſſors in Cruelty; for he would hang up the Natives, which he took in the Wars, by the Heels, and ſplit them down the Middle. He carried an Ax, wrapt in a white Cloth, into the Field with him, to execute any that he ſuſpected to be falſe to him, or had deſerted, and leſſer Malefactors he puniſh'd only by cutting off their Right-Hands, ſeveral of whom this Author ſaw while he was in that Country. This *Gaſpar* came up one Day to fight againſt the King, who was on his March towards him with the ſame Reſolution, and fell upon his Camp early in the Morning, and gave him one of the greateſt Routs he ever had, the King himſelf very narrowly eſcaping; for had it not been for a *Dutch* Company, which he had a little before entertain'd for his Guards, which after his own Army was fled, turn'd Head, and ſtopt the *Portugueſe* in their Purſuit, he had been ſeiz'd; but in the mean while he got to the Top of the Hills, and was there ſafe.

The King of Ceilon routed.

After this Defeat the King deſpair'd of keeping his Kingdom out of the Hands of the *Portugueſe* without ſome greater Aſſiſtance from the *Dutch*, with whom in the Year 1640. or thereabouts, he had contracted a Friendſhip, and obtain'd from them ſome ſmall Aids, by complaining of the Unjuſtice of the *Portugueſe*, to whom tho' he conſtantly paid the yearly Tribute of 2 Elephants, according to the League he had made with them, yet they at every Turn were troubling his Land with frequent Invaſions and Inſults. The *Dutch* readily granted his Deſires, and offered him what Help he demanded, which was inconſiderable, till upon this Occaſion being more earneſtly ſollicited for an Army, they ſent him 6 Ships well ſtored with Men, Artillery and Ammunition, under the Command of General *Gerald Halſot*, who landed in the Iſle *Sept. ult.* 1655.]

K. of Ceilon enters a League with the Dutch.

The Dutch ſend 6 Ships to his Aid.

Being arriv'd, he conſulted with the Ambaſſadors of the King of *Candi* about their Affairs, and it being agreed, that it was neceſſary for the *Hollanders* to make themſelves Maſters of *Caliture*, they cloſely beſieg'd it, and took it by Capitulation within 14 Days, *viz.* On *Octob.* 14. From this Place the *Dutch* marched towards *Columbo* to beſiege it, and were met *Octob.* 18. by *Gaſpar Figari*, who having often beaten the *Chingulays*, thought his Army invincible, and therefore threatned the *Dutch*, that he would ſerve them as he had done the *Chingulays*. The *Hollanders* told him, That they would make him know, he had other manner of Men and better Soldiers to deal with, and ſo came to a Battle with him. They had before contrived a Stratagem, which he was not aware of, placing ſome Field-Pieces in the Reer of their Army, and after a ſmall Skirmiſh retreated, as if they had been worſted, on purpoſe to draw the Enemy upon the Mouths of their Guns. The *Portugueſe* were eager in their Purſuit; but being come within Shot, the *Dutch* open'd on the ſudden to the Right and Left, and firing their Guns, utterly routed them, and drove

The Dutch fight Figari.

them into *Columbo*. The King's Army after this Defeat join'd with the *Dutch* to carry on the Siege of that important City, and the King himself being present, it was agreed between him and the *Dutch*, That their Enemies the *Portugueſe* being expell'd from thence, it ſhould be delivered by the *Dutch* into the King's Hand, and ſo he join'd with them in the Siege; and 'tis generally reported, that without his Help it could not have been taken. This City held out till *May*, and was reduced to very great Straits for Proviſion before it would ſurrender; for Women eat their own Children through the greatneſs of the Famine, which at length obliged them to yield it up to the *Dutch* upon the 10th of the ſame Month. The King, as ſoon as Things were ſettled, waited a while expecting when the *Dutch* would come and according to their Articles put him in Poſſeſſion of it; but inſtead of that (whether upon any Provocation or no is uncertain) they fell upon the King's Army by Surprize, and took Bag and Baggage from him, and ſo ſettled themſelves immediately in all the Territories, Cities and Provinces adjoining to the Sea, which once belonged to the *Portugueſe*. This perfidious and unjuſt Act provoked the King in ſo high a manner, that he maintains a conſtant Hoſtility againſt them, and forbids his People upon Pain of Death to hold any Commerce with them; ſo that the *Dutch* have enough to do to maintain thoſe Places which they have; for oftentimes the King falls upon them by Surprize, and does them great Damage, ſometimes giving no Quarter, but cutting off the Heads of whomſoever he catches, which are brought up, and hung upon Trees near the City; ſometimes he brings up his Priſoners alive, and keeps them by the High-ways ſide, a Spectacle to the People in Memory of his Victories over them. Not long ſince he took *Bibligom* Caſtle, in the County of *Habberagon*, and demoliſhed the Fort to the Ground, carrying up the Guns to the King's Palace, where they, among others, ſtand mounted on very brave Carriages before his Gate.

Columbo to be deliver'd to the King of *Ceilon*.

The *Dutch* ſettle themſelves in *Ceilon*.

K. of *Ceilon* troubleſom to the *Dutch*.

The *Dutch* being unable to deal with him by the Sword, becauſe they are unacquainted with the Woods, and the manner of Fighting uſed by the *Chingulays*, do endeavour for Peace with him all they can, diſpatching divers Ambaſſadors to him, and ſending great Preſents, honouring him with high Titles, and ſubſcribing themſelves his Subjects and Servants, aſſuring him, that the Forts they build are out of Loyalty to him, and to ſecure his Majeſty's Country from Foreign Enemies. By this means they ſometimes obtain a Permiſſion to keep what they have gotten from him, and ſometimes nothing will prevail with him, he neither regarding their Ambaſſadors, whom he generally keeps Priſoners, nor receiving their Preſents; but taking his Opportunities to ſet on them on a ſudden with his Forces; ſo that the *Dutch* hold their Poſſeſſions there with great Difficulty and Hazard.

The Territories of the *Dutch* in *Ceilon*.

The chief Places which at preſent are under the *Hollanders* are, on the N. Part *Jafnipatan*, on the E. *Trinkimaly* and *Batticalow*, on the S. the City of *Point de Galle*, and on the W. *Columbo*, where the chief Governour hath his Reſidence, *Negumba* and *Colpentine*, beſides other ſmaller Forts and Fortifications, with conſiderable Territories. All theſe Parts of the Iſland are governed by the Cuſtoms and Laws of the *Dutch*, and cannot come properly under any further Conſideration in the Deſcription of this Iſland, which is now only to be view'd ſo far as is in the Poſſeſſion of the Natives, being the Inland Parts of it, now under the Government of the King of *Candi Uda*.

The Diviſion of the Iſland

In this Part of the Iſland are ſeveral large Parts or Diviſions, which we may call Provinces, and not fewer leſſer Shares, called Counties. On the N. ſide lies the Province of *Naurecaleva*, conſiſting of 5 Counties; that of *Hotcourly*, containing 7 Parts. On the E. *Mautaly*, having 3 Counties, beſides *Tennanquod*, *Bintana*, *Vellas* and *Paunoa*, ſingle Counties. *Ouvah* contains 3 Counties, where dwell 32 of the King's Captains with their Soldiers. In the Midland are *Wallaponahoi*, *Poncipot*, *Goddaponahoi*, *Cotemul*, *Horſpot*, *Tunponahoy*, *Oudanour* and *Tottanour*, in which ſtands the Royal City *Candi*. The 2 laſt Counties are the Chief in the Land, very fruitful and populous, inhabited by the principal Men among them; inſomuch, that they ſay, *If they want a King, any Man in them is fit for it*. On the W. lie *Audipollat*, *Dolasbaug*, *Hotteracourly*, which contains 4 Counties; *Portalcon*, *Tuncourly*, containing 3 Counties. Moſt of them lie upon the Hills, called from thence *Condelda*, and the reſt are in the Hands of the *Dutch*. They are divided from each other by great Woods, which none may fell, becauſe they are preſerved for Fortifications. In moſt of them there are Watches kept conſtantly, and in Times of of War in all.

The chief Counties.

Their Land is full of Hills, but exceeding well water'd by divers Rivers of pure and clear Water, which run thro' it, and are very ſerviceable for the Production of Rice, which is their chief Suſtenance. The Rivers *Mavelagonga*, which riſes in the Mountain, called *Adam's Peak*, and runs thro' the whole Land Northward, and that of *Cotemul* are the chief, both of them large and deep, but not navigable, becauſe they are full of Rocks, as are alſo the other Rivers of the Country. There are no Bridges over them, partly becauſe the rapid Streams make it difficult to build any, and becauſe the King will not permit it, leſt his Country be eaſie to travel. They have Plenty of Fiſh, and ſo much the more, becauſe they know not how to catch them.

The chief Rivers of the Iſland.

The whole Iſland is generally covered with Woods, except the Province of *Ouvah*, and the Counties of *Oudipallet* and *Dolasbaug*, which are naturally pretty clear of them. It is moſt populous about the Middle, leſt near the Sea. The Northern Parts are ſomething ſickly by reaſon of the bad Water, but the reſt are very healthful. On the S. ſide of *Candi Uda* is the Hill *Hamalell*, called by the *Portugueſe*, *Adam's Peak*, the higheſt in the Iſland. 'Tis ſharp like a Sugar-Loaf, and on the Top of it is a flat Stone, which hath on it the Print of a Man's Foot, 2 Foot long. The People count it meritorious to worſhip this Impreſſion, and for that End do all go at the Beginning of their Year in *March* thither.

The Iſland very woody.

The Print of a Man's Foot worſhipped.

The Kingdom of *Candi Uda* is ſtrongly fortified by Nature, being encompaſſed with high Hills, which are covered with Woods and great Rocks. There are only ſome narrow Paths over them, which have Gates of Thorns ſet at the Bottom of the Hills and Tops. At the Gates ſtand a Watch to examine all that come and go, that no Slaves nor Priſoners may eſcape. They have no Weapons, but they ſtop People by charging them in the King's Name, which none dare diſobey, becauſe they are moſt ſeverely puniſhed. In Times of War Soldiers are ſet at theſe Gates. The one Part of the Iſle differs much becauſe of the Seaſons from the other; for, when the Weſterly Winds blow, it rains on that Side of the Iſland, and then they ſow their Ground, and at the ſame time the E. Side is fair and dry, and they gather in their Harveſt; and ſo it is on the contrary, when the Eaſt Winds blow, they ſow in the Eaſtern Parts, and 'tis Harveſt in the Weſt. This Weather parts about the Middle of the Iſle at the Mountain called *Cauragashing*. It rains much more on the Hills than Valleys. The N. End is much ſubject to Drought, ſo that ſometimes they do not plow or ſow for 6 Years together; but their is Rain in other Parts of the Iſland, from whence the Northern have their Food.

The Reaſon of the Parts of the Iſle.

Demoliſh'd Cities, and what are now ſtanding, &c.

In ſeveral Places of this Iſland, the People ſay, there were Cities formerly, and tho' they retain the Names, few or no Buildings are to be ſeen. The moſt eminent Cities now ſtanding, where the King hath Palaces and Goods are theſe few:

1. *Candi*, called by the Natives, *Hingodagul-neur*, and *Mauneur*. It ſtands in the Midſt of the Iſland, bravely ſituated for all Conveniences, and excellently water'd. It has no artificial Strength, but is environ'd with Hills, and the Paths to it are fenced with Thorn-Gates and Watches. It is Triangular, and the King's Palace is on the E. Side of it; but he has left it about 40 Years ſince, and never reſided there. The *Portugueſe* have often burnt it, and now it is in great Decay.

1. *Candi*.

2. *Neliemby-neur*, lying in *Oudipollat*, about 12 Miles diſtant from *Candi* on the South. Here is the King's Court.

2. *Neliemby-neur*.

3. *Allout-neur*, ſituate in the Country of *Bintan*, N of *Candi*. Here the King was born, and keeps great ſtore of Corn and Salt, &c. againſt a Time of War. It is water'd with the great River, and has Woods full of Deer, but is ſubject to Drought and Sickneſs. It is much inhabited by the wild People.

3. *Allout-neur*.

4. *Badoula*, in the Province of *Ouvah*, 2 Days Journey from *Candi* on the E. The Country about it is well water'd, and fit for Grazing, being low and ſmooth; yet the Cattle of it will live in no other Country.

4. *Badoula*.

Degligy-neur. 5. *Degligy-neur*, in the Country of *Hevahatt*. Here has been the King's Reſidence ever ſince the Rebellion in 1664. when he was routed from *Nellemby*. It is ſituate in a barren Country; but the King chuſeth it for his own Safety; for it is ſo fenced with ſteep Cliffs, Rocks and Woods, that a few Men can defend againſt a great Army.

A Port. There is a Port in the Country of *Portaloon*, which lies on the W. ſide of the Iſle, by which part of the Iſle is ſupplied with Fiſh and Salt, and maintains a Trade with the *Dutch*; but the E. is ſupplied by the beating of the Sea, which the Sun converts into Salt, and that in ſuch abundance, that they have as much as they pleaſe to fetch, and Salt is the principal Thing [illegible].

Their Towns. As to their Towns, the beſt belong to their Idols, and in them ſtand their *Dewalls*, or Temples. They have no Streets in them; but every Man lives alone by himſelf in his own Plantation, which uſually has an Hedge and Ditch about it to keep out Cattle. Their Towns always ſtand at ſome Diſtance from the High-way; for they care not to ſee any, but ſuch as have Buſineſs with them. Some of them have above 100 Houſes in them, and ſome not above 8 or 10. Many of their Towns and Cities lie deſolate, becauſe they will forſake them if many are ſick in them, and 2 or 3 die together, becauſe they think it happens from the Hand of the Devil, whom they think to avoid by leaving it.

CHAP. II.

Of their Corn, Fruits and Plants.

Their different ſorts of Corn, as, 1. Rice. THeir Corn is the Staff of their Country, and of it they have divers ſorts, all different from ours in *Europe*. The choiceſt and beſt is Rice, of which they have 5 kinds according to their ſeveral Seaſons of Ripening, tho' in Taſte they diſagree little one from another. One kind requires 7 Months from its ſowing before it comes to Maturity, called *Mauvi*; another 6, called *Hauteal*; another 5, called *Honorowall*; another 4, called *Henit*; and the laſt 3, called *Aulfaricol*. The Price of them all is much the ſame; but the ſooneſt ripe is the moſt ſavoury, tho' it yields the leaſt Encreaſe, and the lateſt the moſt fruitful. It all grows in Water, and they ſow of each ſort of Rice as they know their Water will hold, which they have convey'd from their Rivers and Ponds into their Lands by certain Canals. Where they have no Springs nor Rivers to furniſh them with Water, as it is in the Northern Parts, they ſupply this Defect by ſaving Rain-Water in a certain large Pond, made in the Form of an Half-Moon. Every Town has one or more of theſe, which they let out by little and little upon their Lands. There are Aligators in theſe Ponds, of which the People are afraid, tho' they do no Harm to Men. In this Country they ſow the early ripe Rice uſually for fear their Water ſhould fail. When the Ponds are dry, they tread the Mud with Buffalo's, and ſow it with Rice, caſting Water with Scoops often on it. There is another ſort of Rice, which will ripen tho' it grows not in Water; and this is uſed where they cannot get their Water to overflow it; but 'tis not ſo good.

Ponds for preſerving Rain Water.

The Husbandry of Rice-Ground. The Manner of preparing of their Ground for their Rice is after this manner: They plough their Land, which indeed is all Mud, by reaſon of the Waters ſtanding continually almoſt upon it, with a crooked Piece of Wood a little bigger than a Man's Arm, and very light, that it may be eaſily managed in their ſhort and muddy Lands. They plough with Buffalo's, and do it only to potch it, becauſe the more muddy the Land is, the better. After they have ploughed their Land once, they make up their Banks to keep in their Water, and lay them very ſmooth on the Top for Foot-Paths; which being done, they lay their Land under Water a while, and then ploughing is again, they ſow their Seed, which is in the mean time thus prepar'd: They lay their Corn aſoak in Water a whole Night, and the next Day taking it out, lay it on an Heap for 5 or 6 Days, till it grows, and then wetting it again, let it lie till it has Blades and Roots, which will be in 8 Days, or thereabouts. Then they ſow it with very great Exactneſs, ſtrewing it with their Hands as we ſtrew Salt upon Meat. After it is ſown they let it ſtand without Water, till it is grown 3 or 4 Inches above Ground, and then overflow it again, and ſo it remains till it is about a Span high, when the Women come and weed it, and pulling it up where it grows too thick, tranſplant it to thoſe Places where it wants, and from this time it ſtands on the Waters till it is ripe. They reap after our *Engliſh* Manner, and the whole Town all begin at one Man's Field, and ſo go on to the reſt, every Man finding them all Victuals while their Corn is reaping. The Women gather up the Corn after the Reapers, and carry it all together. They uſe not Threſhing, but tread out their Corn with Cattle, which is an eaſier and quicker Way; for they'll tread out 40 or 50 Buſhels in a Day with 6 Beaſts. They make a Pit on Purpoſe with certain Magical Ceremonies, and lay their Corn in it. This is the Womens Work, and they receive a certain Fee for it and Weeding, called *Warapol*. They unſhale their Rice after it is threſh'd by beating it in a Mortar or on the Ground; but there is a ſort that muſt be firſt boil'd in the Husk, or it will break to Pieces, and this is the wholſomeſt. And ſo much of their Rice Corn.

Banks about their Land.

The Preparation of their Seed.

Weeding it.

Treading it out with Beaſts.

See Fig. 1.

Beſides Rice, they have ſeveral other ſorts of Corn, which, tho' inferior to it, ſerve the People for Food, when that can't be had; as, 2. *Caracan*, which is a ſmall Seed like Muſtard-Seed. They beat it in a Mortar, and ſo make it into Cakes, which they bake on the Coals. It will gripe ſuch as are not uſed to it. It is alſo of ſeveral ſorts, and grows both in Hills and Valleys, and yields great Encreaſe. 3. *Tanna*, which is much eaten in the Northern Parts, *viz.* in *Candi Uda*, but little ſown, becauſe it yields the greateſt Encreaſe of any Seed in the World, every Ear containing Thouſands of Grains, ſo that no Man ſows above a Pottle. The Women crop it with their Hands when it is ripe, and parching it in a Pan to unhusk it, when beaten in a Mortar, boil it like Rice. It is a dry Food, but very wholſome. 4. *Moung*, a Corn ſomething like Vetches, growing in a Cod. 5. *Omb*, a ſmall Seed, which is boil'd and eaten as Rice; but has this ſtrange Effect, that being eaten when it is new, it will make them that eat it drunk, ſick and ſpue, but not ſo when it is old. 6. *Minere*, a ſmall Seed. 7. *Boumas*, called alſo *Garavances*. 8. *Tolla*, a Seed uſed to make Oil, with which they anoint themſelves, and ſometimes they parch it and eat it with Jagory, a kind of brown Sugar. And ſo much of their Corn.

2. Caracan.

3. Tanna.

4. Moung.

5. Omb.

6. Minere.

7. Boumas.

8. Tolla.

Varieties of Fruit, but not nouriſhed. They have great Plenty and Variety of Fruits, and might have more, but are not careful to nouriſh them, becauſe whereſoever there is any Fruit better than ordinary, the King's Officers, called *Ponudecarſo*, tie a String about it, and then no Man under pain of great Puniſhment, if not Death, may touch them. The Owner is never paid for it, and 'tis well if the Owner himſelf be not forced to carry them to the King, tho' it be never ſo far; ſo that they little regard any ſorts of Fruit, unleſs it be to ſpare their Rice.

The Fruits uſed by them are, 1. Betel-Nuts. The Fruits moſt in uſe amongſt them are, 1. *Betel-Nuts*, which grow only in the S. and W. Sides of the Iſle. They are found only in their Towns. The Trees are tall, and not much bigger than the Calf of a Man's Leg. The Nuts grow in Bunches at the Top, and the Trees will yield ſome 500, others 1000, and others 1500, and every Nut is ordinarily 2 Foot long, and a Foot and half in breadth. The Leaves are 5 or 6 Foot long, and falling off with the Skin, upon which they grow, are of great Uſe to the Country-People, who uſe them for Baſins to eat their Rice in, and when they take a Journey to tie up their Proviſions, becauſe there are no Inns in their Country.

Money is ſcarce among them, but by means of theſe Nuts, which is a great Commodity to carry to the Coaſts of *Cormandel*, they furniſh themſelves with all they want. They uſually ſold 20000 for a Dollar, but now that Trade is forbidden.

2 *Jackes.* 2. *Jackes*, which the Inhabitants call *Polos*, when they are young; *Coſe*, when they are not full ripe; and *Warracha*, or *Vellos*, when they are ripe. Theſe are a great Help to the People, and a great part of their Food, when they have not plenty of Rice. They grow upon a large Tree, and are as big as a Peck-Loaf, the Outſide is prickly like a Hedge-Hog, and of greeniſh Colour. They cut them in Pieces, and boil them. Their Taſte is much like Cabbage, and one of them will ſuffice 6 or 7 Men. They have Kernels in them as big as Cheſnuts, and much like them in Taſte and Colour. Theſe they take out, and roaſt them by the Fire, or bag them up for Proviſions in their Journeys. One *Jack* yields 3 Pints or 2 Quarts of them. When they are cut, there comes out of them a white thick Subſtance like Tar, which ſticks like Birdlime, and the Boys uſe it to catch Birds; but being mix'd with Rice-Flour, it will eat like Eggs.

Their Kernels.

3. *Jombo*, which taſtes much like an Apple, full of Juice, and pleaſant to the Palate, and not unwholſome to the Body. 'Tis delicately painted with White and Red.

3. *Jombo.*

4. Several Fruits in their Woods, which grow wild; as, *Murros*, round like a Cherry, and as big, ſweet to the Palate; *Dongs*, which is like a black Cherry; *Ambelo's*, like Barberries; *Carolla Cabella*, *Cabella-pooke* and *Polla's*, which are like our Plumbs, and well taſted; *Paragidde*, like our Pears; *Coker-nuts*, *Plantins* and *Banana's* of divers Sorts, Taſtes and Names; ſweet and ſowre Oranges; *Limes*, but no Lemmons like ours; *Pautaurings*, in Taſte like a Lemmon, but bigger than a Man's Fiſts put together; Right *Citrons*; *Mangoes* of ſeveral ſorts, a Fruit which the King much delighted in, and had them brought from all Parts to him; *Pine-Apples*, *Sugar-Canes*, *Water-Melons*, *Pomegranates*, *Grapes*, both black and white; *Mirabelins*, *Codjeu's*, and ſeveral others.

4. Wild-Fruits.

Other Trees there are, which tho' they bear no eatable Fruit, yet they are very remarkable, and of great Uſe and Benefit to the Inhabitants, and they are:

Trees that bear no Fruit, but uſeful, as,

1. The *Tallipot-Tree.* It is as big and tall as a Ship's Maſt, and very ſtrait, bearing only Leaves, which are of great Uſe to the People, being ſo large as to cover 15 or 20 Men, and keep them dry from Rains. They fold up like a Lady's Fan, and being dried they are very ſtrong, limber and light. They cut them in Pieces for uſe, and carry them always almoſt in their Hands to skreen them from the Heat of the Sun, ſecure them from the Buſhes as they paſs thro' the Woods, and keep them dry from the Rains in that wet Country. Soldiers all carry them, not only for the Uſes aboveſaid, but to make them Tents to lie under in the Night. Its Leaves grow on the Top, and it bears no kind of Fruit till the laſt Year of its Life, and then 'tis of no uſe, but for Seed, and the Bloſſoms are ſo ſtrong, that if any of them chance to ſtand near an Houſe, they cut it down to avoid the unpleaſant Smell, and then the Pith of it is very good to eat; for being beat in a Mortar to Flour, it taſtes like white Bread, and they make uſe of it inſtead of Corn before their Harveſt is ripe, if they want.

Tallipot-Tree.

Soldiers Tents.

See *FIG.* 2.

2. The *Kettule-Tree*, which grows up ſtrait, but is not ſo tall or big as a Coker-nut-Tree. It yields a Liquor which they call *Tellegie*, and is rarely ſweet and pleaſing to the Palate, and as wholſome to the Body, but no ſtronger than Water. An ordinary Tree will yield ſeveral Gallons a Day, and they boil it up, and make a kind of brown Sugar called *Faggory*; and if they will uſe their Skill they can make it as white as our ſecond beſt Sugar, and for any Uſe 'tis little inferior to it. It bears a Leaf like to that of the Betel-Tree, faſtned to a Skin, which is hard and ſtubborn like a Piece of Board, and full of Stings as ſtrong as Wyre, of which they make Ropes. As long as the Tree is growing the Leaves ſhed; but when the Tree is come to its full Growth they remain many Years upon the Tree before they fall, but when they fall there is no new ones come again; but it buds for ſeveral Years, and then dieth. The Wood of it is not not above 3 Inches thick, mighty ſtrong, and hard to cut, but very apt to ſplit from the Top to the Bottom, becauſe it is full of Pith.

The Kettule-Tree.

Faggory.

'Tis very heavy, ſo that they make Peſtles with it to beat their Rice. The Buds are excellent in Taſte, reſembling Almonds.

3. The Cinnamon-Tree, called in their Language, *Corundah Gouhah*. It grows moſt on the W. Side of the great River *Mavela-gonga*, and is as plentiful in the Woods wild, as Hazels are in *England*. The Trees are not large, but yet of a competent Bigneſs, and the Cinnamon is the Bark or Rind. When it is on the Tree it looks whitiſh, and being pull'd or ſcrap'd from the Tree, they dry it in the Sun. They take it uſually from the ſmaller Trees, tho' the Bark of the greater is as ſweet to the Smell, and ſtrong to the Taſte. The Cinnamon-Tree does not grow generally in all Parts of the Iſle, but chiefly between *Grudumale* and *Tenevare*; nor is it of an equal Goodneſs in that Extent, but the beſt grows between *Ceſta-Vaca* and *Columbo*, and that it may be the beſt, the Tree ought neither to be too young nor too old, and that it be only the middle Bark. *Rib.* p. 11. The Wood is ſoft and white like Fir, and has no Scent. The People never ſpare the Trees, but cut them down for common Uſe, as other Trees. The Leaf is much like that of Lawrel, both in Colour and Thickneſs, ſave that this laſt hath but one main Rib running thro' the middle of it, and that hath 3. The young Leaevs are red like Scarlet, and being bruiſed, ſmell more like Cloves than Cinnamon. The Fruit is ripe in *September*, and is like an Acorn. It has no Smell like the Bark, but being boil'd, makes an Ointment hard and white like Tallow, and ſmells well. They uſe it to cure Aches and Pains, and burn it in their Lamps, for none uſe Candles but the King.

3. The Cinnamon Tree.

Cinnamon.

The Tree deſcribed.

Lamps.

There are alſo many other ſorts of Trees both in their Woods and Gardens, ſome of which bear Berries, which they make Oil of, and others are remarkable for their Strangeneſs, or other Uſes, the chief of which follow.

Strange Trees.

1. The *Orula*, which is as big as an Apple-Tree, and bears a Berry ſomewhat like an Olive. They uſe it in Phyſick for Purges, and being bruiſed and ſteeped in Water, it dyes a very good Black. If any ruſty Iron be laid in it a whole Night, it will become bright, and the Water be as black as Ink, ſo that Men may write with it. They grow but in ſome Parts of the Land, and are not ſo plentiful as Cinnamon. The Berries are ſold by the Drugſters in their Shops in the City.

The Orula.

Ink.

2. *Dounekaia Gouhah*, a Shrub which bears Leaves 2 Fingers wide, but 6 or 8 Foot long, full of Thorns on both Sides, and a Streak of Thorns running down the middle. They ſplit them to weave Matts withal. The Bud which it bears is a Span long like a Sugar-Loaf, covered with Leaves like a Cabbage, but of a lovely yellow Colour, and very ſweet. The Flowers are like a Plume of Feathers, white and ſmall. The Roots they ſplit into Thongs, and then make them into Ropes.

The Dounekaia.

Ropes.

3. The *Capita Gauhah*, a Shrub never bigger than a Man's Arm. The Wood, Rind and Leaves have a Phyſical Smell, and are ſometimes uſed in Medicines. The Leaf is of a brightiſh Green Colour, round like the Palm of a Man's Hand, and rough; but no ſort of Cattel will eat it, no not the Goats that will ſometimes brouze upon rank Poiſon. Theſe Trees grow plentifully in all Countries, but *Ouvah*, and this is ſuppoſed to be the Cauſe that the *Ouvah* Cattel die when they are brought out of it into any other Country, the Smell of the Tree being accounted venomous. To ſweep their Houſes with a Broom made of this Tree keeps them from Fleas. 'Tis excellent Firing, and will burn when it is green. The Goldſmiths uſe no Coal but what is made of this Wood.

The Capita Gauhah.

To cure Fleas.

4. *Rattans*, which are very plentiful, and run like Honey-ſuckles upon the Ground or Trees, and will grow near 20 Fathom long. The Fruit is covered with a Shell or Skin full of Prickles and Thorns, which falls off when it grows ripe. 'Tis like Bunches of Grapes, but every particular Berry is covered with a Husk like a Gooſberry, but ſoft, yellow, and ſcaly like a Fiſh, yet pretty to behold. The Husk being taken off, there grows a Plumb of a whitiſh Colour within, which hath a Stone covered with Meat. The People make a ſowre Pottage of them to quench their Thirſt.

Rattans, and the Fruit.

The uſe of the Fruit.

5. Canes grow juſt like *Rattans*, and bear a Fruit like them, only the Canes are ſomething larger.

Canes.

6. The

The Betel-tree.

6. The *Betel-Tree*, whose Fruit is so much loved and eaten in those Parts, grows like Ivy, twining about Trees or Poles, which they stick in the Ground for it to run upon, and as the Betel grows the Poles grow. The Form of the Leaf is longish, of a bright Green, and very smooth, like a Pepper-Leaf. It bears a Fruit just like long Pepper, but it is not good for Seed, for it falls off and rots upon the Ground; but if they desire to propagate it, they set the Sprigs.

The *Bogahah-Tree.*

7. The *Bogahah-Tree*, or as we may call it, *The God-Tree.* It is much esteem'd and set by, not for its Use or Benefit, but its Holiness. They are very great and spreading, and their Leaves shake like an Asp continually. They grow in all Parts of the Land, because it is held meritorious to plant them. They have a great Veneration for these Trees, and worship them upon a Tradition, That the *Buddow*, a great God among them, when he was upon Earth did use to sit under these Trees; and for that Reason they set up Lamps and Images under them, pave them like a Key, and sweep under them often to keep them clean; and there is a Stone-Table placed under some of them to lay their Sacrifices on. They plant them in Towns and Highways to serve for Shade for Travellers, and also in the Places where the dead Bodies of their Friends have been burnt, as a Memorial of them. It is an Opinion among them, that such as plant these Trees die within a short time after, and go to Heaven, and therefore their oldest Men, who in the Course of Nature are nearest Death, do it, the younger sort desiring to live a little longer in this World before they go to Heaven.

The Planting them.

CHAP. III.

Of their Roots, Plants, Herbs and Flowers.

Roots of divers sorts.

THIS Island produceth great Variety of Roots, useful partly for Food, and partly for Medicine. Such as are commonly used for their Sustenance, called by one common Name, *Alloes*, and by the *Portugueſe* and us, *Inyames*, are of divers sorts, most of them plentiful Bearers, of which some they plant, and others grow wild, being as good as the former, only they are more scarce, and grow deeper. It would be to little purpose to name them all, and therefore it shall suffice to speak a little of them in general. They serve both for Food and Sauce, or for a Relish for their Rice; but they make many a Meal of them alone to lengthen out their Rice, or for want of it; for they cannot want these, if they will be but at the Pains to set them; or, if not, they are bought very cheap. There are 2 sorts of these Alloes; some require Trees or Sticks to run upon, and others require neither. The former sort will run to the Tops of very great Trees, and bear Blossoms and Flowers, but of no Use. The Leaves die every Year, but the Roots thrive, and will grow to a great Bigness, becoming as big as a Man's Waste, something roundish, but in divers odd Shapes. Those that do not run up on Trees are also of sundry sorts, bearing a long Stalk and a broad Leaf: Some of these Roots are also roundish, but others grow out like a Man's Finger, which they call *Angul-Alloes*, i. e. Finger-Roots, and of these some are white and others red. Those that grow in the Woods run deeper into the Earth, and climb the Trees, bearing a Blossom like Hops, and growing to the Bigness of a Man's Arm.

Alloes of two sorts.

Angul-Alloes.

They have also excellent Herbs, and that of several sorts, which they boil and eat with Butter: Some of them are 6 Months growing to Maturity, and rise with a Stalk as big as a Man can reach, and being boil'd, they are almost as good as Asparagus. Some of these have Stalks as red as Blood, and some green, and others have green Leaves, and Stalks very white. They have also divers other sorts of Fruit which they dress and eat with their Rice, and taste very savoury, which they call, *Carowela*, *Wattocul*, *Morongo*, *Cacorehouns*, &c. which are like nothing of that Nature in *England*. Our *English* Herbs and Plants grow very well in their Country, and they have Plenty of them, as, Coleworts, Carrots, Radishes, Fennel, Balsam, Spear-mint, Mustard, &c. all which, except the 2 last, have been transplanted from other Countries hither, and by such Experiments it appears, that other *European* Plants would grow there. They have Fern, *Indian* Corn, several sorts of Beans, as good as any in *England*, right Cucumbers, Calabasses, and several sorts of Pumpkins. The *Dutch* on their Part of this Island have in their Gardens Lettice, Rosemary, Sage, and all other Herbs and Sallетings which grow in their own and other Countries of *Europe*.

Herbs of several sorts.

Carowela, Wattocul, &c.

European Plants will grow here.

Medicinal Herbs are here also found in great plenty, their Woods being their Apothecaries Shops, from whence they fetch Herbs, Leaves and Rinds of Trees, with which they make all their Medicines and Plaisters, and with them sometimes they do notable Cures, of which it may not be amiss to give an Instance or two, because they look miraculous, if compared with our tedious way of curing Distempers. A *Chingulays*, who profess'd the Art of Physick in this Island, would undertake to cure a broken Leg or Arm by the Application of some Herbs, which he gather'd out of the Woods, with that speed, that the broken Bone, after it was set, should knit in the time one might boil a Pot of Rice and 3 *Carrees*, i. e. in the Space of 2 Hours, and accordingly did do it. They will also cure an Impostume in the Throat, by chewing the Rind of a Tree called *Amaranga*, in one Day and Night's time, and swallowing the Spittle, after it is prepared by them. The Author was cured in that Space.

Medicinal Herbs.

Some notable Cures.

There is also great Plenty of Flowers, and many Varieties, all growing wild, because they never plant any. There are Roses, red and white, as sweet-smelling as ours; as also several other sorts of sweet Flowers, which the young Men and Women tie up in their Hairs to perfume them. There are 2 or 3 sorts, which for their Rarity and Use deserve a more particular mention; And the 1st of them is a Flower call'd *Sindric-mal*, of which some are of a *Murry* Colour, and some white: The Nature of it is to open about 4 a Clock in the Evening, and so continue all Night, until the Morning, when it closeth it self up till 4 a Clock again. Some of the Inhabitants transplant them out of the Woods into their Garden, to serve them instead of a Clock, when it is so cloudy that they cannot see the Sun. 2. *Pichamauls*, they bear a white Flower like our ordinary Jasmine, but very well scented. The King hath a Parcel of them brought to him every Morning, wrapp'd up in a white Cloth, hanging upon a Staff, and carried by certain Persons, whose Office it is between them. All People that meet these Flowers, out of Respect to the King, for whose Use they are, must turn out of the Way. These Officers hold Land of the King for this Service, and therefore must always have Plenty of them, and to that End plant them in their own, or any Man's Ground where they delight, which is more-especially by Rivers. 3. *Hopp-mauls*, which are Flowers growing upon great Trees, which bear nothing else; they are extraordinarily sweet-scented, and therefore the young People use it chiefly as a Flower of the greatest Beauty and Vertue in their Isle.

Variety of Flowers.

CHAP.

CHAP. IV.

Of their tame and wild Beaſts, and Inſects.

Several ſorts of Beaſts.

THIS Iſland hath alſo ſome Varieties of living Creatures, *viz.* Beaſts, Inſects, Birds, Fiſh, Serpents *&c.* ſome uſeful, others noxious. We ſhall begin with the Beaſts, of which they have Cows, Buffalo's, Hogs, Goats, Deer, Hares, Dogs, Jackols, Apes, Tygers Bears, Elephants, and other wild Beaſts; but Lions, Wolves, Horſes, Aſſes and Sheep they have none. Their Woods produce great abundance of Deer, from the Largeneſs of a Cow or Buffalo, to the Smallneſs of an Hare. They have a Beaſt called a *Gauvera*, which much reſembles a Bull; his Back ſtands up with a ſharp Ridge, and his Legs are white half way. But the Creature that this Country is famous for above any in *India*, is the Elephant; and therefore I ſhall be more particular in the Relation about it. 1. As to their Manner of taking them; And, 2. Their ſeveral Properties and Qualities.

The *Gauvera*.

The Elephant.

Elephants eaſily catch'd, and how.

This Beaſt, tho' he be ſo big and wiſe, yet he is eaſily catch'd, which is done for 2 Reaſons, either for Pleaſure, as their King does, or for Gain, as the *Portugueſe* formerly did, to ſell them to the *Moors*, and *Mahometans*. When the King commands to catch Elephants, after they have found ſuch as have Teeth, which are but few, and thoſe Males only, they drive ſome She-Elephants into the Woods, which they bring for that Purpoſe; which, when the Males have got a Sight of, they will never leave, but follow them whereſoever they go. Theſe She-Elephants are ſo uſed to it, that they will do whatever their Keeper bids them by Word or Beck, and ſo they lead them thro' the Tows and Countries to the Gates of the King's Palace, where they are either ſnared, or put into a Pound fitted for them, that the King may ſee them, and his Pleaſure be known concerning them, to keep them, or let them go. But the *Portugueſe*, who caught them for Gain, had another way of taking them. They had a very large and ſtrong tame Elephant, called *Ortela*, whom they kept for this Purpoſe, and when they had Notice where the Elephants were, which the Peaſants would not fail to give them, becauſe as they go in Herds, with one great one at the Head of them, ſo they do a great deal of Damage to the Corn by eating it and treading it down with their broad Feet; and they often beat down their Coker-nut-Trees to brouze on, and ſometimes their Houſes; they go out with *Ortela*, and ſome Females with them, which they leave in the Towns near, and ſend him with his 2 Guides into the Woods. As ſoon as the Leader of the Herd ſees him, he will come at him to fight him with all his Force. *Ortela*, with his Guides, advances forward careleſly, and when he comes near him, he claſps him ſo faſt about his Neck with his Trunk, that he cannot ſtir, and holds him till his Guides have fetter'd him before to *Ortela*, and behind. Then they fetch the She-Elephants from the Town, and chain one to him in *Ortela*'s Place, and make the other go by him, and in 3 Days he will grow tame, by keeping him awake. Thus they have catched 30 in a Year, which they ſell according to their Stature, at 1000 *Pardaons* a Cubit, and ſo the leaſt will fetch 8000 or 9000, and the biggeſt 15000, ſomething being given for the good Shapes and Marks.] *Ex J. Rib.*

The *Portugueſe* Way of taking them.

The Elephants Wiſdom and other Properties.

The Wiſdom of this Beaſt is equal to his Bulk, for he will do any thing his Keeper bids him, which is poſſible for a Beaſt not having Hands to do. The *Chingulays* report, that they bear the greateſt Love to their Young of all irrational Creatures; for the She's are tender equally of others young ones, as of their own; ſo that where there are many ſhe Elephants together, the young ones go and ſuck of any, as well as of their own Dams, and if a young one be in Diſtreſs, and cry out, they will all run to help it; and if they be going over a River, as here be ſome pretty broad, and the Streams run very ſwift, they will all with their Trunks aſſiſt to convey the young ones over. They take great Delight to lie and tumble in the Water, and will ſwim excellently well. Their Teeth never ſhed. The tame ones never breed, but when they have a mind to have any young ones of the She's they tie their 2 fore Feet together, and ſend them into the Woods, where they meet with the wild ones, by which they conceive, and go one Year with Young. It is their conſtant Practice to throw down Trees with their Heads, when they are too high for them. The wild ones will run much faſter than a Man, but the tame ones not. The People ſtand much in fear of them, and are often killed by them. They do them alſo great Hurt in their Plantations, when they get into them, by eating and trampling on their Corn and Fruits; ſo that in Towns near to thoſe Woods, where there are plenty of them, they are forced to keep Watch all Night, and when they come affright them with light Torches and Hollowing, by which if they can't be driven out, they make uſe of their Bows to ſhoot them, but not unleſs there be any Trees to ſhelter them; for the Elephant will run upon them and kill them, if they be not very cautious.

Elephants do much hurt.

There be alſo Bears and Tigers in their Woods, but they are not ſo fierce as to aſſault People; but Travellers are in more Danger of Elephants, than any other Beaſts.

Bears & Tygers not in danger of

The King makes uſe of them for Executioners of Malefactors; for they will run their Teeth thro' the Body, and tear it Limb from Limb. They have ſharp Irons with Sockets, with 3 Edges, which they put upon their Teeth at ſuch Times; for the tame Elephants have the Ends of their Teeth cut to make them grow the better, and they will grow again. At ſome times of the Year the Males are mad; ſo that none can rule them. Many times they will run away with their Keepers in their Rage, and throwing them from their Backs, kill them; but commonly they have Notice of it by an Oil running out of their Cheeks, and then they chain them by the Legs faſt to great Trees. The Females are never ſubject to this Malady. The Keepers of the King's Elephants make Sport with them thus. They command them to ſuck up Water firſt, and holding it in their Trunk till they have a Sign, they will ſpout it out a whole Pailful at a time ſo violently at the Perſon mark'd out, that he can hardly ſtand againſt it. [Some Authors have written, that they never lie down; but it is an old Error, they lie all Night, and will couch down whenever they are commanded. In their Journeys, indeed, they never lie down, unleſs they be very weary and tir'd; and then if they lie down, they never riſe again, but die, which has been the Occaſion of the Miſtake, that they never lie down but when they are ready to die.] *Ex J. Rib.*

Elephants uſed for executing Malefactors.

A Trick done by Elephants.

Their Lying down.

They have divers ſorts of Ants worthy of Remark, beſides the ſmall red and black ones, like ours in *England*, viz. 1. *Dimbio's*, which are great red Ants, and make their Neſts upon the Boughs of great Trees, with Leaves wrapt together in Cluſters as big as a Man's Head, in which they lay their Eggs and breed. They often make many Neſts upon a Tree, and where they do ſo none dare venture upon them for the Fruits, for fear of being ſtung.

Ants of divers ſorts.

1. The *Dimbio's*.

2. The *Coura-atch*, a great black Ant. They make deep Holes in the Ground, ſomething like Coney-burrows, but leſs and ſtrait down, where they live, and in ſome Places of the Country there are ſo many, that they Cattle are apt to break their Legs in them.

2. The *Coura-atch*.

3. The *Coddia*, a bright black Ant, which dwells always in the Ground, but in the Day-time are very buſie in going backwards and forwards, like People in trading Cities. They bite deſparately, as bad as if a Man was burnt with a Coal of Fire; but they are of a noble Nature, for they will not begin, and you may ſtand by them, if you do not tread upon them, nor diſturb them. The *Chingulays* fable, That this Power to ſting was given them, becauſe they dared to ask a Wife of the *Noya*, a venomous and noble kind of Snake, which if they had obtained, they ſhould have ſtung as bad as he: But I rather ſuppoſe that they reſpect the Moral, and not the Relation in this, as their other Fables.

3. The *Coddia*.

4. The

4. The *Vaco's*, an Ant of a middle Size, whoſe Hinder-part is white, and Head red. The whole Land ſwarms with them. They eat and devour all that they can come at, except Iron and Stone; as, beſides Food, Cloth, Wood, and the Thatch of Houſes; ſo that People cannot ſet any thing in their Houſes upon the Ground for them. They creep upon the Walls of their Houſes, and always build an Arch over themſelves, how high ſoever they go, eating all things in their Way. They mightily annoy the *Chingulays*, inſomuch, that they are forced to watch every thing they value. In Places where there are no Houſes they raiſe themſelves great Hills like Buts, from 4 to 6 Foot high, which are ſo hard and ſtrong, that they can hardly be dug down with Pick-axes. The *Chingulays* call them, *Humboſſes*. In them are hollow Vaults and Arches, in which they dwell and breed, and their Neſts are like Honey-Combs, full of Eggs and young ones. They are built of pure fine Clay, which the People uſe to make their Earthen-Gods of. Theſe ſort of Creatures when they come to Maturity have Wings, and all that are ripe in an Evening flie up into the Air in ſuch Numbers, as to darken the Sky, as high as they can, and then fall down dead. Such Birds as are not at Rooſt will flie up among them, and make a good Supper of them. Their Poultrey always live on them, and delight to eat them above Rice or any thing, and by ſcraping eaſily find them.

Bees of 3 Sorts.

Bees are the moſt profitable Inſect they have, and are of 3 ſorts. 1. *Meemaſſes*, which are like our *Engliſh* Bee; they build in hollow Trees and the Holes which the *Vaco's* have made. The People drive them out of their Holes by blowing into them, and ſo take their Combs out with their Arms; for they value not their Stinging. 2. *Bamburo's*, larger and of a brighter Colour than our *Engliſh* Bee. Their Honey is thin, and they make their Combs openly upon the Boughs of Trees. In time of Year whole Towns will go into the Woods and gather their Honey, and come home laden with it for their Uſe. 3. The *Connameia*, or blind Bee. They are ſmall like a Fly, and black; their Honey is like Tar, and little regarded, unleſs by the Boys, who ſometimes cut Holes in the Trees, and take it out. When the People find a Swarm of Bees hanging on a Tree, they will hold Torches under them till they make them drop, and taking them, they will boil them and eat them, and ſay they are excellent Food.

Bees eaten.

Leeches.

There is a ſort of Leeches of the Nature of ours, but of a dark reddiſh Colour like the Rind of Bacon, and about 2 or 3 Inches in Length, as big as a Gooſe Quill. In dry Weather they don't appear, but after Rains the Graſs and Woods are full of them. The Legs of Travellers are never free from them, becauſe they go bare-footed, according to the Cuſtom of the Country, and when they have ſuck'd their Bellies full they drop off. 'Tis in vain to pull them off, they crawl on ſo faſt, and are troubleſome; but they bear with them, becauſe they are wholſome. And tho' they are ſo numerous in ſome Countries, there are none in others, nor was it ever known that there was any. They have alſo Water-Leeches like ours.

Monkeys of divers ſorts.

Monkeys abound in their Woods, and are of divers ſorts, ſome as large as our *Engliſh* Spaniels, of a dark gray Colour, and black Faces, but great white Beards from Ear to Ear, like an old Man; others are of the ſame Bigneſs, but Milk-white, both in Body, Face and Beard, but not ſo plentiful as the former. Theſe ſorts do very little Miſchief, keeping in the Woods, and eating only the Leaves and Buds of the Trees, but when they are catched they will eat any thing. Theſe they call in their Language, *Wanderows*. There is another ſort of Apes, which are very numerous, and do much Miſchief in their Corn, which grows near their Woods; for they come in great Multitudes, and tho' they keep Guard, and do all they can to ſcare them, they will get their Bellies and Hands full too, being in ſo many Places together. They have no Beards, but white Faces, and long Hair on the Top of their Heads, that parts like a Man's. They are ſo impudent, as to go into their Gardens, and eat their Fruit. They call theſe, *Rillows*, and account the Fleſh of both ſorts good to eat. There are alſo ſeveral ſorts of Squirrels, which they catch for Food.

1. *Wanderows.*

See *FIG.* 4.

Their Devices for catching theſe wild Beaſts are very ingenious, and therefore I ſhall take notice of ſome of the chief of them. For catching Deer, and ſome other wild Beaſts, they uſe this Contrivance. In a dark Night, when there are driſſling Rains, they have a Basket made of Canes in the Faſhion of a Tunnel, on the Top of which they ſet a Potſhard with a flaming Fire in it, and a Man with 3 or 4 ſmall Bells in his Hands goes into it, and making a jingling with them, that their Treadings may not be heard, he goes into the Woods, and behind him certain Men with Bows and Arrows, who are ſhelter'd from the Sight of the Beaſts by the Basket. Theſe Men go to the Pond Sides, where they know the Beaſts are, and as ſoon as they ſee them, the Beaſts will ſtand ſtill to ſee the ſtrange Sight, and ſuffer them to come as near them as they deſire. They by long Experience, know all the Beaſts by their Eyes, and ſo they ſhoot what ſort they pleaſe; but the wild Hog runs away. Their Arrows are about a Yard long, and the Blades at leaſt a Foot. They will alſo obſerve the Haunt of a Deer, and by placing a Spear ſometimes in it, kill them. If a Tiger kills any of their Cows, they will take notice of the Place thro' which he came, and ſet a Croſs-Bow, ſo that at his next coming it ſhall diſcharge it ſelf upon him. The wild Hog is hardeſt to be taken of any wild Beaſt, and they account it one great Piece of Valour, next to that of fighting their Enemies and hunting the Elephant, to catch Hogs; but they have ſome artificial Ways of taking him; as, 1. By making a Pit, and fixing ſharp Stakes at the Bottom of it, and then covering it lightly with Earth, plant it with Potatoes, and other Roots, which the Hogs love; and when they come to eat them, tho' ſeveral Months after, they break thro' by their Weight, and ſo are taken. 2. They will alſo ſet a falling Trap of exceeding Weight, and plant under it the ſame ſort of Roots, which when the Hog comes to eat, and tread under it, it falls upon them, and they are taken. Sometimes Men are taken in them, and killed. They are alſo very ingenious at catching Birds and Vermin with the like Traps and Gins, which they make of green Sticks and Withs with their Knives only.

Devices to catch wild Beaſts.

The wild Hog not to be taken, thus.

The Way to catch wild Hogs.

CHAP. V.

Of their Birds, Fiſh, Serpents and Commodities.

Divers kinds of Birds.

ANother Sort of living Creatures which this Land produceth is Birds, which are of divers Kinds, *viz.* Crows, Sparrows, Tom-titts, Snipes and Wood-Pigeons, like ours in *England*; but they appear not in ſuch Flocks as ours, unleſs they be Crows and Pigeons. There are alſo Birds like Woodcocks, and Partridges, but they are ſcarce. They have alſo many wild Peacocks and ſmall green Parrots, but not very good to talk. The Bird called *Mal-conda* will ſpeak excellently well with Teaching. It is black, with yellow Gills about the Bigneſs of a Black-Bird. There is alſo another ſort much of the ſame Bigneſs, named *Can-conda*, yellow like Gold, and very beautiful to the Eye, which alſo might be taught to ſpeak. Here are alſo other ſmall Birds not much bigger than a Sparrow, very lovely to behold, ſome being as white as Snow, having a Tail a Foot long, and their Heads as black as Jet, with a Tuft of Feathers ſtanding upright thereon; others are reddiſh like a ripe Orange, with a Tuft of black Feathers on their Head; the one is the Cock, and the other the Hen. They have alſo a Bird which they call, *Carlo*, which never lights on the Ground, but always ſits upon high Trees. He is as big as a Swan, black and very ſhort Legg'd, his Head monſtrous, and Bill very long, a little round like an Hawk. He hath white Spots on each Side of his

The *Mal-conda*.

The *Carlo*.

his Head like Ears, and on the Top of his Head a white Creſt, like a Cock's Comb. They generally keep 4 or 5 together, and are continually hopping from Bough to Bough. They are ſeldom ſilent, but make continually a roaring Noiſe, ſomething like the Quacking of a Duck, which may be heard a Mile. The *Chingulays* ſay, they cry for Rain, that they may drink. The Bodies of theſe Fowls are good to eat.

Their Water-Fowl. They have ſeveral ſorts of Water-Fowl, ſome reſembling our Ducks, but Coal black, which live altogether upon Fiſh. They will remain a wonderful while under Water, and riſe at a great Diſtance; others like Swans, but much larger, which remain about the Ponds and Rivers to catch Fiſh; but the People do not eat them. Nature has endued them with ſuch Craft, that no Allegators can catch them, tho' there be many in their Waters. The Dogs will catch their Peacocks in Rainy Weather, becauſe when their Feathers are wet they cannot flie. The King keeps many Birds tame, as Geeſe, Ducks, Turkeys and Pigeons, but never kills any to eat. None may keep tame Birds but himſelf. He delights not ſo much in Turkeys, becauſe their Heads change Colour.

Store of Fiſh. They have great ſtore of good Fiſh; for not only their Rivers and Ponds, but every Ditch is full of them. They catch them to eat with their Rice, and in Summer time, when their Ponds are near dry, they take abundance of them in Wicker-Baskets like a Tunnel, which by jobbing down in the Mud, incloſeth them; and when the Fiſher perceives them to be in it, by beating againſt the Side, he takes them out, and ſticks them by their Gills upon a Cleft *Rattan*. The great River *Mavela-ganga* is exceeding full of them, and ſome are as big as Salmons. In dry Weather they have a Way of taking them, by ſtretching a With hung full of Boughs over the River, and by drawing it after them, drive them into Pots, which they place between the Rocks, for they have no Nets, nor any other Way of taking them. At a Paſſage near *Candi* the King cauſed great Quantities of Fiſh to be nouriſhed for his Pleaſure, which, tho' now neglected, ſtill keep thereabouts in Expectation, and 'tis common for Paſſengers and others to feed them with Rice, they are ſo tame. In other Rivers alſo the King has Fiſh kept for his Pleaſure, but he never kills any for his Table. The People are much pleaſed with theſe tame Fiſh.

Their Way to catch Fiſh in a River. See *FIG.* 5.

Tame Fiſh.

Sorts of Serpents. The Species of Serpents which are found in this Conntry are: 1. The *Pimberah*, whoſe Body is as big as a Man's Middle, and of a proportionable Length. He is not ſwift, but catches Deer and other Beaſts, on which he preys, by Subtilty, lying in their Paths, and holding them by a Peg, which grows on his Tail. He is ſo greedy, that he will ſwallow a Roe-buck whole, Horns and all; ſo that it happens ſometimes that the Horns run thro' his Belly, and kill him. A Stag being catched by one of theſe Serpents, was at the ſame time ſhot by an *Indian*, at which he gave ſuch a ſtrong Jerk, that he pull'd off the Serpent's Head, while his Tail was twiſted about a Tree to hold him.

1. The *Pimberah*.

A ſtrange Accident.

2. The *Polonga*. 2. The *Polonga*, the moſt venomous Snake, that kills Cattle: They are of 2 ſorts, one Green, and the other a reddiſh Gray, full of white Rings on his Sides, and about 5 or 6 Foot long.

3. The *Noya*. 3. The *Noya*, a poiſonous Snake, about 4 Foot long, and of a grayiſh Colour. He will ſtand with half his Body upright 2 or 3 Hours together, and ſpread his Head wide open like a Pair of Spectacles. The *Indians* call it, *Noy-Rogerati*, *i. e.* The King's Snake, becauſe, as they ſay, 'twill do no Harm. They think, that if they kill one of them, all the other Serpents of the ſame kind will revenge his Death upon the Family of the Murtherer, and devour his Wife, Brethren and Children; and therefore when any of theſe Serpents have bitten a Man, or done them any Damage, they enchant him, and making him to come before them, give him a ſharp Reproof, and then they fancy he will never hurt them more. *J. Rib. p.* 154. But the *Polonga* and *Noya* never meet, but they fall a-fighting, till they kill one another, and the Conqueror eats the Body of him that is vanquiſh'd. The Reaſon of this fatal Enmity between theſe 2 Serpents is, as the *Chingulays* fable, becauſe in a great Scarcity of Water the *Polonga* killed a Child in a Bowl, where the *Noya* had uſed to drink, and never hurt it, tho' it ſtruck him, becauſe he received this Benefit by it; but the *Polonga* being led to it by the *Noya*, bit the Child, becauſe it ſtruck him, and it died, which the *Noya* revenged by killing the *Polongo*, and devour'd him; and ever ſince this Enmity has continued between theſe Serpents, and the *Chingulays*, when they ſee 2 Men irreconcilable, they ſay, they are like the *Noya* and *Polonga*.

A Fable about the *Noya* and *Polonga*.

4. The *Carowalla*, a poiſonous Serpent, about 2 Foot long, which lurks in the Holes and Thatch of Houſes. The Cats will kill them, and eat them. 4. The *Carowalla*.

5. There are other ſorts of Snakes called *Gerende*, whereof there are many, and thoſe not venomous. The former ſorts are few, in Compariſon of theſe who do little Miſchief, but in deſtroying Eggs, young Birds, young Hares and Rabbits, of which laſt there are very few or none wild, becauſe of theſe and other Vermin, as, Polecats, Ferrets and Weaſels. 5. The *Gerende*.

6. *Hickanella*, which is much like a Lizzard, venomous, but ſeldom bites, unleſs he be provok'd. They lie in the Thatch of Houſes. 6. The *Hickanella*.

7. *Talagoya*, a kind of Lizzard alſo, which is found in their Woods; it is of about a Foot long, and a browniſh Colour. Several Perſons that have eat of them ſay, there is no Veniſon that has a better Taſte. 7. The *Talagoya*.

[*Ribeyro* gives us an Account of ſome other ſorts of Serpents, very venomous, of which one, that is about 2 Handfuls long, and of a brown Colour, eſpecially under the Belly, is ſo poiſonous, that if he bites any one, the Perſon falls into a deep Sleep, and unleſs he be immediately help'd, he will die in leſs than 6 Hours: Another ſort makes all thoſe whom he bites mad, and they certainly die within 24 Hours. But the moſt terrible of them all is one, whoſe Poiſon is ſo penetrating and violent, that the Perſon who is bitten bleeds at all his Pores, and is irrecoverable; but of theſe he gives us no Names. He tells us alſo of another ſort, which he heard of, but never ſaw, becauſe 'tis very rare, which gets upon Trees, and when he ſees a Cow, Stag, or Deer, Elephant, or other Animal paſs under him, he darts upon them, and immediately the Fleſh of the Beaſt breaks in Pieces, and putrifies, thro' the Violence of the Poiſon, and the Beaſt never ſtirs after; but nothing appears outwardly, for the Skin is as whole as when the Beaſt was alive, as ſome curious Perſons have found by ſearching them. This Serpent is no bigger than a Viol-String, and not above a Foot long: But he does not deliver this for certain, and ſeems to account it fabulous and incredible.] Some ſorts of poiſonous Snakes without Names.

There are alſo a ſort of Water-Snakes, called *Duberria*, but harmleſs. Allegators, which are very numerous, may be reduced to this ſort of Creatures, of which ſomething is before ſaid. Cattle are often bitten by ſome of theſe Snakes, and as often found dead, but not eaten. When the People are bitten by them, they are cured by Charms or Medicines applied in time. Water-Snakes.

There is a Spider called *Democulo*, very long, black and hairy, ſpeckled and gliſtering. Its Body is as big as a Man's Fiſt, with Feet proportionable. They are very poiſonous, and keep in hollow Trees and Holes. Men bitten with them do not die, but the Pain will ſometimes put them out of their Senſes. Here is alſo a Creature, called *Kobbera-guion*, reſembling an Allegator. The biggeſt of them are 5 or 6 Foot long, ſpeckled black and white. He lives moſt upon the Land, but will take the Water, and dive under it, hath a long blue fork'd Tongue, like a Sting, which he puts forth when he is angry, and hiſſeth and gaſpeth, but doth neither bite nor ſting, tho' the Appearance of him would ſcare thoſe that know not what he is. He is not afraid of People, but will lie gaping and hiſſing in the Way, and will ſcarce ſtir out of it. He will eat Carrion with the Dogs and Jackols, and will not be driven away by them; but if they bark or ſnap at him, he will ſo laſh them with his Tail, which is about an Ell long, like a Whip, that they will run away howling. This Creature is is not eatable. But there is another Creature, much like this, but leſs, called the *Tollaguion*, which is eaten, and reckon'd excellent Meat. The *Chingulays* ſay, 'tis the beſt ſort of Fleſh, and that for this Reaſon: If you eat other Fleſh at the ſame time that you eat of this, and have Occaſion to vomit, you will never vomit out this, tho' you vomit out all the other. This Creature eats no Carrion, but only Leaves and Herbs. It is of a blackiſh Colour, and lives in hollow Trees and Holes in the *Humboſſes*: It may be ſuppoſed the ſame with the *Guiana* in the *Weſt-Indies*. This Country alſo hath its Vermin, as, Rats, Mice, &c. A great Spider. The *Kobbera-guion*. The *Tollaguion*. Rats and Mice.

They

Musk-Rats. They have alſo Musk-Rats, ſo called, becauſe they ſmell ſtrong like Musk; but the Inhabitants do not eat them, as they do all other ſort of Rats.

Precious Stones and Minerals. Many Commodities there are which are the Growth and Product of this Country, as Precious Stones, Minerals, and other valuable Things, of which we ſhall give a brief Account. They have ſeveral ſorts of precious Stones, but none is allow'd to have any, but the King, and he having enough, a Stake is ſet upon the Places where they are found to keep all Perſons from meddling with them, upon Pain of being impaled. [The Stone which is moſt valued among them, is that which is called, *The Cat's Eye*, which is not known to us in *Europe*. They never poliſh it, but only waſh it clean, and it will caſt forth all the lively and brisk Colours which Light can produce, altho' according to the different Poſition of the Eye it ſhews one Colour more than the other, as Cats Eyes do, from whence it takes its Name, tho' theſe Stones much excel them in Variety. They gather theſe Stones out of certain Rivers. Rubies are the precious Stones which are eſteem'd in this Country next to Cats Eyes, and they have the fineſt in the World, and the Saphirs and Topazes are in the next Place. The *Moors* much eſteem the Topazes of *Ceilon*, becauſe they are of a prodigious Bigneſs. They have many other pretty ſorts of Stones, ſome as big as Cherry-Stones, and others as Buttons, and tranſparent, as, *Jacinths*, *Verli's*, *Taripoi's*, and ſeveral others, which they value no more than we do Sand or Flint-Stones.] *Ex J. Rib.*

Cats Eyes.

Rubies.

Jacinths.

Chryſtal. In their Mountains they find ſtore of Chryſtal, white, red and green. They have alſo Iron in great Plenty, of which they can make Steel. Salt-Petre they can alſo make, and Brimſtone is found here; but the King will not have it diſcover'd. Ebony grows here in great abundance, with choice of tall and large Timber. They have alſo Cardamums, Jaggory, Rack, Oil, Black-lead, Turmerick, Salt, Rice, Betel-nuts, Musk, Wax and Pepper, which laſt grows here very well in great Plenty, and if they had Vent for it might be much encreaſed.

Pepper.

The peculiar Commodities of this Iſland is Cinnamon. Wild Cattle and Honey are found in great plenty in their Woods, which any one might have, if they would take Pains to get them; as alſo, Elephants Teeth and Cotton, of which they have ſuch Plenty growing in their own Grounds, as were ſufficient to make them good and ſtrong Cloth for their own Uſe, and ſell it to the Up-lands, where it is ſcarce. Cotton.

All theſe Things the Land naturally yields, and might do it in greater Quantities, if the People were laborious and induſtrious; but the *Chingulays* abhor Work, and will do juſt no more than Neceſſity forces them to, partly out of a natural Love to Lazineſs, and partly becauſe as their Eſtates encreaſe, ſo do their Taxes; for if they are known to have any thing, the Government ſeizes it; nor have they any Encouragement for their Induſtry by Traffick and Commerce. Their Lazineſs.

[Beſides theſe Riches on the Land, there are alſo great Riches gotten by the Pearl-Fiſhing, which is every Year uſed on the Coaſts of this Iſland, from the 11th of *March* to the 20th of *April* by the *Moor*, *Gentile*, and *Chriſtian* Merchants, who ſend 3 or 4000 Ships for this Purpoſe. The Manner of Fiſhing is thus. The whole Company furniſh out 6 Barks, with one Maſter, 10 or 12 Mariners, and 8 or 9 Divers. Theſe Veſſels go into ſuch Places as have not above 5 or 6 Fathom Water, and parting about a Lg. aſunder, take 1000 Oiſters apiece, and having examined them, judge where are the beſt Pearls and beſt Fiſhing by the Largeneſs of them, becauſe they are ſome Years better than others. When they have pitched upon the Place, they agree with the King to let them fiſh, and he gives them ordinarily 4 Men of War to defend them from the Piracies of the *Malabars*, and then the 6 Veſſels go to Fiſhing 4 Hours a Day, when the Sea is calm. The Merchants in the mean time hold a great Fair, and ſell all manner of Goods to the People, and dividing their Pearls at the End of *April*, go Home enrich'd. Here are alſo found upon this Coaſt large Pieces of Amber of a great Bigneſs, which the Fiſhers take from their Coral, caſt upon the Shore by the Waves of the Sea in great Quantities. Their Coral is black, which in many Places is more eſteem'd than the Red.] *Ex J. Rib.* The Pearl-Fiſhing on the Coaſts of *Ceilon*. The Manner of it. Ambar. Black Coral.

CHAP. VI.

Of the King's Perſon, Power and Government.

HAving treated of the Country as to its Product and Wealth, we will now come to the Inhabitants, and becauſe Civil Government is the moſt conſiderable Thing in a Nation, and the King is the principal Inhabitant, it will be propereſt to deſcribe their King and his Government, before we proceed to the other People. Anciently this Country conſiſted of 9 Kingdoms. *Ribeyro* gives us the Names diſtinctly, *viz. Cotta*; *Dina-Vaca*, or *Duas-Cartas*, which in the Times of the *Portugueſe* was ſwallow'd up in the former; *Uva*; *Candi*; *Ceita-Vaca*; *Sepe-Corlas*; *Chelaon*, or *Negombo*; *Jafnapatan* (but this is not under the King, but the *Dutch*) the Nation of the *Bedas*; or *Vaddahs*, who have a Queen of their own; all which had their ſeveral Kings; but now by the Viciſſitude of Time and Things, they are all reduced under one King, who is an abſolute Tyrant, and rules the moſt Arbitrarily of any King in the World. He governs himſelf and all others according to his own Humour, and as the Capricio takes him, and therefore we muſt expect no ſtanding Forms or Laws here, but conſider the Kingly Power, as ſettled in a ſingle Perſon, and managed as he pleaſes, which being in the Hands of *Radga Singa*, which ſignifies, *A Lion King*, we will conſider him firſt in his Perſonal, and then in his Political Capacity.

Nine Kingdoms in *Ceilon*.

Their preſent King's Name and Character.

In his Perſonal Capacity we will ſpeak ſomething of his Birth and Parentage, his Perſon, Relations and Eſtate; his Manners, Pleaſures, Recreations and Religion. As to his Birth and Parentage, he was not of the Royal Blood by a direct Line, but the former King leaving his Queen a Widow with 2 young Princes, ſhe marry'd to the Chief Prieſt, called in their Language, *Tirinanxy*. Her Name was *Donna Catharina*, becauſe being converted to Chriſtianity by the *Portugueſe*, ſhe receeived that Name in her Baptiſm. She had the preſent King by this *Tirinanxy*, who ruled during the Minority of the young Princes, and being old, when they came of Age, divided the Country between his own Son and the 2 rightful Heirs; but ſo contriv'd it, that *Candi Uda*, which is the beſt part of the Land, ſhould fall to his own Son. All theſe 3 Kings in the Beginning of their Reign join'd againſt the *Portugueſe*, but ſoon after fell out among themſelves, and this King in the End prevailed, and got all the Country. *Donna Polla Rodgerah*, King of *Mautoly*, being overthrown, fled to *Columba*, and put himſelf under the Protection of the *Portugueſe*, who ſent him to *Goa*, where he died. The other, named *Comaure-Singa*, King of *Ouvah*, died in *Candi*.

His Parentage.

His 2 Brothers.

As to the Perſon of the preſent King, he is not tall, but very well ſet, ſomewhat of the blackeſt Complexion, with great rowling Eyes, always moving, a brisk bold Look, a great ſwelling Belly, and very lively in his Actions and Behaviour, little Hair on his Head, and that gray, but a large comely Beard with Whiskers, and in the whole a very comely Man. He bears his Years well, for being between 70 and 80 Years old, he appears youthful both in his Countenance and Actions. His Apparel is not according to his own Country Faſhion, but after his own Invention, which makes it very wonderful among them. He wears a Cap like a Jeſuit's, with 4 Corners, and 2 Teer high, with a Feather ſtanding upright before. His Doublet has the Sleeves of one Colour, and Body of another. He wears long Breeches to his Ancles, and Shoes and Stockings; but he does not keep to one Gard, but changes the Faſhion as he pleaſes. He wears a Band hanging down his Back like

His Perſon.

His Apparel.

like the *Portugueſe*. When he comes abroad, he wears his Sword always with a Soulder-Belt; it has a Gold Hilt and Scabboard. He has alſo uſually in his Hand a Cane painted with divers Colours, having a Golden Head, and ſet with precious Stones towards the Bottom. His right and lawful Queen is a *Malabar*, brought from the Coaſt, but lives not with him. She wants not the Maintenance and Attendance of a Queen, but ſeems confined to the King's Palace at *Candi*. He has had by her a young Prince and a Daughter.

His Court at *Digligy-neur*.

He keeps his Court at *Digligy-neur*, whether he fled in the Rebellion againſt him. His Palace ſtands upon a great Hill, and is wall'd about with a Clay Wall, and thatch'd to keep it from the violent Rains. Within the Wall 'tis full of Houſes, moſt of which are low and thatch'd, but ſome are 2 Stories high, and tyled very handſomely, with open Galleries for Air, rayl'd about with turn'd Baniſters, one Ebony, and one painted, but not much Proſpect, ſtanding between 2 Hills; for the King dwells not here for Pleaſure, but Security. His Palace hath many large and ſtately 2 Leaved Gates, excellently well carved, with the Poſts and all the Iron-Work rarely engraven. The Windows are inlaid with Silver-Plates and Ebony, and on the Top ſtand Flowers made of Earth. The Contrivance of his Palace is much like *Woodſtock-Bower*, with many Turnings and Doors, at which ſtand Watches, who dare not ſtir from them without ſpecial Order, and ſo no Man hardly knows where he is. He has ſtrong Guards Night and Day about his Court, kept by his Grandees in Perſon, who every one have Soldiers under them, and muſt not ſtir from the Places appointed them, nor converſe with one another. At the End of every Watch Multitudes of Drums and Trumpets ſound to keep his Guards waking, and for the Honour of his Majeſty. He has alſo Elephants to keep with his Guards, that if there ſhould be any Tumult, they might trample them down. He puts moſt Confidence in a Band of *Negro's*, or *Cofferies*, who therefore watch at his Chamber-Door, and about his Perſon. At uncertain Times he ſends out Spies by Night to ſee how well his Watches are kept, and what paſſes, and of theſe he has ſo many every where, that there is nothing almoſt ſaid or done, but he knows it. Moſt of his Attendants are Boys and young Men of good Parentage, and well favour'd, which by his Order his *Diſſawa's* pick up in the Country, and ſend to the Court. They go bare-headed, and wear long Hair hanging down their Backs, and are uſed only for Attendance; for Sodomy is not heard of among them. He chuſes to have his Meat dreſſed by Women, and therefore has many handſome young Women to furniſh his Kitchin: He matters not whether they be married or not. He once ſent for all the *Portugueſe* Women, which were young and white, and what he liked he kept, and ſome of them are there to this Day; others that he did not like he ſent home, and ſuch as incurr'd his Diſpleaſure, he caſt into the River, or impriſon'd. He keeps not many Concubines within his Palace, beſides thoſe of his Kitchin, which are ſaid to be ſuch. Some he has dwelling in the Towns near, and therefore no Stranger is allow'd to go into them; but Slaves that flie to them are free from their Maſters Service, but ſtill remain Slaves to them. Sometimes he walks about his Palace, where there are certain Pediſtals of Stone, whiten'd with Lime, and laid in Oil, upon which he ſtands when he comes forth, and looks above all his People. When he goes out, which is never far, he orders his Guards, which are many Thouſands, with a *Dutch* and *Portugal* Captain, with their Flags and Soldiers, Drummers, Trumpeters, Pipers and Singers; as alſo, his Elephants, Horſes and Falconers, with their Falcons, to attend him at his Palace-Gate, and commonly all this Throng ſhall attend 3 or 4 times before he will go out, and when he does come, he does it ſo much of a ſudden, that they are forced to hurry much to get in Order. Sometimes he comes upon an Horſe, or Elephent, but ſeldom; for uſually he is brought in a Palleaquin. He ſeldom goes any further than a Banqueting-Houſe, which he has built by a Pond-ſide for his Pleaſure, about a Musket-ſhot from his Palace. He receives Ambaſſadors with great Honour and Shew, ſending his Great Men with large Trains of Soldiers to meet them. The Graſs is pared away, and the Ways made broad for them for many Miles, and Drums and Trumpets, Pipes and Flags go before them. Victuals and all ſorts of Varieties are provided for them, and carried to them as long as they ſtay in the Country. Their Goods and Baggage are all carried by Men provided by the King, who alſo prepares them an Houſe, hung on the Top and Sides with Callico. They are kept under a Guard, and great Commanders with their Soldiers are appointed to watch them, which is accounted for a great Honour; but they dare not ſuffer any to come to the Speech of them, becauſe the King loves to have frequent Conference with them, and to ſee them brought before him in great Pomp and State, that the Ambaſſadors may take Notice of the Greatneſs of his Majeſty, and ſometimes he gives them Men and handſome young Maids for their Servants, being very familiar with them, and admitting them to his Sports and Paſtimes, not caring to part with them.

His Temperance in Diet.

He is temperate both in his Diet and Luſt, tho' he has all ſorts of Varieties which his Country affords brought to his Table; yet his chief Fare is Herbs and ripe pleaſant Fruits, and this but once a Day. Whatever is brought for him to eat or drink is covered with a white Cloth, and whoever brings it hath a Muffler tied about his Mouth, that he may not breathe upon the King's Meat, as hath alſo the Carver, who is always a Nobleman. He ſits alone at Table, and eats upon a Plantane-Leaf laid in a Golden-Baſin. And the ſame Abſtinence he uſeth about his Women, which he doth with ſuch Secrecy, as that 'tis not known. He allows no Whoredom or Adultery in his Court, and if his Nobles are found guilty of either, he not only executes them, but ſeverely puniſhes the Women. Rebellion doth not more diſpleaſe him in his Nobility than Whoredom, nay, all that are admitted to wait on him are not permitted to enjoy the Company of their Wives, no more than other Women. Indeed, he once himſelf got a Child of his own Daughter, which might argue an unbridled Luſt in him; but this ſort of Inceſt is allow'd Kings for Royal Iſſue, but puniſh'd ſeverely in all others. His Pride and Affectation of Honour is unmeaſurable. When any of his People come to addreſs him, they fall flat down on their Faces to the Ground 3 ſeveral times, and then they ſit with their Legs under them upon their Knees as long as they are in his Preſence, and when he bids them depart they go backward till they are out of his Sight; but of the Chriſtians he requires no more than to kneel before him with their Hats off: Nay, he takes on him all the Ceremonies and Solemnities of Honour which they ſhew to their Gods, making this Account, That as he is now their King, ſo hereafter he ſhall be one of their Gods. Formerly out of Haughtineſs of Spirit, he was ſeen very ſeldom by the People, but now he comes forth daily, and loves to be flatter'd with great and windy Titles, ſuch as *Maubawall*, Great Sir; *Hondrewne Boudouind*, Let your Majeſty be a God, and the like; but ſince the Rebellion he is afraid to aſſume the Title of a God, leſt the Power that he abuſed and wickedly aſſumed ſhould again ſet the Hearts of his People againſt him, and quite overthrow him; yet he retains a mighty Haughtineſs of Spirit, as I ſhall ſhew in 2 or 3 Inſtances.

Inſtance of his great Spirit.

In the Year 1675. this King grew very jealous of one of his greateſt and moſt valiant Commanders, who had great Succeſs againſt the *Dutch*, took ſeveral of their Forts, and killed many of them, beſides what he made Captives, and leaſt he ſhould grow ambitious of his Throne, reſolved to take off his Head: The General had ſome private Intelligence of the King's Deſign, and being then in his Camp fighting againſt the *Dutch*, revolted to them, and got to *Columba* with his Wife and Goods. His Departure was a mighty Loſs to the King, but out of the Height of his Stomach he ſeem'd to bear it without any Regard, or Concern, as if it were beneath the Quality of ſo great a Monarch to be moved with ſuch a Trifle, and ſending another General into his Place, never after took any Notice of him; and as for his Houſe and Eſtate, which he left behind him, he let it lie and rot, ſcorning to take any Notice of him or his.

His Contempt of Wealth.

Another Inſtance of his great Spirit is this: On *New-Years-Day* all his Subjects high and low did uſe to bring him at the Beginning of his Reign, and ſome Years after, certain Preſents, or rather Taxes, according to their Abilities, and he was wont then to take them, but now he ſo abounds with all Things, and his Treaſury is ſo full, becauſe he is continually putting in, and ſeldom taking out, that he ſcorns now

to

to receive theſe his due Revenues, leſt his People ſhould think he did it out of Neceſſity or Want. Nevertheleſs his Great Men ſtill at the New Year bring their Preſents, and wait Day after Day for the King's coming forth, hoping that he will accept them, but of many Years he will not be courted to receive them, his Mind being ſo haughty, that he ſcorns to value any thing in this World.

And ſo again; When Tidings are ſometimes brought him, that the *Dutch* have made an Invaſion into his Country, tho' he can eaſily expel them, yet he will not ſeem to take Notice of it. The *Dutch* are ſenſible of his Pride, and his Love of Flattery, and many times make a good Advantage of it, by telling him, they are his Subjects, and built Forts for his Defence, and what Damage they do his Country, is thro' Neceſſity to get Proviſion; but ſometimes this will do no good, for he will fall upon them, and do them much Damage. He expects ſo much Veneration, that whatſoever Things are carried to him, which are known by the white Cloth they are wrapt in, all Perſons that meet them muſt turn out off the Way, not excepting his foul Cloaths, which are carried on an Hand lifted up in a painted Cloth, to be waſhed almoſt daily.

The *Dutch* uſe his Pride for their Advantage.

His Craft and Wiſdom

He is Crafty, Cautious, and a great Diſſembler, nor doth he want Wiſdom. He is not paſſionate in his Anger, but will conceal his Reſentments with much Evenneſs. He is not haſty, or raſh in any Buſineſs, but doth all Things with Deliberation, tho' but with little Advice, for he ſcorns to take Council of any Body. He accounts it Wit and Policy to lye and diſſemble, that his Intents and Purpoſes may the better be conceal'd; but he abhorreth and puniſheth all that lye to him. *Dutch* Runnagates, tho' he receives them, yet he values them not; for he ſays, They are Rogues that are guilty of Murther or Theft, or they would not leave their own Nation.

His Cruelty.

He ſeems to be naturally cruel, for he ſheds a great deal of Blood, and gives no Reaſon for it; nor is he content to take away Mens Lives, but he puts them to long and lingring Torments; for when he is diſpleaſed with any, he will command to cut and pull away their Fleſh with Pincers, and burn them with hot Irons to confeſs their Complices, which, to rid themſelves of the Torments, they will readily do, and accuſe many that they never knew nor ſaw. Then he will order their Hands to be tied about their Necks, that they may eat their own Fleſh, and ſo lead them thro' the City to Execution, the Dogs, who are uſed to it, following them to devour their Fleſh. At the Place of Execution, which is always in the greateſt High-way, that all may ſee, and ſtand in awe; there are always ſome ſticking upon Poles, others hanging up in Quarters upon Trees, beſides what lies on the Ground, killed by Elephants, or otherwiſe. He hath a great many Priſoners, whom he keepeth in Chains ſome in Goal, others in the Cuſtody of great Men, and for what, and how long no Man dare enquire. Some are allow'd Food, others not, and if they do any Work to relieve their Want, if he knows it, he will not permit them, becauſe, as he ſays, he puts them there to torment and puniſh them, and not to work, and be well maintain'd; yet this is conniv'd at, and there are Shops by the Priſons to ſell their Wares. When the Streets by the Palace are to be ſwept, the Priſoners in their Chains are let out to do it. When they have been long in Priſon, at his Pleaſure, without any Examination, they are led to Execution; nor is his Anger appeaſed by the Death of the Malefactor, but he oftentimes puniſheth all his Generation, ſometimes killing them altogether, and ſometimes giving them all away for Slaves; and thus he uſually deals with thoſe whoſe Children are his Attendants; for after they have been at Court a while, and know his Cuſtoms and Manners, he cuts off their Heads, and puts them in their Bellies, no Man knowing for what Crime. When they are killed, they are all called Rebels and Traitors, and their Fathers Houſes, Lands and Eſtate ſeiz'd on for the King's Uſe, which are ſometimes redeem'd by giving Fees to the Courtiers; but often the whole Family and Generation periſh. This makes all the Youth, which the *Diſſawa's* ſend to Court, go with heavy Hearts, as knowing the fatal End that the King's honourable Service will bring them and their Families to; howbeit, there is no Remedy, they muſt go, tho' 'tis like an Ox to the Slaughter; and when they are gone, they muſt never viſit their Friends, nor do their Friends care to own them (tho' they are all allow'd to viſit them, except Women kind) becauſe they ſhall be ruin'd with their Fall, and ſo think it their Safety not to be known.

See FIG. 6.

The Priſoners work, and ſweep the Streets.

His Puniſhment of whole Families.

As to his Pleaſures, and Diverſions, they are alſo of ſeveral ſorts, ſometimes he will ride, or be carried to his Banqueting-houſe, which is about a Musket-ſhot from his Palace. It ſtands on an Hill, and by it is made a little Plain with infinite Labour, but not above a Bow-ſhot ſquare, and in a Valley by running a Bank croſs, he hath made a fine Pond, which is exceeding full of Fiſh. At this Place he hath ſeveral Houſes built very handſome, born up with carved Pillars, and rayled like Balconies; ſome ſtand high upon a Wall for him to ſit in, and ſee Sport with his Elephants and other Beaſts, and for Proſpect: Others ſtand over his Pond, where he ſits and feeds his Fiſh with boiled Rice, Fruits and Sweet-meats, which are ſo tame, as that they will come and eat in his Hand, but he will not ſuffer any of them to be catched. In the Pond his Elephants alſo waſh, and on the Plain he will ſometimes command his Grooms to get up and ride in his Preſence, for which he will give them 5 or 10 Shillings a Man, and ſometimes a Piece of Cloth. When he goes forth, his Horſes are always brought forth ready ſaddled, but he himſelf mounts them very ſeldom. His Horſes are uſually Preſents ſent him by the *Dutch*, but ſome are taken in War. He has about 12 or 14, of which ſome are *Perſian* Horſes.

His Diverſions of ſeveral ſorts.

To ſee his Elephants, and feed his Fiſh.

His other Paſtimes are (for he minds nothing elſe) theſe. He cauſeth Elephants to be brought out of the Woods to him, and catched in his Preſence. Alſo, when he comes out of his Court, he delights to look on his Hawks, altho' he never uſeth them for Game; and ſometimes on his Dogs, tame Deer and Tygers, and ſtrange kinds of Birds and Beaſts, of which he hath a great many. Alſo he will try his Guns, which are excellently true, and rarely inlay'd with Silver, Gold and Ivory, by ſhooting at Marks with them. He hath 8 or 9 ſmall Iron Cannon, which he took from the *Dutch*. Theſe he hath mounted on Field-Carriages, all rarely carved and inlay'd with Silver, Braſs, and coloured Stones, and painted with Images and Flowers. The Guns do really diſgrace the Carriages, for which he has many Braſs ones far more worthy, tho' not ſo much regarded, but 'tis thought he beſtows ſo much on theſe, becauſe they are Memorials of his Victories. They are uſed on Feſtival-Days.

Catching Elephants.

Seeing his Birds.

Trying his Guns.

In his Palace he paſſeth away his Time by looking on certain Toys and Fancies that he hath, and upon his Arms and Guns, calling in ſome or other of his Great Men to ſee them alſo; and he will ask them, whether they have a Gun that will ſhoot further than that he ſhews them, and how much Steel will make ſuch a Knife, as he holds in his Hand.

Viewing Toys.

He takes great Delight in Swimming, which he doth excellently well; and when he is pleaſed to divert himſelf that Way, the Cuſtom is, that when he goes into the Water, all his Attendants that can ſwim, muſt go in likewiſe.

Swimming.

His Religion is not great, nor indeed can much be expected from him in ſo barbarous a Country. The Religion of his Country he has but little Eſteem for, as perceiving that there is a greater God, than thoſe which they, thro' long Cuſtom, have and do worſhip; and therefore when an Impoſtor, a Baſtard *Moor* by Nation, but born in that Land, came and publickly ſet up a new *Nameleſs God*, as he ſtyled him, and ſaid, That he was ſent to deſtroy the Temples of their Gods, the King oppoſed it not for a good while, as waiting to ſee which of theſe Gods would prevail; but when he ſaw that he aim'd to make himſelf King he allow'd him no longer.

His Religion.

The Chriſtian Religion he doth not in the leaſt perſecute, but rather, as it ſeems to me, eſteems and honours it, as this Paſſage will plainly prove. When his Siſter died, for whom he had a very great Affection, there was a very grievous Mourning and Lamentation made for her throughout the whole Nation, all Mirth and Feaſting laid aſide, and all poſſible Signs of Sorrow expreſſed, and in all Probability it was as much as their Lives were worth who ſhould do any thing at this time that might look like Joy. This was about *Chriſtmas*, yet the *Dutch* adventured to keep that Feſtival with the uſual Solemnity and Feaſting. The News of it was carried to the King, and every one reckon'd that it would go hard with the *Dutch* for doing of this; but becauſe it was done

His Eſteem of Chriſtianity.

upon a Feſtival according to their Religion, the King paſſed it by, and took no Notice of it, which was a Sign he had a Reſpect to their Religion; and the like Value he expreſſes by the kind Treatment he gives the Profeſſion of it, as will be ſeen afterwards.

His Tyrannical Government.

His Government is Tyrannical and Arbitrary in the higheſt Degree, for he rules according to his own Will and Pleaſure, and his own Head is his only Councellor. The Land is all at his Diſpoſal, and all his People from the higheſt to the loweſt are Slaves, or very like Slaves, being in Body and Goods wholly at his Command. The Country he farms out, not for Money, but Service, and inſtead of Rent ſome are to ſerve the King in his Wars, ſome in their Trades, and ſome are to ſerve him as Labourers, and others as Farmers, to furniſh his Houſe with the Fruits of the Ground, and ſo all Things are done for the King without Coſt, and yet every Man paid for his Pains, becauſe they have Land for it. Such as have not water'd Land to bear Rice are free from Payment of Taxes, only ſometimes upon extraordinary Occaſions, they muſt give an Hen, or a Mat, or ſome ſuch Thing, to the King's Uſe, becauſe they uſe the Wood and Water of his Country; but if any find the Duty to be too heavy or too much for them, they may leave their Houſe and Land, and ſo be free from the King's Service, as there is a Multitude that do, and thereby live more happily without than they did with the King's Land.

The King's Towns and their Privileges.

Many Towns are in the King's Hands, and the Inhabitants are to till and manure a Quantity of Land according to their Ability for the King's Uſe, and lay up the Corn for him. Theſe Towns the King often beſtows upon his Nobles for their Encouragement and Maintenance, with all the Fruits and Benefits accruing to the King from them. In each of theſe Towns there is a *Smith* to make and mend the Tools of them, to whom the King has granted it, and a Potter to fit them with Earthen-Ware, and a Waſher to waſh their Cloaths, and other Artificers to ſupply their Wants. And each of theſe hath a Piece of Land for this Service; but what they do for other People they are paid for.

His Vigilancy againſt Plots, and Ways to prevent them.

His great Endeavours are to ſecure himſelf from Plots and Conſpiracies of his People, who being ſorely weary of his Tyrannical Government, often do plot to take him off; and to this End, he is very vigilant in the Night, and keeps himſelf and all about him from ſleeping by Drums and Trumpets, which ſound every Watch. In the Night he does moſt of his State-Buſineſs, as calling Ambaſſadors before him, and reading their Letters; diſplacing Courtiers, and promoting others, and giving Sentence to execute thoſe that he would have out of his Way; and this is done ſo ſuddenly, that many Noblemen are laid hold on, and carried away, before they knew that they were out of Favour.

He makes his Country as intricate and difficult to travel as may be; he forbids them to fell any Woods, eſpecially ſuch as part one Country from another; nor allows any Bridges to be made over the Rivers, nor Paths to be made wider, that he may keep the People from uniting or joining in any Deſign againſt him; and for the ſame Reaſon, he employs his People in vaſt Works, which will require many Years to finiſh, and according to the Quantity of the Work, he will appoint one or more Counties to come in, and the Governour of thoſe Counties he appoints to be Overſeers of the Work, and in this Caſe the Soldiers muſt lay aſide their Swords, and bend their Bones to labour. Theſe Works are digging down Hills, or filling up Valleys. Thus to enlarge his Court, which ſtands between 2 Hills, upon as bad a Spot of Ground as any in his Kingdom, and to bring Water into his Palace, and divers Ponds ſmall and great about it, he was forced to ſplit a great Mountain in twain to let the Water thro' it, and after to make a Bank croſs a Valley above a Cable's Length. The Water was brought 4 or 5 Miles in a Ditch, and the Ground all Hills and Valleys; ſo that they were forced to turn and wind as the Water would run, and ſometimes ſoften Rocks with Fires to break thro' them, which they could eaſily do with Mony. The Water which he brought thus to his Palace was the main Thing which nouriſh'd the Country from whence it came for the producing of Rice, and for want of it they could hardly till their Land. The People being in Extremity, repreſented their Caſe to the King. That the Country was deſtroy'd, and they diſabled from performing their Duties and Service to the King, as well as from relieving their own Wants; but the King took it ill, that they ſhould grudge him Water, and they were forced to deſiſt from their Petition. In like manner, after the Rebellion, when the People, that lived at a great Diſtance from *Degligy*, whether he fled in the Rebellion, ſaw that he deſign'd to ſettle there, it being very troubleſome for them to carry their Rents and Taxes ſo far, they all met together, and ſent an Addreſs with great Submiſſion to him, to this Effect: *That his Majeſty would not leave them deſtitute of his Preſence, which was to them as the Sun; That he would not abſent himſelf from them to dwell in a Mountain in a deſolate Country, but ſeeing there was no farther Danger, and all the Rebels deſtroy'd, that he would return to his old Palace again, vowing all Fidelity to him.* The King did not like the Meſſage, but was afraid to ſhew his Diſpleaſure, becauſe there were ſo great a Multitude, and therefore plaid the Politician, and ſaid to them: *That he thank'd them for their Love and Affection towards him; and that he was deſirous to dwell among them in ſuch a Part of the Country which he named, and had them all go to Work to build him a Palace there.* The People departed with Satisfaction, and fell to Work might and main in fetching Timber, hewing Stones, and building, and ſo continued at it near 2 Years, till they were almoſt kill'd with Labour, and began to grumble at the Toil. At length the King ſeeing the People quiet, order'd them to leave off, and ſo it lies now unfiniſh'd, and the Timber provided rots upon the Ground, and the Building runs to Ruine. Thus he keeps his People in Servitude and Toil for his own Security, in building and pulling down, bringing in Water, and making huge Pounds and Houſes for Elephants, without any Reaſon or Neceſſity.

An Addreſs to him.

The People build him a Palace in vain.

He ſtands upon no Villany to eſtabliſh himſelf, and ſtrike Terror into his People, as may appear for his cutting off his only Son, a young Man of about 15 Years of Age upon this Occaſion. After the Rebellion the Kingdom being ſettled in the King's Hands again, and knowing that the Hearts of the People, who were generally diſaffected to him, ſtood ſtrongly inclined towards the Prince, he fear'd his own Safety as the Prince grew into more Years; and to prevent the worſt, poiſon'd him: For about a Year after the Rebellion his Son was ſick, and the King took his Opportunity to diſpatch him, by pretending to ſend him Phyſick to cure him. The People hearing of the Death of the Prince, according to the Cuſtom of the Country when any of the Royal Blood is deceaſed, came all in general towards the City where he was, with black, or very dirty Cloaths, which is their Way of Mourning, the Men bare-headed, and the Women with their Hair looſe and hanging about their Shoulders, to mourn and lament for his Death. The King hearing it, ſent them Word, Since 'twas not his Son's Fortune to live and reign after him, it would be in vain to mourn, and a great Hindrance to the Country; and ſo telling them, he accepted their Good-will as much as if they had mourn'd, ſent them home, and burnt his Son's Body without any Solemnity or Ceremony: Yet the Death of an old Sifter that he had, who carried away the Prince in the Rebellion, cauſed no ſmall Lamentation. All the Countries came up to mourn, and gave all Signs of extraordinary Sorrow both in Habit and Countenance, and the King himſelf was ſeen to weep bitterly. The white Men came alſo, which the King took well. The King and all the Country went in Mourning for more than a Year, and her Body was burnt with all the Honour and State imaginable; yet for all this Reſpect which he bare her, he never viſited her in her Sickneſs, and 'tis now reported for certain, that there is not one of his Generation left.

He poiſon'd his only Son.

The Mourning for the Prince.

The Mourning for his Sifter.

The vaſt Labour about his Palace.

CHAP.

CHAP. VII.

Of the King's Revenues, Treasures, Officers, Governours of Provinces, and Strength in War.

Rents brought to the King 3 times a Year.

THree times a Year they bring their Rents to the King, 1. At the New-Year, called, *Ourida Cotamaul*, 2. The First-fruits, *Alleusal Cotamaul*, and 3. A certain Sacrifice in *November* to their God, called, *Ilmay Cotamaul*; but besides these, whatever is wanting in the King's House at any other time, they must upon the King's Order bring it. These Rents are but little Money, but Corn, Rice, or what grows upon their Ground. Their New-Year's-Gift is the more solemn, and magnificent, which is always upon the 27, 28, or 29th of *March*. On this Day the King washes his Head with great Ceremony, and the Palace is adorn'd with Triumphal Arches and Poles, on the Top of which are Flags flying, and all about are painted Cloths, and Fruits hanged in great Order and Exactness. In other Places also are single Poles with long Penons of divers Colours, and a Bell at each end of them, and they then say, *The Palace is adorn'd above Heaven.* All the Army is summoned to stand and wait at the Palace for the greater State, and the Great Men, Nobles, and Governours of Countries make their Appearance before him with their New-Year's Gifts. *Dackini*, or New-Year's-Gifts, which are due and accustom'd Presents, for Persons in their Places and Officers to give. There is a certain Rate for every one, and at this time they bring them in a white Cloth, and lay them at the King's Feet in most humble manner. These Presents are Gold, Jewels, Plate, Arms, Knives, Cloth, and some Money, and if they can procure any Rarity, which they think will be acceptable to the King, they bring that. These New-Year's-Gifts he hath thought scorn to receive these many Years, and bids them carry them back again, which, after many times presenting, they do. The Tradesmen also bring a Present at a certain Rate, but they are not accepted; but the Rents and Taxes which the People bring, as Wine, Oil, Corn, Honey, Wax, Cloth, Iron, Elephants Teeth, Tobacco and Money, are at length received, tho' for State he will make them wait sometimes divers Months before he will accept them. The Duties brought at the 2 other times are after the same manner.

Other Duties to the King.

The King hath other Revenues, as, 1. When any Man dies that hath a Stock of Cattle, there must be paid a Bull and a Cow, with a Calf, and a Male and Female Buffalo; which Tax they call *Murral*, and there are Officers appointed to carry them away. At Harvest yearly there is a certain Rate of Corn to be paid to the King by every Man, according to the Land he holds. Formerly the King agreed upon a Payment of a Sum of Money, that their Lands should be clear from this Tax for their Lives, but of late there is no mention of any such Discharge, so that in time all Houses and Land will again be liable to it, which will much advance the King's Revenue. Soldiers Lands, who are killed in the Wars, are free from this Tax, else not. Farmers in general, besides these Rents, pay a Duty in Money. When Land is sold, the Duties accustom'd to be paid to the King must not be diminished, and no Land is or can be free from such Duties, but such as is dedicated to a Priest, as a Deed of Charity in God's Name; for, 'tis thought Sacriligeous to take any thing from one that belongs to the Temple.

No Tax paid for Lands belonging to a Temple.

Formerly the King had a considerable Benefit by 2 Ports, *viz.* *Cotiar* and *Portalone*, but the *Dutch* have now deprived him of both. The King hath several Treasure-Houses in Cities and Towns, kept under strong Guards of Soldiers, which are well stored with all Things that the Land affords, as Precious Stones, some Money, Cloth, Elephants-Teeth, Wax, good store of Arms, as Guns, Bows, Pikes, Halberds, Swords, Ammunition, store of Knives, Tallipot-Leaves, and Mats of all sorts. He hath some Hundreds of Elephants kept tame, and can command all in his Country. In fine, The Land is all his, and every Man's Estate is at his Disposal, but he values Toys most, as spotted Elephants, good Arms, &c.

His Magazines.

His greatest and highest Officers are *Adigars*, which are 2 Chief Justices, to whom is made the Supreme Appeal from the Governours of the several Cities and Counties, if Matters be not decided by them according to the Peoples Minds. The *Adigars* have Officers and Sergeants belonging to them, which carry Staves in their Hands like Bandies, the crooked end uppermost, which signifieth as much as the *Adigars* Hand and Seal. These instruct the *Adigar*, if he be ignorant of his Office, as do also the inferior Officers the Superior in other Courts.

Adigars, or Chief Justices.

Next to these are the *Dissawa's*, who are Governours of the Provinces, and greater Counties of the Land. They have all a certain Number of Soldiers under them, and are to take Care that good Orders be kept in the Countries over which they are placed, and that the King's accustom'd Duty be brought to Court in due Season. They have Power to decide Controversies, and to punish contentious and disorderly Persons, which they do usually by Fining, because they have the Advantage of it, and may imprison, but can put none to Death, because the Sentence of Death is only given by the King's Mouth. They are also sent upon Expeditions with their Soldiers, and give Attendance and wait at Court in their Stations. This Office is appointed by the King not for Life, but during Pleasure, and when they are dead, or removed, oftentimes their Places are vacant some Months, and sometimes Years, and then the *Adigar* rules and governs those Countries, and for his Pains receives all the Profits of the Place. The Persons raised to these Places by the King are always Men of good Rank, and genteel Extraction, solid and discreet, tho' not of Ability to discharge the same. At their Promotion he gives them a Sword with the Hilt inlay'd handsomely with Silver and Brass, and a Scabboard covered with Silver, a Knife and an Halberd, and a Town, or Towns for their Maintenance, as Testimonies of his Love and Favour to them, and they receive the same Rents and Profits, which were usually given to the King, and besides out of all the other Free-Towns in their Jurisdiction, there is a small Due paid to the Governour, besides the King's Tax. When any new Governour is made, the whole Country must come to appear before him at Court, and every one must bring his Present with him, which is expected also at other times: Even private Soldiers, when they first come to their Post, must appear before their Commander, and if they have nothing else, present him with 40 Leaves of Green *Betel*, and 'tis accounted a great Favour, that he will receive them. These Governours are never permitted to return Home again after they are admitted to Court, nor to enjoy their Wives, but they are to stand Day and Night in their Stations to guard the King, where he appoints them, and because upon that Account they can't oversee their several Charges in Person; therefore they have several Officers under them; as, 1. The *Courlividani*, who for governing under the *Dissawa* has a due Revenue, but less than the Governour. His Business is to wrack and extort all he can for his Master, which in all Differences and Quarrels he doth, without any Respect to Equity from both Parties, and carries it to the Governour. Indeed, if the People like not his Sentence, they may remove their Cause to the Governour himself, who having an equal Regard to his own Interest, little helps the Matter. These Carriages make them hated by the People for their rigorous Government; but the more the People hate them, the more the King loves them, because he cares not that the People should affect the Great Men.

Dissawa's or Generals.

The King only condemns to Death.

The King's Gifts to them at their Promotion.

Officers under the *Dissawa's*, viz. The *Courlividani*.

Next to this Officer, is the *Cangcomna*, or Overseer, who is to overlook all Things under the *Courlividani*. But besides him there is a *Courti-Achila*, like our Constable, who is to put the Governour's Orders in Execution, to dispatch any thing away that the Land affords for the King's Use, and to send Persons to Court that are summon'd; and in the Discharge of this his Office he may call in the Assistance of any Man.

Cangcomna and *Courti-Achila*.

The

Liannah. The next Officer under the Governour is the *Liannah*, the Writer, who reads Letters brought, and takes Accounts of all Buſineſs, and what is ſent away to Court. He is alſo to keep Regiſters, write Letters, and take Notice of Things that happen.

Undia. Monnannah. Next to him is the *Undia*, or Collector of the King's Moneys; and after him the *Monnannah*, i. e. The Meaſurer, whoſe Place it is to go and meaſure the Corn that grows upon the King's Land, or whatever Corn elſe belongeth to him. The Power of theſe Officers extends not to a whole County, or Province, but to ſuch a convenient Part as they can manage themſelves, and others of the ſame Nature are allotted other Diviſions like our Hundreds.

Places of exempt Juriſdiction. Theſe Officers exerciſe their Authority over their whole Diviſion, excepting ſome certain Towns, which are of exempted Juriſdiction, *viz.* 1. Towns that belong to their Idol-Temples and Prieſts. 2. Towns given by the King to his Noblemen and Servants; for they to whom they are given and do belong, put in their own Officers of the like Power.

There are alſo other Officers, who upon the Death of any Head of a Family fetch away the King's *Murrals*, or *Herriots*, and take certain Meaſures of Corn from every Man's Crop, which I have ſpoken of before. Theſe inferior Officers generally get their Places by Bribery, and their Children after their Death pretend a Right to them, and uſually are preferr'd by greazing the Governour. None of them have their Places longer than the Governour pleaſeth, and he pretty often removes them upon the Complaints of the People, or upon Pretence of Neglects, unleſs they give him Money to continue.

Country-Courts. For the hearing Complaints, and doing Juſtice among Neighbours here are Country-Courts, conſiſting of theſe Officers and the head Men of the Places or Towns where the Courts are kept, and theſe are called *Gom-Sabbi*, *i. e.* Town-Conſultations. But if any do not like their Determination, they may appeal either to the head Governour at Court, or the *Adigars* of the Kingdom, or the King himſelf, but they ſeldom do; for to go to the Governour is chargeable, for he muſt have a new Fee. The *Adigars* do

Bribery uſed. all by Bribery; for 'tis a common Proverb among them concerning theſe Judges, *He that has Money to ſee them ſhall carry his Cauſe, be it right or wrong.* Some have adventured to complain of Injuſtice done them to the King, and ſometimes he will order ſome of his great Ones to do them Right; but for the moſt part he bids them wait until he can hear their Cauſe, which is ſo long uſually, that the Remedy is worſe than the Diſeaſe; but ſometimes he will put them in Chains for troubling him, and, perhaps, they may be in that Condition many Years.

When the King's Officers go into the Country about the King's Buſineſs, they are attended both before and behind with a Number of Soldiers, more out of State, than for any Danger. Victuals is prepared for them and their Captains by the Country ready dreſs'd againſt they come, but not for their Soldiers.

Titles for Grandees. The greateſt Title given the Grandees in the City is, *Ouſſary*, Worſhipful; but when they are abroad from the King, Men call them, *Sibatta* and *Diſſondrew*, *i. e.* Your Honour and Excellency. When the Great Men walk abroad, their Manner is in State to lean upon ſome Man or Boy, and the *Adigar*, beſides this State, has a Man going before him with a great Whip, like a Coach-Whip, laſhing it, to give No-

King's Cruelty to his Nobles. tice that he is coming. But all theſe Honours have ſuch a bitter Alloy, as makes them not at all deſirable, and that is, they are ſo obnoxious to the King's Diſpleaſure, which is ſo cuſtomary, that it is no Diſgrace for a Nobleman to have been in Chains, or in the common Goal; nay, the Great Men are as ready to lay hold one upon another at the King's Command, as he is to command them, as being glad to have the Honour of the King's Executioners, and hoping to have the Place and Office of the Executed; and when any are thus diſpatched, he ſeizes upon his Family, and by Tortures makes them confeſs where the Eſtate lies, and gives them a Monthly Allowance out of the ſame. All the Males that are near a-kin, as Sons or Brothers, he either impriſons them, or cuts them off, fearing that they ſhould plot Revenge againſt him. The Wife and Women-Kindred are

His Mercy to their Kindred. now nothing at all in Eſteem for their Honours; yet ſometimes he will take the Sons or Brothers of ſuch, whom he has thus executed for Traitors, out of Priſon, and prefer them to honourable Employments. It is reported, that 'tis the King's uſual Practice to raiſe them to the greateſt Honours, whom he deſigns to ruine; but thoſe whom he loves, and intends to have longer Service of, he does not ſo load them with Dignity; and tho' the Grandees ſee this daily before their Eyes, yet their Hearts are ſo haughty and ambitious, that all their Deſires and Endeavours are to get to the higheſt Degrees of Honour, tho' it be but one Remove from Death and Deſtruction; yea, and the Womens Ambition is ſo great alſo, that they will put their Husbands on to ſeek for Preferment, that they may have Reſpect, and be reputed great Ladies.

The King's Military Strength. As for the King's Military Affairs, his Strength conſiſts in the natural Situation of his Country, his Watches, and in the Craft more than the Cunning of his Soldiers. He hath no Artificial Forts or Caſtles, but Nature hath ſupplied the Want of them; for the whole Country of *Candi-Uda*, and eſpecially *Digligy-neur*, his preſent Palace, ſtands upon ſuch high Hills, ſo difficult to paſs, that 'tis all one impregnable Caſtle.

Thorn-Gates, how made. There are conſtant Watches kept in all Parts of the Country in convenient Places, and Thorn-Gates at all Times; but in Times of Danger there are ſo many, that 'tis impoſſible to paſs them unobſerv'd. Theſe Thorn-Gates are made of the Thorn-Trees which have ſharp Prickles on all Sides like Iron-Nails, and being woven and platted together, they faſten them upon 3 Spars, and ſo make them in the Faſhion of a Door, which they hang up in a Door-Caſe like a Gallows, 10 or 12 Foot high (that they may ride thro' upon Elephants) like a Shop-Window, and ſo they can lift it up, and clap it down as they have Occaſion, and tie it with a Rope to a Croſs-Bar. In all the Roads and Paſſages from the City, where the King inhabits, the Watches are kept very ſtrict, and none

Their Paſſports. can paſs without a Paſſport firſt had from Court. It is a Print of a Seal on Clay, and differs according to the Profeſſions of the Men that have them; for a Soldier has the Print of a Man with a Pike on his Shoulder; a Labourer a Man with 2 Bags at each End of a Pole, which is the Manner they commonly carry their Loads; and a white Man, a Man with a Sword by his Side, and his Hat on his Head; and ſo many Men as there be in the Company, ſo many Prints there muſt be in the Clay; but there is not half the Examination of thoſe that go into the City, as of thoſe that go out.

Officers of their Army. In their Soldiery there are, beſides the *Diſſawa's*, who are the Generals, ſpoken of before, other Great Captains, as thoſe which they call *More-Ralls*, i. e. Scribes, becauſe they keep the Rolls or Regiſters of their ſeveral Companies, each containing 970 Men, who are under their Command, and of theſe there are 4 principal. Beſides theſe, there are other ſmaller Commanders over the Soldiers, who have their Places from the King, and are not under the Command of the former Great Ones. All theſe, both Commanders and common Soldiers, muſt wait at the Court; but with this Difference, the Great Men muſt do it continually, each one having his particular Watch appointed by the King; but the private Soldiers take their Turns of Watching, and carry their Proviſions with them upon their Backs. They are not liſted (for Liſting is uſed only upon extraordinary Occaſions) but are Soldiers by Succeſſion from their

Soldiers by Tenure of their Lands. Fathers, becauſe they hold certain Lands for that Service, which is inſtead of their Wages or Pay; and if they neglect their Duty, they forfeit their Inheritance; but if any deſire to be releaſed or diſcharged, they may do it by parting with their Land, which the Commander has the Profits of ſo long as it lies void; but he ſoon diſpoſeth of it to another, who muſt give him a Bribe at his Entrance, and afterwards renew it once in 2 or 3 Years, or he ſhall not enjoy it. The Soldiers of *Candi-Uda* are ſo diſperſed all over the Land, to prevent Conſpiracies, that they ſcarcely know one another; for the King is ſo jealous, that he will ſcarcely ſuffer the Neighbours and Towns-men of one Place to be many together in Company.

The Way of ſending up on an Expedition. When the King ſends any of theſe Commanders with their Armies upon any Expedition, ſometimes he ſends them his Orders by a Meſſenger, and ſometimes he will call them into his Preſence, and give them Orders with his own Mouth, but nothing in Writing. When he ſends ſeveral of them together upon any Deſign, he makes no Generaliſſimo over all the reſt, but

but every one of them retains an absolute Authority over his own Men, and disposeth them according to his own Pleasure, which sometimes causeth such a Disagreement, as that it frustrates their Designs; yet the King is not much concern'd at it, because he doth not like that his Commanders should be very intimate, lest they should conspire against him; yet he will not allow them to disagree at such an high rate, as to be known and observed.

News sent to the King.

When there are any Tidings to be sent to the King, they dispatch a Message severally, and inform what they can one against another, thinking thereby to obtain the most Favour and Good-will from the King, and by this means there can nothing be done or said, but the King has Notice of it. Being sent out after this manner, they dare not return, tho' the Business they were sent about be finish'd, till the King send a special Order to recall them. In their Expeditions, which are common against the *Dutch*, it goes very hard with the common Soldiers, who carry their Victuals and Pots to dress it upon their Backs, besides their Arms, as Swords, Pikes, Bows and Arrows, and very good Guns. As for their Tents (for they lie always in the Fields) they make them of *Tallipot* Leaves, which being very light, they carry along with them. These they lay upon Sticks on the Top, like the Roof of an House, to shoot off the Rains, and their Tents they make stronger or slighter, according to the Time of their Stay. Having spent the Provisions that they carried out with them, they go home to fetch more, and so after a Month or two a great part of their Army is absent.

Their Tents.

Watches most strict in War.

When the Army is sent out, the Watches beyond are all secured, to prevent any Intelligence to be given to the Enemy. The Soldiers never know the Design they are sent upon, till they come there; for none can know the King's Meaning or Intentions by his Actions, because he sometimes sends them to a Place till further Order, and when they have lain there a while, he recalls them. After this manner he often catches the *Hollanders* before they are aware, and doth them great Damage. He cares not that his Great Men should be daring and valiant, and if there be any better than the rest, he cuts them off, lest they should do him any Mischief.

Their crafty Stratagems.

In their Wars there is little Valour used, tho' they do accomplish many notable Exploits; for all they do is by crafty Stratagems. They will never meet their Enemies in the Field to repulse them by Battle, or Force of Arms, nor give them any Opposition at their first coming out to invade the King's Coasts, because they know that at first they are wary and vigilant, and well provided with all Necessaries; but their usual Practice is to way-lay them, and stop up the Way before them, there being convenient Places in all their Roads made for that Purpose, and the Woods being left to shelter them from the Sight of their Enemies: Here they lie lurking, and planting their Guns between the Rocks and Trees, do great Damage to their Enemies before they are awares. Nor can they rush in upon them, being so well guarded with Bushes and Rocks, thro' which before the Enemies can get they are fled and gone, carrying their great Guns upon their Shoulders into the Woods, where it is impossible to find them, till they meet them again after the same Manner. They also cast in the Way of their Enemies, as they march, great bushy Trees, which they have prepared on purpose in their Woods, and let fall among them many Shot and Arrows. They are very circumspect to keep their Designs from their Enemies Knowledge, that they may take them upon Surprize and unprovided.

Their Improvements in Warlike Arts.

By their long Wars with the *Portuguese* first, and since with the *Hollanders*, they are much improved in the Art of War, many of their Commanders being such Men, as formerly served the *Portuguese* against them, by which means they are come to know the Discipline of the Christian Armies, insomuch, that they have given the *Dutch* many Overthrows, and have taken Forts from them, which they had up in their Country. Formerly the King used to gratifie them with a Reward who did bring him the Head of an Enemy, but now that Fashion is almost out of Use. They order their Battles very securely; for if they be not almost sure to conquer, they will not run the Hazard of fighting. If his Men do not successfully accomplish the Design he sends them about, he'll certainly set them about a lusty Piece of Drudgery to be revenged on them, and for not using their Weapons well he will exercise them stoutly with Houghs and Pick-axes about his Palace, making them bring their Victuals with them, and when they have done with their Provisions) for they can't bring enough for above a Month (they must go home and fetch more; but this they can't do without giving the Governour or Overseer a Fee, and without his Leave they can't go, not only because of the Punishment, but because the Watches in the Road from the King's City will stop and seize them.

CHAP. VIII.

A Relation of a Rebellion against the King.

A Conspiracy to kill their King, and set up his Son.

IN the Year 1664, the People of this Land having been long and sore oppressed by this King's unreasonable and cruel Government, had contrived a Plot against him, which was to assault his Court in the Night, and slaying him, make the Prince his Son their King, who was then 12 or 15 Years of Age, and was with his Mother the Queen at *Candi*, but the King held his Court at *Nillemby* about 14 Miles distant from it. The Time appointed to put this their Design in execution, was the 20th of *Dec.* about 12 at Night, when having gotten a select Company of about 200 Men (for they needed not many, because they had so many Confederates in the Court) they march'd into the City, and hasten'd down to the Court, where they killed such Great Men as were upon the Watch, as were not of their Confederacy, but some escaped their Hands, and got to the King, whose Apartments were only walled about with a Clay-Wall. These People feared to assault him, tho' thus poorly defended, and so lay still till the Morning, at which time the King fearing to stay in his Palace, found a Way to flee and escape to the Mountains with a small Guard, or Retinue of 50 Persons. The Ways were so bad and difficult, that he could not ride, tho' he had Horses with him, and they were forced to drive an Elephant before him to make Way for him, and his Followers thro' the Woods. The Rebels pursued him, but were afraid to approach him within Gun-shot, for they knew he had excellent Fowling-pieces with him to discharge upon them, and so he got safe to a Mountain, called, *Gauluda*, about 15 Miles from *Nillemby*. Hither many of the People that inhabited near, resorted to him; but had the Rebels been resolute, as they were much the greater Party, so this Hill would not have secured him, but they might easily have driven him from thence, because there were many Ways by which they might have ascended; but as he was afraid to venture into any Place where he might be stopt in, tho' never so strong, so they were not daring enough to pursue their Design, when they had an Advantage; and therefore contenting themselves, that they had driven away their old King, they marched away to the City of *Candi*, and proclaim'd the Prince, King; telling us *English*, who were there, That what they had done, they had not attempted rashly, but upon good Consideration, and with good Advice; the King having by his evil Government occasion'd it, because he went about to destroy both them and their Country, *viz.* by keeping Ambassadors, disannulling of Trade, detaining of all People that came upon his Land, and killing his Subjects and their Children, and not suffering them to enjoy nor see their Wives, all which Things were contrary to Reason, and as they were inform'd, to the Government of other Countries.

The King flies to the Mountains.

The Prince proclaimed King.

The Prince being young and tender, and having never been out of the Palace, nor ever seen any but those that attended on his Person, as it seem'd afterwards,

wards, was ſcared to ſee ſo many Men coming and bowing down unto him, telling him, That he was King, and that his Father was fled into the Mountains; neither did he ſay or act any thing, as not owning the Buſineſs, or not knowing what to do or ſay. This much diſcouraged the Rebels to ſee they had no more Thanks for their Pains, and ſo all Things continued till the 25th Day of *December*, at which Time they intended to march, and fall upon the old King. But in the mean time the King's Siſter fled away with the Prince from the Court into the Country near the King, which ſo amazed the Rebels, that the Money, Cloth and Plunder which they had taken, and intended to give the Strangers to gain their Aſſiſtance, they threw away and fled. Others of the Company fell upon their Conſorts, thinking to prove their Loyalty by killing their fellow Rebels, and ſo the People were all in Arms one againſt another.

The Prince did not accept their Election of him.

The Prince being carried away to the King, the Rebels diſperſe.

By this time a Great Man had drawn out his Men, and declared for the King, and hearing that the Rebellion was broken, went forth to catch the Rebels that were ſcatter'd abroad, and killed all of them that he could find, and ſo all Things return'd back to the King without his Care or Help, while he lay ſtill in the Mountain. The King hearing of theſe Tranſactions in 8 or 10 Days time, commanded that no more ſhould be killed, but all that were taken ſhould be impriſon'd until they were examined, which he did not do ſo much to ſave any innocent Perſons from Violence, as that he might have an Opportunity to torment the Rebels, and make them confeſs their Complices; for he ſpared not any that were ſuſpected to be guilty. Some lie to this Day chain'd in Priſons, their Eſtates being ſequeſtred, and they begging for their Living.

The Rebels taken and impriſon'd.

The King ſent an Arch-Rebel to the *Dutch* to be puniſh'd.

One of the moſt noted Rebels, named *Ambom*, *Wellaraul*, he ſent to *Columba* to the *Dutch*, ſuppoſing that they would invent new Tortures for him, which he knew not of; but they inſtead of executing of him, cut off his Chains, and kindly entertain'd him; and there he is ſtill reſerved for ſome Deſigns they may have againſt the Country. The King, tho' he was ſenſible, that 'twas his rigorous Government that had occaſion'd this Rebellion, yet amended not in the leaſt, but, like *Reboboam*, added more to the People's Yoak, and being ſafely reinſtated in his Kingdom, he poiſon'd his Son, becauſe his Life had given ſome Encouragement to the Rebellion; and, which ſhew'd his horrible Cruelty and Ingratitude, he put thoſe to Death who went along with him when he fled, a very bad Reward of their Loyalty, which he could not doubt of from ſo much Experience.

This Rebellion was foreſhew'd by a Comet, which appear'd juſt at the ſame time, ſo very exactly, both as to the Riſe, Progreſs and Event of it, that we may not omit ſo great and apparent a Wonder. It appear'd at firſt before the Rebellion broke out with a fearful Blaze, the Tail ſtanding away towards the Weſtward, exactly pointing out the Side of the Country from whence the Rebellion ſprung. Juſt when the Rebellion broke out, the Star was right over their Heads, as it were, pointing out the Rebels, and when they were in actual Rebellion, the Tail of the Star was turned the contrary Way, and ſtood away Eaſtward, and by Degrees in a little time diminiſh'd and vaniſh'd quite away, ſhewing the ſhort Continuance of what had been hatch'd by ſo much Diſcontent and Fury. This portentous Star was ſo remarkable, and obſerved by ſo many, yea, and by the King himſelf, that when another appear'd in the Year 1666. in *February*, with a Stream toward the Weſt, the Head being under the Horizon, both King and People were much daunted at the Sight of it, as fearing another Rebellion, and the King ſent Men unto the higheſt Mountains in the Land, to look if they could perceive the Head of it, but they could not; for it kept under the Horizon. This was viſible about one Month, and then was ſo diminiſh'd, that it could not be ſeen. But nothing remarkable enſued to this Country upon it.

A Comet foreſhewing this Rebellion.

Another Comet.

CHAP. IX.

Of the Inhabitants, their different Ranks and Qualities.

Malabars pay Tribute.

BEſides the *Dutch*, who poſſeſs about a 4th part of this Iſland, there are *Malabars*, a free People, which pay a Duty to the King for the Land they enjoy, as the King's natural Subjects do; there are alſo *Moors*, who are like Strangers, and hold no Land, but live by carrying Goods to the Sea-Ports, which are all now in the Hands of the *Hollanders*. The Sea-Ports are inhabited by a mix'd People, *viz.* *Malabars* and *Moors*, and ſome Blacks, who profeſs themſelves to be *Roman* Catholicks, and wear Croſſes and uſe Beads. Some of theſe are under the *Hollanders*, and pay Tribute to them.

The *Chingulays* the natural Inhabitants of this Iſle.

The natural and proper People of this Iſland are a ſort of Men, called *Chingulays*. Whence they derive themſelves it is uncertain; they know not their own Original, and the Tradition of the *Portugueſe*, That they are a Colony of *Chineſes*, whom the King of *China* ſent away with his Son, whom for his rigorous Diſpoſition the People obtain'd that he might be baniſh'd, that he might not ſucceed him, and he fix'd by chance upon this Iſland, is altogether improbable, becauſe this People and the *Chineſes* have no Agreement or Similitude in Features, Language or Diet. It is moſt probable, that they came from the *Malabars*, their Country lying next, tho' they do reſemble them little or nothing. The *Europeans* are more like theſe People, than any other Nation.

Wild *Chingulays*, called *Vaddahs*.

Of theſe Natives there are 2 Sorts, wild and tame. The wild live in the Woods, as the wild Beaſts do, and the Land of *Bintan*, which is very woody, is full of them, as it is alſo of Deer. They are called *Vaddahs*, and ſpeak the *Chingulays* Language, but dwell near no other Inhabitants. They kill Deer, and drying the Fleſh over the Fire, ſell it to the People of the Country, who come to them to buy it. They never till any Ground for Corn, and live only upon Fleſh. They are very expert Bow-men, and carry a little Ax, which they ſtick in by their Sickles, to cut Honey out of hollow Trees. Some few of them have Commerce with the Inhabitants near the Woods. They have no Towns nor Houſes, and only live by the Waters under a Tree, with ſome Boughs cut and laid round about them, to give Notice when any wild Beaſts come near, which they know by their tramp- See FIG. ling upon them.

Some of them ſubject to the King.

Some of the tamer ſort of theſe are in a kind of of Subjection to the King, and when they are found, tho' it be done with a great deal of ſearching in the Woods, they will acknowledge his Officers, and bring them Elephants Teeth, Honey, Wax and Deers Fleſh; but the Officers are obliged to give them near the Value in Arrows, Cloth, and other Goods they want, fearing leſt otherwiſe they ſhould appear no more. It is reported, that the wilder ſort of them, when they want Arrows, will carry their Load of Fleſh in the Night, and hang it up in a Smith's Shop, with a Leaf hung by it in the Form they would have their Arrows made, which if the Smith do make according to their Pattern, they will requite him, and bring him more Fleſh, but if he doth not make them, they will do him ſome Miſchief at one time or another in the Night by ſhooting; but if he makes the Arrows, he leaves them in the ſame Place he found the Fleſh hanging.

The Robberies of the Carriers.

Formerly in this King's Reign theſe wild Men lay in wait to catch the Carriers that went down with Oxen to carry Betel-nuts to the Sea-Ports, and bring up Cloth, and they took from them ſuch Goods as they had Occaſion for; which the King hearing of, gave Order to take them dead or alive; and they knowing there would be no Pardon, would not be taken alive, but being carried dead to the King, he hung up the Heads of the 2 chiefeſt of them on Trees by the City, and ever ſince they have not preſumed to diſturb the Country, nor the King them, becauſe he only deſired they ſhould be quiet, and not be againſt him.

They are sick with the People.

him. About *Hourly*, the remotest of the King's Dominions, there are many of them that are pretty tame, and come and buy and sell among the People. The King once having an Occasion of an hasty Expedition against the *Dutch*, the Governour there summon'd them all in to go with him, and they obey'd him, and did as good Service with their Bows and Arrows as any of the rest; but returning home again, they removed farther into the Woods, and would be seen no more, for fear of being press'd again to serve the King. They never cut their Hair, but tie it up on a Bunch upon their Crowns. The Cloth they use is so narrow, as not to cover their Buttocks.

A Comet foreliewing this Revolution.

Their Religion and Sacrifice.

They have a Religion, as well as the tame; but these build Temples, but the other offer Sacrifice under Trees, and while it is offering dance round it, both Men and Women. They have Bounds in the Woods among themselves, and one Company of them is not to shoot, nor gather Honey nor Fruit beyond those Bounds. Near the Borders of one of these Parties stood a Jacke-Tree. A *Vaddah* being gathering Fruit from this Tree, another of the Division saw him, and told him, he had nothing to do to gather Jackes from that Tree, because it belong'd to his Party. They fell from Words to Blows, and one of them shot the other; at which more of both Sides met, and skirmishing with one another, left 20 or 30 dead upon the Spot. They are so curious in their Arrows, that no Smith can please them.

Another Comet.

They presented the King.

The King once having received a great Present from them, gave them some of his best Arrow-Blades, but they did not please them; for they went all of them to a Rock by a River, and ground them into a clear different Shape, which the other *Chingulays* do not use. They have a peculiar Way by themselves of preserving Flesh; for they cut an hollow Tree, and put Honey into it, and then fill it up with Flesh, and stop it up with Clay, which they preserve for a time of Want. For Portions with their Daughters they give hunting Dogs. They are said to be very courteous, so that some of the tame *Chingulays* being in Discontent, will leave their Houses and Friends, and go and live amongst them, and are civilly entertain'd by them. The tamer sort of them, as has been said, will sometimes appear and maintain a kind of Trade with the tame Inhabitants; but the wilder, called *Rambab Vaddahs*, never shew themselves.

They are very civil.

The tame *Chingulays* described.

The tame or civiliz'd Inhabitants of this Isle, are a People proper and well favour'd, beyond all People that I have seen in *India*, wearing Cloth about their Loins, and a Doublet after the *English* Fashion, with little Skirts button'd at the Wrists, and gather'd on the Shoulders like a Shirt; on their Heads a red *Tunis* Cap, or if they have none, another Cap with Flaps, according to the Fashion of their Country, with a handsome short Hanger by their Side, and a Knife sticking in their Bosom on the Right side. They are very active and nimble of Body, and very ingenious; for, except Iron-Work, they make all other Things that they have need of themselves; insomuch, that they build their own Houses. They are crafty, and so treacherous, that they are not to be trusted upon any Protestations. Their Manner of Speaking is very smooth and courteous, insomuch, that they who are unacquainted with their Dispositions and Manners may easily be deceived by them; for they make no Conscience of Lying, nor is it accounted any Shame or Disgrace to be catch'd in a Lye, 'tis so customary. They are very vigilant and wakeful, satisfied with a very little Sleep; very hardy both for Diet and Weather; very proud and self-conceited.

Not to be trusted.

Live no Shame.

The Bramins are the Carry, &c.

They take something after the *Bramins*, with whom they scruple not to marry and eat, in both which otherwise they are very shy and cautious; for there being many Ranks or Castes among them, they will not match with any inferior to themselves, nor eat Meat dress'd in any House, but in those only that are of a good Caste, or Race among themselves, and that which any one hath left, none but those that are near a-kin will eat. They are not very malicious one towards another, and their Anger doth not last long, and there is seldom or never any Blood shed among them in their Quarrels. 'Tis not customary among them to strike another, and 'tis very rare that they give a Blow so much as to their Slaves, who are allow'd to talk and discourse familiarly with their Masters. They are very near and covetous, and will pinch their own Bellies for Profit; very few Spendthrifts or bad Husbands are to be met with among them.

They do rarely strike any body.

The Robberies of the Carriers.

The Inhabitants of the Mountains and Lowlands differ. The Lowlanders are all kind, pitiful, helpful, honest and plain, very compassionate to Strangers; but the Mountainers are ill-natur'd, false and unkind, tho' outwardly fair, and seemingly courteous, and of a more complaisant Carriage, Speech and Behaviour than the Lowlanders.

Stealing abhorred most by them.

Of all Vices they hate and abhor Stealing, and there are very few Robberies committed among them. They do much extol and commend Chastity, Temperance and Truth, both in Words and Actions, and confess, 'tis their Weakness not to practise them, acknowledging, that the contrary Vices are abominable both in the Sight of God and Man. They do love and delight in those Men that are most devout and precise in their Manners. They will believe a Christian's Word in bearing Witness sooner than their own People, because they think that they make more Conscience of their Words.

Christians believed.

They are very superstitious in making Observations upon Ominous Accidents. Sneezing they reckon to import Evil, and if they chance to sneeze when they are going about any Business, they stop. None may sneeze, cough or spit in the King's Presence, as being Omens of ill or rude Boding. There is a little Creature like a Lizzard, which they esteem a Prophet, and if he cries, they cease their Work, supposing that he tells them that a bad Planet rules that Moment. They take great Notice who they meet withal in a Morning first; a white Man or a great-bellied Woman they reckon fortunate; but decrepit or deformed People they esteem unfortunate. When they travel a great many of them, they go all one after another singly, because their Paths are so narrow, but talk all the Way of the same Matter, and carry their Provisions for their whole Journey.

Good and bad Omens.

A general Character of them.

In short; In Carriage and Behaviour they are grave and stately, like the *Portuguese*, in their Understandings quick and apprehensive, in Designs subtle and crafty, in Discourse courteous, but full of Flatteries, naturally inclined to Temperance both in Meat and Drink, but not to Chastity, near and provident in their Families, commending good Husbandry, not passionate in their Dispositions, nor hard to be reconciled again when angry; in their Promises very unfaithful, approving Lying in themselves, but misliking it in others, delighting in Sloath, not labouring but in Cases of Necessity, neat in Apparel, nice in Eating, not given to much Sleep.

Womens Habits and Ornaments.

As for the Women, their Habit is a Waste-coat of Callico covering their Bodies, flourish'd with Blue and Red, their Cloth hanging longer or shorter below their Knees according to their Qualities; a Piece of Silk flung over their Heads; Jewels in their Ears, and Ornaments about their Necks, Arms and Middles. They are in their Gate and Behaviour very high, and stately in their Carriage, like the *Portuguese*, but will admit the meanest Persons to their Speech. They are very thrifty, and 'tis a Disgrace to them to be prodigal, and their Pride and Glory to be accounted near and saving; for to praise themselves they will sometimes say, *That Scraps and Parings will serve them, but the best is for their Husbands.* The Men are not jealous of their Wives, for the greatest Ladies in the Land will frequently talk with what Men they please, even in their Husbands Presence, and altho' they be so stately, they will lay their Hand to any Houshold Work, tho' they have Slaves and Servants enough to do it.

Their Respect to their Husbands.

The several Degrees among them.

There are sundry Castes, or Degrees of Quality among them, which are not according to their Riches, or Places of Honour about the King, but according to their Descent and Blood; and whatsoever this Honour is, be it higher or lower, they hold that it remains from Generation to Generation. They abhor to eat, drink or intermarry with any of an inferior Quality to themselves. The Signs of higher or meaner Ranks are wearing Doublets, or going bare-back'd without them; the Length of their Cloth below their Knees; their sitting on Stools, or Blocks, or Mats spread on the Ground, and in Caps.

They will not marry beneath their Degrees.

They are specially careful in their Marriages, not to match with any inferior Caste, but always in their own Rank, and Riches cannot prevail with them so to stain the Honour of their Family; and if any Woman be so deluded, as to marry beneath herself, if she appear among her Friends, *viz.* her Father, Brothers, and all her near Relations declare themselves her Enemies, and they'll certainly kill her to wipe off the Dishonour; yet it is not accounted a Shame or

Disgrace for a Man of the highest Degree to lie with a Woman of the lowest Degree, if he doth not eat or drink with her, nor take her to him for a Wife; but if he should, the Magistrate fines him or imprisons him, or both, and he being excluded from his Family, is accounted of the same Rank with his Wife. If he lies with a married Woman, the Husband, if he catch them, may kill both of them, if he pleases, and so by marrying one into another the Descent and Dignity of Families is preserved for ever.

Their several Degrees are, *Hondrews.*

The particular Ranks and Degrees among them are these:

1. *Hondrews*, who are their chief Noblemen, so called from *Hondrewnd*, Majesty. Out of these alone the King chuseth his Great Officers at Court, and Governours in the Country; Riches here make none honourable, nor are valued, for many of the Lower sort exceed these *Hondrews* in Estate. They are distinguish'd from others by their Names, and wearing of their Cloth, which the Men wear half-way down their Legs, and the Women to their Heels; one End of it the Women fling over their Shoulders, and with the very Tip cover their Breasts, whereas the other sort of Women must go naked from the Waste upwards, and their Cloaths hang down not much below their Knees, except it be cold, for then both Women and Men may throw their Cloaths over their Backs, but then they do excuse it to the *Hondrews*, when they meet them, saying, *Excuse me, it is for Warmth.* They are distinguish'd also by their own Country Caps, which are in the Fashion of Mitres, with 2 Flaps tied up over the Tops of the Crowns, and all of a Colour, either white or blue, but the Caps and Flaps of Persons of inferior Quality are of different Colours, and the Flaps always red. There are 2 sorts of *Hondrews*, the one being inferior to the other in relation to Marriage, but not in other Things. The greatest part of the Inhabitants of the Land are of this Degree. All Christians are accounted equal with the *Hondrews*, whether they be white or black, but with them 'tis an Abatement to the Honour of the Whites, that they eat Beef and do not wash their Hands after they have been at Stool, which 2 Things with this People are reckon'd an Abomination. Among the Noblemen may be reckon'd an Honour, which the King confers like unto Knighthood. It ceaseth in the Person's Death, and is not Hereditary. The King confers it by putting about their Heads a Piece of Silk or Ribband, embroider'd with Gold and Silver, and bestowing the Titles of *Mandiamca* upon them. There are never but few of these in the Realm.

Distinguish'd by their Names and Cloaths.

Hondrews of 2 sorts.

Knighthood.

Goldsmiths, Blacksmiths, Carpenters and Painters.

2. Goldsmiths, Blacksmiths, Carpenters and Painters are all of one Degree and Quality, and are next to the *Hondrews*; but they will not eat with them; yet they wear the same Apparel, and are privileged to sit on Stools, which none of the inferior Ranks may do. The Artificers were anciently accounted almost equal to the inferior *Hondrews*, and they would eat with them, but were degraded upon this Occasion. Some *Hondrews* went to a Smith's Shop to have their Tools mended, and when it came to be Dinner-time, the Smith leaves his Work and goes to Dinner, and clapping the Door after him, leaves them in his Shop to wait. The *Hondrews* took it for a great Affront, and caused a Decree to be made, that for ever after all the People of that Rank should be deprived of the Honour of having *Hondrews* eat in their Houses, and this Decree has been inviolably observed ever since. Nevertheless, the Smiths which live in the King's Towns take much upon them, because every one of them has a Parcel of Towns belonging to them, whom none but they are to work for, and if any other Smith does their Work, he is punish'd. These Smiths are to mend every Man's Tools for a certain Rate of Corn to be paid to him in Harvest, according to ancient Custom, and if they have any new Tools made, they must pay for them, yea, and court him too; for in order to have it done, they must come in humble Manner with a Present of Rice, Hens, or other Provision, or a Bottle of Rack, to desire him to appoint his Time when they shall come to have their Work done, which when he has set, they come upon the Day with Iron and Coals. The Smith sits very gravely on his Stool before the Anvil, and they must blow the Bellows, and work it themselves with the great Hammer; he only fashions it with the little Hammer: If it be to be filed, he makes them grind it first, and then he finisheth it. All this State, forsooth, he takes upon him, because the People are compell'd to go to him, and none else.

degraded from eating with *Hondrews.*

The Smith's Stateliness.

3. All that are of any Craft or Profession are accounted of an inferior Degree; as, *Courattə's*, i. e. Catchers or Keepers of Elephants, who are reckon'd equal with Smiths, tho' they neither eat nor marry together. They may wear such Apparel as the *Hondrews*, and sit on Stools, but the *Hondrews* will not eat with them. No Artificer ever changes his Trade from Generation to Generation, but the Son is the same with his Father, and the Daughter marries only to those of the same Craft, and her Portion is some Tools of use to the Trade, and over and above what her Father pleaseth. Barbers, both Men and Women, wear Doublets, but may not sit on Stools, nor will any eat with them. Potters are more inferior. These Men may not wear Doublets, nor wear their Cloth much below their Knee, nor sit on Stools, neither will any eat with them; but they have this Privilege at an *Hondrew's* House, to take his Pot with a Pipe to it, and pour the Water into their Mouths themselves, which none of the inferior Degrees are admitted to, for they must hold their Hands to their Mouths and gape, and the *Hondrews* themselves will pour the Water in. The Potters were denied this Honour, till they agreed together to make no Pots with Spouts for any but themselves, and when the *Hondrews* that wanted could get none, they condescended to grant them this Honour. *Ruddaughs*, Washers, who are many. They wash for all Degrees as low as a Potter, but not lower. They carry a Cloth both Men and Women on their Shoulders. They scald their Linnen with the Steem of a Kettle of Ley, and then wash them clean in a River, slapping them against a Rock, which, as they manage it, doth not tear them. *Hungrams*, or Jaggory-makers. None will eat them, but it is lawful to buy and eat the Jaggory they make, but nothing else. *Poddahs*, Husbandmen and Soldiers, inferior to all afore-named. They take their Profession from their Predecessors. Weavers, who not only weave Cloth, but are Astrologers, and tell the People the good Days and Seasons. At the Birth of a Child they write an Account of the Day, Time and Planet it was born in and under, and these they keep with great Care all their Lives, by which they know their Age, and the Success or Evil which shall befal them. They also beat Drums, and play on Pipes, and dance in the Temples of their Gods and at their Sacrifices, and carry away such Victuals as is offer'd to their Idols, which is accounted a very mean Office. They will eat dead Cows. Basket-makers, called by them, *Kiddea's*, who make Fans to fan Corn, Cane-Baskets, Lace. Bedsteds, and Stools; *Kinnerahs*, or Mat-makers. These Men may not wear any thing on their Heads: The Women of none of these sorts ever do. None of these may presume to be called by the same Names of the *Hondrews*, nor pretend to be of an higher Quality where they are not known, which, indeed, they are never known to do. All Outlandish People are esteem'd above all these inferior Ranks. The *Hondrews* Names end ever in *Oppow*, and others in *Adgah.*

Craftsmen and Artificers.

Barbers.

Potters.

Washers and their Way.

Husbandmen, Soldiers, Weavers.

Foreigners how esteemed.

4. Slaves make another Rank. Their Masters allow them Land and Cattle for their Maintenance, which many of them do so well improve, that, except in Dignity, they are not far behind their Masters, only they are not permitted to have Slaves. Their Masters will not take away what they have got by their Industry, but are pleased with it, as being Persons in whom they may repose Trust; and when they do buy or get any new Slaves, they presently provide them a Wife, and put them to keep House and settle, that they may not think of running away. Slaves born of *Hondrew* Parents retain their Honour.

Slaves and their Wealth.

5. The lowest and basest of the People are Beggars, made so for their Transgressions by former Kings. The Cause was thus. Their Ancestors were *Dəddah Vaddahs*, *i. e.* Hunters, who were to furnish the King's Table with Venison; but instead of Venison they brought him Man's Flesh, which the King well liking, commanded them to bring him more of the same sort; but it being discover'd by the King's Barber, the King was so inraged, that he thought Death too good for them, and to punish their Persons not a sufficient Recompence for the Injury done him; whereupon he establish'd a Decree, that all the Tribe should be expell'd from dwelling among the Inhabitants of the Land, and not be admitted to use any Means or Calling to provide themselves Sustenance.

Beggars.

How man and wife.

How vile and odious.

nance, but that they should beg from Door to Door through the Kingdom for ever, and be looked upon as the most base and odious of all People. Hence it is, that they are obliged to give such Titles to all People, as are due to Kings and Princes only. They are not permitted to fetch Water out of the Wells as other People are, but fetch it from Holes and Rivers. None will touch them least they be defiled. They go begging in whole Troops, both Men, Women and Children, carrying whatever they have in Baskets, hanging at each end of a Pole on their Shoulders: The Women carry nothing, but where they come to beg, dance and shew Tricks, while the Men beat Drums: They'll twirle a Brass Basin on the Top of one their Fingers strangely, and toss 9 Balls up into the Air at once, and catch them all as they come down, and so toss them up again: They'll put several Beads of divers Colours, and of one Size into their Mouths, and takes them out all of a Colour by themselves; and by these pleasing Tricks, with their fawning Titles and Importunities they get an Alms from every one they come nigh, and so live as well or better than any People in the Land without Care or Labour. They build themselves Hovels in remote Places, and High-ways under Trees: Yet one Office is required of them by the King, which is to make Ropes of the Hides of such Cows as die of themselves, to catch and tie the Elephants with, and by this means they get all the Flesh of the dead Cows that die in the Land from the Weavers, who before used to cut them in Pieces, and eat them; but now if any of these *Roudeahs* or Beggars see them, they beat them off with their Poles, on which they carry their Baskets, saying, *If they hack their Hides, they cannot perform the King's Service*, and the Weavers being afraid to touch them, haste away. These Men being so vile, lie with their Daughters or Mothers, as if there were no Consanguinity among them. Many times the King, when he cuts of some Noblemen, against whom he is much incensed, will order their Wives and Daughters to be carried to a River-side, and delivered to these Beggars, which is esteem'd by all a worse Punishment than Death, and to avoid it they'll often drown themselves by leaping into the River. Some of these Beggars, who dwell in remote Parts distant from any Towns, keep Cattle, and sell them to the *Chingulays*; also shoot Deer, and sell them in the Woods where they fall, for if they touch them none will buy them. This People, knowing that a Barber was the Occasion of all this their Misery, will not eat what is dresst in a Barber's House to this Day, in Revenge of his Fact.

Their Houses and Duty to the King.

Their Trades.

Their Incest.

Their Hatred to Barbers.

CHAP. X.

Of their Religion, Gods, Temples, Priests, Worship, Festivals, Doctrines and Practices.

Devils as well as Gods, worshipped by them.

THE Religion of the Country is Idolatry, and they have many both Gods and Devils, which they worship under their particular Names. They acknowledge one to be Supreme, whom they call, *Osse Pelle Maupt Dio*, i. e. the Creator of Heaven and Earth, whom they hold to rule and govern the same still, and send forth other Deities to see his Will executed in the World: And these they account petty and inferior Gods, holding them to be the Souls of good Men, who formerly lived here upon Earth. The Devils, which are the Souls of evil Men, they believe to inflict Sickness and Misery upon them.

Their God *Buddou*.

They have another God to whom the Salvation of Souls belongs, whom they call *Buddou*, and him they believe to have been once upon the Earth. and when he was here, did usually sit under a large shady Tree, called *Bogahah*, which ever since they have accounted Holy, and therefore celebrate their Worship with great Solemnity under it. He ascended from the Earth from the Top of their highest Mountain, called, *Pico Adam*, where they say is the Impression of his Foot. [Concerning the God *Buddou*, which the *Chingulays* have in so great Veneration, *Ribeyro* gives us this further Account; That they worship him under the Figure of a Man of a Giant-like Stature, being above 32 Foot high; and hold, That he lived many Years in their Isle, living a most holy and mortified Life: By their Computation of Time, since he lived among them, it appears, that it was about the 40th Year after Christ, and so it might very well be the Apostle St. *Thomas*; for, 'tis a constant Tradition in all the Eastern Parts, that that Apostle preach'd the Gospel to all those People. The *Chingulays* say, that he was not born among them, and that he left their Country, and died upon the Continent; which agrees very well with the common Opinion of the *Indian* Christians, and particularly with those of the Coasts of *Cormandel*, who are called the Christians of St. *Thomas*, p. 113.]

The Sun and Moon.

The Sun and Moon they seem to be of Opinion, that they are Gods, as the Names they give them may prove for the Sun; which, in their Language, is *Irri*, they call *Irridio*, i. e. the God-Sun; and the Moon whose Name is *Handa*, *Handadio*, i. e. the God-Moon; but to the Stars they give no such Titles.

Their Temples.

Their *Pagoda's*, or Temples of their Gods, are innumerable, many of them of exquisite Work, built of hewn Stone, and engraven with Images and Figures, but by whom is not known, but certainly by more ingenious Artists than is now among them. The *Portugueze* have defaced some of them, and none of them have Skill enough to repair them. They are of different Fashions, the ancient ones are of rare Work, but the latter built are made only of Clay and Sticks, and no Windows. Such as belong to the *Buddou* are in the Form of a Pigeon-House, 4 square, one Story high, and some 2, in which are Idols, as well above as below. They are some tyled, and some some thatch'd.

Their Idols are monstrous.

The Idols and Images are very monstrous to behold, some of Silver, others of Brass and other Mettals, as also painted Sticks and Targets, and strange kind of Arms, as Bills, Arrows, Spears and Swords; but there are no Arms in the *Buddou's* Temples; because he is for Peace, and therefore there are in his Temples only Images of Men cross-legg'd, with yellow Goats on like the *Gouni* Priests, their Hair frisled, and their Hands before them like Women. These Images, they say, they do not own to be Gods themselves, but only Figures representing their Gods to their Memories, and as such, they give to them Honour and Worship. Women having their natural Infirmities upon them may not come near the Temples of their Gods, nor Men, who have been in the Houses where such Women are.

Their Opinion of their Images.

Church-lands many.

Unto each of these *Pagoda's* belong great Revenues of Lands, given them by former Kings, who have thereby much impair'd the Revenues of the Crown, there being rather more Towns belonging to the Church than to the King. These Estates are to prepare daily Victuals and Sacrifices to be set before the Idols. These Temples have all sorts of Officers belonging to them, as the Palace hath; and for State tame Elephants, as the King has. Most of these *Pagoda's* are dedicated to those Gods, to whom belong the Government of all Things appertaining to this Life.

Private Chapels.

Besides these publick Temples, many People do build in their Yards private Chapels, like Closets, sometimes not above 2 Foot square, and set upon a Pillar 3 or 4 Foot from the Ground, in which they put an Image of the *Buddou*, that he may be near them to testifie their Love and Service to him, which they do by lighting up Candles and Lamps in his House, and laying Flowers every Morning before him; and at sometimes they boil Victuals and lay it before him, thinking the more they thus honour him here, the more shall be their Reward hereafter. All Blessings and good Success, they say, come from the Hands of God, but Sickness and Diseases proceed from the Devil;

not that of himself he hath such an absolute Power; but as Servants have Power, License and Authority from their Masters, so they from God.

Their Priests of 3 Sorts, viz. 1. Tirinanxies.

Their Priests are of 3 Sorts, as their Temples are. The first and highest Order of Priests are the *Tirinanxies*, who are the Priests of the God *Buddou*, and their Temples are styled, *Vehars*. [From these *Tirinanxies Ribeyro* makes this Observation, and says, That whosoever considers the Discipline and Order of the *Chirgulays* in Religious Matters, must think, that formerly they have had some Knowledge of the Christian Religion; for about the Time of *Justinian* there were some Churches in *Ceilon* for the Christian Merchants that came thither out of *Persia*; and 'tis probable, that the first Plantation of the Gospel not being sufficiently settled, they fell into their ancient Heathen Worship, but preserved some Footsteps of the Ecclesiastical Government among them; for they have a Supream Bishop, who with his *Gonnies*, or *Changatars*, takes Cognizance of all Religious Matters, whom they call the *Terumvansse*. He is generally a Person very Reverend for his Age and Holiness of Life. He has for the Mark of his Dignity a Golden Ribband and Ivory Scepter: He never goes out, but he is accompanied with a great Number of *Gonnies*, or *Chingatars*, and enjoys considerable Revenues. The whole Island is divided into 4 Dioceses, and each of them has its Bishop, who is subject to the *Terumvansse*, and governs all the *Gonnies* in his Province. The first has his Residence near *Sofragan*, and has a famous Temple consecrated to *Haleiperumal*. The 2d dwells near *Calane*, by the Temple of *Biwxara Perumal*. The 3d resides at *Catagerama*, where is the Temple of the great Idol *Caude Suami*; and the 4th lives by the Temple of *Altener*. These Temples have all Officers and Trades belonging to them which are necessary for the Service done in them, and *Gonnies* appertaining to them. *p.* 116, 117.

Concerning their *Gonnies* he also adds, That the *Gonnies* are in the highest Esteem, and till the Reign of this King were not thought punishable, insomuch, that they joined themselves will all Conspirators against their Prince, and changing their Consciences according to their Humour and Interest, led away the People into their Sentiments, and become formidable; but this King broke thro' this bad Custom, and put many of them to Death. Altho' they are well endow'd, yet they have much of the People's Charity, and especially of such as are dying; for when any one is dangerously ill, they send for a Priest, whom they bring under an Umbrella, and treat him as well as they can, and he stays with them till the sick Man is dead, or out of Danger, reciting the Song called *Bonna*, with the Paraphrase, and preaching to his Friends and Assistants after a most pathetick Manner. They are perswaded, that the Prayer that *Gonni* makes has an Effect proportionable to what they give him, and so they present him largely, and conduct him home with the same Ceremony they brought him. *Ll. p.* 117.—120.]

They have a Religious House at *Digligy*, where they dwell and assemble to consult about their Affairs, which is called, *Vihar*. They admit none to their Order, but Persons of the most noble Birth, and that have Learning, and are well bred, and of those they admit many; but there is not above 3 or 4 that arrive at the high Degree of a *Tirinanx*, which are chosen out of all the rest, and made so by the King. These *Tirinanxies* only live in the *Vihar*, and enjoy great Revenues, and are the Superiors of all the Priests. Many of these *Vihars* are endow'd, and have Farms belonging to them, and these *Tirinanxies* are Landlords, to whom the Tenants at certain Times pay their Rents. These Farmers live the easiest of any People in the Land, for they have nothing to do, but to bring in those set Dues at certain Times and depart, and to keep in Repair certain little *Vehars* in the Country; so that the rest of the *Chirgulays* envy them, and say of them, *Tho' they live easie in this World, they shall not escape unpunish'd in the Life to come, for enjoying the* Buddou's *Land, and doing him so little Service.*

Their Revenues.

The *Gonni*, their Honour, and the Respect paid them.

All the rest of the same Order are called *Gonni*. Their Habit is the same to all of them, *viz.* a Yellow Coat, gathered together about their Wastes, and coming over their Left Shoulder, is girt about with a Belt of fine Packthread. Their Heads are shaved, and they go bare-headed, and carry in their Hands a round Fan, with a Wooden-Handle, which is to keep the Sun from their Hands. They enjoy great Honours and Privileges. They pay no Taxes to the Kings for their own Lands, and the People, whenever they meet them, bowe down to them, as their Gods, but they bowe to none. They are allow'd to carry the broad End of the Tallipot-Leaf foremost over their Heads, which none but the King dôes, and whereseever they go they have a white Cloth, and a Mat laid upon a Stool for them to sit upon, which is an Honour used to the King only. They are to do no manner of Work, nor may they marry, or touch a Woman, nor eat above one Meal a Day, unless it be of Fruit and Rice with Water, which they may eat Morning and Evening, nor may they drink Wine. They may eat any lawful Flesh, when it is dresst for them, but must have no hand in the Death of it, nor so much as consent to it. They may lay down their Order, if they please, by pulling off their Coat, and flinging it into a River, and washing themselves Head and Body, and then they become as other Lay-men, and this they sometimes do that they may marry. When any Man is minded to provide for his Soul, they bring one of the Priests under a Cloth, held up by 4 Men, unto his House, with Drums and Pipes, and great Solemnity, which can only be done to the King besides. While he is there he sings *Bonna* to him, which is some Religious Service out of a Book, made of Tallipot-Leaves, and he tarries a Day or 2 with him, and they give him great Entertainment and Gifts, according as they are able, which they carry for him home, and conduct him back with the like Solemnities. Some of these Priests were beheaded, and cast into the River afterwards by the King, because they had cast off their Habits, and putting on Swords, had join'd in the Rebellion; but the People were amazed, that the King durst do so to such holy and reverend Persons, who had never been so served by any of the former Kings, and were reputed and called the Sons of *Buddou*.

Not to marry.

Their Office to the sick.

Some of them beheaded for Rebellion.

The 2d Sort of Priests are those called *Koppuhs*, who belong to the Temples of the other Gods, called *Dewalls*. These are not distinguished by any Habit from the rest of the People, no not in their Worship, only they wear clean Cloaths, and wash themselves before they go to their Service. They are taken from among the *Hondrews*, and only enjoy a Piece of Land belonging to the *Dewall*, where they officiate, and this is all the Benefit they have, unless they steal any thing dedicated to the Gods. They follow Husbandry and other Employments, as other Men do; but when the Times of Worship are, which is Morning and Evening, oftner or seldomer, as the Revenues of the Temple hold out; they present the boil'd Rice, and other Victuals, which are brought to the Temples, before the Idol, and when they have stood there a while, they bring them out again, and then the Drummers, Pipers and other Officers that belong to the Temples, eat it. These Gods never have any Flesh offer'd in Sacrifice to them, but any thing else.

2. Koppuhs.

Follow Husbandry.

The 3d Sort of Priests are the *Jaddeses*, Priests of the Spirits called *Deyantaus*. Their Temples are called *Covels*, and have no Revenues belonging to them, but a Man piously disposed builds a small Temple at his own Charge, and becomes Priest thereof. On the Walls of it they paint the Images of fierce Men, with Bills, Swords, Arrows and Shields. These Temples are seldom called God's *House*, but *Jacco's*, i. e. the Devil's. Upon some extraordinary Festivals to *Jacco*, the *Jaddese* shaves off all his Beard. When they are sick, they send for the *Jaddese* to their House, and give him a red Cock to dedicate to the Devil, which he does by holding it in his Hand, and an Arrow with it, and telling the God, *That if he restore the Party to his Health, that Cock shall be sacrificed in his Covel*; and then they let it go among the rest of the Poultrey a Year or two, and then if they do not carry it, the Priest will come for it, with many others also dedicated, pretending that he must make a Sacrifice to the God, but he will often sell them.

3. Jaddeses.

The Devil's House.

The Devil cries out among them.

When they enquire any thing of their Gods, the Priests takes up some of the Arms, or other Instruments of the Gods, which are in the Temple, upon their Shoulders, and then either feigns himself to be mad, or really is so, which the People call *Pissowetitch*, and then think the Spirit of the Gods is in him, and as they speak to him, as if he were God, so whatever he pronounceth they look upon as spoken by God himself.

Their Oracles.

Wed-

Their Worship.

Wednesdays and *Saturdays* are the Days when People come and address themselves to the Gods; that is, either pray for Health, or for their Help in some weighty Matters, as in Wars, or swear in any Matter in Dispute; but their chief Business with their Gods is for Recovery of Health, and they hold, that the God or Devil that made them sick hath Power only to restore them; and therefore when they are sick, they first use Means to know which God or Devil hath been the Cause or Author of it; and this they easily find out, by hanging a Pair of Sizzars upon a Bow-string, and repeating the Names of their Gods; for they say, the Sizzars will shake when that God is mentioned, and when he is thus found out, they offer their Oblations and Sacrifices chiefly to him.

To the Planets.

There are 9 Deities, called *Gerehah*, which are the Planets (reckoning in probably the Dragon's Head and Tail) from which they hold that their Fortunes proceed, and if they be ill affected towards any Party, neither God nor Devil can revoke it. When they worship these *Gerehah*, they make Images of Clay according to the Number of the Disaffected, which they pretend to know by certain Magical Tricks, and paint them with divers Colours and monstrous Shapes, something like a Man, but with Tusks like a Boar, and Horns like a Bull. Before them the sick Party sits, and they set Victuals before them. These Ceremonies are always perform'd in the Night with Drums, Pipes and Dancing, till near Day, and then they cast the Images into the High-ways to be trampled under Foot, and the Victuals is given to the Attendants, and despicable People, that wait on Purpose. When they worship those, whom they call Devils, whom they hold to be Spirits of dead Men, they build a new House in their Yard like a Barn, and cover it with Leaves, and adorn it with Branches and Flowers. Into it they bring some of the Weapons or Instruments, which are in the Temples, and lay them on Stools at one End of the House, which is hang'd with Cloth for that Purpose, and before them set Victuals on other Stools, and all the time of this Sacrifice there is Drumming, Piping, Singing and Dancing, which being ended, they give the Victuals to those that drum and pipe, with other Beggars and Vagabonds; for they look upon them not as dedicated, but polluted Meats, and should they eat of them, they think it would be a Reproach to them and their Generation. These Spirits are Local, and those in one County are not known in another, but each County hath Spirits and Devils peculiar to them, under whose Subjection they own themselves to be, and they stand in greater awe of them, than those whom they own and call Gods. They say, that their Country is full of them, and should they not adore them, they would destroy them, and therefore own that the Christians have a Prerogative above them, that they are not subject to the Infernal Spirits; for, indeed, Men and Women are strangely possess'd by them, running mad into the Woods, screeking and roaring, but doing no Mischief; some are taken Speechless, shaking, quaking and dancing, and will tread upon the Fire, and not be hurt. Thus they continue sometimes 2 or 3 Days, and sometimes as many Months. The Friends of the Possessed will go to the Devil, and promise him a Reward, if he will cure them, and sometimes they are so cured, and sometimes they die. The People impute this Madness to some Breach of Promise made to the Devil, or for eating some Fruits or Betel-Leaves dedicated to him, which they do either to prevent its being stollen or begg'd. The Devil doth often cry with an audible Voice, as I have heard my self, very shirl, and 'tis observed, that either just before, or soon after, the King cuts off People. The very Dogs tremble and shake when they hear it, and it passeth from Place to Place faster than any Bird can flie. It is heard only in *Candi-Uda*, and not in the Low-Countries. The *Chingulays* make it cease by cursing it, saying, *Geremoi Goulammah*, i. e. *Beef-eating Slave, be gone, be damned, and the like Raillery, which they speak aloud in Passion and Threatning.*

Christians Prerogative.

Their Possessions by the Devil.

To Devils.

Their monstrous Images of them.

The Devil cries out among them.

When smaller Devils fail them, they repair to the great Devil, and preparing an Offering of Victuals ready dress't, of which on Dish is always a red Cock, they carry it into a remote Place in the Woods, and there devout it to the Honour of the great Devil, before whom Men in horrible Disguise like Devils, with Bells about their Legs, and Doublets of a strange Fashion, do sing and dance, calling him to come and eat it, and the sick Man is present all the while.

Means offered to them are feasted.

Besides their daily Worship and occasional Devotion, they have solemn and annual Festivals, of which some belong to the Gods that govern the Earth, and all Things that concern this Life; and others belong to *Buddou*, who takes care of the Soul and future Well-being of Men. The Festivals of the former are:

Their Festivals.

1. The *Perahar*, which is a solemn Feast and general Meeting to honour these Gods, and procure their Aid and Assistance upon the *New Moon* in *June* and *July*. At this Feast some go to one *Pagoda*, or Temple, and some to another. The greatest Solemnity is performed at the City of *Candi*, after this manner: The Priest brings out a painted Stick, hung about with Strings of Flowers, and wrapt up in branch'd Silk, some part covered and some not, before which the People bowe and worship, and every one presents an Offering according to his free Will. The Priest having received these Offerings, takes his painted Stick on his Shoulder, having a Cloth tied about his Mouth, to keep his Breath from defiling this pure Piece of Wood, and getting upon an Elephant cover'd with white Cloth, rides upon it with all the Triumph that King and Kingdom can afford thro' all the Streets of the City. Before him go 40 or 50 Elephants, hung with Bells on each Side, which tingle as they go. Next follow Men dress't up like Giants, dancing along in Memory of a Tradition, that there were such huge Men that carried vast Burdens, and pull'd up Trees by the Roots. After them go a Multitude of Drummers, Trumpeters and Pipers, which make such a great Noise, that nothing else can be heard. Then follow Men daneing, and such Women-Washers and Potters, as are used in the Service of the Temple, each Trade by themselves, 3 in a Row holding Hands, and Drummers, Pipers and Dancers going between each Company. After these comes the Elephant carrying the Priest with the painted Stick on his Shoulder, who represents *Allout-neur Dio*, i. e. The God and Maker of Heaven and Earth, and behind him sits another Priest holding an Umbrella over his Head to keep off the Sun and Rain. Within a Yard behind him on each Hand follow 2 other Elephants, mounted by 2 other Priests, behind whom also sit 2 other Priests holding Umbrella's over their Heads, as the former. One of these represents *Cotterogom Dio*, and the other *Potting Dio*. These 3 Gods thus riding together are accounted the greatest of all others, and have each a several *Pagoda*, or Temple. After these come Cook-Women, dress't as fine as they can make themselves, with Whisks in their Hands to scare away Flies; and next to the Gods and their Attendants go some Thousands of Ladies and Gentlewomen of the highest Rank, array'd in the bravest Manner that their Ability will afford, going Hand in Hand 3 in a Row. All the Beauties also in the Isle attend this Procession of their Gods, the Streets are made clean, and Poles set up, stuck with Flags and Penons, and hung with Branches of Coker-nut-Trees, like Fringes, and Lamps burning on both sides of them Night and Day. Last of all come the Commanders sent from the King to see these Ceremonies decently performed, with their Soldiers after them, and in this manner they ride about the City once by Day, and once by Night, from the New Moon to the Full. Formerly the King used to ride in Person, with all his Train before him, in this Solemnity; but now he delights not in these Shows. Before these Processions the Gods are set in the Temple-Doors a good while, that the People may worship them, and bring them Offerings, during which Time there are Dancers shewing many pretty Tricks before them, to see which, and to shew their Bravery, causes a greater Resort thither, than their Zeal and Devotion. Two Days before the Full Moon each of these Gods hath a Pallenquin carried after them to add unto their Honour, in which are several Pieces of superstitious Reliques, and a Silver-Pot, which they fill with Water from a River just at the Full Moon, and carrying it to the Temple, keep it till the next Year, and then throw it out, and so the Ceremony is ended for this Year. In the Year 1664. the King would not permit this Procession, and the Rebellion happen'd, so that he has never hinder'd it since.

1. *Perahar.*

A great Procession on it.

The God represented.

Three chief Gods.

Women at this Procession.

The King delights not in it.

Relicts, and a Silver-Pot.

2. At this Time also they have a Superstition, too foolish to be particularly related, consisting in Dancing, Singing and Juggling, which they celebrate lest the Eyes of the People, or Power of the *Facca's*, or Infernal Spirits, might any ways prove prejudicial or noisome to the aforesaid Gods in their Progress abroad.

2. Foolish Superstition.

At

At this Festival no Drum is allow'd to be beaten at any private Sacrifices.

3. *Cartik Powjah.* 3. At the Full of the Moon in *November* in the Night they have another great solemn Feast, called *Cartha Powjah*, which is kept by lighting up Lamps round about the Temple, and erecting the longest Poles they can get in the Woods at the Doors in the Temple and King's Palace, on which they fix Lamps one above another up to the very Top, which they call *Tor-nes*. The Country in general bring the Oil for these Lamps, and the King is much pleased with this Feast, because he has more Honour by it than the Gods, his Palace being adorn'd with these Poles more than the Temples. This Feast lasts but one Night.

4. The Festival to *Buddou.* The Festival and Service, which they celebrate in Honour of the *Buddou*, who it is, they say, must save their Souls, is performed thus: They make small Images of Silver, Brass, Clay and Stone, which they do honour with Sacrifices and all outward Reverence. Where there are any hollow Rocks and Caves they set up these Images in Memory of him, and such as are devoutly bent do carry Victuals to them at New and Full Moons. His great Festival is in the Month of *March*, at *New-Year's-Tide*, and 'tis celebrated only on a Mountain, or under a Tree; and to one of these they all go with their Wives and Children, being both esteem'd equal for Dignity or Merit. The Mountain is at the S. End of the Country, called by the Natives, *Hammalella*, but by the Christians, *Adam's Peak*. 'Tis the highest in the whole Island, and they say, *Buddou* ascended into Heaven from that Mountain, leaving there a Mark of his Foot. To this Footstep they give Worship, light up Lamps, and after offer Sacrifices, laying them upon it, as upon an Altar. The Benefit of these Sacrifices has been given to the *Moor* Pilgrims by former Kings, and they come from the other Coast in great Numbers to receive them. The Tree is at the N. End of the King's Dominions at *Anarodgburro*. This Tree, they say, came flying over from the other Coast, and planted it self, and under it the *Buddou-God* used much to sit when he was upon Earth. 'Tis now become a Place of solemn Worship, and the Performance of it is reckon'd very meritorious. Ninety Kings, as they report, have reign'd successfully since, and 'tis plain by the Ruines, that they spared for no Labour or Costs to build Temples and high Monuments for this God in that Place; and for it they have merited to be happy Spirits. They whose Ability or Necessity will not permit them to go to these Places, may go to some private *Vehars* nearer. For this God they have the highest Respect and Devotion, as appears from this Instance. The greatest Ladies will send their Maids finely dress't in their stead, and the more inferior Ladies and Gentlewomen (tho' of good Quality) will go in Person out of Devotion to beg for *Buddou* towards his Sacrifice, and the People will give them very libraly, but only of 3 Things, Oil for his Lamps, Rice for his Sacrifice, and Money or Cotton-Yarn for his Use. They carry his Image on the Palms of their Hands, covered with a Piece of white Cloth, and some poor Men will thus beg for themselves, and so find great Relief; for the People bowe down to the Image, and reverence it much. They give Corn, Money or Cotton-Yarn, and the Beggar, when he has received it, pronounceth a Blessing upon the Giver, saying, *Let the Blessing of the Gods and the* Buddou *go along with you; let your Corn ripen, your Cattle encrease, and let your Life be long.* Some being devoutly disposed, will have the Image of this God made at their own Charge, and will bountifully reward the Founder; but before the Eyes are made they count it no God, but when the Eyes are made, the Artificer has a good Quantity given him, besides the Reward agreed on, and carrying it home with Honour, it is dedicated by Solemnities and Sacrifices, and then carried with State into its Shrine, which is a little House before prepared for it. Sometimes a Man will order a Smith to make this Idol, and then go with it to well disposed People to contribute toward the Smith's Wages, and they will give freely to such a Piece of Devotion, as they esteem it. Under the *Bogahah* Tree, which is sacred to this God, they perform Sacrifices, and celebrate Meetings. About this Tree, at about 10 or 12 Foot Distance, and at the Edge of the Platform, they usually build Booths and Tents, some slightly of Leaves, and others substantial of hewn Timber, and Clay-Walls. The whole Town joins, and each Man builds his own Apartment, and the Tree is enclosed round, unless at one Gap, covered with a Portal, which is left to go thro' to the Tree. These Buildings are for the Entertainment of Women, who take great Delight to go and see these Ceremonies, clad in their best and richest Apparel. They spend their Time in seeing the Dancers and Jugglers do their Tricks, who will by their Importunities get Money of them, or a Ring from their Fingers, or the like; in eating Betel nuts, talking with their Consorts, and shewing their fine Cloaths. These Solemnities are always in the Night, and the Booths are all set round with Lamps, but continue 3 or 4 Nights, until the Full Moon, when they always conclude.

Their Devotion to this God. Beggars in his Name. A Form of Blessing. Images of *Buddou.* Women pleased with these Ceremonies.

They are few or none zealous in their Worship, or that esteem their Gods, till they come to be sick, or very aged. None is debarr'd from seeing the Ceremonies of their Worship; and if any laugh at their Ignorance and Folly, they will acknowledge it, and laugh at their own Superstitions, but withal tell you, that they are constrain'd to do what they do to keep themselves safe from the Malice and Mischief that the evil Spirits would otherwise do them, with which, they say, their Country swarms. Their Religion.

In their Sickness they go to the House of their Gods with an Offering, which they present to him, intreating them to restore their Health, and promising them upon their Recovery far greater Gifts, as Land, a Slave, Money, &c. and if the God fails them, they will give him a Curse, saying, *He doth but cheat and deceive them.* If their *Gerahah*, or Fortune, be bad, they'll say, *What can God do against it?* And sometimes they'll speak very slighting of their Gods, saying, *Give them no Sacrifice, stop in their Mouths, what Gods are they?* And the King esteems them far less, giving no manner of Countenance to their Worship or Worshippers; so that as he does not in the least molest or disturb the Christians in their Religion, and the People esteem it better than their own, so in all Probability they would be easily converted to it, or any other Religion, as may appear from this Story. Their Offerings in their Sickness. The King esteems of the Idol-Gods.

There was one among them lately that pretended himself to be a Prophet, sent to them from a Nameless God to heal the Sick and do Miracles, and presently he was had in high Veneration. He gave it out, that he was ordered by the same God to pull down the *Dewals*, or Temples, of the former Gods, and made a good Progress in it, without any Lett or Impediment from the King or People, who stand in fear of all that are called Gods, and being surprized that he had no Name, began to admire him, and great Troops of them came daily to worship him and sacrifice to him. This Impostor seeing this strong Inclination to him, thought it easie for him to change his Priesthood for a Kingdom; but while he was but designing it, the King sent for one of his Priests to Court, and putting a Ring into an Ivory Box, sent 3 of his Grandees to demand of him what was in it; but the Priest evading the Question, by saying, *He came not to divine, but to heal the Diseases, and help the Infirmities of the People*, the King commanded him to be put in the Stocks, and set under a Tree, to be wet with the Rain, and dry again with the Sun, which was accordingly done. The Chief Priest, who was the first Inventor of this New God, fearing the like Fate, pack'd up the Plunder which he had gotten out of the Pagod's Temples with Haste, and stealing one of the King's Elephants, carried it to *Columba*. Here he declared himself to be the King of *Mautoly*, elder Brother to the present King, for fear of whom he fled. This being noised abroad, that he was Prince, the People flock'd faster to him than before, which made him change his Heart and Behaviour from a Priest to a King. The *Dutch* seeing this, began to be in a Doubt what this would grow to, and to prevent the worst, set a Watch over him, which he not liking, fled into the King's Country again, with all his Followers, and settled in the same Place he was in before. The King hearing of his Arrival, sent 5 of his greatest Commanders with their Soldiers to catch him, which they did, and laid him and his Followers in Chains. The King commanded him to be kept in a certain *Pagoda* of the *Chinguleys* till the Matter was examin'd, and summon'd the Chief of the Church-men, called *Gemi-nancies*, to appear before him, which they thought was to see him have a Legal Trial: But in the mean time the King order'd that he should be quarter'd, and his Parts hang'd up in the Places which he appointed, which was done. The People in general A false Prophet. The Impostor taken and quarter'd.

general much lamented him, tho' not able to help him, and to this Day adore the Name and Memorial of the *Nameleſs God*.

Their Belief. The People do firmly believe the Reſurrection of the Body, and the Immortality of Souls, and a future State, and upon that Account worſhip their Anceſtors. They do believe, that their Gods were the Spirits of dead Men; and that thoſe that are good Men, tho' they be poor and mean in this World, yet they ſhall be high and eminent in the other World; but the Wicked ſhall be turn'd into Beaſts; and that diſobedient Children ſhall be like a certain Spider among them, who from an Egg which grows under her Belly breeds her Young, which eat her up, ſo their Children ſhall devour them. They hold, that every Man's good or bad Fortune is predetermined by God before he is born. They reckon the chief Points of Goodneſs to conſiſt in giving to the Prieſts, in offering Sacrifices, in not ſhedding the Blood of any Creature, and in abſtaining from eating any Fleſh at all, for they account Herbs and Plants more innocent Food; in ſweeping under the *Bogahah*, or God-Tree, and keeping it clean; as alſo, to be juſt and ſober, chaſte and true, and to be endow'd with other Vertues, as we eſteem it.

The Charity in the Eaſt. They give to the Poor out of a Principle of Charity, which they extend to Foreigners, as well as to their own Country-men, and out of every Meaſure of Rice they uſe in their Families they take out an Handful, as much as they can graſp, to diſtribute to ſuch Poor as they pleaſe, or come to their Doors, and particulary the *Mooriſh* Beggars, who are *Mahometans* by Religion. Theſe have a Temple at *Candi*, to which, by the Grant of a former King, every Free-holder in the Land are obliged to give a *Ponnam*, and theſe *Moors* go to every Houſe in the Land to receive it, and if the Houſe be ſhut, they have Power to break it open, and take out Goods to the Value of it. They beg confidently, ſaying, *They come to fulfil the People's Charity*, and they relieve them liberally. *Dolubaug*, one County in the Land, pay no Duty to the *Moors* Temple, becauſe they beat them from their Doors when they came firſt to demand it; nor do they pay *Marral* or *Herriots* to the King, as other Countries do. Theſe *Moor* Pilgrims have many Pieces of Land given them by charitable Perſons, where they build Houſes and live, and their Heirs enjoy it. They lay Flowers out of Religion before their Images Morning and Evening in the little Chapels built for them in their Yards. They carry Beads in their Hands on Strings, and ſay ſo many Prayers as they go, which Cuſtom they learned of the *Portugueſe*. They love a Man that makes Conſcience of his Ways, and for that Reaſon reſpect the Chriſtians more than others, becauſe they think that they are juſt, and will not lye.

A Duty to the *Moors*.

The *Moors* Devotion.

CHAP. XI.

Of their Houſes, Diet, Houſewifry, Salutation and Apparel.

Their Houſes. THEIR Houſes are ſmall, low, thatch'd Cottages, built with Sticks, and dawb'd very ſmooth with Clay; for they are not allow'd to build their Houſes above one Story high, or tyle them, or whiten the Walls with Lime; but there is a Clay as white as Lime, and that they uſe ſometimes. Every Man builds his own Houſe, except ſome few Noblemen, who uſe Carpenters. They have their Timber in the Woods for cutting, and what ſhould be nail'd they tie with Rattans, and other Strings, which grow in the Woods in abundance. Their Country being Warm, many of them do not dawb their Walls, but wreath in Boughs of Trees inſtead of Walls. The pooreſt Sort have not above one Room in their Houſes, and few above 2, but Noblemen; nor will the King allow them to build better. They are not nice or curious in their Houſes. They have no Chimneys, but make their Fires in one Corner, ſo that the Roof is black'd with Smoak. The Great Men have handſome and commodious Houſes. They have commonly 2 Buildings one againſt another, join'd on each ſide with a Wall, which makes a ſquare Court-yard in the middle. By the Walls of their Houſes are Banks of Clay to ſit on, which they often dawb with ſoft Cow-Dung to make them ſmooth and clean. Their Slaves and Servants, with their Wives and Children dwell without in other Houſes. Their Furniture is ſmall, *viz.* a few Earthen-Pots hung up in Cane-Slings in the middle of their Houſes, a Braſs Baſin or two to eat in, and a Stool or two without Backs, for none but the King may ſit in a Stool with a Back; ſome Baskets to put Corn in; ſome Mats to ſpread upon the Ground to ſleep on, for they have no other Bedding for themſelves or Friends; ſome Ebony Peſtles, about 4 Foot long, to beat Rice out of the Husk, and a Wooden Mortar to beat it in afterwards to make it white, and an *Hirimony*, or Grater, to grate their Coker-nuts with, and a flat Stone to grind their Pepper and Turmerick on. They have alſo in their Houſes Axes, Bills, Houghs, Atches, Chizels, and other Tools for their Uſe. They have no Tables, for they eat on the Ground.

Great Mens Houſes.

Their Furniture.

Their Diet. Their Diet and ordinary Fare is but mean; if they have Rice and Salt in their Houſes, they reckon they want nothing; for with a few green Leaves, and the Juice of a Lemmon, with Pepper and Salt, they will make an hearty Meal. Beef may not be eaten, 'tis abominable. Fleſh and Fiſh they have but little, and had rather ſell that for Money, than eat it themſelves, but only Strangers will buy it; and they, indeed, eat the Fat of the Land, for even the greateſt of them count it a Credit to fare hard, and ſuffer Hunger, which, they ſay, *Soldiers ought to be able to endure*. Their great Ones have 5 or 6 ſorts of Food at a Meal, but not above one or two of them of Fleſh or Fiſh, of which they make a great deal of Portage, after the Faſhion of the *Portugueſe*. Their main Subſiſtance is Rice, and the other Things are to give it a Reliſh. If the People were not diſcouraged from rearing and breeding up of Cattle, Proviſions might be far more plentiful; but as Jackals kill their Hens, and Tigers their Cattle, ſo the King endeavours to keep them poor and in Want, and from them that have Hens his Officers take them for the King's Uſe for little or nothing, and none is ſuffer'd to keep Hogs or Goats, but the King, except Strangers.

Great Mens Fare.

In dreſſing their Victuals they are very cleanly and handy, and, as they dreſs it, their Fare is very ſavoury and good to thoſe that are uſed to it. They ſit upon a Mat on the Ground and eat, but he that they honour and reſpect ſits on a Stool, and his Victuals is ſet on another before him. Their common Drink is only Water, and if they drink Rack, 'tis before they eat, that it may work the better upon their Bodies. When they drink, they touch not the Pot with their Mouths, but hold it at a Diſtance, and pour it in by a Spout. They eat their Rice out of *China* Diſhes, or Braſs Baſins, and they that have neither of them on Leaves. The *Carrees*, or other ſorts of Food, which they eat with their Rice, is kept in the Pans it is dreſt in, and their Wives ſerve them with it, when they call for it; for it is their Duty to wait on and ſerve their Husbands while they eat, and when they have done, then to take and eat what is left upon their Trenchers. While they are eating, they neither uſe nor delight to talk to one another. They always waſh their Mouths before and after they have eaten; but 'tis accounted an Affront for others to pour Water on their Hands, for ſo they do to ſuch as they think not worthy to handle their Water-Pot. When they waſh, they pour Water with one Hand upon the other. They are very cleanly, and often waſh their Bodies and Heads, and when they have been at Stool they waſh.

Their Houſewifry.

Their Way of Drinking.

Their Cleanlineſs.

See *FIG.* 8.

Their Cookery. As to their Cookery. If People be in the Room talking, and the Women is ready to put the Rice into the Pot, ſhe bids them all be abſent, till ſhe has put it in, and then they may proceed with their Diſcourſe; for if they talk while 'tis putting in, 'twill not ſwell. At the time of Year, when there is plenty

of

of Lemmons. they ſqueeze the Juice into an Earthen-Pot, and boil it till it become thick and black like Tar. They call it *Annego*, and uſe it for Sauce, a little at a time; 'twill keep a great while. They have ſeveral ſorts of Sweet-Meats. One they call *Caown*, which is made of Rice, Flour and Jaggory, like a Fritter, and fry'd in a Frying-Pan with Coker-nut Oil and Butter. When the *Dutch* came to *Columba* firſt, the King ſent them a Royal Treat of them, and the *Dutch* ſo admired them, that they ask'd, whether they did not grow upon Trees, ſuppoſing it paſt the Art of Man to make ſuch Dainties. *Ozzula's*, another ſort of Sweet-Meats made of parch'd Rice, Jaggory, Pepper, Cardamum, and a little Cinnamon, rowl'd up hard in Balls. Theſe they carry in their Travels in Bags to eat in Afternoons: *Alloways*, made after the former manner, but in the Faſhion of a Lozenge; they are good for Faintings, and to reliſh their Water with: *Tack Pettyes*, made of Rice, Flour, and the Meat of the Coker-nut and Jaggory. They are made up into ſmall Lumps, and being put on a Leaf, they are laid on a Cloth over a Pot of boiling Water, whoſe Steam boils it like a Pudding. They taſte like white Bread, Almonds and Sugar. *Pitu*, which is made of the *Ceracan* Flour, mingled with Water, which by rowling and ſtirring it makes it crumble into Corns like Gun-powder. Of this they lay ſo much upon a Cloth tied over the Mouth of a Pot of boiling Water, as they can conveniently cover with another Pot, and ſo the Steam coming thro' the Cloth, boils it, that it will be much like unto a Pudding. This they eat as they do their Rice.

Their Sweet-Meats, as *Caown*.

Ozzula's.

Alloways.

Tack Pettyes.

Pitu.

Women's Houſewifry.

The Womens Houſewifry is to beat Rice out of the Husk, which they do with an Ebony Peſtle, laid upon the Ground, toſſing the Peſtle every Stroak out of one Hand into the other, and at the ſame time keeping Stroak with their Feet, as if they were dancing, to keep up the Corn together into one Heap. This being done, they beat it again in a Wooden-Mortar to whiten it, and tho' it being an hard Work, it belongs only to the Women, as it doth alſo to fetch both Wood and Water. Wood they fetch on their Heads, and Water in an Earthen-Pot on their Hips. They have alſo a ſmall Bill to cut Herbs and Pumpkins, which they do by laying it down on the Ground with the Edge upward, and ſhearing them upon it.

Entertainments.

When one comes to another's Houſe, and is ſet down, the Entertainment is green Leaves, which they call *Bullat*, which they eat raw with Lime and Betel-nuts and Tobacco, and being ſet a while, the Man of the Houſe muſt ask the Stranger, *What he comes for?* which if he does not ſoon, the Stranger will take Exceptions at it, and not think himſelf welcome. Neither do they ever go to viſit one another, unleſs it be to beg or to borrow, and if Kindred that are nearly related come together, they have no loving or private Conference one with the other, but ſit like Strangers very ſolid and grave; and if they ſtay above one Night, which is the common Cuſtom, they do help and aſſiſt the Man of the Houſe in any Work or Service he hath to do. When any Friends go to another's Houſe they never go empty handed, but carry Proviſions and Sweet-Meats with them to their Friend, who makes them a Feaſt according to his Ability, but they never eat of thoſe Things themſelves brought. But there is very little Feaſting among them, unleſs it be at a Wedding.

Viſits.

Salutations. 1. Of Men.

When they meet one another their Manner of Saſutation or Obeiſance is to hold forth their 2 Hands, the Palms upwards, and bowe their Bodies, but the Superior to the Inferior, holds forth but one Hand, and if the other be much beneath him, he only nods his Head.

The Women ſalute by holding up both their Hands edge-ways to their Foreheads. The general Compliment one to another at their firſt meeting, is to ſay, *Ay*, which ſignifies, *How do you?* And the other anſwers, *Handoi*, that is, *well*. 2. Of Women.

The Habit of the Men, when they appear abroad, is after this ſort: The Nobles wear Doublets of white or blue Callico, and about their Middle a Cloth, a white one next their Skin, and a blue one, or of ſome other Colour painted over the white, a blue or red Shaſh girt about their Loins, and a Knife with a carved Handle wrought or inlaid, ſticking in their Boſom, and a compleat ſhort Hanger carved with Braſs and Silver by their Sides, the Scabboard for the moſt part cover'd with Silver bravely engraven; a painted Cane, and ſometimes a Tuck in it, in their Hands, and a Boy always bare-headed, with long Hair hanging down his Back waiting upon them, ever holding a ſmall Bag in his Hand, which is inſtead of a Pocket, wherein is Betel-Leaves and Nuts, which they conſtantly keep chewing in their Mouths, with Lime kept in a Silver-Box rarely engraven, which commonly they hold in their Hands, in Shape like a Silver Watch. The Great Ones alſo generally and ſpruce young Men do wear their Hair long, and hanging down behind. Anciently they generally bored Holes in their Ears, and hung Weights in them to make them grow long, like the *Malabars*; but this King not boring his, that Faſhion is almoſt left off. The Men for Ornament do wear Braſs, Copper, or Silver Rings on their Fingers, and ſome of the Greateſt, Gold; but none may wear any Silk. Their Habit and Apparel, &c. Of Men. Long Hair. Ornaments of Men.

But the Women in their Apparel do far ſurpaſs the Men, becauſe they are moſt curious in making their Wives fine. The Mens Pride conſiſts in their Attendance, having Men bearing Arms before and behind them. In their Houſes the Women do not much regard what Dreſs they go in, but put on ſuch Cloaths as are moſt convenient to do their Work in; but when they go abroad they make themſelves fine. They wear a ſhort Frock, with Sleeves of fine white Callico, wrought with blue and red Thread with Flowers and Branches to cover their Bodies; on their Arms Silver Bracelets, and their Fingers and Toes full of Silver Rings. About their Necks Necklaces of Beads or Silver, curiouſly wrought and engraven, gilded with Gold, and hanging down as low as their Breaſts. In their Ears hang Ornaments made of Silver, ſet with Stones neatly engraven and gilded. Their Ears they bore when they are young, and rowling up Coker-nut Leaves, put them into the Holes to ſtretch them, by which means they grow wide like Circles, and they account them a great Ornament; but they are really a Deformity. Their other Ornaments and Apparel ſhew very comely on them. They oil their Hair with Coker-nut Oil to make it ſmooth, and comb all behind, tying it up in a great Puff, with a Knot hanging half way down their Backs. Their Hands are bare, but they carry a Scarf of ſtriped or branch'd Silk, or ſuch as they can get, caſting it careleſly on their Head and Shoulders. About their Waſtes they have one or two Silver Girdles, made with Wyre and Silver-Plate, handſomely engraven, hanging down on each Side, one croſſing the other, and as they walk chew Betel; yet, for all this Bravery, they have neither Shoe nor Stocking, that being a Royal Dreſs only for the King. It is no Diſgrace among them, becauſe common, to borrow Apparel and Jewels when they go abroad, and therefore they'll tell it in the Company they meet. 2. Women. Their Ornaments. Their Hair ordered. No Shoes nor Stockings.

CHAP.

CHAP. XII.

Of their Lodging, Bedding, Whoredom, Marriages and Children.

Their Lodgings and Bedding.

IN their Bed-Chambers they are very curious. If their House have but one Room (as it often is) the Men sleep together at one End of the Room, and the Women at the other. They have Bedsteds laced with Canes or Rattans, but no Testars nor Curtains to them, because the King allows not of them, neither have they, or care they for more than one Bedsted, which is only for the Master of the House to sit or sleep on, and to it belong 2 Mats, and a Straw Pillow. The Women, with the Children, always lies on the Ground on Mats by the Fire-side. For a Pillow she lays a Block, or such like Thing under her Mat, but the Children have no Pillows at all, and for their Covering and other Bedding they use the Cloth which they wear in the Day; but always at their Feet they will have a Fire burning all Night, which makes more Work for the Women, who fetch all the Wood for it on their Heads; for it is accounted a Disgrace for a Man to meddle with those Affairs that properly belong to the Woman. The younger Children, who go naked by Day, creep in under a Corner of their Mother's Cloaths; and if they feel themselves cold in the Night, they rise and blow the Fire with their Mouths, having no Bellows in the Country, and so sit and warm themselves thereby. They are so little given to Sleep, that they will rise many times in the Night to eat Betel and take Tobacco, which when they have done, they lie down and sing Songs till they fall asleep again. At their first going to Bed 'tis very seldom that they do pray to God, nor do they ever teach their Children to do it; but sometimes they will say, *Aub Dio*, which is, *God help or keep me.* But, instead of Prayers, they teach and bid their Children sing Songs when they go to Bed; for they are good Poets, and make pretty Songs, which they sing very sweetly, for they have all good Voices.

A Fire all Night.

Not given to Sleep.

Children of Age lodge abroad.

Where their Houses consist but of one Room, the Children that are of any Years always go and sleep in other Houses among their Neighbours, which please them better than their own; for so they come to meet with Bedfellows; nor doth it displease the Parents if young Men of as good Quality as themselves become acquainted with their Daughters; but they rather like well of it, knowing that their Daughters by this means can command the young Men to assist and help them in any Work or Business that they have Occasion to use them in, and they look upon it as so far from Disgrace, that they will among their Consorts brag of it, that they have the young Men thus at their Command.

Their Whoredom.

This Familiarity so kindles Lust, that all the Youth in the Country is bred up to Whoredom. Indeed, there are no publick Whores allow'd by Authority. In the City some that have follow'd that Trade have oftentimes, by the King's Order, been severely punish'd by whipping, and having their Ears and Hair cut off, but in private few or none can exempt themselves; and for their being with Child, which most of them do not desire, they can very exquisitely prevent it: For (as *Taxeira*, says, *l.* 1. *c.* 33.) there is an Herb that grows in this Isle, which bears an Ear like Barley, but something blacker and more bearded, which being laid upon the Belly of a Woman great with Child, it will make her immediately miscarry, and if it lies long, it will consume the Child in the Womb, and make an incurable Flux of Blood. *Ex Rib.* p. 13, 14. Indeed, the publick Trade would be bad, and hardly maintain them, that exercised it, because the private one is so great; and tho' I think they be all Whores, yet they abhor the Name of *Vesou*, i. e. a Whore; nor will they in their Anger reproach one another with it, unless they are known to lie with a Man of an inferior Quality to themselves, and the Woman reckons herself as much obliged to the Man for his Company, as he does to the Woman for hers. In these Matters the Women are very expert (it being their continual Practice) to keep their Design from the Husband's Knowledge, tho' by his own Experience he cannot be ignorant of the Womens Devices: And, unless he catch them in the Act, he will not trouble himself to prove himself a Cuckold, it being a Thing not much regarded among them to be such. It is a Law here, that if a Man catch another in Bed with his Wife, be it who it will, he may kill both him and her, if he pleases, which hath put the Women upon many crafty Tricks to save themselves and Paramours, when they have been in Danger of being taken by their Husbands, as to throw Ashes in their Husbands Eyes, make Holes in the Thatch of their Houses to let them thro', and the like Artifices; but to avoid these Dangers, as they generally make Appointments with their Gallants in the Woods, when they go to fetch their Firing, so that they may compass their Design, they'll quarrel with their Husbands, and in Discontent go out of their own Houses to their Friends, where they may have an Enjoyment of their Friend longer and without Fear, and the Men to shew their Kindness are very ready to entertain them, and give them what they delight in. In some Cases the Men will permit their Wives and Daughters to lie with other Men, and that is when intimate Friends or Great Men lodge at their Houses. They will commonly send their Wives or Daughters to bear them Company in their Chamber: Nor do they reckon their Wives to be Whores for lying with them that are as good or better than themselves. They do not matter or regard whether at their Marriage their Wives are Maids or not; and for a small Matter the Mother will bring her Daughter, being a Maiden, unto those that do desire her; but 'tis so much abhorr'd for Women of the higher Castes or Descent to admit Men of the low Caste to have any thing to do with them, that, I think, they will never do it. But enough of their Ribaldry.

Open Whoredom punish'd.

What they account Whoredom.

The Punishment of Adultry.

The Womens Contrivances to enjoy their Gallants.

In their more honest Practices of Marriage, which makes the Bed lawful, there are many Ceremonies used among them. The Men never woo a Wife; for the Parents commonly make the Match, and in their Choice regard more the Quality and Descent than the Beauty, and if they agree, all is done. The Match being thus made, the Man carries or sends to the Woman her Wedding-Cloaths, which is a Cloth containing 6 or 7 Yards in Length, and a Linen Waste-coat wrought with Blue and Red. If the Man be so poor that he cannot buy a Cloth, it is the Custom to borrow one. If the Man with his Friends goes to carry it himself, they sleep together that Night to get Acquaintance one with another, and then they appoint a Day when he is to come and fetch her home, which is the Marriage-Day. When that Day is come he goes with his Friends to her House in the Evening, and brings Provisions and Sweet-Meats with him according to his Ability toward the Charges of the Wedding, which is never more than 2 Meals, of which the Supper is one. Then the Bride and Bridegroom eat together in one Dish, which is to intimate that they are both of one Rank and Quality, and sometimes they tie their Thumbs together, but not always, and that Night they go to sleep together. The next Day after Dinner he takes his Bride and departs home with her, putting her before him, and he following her, with some of her Friends to conduct her, for 'tis the constant Custom and Fashion of this Country for the Husband to follow his Wife, and they give this Reason for it, That a Man once going first lost his Wife. When they are come to the Bridgroom's House he makes them a Feast as he is able. Some few Days after her Friends usually come to see her, bringing her a Present of Provisions with them. And sometimes they use this Ceremony in their Marriages: The Man is to stand with one End of the Woman's Cloth about his Loins, and she with the other, and then they pour Water on both their Heads, wetting all their Bodies, which being done, they are firmly married to live together as long as they can agree. The elder sort of People usually woo and conclude their Marriages as

Their Marriages how made and celebrated.

Eating in one Dish, and tie their Thumbs together.

Marriages of little force among them.

they are in Bed together, for having loſt their Maiden-heads, they care not much with what Man they ſleep, and at the Day appointed the Man gives the Woman her Cloaths, and ſo takes her home; but all their Marriages are of very little Force, for if they diſagree or miſſike one another, they part without Diſgrace; and tho' the Man might keep his Wife as long as he pleaſed, yet they both uſually part at Pleaſure. They do uſually give, according to their Abilities, a Portion of Cattle, Slaves and Money with their Daughters, but if they part this Portion muſt be return'd, and the Woman is fit for another Man, being never the worſe for wearing in their Account. Both Men and Women do commonly marry 4 or 5 times before they can ſettle to their Content, and if they have Children when they part the Cuſtom is, that the Man takes the Males, and the Woman the Females; but this Controverſie is not often, becauſe the Women are generally Childleſs. Every Man, even the Greateſt, has but one Wife; [but a Woman has often 2 Huſbands, or more, it being common for all the Brothers of a Family to keep Houſe with one Wife, and the Children to acknowledge and call all of them Fathers. *Ex J. Rib.*]

Their Way of parting.

Women unclean in their Hours.

So long as a Woman have their Infirmities or Fluors upon them, they are accounted unclean, and her Houſe is thought to be polluted, ſo that none will come near it, and ſhe will give Notice to them, that they ſhould not; but when they ceaſe, and ſhe hath waſh'd her Head and Body, ſhe is purified again. It is lawful for no Woman, no not Great Mens Wives to ſit on a Stool in the Preſence of a Man. Men uſually charge one another in the King's Name to do this or that, but a Woman dare not do it upon Penalty of having her Tongue cut out. Men are puniſhed for their Faults by being impriſoned and put in Chains, or ſtanding with a Weight on their Backs till they pay their Fine; but the Puniſhment for Women is only to ſtand with a Basket of Sand on their Heads ſo long as the Puniſher thinks fit. Puniſhment by Stripes is never uſed to Men or Women, unleſs commanded by the King. Lands of Inheritance belonging to Women are exempted from paying *Herriots* to the King, nor do Women pay any Cuſtom for any thing they carry to the Sea-Ports, which Privilege is alſo allow'd to ſuch Wares as are carried on Female Cattle, as Cows or Buffalo's.

Women Puniſhment.

They have no Midwives, but the Neighbouring Women do that Office, and as ſoon as the Child is born, the Father, or ſome Friend, goes to an Aſtrologer to enquire, whether the Child be born in a proſperous Planet, and in a good or evil Hour, and if it be found to born in an evil, they preſently deſtroy it, becauſe they ſay, *They will not bring up a Devil in their Houſes*; for they believe, that a Child born in an ill Hour will prove a Plague and Vexation to his Parents by his Diſobedience and Untowardlineſs; but they will often give ſuch a Child to one of the ſame Degree with themſelves, who will take it and bring it up by Hand; for they ſay, *That the Child will be unhappy to the Parents, but none elſe.* But they ſeldom ſerve their firſt-born Children thus, becauſe they love and make much of them; but when they come to have many, they make it a Pretence to kill them, that they were born under an unlucky Planet. And 'tis reckon'd no Fault, nor have they any Law to reſtrain it. In their Infancy they have Names to diſtinguiſh them, but when they come to Years, they change them into Titles according to the Town where they were born, or dwell; for they count it a Diſgrace to have Names, and ſay, *'Tis like Dogs.* They have alſo Names, which like Coats of Arms, belong to their Families, and by theſe they are called: For they are very ambitious of Titles, and have Plenty in their Language.

Killing of Children.

CHAP. XIII.

Of their Employments, and Recreations.

No Traffick with the *Dutch.*

THey have little or no Merchandize, or Commerce with Foreign Nations, becauſe the King will not permit any Traffick with the *Hollanders*, tho' they have often ſought it, and he did allow it with the *Portugueſe*, when they were at Peace with him. They have a ſmall Traffick among themſelves, from one part of the Iſle to another, becauſe, tho' the whole Iſland bears all Things neceſſary for their Support and Maintenance; yet, becauſe one Part of the Iſle will not bear what others yield plentifully, they are forced to traffick and exchange one with another.

Husbandry their greateſt Employment.

But Husbandry is the great Employment of the Country, and 'tis no Diſgrace for their greateſt Men to be thus buſied upon their own Land; but to work for Hire is accounted a great Shame, and few or none will do it; but carrying Burthens is ſo Slave-like a Work, that all that call themſelves Gentlemen, get others to bear and carry them for them. They geld not their Cattel till they are 2 or 3 Years old, and then nipping the Cods together with 2 Sticks tied together at one end, they beat the Teſticles with Mallets all to pieces, and then rubbing over their Cods with freſh Butter and Soot, turn them looſe, but do not ſuffer them to lie down all that Day, and they generally do very well.

They make their Glew by mixing Curd of Milk with their Lime, which is as ſoft as Butter; and if it be not for preſent Uſe, they rowl up the Curds in Balls, which becoming hard, they ſcrape it with a Knife, and temper it with Lime when they have Occaſion to uſe it. Their Manufactures are but few, ſome Callicoes, not ſo fine as good ſtrong Cloth, for their own Uſe. All manner of Iron-Tools for Smiths, Carpenters and Husband-men: All Sorts of Earthen-Ware to boil, ſtew, fry and fetch Water in: Goldſmiths Work, Painters Work, making Steel and good Guns, and the like. But their Art of ordering the Iron, Stones, and making Iron is moſt worthy our Conſideration. Firſt they take Iron-Stones, of which their Country affords plenty, and which lie not above 5 or 6 Foot deep in the Ground, and laying them on Heaps, burn them with Wood, which makes them ſofter and fitter for the Furnace, which they have ready made of a kind of white Clay. Into it they firſt put a Quantity of Charcoal, and laying theſe Stones on them, put more Charcoal on the Top, which they blow with a ſort of Bellows made of 2 hollow Trees, cover'd with a Deer's Skin, and managed by treading on them. When the Stones have burnt a while, they will melt, and the Droſs that is in them runs out at the Bottom, where there is a ſlanting Hole made for the ſame Purpoſe, ſo big as that a Lump of Iron may paſs thro', but the Iron remains behind, which when it is purified, as they think, enough, ſo that there comes no more Droſs away, they drive this Lump of Iron thro' the ſame ſloping Hole. Then they give it a Chop with an Ax half thro', and ſo fling it into Water. They thus chop it, that the Buyer may be ſatisfied that it is good Iron when they ſee it. They make Butter by boiling the Milk, and then turning it to a Curd, let it ſtand all Night. In the Morning they ſkin off the Cream, and drill it in an Earthen-Veſſel with a Stick, having a Croſs at the Bottom of it ſomething like our Chacolate Sticks. When the Butter is come, they put it into a Pan and fry it to get out the Butter-milk, and then put into a Pot for Uſe.

Their way of making Glew.

Their way of making Iron.

Making Butter.

There are no Markets in the Iſland, but have only ſome few Shops in the Cities, which ſell Cloth, Rice, Salt, Tobacco, Limes, Drugs, Fruits, Swords, Steel, Braſs and Copper. As to the Prices of Commodities, they are ſold at this Rate: Rice in the City, where it is deareſt, is no leſs than 6 Quarts for 4 Pence Half-penny *Engliſh*, or a ſmall *Tango*; 6 Hens the ſame, and a Pig the like. A fat Hog 3 *s.* and 6 *d.* or 4 *s.* but there are none ſo big as ours. A fat Goat 2 *s.* and 6 *d.* Betel-nuts 4000 for 9 *d.* a current Price when there is Trade.

No Markets.

The Price of Goods.

As

Their Measure. 1. Of Extent. 2. Of Capacity.

As to their Measures, a *Rian* is a Cubit, which is with them from the Bone on the Inside of the Elbow to the Top of the 4th Finger. A *Wadde Rion* is the Carpenter's Rule, which is as much as will reach from one Elbow to the other, the Thumbs touching one another at the Tops, and so stretching out both the Elbows. Their Corn-Measures are the least a *Potta*, which contains as much Grain as a Man can hold heap'd up in his whole Hand, Palm and Fingers and all. Four *Potta's* make a *Bondet Nellia*, which is the King's Measure, according to the Statute. This Measure is allow'd by the King to a Man for his ordinary Provision for a Day, but *English* Men are allow'd 2. Four of these make a *Courney*, an handsome turn'd Measure, but some are made of Canes like a Basket. Ten of these make a *Pale*, which is usually sold for a *Laree*, or the 5th part of a Piece of Eight, an usual Price in *Candi-Udi*; but in Harvest-time they sell 2 *Pales* for a *Laree*. Four of these make an *Ommonna*, by which they usually count their Corn, as we do by Quarters.

Their Weights.

Their Weights are the least a *Collonda*, 6 of which weigh just a Piece of Eight: but they have Half *Collonda's* and Quarters. The Goldsmiths, when they weigh Things lighter than a *Collonda*, they weigh them with a kind of red Berries, which grow in the Woods just like Beads, of which 20 make a *Collonda*, and 20 *Collonda's* make a *Pallum*. Here is no Punishment for such as make less Weights and Measures; for they are more circumspect that their Measures be not too big than too little; for Money being scarce, Corn passeth instead of Money, and every Man metes by his own Measure, which therefore he makes as large as he can or dares, that so when he receives his Debt of Corn, he may get as much as he can. These Measures being an Injury to the poorer sort of People, who are usually the Debtors, the *Adigar's* Officers go about the Towns to examine the Measures by the Statute, and where they find great ones they cut them in Pieces, and hang them up in the Streets to terrifie others, and sometimes fine those who have them.

Too small are seal'd here.

Their great Measures broken.

Their Coin of 3 sorts.

There are but 3 sorts of Coin in this King's Dominions: One is *Tangom Massa*, first coined by the *Portuguese* with this King's Arms on the one Side, and the Image of a Friar on the other, the Value is 9 *d.* The *Poddi Tangom*, which is half as much. There is another sort, which all the People may and do coin by the King's Permition; 'tis in Shape like a Fish-Hook, and pure Silver, finer than Pieces of Eight, for if they suspect the Goodness of it, their Custom is to heat it red hot in the Fire, and put it into Water, and if it be not pure white it is not current Money. The 3d sort of Money is the King's proper Coin, and 'tis Death to counterfeit it, it's called a *Penuam*, and is as small as a Spangle, 75 of them make a Piece of Eight, or *Spanish* Dollar. But all sorts of Money is very scarce, and they frequently buy and sell by exchanging Commodities.

Their Sports are few.

They have but very few Sports or Pastimes, because they do not much delight in such Diversions; only on their *New Year* they will sport and be merry one with another. Their chief Play is to bowl Coker-nuts one against the other to see which is hardest. After this time none will work till their Astrologers tell them 'tis a good Hour to handle their Tools, and then both Men and Women begin their proper Works, the Man with his Bill, Ax and Hough, and the Woman with her Broom, Pestle and Fan to clean her Corn. There

A sporting Sacrifice.

is another Sport which they much delighted in generally, because 'twas, as they said, a Sacrifice to *Potsing-Dio*, one of their Gods, and the Benefit was to free their Country from Grief and Diseases; but for the Beastliness of it they never celebrated it near a Town, nor in the Presence of Women. The Manner of the Game is this: They have 2 crooked Sticks like Elbows, which are hook'd one into the other, and with Ropes fix'd to them some pull on the one side, and some on the other, till one of them break, at which the contrary Party rejoyces, as having won, and to express his Joy, dances and sings, uttering sordid and beastly Expressions, which he answers by suitable Postures of Body, not fit to be mentioned, and he is most commended who is most lewd. This Solemnity was much used, and the King himself frequented it, but now he has forbidden it under a Penalty of forfeiting of Money, and so the Practice of it is quite left off. The People of *Gompala* endeavour'd once to revive it, and began it again, but the King hearing of it, sent a Nobleman to take a Fine of them for it. The Nobleman knew they would not come to pay a Fine, and therefore pitching his Tent by a Pond side, call'd them to assist him to catch Fish for the King, which they all were ready to do, because they hoped for the Refuse; when they were come with their Tools and Instruments for that Purpose, he charged them all in the King's Name, according to their Country Fashion, *viz.* by pulling off his Cap, and falling down upon the Ground 3 times, that they should not depart till they had paid such a Sum of Money for reviving the Play the King had forbid; and so they were forced to do it, and it was carried into the King's Exchequer.

The King forbids it.

A Fine paid for reviving it.

When they would be merry, particularly at their great Festivals, at the New-Moons of *June* and *July*, they have People that shew pretty Tricks and Feats of Activity before them; such as these: A Man sets a Pole 7 or 8 Foot long upon his Breast, and a Boy gets to the Top of his Pole, and leans with his Belly upon the End of it, and thus the Man danceth with the Pole on his Breast, and the Boy on it. A Woman takes 2 naked Swords, under each Arm one, and holds another in her Mouth, then she fetcheth a Run, and turns clear over, and never toucheth the Ground, till she lights on her Feet again, holding all her Swords fast. And thus they divert themselves. At their Leisure they will meet at certain Places built for Strangers and way-faring Men to lodge in, called *Ambiombs*, where they sit chewing Betel-nuts and looking one upon another very gravely and solidly, discourse concerning the Affairs at Court between the King and the Great Men; what Employments the Citizens follow, about Cattel and Husbandry, and if they meet Outlandish Men, they enquire about the Laws and Government of their Country, whether it be like theirs, and what Taxes they are bound to pay, and what Duties to perform to their King: And this is their greatest Recreation. Drunkenness they abhor, and so there are but few that use it. Tobacco they account a Vice, but 'tis used both by Men and Women, tho' more is eaten than taken in Pipes.

Their Tricks at their Festivals.

The way of spending their idle Time.

Drunkenness hated.

Their greatest Delight, which they are most fond of, is in Betel-Leaves, and their Mouths are never free from it, but when they are eating; for the last Thing they do when they are going to Bed is to fill their Mouth with it, which they keep there till they wake, and then they spit it out, and take in more. The Reasons why they eat it, as they say, are, 1. Because 'tis wholsome. 2. To keep their Gums sound, and their Mouths perfumed; for being chew'd it casts a brave Scent: And, 3. To make their Teeth black, because they abhor white Teeth, saying, *They are like a Dog's.*

Betel eaten, and why.

[Strengthening the Stomach, and procuring Health and long Life. *Ed.*]

The Gentlewomen and Ladies have no other Pastime but to sit and chew Betel, swallowing the Spittle, and spitting out the rest, and when their Friends come 'tis as good Entertainment with them to chew Betel, as 'tis with us to drink Wine. Their Way of eating Betel is this: They carry about them a small Box full of wet Lime, and as often as they are minded to eat Betel, they take as much of the Lime as they please, and spread it upon a Leaf of Betel, and then taking some Slices of the Nut, wrap them up in the Leaf, and so eat them, rubbing their Teeth with it now and then to make them look black, but sometimes they will put all of them into their Mouths by themselves, tho' they chew them all together, and never eat them assunder. When they want Lime in a Journey, or otherwise, they have a Way to make it of certain Shells, which they pick up in their Fresh-Water Rivers, and wrapping them, with a little Charcoal in a Wisp of Rice-Straw, bound about with green Withs, by which swinging them over their Heads half an Hour, they fire the Coal, and burn the Shells into very good Lime, which they put in their Boxes for their Use. Lime made of white Stone, which they burn in a Kiln, they do indifferently use to eat with their Leaves, as well as this made of Shells. But they wet both with Water when they put it into their Boxes.

The Way of eating Betel.

Their Way to make Lime.

CHAP. XIV.

Of their Laws, and Language.

The King's Will is their Law.

THey have no Laws but their King's Will, ſo that whatever he commands is immutably to be obſerved. But they have certain ancient Uſages and Cuſtoms which prevail generally among them, and are obſerved as Laws, and being pleaded in their Courts and before their Governours, are uſually allow'd. The moſt conſiderable are theſe: Their Lands are Hereditary, and deſcend from Parents to Children; but the eldeſt Son by Privilege of Birth-Right does not poſſeſs and enjoy all the Land, but the Father, if he pleaſes, may divide it among the Children: Yet if it happens that the eldeſt Son does enjoy all the Land, he is without Diſpute to maintain his Mother and her Children until they come to Years of Ability to provide for themſelves. They have a Cuſtom in the County of *Ouvah*, which is a great Breeder of Cattel, and hath but little Wood, ſo that they have not ſufficient to make Hedges, that when they ſow their Corn, they drive their Cattel from thence, and watch them all Day, that they do not break into the Corn, and at Night they tie them up, that they may not break into the Corn; for if one Neighbour's Cattel eat another's Corn, he muſt pay the Damage. Thoſe that are lazy and loth to plow, or that are poor and want Corn to ſow, the Cuſtom is to let out their Lands to others to till at *Ande*, i. e. at Halfs; but when the Fees and accuſtom'd Dues are taken out by the Husband-man that tills it, the Owner of the Land receives not much above a 3d part; for the Husband-man is allow'd theſe Payments beſides his Half, *viz.* *Cautomaun*, which is as much Corn as they can pull off from the whole Heap of trodden Corn by drawing a Bundle of Buſhes over it. *2dly*, *Warracool*, that is a Conſideration for the Expences they are at in tilling and ſowing, for which there is a Rate according to the Bigneſs of the Field ſet. *3dly*, *Warrapoll*, that is, the Corn that is left at the Bottom of the Heap, when they have done Fanning, which is the Woman's Fee for Weeding the Corn, and pulling it up where it is too thick, and planting it where 'tis too thin, *&c.* *4thly*, *Bollerud*, which is the Chaff and Sweepings of the Pit, which ſometimes comes to a conſiderable Value, according to the Quantity of the Corn that is trodden out. *5thly*, *Pelderah*, which is a Piece of Corn, that they leave before the Watch-Houſe, which is ſet up in their Corn Grounds to ſhelter thoſe that watch and guard their Corn from wild Beaſts, which is the Fee for Watching. *6thly*, *Ockyaul*, which is an Offering to their Gods, and is ſometimes carried away by their Prieſts, and ſometimes they beſtow it upon the Beggars, and ſometimes they will take it up, and hang it in their Houſe, and at convenient Times ſacrifice it themſelves. It is one of their Meaſures, which is about Half a Peck. All theſe Deductions much leſſen the Owner's Half, which generally is, as ſoon as Harveſt is over, divided in the Field to his Creditors; for ſuch Owners for ſome Months before Harveſt are fain to go a borrowing Corn to ſuſtain himſelf and Family, for which he pays, when his Corn is ripe, at the Rate of 50 *per Cent.* for Uſe, *i.e.* a Buſhel and half for a Buſhel.

Their Cuſtoms.

Mother to be maintain'd.

Having their Lands, and the Fees allow'd for Tillage.

This Way of lending Corn is a Means of maintaining many Strangers and others, for thus they may live competently well of a ſmall Stock of Corn; but Corn thus lent is ſomewhat difficult to get again; for the Debtor being poor, all his Creditors will come into the Field when the Corn is ſharing (for that is the Place of Payment) and as ſoon as it is divided, each one will ſcramble to get what he can, and having taken Poſſeſſion of it, the Creditor carrieth it home, be it far or near.

Lending Corn a good Trade.

If a Debt remains unpaid 2 Years it becomes double, but from thence forward, be it never ſo long, no more Uſe is to be paid by the Law of the Land, which Act was eſtabliſhed by this King in favour of the Poor, there having being ſome whole Families made Slaves for a Buſhel of Corn; but yet it is lawful for the Creditor, if he has not his Due of Corn, to lay Hands of any of the Debtor's Goods; or, if the Sum be conſiderable, on his Cattel, or Children, having firſt taken out a Licenſe from the Magiſtrate ſo to do; or, if he have none of thoſe, upon himſelf, or his Wife, if ſhe came with him to fetch the Debt; but if ſhe did not, ſhe is free from this Violence. If a Woman go away from her Husband, no Man may marry her, until he firſt be married. Money being lent upon Uſe, becomes double in one Year's time; but if the Creditor let his Money lie in the Debtor's Hands never ſo long after the Expiration of the Year, no more than double is to be paid, as it is in lending Corn. If a Bond-Woman has Children by a Free-Man, the Children are Slaves to her Maſter, but if a Bond-Man has Children by a Free-Woman, the Children are free; for the Children are always as the Mother is, whether bond or free. No Man may cut down a Coker-nut-Tree. If a Man in a Bargain or Promiſe gives a Stone in the King's Name, it is as firm as Hand and Seal, and if he after this go back of his Word, 'twill bear an Action. If any Man be taken ſtealing, he muſt reſtore Sevenfold, or be made a Slave, if he be not able to pay. It is uſual and cuſtomary for a Man in Neceſſity to ſell or pawn his Children, or himſelf. No Man building an Houſe either in his own or another Man's Ground, if he be afterwards minded to leave his Land where his Houſe ſtood, may pull it down again, but muſt let it ſtand for the Benefit of whoſoever comes after him.

No more than double Uſe to be paid.

A Woman not to marry that leaves her Husband.

A firm Bargain.

For deciding of Matters in Controverſie, eſpecially ſuch as are obtruſe and intricate, the Parties do both ſwear before their Gods, ſometimes in their Temples, and ſometimes upon more extraordinary Occaſions in hot Oil, which being unuſual Cuſtoms, I ſhall explain them both. The former of theſe I ſhall ſhew you the Manner of in this Inſtance.

Their Swearing to decide Controverſies. 1. In their Temples.

A Slave was accuſed by a Merchant for robbing his Houſe, whereupon the Slave to clear himſelf deſired he might ſwear: So the Merchant and the Slave went both into the Temple to ſwear. The Merchant ſwore poſitively that the Slave had robb'd his Houſe, and the Slave ſwore as fully that he had not, and neither of them having any Witneſſes, God, who knew all Things, was deſired to ſhew a Judgment upon him that was forſworn, and ſo they both departed to their Houſes, waiting to ſee upon whom the Judgment would fall. In the mean time, the Slave privately ſets the Merchant's Houſe on Fire, and it was burnt down to the Ground. This ſuppoſed Divine Judgment made it evident, that the Merchant, upon whom it fell, was forſworn, and the Slave immediately demanded Satisfaction of him for laying Theft falſly to his Charge. The Merchant could not well tell how to evade it, but yet would not give him any; and ſo the Slave was to get what Satisfaction he could, when Opportunity offered. His Maſter bad him ſeize upon the Merchant himſelf, or any Perſon relating to him, and bring them to his Houſe, and there detain them. Within a ſhort time after the Slave ſeeing a Kinſman of the Merchant's paſs by, attempts to ſeize him; but he, rather than be taken, draws his Knife, and ſtabs the Slave on the Shoulder, and ſo made his Eſcape. In fine, the Merchant was forced to bribe the Great Man to ſave himſelf from further Damage, and ſit down contented with the Loſs of his Goods and Houſe, tho' the Slave was a Man of a very bad Reputation, and had committed divers Robberies, and was known often to ſell ſtollen Goods.

A Merchant's Houſe burnt.

The other Way of ending Debates, is by ſwearing in hot Oil, which is only uſed in Matters of great Importance; as, when Law-Suits happen about their Lands, or when there is no Witneſs. When they are to ſwear after this Manner, each Party muſt have a Licenſe from the Governour for it, with his Hand to it. Then they go and waſh their Heads and Bodies, which is a Religious Ceremony, and that Night they are both confin'd to an Houſe, with a Guard ſet upon them, and a Cloth tied over each of their Right-Hands, and ſeal'd, leſt they ſhould make uſe of any Charm to harden their Fingers. The next Morning they are both brought out, and then

2. In hot Oil.

then they put on clean Cloaths, and purifie themselves, reckoning they are come into the Presence of God. Then they tie to their Wrists the Leaf wherein the Governour's License is, and repair to some *Bygahah*, or God-Tree, and all the Officers of the County assemble, with a vast Number of People besides. Coker-nuts are brought, and Oil is extracted from them in the Sight of the People, that all may see that there is no Deceit. Also they have a Pan of Cow-Dung and Water boiling close by, and when they have made the Oil to boil, that all may see they are throughly hot, they take a young Leaf of the Coker-nut-Tree, and dip it into the Oil first, and then into the Cow-Dung, which presently shews it, for it sings and frizzles up and roars, as if you pour'd Water into boiling Oil. When all are satisfied that both are sufficiently hot, the 2 Men come and stand on each side of the boiling Oil, and say, *The God of Heaven and Earth is Witness, that I did not do this that I am accused of*: Or, *The Four sorts of Gods be Witness, that this Land in Controversie is mine*; and the other swears the quite contrary. But the Accuser always swears first, and the Accused relates his own Innocence, or his Right and Title. Then the Cloths in which their Hands were bound up are taken off, and immediately, upon using the former Words, both of them dip 2 Fingers into the hot Oil first 3 times, and then as many times into the Cow-Dung, and then both their Hands are tied up again in the Cloth, and they are kept both of them Prisoners till the next Day, when their Hands are look'd upon, and their Fingers Ends are rubb'd with a Cloth, to see if the Skin will come off, and if it comes off of either of their Fingers, he is look'd upon to be forsworn, and the Perjury is punish'd by a great Forfeiture to the King, and an equal Satisfaction to the Adversary. It is certain, that the Fingers of some that have been thus sworn have remained whole from any Scald after the Use of the hot Oil, but whether it be by their Innocence or Art that this comes to pass is hard to judge, though they judge 'tis always the first, because so much Care is taken to prevent the last.

Oil extracted.

The Oath.

The Effect.

The Penalty of breaking the Laws or Customs of this Land is at the Pleasure of the Judge, either by Amercements, Imprisonments, or both. When a Person is amerced, this is the Custom of taking their Fines from him. The Officers, wheresoever they meet the Man, stop him in the Place, and taking away his Sword and Knife, make him pull off his Cap and Doublet, and so he sits, with his Keepers by him, till he pays his Fine; and if he delays to pay it, they clap a great Stone upon his Back, in which Condition he must remain till he pays it; and if he still denies Payment long, they load with more Stones, until his Compliance prevents further Pains. Another way they have to exact the said Fines laid upon Men. They take some Branches of Thorns, and draw them between the Man's naked Legs, till he pays; but if he still obstinately refuses, they clap him up in Chains.

The Way of exacting their Fine.

See FIG. 9.

They have a very odd Usage among them to recover their Debts. They will go sometimes to the House of the Debtor with the Leaves of *Neimgala*, a certain Plant, which is rank Poison, and threaten him, that they will eat that Poison and destroy themselves, unless he will pay them what he owes. The Debtor is much afraid of this, and rather than the Creditor shall thus kill himself, will sell a Child sometimes to pay the Debt; not that the Debtor is tender of the Life of the Creditor, but out of Care of himself; for if he dies of the Poison, the other, for whose Sake the Man poison'd himself, must pay a Ransom for his Life. And the same Way they will sometimes revenge themselves of those with whom they have a Contest, for they will jump down some steep Place, or hang, or make away with themselves, that so they may bring some great Trouble upon their Adversary.

A Way to recover their Debts.

Their Language is peculiar to this Island, and not spoken by any other *Indian* Nation, but themselves. Some few Words are common to the *Chingulays* and *Malabars*, which they may have borrow'd one of another by Intercourse and Commerce; but the Words are so few, that a *Malabar* cannot understand the Discourse of a *Chingulays*, nor on the contrary. Their Language is copious, smooth, elegant and Court-like, according to the Nature of the People, who are full of Words, Titles and Compliments.

Their Language described.

Compliments much used.

They have 12 or more Titles, which they give to Women, and near as many to Men, according to their Titles and Qualities. Our Language cannot express them. They use them according as they have Business with Men; for if they seek any Favour or Kindness, they bestow the best sort of Titles on them. Their ordinary Plow-men and Husband men do speak elegantly, and are full of Compliments; so that there is no Difference between the Ability and Speech of a Country-man and a Courtier. When any of them hath any Favour to beg of a Nobleman, or any Business with him, he doth not abruptly speak his Errand at first, but brings it in with a long Harangue of his Worth, good Disposition or Abilities, which is a very handsome and taking Way. They bring up their Children to speak after this manner, and use them to go on Errands to Great Men, and they are able to tell their Tale very well.

They are bold in Speech, without a sheepish Shamefacedness, and yet have no more Confidence than what is very becoming. The King now they call by a Name which signifies something higher than a Man, and next to God; but before the War they styled him *Dionanxi*, one higher than a God, and he took the Title then, but since he has forbidden it. When they speak of themselves to the King, they say not, I did so or so, but *Baulagot*, i. e. the Limb of a Dog did so, and when of their Children, they call them *Puppies*, which shews the Height of the King, and Slavery of the People under him.

They speak boldly.

They have certain Words of Formality and Civility, which they use upon Occasion. When they go to another Man's House, he asks them out of Civility, *What they come for?* And they answer, *Nicamava, They came for nothing*, though they do come for something, and for this they tell this Fable: A certain God came down upon the Earth one Day, and summon'd all Creatures to come before him, promising them to give them whatever they demanded. Some desired Strength or Legs, and others Wings, &c. and they were bestow'd on them. Then came the white Men, and the God asked them, What they came for? And they said, They desired Beauty, Valour and Riches, and it was granted them. At last came the *Chingulays*, and the God required of them, What they came for? They answer'd, *Nicamava*, i. e. *They come for nothing*. Then replied he again, *Do you come for nothing? Then go away with nothing*; and so they for their Compliment fared worse than the rest. When one profers a Gift to another, altho' it be a Thing he is willing to have, and would be glad to receive, he will say, *Eeppa queinda? No, I thank you*; *How can I be so chargeable to you?* And yet while the Words are in his Mouth he will reach forth his Hand to receive it. But they are not free or forward to requite them from whom they have received a Gift, or a good Turn, unless it be with windy Words and Protestations; for they are ready to receive, and backward to give; yet will they not plainly deny any one that comes to them to beg or borrow, but excuse themselves, by saying, *They have it not, or 'tis lent already*, altho' it be in the House.

Their Words of Civility.

Not free to lend.

They usually swear by their Mother, Children or Eyes oftner than by their Gods, but their Protestations or Promises, be they never so deep or serious, yet are not to be regarded, as proceeding from Custom, and not Truth.

Their common Oaths.

Their Railery is in such Terms as these: *Tomotamoy, Go lie with your Mother*, to a Brother; and, *Go lie with your Father*, to a Daughter; and they will commend their Children when they can use their Tongues nimbly in their own Defence by scolding, and say, *Herri Oppana, Well said, valiantly spoken!* If any thing be stole out of their Grounds and Plantations, they will rail bitterly tho' they cannot tell at whom, and say, *This was done by some Low-Caste begotten Rogue*; or, *She was a Whore to some inferior Rank that dress'd it.* The worst Words that they use to Whites or Christians, is to call them *Beef-eating Slaves*. The Grammar of their Language is not, perhaps, possible to be given, and therefore I will conclude with some of their Proverbs, which shew the Wisdom of a Nation as much as any thing, and because they are many, I shall pick the best.

Their railing Language.

Miris dilah, &c. *I have given Pepper, and gotten Ginger*, to signifie a bad Exchange.

Datta Herrula, &c. *Pick your Teeth to fill your Belly*, spoken of a Niggard.

Some of their Proverbs.

De-

Degery illand, &c. *If I come to beg Butter-Milk, why ſhould I hide my Pan*; to ſhew, that a Man ſhould not be aſhamed of the Buſineſs he comes about.

Hingonna, &c. *A Beggar and a Trader can't be loſt*; becauſe they are never out of their Way.

Atting Mitting, &c. *To lend to another makes him become an Enemy*; becauſe he that borrows, hates to be asked for his Debt.

Iſſara Otting, &c. *Firſt look into the Hand, then open the Mouth*; ſpoken of a Judge, who muſt have a Bribe, before he will paſs Sentence.

No Body can reproach the King and the Beggar; becauſe the Former is above the Slander of the People, and the Latter can have nothing bad enough ſaid on him.

Like the Noia *and* Polonga, *i. e. irreconcilable Enemies.*

He that hath Money to give to his Judge, needs not fear his Cauſe, be it right or wrong; to ſhew the Corruption of Great Men, and their Greedineſs of Bribes.

If Fortune be bad, what can God do againſt it; holding that none of the Gods have Power to reverſe the ill Fate of a bad Planet.

CHAP. XV.

Of their Learning, Aſtronomy, and Magick.

Little Learning among them.

THeir Learning is only to Read and Write, and 'tis no Diſgrace to do neither of them. They have no Schools to be inſtructed at in any of theſe or other Arts. Their Books concern only their Religion and Phyſick, and their chief Arts are Aſtronomy and Magick. Their Books are written in a Language differing from the vulgar Tongue, which is to them as *Latin* to us. They learn to write on Sand ſpread thin on the Ground, and make the Letters with their Fingers. When their Hand is brought into Uſe, they then write on a Tallipot-Leaf with an Iron Bodkin, and when they have written on it, the roll it up as Parchment. If they write a Book, they cut the Tallipot-Leaves into Pieces of what Size and Shape they pleaſe, but not above 3 Fingers broad. When they are written thro', they ſtring them upon a Thread, which goes thro' every Leaf, and faſten them to Boards of each ſide inſtead of Covers. When the Readers read them, they lift every Leaf up, and lay them down upon the contrary Side, removing them as Papers on a File. The Prieſts called *Gonnies*, who are Men of Leiſure, write many Books about the Ceremonies of their Religion, and will ſometimes carry them to Great Men for a Preſent, and expect a Reward. The King when he ſends any Warrants to his Officers, folds them in a Way proper to himſelf, which none dare imitate. They write Records upon the Tallipot-Leaf to be preſerved; but upon any ordinary Buſineſs, as Letters, *&c.* they uſe another Leaf, called *Taulcole*, which will bear a better Impreſſion, but it is ſtubborn and harder, and will not fold.

A Book how made.

Their Records.

Aſtronomy, and the Profeſſors of it.

Aſtronomy is beſt underſtood and practiſed by the Prieſts of the higheſt Order, of whom the preſent King's Father was one; but the common ſort of Aſtronomers are the Weavers. Theſe can certainly foretell the Eccliſpes of the Sun and Moon, make *Almanacks* for a Month, which they write upon a Tallipot-Leaf, a little above a Foot long, and 2 Fingers broad. In them are told the Age of the Moon, and the good Seaſons and Times to begin to plow, ſow, or go a Journey, or take any Work in Hand, and on that preciſe Time they'll certainly begin, tho' they do not go on till ſome Days after, nay, ſometimes a Month after. Theſe Aſtronomers alſo tell them when the old Year ends to a Minute, at which Time they ceaſe from all Works, except the King's, which may never be omitted. They acquaint them alſo with the good Hour of the New Year, when they are to begin to work, and then every Man begins to do ſomewhat of the Employment which they intend to follow the enſuing Year, and direct them when to waſh their Hands, which is aſſigned to every one according to the Times of their Nativities, which Ceremony they obſerve very religiouſly.

Their *Almanacks*.

Their Knowledge of the Planets.

Theſe Aſtronomers, or rather Aſtrologers, are skilful in the Stars and Planets, which they reckon to be 9, adding, as is ſuppoſed, the Dragon's Head and Tail, and by them they pretend to foretell all Things concerning the Health or Recovery of the Sick, and the Fate of Children, about whom the Parents do conſult them immediately after their Nativity, and accordingly ſave or deſtroy them, according to the fortunate or unfortunate Hour they ſay, that they are born in. When a Perſon is ſick, his Nativity is carried to theſe Men, who upon the Peruſal tell him his Fate. They alſo tell the fit Times for Journeys, and are conſulted about Marriages.

The Epocha of their Years.

They reckon their Time from one *Sacca warſi*, an ancient King. They call their Year *Ouredah*, and begin it from the 28th of *March*, and ſometimes upon the 27th, and ſometimes, but very ſeldom, on the 29th. It conſiſts of 365 Days, and the Reaſon of the Change of Day in the Beginning, is to equal our Leap-Year. They divide it into 12 Months, which they divide into Weeks, which conſiſt each of them 7 Days, thus called, *Fridah*, *Sandudah*, *Ongborudah*, *Bodadah*, *Braſpatindah*, *Secouradah* and *Henouradah*. Of theſe they count the firſt a good and fortunate Day to do or undertake any thing, and it falls upon our *Sunday*. On their *Wedneſdays* and *Saturdays* they open their Temples, and perform their Ceremonies. Their Day, which they call *Dauſack*, they divide into 30 *Pays*, or Parts, and begin it from Sun-riſing, and their Night alſo into as many, and begin at Sun-ſetting. Their 15th *Pay* is our 12 a Clock at Noon. They have a Flower by which they judge of the Time, which conſtantly blows open 7 *Pays* before Night. They have no Clocks, Hour-Glaſſes, or Sun-Dials, but judge of the Time by Gueſs. The King, indeed, has a kind of Inſtrument to meaſure Time, *viz.* a Copper-Diſh, holding about a Pint, with a little Hole at the Bottom, which being ſet empty upon the Water, the Water leaks it in at the Hole, till it is full and ſinks, and this they count one *Pay*, and he keeps a Man to tend upon it continually. The People will uſe this Pan upon ſome Occaſions, as to know exactly the lucky Seaſon to ſow their Corn.

Their Days.

No Dials or Clocks.

Their Practice of Magick.

They practiſe Magick, of which take theſe 2 remarkable Inſtances. The Country of *Neurecalava* formerly brought forth great Plenty of Corn, by reaſon of its large Waterings. The Kingdom of *Cournegal* in *Hautcourley* was brought to great Want by a Dearth; whereupon the King ſends to the People of *Neurecalava* to bring a Supply of Corn to his Country, which they did in great Store, and making Holes in their Sacks for Expedition, let it run out at every Man's Door, which exceedingly pleaſed the King, who to requite them, asked them, What they moſt needed in their Country? They anſwer'd, That they wanted nothing, but Turmerick and Pepper. The King, to gratifie them, ſent them as big a Quantity of both as his Country would afford; but when the People of *Neurecalava* came to meaſure it out every Man his Portion, they found the Dividend ſo ſmall, that they reſolved to grind it, as they uſed to do for their Victuals, and caſt it into the River, that every Man might take up his Diſh thus ſeaſon'd. The King hearing of this Action, was offended at them, as contemning his Gift, but conceal'd his Diſpleaſure, till having been in their Country, and being told, that the Cauſe of the Fruitfulneſs of it was from the Water of the River, pent up in a very vaſt Pond, which thro' Trenches they convey'd into their Corn Grounds, he went home, and by the Help of his Magicians, he broke down the vaſt Dam, made with Stones and Earth caſt up by vaſt Labour and Art, that kept in the Water, and ſo deſtroying the Pond, their Country for want of of Water became as ordinary Land as the reſt, having nothing but the Rains to water their Grounds.

A Country made barren by Magick.

So

Thieves discovered by a Charm.

So also when a Robbery is committed, to find out the Thief they charm a Coker-nut, which is done by certain Words, which any one may utter, and thrusting a Stick into it, set it at the Door or Hole where the Thief went out, and it will lead him who holds it by the Stick the Way the Thief went, and bring him to the House or Place where the Thief is, if they continue charming it all the Way, and throw Betel-Flowers upon it, and run upon his Feet; but this is not enough to find the Thief guilty, unless the Charmer will swear point-blank, that he is the Thief, as sometimes he will do upon the Goodness of his Charm, and then the supposed Thief must swear, or be condemned. Oftentimes Men of Courage and Mettal will get Clubs, and beat away the Charmer and all his Company, and then all is at an End; or if the Thief has the Wit to lay his Tail in the Way, the Coker-nut, when it comes at it, will stop, and run round about it, but will go no further. I doubting of the Truth hereof, took the Stick once and held it my self, when they were charming thus, but it would not move with me, tho' they used all their Art to provoke it; but when another took it, it went forward, and he assured me it guided his Hand.

Ancient Writings not known.

Here are some ancient Writings engraven upon Rocks in divers Parts of *Candi-Uda*, and in the Northern Parts. The Letters for some Yards together are cut so large and deep, that they may last to the World's End, but neither *Malabars*, *Chingulays* or *Moors* can read them, or make any thing of them. They are probably in Memory of something, but what the Learned must conjecture.

CHAP. XVI.

Of their Sickness, Death and Burial.

They live to a great Age.

THey live to a great Age very often; to 80, [and some to 120, *Rib.*] The King's Sister was near 100, for they are healthy, and of a sound Constitution. The Diseases that this Land is subject to are Agues and Fevers, and sometimes to Bloody-Fluxes.

[There is a Distemper which they call *Bere bere*, which is a sort of Cramp, so violent, that such as are taken with it fall down upon the Ground immediately, and if the Part affected were cut in Pieces they would not feel it. *Rib.*]

Their Distemper.

The Small-Pox sometimes happens among them, and because they cannot free themselves from it by all their Charms and Enchantments, which are often successful in other Distempers, they confess, like the Magicians of *Egypt*, that the Finger of God is in it. [Of all Distempers they fear this the most, and to avoid the Infection the Father will leave his Child, and Wife her Husband, and therefore if any be sick of it, they remove them out of their Houses, and will not come near them, only they give them as much Food as they think convenient, and leave him to shift for himself, whence it is that such as have this Distemper for the most part die. *Rib.* p. 150.] They are subject to Aches and Pains in their Bodies, for which they have excellent Ointments and Oils, which they make and keep ready by them to cure them.

They have no professed Physicians, but all of them in general have some Skill that way, and are both Physicians and Chyrurgeons to themselves. They

The Medicines they use how made.

make their Medicines of the Barks of Trees, and the Leaves found in their Woods. With these they

A Purge.

purge and vomit themselves, and will do notable Cures upon green Wounds and sore Eyes.

For a Purge they use the Juice of a Tree called *Dallugauhah*, which is white and thick like Milk, but accounted rank Poison, tho' the Goats will greedily brouse upon this Tree without Harm. In it they soak some whole Corns of Pepper a whole Night, and then having wash'd them clean, boil them in fair Water, with a sowre Fruit called *Goraca*. This Water they drink, and it purgeth well.

A Vomit.

For a Vomit they use a Lump of Salt, which has been first steep'd in the Milk, or Juice, that issues from the Stalk of a Plant called *Warracole*, which runs out plentifully as soon as it is broken off. This Salt, which is not dissolved by lying in the Milk, they wash clean after it comes out, and boiling a little Rice and Water together, put this Salt to it, and

A strong Purge.

drink it. They have a stronger Purge, made with a Berry called *Tawpolls*, which is a little long greenish Berry, and rank Poison. They boil it with Goraca and Pepper in Water, and drink a little of it.

For Sores.

For healing and drawing of Sores they have a Leaf called *Mockinacola*. It is very like our Ground-Ivy in the Leaf, and running on the Ground, only 'tis of a brighter Green. They only take it, and clap it on the Sore.

For an Impostume in the Throat.

For an Impostume in the Throat they take the Rind of the Tree *Amaranga*, and bruising it, rub it with green Turmerick, and wrap it up in a Plantine Leaf, and bury it in hot Ashes an Hour or two, till the Fire hath qualified it. Then the Patient takes it and keeps chewing it a Day or two, swallowing the Spittle, and it will effect a Cure in 24 Hours.

For a sore Eye.

For a Sore or Hurt in the Eye they take the Juice of these 2 Herbs, *Oulcaude-cole* and *Goderacole*, and having mingled them with Woman's Milk, drop them into the Eye, and find it an excellent Remedy. It

For the Itch.

is a speedy Cure for the Itch to anoint the Party affected with it, with Coker-nut Oil, in which the Fruit of a Tree called *Codouro Giddi*, which is in Fashion like a Muscle, but bigger, hath been fry'd in Slices.

The ordinary Caudle for Women in Child bed is *Goraca* boiled in Water with Pepper and Ginger, and while they are in this Condition they use nothing else. This *Goraca* is a Fruit round like an Apple, mark'd with divers Creases along the Sides, at which it will

Garaca described.

part. When it is ripe 'tis red like Blood, both within and without, but sowre, and the chief Use of them is to boil them with other Things to make them taste sowre, which 2 or 3 Cloves of them will do to a large Vessel of any liquid Thing.

Antidotes against Poison.

As there are in this Country very many poisonous Herbs and Creatures, so the People have excellent Skill in applying effectual Antidotes for them. They are often stung with Serpents, upon which sudden Death doth follow, without speedy Help; but if the Bite be taken in time, they can certainly cure themselves, and make nothing of it, and this they can do both by Herbs and Charms. The Knowledge of these Herbs they have learned from the *Mounggoutia*, a kind of Ferret, which fights with the *Noya* whenever it meets with it. If he chanceth to be bitten by the Serpent, which is very venomous, he runs to a certain Herb, and eating it, is cured, and then goes back and fights again. The *Chingulays*, when they see these Creatures fighting, observe the Herbs he eats, and so have gotten Medicines against such Venom.

Their Skill in Charms, and the Effects of them.

They are so skilful in Charms, as that they can either cure the Stings of Serpents, or prevent them by them. The *Noya's* they can charm so, as to handle them, take them up in their Hands, put them into Baskets, yea, kiss them without Harm; as also Tygers, that they shall not hurt their Cattel, with other wild and venomous Creatures; but the *Pelongs* will not hear a Charm.

For inward Diseases they have little Help, but apply themselves to their Gods by Prayers and Supplications, or rather to the Devil, as being God's Instrument, sent to punish and afflict whom he pleaseth.

They are loth to die.

These People are very loth to die, and as much afraid of the Devil in their Sickness, whom at such Times they chiefly invoke. When any is dead, none will come near the House for many Days, lest they should be defiled. The better Sort burn the Dead, lest Worms and Maggots should eat them; but the poorer Sort make an Hole in the Woods (for they have no Burying-places) and wrapping the dead Body up in a Mat, carry it upon a Pole on their Shoul-

Shoulders, and bury it without any Ceremony, laying it on the Back, with the Head to the West, and Feet to the East, as we do.

Praying for the Dead.

Some Days after his Decease, if his Friends wish well to his Soul, they send for a Priest to the House, who spends a whole Night in praying and singing for the Saving of that Soul. The Priest must be well entertain'd and rewarded, because, he tells them, the same Bounty and Liberality that they shew to him shall the Soul of their departed Friend have in the other World; and so they give him freely such Things as they have, which he out of his good Nature never refuses, be they never so mean, and so with Drums and Trumpets sounding, he is conducted home.

Mourning for the Dead.

Their Manner of Mourning for the Dead is thus: All the Women present loose their Hair, and let it hang down, and clasping their Hands together behind their Heads, make an hideous Noise, crying and roaring as loud as they can, praising and extolling the Vertues of the Deceased, tho' he had none, and lamenting their Condition, that they must live without him, and thus they do for 3 or 4 Mornings and Evenings together; the Men in the mean time standing still and sighing. But all this Mourning of the Women is not out of Affection, but Fashion; for they are of very couragious and strong Spirits, and lay nothing much to their Hearts, and as soon as their Husbands are dead, all their Care is to get others as soon as they can, which is never very long.

The Manner of burning the Dead.

The Manner of burning the Dead, which are Persons of the greatest Quality, is performed with much Ceremony. When they are dead they lay them out, and put a Cloth upon their privy Members. Then they wash the Body, by pouring half a Dozen Pitchers of Water upon it; which done, they cover it with a Linen-Cloth, and so carry it forth to Burning; but if it be kept sometime before it be burnt, then they cut down a Tree, and hollow it like an Hog's-Trough, and having embowell'd and embalm'd the Body, put it into it, and fill it up with Pepper, and so it lies in the House till the King gives his Command to burn it; for if the Person be a Courtier, they dare not burn him till they have the King's Order, which comes not sometimes of a great while, and sometimes not at all; and therefore in such Cases, that the Body may not take up House-room, nor annoy them, they dig an Hole in the Floor of their Houses, and put it in, with the hollow Tree and all, and so cover it; and if afterwards the King commands to burn the Body, they take it up again in Obedience to the King, and burn it, otherwise there it lies. The Way of Burning is this: If the Body be not put into a Trough, or hollow Tree, it is laid upon one of his Bedsteds, which is reckon'd a great Honour among them, but if it be put in a Trough, then that Ceremony is not used. This Bedsted or Trough, with the Body in it, or upon it, they fasten with Poles, and carry it upon Men's Shoulders to the Place of Burning, which is some eminent Place in the Fields, or High-ways, or where else they please, that the Blaze may be seen a great way. There they lay it upon a Pile of Wood 2 or 3 Foot high, and then heap up more Wood upon the Corps. Over all they have a kind of Canopy built, if it be a Person of very high Quality, cover'd a top, and hung about with painted Cloth, and Bunches of Coker-nuts, and green Boughs, and so Fire is put to it. After all is burnt, they sweep the Ashes together into an Heap like a Sugar-Loaf, and hedge the Place round to keep wild Beasts from treading them about, and sow Herbs there; but if they be Noblemen of a more inferior Quality, there is only a Bower erected over them, adorn'd with Plantine Trees, and green Boughs and Bunches, as before: But if any die of the Small-Pox, be his Degree what it will, he must be buried upon Thorns, without any further Ceremony.

The Person dare not burn him till they have the King's Order.

The Manner of Burning.

The Ashes secured.

AN

An HISTORICAL

ACCOUNT

OF THE

Kingdom of SIAM:

Extracted out of

The *Voyages* of *Six Jesuits*, sent into the *Indies* by the *French* King, 1685.

AND THE

RELATION of M. *De la Loubere*, the *French* King's Envoy Extraordinary to the K. of *Siam*, 1687, 1688.

Its Geographical Description.
