The Fisher estate having erected several schools and the public library, consequently the assessment for this purpose is light, be me is in towns from five to fifteen has had a measure of success from the scheme, Campbellton having a greater amount of outlay per year, and greater business opportunity should show a greater measure of success from the change.

A Saving of \$5.00 on Every Suit.

We announced to the buying public in June that we did not intend stocking clothing till we could procure suits to sell at a reasonable price. At \$11.85 we have 50 suits from 8 years to 15 years. These are in Browns, Greys and Blues and Domestic Tweeds, patterned to the season's latest styles. At \$11.95 we have 50 suits in heavy serviceable Tweeds,

This situation is also associated with the fact that Italy cannot supply her own food necessities. It is therefore economically sound that Italian labor should live abroad and remit its surpluses to the homeland.

The task of providing greater facilities has therefore been undertaken and a new port is in process of development at Venice, about the ports. "Italy is naturally bound to suffer some from the present world demand for raw materials, but there is no evidence of immediate suffering. There is enough cotton in Gencoa to keep the mills *running for the next six months, pending the shipment of the new crop. This is equally true of supplies of silk, and, to a considerable extent, of coal. Owing to speculation in coal and poor facilities for handling it, the harbor at Genoa is now congested. The present supply is being gradually consumed, nevertheless, and new shipmens must go forward in the fall. The need is not pressing at this hour. The pressure which Italy will have to bear will depend upon general business conditions thoughout the world. Italy is suffering now from a shortage of orders in silk, cotton, rubber and other commodities, but I believe this condition will not be of short duration."

Romance of JUBILO" Happy, Hearty Laughter

"He's THERE with the real, down to the ground, human interest stuff," says Mae Tinee, in the Chicago Tribune, while the Chicago Herald and Examiner opines that he has "one of the best faces for screen work we know of" and predicts that "he is going to be a big card." "A real "find," says the Charlotte Observer of the famous humorist, while Wid's characterizes him as

"Jubilo" fits the Will Rogers' personality like the proverbial glove.

A wealth of simple, homely humor and genuine pathos radiates through it and gives to it the rare quality of universal appeal. The story of "Jubilo" is simple and at once humanly appealing and dramatic. Set in a background of rustic simplicity, it tells a direct story of plain folks, revealing in a rapid succession of events both dramatic and humorous, the elemental emotions that govern the lives of provincial characters.
