"EMPIRE DAY" IN THE SCHOOLS

The Hoisting of the Flag—The Minister of Education's Instructions.

To the Editor of The Advertiser:

I inclose herewith a circular from the Minister of Education, re "Empire Day," which is of interest to parents, trustees, teachers and pupils. It is my intention to invite the co-operation of trustees, clergymen, parents and teachers in order that the celebration of "Empire Day" in our schools may be, as the Minister of Education wishes, a of patriotism in the children attending our schools. The board of education have taken steps to procure and erect flagpoles at each of the public schools, and Col. J. W. Little has generously donated a flag for each school, and it is the intention of the board to have all in readiness for "Empire Day." I feel assured that all interested will join good suggestions embodied by the Minister of Education in his circular on "Empire Day." Thanking you, Mr. Editor, I remain, yours truly,

CIRCULAR TO INSPECTORS. Gentlemen-This year "Empire Day," the day before "Victoria Day," falls on Tuesday, 23rd of May, and I invite your co-operation in having the event duly celebrated in all our schools. See regulation 11 (2). It is desirable that every suitable means should be adopted to foster among the youth of our country the best national sentiment. The subject is especially important at a time when the British nation is at peace with the world, and when Canprosperity, due, to a great extent, to the development of our resources and the growth of intellectual and moral aspirations among our people. DIE TO WARN OTHERS

Young Husband and Beautiful Wife Commit Suicide Together.

Mrs. Oscar Sims, a young couple, married only on Dec. 28 last, committed suicide in order to warn young men and women against leading improper lives.

The bride of only four months was a beautiful girl, the husband a plodding, prosaic business man. Three weeks ago she broke her marriage yows. On Wednesday her husband learned of her indiscretion. For two days they talked the matter over calmly and philosophically.

Finally they reached an agreement to die together, hoping thereby to wipe out the stain of sin on the wife's name and the dishoner her act had But Baron Korff Says War Is brought to her husband. And in offering up their lives on the altar of expiation they also hoped to

The Niagara Power Situation. The appointment of a commission by the Ontario Government to report on the Niagara power question in all its bearings will be generally commended, though it is by no means implied that the policy pursued by the late Government should be reversed. The situation, as explained by the member for London in the Legislature, is that three companies have been chartered with the right of developing 475,000 horse-power, and that they have already established works capable of providing 120,000 horse-power. One of these, the Electrical Development Com- the neutrality laws against Russia. The company, which had been given the right to generate 125,000 horsepower, thereupon applied to the Niagara park commissioners for permission Russian Empire in loans and investto double its development. An agreement to this effect was framed, with had been imploring France to forget the approval of the late Government, Under this agreement 'the company was required to reserve 50 per cent of its development to be sold to Ontario Britain's. This agreement had not taken effect, as it had not been submitted to the last Legislature. The present Government now refuses to sanction it, taking the ground that no more of the "potentialities" of Niagara should be alienated to private corporations, but that open London and will bring the electhe remainder should be reserved for tion on right away. the public if such a course is found to be for the public advantage. A commission will be appointed to ascertain the value of the work already accomplished by private companies, the cost of producing and transmitting electricity, and other information which may guide the Legislature in framing a policy for the future. Apparently the Government has yet no definite ideas on the subject. It is not committing itself to any course, and it may find that the only feasible plan is that which the late Government adopted, namely, leaving the development of Niagara power to private enterprise, with restrictions as to rates, and as to the quantity of water to be taken for power purposes. A great development had taken place on the American side of the Falls before there was a sign circumstances, the late Government of disease? Ontario granted the first charter to a Canadian power company, under terms which yield a considerable revenue to the Province. The then leader of the Opposition, Mr. Whitney, denounced these terms as oppressive, and declared in a speech at Niagara Falls a few out in the cold. years ago that Niagara power should be "as free as air." The member for London stultifies his leader when he now says these rights were conferred on the power companies for an "absurdly low figure." The State of New York parted with these privileges for nothing and placed no limit on the amount of water the power corporations could take, with the result that the American Falls are threatened with destruction. The Province of Ontario will derive a handsome revenue from the same source.

There are 600 wage-earners, 6 per cent being agriculturists with means to buy farms, etc., 8 per cent are business men with means, who propose going into either farming or trade; 76 per cent are workmen and laborers, most of whom are going on the land, and 10 per cent are domestic servants. Of the adults, the wants too much-she asks for imposmarried comprise 30 per cent, the sible things. single women 10 per cent, and the want is the earth!" single men 60 per cent. Only a fifth of the number are Salvationists, half the entire party claim to belong to the Church of England, and the remainder to other denominations. One young man is prospecting for his widowed mother and family with £2,000 capital. Another had £30 presented to him by his workmates before leaving home, and he and another man who received f100 from a friend have paid the money into the Salvation Army headquarters to await their arrival in Winnipeg. Each emigrant before leaving England was presented with a Bible with a suitable inscription. The immigrants are about equally divided between those who have a destination in view and those who are depending upon the Salvation Army labor bureau to find them employment. The bureau claims to have situations for 400 of them. Diplomatic Cross-Currents. Old world diplomacy at present is in curious tangle. Great Britain is the ally of Japan, and France the ally of Russia, yet Great Britain and France continue to draw together. King Edward has just been received with enthusiasm in Paris, and his visit was designed to strengthen the bond be tween the two nations. At the same time Japan is inflamed against France pelled to support her Asiatic ally. There can be no doubt the British Government is exerting every influence to appease the wrath of Japan and induce France to furnish no cause for offense, while France is endeavoring to Britain and Russia. She has substantial reasons for this policy. Great Britain is siding with her against Germany in Morocco. TORONTO.

Toronto, May 11.—Lack of energy characterized the demand for cattle at the city yards today, and there were times when sellers experienced considerable difficulty in able difficulty in securing Tuesday's range of prices, except for prime steers for butcher and export business. As a general proposition the quality of the offerings was of a more attractive character than earlier in the week, though the receipts still included a large percentage of rough and inferior cattle, and these were very draggy. A comparison of the price level with that prevailing on Tuesday will not show any material changes. day will not show any material changes, but there was undoubtedly a much weak-er undertone to the trade in the cattle out there was undoubtedly a future weak-er undertone to the trade in the cattle division. The other departments were featureless, hogs showing no change in quotations, while in the small meats sec-tion the only variations in prices were in export sheep, which were a trifle easier, and in spring lambs, which advanced 50c per cwt. The run was large, consisting of 103 cars, with 1,620 cattle, 206 sheep and lambs, 2,100 hogs and 161 calves.

One Reason Why Young Farmer Did Not Pay for Machine.

A session of the first division court was held this morning, with Judge Edward Elliot presiding. The most important case on the docket was an action to recover the price of a reaping machine from a young farmer. The latter had given an old machine in exchange for a new one, at the same time agreeing to pay \$35 to cover the difference in values. Defendant used the new machine during all last sum-

"Why did you not pay for it then?" asked the court. "Oh, I decided I did not need the machine, after all," said defendant, adding, "and I had no money."

CIGARMAKERS ARE PLUMBERS' COMBINE STILL WORKING

Attitude of License Boards Has Not Caused London Factories to Reduce Forces.

Hamilton cigarmakers are complainng that the action of the license commissioners throughout the Province in withholding the licenses from a large number of hotelmen has so upset the occurred in the Toronto police court trade that many members of the union find it impossible to secure work. They there is a combine among the say that the hotelmen are buying in plumbers. hundreds instead of thousands, on account of the license uncertainty. In all, throughout Ontario 186 licenses have been cut off, they say, and that is bound to cause more or less of a diminution in the number of cigars sold. They also say that they would not mind the reduc-tion in the number of licenses if the present holders of extended licenses

were assured that they would not also he cut off at the expiration of the extensions. There are so many extensions and such a good prospect of further cutting off that no license-holder wants to lay in a stock, preferring to follow a hand-to-mouth policy. They point out that in Hamilton Blumensteil's laid off ten men on Saturday night. Pearlstein's had closed, Sweet's had closed, and other shops are working on half-time, and that in London 25 men were laid off at Tuckett's. This

At the meeting of the Cigarmakers Union there a lengthy discussion took place regarding the way the cigar in dustry has been paralyzed this year by the action of the license department of Ontario. It was shown how the manufacturers of Hamilton alone had sold 2,000,000 less cigars this year than the same months of last year. The situation is critical and is constantly be-coming worse. There is no reason for any such slump in the clgar industry, except the feeling uncertainty in which hotelmen have been kept since the election, and since the commissioners have spoken they have added to the uneasiness. CITY TAXED; HAS NO MONEY TO PAY

Discovered in the Assessment Rolls.

Everything has its humorous side. There's humor even in matters muncipal. And there's a particular brand of humor, especially for the overburdened taxpayer, in a certain clerical error in for once in its existence, the city of London has seen fit to tax itself, and has no money to pay the tax collector. It is a rule of the assessment department to place a valuation upon all civic properties for the purpose of ascity, but not for taxation purposes. In this way, the city hall, the market house and all other public buildings, appear on the assessment rolls as assessed at certain figures.

This year, however, the market house and several other public properties were not omitted from the list of taxable realty, and in all these totaled in value about \$20,000.

When the city's income this year was eing figured up the auditor, of course, pased his estimate on the erroneous statement presented, with the result that the city taxed itself at the rate of 23 mills on the dollar on the \$20,000. This meant that the city figured on exactly \$460 more than it had a right to.

The error was not noticed until the books were handed over to Tax Collector Haves for collection. Major Hayes was compelled, of course, to inform the mayor and the members of No. 1 committee that he would be unable to collect the \$460 from the city, and a still hunt was at once begun to locate he man who had made the error. Under existing conditions, the erro neans that the council will be compelled to deduct from its item for incidentals the \$460, and the council will have that much less to spend this year.

The Globe has the following reference to the case Magistrate Denison expressed his villingness to commit Richard Crashley, of the James Robertson Company, for trial on a charge of restricting trade in plumbers' supplies. Mr. S. E. Smoke, for the defendant, objected, and more evidence will be taken today. William Meredith, secretary of the Master Plumbers' and Steamfitters' Co-Operative Association, said the sup-ply houses were free to supply nonassociation plumbers if they wished to de so.

"Suppose they did sell to non-union eople?" asked Crown Attorney Curry. "Our association would exercise their rerogative of buying their lsewhere," said the witness. He continued to say that the association was formed because competition had forced the tenders down so low that it was impossible to make a sanitary job at the figures that formerly prevailed. "I don't intend to try this case," said Magistrate Denison. "There is ample evidence to warrant an investigation by the higher court. Local Presbyterians Will Mark the 400th a Week From Sunday.

The 400th anniversary of the birth of John Knox will be fitly noted in the Presbyterian Churches of this city a week from Sunday. In all special sermons will be preached, and the work of the reformer will be made the subject of appreciatory addresses. Knox was born in Gifford, Haddingtonshire, in 1505, and died in 1572. He became a marked and avowed reformer. In the troublous times following, Knox was betrayed and became a prisoner in France for many months. He was subjected to much cruelty, and when released went to England, where he preached at Berwick and Newcastle His bold utterances got him into trouble. He was offered a bishopric, but refused. In Mary's reign he fled to Geneva, but later went to Scotland, and began his work of reformation. He wrote a vehement attack on political government by women, which set the country ablaze. Mary threw herself into the work of destroying the reformation, while the reformers were guilty of much iconoclasm. At Perth an accommodation was made, and the Protestants formed a bond of coven-ant for their protection. Knox was as conspicuous in political as in religious affairs, and took up his residence in Edinburgh. Queen Mary summoned him to her presence, and in many discussions with her he made plain his views on religion. In 1570, weakened by apoplexy, he still held his pulpit.

New York, May 12. - Noon. - For the first hour the tendency of the market was somewhat uncertain, weakness developing in Consumers' Gas, in consequence of the reduction of the dividend. The traders thought there was liquidation, by good houses going on in the stock. On the other hand, St. Paul developed great strength, and the buying was considered excellent. Union Pacific declined to 122, at which figure there seemed to be no end to its powers of absorption. In fact, the volume o buying at this figure so impressed the traders that they started to buy back what they sold earlier. The feature of the market was the sudden display of strength by Smelters, the stock advanced very easily, and met with no opposition until 118 was touched. I is thought that the Gates party is acquiring stocks in considerable volume. London has been a buyer of Union Pacific and Erie, especially the former Commission business remains extreme-

the story in a nutshell—and a mighty

sweet kernel it's going to be for you . . .

We're proud of the business we got inthe last two years. We're especially proud of what you've done for us in that time. We're proud of the increase in your trade this last year over the first one. We appreciate your goodwill and your patronage far more than we can express in mere words. We're anxious to show you that appreciation in a way that'll be both forcible and interesting. And so this sale. We've taken many of the most wanted lines and put them at prices that you've seldom seen before. We want our own customers to get the benefit, of course, but we expect and know that these values will coax scores of strangers to the store, and make regular customers of them. Every department has many bargains-a few only from each are mentioned here:

Mothers Are Helped THEIR HEALTH RESTORED Happiness of Thousands of Homes Due to Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's Advice.

A devoted mother seems to listen to every call of duty excepting the supreme one that tells her to guard her health, and before she realizes it some derangement of the female organs has manifested itself, and nervousness and irritability take the place of happiness and amiability.

she no doubt is suffering with backache, headache, bearing-down pains or

displacement, making life a burden. Lydia E. Pinkham's Vegetable Compound is the unfailing cure for this condition. It strengthens the female organs and permanently cures all disorders such as this letter describes:

Dear Mrs. Pinkham ing mother of five children, I have had experience with the general troubles of my sex. I was lacerated when one of my my sex. I was lacerated when one of my children was born, and from that hour I date all of my afflictions. I found that within a few months my health was impaired, I had female weakness and serious infiammation and frequent flowing spells. I became weak and dizzy, but kept on my feet, dragging through my work without life or pleasure. A neighbor who had heen helped by taking Lydia E. Pinkham's Vegetable Compound insisted that I take at least one bottle. I did so, and felt so much better that I kept on the treatment, and it made me a strong and well woman. He hesitated somewhat when asked to identify Willis' coat, as the coat he saw on the man who passed his house, but he declared he knew Willis by his walk and genral appearance.

Bella Cole, his foster-daughter, broke lown in the box, and it was feared for a time she would not be able to give evidence. She rallied, however, and corroborated her foster-father's vidence. She knew Alex Willis well by sight, and she saw him pass the cole farm the morning after the murder about 7 o'clock. But like her tester-father she was not positive as
