# More About Peas

Some people imagine that Canadian packed Peas are not as good as peas from France. There was never a greater fallacy. French Peas are largely packed from seed grown in Canada. If you will compare the Canadian with the French pack Peas you will notice that the flavor of the imported Peas is killed by the use of green coloring.

A prominent grocer said that he never ate any Peas but the imported. He was asked if he had ever compared the French with the Canadian Peas. He confessed that he never had. A tin of very ordinary Canadian Standard Peas two or three years old was then opened against a tin of French Peas. The French Peas had the Canadian Peas beaten for color, but for flavor the Canadian pack Peas were much superior, and had a flavor that was entirely lacking in the French Peas. In fact the French Peas were quite unpalatable.

The Canadian Canners' Canned Peas are the finest in the world. They have the field to themselves as regards quality.

Talk Quality in Peas, and educate your customers to buy the better grades. Show them wherein the difference lies. It will pay you well.

The difference in cost is slight, and you can obtain a much larger profit on the better grades.

Try it for one week. Talk <u>Canadian Canners' Sweet</u> Wrinkle Peas at every opportunity, and note the results.

BRANDS: "Canada First," "Little Chief," "Lynnvalley," "Maple Leaf," "Auto," "Log Cabin," "Kent," "Lyon," "Thistle," "Grand River," "Horseshoe," "White Rose," etc.

# WHITE SWAN PREPARED COCOANUT

r

0.

In cocoanut you want something true in flavor, fine in texture, bright in color, good in appearance and pleasing in taste. Something that will not grow rancid quickly, thus causing you loss and annoyance.

That's the kind we make-beautiful long threads that will satisfy the most exacting.

An important point, too, is that it does not cost you any more—perhaps not as much—than inferior and poorly-made cocoanut.

Our White Swan guarantee is behind every pound.

Try a lot, and if all we claim for it is not abundantly proved, send it back at our expense.

Samples and quotations cheerfully sent on request.

# The Relations of Canner and Jobber

### Address by President of National Canners Association of United States at Recent Convention of United States Wholesale Grocers-Bears on Si milar Conditions in Canada.

Among the many points of interest at the recent convention of the National Wholesale Grocers' Association at At-lantic City, referred to at length in these columns last week, perhaps none was of more import than the address by C. S. Crary, president of the National Canners' Association, on "The Relations of the Canner and Jobber and ways in high themes Construction of the Mathematical Science (1999). which they can Co-operate to Mutual Advantage.

While neither the canners nor the jobhers are so comprehensively organized as in the United States, conditions here are to a large extent similar to those in existence across the line, and Mr. Crary's address should, accordingly, be of interest to the Canadian trade gen-erally. It is given substantially herewith.

### Relations Closely Identified.

"The relations of the canned goods packing industry to the wholesale gro-cery trade is so close and the interests the two organizations are so closely identified that a member of either can-not well trust himself to speak in criticism of the other, but would better con-fine himself to those points of general interest to both.

"It was a good many years before the rivalry in the canning business would permit of a national organization, covering as it does practically all of the fruit and vegetable packers from Maine to California. And it is only of very re-cent years that the wholesale grocers seemed to find sufficient ground for the bringing about of the splendid organization you have now effected.

"The desire for closer communion be-tween the National Canners' and the National Wholesale Grocers' Associations and to insure as nearly as pos-sible a complete affiliation working for the common interests of both has pro duced your invitation to me to be with you. The tendency is to a closer rela-tionship in all lines of business, and the jobber and packer should, in no sense, be competitors. Yours is the logical organization which the packer seeks as the natural channel through which to accomplish the distribution of his products, and the packer can better afford you a reasonable profit for this to pay distribution than to attempt it himself. Organization is for the benefit and protection of the individual, and this is true in business as well as in social work. Society and business associations are socialistic in their purposes, and are not organized for individual profit.

### Limits Jobbers to Distribution.

"The wholesale grocer has elected to be the important middleman in the distribution of food products between the manufacturer and the consumer. He has constituted himself as the logical clearing house for the packers' products, and the packer, recognizing the benefits of the jobbers' well organized system of distribution, will avail himself of it just so long as the toll charged is a reasonable one, and just so long as the jobber confines himself to the business of dis-tribution and does not enter the field as a competitor of the packer. When a packer has seen his own trade on a given brand of goods dwindle from year to year, finally to be displaced entirely by the jobbers' brand, the reputation of which has been built up by the assur-ance that it is 'just as good,' he at last awakens to the fact that he should confine his efforts exclusively either to his own brands or that of the jobber, and if he decides to handle his own this means a reorganization of the selling end of his business and the establishment of his own plan for distribution.

"A close relationship between the individual packer and jobber exists only virtue of their co-operation in the distribution of the packer's brands. Take away that relationship and the packer has lost the incentive for enthusiasm and painstaking effort. When a man-identifies himself with any business, if that business is to get the best there is in him, he enters upon it as a life business, and to make it amount to anything must build for himself.

#### Assurance Better Than Contracts.

"The personality of the seller and his known disposition to meet his contracts fairly are in reality more vital to you than the contract itself. The contract committee from your association which id us a visit in Cincinnati last Febru-

ary was, doubtless, disappointed, be-cause there was not shown a keener disposition on the part of the canners to agree with them on a uniform contract. "There seemed to be a feeling preval-ent among the canners that the mat-

the of contracts was largely a personal one, and for that reason that it would be quite impossible to get together on important points.

"The selling of goods by a packer un-der his own label and the buying of goods by a jobber unlabeled are two entirely separate and distinct propositions

"No particular form or contract could

be established as a hard and fast rule. "The packer who puts out a line of fancy goods under his own brand always knows that the quantity of high grade stock he is to harvest is uncertain, and there should certainly be no criticism on the part of the distributor if he cares to handle the packer's goods at all, in

taking them on a pro rata contract. "The question of the lack of good faith in making deliveries under pro rata con-tracts on packers' brands does not arise as it would if the goods were bought un-labelled, because the buyer knows that the packer will strain every point to the

care of his own trade name. "Now, the jobber wishes to buy goods for his label and naturally he is the one to take the initiative in the transaction. He wants a given quantity of goods, and it is just as much out of reason for the packer to attempt to change this buyer's specifications as to his requirements as it is for the jobber to attempt to dictate to the packer how and under

what form of contract he should sell him goods.

"If seller is willing to contract for the delivery of 10,000 cases of standard goods on a contract with 80 per cent. delivery guaranteed, then instead, let the contract be placed for 8,000 cases with a guarantee of full delivery, and make a closed contract of it.

### An Easy Way to Consumer.

"We are all seeking, or should seek, the simplest methods of getting from the garden and field to the consumer, the and in doing this we are prone to work along lines of elimination that always eliminate the other fellow, always feeling sure of the necessity and usefulness of our own commercial existence.

"While the practice od dealing in futures is being assailed, there will be those who condemn it, but a very large percentage of the business of the country will continue to be done by those who plan for to-morrow and next week and next year, and in doing it they will continue to make and keep their future contracts as usual.

"The strongest reason for organiza-tion in the canning industry is that it enables us to work out plans along lines of development, which are always looking to an increased consumption of canned goods.

"Quality itself is the best advertisement and recommendation to the consumer for a repetition of his order. There is no better way in which the wholesale grocer can help this matter along than by continually insisting upon a good quality of product, and the packer, who stands for quality should have be held to compete with those of questioned ability to produce good quality. who stands for quality should not

### Advance Step in Economics.

"The packing of canned goods is an advanced step in economics and brings to the people the advantage of an excellent preservation of fresh goods in all seasons.

"By this method we are enabled to provide ourselves in seasons of plenty against those of insufficient supply that are almost sure to follow.

"The public has been prejudiced in the past by attacks from self-styled food experts, and a few years ago the indus-try was held up to such scathing criti-cism, as the result of wholesale comdemnation, growing out of altogether indemnation, growing out of altogether a sufficient investigation of the general practices of the industry, that besides a monetary loss of millions of dollars, the admission of a man that he was really engaged in the canning business carried with it the accusation of being an undesirable citizen use

an undesirable citizen..... "If this test by fire was necessary in order to finally bring about the National Pure Food law, then it was worth the price, and the honest packer may con-gratulate himself that through it all he has had one staunch and intelligent de-fender, Dr. H. W. Wiley, of Washington.

### THE CANADIAN GROCER

## A Fixed Grade of Quality.

"It has been suggested that it might be possible to establish a fixed grade of quality, but after all, the production of quality is much like the contract question, and is one in which the personality of the packer enters largely. The wholesale grocer has established his reiations and business with a certain packer whom he feels can produce and deliver products of a very satisfactory quality, and while he buys from that packer various quantities of so-called standard goods there are neither rulings nor specifications by which these standards are established.

ards are established. "It might be well to establish joint committees on standards. To accomplish this let there be three committees, each consisting of three members, one taken from each of the associations of wholesale grocers, canners and brokers, with the headquarters of one committee in New York to pass on eastern standards, one in Baltimore to pass on Baltimore and Maryland standards, and one in Chicago to pass on western standards. Any matters arising in controversy or where arbitration as to quality is required, could be passed up to the particular committee qualified to pass upon the goods and in this way many differences involving serious loss might be amicably and justly settled.

### Matters of Mutual Interest.

"There are a great many matters which might be worked out to a better solution in ways that would be of great benefit to both packers and wholesale grocers. A close working arrangement between the transportation committees of the two associations might be particularly advantageous at this time when the country is threatened with an advance in freight rates and classification changes that will involve additional burdens to all lines of business. We, as canners, assure you of our deep concern for all matters that affect your organization as a whole and of our particular concern, and esteem for the co-operative work you extend to us in the distribution of our own brand of goods."

### WEDDING BELLS IN THE TRADE.

W. A. Ford, of the office staff of the James Lumbers Co., Toronto, was married on Tuesday, June 16, to Miss Louella May Isaac, daughter of Mr. and Mrs. J. Isaac, of Pearson Avenue, Totonto.

The ceremony was performed by Rev. Dr. Hincks, pastor of the Dunn Avenue Methodist Church, in a bower of greenery and smilax.

A small reception was held after the ceremony by Mrs. Isaac, and later in the fternoon Mr. and Mrs. Ford left to pend their honeymoon in the Thousand Islands. They will live afterwards on Callender Street, Toronto.

Frank Crysdale, only son of Ald. Crysdale, of C. H. Crysdale & Son, retail grocers, Oshawa, was married on the 10th inst. at Fingal, Ont., to Miss Waters, of St. Thomas. The newlynade benedict was a few years ago taken into partnership with his father, and it is only proper that he should take unto imself a life partner.

The Canadian Grocer extends its best tishes to these newly-married couples.

# PROVINCIAL ASSOCIATION FOR B.C.

### Retail Grocers of the Coast Form Central Organization—Aims to Protect Trade Interests and Prove of General Benefit.

An important step was taken by representatives of the retail grocers of the coast on Monday, June Sth, when a Provincial Retail Grocers' Association was organized with the idea of promoting trade interests and of benefitting the members generally. The meeting was held in Vancouver, and representatives were present from Victoria, Nanaimo and New Westminster, as well as Van-couver. S. J. Heald, T. Reddn.g, E. B. Jones, E. J. Hall, H. O. Kiergkam, Fred Carne and Thomas S. Futcher, came over from Victoria; W. H. Morton and James Young, from Nanaimo, and C. P Dean, from New Westminster. From Vancouver there were W. J. Andrews, W. H. Walsh, T. J. Hunter, F. Wright, George Hobson, L. MeTaggart, E. Pooke, F. W. Welch, W. Clark, Mr. White and W. J. Hunter, Secretary of the Vancouver Association.

Officers were elected as follows: President, Fred. Carne, Victoria; First Vice-President, F. W. Welch, Van-couver; Second Vice-President, George Adams, New Westminster; Third Vice-President, James Young, Nanaimo; Secretary-Treasurer, T. J. Hunter, Vancouver; Directors, T. Redding and E. J. Wall, Victoria; W. H. Walsh, and E. Pooke, Vancouver, and C. P. Dean, New Westminster. In speaking of the organization, Mr. Hunter stated that the association was formed to foster and maintain a permanent social feeling among the retail grocers of the Province; to obliterate district differences and inspire confidence among the members of the trade; to correct excessive and unmercantile competition; to remove by concert of action such evils and customs as are against sound business principles and good policy, whether it be the cutting of prices, selling of the wholesale houses at retail, improper house to house peddling, the distribution and consumption of adulterated and unwholesome goods, the use of fictitious labels, the use of dishonest weights and measures, or whatsoever the evil may be: to disseminate useful information: to watch and influence legislation towards the better protection of capital; to assist members in collecting delinquent accounts; to encourage the observance of Sabbath and all legal holidays; and to attain the results which experience has proved are not attainable through individual or divided effort.

The new organization will be known as the British Columbia Retail Grocers' Association, and should do a valuable work in raising the standard of the retail trade in the Province.

### CHANGES IN TRAVELING STAFF.

As a result of the death of the late W. C. Adams, of the traveling staff of Davidson-Hay, Toronto, several changes in the traveling staff have been made during the last week. Wm. Anderson, who has been doing good work in Eastern Ontario, takes part of Mr. Adams' old territory, including the Parry Sound district and the north shore up to Sudbury. L. Chapman will cover all the Soo branch and the main line west of Sudbury. E. J. Peters, who was formerly with the firm returns again and will cover Mr. Anderson's territory in Eastern Ontario.

#### **GUILD MEETING IN PROGRESS.**

### Large Attendance and Interesting Sessions in Historic City.

The annual meeting of the Dominion Wholesale Grocers' Guild, which is being held in Quebee on Wednesday and Thursday of this week, promises to be one of the most successful gatherings the wholesale trade in Canada has ever enjoyed. The attendance is large, the trade in all sections of Canada being represented, and as many of the representatives have their ladies with them, a social as well as a business aspeet is given the gathering. Those in attendance, too, are enjoying the natural beauties and historical atmosphere of Canada's old fortress eity.

A comprehensive account of the proceedings of the meeting will appear in these pages next week.

#### WILL REMEDY TRADE ABUSES.

#### Bill to Amend Inspection and Sale Act Passes House.

The frauds which have been perpetrated in different parts of Canada in contravention of the Fruit Marks Act, particularly during the last season, bid fair to be dealt with more stringently under Hon. Sydney Fisher's bill to amend the Inspection and Sale Act, which came up in the House of Commons on Morday.

The amendment provides, among other things, for more severe penalties for infractions of the fruit marks act, and also in respect to the adulteration of cheese.

Several members suggested that the penalties for violation of the fruit marks act were too severe.

Mr. Fisher said that he was prepared to redeuce the penalties so that for a first offense the penalty would not exceed \$25 nor be less than \$10; for a second offense, not more than \$50 nor less than \$25, and for a third offense, not exceeding \$200 nor less than \$50. With these alterations the bill was reported and passed.

# "Men Who Sell Things"

How One Traveler Made a Success on a Rush Trip—Sheldon's Method of Estimating an Employe's Value — The Wheelbarrow Salesman and His Two Handles—Enthusiasm an Important Factor.

By Walter D. Moody-Serial rights for Canada purchased by the MacLean Publi hing Co. from the publishers, A. McClurg & Co., Chicago.

### CHAPTER V.—(Continued.)

Not content with leaning on the broken reed of their own procrastinating methods while others all around them are getting away from them a large share of business easily within their grasp, they try to argue away the chief point adhered to by their more progressive brethren in the face for sales—namely, that "a bird in the hand is worth two in the bush."

Again I must ask the reader's forgiveness in relating a personal experience which seems to fit in right here, and am willing to bear criticism on that point, if my little book prove a help to some in bringing their attention to the necessity of increased energy in the daily routine of their efforts at winning success. My sole purpose in relating this incident is to point out the reason why, in a certain class of salesmen, the negative qualities are outweighed by the positive. In any event, the reader will agree with me that our sins of omission, as well as those of commission, are traceable to our weaknesses. and also that a cure can be effected only through the development of strong qualities.

Our firm had experienced considerable difficulty in drawing business from the West and Northwest through Chicago to the smaller Eastern market in which our house was located. At different times we had employed two or three salesmen in that section without success. On looking the situation over, we concluded that it was necessary for a member of the firm to go out there and do a little missionary work. Having traveled there at an earlier period, I volunteered to make the trip.

### A Flying Trip's Incidents.

The time to make an advance trip with fall goods being at hand, I immediately mapped up a flyer for ten days, at the end of which I was to meet our buyers in New York. There was no time to lose and keep the Eastern engagement, so I laid out the trip to make close connections.

The first town on the list was Oshkosh, Wisconsin. I arrived there at 4.30 on a hot June afternoon, and planned to get through and leave, if possible, on the 9.30 train the same night.

The sample-rooms were all taken at the Atherton Hotel, and I had to open my trunks in the billiard room, which was used for that purpose when the place was crowded. I made no attempt at a regular display, but simply arranged the trays to be gotten at handily. But an hour and half remained in which

Rushing out of a side entrance to make my first call, I ran into Oley, the Swedish porter, who stopped me long enough to say that two rival salesmen from Chicago had been there all day long winding up their summer business. Noticing my arrival and seeing me unpacking fall goods Oley explained that they had said to him, "He'll have a fine time trying to sell winter goods with the thermometer 93 degrees in the shade. We have a small line of advance goods along with our summer stuff. but haven't tried to do any business. Why! You can't even interest the trade in stuff for present use, to say nothing of goods they'll not need . for three months to come. He might as well close up and move on. We've been around sounding the trade, and that's the verdiet."

"Give them my regards, Oley," I said. "Perhaps they are right, but I'm going to make a stab at it, anyway. Maybe things are not so bad as they predict."

It was a walk of but two blocks to my first customer's store. A few pleasant greetings over, I explained that I was a little pressed for time, and followed up the remark with an earnest appeal for an immediate engagement.

Possibly the urgency of the whole thing impressed them; at any rate, they were over in my room at 5.30. Being quick buyers, they selected a bill amounting to three hundred and fifty dollars by 6.30.

Snatching a mouthful of supper, I hurried back to the sample-room and selected a few samples of the best selling numbers. These I quickly packed into telescopes and boarded a car for the South Side, across the river. The merchant I wanted to see kept open nights, and I was fortunate in finding him in.

Apologizing for troubling him at that late hour. I began unstrapping my cases, keeping up a running fire of selling talk in the meanwhile. He protested that he didn't want to buy so far in advance of the season. Perhaps if I had had as much time on my hands as my Chicago rivals I would have listened to him, but I kept right on, ignoring his protests as tactfully as possible, and finally caught his eye with an unusually attractive value in the velvet line.

He called a clerk, and together they took a few samples and retired to the rear of the store to compare them. They talked them over so long that I began to get nervous. It was eight o'clock. But an hour and half remained in which to return to the hotel, pack up, and catch the train. I was going to interrupt them, when they started toward me, talking earnestly and nodding their heads.

Something in the manner of the dealer told me that the deal was off. Sure enough. Handing back my samples, he said: "You've got some good values; in fact, I don't mind telling you they are a shade better than the samples sent me by the other houses. I will probably send you an order later on, but I don't want to place it now."

### Closing the Sale.

It took me less time to tell him than to write it that I wasn't trying to sell him a cat in a bag; that his own judgment confirmed the quality of my goods, that I had confidence in him, and hoped he had confidence in me; that nothing could be gained by either of us by delay; if he wanted my goods it would be necessary to book his order right there, as I would not guarantee the prices for forty-eight hours.

That brought him around. When I said good-bye, the perspiration was runing down my back but I had his order for four hundred and fifty dollars safely tucked away in my inside pocket. That made eight hundred dollars for a few hours' work. It was reassuring to say the least, when I thought of my two Job's comforters back in the hotel wishing me all kinds of good luck.

I made the train by the small margin of a hair; it was pulling in at the depot when I arrived. There was no time to check baggage. Quickly I ordered the drayman to back right up to the baggage car and dump my trunks in without being checked. The station agent was one of the sort that every traveling salesman carries around a club for He started right in to veto proccedings, but he was a minute late. The conductor shouted, "All aboard!" I threw a half-dollar to the driver, telling him to hurry and drive off. The train pulled out, and I swung onto the rear platform. I stood there and waved my adieu to the enraged agent, but it was lost in the shuffle, for he was blessing the drayman in three languages.

The conductor let me into the baggage car. Handing the baggageman a cigar, I remarked pleasantly: "I had to break the rules this time, brother. Will you please check these trunks to Green Bay?"

### Don't Beat About the Bush.

That was rushing things too much for comfort, but I really believe that some salesmen lose business by having so much time on their hands that they don't know what to do with it. Either they do not make the effort, or they talk their customers all around Robin Hood's barn, until patience ceases to be a virture; the merchants give the orders to the man who attends to his business and then gets away as soon as he can. Mind you, I haven't said, "Do as I have done and you will succeed." Not at all; but rather, I have hinted that you should learn by mistakes how to avoid them.

Suppose that with a house of one hundred salesmen we have fifteen that are full of faith in their house and their work, and eighty-five that stand out eareless and indifferent. What can such a house do? Only fifteen are able to fight, and there are eighty-five fussy. feeble men to look after! Don't you see why that house can make no inroada on the trade of its competitors? Dou't you see why it is that you haven't headed the sales list in your establishme t since you first picked up your grip sack?

My plan is to take a common-sense view of the facts. I like to deal with facts. You can't get around a fact. Theories you can brush cut of the way, but when you come to a fact you cannot dig under it, and you cannot jump over it; you have to meet it.

### Estimating an Employe's Value.

A. F. Sheldon, founder of the Sheldon School of Scientific Salesmanship, asked the general manager of the largest institution of its kind in the world the question, "How do you measure the value of an employe?" The answer was, "By the degree of

The answer was, "By the degree of supervision which he requires. The less supervision he needs, no matter what he is doing, the more valuable he becomes." His next question was, "What is the

cause of the need of supervision?"

Again the answer promptly came, "All supervision is caused by two classes of sins; first, sins of omission; second, sins of commission. If the employe in any capacity did not omit to do a thing which he should do, and in doing it committed no errors, then he would need no supervision, and his value would be at the highest."

The manner in which James Keeley, managing editor of The Chicago Tribune, with the assistance of Harry Olsen, effected the capture of Paul O. Stensland, the Chicago bank-wrecker, in Tangier, Morocco, in 1906, exemplifies the sort of enterprise that does things.

#### Enterprise That Does Things.

It is an admirable lesson in pluck and energy that might well be followed by the class of salesmen who mean well enough, but only partially succeed through puttering around. Intelligent application to instant opportunity is necessary in performing such work. While the detectives were theorizing, the Tribune was working. The information received was indefinite, but investigation proved its probable accuracy, and led Messrs. Keeley and Olsen in tracking Stensland to Tangier, and there arresting him.

Speaking of the incident, the leading daily of another city said:

"The arrest of Paul O. Stensland is an indication of what the press can do, and also what the Chicago police cannot do. The Chicago Tribune has found the man for whom twenty-two thousand depositors of the Milwaukee Avenue State Bank were looking, and for whom the united police force of the world was supposed to be looking, while the sensational press was 'discovering, him in every nook and corner of the world in various discuises.

of the world in various disguises. "The Tribune was the first to receive something in the nature of a clue to the whereabouts of the missing banker. But the clue was slight, and would have been worthless had it not been followed up with discretion, with patience and a study of the subject of the pursuit and what a fleeing criminal would be likely to do under the circumstances in which Stensland had placed himself. A study of the conditions of the various countries in which he might seek refuge was also to be made. It required that knowledge of human nature that after a time becomes a second nature to the trained reporter.

The Tribune in its pursuit of the eriminal did not avail itself of the services of a detective. The trained detectives were looking in an altogether different direction for the fleeing banker. It is not too much to say that had it not been for the Chicago Tribune, in all probability the fraudulent banker would never have been discovered, and might have lived in ease on his ill-gotten gains—money of which he had robbed the poor who had confidence in him."

When Mr. Keeley finally cabled the Tribune that the actual arrest had taken place, the question of getting the prisoner safely back to the United States was attended with all manner of international complications. It was finally decided to send a stenographer from the office of the State's Attorney to Washington to confer with the State Department in an effort to secure the aid of the United States Government for a proper and immediate transfer. His mission was attended with the usual amount of red tape "necessary" to such procedure, causing dangerous delay.

At this interesting juncture the Washington correspondent of the Tribune, Mr. Raymond, comprehending the necessity for vigorous action, entirely without regard to the traditions of international relations, took matters in his own hands and called upon President Roosevelt at his summer home at Oyster Bay. A brief interview was all that was necessary to show him that the President appreciated the urgency of the case, and that he was in hearty sympathy with the victims of the wrecked bank.

With characteristic independence, Mr. Roosevelt did not hesitate to overturn the traditions of musty international law, declaring that he would go to any extent necessary to secure the return and subsequent punishment of the bankwrecker who had stolen millions, and who was denounced as "one of the most obnoxious types of criminals." The interview finished, without a moment's hesitation the President sent a telegram to the Hon. Robert Bacon, Acting Secretary of State at Washington, instructing him concerning the case, stating that it was his desire to appoint James Keeley and Harry Olsen as official representatives to take Stensland in custody.

Stensland arrived in Chicago in due time in charge of his captors, and was duly prosecuted according to law.

The Fussy newspaper man, like the Fussy Salesman, makes a good stroke now and then, when fortune favors him, but in most cases he fools away his best opportunities of doing something worth while. The sort of enterprise exhibited by Keeley and Raymond in behalf of their paper is the kind that will enable the salesman to win big scoops of business for his house.

(To be Continued.)

### WAS OLD TORONTO WHOLESALER

### Daniel McIntosh Died Suddenly in Church on Sunday.

While sitting in his pew in Chalmer's Presbyterian Church, Toronto, on Sunday morning, June 14, Daniel McIntosh, one of the elders of the church, suddenly fell over dead. He had walked to church from his home at 135 Beatrice St. and was only in his seat a few minutes when the end came.

Mr. McIntosh was some twenty-five years ago a member of Hill, McIntosh & Innes who conducted a wholesale grocery business for some time on Front St. He was born in Nairn, Scotland, seventy-seven years ago and came to Canada in 1852. A family of nine daughters and sons survive.

#### EXTRA STEAM BEHIND.

When a heavy train approaches a particularly stiff grade, an additional engine pushing on behind is a great help. The business of a traveling salesman is usually "up-grade" all the time. Anything that will help him keep his old customers and land new accounts is like an additional force pushing on behind. If your house is an advertiser in a trade newspaper it acts as an extra force helping you "up-grade."

# Grocery News From Coast to Coast

### Quebec and Eastern Province Notes.

### St. John Quotes a Drop on Ontario Flour-Halifax is Getting an Abundance of Fruit-New Ideas From Montreal.

### MONTREAL.

June 15.-Business has been very good during the past week, especially the larger dealers. The warm weather has stimulated trade pretty generally. Some of the smaller grocers have experienced a slight falling off from last week, but altogether there is not much cause for complaint.

The Co-operative Grocery Co., whom it was reported had bought the stock of Kingsley Harrison in our last issue, intend to open another store in the near future. A. Girard, Jr., the proprietor of the Co-operative Grocery Co., states that there will be a chain of these stores established throughout the city.

In a local store with an exceptionally bright interior may be seen fly netting put to good use. The entire expanse of shelves are covered with this material, and in this way the stock is kept much cleaner than it would otherwise be. A query regarding the accessibility of

goods elicited the response that the clerks did not find it awkward to get at the stock on the shelves.

G. H. Munroe, of Munroe Bros., now confining his attention to his prin-cipal store at the corner of Mountain and St. Antoine Sts., having disposed of his uptown branch.

Walter Paul, who is attending the General Assembly of the Presbyterian Church in Winnipeg, intends to return via Chicago, and will visit other Ameri-can cities on his way home.

Sometimes grocers, and in fact all people, are said to be irritable, and are accused of all sorts of disagreeable propensities if they try to keep those in their employ in the right path by giving them good advice, and pointing out their deficiencies. There is a certain gro-cer in this city who is exceptionally well informed regarding the source of all the commodities which he offers for sale in his store. This man discoursed very volubly on the difficulty which he had in making his clerks take an interest in the business sufficiently to learn the origin of the products which they were handling. Now, perhaps this grocer in question might have/been an extremist, but the fact remains that an infinitely greater pleasure (can be taken out of the everyday things of life if we know something about their origin. For instance, two baskets of onions may sit side by side at a grocer's door. One side by side at a grocer's door. One basket was raised, perhaps, in our own country, and yet it is being run closely

country, and yet it is being run closely by a product which has found its way from the broad fields of ancient Egypt. This is only a sample of the many in-teresting things which may be learned about the products which daily come under the notice of the clerk. The latest addition to the grocer's comfort, and it is claimed a money maker for him also is a "Remembran-cer." This machine is expected to sup-

ply what the human memory cannot. Very frequently you may witness a grocer reciting to a customer the various things which he thinks he or she might have forgotten, but even the grocer, familiar as he may be with his stock, will omit the very article which the customer most desires, and which he or she has forgotten. Now, all that the customer has to do is to stand before a machine, which does not look unlike a a machine, which does not fook unite a cash register, and then in rapid succes-sion, on a strip of paper, there passes before the vision all of the products kept in stock by the grocer. Between the subdivisions of the stock into their various groups, advertising notes are

### SOME PERTINENT QUESTIONS.

Our Guelph correspondent sends in this week the list of questions which appears below and suggests that they be discussed by corres-pondents and readers of The Grocer. The idea is a good one and we will be glad to hear from grocers and clerks generally in regard to the matters suggested. A thorough discussion of any of these matters will undoubtedly lead to steps being taken which will be of benefit to the trade :

1. How many hours a week should a grocer or his clerk work? 2. Should a clerk have any holi-days? If so, why? 3. Should clerks be paid by the

hours they serve or by the amount

of their sales, or how? 4. Should every clerk know the cost mark? If not, why not? 5. Should all goods be marked in

plain figures ? 6. What should consist or be estimated as a good day's sales for a clerk ?

seen, printed in red. This machine, it is claimed, pays for itself in a very short time by the extra sales it brings. R. J. Kyle, of Kyle & Stevenson, grocers, corner Waverly St. and Es-planade Ave., who was drowned in the Laurentian Baths Wednesday night, was buried on Friday afternoon. There is a back store in a certain gro-cery in the city which is a model of

cery in the city which is a model of order. Among the admirable methods employed by this grocer is one worthy of special mention. Frequently when canned goods come in they are stored way, one box on top of the other, and then when one box is wanted the whole stock has to be shifted to get at the right one. This difficulty is very nicely gotten over in the manner adopted by the grocer in question, who has piled

the boxes in such a way that a particular box can be located in a minute and the top removed without disturbing any of the other boxes. This is accomplished by piling the boxes on their sides with the tops exposed at the front in a ver tical position. In this way any box can be selected and the cover removed eas ily, as it is the free side of the box which makes the face of the pile. The sides of the box, so to speak, are op posed to the sides of the other boxes the same way as a brick in a wall would appear if the largest side were exposed. It was explained that this led to the shelves in the store proper being kept in good condition and full, because the stock in the back store was more

easily accessible. E. W. Kingston, Australian agent for Cailler's Swiss Milk Chocolate, was in town last week, calling on W. H. Dunn the Canadian agent for Cailler's.

### ST. JOHN.

June 15 .- Ontario flour declined 20 cents a barrel last week. Cheese is also a little lower and the dealers are now being supplied by the local factories Business continues quiet, which is prob ably due to a large extent to the farm ers being busy seeding. The outlook for a good crop this year is excellent.

The delegates from the N.B. Grocers Guild to the meeting of the Dominion Grocers' Guild at Quebec, will leave to morrow. W. C. Cross, of Hall & Fair weather, will go in place of Geo. E Barbour. Mr. Cross is on the programme for an address.

Keith & Plummer, general storekeep ers, and Franklin Clark, of Hartland. are clearing away the ground prepara tory to the erection of large brick build ings, that of the former to be 60x80 feel. that of Mr. Clark to be 30x60 feet. The buildings will form a solid brick block two storeys high, with a concrete base ment.

A rather cool game was worked in 1). J. Purdy's grocery, Main Street, on Wednesday last when as the result of a telephone message a stranger was en abled to procure some \$10 or \$12 worth of goods. The message was to the effect that a young man would call at the store for some supplies for a schooner then in port. The man called, got the goods and took them with him, telling the clerk charge them to the owners of the vessel A few hours later the man was arrested while trying to dispose of his booty.

Arthur Carlyle, who acted as collector of the Merchants' Protective Association tion, with an office in Horsfield Stree is reported missing, and a number of merchants who had entrusted accounts to him are anxious for his return. It is said he has gone to New York. No formal charge has been laid against him

A joint delegation from the commo council and board of trade left last week for Ottawa to confer with Hon. Wm. the

Pugsley and other members of the Government as to the future development of harbor facilities here.

F. R. Doerhen, a resident of Barbadoes, was in the city last week trying to interest merchants in promoting trade between this port and the West Indies. He said the West Indies are trading altogether too much with the United States. They should be able to buy more advantageously in Canada. Mr. Doerhen left on Thursday for Halifax.

### HALIFAX.

June 13.—The market is well stocked with fruit and green truck and trade is quite brisk in all lines. The quantity of fruit imported and consumed here is greater than ever before, and is increasing all the time. Bananas are quoted at \$2.50 to \$3, pines at \$2 per dozen, peaches at \$3.50 per crate and cherries at \$2.50 per box. American tomatoes are selling at \$1.75 per crate of four baskets, cukes at 7 cents each, watermelons at \$5 cents each, cabbage per crate at \$1.75 and strawberries at 20 cents per box. Jobbers say that busi-

ness is good all round and that collections are improving.

There has been a heavy decrease in the price of Bermuda onions this week. Boxes containing 45 pounds were sold for \$1 each, a drop of nearly \$1. The season for them is about over and as the stocks on hand were quite heavy a cut in the price was necessary.

Large stocks of potatoes are still held here, and are quoted at \$1.50 per threebushel bag. Potatoes kept remarkably well during the past winter, and the stocks now on hand are in first-class condition. Parsnips are about done and carrots are becoming scarce.

The price of butter is holding quite firm, notwithstanding the heavy rerelpts. Small tubs and rolls of dairy butter are coming in in good supply, and the demand for choice stock is about the average for the season. The jobbers complain that the farmers are expecting too much for their butter. They say that the prices asked here are far in advance of those quoted elsewhere. Eggs are in good supply with a fair demand, the price holding firm at eighteen cents.

### News From the Coast

Cash System Coming in Vancouver and Saskatoon—Edmonton Trying to Secure Better Freight Rates.

#### VANCOUVER.

June 13.—Mexican tomatoes are on the market here for the first time, being an outcome of the trade now being established between British Columbia and Mexico. The vegetable is of fine quality, of good shape and size, with a remarkably smooth skin. They seem rather better than the local varieties in both shape and all-round quality, and also in price, being a cent or two cheaper. They job at about 19c when figured down to actual weight per crate, as against about 21c for the hothouse locals.

Richard Hall, of Point Comfort, Mayne Island, midway between Vancouver and Victoria, in the Gulf of Georgia, is the pioneer of the tomatoraising industry in that part of the province. He has two large glass houses erected, each 130 feet long, and expects in a couple of weeks to take off his first crop. Other farmers on the island have followed Mr. Hall's example, but are planting in the open air. The market is a good one close at hand, and the venture should be profitable. The seed was obtained hy Mr. Hall from Jersey, England.

Warm weather has started in with a rush this week, and strawberries and ther small fruit which require the leat for ripening, are coming along apidly. Although the season is late, the berries will come along in the natural order of sequence, though with ontinued heat. the season may be somewhat shortened.

The only adverse report obtained from rmers in the lower part of the Fraser ver delta is regarding the potato crophis will suffer as a result of the large amount of rain which fell in some sections last month. The seed rotted, and there are instances of where a second planting was put in. The acreage devoted to potatoes in the delta this year is the largest yet, but this extra extent will be about offset by the delay to growth. Cherries will be a large crop, in fact everything has set well, with the exception, perhaps, of prunes, which does not promise to be heavy.

E. W. Leeson, wholesaler. of this city, has returned from Prince Rupert, where he went to look for a business opening. If facilities can be acquired there that will permit the handling of fruit and produce, he will open a branch, but it is doubtful if he can secure what he needs. There is only one wharf there, and under present conditions it is not likely that any part of it will be leased by the G.T.P., for the company will need it for its own business.

The cash system of doing business, or at least, the curtailment of credit is fast obtaining in the various lines of trade on the coast. Following the action of the merchants, P. Burns & Co. has announced to their customers that all accounts must be paid by the 20th of the month. This firm has a large number of meat shops in towns of British Columbia, and this rule will go into effect in all of them.

The growing of flax, which is to be undertaken by the Lillooet Flax Company will mark a step forward in British Columbia's industries. This company, the manager of which is A. Bauthier has secured a large tract of bottom land back of Port Haney, thirty miles from Vancouver, and will reclaim i^t the operations having already commenced. After the flax is ready, it is proposed to manufacture linen, and the various by-products, such as linseed oil, etc. Mr. Bauthier, who is an experienced hand thinks that nowhere are conditions for flax-growing better than here.

than here. Charles Woodward, head of the Woodward departmental stores, left this week on a trip to Europe to make purchases, He will be accompanied to Montreal by his daughters, Mrs. Fisher and Miss Woodward, where the latter will await his return from England.

The Okanagan Flour Mills Co., at Armstrong, which has been in liquidation, last week ratified an agreement whereby the property and assets of the company are sold to Donald Matheson, Donald Graham, Mark Hill, Thos. Clinton and George Parkinson, for the sum of \$35,000. The purchasers assume all obligations, and agree to discharge the outstanding liabilities of the company, both before and after liquidation.

On Tuesday evening a destructive fire took place at the factory of the Empress Manufacturing Company. This company manufactures jam, etc., and has a large trade in the west. The fire started in the engine room, between 6.30 and 7 in the evening, and the extract plant was totally destroyed. The coffee and jam plants escaped. The loss is estimated at \$50,000 or \$60,000 damage. with \$30,000 insurance. The company is to be commended on its enterprise, for the next morning work was commenced and it is expected that only a week or ten days will elapse before business is resumed to meet current demand. The Commercial Travelers' Conven-

The Commercial Travelers' Convention, which was held in Vancouver last week, will mean much to the Canadian West, both from a commercial and social point of view. Fortunately the weather was ideal and every arrangement was carried out. The visiting drummers were able to see what a commercial centre this city is, and were able to appreciate the hearty reception tendered them by the Canadian people. To the local committee all praise is due, for they spared no effort or expense to make the convention a success, and the visit of the outsiders a pleasant one. That they were thoroughly successful is shown by the enthusiastic way in which the whole affair passed off and the generous entertainment accorded will not be lost.

#### SASKATOON.

June 12 .- The state of the grocery business is very satisfactory at present. There is room for improvement, however, in cutting down goods given on time as payments are slow, but the tendeney is towards a cash trade all the time. Two or three of the leading grocers in town who run departmental stores, have schemes on foot by which they give each customer a coupon for each dollar's worth of goods purchased. At a certain time drawings will be held and prizes awarded to the lucky coupon holders. This induces many to pay cash who would otherwise not.

Saskatoon is to have a wholesale distributing warehouse all to itself in a few months' time. Last year the A. Macdonald Co., of Winnipeg, opened a branch warehouse here, and the business handled by it has so increased that the company has decided to erect a large brick and stone building which will meet the needs of the trade for some time to come. A.

Macdonald, president of the company, was in town a few days ago, and pur-chased a site for the building on First Avenue.

Farmers are now well pleased at the prospects for a bumper crop this year. The rain of the last few days has produced a rapid growth throughout this district. Last year's wheat is being disposed of as rapidly as circumstances will allow, as the market is dropping all the time. The Saskatoon Milling Co. report an average delivery each day.

Freeman & Co. have sold out their grocery business on Twentieth Street, and have gone to Keppel, Sask., where they intend carrying on a similar trade. H. S. Hughes has also disposed of his business.

### EDMONTON.

June 15.-W. B. Lanigan, general freight agent for the C.P.R. Western lines, while in the city last week, met a number of the members of the wholesale section of the Board of Trade to discuss with them the question of a reduction in the freight rates prevailing on freight below 100 pounds going out of Edmonton on the C.P.R. Up to the present time this rate has been higher than a freight slightly over 100 pounds. This worked a hardship both on the Edmonton manufacturer or wholesaler and also on the small retailer in the Edmonton district. The Edmonton shippers wished to get the same rate on small freight as on large consignments out of Edmonton. Mr. Lanigan promised to consider the matter and see if something could not be done to improve the freight rates on small shipments.

A factory for the manufacture of candies, aerated waters, vinegar, pickles and sauces may be established in the city this summer by a company of local men if the city council decide to give them reasonable concessions. At the last meeting of the city council J. K. Mc-Donald, on behalf of this company, made application for a site for the factory, and other concessions. He stated that an arrangement whereby the company might lease a site for three years at six per cent., with the option of purchase at the end of that time, would prove satisfactory.

It is expected that the exterior of the new Griffith packing plant will be completed this week, when work on the interior will be pushed with all possible speed. It is understood that several carloads of machinery are now on the way and will reach Edmonton in a few weeks' time. A great many changes have been made in the plans as originally designed, the object of this being to secure a plant of the most modern type possible. It is expected that packing will be begun some time through the fall, probably as early as October.

### Interesting Ontario Items

#### Ottawa is Making Large Preparations for Fall Pure Food Show-Toronto Grocers' Association Planning for Picnic -Strawberries Plentiful Everywhere.

#### CHATHAM.

June 15.-The rains of Saturday and Sunday meant hundreds, probably thousands, of dollars to strawberry growers in the western peninsula. The outlook for the crop at the opening of the season was excellent, but the continued drought had its inevitable effect upon the vines. Early last week the first home grown berries sold for 20c. a box. On Thursday they were down to 10c. Saturday saw the price, in response to the expected falling off of the crop, rise to 15c. Saturday night brought heavy rain, however, and prices are now down to 10c. again, with a still further fall in prospect. High prices are good the growers-but not much good when there are no strawberries.

An addition to the Kent Canning works, 1¹/₂ storeys high and 40 x 76 feet is to be built shortly.

This week a party of Chathamites leave for the Old Country, among their number being Mr. and Mrs. John Mc-Corvie. They will probably be abroad

a month or more. J. A. Muckle, who has been a member of the staff of the Bradley store here

of the staff of the Bradley store here since its inception over a year ago, left to-day for Windsor to accept a position in W. J. Cherney's grocery. Chatham's second 5, 10, 15-cent store was opened on Saturday. S. H. Knox & Company have followed closely on the heels of Brewster & Co., and keen rival-

ry is anticipated between the two concerns. The grocery trade is little affected, however.

There was no quorum at the Retail Merchants' meeting last Tuesday evening, the members having apparently failed to recover from the shock of the elections. A special meeting will prob-ably be called in the near future to discuss house numbering, and the city tele-phone franchise. Merchants strongly rephone framenise. Merchants strongly to alize the assistance which systematic house numbering would mean in the matter of deliveries. The Bell Telephone franchise expires this year, and there is talk of competition from independent lines. The consensus of opinion among retailers is that there is much room for improvement in the local system. The establishment in this city during

the past year of several bottled milk dairies has created a more or less lucrative side line for grocers, particularly those on the side streets. These grocers handle the bottled milk, some of them quite extensively. Many householders do quite extensively. Many householders do not take ice during the summer months and these prefer to take their milk when they want it from the corner grocer, who keeps it fresh and cool in his re-frigerator. Quite a number of customers have left the dairies and are now taking through the grocers. Up till about a vear ago milk was usually sold from big cans, but the bottle innovation has proven very popular. proven very popular.

On June 5, the marriage took place at the residence of Mr. and Mrs. Hugh Collins, Raleigh Street, of their eldest daughter, Miss Nettie Collins, to Chas. Gonyou of the Pere Marquette. Miss Col-lins was formerly a valued member of John McCorvie & Son's grocery staff, and among the many presents were a couple of beautiful oil paintings from that firm. that firm.

Mr. Lidden, of Inwood, has purchased Harry Chambers' meat shop, Bothwell.

Peter Mitgis, the peanut vendor, who makes his business home on King St., is the possessor of a new rubber-tired outfit, containing 3 compartments and

an engine for roasting. Ridgetown parties have purchased the hall at Cedar Springs, and intend open-ing a general store in the near future.

#### OTTAWA.

One of the busy retail centres in On-tario is Ottawa. Here the grocers have their business on a firm basis and they find time to get a surprising amount of work into their day and yet manage to enjoy themselves after hours. Travelers like to strike Ottawa about as well as any town in Canada, for the grocers there always have a glad hand and there always have a glad hand and a cheery word for the man with the grip. This is not saying that grocers in other towns are not just as cordialbut there are so many good fellows in the Capital that the feeling of good fellowship seems more pronounced.

Just to keep themselves bright, the members of the Ottawa Retail Grocers' Association have undertaken to run a pure food fair in connection with the Central Canada Exhibition, which takes place in September. That it will be a splendid success is

a foregone conclusion. Every man is working for it and their efforts are bound to be crowned with satisfactory pleted building at the fair grounds in Lansdowne Park has been placed at their disposal and already more than half the space available has been sold.

The retailers have a good argument to use in talking to possible exhibitors in that the fair always draws thousands of people from all around Ottawa, which swells the attendance at the exhibition wonderfully. Last year fully one hun-dred thousand people visited Lansdowne Park.

Park. It is more than likely, when all arrangements are made, that the display of food products this fall will be better than anything of the kind ever seen in Ottawa. President W. York, Duncan Bell and H. V. Ellis have been appoint-ed delegates of the association to the convention of the Ontario Retail Mer-chants' Association taking place in

chants' Association, taking place in Galt this week. J. C. Tully, paper and twines, has re-moved from Market Square to 14 Nicholas St., where he is in more commodious quarters.

Maclure & Langley, Toronto, who have become over-crowded in their premises at 154 Pearl Street, are removing this week to the offices and warehouse formerly occupied by the Blue Ribbon Tea Co., at 12 Front Street East. The change will place them a good deal nearer the centre of the wholesale section, and will also afford needed addi-tional warehouse space.

### BUSINESS LESSONS FROM A POLI-TICAL DEFEAT.

The recent election in Ontario is not without its object lesson to business men. The Whitney Administration was on the whole a satisfactory one. It certainly did better than its political opponents had declared it would. But it was not without its faults. No political administration ever was without them.

But the Opposition Party in the Legislature did not take advantage of the opportunities which the faults of the Government created. It did not wake up to the opportunities which even the "last awful week" afforded until after the House had adjourned and some of the newspapers began to stick editorial pins into them.

Possibly they were meditating on the tradition of the Liberal Party and hoped that would carry them through. But great as is the tradition of the Liberal Party, and valuable as has been its service to the country, it is as little likely to carry a party into power as political oratory is to inflate a balloon.

Business is not politics. But business men, as well as politicians, must grasp their opportunities if they are to win. Opportunities, as the ancient Greeks typified in their statues, must be grasped as they appear, not as they disappear. Neither will tradition alone serve. To have a good and a long record in business is not to be scoffed at. But it is the methods of to-day, not the acts of yesterday, that are the determining factors of present success.

The Liberal Party in the Ontario Legislature made the fatal mistake of getting busy at the eleventh hour and when opportunity had turned the corner, whereas it should have got busy immediately after the avalanche of January. 1905. Their opponents, on the other hand, never slept.

Business men should be busy all the time, not in doing things fitfully and without method, but with order, method and continuity.

Eleventh hour conversions may be effectual. But there is not much saving grace in eleventh hour developments of energy in either politics or business.

Trade is at present passing through a period of quietness. It does not follow, however, that business should be allowed to drift. On the contrary, there is every reason why it should be pushed.

If advertising, acumen, industry and up-to-date business methods possess utility for manufacturers, wholesalers and retailers they should certainly possess it when trade lags and needs the impetus which these things are supposed to impart.

Do not wait for a more convenient season or, Micawber-like, until something turns up, but "do it now and do it all the time."

The business men who keep their advertisements, their window displays, and their ideas working continuously will be found far in advance of their competitors when trade wakes up. And it is certainly showing signs of awakening.

### THE NEW CANNED GOODS PRICES.

With the somewhat peculiar conditions existing in the canning industry in Canada at present the new prices for 1908 pack goods, which have been expected from the Canadian Canners for several weeks, were awaited with a good deal of interest and in certain quarters even some anxiety has been manifest.

It was practically certain that with the prospects for excellent crops in all lines of fruits and vegetables considerable reduction would be made and this was verified when the new prices came to the trade by means of an advance sheet early in the week. Peas at 75c, with the old price 921/2c, corn at 85c, old price 971/2c, and tomatoes at 95c, old price 1271/2c, furnish an idea of the amount of the drop, and this is practically general throughout vegetables, and, with a few exceptions, in fruits.

Considering the prospects for bumper erops, large pack and consequent large business the prices on most lines seem to be fair and about what was expected. Tomatoes, without doubt, furnish the greatest surprise. Taking into account the 10 per cent. trade discount and the freight charges which must be paid by the packer, the price is low, and members of the trade express the idea that very little, if any, money will be made on these goods at this price.

When it is considered that a large part of the pack of the independent canners is tomatoes, this price is regarded in some quarters as a direct slap at the independents. What course they will take as a result is a matter of interesting inquiry.

While the euriosity of the trade is satisfied to some extent by the announcement of the new prices, there yet remains an element of interest as to how the situation will work out. It is said that large stocks of last year's pack are still held in different parts of Canada. The canners will have to provide for covering the difference in prices, and this will be no inconsiderable item.

The situation at present presents opportunities for manipulation which might put the industry in a peculiar position so far as the canners are concerned. It is scarcely likely that these will be taken advantage of, but there is the possibility just the same.

In the meantime the retail trade, and, in most cases, also, the jobbers, looks on and bides its time. So far as can be learned, little buying has as yet been done on the new basis.

### AN OBLIGING (?) CUSTOMER.

A retailer in a Western Ontario town was recently pressed for money. He in turn began to press his customers, some of whom were considerably in arrears. One of his customers whom he approached was a wealthy farmer who owed him \$80.

"I wish," he said, "that you would pay me the account you owe me. It is owing nearly a year and I am very much in need of money."

"I can't pay it now," replied the farmer.

"Why, you have money in the bank," persisted the retailer.

"Yes, I know I have, but it is earning interest and I can't afford to lose the interest just now. Why don't you borrow? Why, I will lend you money if you want it, at 6 per cent."

The conclusion of the matter was that the farmer lent the retailer \$80 at 6 per cent., but would not pay his account. This is surely a new type of high finance.

### THE SITUATION IN THE WEST

The Western Viewpoint, by our Special Winnipeg Correspondent.

Your correspondent has been playing hooky for the past two weeks but perhaps your readers have not lost anything thereby for the trip was over nearly 500 miles of territory in the northwestern part of Manitoba and Saskatchewan, and, as seeing is believing it is possible to speak with authority concerning at least a goodly portion of the crop areas of the West. Anything more beautiful or promising than the country at the present time would be difficult to imagine. One man who has spent 35 years on a western farm remarked that it would be difficult to imagine any day of the present crop season that could have been improved upon. It is not only that the growth has been rapid, but the plants are well stooled and particularly vigorous and healthy.

Estimates of acreage continue to come in from different sources. One of the most carefully prepared is that of Secretary Fowler, of the Northwest Grain Dealers Association. This estimate places the wheat area at 5,767,000, a gain of 15 per cent.; oats at 2,607,000, a gain of 10 per cent.; barley at 855,-650, a gain of 9 per cent; and flax at 123,420, a gain of 2 per cent. There is really only one exception to be taken to these figures and that is, that the area of wheat is too small. The gain is fully 20 per cent. which would run the acreage over the 6,000,000 mark. It is, of course, far too early to begin to estimate yields, but it may not be out of place to remark that the average of the last ten years in the Canadian West had been nearly 19 bushels to the acre and should 1908 mark up to the average it would mean a crop of 114,000,000 bushels. The West may not reap half that amount but one thing is certain, the present will be a hard crop to kill, owing to the extremely favorable conditions under which it has been planted and the fine growing weather that has obtained since seed time.

The wheat market has been materially affected by the promise of bountiful crops, not only in the Canadian West, but also in the winter wheat belts and there has been a serious decline in the past two weeks, with small recoveries from time to time. The lower prices have increased the export trade materially and one or two firms have cleaned up pretty well the last of the low grade wheats and report an improved demand for higher grades, but following the plan of the whole season the moment wheat reacts to high levels there is a falling off in the British demand. There has been the expected increase in receipts now that seeding is over but it is not

expected to last and at the outside the crop of 1907 will not run over 67,000,000 bushels, which is however, some 5,000,-000 better than was at one time expected, and the bulk of this was marketed at profitable prices.

All thought and attention now is turned toward new wheat, but the oat crop of 1907 is still to be heard from and it is expected that there will be some sensational fireworks at the end of June. One house has been trying to work a corner, a large percentage of their holdings have been bought at very high figures and still the oats continue to come and it seemed hardly possible with the present poor consumptive demand that anything but a fiaseo can attend the closing of the corner.

There is a marked improvement in the business situation in the city, although money is still tight. The letting of the contract for the new Union Depot and the street improvements that are being rushed by the city before exhibition time are absorbing a number of the unemployed and the whole situation is better than it has been for some weeks.

The fact that the crop has such a good start is encouraging country merchants to make preparations for increased business and this again is reflected in the wholesale houses. Wholesale hardware houses, who felt the tight times more than either grocery or dry goods, report that May business was up to that of the same month last year, which was an exceptionally heavy one. Stocks in the country, for the reasons above, have been allowed to run low and though there is little doing in earlot orders even now there is a steady and increasing trade in less than car lots. Trade, too, is much more on a cash basis in the hardware lines than it was before the stringency occurred and this is certainly a most satisfactory state of things. The fact is, the farmers of the Canadian West have met their obligations in such a way on the short crop of last year that business men have come to realize that there is very considerable accumulated wealth in the older settled districts and it will take something much more disastrous than one partial failure of crop to really cripple the West. The stringency, however, has had the effect of making farmers realize their position and the need of paying up store bills about which they were inclined to be careless when money was plenty and credit good.

June is supposed to be the special property of brides and even wedding presents point which way the wind blows. Chatting with the large stores in Winnipeg the other day it was learned that trade in articles that are looked upon almost exclusively as wedding presents such as silver, cut glass, hammered brass and costly china pieces has been fully 30 per cent. better than it was for June, 1907. Managers report that there has been perhaps a falling off in the number of larger and very expensive presents but an increase in the number of small and choice articles, for example, the cut glass running from \$5 to \$20, and that this trade has been almost exclusively eash.

So far as Winnipeg is concerned, June has been a month of meetings of all kinds, in fact, there has been a perfect epidemic, the Presbyterian General Assembly with its 400 commissioners, the Methodist Conference for the Province. the Anglican Synod, the Women's Missionary Conventions, and the Grand Lodge of the Masonic order are just a few of the things that have brought visitors to the city in hundreds this month. And truly, the visitors would go far to find a city looking more beautiful than Winnipeg does this year. Boulevards and trees are alike, a riot of green and early as it is the caragena hedges are a mass of yellow bloom and the tree honeysuckle and lilacs are all out in full bloom.

In connection with things to eat in the West a matter of interest is the formation of an association of the B.C. fruit growers that takes in 85 per cent. of all the growers. A determined effort is being made to capture the Winnipeg market for all the fruit they can possibly send and John Coltart has just returned from that province, having been appointed the Winnipeg representative. To him all the fruit of this association will be shipped so that it will be possible for the future to keep better tab on it and note as to the improvements in packing. Hood River strawberries have always been first favorites here and the B.C. people have succeeded in growing the variety in certain parts of that province and have secured one of the packers from Hood River to superintend the packing in B.C. this season. It is expected that 20 cars of B.C. strawberries will reach the Winnipeg market in the course of the next few weeks. The few that have already arrived are of excellent quality and have come forward in good condition. The B.C. fruit is noted for its depth of color as well as for the richness of flavor.

A feature of the present year will be the erection of buildings on farms. There has been a very marked drop in the price of lumber and already farmers who have refrained from building for some years owing to the extreme cost are laying their plans to erect new barns and stables between having and harvest. The city of Winnipeg is reconsidering its adjustable contract that permitted of the purchase from one firm of not less than 2,000,000 feet and up to 5,000.-000 feet on prices based on the old market. About 2,000,000 has been used on this contract and the city fathers are figuring whether it would not be money in pocket to pay something to forfeit the contract and make a new deal at the new prices.

The whole western situation is one to inspire confidence.-H.

B.C. this

Province,

Sugar-Steady. Teas-New Japan on spot. Beans-Very stiff.

SUGAR-Sugar remains steady, the SUGAR-Sugar remains steady, the demand during the week being a triffe better than the previous week. The de-pression is affecting the market, owing to the smaller orders coming from the factories using sugar. The household use of this commodity has not fallen off very appreciably. It is thought that the primary markets will remain fairly constant for some time constant for some time.

SYRUPS AND MOLASSES-There has been a fair local demand for immediate wants, making the last week brighter for this trade than the previous week. Cables regarding the Barbadoes and Porto Rican product contain no startling intelligence and seem to indi-cate steadiness in the primary markets.

TEAS-Fine Japans are now on the TEAS—Fine Japans are now on the spot. These show good values as they were purchased and shipped before the market advanced. On May 16 heavy frost damaged high grade teas and now lines above 22c and 23c are hard to get. Latest cable reports indicate a rising Japan market. Present quotations are above last year's and there is every in-dication that it will remain so for some time. Cevion and genrowders have been time. Ceylon and gunpowders have been in good demand during past week. No change in prices this week.

DRIED FRUITS-The past week has been marked by a decided dulness in all lines except currants which have been in very good demand, and sultana raisins. Other lines of raisins have been neglect-ed. Cable reports from Greece indicate a good crop this year, therefore buyers are holding off for lower prices. Prunes have shown no activity during the week due, perhaps, to high prices.

BEANS—The high price of beans has stopped large trading partially. At pre-sent the west is offering nothing. Aus-trian beans are being quoted at \$2.10 per bushel. Native beans are still very high. There has been no change in the price which has made the demand shall. Choice prime beans..... 2 0 25

EVAPORATED APPLES-Demand is fairly good in this line and the price remains the same.

Evaporated apples ..... 0 07 9 07

### CANNED GOODS

Prices on 1908 pack goods for On-tario and Quebee issued this week by the Canadian Canners, show, as was generally expected, considerable reduction in almost every line. The prices quoted herewith are taken from an advance sheet, as up to the time of going to press the official printed prices have not been issued. The correctness of the prices given is not vouched for, but so far as can be ascertained up to the time of going to press they may be relied on. The list of prices on 1907 pack goods is also given for purposes of comparison.

Canned Goods-Prices for 1908 pack out.

Sugar—Steady. Beans—Very firm. Collections—Fair.

### Toronto, June 18, 1908.

Interest in grocery circles this week centres on the Canadian Canners' new prices for 1908 canned goods, a provisional list of which was furnished to a number of the jobbers on Monday. With tomatoes at 95c, corn at 85c and peas at 75c, the prices seem to be about what the trade was expecting after the talk there has been for several weeks concerning the matter. Some surprise is evidenced at the price of tomatoes, but various causes are quoted as contributing to this figure. Jobbers seem to be pretty well satisfied. Local retailers, who might be expected to get busy under the announcement, are generally holding off, and seem to be willing to pursue a waiting policy in the belief that something further may occur before the summer is over.

Business generally continues fair, though none of the wholesale houses have been rushed. The situation, however, seems to be gradually clearing up and the expectation expressed is that the good crops promised everywhere in the country this summer will bring along good business.

SUGAR-The local market is quiet and retailers seem to be pursuing the same hand to mouth policy in buying that is evident in most other commodities.

The general situation has not changed materially during the week, beyond a slight strengthening. The trend of all markets is slowly upwards, and all indications point to a continuance of this.

Heavy rains are reported in Cuba and the crop is practically ended, the remainder to come in sight cannot vary much from 25,000 tons, any additions held on estates should go to local consumption to end of year. The stock of 177,411 tons in Cuba for

the U.S. to draw from for six months

to come looks very small and points to large possibilities of sales from Europe and Java.

TEA-Business locally continues very quiet, and all buying is of the hand to mouth variety. Little interest is manifest among the jobbers. This statement is born out by a paragraph from Geo. Wilson-Stanton's latest London circular, which says:

"The quantity of Indian and Cevlon tea taken by the United States and Canada from the 1st January to 31st March, shows a considerable reduction, when compared with the corresponding period of last year. This falling off is shared in almost equal proportion by the two countries of production."

The situation in general continues pretty regular, though by last London reports a better tone is noticed in all the finer and more useful liquoring teas. An irregularity here and there is noted in common teas, but, generally, they hold up to regular quotations.

DRIED FRUITS - Currants and prunes are in fairly good demand, otherwise business is only ordinary. There is nothing new to report.

SPICES-Business is fair at steady prices.

PLANNING FOR ANNUAL PICNIC.

### Toronto Retail Grocers Complete Arrangements at Their Monthly Meeting.

June 17.-The question of the annual picnic, slated this year for Wednesday, July 15, is taking up most of the at-tention of the Toronto Retail Grocers' Association just now, and it was principally this outing that was talked about at their regular monthly meeting in their rooms in the Temple Building on Monday night.

And it surely is going to be a big and merry outing. At last meeting a committee was appointed to complete ar-rangements for the entertainment of the excursionists in Buffalo. This committee, Ben Panter and B. Snow, re-ported that arrangements were going forward swimmingly. Special rates have been secured for meals at Statler's, the big restaurant, and the Toronto people taking in the excursion will be given an automobile trip through Buffalo's most interesting sections for a small sum beyond the excursion ticket. All around, the day's programme promises to be most enjoyable. Some attractive posters are to be issued shortly, advertising the event, and even a larger crowd than usual is expected. Several of the local wholesale houses have signified their intention of donating souvenirs for the occasion and the probability is that the excursionists will be pretty well tagged by the time they get to Buffalo. After the business of the picnic was

disposed of, trade matters in general were discussed in the jocular way cus-tomary to these jolly fellows in the as-sociation. Particular reference was made in regard to the new scale of prices isby the canners and the general opinion expresseh was that they should go light on the buying end to see how matters would develop during the summer. No action, however, was taken. The meeting was even a less informal one than usual on Monday evening and broke up even a little earlier.

Something doing in canned goods this year has been the slogan of a number of the grocer's correspondents, and it has started. Canned corn at 5c. a tin is one special noticed in Guelph and to-day the prices for the season are out and right now on the start get the brand you grant and also see that it is brand you want and also see that it is the brand, and no monkey shining.

### MANITOBA MARKETS

(Market quotations corrected by telegraph up to 9 a.m. Thursday, June 18, 1908.)

### POINTERS-

New prices for 1908 pack tomatoes, corn, beans and peas. Cornmeal—Advanced.

White Beans-Advancing.

Butter-Local market weak and some-

what demoralized.

The local market is quiet and there are few changes of importance, the chief interest attaching to the announcement of prices of 1908 pack of four different vegetables. In every case these show a marked reduction from prices obtaining for 1907 pack and the indications seem to point to lower prices for most lines of canned vegetables and fruits.

Business is fairly active, but, as has been the case for some months, the trade are still disposed to hold off until the 1908 crop is absolutely assured. Prospects were never brighter at this time of the year, and there is an optimistic spirit abroad which cannot fail very soon to have a quickening effect on busi-ness enterprise. Wholesale houses reness enterprise. Wholesale houses re-port collections being promptly met in nearly all sections and while business is not overly active, it is in healthy condition.

CANNED GOODS-As noted above, new prices have been announced for the 1908 pack of tomatoes, corn, beans and peas. These will be ready for delivery by October at latest. The trade wel-comes a return to lower prices, as the high figures obtaining during the last high figures obtaining during the last year have checked consumption. Quotations are

### THE EGG'S FOOD VALUE.

Apart 'from its convenience to the Apart from its convenience to the housekeeper pressed for time, the egg has a distinctive food value which should make it part of the daily menu for every family. A given weight of egg contains more nourishment than three and a half times its weight in milk and about half its weight in good fat meat. The yolk of an egg is more nourishing than the white, as it contains much less water and a large percentage of fat, of

water and a large percentage of fat, of which the white has none.

While the greatest nourishment is to While the greatest nourishment is to be had in the raw egg, says the Wash-ington Post, it sometimes proves quite indigestible. Many persons are made bilious by eating eggs in any form. This is sometimes counteracted by mixing the egg with a little acid, as orange juice or lemon when used raw, and by edding the tipiest piech of sock in cook adding the tiniest pinch of soda in cook ing.

Many persons who cannot eat a soft boiled egg can digest readily one that is cooked for half an hour, though the usual belief is that this is the most in digestible form.

digestible form. A light, well made omelet is probably the most easily digested of all cooked eggs, which is unfortunate, as it i-about the hardest way to prepare them. The idea that one cannot eat eggs i-often but a notion, as has been proved time and again when an egg and milk diet is ordered. Occasionally they make one quite ill, in which case the prescrib-ing physician can always give a correct-ive.—New York Commercial.

### EFFECTIVE WINDOW DRESSING

### Soap Displays in a North Toronto Grocery-The Window as an Advertising Medium.

During the past couple of months gro-cery stores in Montreal, Toronto, and throughout Ontario and Quebec have throughout Ontario and Quebec have been displaying attractive windows more or less similar to the one shown in the engraving on this page. The displays have been well worked up and have il-lustrated several of the points of ideal window dressing. The windows here il-lustrated appeared in J. A. Hopkins' store at the corner of Main and Dover-court Road, one of Toronto's most modern groceries, recently, and attract-ed a good deal of attention. W. D. Wilmott, of the MacLaren Cheese Co., Toronto, who dressed this window, and also the others which have

the window dresser, might be mention-ed. In showing one article they leave an impression which would not be made by a number of different articles. It is often advisable to dress a window occasional-ly with one line of goods, particularly if the goods shown are something special, or something which it is desired to run off quickly. Again, the windows are not crowded. Just enough material has been used to fill the window and to tell the story of the goods without giv-ing an impression of overcrowding. The windows too, with the lithographed posters and border are attractive enough to cause a second glance from a passerby.

time the window is dressed, and of dressing the windows often, is we known by us all.-Maritime Merchant. is well

### WINDOW DRESSING SUGGESTIONS

The desire for possession is one of the strongest human characteristics. The man or woman who sees a good article tastily put on view, if it is seasonable and suited to their needs, will long to own it. They may purchase it at once, or make a mental note of the store and return later. The man who can exhibit goods so that those who see them want them for their own, is the man who becomes a successful window trimmer and who draws trade to his establishment. Display seasonable goods, for which there is a demand or soon will be. Set your goods in attractive sur-

ATTRACTIVE WINDOWS FROM A NORTH TORONTO GROCERY.

been placed in the city, gives the following details as to its construction : "The window consists of a border of

"The window consists of a border of Brownies dancing on a clothes line, which entirely encircles the window. On the bottom of the window is placed a facsimile of the soap wrapper and the background is filled in with cartons re-presenting piles of "Surprise" soap. The prevailing colors are yellow and red, although posters with a yellow, red and blue combination are employed to advantage. Premium books and cutto advantage. Premium books and cut-outs are also used to fill in bare spaces, and the piles of cartons can be varied to suit the requirements and size of the window."

One or two of the best points about these windows, from the standpoint of

### THE WINDOW DRESSER'S IMAGINATION.

Imagination is a principal ingredient in the successful window dresser's composition. The man who has this gift can cultivate it to a great extent and must do so if he is to be successful in his work

Imitation, too, comes in to good ad-vantage, for after a man has copied well the efforts of others, and perhaps tried to improve on them, he will find himself able to think out schemes of his own. If you have imagination and a developed power of imitation, you well will be able to always bring out some-thing novel in your trims. The import-ance of making a complete change every

roundings. A beautiful easy chair, marked with a low price, but shown in the middle of a meadow, would not tempt anyone to buy it. But place the chair, marked with the same price, in a cosy corner, beside a grate fire, with pipe racks on the wall, and a table with magazines, or work-box, close at hand, and that chair will possess attractions on a fall and winter day which many a man or woman will find it impossible to resist.

T. Locke, of Foley, Locke & Larson, Winnipeg, was calling on the trade in Toronto this week.

# CHEAP TEAS

### "Quality worse than we have seen for years"

Extract from the May Circular of Messrs. Kearley & Tonge Ltd., Colombo-

"The estimated shipments for May are placed at twelve million lbs., most of which will be teas of poor quality, for at the time of issue, arrivals, particularly from the Low-country estates, are worse in quality than we have seen for some years."

Extracts from letters received from Messrs. Rodewald & Heath, Colombo, May 7th.

"Now quality is terrible and we have therefore not bought anything since No. 95."

May 14th — "Quality is again worse, many teas from low and medium elevations being quite sour, and we cannot see our way to recommend anything."

Since these letters were written the market for low grade teas has declined about a ha'penny. Is it any wonder? Since I have been in business I have never had such bad reports from Ceylon.

Now I know that efforts are being made to force as much as possible of this tea into Canada. Samples of this trash are already being shown. I am writing this as a note of warning, so any who are tempted by low prices (and most of us are) will do well to test the teas very carefully, not only from samples but when the teas arrive as these very poor teas which may appear sound on arrival may quickly turn sour and prove a total loss.

### Branches :- TORONTO, 3 Wellington E. WINNIPEG, 315 William Ave.

### T. H. ESTABROOKS ST. JOHN, N.B.

P.S.—My customers know that every pound of Red Rose Tea in packages and Estabrooks' Blends, both Black and Green, in bulk, are guaranteed fully up to the high standards of quality and are always returnable at full price if in any way unsatisfactory, and it occurs to me that this is worth stating again here as with so much bad tea likely to be on the market many more merchants may wish to avail themselves of our guarantee, and save themselves any worry.

### CHEESE AND BUTTER BULLETIN

Montreal, June 18. It was observed some time ago that the consumption of cheese in England was falling off. At first the Canadian shippers' were somewhat skeptical regarding such a condition but substantiative evidence has arrived in this country which goes to prove that such is really the condition existing in England.

Grocer

i are rices

ot so

RT

ON

IMITED

The Englishman is very constant in his tastes and distates and cheese has always been one of the foundation stones of England's dietetary programme.

Exporters here have been paying. be bought in England. With not any too roseate an outlook for the future there is the comforting assurance that the other sources of cheese in England will fall off somewhat before long. Although the demand is not very large at present when a shortage prevails it is expected the Canadian shippers will get a chance if their supply is equal to the demand and they may be in a position to dictate prices. Up to the present time the receipts of cheese have been disappointing which is due primarily to a shortage of the milk supply. By this it must not be taken that each individual. cow is not doing its duty, but there is a decided shortage of cows. With all these disadvantages it is fair to say that the yield according to the means available will be ahead of last year. The attractive prices which the Australian and New Zealand houses are offering is diverting attention from the Canadian product. Advices from the Old Country report small stocks. So a little preparation and waiting by Canadian shippers may result. In view of the above outlook, which is rather on the optimistic side, the words of a gentleman recently arrived from England sound decidedly pessimistic when he states that "the slory of the cheese trade in Canada has parted and that it has seen its best days, " This gentleman claims that the w Zealand exporters were getting the hast of the market owing to closer application to the English requirements. While perhaps this may be a too pessinistic view of the situation it may be sid with perfect certainty that the Antipodean exporters would become a very ious menace to the Canadian trade if certain degree of carelessness of the glish requirements which has crept to the Canadian trade were not elimind. One peculiar incident in the cheese tade may be noted and that is, the loss 1,800 boxes which were going to the Figlish, without affecting the market in the slightest degree. This fact goes

to show that the supplies in England must have been ample and it is also significant that Canada so far has shipped very little, therefore, New Zealand is keeping her so well supplied that large amounts can disappear indiscriminately without affecting the market. This fact certainly contains a warning to the Canadian shippers. Shipments of cheese from Montreal during the last week were 52,881 boxes as compared with 44,555 boxes for the previous week and 73 279 boxes for the corresponding week of last year.

The butter market has been rather featureless during the week with the exception of the fact that a large order from England arrived which immediately advanced the market  $\frac{1}{4}c$  to  $\frac{1}{2}c$  and put the market beyond any export business. This condition of affairs is unfortunate because this immediate stiffening of prices will drive the English buyers off instead of cultivating the English market. Prices range around 224e to 224e. Exports for the last week amounted to 1,874 packages as compared with 1,522 packages for the previous week. Total shipments since May 1, 3,396 packages as compared with 295 packages for corresponding period of last year. The above record certainly compares very favorably with last year and it seems regrettable this record cannot be maintained.

Receipts for the week ending June 13, 1908, were 18,956 packages against 15,424 packages for 1907 for the same week. For the year 1908 up to date, 56,039 packages as compared with 71.-939 packages for corresponding period of last year.

### THE PROVISION SITUATION

Toronto, June 17.

There is little new to report in the situation among Canadian packers this week. The British market is holding its own and exhibits no notable features. It still continues well stocked with Danish bacon and consequently offers no lively demand for the Canadian product. Last week Danish shipments aggregated 42,-000, which is about the average weekly deliveries. American shipments, too, were about as usual and in all mounted up to 12,000 boxes.

Under these conditions the Canadian packers have not kept very busy supplying the export demand. Some bacon has been going forward, of course, but the shipments have not been at all large.

Local demand, however, seems to be a little more brisk. Packers state that deliveries have been rather more free during the week under review and when it is known that prices offered are from 20 to 30 cents higher than a week ago, it will be seen that something is offering stimulation. Part of this may be accounted for by the fact that a higher American market is drawing off some of the goods which have been coming to this market. It is said, too, that the opening of the north shore district by means of the new C.P.R. line will mean considerable new business in provisions as heretofore shipping facilities to the districts were poor. This will reflect, of course, particularly to the benefit of Toronto packing houses.

Prices offered for hogs this week are \$6.10 f.o.b. and \$6.35 off cars at factory. Conditions prevalent in the American market are summarized in the following paragraph from the New York Journal of Commerce:

"The past week has witnessed quite a change in the speculative market for hog products. Receipts of hogs were a little lighter and prices higher, but not light, except at the centres where floods have blocked railway transportation. Kansas City being practically shut off. But there has been a great deal of bull talk in the air, notwithstanding stocks are still large and not decreasing to any extent and consumption is still small and not increasing. Shorts have been the chief buyers on the advance, after the packers started it, and the latter have been the chief sellers after it began, looking very much as if they have worked up this boom to sell futures, notwithstanding they are predicting lighter run of summer hogs. Cash demand certainly did not come in at the advance and it looks like a speculative movement, started by the packers and as they are the chief holders of the stock the conclusion is natural that they want to sell and they have been unable to do so.

As to the hog supply there is no evidence that it is likely to run lighter than usual, except that the average weight of hogs is falling off and has been for some time past, indicating premature marketing, as prices of hogs are high and should induce feeding. But corn is relatively higher than hogs and has been for months and this may, together with the Government's overestimate of corn back in farmers' hands, be suf-

### DAIRY PRODUCE AND PROVISIONS

ficient to cause this premature marketing."

### **PROVISION MARKETS** MONTREAL.

PROVISIONS-The provision market has been more active during the past week and some lines have eased off slightly, among them being hams, while other lines have gone forward a little. Lard in its various forms has advanced from 4c to 1c per lb. Other lines remain the same as at the last quotations.

 Fresh Creamery, solids 1
 0 221 0 221

 minimum pri t4, lb
 0 22; 0 23

 Dairy, tubs, lb.
 0 18 0 2

CHEESE-The price of cheese firmed up a little, going 1c higher during the week at the country boards. The receipts were considerably heavier during the last week than the week previous but were practically 10,000 boxes less than the corresponding week of last year.

HONEY-This market is very quiet but remains firm. Stocks are very light just at present but are sufficient to meet the feeble demand.

EGGS-Eggs are in good supply, ar-riving freely, the week's receipts being 11,200 cases against 9,060 cases for the same period last year. New laid eggs are

a little stronger in price owing to the amount going into storage. No. 2's remain at 14c to 141c.

### TORONTO.

PROVISIONS-A fair business is being done this week and one slightly improved over a week ago, though trading would be better were there a continued spell of warm weather. Fresh meat is now so high that consumption is very light, and provision men expect a demand for bacon lines in consequence, especially as prices compare so favorably with fresh meat lines. Lard has declined a quarter of a cent and hams are slightly firmer.

BUTTER-A speculative demand keeps up the price of all grades of butter, for the supply is more than sufficient to meet present and immediate demands. Last year money was to be made in butter because very little was made and less packed, so that retailers had to pay big prices during the winter and spring. This year the farmer is making butter and the retailer is buying direct and packing-each of them believing there will be just as much money to be made this year as last. The consequence is that butter that should be around 14c is selling for 19c. One thing is pretty certain, and that is, that prices will be lower during the coming winter than during the past.

	Per ID.
Oreamery prints	 0 21 0 23

" tubs	 0 17 0 18
Bakers' butter	 . 0 15 0 17

EGGS-A continued firm price rules the market this week. The supplies have declined somewhat and the quality is not up to past years. Some packing is being done, but the high prices prevailing are making dealers somewhat afraid. Retailers are not buying eggs direct, as they are butter, preferring to trade with a dealer who candles his eggs. Prices are expected to be easier before another week comes round.

Eggs, new laid ..... 0 171 0 18

CHEESE-Old lines are a little firmer. but speaking generally the market is rather light. New cheese is slightly easier and the offerings are increasing somewhat.

POULTRY A quiet market prevails and until the warm weather is over no great business will be done. Very little dressed fowl are offering, dealers preferring to handle live birds on account of the difficulty in keeping dead fowl. The quotations below are for live weight.

Spring chickens, per lb	0 25	0 30	
Hens per lb Ducks, per lb	0 12	0 10	
Turkeys, prr lb	0 11	0 13	

### WINNIPEG.

BUTTER-The local market is still in very unsatisfactory condition owing to cutting in creamery butter and oversupply of dairy. Produce buyers are offering 17c per lb. for No. 1 and 14c for No. 2 f.o.b. Winnipeg.

EGGS-Produce houses are still paying 15c per dozen f.o.b. Winnipeg.

### THE FLOUR AND CEREAL MARKETS

Flour Generally Dull, With No Brighter Outlook—Cereal Business Fair—Lower Prices Allow Larg er Export Business.

Continued large offerings of grain, with little demand have served to keep the markets dull in nearly all lines during the week. Farmers are taking advantage of the fine weather and a time when their summer's work is pressing them a little less heavily and are bringing in large quantities of grain. While prices offered for this are low, they seem quite ready to dispose of what grain they have. With the light local denand millers generally are not at all active and at urasent there is anarently no outlook

With the light local denand millers generally are not at all active and at present there is apparently no outlook for brisker business. Prices to the retailer in all lines are unchanged from last week.

The one redeeming feature of the situation is that the lower prices of the last couple of weeks are allowing of considerable export business. Shipments of both flour and oatmeal of some quantity have been made to Great Britain this week, and at present prices demand from overseas points is better.

### MONTREAL.

FLOUR—The local market is very good, a fair volume of trade passing, which is made up of small-sized orders. Prices remain the same as at the last quotation. Enquiries from the country may be said to have been somewhat brighter during the week. It is thought the volume of trade and prices will remain fairly constant for some time.

CEREALS—Dealers report local demand as only fair with plenty of grain offering and prices the same as a week ago. Some oatmeal has been shipped to England recently.

### BEST SEASON FOR QUARTER CENTURY.

#### Large Catches in Nova Scotia Fisheries Aid General Business.

The present season is turning out splendidly for the fisheries of Nova Scotia, as is evidenced in the following letter, which came in this week from a correspondent of The Grocer in Halifax. He says: "The fishermen of the province are reaping a bountiful harvest this season. All along the coast enormous catches are being made of mackerel, and on the Banks the catches of cod and haddock are very large. At some points on the coast the mackerel fishing is unprecedented. The buyers of fresh fish have more than they can handle and they have refused to purchase any more. The fishermen, in consequence, have been obliged to salt the fish down. At Arichat and the fishing settlements along Chebucto Bay, the supply of barrels and salt became exhausted, so large were the catches. During the present week nineteen vessels of the Lunenburg flect arrived at their home port from the Banks, bringing in over 15,000 quintals of fish, valued at nearly \$100,000. The prosperity of the fisheries makes business good all round and the present season so far is the best for a quarter of a century.

### HAVE CONFIDENCE IN YOURSELF.

Don't ask for a position as though you were begging in behalf of a church fair. When offering your services to an employer, remember that you are worth as much to him as he is to you. Prove to him that the salary he pays is a safe investment which will yield liberal dividends.

A young man came into my office the other day, and before I really knew what he wanted I had listened to a most pitiful tale about a crippled father, a sickly mother, and seven younger sisters, all of whom, at that very moment, were home crying for bread. The young man would make an excellent beggar, but an exceptionally weak candidate for a position.

In applying for a position use the tactics of every successful salesman. Be tactful and enthusiastic, and, above all things, don't misrepresent your goods.—H. J. Hapgood.

55

# PERFECTION

is hard to attain, but we have attained it in the manufacture of soda biscuits. If this were untrue, we should be open to ridicule for having so often stated it. But the moment you put a piece of Mooney's Perfection Cream Soda into your mouth you realize that it is superior to any soda biscuit you ever tasted before anywhere. Try it-we'll leave it to the goods to prove our statement.

### A MARKET FOR EAST TORONTO.

#### Proposal to Form a Co-operative Association and Erect Large Building.

A central market for farmers pro-duce is proposed to be located in East Toronto, and the proposition is being much talked about by the merchants of that town. Mayor McMillan is taking

48 Highest Awards In Europe and America

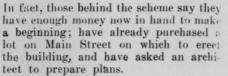

WALTER BAKER & CO.'S

Registered, U. S. Pat. Off.

Branch House,

a foremost part in launching the scheme. The plan as proposed is to build a three or four-storey structure in the centre of the town, costing about \$10,-000. The front of the lower part would be devoted to three stores. at the back while would be accommodation for horses and rigs and all around would be set apart for market purposes. The upper stories of the building would be devoted to hotel purposes, no liquor, however, being allowed to be sold; that is, there would be a large dining-room on one floor, and above that would be sleeping rooms.

The intention is to form a co-operative association composed of merchants and farmers who will subscribe the stock.

The proposition is looked upon favorably by merchants in the centre of the town, but those on the leading thoroughfares away from Main Street do not regard it so favorably as they believe it will to some extent take away their trade.

The promoters of the scheme say that if the plan does not go through as a co-operative association they will form a syndicate and carry out their proposition.

OWEN SOUND

FRUITS. VEGETABLES AND FISH

Immense Quantities of Strawberries Offering—New Peaches, Plums and Apricots From California—New and Old Potatoes—Pacific Coast Fish.

The Canadian small fruit season has opened in earnest, and the markets in various sections of the country report great quantities of berries of excellent quality. Toronto and Montreal are receiving Niagara Peninsula berries and those on the north shore will be found on sale in many parts of Ontario before the week is out.

There was a rumor that the crop in Essex County, in the vicinity of the Detroit River and Lake Erie, had been somewhat burnt with too much sun, but reports from other sections say berries are first-class.

California fruit—peaches, plums and apricots—in fancy packages, is arriving and navel oranges have gone.

In the vegetable line, tomatoes continue to hold the strong position. Cabbage is still arriving freely, and new potatoes are much in evidence, though somewhat firmer than a week ago. Old potatoes, too, have firmed up some, the supplies not being so great as a week ago.

Pacific coast fish is now on sale in various parts of the country. The Eastern markets report increased prices in many lines of fish, but in the Western markets the prices are unchanged, and the dried varieties are not offering. Business has been fair and much above the average.

### MONTREAL.

GREEN FRUITS—The first car of the season containing apricots, peaches and plums has arrived in the city. Pineapples are stronger this week, having advanced 20e in the minimum, and 10e in the maximum price. Bananas remain steady at \$2 to \$2.25. Canadian strawberries are now being quoted at 12e to 13e per quart, while Marylands remain at 15e per basket. Other lines remain as at last quotation. The demand has been good during the past week.

FISH—Fish has advanced in many lines during the last week, with perhaps two exceptions, where there have been declines, one of which is Gaspe salmon. which is arriving freely now, and the price is somewhat easier, having dropped two cents. The other exception is whitefish, which is two cents lower than at last quotation. Haddock, mackerel, B.C. salmon and haddies have advanced from  $\frac{1}{2}$ e to 2e per lb. Oysters in quart tins also have advanced to 40c. The demand during the last week has been fairly good.

#### WANTED.

WANTED in every town and village, a represen-tative to take charge of the circulation of our various publications: - Hardware and Metal, Canadian Grocer, Financial Post, Plumber and Steam-fitter, Dry Goods Review, Printer and Publisher, Bookseller and Stationer, Canadian Machinery, and Busy Man's Magazine. Good financial standing and business connection a strong recommendation. Just the position for a retired business man for his spare time. The MacLean Publishing Company, Limited, Toronto.

#### PERIODICALS.

Toronto.

A DVERTISING writers and business men interested in good printing should subscribe to Canada's only printing trade paper, THE PRINTER AND PUB-LISHER. Subscription price \$2 per annum. Address, 10 Front Street East, Toronto.

THE BUSY MAN'S MAGAZINE is the most popu-lar periodical of its kind. Why? Because each issue contains a strong list of original articles of interest to every Canadian. It also reproduces the most timely, instructive and interesting articles appear-ing in the other magazines and periodicals of the month. The cream of the world's periodical press is too valuable to overlook. BUSY MAN'S is on sale at all news-stands. Better still, send \$2 for one year's subscription. Mail it to-day. THE BUSY MAN'S MARAZINE, Toronto.

COMPLETE information on books, stationery, fancy goods, music, photo supplies and kindred lines is given each month in THE BOOKSELLER AND STATIONER, of Canada. Subscription price \$1.00 per annum. Address, 10 Front Street East, Toronto.

THE market reports make HARDWARE AND METAL a necessity to every hardware merchant, paint and oil dealer in Canada. It is mailed every Friday. Subscription price is \$2 per year. Address HARDWARE AND METAL, Montreal, Toronto or Winnipeg.

CANADIAN MACHINERY AND MANUFACTUR-ING NEWS, \$1 per year. Every manufacturer using power should receive this publication regu-larly, and also see that it is placed in the hands of his engineer or superintendent. Every issue is full of practical articles, well calculated to suggest economies in the operation of a plant. Condensed advertisements for "Machinery Wanted" inserted free for subscribers to the GROCER. "Machinery for Sale" advertise-ments one cent per word each insertion. Sample copy on request. CANADIAN MACHINERY, 10 Front St. East, Toronto.

A RT AND SCIENCE OF WINDOW DRESSING, by S. W. Roth. Every retail grocer should learn the methods set forth in this book-which is spec-ially written for **Gresora** on how to make grocery win-dows attractive and thus draw trade. Every means of successfully displaying goods is treated of in its 14 chapters and 30 illustrations. Price \$2.00, postpaid.

#### MISCELLANEOUS.

STORAGE suitable for out of town manufacturers or brokers, central in Toronto. Office room if required. Address "Storage," THE CANADIAN GROCER, Toronto. (116)

(tf6) THE WHAT, THE WHY, THE WAY.—If you want to get well and stay well you can—without drugs or medicines. Learn the wonderful mission of the INTERNAL BATH. Our free booklet proves that 90 per cent. of human aliments are due to one cause, and tells you how to remove it. Write to TYRRELL'S HYGIENIC INSTITUTE, 285 Fifth Ave., New York, N.Y.

HIGH CLASS COLOR WORK-Commercial sta-tionery, posters. The Hough Lithographing Co., Limited. Office, No. 3 Jarvis St., Toronto. Tele-phone, Main 1576. Art, good workmanship, business methods.

WANTED-Young man; well educated; five years experience in the grocery business, desires posi-tion as travelling representative with wholesale grocery, coffee or tea house; best of references as to character and ability. Address communications P.O. Box 188, Halifax, N.S.

#### LOBSTERS GROWING SCARCER.

A correspondent of the Fishing Ga-tette on the coast of Maine says "that zette on the coast of Maine says notwithstanding the statistics of production the men in the business know that lobsters are growing scarcer each year. The statistics of the annual catch do not reveal all the facts. Thirty years ago lobster fishing on the Maine coast was confined to the inside grounds, or from three to five miles from shore. Then only rowboats and sailboats were used and no man could tend more than forty pots. For a pot not only must be lifted each day to see if it contains lobsters, but it must be moved around constantly to find the places where lobsters are plentiful. To-day, with gasoline boats, the outer field is used more than the inner field. Some catchers go out as far as fifteen miles and fish in thirty-five fathoms of water. Moreover, a man will tend one hundred pots, owing to the rapid movements of the gasoline boat. Thus the volume of lobsters is kept up by improved methods and increased labor, so the statistics of the annual catch are not proof that the supply is not becoming exhausted."

### FACTS ABOUT GROCERIES

### Useful Information for Grocers and Clerks Regarding the Goods They Sell-Something About Cotton Seed Oil and Its Products.

A thousand things pleasing, useful, meritorious and highly prized in the mechanics and arts have within the past thirty years emanated from the frowsy cotton seed, at one time considered practically useless by the cotton growers in the Sunny South. Step by step have these things been attained. Days and months have the chemists toiled to reach the goal of success. Millions of dollars were expended to extract the virtues that were known to exist in the little brown embryo that ignorance wasted and continued blindly wasting until science intervened and turned the river of waste into a sea of gold.

Columbus found cotton in use by the natives when he touched America's shores in 1492. Cortez mentions it as being rudely manufactured into cloth by the Mexican Indians.

The snow-white bolls were found growing wild in Texas and the lower Mississippi Valley as early as 1536. Virginia colonists cultivated it as long ago as 1621. No one dreamed then that it would be a world commodity-no one thought of the value of the seed.

Contrasting the wastefulness of those days with the economies of the present, and the various uses to which the seed and its component parts are put, is the purpose of this article.

The enormity of the sum that is now obtained from a material that thirty years ago was deemed of small consequence, is scarcely comprehensible. Some idea of this can be gained from the fact that one company alone, with a chain of factories in various States, exports annually cotton seed oil and its products to the value of \$50,000,000.

From the cotton seed come compound lard, cooking oil. salad oil and soap oil. chemically pure, nourishing and healthful

The lard is recognized as a mixture of cotton oil and beef stearine, and produces a vegetable product that is unequalled.

Having the indorsement of leading physicians, the cooking oil, which is made strictly without smell or taste. ranks high for the use of persons suffering from indigestion or weak stomachs.

Prior to the enactment of the United States Pure Food Law cotton seed oil was exported in large quantities and returned to America as olive oil, having had 20 per cent. of olive oil mixed with it, and then sold at the price of pure olive oil. The profit to the adulterators on the other side was enormous, as the cotton oil sold for 46 cents a gallon, as against \$2 a gallon for olive oil.

Pure cotton seed oil, as obtainable today under the protection of the Pure Food Act, is preferred for salad pur-poses to olive oil, it being readily assimilated and of lasting benefit to weak stomachs.

Stearine, which comes from the pressing of salad oil under ice, is a natural butter by its consistency and taste. Nearly all of this is sold in Holland to manufacturers of butterine, who ship it to England, where it has a large sale.

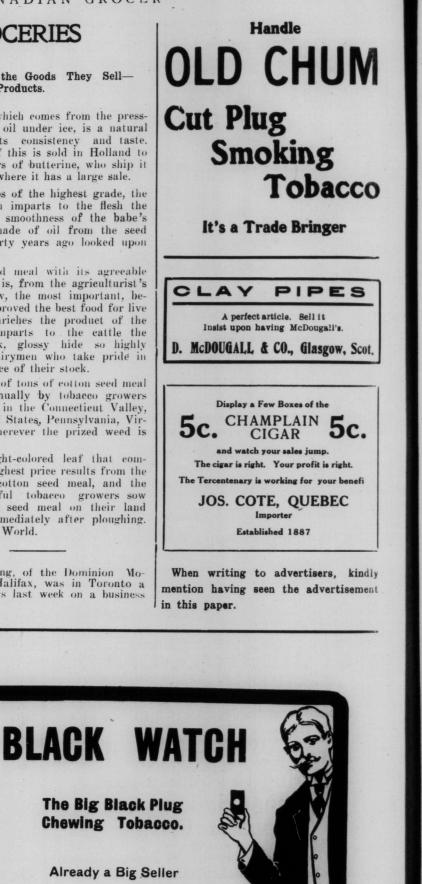

Toilet soaps of the highest grade, the use of which imparts to the flesh the softness and smoothness of the babe's cheek, are made of oil from the seed that was thirty years ago looked upon as worthless.

Cotton seed meal with its agreeable nutty flavor, is, from the agriculturist's point of view, the most important, because it has proved the best food for live stock. It enriches the product of the dairy and imparts to the cattle the smooth, sleek, glossy hide so highly prized by dairymen who take pride in the appearance of their stock.

Thousands of tons of cotton seed meal are used annually by tobacco growers and planters in the Connecticut Valley, New England States, Pennsylvania, Vir-ginia and wherever the prized weed is cultivated.

A fine, light-colored leaf that commands the highest price results from the use of the cotton seed meal, and the most successful tobacco growers sow prime cotton seed meal on their land broadcast immediately after ploughing. New York World.

P. T. Strong, of the Dominion Mo-lasses Co., Halifax, was in Toronto a couple of days last week on a business trip.
