MINARD'S LINIMENT FOR DIS-TEMPER.

ASK FOR ALVINA The Improved Tonic Preparation of an Extract of Cod Liver Oil... Persistent Coughs, Bronchitis, Anemia

LADY LAURAS' RELEASE OR THE STORY OF A SPOILED BEAUTY.

CHAPTER LIX. "Heaven pardon me, my dear," she replied slowly, "but my greatest desire now is to be left alone in peace with you. I am weary of the suffering that has been mine of late."

Baby's Skin Troubles Chafing, scalding, eczema, irritation and itching, burning, eczema, etc. Dr. Chase's Ointment Apply daily after the bath.

"I am staying at Eastbourne with my mother. We are at the Queen's Hotel. When you come, ask for Miss Rooden." He arrived without an hour's delay, his heart on fire to urge his suit.

cried the girl. "He is waiting breakfast for us, I suppose. Pray tell him Mr. Lynne," she said, as the young man rose, "that I will be there in three minutes. Try," she added, softly, "and be more amiable to papa, than you are to my bird and to me."

Fashion Plates.

The Home Dressmaker should have a Catalogue Scrap Book of our Fashion Plates. These will be found very useful to refer to from time to time.

A STYLISH GOWN FOR SLENDER FIGURES. 4271. Black velvet and lace is here portrayed. This will be pretty in Canton crepe in the new "blistered" pattern, combined with satin or georgette. Figured silk tulle could be used in combination with chiffon or net.

4271. Black velvet and lace is here portrayed. This will be pretty in Canton crepe in the new "blistered" pattern, combined with satin or georgette. Figured silk tulle could be used in combination with chiffon or net.

A COMFORTABLE HOUSE OR HOME DRESS.

4081. Long waisted effects still prevail, as this style shows. It is nice for tub silk, gingham, voile and also for taffeta, gabardine and crepe. Blue and white checked gingham is charming and gaudy for collar and cuffs. The sleeve in wrist length is fitted with a dart.

Notice of Poll and Candidates

ELECTORAL DISTRICT OF ST. JOHN'S EASTERN DIVISION TO WIT.

Public Notice is hereby given to the electors of the electoral district aforesaid, that a poll has been demanded at the election now pending for the same and that I have granted such poll and that the persons duly nominated as candidates at the said election, and for whom only votes will be received, are:-

DIRECTIONS FOR THE GUIDANCE OF ELECTORS IN VOTING.

Each elector, on entering the room where the Poll is to be held, shall declare his name, surname and addition. After so doing he shall receive a Ballot Paper in the above form.

Ward Boundary.

No. 1 Ward shall be bounded by a line commencing at Cuckhold's Head, and running along the boundary between St. John's section and Quidi Vidi section to commencement of the road on Logy Bay Road (near Cook's) running from Logy Bay Road to the Torbay Road; thence along the Torbay Road; thence along the boundary between the St. John's section and the Major's Path section to the Torbay Road; thence across the said road to the Port Cove Road; thence along the centre of the last mentioned road to the lane leading past the eastern side of Mr. J. O. Fraser's house; thence along the centre of Circular Road to Bannerman Road; thence along the centre of Bannerman Road to Military Road; thence along the centre of Military Road to the top of Cochrane Street; thence down the centre of Cochrane Street to the harbour of St. John's; thence following the windings of the sea-shore to point of commencement at Cuckhold's Head.

Household Notes.

Sour dock should be favored with horse-radish leaves. A rough flannel cloth dipped into four will clean window shades. Add a little cinnamon to the sugar in which you roll doughnuts. A strap of leather, divided into spaces, is a safe place for kitchen knives. Serve lamb's tongues with white sauce and garnish with slices of hard-boiled egg.

shall deliver their votes at the booth nearest to their residence. NO. 4-POUCH COVE SECTION. Pouch Cove North. Booth 1-At the house of Robert Breez. Booth 2-At the house of Mrs. Francis Ryan. Pouch Cove South. Booth-At the house of William Evans. Banfield. Booth-At the house of Mrs. Alfred LeGrow. Blucyan Cove (Cape St. Francis). Booth-At the house of Walter Ross. Electors residing within said section shall deliver their votes at the booth nearest to their residence.

NO. 5-WARD SECTION. Booth 1-At the house of Mrs. Lina, 7 Mullock Street, for electors only whose respective surnames begin with the letters A.B.C. Booth 2-At the house of Mrs. Land, 18 Hayward Avenue, for electors only whose respective surnames begin with the letters D.E.F.G.H. Booth 3-At the house of Mrs. Murphy, 42 Hayward Avenue, for electors only whose respective surnames begin with the letters I.J.K.L.M. Booth 4-At the house of Mrs. White, 4 1/2 William Street, for electors only whose respective surnames begin with the letters N.O.P.Q.R. Booth 5-At the house of Mrs. Minner, 64 Mullock Street, for electors only whose respective surnames begin with the letters S.T.U.V. Our Weekly Letter.

A woman, holding in her arms a one year old baby, stretched out, faint from loss of blood, attracted the attention of a taxi cab at 1.15 in morning at the corner of Aquebogue and Bonaventure Streets. The Samaritan drove them to the Police Station and the woman's story. She said she had sheltered a man for two weeks, and that night he had robbed a man of \$10 and returned to the house late and told the police the man he had sheltered. The woman became

afraid and told him she'd shelter him no more, as she was not in the habit of encouraging robbery. Then her trouble started. The man kicked her and nearly choked her, and then drawing a razor slashed her face in several places. She ran from the house with her infant and was lying in the snow exhausted when the chauffeur found them. She is now at the Montreal General Hospital where her wounds, while painful are not considered serious. Another example of ingratitude and brutality.

The Recorders have some very funny cases to handle every day, in fact the evidence of the police making the charge and the excuses of the accused, often cause more fun than that comic song, "Mr. Gallagher and Mr. Sheehan." Here is a case in point:

"Are you French?" asked John Williams, 37, laborer, of 50 Cathcart Street, when Constable Giraldeau, of No. 5 Station, arrested him among after-theatre crowds on St. Catherine Street for begging. "I am," replied Giraldeau. "Then take that," came back Williams.

"That" was a stiff punch on the nose. Giraldeau grabbed the man who then bit him on the left hand. Recorder Semple gave Williams three months' hard labor for assaulting the Constable, and 15 days hard labor for begging; the sentences to follow one another.

Westmount is to have a very imposing Baptist Church, which will be situated at the Northeast corner of Sherbrooke Street and Roslyn Avenue. The building will be of Colonial design with red brick and stone trimmings on the exterior, and a bold colonnade and steps to the main entrance on Sherbrooke Street. The lot where the church is to be built is 117ft. by 11-ft. The main auditorium will be 80ft. by 45ft., with a lofty ceiling and will seat 700; 350 in the main floor and 350 in the galleries and choir. The seating will be semi-circular with the choir behind the organ and the organ on an elevated position in the back. The full length of the church will be 105 feet by 63 feet and will be fireproof. Twenty-five classrooms for Sunday School will also form a part of the building. In the basement, a banquet hall to accommodate 250 people and a kitchen will be fitted up. The pastor's study, the church office board room, vestries, choir rooms, baptismal and robing rooms will also be added. A separate building for the janitor, in rear of the site, is also contemplated, and sufficient space for a future parsonage. The church proper will cost \$100,000.

but they'll have to do some for a year, no matter how irksome or distasteful it may appear. One man, who was the father of 10 children, and whose family had been receiving charity for twenty-five years; another who had not provided for his wife and two little boys since last October, paid the penalty in the shape of one year in jail each, after Recorder Semple had convicted the prisoners of non-support.

The father of the large family is 45 years old. He was married at 21, and ever since the birth of the first child, the St. Vincent de Paul Society has been contributing to the family's support. Nine months ago the mother died during birth of the eleventh child.

A girl of 22, the eldest child, is now mothering the balance of the family. She is an epileptic, and was seized with an attack when giving evidence in camera before the Recorder. She told the judge that her father had sold most of the furniture in the home, including the piano, for which he got \$80, and that some weeks ago, when some of the older children had accumulated \$22, to be applied to the rent and grocer's bills, now five months overdue, given her \$5 and had gone out for the night, during which he spent the \$17.

In the second case, the father of two little boys, aged six and seven, had left his wife and the children last October "in the street," as the woman put it. The boys had been given shelter by the Juvenile Court until special arrangements could be made for their lodging at the Reform School at a special rate. The father had promised to pay the money, but had defaulted, and left the children on the Government's hands. He was arrested during Holy Week in a room where he was living with a girl of 19.

Hon. J. J. Guerin, M.D., formerly a member of the Liberal Cabinet, at Quebec, may again enter the Cabinet, as the successor of the Hon. John C. Kalne, of Quebec City, who died a few days ago.

All previous records in tourist traffic are expected to be shattered this season. The number of conventions this year is extraordinarily large, and thousands of visitors will be seen in Montreal during May, June, July, August and September.

Local social workers seem agreed that there are numerous infringements on the Child Labor Act, in the city office buildings as well as in the factories. In fact, some suggest that as the law provides its own factory inspectors it is probable that the law provides its own factory inspectors. It is probable that the minimum amount of cases are found there.

"It does not take a social service worker to see that the law is being disregarded," said George Corbett, of the Society for the Prevention of Cruelty to Women and Children. "A person can go into almost any office building in the city and find as many as 100 cases of children under 14 working by the day. There are probably as many as 5,000 cases in the province."

"The work of the Society for the Prevention of Cruelty to Women and Children is confined to women and children who are abused and are showing signs of abuse. We cannot presume to be factory inspectors, but we do come in contact with occasional cases, without going out to look for them. Recently two cases of this kind came to our notice in the theatrical profession. There is a definite Provincial law which forbids the employment of any child under 15 years of age to sing, dance or appear in any capacity on the stage. Of course this law is disregarded every day. But the S.P.W.C. has stepped in only where the child is showing obvious abuse. One of the cases was a child performing in an acrobatic act, the other a small boy of 5 lifting a 35 pound weight far above his head. The performance was stopped in both cases."

R. J. LOUIS CUDDIHY.

Butterfly Farms.

Quite a novelty in the way of farming is the butterfly farm. And a very paying business it is, too, but a thorough knowledge of entomology is necessary to carry out the work successfully.

There is a great demand for butterflies of all sorts by collectors, scientists, the makers of the beautiful butterfly wing jewellery, etc. As much as \$5 and \$7 is paid for some of the rarer specimens.

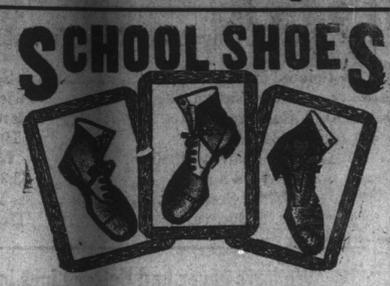

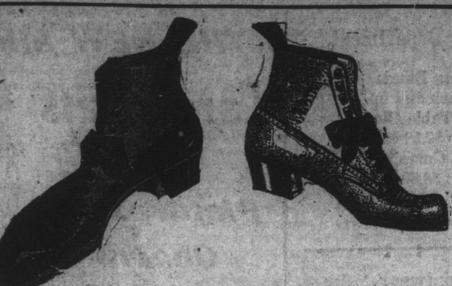

Butterfly farming requires very little space and scarcely any capital to start with. An old shed, attic, or spare room can be utilized, provided it is free from draughts and has a fairly warm temperature.

Empty jars or wide mouthed bottles, and even boxes and barrels, can be used for the breeding compartments, whilst most of the stock can be caught outside, except, of course, the rarer varieties, which have to be purchased.

The successful farmer knows exactly how to feed each variety. Some butterflies produce their eggs in boxes or bags, others require no food whilst laying their eggs, and so forth. The larvae hatched from the eggs have to be fed on certain leaves until they turn into pupae, from which the butterflies eventually emerge.

Pilchard Records.

Extraordinary catches of pilchards have recently been made off the South Devon coast in waters where this fish has not been seen for many years.

Pilchards are a most uncertain fish. The last really big catches were made in Mount's Bay, Cornwall, some four years ago, when two hundred motor and sail boats combined to raid the huge shoals. The drifters got over a million fish, which were sold at twenty to thirty shillings a thousand.

Then seines were run around Penberth and Porthnewn Cove, both of which were teeming with fish, and a catch was made of six hundred hogheads, the total value of which

was \$21,000.
This beats the great record of 1861, when a catch was made off St. Ives of sixteen and a half million fish. The net was a mile and a half long, and the value of the take was £11,000. All this is rather a contrast to the report of a steam-drifter which in August, 1911, fished in the same waters for seven hours with seventy-seven nets and caught one pilchard.

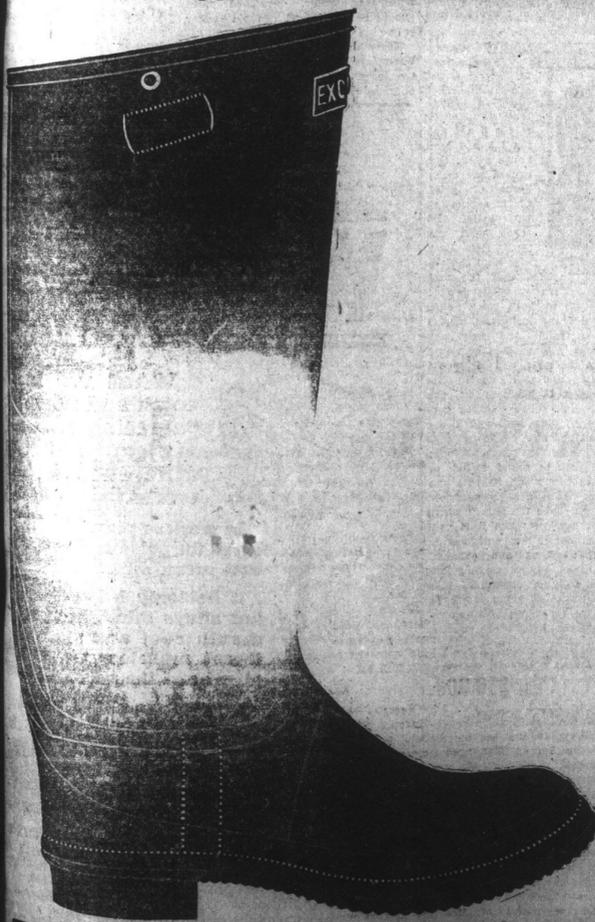

Pilchards are a most delicious fish better even than the herring. But they do not keep well, and nearly the whole catch is bought by the curing houses and packed for export. Most go to Italy. The fish are cured with salt, the process taking about three weeks, and at the end of that time the pickle is drained off, and the fish

packed under a screw press in small barrels.
The pilchard is the same fish as the sardine, merely grown to a large size.

Ground which is FERTILIZED will produce more vegetables than sterile ground.
Good Fertilizer properly used will convert poor ground into good ground.
Good Seed put into good ground will yield goodly crop of potatoes.
A couple of extra barrels of potatoes will repay the cost of fertilizing.

**Farmers,
Read this
Carefully!**

This year, acting on the advice of Agricultural Experts, we have imported Fertilizers of higher grade and greater strength than were imported during the past decade of years.

The Fertilizers we now offer, are of more value than last year's importations and are guaranteed to give even better results.

Although our prices this year figure higher per pound, the cost per unit of fertilizing value is considerably less.

Putting Fertilizer into your ground is like putting money into savings bank.
You can rely on getting more out, than you put in.—it pays to fertilize.
NOTICE!--Our fertilizers are not adulterated with spentslag or rock dust.

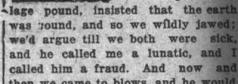

COLIN CAMPBELL, Limited.

Historic Prison to be Torn Down.

The St. Lazare prison for women, which is both famous and notorious in the annals of French history, has been ordered torn down by the municipality of Paris. When the walls of the prison have been replaced by a smiling garden there will have disappeared one of the most remarkable buildings of France, from the point of view of historic associations.

THE EASY WAY.

When I was young and not so fat I argued that the earth was a flat and that I kept it long hours away; this caused me many kinds of grief, for in support of my belief I'd scrap with any jay. Ben Batt, who kept the village pound, insisted that the earth was round, and so we wildly jawed; we'd argue till we both were sick, and he called me a lunatic, and I called him a fraud. And now and then we came to blows, and he would seek me in the nose, and I would spoil his ear; and still, as by its maker planned, in business at the same old stand, rolled on this gorgeous sphere. Ben Batt and I are old and bent and now we do not care a cent for things that made us fuss; and if the earth be round or flat, or helter as an am' / wat, it cuts no ice with us. It is a bully good old earth and we agree it's surely worth whatever it has cost; and it is vain to waste an hour in musty arguments and sour that fret us and exhaust. When our brief day is waxing late we see the folly of debate, of fuss and fret and fight, of argument that's stale and bare, that never gets us anywhere, or proves that we are right.

WALT MACON

That same day it happened—just as it happens when you see a word that you haven't seen before, and then find you are seeing it everywhere—that the same train of thought repeated itself in the afternoon. We were looking at an orchard of apple trees and how they seemed the most friendly trees, the most individual and personal and especially the most climbable trees. "Only," I said, "those apple trees aren't as large as the one we had in our yard. Why, we used to climb way up to a seat that was terribly high. I wonder why those trees are so small."

Just Folks.
By EDGAR A. GUEST.

THE VAUDEVILLE OF LIFE.

Life is a vaudeville show. A good act now and then. The dancers come and go. And then the jangling melody of a dreary turn and slow. With nothing new or bright. The star with eyes aglow. And at the last "good night."

So we from day to day Along the stretch of years Live out life's changing play From happy mirth to tears. Success with all its thrill. Least but a little while. Now tedious seems the bill And far-fetched every smile.

To Wash Paint Work.

First dust the paint, using a soft brush to remove the dust from crevices and mouldings. Next make a soap lather with household yellow or carbolic soap and warm water and place some clean warm water in another basin.

Wring out a soft flannel in the soapy water and wash the paint gently, rinse it with a sponge or cloth wrung out in the clean warm water and wipe it with a dry, soft cloth, giving a final rub with a clean cloth or chamois leather.

Dirty marks on white paint can be quickly removed with a flannel dipped in a little precipitated whiting. Rinse with clean water. Varnished paint should be washed with tepid water only.

Never use soda or strong soaps. Never use too hot water. Do not wet too large a surface of the paint at once, as if not dried quickly it looks streaky.

Household Notes

Try serving baked ham finished with spiced peach preserves and accompanied with sauce.

An excellent Sunday night is a cold baked ham, stuffed cloven, and a sweet potato.

Attach a wire basket to the invalid's bed. It is useful for holding magazines and work.

A good top dressing of soil should be given the strawberry when the winter mulch has moved.

Less shortening is required in chocolate if used in a cake, as a deal of fat is contained in the nuts.

Flour of sole is served on a number of potatoes, covered with a sauce flavored with curry and onion.

After Every Meal

WRIGLEYS

What we have eaten and how it agrees with us makes all the difference in the world.

In work or play, WRIGLEY gives the poise and steadiness that mean success.

It not only helps digestion but allays thirst, keeping the mouth cool and moist, the throat muscles relaxed and the nerves at ease.

WRIGLEYS is the best that can be made and comes you wax-wrapped and sealed to keep it good.

FOR A BETTER SCORE

SIDE TALKS.
By Ruth Cameron.

SHRINKAGE AS THE YEARS PASS.

How things do shrink as years pass by. Not only the undershirts of the famous babies whose mother neglected to use the right kind of soap, but of ever so many things that you wouldn't think could possibly shrink from the nature of their making.

Pythons, for instance. For it was pythons that brought that familiar but not always recognized truth into my mind and into the conversation, and hence by a natural transition into my talk with you.

Thirty Feet to Six Inches.

We were talking about travelling and seeing strange lands, and I was

going to see them again as a grown-up.

Niagara Falls and Apple Trees.

"Like Niagara Falls," said the Authorman, "I saw it when I was a little boy and it was just as big and wonderful as I had thought it would be. Lots of things don't measure up, but that did. And then a while ago I was on a business trip out that way and I went and saw it again. And the whole outfit had shrunk. Why, it wasn't half the size it was when I was a boy. I wished I hadn't gone again."

PAIN

Minard's penetrates to the root of the trouble and gives quick relief. Splendid for sore muscles, sprains, bruises. A good thing—rube it in.

MINARD'S LINIMENT
"KING OF PAIN"

House Party to Cost \$30,000.

Tom L. Burnett, millionaire ranchman, is laying plans for the biggest outdoor celebration on his Triangle ranch, 17 miles north of Wichita, Texas, that was ever held in the Southwest. It will be held the last week in April and will last four days. The cost of the celebration will be more than \$30,000. It is stated, and all of it will be borne by Mr. Burnett.

It will be in the nature of a house party with entertainment features for 10,000 guests. Burnett is organizing the greatest rodeo ever given in this country. He expects contestants for the different prizes from all over the West and Southwest. The whole affair will be a round-up of typical ranchmen and cowboys, with town guests as onlookers.

One of the features of the event will be a barbecue, at which a feast

COAKERISM IS DOOMED!

St. John's East and West Voters Turn Out in Their Thousands to Welcome

BENNETT AND BETTER TIMES

Four Hours' Meeting Concludes at Midnight.

CASHIN, LINEGAR, and HUNT, HIGGINS, FOX, and VINICOMBE Will Have Sweeping Majorities.

To-day is Newfoundland's Independence Day

Candidates Plead to the Multitude to Refrain From Public Parade and Demonstration at Close of Meeting to Comply With Election Act.

Joint meeting held in the Star Hall was presided over by Mr. J. R. Bennett. The meeting was held in the Star Hall and was attended by a large number of voters. The meeting was held in the Star Hall and was attended by a large number of voters. The meeting was held in the Star Hall and was attended by a large number of voters.

In the campaign in St. John's West, Sir Michael Cashin and Mr. Hunt, had witnessed scenes that were direct results of Coaker-Squires rule. To-day 1,800 of our best men are working in Government rock sheds due to Coaker's mismanagement of the fisheries of the country.

HUMBER DEAL NOT THE ISSUE. W. J. Higgins, leader of the ticket in St. John's East, the next speaker, thanked the audience for the reception and said that after to-morrow they, the candidates under Bennett's leadership, would come back with a smile on the face of the Tiger with the Squires party inside them.

become rosy and that money would fall like rain. It would take some time before matters would be straightened out, but it was certain that the party were able to give an honest day's work and will not be always muttering "Umber, Umber, Umber." The country's industries will all be helped but the main thing is the fishery and it will receive complete and close attention. It may be possible that relief work will have to be continued, but it will only be until men can be put back to work at their proper avocations.

Mr. N. J. Vinicombe said it was a sign of the times to see the people out in their thousands for Bennett and Better Times. To-day the Government are appealing to the people without a policy; not a sane policy have they got except vilification and misrepresentation. The Mail and Advocate said that the issue is the leader and that Bennett is Johnny the Pawn. The fact is Bennett will be the Premier after polling day. The 3rd of May will be Independence Day for Newfoundland, because we lost our independence in 1919. The Squires Manifesto with its 23 promises which were never carried out shows that the Government failed in its duty. Mr. Vinicombe made a strong plea for the straight ticket for HIGGINS, FOX and VINICOMBE and resumed his seat amidst tremendous cheering.

MR. N. J. VINICOMBE TELLS UNVARNISHED TRUTHS. In his opening remarks, Mr. Vinicombe said that the gathering for their attention. He pointed out that since the meeting, there had been no change in the Government's platform. He will left with the one plank, Coakerism, which was still in the land and was likely to remain there. He made reference to the expenditure of money and the Auditor General's report which was ever carried on by the Government in his experience. Mr. Ayre, this was but a bucket to the money that was being daily squandered. In the last meeting, the Premier, Mr. A. Squires, had stooped so low as to go into the graveyards and to his respected brother and to Mr. A. M. McKay. On other occasions Squires has an idea that he should not be opposed. He has spoken of in the Government as having made the statement respecting Sir Richard Squires to Mr. Ayre. He wished to deny that statement as he would not be doing justice. In his, Mr. Ayre's remarks, Mr. A. Squires thinks he is a great man, but his wings would be clipped by Mr. Linegar to address the meeting.

MALADMINISTRATION QUITS TO-DAY. Sir Michael Cashin thanked the audience for coming in their thousands. He was struck very much by the remarks of the chairman, who was recognized as a thinking man. Sir Michael referred to the manner in which the Squires Government squandered the surplus left by the previous administration and had increased taxation. Where formerly thirty-seven and a half millions was the value of our exports, out of which a revenue of nine and a half millions was derived, to-day the exports are only ten and a half millions and eleven and a half millions are collected in revenue. The additional million was paid out of a six million dollar loan. The Government say they have a Humber Deal. What is it? Sir Richard Squires was using it to try and gain election, but he was afraid to come on a platform and discuss it with the people. Sir Michael referred to the manner in which the House of Assembly was closed and asked if the Humber Deal was the fine proposition he said it was, why didn't they put it before the House of Assembly as it should have been? To-night Squires was before the people with a manifesto which was full of abuse. The proper thing for him to do is to tell the people why he did not keep his promises of his 1919 manifesto. Continuing his remarks Sir Michael said the Mail called the fight a "spite campaign." So well it might be a spite campaign, the spite of every Newfoundlander against Squires maladministration. Sir Richard Squires was responsible for this and he was asking for re-election without showing why.

WHY YOU CAN'T SUPPORT GOVERNMENT. Mr. Hunt joined with his colleagues in complimenting St. John's on their extraordinary demonstration, which was a sure indication of six candidates for St. John's. He pointed out there were four points on which the election had to be decided, viz: The record of the Government; the proposed Humber proposition; the Manifesto of Sir R. A. Squires and the Manifesto of the leader of the Opposition, Mr. J. R. Bennett. The record of the Government was the saddest and blackest since we had responsible government. When they were elected in 1919 they made 23 promises not one of which was carried out. Throughout the sessions not one act of any benefit was carried into effect, for the fisherman, labourer or farmer. They had broken keep the promises of his 1919 manifesto on a policy of economy, and on sooner were they returned than they increased their own salaries from \$200 to \$1,000, and Executive heads from \$2,000 to \$4,000 and that at a time when men were looking for work in vain and widows were without food and clothing. They next appointed a Commission and imported detectives at a cost of \$15,000 to prove that Cashin and Crosbie were honourable men. The blackest page in the history of the Government was the Fishery Regulations, which cost millions to the country and sent many of our best firms to the wall. Coaker is now threatening nationalization of our codfisheries, if returned which means the ruination of St. John's, as once the fish is taken out of St. John's the labourer and all in the city will suffer. He was the great menace facing the country to-day, and it was not a fair deal for the people to be held in the grip of one man, to do as he dictated. The many cases of abject poverty in the city to-day were directly due to the mismanagement of our great fishing industry. Mr. Hunt referred to the Squires Manifesto and its lack of policy and compared it to Mr. Bennett's straight and open pronouncement which was the only hope for Newfoundland, as he promises above everything else the preservation of the fisheries which support 80 per cent of Newfoundland and without which we cannot exist.

ABSOLUTELY NO EXCUSE. Mr. C. J. Fox was the next speaker, and like the preceding candidates was given a whole-hearted welcome. In a forceful speech of nearly one hour, Mr. Fox reviewed the issues now before the country. The Government themselves were ashamed of their record, and that is why the House was closed, and a general election sprung on the country. They could not put forth a reasonable excuse for their actions. The Humber cry is a fictitious cry, as the Humber is not the policy of the Government. It is already as well known an accomplishment as the fact that the Government give them another term of office. As Newfoundlanders we must put an end to the wholesale emigration of our best manhood, 10,000 or more of whom, have gone out the Narrows since Coaker and Squires got control. The Government has abandoned constitutional authority and have done everything by Minute-of-Council.

A RECORD OF INCOMPETENCE. In response to the insistent demand of the audience, Mr. John Stone, the leader of the Opposition team in Trinity District addressed them. Mr. Stone took part of the Squires Manifesto of 1919 and showed up its falsity. He referred in scathing terms to the fleet of ships which the country had to pay dearly. The manner in which the Herring industry was neglected as well as the possibilities of Refined Cod Liver Oil also came in for severe castigation. Squires said he would put the Reids in their places but as soon as he got in power he gave them two millions and has, so it is reported, given them another million and a half. He has allowed them to increase their passenger rates one cent per mile and freight rates from forty to eighty per cent. Mr. Stone referred to the famous roads that were built and also to the failure to erect the Outport hospitals. Mr. Stone's remarks were heartily received and at the close of his speech he was given three hearty cheers. Mr. Stone came to town yesterday to look after the Trinity Bay booth here. Mr. Higgins then called for three cheers for the chairman, for Mr. Bennett, for the candidates, which were given with whole-souled vigor and the meeting then adjourned near about midnight.

Can't Help Bluffing. Bluffing seems to be a complaint with the Advocate and Mail scribes who throughout the campaign have turned and twisted every argument and contention which called for truth and verification. In the special edition of the Mail this morning the reporters of the meeting stated almost three thousand people were present in the Majestic Theatre. To prove the absurdity of this statement we have only to mention the seating capacity of the Majestic which is 1135 allowing that between another three or four hundred would find standing room, it will be clearly seen that if the hall was filled to capacity, the most that could possibly assemble, at one time would not exceed fifteen hundred. Make a fair comparison with this gathering and the meeting, at the Star Theatre which is without exception the largest in the city which was crisscrossed to the doors, hundreds could not get standing room. Boxes, aisles and entrances were jammed with an eager enthusiastic assemblage and long after midnight hundreds despite the inclemency of the weather waited in the hope that they would hear open air addresses from their popular representatives and accord them a public demonstration. But as it was long after midnight before the theatre was vacated, it was deemed advisable to refrain from any demonstration of this nature for the principal reason that without exception all the St. John's Bennett candidates will be elected with sweeping majorities and their opponents might avail of this excuse to have them unseated. If there were two thousand people in the Majestic there were five thousand in the Star and bluffing and misstatements of this nature do cause very little credit or advantage. The people will have spoken to-day and all the deceit they can manufacture cannot stave off the inevitable that is generally accepted in the slogan of Bennett and Better Times. St. John's is finished with Coaker and Squires.

A FEW GENTLE HINTS

AT THE CLOSE OF THE CAMPAIGN.

(By OBSERVATOR.)

The film-fam and the hocus-pocus end. The angry orators are mute at last. The editors have shot their final blast. And there are no more dollars left to spend. Too late now to accuse or to defend. Another great campaign is in the past. And there is nothing left but to forecast with trembling soul the landslides that impend. Nothing but with the lips to prophesy. And in the heart to wonder after all. Whether the world would end if A should win. Or paradise with B drop from on high. And what that dappled map upon the wall will look like when the last returns are in.

A RELIEF TO RIGHT-MINDED PEOPLE.

It is now a relief to all right-minded people to observe that throughout the election campaign, which has just closed, no dangerous or disquieting appeals of a sectarian nature have been made to the electorate by the Telegram. This is exactly as it ought to be. Religion, in the sense of sectarianism, should always be kept apart from politics. Nothing is so irreligious and anti-Christian as to stir up fellow-countrymen and fellow-

Christians to hate and persecute one another in the name of religion. But in politics, as in private life, religion should always be the guide of our conduct, and should make us truthful and just in our dealings with our fellow-men. Religion urges us to side with the weak rather than with the strong, with the poor rather than with the rich, with the ignorant rather than with the educated. Religion forbids tyranny and coercion; it commands us to love our country; it bids us labor to remove poverty, to improve the condition of the masses. We are taught to believe that God's blessing rests upon those who labor to make the poor prosperous, to heal the sick, and to render less hard the lot of the insane. Those politicians who thus act, who endeavor to strengthen the hold of religion on men's hearts, by associating religion with freedom, with progress, with prosperity for the poor and tolling masses, with mercy to the afflicted and suffering—those are the true friends of religion and the people they represent in the Legislature of the country.

A MATTER OF GREAT IMPORTANCE.

One institution, above all others, we imperatively need at the present

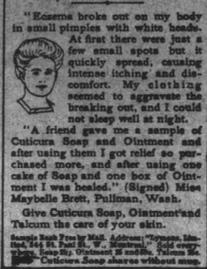

moment, and that is a college to teach our toilers of the sea how to reap to the fullest extent and properly prepare for market our inexhaustible harvest of the deep. This, to my mind, is of far greater importance than a Normal School or anything else of a kindred nature. Let us hope that during the next session of the Legislature provision will be made for such a college. As a writer in one of the American magazines observes, "the blessings of fishing—and this commercial fishing, and not the sport of angling—is one of the oldest in the world, and as now conducted, seems a rather fixed industry. In other words, the fishermen go out in their boats, set their traps and trawls, take from them what they can use, and that is all there is to it." What, therefore, could a fishermen learn from a college whose purpose is to teach him how to fish. This question has been answered by the establishment of the College of Fisheries of the University of Washington, and the only institution of its kind on the Western Continent. Established three years ago, it has already proved an unqualified success. It has shown that, while the whims of the sea and the vagaries of the always wandering schools of fish largely control the prosperity or the lack of it of the commercial fishermen, nevertheless the fisheries may be regulated, the habits of the fish sought studied, and much of the uncertainty of the catch converted into a reasonable sureness of output every year.

A WONDERFULLY VALUABLE INDUSTRY.

It seems that the principal justification for the establishment of the College of Fisheries referred to was the fact that the commercial fisheries of the North American Continent are the most important in the world. "In the United States, including Alaska, their production amounts to almost three billion pounds annually, valued, as they leave the fishermen's hands, approximately at \$100,000,000." Canada is the second most important fishing country in the world, with products valued annually at more than \$30,000,000, while those of Newfoundland total almost as much. The total value of the world's fisheries is computed at \$560,000,000, and if the value of the fisheries of the United States, Canada and Newfoundland were combined, they would represent almost one-third of the total. In the fisheries of the United States are utilized 8,700 vessels of 240,000 net tons, and 191,000 men, women, and children are employed. Much of our fishery resources is, however, either totally neglected or little utilized, simply because of the lack of trained men. The College of Fisheries sup-

ECZEMA ON BODY IN PIMPLES

Itching Intense. Could Not Sleep. Cuticura Heals.

"Eczema broke out on my body in large pimples with white pustules. At first there were just a few small spots but it quickly spread, causing intense itching and discomfort. My clothing seemed to aggravate the breaking out, and I could not sleep well at night. A friend gave me a sample of Cuticura Soap and Ointment and after using them I got relief so quick that I bought a box. I used one cake of Soap and one box of Ointment and I was healed." (Signed) Miss Maybelle Best, Pullman, Wash.

plies these men, and teaches them the best methods, not only of operating the industry, but of preserving and conserving the natural product which forms the basis of that industry. The older and more experienced students of the College form the bulk of the salmon inspection force of the National Cannery Association, for which work they receive special instruction at the College. Special instruction is given all who are considering engaging in the canning or packing of fish or any other branch of the fisheries industry, but who lack the special knowledge of the methods employed, which is requisite to success in this day of specialization in business. The four-year curriculum of the College leads to the degree of Bachelor of Science in Fisheries. Students in the College are taught the fundamentals of commercial fisheries—how to outfit for the fisheries, how to operate for each variety of food fish, and how to prepare the fish for market once they are caught. They are also taught to conserve the fisheries resources of their country by surveys of the available waters and their fish supply, by the establishment of rules whereby this supply of fish can be conserved, not alone for the commercial fishery, but for the anglers as well.

A HOPEFUL SIGN OF THE TIMES.

It is a hopeful sign of the times that, in spite of the present political hurly-burly, the widespread industrial unrest, and the almost unprecedented difficulty of making a living by which the masses are confronted, crime is certainly not on the increase here. As a matter of fact, the criminal calendar shows a considerable falling off, as compared with the number of commitments for the months of March and April last year. This condition of things speaks well for the home life of our people. Criminals are made not born. It is home environment rather than mental abnormality that causes the youth of the country to go wrong. Feeble-mindedness among criminals is not greater than among the general population. Reports upon the levels of intelligence of juvenile criminals show that youngsters of superior intellectual ability are approximately the same number of those who are feeble-minded. Statistics on investigations at reformatories, wherever such institutions exist, reveal that among boy inmates about 50 per cent. are members of what are termed "crippled families"—families in which one or both parents were dead or otherwise separated permanently from their children.

FACTORS CONDUCTIVE TO JUVENILE DELINQUENCY.

As proof of my assertion that delinquency frequently has inception in such "crippled families," reliable figures show that about 55.3 per cent. of the children of sixteen years or under of the country are attached to such families. If the "crippled" condition of the family were of no importance only 25.3 per cent. instead of more than 50 per cent. of these boys should come from such homes. City life is more conducive to juvenile delinquency than outport life. Absence of certain factors tending to create youthful criminals, found in even a city like St. John's, is the only explanation I can give for the

smaller number of young criminals in rural towns and settlements. Responsibility for contracting these factors should be placed squarely upon the shoulders of city parents. These influences must be counteracted in the home. The obligation to discover the formula in each individual case rests with the fathers and mothers, and they cannot evade it. The disregard with which many parents view the Prohibition Law cannot be otherwise than deplored as a most important element in leading youths to view all law with like disregard.

Storm Laws.

In the Heart of the Cyclone Lies the Greatest Danger for Little Ships. The devastating storms which sweep over England several times each winter are not ordinary gales, but North Atlantic hurricanes, fatal to almost anything that dares to oppose their tremendous force. Across the ocean a long trail of damaged and sinking shipping bears testimony of the hurricane's mighty power. Liners arrive behind time, big cargo freighters come into port minus their boats and with bulwarks levelled to the deck, and many little ships have gone to their last port, all because they met the full force of an Atlantic cyclone.

Years of dearly bought experience, together with much patient observation by shipmasters working in conjunction with the meteorological authorities, have resulted in the Laws of Storms. These rules relate to the formation of cyclones, hurricanes, and typhoons, the direction they take, and how to avoid them. They form an important part of the Board of Trade examination of every candidate for master of a foreign trading vessel.

At the Mercy of the Waves. The actual cyclone is in the form of a huge swiftly revolving whirlwind about thirty miles in diameter. Within this area the wind blows with a spiral movement toward the centre, increasing in violence as it approaches it. A vessel meeting the outer fringes of the cyclone would not suffer much harm if properly handled, it is the storm centre which does the damage. While the largest ships may live through it, to small ones it is fatal, as Lloyd's overdue list at this time of the year shows.

The storm centre is no larger than Trafalgar Square, and curiously enough is totally devoid of wind; it is the sea which makes it so dangerous. Roaring pyramids of seething water rush together in menacing confusion from all directions. When by wireless news or by local signs an approaching cyclone is indicated, the navigator who wishes to avoid the danger must first find the approximate direction and distance of the storm centre from his vessel, the cyclone's line of progression, and the course he must take to remove his ship from danger.

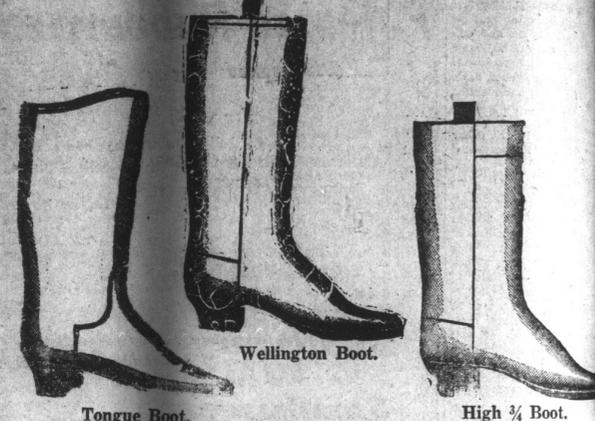

First, he faces the wind; the danger will then lie ten compass points on his right hand, the distance being indicated according to how far the barometer has dropped, on the principle of the lower the pointer the closer the storm.

Next, the ship is stopped and the alterations in the wind direction carefully noted. This will show the course the cyclone is taking. Having found the relative positions of ship and storm, and the course of the latter, the navigator plots both on his chart and steers a course to safety. It frequently happens that small vessels of low speed have not sufficient power to take them over mountainous seas out of the path of the storm. Then the sailor realizes the full significance of being at the mercy of the elements. The steamers Merrimack and Kansas City, which foundered somewhere in mid-Atlantic through being unable to avoid the centre of a cyclone, suffered the fate that has befallen hundreds of fine ships and from the same cause.

Patented Rubberized Roofing Cheaper Than Common Felt

This Rubber Roofing sold last year at \$4.75 per roll, but as some of the rolls were slightly damaged we bought it cheap and we are selling it at only \$3.00 per roll.

With each roll you buy we give you enough nails and cement to put the roofing onto your roof.

Houses covered with this Patent Rubber Roofing pay less insurance tax than roofs covered with common felt, and in addition to saving on insurance you save \$1.75 per roll.

YOU CAN PICK OUT GOOD ROLLS IF YOU COME QUICKLY

Patent Rubberized Roofing doesn't need tar or other coating until it has been one year on your roof.

M. A. BASTOW & SONS, Ltd., Beek's Cove

Where Men do all Housework.

There are many remarkable things in the Congo region in Africa. A stranger going through the country is at liberty to stop at any hut and spend the night or remain as long as he feels inclined.

But if the stranger is tired, he is "out of luck," because hospitality in Congo is expressed in a strange fashion. To give their guests a real welcome the host and hostess gather all of their neighbors and friends around their home and plan for the evening's entertainment.

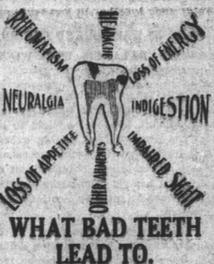

He is expected to appreciate it, and naturally, should not show any signs of fatigue. After a sleepless night he is surprised to find that his hostess is out in the fields, bright and early, with her cigar in her mouth—because in Congo only the women smoke, the men prefer to take snuff.

The men take over the domestic duties. It is no strange sight to see the man of the house engaged in doing the family washing, and then hanging the clothes out to dry on the branches of the trees around his home.

From all Districts.

THE CRY IS BENNETT AND BETTER TIMES.

The North has turned against Coaker. Even in his pet district of Bonavista the Government are exceeding two men to the Opposition. The same is true of Twillingate and Trinity and Lons's election in Fogo is already assured.

WHAT BAD TEETH LEAD TO.

Do you know that many serious diseases come from diseased conditions of your teeth. It is a fact now well known to medical science.

9 Arrested With Over \$2,000,000.

SPECTACULAR RAID ENDS RECOVERY OF BANDITS' LOOT.

St. Louis, Mo., April 20.—Nine men were arrested and more than \$2,000,000 in securities, stolen in the daring robbery of a mail truck here on April 2, was recovered late yesterday in a spectacular raid by post-office inspectors and deputy sheriffs in St. Louis county, west of the city. The loot was found in a luxurious bungalow at Richmond Heights, occupied by William F. Doering, 29 years old, a tire salesman and alleged gangster, who was taken into custody with Theodore Weisman, 23, proprietor of a shoe store in Johnson City, Ill., and William D. Williamson, 45, who said he was employed as a yard man by Doering. In addition, six other men were arrested on suspicion at Clayton, the county seat, in connection with the holdup.

The officers discovered most of the loot, consisting of some negotiable securities and assigned notes of the Federal Land Bank, in an attic in an old suit case.

Further search of the house revealed a small arsenal. Sawed off shot guns, dynamite, fuses, revolvers and automatic shot guns were taken from hiding places by the officers, who declared these were the type of weapons that victims of the robbery told the police the bandits carried.

COCOANUT OIL SHAMPOO.

Far superior to ordinary shampoo soaps for shampooing. Thoroughly cleanses the hair roots and the scalp without clogging the roots. Does not leave the hair dry, but gives it renewed life and lustre. A very small quantity gives an abundant lather.

MINARD'S LINIMENT FOR SALE EVERYWHERE.

Four Liners are Near Cape Race.

CAPT. HAYES, HERO—RISKED LIFE WITH SMALL CREW TO SAVE S. S. JOHN S. THOM IN ICE CRUSH.

Four incoming liners are already reported off Cape Race, all of them in the race for the lower gulf and it will be an exciting finish in the first laps of the race as to which will pick up the pilot first at Father Point. So far the Metagama of the Canadian Pacific Steamship is leading but the new Anchor, Donaldson liner Athena from Glasgow is very close to her as also is the Canadian Pacific Montcalm. Both are newer and probably faster boats. The White Star liner Canada-wirelessed to-day from outside Cape Race that she would pick up her pilot at Father Head at 5 a.m. on Sunday, so that she too is very much in the race.

The relative positions of the liners inshore, according to wireless messages received from their commanders is as follows: Athena 430 miles east of Cape Race yesterday noon, Metagama 330 miles east of Cape Race last night, Montcalm, 400 miles east of Cape Race yesterday morning, (at present fog bound). The positions of the Canada and Ausonia are not known.

30 FREIGHTERS COMING.
In addition to the liners there is a notable fleet of freighters enroute to this port, nearly thirty, it is estimated and of these 6 have already reported, namely the Calvarona, the only ship reported so far to be in the gulf proper, the Hoerda, San Manuel, Berwin, Arisano, from Halifax) and Canadian Squatter. About twenty other freighters are behind this vanguard. The Calvarona is now near Cape Ray and stopped steaming overnight while in field ice.

GENERAL ICE BREAK.
What is thought by river authorities to be first signs of a general push in the river ice is now making itself manifest. The ice in the river has been pushing all day in Lake St. Peter and at Bellmouth although it is stationary here. It pushed also for many hours and Sorel as the result was very evident at Three Rivers where the Government Signal station reported at noon to-day that the ice was now passing down stream the full width of the river.

But as to the incoming liners and whether they will have all the proper aids to navigation, the situation is still uncertain. To-day the Department of Marine state that Sunday or Monday will see the first buoys put down and it will take some days to complete the task because there will be lots of shore ice to pass out after the main channel is clear. This shore ice may damage the buoys and if it is plentiful the buoys will not be put down immediately.

The winter spar buoys, on which some smaller boats are depending for daylight navigation, are also uncertain. R. A. Willard stated to-day that these buoys may have shifted in the ice and their position has not yet been verified by his staff. He will have more definite information to give out at a later date, he stated. Another river authority stated recently that the present ice movement indicates that the ice will be all out of the main channel by April 27th.

Further details regarding the sailing of the river steamer John S. Thom, which spent the winter in the ice, three miles from Sorel, as told recently by G. F. Smith, chief claims agent of Dale & Company, underwriter for the vessel, indicates that the exploit was absolutely without precedent in the history of the St. Lawrence.

The push in the river Tuesday afternoon which carried the John S. Thom down 1,000 feet, would have been disastrous if it had gone about two thousand feet further. This lucky stroke for Captain Hayes, however, was more than compensated by his bravery. He and only a few of the crew stayed on the ship overnight and helped to work her when the next push in the ice started. Few of even the most experienced river men would have taken such a risk.

As it was the John S. Thom got a good squeeze, and will probably show the result when in drydock at Sorel, where she now is. The night before the big event the crew left the ship, but a few returned. Capt. Hayes is still at Sorel, and his verbal report on the incident is being awaited with interest.

REWARD BEAUCHEMIN.
Two operations carried out from the shore were almost as exciting and hazardous as when the river itself took a hand in the game. Albert Beauchemin, contractor, and well known in Sorel, took a "no cure, no pay" contract from the underwriters to cut a channel to the ship through the ice. More than half of his contract, which included freeing the ship herself from adjacent ice, had been completed, but the channel was not finished when the ice shoved.

There are 4 grades of roofing felt selling in Newfoundland, "BARRETT'S" is guaranteed the highest grade.

"Barrett's" 1, 2 and 3-ply felts have been in use in Newfoundland for more than 50 years.

The best roof known in America is a "Barrett" roof, "Barrett's" felt ONLY is used in putting on a "Barrett" Roof. Ask any Architect.

"Barrett" 1, 2 and 3-ply felts are really made of felt saturated with genuine coal tar--the 2 and 3-ply felts have a layer of coal tar pitch between each ply.

"Barrett's" felts are made to give good wear, therefore they cost more than roofings made of paper saturated with diluted asphalt.

If you use "Barrett's" felt instead of common felt, a new roof covering for your house may cost you \$2.00 more for the whole roof.

Roofs covered with "Barrett's" felt are secure, the extra cost of one or two dollars (for the entire roof) is money well spent.

Which felt do you intend to use?

Architects, Builders and Contractors prefer "Barrett's" Felt.

may1,14,100

the ice from the ship so that she floated in clear water was one of the contributing factors which saved her.

The tug Berthier which cut a channel to within 100 yards of the John S. Thom last December, and then had to give up, was again on the spot at 5 p.m. yesterday and helped to bring in the damaged ship.

In his operations Albert Beauchemin and his gang of 150 men had to resort to dynamite, picks and shovels. Three men had to be kept busy all the time sharpening and repairing the enormous saws with which the ice was cut. During her forced stay in the ice the ship had burned about forty tons of coal. The ashes from this had been tipped over the side and thus, every little while, a snow would cut into a clinker and be put out of use.

Captain G. L. Hayes is an old Furber with captain and he got his experience when he served as master for 15 years on the Furness Withy freighter Sachem running between New York, Halifax, Newfoundland and UK ports.

It was a break down in the Mikula which so endangered the John S. Thom, because had the big icebreaker not been damaged she could have easily reached the boat. "The Mikula is a wonderful boat," Mr. Smith said, "and she cut through ice 40 inches thick with ease. The action of the Government in sending her down to break the jam at Batiscan, although damaged is something we appreciate."

As a risk the John S. Thom represented \$50,000 on the Dale and Company books. She is owned and operated by the Quebec and Lewis Perry Company, of which John S. Thom, of Quebec, is President.—Montreal Star, April 26th.

Note: Capt. Hayes referred to above, commanded the Furness liner Sachem and is well known in St. John's. Capt. Hayes is now employed with Dale & Co. Marine Underwriters of Montreal. Messrs. Dale & Co. are represented in St. John's by Capt. Stewart.

Personal.

Mr. M. M. Basedon, who has been here since January, in connection with the Aerial Survey Co. and who made a trip to the icefields in the Neptune with the "Aveo" aeroplane, is returning to England by the S.S. Digby to-day.

Lady Horwood leaves for England by the Digby to-day, on a holiday and pleasure trip combined.

Canon and Mrs. Jeeves and children left by the Digby to-day on a short visit to England.

Mr. Alex Robertson was a passenger to England by the S.S. Digby, sailing to-day.

TRAIN NOTES—The cross country express went out at 1 p.m., taking several local passengers. The Carboniferous train arrived at 2:30 p.m.

MINARD'S LINIMENT, LUMBERMAN'S FRIEND.

Shortage Follows Seizure of Drugs.

HALF MILLION DOLLARS WORTH TAKEN IN MID-ATLANTIC BY DETECTIVES—AEROPLANE WAITED—THIRD WAS BOOKED FOR MONTREAL—BALANCE FOR WINNIPEG SOUTH.

A shortage of cocaine in Montreal has for the past three weeks made it very difficult for local addicts to obtain the drug without paying exceedingly high prices following the seizure of one of the largest shipments of cocaine that has yet been booked for this city in mid-Atlantic by Scotland Yard detectives.

A shipment of cocaine valued in this country at about half a million dollars was recently consigned to Halifax from a German port. This shipment, on arrival, was to have been divided into three parts. Half was to come to Montreal, and the other part to be divided between the United States and Winnipeg.

Secret service agents working in Germany got wind of the shipment that was to be made, and when the boat docked for a short time, at an English seaport, a band of Scotland Yard detectives managed to stow themselves away. In a short time they discovered the hiding place of the cocaine, and without further waiting, seized the whole contraband cargo.

Upon the arrival of the ship in Halifax the drugs were turned over to the Government.

Waited in Halifax.
Members of the dope ring in this country waited in Halifax up until a few days before the arrival of the boat. They then discovered that their plans had gone astray.

Officers of the R.C.M.P., stationed in Halifax to arrest the receivers, failed to secure any of the men they suspected.

A hydroplane that had been stationed outside Halifax for some time left with some haste about the time the seizure was made on the ocean. The police suspect that the American shipment was to have been smuggled across the border by air.

The people guarding the shipment on board the boat had evidently kept in daily communication with those in Halifax from the time they left Germany. When the communication suddenly stopped, the agents in this country took warning and managed to escape the police.

Officers of the R.C.M.P. are still keeping a close watch on certain Montrealers whom they feel certain were in Halifax waiting for the shipment. They expect that another attempt to smuggle a large amount of the drug into this country will be made shortly, and that the same people will be implicated.

MINARD'S LINIMENT USED BY PHYSICIANS.

To Plant 2,000,000 Trees

Massachusetts will have the biggest tree planting bee in its history this spring when 2,000,000 pines and spruces are set out by cities, towns and private citizens on waste land. Most of the young trees will be sold at nominal cost by the state.

"There has been a decided awakening in Massachusetts to the need of forest conservation," said Chief Forester H. C. Cook recently. "In our state nurseries, in which we raise pines and spruces, we have 1,500,000 trees of the best age for transplanting. There is such an increased interest in this subject that we expect to produce transplantable trees in our nurseries at a rate in excess of 4,000,000 annually."

Cost 2 Cents Per Tree.
The lowest estimated cost of the forest plantings is 2 cents for each little tree. The entire cost probably will exceed \$40,000. In 50 years the trees should be worth \$200,000.

Water supply companies are particularly active in creating forests as a means of conserving rainfall on the sloping lands surrounding reservoirs, said Forester Cook, and cranberry growers are increasing the number of trees planted in the bare acreage around their bogs.

Pittsfield will plant 75,000 trees this year, mainly spruces, in the campaign for forest conservation started by foresters of New England at a meeting in Boston this winter. Other community forest plantings will be made in various parts of the state.

In general the trees to be set out in the western counties are spruce. In the eastern counties the plantings will be of white pine. As a means of combatting the serious ravages of white pine blister rust, the state is offering the immense Scotch pines to be mingled in the new forest areas.

When you are "wandering around again" or functions where full dress is usually worn, don't you feel out of place with a jacket on? Now is the time to leave your order for Full Dress or Tuxedo. The prices for these Suits are remarkably reasonable. For special parades, or social calls, we can give you something within your means in a Prince Albert or Morning Coat. We specialize in these garments.

Household Hints.

Dress cold beef at parboiled vegetables with mayonnaise and serve on lettuce with brown bread sandwiches.

If honey is used in a recipe as a sugar substitute, decrease the amount of liquid used, as honey contains some water.

Round milkweed is quite delectable—parboiled in salted water and served on toast with drawn butter or cream sauce.

The top of a stove is the only portion that needs blacking. The sides if wiped carefully with a cloth, will keep bright.

If withered ripe apples are dipped first into lukewarm and then into cold water, they will be partially restored to freshness.

Richard's Liniment for Aches and Pains.

Exceptionally
Cheering News.

FROM ALL OVER CONCEPTION BAY

The telegraph and telephone wires are pouring in the exceptionally cheering news all the forenoon, which foretells the election by substantial majorities of all of the nine Bennett candidates. The different sections of Bay de Verde are swinging strongly to Grosche and Boddester, particularly in the larger settlements. From Caribou there is a continuous and steady stream of the most welcome news that the Moore forces are outclassing those of his opponent and that Moore will win by a good safe majority. Harbor Grace, Bay Roberts and Spearhead's Bay send along every moment the very best of information, all pointing to a very large majority straight ticket vote in favor of Bennett, Hickman and Archibald. Brigus, Cupids and Fort de Grave send along the same good cheering news forecasting Winter's defeat by Mackay with a splendid majority in favor of the latter. All along the shore from Harbor Main, Avondale, Holywood and down to Topsail the stream of messages indicates great activity in favor of Woodford and Kennedy, very few voters for Jones and a big falling off in the expected vote for Hawes and St. John. Keep on the more than, electors of St. John's, and be active until 8 o'clock to-night. You have only a short time left to rally every voter who has not yet performed his duty. Conception Bay is nobly doing its share, so let us have no slackers in St. John's. Make the victory good and strong and the majority the largest yet given in favor of any party. Don't split a single vote, but mark the straight ticket to the last moment for HIGGINS, FOX AND YINICOMBE in St. John's East. CASHIN, LENIGAR AND HUNT in St. John's West.

The Country is Safe.

VICTORY ALL OVER THE ISLAND.

Don't Listen to the Fake Yarns of the Squires' Hoaxers.

Stand to your guns all supporters of the Bennett party and don't be influenced to give way in the least by any fake yarns spread along the street or published in the press, by the Squires' hoaxers. They are being beaten badly all over the country which is now safe from any further damage by their false and misleading campaign actions. St. John's is going strongly against them too, but by the spreading of reckless misleading stories they are trying to have something from the wreck during the few hours that still remain. Keep your courage alive to the uttermost for you have them on the run, but you will get a splendid finishing touch on the victory by utilizing every moment that is now left. Exhaust the roll to the last man available and keep the six Bennett candidates well up out of sight right to its very top.

Mr. T. Jackman
Could not be Bluffed.

HE CAME ACROSS WITH \$3,000.

Yesterday Mr. Toby Jackman offered through an advertisement in the News a bet of \$1,500, made up of three separate amounts of \$500. First, that Squires does not get two men in St. John's; second, that Coaker does not get eleven men North; and third, that Squires will not get the Government. During the day the certified cheque remained at the News office and no one came forward to cover it. In the Mail, however, an item appeared accepting the bet, with the addition that it made a further offer of \$1,500, that it would win each of the three bets. No sooner was the paper on the street than Mr. Jackman immediately went to the Mail office talking with him \$2,000 to cover the amount stated in the Mail. Those at the Mail office little dreamed that their offer would be so readily accepted and Mr. Jackman was told at first that the money was not there, but that it was Mr. Ben Stafford who was offering the money. After some delay, Mr. Stafford was located and the money was put up and is now held by Messrs. Manning, Rabbits and Parsons, in amounts of \$2,000 each.

Useful Hints.

Dirty cloth may be improved by washing with warm water in which a little borax has been dissolved; let it dry, then so over with a cloth dipped in milk.

One part of turpentine to two of pure olive oil makes a good furniture polish. Keep in a tightly-corked bottle, shake well before using, and apply with fannel.

Stained boards should be washed as little as possible with water. Rub with a little linseed oil when dusty, and polish occasionally with beeswax and turpentine.

Vigorous sponging with ammonia and water will renovate navy suits; and gentle rubbing with fine emery paper will reduce the shininess of places exposed to extra wear.

Every True Supporter

SHOULD GET TO THE BOOTHS NOT LATER THAN 7 O'CLOCK THIS EVENING. DON'T WAIT TILL THE LAST HOUR.

Splendid work is being accomplished by the Opposition campaign enthusiasts in getting all the electors possible during the day to record their votes in favor of the Bennett candidates, and so their activities are the cause of great rejoicing. There is no doubt the work so far promises a glorious victory but this is no reason why all who have not yet voted should take it easy by waiting till the last moment. We strongly advise those who have not yet marked their ballots to proceed as quickly as possible to the booths otherwise their votes may be blocked by an overcrowding at the last hour. If you can't reach there right now or before 6 o'clock get there at any rate before 7 o'clock. It is dangerous to delay for a good majority is essential and the larger the better. Beat the Government forces in their attempts at reducing the help of those whose minds may still be wavering and let the whole country see how strongly St. John's has spoken in favor of Bennett and Better Times.

Aeroplanes for Labrador

START TO BE MADE SHORTLY.

The Aerial Survey Co. (Nfld.) Ltd., are shortly sending three aeroplanes to the Labrador Gold Fields at Star Bay, A. Martinsyde, piloted by Major F. S. Cotton, President of the Company; a Westland Limousine, piloted by Major H. H. Kitchener; and a large Westland passenger aeroplane, piloted by Mr. T. K. Breakell. The start will be made from the Company's base at Botwood, Newfoundland, and a stop made at Hawkes Bay to pick up gasoline and supplies. From Hawkes Bay, Rigolet, Labrador, should be made in one nonstop flight. The object of the trip is to make an aerial map of all the area on which claims have been staked, and to leave a survey party there to carry on the work throughout the next two months so that when the first prospectors arrive the Company will be in a position to give them any assistance they require. The winter has been an exceptional one and it will be therefore late in the summer before steamers can get through. The Straits of Belle Isle are completely blocked with ice, which is almost unheard of. The Aerial Survey Co. (Nfld.) Ltd., intends to bring back a number of samples, and the planes are taking up all the necessary equipments, etc., to carry on the preliminary work. The machines are able to carry 12 passengers and three pilots and are completely equipped with living gear in the event of a forced landing. Never before in the history of the world have aeroplanes been used in this connection, and the valuable position which the Hawkes Bay Trading Co., and the Labrador Gold Deposits Ltd., will find themselves, in the event of the flight being successful is hard to realize. The river and country surrounding the area on which claims have been taken out are not mapped, and the Aerial Map, which will be made on the flight, and the information obtained will place these two companies in an enviable position. Much credit is due to these companies in realising the value of the use of aeroplanes in this connection, and it is hoped that their efforts will be amply rewarded. Both the Hawkes Bay Trading Company and the Labrador Gold Deposits Ltd., hold a considerable number of claims, including most of the claims on the mouth of the river. The Aerial Survey Co. (Nfld.) Ltd., has been carrying out survey work and has made flights all through the last winter, notwithstanding temperatures as low as 40 degrees below zero. The winter aerial surveys of timber limits has been a great success and show more details than summer surveys. The company's aeroplanes as a result of continuous experiments in overcoming freezing troubles and difficulties of landing on various surfaces, are able to fly at all times in Arctic weather, as a result of which the preliminary survey party will be able to commence work months earlier than otherwise would have been the case. It is difficult to realize that the aeroplane is the only means of reaching Labrador in the winter.

Curliana.

TROPHY NIGHT A BIG SUCCESS.

On Tuesday evening the presentation of prizes took place at the Curling Rink. The prizes were presented by the President, Mr. Gerald Harvey in his usual pleasing manner, after which a most enjoyable smoker was held, the following taking part:—Messrs. A. Williams, C. R. Duder, W. Wallace, A. Lawrence, K. Trappell, D. McFarlane, E. W. Taylor, J. S. Hamlin. Altogether the evening was a most enjoyable one and a very fitting close to a most successful season.

Skim milk will remove fresh ink-stains from a carpet. Older stains, if the carpet colours are fast, should be rubbed with salt and vinegar mixed, and the mixture washed off with soap and water.

Poultry Notes.

HOW TO AVOID IMPERFECT EGGS.

Judging from market reports and the large number of complaints received recently from correspondents, there is reason to fear that the laying of thin-shelled eggs is becoming far more common. This is a serious matter and should receive the careful attention of poultry breeders. It is probable that the defect in some extent due to the very large number of eggs laid out and the rapidity with which they are produced by hens in which the laying character has been so strongly developed as the result of selective breeding for high fecundity.

An egg receives its coating of shell material (in the form of a thin liquid secretion containing lime and hardening quickly) during its passage through the lower section of the oviduct and just before it is discharged into the cloaca. When the egg passes through this section too rapidly, as it does in the case of some very heavy layers, this secretion is not supplied in sufficient quantity to give the egg a thoroughly sound shell.

Breeding the Trouble.

By continued breeding from such birds the trouble is accentuated and the defect becomes a fixed character in the offspring, and it is probable artificial incubation, which makes it possible for the operator to hatch out thin-shelled eggs, which under natural methods would be crushed by the sitting hen, helps to perpetuate the character.

But the most common causes of thin-shelled and otherwise malformed eggs are: (1) An insufficient supply of shell-forming material; (2) over-fat condition of the hen, and (3) the use of a too stimulating or forcing diet.

The first of these is easily remedied by giving the hens a constant supply of the lime required for the production of properly shelled eggs. This can be provided in the form of sea shells broken up small or old mortar. Oyster shell is undoubtedly the best, but it is in short supply and consequently high in price. Cattle, limpet, and other varieties of shell are good.

Over-fat Hens.

When the trouble is due to over-fatness of the hen she should be reduced by strict limitations of her food and compelled to take ample exercise by burying all grain in deep litter. An occasional dose of Glauber salts also will be found useful.

Possibly the commonest cause of thin-shelled, shell-less, and malformed eggs is the use of highly stimulating, concentrated foods, and also of condiments and spices. In such cases they should at once be discontinued and the bird put on a plain diet consisting largely of grain thrown in the litter and a limited quantity of mash made up of bran, middlings, and boiled green vegetable, and omitting all meat or fish meal.

When the treatment has had the desired effect and shells again become normal, the use of meat or fish meal may gradually be resumed. Observation is a main essential, and a watchful eye should be kept on the eggs, which, in many respects, are a reliable indication of the hen's condition. On the first signs of any roughness on or imperfections in the shells the necessary treatment to ward off the threatened trouble should at once be adopted.

Wins Scholarship.

Sackville, N.B., April 21.—Dr. John Line, M.A., S.T.B., Professor of Systematic Theology at Mount Allison University, received word a few days ago that he had been awarded a biblical essay prize (value about \$500) by Trinity College, Melbourne, Australia, for an essay on the subject: "Reconsideration of New Testament Inspiration in the light of Modern Criticism," in connection with the annual biblical essay contest, which is open to graduates of all universities in the British Empire. This award contest was instituted by Trinity College about three years ago; but this is the first prize to be awarded, as hitherto the essays have not reached the required standard.

Mr. Line is to be congratulated upon his success.

Household Notes.

Cut the heels of old rubbers, leaving a narrow strip of rubber for the ankle strap and you will have a good pair of sandals.

Forks is delicious cream and served on strips of toast or parbaked and served cold with mayonnaise and sliced hard-boiled eggs.

A Fine Recommendation:

"I never use any other cooking fat but Crisco. It is positively the purest and most economical shortening I ever used. Whenever we talk of cooking between ourselves, I always recommend Crisco, for I have found by experience that you can be sure of your results with Crisco."

The lady who writes in this splendid statement about Crisco goes on to say that she would rather pay double the money for Crisco, than use inferior brands of shortening.

Good housekeepers are daily getting on to Crisco. Have you tried it yet in your home? At all grocers.

Airship Picks up Plane.

The giant semi-rigid
now being constructed at
for the army air service
used as an airplane carrier.
was learned officially. Plans
officially completed. It was
equipped it with 12 small
planes, which not only can
be taken up by the airship while
in flight, but which also can
be taken from the moving airship.
The airship just completed at
Field, Mineola, L.L., by air
force, have proved that air-
ships are used as airplane carriers.
The general type of apparatus
used on the planes and for
the ship has practically been
developed. It is possible that fur-
ther experiments will result in
this apparatus.
Experiments at Mineola,
Virginia, have been kept secret
and were placed on the
board of the airplane and a hook
of the size was suspended
from the basket of the airship. After
the airship was in full flight, the air-
plane was lowered under the basket
and regulated his speed to
that of the airship. The picking up
of the plane was quite easy.

**Prizes including \$1000

Tickets 10c. each.**

From Rubbish.

science has discovered
something useful. Refuse
is especially constructed
and the best produced gen-
erators to drive the dynamo
electric light. The ashes
make concrete. Soap suds
driving away to pollute
the rivers and streams are strained
and pressed into fuel
which has burned give out
more heat than coal gas would pro-
duce. The carcass of a horse may be
used as fuel. The hair
of the haircloth, etc. need to
be treated. The hide makes good
fertilizer and gelatin is obtain-
able from the bones. The bones re-
main, handles, and buttons.
The refuse are prussiate of
potassium, from which
the most beautiful artificial
diamonds are manufactured.
The diamonds and coals are used
for the same purpose, and the addi-
tion of them adds an air of
refinement to a plain dessert.

Here We Are Assembling Spring Needs.

That's the business of the moment at this Store--getting together all those things the New Season insistently clamours for; putting them before you and marking them in our own peculiar way--moderately low, thus assuring you ample returns for every dollar expended here.

Friday, Sat. & Monday

Day by day
In every way
The people said
We were going to have
Bennett and Better Times.

In a few hours more the people will have spoken.

The very favorable news from the outlying settlements gives Bennett's candidates in St. John's unheard of majorities.

The illiterate vote in Conception Bay districts shows how little the vote for the Coaker-Squires candidates will be.

It's Bennett everywhere.

The North no longer is owned by W. F. Coaker.

The election of Bennett candidates refutes this time-worn statement.

To use Coaker's own words: The Gratters must go!

They are going, and at 8 p.m. they will be gone.

By the time many of our readers review this issue, the ballot boxes in the outport districts will be locked up and the verdict delivered.

St. John's East and West, however, have the last opportunity.

From all accounts Bennett will be our next Prime Minister.

The result is already told in the city districts where Cashin, Linegar, Hunt, Higgins, Fox and Vincombe are elected, but the race is for record majorities.

The illiterate vote up to 1 o'clock is overwhelmingly in favor of Bennett's Standard Bearer.

Challenges of the Opposition were not taken up.

Wagers are still waiting for acceptance.

They are beaten to a standstill.

Conception Bay voters did their duty nobly and well.

With this issue will cease this column and the writer takes this opportunity to thank the many friends—contributors and readers for their good will and support received from time to time, and to those with the now accepted and generally acclaimed slogan which was originated by the writer in this column, I wish you all good cheer and

BENNETT AND BETTER TIMES!

PUBLIC NOTICE.

Notice is hereby given to all parties concerned that under the provisions of the Election Act 1913, and the Proclamation of His Excellency the Governor of date 7th April, booths for the Districts as set forth below will be opened in the building known as the "King George V. Seamen's Institute" on the 3rd day of the present month of May, from the hour of 8 o'clock in the morning until 8 o'clock in the evening, for the purpose of receiving the votes of electors of the respective Districts duly qualified to vote at the ensuing General Election of Members to serve in the House of Assembly.

Booths for the Districts concerned will be opened as follows, namely:

For the District of—

St. Harbo	1 Booth
Twillingate	2
Fogo	1
Bonaville	2
Trinity	2
Bay de Verde	1
Carbonara	1

The Tablets Cured Her! Does Your Case Resemble Hers?

For twenty years I suffered from heart trouble and nervous prostration. I had constant pain in my left side, shoulder, left arm, and could not get my hand up to my head. Often times I was confined to my bed, and not able to do the least work. I had palpitation, faint spells, cold hands and feet, shortness of breath, (often at night had to be propped up in bed to get my breath) and could not sleep on my left side. I could hardly eat anything without its causing great pain and gas in my stomach. There was a great feeling of oppression about my heart which made it impossible to do even the lightest work, and I did not know what it was to get a good night's sleep. I can hardly describe my serious condition when beginning to take your Tablets. I had consulted several of our best physicians and taken many kinds of patent medicines without success. I sent for your Tablets and took four boxes. I can truthfully say I now have no symptoms of my former troubles, can eat anything I want, sleep well, do any kind of work and have gained fifteen pounds in weight in three months. It is needless to say that your remedy is the best in the world.

MRS. M. E. BROWN.

52 Houses

situate in the city are listed on our books for sale; prices ranging from \$600.00 to \$8,000.00. Included in the above are some of the most modern construction of the day, and some are below the cost of replacement owing to the owners, in some cases, being hard strapped. Every house on our list is away below the prices prevailing the last few years. Our list is being augmented every day. We sell for CASH or for the best terms obtainable in the market to-day, thereby you have the opportunity of putting your monthly rent towards the purchase.

Wallace Silverwear.

Is your Table Silver as good to-day as when you bought it?

Have you noticed that at the parts most exposed to wear, the plate has become worn?

Do you think this condition of your Silver is in keeping with your idea of a well appointed table?

Then why not, when you decide on replacing your old ware, give place to it with the "Wallace" Brand; the Silver that refuses to wear and is guaranteed without time limit.

Start with the Tea Spoons and gradually complete your Set with the one pattern—there are several for you to choose from and the price is very moderate.

Tea Spoons cost \$8.00 for a Dozen.
