SMOOTH, HARD CASTINGS—EASILY POLISHED

Every woman who prides herself on a well-appointed kitchen wants her range to be well polished, look clean and have a new, elegant appearance. This is not possible if the eastings are not right-all castings in the "Pandora" range are made from the highest grade of pig-iron (no scrap of any kind is used) the best skilled moulders in the land do the moulding, the utmost care and latest machinery is used in the cleaning, and when the intended every part has a smooth, hard, black surface which takes a beautiful, rich polish and never has that grey effect always seem in poor castings.

Special flue construction in the "Pandora" forces the heat around the oven twice and directly under every pot-hole—is a perfect baker and a perfect cooker at the same time.

### Poetry.

Did you tackle the trouble that came your way
With a resolute heart and cheerful, Or hide your face from the light With a craven soul and tearful?

Oh, a trouble's a ton or a trouble Or a trouble is what you make it. And it isn:t the fact that you're hurt that counts, But only how did you take it.

Come up with a smiling face. t's nothing against you to fall down

But to lie there—that's disgrace. The harder you're thrown, why, the higher you bounce; Be proud of your blackened eye!

t isn't the fact that you're licked that counts: It's how did you fight-and why? And though you be done to the death what then?

If you battled the best you could,

f you played your part in the world Why, the critic will call it good. Death comes with a crawl, or come

And whether he's slow or spry t isn't the fact that you're dead that But only how did you die?

An Experiment in Musical Education.

There is being tried in North Syd ney, C. B., an experiment, which, as Superintendent MacKay says, is an object lesson to all the provinces. Ev ery pupil from grade two upwards re eives instruction in vocal music as a part of public education. The total cost to each pupil, including music, is could have sold several times as many lifty cents a year. The only equipfatted chickens if an extra number ment in the line of instruments is a twenty-five cent tuning fork; but behind it is a teacher of wide experience, undoubted capacity, and with

the best training.

In October last, Mr. C. L. Chisholn was engaged by the school board of North Sydney to give instruction in the system known as the "Education al Music Course," used in the public schools of New York, Boston, Philadelphia and elsewhere throughout the United States. At the outset all voices are tested, the bad voices recorded, their owners put by themselves, and allowed to take part in the theory work, but not in the singing. Later, these were tested again,

when many were found to have onsciously discovered their ears and marks used, and the irregular packing of Canadian apples, we were never ing of Canadian apples, we were never in the last Cultivator, on milk fever. I have decided ideas of the Challenge of the

The examination that was held at the close of the year was a striking proof of the work that can be done in a short time in the theory and practise of vocal by a trained and

accomplished teacher. Mr. Chisholm has had nine years training in the best schools of Boson and Europe, and the experience of eleven years of private teaching in three different conservatories.
