## GERMAN TRADE WITH CANADA.

The reciprocity, negotiations between Canada and the United States were closely watched by Germany. When the proposals were first made, the German government communicated with the Washington authorities as to how far the "favored nations" treaties would allow them to partake of the Canadian-American reciprocity agreement. Germany was informed that the matter was still academic, and that the application was a trifle too premature. This week a Berlin despatch states that exporters in general, and the timber and paper trades in particular, "accuse the Washington authorities of bad faith in regard to Customs duties. It is alleged that the provisions of the Canadian reciprocity agreement, although the proposal has now been beaten in Canada, are being partially enforced. Canadian timber and other commodities, it is charged, are being admitted into the United States at less duties than corresponding German wares, although the agreement between this country and the United States of February, 1916, gave Germany unlimited most-favored-nation terms.'

With reciprocity defeated, it is quite likely that the German authorities will seek better trade terms with Canada. Since the removal of the surtax about a year ago, German trade with the Dominion has increased rapidly. This is illustrated in the following figures:—

1909. S1,476,552	\$ 2,501,191
Total exports 6,001,454	7,958,264
. Total trade \$7,478,006	\$10,459,455

While the final figures for Germany's total foreign trade in 1910 have been published; final figures of the trade between Germany and the various countries have not yet appeared.

The value, in 1,000 marks, of the total export and import, excluding precious metals, for the last five years, is as follows:—

years, is as follows:	Import	Export.
	8,021,890	6,359,029
1906	8,743,976	6,845,224
1907	2 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	6,398,572
1908	7,664,021	
	8,520,125	6,592,242
1909	8,934,126	7,474,661
1010	3,004,000	

ing vio

50

These corrected figures exceed the provisional official estimates, given in a preliminary report, as far as the export is concerned, by 7,500,000 marks, and as far as the import is concerned by as much as 325,000,000 These discrepancies are explained by the fact that in the official preliminary publication the provisional totals are, as far, as the export is concerned, to a very limited extent only calculated upon the basis of the values established for the preceding year, but entirely so far as the imports are concerned. The steady growth of the German foreign trade may be exemplified by the fact that in 1880 the value of the import amounted to only 2,803,400,000 marks, and that of the export to only 2,923,400,000 marks. The two values together (foreign trade as such) amounted in 1880 to 5,700,000,-000 marks, but for the year 1910 they amount to 16,400,-000,000 marks. The rise in the three decades, therefore, amounts to almost 200 per cent.

We may expect to hear from Germany in the near future. Its competitors for Ganada's import trade will do well to keep an eye on that enterprising and progressive nation.

#### COMBINE LEGISLATION.

It is somewhat of a coincidence that anti-combine legislation should have been levelled at the United Shoe Machinery Corporation almost simultaneously in Canada and in the United States. The first complaint brought under Canada's, Combines Investigation Act late last year was against that corporation, which is a branch of the American concern, while last week the parent company was indicted for alleged violation of the Sherman anti-trust Act. The case against the company will probably he heard in the American courts during the winter, while we may expect every day to hear that the Canadian board of investigation has commenced its sittings. The United Shoe Company leases its machines, and shoe manufacturers who use them pay royalties, which, the company's president states, average less than 2 2-3 cents per pair of shoes in the manufacture of all types and grades. The highest royalty paid on the most expensive shoe is less than 5½ cents per pair.

Mr. S. W. Winslow, the president of the United Shoe Machinery Company, has issued a lengthy statement to the public in defence of the company's operations. In view of the Canadian interest in the matter, it is printed elsewhere in this issue. He says that the object of the consolidation of the three companies of which the United Shoe Machinery Company was formed was not to destroy competition. "The purchase was to reduce the cost of production of the machines, to improve the quality of service furnished without increasing the cost to the shoe manufacturer, and to give to each manufacturer who might wish it an opportunity to get from a single company under these improved conditions such of these machines as he might need in that department of his factory in which soles and heels are attached to uppers-the machines in what is known as the bottoming-room.'

Speaking of the beneficial results of the consolidation and the company methods, both to the shoe manufacturer and the consumer, these have been manifest, he adds and continues: "By leasing machines to all manufacturers, large and small, on the same terms the company enables the small manufacturer to have a credit with every leather dealer, previously entirely unknown; to establish himself in business, and continue business without tying up a large and perhaps a prohibitive amount of capital in his machinery, conscious that he is under no disadvantage in competing with the large manufacturer, who perhaps might feel better able to tie

up a portion of his capital in costly machinery, subject to more rapid depreciation than the machinery employed in any other large industry."

The Canadian board of investigation may conduct their enquiry without undue haste. It should prove an easier matter for Canada to deal with the complaint against the branch company after the United States has dealt with the indictment against the parent company.

### OF THE LONDON MARKET.

What is the condition of the London market in view of contemplated Canadian flotations there? The answer appears to be one of little encouragement. The best authorities overseas speak of a lengthy crisis, which becomes more perplexing as it unfolds. The situation, at first purely financial, was regarded as a natural reaction from over-speculation. With the Morocco controversy there entered the international element, followed by a succession of serious strikes and uncertainty at many points in continental Europe.

While these causes have aggravated the situation, the primary cause has, perhaps, the greatest meaning for Canada. The origin of the unsettled and unsatisfactory financial state in London, seems to have been in the over-production of new securities and the artificial inflation of old ones. There is a dian financiers and promoters. Our security issues being prepared for the London market should be only of the best type, and at present as few as possible. That these facts are recognized is apparent by the failure of the city of Montreal to receive any bids from financial houses for its \$7,000,000 worth of bonds. To maintain our credit in London and to prevent sacrifices, considerable caution is necessary on our part.

#### SMALL CHANGE.

That Toronto wholesale merchants have confident in Northern Ontario is evident from the attitude they have taken regarding the business failures which to sulted from the recent Porcupine fire. Almost all the storekeepers who were forced to assign on account of the conflagration were allowed a cash balance and given sufficient credit to re-establish their businesses.

There is no longer possibility of the Canadian for dollar bill being mistaken for an one dollar bill as the design has been improved. On the new bill the word 'four' has been printed in large type across the top in both corners, while on the back the same change is duplicated, a word being printed across the figure 4 at both ends of the bill. The Lord and Lady Minto series is being used on these bills.

Many stories are being circulated as a result of the legislative attack upon the trusts of the United States. A New York paper says it is understood that the United States Steel Corporation, fearing further action against it on the part of the government, will dissolve the trust as it now exists, and come to Canada, where a new company will take out a charter and become a holding company under the Canadian law of the various divisions of the trust in the United States. The despatch adds that if they can get the legislation, or even the charter under the general act, which they desire in Canada, other trusts will follow their example. We scarcely dare to speculate upon the change likely our economic geography should United States combines find a haven in Canadian charters.

# UNITED SHOE MACHINERY COMPANY.

### Laws of Canada and the United States Are Levelled at Big Corporation—Company's President Issues Lengthy Statement.

The United Shoe Machinery Company is being assailed both in the United States and in Canada. In the neighboring republic, the company was indicted last week for alleged violation of the Sherman Anti-Trust Act. One indictment charges a monopoly of the trade in shoe machinery and a conspiracy to monopolize the same. The trial will take place

conspiracy to monopolize the same. The trial will take place some time during the winter months.

A complaint under the Combines Investigation Act of Canada was lodged against the United Shoe Machinery Company of Canada, a branch of the United States corporation, late in 1910. The company was alleged by Quebec complainants to be acting in restraint of trade. Judge Cannon of Quebec granted a request for an inquiry under the law. The application went through a maze of technical protests to the highest court, the privy council. A writ of prohibition, effective until September 15th, was obtained and that alone restrained the board of investigation from proceeding under the order of Judge Cannon. The Canadian board of investigation will probably begin its hearings shortly.

shortly.

In the meantime President Sidney W. Winslow of the United Shoe Machinery Company, Boston, in view of the indictments in the United States, has issued a statement to the public in defence of the company's operations. He says

in part:—
"I feel that the public should be made acquainted with

"I. The item of machinery is the only item of cost in the manufacture of shoes which is lower to-day than in 1899, when the United Shoe Machinery Company was formed. the following facts:

As to Royalties Paid.

"2. The company has lowered many of its charges and has never increased royalty charges or charges for materials furnished manufacturers. The initial cost of the machinery equipment of a shoe factory is lower to-day than ever before.

"3. The average royalties paid by a shoe manufacturer for the use of all machines furnished by the company in the manufacture of all types and grades of shoes is less than 2% cents per pair of shoes. This includes the Goodyear welt shoes, on which the highest royalty paid on the most expensive shoe is less than 5% cents per pair.

"4. Goodyear welt shoes constitute less than one-third of the total annual production of the United States. On 164,000,000 pairs of shoes out of the total annual production, including Goodyear turn shoes, McKay shoes, Standard screw and loose-nailed shoes, the amount of royalty received will average less than 1% cents per pair, and this is all the company receives for the manufacture, installation, use, care, and service in keeping the machines in running order and for instruction of operatives.

Three Hundred Machines.

#### Three Hundred Machines.

"5. The company now makes over three hundred different machines, some of which are leased to manufacturers, many of which are sold outright and most of which can be either leased or purchased as the shoe manufacturer may prefer.

may prefer.

"6. The United Shoe Machinery Company has many millions invested in machines in shoe factories, and its returns on this investment are not as large, proportionately, as the returns received by the successful shoe manufacturers

"7. Of the 7,106 individual holders of the stock of the corporation 4,325 are residents of Massachusetts and more than half the stockholders are women.

"8. The operator's on the company's machines in shoe factories are much more regularly employed and receive higher wages than under the conditions existing prior to the formation of the company.

#### Notes of Wages Paid.

"9. The wages paid at our Beverly factory average higher than those paid in any other factory of equal size in Massachusetts. According to the official report of the Massachusetts State Bureau of Statistics, the City of Beverly held first place in Massachusetts in 1908 with an average annual wage of \$640.17. The average of the Beverly factory exceeds that of the city. The weekly wages in 1910 averaged \$15.75.

\$15.75.

"fo. The provisions for the comfort, safety, health and happiness of the employes at the Beverly factory are not excelled and perhaps not equalled at any other factory in

11. The company's business has always been carried on frankly and above board.

The nature of our leases has been a matter of public knowledge for years. The leases have been printed in the public press over and over again. The well-known fact that the public are not familiar with the technical details has given certain critics of the company an opposituality to misrepresent the real facts.

"We have given the Department of Justice every facility for conducting its investigation.

"The company has been advised from the day of its organization by able and high-misded counsel, who have been thoroughly familiar with every page of its history and in whose judgment its course has not in any way been opposed to the letter or the spirit of the law."

"We have never believed that we were doing business in violation of the law and the action of the Grand Jury has not changed our opinion on that point.

#### Consolidation of Three Companies.

the consolidation of which the United Shoe Machinery Company was formed, were not competing companies. The principal machines which each made did not interfere with the machines made by any other of the three companies.

"The Goodyear Shoe Machine Company chiefly made machines for sewing the sole to the upper in welt shoes and various auxiliary machines which helped to perfect the shoe. The Consolidated & McKay Lasting Machine Company made machines for lasting a shoe—an entirely distinct operation. The McKay Shoe Machinery Company made machines for attaching soles and heels by metallic fastenings and furnished material for that purpose.

#### Object of Consolidation.

"The object of the consolidation was not to destroy competition. The purchase was to reduce the cost of production of the machines, to improve the quality of service furnished without increasing the cost to the shoe manufacturer and to give to each manufacturer who might wish it an opportunity to get from a single company under these improved conditions such of these machines as he might need in that department of his factory in which soles and heels are attached to uppers—the machines in what is known as the bottoming room. as the bottoming room.

"13. The beneficial results of the consolidation and the company's methods, both to the shoe manufacturer and the consumer, have been manifest. By leasing machines to all manufacturers, large and small, on the same terms the company enables the small manufacturer to have a credit with every leather dealer, previously entirely unknown; to establish himself in business and continue business without tying up a large and perhaps a prohibitive amount of capital in his machinery, conscious that he is under no disadvantage in competing with the large manufacturer, who perhaps might feel better able to tie up a portion of his capital in costly machinery, subject to more rapid depreciation than the machinery employed in any other large industry.

#### Competition in Manufacturing.

"Competition in the shoe manufacturing industry in consequence is more free than in any other extensive industry. There are over 1,200 individual concerns in the United

States.

"Under the royalty system a shoe manufacturer can start in business with a modest capital, and although shoes are made on a close margin of profit, the capital being in liquid form can be turned several times a year, thus giving the manufacturer a substantial profit on the total volume of business while giving the consumer the benefit of the narrow margin of profit on each pair of shoes. There is no other large industry of which this is true.

"The watchword of the company has been efficiency—efficiency in the manufacture of machinery, efficiency in inventing and improving machinery, efficiency in keeping that machinery in the best possible operating condition.

### To Keep Machines Repaired.

"It is and has long been the policy of the company to maintain at its own expense a large force of skilled mechanics whose business and duty it is to attend and keep in perfect repair all machines leased to manufacturers of shoes.

"The shoe manufacturer cannot practically give his attention to the manufacture or repair of machines. He must center his efforts, skill and energy on making shoes. For him this company furnishes, keeps in repair and improves all the machinery necessary for making shoes.

"It gives practically without charge all the benefits of research, study and invention in the art of shoe machinery."

15

#### WESTERN CANADA.

#### New Field For Canadian Cattle—Western Stocks Are Active-In The Wheat Markets.

Monetary Times Office. Winnipeg, September 26th, 1911.,

It would be an extravagant statement to say that every-body is satisfied with the result of the election, but it is not beyond the truth to say that men of both parties are generally better suited with the fact that the result leaves no room for doubt and the certainty rather than questioning, is the only thing in order. Business men know the base upon which their affairs will rest and the course of trade will

resume its wonted flow.

The weather is still unfavorable for the western farmer to get on with his work, and while it is likely that October will be a good month, some anxiety is being felt. Business men in Winnipeg and in the East are preparing for one of the biggest years in their history.

#### New Field for Canadian Cattle.

There has been considerable activity on the local stock exchange during the past few weeks. South African Warrants which have been selling at a high figure took a slight reaction last week, and the selling price now stands at 850. The Canadian Fire Insurance Company, while not active, has been in demand, and 130 was bid for this stock at the close of the week with none offering. Great West Permanent continues to be an active seller and shares change manent continues to be an active seller, and shares change hands almost every day. Western Canada Flour has been in demand, and 125 was offered, but holders are asking 130.

Brokers state that there has been quite a renewed activity in Canadian railroad stocks since the reciprocity

agreement failed to carry, and this will undoubtedly continue to be the case.

Mr. C. N. Bell, secretary of the Winnipeg board of trade, has received a letter from Mr. Phillipp Roy, Trade-Commissioner General for Canada in Paris, which relates to a probable field in France for the sale of Canadian cattle. The letter is as follows:—"I have met several business men here who seem to think that because of a very dry season and a disease which has been acting badly with cattle this year, France would have to import cattle extensively. Owing to an immediate demand for meat, fat animals will have to be imported.

"I am told, although not officially, that the government, for these reasons, will probably reduce the import duty on fat as well as on lean animals for this year, and it has occurred to me that it might be a splendid opportunity for our Canadian exporters to get better known in this great market, and establish here a new line of business which might remain in the future.

"If we can be of any assistance to the Canadian exporters, either by securing further information for them or otherwise, we are entirely at their disposal."

#### Industrial Bureau Busy.

Interest in Winnipeg is clearly marked by the fact that the Industrial Bureau of this city is receiving an average of seventy-five inquiries a day from different parts of the world-but thiefly from the United States and Great Britain-asking for information about Winnipeg as a city for Britain—asking for information about Winnipeg as a city for the location of new business enterprises, and about Western Canada as a field for trade development. The Bureau is able to quote facts and figures which show that there is no better field in the world for this sort of expansion and growth, and very few that are anything like as good. Inquiry so extensive as this and answers so accurate and convincing, must have great effect upon the growth of Winnipeg during the next few months.

Among the facts cited by the Industrial Bureau, are those relating to growth of the banking business in the West. This is set forth clearly in the following figures:—

	Br	anches i	n I		
Year.	Man.	Sask.		Alta.	Total.
1901.	52	6	*19		71
1902	53		*23		76
1903	64		*42		106
1004	86		*74		160
1905		39		41	170
1966	104	48		49	201
1907	146	91		77	314
1968	161	116		89	366
· 1909	164	131		97	392
1910	171	187		140	498
1911	187	306		200	702

\*North-West Territories.

The course of the market was somewhat checked per ing the issue of the Dominion election, but the defeat of reciprocity furnished sensational markets in the United States. In Winnipeg the result had no particular effect except that of extreme nervousness, but across the border prices took a of extreme nervousness, but across the border prices took a big jump. On Thursday the spread between Winnipeg May and Minneapolis May was 4½c., on the following day it had mounted to 11½ cents, while other months also proportionately advanced. The decision of the ballots led to heavy selling on our local market, and a generally wide mixed trade, with good demand for spot cash wheat. Contrary to the experience in the United States our prices ruled slightly lower than before the election. Export houses were free sellers, but values were scarcely in line for an extensive business. It will probably be some days before our market becomes normal in tone. After a time the usual factors of supply and demand will influence the course of international

#### Shortage of Milling Wheat in United States.

With regard to the position in the States consequent or the shutting out of free Canadian wheat, it is pointed out that the expectancy of the passing of the measure was an important factor in shaping values, and that farmers parted with their winter wheat early and in liberal quantities. The United States, it is stated, is now on a domestic basis. The shutting out of Canadian wheat, on which the great milling interests of the spring wheat states were counting for the season, makes the United States domestic situation a strong one, and the mills, deprived of choice Canadian wheat, we be forced to buy hard winter wheat wherever it can secured. American reports speak of the pronounced bullish sentiment now prevailing, and in view of the bullish nature of the world's statistical situation, suggest that the market will undoubtedly work higher.

#### PERSONAL.

Mr. James Findlay, of Glasgow, Scotland, has been cointed fire chief of the North Vancouver, B.C., fire department,

Mr. J. C. Hyndman, of the International Harvester Company, Brandon, Man., has been appointed to the com-pany's agency at Paris, Frances

Mr. Robert H. Arkell, of head office staff of the Merchants Bank of Ganada, Montreal, has been appointed manager of the Stratford, Ont., branch.

Mr. J. F. Jones, Canadian divisional manager of the International Harvester Company, was in Brandon, Man, recently, arranging for the transfer of the business to Mr. D. Gus, the newly-appointed general agent.

Mr. Borgi Eyford, who the past eighteen years has been in the employ of the United States Government as been in the employ of the United States Government as immigration inspector between Pembina, N.D., and Winning Man nipeg, Man., has resigned.

The Duke and Duchess of Connaught will sail for Canada about October 7th, when His Royal Highness The Canada. The Canada Articles of Canada Articl following will be the staff accompanying them: Major H. C. Lowther (Scots Guards), military secretary; Captain T. Rivers Bulkeley (Scots Guards), controller of the household and equerry; Captain W. Long (Scots Greys), A.D.C.; Captain H. C. Buller (Rifle Brigade), A.D.C.; and Captain E. S. Worthington (R.A.M.C.), medical officer.

#### BANK OF ECYPT SUSPENDS PAYMENT.

A Canadian Press dispatch on Tuesday stated that the Bank of Egypt, Limited, has suspended payment. In a notice to depositors, the directors say that advices from Egypt make it apparent that the bank cannot provide suffcient cash to meet current obligations, and the company will file a liquidation petition. The suspension came as a big surprise, although at the last annual meeting of the bank it was annuanced that the profits had decreased because of the had contain

the bad cotton crop and keen competition. It is expected that the institution will be able to meet its liabilities.

The Bank of Egypt Company was incorporated in 1856 and registered as limited in 1887. The authorized capital is £1,500,000. R. L. Barclay is chairman of the board of directors, which includes Lord Grenfell and Lord Rathmore. From 1899 to 1909, inclusive, the bank paid annual dividends from 12 to 18 per cent. In July, 1919, four per cent. was from 12 to 18 per cent. In July, 1910, four per cent. was

#### NEW INCORPORATIONS.

Six Companies Have Capitals of a Million Dollars and Over Seventy-two New Concerns.

Seventy-two companies were incorporated last week, the

six companies have capitals of a million dollars and over, the largest being the Rose Gold Mines, \$3,000,000, and head office in Toronto. The National Live Stock Exchange, Montreal, has been capitalized at \$2,000,000, while the following have capitals of \$1,000,000: Ontario Gold and Silver Mines, Toronto; American Porcupine Gold Mining Company, Toronto; Queenston Heights Spring Water Company, Niagara Falls, Ont., and the Merchants Trust Company, Calgary, Alta.

Real estate and financial controls.

Real estate and financial concerns are again in evidence

in this week's list of companies granted charters.

The Vancouver Harbor and Dock Extension Company, with capital of \$10,000,000 and head office in Vancouver, B.C., was recently incorporated. This company has been invested with wide rowers including the account of the company has been invested with wide powers, including the carrying on of a general shipping business, and will undertake large harbor developments on the coast. Mr. C. F. Pretty is the promoter of the company, and the directors are identified with Pretty's Timber Exchange, Limited, recently chartered. Considerable British capital has been interested in the concern.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Medicine Hat, Alta. Scottish Securities, \$10,000. Shand Siding, Sask .- Maple Leaf Mines, \$50,000. Lacombe, Alta. Lacombe Drug Company, \$10,000. Clover Bar, Alta. Great West Coal Company, \$150,000. Mountainview, Alta.—Smith Bros. Company, \$23,000.
Regina, Sask.—Illinois-Saskatchewan Land Company,

Purple Springs, Alta. - Aspern Beach Realty Company,

Redcliff, Alta. - Redcliff Clay Products Company,

Pleasington, Alta. Pleasington Threshing Company,

Castor, Alta.—United Farmers' Elevator Company, of Castor, \$10,000

Lougheed, Alta. - Farmers' Elevator Company, of Lougheed, \$10,000.

Athabasca Landing, Alta.—Athabasca Light, Heat and Power Company, \$10,000.

W. M. McClemont, W. J. Squibb.

Brantford, Ont.—Joseph Baker's, \$50,000. J. A. Baker, London; J. E. Baker, R. E. Baker.

C. Asmussen, C. Bramm, A. Asmussen.

F. E. Hewitt, M. R. Riddell, S. Castrucci. \$250,000.

Cobalt, Ont.—Mines Water Supply Company, \$40,000.

J. W. Mahon, J. D. O'Brien, W. G. Atkin.

Berthier, Que.—Papeteries de Berthier, \$50,000.

Lavallee, M. A. L. Aubin, J. O. Daviault.

P. P. Salter, Ottawa; J. B. Galarneau, Hull.

Saskatoon, Sask .- Oddfellow Temple Company, \$50,000 Clinkskills, \$35,000. Electra Syndicate, \$5,000.

Moose Jaw, Sask.—Moose Jaw Grain Exchange, \$10,000.

Moose Jaw Land and Investment Company, \$60,000.

Megantic, Que.—Lake Megantic Realty Company, \$100,000.

W. G. Craig, D. Murray, W. H. Craig, Kingston.

Walkerville, Ont.—Dominion Paint Works, \$30,000. F. W. Davis, New York; T. R. Wyles, Chicago; P. D. Whatley, Detroit.

Niagara Falls, Ont.—Queenston Heights Spring Water Company, \$1,000,000. G. W. Clarke, H. F. Upper, F. W. Griffiths.

Ottawa, Ont.—Ottawa Uplands, \$100,000. J. F. Orde, M. G. Powell, N. W. Lyle. Consolidated Securities Corporation, \$100,000. J. W. Anderson, J. Gray, R. J. Simpson.

Quebec, Que.—Compagnie Caron & Jacquiers, \$45,000.

L. Eudore Caron, J. V. Jacquiers, Lyons; France; Hon. P.
A. Choquette, Quebec. Compagnie d'Amiante de Thetford
Centre, \$500,000. L. P. Pelletier, N. Belleau, E. Baillar-

Edmonton, Alta.—Belgian Investment Corporation of Canada, \$100,000. Athabasca Townsites, \$20,000. Lewis Bros, Cafe Company, \$3,000. Edmonton Cold Storage Company, \$150,000. British American Transcentinental Coal and Timber Company, \$100,000. Canada Lecomobile Company, \$10,000. Allan Haynes, \$10,000.

Calgary, Alta. A. B. Cushing Lumber Company, \$100,000. South-East Land Company, \$250,000. Merchants Trust Company, \$1,000,000. Westera Canada Supplies Company, \$60,000. Macleod Security Company, \$18,000. Stone and Clay Company, \$100,000. North-West Gas Appliance Company, \$50,000. Bertram J. Vine Company, \$60,000. Donnelly, Watson & Brown, \$500,000. Calgary Collieries, \$300,000. \$300,000.

Montreal.—Canada Silk Company, \$100,000. W. F. Chipman, R. O. McMurty, F. G. Bush. National Live Stock Exchange, \$2,000,000. L. A. David, H. J. Elliott, C. J. E. Charbonneau. West Valley Land Company, \$70,000. E. R. Decary, J. B. Peloquin, E. N. Heibert. Montreal Vehicular Traffic Company, \$10,000. G. R. Starke, W. A. Clark, W. Walker! Utilities, \$20,000. W. Johnson, A. R. Johnson, L. H. Boydl. Arbours Hotel Company, \$40,000. H. A. Letourneau, A. Richard, A. Ecrement.

Winnipeg, Man.—Cadillac Motor Sales Company, \$50,000. A. Anderson, W. L. Garland, E. T. Sirett. Manitoba White Granite Pressed Brick Company, \$125,000. L. F. Willan, J. A. Gowley, J. Smith. Selkirk Securities Company, \$100,000. C. H. Locke, C. A. Crawley, H. Dunk. Northern Nursery Company, \$60,000. F. L. Gillilas, H. K. Gillilan, J. F. Coughlin. Toronto Plaster Company, \$150,000. H. W. Cox, W. J. Sheppard, H. A. Carman, C. E. Miller Company, \$20,000. C. E. Miller, E. C. Duffin, F. W. Dudley. South Winnipeg Realty Company, \$50,000. F. W. Sparling, M. A. Law, P. J. Proctor.

Toronto. Canadian Union Land Company, \$150,000. S. C. Smoke, W. C. Chisholm, J. G. Smith. Paper Bottle and Package Company, \$200,000. W. A. Mackenzie, C. Swabey, J. N. Forrest. Toronto Brick Company, \$600,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock. Ross Gold Mines, \$3,000,000. J. M. Ferguson, E. V. O'Sullivan, J. F. Coughlin. Toronto Plaster Company, \$150,000. H. W. Calkins, D. E. Kennedy, Mrs. K. R. Calkins. Tecumseh, Hockey Club, \$15,000. C. L. Querrie, K. A. Williams, Toronto; A. R. Hall, Montreal. Ontario Gold and Silver Mines, \$1,000,000. E. G. McMillan, W. B. Sturrup, J. R. Corkery. American Porcupine Gold Mining Company, \$1,000,000. J. M. Godfrey, T. N. Phelan, T. B. Malone. Toronto Hockey Club, \$15,000. P. J. Quinn, Toronto; F. G. Robinson, A. R. Hall, Montreal. Security Transfer and Registration Company, \$100,000. J. W. Sain, G. B. Strathy, F. R. MacKelcan, Gibson, Taylor, Strathy & Company, \$50,000. J. C. Gibson, A. B. Taylor, Toronto; E. K. Strathy, Winnipeg.

### MUNICIPAL ASSESSMENT NOTES.

According to the estimate of the Assessment Depart-nt, which will issue official returns to-day, Brantford's ulation has reached 23,700, an increase of 1,500 over population has reached 23,700, that of last year.

The assessment of the city of Toronto for the coming year has been compiled. It shows a total valuation of \$359,945,000, which is an increase of \$59,193,000 over the figures of the current year. The details for the coming year are:

... \$154,346,000 Business 153,024,000 38,443,000 14,131,000

Total for 1911 ...... The population is estimated at 374,672, an increase over the past year of 32,681.

The St. Catharines Broom and Brush Company, of St. Catharines, Ont., may locate a factors in Calgary, Altal The Northwestern National Insurance Company of Milwaukee, Wis., has obtained a license authorizing it to carry on a general fire insurance business in Manitoba.

The United States is being gradually aroused on the subject of the fire risk. The Western Union Association has sent out 250,000 pamphlets, suggesting simple methods of fire prevention and improvement of hazards. A "Fire Prevention Day" has been officially Minnesota, Michigan, Montana, Nebraska, and South Dakota. Dakota.

#### CANADIAN FLOTATIONS ABROAD.

#### Preparations Being Made to Make New Issues in London Period of Rest Has Nearly Expired.

Already we are apprised of activity in the London market in new Canadian flotations. There has been a long period of rest, from July to the present date, with only one Canadian issue made overseas. This was 20,000 shares of Canadian issue made overseas. This was 20,000 shares of £1 each of the Kamloops Land and Development Company, Limited. The company's head office is in Manchester and its bankers are Lloyd's Bank, Limited, and the Imperial Bank of Canada. Mr. W. H. Homfray, of Kamloops, is

the managing director.

Had the city of Montreal been able to raise its loan of £1,500,000, that issue would undoubtedly have been made in the London market in the near future. A banking authority in London is quoted as saying: "A state of congestion continues in the Canadian municipal and provincial government market, which is one and the same. This congestion continues in the Canadian municipal and provincial government market, which is one and the same. This congestion is accentuated by the political and the financial situation, and the failure of London to tender, for the Montreal loan is partially the outcome of the general disapproval in the London market of the method of offering securities by public auction to the highest bidder. This practice is adopted by practically no other important borrowers the world over."

#### Shawinigan Power Stock Issue.

Cable advices state that one of the first Canadian new issues promised for the London market this fall will be Shawinigan Power Company, \$1,000,000 common stock, to

Shawinigan Power Company, \$1,000,000 common stock, to be offered to existing shareholders at \$108 per \$100 share, on the basis of one new share for every nine already held.

This company has authorized capital stock of \$10,000,000, of which \$8,500,000 was subscribed and paid-up at the end of 1910. Its authorized bond issue is \$5,000,000, of which at the same time \$4,846,500 was outstanding. There is perpetual consolidated mortgage debenture stock of \$2.00. is perpetual consolidated mortgage debenture stock of \$3,-500,000, bearing 4½ per cent. This debenture stock was made a charge on the company's undertaking, subject to made a charge on the company's undertaking, subject to the outstanding issue of first mortgage bonds, and especially secured by a deposit of various securities held by the company in subsidiary undertakings, including the entire stock and bond of the North Shore Power Company, of Three Rivers. A comparison of the gross income of the Shawinigan Water and Power Company for 1916 with 1909, shows a gain of \$171,858, while a similar comparison of net revenue shows a gain of \$85,950.

#### Periods of Rest.

The numerous Canadian flotations in embryo may be issued in London despite the heavy load of undigested securities still in that market. No Canadian issues were made overseas in August or September, 1906, and only three in October. In 1907 the same two summer months were devoid of Canadian issues, while seven were made during the remainder of the year. In 1908, no issues were made in August and only one in September. The rest of that year accounted for ten. In 1909, August and September were again the quiet months, not a single Canadian issue being made. From the end of September to December, inclusive, ten Canadian issues were made. Last year, July was an unusually busy month for Canadian issues abroad when nine were made, two in August and one in September. Autumn activity was marked by sixteen Canadian flotations. This year, as noted above, only one Candian flotations. This year, as noted above, only one Canadian issue has been made since the end of July.

#### SUINC CITY FOR FIRE LOSS.

Thirty-five actions for damages aggregating over \$20,been entered against the city of Montreal by residents of the newly-annexed Longue Pointe ward, who claim that they suffered damage to this extent through a fire which burned twelve houses and a tenement there, and which was only enabled the gain such headway by insufficient water supply and lack of ample protection against fire. They claim that the city, upon annexation, should have installed adequate fire which may apparatus adequate fare-tighting apparatus.

There will be no new developments in connection with the York County Loan and Savings Company until early next year, when it is expected that a second dividend of 25 per cent. will be declared to the shareholders.

. 1

#### FOREICH CAPITAL FOR CANADIAN BANKS.

French interests have acquired \$250,000 of the stock of the Bank of Vancouver. This is another illustration of the the Bank of vancouver. This is another infustration of the increasing interest of foreign capital in Canadian bank shares. The Banque Internationale of which Mr. Rodolphe Forget, M.P., is president, is backed by at least \$7,000,000 of French capital. The Dresdner Bank of Germany invested \$1,000,000 in the Sovereign Bank of Canada, now defunct. Its investment remains in the country as funct. Its investment remains in the country as the Dresdner Bank agreed to turn over its Canadian interests to the new company formed to take over the Sowereign Bank's assets. American capital is considerably interested in the Weyburn Security Bank which commenced business January, 1911.

Large and numerous purchases have been made in Great Britain of Canadian chartered bank shares. These investments extend over a greater period than five years, in approximately \$1,125,000. This sum represents but a small percentage of the total percentage of the total percentage. British investment in bank shares. As is known, The Molsons Bank sold \$2,000,000 worth of its stock to a London syndicate.

A fairly large amount of foreign capital, according to "Capital Investments in Canada," a new book published by The Monetary Times, has been placed in Canada by the purchase of Canadian bank shares. The following table gives details as to the approximate amount:-

Germany	 096,150
France	 284,750
Italy	 32,700
Spain .	 12,350
Sweden	 3,300
Japan .	 2,100
Belgium	 1,650
Servia	 1,500
Austria	 1,250
China	 1,200
Russia	 800
Turkey	 750
Brazil	 600
Holland	 400
Cuba	 100
Mexico	 . 50

A part of these amounts may be held by Canadians resident abroad.

#### BELL TELEPHONE TO ISSUE MORE STOCK.

The Bell Telephone Company has issued the following circular to its shareholders: "At the meeting of the directors held at the office of the company on the 13th day of 13th day of September, 1911, acting under the powers conferred them by the stockholders at the special meeting sheld February 22nd, 1906, it was decided to increase the paid up capital of the company from \$12,500,000 to \$15,000,000.

"Each stockholder of record the 30th September, 1911, is entitled to take, at par, shares of the new stock in the proportion of one share for every five shares now held.

"Subscriptions will only be accepted for full shares. Holdings that are not multiples of five shares justed by the purchase or sale of rights, but the company will neither buy, sell nor adjust rights.

"The right to subscribe will expire at 1 o'clock in the afternoon of the 31st October, 1911. All stock not taken subscriptions then on file at the Treasurer's Office, will disposed of as the directors shall determine.

"Stockholders who take new stock must file their subscriptions, and subscribers under purchased rights must file the assignment under which such rights are a with their subscriptions, at the Treasurer's office, 1 o'clock in the afternoon of the 31st October, 1911.

"Sellers of rights will not subscribe therefor.

"Payment at the rate of one hundred dollars for each share must be made at the office of the company, Montreal, as follows:

"\$40 per share on January 2nd, 1912.
"\$20 per share on April 2nd, 1912;
"\$40 per share on August 1st, 1912.
"Receipts for the amounts paid will be issued in change for each payment which will carry interest at current rate of dividend, and stock certificates will be issued at the date of final payment." st-

## PULP AND PAPER POSITION.

### Canada Enjoying the Low Tariff-American Manufacturers are Complaining.

Mr. John Norris, chairman of the Committee on Paper of the American Newspaper Publishers' Association, has issued a statement showing that the defeat in Canada of the reciprocity agreement has expanded the free zone for pulps and paper so as to include all of the favored nations. His statement follows:—

"Canada's rejection of reciprocity raises a question with respect to the favored nation treaties that is unique. Unlike the items contained in section 1 of the Reciprocity Bill, the paper and pulp clause, which was section 2, abolished the duty on Canadian pulps and paper subject only to a condition precedent that the pulps and paper must be made from unrestricted woods. from unrestricted woods

"The importers of pulps and paper from Germany, Norway and Sweden claim that under the favored nation treaty the products of these countries are entitled to the treatment that Canada obtains when the products of pulps and paper section, which cannot be nullified except by a repealing Act of the American Congress, and such repeal is highly improbable.

"The importers of pulps and paper from Germany, Norway and Sweden claim that under the favored nation treaty the products of these countries are entitled to the treatment that Canada obtains when the pulps and paper are made from unrestricted woods, and that the tariff on those articles is automatically abolished under like conditions. Treasury Department officials say no similar case has ever arisen in this country."

Paper makers in the United States think that they have been unfairly treated and that the action of Congress in putting paper in a class by itself and removing the duty independent of the passage of reciprocity is open to severe criticism. They point out that the Tariff Board reported that Canada had a natural advantage in making paper that more than balanced the tariff. On paper not made from Crown land wood, there is no duty. But American manufacturers have received no immediate hurt. Canada's surplus of paper is small. The acreage of freehold timber available for the paper mills is fimited. "When it comes to building new mills," says an American critic, "the American will be on an equal footing with the Canadian. The latter has no start. Most of the future development in the paper industry will naturally be in Canada, for raw material and water power are both plentiful there. But it will be four or five years, at least, before conditions are greatly changed. In the meantime the United States is losing several hundred thousand dollars a year in duty, and it is doubtful if the price of paper will show any reduction."

A Washington dispatch states that practically all the

A Washington dispatch states that practically all the wood pulp and print paper produced in New Brunswick until August 1st, 1912, will enter the United States free of duty. This is made possible by a revised rule made this week by the Acting Secretary of the Treasury, Mr. Curtis, under the only operative clause of the Canadian reciprocity agreement.

#### New Law of New Brunswick.

The Surveyor-General of Customs of New Brunswick advised the Treasury Department that the new law of that province restricting the exportation of wood pulp and print paper did not apply to lands operated under licenses issued or renewed prior to October 1st, on which date the act becomes effective. The lands are used under long-term laws, governed by yearly licenses, and August 1st is the date for renewing these licenses. Consequently until that time there will be no American import tax on pulp wood or print

there will be no American import tax on pulp wood or print paper originating from those lands.

Regulations also were issued by Mr. Curtis governing the taxation of Canadian pulpwood and print paper coming partially from Crown lands and partially from private lands. American Customs collectors will insist upon sworn statements showing the percentage of origin, assessing duty on products of Crown lands where the importation is restricted and entering the remainder free. and entering the remainder free.

Following the purchase of the assets of the Sovereign Bank by the International Assets Company on August 3rd, the liquidator states that no information can be given with regard to the probable settlement until all the assets have been realized upon.

## NOT QUITE EIGHT, MILLION PEOPLE

#### Is Canada's Population-This Will be Shown by New Census Figures.

The preliminary figures of Canada's fifth census, which was begun in June, are complete with the exception of the returns from Yukon and the Northwest territories. According to the facts at present available, the population of Canada has not quite reached 8,000,000, as some phophets had predicted. The returns show that Toronto and Montreal have made the largest gains in population, the former the greatest percentage of gain and the latter the largest gain in numbers. numbers.

The Maritime Provinces of New Brunswick and Nova Scotia have not grown as have Quebec and the other provinces. The gains in New Brunswick and Nova Scotia are confined practically to Halifax and the mining sections.

### Large Cains in Quebec,

The Province of Quebec will show large gains both incommon and country; all the cities and towns increased and the increase included the rural districts. In Ontario the population of the rural districts has declined, notably in Western Ontario, from which there has been a large immigration to the west since the last census. This has been partially offset by a great increase in population in Northern Ontario, in the four districts of Nipissing, fast and West Algoma and Rainy River and Thunder Bay, where the population has more than doubled. All the western provinces show large increases, the largest percentage of gain being credited to Alberta. The cities of Winnipeg and Calgary show the largest gains of any of the western cities.

#### Manufacturers Have Increased.

Mr. Archibald Blue, chief of the consus and statistics bureau, said that a glance at the figures relating to manufactures showed many surprising gains and instanced the city of Hamilton, Ont. whose manufacturies have increased more than one hundred per cent, since the last census. The cities of Montreal and Toronto would show similar gains.

The census of the district along the west shores of Hudson Bay and west to the Height of Land was taken under the direction of the Royal Northwest Mounted Police, and is complete, showing a population of fitteen hundred Eskimos and Indians and a few white and half-bred trappers. The enumerators there and in the Yukon and North West districts had to travel thousands of miles by canoe and horseback and on foot in some remote sections of the far north the duties were performed by missionaries and the men of the Hudson Bay Company. The census of the Arctic waters was taken by Captain Bernier, the explorer, who has just returned. returned.

## Quessing at Redistribution.

The large increase in the Province of Quebec may raise the basis of representation in the House of Commons from 25,000 to 28,000. This will result in Nova Scotia and New Brunswick each losing two seats and Prince Edward Island losing one seat. Ontario will certainly gain no members and will lose one or more. The Provinces west of Lake superior will gain about twenty seven additional members, which will increase the membership of the House of Commons after redistribution from 421 to 211 members.

The following population figures of the previous four census years are of interest: —1871, 3,855,761; 1881, 4,324,-810; 1891, 4,833,239; 1901, 5,374,315.

#### COBALT ORE SHIPMENTS.

The following are the shipments, in pounds, of ore from Cobalt Station, for the week ended September 22nd:
La Rose, 238,480; Nipissing, 151,000; Coniagas, 123,150;
Drummond, 120,000; Trethewey, 64,060; Cobalt Townsite, 100,520; Right of Way, 56,080; McKinley-Darragh, 64,050; Cobalt Lake, 60,670; Temiskaming, 40,320; Buffalo, 68,60, Crown Reserve, 50,800; Kerr Lake, 60,870; total, 1,192,950 pounds, or 596 tons.
The total shipments since January 1st are now 37,308,453 pounds, or 18,654 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; In 1905, 2,144 tons, valued at \$1,437,196; in 1906, 5,129
tons, valued at \$3,900,000; in 1907, 14,040 tons; in 1908,
\$25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

#### FIVE COAL FIELDS OF VANCOUVER ISLAND.

#### Nanaimo Area is the Most Important-Some Notes of Great Possibilities.

The five coal fields of Vancouver Island, Nanaimo, Comox, Suguash, Cowichan and Koskeemo, all bituminous fields, are the most valuable on the Pacific Coast of North America. Mr. D. W. Dowling, of the Geological Survey of Canada, considers the Nanaimo field the most miles with a way. these, and gives its area as 350 square miles, with an average thickness of six feet of coal, or a content of 1,344,000,000 tons. Comox is given an area of 300 square miles, and a similar thickness of coal to Nanaimo, giving its content as

similar thickness of coal to Nanaimo, giving its content as 1,152,000,000 tons.

Suguash has an area of 10 square miles, with an average thickness of 3 feet of coal, or 19,000,000 tons. Mr. Dowling made this estimate before any development work had been done cutside that of the Hudson Bay Company in 1848.

Recent development shows this field to have two seams of economic value, hitherto unknown, while diamond drilling shows the coal area to be much more extensive than formerly

#### Of the Cowichan Field.

The Cowichan field has an area of 9 square miles, averaging 4 feet of coal, or 23,000,000 tons.

The Koskeemo field is placed at five sour; an average thickness of 3 feet of coal, or 9,000,000 tons. Cowichan and Koskeemo fields are the only two lying dormant. Attention has been paid to Koskeemo, diamond drilling and geological investigation having been employed with a view to ascertaining the prospects of opening it economically, but so far with little success, swing to the disturbed nature of the country tributary to the Sound. The Koskeemo field is a continuation westerly of the Suouash field, and it is not improbable that the two may be yet found to be continuous. The area is older than either the Comox or Nanaimo fields, and is co-related to the still older formation of Graham I land.

A new field is likely to be added to the above, namely, Alberni. It has been recognized as probable that coal might be found at Alberni, outliers of the Comox formation having been recognized there, and as a result the Alberni Land.

been recognized there, and as a result the Alberni Land Company Limited, in disposing of its lands there, reserved

the coal rights.

#### Coal Areas of the Island.

When the extension of the railway was under construc-tion last fall, the steam shovel uncovered a seam of coal, and the company recently started development on it, with the result that so far as the slope has been run, about 170 feet, a continuous seam of coal of high quality, and of a width of 4 feet has been proved up.

It seems probable that the coal areas of Vancouver Is-

land are good for about three billion tons of coal, or enough to supply 10,000 tons a day for 800 years, so that the people of to-day have not much need to worry over the possibility of the exhaustion of these great coal fields. The Vancouver Island coal fields have produced to date coal to-the value of \$70,000,000.

#### Of the Nanalmo Field.

The Nanaimo field occurs in tion, and has been proved by the developed mines and bore holes to be coal bearing over a length of 55 miles, by an average width of six miles. About the remainder submarine. The basin lies north-west and south-east and dips easterly. The average dip is from five to south-east and dips easterly. The average dip is from five to twelve degrees with variations due to several faults. Its continuity is proved from the old Wellington mine north-west of Nanaimo, to Tumbo Island, near the south-eastern boundary of the Gulf of Georgia area of British Columbia, Mr. W. Blakemore, M.E., representing Mr. A. E. Hepburn, M.E., having proved by diamond drilling the extension of the field to the latter point. Over a considerable portion of the area the coal deposits are probably at too great a depth to be economically workable at present, but toward the western portion of the field they gradually rise to the surface. ern portion of the field they gradually rise to the surface, and their outcrops are traceable from the old Wellington mine to Oyster Harbor.

#### Three Seams of Coal,

So Tar as proved up the Nanaimo field carries three seams of coal of such volume as to be available for economic operation. The lowest seam, known as the Wellington, outcropped at the old Wellington mine, at Nanaimo River and Extension. At Wellington and Extension it was operated by the Dunsmur interests, since acquired by the Canadian Collieries, Limited, and in the vicinity of Nanaimo it is worked by the New Nancouver-Nanaimo Coal Company, Limited.

The Wellington seam is irregular in thickness, having been laid on a floor with numerous depressions and eroded channels, the coal-forming matter accumulating in the basins, accounting for swells in the seam, causing it to vary in thickness from two feet to 28 feet. The average width of the seam is probably nine feet.

The middle seam is the Lower Douglas, and lies on a horizon about 800 feet above the Wellington seam. It is narrower than the other seams, but very uniform in width, running from two and a half to three and a half feet in thickness. It is particularly well adapted to longwall mining. It outcrops at Nanaimo and South Wellington.

#### Notes of Seams,

The Upper Douglas seam occupies a horizon varying considerably in its relation to the Lower Douglas, the two being found at depths apart varying from 22 feet to 120 feet. This seam also outcrops at Nanaimo and South Wellington. This seam also outcrops at National and Counterpart of the In characteristics it is almost a perfect counterpart of the Wellington seam, being laid on an uneven, wavy floor, and thickness from two feet to 26 feet. The roof of varying in thickness from two feet to 26 feet. the Upper Douglas seam is mainly shale, while that of the Lower Douglas is sandstone. The tonnage mined in the Nanaimo field last year was 1,615,160 tons.

### STATISTICS OF THE UNITED STATES.

#### Area Greatly Increased Within a Century-Progress the Country in its Material Resources.

"Statistical Record of the Progress of the United States, 1800-1911," is the title of a small document just is sued by the Bureau of Statistics, Department of Commerce and Labor. It pictures in statistical form conditions in the commercial, financial, industrial and transportation systems of the United States at brief intervals since the year 1800, down to, and in many instances including the year 1911. In those eases in which the subjects considered are measured by Governmental fiscal year periods, the figures for the fiscal year 1911 are included; in those in which calendar year periods are used, statements can only terminate with the calendar year 1910.

Among the interesting facts shown are that the area of continental United States was 843,255 square miles in 1800, advancing to 1,734,630 square miles in 1810; to 2,995,536 square miles in 1850; and 3,026,789 square miles in 1853, since which date no change in area is shown. The population, which was 5½ million in 1800, was 93¾ million in 1911. Public debt, which was 83 million dollars in 1800, teached 2,675 million dollars less cash in Treasury in 1865, the figures of 1911 being 1,015 million dollars.

#### Per Capita Debt.

The per capita debt, which was \$15.63 in 1800, and in 1865 \$76.98, is in 1911 \$10.83. The interest charge per capita, which amounted to 64c. in 1800, and \$4.12 in 1866, was in 1911 23c., and the total annual interest charge, which was in 1866, 146 million dollars, was in 1911, 211/3 million dollars. Money in circulation, stated as 261/4 million doldollars. Money in circulation, stated as 26½ million dollars in 1800, was in 1911, \$3,228,627,002, and the per capita circulation, which was in 1800 \$4.99, was in 1911, \$34.35. Deposits in all the banks in the country cannot be shown earlier than in 1875, at which date they are set down as a little over 2 billion dollars, and in 1910, over 15 billion dollars. The number of depositors in savings banks in 1820, the earliest year for which the forward can be shown was a the earliest year for which the figures can be shown, was a little less than 9 thousand; and in 1910; over 9 million. Government receipts, which amounted to \$2.04 per capita in 1800, were in 1866, \$14.65, and in 1911, \$7.45, or about one-half what they were in 1866. Exports of domestic merchandise which amounted to a million dollars in value in chandise which amounted to 32 million dollars in value in 1800, were over 2 billion dollars in 1911; and imports, which amounted to 91 million dollars in 1800, were 1½ billion in

#### Imports and Exports.

Many other subjects of this character stated by the document in question, include details of imports and exports by great groups and grand divisions, and principal ports through which shipped; the production of principal articles, such as wheat, corn, cotton, coal, sugar, copper, etc., from 1800 to 1910; the attendance in public schools, and sums expended for that work; postal receipts and expenditures; and a few pages devoted to monetary and commercial conditions in the principal countries of the world.

Copies of the publication in question can be obtained by applying to the Bureau of Statistics, Department of Com-

merce and Labor.

#### DOLEFUL STORY OF AMALGAMATED ASBESTOS.

One of the First Big Mergers in Canada is Not in the Best of Positions—Bonds Sold at Low Point This Week,

> Monetary Times Office, Montreal, Sept. 27th:

The sale of \$10,000 of the bonds of the Amalgamated Asbestos Corporation on the Montreal Stock Exchange, at 40, this week, calls attention to one of the most unfortunate flotations of any considerable magnitude which has ever been made in Canada. The previous low point was reached some time ago when some of the bonds sold at 50.

It is now about a year since there arose apprehension that the dividends on the preferred stock of the Corporation

that the dividends on the preferred stock of the Corporation would be passed. Up to that time only one annual report had been submitted, and this report indicated that the company had not been doing any too well, but that at the same time it had been earning far more than its bond interest. It even went to show that the preferred dividends were being earned.

About this time, also, the preferred stock commenced to break, indicating that for some reason or other insiders were getting out. Messrs. Cramp, Mitchell & Shober, of Philadelphia, the syndicate underwriters, in September last, advised the subscribers that they would have to take up their securities which were being carried in the Royal Trust Company. All this coming at the one time caused holders of the Amalgamated Asbestos bonds and stocks to feel pescipiette. It was not till the next financial report of the of the Amaigamated Aspestos bonds and stocks to feel pessimistic. It was not till the next financial report of the company was issued that the holders of the securities became appraised of the seriousness of the situation. This report was issued at what corresponded to the second annual meeting although in reality it was feed as a second annual meeting although in reality it was feed as a second annual meeting although in reality it was feed as a second annual meeting although in reality it was feed as a second annual meeting. report was issued at what corresponded to the second annual meeting, although in reality it was for a period of but seven months, this being for the purpose of changing the financial year of the company. It was then shown that the company, for the period under revision, had earned about \$30,000 less than its bond interest.

Reorganization Was Commenced.

Something in the nature of reorganization took place in company some months ago. Mr. E. B. Greenshields, Something in the nature of reorganization took place in the company some months ago. Mr. E. B. Greenshields, who first was president, retired last year and his place was taken by Mr. Thomas McDougall of the Quebec Bank. Later on, other changes were made in the directorate and also in the management of the company's properties. A policy of retrenchment was introduced and it was understood that the situation had greatly improved. The fact that the bonds stayed around 50 to 60 still showed that they were not regarded as a very advantageous purchase.

Altogether the Amalgamated Asbestos affair has been infortunate from the start. There is now talk of reorganization in connection with the securities of the company. The holders of the preferred and common stocks are appre-

The holders of the preferred and common stocks are apprehensive as to what may happen, and even the bondholders are not very comfortable.

The Amalgamated Asbestos Corporation was formed in the spring of 1909 and was the first of the many mergers which have taken place in Canada during the past few years. The securities at that time were:

Preferred cumulative. / Del Center	75,000 1,875,0 25,000 8,125,0	
------------------------------------	----------------------------------	--

Later on, \$300,000 more bonds were issued, making a total of \$7,800,000.

The underwriting was offered to the public at par for the bonds, a bonus of 25 per cent. preferred and 25 per cent. common stock accompanying the purchase. The issue was a pronounced success, it having been necessary for the subscribers to pay down 20 per cent. only in cash. Arrangements were made to have the Royal Trust Company carry the rest for a certain length of time.

#### Subscribers Signed Agreement.

Each of the subscribers signed an agreement, whereby Messrs. Cramp, Mitchell & Shober, of Philadelphia, had the privilege, subject to certain conditions, to dispose of their bonds at no less than 88 per cent. of par; and the expenses were to be a charge against the bonds.

The first annual report issued by the company showed earnings of \$517,969. The bond interest amounted to het earnings of \$517.060. The bond interest amounted to \$375,000. That is, the net earnings, as shown by the company during its first year's operations, were largely in excess of the requirements for bond interest.

At the present price of 40 fer the bonds, the value of the issue becomes reduced from \$7,800,000, par, to a market value of \$3,120,000. It is claimed that the company has liquid assets in manufactured aspestos, etc., equal to \$1,000,000, which would reduce the risk on the bonds to \$2,120,000, on, a basis of to-day's prices. It is stated that the properties cost the company over \$6,000,000, but it is doubtful is this could be regarded as a legitimate valuation, inasmuch as the whole deal seems to have been upon a wrong basis from the inception.

Many say that the properties were taken over at far more than their actual value. However, at 40, it would certainly seem that the bonds ought to be good enough value. The dommon stock sold as high as 33 in 1909, the preferred selling at the same time at \$11/2. The common continued to decline during 1910 and is now quoted at anywhere from \$3 to \$4 a share.

The preferred sold highest in the spring of 1910, when 98 was touched. To-day, it is quoted at \$20 a share.

All this simply goes to shore how difficult it is to know

quoted at \$20 a share.

All this simply goes to show how difficult it is to know when a deal is right.

Names on the Directorate.

The array of names on the directorate of the Amalgamated Asbestos Corporation was as fige as could be desired, including, as it did, several prominent. Montreal men, as well as well-known New York and Philidelphia people. The names of the Bank of Montreal, the Bank of Commerce and names of the Bank of Montreal, the Bank of Commerce and the Royal Trust Company were used somewhat freely, and although these in no way guaranteed the deal, conclusions were drawn which are costing the subscribers dearly. It is not impossible that, given time, the Amalgamated Asbestos Corporation may pull out and make good, as it owns fine properties in the Black Lake district and, together with one or two other companies, has practically a monopoly of certain grades of asbestos. At present there seems to be a little friction between some of the companies, and it may be that the rivalry is forcing prices to a level which will not permit them to show profits which would justify even bond interest. interest.

#### NORTHERN EXPLORATION COMPANY.

The managers of the Ontario Exploration Company have been moved by the repeated requests for information which have come from this side. The directors have decided to issue to shareholders an interim report and statement of accounts up to June 30.

In response to a specific request for details of the company's position, the following information has been formished a Toronto firm:

furnished a Toronto firm:—

(1) Up to September 12, 1911, there had been sissued 110,425 shares of one pound each of the company's capital.

(2) Options are outstanding on the balance of the unissued capital, namely 280,523 shares.

(3) There is no stock in the treasury free from options.

(4) The Northern Exploration Company still owns.

6,000 shares of Hollinger.

(5) The company also owns r65,008 shares of Ontario Porcupine Gold Fields Development, fully paid, also 17,250 shares on which fifteen shillings per share is paid up, and 95,590 shares on which ten shillings per share is paid up.

(6) The company has cash on hand of 85,000 pounds,

or approximately \$425,000.

The position of the wrecked freighter Ioliet, which was rammed and sunk in the St. Clair River last week by the steamer Phipps, is such a difficult one that the Pittsburg Steamship Company, which owns the boat, has offered to donate her to anyone who will agree to remove her from the channel at once, and will furnish a bond to that effect satisfactory to the government. The Joliet is 282 feet long, and is loaded with iron ore. If the steamship company's offer is not accepted the Jonet will be blown up with dynamite as she lies.

offer is not accepted the Joret will be blown up with dynamite as she lies.

The Springfield Republican emphasizes the need of popular education on fire hazards and fire prevention by the following, taking as its text this item: "A woman poured a quart of gasoline into the marble wash bowl of the toilet room and placed a silk waist in it. She closed the door and returned in about ten minutes. She rubbed the silk between her hands. This generated sufficient electricity to make a spark. The gasoline exploded, the house burned and the woman lost her life. If the woman had known that gaseline evaporates rapidly, that the gas it makes is seven times more dangerous than gunpowder, that a single spark would cause a terrible explosion and that one may generate an electrical spark by rubbing silk cloth—if the woman had known all this there would have been no fire in the house and she would probably be alive to-day."

Deputy Minister of Finance

#### FIRE MARSHALS.

Their Qualifications and Duties-Expense of Fire Protection Cities Should Maintain Adequate Fire Protection.

By Fire Chief Finch, Cuelph.

The fire losses on the continent of America, being as they are, ten times that of the European countries, has raised the question on all sides. "Where is the responsibility?" "Why is it that American losses should be greater?" and again, "Is there a remedy?"

It is a tendency of a great many people to look upon the insurance companies as being the people responsible for the loss. After studying the situation for a time, this belief appears ridiculous as the property insured is not the property of the insurance companies, but is the people's property, and they pay a tax to these companies, who, in return for the same, guarantee them against loss by fire. That tax must be such as to be equal to the losses by fire, the operating expenses of the companies, and also the percentage for dividends on the money invested. This being the case, it is immaterial to what extent the people protect their property, in so far as the insurance people are concerned, for the higher the losses, the greater must be the tax.

Then it follows that the people must create a good

Then it follows that the people must create a good standard of fire protection or pay a high insurance rate for the privilege of not doing so.

The fire protection of the different municipalities is entirely in the hands of the councils of the same, and, as a rule, these councils are composed of people who may have little at stake directly in the matter of fire losses, possessing, as they may residential property, the rates on which being practically hil as compared with the rates on the great stocks of goods carried in the congested mercantile and manufacturing areas.

#### Expense of Fire Protection.

The expenses in connection with fire protection seem to be levied on assessable property, whereas the stocks in the stores, warehouses and the manufacturing areas practically escape the tax for municipal fire protection.

Let us use for an instance a common condition ~ A store in the mercantile area of a city is being assessed for \$5,000 and has a stock valued at \$80,000. The store building is assessed in the municipal tax, while the stock is not, there being but a business tax to represent the stock, and this business tax is 30 per cent. of the store building. Then it shows that a value of \$85,000 is being protected by a tax on \$6,500.

Everything that is subject to destruction by fire should be subject to a direct taxation for the expenses of fire protection, and every municipality should be required to furnish protection facilities in accordance with the value therein represented. This may, in part, be responsible for conditions creating, the necessity for government supervision where the fire hazards are concerned, that the causes of fire may be gathered to that office, and there studied by practical men in that work

may be gathered to that office, and there studied by practical men in that work.

It is in the causes of fire wherein the remedy for the prevention may be discovered, and these causes are numerous, but of them all the one to be most dreaded is that of incendiarism. When the motive for incendiarism is burning for the insurance, the chances for success are studied by the person setting the fire. As a result the losses are heavy from such sources.

The sources through which the causes of fire are being investigated are generally the insurance companies involved, and they, owing to the bad feeling created towards them on account of the investigation, will hesitate before ordering a fire inquest, and the feeling locally under such conditions account of the investigation, will hesitate before ordering a fire inquest, and the feeling locally under such conditions may be such as to cause the inquest to be a farce, and the wrong in this way may never be rectified. If these investigations were conducted by a party from the outside of the municipality, the fear of local influence would be removed, thus overcoming that difficulty.

#### City Should Maintain Adequate Fire Protection.

When the causes of all fires are collected into one office the tendency will be to create a general condition of safety by the use of suggestion from a practical standpoint. Better fire by-laws may be made and applied universally, as fires have a univertal influence. For instance, we may find one city that takes the greatest care in having adequate fire protection, spending a suitable amount annually to maintain an efficient service, and there may exist in the same province another city that will scrimp the fire protection system to the last dollar. Is not the city that is providing

good protection influenced in its insurance rates by the neglect of the city not doing so? Yes; it is the universal tax that pays the universal losses, and to offset the injustice done the careful city it will be necessary to create a universal influence, that the careless city be forced to be not a menace to the insurance rating of that area. There is a view other than that relative to financial losses, that of danger to life in public buildings. There are many buildings in this province that are veritable death-traps; and the provincial government is directly responsible for some terrible conditions, no doubt unthinkingly; nevertheless they exist

We have schools that are under the supervision of an inspector, who may not realize the necessity for a fire-escape, thinking they may the architectural beauty of the building. We have fire-escapes on schools that are unpractical for the purpose they are meant for, and the same may be applied to hotels and factories.

With the hotels of the province, matters relative to fire are in the hands of the license commissions. With the schools of the province it is in the hands of school boards. With the factories it is in the hands of a factory inspector, who may previously have been a clerk or a machinist. He may be a person who has not spent one hour of his life studying matters of fire prevention engineering. With the opera houses, lodge rooms, public auditoriums, etc., matters relative to fire protection are left in the hands of city councils, who create municipal by-laws never to be enforced owing to local influence. We have the man whose life is busy in channels other than the one he is given the authority to act as judge. You find where the man who studies these conditions, having authority, and whose judgment may be tolerated, but not necessarily acted upon, must give was for the man having the influence to get these jobs. The for the man having the influence to get these jobs. public must be subjected to the hazard that as a result must exist, has existed and does exist, a monument of incompetency, and engraven thereon as an epitaph the story our fire losses.

#### Duties of Fire Chief.

Let us take a peep at the inside works of the present day municipal fire department regarding matters of conditions for the safety of the public in public buildings. I wi quote a sample of a part of a certain by-law relative to the duties of the chief: "Visit all schools, churches, theatres, factories, hotels, and all public buildings in the city where a large number of people are accustomed to assemble for the purpose of ascertaining the means of ingress and egress, and generally to make investigation regarding the construction thereof, in order that in case of fire he shall know what manner to direct the work of extinguishing such fire. Thus it is that by-laws are made making it the duty of the chief to simply look at fire traps, that he may know how to extinguish a fire that neight occur in them.

The chief may find conditions that are extremely dangerous to the public. For instance, he may find in a theater gerous to the public. For instance, he may find in a theam a middle gallery having a seating capacity of several hundred, having for a fire excape exit an outside flimsy iron stair of three feet width, this being the only emergency exit from this part of the house. There may exist numerous other dangerous conditions that might be mentioned, and while it may be his duty to report on such conditions to his while it may be his duty to report on such conditions to me committee, there the matter may stop after his reports have been distributed to the respective parties concerned. These few points, of the many that could be mentioned, are sufficient to demonstrate the necessity of a commission in the provincial legislative offices composed of practical men in this work. We have in this province that element of practical men—men who have spent whole lives in this work, and who study the results of experiments in the arts of coping with fires and conflagrations, receiving as they do coping with fires and conflagrations, receiving as they do a report of all the principal ones, in addition to the experience acquired in their own work. Then is it not reasonable that from this plant of the conflagrations. that from this element competent judges in matters relative to fire conditions may be found?

#### Duties of a Fire Marshal.

The duties of the office of fire marshal are to receive reports of all fires occurring in the province from chiefs of fire departments; where none exist, from the county constables of the respective counties, and to investigate, or cause to be investigated, the causes of fire should they be known. It should be his privilege to conduct an inquest, if such should be deemed by him to be necessary, and be given the authority to call witnesses for the same, having the same power in this matter as the existing corner. To receive power in this matter as the existing coroner. To receive reports as to the conditions of all public buildings relative to their safety in the event of fire, and to create a standard of fire/ escapes suitable for the class of respective purposes as to strength, capacity and practicability. To receive reports from fire chiefs as to the safety of public buildings, and where it is impossible to have them made safe through

# BENEFITS OF GOOD LIFE INSURANCE.

Some True Stories Told by a Life Insurance Manager of Forty-five Years' Standing-Some Talking Points for the Agent.

#### By William H. Orr.

Thomas Wilson, one of my subsequently most successful writers, came in early one morning, at the beginning of his life insurance experience, slapped down his rate-book and exclaimed

"I cannot do anything with those people. They had a meeting last evening at which a special lecturer showed them some most captivating figures as to how much cheaper it would be for them to pay \$8 entrance fee for a certificate in the Grand Order of Successful Relief, and 40 cents for mouthly dues, and at age 37, a monthly assessment of \$1.50, thus making the yearly cost after entry only \$22.

Our lowest is \$23.72."

"And did they all conclude to go in like a flock of sheep, without looking at what you could do for them in our company?"

"Yes, most of thems to help start a new hive or court "I cannot do anything with those people. They had a

our company:
"Yes, most of them, to help start a new hive or court,
but I am satisfied quite a number of them will be declined."
Well, we don't want any left-overs. But what did he show them as an equivalent for the stability of a regular company, and the cash return in case of lapse, or the borrowing privilege?"

#### What Was Offered.

"Oh, well now, he did not dwell on those points except to say they could put the overplus which an old line company would charge, into a savings bank, and in that way have a good 'pocket reserve' to fall back upon in case the lodge, or the society, broke up. A savings bank would give them 3 per cent. interest on all the money the G.O.S.R. would save them, in comparison, and they would make their payments in easy monthly instalments. Several of them offered to take a twenty-year endowment with me if I would guarantee to return, at any time it was called for, 3 per cent. on the whole premiums that would have been paid."

"Of course you could not do that, either for yourself or the company; because, the carrying of the insurance in our company, though costing less, probably, than in any assessment association, would absorb a good part of any premium, whether life or endowment."

"But could we not give them life insurance, and guarantee them more than what 3 per cent. per annum on the difference in cost would be, and with better security thrown in, supposing a man should desire to withdraw from the one or the other society after five, ten, or more years?"

"Certainly. For instance: the difference on a straight

in, supposing a man should desire to withdraw from the one or the other society after five, ten, or more years?"

"Certainly. For instance: the difference on a straight life contract, age 37, as between \$22 and \$23.72, is only \$1.72 per year, which is \$8.60 in five years or \$17.20 in ten years. Accumulate the \$1.72 per year in a savings bank, and it becomes \$9.40 and \$20.30. But look at what our cheapest life policy guarantees, viz., \$40 in five years, or \$122 in ten years."

"Yes," said Wilson, delighted with that showing, "and I now see that in 15 years our policy guarantees \$213, and in 20 years \$312. An assessment society's pocket reserve of \$1.72, improved in a savings bank, comes to only \$33.00 and \$47.60. The guaranteed \$213 and \$312 which would be over six times as good a result."

#### When Assessment is Unpaid.

"And then look what happens if an assessment is unpaid in any month; or a whole court gets suspended, as occasionally happens. There is then no insurance left—nothing but the \$1.72 which may or may not have been laid aside, regularly, in a savings bank. But in a regular company, the insurance is non-forfeitable. It runs after five years, for about four years longer without any payment of premium; after ten years, it runs for about ten years more, free of any cost, and after 20 payments, will be held good for \$1,000 to the family for about thirteen years more, or 33 years in all."

for \$1,000 to the family for about thirteen 33 years in all. "These, certainly," said Wilson, "are great advantages, and no admission fee or medical fee is asked, nor waste of time attending lodge or committee meetings. And if a man wants to pay in smaller figures, he can take the quarterly premium plan from the beginning, or change to it at any time, can he not?"

"Well, yes," I replied, "but I do not recommend you to work the quarterly payment plan. All companies charge a higher rate for quarterlies, and the universal experience is that such policies lapse before the end of the first year in surprising numbers. The efforts of all companies and agents to help those who can only pay about five dollars at a time, have been very unsatisfactory. Hence the line of a time, have been very unsatisfactory. Hence the line of

success in your work leads towards cultivating a class of people who are able to pay anywhere from \$250 a year up to ten, twenty or forty times as much. As a matter of fact the premiums received by all the regular companies in Canada, average about \$60 per membera apart from the industrial policies issued by three or four companies. The latter are very small policies, averaging a cost of only about \$5 per year, by expensive weekly instalments.

#### Interested in Endowment Insurance.

Interested in Endowment Insurance.

The next day Wilson turned up with some figures he had made for a prospect whom he had interested in endowment insurance. He said: "That lecturer persuaded many of his hearers that it was wasteful to pay money to old liners for endowments, because they could themselves keep the money and use it to better advantage than anything a company could afford to give them. That is, keep the difference and perhaps pay off a 6 per cent, mortgage with it. But I find that any company can give a man far more than 6 per cent, per annum for all the overplus he pays.

"You are probably quite correct, Wilson," said I. "Let us see how it looks in black and white."

"Here is the statement I gave to a man who was about to join the Grand Order of Successful Relief, at a yearly cost of \$22, but without knowing whether he hight not have to pay extra relief assessments, such as all 6id members of some societies have already had to meet. I offered him a 20 Pay Life at \$31.55, so the yearly difference was only \$0.55, for which he would have a cash guaranteed value of \$569, if he surrendered the policy at the 20 years end. Or, instead, if then in poor health, could borrow \$500 against it, and thus keep the policy in force to the end of life. He saw the advantage of this form of contract as a combined life insurance and savings bank, and though he also joined the society, to make up the number needed for a charter, he has promised to take an endowment before the month runs out, after which he would be a year older."

Misfortunes Never Come Singly.

Misfortunes Never Come Singly.

A few weeks later Wilson was canvassing in a certain city street, and noticed a child's funeral procession forming in front of a house. Halting a few minutes, he noticed his prospective endowment as the chief mournes. Meeting him some days afterward, hoping to write him up, he was sorry to learn that the funeral expenses had consumed the money he had intended putting into the endowment. It is an old adage that "misfortunes never come singly." Of course there is no truth in that, any more than that "lightning never strikes twice in the same place. But Wilson had his labor for nothing, all the same. Shortly after the funeral of the child (one of six) the father met with a long siege of rheumatic fever, by which his savings were further depleted, and all chance of acceptance for insurance postponed for many a day, if not for good and all.

The experience here related is only one variety of what every life insurance agent of any lengthe experience has been up against, in his work. In one very recent case, my agent travelled some thirty miles to keep an appointment to the day, made by a man to take \$5,000 and, on reaching the town, found the party had died somewhat suddenly and been buried that very day.

Took a "Five Thousand" Policy.

Took a "Five Thousand" Policy.

The late Hart A. Massey, in 1866, then doing a comparatively small but prosperous business at Newcastle, Ont., took a \$5,000 policy on the life plan, and an agency. But instead of sending in any new business, he soon afterward moved to Cleveland. When he returned, and erected large premises in Parkdale (now part of Torond), he had four insurable sons, three of whom subsequently died in early manhood. On their lives, as helpers in the rapidly expanding business, not less than \$50,000 each should have been placed. But though I canvassed several of them again and again, they were deterred from action by their father having once made the rather thoughtless statement, that if he had his life to live over, he would not pay out money for life insurance. He changed his mind, however, in two instances, to my knowledge. One was when he decided, but too late, to have another policy on his own life; and again, when he consented to his eldest son, Charles, taking \$5,000 with me, though I strongly urged the young man to let me make it a much larger sum. I well remember taking up the new policy to the office, when issued, where the old gentleman and his son, Charles, his then chief business assistant, sat side by side at his desk.

Was Not Adequate.

#### Was Not Adequate.

I told my old friend that this \$5,000 was not at all adequate to cover the financial loss to his business, should Charles, his right hand man, be called away from it by early death, and that five or ten times as much would more nearly suit the emergency. I strongly unged him to at least make the cheque for double that policy's cheap premium,

#### LOCAL INVESTMENTS FOR LIFE INSURANCE COMPANIES.

#### This Plan is Advocated by State Insurance Commissioner of South Carolina-Would Not Work in Canada.

There is no other single agency in the United States comparable to life insurance making for the concentration of wealth in certain centres. This is the statement of Mr. F. H. MacMaster, insurance commissioner of South Carolina, in a communication to The Monetary Times, advocating local investments in life insurance companies.

local investments by life insurance companies.

"The whole wealth of the people of the United States," he says, "is relatively about one hundred and twenty-five billions of dollars. The life insurance accumulations of the people of the United States are relatively about four billions

#### Accumulations in New York.

"The first form of wealth is equitably distributed throughout the length and breadth of the 3,000,000 square miles of our country, as the people labor profitably, and as the natural resources yield their increase. But of the other the natural resources yield their increase. But of the other form of savings, we find that in the City of New York alone, one-half of the entire accumulations are controlled, and over one-half of the annual contributions to it are received. If, with New York, we include four other nearby cities—Philadelphia, Pa., Newark, N.J., Hartford, Conn., and Boston, Mass.,—we find that in these five cities about \$3,000,000,000 of the \$4,000,000,000 of life insurance assets are controlled, and that annually there are poured into these five cities contributions for life insurance purposes of over \$600,000,000,000, or about three-quarters the annual revenues of the Unted States about three-quarters the annual revenues of the Unted States Government, and about six-sevenths of the total income of all life insurance companies in the United States.

#### Invest Where Money is Drawn.

"If the life insurance funds were invested in the securi-ties of the localities from which they are drawn, the centralization of the money power would be greatly lessened, if not wholly destroyed. Certainly very many of the evils growing out of the power of a few financiers to use these immense funds for their own selfish ends would be cured.

"The attitude of many of the managers in respect to "The attitude of many of the managers in respect to the proposition to require the investment of reserves within a State is somewhat surprising. In the first place, they issue the dictum that in case of such legislation 'they' will withdraw from the State. Truly, they are now vested with the power of withdrawing from a State, but it is entirely within possibility for the policyholders to replace an entire management, or wholly to change the policy of a company. I do not now undertake to say that it would be within the power of policyholders in one State to have a court of equity to intervene and prevent the management of a company, especially a mutual company, from withdrawing from a State because legislation requiring the investment of reserves in securities within the State. But the matter is worthy of consideration sideration.

#### Where Charter Is Obtained.

"If the State which creates the life insurance corpora-tion says to it, as most of them do, that it shall invest its assets in real estate, first mortgage bonds of real estate, county or municipal bonds and first mort-gage bonds of solvent and dividend paying corporations, it certainly is no discourtesy for another State to say to that corporation, when it seeks to do business within its bounds, that it must invest the pro-rata accumulations of the policy-holders in this State in securities of this State similar in character to those named by the State from which it gets its

#### Will Derive Larger Benefits.

"The State in which the home office of the life insurance corporation is located will derive larger benefits from the operation of such a corporation than any other State. Then, when this corporation, voracious in its energetic seeking for the people's money, knocks at the door of another State and asks permission to solicit the life insurance savings of the people of that State, is it unwise for that State to say, 'after taking your toll for expenses you must invest that portion of the money which you take from this State, which represents the savings and is known as the reserve in the securities of this State, similar, in character to serve in the securities of this State, similar in character to those prescribed by the laws of your own State?' When it is recalled that the toll for expenses is about four-fifths of the first year's contribution, and about one-fifth of each sub-sequent year's, the demand for the investment of the reserve is moderate.

"New York recognizes this principle in her laws. of her statute relating to investments, section 16, reads as follows: 'Every such domestic corporation doing business in other States of the United States or in foreign countries may invest the funds required to meet its obligations incurred in such other States or foreign countries in conformity to the laws thereof in the same kind of securities in such other States or foreign countries that such corporation is by

law allowed to invest in this State.'
"That the need for such legislation is not more keenly realized by the public is because of the mystery surrounding life insurance, its principles and practices. channel for the investment of the savings of the people of South Carolina is in South Carolina securities. The same is true of every other State in the Union. How will these investments find their natural channels if they are controlled by men in Boston, Mass., New York City, or Newark, New Jersey, or other points 1,000 miles away from South Carolina, and by men who know little of and care less for the particular in men who know little of and care less for the particular interest of such distant States

#### Securities on the Spot.

"Nearby securities of even less interest rates will be exhausted first before securities of more distant localities are sought, regardless of the locus of the policyholders. The securities on the spot will be taken as a general rule, unless legislation compels otherwise.

legislation compels otherwise.

"This is strikingly shown by the following figures: The Equitable Life Assurance Society has in New York State about 21 per cent. of its insurance in force, in New York State is 57 per cent. of its real estate holdings and 75 per cent. of its real estate mortgages. The Mutual Life has only 14 per cent. of its insurance in New York State, 77 per cent. of its real estate holdings and 88 per cent. of its real estate mortgages are there. The New York Life has 14 per cent. of its insurance in New York State, 56 per cent. of its real estate insurance in New York State, 56 per cent. of its real estate mortgages."

In Canada we are not worrying as to which provinces receive the investments of the life insurance companies. receive the investments of the life insurance companies. According to the plan outlined by Mr. MacMaster, the South Carolina insurance commissioner, some of our provinces would suffer. For instance, the premiums received by life insurance companies in Saskatchewan in 1910 amounted to \$946,044. Their investments in the same province totalled \$13,749,439. If insurance companies incorporated in Saskatchewan only, invested money, raised there in that province Saskatchewan would have a zauch smaller sum invested than is at present the case.

#### BANK RATES IN CERMANY.

In connection with the increase in the discount rate of the Imperial Bank of Germany from 4 to 5 per cent. last week it is interesting to note that the average bank rate in Germany for 1910, was 4.35 per cent., as against the average of 3.93 per cent. in 1909. The high average was due to the rises in the rate during the second half of 1910; in the first half the rate had been twice reduced. If the financial resources of Germany are too readily under-rated abroad, they are too readily over-rated at home. The accumulation of capital, though stupendous in recent years, is not in keeping with the expansion of German trade and is not in keeping with the expansion of German trade and industry. During the last thirty years an increase of 20.000,000 in the population had to be "financed." This increase in the population had to be "financed." It is increase in the population has itself necessitated the provision of enormous expitals for food, clothing, housing, etc., which cannot be "tved." In 1910 the available capitals were too quickly absorbed by the revival of trade, for not only has the standard of living increases. not only has the standard of living improved, not only have not only has the standard of living improved, not only have the necessaries of life risen in price, but industry needs larger capitals, because the cost of raw materials has been raised, because wages have risen, because increased amounts are necessary for any extension of works and workshops. In 1910, moreover, there continued the wave of speculation which had begun in 1909. It made such large demands upon the money market that the board of the demands upon the money market that the board of Imperial Bank issued a manifesto of warning. The bank rate of 5 per cent, during the second half of 1910 was higher than the rate which the commercial revival could assimilate, and so it retarded for the time being the pace of the industrial progress. trial progress.

The annual meeting of the Grand Trunk Pacific Railway has been adjourned on account of the absence of the president, Mr. Charles M. Hays, who is touring the West.

# HOW GASOLINE SHOULD BE HANDLED.

### Underground Storage the Best-Methods of Drawing Gasoline-Modern Methods Reduce Insurance Rate.

Gasoline will generate 8,000 cubic feet of gas, which if ted will expand 4,000 times this space, and one gallon gasoline properly mixed with air,—sixteen parts air to of gasoline—and compressed has an explosive power of of gasoline properly

one of gasoline—and compressed has an explosive power of 83% pounds of dynamite. The above facts were stated at the recent convention of Western Canada Firemen's Association Convention held in Calgary, Alta., recently.

Gasoline in itself is as harmless as water, and when properly confined, is not an explosive. The explosive resulting from gasolene is created by the exposure of gasolene to air. A gasolene vapor is heavier than air, so that when gasolene is exposed in a building, the vapor has a tendency to constantly drop, and to lie very close to the floor, under any obstruction, or in corners, settling in the lowest point possible, remaining there until a current of air strong enough removes it. Therefore, the vapors from gasolene may be present in great quantities in a building, but, because of their being so close to the floor, it is impossible to detect their presence by the odor.

Casolene Should be Stored Underground.

# Casolene Should be Stored Underground.

s

ts ts te

th

n-If

rs, nd

ıg, ap-for

nd

nk

Gas from gasolene being heavier than air is no doubt the cause of the recent disastrous fire in the Winnipeg gar-age. While it cannot be authentically stated, it is believed that because of the gasolene being transferred inside, the garage in open buckets, and the atmospheric conditions begarage in open buckets, and the atmospheric conditions being most favorable to gasolene forming a vapor quickly, the entire lower strata of air in the garage became permeated with gaseous vapor, and one of the horses which had been driven to the garage, striking its shoe on the cement floor, made a spark, which ignited quickly the gaseous vapors, causing immense property loss of over \$250,000.

Gasolene, as well as other volatile liquids, should be stored underground, in a well-made tank designed for the purpose. The tank should be so constructed as to prevent evaporation, and all flanges or openings should be on the top. Under no consideration should there be openings on

evaporation, and all flanges or openings should be on the top. Under no consideration should there be openings on the side or bottom of the tank, which would in any way permit the liquid to flow from the tank by means of gravity. The quantity of gasolene which is stored should regulate the thickness of steel of which the tank is constructed. Naturally, a large storage tank, say about 1,500 or 2,000 gallons, should be manufactured of 3-16 inch to ¼ inch plate, thus eliminating any possible chance of the weight of the tank itself causing it to buckle, and thus spring a leak. A plan which is followed with tanks of say 500 or 600 gallon capacity or less, is to have the material manufactured of 12 or 14 gauge thickness.

### A Low Uniform Temperature Should be Maintained.

Gasolene, if maintained at a low uniform temperature, not only retains its quality, but the possibility of evaporation is reduced to the minimum. Gasolene tanks should never be placed in vaults or pits, as they simply provide a hiding place for the gasolene vapors which may result from leakage or accident, and the tank buried in the ground, simply covered by the earth, has never been known to explode if properly vented. While it is conceded that the only method of storing gasolene is in underground tanks, it is absolutely vital to the success of handling this liquid with the minimum amount of danger to have them properly vented. The mum amount of danger to have them properly vented. The vent pipe from the tank should extend at least sixteen feet vent pipe from the tank should extend at least sixteen feet above the top of the tank. This will insure no evaporation, inasmuch as gas will never rise sixteen feet unless under pressure. The vent pipe should be protected by a fine wire gauze mesh, and where the vent pipe enters the flange on the tank, another wire gauze should be provided, so that if the walls of the building fall, and the vent pipe be broken, there is no possible chance of the gasolene in the tank becoming ignited. Fine wire gauze mesh is used for the same reason that it is used on the miner's safety lamp.

#### Methods of Drawing Casolene.

There are several methods of drawing gasolene from the tank, but that which is the most commonly used, and which seems to be the most successful, is by means of an approved self-measuring pump, which should be located higher than the state of the second self-measuring pump. which seems to be the most successful, is should be located approved self-measuring pump, which should be located approved self-measuring pump, which should be reaction or went higher than the tank. All pipe lines for suction or went should be made absolutely tight by cement which is not afsected by the action of gasolene. No point in the suction fected by the action of gasolene. fected by the action of gasolene. No point in the suction line must ever be below the top of the tank, as it is necessary to guard against any accident that may happen to the pipe line in case of fire, and, as a result, the gasolene be forced into the building by gravity.

Gasolene, or any other inflammable liquids, should never be handled by pressure system, as such an arrangement does not permit the control of the gasolene, for if the ment does not permit the control of the gasolene, for if the discharge line becomes broken, the liquid will automatically discharge itself into the building, and, as a result, is very dangerous, especially in case of fire, as it will help to increase same. If a pump is used to draw the liquid from the tank, it is obvious that when the operator ceases the operation of the pump, the flow of liquid stops immediately, and there can be no further disturbance of the liquid in the storage tank without the operator again working the pump.

While the use and application of gasolene is continually broadening in various ways, it is now principally used in automobile garages, paint oil stores, and what is commonly known as the dry-cleaning establishments.

Dry-Cleaning Establishments are Grave Hazard.

In addition to the safe storage of gasolene in garages, there is another grave hazard which confronts the the fire department of every city,—i.e., what is known as the dry-cleaning establishment. It is not an uncommon thing for gasolene to be stored in these places in common open tubs, and frequently in a room where there is an open fire. Shringent by-laws should be passed by all municipalities, which will compel this class of business to either handle the naptha by the modern method or to be compelled to discontinue business at once, for this method of handling gasolene in dry-cleaning establishments is no longer necessary. There are mechanical devices to be had, which will reduce the danger in dry-cleaning establishments equally as much as now provided for garages, as mentioned above. much as now provided for garages, as mentioned above. Modern naptha storage and control equipments can be had at a minimum cost, which-will enable the dry-deaners to use their gasolene over and over, if desired, and yet store it with affair.

with safety.

The modern methods of oil storage should receive most serious attention, is the handling of paint oils, such as raw, boiled, turpentine, etc., in hardware stores. It is well-known that waste or saw-dust, saturated with anseed oil, will take fire spontaneously in a temperature of about 70 degrees. Now, while these oils may be considered inflammable, they can be safely stored in above-ground tanks, provided they are substantially built, and evaporation proof, and there is to be had a modern system which will eliminate this hazard in hardware stores, factories and mills, not only reducing the hazard to the minimum, but effecting a great saving in room, and being otherwise of value to the user.

#### Modern Methods Reduce Insurance Rate.

Insurance companies are loath to give reductions in insurance where any appliance is installed, unless there is absolutely no question as to the merit of the equipment. If insurance companies do recognize a system, it should certainly be an evidence of its worth. The board of underwriters throughout Canada have not ofly acknowledged the value of modern systems of oil and gasolene storage, but are giving material reductions in rates, wherever these systems are installed, not only in public and private garages, but in hardware stores, mills and factories, for handling various paint and lubricating oils. Insurance companies would evidently not give reductions in rates if reduction in the hazard is not effected.

If modern methods of gasolene and oil storage are

If modern methods of gasolene and oil adopted, the danger of life and property from storage are this source can be reduced to the minimum.

# AUGUST BANK STATEMENT.

The details of the August Bank statement appear in the current issue of The Monetary Times. Its figures were analyzed in last week's issue.

## FARMERS BANK RELIEF COMMITTEE.

The first step toward the formation of a Farmers Bank Relief Committee for the purpose of securing, if possible, one hundred cents on the dollar, were taken at a meeting held in Toronto this week. The personnel of the relief committee is as follows: Chairman, Rev. George Gilmore of Fingal, Ont.; secretary, Rev. C. F. Glarke of Kerwood; treasurer, Mr. A. S. Minthorne of Lindsay; and Messrs. W. H. Pollard of Pontypool and J. G. Ashmore of Dunsford

The chairman made the following statement regarding the aims of the committee: "All necessary steps are being taken to secure for the depositors their money. The matter will be presented to the new Government."

### LLOYDS SYSTEM OF UNDERWRITING.

"No Such Thing as Insurance at Lloyds, Except for Marine Risks," Says a Writer in London Truth:

A recent copy of London Truth contained an article under the heading, "The Threatened Scandal of Lloyds." It reads in part as follows:—

"There are two ways of looking at this question of insurance with Lloyds. The first is the uncertainty of the security afforded in consequence of the absence of any knowledge of the financial standing of the individual underwritter with a long conversible for making naveners. derwriters who alone are responsible for making payments in the event of claims arising. The second aspect of the matter is the inability of particular underwriters to meet

their liabilities.

The more general aspect is an old-standing, permanent, obsalete condition of things which no one would countenance for a moment in connection with other financial transactions; for example, I constantly have to criticize bogus rhitanthropic societies or individuals for not publishing accounts of their receipts and expenditure, and it is now a recognized rule among all sane people to give no money to philanthropic bodies which do not publish ac-

No Financial Statement.

"It seems a trifle absurd for people to trust their finan-cial security to underwriters at Lloyds who vouchsafe no cial security to underwriters at Lloyds who vouchsafe no information of any sort or kind about their financial position. It is true that the committee at Lloyds have done a little to shut the stable door after the horse has been stolen by providing for the discontinuance of business by underwriters who have become insolvent. It is further true that legislation has been, or is being, obtained which may or may not be of value according to the steps taken by the committee of Lloyds.

"In any case, if insurance means 'making sure,' there is no such thing as insurance at Lloyds except, possibly, for marine risks. Holders of Lloyds policies may be, and sometimes are, perfectly secure, but there is no means that

is no such thing as insurance at Lloyds except, possibly, for marine risks. Holders of Lloyds policies may be, and sometimes are perfectly secure, but there is no means that I can discover of making sure that they are really safe.

"The whole system seems to me essentially wrong in principle, and a recent case illustrates how it may work out disastrously to every one, An underwriter at Lloyds, whose name I prefer to leave unmentioned, conducted a small and sound business successfully for many years. He then met with an accident which almost incapacitated him from attending to the business, and entirely precluded him from any effective supervision of his affairs. His business was conducted by a manager, who very quickly increased it to about ten times its former magnitude. The result was a hopeless failure and bankruptcy proceedings. Among other things he received from one insurance company some thousands of pounds for premiums. He reinsured the whole of the risks with another company at a lower rate of premium, taking 5 per cent. for himself. From the second company he received payment for claims, but the money so received was not paid over to the first company by whom he had been paid the premiums.

"This first company obtained judgment against him for some thousands of pounds, including £1,000 for interest and costs. The insurance just referred to was not under marine policies, the claimants under which successfully asserted their right to the whole of the deposit of £5,000 with Lloyds to cover marine risks, and the marine policy-holders claim as unsecured creditors for the balance which is due to them. This particular underwriter had for years

holders claim as unsecured creditors for the balance is due to them. This particular underwriter had for years done a prudent and satisfactory business. He was an able and experienced man, and his reputation was high. If it is prudent to insure with Lloyds at all for anything but marine risks, it was right to do so with this particular underwriter. These considerations, however, in no way alter the ultimate fact that when the policies he issued became unable to meet his liabilities.

claims he was unable to meet his liabilities.

Signed by Group of Underwriters.

"A Lloyd's policy is signed by a group of underwriters, each of whom is responsible for his own share and in no way liable for his co-underwriters. There have been cases of late where one or some of the members of the group have been unable to pay, and the others, who are supposed to be solvent, have made the excuse that they would pay when the rest of the group paid, but not before.

"In other instances, after the amounts of the claims have been agreed upon, underwriters have offered 12s. 6d. or 15s. in the f or even less, proclaiming their inability to pay in full, and suggesting that the refusal of these terms might result in less or nothing being obtained.

"Sometimes it is doubtful whether or not it would be worth while to take proceedings against underwriters for the

worth while to take proceedings against underwriters for the recovery of the amount due. People are naturally averse to throwing good money after bad, and if there is little probability of obtaining the debt and costs people prefer to cut

their losses. This is the position of affairs in regard to eighty-two underwriters at Lloyds at the present time. It is not pretended that the whole of the eighty-two are insolvent, and there is little or no dispute about the amount There is some difficulty in the way of legal of the claims. proceedings because of an arbitration clause in the treaty. Certain it is that the money due amounts to a very large sum, and cannot be obtained, and it may be necessary to issue eighty-two writs for its recovery.

"If people doing business on a large scale with Lloyds underwriters, and who may be supposed to have some of information about the standing of the group, with they deal, meet with experiences of this kind, what fate can individual policy-holders expect to meet with who trust to unknown gentlemen for payment of claims when they arise? Such people may be perfectly safe, but these contracts can-not legitimately be called insurance, since there is no means of making sure of the ability of the underwriter to pay,

#### CASUALTY, FIDELITY AND SURETY INSURANCE.

New York Report Shows a Large Amount of Business Written.

Superintendent of Insurance Hotchkiss has made public Volume III. of the Annual Department Report, covering the business of casualty, fidelity and surety, credit, real estate title and mortgage guarantee companies for the year ended December 31, 1910.

This report carries the audited statement of these companies and accompanying statistical tables, fixing the valuation of their bonds and stocks owned in accordance with the allowed appraisal of the department, as arrived at by its erpert appraiser, thus placing the valuations of these holdings on a uniform basis. In auditing these statements the department has gone into great detail as to the valuation and allowance of the various asset items returned by the companies and has also, so far as possible, made a proper read-justment of their liabilities where deemed necessary.

This report indicates that the audit of the statements

in a number of instances changed the figures from those published in the preliminary tables issued by the departm in April last, when for the early information of the public the returns of all companies, other than fire, reporting to the department were published in tabular form without audit.

General Summary of Report.

A general summary of the report is shown by a com-parison of the results of the business of 1909 and 1910, as

#### FOR FIRE INSURANCE MEN.

The following articles will be of special interest to fire insurance men this week:

Need for Fire Marshals in Canada. Page 1420. How Gasoline Should be Handled. Page 1423.; L'oyds System of Underwriting. Page 1424. Monetary Times Register of Recent Fires. Page

Additional Information Concerning Recent Fires. Page 1425.

New Electric Wiring Rules. Page 1426.

#### RECENT FIRES.

#### Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Informa-

'Chatham, Ont.—September 21st.—Barnes' livery stable destroyed. Loss and origin unknown.

Lindsay, Ont.—September 26th.—Cottage of Mr. A. F. Michael, destroyed. Loss and origin unknown.

Calt, Ont.—September 26th.—Farm house and barn of Mr. H. Zimmerman, destroyed. Loss and origin unknown.

Peterboro, Ont.—September 26th.—House of Mr. Edward.
Webb, destroyed. Loss, about \$1,000. Origin, defective

Wynyard, Sask.—September 23rd.—Dancing hall owned Mr. G. Johnson, destroyed. Loss, about \$2,000. Origin

Harriston, Ont.—September 24th.—Barn owned by Mr. Pritchard destroyed. Loss unknown. Origin, careless with matches.

Picton, Ont.—September 24th.—Coal sheds of Mr. Nelson Ostrander, destroyed. Loss, about \$3,000. Origin, careless with matches.

Davidson, Sask.—September 20th.—Barn of Mr. A. B. McGregor, destroyed. Loss about \$1,300. Insurance, \$350. Origin unknown.

-September 22nd.-Store of Mr. W. J. Winnipeg, Man.—September 22nd.—Store of Mr. W. J. Pengelley, 321 Donald Street, destroyed. Loss about \$500.

Stanley, Ont.—September 23rd.—Saw mill and black-smith's shop owned by Mr. T. P. Kelly, destroyed. Loss and origin unknown.

Sherbrooke, Que.—September 19th.—Sheds of Stanstead Granite Quarry Company, Beebe Junction, destroyed. Loss and origin unknown.

Brantford, Ont.—September 21st.—Waterloo skating rink, frame house and two barns destroyed. Loss about \$15,-Origin unknown.

Mr. Blosdale, Delaware, destroyed. Loss, about \$3,000, no insurance. Origin unknown.

Morden, Man.—September 20th.—Barns of Mr. Peter Patterson, destroyed, also 3,000 bushels of oats. Loss unknown. Origin, lamp explosion.

Howe Island, Ont.—September 25th.—Barn owned by Mr. Henry Beautain, destroyed, also two horses, 18 tons hay, and farm implements. Loss and origin unknown.

Vancouver, B.C.—September 18th.—Frame building of the Hoffar Motor Boat Company, 1933 Georgia Street, destroyed. Loss about \$1,500. Origin unknown.

Melbourne, Ont.—September 26th.—Barh of Mr. J. C. Fletcher, including season's crops, destroyed. known. Origin, supposed, tramps careless with matches.

Montreal, Que.—September 21st.—Two barns, stable and hot house belonging to Mr. Joseph Quevillion, St. James Street, destroyed. Loss and origin unknown. Premises of Mr. Bernard Bernstein, 9 East Dorchester Street, destroyed. Loss unknown. Origin, careless with matches. September 24th.—Tanks in Canadian Oil Company yards, St. Etienne Street, destroyed, also 8,000 gallons of oil. Loss, about \$15,000. Origin, live coal from passing engine. \$15,000. Origin, live coal from passing engine.

Toronto, Ont.—September 23rd.—Stable of Mr. Alex.
Holland, 19 Jones Avenue, destroyed, also seven horses.
Loss about \$2,000. Origin unknown. September 27th.—

Premises of Mr. J. Brass, Yonge Street, damaged. Loss about \$1,000. Origin, supposed defective furnace. September 27th.—Stables of Canadian' Transfer Company, damaged. Loss about \$2,800. Origin, spark from hay cutting machine. September 27th.—Stable of Connell Coal & Wood Company, 324 King Street West, damaged. Loss about \$1,000. Origin unknown. September 27th.—Shed, rear of Messrs. Smith Brothers, Berkeley and Duke Streets, damaged. Loss about \$500. Origin unknown.

#### ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Walker & Sons, Limited, was \$712 on buildings. Insurance in the Royal, \$3,000.

Montreal, Que.—The Merchants Awning Company's loss was \$4,500 on stock and \$2,000 on buildings. Insured in the following companies:—United London & Scottish Company, £307; Missiquoi & Rouville, \$2,500; North America, \$5,000; The Provincial, \$1,500; The Acadia, \$3,500; Atlas, \$3,500; Fidelity Phenix, \$4,000; Hartford, \$2,500; Economical, \$2,000; Ottawa, \$2,500. The loss sustained by the Canadian Rubber Company was \$120, fully insured. The property destroyed belonged to the contractor who is erecting the new factory, and one of his workmen was responsible for the fire which was caused by a plumber's torch.

#### THE TRAVELERS' INSURANCE COMPANY'S HOUSEWARMING.

The removal of the provincial headquarters in Toronto of the Travelers Insurance Company of Hartiord, Conn., and its auxiliary, the Travellers Indemnity Company of Canada, to the new Standard Bank Building, Toronto, was made the occasion on Monday of a convention of representatives from the head office, the local staff and the agency force. from all parts of Ontario. The convention, which took place at the King Edward Hotel, was presided over by Mr. John B. Lunger, first vice-president of the company. Mr. Lunger in welcoming the gathering expressed his regret that President Sylvester C. Dunham had found it impossible to be present.

Mr. Lunger was followed by Mr. B. A. Prige, secretary of the Accident Department, who gave some interesting statistics regarding the growth of the company's business throughout Canada but more especially of Ontario. So encouraging had this growth been that the company in addition to securing larger quarters, had been oblized to add to its life and accident department—several—new departments, such as the liability department, the adjustment of claims department, at the head of each of which had been placed a superintendent. In tracing the growth of the company's business from its small beginning in Canada about fifty years ago to its present large volume, he did not fail to pay a just tribute to the managers, under whose buoyant and aggressive regime the company was leaving all previous records far behind. The company's general manager for Canada, Mr. Frank F. Parkins, of Montreal, joined in the general congratulations and gave a brief sketch of the founding of the company in providing new facilities for the conduct of its business in Toronto was fully warranted. The remainder to the sessions was devoted to a discussion of the company's died ent, health, employers' liability, automobile insurance, steam boiler, etc., etc., and the various plans in connection therewith. The evening session took the form of a bancuet as wood, to Mr. Laurence on behalf of the agracy staff, of a cabinet

The Monetary Times learns that the board of investigation appointed to investigate the combine complaint against the United States Shoe Machinery Company, of Canada, met on Thursday. Justice Laurendeau is chairman of the board and Messrs, W. J. White, K.C., and J. C. Walsh, the other members Walsh, the other members.

#### NEW ELECTRIC WIRING RULES.

#### Grade to be Used Contractors May Use Old Stock First-Position of Our Fire Underwriters' Associations.

At the end of the present year new rules for electric wiring will come into force. Under these the wire to be used will be of a much better character and similar to that used in England. The cheap grade of what has been known as rubber insulated wire will be barred by the wiring inspectors.

#### May Use Old Stock First.

Mr. H. F. Strickland, chief electrical inspector of the Canadian Fire Underwriters' Association, states that a limited time will be given contractors to use up what stock they may have on hand of the old wire, but he advises against any purchase of stock of the kind of wire that has

been used in the past.

Rule 50 of the requirements of the National Board of Fire Underwriters for electric wiring and apparatus applies to rubber covered wire.

The Canadian Fire Underwriters' Association is an active member of the National Fire Protection Association of Boston. The objects of the National Fire Protection Association sociation are stated in the articles of association to be the promotion of the science and improvement of the methods of fire protection and prevention, the obtention and circulation of information on these subjects and the co-operation of its members in establishing proper safeguards against loss of life and property by fire. The following clauses, extracted from the articles of association, show the composition of the membership of the National Fire Protection Association

"Article 3 Membership shall consist of (a) Active, (b) Associate, (c) Subscribing, and (d) Honorary. It is understood that through membership none is pledged to any course of action.

"a. Active members.—National Institutes, Societies and Associations interested in the protection of life and property against loss by fire; State Associations whose principal object is the reduction of fire waste; Insurance Boards and In-

ject is the reduction of fire waste; Insurance Boards and Insurance Associations having primary jurisdiction shall be eligible for active membership. Annual dues shall be \$15.

"b. Associate Members.—National, State and Municipal Departments and Bureaus, Board of Trade, Chambers of Commerce and similar business men's associations; Insurance Boards and Insurance Associations not eligible for active membership; Individual members of the organizations represented in the active or associate membership; Individuals engaged in the fire insurance business shall be eligible for associate membership. Annual dues shall be \$5.

#### Subscribing and Honorary Members.

"c. Subscribing Members.—Individuals, firms and corporations interested in the protection of life/and property against loss by fire shall be eligible for subscribing membership.

Annual dues shall be \$5.

"d. Honorary Members.—Honorary life membership may be conferred upon ex-members prominent in the promotion of the objects of this Association, provided they are not identified with fire protection from a commercial standpoint. A favorable report by the Executive Committee and a majority vote of the Association at any regularly called meeting are necessary to elect. This membership carries all the privileges of associate membership without dues, including eligibility to serve upon any committees of the Association,"

#### Canadian Members.

Among the Canadian active members of the National Fire Protection Association are:

Canadian Fire Underwriters' Association, Montreal; Canadian Fire Underwriters' Association, Toronto; Canadian Manufacturers Association, Toronto; Mainland Fire Underwriters' Association of Vancouver, B.C.; New Brunswick Board of Fire Underwriters, St. John, N.B.; Nova Scotia Board of Fire Underwriters, Halifax, N.S.; Royal Architectural Institute of Canada, Montreal; Western Canada Fire Underwriters' Association, Winnipeg.

Many members of Canadian fire insurance companies are also associate or subscribing members of the National Fire Protection Association.

#### National Electrical Code.

The National Electrical Code was originally drawn in 1897 as, the result of the united efforts of the various Insurance, Electrical, Architectural and allied interests which through the National Conference on Standard Electrical Rules, composed of delegates from various National Associations, unanimously voted to recommend it to their respective associations for approval or adoption; and is here presented by the National Board of Fire Underwriters with the various amendments and additions which have been made since that time by them.

The National Conference has disbanded, the work of the Underwriters' National Electric Association and of the National Conference having been taken over by the National Fire Protection Association.

The following associations, formerly members of the National Conference, are represented on the Electrical Committee of the National Fire Protection Association:

American Electric Railway Association; American Institute of Electrical Engineers; Associated Factory Mutual Fire Insurance Companies; National Board of Fire Underwriters; National Electric Light Association; National Electrical Contractors Association; National Electrical Inspectors Association.

#### BOND TENDERS INVITED.

#### Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Brantford, Ont.—The ratepayers will vote on a by-law to raise \$85,000 for enlargement of hospital.

Luseland, Sask .- Until October 15 for \$8,000 15-year debentures. Mr. J. H. Wilson, secretary-treasurer.

Ridgetown, Ont.—Until October 20th for \$35,000 30-year 434 per cent. debentures. Mr. D. Cochrane, clerk. Mapleton S.D., No. 5, Man.—A by-law to raise \$3,000 will be voted on on October 10th. Mr. J. MacDougall, clerk, St. Andrews.

Govan, Sask.—Bond tenders invited for \$5,000 15-year 6 per cent. fire debentures. Mr. A. Graham, secretarytreasurer.

Deloralne, Man.—Until October 26th for \$6,000 20-year local improvement debentures. Mr. D. L. Livingston, secretary-treasurer.

Wilkle, Sask .- Tenders are invited for the \$35,000 waterworks and electric light debentures. Mr. T. A. Dinsley, secretary-treasurer.

Outremont, Que.—Until October 2nd for \$250,000 4% per cent. town bonds, due November 1st, 1953. Mr. J. Kruse, secretary-treasurer.

Calgary R.C. S.D., No. 1, Alta.—Until October 23rd for \$60,000 30-year 4½ per cent. debentures. Mr. J. McCaffary, secretary-treasurer.

Donald S.D., No. 1094, Man.—On October 7th the rate-payers will vote on a by-law to raise \$1,500. Mr. T. Bunn,

secretary-treasurer, St. Clements.

Fergus, Ont.—Until October 23rd for \$25,000 5 per cent. 15-year debentures. Mr. J. Beattie, clerk. (Official advertisement appears on another page).

Union S.D. of Friedensfelt, No. 1572, Man.—On October 10th a by-law to issue \$1,800 debentures will be voted on.

Melita, Man.—The electors will vote, on October 7th, on by-law to issue \$4,000 20-year 6 per cent. debentures to stablish public, wells. Mr. J. Robertson, town clerk.

St. Mary's, Ont.—Until October 2nd for \$135,000 "Convictors" of the convictors of the convictors

solidated" 4½ per cent. 30-year, and \$5,000 4½ per cent. 20-year cement bridge debentures. Mr. T. M. Clark, clerk, St.

Regina, Sask.—Until October 16th for \$1,032,800 4% per cent. 20 and 40-year debentures. Mr. A. J. McPherson, city commissioner. (Official advertisement appears on another page.)

Hardisty, Alta.—Until October 31st for \$3,000 6 per cent. 7-year sidewalk and street debentures. Mr. A. Mursell, secretary-treasurer. (Official advertisement appears on another page.)

New Liskeard, Ont.—Until October 1st for \$7,000 5 per cent. 20-year sewerage system debentures. Mr. P. R. Craven, town clerk. (Official advertisement appears on another page).

Clinton, Ont. Until October 5th for \$5,000 30-year waterworks, and \$6,000 20-year road debentures. Mr. D. L. Macpherson, treasurer. (Official advertisement appears on another page).

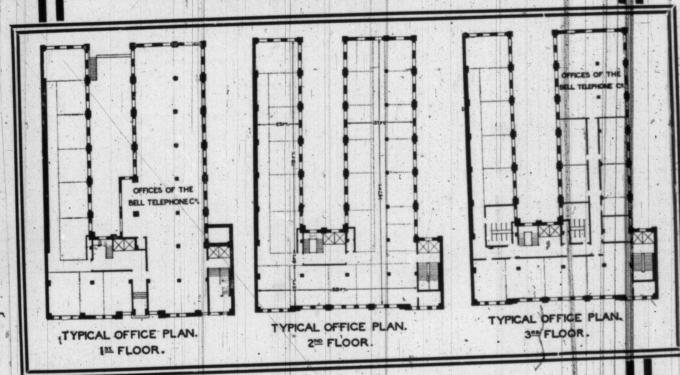

Calt, Ont.—Until October 2nd for \$10,000 30-year 4 per cent. waterworks debentures. Mr. A. M. Edwards, chairman, Finance Committee. (Official advertisement appears on another page.)

The half-yearly interest on \$500,000 Carriage Factories, Limited six per cent. gold bonds, is due and payable on October 1st.

# ENGLISH ENGINEER FINDING CANADIAN SCHEMES.

#### Several Tramway and Radial Proposals for Canada Are to be Placed Before Financial House.

The Monetary Times has had an interview with Mr. J. Edward Waller, M. Inst. C.E. of Messrs. Kincaid, Waller, Manville & Dawson, consulting engineers, of London, England, following on a tour of investigation made by Mr. Waller of the Dominion.

Mr. Waller's visit to Canada was at the instance of several financial groups, which evinces a growing interest in the Old Country in the opportunities which Canada offers for legitimate and sound investments. Some of the financial firms by whom Mr. Waller has been retained are, it is understood, for the first time turning their attention to this country; but in one case Mr. Waller is acting in connection with a firm in England, Messrs. Matthews, Wrightson & Company, Limited, who have already shown their belief in Canadian prospects by the establishment of offices in Montreal and Winnipeg.

#### Has Submitted a Report.

Our enquiries elicited from Mr. Waller that he was particularly impressed with the growth of Winnipeg, Calgary, and Vancouver. Mr. Waller has submitted to Messrs. Matthews, Wrightson & Company, his report on a proposed radial line from Calgary to Chestermere Lake, a distance of about ten miles in an easterly direction. The Chestermere Lake is the storage reservoir of the Canadian Pacific Railway for the irrigation belt. It is about four miles in length and a mile wide. Mr. Waller believes that this will become a favorite summer resort for the inhabitants of Calgary when proper traffic facilities are provided. The numerous purchases of land sites round the lake for residential purposes; the reservation of a township site by the Canadian Pacific Railway Company, and the presentation of a park site by the same company, give color to these anticipations.

Mr. Waller's journey included a visit to Nanaimo, in British Columbia, at the instance of Messrs. Heaton's Agency, of Toronto, who have interested themselves on behalf of a British syndicate in connection with a franchise for a street car system proposed by the city. While the population of the city is only about 5,000, Mr. Waller informs us that the city limits are very restricted, and that for the purpose of a commercial enterprise of this character, it is probably to be reckoned more in the neighborhood of 12,000. Mr. Waller thinks it more than probable that his friends will be prepared to take up the Nanaimo concession, provided the city authorities are prepared to accept reasonable conditions.

#### Inter-urban Electric Line May be Constructed.

Amongst the other propositions Mr. Waller is taking home to his friends is the construction of an inter-urban electric line between London, Ontario, St. Mary's and Stratford, a length of about forty miles, with a branch to Lucan, about six miles in length. The charter is in the hands of the North Midland Railway Company, and it is proposed to be financed by an English group whom Mr. Waller represents.

In connection with hydro-electric undertakings, a water power at Waddington, on the St. Lawrence, has been investigated. Waddington is in the United States, almost directly opposite Morrisburg, and there are many towns in Canada urgently requiring a supply of electrical energy situated within easy reach of Waddington, while at considerable distance from the Niagara Falls installation, and, as a consequence, the Hydro-Electric Commission have, we understand, entered into a contract with the Waddington Company for the supply of electricity over transmission lines to be erected by the Commission, to such towns as Kingston, Brockville, Lynn, Morrisburg, Cardinal, and Prescott. The charter under which the company holds the property emanates from the United States, but it is understood that a Canadian or English company will probably hold the entire stock, and make a fresh bond issue in order to facilitate English finance.

Mr. Waller's firm are well known as consulting engineers in England. Amongst the numerous undertakings for which they are responsible, probably a work which they are at present carrying out in the electrification of the London, Brighton & South Coast Railway in England, and the large system of electric tramways in Buenos Ayres, in respect of which they are consulting engineers, will be most likely to be known; but their sphere of action embraces many countries.

#### BRITISH COLUMBIA.

# Scheme for Colonizing Canada with British-Born-New Electric Line for Okanagan District.

(Staff Correspondence.)

Vancouver, September 23rd, 1911.

If Americans have found it profitable to come into British Columbia in the past they will doubtless come in the future when there is good opportunities for making money. The Borden government, with a policy of declared protection, will probably place a duty on lumber similar to that imposed by the United States. It is reasonable that a duty on any product into the United States should be met with a duty on the same product coming into Canada; other things being equal. Lumbermen have asked for it, and a duty would mean much business for British Columbia mills. It is an old story how rough lumber is dumped into the Canadian West, even into Vancouver, by American mills. The policy of giving what we get is applicable in this instance.

It might be termed an opportune coincidence that the party of prominent British investors should be in the West at a time when increased inter-imperial trade was a subject of discussion. The party consisted of the Duke of Sutherland, Viscount Castlereagh, Lord Charles Beresford, Lord Desborough, with Mr. Sangster, chief tenant farmer of the Duke, accompanied by Capt. C. E. Hutton, London, representative of the North Coast Land Company, Limited, and Mr. C. S. Edwards, president of the company. The Duke of Sutherland has purchased a tract of land near Fort George, which it is the intention to colonize. When it was seen how good the land was more was bought.

#### Colonization of Canada by British-Born.

This is corroboration of the statement made by a surveyor returned from the north that some of the best land in the province is found away beyond the present settled strip of civilization along the main line of the Canadian Pacific Railway. The Duke of Suterland is interested in the colonization of Canada by the Britisk-born, not from the standpoint of profitable returns, but from a desire to encourage the emigration to Canada of a class of British workmen that has confidence and ambition but little or no opportunity to prove its worth in the agricultural districts of Great Britain.

There is a prospect of at last having a satisfactory treatment of the low-grade zinc ores of southeastern British Columbia. The announcement is made that Dr. Gordon French's experiments looking towards a commercial process of the reduction of the refractory zinc ores of the Kootenay have been successful. These experiments have been conducted for a year at Nelson. If everything works out all right on a large scale it will mean much for mining in the Kootenay and Boundary districts.

#### New Electric Line for Okanagan District.

Mention has been made in these columns of the project of the Coteau Power Company to construct an electric line in the Okanagan district, with branches, the power to be obtained from Shuswap Falls. This was proposed first some years ago, and recently the charter of the company has been acquired by Sir William Mackenzie, Sir Donald Mann and associates. When in the West, they visited the district to inspect the possibilities, and also to consider in a general way the route for a line which will link up the Okanagan with the Canadian Northern, thus giving the railway a feeder for a large fruit producing section of the province. Rapid transportation throughout the Okanagan would mean much to the people on the land.

British capital is interested in the purchase of thirty acres on the north of the Fraser River, immediately south of Vancouver. The city is extending out there, and it is thought some institution may be established. Not many years ago the land was bought by the vendors for \$1,000 an acre, and it sold for approximately \$300,000.

The directors of the Spanish River Pulp and Paper Mills have declared the half-yearly dividend of three and one-half per cent. on the preferred stock for the six months ending August 31st. The dividend will be payable October 15th next. Reports submitted to the directors, it is said, were of a satisfactory character, showing earnings for the six months in excess of those of the same period last year, and this notwithstanding the fact that the company's mill was shut down for practically the whole of April, owing to the improvements that were being carried out.

#### DEBENTURES AWARDED.

Amaranth Township, Ont.-\$3,500 5 per cent., to Bank of Hamilton, Orangeville, Ont.

Brandon S.D., Man. \$45,000 5 per cent. 30-years, 10

Brandon S.D., Man. \$45,000 5 per cent. 30-years, to Messrs. Nay & James, Regina.

Small Schools, Alberta and Saskatchewan. \$8,000, to Messrs. Alloway & Champion, Winnipeg.

Lemburg S.D., Sask. \$2,000 30-year 6 per cent. debentures, to Messrs. Nay & James, Regina.

Small Schools, Alberta and Saskatchewan. \$10,500 6 to 7 per cent. 10-years, to Messrs. Nay & James, Regina.

North Edmonton S.D. \$6,500. 5 per cent. 20 instalments, to Messrs. Æmilius Jarvis & Company, Toronto.

Smith's Falls, Ont. \$43,964.33 5 per cent. 20-years, to Messrs. Æmilius Jarvis & Company, Toronto. School purposes accounted for \$12,500 of the total, and local improvements for \$31,464.33. Smith's Falls is a divisional point on the Toronto-Montreal line of the Canadian Pacific Railway; has a population of 6,000, with total assessment of \$1,854,319. \$1,854,319.

#### MONTREAL WATER AND POWER COMPANY.

The question of the purchase of the Montreal Water & Power Company by the City of Montreal is again being discussed. The Montreal Water and Power Company supplies Westmann Power Company

cussed. The Montreal Water and Power Company supplies Westmount and many of the suburbs, some of which have recently been taken into the city. It will become necessary to operate all the water supply under the one department, and consequently it is believed that Montreal will shortly close with the Montreal Water & Power Company.

Hitherto the city and the company have not been able to get together owing, so it is claimed by the city, to the extravagant price demanded by the company. Alderman Lagainte at the recent meeting said that it would be shown by the company that it was willing to take \$6,500,000 for its plant, being a reduction of half a million dollars on its former price. He intimated that unless the matter were fixed up it would go before the Legislature at the next session, after which, in his opinion, the city would have to pay even more than the \$6,500,000 now demanded.

# MATURING BONDS

-And Reinvestment of Funds

During the remaining months of the year there will come to maturity many Corporation and Municipal bonds. Funds will require to be reinvested.

Of the \$20,000,000 and more, Canadian Northern Railway Equipment bonds which The Dominion Securities Corporation, Limited, has placed on the market—since series "A" of 1902—nearly \$8,000,000 have been retired by the operation of the serial form of issue. In October and November \$700,000 fall due—the proceeds will be seeking investment—and we can recommend no better security than these same Equipment bonds.

Canadian Northern Railway Equipment bonds of a later series and of various maturities—five to eight years—may be had to return from 4%% to 5. And not only will we make proposals for exchange of the shortly to mature Equipment bonds, but for any bonds or debentures falling due within a period of one year.

Some Municipal debentures will yield 434 % to 51/4 % Some Railroad and Public Utility Bonds will yield 5 %.
Some Industrial Bonds will yield 5 % to 6 %.

A new sawmill may be established on the banks of the Fraser River, B.C., at a cost of about \$500,000. The plant will be run by electricity, and every modern appliance known to lumber men will be installed. There will also be a large box factory in connection with the sawmill.

The Governor of Minnesota, in issuing his official proclamation of Fire Prevention Day, cites the fire waste of the country and of the State, showing that most fires are due to carelessness or criminality, and pointing out the causes of fire that may be most easily corrected. He closes thus: "Taking into account these vital considerations for the welfare of our State, I hereby do proclaim the 8th day of November, 1911, to be known as Minnesota Fire Prevention Day, and urge that it be so recognized and observed in all the departments of the State, in all public and private institutions of learning, and by all organizations and persons interested in the social and economic uplift of our people. It is urged that the press, as the strongest factor in the development of public sentiment, impress the importance of this movement upon our people."

# British Columbia Mortgages

In placing any surplus funds your first thought should be—security. The careful investor is wary of mining and oil shares, because no security is usually given.

No safer form of investment exists to-day than first mortgages. Ours are placed on improved city properties in Vancouver and farms in Saskatchewan and Alberta. Our valuations are made by experts and are very conservative.

No loan is placed for more than 50% of appraised value. All loans are approved by board of directors. The company insists on the payment of a portion of principal at end of third year, interest payable half-yearly. Titles are searched and certified by our solicitors.

We guarantee to net you SIX PER CENT., making all collections and attending to minor details without charge. Let us tell you more about our Guaranteed First Mortgages.

#### FIRE MARSHALS.

(Continued from Page 1420.)

local efforts. To inspect municipal fire protection systems, and report to the government the efficiency of each, including building laws, storage restrictions and waterworks capacity and efficiency of construction of the same.

### The Qualifications of a Fire Marshal.

The Qualifications of a Fire Marshal.

He should be a qualified fire chief, having good experience with waterworks systems, electrical installations, electrolysis and its causes, fire combustions, and successful fire department discipline. An examination should be prepared for this official by competent engineers of the Underwriters' Association in the matter of building constructions, etc., and all other matters in connection with his work. He should be of mechanical turn, that he may be enabled to test out devices associated with fire prevention engineering.

The appointments of fire marshals in some of the States of the United States has met with marked success in the matter of reducing fire losses. This province should adhere to the principles of its law in this matter, as its duties in this office seem to be confined to the matter of ferreting out incendiarism. While this matter may be of importance, it is better practice to remedy conditions. In conjunction with the investigation of incendiarism have a board of examiners appointed from among the fire chiefs of the province to deliberate on these dangerous conditions, and submit a remedy to be applied, in order that the property and the lives of the public may be safeguarded against a conflagration, and particularly what is worse, a holocaust.

It is announced that the Sao Paulo Tramway, Light & Power Company has arranged to dispose of a further £150,000 of perpetual consolidated debenture stock.

The following companies holding Ontario charters, have increased their capital stock: Thelma Gold Mines Company, Limited, from \$1,000,000 to \$6,000,000; Port Credit Brick Company, Limited, from \$500,000 to \$1,000,000; Williams, Greene and Rome Company of Berlin, Limited, from \$400,000 to \$750,000. \$400,000 to \$750,000.

### Conservatism in Investments

Ever since it was established in 1873 it has been the endea-vor of this house to be if anything ultra-conservative in all investments. Before buying any binds or securities it has endeavored after investigation to select the ones that would come hearest affording absolute safety and at the same time give a fair return on the investment.

In afterwards selling these bonds or securities to the public, we have always placed at the disposal of the buyer all data and information we may have secured in making our investi-

The services of our Statistical Department are always at, the disposal of our clients, whether buying or selling.

#### BENEFITS OF COOD LIFE INSURANCE.

(Continued from Page 1421.)

and let me have the policy re-written for \$10,000. "No," he said, "this will do for the present."

It was but a very few years afterwards that the \$5,000 was called for through Charles A. Massey's death. He was taken ill on a train, returning from a business trip to Winnipeg, and the trouble developed into typhoid fever, which disease, some years later, also carried off the third son, Walter. The younger of the three, Victor, after whom the Victor Mission on the corner of Queen and Jarvis Street, is named, fell a victim to consumption. His early death from that cause led his father to join Mr. W. J. Gage in founding that splendid institution, the Muskoka Consumptive Hospital, which has been the means of saving many lives from destruction by "the great white plague."

A company has been formed, with a capital of \$100,000, to manufacture beds in Vancouver. The Okim patent for a locked rail will be utilized.

Eight bids were received for the \$3,500 5 per cent. bridge debentures of Amaranth Township, Ont. The offer of the Bank of Hamilton, Orangeville, was accepted.

Two million dollars common stock, \$1,500,000 preferred, and \$1,500,000 bonds of the Canadian Locomotive Company, Limited, have been listed on the Toronto Exchange.

A factory for the manufacture of automatic gas producing machines, will be erected at Vancouver, B.C., at an early date. The company will give employment to about 250 men and \$500,000 will be expended on the plant.

Such a wide difference of opinion exists in the Winnipeg city council over the terms of purchase of the Street Railway and allied interests of the city for \$24,000,000 that there is now serious question as to the scheme being carried through. The chief opposition to the purchase on \$24,000,000 valuation is based on the fact that the present large earnings, which have forced the stock up to \$250, are the result of present high prices, which are excessive, and cannot be sustained in competition with the street railway plant when it is placed in operation.

#### DIVIDEND NOTICES.

#### THE SHAWINICAN WATER AND POWER COMPANY.

#### Dividend Notice.

Notice is hereby given that a dividend of one and one-quarter per cent. (1%%) has been declared upon the Common Stock of the Shawinigan Water & Power Company, for the quarter ending September 30th, 1911, payable on October 20th, 1911, to shareholders of record at the close of business on October 7th.

By order of the Board,

#### WELDING BUSINESS ARMOR.

It is just as necessary to receive proper training for business life as it is for any particular trade. This function, which may be termed the educational finish, is well performed by business colleges. In Winnipeg, the Dominion School of Accountancy and Finance is catering to the need. A glance at the syllabus of the courses instituted by this progressive institution shows that the various subjects are dealt with in a complete manner. With average ability and hard work, the student should find himself thoroughly trained for the business world after a course at this or any similar school. There are courses in bookkeeping and busining similar school. There are courses in bookkeeping and business practice, the theory of accounts and practical accounting, business mathematics, auditing, political economy, grain merchants' accounts (an important matter for West-

grain merchants' accounts (an important matter for Western Canadians especially), advanced accounting in theory and practice, and business law.

This last named course covers the following subjects: Contracts, bills of exchange, partnership law, banking, company law, chattel mortgages, mortgages, wills, mechanics' and wage earners' liens, assignments and insolvency. The section on banking deals with the incorporation and organization of banks, business and powers, loans, security, collateral security, security for noteholders and depositors, double liability, circulation redemption fund, cheques, deposits, receipts, letter of credit, warehouse receipts, bills of lading and letter of hypothecation.

The fees of the Dominion School of Accountancy and Finance are moderate and, with the school properly conducted, there is no better way for the young man or woman to train for business-spheres.

The Crescent Creamery Company, of Winnipeg. Man., will erect a new plant at a cost of about \$250,000.

This Company, established in 1872, was the pioneer in introducing Corporate suretyship on the American Continent, and its bonds are accepted by the leading Banking, Railway, Commercial and Financial Corporations in the United States and Canada, many of which guarantee with it their entire staff.

### FIDELITY GUARANTEE BONDS

Personal Accidents Policies, including 10 per cent. Bonus accumulations.

Siekness Policies—covering any and every siekness.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

During August, 1911, there were 119 steamers called at the port of Prince Rupert, British Columbia, and 93 depart-ures. For a new city, not yet five years old, this is somewhat remarkable.

Rates of marine insurance were for years so low that the business got into a bad way; but now that rates have been revised upward, it would seem that the business is being put upon a paying basis. The extent of marine losses in a year is thus given by the French Bureau Veritas: Nine hundred and eighty-six vessels of the world's merchant marine—steam and sail—totally lost in the year 1908, say these careful Franch these careful French statisticians; and this tally recognizes only steam vessels of over 100 tons burden. Such the record of complete destruction, and the following the count of damage not irreparable: 4,273 steamers injured by fire, collision, stranding, stress of weather, and other causes. The destruction varies from year to year; in 1907 there were 1,104 total losses among merchant ships; in 1905, there were 1,038 steamships and sailing vessels gripped by the

A commendable step has been taken by the Equitable Life in founding a publication to be called, "The Human Factor." Its first number devotes much space to instances of saving life in the face of almost certain death. How to help in the prevention of life waste, will be explained. The prospectus number says: "Policyholders are especially concerned in this loss because every unnecessary or premature death among their number adds to the ultimate cost of life insurance. For it is clear that to prolong the average years of life of our members is to increase the annual savings from mortality which go into the surplus from which dividends are paid to policyholders. . . The action of the Equitable management in undertaking to assist in spreading knowledge of the science of disease prevention the Equitable management in undertaking to assist in spreading knowledge of the science of disease prevention among its members and others is prompted primarily by a desire to render direct personal and financial service to its membership, and indirectly to the public."

"THE LAND OF SUCCESSFUL INVESTMENTS."

Discriminating investors the world over are investigating the many opportunities which this immense province offers for successful investment.

These people are placing millions at good profits on the development of the great natural resources and the building up of the towns and cities in this rich province.

Having offices in Victoria and Vancouver and extensive connections throughout this province and in Western Canada in general, we are prepared to give authentic information regarding the purchase of Victoria and Vancouver City and Suburban properties, B.C. Farm and Wild Lands, Timber, Stocks, etc. Our experience will help you. WRITE US TO-DAY.

# THE WATEROUS

Is built essentially to suit Canadian road building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine. a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue. No. 301, or better still, visit the Brantford Works and see the Roller being built and tested a practical demonstration that is its best selling argument.

#### SIX PER CENT. BONDS

#### REAL ESTATE SECURITY

REAL ESTATE SECURITY

The Canadian Real Estate Bond Corporation offers for sale its ten-year six per cent. bonds. The bonds are offered and issued at par in denominations of \$100. \$500. and \$1.000.

They are a first lien upon all real estate and all other assets of the corporation.

The bonds, as well as all other assets of the corporation, are secured by the absolute ownership in fee of approved real estate in the city of Winnipeg and other Western Canadian cities, or by first mortgage upon such real estate.

The bonds mature in ten years. They have interest coupons attached payable semi-annually.

Send for prospectus and other

### Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from \$50 to \$500 per acre in crops, may now be bought from \$10 to \$15 per acre, depending on quality and amount of pur-chase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

#### ATLANTIC STEAMSHIP RATES.

A London cable says that the increase of 10 per cent in North Atlantic fares announced this week is only the betrade between the United Kingdom and the United States and Canada. Far more important is the renewal of the pooling arrangement which expired by effluxion of time on June 30 last and was the subject of a conference in London about two months ago. The conference was adjourned October without any satisfactory result being reached. Severally subject to the subject of a conference was adjourned to the subject of a conference in London eral companies claim, and are entitled to a larger participation in the pool than they have hitherto enjoyed, but any alteration is opposed by those lines which would stand to suffer by a rearrangement. The latter are mainly Continental lines, as the Atlantic passenger has recently tended to travel by the non-Continental lines. A further difficulty is introduced by the desire of the Canadian companies not t have anything to do with the pool, but it is thought that the rate of participation of the Dominion lines is increased tney may be induced to co-operate.

Two practical engineers have stated during the last week that when the projected works at St. John are completed it will be the best equipped port on the Atlantic sea board. The gentlemen referred to are Mr. H. A. Woods, assistant chief engineer of the Grand Trunk Pacific Railway, and Mr. A. M. Bouillon, the district engineer of the company in New Brunswick. Mr. Woods, assistant of the Railway, and Mr. A. M. Bouillon, the district engineer of the company in New Brunswick. wick. Mr. Woods visited St. John to make with his associa a practical study of the site of the company's terminals at St. John Harbor East. The company have some eighty acres on the shores of the harbor and their plans are to be so made as that they shall fit in with those of the Federal Gorenment for a dry dock, ship repair plant, wharves, breakwater and possibly a ship-building plant. The contract for water and possibly a ship-building plant. The contract for the dry dock, etc., may be awarded to Messrs. Norton Grif-fiths & Company, who are the lowest tenderers, and the work to be done will involve eventually an expenditure of \$12,000; 000 or \$14,000,000.

#### A RUN OF RECORD MONTHS

has characterized the business of the Great-West Life Assurance Company this year.

June was—to that time—the best month known. July was better still. August was considerably higher. September promises to be an excellent month.

The significance of this success is obvious—both to the applicant for Life Insurance and the Agent. It shows that to an increasing extent the public realize that there are no better Policies than those of
