in anasacian services and a services of the se public mind in Canada, as in all other Colonies, is towards democratic principles—distruct and apprehensi in always agitated the 'masses whenever the Representative of the Crown assumed a prominent share in the tegislation—and the struggle has ever been to wreet from the Crown, and impart to the people, those privileges which the experience of the adjoining Republic has consecrated as a necessity and a duty. We still believe now, and we stated them, that the accurations laid to Lord Metealfe's charge, by a welfah, treacherous, and mendacious Ministry, were absolutely destitute of foundation, and that he did not in any wise interfers, according to the cent of the day, with the

Idelous Ministry, were absolutely destitute of conduction, and that he did not in any wise interfers, according to the cant of the dey, with the weil anderstood wishes of the people. The events of that period have passed away, and if we rake up the remains, and commence a process of analyzation and investigation, it is that we may satisfactorily prove that those who then pinned their faith on Lafontains and his accomplices, were gregiously deceived—and that Laf stains, under the gart of a reformer, instead of enlarging the public liberty, has systematically been completed in engrafting upon this Colony a scheme of Government which deserves no milder name than an airosis the fountsin of honor, and the disperser of patronage vested in the Soversign is entrusted to the people. In Ca. ada we have neith rone form nor the other—we have a bustard form, which may he spitly styled Lafontainism. It is robberty, plunder, fraud, treachery and falchood combined. The people have no share in the Government, and the Governor has dwindled, since Lord Whether he could have resisted the surrender of every attribute of power, may be questioned—he may be a victim and a dupe, or he may be a victim and a dupe, or he may be a victim and a dupe, or he may be a victim and a dupe, or he may be a victim and a dupe, or he may be a victim and a dupe, or he may be a victim and a dupe, or he may be a victim and a dupe, or he may be a victim and a dupe, or he may be of every attribute of power, may be questioned—he may be a rictim and a dupe, or he may be a know. The curtain of the Cabinet oursula him from view, and he is only paraded when some expecial act of iniquity is to be perpetrated. That he is absolutely powerless, except to antesion with the name of his Severeige some great wrang, is almost the vannt of the Ministry. That their varion of his services is correct, neems to be insplied by his over-attrained economy, and the certainty of his recall should be provuke a rupture with his keepers. But, turning from the question of the Governor's private failings, or personal feelings, as subjects exempt from ordinary criticism—it is turn that the people should ascertain what they gained by agraphizing with and auctaining Lafontaine in the Metalle conflict. Have they realized any one of their aspirations, are they conficious of enjoying any new powers or privateges before dealed,—has commerce, agriculture, or adu-

J. W. Hogg, H. L. Corry, E. Cardwell, and Sir J. Thesiget. R must not be lost sight oi, that, although Cobden and Bright voted sgainst Ministers, W. Ewart, Colonel Thompson, G. Thompson, Joseph Brotherton, and all the chiefs of the Pence party, voted for Mr. Roebsuck's Resolution, and consequently in opposition to their own principles, for Lord Palmerston's is certainly not a passe policy. Considering the state of parties in the House of Commons, there can be no doubt that 46 is a decisive majority for Government. The effect of it will, in all probability, be to keep the Whigs in office, at least until 1891. The open severence, however, of the Peelites from Government, which has received a real and a still greater moral support from the chief leaders of the party apon many severe trials of strength, occasions a breach in the ranks of the auxiliaries of the Government, which it will be most difficult to heal. A lamentable occurrence too, to which I shall presently refer, will lead Sir J. Graham, Mr. Gladstone, and other aspirants to power, to form new combinations, and make fresh attempts to dislodge the Russel Ministry from office. So that perhaps after all I am not justified in predicting that the present Government will be in offices in 1851.

The last Parliamentary week having closed triumphantly in a vote of confidence in Ministres, on Monday the ordinary business of the country was resumed. In the House of Lords, the Irish Franchies Bill has been discussed. Earl St. Garmains, after a debute, withdrew his motion to substitute 412 as the voter's qualification, instead

without transacting business, out of respect to the decased Baronet.

There are now two seats vacant in the House Commons—Tamworth and Mayo—the latter through the death of Mr. R. Dillon Browne, whom I mentioned some time since as a claimant to the Earldonn of Roscommon.

Dr. Jackson proceeds to the estilement of Canterbery, New Zealand, as Titular Bishop of Christ Church, being the fifteenth Prolate for whom provision has been made through the medium of the Colonial Bishopric at Montreal have just been completed—henceforth that city will constitute a See perfectly distinct from the Diocese of Quebec.

A life of Robert Fiumer Ward has just been published in E. gland, in which it is stated that the success of his first novel, "Tremaine," was so great that, in six weeks, fitteen hundred copies were sold, and pursons of the highest rank busied themselves in trying to ascertain who was the author.

The Corn Market is firmer, but no alteration in prices has taken place. Supplies continue small, and a triffling rise in prices is deemed not improbable.

The Quarterly Revenue Returns, which will be made up this evening, are likely to be of a satisfactory nature. The Customs and other leading branches of Revenue will, it is said, show a considerable increase.

The famed Hol-i-noor Diamond arrived in England on Saturday in H. M. S. Medes, from India. This gens weights 29 carate; its original weight was 800 carate, but it was greatly reduced by one Hortensis. Borgis, an Italian, who was employed by Sheft Jehaun to cert it—see annoyed was that

A NALYSIS OF MINERAL WATER OF Analysis of the Water of the Mineral Spring at Point di Jour, near L'Assomption, L infer that it will prove a valuable addition to those already discovered in Canada.

It appears to be well adapted to cases of scrofula, diseases of the skin, gout, rheumatism, and dyspeptic complaints generally.

Mineral Water to be useful should be taken for some time, and when it seems to loce its effect, that from snother spring should be substituted; and one not agreeing with an individual, another may act kindly and effectually. Weak and delicate persons should neak the advice of a physician with regard to the employment of these waters—it would be a great blessing to society if these productions from the laboratory of nature were to supersede the ville and heterogenous compounds, with which the world is cursed, under the name of "Patent Medicines."

We Nezion 11th March 1860.

Montreal, 11th March, 1890.

I certify that I have used the Point du Jour Spring Water in my practice, and have found it to act as a mild purgative and alterative. From the quantity of lodine it contains, it will, I doubt not, be found useful in acrofulous diseases and in some form of syphilis, in addition to offier remedies.

Testimony of Ms. Navnam Martinum. a sighly respectable and untiling citizen of Nameric, N. J.
Disc G. W. Harrany.—I believe your Forest Wine and Fills have been the means of saving my life. When I normalised taking them, I lend at the soint of death, with Droppy, Files, and Asisma. My Physicians had given me over as past circ, and my family had lent all hope of my recovery. While in this dradital situation, your Forest Whise and Fills were procured for me, and before I had Smithed the first bottle of the Wine, and box of Fills, I experienced great relief; my body and limbs, which were greatly avoiles, became sensitly reduced. Hopes of my recovery began now to revive, and after continuing the use of your medicines for about a month, the Fliesand Anthens were completely cared. The Dropsy, with which my life was placed in such great danger, was also nearly gene. I have continued the use of your Medicines until the present time, and I now stiply as parfect health as ever I did in my life, githough I use more than sixty years of age. I need to my recovery entirely to the use of your excellent Medicines. Several of my neighbor have also used them with similar success in obtaining complaints, and I can cheerfully recommend them to the public.

Your, respectfully. N. MATHEWS, Negarit, Dan 19, 1847.

Merriage requires the fulfilment of several conditions, in order that it may be really the cause of mutual happiness. Could the real, which covers the origin of domestic vereibedness, be raised, and its true source in ever instance disclosed, in how many could it be transat to physical disqualifications and being attendant discoppointments. Excesses are always folurious; the gift which, when used in moderation, is fraughts with advantage, becomes, when observed, the prolifes fources of mischief, and of greater or less it just to the constitution and vital powers. The particular recesses, on the sature and consequences at which this Treative professes to dilute, see productive of greater misery to the human frame than any other to which it is subject.

This Work contains an accurate and complete account of the Annum send Physiology of the Reproductive Organs, and of their relative conditions in health and dissense. Nor are those the sole contents of the work: the means of decape, as well as the matter of the danger, are pointed out in clear and intelligible language. It deservedly requires the clusest attention and study, for what subject can be of more importance than the preservation of busilit, and of the physical examplifities of which every many should be possessed. It unfortunately happens, that, the unhappy victim of excessive independent and victous habits, whether acquired in early life, or from the follies of advanced age while suffering from their invalidate insequences, unwindly entertained for the physical examplants. MINERAL WATERS

POINT DU JOUR, PARISH OF L'ASSOMPTION. POINT DU JOUR, PARISH OF L'ASSOMPTION.

THESE truly valuable WATERS are distinguished for the large quantity of Bromine and Iodine they contain, and are acknowledged superior to all other Medicinal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the greatest degree in the most oppressive heat of Summer, and that without altering or affecting injuriously the health of the person using them upon the contrary, they are found to improve and strengthen. The large number of cures effected by the use of the above Waters, enable us to recommend them to the public as an excellent remedy in a very great number of cases. The names of a few only of the persons of celebrity, who have given their written recommendation of the Waters, are here given. These, however, show the happy results arising from their application:—
