CHESEBROUGH MANUFACTURING COMPANY (CONSOLIDATED)
17 STATE STREET, NEW YORK.

All "Vaseline" Products are in all drug stores and General Stores.

At the Mouth of the Treacherous Pit
STORY OF LOVE, INTRIGUE AND REVENGE

CHAPTER XVI.

"Say no more, mamma!" she cried, her indomitable pride and spirit coming to the rescue. "It is all a mistake. I—I do not care. Let Sir Karl marry whom he will; it is nothing to me."

Her voice had in it such a ring of pain, that tears came into her mother's eyes.

"Did I say that I loved him, mamma?" It was perfect nonsense, quite untrue. The white rose, you know—always the white rose!"

Madame thought that she was wandering in her mind; she could not see what a white rose had to do with her disappointment. Lolo's dark eyes flashed as she went on.

"Never remind me of my folly, mamma; forget all about it, as I shall. Who would have thought Dolores would have two husbands, while I have not had one? It is most amusing. Have I frightened you?"

She said, looking toward her mother, who sat with a terrified face. "It was the closeness of the room which made me faint, not what you told me about Sir Karl."

She laughed, with a laugh that made Madame's blood run cold—a horrible laugh; then she stopped suddenly, kissed her mother's face and said—

"Poor mamma! I am sorry I have frightened you. Let me get you some wine. You must have something, you look quite white."

"I want nothing, Lola. Tell me one thing. You have neither father nor brother—only me to befriend you, but I, though a weak woman, I can be like a lioness when my child is touched. Tell me, has that man deceived you? Has he made love to you as a mere sport and pastime? If so the law shall punish him."

Lola laughed again, this time with flushed face and glowing eyes.

"No, mamma, he has never made love to me. Say no more about him. What lies between him and myself I will repay. Never mention the subject again."

When the clock struck seven, the girl stood up, and then a worn look dimmed the brilliancy of her face.

"Mamma, I am very tired," she said. "I am going to my room. Do not let any one disturb me on any account. I shall be quite well to-morrow."

Madame kissed her, and when her laughter had left the room, she closed the door.

Improve Your Tennis Service

By F. G. LOWE, the "International" player.

A moment's thought will show what an important part service plays in tennis. It should be the dominating stroke in the game. A good service will almost carry you through a match, whereas a weak one will invariably let you down. The former should be the means of opening out your whole game; the latter will put you on the defensive at once.

It was obvious to those who saw Patterson serve his way through the Wimbledon Tournament of 1922 what a powerful weapon of attack a service could become. The French trio, Cochet, Borotra, and Lacoste, good as they are, cannot quite hold the best Americans; it is only in service that they are weaker. The odds are strongly in favour of the server, for while the service is being won the match can never be lost!

Conserve Your Energy.

The service is the one stroke at lawn tennis which cannot be influenced by your opponent. Plenty of time can be taken and the ball thrown up as you wish for hitting. This being the case, it should be possible to cultivate a good action, which should become almost mechanical. The service can be practised alone both on and off a court until perfection is nearly reached. Cultivate an action which produces the maximum of effect with the minimum of effort.

The server should stand sideways to the net with a wide stance, adopting much the same attitude as that used for throwing. From this position the weight of the body can be used in making the stroke, and should be swung from the right to the left foot as the ball is being hit.

The keynote of a successful service is in throwing the ball up to the correct position, which is in line with the left shoulder and a little in front of the body.

Watch the Ball.

It should travel at least two feet higher than the server's actual hitting plane. The ball should be hit at the highest possible point, with arms and racket fully extended in order to clear the net with the least amount of risk. The server should almost fall on to the ball. He will thus be carried forward in his run to the net.

If the ball is thrown up carelessly the server must lose his balance in attempting to hit it. Therefore, before anything else is attempted, make certain by continuous practice of throwing the ball up in the correct line.

Grip your handle at the end in order to attain the maximum reach, and adopt an action similar to an Indian club swing. Keep your eye on the ball all through the stroke.

The Unguarded Court.

Your racket should swing through after impact with the ball and finish to the left side of the left knee. By this means a hard, well-placed delivery should result. It is not a bad tip to follow through to the right side for your second service. Your placing will not be as accurate but the ball will be kept in court owing to the top spin imparted. Endeavour to cultivate a second service of nearly the same pace as your first.

Always try to keep your opponent guessing, and vary your pace and placing. The centre line, where the net is lowest, will be found the best spot at which to aim, as it reduces to a minimum the possible replies of your opponent. Your stance should be as near to the centre of the court and the baseline as possible. It never pays to serve from a corner, as too much of your court will be left unguarded.

I am strongly in favour of women, as well as men, using the overhead service; an all-round game will seldom be developed otherwise.

Forest Fires

Forest fires annually destroy in the United States about seven million acres of timber land. Three-fourths of the forestry problem in this country is declared to be protection against fire. A great majority of these are started by careless individuals. They belong to that class of persons who every year contribute to a fire loss of property, aside from timber, that amounts to more than 400 million dollars. Until recently enacted Forestry Bill protection of forests was greatly extended. But no system of protection, which reasonable funds will make possible, can

Red, White, and Blue Mourning!

Black always spells mourning to us, but in other lands every conceivable colour is utilized. Black signifies loss of light and joy, and resultant grief, but white, suggesting hope, is favoured in China.

The South Sea Islanders combine the two and mourn in Black and white stripes. Sky-blue holds its own in Boko bars, and pale browns, to represent withered leaves, is worn by the Persian.

In Ethiopia and Abyssinia relatives think of the earth to which their dead friends return, and accordingly adopt grey-brown for their mourning. Purple and violet are the colours used to mourn cardinals in France. French Kings, however, have been known to wear scarlet.

Yellow should stand for unfaithfulness and jealousy, yet the country classes in Britain always use it for mourning. Traitors' cells were once painted yellow in France, and the Spanish executioner's robes used to be yellow and red.

Corns

Don't Pare Them!

Cutting a corn is always dangerous. Blue-jay cures corns. Kills the pain instantly, dries the corn looses and cures out. No risk, no discomfort. Get Blue-jay at your druggist.

Predicting the Tides

An authority on British tidal work writes, regarding the article "Predicting tides by machinery," in our issue dated May 24th, that "30 per cent. of all tidal investigation has been carried out in this country. The method of prediction in which the machine is used was suggested by Lord Kelvin, and depends in practice on a British Association Committee, the chairman of which was the late Sir George Darwin.

The predicting machine was also suggested by Lord Kelvin, and the first machine, constructed about 1868, is now in the South Kensington Museum. Since that date the total number of machines constructed, or under construction, in all countries, is eleven—one each in Germany and the United States (referred to in our article) and nine in this country.

Of the nine British machines, one is in use for predicting tides in this country, and one each has been supplied to India, France, Brazil, the Argentine Republic, and Japan; three are under construction, one for use in this country, one for Japan (to replace the previous machine destroyed in the earthquake), and one for Portugal.

Tidal predictions of an approximate nature have been locally published

at a number of ports since about the middle of the seventeenth century, but the first regular official tables were published by the Hydrographic Department of the Admiralty for the year 1833. These tables have been published annually since that date, and the 1925 issue, now printing, contains full predictions for ninety-six ports and the tidal constants of some 8,000 ports.

The United States tables were first published for the year 1867, and the 1925 issue contains full predictions for eighty-three ports and the tidal constants of some 2,600 ports.

MacDonald Adopts Conciliatory Attitude Towards France

\$500,000 Worth of Liquor Stolen in Rum Row—Brazil Rebellion Assumes Serious Proportions—Prince of Wales Will Visit South Africa

MACDONALD CONCILIATES FRENCH OPINION. LONDON, July 10. The British Prime Minister Ramsay MacDonald, made a statement in the House of Commons to-day explaining his recent visit to Paris and his discussion with M. Herriot, the French Premier, on the Reparations situation. It is evident from this statement that Mr. MacDonald has gone a long way to allay and meet French resentment and susceptibilities, even to the extent of temporarily giving up some of his own pet ideas in an endeavour to help the Herriot Government ward off the initial attack by the Poincarist bloc in the French Senate. It had been agreed by the British Ministers and Liberal leaders to await the outcome of the debate in the French Senate before debating the subject in the British Parliament, hence the British debate is now scheduled for Monday. In the memorandum accompanying the original British invitation to Italy, Belgium and Japan, to attend an inter-Allied Conference, the British Government proposed that in the event of a German default the matter might be referred to the League of Nations or the Hague Arbitration Tribunal, thus lifting it out of the hands of the Reparations Commission. It was this prospect that caused so much recent comment in France and gave M. Poincaré a weapon with which to attack Premier Herriot.

VISIT A SUCCESS. LONDON, July 10. Great satisfaction was expressed to-day throughout British officialdom over the results of Prime Minister MacDonald's visit to Paris and confidence seemed to be felt that the Allied Conference on Reparations would open here July 15th as planned. Mr. MacDonald is still suffering from ill health, but made known his intention to make an important statement in the House of Commons this afternoon regarding his meeting with Premier Herriot of France. Owing to the lateness of the communication of the results of the Conference between Premiers Herriot and MacDonald there is little comment on the meeting in the morning papers and this is largely tentative.

PRIME WILL VISIT SOUTH AFRICA. CAPE TOWN, S. Africa, July 10. The Prince of Wales has accepted the invitation of the Hertzog Government to visit South Africa next year. The date for His Royal Highness' visit has not yet been arranged.

PIRACY INVESTIGATION. HALIFAX, July 10. Representatives of LaMerue Franchise, owners of steamer Mulhouse, which arrived here Tuesday, reporting the loss of one million dollars worth of liquor and three thousand dollars in cash at the hands of pirates off the New Jersey Coast, two weeks ago, are en route here from St. Pierre for the purpose of instituting an investigation into the hair-raising story told by officers and men. They will arrive to-morrow. In the meantime an investigation is being conducted at the instance of the French Consular authorities into the damage sustained by the ship during the alleged ten days' visitation of the pirate band. It is understood that both cargo and ship were fully insured, which means a third investigation will probably be instituted so soon as the underwriters, reported to be French Lloyds, are called upon to make good the loss. Capt. Ferrere, when interviewed this morning was insistent regarding every single one of the blood-curdling details enumerated yesterday. He reiterated the steamer had been boarded by thirty pirates who had overcome the officers and crew and kept them imprisoned for scanty fare for upwards of ten days. Leisurely loaded 300,000 cases of liquor into small boats and then disappeared, leaving a paltry three thousand cases behind. James Fraser, representative of the owners, gave a statement this morning to the effect that the value of the stolen liquor was about five hundred thousand dollars, and that the loss consisted of 322,000 cases, including brandy, whiskey, champagne and French wines. The pirates, according to the statement, came aboard the Mulhouse on June 24th, from the Speed Boat named Xerxes Away, New York. The seized liquors were placed on board the following craft: The schooners Patara Clarke, Corikum, M. M. Gardner, Quaco Queen, and Marie Conard; all thought to be of Nova Scotia registry; the steamer Genevieve, the schooner Marie, Nassau, and the Tessa Aubrey, place of registry not stated. The statement said it was

not decided as yet whether the investigation would be conducted at Halifax before the French Consul or at St. Pierre in the French Admiralty Court.

CHURCH UNION BILL IN SENATE. OTTAWA, July 10. The Church Union Bill received a second reading in the Senate to-day. An amendment to have the Bill referred to a special committee was defeated.

REBELLION IN BRAZIL SERIOUS. BUENOS AIRES, July 10. Unofficial advices received by the newspaper La Nacion, from Rio Janeiro and Port Alegre, Brazil, by way of Montevideo, assert the rebellion at Sao Paulo is far from being dominated by the Government, and that the state of Parana and part of the state of Rio Grande have joined the insurgents' movement. La Nacion's informant says the Rebels' resistance in Sao Paulo is not limited to Luz Barbach, adding the bombardment is general and severe in the principal streets. The resistance given by the Rebels led to the embarkation of new reinforcements of Federal forces, Wednesday, from Rio Janeiro, for Santos, to proceed by land to Sao Paulo.

LAD TO REST. PLYMOUTH, Vt., July 10. Calvin Coolidge, Jr., 16 year old son of the President, was buried here this afternoon in the family lot of the Plymouth Cemetery. Mr. and Mrs. Coolidge and their son John, walked sadly away from the grave with heads slightly bowed as a bugler sounded "Taps."

DOMINION REPRESENTATION. LONDON, July 10. Premier Ramsay MacDonald will meet the High Commissioners of the Dominions to-morrow, instead of today, as originally arranged, for the purpose of discussing the question of Dominion representation at the Conference to be held in London on July 16 in connection with the carrying out of the Dawes Report, on the matter of reparations. The Canadian Press understands that while the other Dominions are willing to have Great Britain present their views at the coming conference, Canada will insist on distinct representation at the conference; otherwise Canada will disclaim any responsibility for the conference.

RICHARD HUDNUT THREE FLOWERS TALENT. Your choice of the Three Flowers color powder is of quality and reliability. Packaged.

Motor Driver Gets Prison Sentence. Wednesday in the Magistrate's Court before Judge Morris, on conviction, a motor driver was sentenced to the Penitentiary for ten days' imprisonment without the option of a fine. The evidence showed he was driving at a speed of twenty-five miles per hour along LeMarchant Road on Sunday morning last. The Judge said that during the season he had been warning forayers and careless drivers that upon conviction they would not be given the option of a fine. He felt certain the sentenced in this case would have a deterrent effect.

Racer "Nellie R." Removed From Lake for Repairs. The Nfld. Highlanders, under command of Lt.-Col. W. H. Herrier, went to Quidi Vidi Lake last night and brought the racer "Nellie R." to the Carling Rink, where she will be put in first class condition for the annual Regatta. Mr. Bob Sexton, the well known boat builder, will commence work on her immediately.

Distinguished Mason Here. By the S.S. Silvia yesterday morning there arrived Mr. Plus J. S. Oite, Grand High Priest for Nova Scotia, Prince Edward Island and Newfoundland. Last night an emergent convocation of Shannon Chapter was held in the Masonic Temple to welcome him, and later the brethren gathered in the banquet room where the usual toasts were honored and a most enjoyable social hour spent. TO-NIGHT! TO-NIGHT! — Band Concert, Victoria Park, by M.L. Cashel Band.—July 11, 11

Class Mates Give Congratulatory Dinner

TO HON. W. J. HIGGINS, K.C.

At Smithville, last night, Hon. W. J. Higgins, K.C., M.H.A., was tendered a complimentary dinner by a number of those who were his class mates at St. Patrick's Hall, in the year 1894. Mr. W. B. Comerford ably performed the duties of chairman. The speeches were excellent and particularly pleasing was the address of Mr. J. C. Pippy, who proposed the toast "Our Guest of Honor." Telegrams of congratulatory nature were received from Hon. J. P. Hand of Bermuda, and Mr. F. J. Ganning, of Los Angeles, were read. A vote of thanks was tendered Mr. T. P. Halley for making the musical portion of the programme such a huge success. The toast list was as follows:—

The King—Prop. The Chairman; Resp. "God Save The King." The Archbishop And Clergy—Prop. Mr. Jos. Fitzgibbon; Resp. Rev. J. F. Pippy, P.P. Song—Mr. Halley. Our Guest of Honor—Prop. Mr. J. C. Pippy; Resp. Hon. W. J. Higgins. Song—Mr. H. J. Brophy. Our Alma Mater—Prop. Mr. J. J. Rossiter; Resp. Rev. Bro. J. E. Ryan. Song—Mr. W. J. Murphry. Absent Class Mates—Prop. Mr. M. J. Murphry.

God Bless The Friends We Love. The Chairman—Prop. Hon. W. J. Higgins, K.C.; Resp. Mr. W. B. Comerford. Anid Lang Syne. GOD SAVE THE KING.

HOW MANY TIMES DO I HAVE TO TELL YOU TO KEEP YOUR HAIR BRUSHED? DO YOU WANT TO LOOK LIKE A BUM? I'LL PUT A PERMANENT PART IN IT!

Reception at Canon Wood Hall

A large gathering of Parishioners attended the reception to Dr. and Mrs. Jones and Rev. W. E. and Mrs. Godfrey, in Canon Wood Hall last night. The former, who is Dean of St. Paul's Cathedral, Cincinnati, is on a visit to his old Parish and friends in the city, while Rev. Mr. Godfrey has been just added to the Clergy staff of the Parish.

The Rector, Rev. J. B. Elliott, presided, and among those present were Rev. Canon Bolt, Rev. Canon Field, the Prime Minister, Hon. W. S. Monroe, Hon. R. Watson and H. Y. Mott, Esq.

A very hearty welcome, extended to the Rev. gentlemen, their wives and children by Hon. R. Watson, as People's Warden, Mr. H. Y. Mott, on behalf of the Sunday School, Rev. Canon Bolt, for Bishops and Clergy of the Diocese, and Rev. Dr. Curtis, on behalf of the Methodists of the city, was feelingly replied to by Rev. Mr. Godfrey and Very Rev. Dean Jones. During the evening, at intervals, solos were rendered by Messrs. Ruggles and Hammond, Miss White being the accompanist. Refreshments were provided and served by a committee of ladies from the Women's Association and St. Margaret's Guild.

Enquiry Postponed

The postponed preliminary enquiry into the charges preferred against Sir R. A. Squires came up for hearing in the Magistrate's Court yesterday afternoon before Judge Morris. Mr. Eric Jerrett, B.L., in the absence of Mr. W. R. Howley, K.C., appeared on behalf of the accused, and made application for postponement until Sept. 15th, next. Mr. Howley, K.C., lawyer for the Defence, is at present absent from the country. Mr. L. E. Emerson, B.L., upon consenting to the motion, informed the Bench that he had been in communication with Mr. Howley before leaving here and also with the Department of Justice. Under the circumstances the Attorney General was prepared to assent to the motion, but with the understanding that the enquiry would then be proceeded with without further interruption. Judge Morris consented to the motion made by Mr. Jerrett for accused, and adjourned further hearing until Monday, 15th Sept., at 3.30.

The charges of criminal libel preferred by Sir John Croebie, against one Harris M. Mosdell, was postponed sine die.

Thy Neighbor as Thyself

London Daily Telegraph: It is a platitude to say that if there had been in Europe a pervading sense of the unity of Christendom the War would never have been fought. If we had now a general faith in the unity of civilization some of the most dangerous problems of the peace would be solved. If even within the British Empire men and women thought of themselves as members of a common state instead of only English, Canadians, Australians, it would be better for us all. The growth of the spirit of individual nationality may well have been necessary to the development of the human race. It has certainly made contributions to civilization, in assuring prosperity to great masses of people, in the development of the natural resources of the world, in fostering racial genius for politics, literature, art, and science. But there is something to be set on the other side. While national rivalries are vehement, there can be no peace on the earth. An excess of national, racial, local patriotism is the "howling provincialism" of Mr. Kipling.

Japanese Struggle in Prague

WITH STUBBORN LOCAL TENANT. PRAGUE, June 30.—(A.P.)—One citizen of Prague, while it has not involved international relations, is frantically his with as much annoyance as it does amusement to his neighbors. Dr. Svoboda, of the University, holds a lease on a flat in a building just acquired by the Japanese legation. He will not surrender the premises and under the law he cannot be evicted. The coal cellars and the laundry have been locked against him, the gas and water supply cut off and a new lock on the street door closes it from 6 at night until 7 of the morning. On the one hand the law prevents his eviction and on the other the po-

Bird Barometers

The cat is not the only creature that foretells rain. Most birds are restless when a change in the weather is likely. Guinea fowls and peacocks shriek, parrots whistle more shrilly than usual, and pigeons return to their homes when rain is expected. Gulls are disturbed and utter mournful cries when a storm is at hand. An old rhyme tells us that fowls roll in the sand when rain is at hand, and many country folk get out their wet-weather garments when they see their hens gathering together and trimming their feathers. When ducks backwash and forwards and splashing large quantities of water over their backs, it may be taken for granted that rain is near. When a skylark soars very high the weather is likely to remain fine, and if swallows in the evening are seen chasing insects in the heavens rather than close to the ground the same conclusion may be drawn.

Stiff Joints

House of Assembly
Proceedings

OFFICIAL SYNOPSIS

THURSDAY, July 10, 1924.

The House met at 2:45 p.m. pursuant to adjournment. At 3 o'clock a message from His Excellency the Governor was delivered by the Gentleman Usher of the Black Rod, commanding the immediate attendance of the Speaker and the House in the Council Chamber. Whereupon Mr. Speaker and the House attended His Excellency in the Council Chamber, and being returned to the Assembly Room, Mr. Speaker informed the House that when in attendance upon His Excellency in the Council Chamber, His Excellency had been pleased to approve of his election as Speaker, and that in the name and on behalf of the House of Assembly, he had by humble petition to His Excellency laid claim to all these ancient rights and privileges, which His Excellency had confirmed to them in as full and ample a manner as they had been heretofore allowed.

Mr. Speaker also expressed his respectful acknowledgments for the high honour which the House had conferred upon him. Mr. Speaker also announced that whilst in attendance at the Council Chamber His Excellency had been pleased to make a gracious speech to both branches of the Legislature, a copy of which, for greater accuracy, he had obtained and would read to the House:

(The Speech from the Throne appeared in yesterday's issue.)

Mr. H. B. C. Lake, member for Burin, moved that a Committee be appointed to draft an Address in Reply to the Speech with which His Excellency the Governor was pleased to open this session of the Legislature. He congratulated the Speaker on being appointed the first Commoner of the land and felt sure that his Honour the Speaker will do his duty fairly and impartially. He also congratulated Mr. Walter S. Monroe on becoming the Prime Minister of this Island. The Leader of the House had brought back with him a substantial majority of members and he had no doubt that, under the leadership of Mr. Monroe, the people of this country will not have cause to regret their action. As His Excellency appropriately suggested in the beginning of his speech, in view of all the circumstances, our deliberations need not be protracted. It is unusual to have a session of Parliament at this particular season of the year when so many of our people are engaged in the fisheries and trade of the country, but, under the circumstances, the best possible was done in the best interests of all concerned. A brief session is desirable from the fact that this Government has been too short a time in office to acquire that information about public affairs which is necessary for wise and sound legislation.

The past six months has been extraordinary in the political history of Newfoundland, as, during that period, not less than three administrations were appointed, two of which resigned; but he felt that the present party is here to stay and that the leader has the confidence of the whole country. Mr. Lake was pleased to note that the Bye-Elections in Hr. Grace resulted so favorably for his colleagues. In the case of Bonaville it was deemed advisable to have the Bye-Elections postponed until the Fall when the fishermen are home, thus showing how fair Mr. Monroe is, and that no voter will be disfranchised. He endorsed the remarks of His Excellency that this year's seal-fishery was a successful one and that the codfishery—the mainstay of the country—had opened up so favorably and he trusted that the prices paid for this product in the local and foreign markets will be such as to be remunerative to the fishermen of the country. He went to the bank fishery as a boy with his father, one of the pioneers of that branch of the fishery, and he has seen the fishing business in all its stages and he was sure that this Government was composed of men who will see that no legislation will be introduced that will again handicap this great industry which, in his opinion means practically everything to Newfoundland; and he trusted that our Fisheries Department, under so capable and experienced a Minister as Captain Winsor, Members for Bonaville, will be brought to such a stage of usefulness that everyone will be proud of it. He said he was sure of the fact that we had the Humber, Grand Falls and Dell Island industries and he trusted to have the Gander and other industries opened up within a short time but still we could not get away from the fact that the codfishery is our main industry.

He endorsed the opinion expressed by His Excellency that unemployment had decreased and that a new era of things had been entered upon, and hoped that able-bodied relief will be a thing of the past, and that the people generally abhor the idea of dole.

He thought that a great advertisement had been given Newfoundland this summer by the visit of so distinguished a soldier as Field Marshal Earl Haig and that the Great War Veterans, particularly Padre Nangle, deserved congratulations upon the

successful manner in which the whole programme in connection with that event had been carried out.

The Estimates for the carrying on of the public service, which are now in the hands of the Finance Minister, have due regard for economy and retrenchment, and which he thought was necessary to allow the working classes of the country to live in the country.

With reference to the inquiry into the public affairs of the Colony, he said the Government proposed to invite a Commission from England to deal with the matter when the time is ripe.

Regarding the Prohibition Act he thought that the present law was not being enforced and he denounced the script business. He said that the Government proposed to remedy the whole system at an early date.

Speaking of the excessive cost of printing, he said that the Government proposed to introduce a system of economy and retrenchment by having printing done by tender and contract and that the work will be controlled by the Colonial Secretary with a special official in charge as King's Printer.

He thought it would be good news for the workman to know that legislation will be passed at this session for the manufacture of pulp and paper on the Gander River and the Flour Mill on the South Side of St. John's. These industries, combined with those already mentioned, will give employment to thousands of men when the fisheries are over.

He said that 5,500 men are now engaged on the Humber and that 90 per cent. are Newfoundlanders and he had no doubt that as time went on and our people became proficient that all the men employed there will be Newfoundlanders. He was also glad to know that the steel works at North Sydney will not be closed down, as at first thought, because the Besco people had received orders from the Canadian Government for steel rails. This will mean our men now employed will be kept going in full swing.

In conclusion Mr. Lake said he was proud of the honour conferred on him in moving that this Committee be appointed and in particular as representing the electorate of Burin District.

Mr. Linegar had very much pleasure in seconding the motion made by the honorable member for Burin. He congratulated the Speaker on the high honour conferred upon him, and felt confidently certain that he would do honour to himself and to the people of this Dominion. Especially did it give him pleasure in expressing his feelings as a labour representative—the first time a representative of labour had a seat in the legislature in the history of Newfoundland—and that is one particular reason why he felt gratified in expressing his thanks to the Executive Government for asking him to second the motion to-day. He questioned whether he would be able to fulfil all that was required of him at the present time, because it was such a large contract to fulfil and perform. He expressed himself as being proud that he was the representative of labour in the House. He represented labour in all its forms, organized and unorganized; he represented 300 coopers strong, besides other numerous forms of labour, and he trusted that he would be successful in keeping up to what was expected of him. He assured all those whom he represented in the House that he would do his best for their welfare and benefit. Labour needed a representative in the House. He did not want to see crowds of men coming to the Bar of the House this year, as they did in the past, asking for their rights.

He also congratulated the Prime Minister upon the confidence reposed in him by the people of this country, and expressed his candid conviction that the electorate of this country had made a wise and important choice in choosing the Hon. W. S. Monroe as the Prime Minister of this ancient Colony.

With regard to the Speech from the Throne Mr. Linegar did not propose to deal at length nor could he hope to improve upon what Mr. Lake had said. With regard to the Seal-fishery Mr. Linegar expressed himself as being pleased to note and say that it had been a successful one. Later on in the session he hoped to say something regarding the conditions on the Seal-fishery and to show why the Seal-fishery is not as profitable to the labourer as it should be. He also said that the fish markets at present are good and he did not think that there is any doubt, whatever, that what we will have good results right through. He was also pleased to be able to mention and express his pleasure upon the visit of our distinguished guest Field-Marshal Haig. He felt certain that we were all pleased to have him here, and infinitely more pleased to know that the distinguished visitor enjoyed himself to such an extent during his stay amongst us, and that he was given such a rousing and whole-hearted reception.

Regarding estimates Mr. Linegar said that as they had already been covered by Mr. Lake the Hon. Member for Burin, he could only reiterate what had already been said by that Hon. Gentleman.

With regard to the motto of cleanliness and keeping clean, Mr. Linegar said that it was one of his election pledges all through the campaign and that he meant to stand by it. With respect to the enquiry into the public departments he hoped it would be thorough, and it was only right and proper and also justice that those who have done wrong should be punished to the utmost extent of the law.

With regard to prohibition, Mr. Linegar assured the people that something would be done in the very near future to remedy the abuse of the law as it stands at the present time. With regard to industries in general, Mr. Linegar said that it was high time that we had some confidence in ourselves. This country possesses sufficient industries to be in a flourishing financial position if we only had the confidence in its resources. The country has been demoralized, the spirit of the working man is broken. The working people have been taken, in a good many cases from their ordinary work and put in some place where they do not belong and consequently have not been able to do justice to their country in general or themselves in particular; conditions as they at present exist must cease, and a general improvement for the betterment of the working class result. In conclusion Mr. Linegar remarked that he would like to refer to the conditions of our workmen; which to-day are appalling. He could say in dealing with this matter that he knew as much about the conditions of the working man in this country as any person in Newfoundland; and what conditions the labourers work and lives in this country has only to go among them and be convinced as to the unfairness and the disadvantages under which they work. He said that the conditions were such that it was a miracle how the people could live at all. It has been said that you cannot get good results or returns from the labourer, but Mr. Linegar affirmed that the working man of St. John's as the finest kind of man, and the finest kind of workmen that you could get, but he was sorry to say that the working man's spirit was broken, and that when they did start it would take two or three years to get him going, and to instill a feeling of independence and willingness in him. He wished to thank the Government, its Hon. Leader, and the electorate of his District for sending him to the House to-day and in giving him the privilege of being able to champion the rights of those whom he represented, and he assured them all that he would do his best to justify his seat in the House as a representative of the District of St. John's West. Mr. Hickman said he wished to make a few opening remarks and in doing so he would like to tender his congratulations to Mr. Fox, as Speaker. He felt sure that Mr. Fox would do his duty fairly and unbiased and that he would treat the Members of the Opposition in the same way as would the Members of the Government. Mr. Hickman also wished to congratulate the mover of the motion for the Address in Reply. He said it was good to see men of the type of the Hon. Member for Burin representing their own Districts in the House of Assembly; and that he felt certain that the District of Burin would find an able and confident supporter in the person of Mr. Lake. He also wished to congratulate Mr. Linegar, the Member for St. John's West upon the speech made by him. He said that Mr. Linegar claimed to represent Labour and that the Opposition were pleased to see him and have him in the house and that they assured him of their sympathy in the movement in which he was so interested. We of the Opposition are veritable working men and before the session concludes we will give evidence of it and see that legislation is put in force to provide for the laborer. As to the Speech from the Throne it has been customary heretofore to distribute copies previous to the opening of the House so that members of the Opposition might have an opportunity to discuss it but on this occasion this had not been done. As heard by him, Mr. Hickman said, there was nothing of importance in the Speech though it might be interesting to the public to know that Countess Haig had visited here and that those who had opposed the Government in the election had been defeated. He proposed to assist the Prime Minister in carrying out his promises to the people to assist in every way possible in forwarding whatever legislation that might be brought before the House. He hoped that the policy of "Clean up," the maintenance of law and order and the amendment of such acts at present in force and incapable of being carried out, would be brought into being and employment found for the people, particularly the fishermen, so as to enable them to live in comfort. As to the cutting down of expenses he trusted that men would not be dismissed because of their party affiliations and their political views by supporters of the Government on the only grounds that they had supported the right side. In conclusion he expressed the belief that though Newfoundland is at present facing a serious situation in her history, she can weather the storm as she has done before and by proper

legislation be brought back again to a condition of prosperity. The Member for Fortune, District, Mr. Warren, speaking for the Independent Opposition, congratulated Hon. the Speaker on the dignity conferred on him by his election to the position of First Commoner, of the Island and paid tribute to his ability as an orator and lawyer. He also congratulated Messrs. Lake and Linegar on their efforts in proposing and seconding the Motion for the Address in Reply. Hon. the Prime Minister took the opportunity to congratulate the Mover and Second of the Address in Reply and the Hon. the Leader of the Opposition and Mr. Warren for the manner in which they had referred to the Speech from the Throne. He congratulated the Independent Opposition, expressing the belief that none was more qualified to fill it. He regretted that copies of the Speech from the Throne had not been available for the Opposition, but that was due to his inexperience. As to the promises made, or said to have been made, by the present Government, they had never made anything like the promises of their predecessors, but would guarantee to carry out their programme as well as any party who ever held power before. The Government is sincere in its efforts to clean up and to give a square deal to all and that policy will be rigidly adhered to. He did not wish to make a political speech, but as to the suggestion of the Hon. the Leader of the Government that Government employees might be dismissed because of party affiliations he wished to state that none would be interfered with as long as they were faithfully performing their duties, but men who were actively canvassing might have to be dealt with. He was sorry to say that previous governments had dismissed people from various offices simply because they or their relatives had supported those opposed to the Government. As to the fishery the Government would do all possible to foster it and every other labor giving industry, and a speedy solution of the Bell Island problem is looked for. The position of the Government is to try and make labor and capital agree, and while some think that a standard wage should be given to labour throughout the Island, the whole situation hinges on supply and demand. We have to go cautiously before saying that every employer shall pay a certain rate. Continuing, he hoped to reduce taxation, but pointed out that at present it is impossible to make an estimate of the country's finances owing to the way in which the accounts have been jumbled for some years past, salaries, bonuses, etc., being so confused that it is next to impossible to tell the wages of some officials. This will be straightened out and everything made clear to the public. At the next session it is hoped to be able to state where the country stands financially, but at present this is impossible owing to the way in which figures have been turned and twisted. The Prime Minister concluded by stating he would have more to say on this subject later.

The motion was then put and carried and the following Committee appointed: Messrs. Lake, Linegar, Halfyard, Hibbs and Chambers.

NOTICE OF BILLS.

The Minister of Justice gave notice of Bills (1) to amend Chapter 86 of the Consolidated Statutes (Third Series) entitled "Of Stipendiary Magistrates and Justices of the Peace;" (2) to amend the War Pensions Act (1922).

The Colonial Secretary gave notice of a Bill "An Act" respecting the Department Public Printing and Stationery.

The Minister of Finance gave notice of Supply. Mr. Halfyard gave notice of a Bill to amend the Election Act 1913. Mr. Brown gave notice of a Bill to amend Chapter 216 of the Consolidated Statutes entitled "Of the employment of men engaged in logging."

QUESTIONS.

The following questions were tabled: Mr. Scammell: If it is the intention of the Government to continue the payment of bounties for ship-building, as provided for during the past few years? Mr. Warren: (1) What Departments of the Public Service have been under investigation during the past two months; (2) if any of such investigations have been completed; (3) if any report thereon has been submitted to the Government? Mr. Grimes: If it is the intention of the Government to allow the members of the Opposition to control the grants for the districts they represent?

The House then adjourned until 3 o'clock on Monday, July 14th.

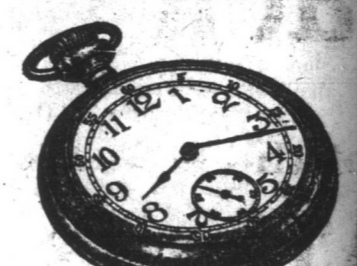

Could you spend \$50, \$25, or \$20, to advantage? Of course you could. If you save enough Box Fronts one of the above three prizes may be yours.

One of the most charming of the new gowns is of black crepe with an applique of white birds.

MURPHY'S GOOD THINGS
BARGAINS EVERY DAY

We are now moving our stock to make room for New Goods. Our Buyer is leaving this week for the American markets, and we need more room for new stock. Come while the Bargains are here.

Children's Hose. In Black and White cashmere, to fit children up to 6 years, worth 25c. Our Price Per Pair 12c. Same in Pink and Blue 19c.

Ladies' White Underskirts. Deep flounced styles. A choice of pretty styles for wear under sheer dresses; deep flounces or embroidery trimmed or finished with tucks and hemstitching; some with underlay. Each 98c. to \$1.98

American Lawyers To See Paris After Meeting at London

Dallas, Tex., July 7. (A.P.)—In response to invitations from Ambassador Jules Jusserand on behalf of the French Government, M. Tourcave, as president of the Order of Advocates of Paris, and the American Chamber of Commerce of France a large number of American barristers will attend a special reception in their honor in Paris, July 29-31. It was announced here by Robert E. L. Saner, president of the American association.

The Paris meeting, where the Americans will be the guests of the French lawyers, will follow immediately the adjourned session of the American Bar Association, to be held in London, July 20-26. A tentative program arranged includes a reception by the Paris bar at the Palais de Justice and by the municipality of Paris at L'Hotel de Ville on July 29; a reception at Versailles and Ramboillet by the president and premier, July 30, and a reception by the Franco-American committee in Paris, July 31.

The suggestion that the American Bar fix the program was made by Ambassador Jusserand. The program committee included William D. Guthrie, New York, chairman; Fred R. Couder, New York; George Denege, New Orleans; George B. Rose, Little Rock; James Brown Scott, Washington; Silas H. Strawn, Chicago, and George W. Wickersham, New York. The entertainment of the visitors will be in charge of a committee of American lawyers practicing in Paris with Hugh A. Bayne, chairman, and the following members: Watson C. Emmet, Donald Harper, Benjamin F. Conner, Gethering C. Miller and Lovring Hill.

Headquarters for the American visitors will be maintained at 82 Avenue des Champs Elysees. About 2,000 American lawyers are expected to visit London and a large proportion will attend the Paris meeting. Mr. Saner said. Others will visit with the Bar of Scotland at Edinburgh and the Irish bar at Dublin.

Breeding Yakalos May Augment Meat Supply

WAINWRIGHT, Alta., July 8.—(A.P.)—A new breed of livestock which may have a bearing on the future meat supply has been developed in the national park here by crossing buffaloes with yaks. Superintendent A. G. Smith says the stock has heavy beef qualities, combined with a good rustling nature.

The breed has been given the name "yakalos," which Mr. Smith believes will prove more practical than "catalo," evolved several years ago by crossing buffaloes with domestic cattle. "Yakalos" breed true to type, are sturdy and able to forage for themselves, he said.

More than 1,500 buffalo calves were born this year in Wainwright park, which makes up for the excess sties killed last winter. The herd now numbers 6,000 full grown buffaloes, the largest in existence and one of the remnants of the millions of bison that once roamed western prairies, according to Mr. Smith.

With Ages
Totaling 392 Years

THREE FILIPINOS PASS AWAY.
MANILA.—(A.P.)—The town of Taytay, situated only a few miles from Manila in the province of Rizal, claims the record for longevity in the Philippine Islands. From October 1923 to the end of April 1924, six persons who passed the century mark died there, according to the record kept by Father Dumandan.

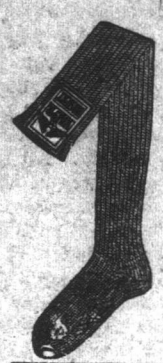

One woman, Benta Gonzaga, according to the record was 140 years old when she died. Others who had lived far beyond the century mark were Tomasa Vivencio, 123 years and Maria Roxas, 129 years.

Father Dumandan says he believes that the simple diet of fish, vegetables and fruit which compose the chief foods of these people, adds greatly to their long lives.

Pill green pepper cases with cream cheese, mashed and mixed with chopped nut meats, sour pickle, hard-cooked egg and salad dressing. Slice across and serve on lettuce.

Pure, clean wholesome Crisco adds to the taste of French fried fish.—adv.

The Speech From the Throne

The Speech from the Throne, which was delivered yesterday by his Excellency the Governor at the opening of the Legislature, outlined briefly the main questions to be dealt with by the Government during the session. The reference to the auditing of accounts in the various Public Departments as a preliminary to further investigations to be held by a Commissioner from England is in keeping with the policy of "Clean-up" which was the Party's main platform. It is gratifying also to notice that economy in the public service is being enforced, and that further measures with that end in view have been decided upon, thereby carrying out the pledge to "Keep Clean".

The promise of a measure designed towards more adequate control of the sale of liquor has awakened lively interest, and irrespective of the opinions held on the merits or demerits of Prohibition in its widest sense, it is generally felt that the evils of the present system must be drastically dealt with, and without loss of time. The Hon. A. B. Morine gave the assurance in the Legislative Council that the script system under the proposed changes would be abolished. That in itself will meet with strong approval, and it is to be hoped that the legislation which results from the deliberations during the session will be such as to put an end to the disastrous effect which the Prohibition Act has had in encouraging lawlessness, lowering the moral standard of the community, and tending to increase intemperance. While we are firmly convinced that the abolition of the open saloon, which perhaps could be more accurately described as the private drinking rendezvous, was a move in the right direction, at the same time we are equally convinced that a system for the distribution of liquor can be found whereby the man of temperate habits will not be deprived of his liberty, and a check can be placed upon the individual who is incapable of self-control.

The decision of the Government to place the control of public printing and stationery under the Department of the Colonial Secretary is a new departure, the effect of which can only be judged by results. Certainly if the expenditure during recent administrations is anything like the amount generally stated, it is quite time that radical changes were made in this direction. The flour milling project and the proposed Gander River enterprise can only be discussed when further particulars are available, but it is to be hoped that in connection with the latter it is the intention of the Government to insist upon manufacture. The policy of cutting our timber for export in its raw state should be discouraged and as soon as possible forbidden, unless we are anxious to hasten the time when this country will be turned into a barren wilderness.

TO-NIGHT! TO-NIGHT! Grand Concert, Victoria Park, by Mt. Cashel Band.—July 11, 11

A Personal Experience of Monday's Hail Storm

From a conversation with Rev. J. Omond, the Methodist Minister, at Flat Island, we obtained further particulars of the unusual storm which swept over the settlement with such disastrous effects. Monday morning was gloriously fine until about 10 o'clock, when signs of a storm appeared to the North-west. It approached rapidly accompanied at first by mutterings of thunder which gradually increased in intensity. At ten thirty the storm broke over the village, and although it did not last longer than 15 minutes the harbor was terrified. The surface of the water was churned into white foam by the hailstones, which were as large as an inch in diameter and immediately practically all the window panes were shattered. Houses covered with felt had the roofs torn to pieces and the rain which followed deluged the interior of residences and stores. Suddenly as the storm came, it disappeared, and the terror-stricken people gathered in groups to ascertain the damage done and to exchange experiences.

In some houses as many as forty panes of glass were destroyed and many of the roofs were completely stripped and are at present open to the elements. A curious feature of the disturbance was that Red Harbor nearby was untouched, and several fishermen attending traps in the vicinity were outside of the zone.

Codfishery Reports

The following reports of the codfishery for the week ending July 5th have been received by the Fisheries Department:
Ferryland—Twenty-three traps in water between Lay Point and South Head.

Bay Bulls—No codfish is being taken on trawls. The whole coast is lined with dogfish.

St. Barbe—From Eddies Cove to Ferolle South, two hundred traps in water, prospects fairly good. Fish is laying on grounds and will not trap, bait supply is good. Fifteen hundred qts. of fish taken to date with 150 fish week.

Bonaville—Shoe Cove Point to Greenspond, codfishery prospects very poor. Up-to-date fish has never been so scarce.

Fogo—Wild Cove Point to Hare Bay Head, forty traps out, 150 dories and skiffs fishing, total landed to date 1,700 qts. Codfishery prospects fair, no bait supply; caplin struck off shore early.

Sunset Glow Arrives

Schr. Sunset Glow, Capt. Geo Dean arrived in port yesterday with a cargo molasses to Harvey & Co. One of the crew named Martin, belonging to Carbonear was reported ill on arrival of the vessel. The port doctor visited the patient and found that he was suffering only from a cold.

Our Drugs and Chemicals are as pure as can be had, as we buy only from first class houses. Only qualified Druggists dispense and strict adherence to the Doctor's order is our motto. We have connection with this department and our messengers are at your service. Give us a trial. Our prices are reasonable and we guarantee prompt service.

FOR SORE FEET—MINARD'S LINIMENT.

Legislative Council

THURSDAY, July 10.

Following the formal opening of the House a short session was held. The Clerk having read the Speech from the Throne Hon. S. Milley rose to propose that a Select Committee be appointed to draft an address in reply. He first extended a hearty welcome to Hon. A. B. Morine, whom he believed would be a great addition to the House and greatly augment its debating strength. Newfoundland, he said, did right when he decided to take a part in the British Empire Exhibition, and even at this early moment people can see that it is benefiting the country and greatly advertising it by the well ordered exhibits to be found there. It is said that in Councils there is wisdom, and if this is true his Excellency the Governor must be wise indeed as he has had four sets of counselors within the past twelve months. For some time past we have had too much turnover but it is a pleasure to know that at last the unrest is over. The country has given with a clear voice a large majority to a new administration, and it is up to the upper chamber to see that everything possible is done to see that the country prospers as it can prosper, if the legislature so decides. The country is sick of politics and it is now in need of a period of reconstruction. The visit of Earl Haig marks an epoch in our history, and those who are inclined to talk disparagingly of our climate must have recalled opinions when they consider the excellent weather conditions prevailing here during Earl Haig's visit. The finances of the country give room for serious thought. For some time past we have not been thought very highly of in this connection in the outside world, and several times during his travels he had been forced to listen to things said about the country that he was able to deny. Mr. Milley hoped that the present Government will take steps to see that the country's name in this respect is redeemed. He welcomed the opening of new industries because they will tend to increase employment.

As yet not knowing the details, he was not in a position to discuss them fully, but he hoped that when they are introduced that Newfoundlanders will not be heavers of wood and drawers of water whilst outsiders will get the plums. He was glad to see that the Government will follow out the action of the Warren ministry in regard to investigations of wrong doing. It is the only way to show the outside world that we will no longer tolerate that state of affairs. With regard to Prohibition Act he hoped the Government will make an effort to bring in a law that will be carried out. He was sorry that the speech from the throne made no reference to lotteries and sweepstakes and etc., and he was afraid that unless some measures are taken in this matter we shall be in a position, which will not be a happy one. In conclusion he hoped the session would be a short one, so that when the house meets the next time the Government will be in a position to bring in measures of progress.

Hon. D. A. Ryan seconded the motion. He was glad to see that things are looking brighter. At present there is a good demand for our fish, and fair prices are being offered and he had no doubt that this will continue if the markets are kept from being overstocked. He was glad to see that something will be done to amend the Prohibition Act and was very pleased to know that measures are being taken to introduce the Gander and Flour Mills projects, both of which will provide much employment. He welcomed to the Council Hon. A. B. Morine, and offered him his warmest congratulations. Hon. Sir P. T. McGrath congratulated both speakers and with what they had said he on the whole agreed. The members of the Legislative Council, however, are in a degree responsible for some of the things that have happened in the country for the past four or five years. When the Fish Regulations were introduced the Legislative Council had adopted them, practically without question and the members cannot unload the whole responsibility of their evils on the shoulders of others. Similarly with regard to financial conditions they were in a measure to blame. True it is that some of the expenditure was inevitable, but, as the Walker report pointed out, in several cases, they were criminal extravagance. He was of opinion that there should be a repeal of the Legislative act of 1915 which removed from the council the power to reject money bills as without this power their hands are practically tied.

The Prohibition law has been in practice very unsuccessful. He hoped that one feature of the new act to be made will be the doing away of the script system. He was surprised that the men of education and standing as he the medical profession should be so false to the ethics of their profession as to prostitute it as has been done during the last four or five years. He hoped the incoming government will endeavour to do something for the betterment of the country. To advocate a policy of clean up is very easy, but it is much more difficult to bring such policy to practice. In endeavouring to do it the Government will be assailed from many quarters, but

TO-DAY'S MESSAGES.

ARMY NOT SO ATTRACTIVE AS FORMERLY.

LONDON, July 11.—The army as a career is seemingly not so popular as it once was. After making his half yearly inspection of the Military College at Sandhurst General Earl Cavan, Chief of the Imperial General Staff, said the strength of the College was being reduced by one company entirely owing to insufficient number of candidates for commissions.

INSURRECTION IN MANY PARTS OF BRAZIL.

BUENOS AIRES, July 11.—News arriving from Brazil from both official and unofficial sources indicate the situation in Sao Paulo, the scene of an insurrectionary outbreak, is still very serious and there is a great deal of threat in other parts of Brazil.

APPOINTMENT OF U.S. REPRESENTATIVE UNLIKELY.

LONDON, July 11.—The proposals of Premier Macdonald and Herrick to appoint an American representative on the Reparation Commission when dealing with possible German defaultation under the experts report is the subject of further editorial comment this morning, but there is little confidence that such an appointment is likely.

YOUTHFUL MURDERER HANGED.

VALLEYFIELD, Que., July 11.—Walter Muir, a 21 year old New York student, on whose behalf great efforts were made by parties in United States, was hanged this morning for the murder of Henry Lavolette in this town on September 22, 1923.

FARMERS PARTY WILL NOT SUPPORT LAPOLETTE.

CHICAGO, July 11.—Senator Robert LaFollette, endorsed for President last week at the conference for Progressive Political action will not receive support of the Farmer Labor Party which held a convention recently at St. Paul, it is announced by the Executive Committee of the party.

HALF A MILLION DOLLAR FIRE IN TORONTO.

TORONTO, July 11.—Colby building of Don Road occupied by the Colby Carriage Co. and Dominion Stores Ltd., was completely destroyed by fire last evening together with the contents, including 43 automobiles entailing a loss of over \$500,000.

300 PERSIAN CAVALRY SLAIN.

ALLAHABAD BR., July 11.—Three hundred Persian Cavalrymen were killed by Turkomans during a night attack near Gumbady, Kabardin in the Turkoman country, according to despatch to the newspaper pioneer.

Famous Russian Explorer

Finds Tombs in China: Old When Tut Was Young. Moscow, July 1. (A.P.)—Professor Peter Kozloff, Russia's foremost archeological explorer, has made a series of remarkable discoveries at the Chinese Royal Tombs near Urga, Mongolia, which have greater antiquity than the tomb of Tut-Ankh-Amen.

From the summit of a hill, Professor Kozloff and his assistants dug to a depth of fifty feet where they unearthed several imposing wooden structures containing sarcophagi of Chinese kings and princes who ruled the Chinese Empire before Europe and America were heard of.

The subterranean tunnels connected the mortuary chambers of the former rulers and the tombs are of distinctive craftsmanship, indicating the existence of a high state of culture in prehistoric times. The walls are richly embellished in elaborately embroidered silks and satins and bear hieroglyphic inscriptions illustrating the lives and achievements of the dead rulers.

As in the tomb of Tut-Ankh-Amen there was found a considerable amount of furniture and a large number of miniatures of figures representing men, animals and birds in deference to the Chinese religious respect for these figures.

Professor Kozloff decided not to disturb the bodies of the kings which have occupied their tombs for more than 4,000 years. He is reorganizing his expedition for a final dash into Tibet where he will resume his excavations in the forgotten city of Kharakhota which he unearthed some years ago.

Shipping

Schr. Mystery has cleared for Oporto from Grand Bank taking 3,228 qts. codfish.
Schr. Jean McKay has cleared for Oporto taking 5,507 qts. codfish shipped by J. E. Potter, Wm. Forsy and S. Harris Ltd. Grand Bank.
Schr. Dauntless has arrived at Trinity with a cargo coal from Sydney.
Schr. Everett sailed yesterday from Twillingate for Calham, N.B. in ballast.
MINARD'S LINIMENT FOR HEAD-ACHE.

German Snakes Slept While Thieves Stole Bronze Brother

Hamburg, June 16 (A.P.)—The largest bronze snake in Germany, which occupied a prominent place in Carl Hagenbeck's animal farm near Hamburg, was stolen recently by thieves who, the police said, would probably sell the statue for old metal. The bronze snake stood on a pedestal in the center of the snake yard, which is a kind of jungle, so that the inhabitants might be reminded of their native haunts and feel perfectly at home.

The management believed that the snakes were better than watch dogs to guard this valuable piece of statuary, but the thieves apparently had no fear of the thousands of reptiles within the enclosure, and escaped with their loot without anything more than being hissed at.

Radio Weak at Sunset.

Washington, July 6. (A.P.)—Summer afternoons are the worst periods for radio, the bureau of standards of the commerce department has found. The announcement was made after extensive tests, which showed that during hot afternoons radio signals are weak and disturbances are strong. Observations made on the strength of radio signals from high power European stations showed that the signals are weakest at the hour of sunset at the European stations.

Here and There.

A truly fine soap for the face and hands—yet it costs only five cents—Ivory Soap—adv.t.
Purity, mildness and gentleness are three of the pleasing features about Ivory Soap—adv.t.
SIX DAYS' SALE—Over four thousand two hundred cups and saucers were sold the past six days at S. RICH'D. STEELE'S China Depot, opp. Court House. See advertisement.
CLEAN DOCKET.—There was nothing of a criminal nature to be disposed of before the Magistrate's Court this morning.
Fresh Lobster and Chicken Salad served daily at LIDDY'S HOTEL, Torbay, 'Phone 14F2. July 11, 121

PUBLISHED TO-MORROW.

An address, delivered at the Rotary luncheon yesterday, by the High Commissioner at London, Mr. Victor Gordon, will be published in our issue to-morrow.

Mrs. Arthur Hammond will be "At Home" on Saturday, July 12th, from 3 to 5.30 p.m., at the residence of Mrs. N. P. Hunt, 118 Barnes' Road.—July 10, 21

ARRIVALS AT BROWNSDALE HOTEL.

To Patrons of THE NICKEL

Dear Friends:— Only once in the course of years are we privileged to bring to our friends a photodramatic creation of such magnificence and dramatic power as "Enemies of Women" the brilliant picturization of Vicente Blasco Ibanez's famous novel. It will be shown here next week.

More than a million dollars was spent in bringing to the screen this thrilling narrative of Europe's gilded society life, with its magnificent palatial settings, its unparalleled luxury, its great cast of prominent players. Lionel Barrymore as a pleasure-loving Prince of Russia and Alma Rubens as the most famed siren of the Continent are featured among a host of screen celebrities and a company of the acknowledged beauties of the theatrical world.

Against the background of Paris, Petrograd, Nice and the Riviera where the drama was photographed are staged the revels and intrigues, the tragedies of the Monte Carlo gambling tables, the red course of Russia's revolution, the echo of the battle-fields combining to make one of the most absorbing narratives of screen history.

"Enemies of Women" comes direct from successful showings in the biggest theatres of America where it was played at advanced theatrical prices. It is a privilege to be able to show it here and we sincerely advise those who seek the truly big things of the motion picture art not to miss it.

Very truly yours, THE NICKEL MANAGEMENT.

Metegama Sails this P. M.

TEMPORARY REPAIRS EFFECTED. The temporary repairs to the C. P. R. liner Metegama were completed at the Dry Dock this morning, and it is expected the ship will be ready to sail for Quebec by 3 p.m. Capt. Walsh, Manager of Canadian Pacific Steamships Limited, and Mr. T. C. Workman, of the London Salvage, who supervised the work, are taking passage by the ship. The Canadian Cutter Ocean Eagle will accompany the Metegama to the mouth of the St. Lawrence River.

Would Restrict City Laundries

New Bye-Laws Allows Two-third of Electors to Reject Building Right. Two-thirds of the electors of any city polling sub-division may block the granting of a permit for a public laundry, according to a new by-law of which a draft has been submitted to the Executive Committee to the city council for its study within the next month. This regulation has for its object the control of such places through the wishes of the ratepayers and demands that every person, company or other concern desiring to construct a laundry must give ten days' notice of such to the City Clerk who will publish, in two newspapers, one in each official language, details of the proposed construction.

At the same time, a descriptive placard must be placed by the proprietor in a conspicuous place on the site intended for such laundry. If two-thirds of the civic electors submit their objections to the City Clerk within fifteen days of posting of the notice, the permit will not be granted.

If, however, the plans are approved of by the building department, and no opposition is made, the permit to build will be issued as usual. One of the conditions imposed on such builder or owner is that he will agree to equip his plant with all necessary smoke or gas consumers to avoid all possibility of a smoke nuisance. A deposit of ten dollars is required with such request for a permit, to meet expenses of advertising, placard, etc., as required in the above.—Montreal Star.

Run by Rain-Power

Hoghton, in Lancashire, can boast what is probably the only cotton mill in Britain which is run by water-power. The mill is three storeys high, contains 100 looms, and is worked by thirty weavers and their assistants. Strikes or coal prices do not worry; trade depression matters little.

The only time during which anxiety overtakes the millowners and the employes is the time of drought. Little rain means little power. There have been times in a hot summer when the weavers have only worked an hour.

Hoghton, in Lancashire, can boast what is probably the only cotton mill in Britain which is run by water-power. The mill is three storeys high, contains 100 looms, and is worked by thirty weavers and their assistants. Strikes or coal prices do not worry; trade depression matters little.

The only time during which anxiety overtakes the millowners and the employes is the time of drought. Little rain means little power. There have been times in a hot summer when the weavers have only worked an hour.

Metegama Sails this P. M.

TEMPORARY REPAIRS EFFECTED. The temporary repairs to the C. P. R. liner Metegama were completed at the Dry Dock this morning, and it is expected the ship will be ready to sail for Quebec by 3 p.m. Capt. Walsh, Manager of Canadian Pacific Steamships Limited, and Mr. T. C. Workman, of the London Salvage, who supervised the work, are taking passage by the ship. The Canadian Cutter Ocean Eagle will accompany the Metegama to the mouth of the St. Lawrence River.

Would Restrict City Laundries

New Bye-Laws Allows Two-third of Electors to Reject Building Right. Two-thirds of the electors of any city polling sub-division may block the granting of a permit for a public laundry, according to a new by-law of which a draft has been submitted to the Executive Committee to the city council for its study within the next month. This regulation has for its object the control of such places through the wishes of the ratepayers and demands that every person, company or other concern desiring to construct a laundry must give ten days' notice of such to the City Clerk who will publish, in two newspapers, one in each official language, details of the proposed construction.

At the same time, a descriptive placard must be placed by the proprietor in a conspicuous place on the site intended for such laundry. If two-thirds of the civic electors submit their objections to the City Clerk within fifteen days of posting of the notice, the permit will not be granted.

If, however, the plans are approved of by the building department, and no opposition is made, the permit to build will be issued as usual. One of the conditions imposed on such builder or owner is that he will agree to equip his plant with all necessary smoke or gas consumers to avoid all possibility of a smoke nuisance. A deposit of ten dollars is required with such request for a permit, to meet expenses of advertising, placard, etc., as required in the above.—Montreal Star.

Run by Rain-Power

Hoghton, in Lancashire, can boast what is probably the only cotton mill in Britain which is run by water-power. The mill is three storeys high, contains 100 looms, and is worked by thirty weavers and their assistants. Strikes or coal prices do not worry; trade depression matters little.

The only time during which anxiety overtakes the millowners and the employes is the time of drought. Little rain means little power. There have been times in a hot summer when the weavers have only worked an hour.

PEPYS BEHIND THE SCENES.

July 10th.—Up betimes, the day cold and foggy, and as much like the fall as was last se'enight like the tropics. Indeed, so chill has it become that croakers do prophesy no summer at all, which I am inclined to doubt, being yet somewhat early for the heat. Talking with Mr. Lake of the great storm at Flat Islands which shatters all the window panes, and is the greatest damage done by a storm since the great October gales of 1921. A thing to note is Mr. Monroe, he asked to grant money for the Flat Islands' relief, but will not do so, refusing to give the people money save in cases of the most desperate nature. So while all sorry for the people of Flat Islands, yet Mr. Monroe's action pleasing in that it is clear that while he is Prime Minister there will be a careful administration of public monies and no squandering hereafter. By the public despatches, news of W. Davis, that he was one of the American Ambassador to the Court of St. James, he chosen leader of the Democrats on the 103rd ballot, and is the largest number of ballots were required for this purpose. The House meets to-day and a great-er Governor reads the Speech from the Throne, and little promise of Legislative effect, but the time was too short for much to be prepared. Among other things, a full enquiry into public matters, and promised into public before the House measures to come before the House for the amendment of the Prohibition Act and for the starting of a pulp and paper plant on the Gander River, and a flour mill at St. John's. But little debate in both Houses on the speech being confined in the Upper House chiefly to congratulatory discourse and in the Lower House to indignant statements of policy. Mr. Lake makes a very good discourse on as motion for an address in reply to Mr. Linagar, his secretary, and Mr. Warren, also speaks briefly and makes the time honored comment on the speech from the Throne, that it has little in it. Mr. Monroe replies, and he address mighty emphatic and the need for economy and careful administration. His discourse, for all brevity, a safe indication of his desire to benefit the country in every way that lies in his power. So with few questions and notices of motions, the House adjourns to meet again Monday, and to conclude its business with all possible despatch.

Newfoundlanders Lead in Fashion Parade

FAIR DAUGHTERS OF TERRA NOVA ARE LEADING FIGURES IN BEAUTIFUL SOCIAL EVENT IN CALIFORNIA.

When the Orchestra struck up the "Grand March" and the parade of 180 guests was formed up in the beautiful ballroom of the Baltimore Hotel, at Glendale, California, the selected leaders chosen by the Committee of Chaparones were Miss Jean Corbett and Florence McCoubrey.

Both, charmingly attired, stepped down their places as roses were showered from the balconies, and the Fashion Parade moved off to the delightful music of Heine's Orchestra.

Miss Florence McCoubrey is the young daughter of the late H. T. McCoubrey, former Managing Director of the Standard Manufacturing Co., St. John's, Nfld. Her mother, Mrs. J. O'Neill Farrell, is at present a resident of Los Angeles, and has been living there since 1916.

Miss Jean Corbett is the daughter of Mrs. J. A. Corbett (nee Miss Maud Williams), the latter one of our most accomplished actresses in the days of St. John's premier amateur performances. Miss Williams made her first appearance in St. John's in "Under the Gaslight" at the Metropolitan Theatre, when it was last produced by the Old Favorites Dramatic Co., the cast of characters at that time including T. M. White as "Bykerk", her cousin, Leo Murphy as "Skerby", J. J. O'Grady as "Ray", G. F. Power, P. J. Patterson, G. F. Power, Jean Halley, Polly Carroll, T. J. Rolfe and many others well known to the footlights.

Although losing active touch with their native country, the hearts of the Newfoundlanders abroad warm towards Avalon's shore, even though they live in a sun-kissed centre, where the roses and fruits grow in rich profusion.

Goiter Traced to Snow Water

Winnipeg, Man., July 7. (A.P.)—Examination of 600 school children has resulted in the pronouncement that prevalence of goiter among them was caused by snow water in Shoal Lake, a body 50 square miles in area, situated 40 miles to the northeast, from which the municipal supply is drawn. Dr. Duncan McRae said iodine would have to be introduced into the water. Three hundred children between the ages of 12 and 16 were found to have goiter.

Reg. 50c. each for **44c.**

Ben Redden Scores Again

"LITTLE MOTHER OF MINE" AND OTHER SELECTIONS APPLAUD ED.

Despite other attractions, a large audience attended the Majestic Theatre last night. Ben Redden, the vocalist with some voice, treated the patrons to three songs which were sung in masterly style. "Out There in the Sunshine With You" and "Me and Mah Partner" were well rendered and accepted. "Little Mother of Mine" is already a local favorite, and last night the crowd seemed to swing to it, so much so that everywhere to-day the public are humming it. "Three Black Eyes" was the feature picture in which Taylor Holmes is the star. To-day this bill will be repeated. For the benefit and pleasure of screen lovers a number of outstanding Paramount features will be exhibited during the next few weeks. These pictures are especially recommended and those interested would do well to keep posted on the events and subjects as will be advertised.

Noble Hands Soiled Daily

AS DUKE LABORS IN FIELDS.

INVERARY, Scotland, June 30.—(A.P.)—The idea that Dukes can't and won't do manual labor is dispelled by a visit to Inverary Castle, in the grounds of which the owner, the 52-year-old Duke of Argyll, is working as a stonemason's laborer. He carries heavy stones, takes orders from the foreman, and keeps strict trade union hours.

The duke, who is also Keeper of the Great Seal of Scotland, is helping to erect a belfry. He wears a kilt and a grey woven shirt, and rolls up his sleeves to tackle his job.

General Downward Trend in Prices

The theory of which something has been heard lately, that we are at the beginning or rather have made a fair start on a period when the general trend of prices will be downward, has a good deal at the back of it. There is, in the first place, the argument from history. That periods of warfare have been followed by long periods of declining prices from the level reached in war-time is well authenticated, and if the last period of warfare was on an immensely greater scale and resulted in an inflation of prices much in excess of that previously known, there is reason to believe that the matter of size, while it may modify previous experience, will not vitiate it. There is also what is perhaps new to some extent, or at any rate is of considerably greater importance than previously, what may be termed the psychological argument. This is referred to in some detail in a recent review issued by the Royal Bank of Canada. With greater attention and greater publicity given to price movements than in the past, an effect is more quickly produced in the mind of the buyer. Under present circumstances, also, the effect is marked, and will probably continue to be marked during the active lifetime of the present generation of business men, whose memories regarding the debacle of 1921, are likely to be easily dulled. Hence the hand to mouth buying which has been so pronounced a feature of business activities during the last two or three years.—Insurance and Financial Chronicle.

Rice Hay for Army Horses

MANILA, June 30.—(A.P.)—The United States army within the last year has purchased 8,000,000 pounds of rice hay, which has been found satisfactory as fodder for horses and mules. After July first the commissary expects to enter into contracts for about 10,000,000 pounds of this hay, and it is hoped to encourage farmers to produce the entire quantity of hay used by the army in the Philippines.

Big Fleet Goes After Tuna Fish

SAN PEDRO, Cal., July 8.—(A.P.)—Eight hundred boats, the largest fleet in the history of the local industry, will work out of this port during the tuna fish season, which started in June and continues until September.

During May 15,014 pounds of tuna, of the yellowish and yellowish varieties, were brought in. Approximately 3,000,000 pounds of fish of all kinds were delivered to the market here during the month.

The combination of silk overboots and shirt is of merited interest this season.

Fortunes Made

in a Hurry

GET-RICH-QUICK TRAPS FOR THE GULLIBLE.

Who wants to make a fortune in a hurry? If anybody has an ambition in that direction, his course is perfectly clear. He has only to advertise for a job with investment, and then—well, take his choice!

Such, at any rate, is the conclusion I have come to (write the "Tit-Bits" man) after reading through a pile of letters, circulars, prospectuses, and so forth sent me by a friend who did advertise for work with investment. Entrancing are some of the schemes set out, only . . . Occasionally two or more of the names given, under the Business Names Act, in the printed heading are struck out with a pen, and new and then alterations are made in the address in the same way.

"Gold-Mine" Business.

Among the letters from agencies, one I find one which—administers a gold douché:—

"The tricks of the bogus business merchant are quite beyond the comprehension of the average investor, and unless he has some experts, like ourselves, behind him, he stands a very good chance of losing his money. . . . Never let the other party form your company, or you are likely to be had! Insist on our forming and registering the company, as we see to it that you are 'top dog' all the time."

Here is a letter from another agency, which offers, on behalf of clients, a directorship in a coal business. The weekly turnover, it is said, is £1,000, £200 of which is profit. Who, except perhaps, the householder, would have thought that there is so much money in coal?

A good many of the other letters relate to comparatively small businesses of the gold-mine order. Writes a commission agent:—

"This old-established business is for sale, price, inclusive of everything, £350. The clear profits average £500 per annum, and are increasing. There is a good, sound, steady clientele. All business is conducted from the office by letter, 'phone, and telegram."

Lure of the Films.

In a letter of the same class a book-seller states that he wishes to open a shop in a certain thoroughfare, adding: "I had a three months' tenancy there, and my turnover was £1,100! My present premises have brought in £520 for three months, with an average profit of thirty to forty per cent."

A similar correspondent says he requires a partner, with "investment of not less than £2,500, in return for which we can offer an immediate guaranteed salary of £2500 a year (with considerable increase after a few months), if justified by the ability of the partner) and a share of the profits."

Further letters are from people connected with, or anxious to be connected with, the film industry. One correspondent asks whether the advertiser would invest £3,000 to produce a powerful film novel.

Profits From Patents.

"The sole rights are my own," she declares, "and you could have one of the leading parts at a very good salary. Ten pounds per week is the lowest for a good lead. Or you could have any other position preferable to you. You would share all proceeds from profits also I could share the proceeds from the publication of the novel, which at the moment is at the publisher's. Several thousand pounds would be realized from the sale of the picture after production."

Another letter says that there is going to be a share in a syndicate for the acquisition of a high-class London hotel, on the directorate of which will be "four men of title, all well-known business men."

There are, too, proposals for developing natural resources. A man, for instance, says that, in conjunction with friends, he is "about to develop an extraordinarily rich natural deposit of fibre, clay, peat, and natural gas" in a certain country. He offers a half share for 150,000 francs, which, he states, "will earn profits of over one hundred per cent. on capital invested for thirty years."

But to my mind the most fascinating of the schemes laid before my friend are those for the exploitation

of patents, secret processes, and so on. One of these schemes is for putting on the market an instrument used in the motor trade. At present the average cost price is 9s. each, and the average selling price 40c. each net, and on this basis, allowing for a reduction in the cost of production in quantities, some fine round figures are given. If 100,000 were manufactured, it is calculated, the cost would be £45,000, and on this quantity the gross profit would be £155,000.

A Coal-Saving Scheme.

Equally enthralling is a scheme for the conservation of fuel. The proposed capital is £25,000, to be subscribed up to £2,000 by branch managers, one of whom, it is suggested, shall be my friend. The estimated profits look uncommonly well on paper. On the first year's working they would be nil, on the second year's 58 per cent., and on the third year's 284.3 per cent., or an average for three years of 114 per cent. per annum!

So ridiculously easy is it to make money when you really settle down to the job!

Just Folks.

By EDGAR A GUEST

GETTING THE DOUGH.

Whenever around the festal board sit four or five of us, Queer wanderers through the lanes of life, our fellows to discuss, 'The conversation wise and true ere very long will turn Unto the sums of money ignoramus can earn; And soon upon the ear will fall this sentence soft and low: "There's Jack! He has no wit at all, but he seems to get the dough."

Now, we are most intelligent, a brainy clever crew. There's little that we do not know, but much we cannot do. Upon our walls the sheepskins framed attest that we have been To college, and of course you know 'Tis not the day to go to my cousin; it is to-morrow!"

Only the other day two young ladies on my bus began arguing as to which would pay. "No, dear; let me," one said, "I insist," the other declared. "But it is my turn, really," was the response. After ten minutes of this I knew that it was a game of patience, for neither wanted to "part."

They are, happily, always amusing incidents happening which help to make lighter one's task. The other day, just as the bus was about to start, I heard a shrill voice call: "Wait a minute; wait until I get my clothes on!" With an accord the passengers craned their necks. What they saw was a small girl struggling to hoist a laundry basket on the step.

Humour on the Bus

A CONDUCTOR WRITES ON HIS TRIALS AT HOLIDAY TIME.

At the best of times the bus conductor's job is no easy one, but on such occasions as public holidays his troubles are multiplied tenfold. The wonder is that all the bus conductors of London are not grey-haired. I am sure that every one of us would be if it were not for the fact that our sense of humour comes to our aid and helps us to "carry on."

It may be my imagination, but it always seems to me that at holiday time I get the most eccentric passengers. One year, I remember, when my bus was crowded to capacity, an old gentleman, when I asked for his fare, calmly told me that he did not believe in paying until he had completed his journey.

My Fussy "Fares."

I argued with him in vain, and even when I threatened to call a policeman it made no difference; indeed, he said he would be very pleased, as then he could test the legality of his case in the courts! On such a busy day I couldn't keep the bus waiting, so we went on. At the end of his journey this unusual passenger paid his fare, adding that he was "sorry to have troubled me!"

Perhaps the most unwelcome passenger at holiday time is the person who tenders threepenny-bits. More threepenny-bits are lost on a holiday, I should imagine, than on any other day in the year. What happens is that the coin slips between the conductor's or the passenger's fingers, rolls down the deck of the bus, and finally falls through the narrow slit which runs along the side, to be lost in the street. It wouldn't be so annoying, so far as the conductor is concerned, if it were not for the fact that in such cases the conductor has to bear the loss. We have to pay up and grin and bear it.

The "fussers," as they are called, also do their best to add wrinkles to the poor conductor's brow. If they are not complaining of draughts they are changing to more comfortable seats; then once they have "settled" themselves to their satisfaction they begin to bombard the conductor with questions—very often the right ones; will they be in time to catch such and such a train; will the conductor ask the driver to proceed with more cau-

tion? And then they suddenly discover that they have been given a penny short in their change. Usually, in the end, the conductor finds they have dropped the money.

I have given up marvelling over people's peculiarities since the time when the dear old lady, in the course of a long journey, asked me every three or four minutes if I was certain she was in the right bus. I thought I had seen the last of her when we reached our destination; but she turned round and suddenly exclaimed, "How stupid of me, conductor! This is not the day to go to my cousin; it is to-morrow!"

Only the other day two young ladies on my bus began arguing as to which would pay. "No, dear; let me," one said, "I insist," the other declared. "But it is my turn, really," was the response.

After ten minutes of this I knew that it was a game of patience, for neither wanted to "part."

World Advertisers Gathered in London

TO DEBATE PROBLEMS.

LONDON, July 6.—(A.P.)—Hosts of advertising men from all parts of the world, 2,000 alone are expected from America, are beginning to arrive here for the Convention of the Associated Advertising Clubs of the World. The general sessions of the convention, held at Wembley Park, site of the great British Empire Exposition, will begin July 14 and continue to July 18.

From India, Hawaii, South Africa, New Zealand, Australia, Belgium, France, Norway, Holland, Sweden, Italy and Czechoslovak delegates of the advertising fraternity will wind their way to the world's largest city to confer on the latest developments in merchandising and advertising, to lay plans for the future and to hear the opinions of famous statesmen, business men and advertising experts.

The list of prominent men who will address the convention includes Premier MacDonald, American Ambassador Kellogg, Lou Holland, President of the Associated Advertising Clubs of the world; E. W. Beatty, President of the Canadian Pacific Railway; Reginald McKenna, famous British banker; Sir Charles Hignam, Lord Burnham, Sir Eric Geddes, Herbert Houghton, Harry Tipper, Winston Churchill, Sir Philip Lloyd-Greame, Lord Leverhulme, Lord Kylsant, Edward A. Filene of Boston, Sir Robert Horns and Stanley Baldwin, former British Premier.

In addition scores of speakers will discuss the more detailed questions of the various phases of advertising in the group meetings, of which there will be many. Every known variety of advertising will come up for consideration.

The Prince of Wales has extended his patronage to the convention, and the Lord Mayor of London, with the Lord Mayors of virtually all of the principal cities of England, Scotland and Ireland, have given their official cognizance. Complete arrangements have been made for hotel accommodations for the delegates on their arrival in London and Lord Ashfield, on behalf of the London Underground Railway Company, has granted to each visiting delegate a free pass for the week on all London underground trains and London buses.

The festivities will start with a national welcome at Royal Albert Hall on Saturday, preceding the opening of the general sessions, at which time it is expected that most of the dele-

gates will have arrived. On Sunday 2,000 seats have been reserved at Westminster Abbey where a special sermon will be preached by the Lord Bishop of Durham.

The chairman of the general sessions will be Viscount Burnham, President of the Empire Press Union, and proprietor of the London Daily Telegraph.

The opening address Monday morning will be made by Premier MacDonald. He will be followed by Sir Eric Geddes, Harry Tipper, chairman of the general programme committee, and C. Harold Vernon, President of the "Thirty Club." In the afternoon Winston Churchill will speak, his subject being "The Responsibility of Trade."

Among the speakers Tuesday morning will be Reginald McKenna, whose subject will be "The Reconstruction of Europe with special reference to the Dawes Report." Sir Robert Horns

and Stanley Baldwin will be on the programme Thursday.

Curious, Isn't It?

PECULIAR FACTS AND FIGURES.

An ordinary railway engine is equal in strength to 900 horses.

The world has an estimated stock of forty-two tons of diamonds.

At the foot of the Monument, in London, is an order forbidding the beating of carpets against its base.

In Mexico a bride's trousseau is paid for by the bridegroom.

Whist the yolk of an egg is generally yellow, hens fed on white food, such as rice, lay eggs with white yolks.

Experiments have proved that wire-logs can be heard 3,000ft. below the surface in a mine and to considerable depths in water.

Last year America exported to

ed that £140,000,000 is staked annually.

The entire coast line of the earth measures 136,000 miles.

Valued at £15,000, a wonderful new telescope has been made for the Russian Government by a British firm.

It contains a mirror 40in. wide, 8½in. thick, and nearly 1,000lb. in weight.

The world has an estimated stock of forty-two tons of diamonds.

Experiments have proved that wire-logs can be heard 3,000ft. below the surface in a mine and to considerable depths in water.

Last year America exported to

other countries 148,434,916ft. of film, or nearly 30,000 miles.

The average speed of an electric lift in England is 300ft. per minute.

In America a lift speed of 800ft. per minute is attained.

Japan Goes to Wren

Japan is evidently determined to rebuild Tokio and Yokohama according to the best ideas. For this purpose it has asked the Corporation of London to allow her representatives to have access to all records in existence relating to the Wren reconstruction of the City following the Great Fire.

Further light on this scheme has recently been thrown by Mr. Sydney Perks, the City Surveyor, and in particular he has got together a mass of valuable information in regard to the proposal of Wren for the construction of a quay, re-embankment, right along the river-side.

"Bring on those Kellogg's Corn Flakes. I'm a hungry man!"

- 1st It's crisp and delicious as no other cereal can be—and it's simply great for any meal, any time!
- 2nd As healthful as it's good. Brimming with the kind of nourishment growing bodies need.
- 3rd Remember, too, it saves you work. No cooking—no sticky dishes to wash. Ready to serve.

ADVERTISE IN THE EVENING TELEGRAM.

Does Nature Use Wireless
MYSTERIES THAT SCIENCE CANNOT SOLVE.

Watch a flight of plover, especially golden plover, which are common in moor and country. There may be several hundred birds in one flight, and they move with amazing speed.

What will strike you as strange is that, when they change their course in the air, every single unit of all those scores of hundreds of birds change simultaneously and at precisely the same angle.

There is no visible leader; there is no warning call. In perfect silence and with absolute precision each bird acts as if it were conscious of what was passing in the brain not only of its neighbours, but of the entire flock.

Silent Signals.

Many other birds, such as starlings, behave in similar fashion. To put it briefly, the whole flight acts as if controlled by one brain. We do not know at present how this amazing uniformity is obtained, but we can be quite certain that there must be some incomprehensible means of communications. Were this not the case there would be frequent collisions in mid air, collisions which, at such high speed, would be extremely dangerous to the birds.

Fish which travel in shoals have similar methods of silent but instantaneous communication. You will see or rather presage—a steamer. They swim either in two long, straight lines or in a wedge shape, like the head of an arrow. Suddenly every fish in the line will turn simultaneously, dash outwards in a great curve, swim round the ship, and join up again in exactly the same formation, only that those that were previously on the right are now in the left-hand line.

The writer has seen this happen again and again, and no soldiers, however perfectly drilled, could match the perfection of "dressing" exhibited by these creatures.

Spots That Mean Safety.

Wild animals of many kinds are undoubtedly able to transmit warnings to others of the same species at a distance. Mr. Cherry Kearton, during his long wanderings in the wilds with a cinema camera, has noticed this fact over and over again.

Even lions, he says, are susceptible to the "danger" message, and where a few years ago they were plentiful they are now rarely seen, simply because the hunter has raked that part of the country with his motor-car, rifles, and an army of "boys."

On the other hand, whenever a sanctuary is made, animals and birds journey to it from great distances. In some mysterious way they get the news that a certain spot means safety, and there they will gather and breed and rapidly become almost tame.

The Moth's Mystery Message.

If conditions in any particular place become suitable for any special bird, animal, or insect, in some mysterious way that creature appears there. For instance, some years ago a kingfisher appeared in the heart of Bath, and was seen fishing for some small fish with which a pond had recently been stocked.

The kingfisher naturally avoids the dwellings of man, and how the beautiful little bird became aware of the presence of fish in that particular pool is a mystery.

A form of wireless occurs also among insects. There is a variety of moth which frequents only a certain kind of tree. A naturalist took one of the females of this species and placed her in a cage three miles from the nearest wood in which others of her kind were to be found.

The next night two males of the species were discovered, clinging to the outside of the cage, yet how they had become aware of the presence of their mate is a problem which defies any ordinary explanation.

War Claim Awards Of \$14,500,000 Made Against Germany.

Washington, July 8. (A.P.)—A recapitulation of the work accomplished by the German-American Mixed Claims Commission since its organization up to the present time, shows that 439 awards aggregating more than \$14,500,000 have been made in favor of American firms and individuals on claims against Germany for losses sustained in the world war through death or property damage. In addition to the principal, Germany will be required to pay five per cent. interest on each claim allowed from the date of the award to the time of payment. No payments will be made by Germany until the commission includes its labors and a funding method is determined upon.

When the commission adjourned recently for the summer it had pending before it 12,416 claims amounting to approximately \$500,000,000, including one by the United States government for \$255,544,810, representing the cost of the American army of occupation. This claim however, is expected to be settled through other than commission channels. Of the more than 12,000 pending claims, 2,044 have been considered by the American and German agencies of the commission and are ready for final action.

Wilhelm Kissebach, German Commissioner, recently went to Germany for the summer and will return to Washington early in the fall when the commission contemplates resuming its sessions. Robert W. Bonynge, American agent on the commission, and Agent von Wewinski of Germany, accompanied by attorneys and assistants, will sail on separate steamers July 9 for Germany where evidence necessary to adjudicate American claims not obtainable in this country will be investigated.

While Germany is obligated to pay the amounts agreed upon by the Mixed Claims Commission, it remains to be decided where she will get the funds for such payments.

Once the question of how the claims are to be met is determined, Germany will pay the American government, which, in turn, will remit the amount of the respective awards to the individual claimants.

Hospital to Eradicate Malaria in Philippines

MANILA, June 30—(A.P.)—A modern hospital designed primarily for the eradication of malaria in the provinces of Pangasinan and Batan, Island of Luzon, has just been opened at the Pampanga Sugar Mills Central at Del Carmen, 60 miles north of Manila.

The hospital, which is one of the most completely equipped in the Philippines, is the gift of John D. and Adolph B. Spreckels of San Francisco, who are largely interested in the Del Carmen sugar central.

The institution in addition to being used for the care of medical and surgical cases in the two provinces will be the headquarters for the Rockefeller Foundation and the Philippine Health service in their campaign for control of malaria.

The central court of the building contains a pond, the gift of the Rockefeller Foundation, which will be stocked with fish from the United States, to be studied in connection with experiments on anopheles mosquito larvae.

R. R. Hind, general manager of the central, outlining the purpose of the donors in making the hospital possible, pointed out that the physical welfare of the Filipino workman was most important not only to himself but to his employer.

"There's no place like home be it ever so humble." Decorate it with Box Fronts until September 30th. Prizes to the value of \$600 must go into fifty homes.

Germany Imposes Travel Fee
TO KEEP PEOPLE AT HOME.

BERLIN, June 30—(A.P.)—Germany's new regulation charging all Germans 500 marks, or about \$125, for a visa to leave Germany has halted the exodus to adjoining countries where the exchange rates are better than in Germany and the prices less.

However, this new regulation has called forth loud protests from many sources. Students, teachers, artists and many others of limited means say it is no hindrance to wealthy Germans who will pay the fee and go abroad as usual to spend their money, but prevents persons of modest means from making trips for study and recreation.

As a matter of fact, the government has arranged to exempt students who can prove they are going abroad to attend some educational institution, and invalids and other classes are also exempted. But the difficulties of getting exemption are said to be so great that many persons prefer to remain at home rather than struggle through the red tape.

Repair the Roads
Editor Evening Telegram.
Dear Sir.—As a citizen I would rather praise the Municipal Council than criticize, but surely some explanation is due the public as to why our streets and lanes are smothered with dust when 75 per cent. of the dust nuisance could be cured by the application of tarvis as in previous years. Although it is nearly the middle of July no effort has been made to commence this work and the streets are not even prepared for the tar. Practically all of the streets need some slight repairs and even Military Road and LaMarchant Road, the chief roadway on the Higher Levels, is covered with ridges and pot holes. There is no reasonable argument as to why this work should be delayed until half the summer has passed. Although the spring was cold, we have had dozens of fine warm days since April when this work could have been done, and we have just experienced about two weeks of suitable warm weather. There is certainly need for a shake up either in the Council or among the staff. We are paying enough taxes to receive decent living conditions, and if those in charge of this work are not prepared to act in an efficient manner they should make room for those who will. The use of tarvis on the level streets makes a permanent and clean road for a season, and thin oil which does not stick or harden could be imported and used on the hills and so keep the dust down without being slippery for horses. No doubt tarvis would be just as good for sidewalks as it is for the road bed.

Yours truly,
CITIZEN.

THE GRAY MEN.
The old gray men are bending to tasks that are too hard; they're patching a road they're mending the pavement by the yard; they're digging in the ditches with spades the town provides, and they have grievous stitches all up and down their sides. The tired gray men are sweating out yonder in the sun; and as they toil they're letting their thoughts to old days run. They're thinking of the "man" they used to be, when all the world was sunny, and youth and health were theirs. Ah, then the sage implored them to save their godly wages, to earn the plunks and hoard them against their wintry age. In vain was his endeavor, they threw away the kale; their youth would last forever, and their strength would never fail. But youth and health are fleeting, the winter comes oftsoons, and life is sorely beating the man who lacks doubloons. The sad gray men are wielding their shovels in the rain, and every hour is yielding new weariness and pain. The ones who prospered greatly go by in limousines, the men with aspect stately, the dames like ermine queens. The gray man digging, spading, and working in the drain, behold the rich parading, and feel their lives were vain. "We too," perhaps they're sighing, "might ride in limousines, if we had not sent flying, in youth, the hard earned beans."

WALT MARCH
I have let myself be angry this morning over a matter in which my anger cannot have any immediate outlet. I know when I started to think and thinking on that subject just what was going to happen and yet I let myself go.

The result is that every nerve is on edge. I have a feeling of physical nausea. I am filled with a tremendous restlessness. I am just as much ashamed of myself as if I had gone on some kind of a bat and gotten intoxicated. I have Poisoned Myself. In fact that is just what I have done. Gotten intoxicated. Intoxicated means poisoned. We have generally applied the words to the poisons of alcohol. But it can mean any poisons, and the poisons that result from suppressed sugar are as bad in their way, as those of alcohol.

And do not think I am speaking figuratively. I mean real physical poisons. In a vague way we have realized for centuries the harmful effects of such emotions as anger, fear, jealousy, and the like. The old association of jealousy and bile is a familiar example of this conception. It is only in the last few years, since scientists have had their attention turned to the wonderful work of the ductless glands, that we have realized that whenever certain emotions, the subconscious mind flashes the word to the ductless glands and the glands pour into the circulation whatever secretion the emergency requires.

Pleads Guilty From Weariness
BAKERSFIELD, Cal., July 8 (A.P.)—Charles Handy, a negro, charged with a statutory crime, fought his case, but he got tired of waiting for the jury to return a verdict. After the jury had been out fourteen hours and while it was still deliberating, he pleaded guilty.

Listen that Radio Set! It's on display in the window of our Premium Department. OH BOYS!

DO YOU EVER GET INTOXICATED?
I have let myself be angry this morning over a matter in which my anger cannot have any immediate outlet. I know when I started to think and thinking on that subject just what was going to happen and yet I let myself go.

The result is that every nerve is on edge. I have a feeling of physical nausea. I am filled with a tremendous restlessness. I am just as much ashamed of myself as if I had gone on some kind of a bat and gotten intoxicated. I have Poisoned Myself. In fact that is just what I have done. Gotten intoxicated. Intoxicated means poisoned. We have generally applied the words to the poisons of alcohol. But it can mean any poisons, and the poisons that result from suppressed sugar are as bad in their way, as those of alcohol.

And do not think I am speaking figuratively. I mean real physical poisons. In a vague way we have realized for centuries the harmful effects of such emotions as anger, fear, jealousy, and the like. The old association of jealousy and bile is a familiar example of this conception. It is only in the last few years, since scientists have had their attention turned to the wonderful work of the ductless glands, that we have realized that whenever certain emotions, the subconscious mind flashes the word to the ductless glands and the glands pour into the circulation whatever secretion the emergency requires.

To Avoid The Curse of Nerves.
I am going to borrow two paragraphs from a wonderful book on the subject of avoiding nervous trouble which I think every person in this land would do well to read. If anyone will send me a stamped envelope, I will send him the name of this book. I would do so here if it were not that it would be like advertising and

ing attention here. The roof is pitched covered with a half-inch of gravel. One of the birds is mothering her brood of two young ones. Those who go to the roof to watch the birds can do so without disturbing them, as the instinct of the partridge prompts it to lie still when danger is sensed, and to rely upon its natural camouflage for protection. According to workers in the building, the birds have been coming there regularly for several years.

Wild Birds Nest in Confidence
YORK, Pa., July 9.—(A.P.)—The unusual sight of a family of partridges nesting on the roof of a six-story office building in the heart of the business section of the city, is attracting attention here.

Famous Stage Beauties in 'Enemies of Women'

Broadway Show Girls in Gorgeous Costumes Designed by Joseph Urban's Daughter.
"Enemies of Women," the thames story so gorgeously produced for the screen by Cosmopolitan Corporation and which will be the offering at the Nickel Theatre on Monday next, is notable, among several reasons, for the quantity and quality of the feminine pulchritude in the supporting cast. More than a hundred of the most famous professional beauties in New York participate in the fete scenes. The time of the action is placed about 1914 to 1918.

The task of designing the costumes for these beauties proved a fascinating one to Mrs. Greil Thurlow, who creates the gowns and costumes for all Cosmopolitan superfeatures. A daughter of Joseph Urban, the scenic artist, Mrs. Thurlow displays the same fine eye for line, color and atmosphere that characterizes the creative genius of her father.

Early in the "Enemies of Women" film, there occurs a fete given by the Prince Lubimoff (Lionel Barrymore) of the story. Mrs. Thurlow costumed the beauties distinctly for type. For instance, Holes Lee Worthing is a dignified, blond Norwegian type. Her gown is of pale pink satin underdressed, draped gently to the figure and quite long. Over this is draped an over dress of pink chiffon, its long sleeves banded in rich sable fur six inches in width, its neck line straggling from the security of a high

glance on the left shoulder to "uter abandonment as to the right, leaving the member utterly unadorned. Mrs. Thurlow realized the beauty of Miss Worthing's shoulders and calls attention to them in her design.

Jean Le Monte as a Jewish beauty wears oriental green-brocaded trousers and bodice, overdressed with a batik dyed veil that starts from a jeweled crown and finally gathers volume into a whimsical tail. Long jeweled ear-rings are also worn.

Vital Facts for Women

Sooner or later almost every woman is brought face to face with the fact that she is a victim of some weakness or ailment peculiar to her sex. It may be the young woman suffering from pain or irregularities, a mother who has brought on some weakness or displacement from overwork, or the middle aged woman passing through the most critical period of her life. For each of these trying periods Lydia E. Pinkham's Vegetable Compound has proved the greatest boon ever given to women, and there are women living in every town and city in the country who testify to its value.

After a mixture has been frozen, draw off as much of the salt water as possible and reheat, using four parts of ice to one part of salt. Blueberries are delicious omelette with buttered breadcrumbs, baked and served with hard sauce, or a sauce made from the berries.

Left Over War Explosive USED TO CLEAR FARM LAND.

NEW YORK, July 7.—(A.P.)—More than 45,000 farmers in 28 states have used war surplus picric acid to clear 250,000 acres of land and to remove stumps from about 80,000 acres, according to the American Chemical Society. Nearly 8,000,000 pounds of this explosive have been applied to agriculture by the United States Bureau of Roads. It is estimated that the saving to the farmers over the cost of commercial explosives has amounted to \$750,000, but the actual benefits have been more far-reaching as thousands of small farms have had the acreage of cultivatable land increased.

Fashionable London Mansions

TO BE MADE INTO APARTMENTS.
LONDON.—(A.P.)—The present home shortage and the many large empty houses in certain parts of London have at last moved owners of such dwellings to permit a conversion scheme on a large scale. Many large mansions south of Hyde Park and in fashionable Mayfair, Eaton Square and Grosvenor Square, will be changed into small apartments, while retaining their present appearance. One of the chief reasons big houses are being given up is the shortage of servants.

Government Plans to Stop Lake's Leak With Concrete

SALT LAKE CITY, July 6 (A.P.)—Plugging up holes in the bottom of Duck Lake in the Dixie National Forest in southern Utah so that it will not become entirely dry each summer and fall, is planned by officials of the United States Forest Service. Duck Lake, located in the mountains, contains much water in the spring but it soon filters out. There are several large holes and the forest service plans to fill them up with concrete. It is estimated it will be two years before it will be definitely known whether the plugging process is successful, for the holes cannot be filled until this fall and then there will be a wait for the lake to fill up again.

Laugh and Grow Fat
is an old Axiom.

We advise the use of a Good Tonic and we know of no better than

BRICK'S TASTELESS.

Brick's Tasteless is a wonderful nerve tonic and blood builder that we gladly recommend. If you have no appetite, and feel tired, no energy for anything, try a bottle of BRICK'S and see how quickly it will help and improve your condition.

You can purchase a bottle of this excellent tonic at nearly every store in the country.

THREE WORLD'S RECORDS WERE BROKEN AT OLYMPIC GAMES.

Harold Abrahams Won The 100 Metre Run—Paddock Was Sixth—Osborne, United States, Broke Record In High Jump, Going Over 11 Feet 6 In.—New Mark In 400 Metres.

OLYMPIC STADIUM, Columbus, France, July 7.—Capturing the 100 metres title for Great Britain and depriving the United States of one of its most cherished Olympic championships, Harold Abrahams, of Cambridge University, was to-day's outstanding star of to-day's Olympic track and field events. He left no doubt of his superiority over the sprinters of all nations when he led Scholtz, the fleetest of the Americans, by three yards to the tape, in the Olympic record time of 13.5 seconds.

It was the third time that the "100 metres" title for Great Britain and depriving the United States of one of its most cherished Olympic championships, Harold Abrahams, of Cambridge University, was to-day's outstanding star of to-day's Olympic track and field events. He left no doubt of his superiority over the sprinters of all nations when he led Scholtz, the fleetest of the Americans, by three yards to the tape, in the Olympic record time of 13.5 seconds.

Robert Legendre, of Newark, N.J., in the pentathlon broke the world's record for the broad jump with 7.76 metres, equivalent to 25ft. 6in. This performance insured him first place in the event. His jump bettered by three inches the former world's mark of 25ft. 3in., held by E. O. Guardin, of Dorchester, Mass.

F. Morgan Taylor, United States, won the finals in the 400 metres hurdles.

Taylor shattered the official world's record by finishing in 52.3-5 seconds.

Harold Osborne, United States, won the runner high jump with his record jump of 6ft. 6in., giving the United States a victory in another final event.

800 metres (first semi-final three to qualify)—Stallard, Great Britain, first; Wm. B. Richardson, United States, second; Martin, Switzerland, third. Time, 1 minute, 54.1-5 seconds.

800 metres, second semi-finals—Low, Great Britain, first; H. Waters, United States, third. Time, 1 minute, 56.2-5 seconds.

800 metres, third semi-finals—Ray Dodge, United States, first; S. C. Enck, United States, second; Charles Hoff, Norway, third. Time, 1 minute, 57.2-5 seconds.

1,000 metre steeplechase, first heat (three to qualify for finals)—Katz, Finland, first; Bontemps, France, second; Montagne, Great Britain, third. Time, 9 minutes, 43.4 seconds. Roland Payne, Ohio State, failed to qualify.

1,000 metre steeplechase, second heat—Isola, France, first; Michael A. Devaney, United States, second; Ebb, Finland, third. Time, 9 minutes, 57.4-5 seconds.

1,000 metre steeplechase, third heat—Wills, Finland, first; Marvin Rick, United States, second; Newey, Great Britain, third. Time, 9 minutes, 59 seconds.

Final, 100 metre dash—Harold Abrahams, Great Britain, first; Jackson V. Scholtz, United States, second; A. Porritt, New Zealand, third; Chester Bowman, United States, fourth; Charles W. Paddock, United States, fifth; Loren Murchnison, United States, sixth. Time, 10.3-5.

Running high jump, (final)—Harold Osborne, United States, first 6ft. 6 inches (a new record); Leroy Brown,

the canvas for the full count. Kite landing over a left-handed punch to the right jaw.

FEATHERWEIGHT.

Hawker (Constance) 125lbs. vs. Chaney (City) 120lbs.

Honors were evenly divided in the first two rounds. In the third round Chaney put up an excellent exhibition, delivering several well directed punches to his opponent's head and body. A terrific milling was witnessed in the final round, with the local boy holding the advantage. Chaney was awarded the bout on points.

BANTAMWEIGHT.

Bunt (Wireless Station) 117lbs. vs. James (City) 116lbs.

This was a real fireworks display. Both boxers opened up hostilities in real earnest, and the pace did not slacken until the fourth round. At first Bunt had the better of his man and inflicted punishment, but James showed himself able to take any amount of it and gradually wore his opponent down. Bunt landed several good upper cuts during the bout, but many went wild. James was awarded the decision on points and was heartily applauded.

MIDDLEWEIGHT.

A.R. Dabbs (Constance) 139lbs. vs. Diamond (City) 130lbs.

For four rounds these men put up a merry battle for the points, and at the end the judges declared the bout a draw. In the final round Diamond slackened somewhat, while at the same time Dabbs pushed matters. The judges then awarded the decision to Dabbs. A part of the audience disapproved, but it was generally conceded that the decision was fair.

LIGHT HEAVYWEIGHT.

A.L. Davis (Constance) 170lbs. vs. Butler (City) 180lbs.

Great interest was centered in this bout, but it was most disappointing. The contestants entered the ring about even in stature, with Butler holding an advantage of 10lbs. in weight. Several well directed blows were exchanged, but Butler was inclined to clinch, and the referee was given a busy time in keeping the opponents separated. For some inexplicable reason the police stopped the fight in the first round after Davis had delivered a blow to the solarplexus which made Butler groggy, but it was fairly delivered and there was nothing to justify the police's action. Eventually the fight was allowed to proceed.

In the third round, Butler landed a solid right to Davis' left jaw, who took the count of six, while almost immediately after Davis retaliated and sent Butler to his knees for the count of four. In the fourth round Davis had Butler on his knees twice for the count of three and four. The fifth round saw many clinches and after one minute had elapsed, Butler was disqualified for fouling, a decision which met with general approval. Davis was given an ovation. He has shown himself one of the cleanest and ablest exponents that we have had here for many years.

WELTERWEIGHT.

A. B. Kite (Constance) 140lbs. vs. Way (City) 130lbs.

This was a four round contest. Kite proved to be the master of the situation in all four rounds. With a solid right and deadly left-handed punch, he floored Way several times, but Way gamely came back and held on until the last round when he was sent to

the canvas for the full count. Kite landing over a left-handed punch to the right jaw.

FEATHERWEIGHT.

Vandersteen (Constance) 122lbs. vs. Marshall (City) 131lbs.

The featherweight bout between

Surplus Earnings After Dividends \$856,445,643 Since Incorporation In 1901, Or Over \$168 A Share In Common.

(BOSTON NEWS BUREAU).

BOSTON—Since its incorporation in 1901 and to the close of 1923 the United States Steel Corporation reported surplus earnings, after dividends, of \$856,445,643, equal to over \$168 a share on its 5,038,025 common shares.

All of this surplus does not show on the balance sheet, \$162,735,509 having been expended in property and written off, thus becoming a hidden asset. Of the remaining \$693,650,123 there has been appropriated for property additions, etc., \$180,898,914, carried on the balance sheet as "appropriated surplus," the remaining \$487,751,209, with \$25,000,000 cash surplus provided at organization, a total of \$512,751,209 being carried as individual surplus.

Vandersteen and Marshall saw some very clever boxing. This bout was scheduled for eight two minute rounds, but the contest ended at the end of the third, Marshall deciding to quit in favour of his opponent. During the first round Marshall showed up to advantage, owing to his reach. Vandersteen was quick to see his disadvantage and in the following rounds confined his attention to fighting. Unlike several of the other bouts there was no clinching. Gradually the frequent body blows administered to Marshall, who conceded the fight to his opponent after the third round. Both fighters gave an excellent exhibition while it lasted and the bout was clean and vigorous. Mr. A. Johnston acted as referee.

The manner in which Mr. S. Cullen controlled the various bouts and the excellent judgement which he showed is deserving of congratulation. We learn that the offer was made to the Constance to appoint the referee, but they expressed themselves as quite satisfied with Mr. Cullen.

Prizes were presented by his Excellency the Governor after each bout and he heartily congratulated the winners on their excellent performance. The tournament was conducted very successfully, and the officials and all concerned are to be congratulated on the excellent programme provided.

NEW YORK, July 11.

TO-DAY'S OPENING.

Am. Smelters</

Municipal Council

WEEKLY MEETING.

The regular meeting of the Council was held yesterday afternoon. Mr. Cook presided and Councillors Messrs. Outerbridge, Collier, Ryan and Dowden were present. After the reading of the Minutes the following routine matters were brought to the attention of the Council.

A communication was read from the Newfoundland Motor Association with regard to the erection of traffic standards at some of the more populous street crossings in the City, by which was attached a letter from Mr. W. J. Ellis and a sketch of a standard which he thought would be suitable for the City. This was handed over to the City Engineer, who will go into the matter and report to the Council.

Mr. J. Bartlett called attention to the need of having cobble stone drains along Gower Street, replaced by concrete, as the grading at the place in question is not sufficient to take away surface water. It was decided that this improvement be made.

Mr. G. Brownrigg complained of the fact that since the recent closing of Custom House Hill, Hallways Street—from Duckworth to Water Street—was being considerably used for vehicular traffic, and that as the street is very narrow, carter's have been compelled at times to use the sidewalk and to a great extent damage his property. The City Engineer was instructed to inquire into this matter.

H. J. Moore applied for extension of water and sewerage to his dwelling at 1000 Avenue, and also stated that he had some gravel suitable for road purposes, which he placed at the disposal of the City Engineer. Both matters were referred to the City Engineer. The following plans were passed, subject to the approval of the City Engineer:—Dwellings, M. A. King, 1000 Avenue; Extension, J. M. Kelly, 1000 Avenue; Garage, C. Hammond, 1000 Avenue; Conditional upon his installing ventilator in the building. The application of F. J. Dodd to use the same as a garage, was passed, subject to the approval of the Inspector General.

The Central Bakery Company applied for permission to erect new buildings on Flower Hill, in accordance with the City Regulations. The City Engineer, if satisfied, may issue the necessary building permit.

The Engineer's report on the work done by the several departments under his control for the past week was read. He stated the placing of sewerage extension to the vicinity of Hill would cost in the vicinity of \$1000. Some time ago the property owners in this section petitioned for extension of the mains. It was decided that a statement of the cost to be paid by each individual when their reply is received, the same will be given further consideration.

The Engineer also submitted a plan for the widening of Topsail Road, near the General Protestant Cemetery, and it was decided that this be deferred to the present.

He stated that the macadamizing of Duckworth Street, Waterford Road, New Gower and other streets was now well under way and that it was expected to have same completed in a very short time.

The Medical Officer of Health reported three new cases of Scarlet fever and one of Typhoid in the City during the past week.

Statements of Revenue and expenditure to June 30th last were tabulated and considered fairly satisfactory. With the granting of requisitions for passing of accounts, the meeting adjourned.

City Linen From Overseas

A prodigious quantity of dirty pillowcases has lately been washed in the United States, in Newfoundland, and in Canada. "You will find a reader writes from British Columbia, 'that we need not go to Washington and the Teapot Dome or Newfoundland and Dominion Steel for these unsavoury scandals.' By the evidence he sends a large collection of newspaper cuttings, leaflets and pamphlets in reference to the charges of corruption that have been made against eminent persons in British Columbia. The charges were connected with the promotion and construction of the Pacific Great Western Railway, and leaders of both Conservative and Liberal parties were implicated. A Royal Commission was appointed, but the Provincial Government, which is the third party, declined the inquiry as a farce, and the case is still in progress.—Truth.

TONIGHT! TO-NIGHT!—Concert, Victoria Park, by the Cashel Band.—July 11.

Package of square-cut crystal slightly longer than checker makes a wide appeal on the basis of its universal becoming.

JULY--ALWAYS A BIG MONTH HERE

Finds Us with a Meritorious Array of Values Setting a Pace in Value-Giving Hard to Equal OPPORTUNITIES Crowd Thick & Fast--Avail of Them

The first of the Season's Clearances appear this week. What great opportunities to procure Apparel for which there is such a long season of serviceableness ahead.
