But telegraph and railroad companies have obtained certain privileges from the public on certain con-ditions, one of which is, as the courts have decided, that they shall serve the public ef-fectively and constantly. We repeat what we said a few days ago: The corporation came into existence and exists only by leave of the state. It derived from the people its valuable franchises and privi-leges—the right to plant its poles and con-struct its lines on public and private prop-ierty, to run its wires across navigable waters and through the streets of cities. It was chartered to serve the people and to do a public business. There are imposed upon a great telegraph company obligations to the public which cannot be di-disregarded and duties which cannot be ne-glected. It is bound to give the people

SUBSCRIPTIONS ARE INVITED

A Railway siding runs along the front of the works to facilitate the receiving, alling and shipping of goode.

The estimated saving in labor alone will be over \$5000 a year.

The works being fireproof may afford a saving in insurance of \$4000 a year.

Rept, water rates, city texes, gas, etc., a saving of \$3600 a year.

Fuel delivered ex-cars instead of as heretofore ex-yard will save near \$2500 a year.

The Building being specially constructed for the business, every evil attaching to other premises in which leakage, waste and tinkering expenses were unavoidable, will effect a very large saving that cannot be fully estimated in figures.

Every convenience exists for doing more and better work, as well as greater variety, than heretofore, at a less cost of production and with more satisfaction to all concerned.

The Company have on hand extensive orders from the following Railways :

The Canadian Pacific Ry. The Grand Trunk Ry. The Canada Southern Ry. The Great Western Ry. The Michigan Central Ry, The Kingston & Pembroke Ry. The Manitoba & Northwestern Ry. And Other Companies.

The permanent, fixed and steadily increasing portion of the business is with Hardware Merchan's and other manufacturers all over the Dominion in Carriage, Stove, Tire, Fancy and other Bolts, now aggregating 30,000,000 a year. The trade with Railways at the present is about one car load each of Track Bolts and Spikes per day. This extent of trade slackens some portions of the year, but with the opening of the Northwest it will largel7 increase, and the track repairs with renewals will alone constitute a large trade.

The Works are a necessity in the country almost as much so now, as the Telegraph or Telephone Companies, the Railways being in absolute need of the Works, without which Railways would not be built as fast as they are now being rushed through the country.

The Agricultural Implement Works throughout the Dominion depend for their sup-plies upon this Factory, other Works also look to this Factory for their supplies, making its products as staple as cottons; and each kind of Bolts are sold in every town in all the Provinces of the Dominion on the name alone without call for samples which are now rarely ever asked for.

The Company own a large lot of land bought at a low price within the proposed City Linuits, portions of which have already been sold at Four Hundred per cent profit, and sites as well are allotted for other Factories.

The annual meeting was held on the 13th iostant for the first six months' business of the Company, at which a Dividend was declared at the rate of ten per cent per annum for the half year ending on the 1st of May last. Applications for stock must be made at the office of the undersigned, where the Report and Statement of the affairs of the Company may be seen
