Subscribers finding the figure 8 after their name will bear in mind that their term will expire at the end of the present month. Early remittances are desirable, as there as then no loss of any numbers by the stopping of the peper.

AN UPRIGHT CHINESE OFFICER.

We give a portrait of Wen Siang, an upright Chinese officer, who died lately in Peking. He was for many years the Vice-President of the Imperial Council, Secretary of the Board of Foreign Affairs, and Director of the Hanlin College

Unlike most of his countrymen who are in office, he did not enrich himself, but labored for what he considered was his country's good; and he was more anxious to do what was right than to get money. Though he had held office so long he was comparatively poor when

He was widely known and respected as "the Honest Wen Siang." Thousands attended his funeral, and the Emperor, and other high offloors, gave largely to make it an imposing one; and a costly monument will doubtless be crected over his remains. So if the Chinese and especially the official class, do not practice honesty, they at least respect the few among them who are up-right.

The mandarins are noted for their oppression of the people, and their cariching of themselves by unjust means. The late Emperor of China cent a high officer from Poking, who was noted for his integrity, to examine into the conduct of the official class in the various provinces, and he reported that instead of acting as the fathers of the people, they acted more like wolves. Nothing that fore-igners have written concerning the injustice and averice of the mendarins is so strong as

what this officer wrote to the Emperor.

Once in a long while, however, each city and district is favored with an officer who does justly and loves many; and the change is so great, from the rule of the oppressors, that the people are filled with gratified, respect and

admiration.

Their way of showing their gratitude, however, is very gingular. Just before his term of service ends, the citizens present him with a coat of many colors, not to be worn, but to be preserved as a memento; and, as his cortôge leaves the city, the streets of which are crowded with the poople, it is stopped at the gate, and presents appointed by the citizens present the mandarin with a pair of now satin boots, and request that those he has on be given to them to be preserved as a memento.

This ceremony of explanging boots is some-

This con This ceremony of exchanging boots is some-times performed at other cities and towns through which he passes to his home, or to his next place of rule. These are outsoms which have come down from very ancient times, and they are valued by those who desire the good will of the people, gained by right acting and just dealing. Scarcely more than once, however, in an average life-time do the people have an officer sent to them whose conconsiderable and concernent to them whose con-cinct proves worthy of these honors, nor will there be my improvement in their rate until that religion prevails in the country which not only enjoins all men "to do justly and love marry," but also "to walk humbly with

GEN. SWIFTS TESTIMONY

General John L. Swift, of Boston, who is well known in that city as a public man, and self.

went, but I wanted to be a sort of disciple in incognito I wanted to be a believer in repose I wanted to have this religion all alone to my well known in that city as a public man, and welf. I had a great dislike to religious terms—whose conversion has attracted a great deal of attention, spoke as follows at a recent meeting in the Tabernacle before an immense audience:

It was said last Thursday at this meeting that fluency of speech and cratery were not wanted in the evidence of the new man, and it is a matter of great encouragement to me that without labored argument and without intensity of declamation I am able to tell to-night the old, old story of one more change of the new that I was here, and to under-I had a great dislike to religious terms to-night the old, old story of one more chang. of to know that I was here, and to undersod heart. I came to this building three weeks sand my case procisely. His eye seemed to ago, and entirely without expectation on my range over to that very spot, and his whole part, and by what must be considered, under attilitiety seemed to bear upon that one spot, all the circumstances, as special intervention.

WEN SLANG.

Before I came here I had determined in my hear mund to be a Christian in a modest rotining way. I wanted to have a religion all to my salf. The Sebbath labors of my own pastor, who may be hearing me to-night, and that of other Christians, had sottled in my mind the beyond a cavil ora doubt that evangelic truths were founded both upon the rock of reason forty and upon the authority of the revolution. The sand upon the authority of the revolution. The tacklings of every-day life had convinced me first that the New Testamont was sound whem it said that theft and covelonmose, and wicked dolor nees and deceif, and blaspheray and pride-

heart, and then and there I resolved that at the first opportunity I would carry the flag

about prayer. But it is the Bible, and in it this truth, as imperishable so the law of the ever-living God,—that prayer is heard and prayer is answered, for He has said:

"And all things whatenever we the 'cat'

prayer is answered, for He has said:

"And all things whatsoever ye sha." ask in prayer, believing, ye shall receive."

I wreter left my mother, to my recollection, in my whole life, for any length of time, but what she said to me when I left her: "I want to live long enough to see you give your heart to your Saviour." It was the conclusion of every separation, it was the burden of every separation, it was the burden of ever wrote to me in her life. remember on one occasion, and there are those here that can recall the fact, that I was invited by my fellow-citizens to deliver in Trement Temple an address upon the campaign in Mississippi and the surrender of Fort Hudson The mayor of the city presided. The hall was crowded, and we were all at the white heat of patriotism. I was endeavoring to picture the advance and compation by our victorious army of those blood-stained uplands. The whole seens was vividly before me, and when I came to the scene where at our command? .000 of one then fees laid down their guns and the dear old flag ran up the pole, where for more than two months had been flaunting in our eyes the standard of robellion, why, the whole and smoo went wild, the music struck up, and they rose upon their feet, surging and swaying with cheers. As I stood there alone amidst that wild burst of enthusiann, I looked into the laft of the gallery, and saw one pale, unemotional

IT WAS THE PAGE OF MY MUTHER.

She was a little woman. It seemed as though She was a little woman. It seemed as though I could lift her in the palm of my hend, but she was great in love and faith, and when I met her she said, "I could give you freely to my country, but, oh, if I could have seen you so talk for your Saviour I would ask no more on this centh." There is a passage in Suripture, "Except ye be converted and become as little children, yo shall not enter into the kingdom of Heaven." I know what that means I of Heaven." I know what that means. I know what it is to feel as a little child, though know what it is to feel as a little child, though my hairs are gray with the footfalls of time. Now, I wish to say here, and impress it upon you, that, at that meeting in 1863, there was no man in the State of Massachusetts so little threly to be reconciled to his God, it appeared to me as myself. I was entirely absorbed with the would. I was careless about all-religious influences, and it was my belief that it would all come right in the end. But last Wednesday I stood in that Temple, and as I rose I looked down in the front seat and there was my old father seventy mine years of age, who had struggled over to hear his son tell of the glorious tidings of this Gospel. It almost broke me down, but I went on as well as I could. Those who are in this Christian work say that it is my duty to out I went on a well as I could. I hose who are in this Christian worksay that it is my duty to stand here. I would wish myself far loss publicity in this matter, but I dare not be silent, if it is possible that I may reach out and help save some man's soul. I believe the great work is only begun in this city. rost

way. I wanted to have a religion all to my said. The Sabbath labors of my own paster, who may be hearing me to-night, and that of other Christians, had settled in my mind beyond a cavil ora doubt that evangelic truths this is the superior fact that for nine and beyond a cavil ora doubt that evangelic truths this is the superior fact that for nine and poon the sutherity of the revolution. The and of loving prayers. When these prayers it is a substituted that the last has led the van of progress - should believe, and that the last has led the van of progress - should be levely, and that the last has led the van of progress - should be levely, and that the last has led the van of progress - should be levely, and that the last has led the van of progress - should be levely, and that the last has led the van of progress - should be levely, and that the last has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely, and that has led the van of progress - should be levely of the redeemed. I immore you who listen to one to-night to ome the day of the redeemed. I mean of death that the last the last has led the van of progress - should be levely of the redeemed. I must be a like the last has led the van of progress - should be levely of the redeemed. I want that the last has led the van of the last has led the van of the last has led the van of the last has le TIDLE WAVE IN YET TO SWEET OVER THIS PLACE

JIM ANDERSON'S LEGACY.

(Continued.)

" I never saw men look more horrified than the neighbors in the next room. Even Wil-ham was appalled at the night of his old under

in his death agonies.

"'Can nothing be done, doctor ?' he said.

'No, William,' replied the doctor, 'he s far beyond my reach, now. It will be all over

The struggles of the old man became the saraggies of the old man became frightful No matter if he put his head under the bed lottles where he, at times, vanly sought darkness the spectres were there still whether his eyes were closed or open it was all the same

"At one time, after a brief pause, he looked wildly at the foot of the bed, and said,
"Art thou come, lass? I kept my promise Fly 'fly 'fly 'or they will catch thee. Don't look at me so, lass. I wo left him the rocks! the oursed rocks. I'll leave him all—every-thing Go'go! go! A moment after and uncle Jim, with one convulsive effort to spring up in the bed, fell back dead. I think it mu have been my mother's vision that he imagin-

ed he saw standing at the foot of his bed.
"Well, after the funeral, Lawyer Scribe of
Tippleton, read nucle Jim's will, and sure
enough, there was the hundred acres in the
south-east corner of the farm left to me, while the other two hundred acres were left to the other boys.

"It was not long before William soli his hundred acres and went to Tippleton, where he at first carried on horse-dealing, and having all-work at a tavern. The habits of intemperance that had been fostered in him, when he used to frequent the Four Corners tavern, grow upon him as it had grown upon uncle Jim. He became useless at length and lost his place at the tavern, and he was musaing all one winter, but in the spring, they found his body in the woods at the outskirts of the town, where, it is supposed, he wandered in drunken fit and was frozen to death.

" Brother John did not soll his farm, but it * so heavily mortgaged that he will nover again call it his own, I am afraid. But I again call it his own, I am afraid. But I great admiration for the more I then be the terrete in a revenue I and Surveyor, have great hopes of John. When he was left the more I thought of it the more I behold the 1 and somewhat interested in regard to the lay alone, I struggled hard to get him to turn over wisdom and infinite fitness of God's deslings of these farm lots."

with His creatures, and as I heard the low! We returned to our boat and took luncheon, but for yours I seemed to have no answer. I stoody, peaceful, breathing of my friend who! after which, Rawlings said he was going to used to talk to him antil he became vexed, was callying the repose of dream-land by my! run a line. We had a surveyor's chain in the when I would drop the subject. It was a lade, I could not but feel convinced that an-1 boat. So after enting two straight poles, we have going time before I could get him to ge to meet—other noble to behove ment was about to grace! returned to the Surveyors stake we had saccute the noble impulses of his hand in the morning. I have now the object of my

ron don't know what a different man he is
but at times I am afraid of him, for his prospects on the farm are so blank. It is all upvon don't sure but at times I am afraid of nim. Let but at times I am afraid of nim. Let become the farm are so blank. It is all uppects on the farm ness blank. It is all uppects on the farm But I have faith that, for all my labor I shall win him to the Saviour all my labor I shall win now, gentlemen, you know my story, and as it is getting late. I must get home. "Well friend," said Hawlings, "I have been

much recreated in the sed story was been re-ated I cannot boly feeling that feed will no-tainly bless your efforts. If not by worldly कर्ता होते हैं। कर्ताती कर्ताती कर्ता sunness at any rate by storns' rest. And ofter subjects His followers to the greatest afflictions on earth. Some of us need this divine disripon each some of us need this areas casep-ins not only to keep us humble but to keep us from being swallowed up by the things of this world. Continual prosperity in this world often brings the soul to perdition."

" hfrow tageous my hundred acres may app at to you, I assure you that I raise a great lot of stuff or , and therefore you I then I hav done at : but it is scattered about cannot see it all at once, and therefore you cannot see it all at once, and then I hav done splendidly with my stock. It is the very place for sheep. You I shall be happy caough and contented when I can pay off 'ohn's mortgage on the farm. Then the were will mortgage on the farm. Then the wo. will be clear for us both to go on smoothly to-gother. If I can got John's mind at ease, I can reclaim him,—I know I can "

"Are you going to be busy to-morrow, Mr Anderson," asked Rawlings, as the farmer

Anderson," asked Rawlings, as the farmer arose to take his departure.

"Not particularly," replied he
"I should like to engage your services as guide to-morrow, and perhaps for a day or two Three dollars a day I am accustomed to pay for such work," said Rawlingr
"That's more than I should expect for any halp I can give you and I shall be wind to

help I can give you, and I shall be glad to serve you in any way I can, 'said the farmer "Then, suppose you come here eight o clock to-morrow morning." caid Rawlings When the farmer had departed, my friend

lighted a candle in the tent and took out of a un box a county map and pered over it very intentiv.

"Let me see," said he, ruminating and pointing with hisfinger on the map, "Here is the lake. We are camped about here. But the farm lots on this map are not all numbered,—at least not in this particular section."

A sudden thought flashed through my brain a I sat watching Rawlings examining the

as I sat watching Hawlings examining the map.

"Rawlings!" shouted I, springing to my feet, "what if the iron we found happens to be on Miles Anderson's farm! I never once thought of it until this moment!"

"Did you not?" said Rawlings, "but I did"

"Then why did you not say something about it to poor Anderson when he was here? What a happy ruan you might have made him!" said I.

"And what an unhappy man I might have

him!" said I.

"And what an unhappy man I might have made him if after all the iron happens to be just upon the next lot to his and not upon his at all, and I very much fear that it is not on Anderson's farm, but very near to it.—and you know a miss is as more and are arrive." Anderson's farm, but very near to it,—and you know 'a miss is as good as a mile."
"True," I said, "it would be a sad disap-

pointment to raise a man's hopes and then dash them to the ground again. I suppose

we shall know to-morrow? said I.

Yes, but say nothing to Anderson regarding our discovery when he comes in the morning, said Rawlings.

I was so impressed with the idea, or rather

"Yes, but say nothing to Anderson regarding our discovery when he comes in the morning, said Rawlings.

I was so impressed with the idea, or rather with the hope, that the underson and it derson a farm that it was a long time before I back to him, my friend said,—

"You must not be surprised at my inquizing the more I thought of it the more I behold the and somewhat interested in regard to the lay are done and infinite fitness of God's designer."

"Will you let me look at it was accounted in section ings.

"Certainly; come down to the house."

Rawlings examined the deed and found it perfectly legal in every respect. Handing it because the house in the same of the same o

corner life if he would only there and then ber as to render landing very unpleasant. It identical farm of rocks that had been bequeathed two more a new life. I told him I would would be almost impossible, from the view ob. ed with a curse to Miles Anderson, by his unbelow pay off the mortgage on his farm if he I tained from the lake, to conjecture the nature for tunate uncle Jim.

"Well, Miles I'll tre. I'll successful."

of the country beyond the dums were a skirted the water's edge.

As we neared the point where, the day be-fore, Rawlings and I had landed and taken our lunch, a feeling of nevrousness came over ma I was straid of my friend saking whose lot it was and of hearing Anderson say it be-longed to some one whose name I had never heard before. We landed at the same place we had done before, and made fact our boat Rawlings took a pooket compass from his satchel, and after taking the bearings, said,—

"God has already blessed me even in this managed to scramble up to the top of it, when orld," said Anderson, "for however disadvan we beheld a labyrinth of rocks over which we grous my hundred acres may app ar to you, climbed with difficulty. The last rock we came to had an aimost perpendicular descent, down which we had to alide as best we could, and which brought us into a potato patch having a somewhat familiar look. We pressed on, however, in the direction at first indicated by Rawlings. We came to more rocks, and a patch. Again more rocks, when suddenly, Anderson's farmhouse stood in full view. and a patch. Again more rocks, when sud-denly, Anderson's farmhouse stood in full view, right in our path. We called at the house, drank some cold well-water and rested a while, lirs. Anderson brought us frosh milk, and cemed bright and happy with her young children are and hor. We started again on our route and crossed the highread. We our route and crossed the highrend. We came in sight of the old homestead where biles Anderson was born, and where the rocky nature of the soil seemed to bease. Rawlings gazed around with a searching glance, and finally altered our course. We glance, and finally altered our course. We went over more rocks down a steep descent into a small valley, and as we neared the woods Rawlings stood and chipped out a piece of the rock with his hammer. It was the same colored rock we had discovered the day before. He took out his magnetic dip needle and held it over the spot, but it did not drop quite perpendicular though, it pointed downwards, but at length he came to a spot where it suddenly dropped. Rawlings ed downwards, but at length he came to a spot where it suddenly dropped. Rawlings put up his compass and sitting down on a rock, asked Anderson where his lot line ran.

"Over yonder," replied he, pointing with his hand.

his hand.

"Let us go and see," said Rawlings.

We went past the farmhouse about three hundred yards, where there was a make-fence that ran to the rocks, but stopped there.

"Have you a survoyor's stake heresbouts?"

sked Rawlings.
"Yes, here it is, marked M. A.," replied

Andersor

And where does the line run?" asked Rawlings.

"There, in that direction," said the farmer, pointing with his hand towards the lake. "Then this is the north-west corner of your hundred acres?" enquired Rawlings.

"Yes, this is the north-west corner," said

Have you a doed of your farm?" asked

" Have you be a considered as a considered Rawlings.
" Yoe."
" Where is it?"
" In the house," said Anderson.
" Will you let me look at it "" asked Rawling."

when I would drop the subject. It was a just a touch to be not to grade I start that the bearing two satisfies we had seen long time before I could get him to go to meet—joiner noble impulses of his hand in the morning. I saw now the object of my do no good. He still drank, and I never and heart. Thus ruminating, I too fell asleep. I friend's enquiries, and why he was going to control to pray daily for him.

We did not awake in the morning until the true a line. It took us some time to find the Day day he came to my house and we got sam was in the heavens and before we finish. Government boundly line meanment. We did talking about mother, and I reminded him ed broakfast Anderson strived at our so at last, however. ed with a curso to Miles Anderson, by his unfortunate uncle Jim.

As it was gotting towards evening by the
time we had finished running the line, we invited Anderson to come and spend the evening
in camp with us. I was surprised that Rawlings did not make known to Anderson his
great good fortune. He said nothing to him,
however, and the farmer suspected not that
such a vast change was about to take place in
his worldly dirementance.

We sat talking a long time after supper upon different topics, and I began to be quite rexed with my friend for act telling Anderson how rich he was. But at length Rawlings

stichol, and after taking the bearings, said,—
"I want to take that direction," pointing with his hand towards the same part of the woods we had penetrated the day before.

"All right, sir," said Anderson, "I know these woods pretty well."

"We passed the open space where we had discovered the bron, but it was a little to the last of our route. However, I cast my eyes and till not notice any marks of our digring. We fought our we ye preserveringly through the brambles for some time without exchanging a word, and at length came to a blank wall of rock which should rearried in the same to a blank wall of rock which should rearried the last length Rawlings ings, "God to praised! It word not account is some that it length flawlings and if have thought about it agood deal. Yes, I have thought about it agood deal. Yes, I have produced to be really signed the pledge. No over 5,000 have recently signed the pledge. No over 5,000 have more thank and His infinite mercy on the other. I must say I never felt so disappointed in a spooch in all my life. I felt ulmost angry with my friend for what he had said to poor Anderson, who seemed somewhat taken aback

by what Rawlings had said to kim.

"It's not be alarmed at what I have said," by what Rawlings had said to him.

"In not be slarmed at what I have said," continued my riend. "Remember what the good Book says; 'Let not your heart be troubled, neither let it be afraid.' A good man need fears notizing. But there is a fearful danger that lies in your earthly path that will require more Christian fortitude to guard against then any that you have yet displayed. You are supprised that for years—I may say all your life—you have wandered around one of the deepest pit-falls that an evil agency can create, and indeed it may turn out to be a fearful curse. My advice is now to watch and pray lest you fall into temptation."

Anderson had risen to take his departure, and in a Lawldored sort of way hade us good night, and promised to be at the appointed renderons in the morning.

In all my experience of my friend's character, his oddities and vagaries, the question of his sanity never entered as a doubt into my mind; but to-night, as I watched him get into bed, I certainly thought of the numerous instances of very learned men going mad. However, his subsequent conversation, which did no, in the least touch upon Anderson.

However, his subsequent conversation which did no. in the least touch upon Anderson, which did no. in the least touch upon Anderson, reassured me, and I fell saleep and did not wake until early morning.

We arrived at the appointed spot by the

We arrive at the appointed spot by the time agreed upon, where we found Anderson awaiting us. He looked anxious, and I felt anxious myself as to what Rawlings contemplated doing. At last he said,

"We shall need the picks and shovels into the boat this morning.)

We carried the implements to the spot where we had discovered the iron ore.

"Now," said Rawlings, "we will unearth a demon,—a real, tangible, insidious demon of the blackest and most dangerous type. All hands to work! Here, Mr. Anderson, you begin there and pick away, and you (addressing me) begin there?"

Poor Anderson looked at me as though he would say, "Surely this man is mad," and

would say, "Surely this man is mad," and Rawlinga divining his thoughts, exclaimed. 'I am not mad, most noble Andarson," whereapon we fell to work vigorously, and after two hours labor a bed of iron ore, some thirty

"Now," said Rawlings, at length looking at Anderson, who stood bewildered at the apparently useless work we had been doing, "Now I will introduce you to this demon. You on his black back there—that is ho—the Prince of Darkness, there you see him in the body, but his spirit you see not, there he lies, and his wil agency lies buried deep down in the bowels of the earth. Shall I tell you the mane of this doyl, killes Anderson I asked

name of this devil, Miles Anderson I' asked Rawlings, solemnly.
"Yea, tell me his name," said Anderson.
"His name is Wealth," replied my friend. At that word, Anderson let fall his pick and sounded suddenly to divine the whole mysterious conduct of my friend. Yea, he saw it all now why he had examined his deed of the farm, why he had examined his deed of the half warned him of denser.

form, why he had measured the land, and why he had measured the land, and why he had measured the land, and why he had warned him of danger.

"And now, Miles Anderson," ried Rawlings impressively, "what will you do with this carso this vast wealth? Here are twenty, forty are, perhaps a hundred thousand dollars—all yours to do what you like with. Will you let it drag your soul down with the dust? Will you let it break as under that predous to that binds your soul to things divine? Will you cast off the humble mantle of rightcousness and descriing its paths of leveliness and peace, less yourself in the gildy world of peace, less yourself in the gildy world of selfishness and frivelity to which this demon will endeavor to lure you? Is this new-found trussure to prove a blessing to you, kalles Anderson, or is it to prove a curse? Say, what will you do with all this wealth?"

Poor Miles Anderson fell upon his kness, and with a tremulous voice, exclaimed,

roof kinds the absence the upon his know, and with a tremulous voice, exclaimed,
"I will pay off Johnny's mortgage and build a brand now meeting house?"

"God be praised?" wied Herbert Rawlings, "God be praised? It soul not prove a course."

-Rochester, N. Y., into been struck with the Referm morement, and over 5,000 have recently signed the pledge. Noon-day prayer-meetings are sustained, and the malgibbring towns and villages are feeling its infinesce.

Agricultural Department.

OUR INSECT FRIENDS

At a late meeting of the Elmira Farmers Olub, Prof. Comstock made the following in-teresting remarks upon insects, as reported in the Husbandman;

Many people forget that some insects are our friends; and only a few persons appreciate how many friends we have among the insects. We neet to talk about noxious insects; we read in agricultural journal accounts of never ious insects; State entermologists are emply-ed to study and report on noxious insects; our sons in agricultural colleges listen to lecour sons in agricultural colleges listen to lec-tures on noxious insects; and ere weare aware of it, we come to think that the adjective is inseparably connected with the noun and speak only of noxious insects. As a result of this, you see in the various agricultural journals plans for the wholesale destruction of insects, plans which, if adopted, would destroy many more friends than foes.

Our insect friends are numerous, and bene-tit us in many ways. Some furnish as with

Our insect friends are numerous, and benefit us in many ways. Some furnish us with useful products, as silk, honey, wax and coloring matters. Others perform an important office in fertilization of plants. Many act as scarengers, feeding upon decaying animal and vegetable matter, while a great number feed upon and destroy other insects which are noxious. It is to the latter class only that I wish to cell your attention to-night.

This class of insects may be divided into two groups; one group, including those species

This class of insects may be divided into two groups; one group, including those species that are predaceous, and the other group that are predaceous, and the other group those that are parasitic. Good examples of predaceous insects are the ground-beetles and the lady-bugs. The ground-beetles are the black beetles with the long legs, very common under sticks and stones. They are very active,

the laty-bugs. Into ground-becties are the black beetles with the long legs, very common under sticks and stones. They are very active, can run very fast, and destroy many noxious insects. The lady-bugs are the little hemispherical beetles, generally red or yellow with black spots. They are common on all plants and feed on plant lice and the eggs of insects. Of the parasitic insects the most important are the lichnsumen files. These insects can usually be recognized by their long, slender bodies, wasp like wings, and a long organ, the ovipositor, attached to the posterior end of the subdomen. There are many species of them, probably two thousandspecies living m Amotica. They are parasitic on the young of other insects. The female Ichnoumen fly lays her eggs either in or upon the body of the insect upon which her young are to feed. When the eggs hatch, the young grubs begin at once to npon which her young are to feed. When the eggs hatch, the young grubs begin at once to feed upon their victim. There is a curious fact in connection with the manner in which they do this. They first cet the fatty pertions, carefully avoiding the vital organs, so that the caterpillar or other inseet, as the case may be, lives on with these creatures inside its body and deniring their nourishment from it. In many cases the caterpillar lives until it has spun its coccon, and then is killed by the parasites. In these cases the parasitic grubs, when fully grown, si in for themselves co-coms within the cocon of their victim. In other cases the parasitic grubs gruy growth. come within the cocom of their victim. In other cases the parasitic grabs get growth before the exterpillar spins a cocom. They then crawl out from the body of the exterpillar and each spins about its body a cocom. These cocoms are attached to the body of the caterpillar or to the plant on which it was. They are usually white or yellow. Feeble caterpillars may piten be eccurawing about with from fifty to two hundred on these little cocoms attached to their bodies. After remaining in their corona for a time, in some species a few days, in other species a few or several months, the Ichneumon flies escape as perfect insects furnished mon flies escape as perfect insects furnished

with wings.
These creatures show a wonderful instinct in discovering a prepor place in which to lay their eggs. They will not lay them in an insect that is already infected. A large lehnenmean from the same of the constant of the cons

size, and of bright metallic colors. Habits similar to those of the Ichneumen flies, they being like them parasitio on the young of other insects. They differ, however, from the Ichneumen flies in this particular, the Chalcis flics do not spin a coccon, s. s. their pupes are

naked.

A species of Chalcis flies proy upon the cabbage worm. In a collection of sixty chrysalides of this insect, flifty-seven were infected by Chalcis flies, only three producing butterflies. One can easily see the immense harm that a person would do that collected and destroyed indiscriminately a large number of these chrysalides.

The speaker then drow the following conclusions:

dusions

Great care is necessary in the destruction of noxious insects, to avoid those that are beneficial. From this it follows that one should study a species carefully before waging war against it.

against it.

Don't destroy cate pillars that have small white or yellow coccas attached to them. Such caterpillars are harmless, as they are sure to die before arriving at maturity. And cach little coccon contains an Ichneumen fly, which, if undisturbed may destroy many caterpillars.

Collect chryselides of noxious insects and

Collect chrysalides of noxious insects and put them in a first covered with wire gauze; an old aleve will answer. If a sieve of wire notifing is not at hand, a box can be prepared in a few minutes by driving tachs around its edge, and passing cords back and forth, thus making a net. The netting should be coarse enough to allow the small Ichneumon and Chalcis fly to escape, but fine enough to retain the butterflies or moth.

The occours and chrysalides of many noxious insects may be found under boards and under fences or building, in the neighborhood of infested plants. He recommended placing boards between the rows in the cabbage werms will fasten themselves to the under side of these boards to undergo their transformations. The chrysalides can then be easily collected and placed in boxes as recommended above.

Prof Lazenby saysthemost satisfactory way fight in certain the cabbage way a fight incertain the cabbage way.

Prof Lazenby says the most satisfactory way to fight insects is to have good strong, healthy plants and make them grow rapidly. Poor stock gets lousy, poor or weak plants become infested with vermin.

Enquiry was wade of Prof. Comstock in regard to the enemies of the potato beetla. He claimed that the ravages were in some degrees checked by purasitio insects which might eventually destroy them, but for the present Paris green is the safest treatment for the potato bug.

STABLE MANAGEMENT.

Stables should be built on high ground, so that the surface water can be thoroughly drained from the building. Water saturated with the earth and decaying vegetable matter produces a change in atmosphere air, and convertait into a miasma that is pernicious to the health of all animals. Horses will never enproduces a change in atmosphere air, and comvortsit into a miasma that is permicious to the
health of all animals. Horses will never enjoy good health confined in a damp, filthy
stable. It is the source of blindness, favoy,
glanders, and other fatal disorders that cause
the death of many valuable horses. There is
another fatal delusion in stable commony,
namely, not one-touth of the stables are ventilated. The animals confined in fight, illventilated stables are compelled to breathe the
sit over and over, which is permicious to health.
They will lose condition in spite of good
grooming, warmth and cleanliness. The air
which the horse breathes out is very different
from that which he inhales. He inhales puresit and respires a diluted gas that is rank poison to the lungs of all animals. The air, in
the process of breathing, unministes its
specific gravity and rises into the lighter atmesphere. It can be conducted out of the
barn by aberts or tubes for that purpose. The
constant agitation of the elements by the ingross of fresh air—like running water, pumps
itself. Port holes can be made at the base of
the building to let in fresh air, and shefts can
be placed at the head of each horse to conduct
the foul air out of the stall as fast as it is
broafied in the surrounding atmosphere, or
a large shaft can be built in the centre of the
barn which will answer the purpose as a
general conductor of foul sir.

The horse requires to be fed often on good
substantial food. The stomach is smaller than

mly one, in each victim, while the smaller species will lay many eggs in a single insect, nover so many, however, that the young will want food. These creatures soon to have the power of finding their victims, whenever they dignet their food rapidly. It has been found may be, hid. Even those species of insects which bore in the trinks of trees are infested by experiment that the borse dignets his food with Ichneumon flies. Nearly every group of insects is infested by Ichneumon flies. They may be their eggs either in, or upon the larve of other insects, but some very small replanish the netwest waste of the body. In all acts of exertion there is an expenditure of masses. This is a large family of insects, there being in this country probably one thousand species. The species are of small disc-footed animals, because they contain

most of bone and muscle. Hay forms the bulk of the food for domesticated animals. It contains sugar and starch, the constituents of fat, and fibrine, with some of the constituents of fat, and fibrine, with some of the constituents of muscle. Work horses are fed all the hay they will eat, but grain is parceled out no-cording to the work they perform. Water is the primitive agent of condition. It is indispensable to the hea'th of these domestic servants. One-half pailful as often as they deare it is the best measure for anything like fast work. When cool they can be suffered to drink what their appetite craves. Salt is essential to the health of all animals. It should be furnished to the equine and bovinespecies once a week. The horse should be fed his grain four or five times a day on account of his small stomach. When over-loaded it obsaruets his wind and interferes with fast travelling. It has been found in staging that the horse will of muscle. Work horses are fed all the hav wind and interferes with fast travelling. It has been found in staging that the horse will do better to be driven nine or ten miles an hour for five hours and then fed and rested, than he will to be driven five miles an hour for ten hours on an empty stomach. Even if driven sixty miles in six hours he will be in better condition and do his work more cheerfully the next day then if driven the same distance all day on an empty stomach and without rest. The horse ought to be fed and watered one hour before he is wanted for use. When the stomach is over-loaded with food it obstructs his wind and interferes with his work.

Michigan Farmer. -Michigan Farmer.

NEGLECT OF PASTURES.

This is the only country in the world, the This is the only country in the world, the Ohicago Times says, where any pretensions are made to good farming that no attention is given to improving pastures. In taking up a now farm, the poorest portion is invariably set apart for the pasture. After the best portions are planted and sown to annual crops, so long as they will may the cost of cultivation. set apart for the pasture. After the best portions are planted and sown to annual crops, so long as they will pay the cost of cultivation, the land is seeded down to grass. This is out and cured for hay, till the farmer is sahamed of himself of the small amount he gets from an acre, when he concludes that he will convert the field into a pasture. He soldom seems to think that his pasture is his great source of wealth, that his cows get from it the materials which furnish milk; that the grass it produces makes meet of the wool, beef, and mutton he has to sell; and that all his young estile obtain their living from the pasture about soven months in every year. He seems to farge that he and his teams work all summer chiefly to obtain food which the stock consumes during the winter, while his pastures furnish a supply for a longer period, without any labor being expended upon them.

Land once termed out to pasture is doomed to regise too long as it is devoted to that purpose. Weeds and bushes are permitted to spring up and spread at will. As the grass in places becomes killed out, the spots are allowed to remain barron. A large proportion of the stock kept in him pasture are yrded at night, and most of their droppings are left,

in places becomes killed out, the spots are allowed to remain barron. A large proportion of the stock kept in the extent are yirded at night, and most of their droppings are left, when they are taken to cultivate fields. Even those that fall on the pastures are not broken up and scattered, as they should be. The rank grasses which spring up, but which are not eaten by the stock, are allowed to go to seed, and in this way gradually extend over a large portion of the ground. No Western farmer thinks to apply farm-yard, mineral, er commercial fortilizers to his pasture. If a portion of it happens to become rich by the cattle, sheep, or colls remaining on it during the night, the chances are that he will plow it up and put it in cultivated crops; and curn out another piece of land that is in too pocroundition to produce corn, grain, or hay.

In England pastures receive constant attention and meresse in productiveness year by year. They are generally in so high a state of fortility that a good crop of hay may be have sed from them, if the stock is taken off, as done occasionally. They are measured like linds which produce annual crops, the ferbilizors being applied late in the fall or very

as done occasionally. They are manured like lands which produce annual crops, the fertilizers being applied late in the fall or very early in the spring. They are ordinarily mown at least once group enson, so as to keep down the weeds and coarse grasses. By outing them off, their grasses spring up, while the woods and rank grasses that are cut down help to cannot the sed! The turf, once well established, may not be turned during a contary; but it is occasionally scarified by a utensil made especially for the purpose, so as to lay have some fresh soil, on which the seed of more valuable grasses may be sown. A great variety of grasses is produced on Encileb usabaro some fresh soil, on which the seed of more valuable grasses may be sown. A great variety of grasses is produced on Enclish mantures and attention is given to seeding pequilat soils and locations with grasses that are adapted to them. In this country little or no attention is given to this matter, but the grasses are left to establish themselves as best they will. In some localities white clover, redtop, and blue grass, all good pasture grasses, will, by a process of self-eceding or extension of their roots, establish themselves over a considerable amount of ground. Under unfavorable circumstances, however, sorrel, burdock, this los, and course grasses will take possession of the land,—N. F. Iscopendent.

DOMESTIC.

COLD MEAT DISHES

BY MES T. B. DAERINGER

One excellent way of proparing cold corners beef for the table is to chop several sheed moderately sinc, then peel and slice four or sive onions, boil them until tender—of course changing the water in the usual way—then put the beef in the skillet with the enions, and add a piece of butter, and a little peoper and salt. Let it boil up and serve.

Another way is to take thin slices of the beef, lay them in the spider and pour over them a gravy made of one-half teacup of water, one-fourth teaspoon of mustard, one tablespoon of catsup, one taspoon of vinegar, and one sprinkle of cayenne pepper. Let it come to a boil and serve.

Cold reast beef. Take thin slices of the rare parts, lay them in a tin pail, prepare a sauce of one teaspoon currant jelly, one of vinegar, four of extsup, one-fourth teaspoon of pepper sauce, one tablespoon of butter, two loves not two teaspoons of cloves—one-half cup boiling water, salt to taste. Pour this over the mest, cover tightly, set in a kettle of boiling water. Let it boil fifteen minutes and serve.

not two teaspoons of cloves—one-half cup boiling water, salt to taste. Pour this over the meat, cover tightly, set in a kettle of boiling water. Let it boil fifteen minutes and serve. About the best way to serve the parts that are well done is o slice it across the grain very carrefully and ve y thin, and use it for ton with broad and butter; but you can make it palatable by mincing it. Them mines an equal quantity of breed and crumbs, put a layer of the meat in the bottom of a pudding-dish, add salt, pepper and bits of butter, then cover with a layer of the bread crumbs, having wet them first in salted milk, and so on, filling the dish as full as you wish, having meat at the top. Prepare a covering for this made of one cup of milk, one cup of bread-crumbs, one beaten egg, and a little salt. Spread it over the top and put little bits of butter all over it. Bake half an hour. Catenp, it some sour gravy should be caten with this.

Lamb sandwiches propered in the following way are very good: Butter thin slices of lamb with current jelly spread between them, lay these inside the bread.

Cut ool mutton in slices, lay well piece reparately on a dish and spread decime a refer

Cut cold mutton in slices, lay each piece reparately on a dish, and spread (being careful to leave no piaces untouched) with catsup sprinkle a little salt over it, cover, and let it stand in the oven for fifthy minutes, or until heated through; then serve.

hoated through; then serve.

Coldmeats are often spoiled because they are not carved well. In the country one sees culves, of most; but very rarely thin slices, and more rarely still, meats out across the grain. It is useless to touch cold meat, hoping to make it useless to touch cold meat, hoping to make it more palatable, unless you are particular ab in thin slices—if it is sliced—and cutting across the grain.—Zion's Herald

PREAFFFLE MARMALABE.—Select the largust, rippet, and most perfect peneapoles that can be found, pare them and cutoutalishe blumishes, grate them on a large dish, using a coarse grater, and omitting the hard core which guess down to the centre of each, o. in the absence of the grater, out them in sman cotta. Add an equal weight of the best double reflued sugar (in lumps), put them into a preserving ketting in them well together, set over a moderate and very clear fire, and boil and skim well. Stirring it after skimming. After the sound has cossed to appear, stir the marmalade frequently until it is done, which will be in an hour or an hour and a half after these come to a boil. But if it is not smooth, occur and bright in that time, continue the besing until it is. This is a delicious preparation of pinespele.—Goodholmes Lowette Cyclopadia PIMEAFFFLE MARNALADE. - Solect the larguest,

spple.—Goodholmes Lomette Cyclopadia
The Queen or the Second Course.—Take
one desen large sweet-potatoes, have them
reacted, peeled carefully, then well mashed
until periodity amooth. The most important
ingredient in this dish is a pound of cold
chicken, propered as if for chicken saled. A
tecoupini of chopped celery is a very good
addit on, and a cupinl of sweet cream is needod. The whole mass must be well worked torother, and seasoned to taste with salt and ed. The whole mass must be well worked to-gether, and seasoned to taste with salt and gonor, and scasoned to taste with sult and popper. A large table-spoonful of butter must not be forgotten. Form this into an oblong roll, and put it in a tin vessel to known in a quick oven. Half a wino-glassful of Womoster sauce improves the dish very much. Of course only the least bit of salt is needed.

only the least bit of salt is needed.

MINNERALE CLEE—One and a half supe granulated angar, half cup butter surved to a crosm, whites of air eggs or three whole eggs, two tempocariuls crosm taxtar, put into two heaping supe of flour and both sifted together, one tempocariuls sods in half oup sweet milk. Bake the cake in three layers. For filling takes a teneup of sugar and a little water; boil together until brittle when dropped into cold water; remove from the store and sir quickly into the wall-besten white of one egg add to this a control stoned raisins, chopped line; or a cup of chopped hickory unt-meats and place between, layers and over the top of the cake.

"ISAW YOU."

take the "forbidden fruit,"- agitated not an apple, but a pear, from a favorite tree, when on looking up to reach it, a star shining through the branches reminded tremulously; "you look as if Lydia, glad herself, at last, to you had been crying." him of God's eye being ever fixed upon him. If young peo-ple always remembered that a little. "on the sly," and thus sowing the seeds of many rank thistles - of forming many bad habits -of entering upon paths that lead to sad ends.

Lydia Travers was in capital spirits, for she was just having the morning which, of all others, she liked the best. She was having a sweep and a "rummage." In her dictionary, "rummage" meant to pry into every hole and corner she liked, to put things straight and tidy, according to her own notions of tidiness at least, and to feel her little self to be mistress of the house. She would have better pleased her mother, if she had been content with the sweep without the "rum-mage;" but as this morning her mother was out, she was pleasing herself. The room had been nicely arranged, and now there was only one mere thing to be done-the cupboard :

"Now for it! she said, with a smile; "mother has left it open for once." Her eyes surveyed with pleasure the cupboard, which Mrs. Travers always had in such good order that it was never necessary to "rummage" about for anything. To Lydia's delight, on the bottom shelf, what should she

was scarcely audible.

"Than the jam I saw you take just now," said the widow, gently, and laying her withered hand on the finger on which a stain of raspberry juice was yet to be seen.

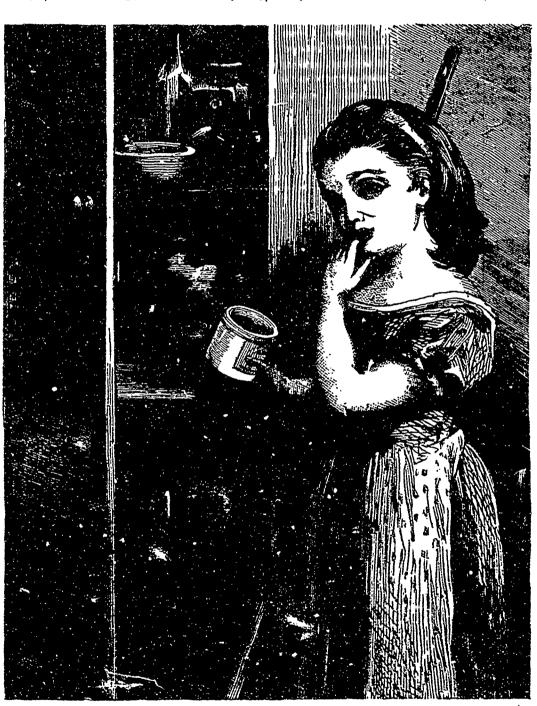

"Oh! Mrs. Bell" cried Lydia, now crimsoning with shame, "I am so sorry! I didn't mean to be a thief," she said with a shudder; "indeed I didn't."

"I am sure you did not, my child," said the widow, earnestly; "and I am sure my poor Herbert did not. But, my dear he is in prison to day, for all that. Now, if I were you, when your mother comes home, I should tell her all about it, and ask her to help you all she can to conquer this bad habit of yours."

That morning was as useful a morning as Lydia Travers ever spent in her life. She frankly told her mother what she had done, and how sorry the felt for having yielded to temptation. For a long time she never looked at the cupboard door nor saw it opened, without thinking of the gloomy prison door, which, strongly barred and bolted, separated the widow and her son.

In after years, Lydia mistress of the British school in which she had been a diligent pupil teacher. One lesson she used to give to the children was entitled "Nothing is nice that is naughty."-British Juve-

PLUCKED BLOSSOMS.

"O mother, do see!" said little Georgiana to her mamma, as she came rushing in from the garden; "somebody's cut off all the buds of your heliotrope and little rose. Only look!"

"I did it," said her mother.

"You, mamma!"

· " Yes.'

"Why-don't you like flowers?"

"Yes, my dear: it is because I like flowers I cut them off."

"What do you mean, mam-

" My dear, do you notice that the heliotrope and rose are both young and weak-just beginning to grow? The strength that they would spend on a blossom now I want them to employ in making larger roots, and throwing out more branches, so hev by and by, instead of one now."

"Oh, that is it."

"Yes; you see, my dear, there is in every plant a mysterious power, called the vital force, or life. Now, this vital force is all the while stimulating the plant to throw out either roots. stalks, leaves, or blossoms; but of all things that a plant can do, nothing uses more of this mysterious power than to blossom. If the vital force makes roots, these roots are so many mouths through which the plant sucks food from the earth; if it goes to make more leaves, these leaves are lungs by which the plant breathes the air, and thus takes in nourishment. But the of what our Heavenly Father is flowers are neither lungs nor mouth; yet it takes the highest force the plant is capable of to produce it; and while the planis maturing the seed which lies hidden in the flower, it often entirely suspends all other growth, because all its energies are taken up with this effort. So, if a gardener wants to make a plant strong and thrifty, and capable of bearing a beautiful show of flowers, he often picks off the first blossom-buds, and plant to leaves and roots.'

Little Georgians looked quite

thoughtful.

'My dear," said her mother, "I am going to tell you somealwaysremember. Thisflowering of plants is like some other things that I want you to notice In educating you, there are up a green vigorous shoot, from enjoyment. many pleasures and pursuits, which multitudes of roses shall beautiful as the blossoms of a love has been broken off by with you, and you know I shall ample of Him who "pleased not flower, that I restrain you from, death, there springs out of it a bring you lots of flowers, and Himself."—British Juvenile.

but because I think for you to suffer and sorrow. have them now would have the same effect on your character have tastes and capabilities, that too early blossoms would beautiful in themselves, which on a delicate plant.

"You would like to spend your time in reading story-books, in going on visits, in attending shows and concerts, and many such things, which may all be pleasant enough in themselves; but instead of all these, you have to spend your strength in daties and lessons, at home, and at school. You are doing now what a plant is-you are making roots, and leaves, and branches; and, when your mind and character are formed, blossoming may not hurt you.

"Sometimes a gardener cares nothing about the strength of a plant. His only object is to will become strong, thrifty get a show of fine flowers implants, and bear twenty blossoms mediately. He keeps it warm, get a show of fine flowers imwaters with stimulating nourishment, and turns all its strength to flowering. In this way beautiful flowers are made; but when their transient bloom is withered, the plant is a poor, withered, thing, unsightly whose vitality is all expended. So some pirents and teachers bring up children to care only for pleasure, gaiety, and show; and when childhood and youth are past, their vigor is all spent -they are poor, insipid, useless creatures, affording no pleasure or use either to themselves or others.

"But, more than this, what I do for you, is only an emblem constantly doing for us all. Our minds are all the while reaching forth and striving after blossoms which He cuis off, not because He does not love flowers, but because He does love them, and wants His immortal plants to gain strength for a thousand, instead of one.

"Here is a mother, for instance, and all the strength of at the Sunday-school, and had her life is put forth in one fair been looking forward for many child—a rosebud of infinite sweetness. All the strength of turns all the strength of the her soul is going into love for clergyman of Schild. The Heavenly this Gardener cuts off this blossom of wished for had arrived; the love, not because He has no weather was all that could be pleasure in it, but because He desired, clear, bright and warm, buds have been cut off, throwing I new, form part of the day's

not because I do not like them, love to all mankind—to all who tell you all I have been doing

"So people in this world often the circumstances of their lives forbid them to indulge. A mother, for example, has a taste formusic, drawing, or literature; but poverty, and the charge of a young family, keeps her confined to the drudgery of ordinary life; but God, the loving Gardener, has fore-ordained all this. He casts her lo! thus, not because He has no love for the beautiful tendencies of her mind, but because He would give them a stronger root and wiger growth.

"And now, my dear child," said mamma, " remember, if in self;" and she remembered he your life a time should ever had told them that even childyour heart are cut off-when low Christ, could find opportuniyou are forced from all that is ties in daily life for denying lovely and agreeable to you, themselves, by giving up their and confined to all that is repugnant and distasteful-be sake of helping others, and in

when I come home; but I must not stay to talk now, or I shall be late, so good-bye;" and giving Lucy and her mother a hasty kiss, Bessie ran off to join her companions.

Bessie did not feel so happy as she thought she should, as she walked towards the school where all the children were to assemble. Her conscience whispered to her that she had not acted quite kindly to her suffering little sister. She tried to put away the unwelcome thought, but it would not do; again and again came into her mind some words spoken by Mr. Graham in school on the previous Sunday, "Even Christ pleased not Himcome, when all the desires of ren, if they really wished to folup their own pleasure for the

MICE AT PLAY.

Four children sat around a wood-fire, in an Four children sat around a wood-fire, in an old-fashioned country house. The red embers blazed up merrily, and showed four flushed little faces, four very taugled heads of bair, eight bright, merry eyes, and—I regret extremely to add—eight very dirty little hands, belonging, respectively, to Bess, Bob, Archie, and Tom Manma was away, you may be sure. If she were a home, the children would have make a very different appear are. Oh yes, indeed, quite and entirely different.

The round table was wheeled in front of the I no round rathe was whoshood in front of the fire, and the student lamp in the centre shed its light on Tom's letter, which he was writing

its light on Tom's letter, which he was writing to his mother.

Archie was lenning back in the large chair, his arm, which he had broken in riding the trick mule of the circus the day before, was in splint; but, judging from the rapid disappearance of the gingerbread on the plate wear him, it is to be doubted if trick mules or broken arms seviously impair the appetite.

arms seriously impair the appetite.

Bess, step jogging the table! How earth ar a fellow write with you around:

"Head what you've written," said Bess.

"Yes, do, chimed in Archie They whether they have been been been been a serious with the se

"Wait till it sdone," answered Tom. Writing a letter was no joke for Thomas Bradley,

"Won't you tell her I dropped the tea-por down the well?" asked Bob.
"Oh, did you?" cried Tom, Bess and Archie, all in a breath.

Bab nodded his head, and looked at them all

with a calm stare
"Which one" asked the three children, vlenoixae

"The big alver one," said Bob.
"How Why? What were you doing " How?

with it?"

"The gardener wouldn't lend me the watering pot, and I wanted to water my garden, so I went to fill it at the well, and the bucket but it right over into the nell. It was the bucket's fault. I ain't to blame."

"That's the worst scrape yet," said Bess. "For if I did get lost, I was found again; and if I did thar my clothes, they are all mended now; and if Archie did broak his arm, he seed it mended now, too, but the teaper That's dropped down the well, and there it is. Bessie's argument was convincing. There was no more to be said.

After a while Tom's letter was finished, and ran as fellows.

"P. S. I do wan seed.

Bob a dun."

The next morning all four children were gathered around the well, at the bottom of which lay the silver teapet.

"I see it, I see it." cried Tom, eagerly, "It's down at the bottom."

"Did you suppose it would float?" asked Rass

Bess.

"Let me see," cried Bob.

"You clear out," said Archie. "you've made all this mischief. You'd better go before you tumble in yourself, you little goose. I can't go after it, with my broken arm.'

Meanwhile Bess had gone to the house for a long fishing-pole, and soon returned carrying it.

a long fishing-pole, and soon returned carrying it.

"We'll fasten a hook to the end of it and fish the teapet up," said she.

"Ho, ho! Do you suppose it will bite like a fish?" laughed Tom.

"No, I do not, Tom Bradley. But I suppose if I tie a string to the pole, and fasten an iron hook to one end, that I can wiggle it around in the water, till the hook catches in the handle, and then we can draw it up. That's what su, pose."

"There's something in that, Bess. Let me try."

"No; go and get one for yourself."
"But where can I find one?"
"In the smoke-house, where I got mine."
"Oh, get me one, too," cried Bob.
"And me one, too," cried Archie.

PAnd me one, too, oried Aronie.

Before half an hour had passed, the four children, all armed with fishing-poles, were intently wigoling in the water, catching their hooks in the stones by the side of the well entangling their lines, digging their elbows in each other's sides, in their frantic attempts to pull their hocks loose, scolding, pushing, and catting senerally excited. getting generally excited.

Every few minutes Tom would pull Boss back by her sun-bonnet and save her from tumbling over in her eagerness; but so far from being grateful to her deliverer, Boss resented the treatment indignantly.

"Stop jacking my head as ""

rrom coming grateria to not deliverer, Bees re-sented the treatment indignantly. "Stop jerking my head so!" she cried. "You'll be in, in a minute, you'd have been in then if I hadn't jerked you," answered

in then by ""

Tom.

"Well, what if I had? Let me alone. If I go in, that's my own look-out."

"Your own look in, you mean. My gractous! wouldn't you astonish the toaks down them." But you'd get your face clean."

"Now, Tom, you let me be. I'most had it that time."

"So you've said forty times. This is all humbug. I'm going down on the rope for

"Oh, no, Tom, please don't. Indeed you'll be drowned, the rope will break; you'll kill yourself, you'll catch cold," cried Bess, in alarra.

"Pooh! garl ooward!" retorted thankless Tom. "Who's afraid of that? Stand back, small boys, I'm going in." "You'll poison the water," suggested

Archie.

"It will be so cold," meaned Bob.

"It will be so cold," meaned Job.
"I'll scream for a hundred years without stopping, Tom," oried Bess, wildly. "You shan't go down—you shan t; I'll call some one. Murray! Feter! Maggie! c-o-o-o-o-o-me!"
"Stop screaming and help. Now, do you three hold on tight to this bucket; don't let go for a moment; pull away as hard as you can when I tell you to. Now for it."
And, without more ado, Tom clung to the other rope with his hands, and twisted his feet around the bucket handle.
"Hold on tight and let me down oasr." said

"Hold on tight and let me down casy," said Tom, and the three children lowered him little

A sudden splash and shiver told them he had reached water, and a shout of trimoph declared that the teapet was rescued.

As Tom shouted, all the children let go the rope, and rushed to the aide of the well to look at the victorious here.

It was a most fortunate circumstance that

It was a most fortunate circumstance that the water in the well was low. As it was, he stood in the cold water up to his shoulders. "What made you let go?" reared Tom.

O, Tom, have you got it? Hase you really? Am't it cold? Are you hurt? Were you scared? Is the teapet broken?"

'Draw me up! You silly children. You grove of a Bess! Why don't you draw me

"Hittin next door and can mr. wison, said Ress, hopefully, and started.

As Bess ran, she was suddenly stopped at the gate by the sight of a carriage which had just driven up, and out of which new stopped Aunt Maria and Aunt Maria's husband, Uncle Daniel. These were the very grimmest and Daniel. These were the grandest of all relations.

Frances of all rolations.

For one awful moment Bees stood stunned Then her anxiety for Tom overcame every other consideration, and before Aunt Muria could say, "How do you do, Elizabeth?" she had caught her uncle by his august coat tail,

had caught her uncle by his august out tail, and, in a pitcous voice, besought him to come and pull on the rope.

"Pull on the rope, Elizabeth!" said Uncle Daniel, who was a very slow man; "why should I pull on a rope, my dear?"

"Oh, come quick! hurry faster! Tom's down in the well!" cried Bess.

"Tom down in a well! How did he get there t

'He went down for the teapet," sobbed Bess, "the silver teapet," and we can't pull him up again, and he's cramped withcold. Oh,

do hurry!"
Uncle Daniel leisurely looked down at Tom. Then he slowly took off his coat, and as slow-ly carried it into the house, stopped to give an order to his coschman, came with measured pace to the three frightened children; then took hold of the rupe, gave a long, strong, calm puli, and in an instant, Tom, "dripping with coolness, arose from the well".—Interior

SITTING DOWN.

BY JENNIE M. DRIMEWATER

Theodora drew on her gloves as if the action wearied her. Ales Geerer was thinking that she did not look strong enough to be nitting up. As the button of Theodora's glove flow off, she repressed the impatient and nervous exclamation that almost uttered itself, bont days and nicked to the button saving, with a down and picked u the button, saying with a smile that tried hard not to be pitiful: "I am so cross nowadays that I feel wicked all the

so cross nowadays that I reel wicked an the time."

"Sit still and rest. I've been thinking that I would like to put you to bed and feed you with a spoon."

"Oh! no, I'm not so tired. A brisk walk will rest me," she returned, rising, with an effort. "It was mid-light when I turned off the gas last night; and I had to be up early this morning, to see to father's breakfast. I'm full if business these days."

"This is a busy age," replied Mrs. Gesner, dropping her work and folding her hands. "In an age so full of bustle and racket, so full of doing and so barren in being, I wonder how people fluct time to be still before. God and to hear his voice. If he say, 'Hush, be quiet and listen!' they have no cars to hear. The cars are full of human voices. They would not dare to treat another friend so."

"Do you mean me?" asked Theodors,

"Do you mean me?" asked Theodors, glancing away from the clock.

"I mean you and every other too-busy worker. I mean every mother and father, every teacher, every minister, every writer, every woman who has a special work, and every man and woman who has not a special work. man and woman who has not a special work. I mean every human being who works so hard in serving man that they forget that to hear when God speaks to them is his will above all. He can feed the hungry without human aid; he can teach the ignoraat without using man's peer wiedom, but when he would speak to his children, he will not speak unless they are willing 'to stop and listen."

"He can make us hear through the bustle and racket," said Theodora, uncasily, rubbing the white door-knob with her fingers.

"Yee, if he ordain the bustle and racket. Do you not think that we eften make the

"Yes, if he ordain the bustle and racket.
Do you not think that we eften make the
racket ourselves?"
Racket! Her work for him! Why did not
Mrs. Gesner call it rubbish?

The pained face and drooping figure not a pleasant contemplation. Mrs. Genser found her work prottier to look at.
"Now, my dear, tell me what your plan is for the remainder of the day."

Theodors looked at the clock. It was nearly

three o'clock. Her voice was somewhat husky, perhaps. Mrs. Gesner would think her work

was not at Sunday-school last Sunday. I must go to a book-story and find a picture-book for a little lame boy in our block. I must visit an a halo kind oby to the clock. I must want an old blind man and read awhile to him. I must call at St Luke's, to see Sarah Merchant. She has been sick there four or five months. I must to be home at supper-time, to make mother's toast. I must go to prayer-meeting this evening. And then I must come home and finish Minnie's waterproof, and answer three or four letters; and then—"

"Where is the time for Christ?"—interrupted Was Geomer crarely and country.

But all the united efforts could not raise form.

But all the united efforts could not raise form.

"I'll run next door and call Mr. Wilson," sid Ress, hopefully, and started.

As Bess ran, she was suddenly stopped at he gate by the sight of a carriage which had not driven up, and out of which now stepped into the frequency of the very grimmest and randest of all relations.

For one awful moment Bess stood stunned there anxiety for Tom overcame every there consulcration, and before Aunt Maria and caught her uncle by his august coat tail, and caught her uncle by his august coat tail, and, an a pittous voice, besought him to come

"Help what? Serving your neighbor and forgetting God?"

"I thought serving my neighbor wasserving him." Thoudors answered, spiritedly.

"I thought serving my neighbor coasserving him," Theodora answered, spiritedly.
"So it is, when he bids it so. But he is a tender lover and exces for a return. We may love him for his o va sake, as well as love his brethren for his a ke"

"I never the aght of that," confessed 'Theodora. "I t' ought that he wanted me to keep busy."

"Keep busy about his business, but not about your own. If he saws that you come

"Keep busy about his ourness, our nor about your own If he says that you serve him best with taking no time to study his will, with no time for speaking to him alone, then, child, go on. You are doing his will. But he with no time for speaking to him aione, then, child, go on. You are doing his will. But he spent a whole night in communion with his Father. There were lepers and blind that needed helping, sinners sinning against God that very night. But he left them all to give himself—every thought, every feeling—wholly to God. And if he, the suless, needed that, oraved that, oh! how much more do we!"

"I thought I was right," murmured Theodora.

"Do you love him best of all? Do you feel

always near him.?"
"No. I'm too wicked and tired and oris-

"You treat him as if he were a very hard master. Suppose, tired as you are, I kept you standing, waiting on me, and wouldnot let you at down. I would not treat my Bridget asyou act as if your Master were treating you."
There was a chair near the door. Theodors glanced at the clock, then dropped into the comfortable and comforting cushions of the chair.

chair.

"Do you remember that once, after the people had been three days with the Lord, and he had healed them and taught them, amid great rejoicings, that he would not send them away fasting to their homes, fearing that they might faint by the way?"

"Yes, I know."

"Sunness they had said 'Oh, no Thank

"Yes, I know."

"Suppose they had said 'Oh, no Thank you, Master, I really can't stop to eat. I don't mind fainting by the way. I want to go home, to tell everybody how good you are. I want the neighbors to see that Aaron can speck with his loosered tongue, and that Miriam can walk as well as before she was sick. And I want to tell overybody in the town all the gracious words that have come out of your mouth."

Theodora smiled. "I don't believe that anybody was so foolish as to run away from

Theodora smuce. "I don't beneve that anybody was so foolish as to run away from the bread that he made for them."
"Nor I, not in those days. So he bade them all sit down. Wasn't it pleasant to sit down and wait and be ready for his bread? He was not a hard Master th.

Theodora arose, without sook ag at the

clock. "I will go home and rest awhile," she said. "I. I. Independent.

CARPINGS.

BY FRANK II. CONVERSE.

In their early discipleship Christ's followers though their Master was constantly with them though their aleger was constantly with them were perpetually making failures, and slumbling where their steps should have been firm and unfaltering. Yet we do not learn that the Saviour represented them with the seartion that they were unworthy to be called his disciples.

disciples.

But somehow, in the world's mechanical effort to adapt Christ's teachings to the merest requisites of outward morality, instead of following it out in its beautiful fulness, they totally ignore his loving charity for us on earth, in exactly the rame degree that they shut out the beam of self and bring inte conspicuous notice the mote of their fellows.

"Look at John Smith," cries the World with virtuous indignation; "he calls himself a Christian, yet he's censtantly quarrelling with Jones and Brown. I don't see that his ugly temper is any way bettered by his conver-

temper is any way bettered by his conver-

really? Am't it cold? Are you hurt? Wero
you scared? Is the tempet broken?'
Taking the assertion cum grane -ide, it is
finish Minnie's waterproof, and answer three
or four letters; and thum.—'
"Draw me up! You silly children. Tou
gross of a Beas! Why don't you draw me
up?
"I will, Tom. I'm going to," answered
"Mes. Gesner, gravely and gently.
"I'w all his time," faltered Theodora, flushing and rubbing the door-knob.
"Oh, it is! You will fed more like caying to

any more than it is aware of the victories, which, through his Helper, he has attained to.

"The hardest men I have to deal with in trude," again says the World with ill-concealed triumph, "are some of your professing Christians." And then it fluently narrates personal aneedetes of A.'s parsimony, B.'s disputations as to prices, C.'s refusal to pry his proportion of the minister's salary, cutting it down one half because his sermons were not use length of a former pastor's, and, perhaps, winds up with an intimation that D. would not saruple to lie if, perchance, he could gain a few cents in a bargain thereby.

Now, I will be charitable emough not empose for a moment that the World has in any degree purposely overstated or exaggerated these defections of my brethren, but if Christianity be a failure through these glaring faults, then indeed, was Christs exitly pilermage futile by the lapsee of Peter and the helding converse, itself professes an outward morality; yet it is patent to all observers that way that no human engineering can rival, and all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own all you have to do is to smooth it to your own.

granage futile by the lapses of reter and the henous crune of Julas.

"But they profess such great things," argues the World. But the World with whom I am holding converse, itself professes an outward morality; yet it is patent to all observers that quite often it falls for short of its profession.

It is unfortunataly too true that there are

quite often it falls for short of its profession.

It is, unfortunately, too true that there are moral natures so warped by inherited and inhorn traits of character that even God's grace seems in this world never to straighten them into symmetry, that is, if we judge them by the surface life. How it might be could we see His workings in their inner nature, we know not.

And the committee of the profession of the surface life.

see His workings in their inner nature, we know not.

And the carping World, putting behind it with easy assurance the multitude of consistent Christian lives which it knows and has known, the humility and self-sacrifice which it sees and has seen, places in full prominence the faultiness of so-called Christians, exclaiming with a loud voice, "God, I thank thee that I am not as these other men, extertioners, unjust," while the really repentant disciple, turning his eyes inward and smiting his breast cries, "Lord, be merciful to me a sinner."

True it is also that there are the self-righteous and the hypocrite; but, my deer World, these are not, as you charitably suggest, the fruits of Christianity. Ah, no, they are rather the sure indications of its absence, a most deplorable lack truly, but one which, in the final adjustment, will in no way advantage you to whom judgment will be meted out according to the measure of your own lives.

I seek in no wise to excuse or cover the failings which I deplore in myself and my brother Christians; for while I believe, as I have said, that there are some natures which in life may never lose their inherent characteristics, though holding them in absyance there are a far greater majority who, living professedly Christian lives, are satisfied if they keep clean the outside of the cup and platter, though making no special effort toward purifying the inside.—Ill. Chris. Weskly.

A DAY'S MARCH THROUGH FUNLAND

When I first made the acquaintance of Viborg, a journey thither from St. Petersburg, though the distance by land is only about eighty miles, was no light undertaking. The daring traveller who elected to travel by read had no choice but to provide himself with abundant wrappings and a good stock of food, draw his strong boots up to his knee, fortify his inner man with scalding tee or fiery cornwhiskey, and struggle through axle-deep mud or breast-high snow (according to the season), semetimes for two days together. "Mair none occur change tout cale." Two trains run daily from St. Petersburg, covering the whole distance in about four hours, and the stations along the line, though bearing marks of hasty construction, are still sufficiently comfortable and well supplied with provisions. Thanks to this direct communication with the capital, Viborg is now completely as fair of the news of the day, and all fashionable topics are canvassed as eagerly on the promenade of this little Finnish scaport as along the pavements of the Nevard Prospect.

"We must breakfast early to-morrow, mind," mays P——as we settle into our respective beds, "for a march in the sun here is no joke, you bet!"

"Werse than in Arabia or South America P' ask I with calm scorn.

Werse than in Arabia or South America?

"Werse than in Arsons or count america.

"You'll find the north of Russia, a pretty fair match for both at this sesson. Do you happen to know that one of the hottest places in the world is Archangelsk on the Walke Sea? In summer the pitch molts off the reseals like inter, and the mosquitoes are so thick that the men on board the grain-ships fairly burrow into the corn for shelter. Good-

fairly burrow into the corn for abelier. "Goods night! Sharp six to-morrow, mind!"

Accordingly, the carly daylight finds us tramping along the edge of the picturesque little creek (dappled here and there with wood-crowned islets) in order to get well into our work before the sun is high in the sky, for a forty-miles march, knapsack on shoulder,

way that no human engineering can rival, and all you have to do is to smooth it to your own

And now the great panerams of the North—a soble change from the flat, uncading monotony of the Russian steppes—begins in all its splender. At one moment we are buric? in a dark depth of forest, shadowy and spectral as those which haunt us in the weird outlines of Rotzsch; the next minute we burst than a coop rather than the second of the seco outlines of Rotzsch; the next minute we burst upon an open valley, bright with fresh grass, a d with a still, shining lake slumbering in the centre, the whole picture framed in a background of sombre woods. Here rise giant boulders of granite, crested with spreading pines—own brothers, perhaps, of the block dragged hence eighty years ago from which the greatest of Russian rulers still looks down upon the city that bears his name; there, bluffs of wooded hill rear themselves above the surrounding sea of foliage, and at times the roadside is dotted with the little wooden faced but of the natives, whence wooden-faced hut of the natives, whence wooden-faced women, turbaned with colored handker-chiefs, and white-headed children, in nothing but a short night gown with a warm lining of dirt, stare wonderingly at na as we go strid-ing past. And over all hangs the clear, pearlygray northern sky.

One hour is past, and still the air keeps moderately fresh, although the increasing glars warns us that it will be what I once heard a British tourist call "more hotterer" by and by British tourist call "more hotterer" by and by. So far, however we have not turned a hair, and the second hour's work matches the first to an inch. As we pass through the little hamlet which marks the first quarter of our silotted distance we instinctively pull out our watches: "Ten miles in two hours! Not so bad, but we must keep it up."

By the middle of the fourth hour we are marching with costs off and ale: "a rolled up, like amateur butchers, and although our "pace" is as good as ever, the clastic swing of our first start is now replaced by that dogged, "hard-and-beavy" tramp which marks the point where the flesh and the spirit begin to pull in opposite directions. Were either of By the middle of the fourth hour the point where the mean and the spirit begin to pull in opposite directions. Were either of us alone, the pace would probably slacken at once, and each may safely say in his heart, as Condoroet said of the dying D'Alembert, "Had I not been there he must have flinch-

But just as the fourth hour comes to an end we come round a sharp, bend in the road, and there before us lies the quaint little log-built post-house (the "halfway house" in very truth), with its projecting roof and painted front and striped doorposts; just at which respictous moment I stamble and twist my foot.

"You were right to reserve that performance to the last," remarks P—— with a grin, helping me to the door; and we order a senerar (tea-un) to be heated, while we curselves indulge in a scrambling wash of the rudest kind, but very refreshing nevertheless.

Reader, did you ever walk five miles an hour for four hours together over a hilly country, with the thermometer eighty-three degrees in the shade? If se, then will you appreciate our satisfaction as we throw aside our heavy books, plunge our swel-

cegrees in the shade? If se, then will you appreciate our satisfaction as we throw saids our heavy books, plunge our swollen feet into cold water and, with coats off and collars thrown open, sit over our team of the collars thrown open, sit over our team of the collars thrown open, sit over our team of the black bread in that quaint little cross-beaued room, with an appeals herror excited by the best plats of the Eng-Herson Karl or the Trois From Provingent; our foot still unit for active servers, we collar a talescoin limit.

Our meal being over and my foot still unlit for active serves, we order a telegrate (cart) and start anew for, imates Foot. Our vehicle is simply a wooden tray on wheels, with a bag of hay in it, on which we do our best to recline, while our driver, perches himself of the edge of the eart; thereby doubtless realizing viridly the sensation of rowing hard in a pair of thin unmentionables. Thanks to the perpetual gaps in the road formed by the great than two mouths ago (the Finnish winter

ending about the beginning of May, during the I greater part of the ride we play an animated though involuntary game of cup-and-ball, boing thrown up and caught again inceasantly. At length a dull roar, growing over louder and louder, breaks the dreamy stillness of the forest, and before long we come to a little chalet-like inn embosomed in trees, where we alight, for this is the "Imatra Hotel."

Let us cast one glance out of the back win dow before sitting down to supper (in a long, bare, chilly chamber like a third-class waiting-room), for such a view is not seen every day.

bare, chilly chamber like a third-class waiting-room), for such a view is not seen every day. We are on the very brink of a deep, narrow gerge, the upper part of which is so thick-ly clad with rines as to resemble the creat of some gigantic belimet, but beneath the naked granite stands out in all its grim bar-remess, lashed by the spray of the mighty torrent that rous between its projecting rocks. Just below us, the river, forced back by a hugo bourder in the courter of its course. Interally boulder in the centre of its course, interally piles is self up into a kind of liquid mound, low-raing, flashing and trembling incessantly, the conseless motion and tremendous din of the rapids having an indescribably bewildering effect.

rapids having an indescribably bewildering effect.

The sight of the country, however, is nudoubtedly the natives themselves. Their tawny akins, rough yellow hair and coarse fint faces would look uninviting enough to those who have never seen a Kalmuck or a Samoyeds, but, despite their diet of dried fish and bread mixed with a vdust, both men and women are remarkably healthy a. I capable of surprising feats of strength and endurance. They make great use of bark for caps, shoes, plates, etc., in the making of which they are very skilful. As to their dress, it baffles description, and the horror of my friemd the exchangeur at his first glimpee of it was as good as a play. On one cocasion he was criticising severely the "rig" of some passing natives: "Voils am que porte em pantalon et point de lottes—am autre qui a des bettes et point de pantalon; peutêtre que le troisime n'aura m' un mi autre l' At last came one with a pair of boots almost big enough to go to sea in, and turned up like an Indian cance. Our critic syed them in allence for a moment, and then said with a shudder, "Ce cont des bottes impassibles!"

But there needs only a short journey here to show the follyof further annexations on the

But there needs only a short journey here to show the folly of further annexations on the part of Russia while those aiready made are so immentably underveloped. Finland, which, rightly handled, might be one of the Czar's tichest pessessions, is now, after nearly seventy years' occupation, as unprofitable as ever. Post-roads, soarce enough in the Scath, are absolutely wanting in the North. Steam navigation on the Gulf of Bothnis extends only to Uleaborg, and is, so far as I can learn, actually non-existent on the great lakes, except between Tanashuus and Tammerfors. Such is the state of a land containing boundless waterpower, countlessacres of prime timber, countless the state of a land containing boundless water-power, countless area of prime timber, countless shiploads of splendid granite. But what can be expected of an untaught population under two millions left to themselves in an unreclaimed country nearly as large as France?

Helsingfors can now be reached from St Petersburg, vis Viborg, in fourtoen and a half hours, but what is one such to line the boundless emptiness of Finland? The fearful lesson of 1869 will not be easily forgotten, when all the horrors of familie were let loose when all the horrors of famine were let loose at once upon the unhappy province. Seed-corn was exhausted, bread became dear, dearer still, and then failed altogether. Men, women and children, struggling over anowy moors and frozen lakes toward the distant towns in which lay their only chance of life, dropped one by one on the long march of death, and were devoured ere they were cold by the pursuing wolves. Nor did the survivors fare much better; some resched the haven of refuge only to fall dead in its very streets. Other gorged themselves with unwholesome food, and died with it in their mouths. Fields lying waste; villages dispopuled; private food, and died with it in their mouths. Fields lying waste; villages dispeopled; private houses turned into hospitals; fever-parched skeletons tottering from the doors of over-crowded saylums; children wandering about in gaunt and squalid nakedness crowds of mest, frenzied by prolonged misery and ripe for any outrage, roaming the streets night and day,—such were the scenes enacted throughout the length of Finland during two months and a half.

and a half.

2nt better days are now dawning on the afflicted land. Reads and railways are being pushed forward into the interior, and the illinged attempts formerly made to Russianize the population have given place to a more conciliatory policy. A Russian from H. negfors tolls the that lectures are being delivered there, and extraots from native works read in the aberiginal tongue. that it is being treated with special attention in the great schools of Soon Financial representations in Finnish at the Helsingfors theatre. Such a policy is at once pradent and generous, and far better calculated to bind together the heterogeneous that wait upon the Lord, they shall inherit races of the empire than that abourd "Pan-the warrior's trust;

Doomed to pezish—Earth to earth, and dust to dust!

From a feeble creature taken,
Once my whole appeared in aight;
And by strength vindictors shaken,
Slew a thousand in the fight;
Twaz selected
To robuke the Gentiles' pride;
Boon rejected,
Like a waspon cast aside.

—For evildoers shall be out off; but those that wait upon the Lord, they shall inherit races of the empire than that abourd "Pan-

slavism" which is best translated as "making ovory one a slave." - David Ker, in Lappincott' Magazine.

FORGIVE YOUR FRIENDS.

It female again and again that it is the duty of a man to forgive his enemies. That is true. But there is another duty equally as plain and sometimes more difficult—to forgive your friends. Not your false friends, but those who are your true ones, and who have shown their friendship in many ways.

their friendship in many ways.

Our friends tax our patience sorely sometimes. They say and do things which it is hard for us to understand. They presume upon our friendship and tease us, they crossour pathway, and they fail when we depend upon thom. Out of pure friendship they tell us things which annoy us, and their thoughtlessness inflicts a wound as deep as that which malies itself can make. Sometimes we marvel at the strange conduct of our friends. We are puzzled to explain it, and all that we can do is to forgive. No light word or strange deed of theirs shall break the tie which through years of intercourse was slowly formed.

One day, in a confidential mood, we wrote a private letter to a friend. It contained a de-

of intercourse was slowly formed.

One day, in a confidential mood, we wrote a private letter to a friend. It contained a defence of our conduct which some enemy had publicly assailed. What does our friend depublicly assailed. The letter, and then send us a copy of the paper, with a letter, which said, "I deemed it due to you that your satisfactory defence should be published. Pardon me if I have done wrong." We forgave him, but it was an effort, for we smarted under the mischief which he wrought.

Another friend makes you the butt of his wit. He loves you, so he nicknames you in the presence of strangers. He gives you a good-natured thump. He throws the rays of his wit on your foibles, and raises a laugh in the company at your expense. He pursues that line of conduct until you are driven to calling him to account. Then he is hurt and griered that you should acubt for a moment the sincerity and depth of his friendship. He would risk his life, he says, to save yours. He says truly; so you forgive him.

Another friend, almost breathless, inastens to meet you "Mr. A.," he begins, "said in my hearing the other day a very ill-natured thing about you." You bog him to stop, as y a do not wish to hear what was said, but you beg in vain. "I am your friend, and must tell you." And so he quotes a malicious remark, which ought. "to have been repeated, and which makes you excessively uncomfortable. Then he asks you to forgive him if in his friendly zeal he did wrong to repeat this precious bit of personal gossip, and you forgive him.

But the friend that is the hardest to forgive is he who feels it to be his duty to be your

But the friend that is the hardest to forgive is he who feels it to be his duty to be your faithful critic, and to tell you of all your faults. He uses no judgment about the matter. His eyes are always open and staring, and his tongue is always moving. He sees something odd about your dress, something awkward in your manners, something ungrammatical in your speech, and you wonder what there is about you that he likes. He is worse than an accusing conscience, and in your loftiest tens you call him to order. "Pardon me for my criticisms," he says, " for they are well intendicationed, and faithful are the wounds of afriend." What can you do but pardon him?

Forgive your friends! If you find it hard to do this, Oh think how often they have forgiven you!—Methodiat. But the friend that is the hardest to foreive

SCRIPTURE ENIGMA.

Curiously hinged and jointed
To its fellow hangs my first;
To preserve man's life appointed,
When the ground, through sun, wasoursed; Yet it never Fails to deal destruction round, To whatever May within its reach be found.

With substantial fabrication Is my unseen second blest; Made a wondrous habitation, For a still more wondrous guest: Framed to obmish Force of arm—the warrior's trust;

Doomed to perish—
Earth to earth, and dust to dust;

TWO THINGS AT A TIME.

"One thing at a time, and do it well," is an old maxim, which has wisdom in it, as most such old saws have. But there is another side to the subject. Sometimes we can do two things at a time, and do them well, as reading and knitting, for instance. It requires only and knitting, for instance. It requires only practice to make this very easy, and the hands can mechanically go on with their work, while the mind gives it no attention. When I was ten years old I was thrown from a carriage and broke my unkle. It was many menths before I could run about as usual, and my before I could run about as usual, and my time was mostly spent in knitting. I had not learned to sew yet, and doing nothing was the hardest work I ever did. I was fond of reading, and I found that the two employments could go together very well. Indeed, the faster I read the faster my fingers flew over the needles. Philosophers say we cannot think of two things at once, but I know I used to keep the run of my "narrowings," and even count off my stitches, without looking off my book or breaking the thread of my story. Very likely the mind can turn so quickly from one subject to another sometimes, that it one subject to another sometimes, that it may seem to have both in the mind at once. I acquired a taste for reading that winter which has staid by me ever since, and also a care in keeping more than one thing well "in

care in keeping more than one thing well "in hand," which has been a great time-saver.

It is not well to have too many kinds of work around at once; but one may profitably have several begun, which can be taken up at suitable times, and thus all the odd minutes be saved. Light fancy work is not out of the way when a friend drops in for a half hour's chat, and o a may save up "trimmings" for such occasio.

Heavier pieces of work should be kept for presular sewing hours and the be kept for regular sewing hours and the region for regular sewing hours and the region for regular sewing hours and the region for regular sewing women learn to carry a great many operations at about the same time. While they are watching the piec bake they will snatch time to do many other small they will snatch time to do many other small pieces of work, which help a great deal in "putting work along." Those who can do but one thing at a time are about the slowest kind of workers. It is a good rule to complete whatever you undertake at the earliest possible moment. There is such a satisfaction in finishing off anything, besides the convenience of having it done. Do not be afraid of having too many irons in the fire, if you only sharpen your attention and keep them all in motion

ESTRANGEMENT FROM GOD.—The longer we neglect writing to an absent friend, the less mind we have to set about it. So, the more we neglect private prayer and closet communion with God, the more shy we grow in our approaches to Him. Nothing breeds a greater strangeness between the soul and God than the restraining of prayer before Him. And nothing would renew the blessed intimacy, if God Himself, the neglected party, did not, as God Himself, the neglected party, did no it were, send us a letter of expostulation from heaven, and sweetly chide us for our neglige nee. Then we melt, then we kindle, and the blissful intercourse gradually opens as usual.

A writer in the Sunday School Chronule, A writer in the Sunday School Chronule, of London, tells of these lines, as printed on a placard suspended in his school-room, for the purpose of "reminding old scholars, and informing new ones, what is expected from

PAUL AT ATHENS [About 52 A. D.1

READ Acts xvil. 22-34. RECITE Vs. 24-26, 30, 31. DATLY READINGS - M.—Aots xvi. 22-34. I —Aots ii 37-50 W—Pa i 118 7A.—Deut. xxxii. 118. --Isa xi 18-27. Sa -1 Pet. iv. 111. S.—Acts xxiv. vii 37-50

GOLDEN TEXT .- Por there is one God, and one Mediator between God and men, the man Christ Jesus.—1 Tim, ii. 5. CENTRAL TRUTH-God requires repentance,

CONNECTED HISTORY.—Paul, again is danger of an na-senit from the Jews at Theesalonica, was conveyed by the Caristians to Athens, where he waited for Silas and Timothy; be preached to the Athenians.

To THE SCHOLAR.-Notice the wisdom of Paul in praising the Athenians for being religious and thus in ducing them to hear of the true God.

NOTE : — Athens, once the capital of attion, and the NOTE - Corrects, a famous city; capital of Achada; the most neted city in all Greece named after the goddess is motropolis of Greece; 45 miles seath-west of Athens or Minera. It was the contre of learning; was

"given to idolatry, having 30,000 idols." Petroxius the west; was notorious for its immoratity and wickedsaid. "It was easier to find a god in Athens than to find a wess (1 Cor. v.); had a large and extensive man" Mars Hittor Ar-cop'a-gus, a rocky bill in Alhans
where court was held and public questions discussed
Acts xvii 18,19 Artor, for offerings to idol gods. The object or purpose of the altar was sometimes written on its aids. Di'o-ny'-s-us, one of the judges, a member of the court of Arcopagus. I addition says he was biship of Athens, and died a martyr. Dam'-a-ris. I ome suppose her o be the wife of Dionysius; more probably she was a voman of wealth or good repute.

EXPLANATIONS AND QUESTIONS.

LESSON TOPICS-(I) THE UNKNOWN GOD DECLARED IL) REPERTANCE COMMANDED. (III.) MOCKERA AND BRLIEVERS.

I THE UNKNOWN GOD DECLARED. (22.) MARA Hill, see Notes; MEN OF ATERES, literally "Athenian gentlemen," too superstitious, or more correctly "very religious." (23) Passed St, or slong your streets; to THE UNKNOWN GOD, or literally "God the unknown;" CHORARTLY, or "not knowing ye worship." (24.) 1x remples, literally " in hand-made temples" or "shris (25.) WORRHIPPED. " Is cared for" is the more exact idea (Alconder) (26.) ONE SLOOD, Attendant thought they were of a better race than others; Detraminas, etc., "having fixed the appointed Teasons and limits of their aboda '- Rackett I (27.1 PERLAPTER MIN. as if groping in the dark (28.) form own fours, Aratus and Cleanthes, two Greek poets. (29.) Graven, like the statues of gods which filled the streets and squares of Athens.

I Officerious -- How was Paul brought to Athena ! For whom did he wait there! What see! Why speak on Mars Hill! Describe Athesa. Mars Hill. State the meaning of "too superstitions" The number of the meaning of "too superstitions" The number of idols in Athens. What alter did Paul see? V. hom did hedeclare? Why? Where did God not dwell? How shown? What things nad God given? What made? What fixed? How was he sought? How near and about us? What Greeks had said thin? Why was God not like idols?

II BEPEENTANCE COMMANDED. (30) WINERD AT, or rather "overlooked;" ALL MEN, Greeks as well as lows. (Sl.) appointed, set, fixed a day: BY THAT MAN. through that person; onDAINED, appointed.

II. Quarrious.—State the meaning of "winked at."
What had God overlooked? What now commanded?
In view of what day? Who was the appointed judge? How would be judge? What proof had been given that Christ would be the judge ?

III MOCKERS AND BELIEVERS. (82.) ENSUREMO TION MOCKED, most Greek pallosophers believed as Æschylus said. "Once dead, there is no resurrection;" HEAR THEM AGAIN, may be a polite refusal to hear more or possibly an offer to hear at another time. (3%) Paul or possiony an oner to near at amount time. (3%) PATL DEFINITED, no other opportunity for them is recorded (34.) CLAYE, Joined Paul, the word implies that they were opposed; ARROYADITE, z member of the Greek court held on Arcopagus or Mars 1881, see Notes; DAKARIS, see

III Oppositions -- Whe did some month. What was the rommon belief of the Greeks as to a resurrection;
What said others of the Greeks 1 What did they probably mean? Who joined Paul? State the position of Dionysius. Give the Central Truth.

What facts in this lesson teach us-

- (1) Not to insult or abuse those who differfrom us to
- (2) To declare faithfully and kindly unto them the ruo religion I
- (3.) To be thankful for the light of the gospoi !
 (4.) That God requires repentance of all in America
- England, everywhere !

ILLESTRATION .- View from More Hill. As Paul stone on Mars Hill the temple of Eumenides was below him; behind him. eastward, the temple of Theseus; fxclag him, he beheld the Propyles of the Acropolis, and the Parthenon, upon the Acropolis above. The temple of lictory was on his right, and a counties m temples and alters in the Agors, below him. Above him on the ruck of the Acropolis, was the bronze colorens Minerus, semos with speer, shield, and helmet, the char pirm of Atheus. Standing almost beneath its shade, the courageous apostic pronounced that the Pelty as not to Nikened to that, the work of Philips, or to other forms "in gold, sliver, or stone, graven by art or man's device," which crowded the scene before him, and that in temples made with hands the Delty doth not dwall.—(Cond. from Woodneorth.)

LESCON X.

PAUL AT CORINTH. [About 52-54 A. D.1

READ Acts aviil. 1-11. REGIED VR. 6, 9, 10. DAILY READINGS.—M.— Acts xviii. 1-11. Z.—2
Those iti. 1-13. W.—Matt. x. 7 23. Th.—Ex. iti. 4-21.
F.—1 Cor i. 1-18. Sc.—Eph. vi. 10-24. S.—2 Corintatans i.

GOLDEN TEXT .- Not slotkful in business ; pervent in spirit; serving the Lord. -Rom. xil. 11. ORNTRAL TRUTH,-The Lord's ministers are of good courage.

CONNECTED HISTORY -Paul left Athena after a short stay (some say only two weeks), and west to Corinta, where he is supposed to have spent a year and a helf or two rears.

22

To THE SCHOLLE.-Notice that Paul regi work as no diserace; did not allow worldly business to interfers with presching the gospel; was providentally encouraged and rewarded for his falthfulness.

commerce with all countries; the gospel from the might spread everywhere; is now in rules; the wretched village of Gortho is on its site. Ad "wt-la, Proced! to, Jow of Poulus; they lived at Rome, Kphesus, and also at Cortoth, Acts xviii. 2, 18, 19; Rom. xvi. 3; were probably wealthy, tradition says Aquila and his wife were be heade?. Pon'sus, an eastern Roman province of Asis Minor, bordering on the Black Sea. It'-a-ly, the country still called by that name, of which Rome was the capital. Clear-dies, fourth emperor of Reme, succeeded Caligula, A. D 41; poisoned by his fourth wife, Agrippina, mother of Mero, A. D. 54 He banished the Jows from Rome, of New, A. D. 64 He banished the Jaws from Rome, A.D. 52. Reme, the capital of the Roman empire; founded about 750 B. C.; said to have had two millions population in Paul's time, of which one million were slaves; had representatives of every nation and religion; under the emperorait became the persecutor of both Jow and Christian. That methers, all Jews, however wealthy, were required by rabbinion law to teach their sens neeful tr required by resolutions new to concentrate meast unrest tractor; Sank was taught tentimaking. Tents were made of cloth, skins, or leather. Jus-Nes, three persons of the name are mentioned in the New Testament Acts 1. 23; xvill. 7; Col. Iv 11. Ords pus, a chief ruler among the officers of the synagogue at Corinth; baptised by Paul. Tradition says he become bishop of Ægina.

EXPLANATIONS AND QUESTIONS.

LESSON TOPIOS.— (L) PAUL TENT-MAKING. (IL) PREACHING IN THE STRAGOGUE. (III.) PREACHING IN THE HOUSE. (IV.) RECOURAGED BY A VISION.

L PAUL TENT-MAKING. (1) CORINTM. see Notes (2) FOUND, mot unexpectedly.—(Alexander.) Aquilla...
PRISCILLA. PONTUS ITALY, see Notes; CLAUDIUS.
Claudius Cassar, the emperor, see Notes; Jaws... To DEPART, the Jowa had resisted the Roman army in Palestine, and Claudius probably feared trouble from them at Rome. (3.) same crapt, trade, att, or employment; whought, worked, trut-makers, see Notes.

I. Quaeriona.—State the title of the last lesson. Of this one Describe Corinta. Whom did Paul meet at Countil From what place? From what city lately driven? By whom? Of what trade? Where now living? Who worked with them there?

IL PREACHING IN THE SYNAGOGUE. (4.) REASON ED, or disputed, Acts avil. 2, 17; PERSUADED, tried to convince. (C.) Pilas . . Thorsaus . . Maceronia, see Motes . Parsen, "urged by some impulse," or "wholly given to the vurd," is the reading of some h8S. (6, opposes, military word meaning "to array against;"
measymmen, "abused" the aposite, or more probably
"reviled God," smook his relinent, in token of his condemnation of their sins. Mart. z. 14; zzvil. 24; clzax guiltless of your rain.

IL QUESTIONE-What did Paul do in the synagogue a Corinth? With whom did be "reason"! How often?
Who joined him at Corinth? Wherefrom? State the meaning of "pressed in spirit." What was he "pressed" to do? How was his testimony received? State the not of Paul. Its meaning. His parting statement.

III. PREACHING IN THE HOUSE. (7.) JUSTUS, se JOINED MARD, old English for " (8.) CRISPUS, was one of the few that Paul baptized. Cor. 1. 16; See Notes.

HI. Quartoxs.—When drives from the synagogue where did Paul present is whose house? State the character of Justus. Of Orispus. His ofnee among the Jews. By whom captured. What shows that the abarehat Coristà usa lavent v. R.

IV. ENCOURAGED BY A VISION. (9.) VISION, Acta L 12; TTL 9; TELL 18; PRAR NOT, this seems to imph hat Paul was shrinking from the danger - Alen that Paul was shrinking from the dangers —(Almonder.)
[10.] I AM WITH YERS, see Jer. I. S; Math. XXVIII. 20; MUON PROFILE, many yet to be converted. (11.) COX-XINCED, literally, "No sat" there, se Eastern teachers were secusioned to sit; A YHAR AND SIX MONTHS, this may include the whole of Paul's stay at Corinth or only matil bis arrest, neted in the next verse. See Cho v. 12.

IV. OCRETIONS.-Who spoke to Paul in the night Post 1 State the first charge to Faul in the inguity Best 1 State the first charge to Faul. The second and third. The three reasons given for the charges. How would these encourage Paul ? How long did he romain at Corinth ! What doing?

What farts in this lesson teach na-

:1) That honest employment is right and honorable t (2.) That the greater the opportion, to Christ, the rescuest Christians should be for him?

(8.) That Caristian workers may leave hopeious fields mistar 1 (4.) That the Lord is roady to excourage his faithful

ATVANTS ?

ILLUSTRATION .- Courage in danger .- Charles XII. Sweden was dictating a letter to his recretary during the steps of Strainuad, when a bombehell crashed Arough the steps of Strakeusd, when a bombeholl crashed trough the house and burst in the next reom. Alazmed, the secretary's pen fell from his hand. "Why do you not write !" calm-ity saind the king. "The bombeholl, size!" "Well," re-plied the king. "what has the bombeholl gut to do with the letter! Go on with the writing."

KECOS ECOS - ECOS ECOS X **Blessed** is he E whose transgression is forgiven. ***Cas-Cas-Cas**-X All persons are warned against paying subscriptions to the MERRENGER, or any other publication, to persons they do not know, unless such persons are able to show the clearest possible evidence of being authorized so to collect.

NOTICE TO SUBSCRIBERS. - When remitting be particular to give the correct Post-Office address with the Province, and not the name of your residence, county, or township, as is frequently done, which prevents the receiving of the publication until the correct address has been obtained. In forwarding remittances register the letter, or procurs a Post-Office order (in all cases we prefer the latter, as it protects the sender and ourselves), which can be had at the following rates: \$1 to \$4, 2c., and \$4 to \$10, 5c. When stamps are sent to make up the remittance, the only denominations that are of practical use are 1 cent, 2 cents, and 3 cents of the Dominion of Canada. When changing address from one Post-Office to another it is necessary to one the old address as well as the new. If this is not done the change cannot be made, thereby causing disappointment. Address all letters concerning subscriptions: John Dougall & Son, Witness, Montreal.

Erra's Cocoa.—Some time since, in a series of articles in these columns upon food, we spoke in terms of unqualified praise of Mesera-Epps & O.'s "Prepared Cocoa." The opia ion we then expressed as to its purity and rutritions qualities has been fully endorsed by the public, as shown in its increased and structure of the kind in the three kingdoms, and the total quantity of "Prepared Cocoa" consumed at the present time approaches four millions of pounds annually. This result is not surprising. The dietetic properties of native cocoa are well known, but in the form prepared by Messrs Epps, Homoepathic Chemists, they are rendered additionally valuable, both on account of their increased nutritive p wer and digesticle character. We rejoice to see the high opinion we originally held to have been so generally confirmed, and we again congratulate Messrs Epps or the sound and valuable addition they have made to our not over lengthy list of dietetic foods.—Civil Service Gazette.

ADVERTISEMENTS.

AUGUST IS A WARM MONTH AND A PLEASANT AUGUST IS A WARM MIONTH AND A PLEASANT one for young folks to run around. Perhaps some will think that it is too warm to do snything for the Mass. One has that can hardly be so, because boys and gitts talk in summer as well as winter. It would be prosty hot when they couldn't talk, and when they do talk certainly when they constant on will sometimes turn on what they read and the paper they read it in. If it is the time to talk of the Massardars and get your friends to take it. Just try and see what success you will have.

THE READERS OF THE MESSENGER WILL HAVE noticed its greatly improved appearance for the last two or three numbers. This improvement adds to the bost of publication, but this cost may be covered by a good addition to our subscription list, and that addition the publishers expect their triends will make.

THE SEPTEMBER NUMBER OF THE DOMINION MONTHLY Will contain the beginning of an illustrated ar-ticle by Col. Gray entitled "On the Sticking." The Sticking is a river in Alaska, up which Col. Grey recomby made a trip, the account of which be presents to our read-

GOOD HEALTH AND AN EVEN TEMPTE ARE two of the best accompilationents young ladies can have, and these are necessary adjuncts to a beautiful face. The marks of a peerich disposition are not tong in stamping thomselves on any face, naturally the most beautini. But who can help trelling peerich when ill-health comes! Very few, indeed, more especially when ill-health comes! Very few, indeed, more especially when it is entirely unnecessary. A bad cold, if obtained in carrying words of comfart to a sick friend, is endurable; but it is difficult to exploy one twice through an act of bravado. Just so when young ladies become invalids through obeying the disease of that fashion which suys: "Put on console and lace them as tightly as possible," and others of a similar kind, they find that everything has been lost and nothing found. Wilk the growth of the knowledge of the human system, fashion will begin to obey sanitary laws. The publishers of Drass Av. Haltert Lave done much to direct public attention in this matter. This little book has med with a contilal recognition in England, Irsland and footland, as well as in Canada, and the circh proble of the law of the post free to any address in America. GOOD HEALTH AND AN EVEN TEMPTE ARE

PRESONS ANYLIGIED, LOWEVIE SLIGHTLY, with any weakness of the Cheet or Throat, involving either the Larynz, Traches, Bronchial Tubes or the Lune beamselves, should, on the first symptom, commence with reallows' Compound Symp of Hypophosphitos, as by its use diseases of those organs (even Consumption in its primary stage) are speedily oured and more slarming symptoms prevented.

THE CLUB RATES FOR THE MESSENGER are when sent to one address, as follows:—1 copy, 300, ; 10 copies, \$2.50; 25 copies, \$6: 50 copies, \$11.50; 100 copies, \$22; 1,000 copies, \$300. J. Doreall & Son Pallshers, Montreal.

The MORTHERN MESSENGER is print 3 and published on the lat and 15th of every month at Nos. 35 and 37 Bonaventure street, Montreal, ? Jesus Doceau. & Sox, composed of John Doceau, of New Nort, and John Redpath Doceau and I. D. Doceau, of Montreal.
