BELFAST, May 15 .- Stubborn disinclination to accept anything in the tory of the Sinn Fein rebellion was beway of a government which might gun today, when Sir Roger Casemant, imply the future subjection of Ulster to home rule was evident today on the occasion of Premier Asquith's visit to Belfast, which lasted only a few hours. So far as can be learned the premier's conference with a large body of representative Ulstermen was disappointing.

It is understood that the question of the general disarmament of forces in Ireland not authorized by the government was discussed, and, altho those

the breakdown of their previous tactics, as employed at Ypres, the Dnajec and Verdun, and that they are endeavoring to work out a new plan of clinching victory that does not involve such a tremendous waste of life.— The German tactical scheme of attempting to thrust infantry forward to capture positions and to clinch a success was invented by the kaiser. It was realized that this method of fighting was costly. But the German general staff believed before it began the war that a complete victory would be won by Christmas, 1914, or by spring at the latest, and for a speedy victory it was prepared to sacrifice a great many men.

But never yet has the German system of tactics succeeded. Even when their artillery could open a comparatively narrow gap in the Russian lines last summer, the German infantry could do no more than occupy the "cultivated" ground. Whenever it tried to clinch the decision with the Russians would fall back in good order to a new position, the German infantry had to let them fall back in good order, and the Russians would hold out till the Germans slowly brought up their heavy guns. At Verdun the French were fully prepared for the negativing of the German scheme of attack, and the lates, and that the commission be leaded to a strong supplication.

LONDON, May 15.—The Russian column which has just been discovered as marching on Mosul, Mesopotamia, 200 miles north of Bagdad, is losing no time in its advance, for it has just taken the Town of Rivandouza and sent Cossacks out in rapid pursuit of the fleeing Turks. The occupation of Rivandouza marks a considerable advance since yesterday. The Turks are retreating precipitously and they have abandoned convoys and quantities of war material.

The Russians also repulsed a Kurdish offensive launched from the direction of Diarbekr, and they report the gaining of valuable results from reconnaissances in the direction of Mamakhatin.

Special Cable to The Toronto World.

LONDON, May 15.—German trenches on a front of 220 yards on the heights of the Meuse, in the region of Verdun, were captured by the French in a sudden attack haunched after preparation by artillery, the French war office announced tonight. The work was done by French patrols, which cleared the enemy out of the positions and brought back some prisoners. The French first and second lines west of the Meuse were intermittently bombarded.

Other fighting broke out in Champagne, where German attacks were unsuccessful. The enemy first bombarded the region of Le Mesnil-Lee-Maisons de Champagne and then launched several simultaneous attacks by small effectives. All these onsets were caught in a French curtain of fire or repulsed by counter-attacks of the French.

French artillery also shelled German detachments marching on the road between Essey and Pannes.

existing system of tactics, and it is now too late for the Germans to do so with any chance of success.

Along the British front in Flanders considerable activity has prevailed between Loos and Bethune and La Bassee Canal. East of Loos the Germans heavily shelled a small section of the British trenches, and a raiding party entered them, but was left only a few minutes in possession. North party entered them, but was left only a few minutes in possession. North of Loos the British artillery heavily and effectively shelled the German your address and the pocset testament. It was just what I wanted, as I the Germans exploded a mine 25 yards in front of the British trenches and occupied the crater. This cavity was then shelled by trench-mortars and parents to send me one. British infantry captured its lip, taking one prisoner and finding several British infantry captured its lip, taking one prisoner and finding several dead Germans in the crater. Each sides exploded mines northwest of Hulluch today, but there was no infantry fighting. The British bombarded has happened since then, and can only the positions of the enemy opposite Faquissart and their guns silenced his the positions of the enemy opposite of St. Eloi.

In their advance on Mosul from the east-northeast, the Russiaus nave entered the Town of Rivandouza and seized ammunition depots. The Turks were driven off in precipitate retreat and Russian cavalry are in close pursuit. Convoys and war material are being abandoned by the Turks. In their advance on Diarbekr the Russians repulsed a Turkish offensive and their reconnaisances in the direction of Mamakhatun have produced useful results.

Heavy artillery firing is reported from the Graeco-Bulgar-Serbian frontier, and that is all. The allies are making artillery preparation for a coming offensive. Greece has settled her differences with the allies and Venizelos is gaining headway in popular regard. It is even expected in Paris that when the time comes for the advance into the Balkans the Greeks will be swept off their feet and join in the parade. But reliance on Greek promises is like reliance on the wind. The people may be sound, but the king is a shirker. The German defeat at Verdun is, perhaps, greater on its psychological side than on its military side, for hitherto the general staff of every small European nation has believed that the German general staff is invincible. The scales are now falling from the eyes of these misguided militarists of the Balkans and Scandinavia.

On the main Russian front, except for a brisk artillery fire against the front of General Evert, the Germans and Austrians are quiet. Galicia, where the Russians are expected to launch an offensive, is conspicuous by its.ommission from Russian war bulletins these days. It is hardly probable that a movement on an extended scale in that province can be carried out for some time to come, for the roads in that region are still impossible for use in the transportation of artillery and heavy shells.

sox which I received, together with a note, dated Feb. 4, 1916.

The sox were dandy and altho my work does not take me into the front line trenches, I am sure that they (the sox) would be quite suitable. You must excuse the old stereotyped phrase with which I began this letter, but I could not think of any other ware. but I could not think of any other way.

This brigade has about 700 men who expect to leave for France in about a month, so we distributed the sox among the batteries to be given to the most needy men. There were no names in about 60 pairs, so I hope you will convey the thanks of the men o these modest but loyal citizens. If I might make a suggestion, it would be to have all sox made at least 11 inches long by 4 inches wide (and sox 12 inches long, 41-2 wide). Sox shrink considerably when washed, and owing to the heavy leather in the boots, the men wear larger sizes than ordinarily, and if a man gets too large a sock he can always trade it off for a smaller one, but it is hard to make the trade vice versa. Again assuring you that your houghtfulness and loyalty will not be

Germans Raid Trenches British Shell Enemy's

One Blown Up by

LONDON. May 15.—The Loos sector was the centre of considerable activity on the part of both the British and Germans last night, but no material change in the situation has resulted. The Germans started the fighting by a bombardment of a small section of British trenches immediately east of Loos, and launching an attack. They got into them and were ejected after an interval of a few minutes. The British then subjected the German positions further north and near the Hohenzollern redoubt to a heavy bombardment. The Germans exploded a mine 25 yards in front of the British trenches, near La Bassee Canal, and seized the crater. British trenchmortars then sharply bombarded this creter, and British infantry captured the lip. One prisoner was taken and several dead Germans were seen in the cavity. Both sides exploded mines northwest of Hulluch today, but there was no infantry fighting.

The British successfully bombarded the positions of the enemy opposite Faquissart today, and British guns also silenced German trench-mertars in the vicinity of St. Eloi today.

T. A. Russell, representing the Russell Motor Company, made application to the York Township Council yesterday for favorable consideration of the application of his company for a fixed assessn 20 years on 30 acres of land and a big factory, which it is proposed to build immediately south ofg Dufferin street, on the outskirts of the Village of Weston, but wholly within the limits of the township. The first cost of the buil will be \$100,000, and from 250 to 300 mer

will be \$100.000, and from 250 to 300 men will be employed in the start. Mr. Russell asked for an assessment of \$60.000 for the first five years, \$90,000 for the second ten years, and \$120.000 for the second ten years, and \$120.000 for the remaining five. The company ask for a number of minor concessions in the matter of improved streets and sidewalks. Reeve Griffith and the members of coucil, while anxious to secure the industry, urged that the assessment ought to be raised. A conference between Mr. Russell and the council will be held on Thursday afternoon.

The splendid financial position of York Township was shown by the large number of tenders—15 in all—submitted for debentures amounting to \$68,875, and of which \$17,000 were in school and the balance in local improvement. The bonds draw interest at the rate of 5½ per cent. and run for 10 and 20 years. The Dominion Securities were the highest bidders at \$101.106, which was regarded by the reeve and council as satisfactory. Delay has occurred in the negotiations between the township and the Ontario Hydro-Electric Commission relative to the delivery of light and power thruout the township, and matters are now in a fair way for turning everything over to the Toronto Hydro-Electric, the latter delivering the current direct to the township without any outside interference.

WHEN OUR BUYER returned, just recently, from Japan, he brought with him a magnificent variety of quaintly shaped and peculiarly decorated fancy lanterns,

such as only the people of that country are capable of producing. We believe the collection includes the largest and the most extensive variety of original Japanese lanterns to be found anywhere in Canada.

And those who are planning a May fete or lawn party or who like to decorate the verandah, should avail themselves of the opportunity of choosing their decorations from this extensive assortment of Japanese lanterns. The surprising feature about them is, that they are exceptionally low priced. Those 7 inches high being 4c each and others in proportion up to size 36 inches at \$2.00 each. Madame O'Gorman Gives Graphic Picture of War and Its Horrors.

# IN FORESTERS' HALL

Disgrace for Rich Man at Close of War. Predicts Sir John Willison.

Introduced by Sir John Willison, Madame O'Gorman, who is here to plead the cause of the French hospitals, gave a most graphic picture of war and its horrors to the large and representative audience assembled in Foresters' Hall last evening. The chairman paid tribute to the high place France had always held in the esteem of the civilized world. The Red Cross of France, said Sir John, had been greatly assisted by the Secours National, under whose ausces the meeting of Madame O'Gor-an was being held. He appealed for financial aid and said that a man should be willing to give every dol-lar he could spare from the decent support of his family to help. The support of his family to help. The man who was rich at the dose of the

war would be disgraced.
"I have a sad story to tell tonight, said Madame O'Gorman, "and help to ask for hundreds and thousands of the

destitute children of France." covered for hundreds of miles with stretches of bleeding scars. Yet the people of France and the allies generally know that they are fighting for right and freedom and this is why they shall win.

Madame O'Gorman said that France unfortunately had driven out her religious orders, so that when the war broke out they had no nurses, none but orderlies. Now the nursing orders have come back and are coming back in hundreds. There are 6522 hospitals in France and the needs for these are beying count.

"It is sometimes said that hoxes of supplies are piled up at different places and are not used. Perhaps they are," said the speaker, "but I would sooner have hundreds so piled up than lack one when needed." At 48 hours' notice Madame O'Gor-man left London for Belgium in an-swer to an appeal for help. She took with her 20 trained nurses. At Antwerp the Belgian Government gave them a boys' school, where they estab-lished a hospital, and soon had six or seven hundred beds. She was present at the beginning of the siege.

## GOES TO ORILLIA IN INTERESTS OF HYDRO

Advantages of Linking Up With System.

Because Orillia will vote on May 22 on a bylaw to take hydro power. Sir Adam Beck will speak in the armories there on Wednesday evening.

The department of railways and canals, in building the Trent Valley Canal, found it necessary to destroy Orillia's plant at Ragged Rapids, In exchange, they promised to give the town all rights in a new dam at Swift Rapids, further down the Severn River, and to further down the Severn River, and to build a new power house.

Great Hopes for the Future.

The Hydro Commission now propose to pay Orillia \$228,000 for this right, and to take Orillia into the hydro circuit, arguing the benefits of co-operation and reduction of Orillia's debt of \$406,000 incurred on the present system. The hydro system would save the city between \$6000 and \$12,000, they say, becides saving the town from heavy additional cost of construction. Arthur Hawkes, in Mullin's Hall, Bloor

would go to supply 10 or 12 other mu-nicipalilies, relieving Orillia's financial burden.

government and the necessary legis-lation would be brought down at the

present session.

Replying to a question Judge Doher. ty, minister of justice, promised that some provision would be made for counsel to represent the opposition at the inquiry into the sale of small arms ammunition now in progress before Sir Charles Davidson. An announcement, he said, would be made in the The house then went into committee of supply on the proposed loan to the Canadian Northern Railway Sys-

Setback for Pugsley. Hon. William Pugsley moved an mendment that the government se-

cure an option on the road good for five years, at a price to be fixed by five years, at a price to be fixed by the governor-general-in-council, but Deputy Speaker Rhodes, who was in the chair, ruled the amendment out of order. No amendment could be entertained in committee of supply, he said, except an amendment to reduce the estimate or strike it out altogether.

R. B. Benrett (Calgary) then addressed the house at some length on the general railway situation. He said we had four large systems in this country. There was the government system of railways, which had been greatly extended in recent years. The greatly extended in recent years. The Laurier government he thought, was to be commended for extending the Intercolonial to Montreal, but was to be

censured for not acquiring the Canada Atlantic, so as to carry the Interco-lonial to Georgian Bay. Bennett Favors Receivership.
The Grand Trunk Railway System
of Canada, he said, extended from
Portland, Maine, to Chicago. The responsibility for it rested largely on the Portland, Maine, to Chicago. The responsibility for it rested largely on the statesmen of pre-confederation days. He was inclined to agree with the member for South York (W. F. Maclean), that it was difficult to deal with the Grand Trunk Pacific without at the Same time dealing with the Grand Trunk Pacific without at the same time dealing with the Grand Trunk Rallway. He could see no realieve the Grand Trunk of its commitments in respect to the Grand Trunk Pacific. On the other hand, it must be remembered that all the money invested in the Grand Trunk was British money and that upon \$100,000,000 invested in that enterprise not a central dever been returned in the way of dividends. We were now especially concerned with the other two systems, namely, the Grand Trunk Pacific and the Canadian Northern, and we had either to nationalize these two systems, give them further financial aid, or let them pass into the hands of the receivers. Personally he thought it would be a good thing to have a receiver ap-

ceivers. Personally he thought it would be a good thing to have a receiver ap-pointed for the Canadian Northern and the Grand Trunk as well. He was not frightened by the word "receiver." To Squeeze Out Water. Eighty per cent, of the American railways had at one time or another been in the hands of a receiver and at present one-seventh of all the mi-leage of the United States was under

court management,
Receiverships would be necessary, Mr. Bennett argued, if the water was to be squeezed out of the railway secu-rities. As to the Canadian Northern hond issues, \$208,000,000 were guaranteed by the Dominion and provincial governments. They would have to be taken care of, but he was unalterably opposed to the Dominion of Canada asuming responsibility for the securities mounting to \$147,000,000, which were

not guaranteed by any government.

By the same token, he was opposed By the same token, he was opposed to this government's assuming those issues of the Grand Trunk Pacific which the Grand Trunk Railway had guaranteed.

Cabinet Too Powerful. Mr. Bennett said he was utterly opposed to Mr. Pugsley's suggestion that anything should be paid to Mackenzie and Mann for their common stock. That stock, in his opinion, had no value whatever and would be entirely wiped out if a receiver was appointed and the system went into live live their and the system went into liquidation. He complained that the government had brought down the railway legislation in the dying days of the session. More and more in every British country the cabinet was becoming supreme and the private members reduced to mere automata. The caucus as a link

hetween the government and its sup-porters was not satisfactory. He, therefore, suggested that the commission about to be named by the government be appointed forthwith, and that as soon as its report was received, say in September, a special session of parliament be called to consider and deal with the railway situation. Mr. Bennett was not yet ready to say where he stood on the nationaliz-

and counter-proposals made by meni-liers of the opposition. He said in re-ply to Mr. Turniff that there was no danger of the Canadian Northern being able at any time to take the governable at any time to take the government by the throat. Under the legislation of 1914 the government had power at any time upon default to take possession of the Canadian Northern, put in a new board of directors and declare the mortgage foreclosed. All outstanding interests would be barred by that proceeding and the stockholders could only get what, if anything, parliament allowed them. There would be no advantages, therefore, in getting more of the common stock, and he understood all the stock held by Mackenzie and Mann had been hypothecated. Neither would it be adviable for the governor-general-incouncil to place any value on the 60 per cent. of stock not owned by the government and outstanding. It might turn out to have no value at all and turn out to have no value at all and it would be foolish to tie the hands of parliament in advance. Sir Thomas added that, for the government to take over the road by acquiring a majority. over the road by acquiring a majority of the stock at this time, would be to assume the burden of financing the enterprise and practically lead to the government assuming all the debts of the corporation.

Mr. Pugsley objected that the government was tiding the company over hard times. The stock might have great prospective value and the government would be held up for a big sum in case public opinion compelled the nationalization of all our railways

railways
Sir Thomas White said in reply that he was quite optimistic about the fu-ture of the road and therefore thought it would be a great misfortune to let the company collapse for want of some financing. While it was possible that we might sooner or later come to the nationaliation of our railways, he personally thought it would be a great undertaking even in normal times and was not to be thought of while the war was in progress. The member for South York had said we could simply possume the obligations of the various road, but there were the rights of the stockholders to be considered. The

Transfers Street Lighting Service to the Property Department.

When the question of the Queen street sewer came up at the board of control meeting yesterday morning, Controller Foster voiced strong op-position to it on the ground that it was position to it on the ground that it was a very large expenditure. Business people, he said, had made the necessary provision by installing syphons. Mayor Church asked if he wanted it left until after the war.

Commissioner Harris stated that if the present sewer, which was con-structed in 1884, was left, the board

structed in 1884, was left, the board would have to assume the responsibility. In answer to a question from Controller Thompson he said that the newer was in such a dilapidated condition that it was liable to fall down any minute, and that if it did it would the up traffic on Queen street.

Controller Foster was willing to take controller Foster the summer what the commissioner would not. Controller Foster the responsibility, but controller Thompson refused to assume what the commissioner would not. Controller Foster then suggested not. Controller Foster then suggest that the people should have the opportunity of saying whether or not

Mean Loss of Time Mr. Harris pointed out that it would mean loss of time and that the C.I.R. owned much of the land on the south side of Queen st. and that there was little chance of getting the thing thru on the initiative principle.

By a vote of three to one the board

By a vote of three to one the board favored the commissioner's report to lay the system of sewers on Queen street from Pape to Leslie, under section 9 of the Local Improvement Act.

The board formally decided to transfer the street lighting service to the administration of the property department and voted \$1350 to the department in connection with this work. partment in connection with this work.
Controller Cameron stated that he was opposed to sending carpenters to another city to act as strike breakers when the reports of the property commissioner regarding the civic employment bureau were considered. He also stated that he was opposed to sending any labor out of the city, as there was a scarcity here at the present time. He thought the labor bureau might well

The works committee's report to construct an asphalt pavement on Pacific avenue was adopted.

## ROYAL RECEPTION FOR KINGSTON ARTILLERYMEN

Mayor Presented Them With Cheque From the Citizens' Recruiting League.

The Royal Canadian Horse Artillery, comprising 200 men, were welcomed to the city at noon yesterday by a right royal reception at the city hall by the mayor and members of the city council and thousands of citizens. The men in the battery are nearly all natives of Toronto, who have been training in Kingston. The their train was almost two hours behind time, a very large crowd, members of the board of control. Lt. Col. Odell, officer commanding the batteries at Exhibition Camp, and a band and escort from the camp batteries, were on hand to welcome them.

High tribute was paid the work of the artillery in the present war by Mayor Church in welcoming the men. He trusted they would have a pleasant stay in the city, and handed to Capt. William Steacey of the battery a cheque for \$300 from the Toronto Citizens' Recruiting League. Captains Steacey and Ringwood replied and paid tribute to the city's generosity to soldiers. Lt.-Col. Odell also spoke.

The Modern Method is Most Successful in Treating Indigestion.

The old-fashioned methods of treat. ing indigestion and stomach troubles are being discarded. The trouble with the old-fashioned methods was that when the treatment was stopped the trouble returned in an aggravated form. The modern method of curing indigestion and other stomach troubles is to tone up the stomach to do nature's work. Every step toward recovery is step gained, not to be lost again. The recovery of the appetite, the disappearance of pain, the absence of gas -- are all steps on the road to health that those who have tried the tonic treatment remember distinctly. An international specialist whose articles on stomach trouble have been printed in nearly every language, recently stated that to treat the average case of stomach trouble, indigestion, dyspepsia, etc., by doctoring the stomach, killing the pain with opiates, or by the use of artificial aids to digestion such as pepsin and pancreatin, was just as foolish and useless as to attempt to put out a fire by throwing water on the smoke, instead of the fire. He claims, and facts seem to justify his claim, that nearly ninetenths of all stomach trouble is due to acidity and food fermentation; and that the only way in which to secure permanent relief is to get rid of the cause, i.e. to neutralize the acid and stop the fermentation. For this purpose he strongly recommends the plan now generally adopted thruout Europe of taking a teaspoonful of ordinary bisursted magnesia in a little water immediately after eating or wherever pain is feit. This immediately neutralizes the acid, stops the fermentation and permits the stomach to do its work in a normal manner and thus by removing the cause, enables nature to quickly restore the inflamed stomach lining to a perfectly healthy natural condition. For the convenience of travelers it may be noted that most druggists are now able to supply bisurated magnesia in 5 grain tablets, 2 or 3 of which will almost instantly relieve the most violent attacks of indigestion. A conference of great importance of the branches of the Patriotic Fund for Eastern Canada begins today and continues tomorrow and Thursday, in the Canadian Foresters' Hall, College street, city. This gathering is pro-bably the most important convened since the inception of the fund. The territory from which delegates will be drawn comprises Ontario, Quebec, as experience has shown to be the most crucial in the administration of

## Bureau of Research Recommendations.

1904 there has been a yearly deficit, which liberty and faith counted for and since 1909 it has increased steadily from \$31,000 to over a million. It example and leaves the honored memtain this fine record and have his realized what manhood owes to huterm of office distinguished by this feature. All succeeding mayors would have been compelled, by such a splendid example, to endeavor to live up to the motto of "pay as you go." The fatal inability to stick to a good policy long enough to make it a tradition, or the equally fatal ambition to pose as the author of a lower tax rate, led Mayor Church into the unwarrantable course of postponing payments and undertakings which should

sible for estimating the revenues and also for preparing the draft estimates of expenditure in co-operation with the heads of departments. This policy is commended by the Bureau of Research, and commends itself to good business judsment. The innovation will tend very properly to make the budgeting of the city more a matter of plain hard business management than a semi-sentimental oversight of not believe that a commissioner of what the controllers may think is good for the tax-payers. The only thing that is good for the tax-payers is the keeping of expenditures down to the practical minimum, and the careful expenditure of the revenues in the ably meant those who have property most thrifty way that can be con-

"Why should we adopt the gospel of despair by continually breaking off fragments of the city's work for administration by separate independent commissions instead of soing to the root of the trouble by performing our duty to make every local legislative, executive, and administrative body or official non-partisan and independent of any influences looking to the elfare of special interests rather than to the welfare of the city?" This view is that commissions should be of an investigative and advisory character and not executive. This falls in with our own frequently portation commission will be able to Toronto. recommend a solution of the city's traffic problems, and believes that the new street railway system should be managed as at present under one responsible head. The principle is summed up as follows:

"If all commissioners or other heads of city departments were made as secure from undue interference in the administration of their departments as independent commissions customarily are, what need, in many cases, would there be for commissions? It is easier to fix responsibility on one man than on five, and it is just as easy

to make one man independent of outside influences as five."

On the other hand, the report goe on, the mobilization for the city's service of the special skill, training or experience of its private citizens, thr is only in its infancy and should be creatly extended in the near future. As transportation is the most vita problem in the city's affairs it will be well to consider carefully the respon-

sibility laid upon the new commission entrusted with the study of the situation. There is no other question in civilife which does not depend more or which the transportation problem is solved. Taxation, city-planning, housing, charity, education, labor and all the problems that cluster around these matters are vitally associated with a proper settlement of our civic transportation policy.

Soldier, Scholar, Gentleman

Not the least tragic feature of war in which there is so much of tragedy is the taking off of the brightest, the most promising, the flower of the rising generation. If only the older men could go and leave the brainy and progressive juniors to carry on the work of the great world! In the death of Professor Kylie, who has succumbed to typhoid fever as captain and adjutant of the 147th Battalion, Canada has lost one of a type which it can ill afford to spare. No Occupation or Home. Sir Roger, who is one of the most famous prisoners arraigned since the outbreak of the the war, was described as having no occupation and no fixed place of abode. Bailey was described as a soldier.

The charge against defendants was that they did on divers occasions between November, 1911, and April 21, 1916, unlawfully, maliciously and traitorously commit high treason within and without the realm of England, in contempt of our Sovereign Lord King and his laws, to the evil example of others and in like case contrary to the due allegiance of the said defendants."

The prisoners, especially Sir Roger, seemed to be in excellent health and spirits. They were escorted to the court from the Tower of London under a military escort. The trip was made secretly by taxicab in order to prevent any untoward demonstration in the streets. There was accommodation for the streets. tion for only about 60 spectators in the court, but despite the limited space a great crowd clamored for admission, and the police on duty out-side the court had a difficult time in restraining them. As early as 1 o'clock this morning two women headed the line-up, while by 6 o'clock there was a large crowd. The police provided women in the crowd

with coffee.
Casement's Friends Present. Among the earliest arrivals in the court was Sir Horace Plunkett of the department of agriculture, Ire-land. He took a seat near the magis-

court room. Tampered With Irish. In opening the case for the crown, the attorney-general charged that Casement had conducted a systematic campaign among the Irish prisoners in Germany with the purpose of ducing them from their allegiance. Bailey, he said, had been seduced in this manner, and had made a statement explaining Casement's actions in detail.

According to the attorney-general, Bailey was born in Dublin, and joined the Royal Irish Rifles in 1904. He served with his regiment in India and was honorably discharged. On the outbreak of the European was ley was called out as a reservist and sailed with the original expedi-

tionary force to France. He was taken prisoner in September, 1914.

Spoke at Limburg Camp.

The attorney-general said that Balley had related how a large number of Irish prisoners had been collected from various prisoners in Germany and placed in a large camp at Limburg. Here they heard addresses by Casement, who tried to inflame their minds against the British Government and persuade them to break their oaths of allegiance and support him in his projected expedition

Bailey declared he had joined an Irish brigade to "see if it was possible to get out of Germany." visiting the German war office Bailey was told to be ready to travel. He was taken aboard the submarine U-19 which set out from German waters.

"Upon sighting Tralee, Ireland, I was told that the visit was in connection with the Irish volunteer movement," said Bailey's statement. "As the submarine neared the coast, Sir Roger Casement and myself were transferred to a collapsible boat which overturned in the surf. I waded ashore and ther went back to fetch arms. Sir Roger and myself then reached Tralee, where able to seduce from allegiance to the King the Irish prisoners at Limburg camp, whom he addressed and lectured. The evidence shows that in January and February of 1915 Casement repeat-

edly addressed these prisoners."

"Casement's conduct required a great deal to justify it. At the Limburg camp Casement introduced himself as organizer of the Irish Volunteers. the war the German Government would give each man £10 to £20 and would give each man £10 to £20 and free passage to America.

"This is the plan conceived in 1915," said the attorney-general, "by the man who in 1911 was begging Sir Edward Grey to convey his deep appreciation to the King for the honor of knighthood which had just been conferred on him."

Prisoners Contemptuous.
Sir Frederick said that the Irish prisoners treated the overtures of Sir Roger very contemptuously. The Irish knight was hissed and booed out of the camp, the Munster Fusiliers being par-ticularly resentful. "It is reported that ticularly resentful. "It is reported that Casement was only saved from violence by the intervention of the Prussian guards," said the attorney-general. Sir Roger smiled as he heard this and glanced at Eailey.

When the attorney-general declared that one of the Irish prisoners had struck Casement in the face on being asked to join the brigade, Casement smiled disdainfully and pulled at his beard in evident amusement.

Punished Refusers.

Sir Frederick continued: "The Irish prisoners who refused the proposals

prisoners who refused the proposals and their rations reduced. The few who accepted were given certain pri-vileges and provided with green uni-

forms. Bailey was one of them. He was made an officer." Sir Frederick followed the story of Casement's alleged machinations in Berlin with details of his trip by submarine to Tralee,, where he land ed on Good Friday with Bailey and a third man named Monteith, who is still at large. He also told of the sending of a ship with 20,000 rifles from Germany to Tralee and of how this ship was sunk at Tralee and the

crew was captured.
The attorney-general said Case men was found concealed in what is known locally as McKinna's Fort. He gave the name of Richard Morton of Buckinghamshire, and his occupa-tion as an author. He was seen to drop a paper which contained a code, including the following: "Await including the following: "Await further instructions, Have decided to stay. Produces Rebel Flag.

The attorney-general here introduced a dramatic touch by having brought into the court the green rebel flag, which he said Casement had brought from Germany to Ireland. For a moment the prisoner sat with eyes fixed on the floor, refusing to look at this emblem of the rebellion. Then he glanced up at the flag and smiled derisively.

Prisoners Coerced.

John Cronin of Cork, formerly a private of the Munster Fusiliers, corroborated Robinson. He said the prisoners had been treated badly before Casement began his work, but that subsequently the Germans were more considerate. He said, however, that those who declined to join the Irish brigade "had their bread knocked off." Court then adjourned for lunch.

then adjourned for lunch.
According to testimony given this afternoon by Daniel O'Brien, another Irish prisoner, who was at Limburg during Casement's visits and who af terwards was exchanged, Casement was hissed and hooted out of the Limburg camp. Some members of a Mun-ster regiment struck Sir Roger, and several prisoners, including O'Brien were punished for it, their rations be-

ing cut down.
Several other witnesses were brought forward by the prosecution during the afternoon. Their testimony was corroborative of that which had been

ment in Germany.

The court-room was as crowded in the afternoon as during the morning. Almost as soon as the adjournment was taken for lunch, a new line of men and women gathered outside the building and waited patiently in the building and waited patiently in the hope of gaining entrance. When Sir Roger took his place in the dock it was evident that any nervousness he may have felt had largely worn off.

Displays Self-Esteem.

The Casement of old. whose large amount of self-esteem was a marked feature, was reasserting himself. His spirits were not dampened even by his wrinkled sack suit, which looks as the head slept in it in the fower, or

the had slept in it in the tower, or by the unlaced shees which are pro-vided for prisoners of his class to prevent them from using the laces to narm themselves. In his evidence Daniel O'Brien said that after Casement left Limburg, re-cruiting for the Irish brigade was car-ried on by each state.

APPELLATE COURT

Decides Roy Dies Was Not to Blame for Motor Car Collision.

A 12-foot lane between King and Pearl streets, east of York and west of the North American Life Building, was the subject of a case heard in Osgoode Hall yesterday afternoon by Justice Middleton, who will decide whether it is a public horofare or not. A judgment delivered by the late Justice Gwynne, in 1877, in the action of Hughes Bros. against the United Empire Club, declared the lane a public one.

The Baldwin estate, represented by E. D. Armour, K.C., and J. W. Carrick, is the plaintiff in the case against Dan-K.C., John McLean and George W. Verral. The plaintiffs, contending they are not bound by the earlier decision seek to close the lane.

Early wills and title deeds, entered as exhibits, formed a part of the evid

Mrs. Hendrie has arrived in town from Hamilton and is staying at Government House with His Honor the Lieutenant-Governor and Lady Hendrie.

Saturday will be the opening day of the Ontario Jockey Club races, which will be hailed as a great relief from the indoor work that has been occupying the women all winter; the sun and breezes down on the members' lawn at the Woodbine will blow away all the fluffs and a week outdoors will be thoroly enjoyed. Mr. George Beardmore has horses in training for the meeting, a new departure for the popular M.F.H. Mr. and Mrs. Andrew Allan will be at Chudleigh for race week and two dinners are on the tapis, one on Saturday and the other on Victoria Day. The smartest establishment in Toronto is very busy, gowns having absolutely arrived at the stage where they are too out of date to wear any longer, so that everything will harmonize with the fresh green of the lovely lawns and exquisite flowers with which they are surrounded. All sorts of things are being planned for next week and a great many people will be in town for the racing.

Mrs. George Heintzman, who accompanied her daughter, Miss Ione Heintzman, to New York on her way to England, is expected home today.

Miss Julia O'Sullivan gave a very charming musicale on Sunday afternoon. The young artist, who received with her mother wore a frock of flowered pompadour silk, Mrs. O'Sullivan being in black satin and lace. The very enjoyable program was presented by the hostess, Mr. Rudolf Larsen and Miss Lisa Garden and Mr. Paul Wells. Mrs. Edward Fisher and Mrs. Roscoe Graham poured out tea at a table most attractive with yellow tulips and tulle. Among those present were: Mme.Rochereau de la Sabliere, Mrs. Moss, Prof. and Mme. Hambourg. Miss Ethel Shepherd, Mr. and Mrs. Welsman, Miss Van Buskirk, Mr. and Mrs. Frank Blachford, Mr. Vogt, Mr. Ernest Seitz, Miss Mary Morley, Miss Ritchie, Mr. and Mrs. Frank Smith, Miss Rona Bates, Mr. and Mrs. Von Kunits, Miss Rachelle Copeland, Mr. Claude Fox and Mr. John J. Feature of Performance Was Dancing of Miss Dagmar Printz.

Toronto's amateur theatrical talent attained another high standard last night, when bits of professional acting, comedy, songs and artistic dancing won the applause time and again of a large firstnight audience during the initial production of the musical comedy, "Talk, Talk, Talk," at the Grand Theatre.

Proceeds from the show, which will be staged each night this week and two matinees, on Wednesday and Saturday afternoons, will go for recruiting purposes.

Another feature was that every soldier must be registered with the association as belonging to a particular unit, and his desire to play any one or several sports was recorded at the same time.

If it be borne in mind that the figures quoted above concern one military district alone, truly the figures for all Canada, if they were obtainable, would prove gratifying to lovers of sport everywhere. They would surely uphold the contention of sportsmen in this country that our national pastimes are worthy of all praise as a means of developing the virility of Canadian manhood. We doubt very much if any country anywhere, not even excepting the motherland, can show results comparable to these.

All Acts Are of Unusual Merit and Chaplin's "Floorwalker" is Very Funny.

No act at Loew's this week stand pre-eminent, as all are of unusual merit. The dance feature by "Grey and Old Rose" drew much applause. Louis Stone has something novel in the dancing line. He dances in almost any position he can as-sume—with his feet in the air, on his back, and in a variety of other postures. Smith and Kaufman are two clever come-dians and are good singers as well. Over-holt and Young Sisters, in a singing and holt and Young Sisters, in a singing and dancing actrsing some tuneful songs and dance gracefully. Other numbers are: Arthur Rigby, the colored comedian; Judge and Gail, trapeze artists, and Ernest W. Cortest in an interesting playlet. Charlie Chaplin, in the "Floorwalker," is the funniest picture shown here for some time. The bill was presented yesterday to crowded houses in both the theatre and Winter Garden.

# Soccer Football Gains Popularity Thruout Cities of United States

NEW YORK, May 13.—The rapid growth of soccer football thruout the States is further proved by some interesting figures just given out by the secretary of the United States Football Association. The National Challenge Cup competition, which concluded last Saturday, attracted the large number of 66,692 people to the ties, including the qualifying round to the final, against 52,934, who attended last season. The sum of \$16,742.97 was taken at the turn-stiles, which shows an increase of \$31.99.62 Association's percentage from the gate receipts shows a welcome increase of \$467.41 over last season, \$1955.21 being The National Challenge Cup competition for 1915-16 was a pronounced success. Athletics Had One Big Inning-Two for the Naps Over the Yankees.

At Philadelphia (American)—Eddie Plank pitched against Philadelphia, his former club yesterday, for the first time in his career, and the home team defeated St. Louis, 5 to 4. Plank was in excellent form until the seventh inning when singles by Lajole and Stellbauer, Pick going to first on being hit, Schang's triple, and a passed ball sent four runners home and won the game. The score:

At New York.—Cleveland made it two straight from New York here yesterday. Winning by a score of 6 to 4. Cliff Markle was knocked out of the box in three innings, and lost his first game since he came to the New York Club last September. Caldwell, who succeeded Markle, was ordered off the field in the seventh inning. Baker made his second home run of the season. Score:

# WOODBINE GOSSIP

The all night rain left the Woodbine a sea of mud for the horses yesterday morning, and it was still raining when the time for the trials arrived. The Seagram horses, probably anticipating sloppy going on Saturday, accepted conditions, and Mandarin galloped a mile outside the dogs in 1.50 2-5. Phillistine went three quarters in 1.26, Sweet Colleen and Dehaven went a half in 57, Late Hours, a nice mile in 1.54 3-5. NEW YORK, May 15.—Racing, a well-known sport around this city, will come back for its annual visit this week at Jamaica, on Thursday. This course is a kite-shaped affair, where every move of a race can be seen.

It will be a better season than any since 1908, but 'twill not be a return to the old, seething whirl of the ring days. The men who have fortunes invested in racing will see that affairs are conducted strictly within the letter of the law. They have to adopt this course, for only under these conditions will the game be permitted to last.

There is no disguising the fact that those who love to hear the patter of iron hoofs tearing down the wide stretches also enjoy wagering on their choices. That is human nature. The legislature decided eight years ago that public bet-

# Columbia Stroke Blew Penn Splashed Badly

New York Herald: Columbia was not the Gem of the Ocean, nor was it the Gem of the Schuylkill River, in the annual regatta, which is called the American Henley. The boys from New York City had been picked by most of the experts to win the race for the Childs Cup, which is one of the most sought for trophies in the collegiate world.

Princeton was the victor, and therein lies more or less of a smile on the professional coaches. This is the first really big race that the Tigers have won, in spite of the fact that they have been able to beat other crews in dual meets. Against the eight that was coached by Professor Spaeth of the English department at Princeton, were eights trained by Dick Glendon, Jim Rice and Joe Wright, all experts with the sweeps and in the methods of teaching the application of them.

In this race the Tigers surprised not only the experts, but the thousands who lined the banks, when they went out into the front, almost at the crack of the gun, and never came back for an inch.. At the quarter-mile mark Columbia was out in the lead and looked as if it was going to live up to all the predictions that had been made. Something happened in the boat from New York, tho, and you could

Belief in Improvement by General Rains Causes Sagging Market.

PROVISIONS ADVANCE

Heavy Selling of Lard Follows, Largely Wiping Out Gains,

CHICAGO, May 15.—Notwithstanding that Kansas reports of damage by Hes-sian fly caused advances today in the price of wheat, the market afterward price of wheat, the market afterward sagged heavily, owing to seeming spread of belief that the crop outlook as a whole had been substantially improved by general rains. The market closed unsettled, %0 to 1c net lower, with July at \$1.16% and September \$1.16½. Corn lost %c to %c, and oats a shade to 1½c. In provisions, the outcome varied from 7½c decline to a rise of 10c.

It was not until the last half of the session that bearish sentiment regarding wheat became manifestly predominant. The market soon scored a moderate upturn, however, influenced by despatches from Salina, Kansas, where a leading Chicago crop expert said Hessian fly injury was so bad that grain men were predicting only half a crop at best.

In the late trading a majority of dealers gradually changed to the selling side of the wheat market, regardless of the Hessian fly reports.

J. P. Bickell & Co., Standard Bank Building, report the following prices on the Chicago Board of Trade: Hessian fly reports.
Corn swayed with wheat.
Oats, like wheat, were said to have received much benefit from the general

rains.

Hogs at the highest prices for six years brought about a bulge in provisions. Heavy selling of lard followed, and the gains were largely wiped out. CONTROL CROP REPORTS.

CHICAGO, May 15.—Officials of the Chicago Board of Trade propose hereafter to exercise a complete control over so-called crop reports. J. P. Griffen, president, announced that all reports sent in by crop experts are being carefully tabulated. "Later, if it is demonstrated that any of these so-called experts are unreliable, members of this exchange will be forbidden thereafter to distribute the reports," Mr. Griffen said.

WINNIPEG GRAIN MARKET.

WINNIPEG, May 15.—Wheat fell off %c for May and July and ½c for October on the local wheat market today. Oats gained %c in May and July, and dropped %c in October. Barley was unchanged, but flax gained 2½c for May and 2%c for July and October. The market weakened a lot today on he report of rain in Kansas and the enefit to the crops there.

Export buyers bought sparingly. Cash lemand was fair.

More Sales Made at Nine Dollars and Over Than at Any Time in History.

AT UNION STOCK YARDS

Calves, Sheep and Lambs Were Firm at Last Week's Quotations.

Receipts of live stock at the Union Stock Yards on Monday since Saturday norning were 213 carloads-4204 cattle. 1759 hogs, 79 sheep, 495 calves and 14

Butchers' Cattle.-Receipts were largest of the season thus far, fully 4000 having arrived since Saturday. There were many of good to choice quality among them, and more sales made at and over \$9 than at any time in the history of the Toronto market. The high price of the day was for a load of cattle brought in by John Black of Belwood, Ont., weighing 1500 lbs., and sold by John Black of Rice & Whaley at \$9.75 to the Swift Canadian Company. The next high price was for a load of cattle brought on the market by Urban Schmidt of Mildmay, and sold by McDonald & Halligan at \$9.45 to the Swift Canadian Company. This firm also sold one load at \$9.25, two loads at \$9.20, one load at \$9.15, and five loads of choice butchers at \$9.10.

Dunn & Levack were another firm that among them, and more sales made at

\$9.15, and five loads of choice butchers at \$9.10.

Dunn & Levack were another firm that had many choice cattle among their 28 carloads, that were consigned to them by their many clients. Out of the 28 carloads, they sold 13 cars, containing 236 choice cattle, at \$9 per cwt., something that they never accomplished before yesterday. See their sales given below. Many of the other firms sold cattle at \$9 and over, among them being H. P. Kennedy, Sam Hisey and A. B. Quinn. Stockers and Feeders.—These were in demand at very firm values, in sympathy with high figures paid for fat cattle, as high as \$8.50 being paid for some choice short-keep feeders. A. B. Quinn sold one load of feeders, \$00 to 900 lbs., at \$5 to \$8.50, showing the strength of the stockers and feeders.

Milkers and Springers.—This section of the market only had a limited supply, which sold readily at \$60 to \$100 each, and more would have been taken had they been here.

Calves, sheep and lambs were firm at last week's quotations.

Hogs.—The packers were quoting \$10.65

Market Notes.

Urban Schmidt of Mildmay, Ont., was on the market with a very choice load of steers, 1280 lbs, each, which were sold by McDonald & Halligan at \$9.45 per cwt., the second highest price yet paid this season. Fourteen of these were fed by Beitz Bros., well known as good feeders of cattle in the township of Carrick.

E. Watson of Blyth, one of the old-time drovers, was on the market with a drove of 65 choice cattle, which sold at last week's values.

William Snell of Exeter brought in a choice load of steers, which sold at a choice price, and he went home well pleased.

A. Paul was another man who had a choice load of cattle, weighing 1150 lbs., which were bought by the Harris Abattoir at \$9.25. Mr. Paul comes from St. Mary's district: he, too, went home well pleased with his sale.

J. P. Allison, an old-time farmer and cattle dealer, was a visitor on the market. He is now the postmaster at Moffat, Ont.

For leaders the market had such old-

points.

Mexicans were backward at first on the conflicting character of the news from that country, but came forward briskly later; Petroleum gaining over 4 points, with 3 for Texas Co.

For a time Zinc shares were the only features of the metal division, but coppers were in fair demand during the afternoon at moderate advances. U. S. Industrial Alcohol was foremost of the miscellaneous issues, its total gain of 7½ being attended by a revival of the old rumor of a "meion cutting." Shipping stocks were irregular, Mercantile Marine preferred being under pressure, while United Fruit was in steady demand at higher quotations.

Enquiry for rails embraced issues of high and low degree, the coalers being especially active with gains of 1 to 3 points for Canadian Pacific, Illinois Central, Chicago and Northwestern, St. Paul and Baltimore & Ohio. Rock Island, Iowa Central and some low-priced southwestern railways were in moderate demand. Final prices were lower by fractions to a point. Total sales amounted to 390,000 shares.

Bonds were firm, but dealings were featureless aside from the heavy trading in Anglo-French 5's. Total sales (par value) \$3,760,000.

bulls 25c per 100. Six steers, weighing 1400 pounds each, were sold at \$10 per 100, the highest price ever paid in the history of the trade here for ordinary choice steers at this season of the year. Hogs were stronger, prices showing an advance of 10c to 15c per 100 pounds. Packers bought freely. Selected lots brought \$12.10 to \$12.35; rough selects, \$11.90 to \$12; sows, \$10 to \$10.35, and stags, \$5.95 to \$6.15 per 100, weighed off cars. than sufficient to supply orders, and

For the purpose of securing capital with which to develop the Sovereign Porcupine mine an issue of stock of 200,000 shares is being made by F. C. Sutherland & Co., members of the Standard Stock Exchange. The Sov-ereign is one of the properties still undeveloped in the Porcupine region and is particularly well located, being adjacent to the Hollinger Consolidated, and is particularly well located, being adjacent to the Hollinger Consolidated, Vipond and Triumph.

Some work has been done on the Sovereign—about five thousand feet of stripping and trenching—which has laid bare some very promising veins, samples taken from which assayed very high. It is generally believed that with aggressive development the Sovereign will become one of the big producers of the yellow metal. Under an efficient board of directors and with a capable engineer in charge the Sovereign will be given a good opportunity to prove its worth as a gold mine.

passed its former best price by 3½ points, selling at 83½ and closing 82%, or 3% up. Buying of Power assumed large proportions, considering its high price, upwards of 2600 shares changing hands, while dealings in Cedars were about 2500. The strength of Cedars was viewed with interest, as it appeared to indicate a reversion to the market idea that the amalgamation would be on the basis of 300 for Power and par for Cedars.

Brazilian was up 1 to 55, and Detroit and Canada Steamship preferred finished with a gain of %.

Smelters continued active and early in the day made up about a point of its late loss on Saturday, selling at 43½, but closed 42½.

POWER STOCKS GAIN ON

MONTREAL EXCHANGE MONTREAL, May 15.-Impressive strength in the stocks of the local power group was the outstanding feature of the market for securities here today. Heavy buying of both Montreal Power and Cedars Rapids continued to the close. The former rose 2% points above its previous high record level to 248% and closed at the best with a net gain of 4%. Cedars passed its former best price by 31/4 points.

less than 8 times those of 1914 and twice those of 1913. Meantime the earnings of Nova Scotia Steel were five times those of 1914, and nearly twice those of 1913. Both these companies embraced in the period covered in the reports the opening months of last year, which were very quiet as far as the steel trade was concerned. The Dominion Steel's year did commence until the beginning of the second quarter, and included the first quarter of this year, the banner period probably in the history of the stee industry in this country. Consequently it is anticipated that the record should be at least rivalled. It is figured that if the 1914-15 figures were doubled in the year just passed. corporation must have earned close to 15 per cent, on its common stock.

The market at the Standard Stock schange was strong in tone yester-y and fairly active. McIntyre was tstanding feature, selling up to high at 151, an advance of an new high at 161, an advance of an ten ten points from the high of Saturday. Hollinger, West Dome Consolited and Timiskaming were also tronger and active. Business was we distributed and transactions for the day amounted to 162,959 shares. The attention of speculators and investors all over the country is being drawn to the local market by reason of the rapid upward movement in Mcintyre. This stock started only a very short time ago from 96, and yesterday eached 151, with the trend of the stock will upwards.

sached 151, with the trend of the stock till upwards.

Silver reacted slightly again, which had a quieting effect on the Cobalts, with the exception of Timiskaming.

In the Porcupines Dome Extension opened at 35 and closed a little better at 25%. New York has been a big eller of this stock lately, which may explain its heaviness at the local explain its heaving in a lot of short towering. Big Dome was strong, odd of selling up to \$29.00. Hollinger eld around \$30.00 all day. The fact hat Hollinger annual meeting was being held yesterday seemed to have but little influence on the stock.

Around McIntyre centred the big interest. The stock opened at 143, rejected to 141 and then shot up 10 points to 151, closing almost at the top at 150. The advance in the stock is Maging in a lot of investment buying. Verification of the recent reports of onds on this property is being releved, and it looks as if McIntyre will be one of the big mines of Portugine.

west Dome Consolidated came in for insiderable activity, opening at ?8 and, after easing off a little, sold up to 14. Developments on West Dome re shaping up well, and the stock has rance of becoming a public

laworite.

In the Cobalts, Timiskaming was fairly active, opening at 74 and reacting to 72½. A buying movement set in towards the close, which carried the stock up to the opening price, where it closed strong. The weaker tendency of the silver market has caused considerable liquidation in Timiskaming, but well-informed brokers are anticipating a sensational movement in the stack exchange.

A there was moderate activity in Pete

The St. Maurice Mines Co, Ltd., with a capital of \$490,900, has been incorporated under Quebec patent laws to prospect and exploit mines in the Counties of Montcalm, Pontiac, and in the Timiskaming and also in the Abitibi region. The promoters of the company are: Messrs. Albert Edward Turner of London, Eng., dealer; W. E. Simpson of Grantown-on-Spey, Scotland, enginer; Daniel E. Moran of New York engineer; A. E. Doucet, C. E., and George Belleau, bank inspector, of Quebec. The head office of the company will be Quebec City.

Yealed a five-foot vein of \$17 ore at a depth of over 500 feet. When it is remembered that these developments are the result of only a comparatively few weeks' work the progress of West Dome is surely to be regarded as remarkable.

"West Dome Consolidated will not be in the dividend-paying class for some time to come, but it will soon be a regular producer, and at these prices the stock is one of the cheapest mines on the list. As a semi-speculative purchase West Dome Consolidated could not be bettered, and we strongly advise its purchase."

The annual meeting of the McIntyre Mines will be held in this city on Friday, May 26, at which a complete recital of the recent spectacular discoveries made at depth will be given. The remarkable market advance in this security is significant, and conservative engineers who are in close touch with engineers who are in close touch with what is actually occurring at the mine declare McIntyre a second Hollinger.

Mocatta & Goldsmid of London, England, say with regard to the silver market: Such an advance as we have had, of 6d per ounce, since the 14th of March, is almost unprecedented and can only be accounted for by the almost universal demand for silver coinage and at the same time a diminished supply, for which the troubles in Mexagenia. age and at the same time a diminished supply, for which the troubles in Mexico are partly responsible. No doubt in normal times these quotations would have produced sellers for forward delivery, both speculative and otherwise, but in the absence of any "forward" quotation, this has been impossible, and the market has been dependent on atoms supplies which are by no means atcual supplies, which are by no means over plantiful.

This compares thus with preceding months:

a vein of a width of seven feet was uncovered in the south cross-cut, and assays proved an average value of over \$7 to the ton. # RICHEST GOLD MINE IN THE WORLD THE NOW FAMOUS HOLLINGER CONSOLIDATED

To gain a stock-ownership in a property adjoining the Hollinger Consolidated, now acknowledged as the richest gold mine in the world, is the basic reason for making a mining investment which practically assures an exceptionally large profit-return. Every investment made in Hollinger has proven highly lucrative, and after a careful and thorough analysis we believe

SOVEREIGN PORCUPINE MINES, LIMITED,

has a most excellent chance of developing large and important

ore bodies and SHOULD PROVE TO BE THE SENSATION OF THE YEAR. The basic factors in this Company, which bespeak a remarkably prosperous future and make this offering one of the

most attractive to the Investing Public, are: SOVEREIGN OWNS ITS 160 ACRES OUTRIGHT. THESE SITUATED WITHIN THE PROVEN RICHEST

MINERALIZED ZONE. NO COMPANY INDEBTEDNESS WHATEVER.

ITS CAPITALIZATION IS THE SMALLEST IN PORCUPINE. GOVERNED BY AN EFFICIENT BOARD OF DIRECTORS. PRODUCING GOLD MINES SURROUND SOVEREIGN HOLDINGS.

The principal holdings of the Company are surrounded ON THE NORTH BY THE HOLLINGER CONSOLIDATED; ON THE WEST BY PORCUPINE VIPOND, and ON THE EAST BY THE TRIUMPH MINES (SUCCESS). Another of its 40-acre holdings adjoins the famous Davidson property, which is absolutely proven to considerable depth as a gold mine. The remaining 80 acres are situated in the Hollinger section of Porcupine.

HIGH GRADE VEINS PROVEN ON ITS PROPERTIES. In a total of 5000 feet of surface development workstripping and trenching—several veins of substantial width have been exposed and high assays in gold obtained. Engineers of reliability, with reasonable certainty agree all required to quickly bring the SOVEREIGN PORCUPINE PROPERTIES to the producing stage is intelligent and aggressive development

work. Arrangements for this important work to begin have now ENERGETIC DEVELOPMENT STARTS FORTHWITH.

AUTHORIZED CAPITALIZATION OF \$1,000,000. (Par Value of shares \$1.00 each)

650,000 SHARES IN COMPANY'S TREASURY.

A LIMITED AMOUNT AT 35 CENTS PER SHARE NOW OFFERED FOR PUBLIC SUBSCRIPTION.

This offering consists of 200,000 shares and the proceeds will be devoted to treasury purposes. The location of the SOVEREIGN PORCUPINE PROPERTIES is all that can be desired as regards their mine-making potentialities. As a matter of fact HOLLINGER CONSOLIDATED now has one of its main shafts sunk to the 400-foot level within 150 feet of the North-West line of one of the Company's properties, while TRIUMPH MINES to the East, are reported to be driving on a high grade vein, 10 feet wide, at the 200-foot level which, it is believed, will run direct into SOVEREIGN PORCUPINE. As underground work continues on PORCUPINE VIPOND, we are advised, the rich DAVIDSON vein is heading towards SOVER. EIGN PORCUPINE HOLDINGS, and may yet become one of the branches to the main vein system, reasonably sure to be revealed upon a limited amount of development work. Those conversant with actual conditions in this section of Porcupine

AT THIRTY-FIVE CENTS PER SHARE SOVEREIGN PORCUPINE IS AN EXCELLENT SPECULATIVE INVESTMENT.

The Board of Directors include G. C. Crean, President, President of the G. C. Crean Hat Mnfg. Co'y.; A. C. Thompson, Vice-President, President of Thompson & Sutherland, wholesale hardware, and W. J. McCormack, Capitalist. An engineer of the highest standing is to have charge of mine operations, and in view of the foregoing facts, as well as the excellence of this offering at such a ridiculously low price, we believe it would

WIRE RESERVATIONS IN SOVEREIGN AT ONCE This limited offering will likely be oversubscribed within the next few days. Already we have received enquiries direct from the miners working at the surrounding mines, as to price of stock and the time of offering in SOVEREIGN PORCUPINE. Under Mr. Carvell's cross-examina-tion, Col. Lafferty divulged the information that the price of \$8.44 for the shells was based on the cost of \$5.53 per shell when made at the Dominion Arsenal. Mr. Carvell asked witness if it did not occur to him that the price of \$8.44 asked by the manufacturers of these shells was too high.

"I think they were taking great chances at that price," the arsenal su-perintendent answered. He said he was as much responsible for paying. \$8.44 for shells as any other member of the shell committee, and General Pease agreed with him that on a first small order the price per shell was low. He could not remember the shell com-

Witness admitted that until the subcommittee was appointed in septem-ber, 1915, Cols. Carnegie and Bertram conducted practically all the finances of the committee, but, pressed by the Liberal party's counsel, he could not remember that he had been consulted as to what prices ought to be paid for the various munitions and parts for which the committee contracted.

Mr. Carvell: Did it ever occur to you that the four manufacturing mem-bers of the shell committee were getting in a different position in relation to these contracts as directors of contracts and were entitled to make

money themselves?

Col. Lafferty: I never saw the situation in that light, and never appreciated such a change. Witness, when further questioned naintained that he never heard any of the members express the sentiment that they were entitled to any profits Problem of Manufacture,

In cross-examination Mr. Carvell asked witness if he ever had any explanation of why, if all profits were to go to the war office, the second contract between Sir Sam Hughes and the four manufacturing members was drawn up.

Col. Benson said he had never had any explanation.

In pursuing the question of prices on contracts Mr. Carvell took up the price paid for component parts of shells in May, 1915, to the Nova Scotia Steel Company, Mr. Hellmuth objected on the ground that the contract was not under discussion. DEAR ANNIE LAURIE: Please read me a lecture on my ocial duties as a young man of 26, particularly toward the girls of my acquaintance. From time to time one or another of them says for me to "come up and see her some evening—any time." C. T. Y .- The "social duties" of any -no matter whether he is 26 or imply depend upon the sort of 62-simply depend upon the sort riends he likes, and how many of them he wishes to have. It isn't always the man who can "keep up a running fire of small talk" who is really the most entertaining. It often happens that just this sort of man you describe is one who is really boring, and who leaves the person upon whom he has been calling, wondering how he can talk so much and so fast.

Nor should you worry because you say only the things you mean, and telephone or call upon a girl only when you have something particular to say. If you are a nice, likeable chap, you may be very sure that whatever shortcomings you may have in a conversa tional way are amply made up for by the real things you have to offer.

One Cent Tickets Will Apply to Fifteen Cent Admissions.

"MOVIES" BENEFIT

First Day of Tax Collection Goes Thru Without a Hitch.

The provincial amusement tax has been lowered so that one cent amusement tax tickets will apply to 15c admissions. By previous arrangement admission tickets costing 10c or less called for one cent tickets and amounts above that up to 50c called for 2c tax tickets. The change was made yesterday, the first day of the tax collection. The treasury department felt that the jump was too great between 1c tax on 10c tickets and 2c tax on 15c' tickets. This appeared disproportionate.

The convenience of the patrons and proprietors of moving picture houses was the other reason for the change. It was noticed that many moving picture theatres charged 10c in the afternoon and 15c at night; that others charged 10c all the week except dur-ing the rush hours on Saturday night, while others charged 10c and 15c for seats thruout the week. He had a holiday, met old friends, won his case and got a lot of free advertising all at once. Walthall looks very well and speaks highly of his treatment by the Essanay management.

Mabel of the deep, dark, soulful eyes is tired of slapstick comedy. She is weary of being cast into swift running waters and thrown under the grinding wheels of automobiles. What Miss Normand wants is to play in comedy dramas—something with a dramatic element and a serious side. In her newly signed contract she is

TORONTO YESTERDAY Five Downtown Theatres Played to Capacity With the Funny

Man as Star. Until yesterday Billy Sunday held the record for being Toronto's greatest drawing card, for in one day he managed to attract nearly 18,000 people to the Arena to hear a talk on prohibition. Now he must relinquish that honor, for without even coming near the old town, Charlie Chaplin yesterday drew just a trifle larger audience into five different downtown theatres. Toronto literally went Charlie mad, it had Chaplinitis of the worst sort. Old and young, male and female, pushed and pulled, and paid

war taxes, and fought with cashiers

in their frenzied efforts to see Chap-

lin go thru his contortion acts. At the Strand, Loew's Yonge Street Theatre, and Winter Garden, His Majesty's, and the Photodrome, the highest paid of all movie stars at-tracted dimes and cents, and judging from the roars of laughter that greeted his entrance and abode upon screen he gave a good return for the investment. Charlie has been adverhas made up his mind to see the first of the new series of Mutual Chaplin comedies, "The Floorwalker." Theatre managers are at a loss to account for star long before this. At any rate, Toronto has followed the road of other cities and can't get too much of his

George Fisher, who plays the diffi-cult and delicate role of the Christus in Thomas H. Ince's huge spectacle, "Civilization," lives at the beach town of Venice, Cal., near the studio, and each morning enjoys a plunge in the surf before breakfast. Now, despite the warm southern California sun, the air is sharp and cool at 6 in the morning, and Fisher one morning was leaping, slapping himself and tumbling about to bring his circulation to a glow. A party of eastern tourists, out for an early constitutional along the strand, stopped to watch him, and one at the first must be Charlin Charling. for an early constitutional along the strand, stopped to watch him, and one said, "That must be Charlie Chaplin without his make-up. See the curly hair." "No," said another. "You're wrong. That's William S. Hart, the rough rider. He always does that in rough rider. He always does that in the morning to get in the proper mood to kill a dozen Indians."

# The Amateur Gardener

EVERY spring a liberal quantity of manure should be applied to the rose bed. In the long list of plants which we grow in our gardens, there is no plant that requires richer food or larger amounts of it, and unless it can be supplied I would not advise undertaking to grow this plant. Whatever

be supplied I would not advise undertaking to grow this plant. Whatever fertilizer is used should be mixed into the soil to a depth that will bring it into contact with the roots.

I have advised the selection of hybrid perpetuals and tea roses for general culture. These require special treatment in order to give satisfaction. Their flowers are borne on new wood, therefore, to keep the plants producing flowers constantly of flowering is concerned.

Constant cutting back will prevent devolopment of the plants as to size, but the fact is that the rose ought never to be considered as an ornamental shrub, therefore the stubby plants which result from close pruning will not be objectionable when viewed from the standpoint of good bloomers, rather than rivals of shrubs whose size and dignity entitle them to a prominent place on lawn or in the border.

I would, on this account, give the rose a place of its own somewhere in the rear, where it will not be expected to pose as an ornamental plant.
