

**FEB**

## CHIGNECTO POST AND BORDERER

SACKVILLE N. B., Feb. 1st 1894

HAS WESTMORLAND COUNTY A WARDEN?

Many say not. Some say that the council wished to elect Mr. Kay but at the business in such a bungling way as to defeat their own wishes. Others say that if the councilors really wished that Mr. Kay should be elected they would have elected him. The law bearing on the election of Warden reads as follows: "All questions shall be decided by a Majority; the Warden or temporary chairman may vote with the other members on all questions and any question on which there is an equality of votes shall be deemed to be negative." The chairman therefore has not a casting vote but votes like one of the other councilors and in case of a tie the question is deemed to be negative, and there must be a majority in favor of the affirmative and negative sides. In the case in question then it should have been moved that Mr. Kay, who was first nominated should be Warden. It should have been moved as an amendment that Mr. Kay be elected. A strict "yes" and "may" vote should have been taken on the amendment and in case of a tie the amendment would have been lost. But in case the amendment was lost the original motion should have been put in the same way and on the same question this motion the election of Mr. Kay should have hung.

Note now the actual method of procedure as nearly as we can ascertain it at present, for the official report slurs it over hastily. When the time came for election of Warden, Coun. Kay was nominated by Coun. Alward; Coun. Ogden was nominated by Coun. Hickman; Coun. Gaudet was not present but of the fourteen present seven voted for Mr. Kay, seven for Mr. Ogden, voting by ballot and writing Kay or Ogden as preferred. The law was then examined, the question declared negative, and Mr. Kay declared elected Warden of the county. "But how," says one person, "since the councilors were voting for Kay or Ogden, why not call Ogden be called negative rather than Kay?" "And how," says another, "even if the amendment in favor of Ogden was negative could Kay be elected without that original motion being put?" "And how, there fore," say both together, "has Westmorland county a Warden?"

## ORIGIN OF DISEASE.

The scientific American discusses filth as a source of preventable disease and it says that besides direct poisoning as from fumes of organic decomposition as from a sewer it injures by means of the morbid ferments or contagia which it breeds or harbors. The chemical products of filth hurt by instant action and in direct proportion to the palpable and ponderable dose; with contagia on the other hand indefinitely large ulterior effects are by or by means of doses, which are indefinitely small.

In the common species ferments these reside powers of disease production as positive as those which reside in various or epidemic contagia. By successive inoculations it not only develops itself as one of the most tremendous of poisons (produced by minute living organisms indefinitely self multiplying present where putrefactive changes are in progress) but becomes a communicable from the sick to the healthy, producing disease exactly as contagious, the fatal infectious filth known under the names of erysipelas, puerperal septicemia and diphtheria; infectious sometimes in unquestionable dependence upon filth, yet becoming when arisen the most communicable of diseases. This ferment can in the human body start chronic processes as tubercular disease, capable of hereditary transmission. It may be worthy of notice that filth ferments show no power of active diffusion in dry air. Moisture is their normal condition. It ventilated, low lying localities where filth is allowed to lie may have these poisons present in their atmosphere as well as teeming in their soil and ground water.

The Montreal Times and Transcript have succeeded in proving, case to case, to its own satisfaction, and doubtless to the satisfaction of the public, that the other is under the management of swindlers and shippers who live by sweeping suddenly down on the City Fathers when the latter are in a state of weakness or intoxication, or possibly suffering from gripe, and extorting \$300 for an \$82 job. We are deeply grieved that our contemporaries, whom we have always esteemed honorable and upright, should have sunk so low, but at the same time we are glad to inform the rate-payers of Moncton that they need not run off by the law on a typewriter, their printing can be neatly, cheaply and promptly done at the office of the Chignecto Post, Sackville, N. B. New press, new type, skilled workmen, and goods delivered without extra charge.

THE N. S. Legislature has hoisted the bill extending the franchise to women, and the hand that rocks the cradle must be content to let the Nova Scotia world in the old fashioned way—by broomstick fusion.

DEVELOPING THEMSELVES.—A. P. Walden and W. B. Smith, have been appointed to the recent seats in the Legislative Council, but that body refuses to admit them on the ground that they are pledged to the abolition of the Council.—Amherst News.

## The W. C. T. U.

## DISTRICT CONVENTION AT PORT ELGIN.

The annual district convention of the Women's Christian Temperance Union of Kent, Albert and Westmorland counties met at Port Elgin on Tuesday, Wednesday and Thursday of last week. The following delegates being present: Mesdames Atkinson, Emerson, O'Neill, Forbes, Murray, Gorbill, Wilbur and Harris from Moncton; Mrs. Allen, Richibucto; Mesdames Humphrey, Powell, Wood, Cole, Sackville; Mesdames W. W. Harris, E. Thompson, Upper Sackville and twelve or fifteen leaders from the Baie Verte and Port Elgin Unions.

The opening meeting was held on Tuesday afternoon at three o'clock and was opened with devotional exercises by Mrs. E. B. Atkinson, president of the convention. Committees were then appointed on: The plan of work, Resolutions and courtesies. The Josiah Wood, the secretary read an interesting report of the year's work and when programmes for the various sessions had been arranged the meeting adjourned to meet again at 7.30.

The evening meeting was a public meeting of Welcome to the delegates. Mrs. William Prescott of Baie Verte occupied the chair. Addresses of welcome were given on behalf of the local union by Mrs. B. Atkinson, of Port Elgin division by Mr. Clement A. Ward, of Baie Verte division by Mr. G. Wells, and of the citizens of Port Elgin by Mrs. W. W. Wells, M. P. P. who gave the W. C. T. U. great credit for their zeal in pushing through the legislature the bill for scientific temperance education and that prohibiting the sale of liquor to minors. Rev. W. B. Thomas, (Methodist) welcomed the ladies in the name of the clergy and regretted that his brother minister of the Baptist church, Rev. A. H. Lavers was unable to be present on account of illness. Mrs. Wood replied to all the speeches in an appropriate and feeling manner. During the evening eighteen boys and girls trained by Miss Lavers sang a sweet song of welcome which reflects much credit on their instructor, and the choir furnished excellent music. Mrs. Joseph Read's solo "Save the Boy" was worthy of special mention. The meeting closed with the Temperance doxology.

On Wednesday morning after an hour spent in consecration service presided over by Mrs. Allen of Richibucto the regular meeting opened and the secretary's report was received. Reports read from various divisions were encouraging and showed that much good is being done by the white ribbon sisters. The 7 unions in the three counties have a membership of 148 and the amount raised is \$845. The Band of Hope has a membership of 400. There was a meeting again at 2 p. m. when reports of committees were received. Wednesday evening a mass Temperance meeting was held in the Methodist church. Special prayers were provided. Mrs. Emma B. Atkinson, the president, presided. Mrs. Powell of Sackville gave the scripture reading, Mrs. Emmerson leading in prayer. Mrs. Humphrey, Sackville, gave a number of crusade sketches. Mrs. Emmerson a paper on women's suffrage. Mrs. O'Neil an address on need of work and workers, and Mrs. Atkinson an excellent and thrilling speech on the work of the W. C. T. U. and the Social Act.

Thursday morning a short business meeting was held and in the afternoon a new union was formed at Port Elgin of twenty two charter members, and no deep an impression was made that seven gentlemen put on the white ribbon and became honorary members. The last district convention which these counties have ever held, then came to a close by singing "God be with you till we meet again," and the delegates were driven to the station and bade good bye to their kind friends who had done so much to make the visit to their pretty village pleasant and enjoyable.

## PLAN OF WORK FORMED.

The following plan of work was arranged by the committee appointed for that purpose and adopted.

1. That all workers of the White Ribbon be urged to peruse the plan of work and to use their influence upon others to the same end.
2. That the Union be urged to order literature from Mrs. D. Todd, St. Stephen, and to contribute to the Dominion Literature fund.
3. That all Unions be urged to keep before the teachers the importance of temperance, and the effects of tobacco and alcohol and to use in their schools and in their homes, and to be provided with leaflets prepared for that work and other W. C. T. U. literature.
4. That workers be petitioned to cast their votes for temperance men only.
5. That local Unions endeavor to have each member furnished with a copy of the Annual Report and Constitution and make the study of these, part of their order of business.
6. We recommend the Juvenile Temperance Societies Mrs. Todd's excellent ritual and the diploma and seal course, prepared by the W. T. P. A., for the graduates of the L. L. L. Also that a uniform lodge be agreed upon.
7. That members of the W. C. T. U. have the law prohibiting the sale of tobacco to minors placed in all stores where tobacco is sold and other public places.
8. That country districts be visited where no Unions exist, and that meetings be held, also public temperance meetings, and where Unions cannot be formed, members of which pay 25 cents yearly wear the white ribbon and observe the noonday hour of prayer.
9. That the Band of Hope be formed wherever possible and that, in addition to the temperance instruction given, kindness to animals also be taught.

RESOLUTIONS ADOPTED.

The following resolutions were formed by the resolution committee and adopted.

1. Resolved, That we earnestly request that the members of the W. C. T. U. discourage by every means in their power the cruel and deplorable slaughter of innocent birds that is carried on all over this continent, 5,000 of bird skins being annually required for the ornamentation of American women's bonnets. That this slaughter of birds and consequent suffering of

their young is unworthy the patronage of Christian women.

2. Resolved, That no persons should be engaged to teach in our schools who use strong drink or sanction its use.

3. Resolved, That we urge upon the male population to see that the law relating to Sabbath observance be better enforced by moral suasion if possible, but if that will not suffice, have violators convicted and punished.

4. Believing that many of our social entertainments, such as card playing and dancing, are a Joseph Coat of Arms, "Ante-chambers of mischief" and that where virtue ends vice begins. Therefore resolved, That as members of the Women's Christian Temperance Union we will do all in our power to discourage such social amusements.

5. Resolutions. That we express our thanks to all Editors who have granted us space in their papers, and we earnestly recommend our local Unions to use this means of circulating information regarding temperance work.

6. Resolved, That we urge upon all our White Ribbon sisters to see that the law prohibiting the sale of tobacco to minors is carried out.

7. Resolved, That the District Convention express thanks to Railway managers for their courtesies; to the trustees of Port Elgin Methodist church for the use of their comfortable edifice for the meetings of Convention; to the representatives of the various temperance societies; to the pastors of the village and citizens for their greeting, and to the kind friends who have welcomed us so cordially to their homes.

## Albert County.

LUMBERING—MINING—FARMING—WORKMEN ARE FEW AND CAPITAL IS NEEDED.

Albert was one of the two counties which lost population in the decade before the last census. Whether or not this may be accounted for by the fact claimed by many that the census preceding that of 1891 was inaccurately taken, the county undoubtedly met with local difficulties during that time fully sufficient to account for this loss, and that it has contended with those difficulties so well and is at present in a more prosperous condition than before the reverse came snows in no mistakable manner the great natural resources of the county and the energy and enterprise of its inhabitants. Principal among these reverses was the closing of the Albert mines which threw some three hundred men out of employment and depopulated a thriving village. Other industries have been abandoned and various circumstances have co-operated to lessen the population. The case of the farming and lumbering village of Lumsden near Albert may be cited which was bought up by Messrs. C. & I. Prescott in order that the land might be used for raising lumber. The inhabitants of this village emigrated to Victoria county, but according to late reports are dissatisfied with their new surroundings and would willingly return if their farms could be obtained again. The tide has turned. Not only are those who had left the county returning, but strangers are coming in, buying up land and investing money in lumbering and mining, and all things indicate that Albert will ere long take place among the counties of New Brunswick right at the very front of the lumber and mining industry. Her fertile uplands and broad meadows, her mighty forests, and her unsurpassed mineral resources. Capital is needed to develop new industries and workmen are needed to carry on the old.

Lumbering takes a prominent place in the industries of Albert county and mills of all kinds abound. Near Hillsboro Wright's rotary mill cuts large quantities of deals which are shipped from Gray's Island. C. E. Leblanc & Co. have a mill at Hill, and are shipping a large quantity of deals and lumber. The late George Taylor, General Freight Agent, was superannuated at the same time, but enjoyed his retiring allowance for only four months, dying suddenly at Bedford, for advanced age. Mr. Busby has survived him but a very short time.

The deceased leaves a widow (see Mrs. Williams, of Quebec province), and four children, two sons and two daughters. The deceased was a man of very kindly and retiring disposition, and was universally respected by all classes in the community. He was especially beloved by the railway men, with whom he came in contact most, and he will be long remembered by many as a kind and considerate superior and a warm friend.

The Normal School at Fredericton has 210 Students enrolled now, and of this number only 10 are in the French department under charge of Prof. Bellevue. One hundred and five of the students who entered in September were examined for third year, in December, and it is understood that of this number 10 or 12 failed to secure a license. Since Christmas 37 teachers have entered for admission, whose names, which bring the total up to 210.

Dr. Andrew D. White has sent from Russia to The Popular Science Monthly a group of papers in continuation of his series on the "Theories of Science, the special purpose of which is to show that the modern evolutionary doctrine is itself a development from the earlier theological and metaphysical papers. The general papers FROM CHAOS TO EVOLUTION, and the first of them, which will appear in the February Monthly, deals with the formation of the earth and stars, showing how scientific research and biblical criticism have at last reached the same goal.

Dr. Andrew D. White has sent from Russia to The Popular Science Monthly a group of papers in continuation of his series on the "Theories of Science, the special purpose of which is to show that the modern evolutionary doctrine is itself a development from the earlier theological and metaphysical papers. The general papers FROM CHAOS TO EVOLUTION, and the first of them, which will appear in the February Monthly, deals with the formation of the earth and stars, showing how scientific research and biblical criticism have at last reached the same goal.

NOTES.

In addition to the deals a large

quantity of small lumber will be cut for the American market in case lumber is definitely placed on the free list.

Messrs. C. & I. Prescott intend shipping most of their deals direct to the British Market from Harvey, Back and the Five Pishon Hills.

Large quantities of shingles will be saved at Hopewell Hill, New Ireland and elsewhere in the county.

The Albert Manufacturing company of Hillsboro are getting out the usual amount of plaster.

It is understood that the King Dimock, plaster quarries at Curryville will be worked to a greater extent, than last year. Plaster was first shipped from this quarry last summer by way of Gray's Island. Mr. Jas. Blight a gentleman of large experience and excellent judgment in such matters has charge of these quarries.

Operations in Alma coal mine are suspended but will be renewed in the spring. Mr. Elias Steeves of Salem is manager.

The manganese mine near 21bert of which Capt. Sargent is manager will resume operations in the spring. Several tons were shipped to the west coast, and have been sold at a good price. It is expected that this mine will prove a good paying property when properly developed.

Crops this year were good and farmers feel encouraged. More attention is being paid to dairying than formerly. The late Hopewell Cheese and Butter Co. turned out a large quantity of cheese from their factory at Hopewell Hill which met with a ready sale. Next year they expect an increased output, a considerable amount of money was paid out monthly to farmers for milk.

More mud than usual is being hauled from the river banks to the uplands. The farmers are improving their marshes by ditching diking etc.

Enslilage if adopted in Albert county would add largely to the prosperity of farmers. I do not know of a silo in the county.

There is no ship building going on at present and no immediate prospect of this industry being revived. The last vessel launched, Bark Westmorland registered at Dorchester N. B. was begun by the late G. S. Turner and finished last summer after his death.

C. F. Dow the well known "master builder of Harvey Bank is repairing 'eh'r Bertha Maud for J. S. Atkinson & Co. at that place. Mr. Dow who purchased the ship yard and the estate of the late G. S. Turner has a fine site for a marine railway.

Messrs. C. & I. Prescott who lately purchased the Turner estate at Hopewell Hill, have added to their property an addition to this year to give greater facilities for shipping lumber from Albert and West River mills.

J. S. Atkinson & Co. will increase their shipping facilities this summer by building a wharf just in front of the Albert railway station and land lately purchased from Mr. Job Stiles. The wharf will be on the opposite side of the river owned by Messrs. C. & I. Prescott will be repaired and enlarged.

Messrs. C. & I. Prescott have erected a building for their mill for the accommodation of their hands. George D. Prescott has built a store at West River near his mill.

Messrs. C. & I. Prescott are about to build a dam at their mill on Crooked Creek to cost in the vicinity of \$1000.

Large quantities of logs and wood being placed beside the S. & N. B. R. for transportation in the logs. Logs are being taken by the same line from Monville to McLeellan and Turner's steamer.

Not a vacant house is to be found at Hopewell Hill or Albert and numbers of would-be settlers at Albert have been obliged to locate elsewhere for want of houses. Here is a good reason for careful investment of capital.

The Albert Southern railway which closed down some weeks ago will be running in about a month. This road is held by the estate of the late G. S. Turner and is under the arrangement of W. A. Freeman, Albert County's Judge of Probate. Trains run three times a week. Large quantities of logs and lumber are already waiting transportation and the rolling stock of the company will be taxed to its utmost.

Through the county are many signs of prosperity. Houses have been repaired and repainted and new fences and new tailors shops have been opened at Albert by a Montreal firm.

Attendance at Albert school has increased so as to render an assistant necessary. Miss Elsie Downing of Riverside fills this position of teacher. The school is a superior teacher in principal.

James A. Keiver of Albert who was burned out a few weeks ago has fitted up a store near the old store.

There is talk of a banking agency being opened at Albert. This would be a very large business in shipping and other things in done there. The late estimate for the lumber shipments of last season alone from Riverside, Albert Harvey and Alma would not fall far below \$200,000.

An example of what yet remains to be done in the way of farming it is estimated that 20,000 bushels of oats and nearly 50 tons pork and beef were imported into the county last year.

Rev. Sidney Welton Again.

The Windsor Journal says: The Baptists and others of the maritime provinces were surprised by the announcement in the New York Examiner (Baptist), that the Centennial church of Brooklyn, N. Y., has called Mr. Welton to its pastorate. Newspaper reports of the Graveyard insurance cases in St. John N. B., and notion of the action of a Baptist church in that city depositing Mr. Welton from its pastorate must have failed to reach Brooklyn. The Examiner says: "The Centennial church of Brooklyn, N. Y., has called Mr. Welton to its pastorate. Newspaper reports of the Graveyard insurance cases in St. John N.
