Mr. Hellmuth Wants More Time to Collect Evidence - Mr. Osler Says He Is Going to Run His Case His Own Way - Mr Toothe's Funny Break.

Thursday Afternoon. PATRICK MOPHILLIPS.

Patrick McPhillips, sworn, said he was a partner of Mr. Toothe's. Their special duty was to prepare the evidence for the trial. He remembered Sullivan's visit. He denied Sullivan's story that he (witness) had asked Sullivan to make a declaration. During Sullivan's second visit he heard Sullilivan ask Toothe "What story will we make up to swear to?" He did not hear Toothe's reply, but heard some swearing, and saw Toothe take Sullivan by the neck and shoved him

To Mr. Osler witness said the words he had quoted to Mr. Hellmuth were the only ones he could distinctly remember in the Toothe-Sullivan interview. He was busy, and was paying no attention. He had taken only four or five statutory declarations. He had no election cash book, and had paid out no money in connection with this business. There were receipts spoken of during Sullivan's first interview. with witness.

TOOTHE SWORE

Judge Ferguson-What did Toothe say in reply to Sullivan when Sullivan asked "What will we swear to?" Witness-Toothe swore, but I can't repeat what he said. "Oh, don't be too modest," said Judge Robertson, impatiently. "What did Toothe say?"

"Well, Toothe said something under his breath, and I couldn't hear. and then Toothe jumped up and grabbed him," replied the witness.

Judge Ferguson—And you were all sitting together, and you can't say what toothe said.

A.—Yes.
"Humph," said Mr. Osler, with a smile.

John Farrell, barber, sworn, was sked by Mr. Hellmuth if he saw Sullivan in the City Hotel barroom between 8 and 9 o'clock the night before the last trial. Witness did not know the exact night. He could not say to the week. "There is no foundation for Mr. Hellmuth's question," said Mr. Osler.

'The witness cannot fix the time." Judge Ferguson agreed with Mr. Mr. Hellmuth asked witness if he could recollect any circumstance that would fix the occasion of Sullivan's resence in the barroom, as the time of the first election court sitting.

Witness—Only by the crowd in the barroom talking about it. Mr. Osler—That's hearsay evidence of the worst kind. Mr. Hellmuth complained that he kauer, the private physician of the had no time to see his witnesses before they went into the box. Mr. Osler argued that this was a straight case of paying a man for a The question was whether the vote. two Sullivans of Mr. Toothe were to be believed. If the two Sullivans were telling the truth, the charge ought to prevail. If their lordships are satised with Mr. Toothe's denial the evidence of the Sullivans was not to prevail. The money due Sullivan was \$3; the money paid him was \$9. If he took the \$3 and added \$2 for the drink, and \$4 for the fifteen minutes' work; wrote him some vote, it made \$9. Toothe had sent for Sullivan and attempted to bind him by a statutory declaration, Mr. Osler strongly condemned this pernicious practice of solicitors, seeking to tie witnesses up by statutory declarations, when those witnesses were under subpoena. Toothe's accounts were \$4 short. That \$4 corresponded with the bribe. Look at the attempt made to discredit the witness. Look at the pole electrician; mere tavern talk, which could not influence their lordships. Mr. Osler strongly emphasized the fact that Toothe had made so many different payments to Sullivan. Mr. Hellmuth said Mr. Osler had

made a most unwarranted attack on a solicitor of this court. It was a those who were determined to win their point at all hazards. It was on a par with the cigar box story, which Mr. Osler had abandoned.

Mr. Hellmuth said it was right for a solicitor to secure statutory declara-tions to protect his case. He attributed Sullivan's story to revenge for being thrown out of Mr. Toothe's of-Judge Ferguson-So you say

THE COWLEY DIVORCE CASE. London, Jan. 29.-The trial of the suit for divorce brought by Countess Cowley against her husband, Earl Cowley, has been resumed in the divorce division of the High Court of Justice, after an adjournment over several days. Earl Cowley testified that his wife was unreasonably jealous of him. There had been no desertion of her on his part. They had mutually agreed to live apart. He admitted having stayed at the Hotel Orange at Schemeningen, while Mrs. Charrington was there, but denied specifically the stories told of his famil-

iarity with that lady.

PROPOSED GREAT CONFERENCE. London, Jan. 29. - The Cape Town correspondent of the Daily Mail cables that Sir Gordon Spring, Prime Minister of the British Colonies, and all the Ministers of British colonies, have received invitations by cable, inviting them to attend the fetes next June in connection with the Queen's diamond jubilee. The wives of the Prime Ministers and their staffs are included in the invitation. The correspondent adds that advantage will be taken of the gathering to hold a great pan-Britannic conference to discuss imperial matters.

THE CZAR IN GOOD HEALTH. London, Jan. 29 .- A dispatch to the Telegraph, dated at St. Petersburg, Wednesday evening, says: "Count Vorontsoff-Daschkoff, Minister of the Imperial Court, authorizes me to afthe health of the Czar is excellent, and that his Majesty receives the Government reports daily, takes his usual walks and makes his accustomed visits. He has in no way changed the routine of his life during the last few weeks. Grand Duke Michael is, however, suffering from a severe attack of inflammation of the lungs, according to the St. Petersburg correspondent of the Telegraph. His eldest son has been hastily summoned from the Caucasus region."

A Berlin dispatch says the Czar's trouble is simply a boil, and these dis-

putes are simply financial schemes. PERILS OF THE SEA. London, Jan. 29.-The White Star

Do You Use It?

It's the best thing for the hair under all circumstances. Just as no man by taking thought can add an inch to his stature, so no preparation can make hair. The utmost that can be done is to promote conditions favorable to growth. This is done by Ayer's Hair Vigor. It removes dandruff, cleanses the scalp, nourishes the soil in which the hair grows, and, just as a desert will blossom under rain, so bald heads grow hair, when the roots are nourished. But the roots must be there. If you wish your hair to retain its normal color, or if you wish to restore the lost tint of gray or faded hair use Ayer's Hair Vigor.

BOARD OF DIRECTORS.

SIR W. P. HOWLAND, ROBERT JAFFRAY, Esq.; ROBERT JOHN FLEMING, Esq. (Mayor of Toronto); EDWARD TROUT, Esq.; G. G. S. LINDSEY, Esq., of Toronto; HON. T. MAYNE DALY, Q. C. formerly Minister of the Interior, and JOHN McMARTIN, Esq., Railway Contractor, Rossland. B. C., and A. W. McDOUGALD, Esq., Chicago.

SOLICITORS TO THE COMPANY—At Rossland, B.C., Messrs, Forin & Forin, and C. R., Hamilton, Esq. In Ontario, Messrs, Lindsey, Lindsey & Bethune. BANKERS-In British Columbia, The Bank of Montreal,

Registrar of the Company's Stock—The Toronto General Trusts Company.

PLANS AND PURPOSES.

The Company proposes to engage in and carry on the business of mining for Gold and Silver in Ontario and in British Columbia. For that purpose it has already bought and paid for the valuable Trilby and Prince of Wales Group, which it is now equipping with a machinery plant. These properties give every present indication of developing into rich producing mines at an early date; but the Company will not confine its operations and its chances of ultimate success to these properties. It is Primarily a Development and Exploration Company, and its present holdings were acquired on that basis.

Having highly promising mines with which to commence its business, the initial risk upon which, to a large amount, was carried by its organizers (and is still being so carried, as they receive stock for their interests and no cash out of the Treasury), and an unusually large and safe allotment of shares having been made into the Treasury, the Company is confident of realizing ample capital with which to transact a large and profitable general mining business without exhausting its large holdings of Treasury Stock.

The valuable features of the ordinary DEVELOPMENT Company are combined with the prime advantage of low capitalization and an ample treasury reserve.

It is estimated that during 1897 not exceeding 200,000 shares of the Treasury Stock will be needed to be sold, in which event only 800,000 shares in all would remain outstanding against the Company's assets and working capital.

HOLDINGS OF THE COMPANY

The Company has acquired the assets of The Trilby Mining Corporation, Ltd., which has been in operation in British Columbia during the past six months. These consist of The Trilby and Prince of Wales valuable properties in the South Belt at ROSSLAND, upon which development has been carried on during the last five months onbehalf of the Company with the most satisfactory results. In addition negotiations are pending with a view to the acqusiition by the Company of other properties in the Slocan and Rainy River Districts.

Active exploration has been carried on in the various mining districts of British Columbia on behalf of the organizers of the Company during several months past, and its agents in the field are in possession of valuable and, in some instances, exclusive information as to the newer sections which will be opened up with the advent of spring. Having been early upon the ground, they have exceptional facilities for obtaining control of the safest and most eligible Trusted agents of the Company have also been and are now at work in the rich Rainy River District, and it is confidently expected that negotiations being carried on by them will result favorably, and be able to be announced

THE SHARES AS AN INVESTMENT.

If the Company shouldnot acquire or be in a position to operate any other mining claims in addition to the Trilby and Prince of Wales, and having regard to the number of the Company's shares outstanding, when the sale shall be effected of the number estimated sufficient to yield a net working capital of not less than \$50,000; to the position and value of the Company's holdings now being developed; to the assurance afforded the public of the prudent and economical management of the assets and working capital of the Company; the shares of the Company at twenty-five cents (25c) upon the dollar are relatively cheaper than those of any company operating any mine in the same stage of development as the Trilby in the Rossland district.

Shares at 25c in a company having only 800,000 shares outstanding, owning two highly promising mineral claims, with \$50,000 or more in its treasury, and with 450,000 unsold treasury shares, are a better investment than shares n a company capitalized at \$1,000,000 to \$2,000,000 with only one-quarter of its shares in the treasury, and offered at 10c per share. It is a simple arithmetical problem and capable of easy calculation.

THE INCORPORATION OF THE COMPANY:

Special features and advantages to shareholders in the methods of incorporation of the Company are the following:

I. The chief office of the Company is to be kept at Toronto, and all of its books, records and accounts are to be kept there, and all its business and transactions, save only the actual operation of its mining properties, are to be directed and conducted from that office.

2. All of the meetings of the shareholders of the Company and the meetings of its Board of Directors are to be held at the head office in Toronto, thus rendering it feasible for the vast majority of the shareholders of the Com-

be present at such meetings, 3. A majority of the Board of Directors are residents of Ontario.

TREASURY SHARES TO BE SOLD.

The Board of Directors has authorized the sale of Fifty Thousand (50,000) shares of the Treasury Stock at the low price of Twenty (20) Cents per share, subject to withdrawal or advance without other notice.

Subscriptions will be received by the undersigned (who are exclusive brokers for the Company) for blocks of not less than 100 shares, and certificates will be issued by The Toronto General Trusts Company, Registrars, spon allotment. Allotment will be made in the order in which subscriptions are received. Checks or drafts should accompany subscriptions.

Witness said Mr. Toothe did not ask him about his vote. To Mr. Osler, witness said he wa out of employment when he made the agreement with Mr. Toothe. Mr. Osler-Where did you get the last \$4 from? A .- From Mr. Toothe, out of Mr. Gnavdon's pocket. Witness said the \$15 payment from Red Mountain, in the vicinity of the big mines; the "Beaconsfield," in the south belt, in the same ore zone as Toothe was sent to him at his house by a telegraph messenger. He was not desirous of hold-ing up Mr. McVean as an object of admiration, but he was being played upon by the other side. Mr. Graydon was not called to deny the payment of the \$25 or the \$4. It was a corrupt transaction. Mr. Osler cited Justice Cameron's decision in East Middlesex, decreeing that unreasonable amounts for political services constituted brib ery. He could not fairly argue, after Mn Toothe's denial, that the story of the bribery of the eight voters should be given effect; but it was unnecessary to prove that specific act. Mc-Vean went to the Conservative peni-

tent bench, and confessed his sin, but received \$25. Mr. Hellmuth said there was no offense in buying information if it was not a cloak for bribing the man or for delegating him to bribe others. It was a fortunate thing for the respondent that this witness had been brought in. It showed that Mr. Toothe had concealed nothing, and told the truth.

Mr. Osler said Mr. Hellmuth might have put Mr. Graydon in the box to show what the original agreement was and whether the \$4 was paid. But they carefully abstained from putting Graydon in the box, because Graydon could not deny the \$4 paid to Mc-Vean on the night before the election. Mr. Toothe himself but faintly denied it. Money Spent in Social Pleasure.

Our former fellow-townsman, Rev. Dr. Rainsford, of St. George's Anglican Church, New York, recently set metropolitan society in a ferment by a condemnation of lavish expenditures of money on balls and private entertainments at such a time as the

Dr. Rainsford takes the 6,000,000 odd votes polled for Mr. Bryan in the recent Presidential election as an evidence of the existence of great dissatisfaction with present social conditions, and he believes that the expenditure of many thousands of dollars on luxurious entertainments this winter but aids in keeping going the agitation set on foot by Mr. Bryan and his friends to such an extent as to insure its success in 1900. As he holds that would be a calamity, he issues the present warning.

The immediate cause of Dr. Rainsford's protest was the giving of a ball by Mr. Bradley-Martin, a millionaire, on which, it was announced, it was 000. Dr. Rainsford's protest opens up must be conceded. a wide question for discussion. Heavy expenditures by moneyed people for ciety modestly ask for \$1,000 to carry the social enjoyment of themselves on their work during the year. The and their friends may have a decid- municipal bodies and philanthropic edly beneficial effect on the workers in citizens should make their task an the community, and yet not be wholly easy one if that is all the money free from baneful influences. In a lesser degree in every center of population, the season for balls and parties is depended upon to supply merchants, manufacturers and their employes with money. Otherwise dullness would prevail. Is it advisable that there should be a suspension of all such entertainment? Certainly not from the point of view of the retinue of persons employed to provide the requisites for their suc-

It is not advisable, especially in times of distress, for moneyed men and women to become miserly in their expenditures, and to accentuate the hard times already prevailing among those who depend on their patronage for their sustenance. We can, however, imagine it possible, as has been the case in the past, for entertainments to be so very lavish as to cause social discontent, and aid the revolutionist is his propaganda.

Another matter for consideration is the effect which large expenditures and lavish display, made by those who can afford it, may have on their neighbors, who, with slim purses, may be moved to endeavor to emulate their better off fellows. Do we not all know people of this stamp? They have not the means to give costly entertainments or to buy outfits in which to attend them, but they are too proud to acknowledge it, and to live within their means. Insolvency and humiliation may stare them in the face, but so long as they can beg, borrow, or get credit, they will not acknowledge that the procession is too rapid

In so far as ostentatious entertainments nurture this spirit in a community are they detrimental to its wellfare. To each man and to each woman must it be left to judge how far his or her example contributes either to social discontent or social demoralization. Within those limits, ly earned, is to be commended. Many freely for the promotion of the public welfare and in charity, and do not stint themselves in buying that measure of social enjoyment which they deem necessary and which their means enable them to have.

Save the Little Ones.

The London Children's Aid Society are making their annual appeal for the sympathy and support of citizens of London and district.

Last year the society did good work. Over 100 cases were dealt with; of these 64 were taken charge of by the society. Twenty-nine children-boys and girls-were placed during the year in good comfortable homes, and are practically adopted, and surrounded by good influences. Mrs. Harvie, the Government visitor, after inspecting some of these, says they are the best homes that she had met with so

Seventeen of these 29 were turned over to the guardianship of the society by various magistrates and judges. The society returned 7 children to their parents; delivered 5 | over to the Barnardo and Feggan Homes, to which they belonged; sent 1 to the Good Shepherd's Home, while were committed to Penetang Reformatory. One baby died in the hospital; 13 are on hand awaiting adoption, and the remainder left in the hands of the inspector by the police magistrate.

A DRAW.

DROPPED DEAD

Suddenly Stricken Down by Heart

Disease. 'A sad and sudden death occurred to a well-known citizen on one of the leading streets this morning."

Nearly every large city paper contains daily some such heading. The number of deaths from heart failure is very large, but it is only when they occur in some public and sensational manner that general attention is drawn to them. Palpitation and fluttering of the heart are common complaints. With the heart itself there is nothing radi-

cally wrong. But the system is disorganized, the kidneys and liver are out of order, and the stomach is not in condition to do its work properly. Between them all, they throw too much responsibility on the heart, and the latter is unable to stand the strain. A box of Dr. Chase's Kidney-Liver Pills, at a cost of 25 cents, will regulate the system, purify the blood, and make a new person of every sickly man, woman and child.

Dr. Chase's Liver-Kidney Pills may be had from any dealer or from the manufacturers, Edmanson, Bates & Co., Toronto. One pill one dose, one

men were too weak to fight any longer, and the referee declared the fight drawn. Burge fought at 143 pounds and Connolly at 138. The fighting was vicious from the start. Connolly led the hitting at a tremendous pace, but he was stopped repeatedly by blows on the face. After five rounds. in which the exchanges were about even, Burge landed a crushing blow Connolly's neck, knocking him down. The latter, however, was on his feet again in eight seconds, and Burge was just going to finish the fight when time was called. Connoly recovered with marvelous rapidity from the effects of the blow, which had come so near knocking him out, and in the next round he landed several stinging blows which made Burge stagger. The spectators were wild with excitement when they saw the favorite in this At the end of the ninth round both men were terribly weak but both were game. Long wheat, which has been held for months in the expectation that \$\forall was to be attained, has been thrown overboard this week, without-consideration as to price. For a time this morning it appeared as though a recovery might take place, but when shorts have covered all they felt disposed to and prices showed no signs of booming, a drive was again made at the market, and in the last hour there was complete demoralization. Liverpool cables were steady at unchanged prices. Continental markets were generally lower. March wheat opened from 76½ to 76½; sold at 77; declined to and closed at 7½—1½ under yesterday. Cash wheat was weak and 1½ lower. Corn declined ½ and oats ½ to ½. Provisions easy.

WOMEN STENOGRAPHERS.

They Now Have a National Association With Headquarters at Chicago.

The enterprising women who have formed the National Association of Wemen Stenographers want to make their or-ganization national in character as well as in name and are just now agitating the enterprise with commendable zeal. The association has its headquarters in Chieago, to which city the membership is now largely confined. It was started there during the World's fair at the instigation of Mrs. Potter Palmer, who wished the stenographers to be represented in the women's congress as an organized body. For awhile after the exposition closed the affairs of the association were almost forgotten, but the organization was revived and made a permanent one. At present there are only about 200

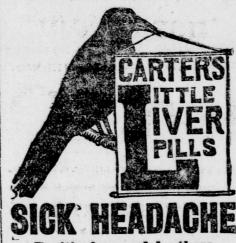

members, but Chicago alone has about 5,000 stenographers, and there is a large field from which to draw recruits. Connected with the association is a sick benefit scheme, which, it is thought, will be very popular when it is understood. The mem-bers are divided into three grades, paying 25 cents, 50 cents or \$1 monthly, accord-

GREAT STOCK TAKING SALE OF . . .

We take stock the 1st of February, and, as our stock of CARPETS and CURTAINS is larger than we would like at this time of the year we propose to make a slaughter sale for this month only. The citizens of London and surrounding country are well aware that when we advertise a sale we carry out what we say.

In the first place we have no old stock. Secondly, our qualities and patterns are the best. Thirdly, we intend to give the public the best goods at the lowest prices ever offered in the city. Note some of the reduc-

falcolm Cameron, of Parkhill, in the Toils.

Malcolm Cameron, of Parkhill, was brought here by Chief Mains, of that place, and confined in the county jail yesterday afternoon. Cameron, it is alleged, is one of the parties who assisted Edward Ellis in the assault on Samuel Peck, of Parkhill, on Dec. 15, 1894. Since that time Cameron has kept out of the way. He was arrested on his return to Parkhill on Wednesday. An indictment against both these men was found by the grand jury at the June assizes here in 1895. The trial of Ellis was postponed until the December sessions, when he was convicted and sentenced to eleven months in the Central Prison. BRAKEMEN STRIKE.

Refuse to Ride on Top of the Cars in Cold Weather for a Dollar a Day.

Atlanta, Ga., Jan. 29. — Cold weather and low wages have brought on a partial strike among the brake-men of the Georgia road. The brakemen had begun to seek shelter on the engine and in the caboose, sallying out when the time came to go down grade or slow up at a station, and the management issued an order recently to the effect that the rule as to niding on top must be strictly complied with. It was this order that thinned the ranks of the brakemen. They are paid \$30 a month, and many of them are unwilling to undergo the exposure

LIFE ON THE OCEAN WAVE

It Is Different.

Boston, Mass., Jan. 29.-A message was received by John G. Hall & Co., this morning, that the British bark Corrivrechan, Capt. Hammond, Java to Boston, loaded with sugar, was at anchor between Hastings Ledge and Minot's Light, with both her anchors and all her cable out and her entire crew so benumbed with the cold and so badly frost-bitten that they were unable to raise the anchor. Capt. Hammond requested the com-pany that men be sent to the vessel to work her into port, as, aside from her crew being disabled, the Corrivrecahn's sails were blown to ribbons during yesterday's gale.

\$25,000 WORTH OF LOVE

Said to Have Been Alienated From a Husband.

Peterboro, Ont., Jan. 29 .- A great sensation has been created here by the announcement that W. A. C. Baldwin, late of Quebec city, and now in business here as a broker, has issued a writ against J. J. Lundy, a prominent resident of Peterboro, chaiming \$25,000 for alleged allenation of the affections of his wife. It appears that Mrs. Baldwin, who is a sister of the defendant, left her husband at the time of his financial difficulties in Quebec, and since then, with her ohlidren, has been living apart from him. Mr. Baldwin charges Mr. Lundy with having been the cause of this action on the part of his wife, and has issued the writ above mentioned against him. Efforts are being made to settle the matter without having it threshed out in the counts, but as yet without

Toronto, Jan. 29.-R. G. Dun & Co.'s

weekly statement of trade in Canada In Montreal there are indications of improved demand in some lines of staple goods, and when the country roads get into better shape a freer movement is looked for, with improv ed collections. As yet there is a notable degree of general activity in trade. The very cold weather has improved the sorting demand from the country for seasonable drygoods, and a fair proportion of orders for spring goods is also being booked. City retail trade has been dull throughout

January.
The improvement in trade at Toronto this week has been slight. The weather is more seasonable and the condition of roads has been greatly improved by snow. Retail trade at country points will be benefited by an increased movement of produce, and in turn wholesale business will likely increase. The feeling is honeful, and the assurances given with respect to the Government's trade policy are

likely to produce good results. The number of failures has decreased, and after the first week of February a change for the better is confidently expected. The failures for the week were 57, as against 70 for the same week of last year.

Dr. Henry Barnard, who is known as the father of American education, will see on Jan. 24 the eighty-sixth anniversary of his birth, and there is some talk of having a celebration in his honor. Dr. Barnard, who is an extremely modest man, opposes the project, but there are so many who realize the extent and importance of his work that it is possible his objections may be overruled.

Few men have so persistently turned their energies toward one purpose as has Dr. Barnard during his long lifetime. From earliest manhood until the present day he has worked for the cause of education in this country, and the record of his accomplishments is a long one. He was graduated from Yale in 1830, admitted to the bar in 1835 and two years later, as a

gan his educational career by advocating reforms in the common schools. He effected a reorganization of the public school system in that state, introducing schoolhouses of improved construction, high schools, teachers' institutes, a normal acad-

amy and new methods of instruction. But Dr. Barnard was working for the nation and not for Connecticut alone. He went to Rhode Island and, in the face of much opposition, introduced similar improvements there. In 1842 and 1843 he visited every state in the Union except Texas, working in the interests of education. He spoke in more than 60 citles and appeared before 17 legislatures. Subsequently he corresponded with the leading men in all parts of the Union, and school reforms followed, everywhere. In 1857 he accepted a position as president of the University of Wisconsin, putting that institu-

tion on a sound educational basis. His greatest achievement, however, was the founding of the national bureau of education. For several years he agitated the subject and finally got the bill through congress. President Johnson appointed bim commissioner of education and he held the position for three years. Dr. Barnard has also been a most voluminous writer on educational topics, and his books are standard works. He has published 52 volumes, comprising over 800 separate treatises. He founded the Connecticut Common School Journal, the Rhode Island School Journal and The American Journal of Education. Dr. Barnard was born in Hartford, where he still lives and works almost as energetically as he did a quarter of a century ago.

The second, however, fully made up for this lack of excitement. So fearful was he of missing a possible visitor by over-sleeping himself, that he never closed his eves at all, and he was rewarded for his vigilance when, between 2 and o'clock, he heard a slight noise at s door, and a moment later saw dim-

But the young man, Pancake Flour ment had darted across the room and out at the door. But the young man, being prepared for such a contingency

as this, sprang out of bed half dressed, and dashed out on the landing in pursuit. The woman had got the start of him, and was by this time half-way up the attic staircase. He followed, saw her open the door of the room on all his strength against the door. It shook, it creaked; another such blow. and the rickety old frame-work would give way. Just as he hurled all his weight against the door for the second time, however, he heard the unmistakable sound of the throwing open of the window of the room. The next instant the door gave way under the force of his blows, and he dashed into the room just in time to see a head disappear behind the sill

of the open window. (To be Continued.)

Tenders Called

Two Sections of the New Sewer Will Soon Be Started.

The Portion Built Is in Perfect Condition.

No Further Danger From Cave-Ins -The South Main Sewers to be Egg-Shaped-A Decision

Rescinded.

Am interesting report by Mr. Willis Chipman, consulting engineer on the new sewers, was laid before the members of the Board of Works at the the decision of the board to call for tenders for sections now ready. The first part of the report related to the Evergreen avenue section, now under creasing their frontage tax construction, and contained the pleas-

ing statement that the portion built is apparently in perfect condition. Another satisfactory statement was that the brickwork is now being constructed in hard clay, and there should be no further trouble from "caving" or Chairman Parnell, in surprise, to the sliding of banks. Continuing, Mr. Chipman stated: "That trunneling in alternate sections of twelve feet has been adopted by the contractor. Mr. Chipman is satisfied that it is being carefully done, and that there is no probability of injuring the sewer by this method of construction, if the inspector, Mr. Baker, insists on the compact filling of the space between the brickwork and the roof of the tunnels, which

is now in sufficiently hard material to stand without sheeting or timbering." This clause was filed, as was also following, relatting to concrete "The use of concrete in the construction of sewers may be adopted with advantage, provided the work is well executed. The specifications provide that concrete pipes, if used, shall seasoned at least six months before and machinery. being used, and they shall be manufactured under the eye of a city inspector, appointed for the purpose. It mittee to compel sewer contractors to is also specified that these pipes shall have bell and spigot joints, similar to

glazed sewer pipes. "The concrete sewer pipes that I have seen in the city do not conform to the specifications. They are rough and porous, and not, in my opinion, sultable for sewer construction. a better article is turned out by the manufacturer, I cannot recommend them in preference to brick or tile." Under the heading, "Brick vs. Tile," the report stated: "In my reports of 1892 and 1896, I did not rec either tile or brick for sewers 24 inches diameter, but merely stated the to be decided by the council. Twentyfour-inch tile was specified by Mr. Rust in his report, and also in the report of the Board of Health, adopted by the council, but my estimates and ness at night. These symptoms, toork, and consequently a higher velocity with a small flow of sewage. Upon investigation I find that 24-inch tile faid will cost about 25 cents per foot more than a double ring of brick case will be practically the same. One great advantage in adopting the brick is that the brick can be made in London. One-quarter at least of the brick used in a 24-inch sewer should be radiated. The local brick-makers, if they desire to furnish all the brick required in the construction of the large sewers, should adopt the latest machinery and the most approved method of manufacture, in order to turn out smoother, harder and cheaper brick than they are turning out today. Under the circumstances, I concur with the city engineer that brick should be adopted for the 24-inch south main

Continuing, the report recommended that in general this brick sewer should be built with two rings (9-inch work) in the lower half, and one ring only in the upper half, thus saving 30 cents per lineal foot in the first cost, or a tal of \$900. When the depth exceeds twenty feet, and in very bad ground. the outer ring can be made complete, the contractor to be allowed 30 cents per lineal foot for such extra work. "I have successfully constructed many sewers in this way, one at a depth of 26 feet," added Mr. Chipman. On motion of Ald. O'Meara, it was

decided what it would be advisable, for the sake of \$900, to have a double ing of bricks all around. This amount will be saved by using brick in preference to tile. Mr. Chipman stated: "An egg-shaped sewer, 20 inches by 30 inches, has practically the same capacity as a 24-inch circular one. In the egg-shaped sewer the velocity with a very small flow will be about 4 per cent greater than in the circular sewer, but this sewer will require about 5 per cent more brick, and I am of the opinion that the circular form is the stronger of tre two. In the case of the south main

cheaper to construct." Ald. Cooper moved that section F avenue. Telephone 997. e egg-shaped, as favored by Engineer Graydon, who claimed it would be sufficiently strong. Ald. O'Meara alone objected. With regard to steel pipes, Mr. Chipman said that to determine the exact difference between cast iron and riveted steel pipes for the proposed 30-inch sewer from the west end of Evergreen avenue to the west of the ve, it would be advisable to call for tenders of both. Field work should be proceeded with at once. The commit-

EVIDENCE of a peculiar form of theological insincerity on the part of the Society for the Promotion of Christian Knowledge is presented in a re-cent number of the Athenaeum. The society has published a "translation" of Prof. Maspero's "History of Eastern Nations," the original text of which treats the Old Testament very critically, with all the passages that might shock orthodox readers carefully toned down or expunged, and with no notice given of the modification.
