	12x		16x		20x		24x		28x		32x	

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaît sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

2206 St. Catherine Street - - MONTREAL

MONTREAL, a city of some 350,000 souls, so named from the mountain between whose base and the mighty St. Lawrence the city lies, is the commercial metropolis and national port of the Dominion of Canada.

Place d'Armes Square

Situated at the head of navigation of one of the greatest of rivers—a river which drains a most fertile and generous land—

Montreal is destined to occupy a foremost rank among the cities of this continent. In the year 1535, Jacques Cartier came up the St. Lawrence to where the city now stands, and found a large, well-fortified Indian town called Hochelaga. Later on, in 1611, Champlain established a trading-post and called it Place Royale; a tablet in front of the Custom House now marks the spot. It was not, however, till 1642 that Paul de Chomedey, Sieur de Maisonneuve, landed on the island and laid the lasting foundation of the city. For almost a century and a quarter Canada remained a French colony, and not till the Treaty of Paris, in 1763, did Montreal become a British city. Since then, French and English, have lived together, happily and prosperously, side by side, each in the enjoyment of his own language and religion, both working strenuously for the development of Montreal as a national port, and a port which will eventually be second to none upon the continent.

The early history of the United States is indelibly blended with that of Montreal, for it was from this city that many of the strong men of one, two and three centuries ago went forth to discover, to govern, to trade and to convert. On St. Paul street, just east of Place Royale, stood the birth-place of Pierre and Jean-Baptiste Le Moyne the men who discovered the mouth of the Mississippi river, in 1699, founded New Orleans, and who were, between them, governors of Louisiana for forty-six years.

Between 1666 and 1668, Jacques Marquette, the great Jesuit missionary and discoverer, was a familiar figure in Ville-Marie, and he left the banks of the St. Lawrence on his voyage of discovery to the Mississippi. It was to Montreal that Sir William Johnson, of Johnson Hall, on the Mohawk, came in 1760, and on the site of the present Bonsecours Market stood the residence occupied by his son, Sir John Johnson, Indian commissioner, and it was here that peace conferences were held with the great Indian chiefs Brant and Tecumseh.

At the corner of St. Peter and St. Paul streets stood the residence of Robert Cavalier, Sieur de La Salle. In 1666 La Salle came to Montreal, to go, ten years later, on his voyage of discovery into the North-west and thence to the Gulf of Mexico. On the lower road leading from Montreal

to Lachine can still be seen the remains of a fortified seignorial château which tradition asserts was the home of La Salle in the year 1668.

Some Historical Reminiscences.

Near the Place d'Armes stood the house of Sieur du Luth, after whom the city of Duluth, in Minnesota, is named. On Notre-Dame street, west of St. Lamher Hill, was the residence of La Mothe Cadillac, who left the then little French village to proceed westward and found the now beautiful city of Detroit. A tablet on the Leeming-Miles Building erected on this spot, records this fact—The Tourists Information Bureau is in this Building. In later years such men as Washington Irving, General Montgomery, Benjamin Franklin, Arnold, Chase, Carroll and John Jacob Astor followed one after the other to Montreal, each leaving a lasting imprint in the city's history.

Old Windmill
on the Lower Lachine Road.

A little tablet at the corner of Notre-Dame and St. John streets, with the following inscription: "Forretier House. Here General Montgomery resided during the winter of 1775-6," reminds us that the city was once in the hands of our southern neighbors. Sir Guy Carleton—whose name will always be associated with the Quebec Act, 1774—won back the city for us, and since then Montreal has stood secure, though again threatened during our troubles with the great republic to the south, in 1812-15. Its growth in population has been consistent. At the time of the cession to Great Britain, the city had only a population of some 3,000; at the beginning of last century, this had increased to 12,000, and at the present time she boasts of some 350,000 inhabitants.

Situated on the island of Montreal, the largest of a group of islands formed by the confluence of the Ottawa with the St. Lawrence river, one thousand miles from the open sea, its position is picturesque to a degree. Behind is the beautifully-wooded Mount Royal, in front the majestic St. Lawrence, and in the distance the mountains of northern New

Notre-Dame Church.

York. The natural beauty of the site is more than matched by its practical importance as the head of ocean navigation; as the key to and from the great interior of the Dominion, as the spot whence all traffic upon the great waterways of the country must centre, Montreal can never lose its maritime and commercial supremacy.

Immediately to the west of the city has been built the Lachine canal, thus obviating the difficulties to navigation presented by the Lachine rapids. The passenger steamers "run the rapids," and this is a most exciting and indeed a never-to-be-forgotten experience enjoyed by thousands of tourists each year.

The Lachine rapids were first run by a steamer in the summer of 1840, by the side-wheeler "Ontario," afterwards known as the "Lord Sydenham."

Not only is Montreal the key to the great waterways of Canada, but it is also the chief railway centre of the Dominion.

To facilitate direct railway communication with the city, two magnificent bridges span the St. Lawrence. The Victoria Jubilee Bridge, opened for traffic in 1860, by His Majesty King Edward VII., then Prince of Wales, is a double-track steel open-girder bridge, with carriage-ways and foot-walks on either side of the main trusses. It is a magnificent structure, over two miles long, and brings its traffic directly into the city. The other bridge over the St. Lawrence belongs to the Canadian Pacific Railway, and crosses the river at the head of the Lachine rapids, striking the north shore a little below the village of Lachine and about seven miles west of the city. This bridge is also a great triumph of engineering.

Ocean steamships, run direct between Montreal and Liverpool, London, Glasgow, Manchester, Belfast and other

British ports ; also to several Continental ports, such as Hamburg, Antwerp and Havre, and to the Mediterranean. In connection with the large ocean traffic, the following tablet, found on the walls of the Canadian Rubber Company's works, on Notre-Dame street, records this interesting fact : "1829-1833. The Pioneer of Steam Navigation. On this site stood Bennet & Henderson's foundry, in which were erected the two engines designed and placed by John Bennet on the 'Royal William,' the first vessel to cross the Atlantic or any ocean, entirely propelled by steam."

Steam communication between Montreal and Quebec dates as far back as 1809, when John Molson, the father of steam navigation on the St. Lawrence, launched the steamer "Accommodation" for Montreal and Quebec service, as shown by a tablet on the wall of Molson's brewery.

**The City's
Foreign Trade.**

The harbor of Montreal, situated on the north side of the River St. Lawrence, has seven miles of wharfage accommodation, and this is being constantly increased.

The revetment-wall is a magnificent piece of granite masonry running along the river-front and securely protecting the city from inundation.

The weekly passenger services between Montreal and British ports are first-class in every respect, and are yearly becoming more popular with tourists.

Montreal's trade with foreign countries has grown very fast of late years, the short route to Europe *via* the St. Lawrence meeting with universal commendation of trader and passenger alike. Montreal is the great export centre of the continent for dairy produce, and the exports exceed those of New York in butter and cheese.

The exports from the port of Montreal for the year 1904 amounted to \$67,844,729, and the value of the imports to \$74,517,129. The Customs duty collected at Montreal amounted to \$12,437,927.

Built chiefly of limestone, of which there is an inexhaustible supply at hand, Montreal's public and private buildings wear a look of stability, comfort and wealth. Many of its private residences, university buildings and churches are magnificent examples of architecture.

**Churches of
Interest.**

One of the most important of these churches is the Roman Catholic parish church of Montreal. It is situated on Notre Dame street, facing Place d'Armes Square,

St. James Cathedral (Roman Catholic.)

and is a massive and impressive structure. The style is of a composite Gothic order, combining different varieties of a severe French design. The vast auditorium holds ten thousand people. The organ is reputed to be the finest on the continent.

The towers are 228 feet high. In the western tower, from the top of which a view is obtained, is hung the great bell, *Le Gros Bourdon*, the largest in America, weighing 24,780 pounds. The bell was cast in London, in 1846. In the eastern tower are ten bells, which require eighteen men to ring them.

The Seminary adjoins the church, and here since 1710 have been kept all the registers—baptismal and others—of the city. Here also is found a vast wealth of historic treasure. The building, including the old stone wall on the Notre-Dame street side, have seen practically no change since erected, nearly two hundred years ago. The fleur-de-lys, the quaint old-time clock, with its little bells which tinkle off the quarters and hours, are all relics of old French occupation.

The following interesting tablets contain a great deal of important history in brief space.

“The Seminary of St. Sulpice founded at Paris by Monsieur Jacques Olier, 1641; established at Ville-Marie 1657; Monsieur Gabriel de Queylus, Superior; Seigneurs of the Island of Montreal, 1663.”

"François Dollier de Casson, first historian of Montreal, captain under Marshal de Turenne, then priest of St. Sulpice during thirty-five years, He died in 1701, curé of the parish."

St. James Cathedral (Roman Catholic) is situated on Dorchester street, at the eastern side of Dominion Square. Designed to exceed in size and magnificence all other ecclesiastical buildings on this continent, it is built on the model and being one-third the size of St. Peter's at Rome. The foundations were commenced in 1870, and the structure completed 30 years later.

It is built in the form of a cross, 330 feet long and 222 feet wide. The dome is the great feature of the building, and is seen from all parts of the city. It is 70 feet in diameter at its base, and the summit is 210 feet from the floor of the church. The exterior height of the dome to the top of the cross is 250 feet.

The palace of the Roman Catholic archbishop of Montreal adjoins the cathedral to the south.

The church of Notre-Dame-de-Bonsecours, situated on St. Paul street, at the east end of Bonsecours Market, is historically, perhaps, the most important of Montreal's churches. It was named Bonsecours to commemorate the many escapes of the colony from destruction by the Iroquois Indians. It was the first stone church in Montreal. The

Christ Church Cathedral (Anglican).

foundations were laid about 1657, by the celebrated Sister Bourgeois.

The church of the Gesù, on Bleury street, is a favorite resort of visitors on account of the beauty of its frescoes, and the exquisite music of its choral services.

Christ Church Cathedral (Anglican), situated on the north side of St. Catherine street, between University street and Union avenue, is the Episcopal parish church of Montreal. It is, architecturally, the finest church edifice in the city, and is an excellent specimen of the decorated Gothic style. It was built in 1859, under the *régime* of Bishop Fulford, a marble bust of whom stands in the left transept, and to whose memory there is erected in the churchyard a fine monument similar to the Martyrs' Memorial in Oxford. The spire, built entirely of stone, the only one of the kind in Canada, is 211 feet high.

The Presbyterians have about twenty churches in Montreal, some of them handsome architectural structures built by wealthy congregations; notably, St. Paul's, Knox, Crescent street, and the American Presbyterian Church, all on Dorchester street; St. Andrew's, on Beaver Hall Hill, and Erskine Church, on Sherbrooke street.

St. James Methodist Church, on St. Catherine street, is one of the largest Protestant churches in the city.

The Seats of Learning. McGill University grounds lie at the foot of the slope of Mount Royal.

Close to grounds are situated the Royal Victoria College (for the Donalda Department), the building of the Faculty of Comparative Medicine and Veterinary Science, the Gymnasium, and the four affiliated theological colleges—Diocesan, Presbyterian, Wesleyan and Congregational.

The modern buildings are magnificent in their architecture and unrivalled in their equipment. The princely munificence of Sir William McDonald has erected and endowed the Physics building and the Chemistry laboratories. It is said by experts that these are unsurpassed, not only on this continent, but in the world. In 1836 Lord Strathcona and Mount Royal, Chancellor of the University, endowed the Royal Victoria College for the instruction of women in the Arts course. In addition to the endowment of one million dollars, he built the college at a cost of three hundred thousand dollars.

Laval University is situated on St. Denis street, one of the chief thoroughfares of the eastern part of the city. It is a handsome building in modern Renaissance style, with a frontage of 190 feet. Laval University was founded in 1852 at Quebec by the Seminary of that city, who gave it the name of the founder, François de Montmorency-Laval.

The College of Montreal, or *Petit Séminaire*, is the junior branch of the Seminary of St. Sulpice, and is situated on Sherbrooke street, to the west of Guy street.

Behind the college, farther up the hill, stands the old country house of the Seminary, and still farther up is the handsome structure built as the headquarters of the order. The village of the Indian converts stood in a walled enclosure to the east. The two towers which remain standing, in an excellent state of preservation, formed originally a portion of the wall. One of the old towers was used, in early times, as a chapel for the Indian mission, and the other as a school. A tablet on the chapel tower bears this inscription: "Here rest the mortal remains of François Thoronhiongo, Huron; baptized by the Reverend Père de Brébeuf. He was, by his piety and by his probity, the example of Christians and the admiration of the unbelievers; he died, aged about 100 years, the 21st, April, 1690." This Père de Brébeuf, along with Père Lalement, was tortured to death by the Iroquois with every cruelty devisable.

The school held in the other tower had at one time a very famous native teacher. She was called "the Schoolmistress of the Mountain," and a memorial is erected to her memory: "Here rest the mortal remains of Marie-Thérèse Gaunansagouas of the Congregation of Notre-Dame.

Above the door of the western wing is the legend, "*Hic Evangelizantur Indi*"—"Here the Indians were evangelized." Two tablets are seen on the wall on Sherbrooke street: the one to the west stating that the Indian mission was founded in 1677, and recording some facts about the towers; the other to the east marking the position of General Amherst's army at the time of the surrender of the town to Britain.

There are many large public institutions in Montreal, offering interest to strangers visiting the city. The hospitals bear witness to the benevolence of the citizens; and the equipment and character of these institutions show that Canada is

in the front rank of surgical and medical science. Very notable among them is the Montreal General Hospital, established 1818, situated towards the eastern end of Dorchester street.

Hospitals and Asylums.

The Royal Victoria Hospital was founded in the year 1887, in commemoration of the jubilee of Her Majesty the late Queen Victoria. The founders, Lord Mount Stephen and Lord Strathcona, each contributed one million dollars for its erection, equipment and endowment.

Towers in the Grounds of Montreal College, Sherbrooke Street, probably the Oldest Structure in Montreal, dating back some 250 years.

The Hôtel-Dieu St.-Joseph-de-Ville-Marie is the oldest and largest of the Roman Catholic hospitals in the city. It is situated on Pine avenue, on land given by Benoit and Gabriel Basset. It was founded in 1644, by M^{lle} Mance, whose name is inseparable from the early history of the city.

The following tablet: "Hôtel-Dieu de Ville-Marie, founded in 1644 by Jeanne Mance. Transferred in 1861 to this land, given by Benoit and Gabriel Basset. Removal of the remains of Jeanne Mance and 178 nuns, 1861," records the occupation of the present site. Jeanne Mance forms the subject of one

of the groups at the base of the statue on Place d'Armes. She is represented as tying up a child's cut finger.

The order of the nuns of the Hôtel-Dieu is known as "the Black Nuns." Those who take the full vows never leave the premises.

The Notre-Dame Hospital, situated on Notre-Dame street, close to the Canadian Pacific Railway Station at Place Viger, was established in 1880. It is managed by Roman Catholics, but its doors are open to all.

The Grey Nunnery, so called from the dress of its community, is situated on Dorchester street, to the west of Guy street. It was founded in 1692, when Louis XIV of France, had granted, by letters-patent, to the Bishop of Quebec, the governor and their successors, power to establish general hospitals and other similar institutions. Over the gateway of the new building is placed the inscription: "Hôpital général des Sœurs Grises. Fondé en 1775. Mon père et ma mère m'ont abandonné, mais le Seigneur m'a recueilli. Ps. 26."

In a corner of the grounds is a red cross which marks a murderer's grave. For the killing of an old man and his wife, for their money, this murderer, Belisle by name, was arrested, tried, convicted and condemned "to torture ordinary and extraordinary, and then to have his arms, legs, thighs and ribs broken, alive, on a scaffold to be erected in the market-place of this city, then put on a rack, his face towards the sky, to be left to die." The sentence was carried out, and the mutilated body buried in Guy street, near where the red cross stands.

**Montreal's
Pleasure-grounds.**

Montreal has many pleasure-grounds, and its parks and squares are laid out with good taste. There are three large public parks—Mount Royal, St. Helen's Island and Parc Lafontaine.

Mount Royal is an ideal crown for a city. Rising directly behind the city, it is covered to the summit with beautiful trees, under whose grateful foliage thousands find a cool and quiet spot. From the summit may be had a most enchanting panoramic view of the valleys of the St. Lawrence and Ottawa rivers and of the island itself. Unquestionably the finest view is obtained from the "Look-out."

Mount Royal is of volcanic origin. The crater of Mount

Entrance to the Sem nary of St. Sulpice.

St. Patrick's Church.

Chapel of the Grey Nuns.

Hotel-Dieu.

Royal is on the top of the hill, and there is a prophecy that one day it will become active and bury Montreal in its ashes. From the Observatory can be seen, to the west, the Lake of the Two mountains, with the various branches of the Ottawa by which it pours its waters into the St. Lawrence, and beyond that the Laurentian mountains, the oldest hills known to geology.

Mount Royal is about nine hundred feet above the sea, and seven hundred and forty feet above the river. The portion set apart as a park contains four hundred and sixty-four acres.

On the opposite side of the mountain from the city are the cemeteries.

Alongside the Protestant cemetery to the south, on another face of the mountain-slope, lies the Roman Catholic cemetery. Here stands the Patriots' Monument to commemorate those who fell in the rebellion of 1837.

The park on the island of St. Helen, containing 128 acres, was granted by the Government to the city in 1874. The island is about a mile from the city, and is reached by a steam-ferry. It was named by Champlain after his wife, Hélène de Bouilli, and bought by him with her dowry. Under the early British *régime* the island was made a garrison. A portion is still reserved for military purposes. The old fort is extremely well preserved, as is also an ancient wooden block-house situated on the crown of the hill. It was upon St. Helen's Island that Chevalier de Lévis, commanding the last French army in Canada, burned his flags (September 8, 1760), rather than surrender them to General Amherst, who took the city.

Lafontaine Park, containing 84½ acres, lies at the east end of Sherbrooke street.

Dominion Square is the largest and most beautiful of the public squares. To the east is the building of the Young Men's Christian Association, constructed of brick, with facings of grey stone, in the style of Queen Anne. On the southern part of the square is the statue of the late Sir John Macdonald, and two cannons taken from the Russians in the Crimean war. To the east stands St. James' and to the west are St. George's Episcopal and the Dominion Square Methodist churches.

At the south-west corner is seen the Canadian Pacific Railway Station and general offices.

St. James Methodist Church,

St. Paul's Church (Presbyterian).

St. George's Church (Anglican)

Phillips Square lies at a short distance eastward on St. Catherine street. The Art Gallery, on the east side, will well repay a visit.

"Our Handicrafts Shop," under the management of the Woman's Art Association, shows *habitant* homespun, Douk-hobor and Galician embroideries and Indian work.

Southwards, at the foot of Beaver Hall Hill, is Victoria Square. On the way down are passed, on the right, St. Andrew's Presbyterian and, on the left, the Unitarian Church, on which is the tablet: "Here stood Beaver Hall, built 1800, burnt 1848, mansion of Joseph Frobisher, one of the founders of the North-West Company, which made Montreal for forty years the fur-trading centre of America."

On Victoria Square, stands the beautiful bronze statue of Queen Victoria, from which the square is named.

**A Bit of
Old Montreal.**

Eastward along St. James street is the Place d'Armes. In the centre stands the bronze statue of de Maisonneuve, above a granite pedestal on which is inscribed: "Paul de Chomedey de Maisonneuve, founder of Montreal, 1642." There are four *bas-reliefs* on the pedestal, representing (1) the founding of Ville-Marie; (2) de Maisonneuve killing the Indian chief; (3) the death of Dollard; and (4) the first Mass. Four full-sized figures stand at the corners: an Indian of the Iroquois tribe; a soldier, LeMoyne; a colonist, Closse, with his dog, and Jeanne Mance, tying up a child's wounded hand. The statue, by Hébert, a Canadian, is one of the finest pieces of sculpture on the continent. Notre-Dame Church and the Seminary of St. Sulpice stand on the south side, while on the opposite side of the square is the Imperial Insurance building, on the wall of which are two tablets; "Near this square, afterwards named La Place d'Armes, the founders of Ville-Marie first encountered the Iroquois, whom they defeated, Chomedey de Maisonneuve killing the chief with his own hand, 30th March, 1644." "This building is erected on part of the original concession made to Urbair Tessier named Lavigne, this being the second lot granted to an individual on the island of Montreal." To the west is the

Bank of Montreal, the oldest Bank in Canada, organized in 1817. It is a fine specimen of Corinthian architecture. The stone fortifications of Ville-Marie extended from Dalhousie Square through this site to McGill street, thence south to Commissioners street, and along the latter to the before-mentioned square. Begun 1712 by Chaussegros de Léry, demolished 1817. To the west of the bank is the massive building of the General Post Office. In this square the French laid down their arms to the British, under General

Maisonneuve Monument, Montreal.

Amherst, in 1760. On a house at the south-east corner of the

square is another tablet: "Here lived, in 1675, Daniel de Grésolon, sieur Duluth, one of the explorers of the Upper Mississippi, after whom the city of Duluth was named."

Further east is the Champ-de-Mars. It is situated on the slope from Craig street up to Notre-Dame street, at the east end of St. James Street. Here the British regiments stationed in the city paraded, and it is still used as a parade-ground by our volunteers. On Craig street, opposite, is the Drill-hall, capable of holding fifteen thousand people. At the top of the ridge are the massive buildings of the Court House, the City Hall, and the Provincial Government House, which was formerly the residence of the Honorable Peter McGill, who was, in 1840, the first British mayor of Montreal. Here was the old Jesuit monastery, which was successively used as military quarters, gaol and court house. The present building was erected in 1856. Two tablets here are interesting: "The Père Charlevoix, historian of La Nouvelle France, 1725." "Here stood the church, chapel and residence of the Jesuit Fathers. Built 1692, occupied as military headquarters 1800, burnt 1803. Charlevoix and Lafitue, among others, sojourned here. On the square in front four Iroquois suffered death by fire, in reprisal, by order of Frontenac, 1696. Here stood also the town pillory. The City Hall is a large and handsome building, with a striking tower and heavy corner turrets, and cost in the neighborhood of \$525,000. On the wall is the tablet: "To Jacques Cartier, celebrated navigator of St. Malo. Discovered Canada and named the St. Lawrence, 1534-1535."

In front on the river slope of the ridge, is Jacques Cartier Square, at the upper end of which stands Nelson's monument. This tall column, surmounted by a statue of Lord Nelson, was erected by public subscription in 1809. The square is used as an open market. In a house to the east lived the Honorable James McGill; on it is a tablet: "The residence of the Honorable James McGill, founder of McGill University, 1744-1813."

Adjoining this is the famous Château de Ramezay. It is now the museum, containing many interesting relics. Two tablets on its walls set forth its history: "Château de Ramezay, Built about 1705 by Claude de Ramezay, governor of Montreal, 1703. Headquarters of La Compagnie des Indes, 1745. Official residence of the British governors after the

Young Men's Christian Association Building.

cession. Headquarters of the American Army, 1775; of the Special Council, 1837." In 1775 this château was the headquarters of the American Brigadier-General Wooster, and here, in 1776, under General Benedict Arnold, the Commissioners of Congress—Benjamin Franklin, Samuel Chase, and Charles Carroll of Carrolton—held council." Here Franklin set up his printing press and printed "The Gazette," which still continues as a Montreal daily paper. In the council room Lord Elgin signed the Rebellion Losses Bill, after the rebellion of 1837.

Place Viger is situated on Craig street. It was named after Commander Viger, the first mayor of the city. The chief French residential quarter lies to the north, up St. Denis and the neighboring streets. Opposite the square, on Craig street, stands the Canadian Pacific Station and magnificent Place Viger Hotel. This is a handsome building of red sandstone, and, like the Frontenac at Quebec and other hotels of the Canadian Pacific Railway, affords first-class accommodation to the tourist.

Chateau de Ramosay

The ancient fortifications of the city, of which relics here and there are still to be seen—notably at the Champ-de-Mars—extended from Dalhousie Square on the east to McGill street on the west. On the north, a bastioned stone wall ran along what is now Fortification lane, while the water-front was also fortified. At the corner of Notre-Dame and McGill streets is the following tablet: “Récóllets Gate. By this gate Amherst took possession, 8th September, 1760. General Hull, U. S. Army, 25 officers, 350 men, entered prisoners of war, 20th September, 1812.”

The squares, reserved in the various districts of the city, have a total area of $47\frac{1}{4}$ acres: and along with the public parks, have an estimated value of \$7,238,500.

The water supply of the city is good. Powerful engines raise the water of the river to two reservoirs on the side of the mountain.

The streets cross one another at right angles. There are in all 82 miles of streets in the city. Of these 45 are covered by electric car lines.

The Bonsecours Market, situated on the water-front, near Jacques Cartier Square, is one of the city's sights, on a market day, presenting as it does the unique scenes of French provincial life. Thither flock, on Tuesdays and Fridays, the country *habitants* with their little carts and homespun clothing. Amid the jabber of the Norman *patois*, and preposterous haggling worthy of Italy, over the *trente sous*, the *neuf francs*, or the *un cen*, one catches glimpses, through the jostling crowds, of piles of wooden shoes, of brilliant stripes of native-rag carpet, of home-made chairs, or olive-wood rosaries and metal charms, exposed for sale; and at Easter-tide the display of enormous oxen, decorated with paper roses, green, yellow and red, delight the hearts of the children and peasants.

The management of the harbor of Montreal is under the control of an efficient Board of Commissioners, with the Hon. Senator Mackay as President. The work done annually by the Trust regarding improvements to the harbor is of the most arduous nature, and the time devoted to the welfare and growth of the port by the members of the Board is given at a sacrifice to personal and business interests. The Trust has accomplished a great national work, which the citizens of Montreal gratefully recognise.

Fish and Game.

While hundreds of sportsmen from the United States and Great Britain each year visit Canada's magnificent forests, lakes, rivers and streams, who can tell even as well as the native himself the advantages of this or that section as regards the deer, the moose, the trout, the ouananiche, or the small-mouth bass, and there are still thousands devoted to the reel and rifle who are utterly ignorant of what the territory north of the 45th parallel has to offer.

First of all, fishing and hunting in Canada is an inexpensive sport, as compared with other sections of the continent; particularly if it is gone about in the right manner. If the luxury of a guide is demanded, the pay runs from \$1 to \$3 per day, according to locality, but never more. Throughout the Province of Quebec, Jean-Baptiste and his good wife keep the hostelry, and a dollar a day or thereabouts is the maximum charge. The little hotel over which he presides is ordinarily comfortable, but never fashionable, and nine o'clock at night finds the household, including the tired fisherman, sound asleep.

For trout, speckled and grey, the Laurentians open up to the sportsman a delightful territory, being on the lines of the Canadian Pacific Railway, within a day's ride of the city. For trout and for the small-mouth bass, often called the prince of American game-fish, that vast field for the angler known as "Highlands of Ontario" is readily accessible by the Grand Trunk Railway. If ouananiche, spoken as the land-locked salmon, are the quest, then the journey continues on from Montreal to the Lake St. John country.

Within a ride of an hour or two of Montreal, black bass, doré and maskinongé fishing can be obtained which would warm the heart of the average angler.

Brome lake, near Knowlton, is famous for its large black bass; Lake Memphremagog, partly in the Province of Quebec and partly in Vermont, for large grey trout and pickerel. The waters in this latter section are well filled with speckled trout. Again, there are various points on the Ottawa river where bass and maskinongé fishing is unexcelled, the latter running up to sixty pounds in weight.

To the north of Montreal, in what is known as the St. Agathe region, are literally hundreds of lakes which abound with fish. An advantage here, also, is the fact that practically any point in the district may be reached in a day's journey.

In the autumn, red deer, partridge and duck also abound in this section, and here are to be seen vast stretches of country in which the settler is unknown and where the woodman's axe has yet to ring.

Windsor St. Station, Canadian Pacific Railway.

The "Highlands of Ontario," already referred to, are reached by the northern division of the Grand Trunk Railway running from Toronto to North Bay. The lake country presents unrivalled facilities for hunting, fishing and camping. Another district, east, known as the Haliburton region, but included in the high altitude of the Highlands, is the haunt of some of the largest speckled trout on the continent, running as high as eight pounds each.

The domain occupied by the fish and game cover so many hundreds of thousands of acres, that no one need feel that his pet pool or favorite lake will be infested by a crowd of eager, and perhaps noisy, sportsmen. Then again, the quantity and quality of the sport is in accord with the wide domain. In the cold waters of these northern lakes and rivers, not only do the fish thrive, but grow larger and gamier than in any other section of the continent. A well-known writer on fishing in Canadian waters has described the ouananiche as an "India-rubber idiot on a spree." This might be applied nearly as well to the other game-fish of these northern waters; and all we can say is, "Come and see for yourself."

Grand Trunk Railway Station.

There are thirty-three chartered banks in Canada, with an authorized capital of \$100,246,666, and a paid-up capital of \$80,078,420. Montreal being the great commercial centre of the Dominion, has the head offices of a number of the banks or branches of all the most important of these financial institutions.

The Province of Quebec is governed by a Lieutenant-Governor, a Legislative Council and a Legislative Assembly. The first two branches named are appointed, and the members of the Assembly are elected by the people. The Hon. Lomer Gouin has just become the Prime Minister of the Province. He is a citizen of Montreal, and has for some years been one of the city's representatives in the Assembly. Recognized by French and English alike as a man of great ability, with sterling principles of honesty and integrity, he brings in his new position a great honor to the commercial metropolis of Canada.

THE CORONA HOTEL

THE CORONA is the West End Hotel de Luxe of Montreal. This hotel is conducted on the European plan, and is the only one of the kind in the city. It is removed from the bustle and noise of the metropolis, and fills a long felt need for the comfort of the Tourist and Traveller. It is a cut stone building—fire-proof, and specially constructed for CONVENIENCE and COMFORT. The rooms are large and airy, and the fittings and furnishings of the finest—telephones in each room, and the service is first-class in every respect. The hotel is situated on Guy street, near St. Catherine street, at the foot of Mount Royal, and on the Electric Car Lines.

DONT FAIL TO VISIT

"THE WIGWAM,"

138 PEEL STREET,

Between St. Catherine Street and the Windsor Hall,
opposite Dominion Square.

INDIAN CURIOS—In Moccasins, Snowshoes, Canoes, Baskets,
Pipes, Leather Goods, etc.

SOUVENIR JEWELLERY—The Largest Display in Canada.

Wedgewood, Doulton, and Royal Austrian China.

Burnt Leather Novelties! Hand-painted Indian
Pillow Covers, Placques, annerettes, &c., &c.

VIEWS OF MONTREAL! In Photos, View Books, &c.

Also, Clarke's "**MONTREAL**," the best souvenir of our city,
elegantly bound, with **125 Beautiful Illustrations**. Price,
50c., \$1 00 and \$1.75 each.

SOUVENIR POSTAL CARDS! All the Latest.

"THE WIGWAM"

Is located at 138 Peel Street, First block north of Windsor
Hotel, near St. Catherine Street.

WHEN YOU MAY FISH AND HUNT

PROVINCE OF QUEBEC

Caribou.—From the 1st of September to the 1st of February.

Deer and moose.—From the 1st of September to 1st of January.

Deer and moose, counties of Ottawa and Pontiac. — From 1st Oc-
tober to 1st December.

It is forbidden to hunt, kill, or take, at any time, the young of
caribou, deer or moose of one year of age or less. Also to hunt, kill or
take at any time any cow moose or doe.

Beaver.—At any time after the 1st day of November, 1903.

Mink, otter, marten, pekan, fox and lynx.—From the 1st of Novem-
ber to 1st of April.

Hare.—From 1st November to 1st of February.

Bear.—From 20th August to 1st July.

Muskrat.—from 1st April to 1st May.

Woodcock, snipe, plover, curlew, tatter or sand-piper.—From 1st
of September to 1st of February.

Birch or spruce partridge.— From first of September to 15th of
December.

Widgeon, teal, wild duck of any kind.—From 1st of September to
1st of April.

Sheldrake, loons, gulls, eagles, falcons, hawks and other birds of
the falconidæ are not protected.

It is forbidden to take nests or eggs of wild birds at any time of the
year.

Line fishing, and rod-and-line fishing, are alone permitted in navigable waters, and the rod-and-line fishing only is permitted in the non-navigable waters of the Province of Quebec.

Any person not having his domicile in the Province, who desires to fish therein, must, before beginning to fish, procure a special license to that effect from the Commissioner, or from any other person authorized for that purpose.

Fees for license for non residents are as follows :

For one day or more, per day.....	\$ 1.00
For one month.....	10.00
For two months	15.00
For three months.....	20.00

Bona fide active members of the clubs duly incorporated under the laws of the Province, or licensees of the fishing territory, have no license to pay to fish in their territory.

The fishing rights do not give non-residents the privilege to hunt.

OPEN SEASON FOR FISH

Bass.—From 16th June to 15 of April.

Maskinongé.—From 2nd of July to 25th of May.

Pickereel (doré).—From 16th of May to 15th of April.

Salmon.—From 2nd of February to 15th of August.

Speckled trout.—From 1st of May to 1st of October.

Grey trout, lake trout or lunge.—From 2nd of December to 15th of October.

Whitefish.—From 2nd of September to 10th of November.

Ouananiche.—From 2nd of December to 15th of September.

**The St. Lawrence
Below Montreal.**

Boucherville, situated on the south shore of the St. Lawrence, a few miles below Montreal, was, in the old French *régime*, known as Fort St. Louis. Here on May 20, 1668, Father Marquette, the discoverer of the Mississippi, baptized a baby Indian girl, and that baptism appears at the head of the first register of the parish. The original, in the hand of the famous Jesuit, is still to be seen in the parish church.

The Lower St. Lawrence, specially attractive to those seeking pleasant summer quarters and to the lovers of the rod and gun, is reached by the Intercolonial Railway, running down the south side of the river. On the way are passed St. Hyacinthe, a summer resort, and Drummondville, in whose neighborhood good trout fishing may be had. Thence the line runs through twenty-eight miles of forest abounding in deer and caribou. At Lévis the river is reached, whence are seen the heights at Sillery, the Plains of Abraham, and Quebec itself. The city is beyond description. It is unique among the cities of the continent. To one coming from the

busy West and South, everything here is strange and new ; for, despite its commercial progress, the past and present seem inseparably interwoven. Quebec of to-day reminds one at every turn of the centuries dead and gone.

Club St. Denis.

St. James' Club.

For hundreds of miles below the country is purely French-Canadian. The farms are long and narrow, with quaint cottages and low barns. Beyond this is the district of summer resorts, each with its own peculiar feature to commend it to the pleasure seeker.

Murray Bay, on the opposite side of the river, amidst magnificent surroundings, with cool and invigorating ocean breezes, is more accessible this year than heretofore, owing to the construction of the new shore line from Rivière Ouelle to Rivière Ouelle wharf, thence by steamer across the broad St. Lawrence. This new route saves many hours of travel. The new hotel, the "Manoir Richelieu," completes Murray Bay as an ideal summer resort

Rivière-du-Loup, besides being a favorite watering-place, is a centre from which various points on the river or in the forests can be easily reached. A railway runs inland here to Temiscouata Lake, where good fishing for tuladi and trout can be had. Steamers ply from Rivière-du-Loup to the watering places on the north side of the St. Lawrence—Murray Bay, Tadousac and the Saguenay river. One of the most remarkable of nature's works on the continent is the Saguenay river. As Bayard Taylor says: "It is a natural chasm, like that of the Jordan Valley and the Dead Sea, cleft for sixty miles through the heart of a mountain wilderness."

Cacouna is one of the most popular places on the river. Bic is, perhaps, the prettiest spot on the south shore, and has often been called the Switzerland of Canada. Rimouski and Little Metis are farther down the river, and at about this point the Railway strikes inland to the beautiful valley of the Matapedia, so justly famous for its salmon rivers. Below this lies the home of the moose, the deer and the caribou. Here also are the rivers Repêche, Mipisquit and Miramichi, abounding in salmon and trout. At Moncton is to be seen the wonderful tidal-bore on the Peticodiac river. Here a branch of the railway runs to St. John, and another branch to Pointe-du-chêne, whence Prince Edward Island can be reached by boat. This beautiful island can also be reached by rail to Pictou and thence by boat to Charlottetown, the capital. The main line of railway ends at Halifax, well known as one of the military and naval depôts of the British Empire. From Truro, on this line, a branch runs to Cape Breton Island, and through the island to Sydney. This island has lately risen into importance through its rich coal-fields. Here are also many charming summer resorts, such as Baddeck, on the Bras d'Or lakes.

On Dominion Square, one of the most prominent structures, is the splendid cut-stone pile of the Windsor Station—headquarters worthy of the Canadian Pacific Railway, the greatest transportation company in the world. It controls 10,000 miles of lines, stretches from the Atlantic to the Pacific, and has fleets of fine vessels regularly plying on both oceans. On the Atlantic its ships keep up a regular service between Montreal, Quebec or St. John, N. B., and London, Liverpool, Bristol and Antwerp, and on the Pacific between Vancouver and Victoria, B. C., and the Orient,

Scenes on the Canada Atlantic Railway.

Skagway and Seattle, while the steamers of the Canadian-Australian line run in close connection with its trains, to Australasia.

Besides the Windsor Station, it has another fine depot in the east end of the city, on Place Viger. Here arrive the trains from Quebec, the Nomingue branch through the Laurentians and the north shore route to Ottawa. The Windsor Station, however, is the centre of the whole system, for it is the point of departure and arrival of the regular trans-continental trains, and of the "Short Line" trains that connect Montreal with the Maritime Provinces, Halifax and St. John, the winter terminus of the Atlantic steamship service. Here, too, arrive and depart the trains for New York, Boston and Toronto.

Iona Islands, Bras d'Or Lakes, Cape Breton, Nova Scotia.

Such a system touches many points of interest to the tourist. Quebec, Montreal and the Maritime Provinces unite scenic and historic interest. From Toronto, Niagara and the "Garden of Canada" may be visited. The sportsman will seek the St. Maurice and Gatineau valleys for big game, and Timiskaming and Mississaga for fishing and canoeing, while the Laurentians afford most pleasant outings. At Desbarats the Indian play, "Hiawatha," and at Rat Portage the lovely

Lake of the woods attract much interest, and Winnipeg and the prairies shew a nation in the making—a process the Canadian Pacific Railway is doing much to foster. The Canadian Rockies are famous the world over, and are all the more accessible by reason of the double daily transcontinental train service, including the Imperial Limited express, and the chain of fine hotels the Canadian Pacific has instituted. Banff, Lake Louise, Field, Emerald Lake, the Yoho valley and Glacier are the favorite points for tourists; while the sportsman will find Sicamous, on Shuswap Lake, one of the most attractive spots. The whole of British Columbia, however, is an excellent country for the angler or the lover of big game. Vancouver and Victoria are most picturesquely situated, and he who crosses the continent in the Imperial Limited or express trains of this great Canadian company will find it one of the most interesting and delightful trips imaginable.

Montreal is the headquarters of one of the oldest railroads, not only of America, but of the world. Railroading was in its infancy when, in 1851, the Grand Trunk Railway Company obtained its charter, and it was only two years later that the line from Montreal to Portland, Me., a distance of two hundred and ninety-seven miles was opened—a remarkable record for those early days. This vigorous and progressive beginning was kept up, and the main line to Toronto was opened in 1856, and continued to Sarnia in 1858. The next great step was the purchase of the Chicago and Port Huron Line, which opened communication from the great city on the Lake to Montreal, and thence to the Atlantic Ocean, at Portland. Further details of the progress of this huge corporation, interesting as they are, must be left, and it will be sufficient to say that the Grand Trunk System to-day has a mileage of four thousand one hundred and seventy-nine miles; that it covers with its iron network the states of Illinois and Michigan; that it touches every town of importance in the provinces of Ontario and Quebec, and that the original section through Vermont, New Hampshire and Maine carries a yearly increasing number of pleasure-seekers to the seaside resorts of the Atlantic coast. It also reaches all the principal ports on Lake Erie, Huron and Georgian Bay as well as leading industrial centres; taps the rich farming section and holds important traffic relations through its own connecting lines with the United States through Port Huron, Detroit, Suspen-

sion and International Bridges ; and by a recent arrangement with the Canadian Government has under way the construction of a transcontinental line from the Atlantic to the Pacific Ocean, all on Canadian soil. It receives inland water freight on lakes Huron, Michigan, Erie and Ontario ; it taps both inland ocean navigation at Montreal, and it meets the great ocean liners at Quebec, Montreal and Portland.

Naturally, a railroad system with such a mileage and with such varied connections offers a wide range of attraction to the tourist, every taste finding something to satisfy it. The vast expanse of inland seas, the varied beauty of wooded Islands, the shimmering loveliness of lonely lakes, the foamy attractions of rapid streams, the charm of tree-clad hills, the grandeur of snow clad mountains, and the awe-inspiring Niagara Falls, are all found along this line.

Beach at Cacouna.

A trip to Montreal from the West carries the traveller past four of the world's great triumphs of engineering skill. The St. Clair tunnel is really an iron tube nineteen feet in diameter and nearly two miles long, through which the trains pass under the St. Clair river. The International bridge crossing the Niagara river at Buffalo is a vast and important piece of work. The single-arch double track steel bridge at Niagara Falls replaces the old suspension bridge which had such a world-wide fame. The new bridge is not only a wonderful structure, but it harmonizes in a marvellous way with

the natural scenery about. The span of the arch is 115 feet long and 226 feet above the river. At Montreal is the Victoria Jubilee bridge. This has replaced the old tubular bridge; and while the work was in progress it was so cleverly performed that no stoppage of traffic was necessary.

Abenakis Springs Hotel.

By taking any of the many branch lines at different points, lovely side-trips can be had, and splendid localities for fishing and shooting reached. Its lines into the northern part of Ontario lead into the wonderful scenic region of Muskoka, a name already well known among tourists and lovers of beautiful scenery. Here are lakes and streams, varied in character but uniform in beauty, which make a trip through this district a continual panorama of loveliness.

Young Women's Christian Association
Building, Montreal.

The yachting centres of the Richelieu and of Lake St. Louis, where the international races are held, are all reached by this line. Perhaps the most enjoyable of the outings in the vicinity of Montreal is the trip down the Lachine rapids. The experience is unique, and those who "shoot" the rapids for the first time experience the sensation of having come safely through some dangerous pass. This is considered

to be one of the feats of navigation of the world.

The rolling-stock and road-bed of this company are in excellent condition, and everything is done for the comfort and convenience of their passengers. One of the finest structures in Montreal is the general offices of the Grand Trunk Railway System, on McGill street, and which is well worthy of a visit.

The Abenakis Springs is one of Canada's best known pleasure and health resorts. These mineral springs rival those of Europe in health-giving qualities, so much so, that they are known as "the Carlsbad of Canada." For centuries the Indians have referred to these waters as the "Water of Life," because of its wonderful curative properties. The hotel accommodation is excellent and the surroundings of the St. François River, Lake St. Peter, etc., delightful.

The Canada Atlantic Railway from Montreal to Ottawa, and thence across to Parry Sound, carries the tourist through the famous Algonquin National Park of Canada. This Park is a reserve of over two thousand square miles set apart by the Ontario Government for all time to come, "for the benefit and enjoyment of the people." It lies between the Georgian Bay and the Ottawa river, south of Lake Nipissing. It is one of the most remarkable regions of lake and stream, primeval forest and rock, that can be found anywhere. It is a great game-preserve, a fisherman's paradise, a source of water sup-

The Restigouche River, New Brunswick.

ply, a field for reforestry, and a natural sanitarium. No less than one thousand lakes make the reservation a veritable lake-land, if the expression may be used. The largest is Great Opeongo, and the highest is Caché Lake, which is 1837 feet above the sea-level. The elevation of this territory consequently is much greater than any other district in Canada east of the Rocky Mountains. On the shore of Opeongo is the burial place of the Algonquin Indians, who formerly inhabited the district.

Nature intended a region so wooded and watered to be the haunt of fish, birds, game and fur-bearing animals, and, under the wise protection of the Ontario Government, hundreds of strong colonies of beaver, otter, marten and mink are to be found within the protected limits. The lordly moose and red deer are found in large numbers. Fish are plentiful and various kinds are cultivated in all the waters. Good portage roads have been made, and forty-eight shelter-huts have been built in various parts of the convenience of the rangers and the public. A map has been issued by the Government showing the canoe routes, portages and situation of huts. Licenses to fish with rod and line only, and to make a tour through the park, may be had, without charge, on application to the Superintendent, Mr. G. W. Bartlett, at Algonquin Park, P. O., Ontario.

**The historical
Ottawa.**

The Ottawa river, known to old *voyageurs* and early settlers as the Grand River, is upwards of six hundred miles long, and has twenty large tributaries.

At the Chute-à-Blondeau—*au pied du Long-Sault*—Dollard des Ormeux and his brave Frenchmen perished in 1660, in their stand against the Iroquois.

At St. Anne, where the Ottawa empties into the St. Lawrence, stands the house in which Tom Moore, the great Irish poet, resided in 1805. Here he wrote the "Canadian Boat Song," and the old house has seen no change from that day to this.

**Montreal a
Sporting Centre.**

Montreal has much to offer in the way of recreation, being the sporting centre of the Dominion and at all seasons of the year appropriate contests may be seen. In Montreal will be found pastimes peculiar to Canada, and in no other city on the continent are these particular games played with such a degree of skill. The Minto Cup, emblematic of the championship of the world in lacrosse, is held by

a Montreal club; and the Royal St. Lawrence Yacht Club holds the Seawanhaka International Challenge Cup, which is to twenty-five footers what the America's Cup is to the gigantic ninety-footers.

Lacrosse is the national game of the country, and its season extends from May until October. Hockey is the national winter game, and is played on ice from December until March. In addition to these distinctly Canadian games, football (both Rugby and Association,) cricket, golf, polo, yachting, rowing and canoeing flourish, and all field sports

General Offices of the Grand Trunk Railway System.

are well patronized. Ice racing is a feature of winter sports; while for tobogganing and skating no city in the universe furnishes such opportunities for three months in the year.

Montreal is the home of three athletic associations—the Montreal Amateur Athletic Association, the Shamrock Amateur Athletic Association, and National Amateur Athletic Association; the latter being the foremost French-Canadian club of the country. Each possesses well equipped grounds. The Montreal Amateur Athletic Association has an excellent cinder-track, where on alternate years, the Canadian amateur championships are contested. In the winter this immense athletic oval is turned into an open-air skating

rink, with a quarter-mile track. By an arrangement with the National Amateur Skating Association of America, the speed-skating championships of the continent take place on this track every second year.

In small yacht racing Montreal designers, builders and sailors hold an eminent position. Lake St. Louis is within easy access of the city, and affords a magnificent course for sailing. The home of the Royal St. Lawrence Yacht Club is at Dorval, and it is here that the Seawanhaka Cup is kept. This trophy of international fame was won from the Seawanhaka-Corinthian Yacht Club of New York, and has been successfully defended against American and English challengers since its arrival here.

Cross-country riding is extremely popular, and there are two hunt clubs which furnish sport of this character. The Montreal Hunt and the Canadian Hunt are both flourishing organizations. The former is one of the oldest hunt clubs on the continent, standing second in point of age. The Canadian hunt while a younger organization, also possesses an excellent pack of hounds and many riders. The country about Montreal is particularly well adapted for fox-hunting.

Golf has become a favorite pastime, and Montreal is, indeed, well favored, and devotees of the ancient game have no lack of courses, there being no less than six of them in the city, or else within convenient access.

Tourists are invited to call at the Information Bureau of the Montreal Business Men's League. The advantages offered to strangers are free of charge and correspondence receives attention.

The address may be used by tourists for letters and telegrams. Side trips and accommodation arranged for; information about the city and all Canadian places of interest furnished on application. Shopping lists furnished.

Any information required as to these resorts can be obtained by addressing the office of the Montreal Business Men's League.

THE NEW YORK CENTRAL

Is getting to be a very strong ally of Canadian Institutions, reaching Montreal by its own line through the Adirondack Mountains, *via* Utica and Malone; by its Rutland line on the east side of Lake Champlain, passing through Manchester, Rutland and Burlington, and by the Delaware & Hudson, *via* Albany; and it also reaches Ottawa by its newly acquired New York & Ottawa Line.

The NEW YORK CENTRAL reaches Toronto by the Toronto, Hamilton & Buffalo R. R. and connections, and its Michigan Central line passes through Ontario between Niagara Falls and Detroit.

The system of the NEW YORK CENTRAL Lines now covers over **12,000 Miles of Railway** east of Chicago and St. Louis, with New York, Boston and Montreal as its eastern terminals.

Maps and information in regard to this great central railway system of America, can be obtained upon application to MR. FRANK E. BARBOUR, General Agent, 130 St. James Street, Montreal.

A. H. SMITH,
General Manager,
