Another Report Exploded.

ROSSLAND, B. C., THURSDAY, JULY 24, 1902

A representative of The Miner called upon Bernard Macdonald yesterday afternoon at the offices of the Rossland Great Western to ascertain the accuracy or otherwise of the report, which had gained considerable circulation, to the effect that he was appointed general manager of the Le Roi.

Mr. Macdonald replied emphatically that the report was not true,

saying that he would surely know if it were. Thus another street rumor vanishes into thin air.

MUCH ORE SHIPPED FROM ROSSLAND

week ending last night is normal, with commenced burning wood at its boiler the exception that the War Eagle and plant, and has since consumed a cou-ple of carloads of this combustible Centre Star mines did not ship ore. daily. The Centre Star and War Eagle The Le Roi increased its output slight- employed the Roslyn coal, and the Le by, and the Le Roi No. 2 sent out about Roi No. 2 continued to use the electrithe same as last week, while the Giant ent out a somewhat enhanced tonnage. The facilities for handling ore are down to their ordinary basis, and the expected increase in output may take lace at any time.

During the week but little of special interest has occurred at the big mines. Work has been continued along the usual lines without variations in the strength of the crews. It is expected that after August 1 the shipments from the Le Roi dump will be substantially increased. Last week only 750 tons of dump ore were shipped, but it believed that next month the shipments from this source will be close to 500 tons daily until the whole is removed.

The Rossland mines have been more ortunate than those of the Boundary in respect to their supplies of fuel. slightest degree. When the supply of ed with much interest.

The output for the camp during the Fernie coal dropped off the Le Roi cal power as before.

THE OUTPUT. The output of ore for the week ending July 19th, and for the year to date as follows:

Le Roi No. 2.... 1500 Centre Star War Eagle..... Rossland G. W. Giant... 130 Cascade. Columbia-Kootenay Bonanza Velvet

The next few weeks are likely to be fraught with events of prime interes While the tie-up at Fernie led to the and importance to the Rossland camp. temporary closing of the Phoenix and Increased shipments, augmentations of Greenwood mines the Rossland mines working forces and other features are were scarcely interfered with in the anticipated, all of which will be await-

DOMINION SURVEY NOW AT SHEEP CREEK

Sheep Creek station is now the basis up at Cascade east, and has now of operations for the international boundary survey under the direction of W. J. O'Hara, the engineer of the topographical branch of the Dominion Geological Geological Survey, and Mr. McCoun, Survey, to whose charge the important task of defining the line of demarcation between Canada and the United States has been committed.

A day or so ago the entire party of engineers, scientists and crew, moved into camp about a mile this side of located in that vicinity for the best part joying the field work immensely. of the present week. On leaving Rossland, as described in The Miner some be in Rossland this week for the purweeks since, the party started to Midway and rapidly went over the ground between that point and the similkaen river, which was surveyed in detail last year. Returning to Cascadethe American survey party working

the vicinity of Rossland.

The survey includes Mr. O'Hara, in a naturalist, or "bugologist" as he 's facetiously termed by his colleagues Assisting Mr. McCoun is a trapper, whose work as a naturalist is practically confined to the four-footed animals and such birds as are encountered in the course of the progress of the survey. The scientists are enthusiasts Sheep Creek station and they will be their respective branches, and are en-

It is probable that Geologist Daly will pose of visiting the principal mines. The rank and file of the members of

the survey party are principally Ross land men, ex-Constable Dan McGillivray being one of the best men in the outfit. Good progress has been made jointly with the Canadian having run with the work. The camp is shifted the line between Midway and Cascade a couple of times weekly, and is moved in 1901—the detailed survey was taken eight or ten miles on each occashion.

THE LE ROI

The Colonial Goldfields Gazette of July 5 gives an account of the recent meeting of the Le Roi shareholders which will be interesting reading for

Rosslanders. It is as follows: Shareholders in the Le Rol Mining Company, Limited, would be wealthy investors if the dividends they received were on the same generous scale as the advice to which they have been treathave had the opinion of experts, of mine managers, and of their peripatetic directors, and now, at last, they have been favored with the views of the gentlemen appointed by themselves to investigate the position of the of coal mining in defence of your strugcompany and the prospects of the mine. This committee was appointed at a meeting held on May 30, so that no time has been lost in the preparation of its report. It may be remembered that at the meeting held rather more than a Neither passion nor prejudice should month ago certain unsavory accusations were made against the directors, but in the opinion of the committee spiration to the great army of men, those gentlemen are not responsible women and children in the anthracite these gentlemen are not responsible for the present position of the com- fields who are watching and praying pany, while as regards the leakage of in expectation that this assembly will official information the committee states devise some measure which shall prov that "no blame attaches to anyone" for sufficient to enable them to obtain livthe delay in publishing the cable of ing wages, and humane, American em-April 16. The military orders announce that owing to the lack of accommodations on the transport Cestrian 34 officers and 235 men remained in South Africa waiting transportation. Among the list are Lieutenant A. A. Vernon, of the Fifth C. M. R., and Veterinary Captain S. Hadwen, both of British Columbia. Judge Wetmore is appointed referse

UNITED. MINE WORKERS.

Meeting at Indianapolis Decides Not to Order General Strike. INDIANAPOLIS, Ind., July 17.-If

the voice and influence of President Mitchell of the United Mine Workers shall prevail with the members of his organization there will be no general strike of the organization. The chances of such a step now being taken are very remote. In his speech in the convention this afternoon Mr. Mitchell advised strongly against a strike, and urged that the bituminous miners continue at work and that a system of astinue at work and that a system of as-sessment upon the members of the or-der, which he outlined, be carried into effect as the best means of affording 129,336 ed during the past twelve months. They aid and support to the striking anthracite men in the east.

President Mitchell said in part: "In determining the grave question which confronts you, namely, the advisability of inaugurating a national suspension gling fellow-workmen in the anthracite section of Pennsylvania, it is imperative that you should weigh with the greatest possible care the momentous problem with which you have to deal influence your decision, whatever it may be. It should carry hope and 'non you a realization of the fact that company is largely indebted to the strikes have many adherents, and the Bank of Montreal. The committee had efficiency of such methods appeals sound financial position, or whether it public mind, but the past history of would be better at once to reconstruct the labor movements teaches lesso is that should not be forgotten today. charge of the engineering corps, Mr. ing capital by an assessment on the As far as my knowledge goes I do not shares. A majority of the members of know of one solitary sympathetic strike the committee considered that it was of any magnitude which has been successful. On the contrary, most conspi; construct, and appealed to shareholders uous among the sympathetic labor and crushing defeat.

I am firm in my conviction that the strike in the anthracite field can and will be won without repudiating our solemn contracts with the bituminous operators, providing the bituminous miners will rise to the occasion and do their full duty by their struggling fellow-workmen, and, with this in mind, I desire to submit for your consideration the following specific recommendations:

directed to appropriate \$50,000 for the relief of the anthracite miners.

2. That the unions appropriate for the same purpose as large a sum as they can afford. 3. That an assessment of \$1 per week

be levied on all members of the unions. 4. That all officers of the National shares, the shareholders to receive District drawing a salary of \$60 a month or over contribute 25 per cent of their salaries.

A DEADLY EXPLOSION.

Caused by a Miner Going Into Magazines With Lighted Candle.

PARK CITY, Utah, July 16 .- Thirtyfive miners were killed in the Daly West and Ontario mines today-twentynine in the Daly West and six in the Ontario. The disaster was the result of an explosion occasioned by John Burgy, a miner, going into one of the magazines of the Daly West with a lighted candle. His act cost him his life and the lives of many other miners besides His own body was blown to pieces. Th explosion occurred at 11:20 o'clock last night and in a moment the deadly gases were generated through the mines. crept through the tunnel shaft and in a very short space of time scores of miners found themselves face to face

with death. It is not known how much powder was exploded, but whatever amount there was it went off with a terrible concussion. The shock was something terrific and was heard for a long distance, although it was nearly 2 o'clock before the disaster became known at Parker, a distance of three miles. When it is stated that a horse was killed at the mouth of the Ontario tunner two miles away, some idea of the force of the explosion may be had. That the loss of life was not far greater seemed

AGAIN ELUDED SHERIFF.

Tracy Has Two Companions and Supposed to be Wounded.

(Special to the Miner.)

SEATTLE, Wash., July 18 .- Sheriff Cudihee has abandoned the pursuit of Tracy and is now in Seattle. He is reticent as to his future plans, but it is believed that unless Tracy makes his whereabouts known no further steps

1902 EDITION.

The new 1902 edition treats of copper from all standpoints-Historical, Technical, Statistical and Descriptive. It s divided into ten chapters, as follows:

I. History of Copper II. Chemistry and Mineralogy.

III. Metallurgy
IV. Glossary of Mining Terms. V. Coppper Deposits of the World. VI. Copper Deposits of the U. S.

VII. Leading Foreign Mines. VIII. Lake Superior Mines. IX. American Copper Mines. X. Statistics of Copper.

The work is an octavo volume of 432 pages, set in brevier type. It is the only volume printed in any language treating of the entire subject of copper with descriptions of all principal mines, some 700 properties being listed, the descriptions ranging from a few lines to a dozen pages for each, according to importance.

The price of the Copper Handbook is \$3 in full morocco, and \$2 in buckram binding, prepaid to any address

SENT ON APPROVAL and may be returned within 30 days, if the purcha er is dissatisfied, for any reason what ever, and price paid will be refunded

THE STEMWINDER.

A Promising Mine of Fairview Camp-Installation of Plants.

(Special to The Miner.)

FAIRVIEW, July 15.-It is stated here, and the statement is believed to is being exhibited in Kaslo today. It be true, that ore averaging \$10 to the is a live mountain goat, which was ton for the whole width of the working captured the other day by Theo Adams is being mined at the 300 foot level of this city. of the New Fairview Corporation's Stemwinder mine. This is very encour- last night, where he had gone in the aging intelligence, and following earlier experience in this mine, which had already proved values to have increased as depth was made, tends to confirm the opinion that further development will make the Stemwinder a profitable enterprise. The management of this mine is mak-

ing betterments right along that give increased facilities for the economical handling and treatment of the ore, and for enlarging the capacity of mill and gold saving appliances. Mention was made last month of the additions to the stamp mill then in progress, and these are approaching completion. Besides increasing the number of stamps from 46 to 66, more cyanide tanks are being provided, eight to ten of which are being made at the mine. Water has been brought by a flume and thence down the hill in pipes to the battery where a Pelton wheel, expected to arrive any day now, will be erected, and this will give part of the power needed and so reduce the cost of fuel, which has been a rather heavy charge in connection with the steam power heretofore in use here. Carpenters are now on their way in from the Boundary to assist in pushing on the work of providing the additional power and treatment facilities

A contract has been awarded to C. G Cunningham, electrician, of Greenwood B. C., for the installation of an electric light plant and 160 lights, these latter to be distributed throughout the underground workings, the cyanide works and stamp mill, and in other buildings on the property. This contract provides that plant and lights shall be ready

for use by October 1st next. There are now some 70 to 80 men emloved by the New Fairview Corporation and the prospects of the Stemwinder mine proving a success are considered to be brighter at the present time than at any previous period in its history.

GREENWOOD DOCTOR'S LIVELY ROMANCE

According to the San Francisco Ex- | speaking bitterly of Gillard's act in 'olminer, Dr. R. Walleck Jakes, of Green- lowing the wood, prominent in his town as the head of the Greenwood hospital, was arrested in the California city while hving at the VICTORIA, B. C., July 17.-Edna St. James Hotel, 824 Laguna street, along with his wife, that is nobody's

with him. again." The Examiner says the physician has at his British Columbia home a family and that you were formerly a nurse consisting of his wife, a son and a connected with Dr. Jakes' hospital? asked the reporter. daughter, aged four years and six years respectively, and two older step-children, Mrs. Jakes having been maring to tell you my name. Why, Dr. Jakes doesn't know my real name, and ried before. He and Miss McGregor have resided here since the beginning of

April. The avenging spirit in the case was W. H. Gillard, brother of the deserted wife. He was a miner at Searchlight, Nevada, but when notified of Dr. Jakes' began a hunt for the physician and ing that he is an able man and perfectly nurse. Over a long and intricate trail he followed them and at last succeeded in Miss McGregor long ago got beyond the locating them in the Bay City.

The warrant was sworn out at noon Wednesday, but the police wasted six hours in serving it. Had Dr. Jakes suspected that his brother-in-law was on the trail, he would have had plenty of time to hide from the police and could have got far away from the city if he had so desired. At 6 o'clock the war-rant was served, when the elopers were still at the St. James, where they were known as Dr. W. Jackson and wife.

At 1 o'clock an Examiner reporter who had been informed of the issuance of the warrant, was at the hotel waiting for the arrest to be made, but the police held the warrant all the afternoon without making any attempt to find the

couple. When two policemen, accompanied by Gillard, knocked at the door of the room occupied by the elopers, Miss Mc-Gregor, whom the pursuing brother-inlaw had never seen, responded. "Is Dr. Jackson in?" one of the po-

licemen asked, Jackson being the name by which Jakes is known at the St. attle, where Dr. Jakes used the name "No, he is not at home now," in-

swered the nurse. wered the nurse.

Gillard arrived at San Francisco
The men with the warrant were of about May 15th and watched for Jakes satisfied with that statement, and, until he found him on Market street brushing past the young woman, found and shadowed him to the hotel.

Dr. Jakes hiding in a closet of the room.

Dr. Jakes filed a divorce contains the found him on Market and shadowed him to the hotel. The warrant was read to him, and, against his wife soon after his arrival shamefacedly, he allowed himself to be here, alleging desertion, although he led from the room betwen his captors. has not been in the state a year, as re-The pretty nurse threw her arms quired by law. When Gillard finally

around the doctor and kissed him good-bye. made his presence in town known to the physician, Jakes said he would pay alimony if his wife would assist him Jakes took the arrest coolly and declined to make any statement.

After the prisoner had been taken was refused, and finally Gillard caused way, Miss McGregor talked volubly, the arrest.

THE STEMWINDER.

A Promising Mine of Fairview Camp- The Mines Around Kaslo Are Showing Installation of Plants.

(Special to The Miner.)

FAIRVIEW, July 15.—It is stated be true, that ore averaging \$10 to the is a live mountain goat, which was ton for the whole width of the working captured the other day by Theo Adams is being mined at the 300 foot level of this city. of the New Fairview Corporation's Stemwinder mine. This is very encouraging intelligence, and following earlier experience in this mine, which had already proved values to have increased as depth was made, tends to confirm the opinion that further development will make the Stemwinder a profitable en-The management of this mine is mak-

ing betterments right along that give ncreased facilities for the economical handling and treatment of the ore, and for enlarging the capacity of mill and gold saving appliances. Mention was made last month of the additions to the stamp mill then in progress, and these are approaching completion. Besides increasing the number of stamps from 46 to 66, more cyanide tanks are being provided, eight to ten of which are being made at the mine. Water has been brought by a flume and thence down the hill in pipes to the battery where a Pelton wheel, expected to arrive any day now, will be erected, and this will give part of the power needed and so reduce the cost of fuel, which has been a rather heavy charge in connection with the steam power heretofore in use here. Carnenters are now on their way in from the Boundary to assist in pushing on the work of providing the additional power and treatment facilities just mentioned.

A contract has been awarded to C. G. Cunningham, electrician, of Greenwood, B. C., for the installation of an electric light plant and 160 lights, these latter to be distributed throughout the underground workings, the cyanide works and stamp mill, and in other buildings on the property. This contract provides that plant and lights shall be ready for use by October 1st next.

There are now some 70 to 80 men emloyed by the New Fairview Corporation and the prospects of the Stemwinder mine proving a success are considered to be brighter at the present time than at any previous period in its history.

TOOK POISON BY MISTAKE.

GREENWOOD DOCTOR'S LIVELY ROMANCE

According to the San Francisco Ex-| speaking bitterly of Gillard's act in 'olminer, Dr. R. Walleck Jakes, of Greenwood, prominent in his town as the head of the Greenwood hospital, was arrested in the California city while living at the Wallace Hopper is here with her attor- with Miss McGregor, a young and pret- business. They were separated shortly

> The Examiner says the physician has at his British Columbia home a family and that you were formerly a nurse consisting of his wife, a son and a connected with Dr. Jakes' hospital? daughter, aged four years and six asked the reporter. years respectively, and two older step-knew I was Scotch," she replied. "No. children, Mrs. Jakes having been married before. He and Miss McGregor have

April. The avenging spirit in the case was W. H. Gillard, brother of the deserted wife. He was a miner at Searchlight, Nevada, but when notified of Dr. Jakes' opment he gave up his position and egan a hunt for the physician and nurse. Over a long and intricate trail he ollowed them and at last succeeded in

locating them in the Bay City. The warrant was sworn out at noon Wednesday, but the police wasted six ours in serving it. Had Dr. Jakes suspected that his brother-in-law was on the trail, he would have had plenty of had so desired. At 6 o'clock the warrant was served, when the elopers were still at the St. James, where they were known as Dr. W. Jackson and wife. At 1 o'clock an Examiner reporter, who had been informed of the issuance of the warrant, was at the hotel waiting for the arrest to be made, but the police held the warrant all the afternoon without making any attempt to find the

When two policemen, accompanied by Gillard, knocked at the door of the coom occupied by the elopers, Miss Mc Gregor, whom the pursuing brother-inlaw had never seen, responded.
"Is Dr. Jackson in?" one of the po-

licemen asked, Jackson being the name by which Jakes is known at the St. "No, he is not at home now," in-

wered the nurse. The men with the warrant were lot satisfied with that statement, and, brushing past the young woman, found and shadowed him to the hotel. Dr. Jakes hiding in a closet of the room. The pretty nurse threw her arms

Jakes took the arrest coolly and declined to make any statement. After the prisoner had been taken was refused, and finally Gillard caused away, Miss McGregor talked volubly, the arrest.

again." "Is it true your name is McGregor,

KLONDIKE GOLD.

The announcement is made that the Seattle assay office, since opening for business July 15, 1898, has handled mearly \$60,000,000 in gold. All of this, or nearly so, has come from Alaska and the Klondike, mostly from the latter point. Seattle has reaped greater advantages from the rush to the north than any single coast city, but since the establishment of a government assay office at Vancouver a goodly portion of the Klondike gold will be diverted to that city, to more directly enrich the country from which it came. The Vancouver office should have been established at the beginning.

LIGHT ON ELMORE OIL PROCESS

**************** The question of ore concentration is vexed problem in other important mining camps of the world as well as Rossland, and the Elmore oil process has come in for a liberal share of attention elsewhere. The appended article reproduced from the Anglo-Colorado, reputable mining journal, will be read with interest locally, more parin everyone's mouth, so to speak, for the past month or more: We have from time to time directed

attention to the Elmore oil concentration process, which, if its merits approximate those claimed for it, Colo rado's ores have a wonderful method of treatment. This process was broug it under Stratton's Independence and Ven ture Corporation boards' notice for use, if practicable, at that great Cripple Creek mine, but no information has been afforded shareholders on this important subject. Oil has, we have been told, been tried there in place of coal, in North Alberta by a flour mill combut on that point also proprietors are pany at Edmonton and the Canadian kept ignorant. These and other matters Pacific Railway Company. Much of it seem to be entirely in the hands of the came through the winter safely, and clique who manipulate this propercy promises to yield a crop. If it turns out and give to shareholders just as little that fall wheat can be cultivated sucinformation as and when they choose. So many new processes, showing well a profit when worked on mines, have and better farming, and the farmer been brought to our notice, that it is can divide between two seasons the necessary not to favor anything of this seeding labor he now concentrates in sort until practically proved. And in the present case it seems the more ne cessary to be cautious, because, marvelous as is the process (according to the vendors and others interested), we cannot learn that it has been in opera- the New York Times speaks of the rap-

Fraser and Chalmers, whose city office is that of Mr. Hammond's, are licensed o make the plant used for the process. When inquiry is made at headqua :ers about this process, questions are evaded, and reluctance to afford infor-

mation is evinced. And yet there has been ample time to prove the proce s in Colorado and elsewhere. Mr. Butters, in November, 1900, saw the process at work in Wales, and said he would try and verify results on American ores. In January, 1901, Mr. F. W. Bradley said "the process is not a 'fake' one at all and has made a decided success to my knowledge on a working scale in Wales." The Gladsir mine, closed for a time owing to litigation, has, we understand, been recently reopened. Beyond that we hear nothing about the process, except tests at the Kingsland plant on ore from several mines. Statements from interested parties are plentiful, but we want to learn of its suc cess on an economical scale. Before vestors" go into the enterprise, they ould be assured of contracts having for the use of the guarantors should be left with the financial responsibility.

The Canadian company is brought dicate-directors, Messrs. E. E. Sawyer, E. E. Rand, and M. T. Brown; offices, 11. Queen Victoria street, and registered last October to acquire property, concessions, claims, &c., in Canada and lsewhere. Its authorized capital is £1000, of which 500 in £1 shares have been issued, fully paid, and 500 with 2s. called up. Mr. Brown's record of 13 companies is not brilliant. Besides the Syndicate and the Canadian Co., of the other 11, seven have reconstructed, which is not likely to encourage readers to go into the Canadian Company, especially when it advertises that the information given is not to be taken cate, whose directors are practically the Canadian Ore Concentration Co.'s tence. The editor of the Paystreak board, acquired from the Elmore Ore Concentration Syndicate an option to purchase the patents by paying £500 in November, 1901, and a further paynent of £10,000 in cash and 40,800 in Syndicate, by a contract last month, dian Company, which repays registration costs to the extent of £1250, and right to receive ten shares in this new concentration company, and B shares, 'entitled to the remainder of the property." The Ore Concentration Syndicate have a right to subscribe at the price of issue 51 per cent.

It is a curious coincidence that Charles Butters and Co.'s offices and those of the notorious Sand Fork Petroleum Co. (run by the American "incorporate1" bankers, E. R. Holden and Co.), whose shares were off-loaded upon, and at the expense of the British public, adjoined in the same Bishopsgate street buildng, and we were officially told one was a tenant of the other. Our readers should know the fact that we have been striving for some time to find out what mine has this process in commercial operation other than the Gladsir, with which the patentees have long been associated; but although Mr. C. Butters, the agent of the Elmore's patentees, has been for a year or two endeavoring to get it adopted in Colorado and other Western States mines, and it has been specially brought, as the natty little racing yacht Tecumseh, of enterprise in capturing the bandits as Guide has shown, before both the Portthe playwright has in placing it on land and the Independence managethe stage it would have been all over ment, the patentees and others are This is the yacht that was victorious

should ere this have surely heard about

The advertisement notification that it 'must not be taken to be a prospectus or an invitation to apply for shares" is not calculated to tempt cautious investors, and, without specific information of successful work on a going min; our readers should avoid this business We hope it will not turn out as bad as some companies with which is connected that guinea-pig (see Guide No. 48) Major Ricarde-Seaver, a director of the Elmore Syndicate, who has a penchant for ore treatment processes. If he can tell us anything satisfactory to the mining investor about the Cassel-Hinman method, we will gladly give publicity thereto. It would be quite a change, for many of the Major's companies have been disastrous to "investors," despite reconstructions.

****************** **CURRENT COMMENT**

FALL WHEAT.

The Canadian Northwest is not satisfied with the reputation of being the greatest spring wheat region in the world, but aims as well at high success in the production of fall wheat. Last autumn a quantity of wheat was sown cessfully in the Northwest, the advantage to the country will be great. Sumone.-Toronto Mail and Empire.

THE SUPPLY OF WHITE PINE

A special dispatch from Duluth to tion on any mine except the Glasdir. idly increasing lumber cut in the Northwestern States and declares that "the matter now is because an Anglo-Cal- Northwestern white pine region is but adian company has been promoted to a thing of a few years more"—meaning try the process, and Cripple Creek and that the supply of white pine from the other Colorado mine owners have had it Northwestern States' forests will brought before them by one of the speedily exhausted. This has been the brothers Butters. Mr. Charles (who has cry for the last fifty years. Forty years the American and Mexican rights), and ago some expert lumbermen declared Messrs. Bradley (Mr. Hammond's Strat- that the supply would not hold out ton's Indenendence assistant), and more than ten or fifteen years longer. But the fact is that the output of white advised to test the process on those pine from this region is today greater than it ever was before and in seasons favorable for driving there is no scarcity of logs. One reason why the timber has lasted longer, in the face of the enormous consumption, than anybody supposed it would, is that modern ingenuity has devised ways and means of getting the timber distant from the banks of the streams down to consumptive points at a cost that makes the enterprise commercially feasible.

No one can say with certainty how long the white pine forests will last; but it stands to reason that with the growing population of the United States here will be an end some day, unless the percentage of consumption to population can be diminished. Systematic state and national forestry will help some, but the time will come when Americans will have to reach out into Canada for our vast reserves of native timber.-Revelstoke

LE ROI RECONSTRUCTION NEGA-TIVED.

That "shareholders hate reconstructions"-a remark made by Mr. Hill, the chairman of yesterday's Le Roi meeting -was amply proved at that gathering, when Mr. Milne's proposal that the Le Le Roi Company be reconstructed was The meeting received hounded down. scornfully any idea of having to provide further funds for the establishment on a sound basis of the company's financial position, which, it has been repeatedly shown, is anything but satisfactory. Nevertheless, it was to be noted that Colonel Burton Brown, who signed the report in which it was stated that "it is neither necessary nor desirable to reconstruct the company," himself observed that money might be raised by the issue of debentures or preference shares, thereby implying that more funds may have, to be provided. It was satisfactory to learn from a cable received yesterday morning that on the 30th June the estimated deficit at the Bank of Montreal had been reduced to £10,000, but this sum, it appears, only represents that portion of the debt which is totally unsecured The actual indebtedness at the end of April was £283,000, of which sum £240,-000 was secured by matte at the mine or in transit, roasted ore, mine stores, etc., leaving an unsecured balance then of about £43,000. The high grade ore reserves are reported to have been increased to "probably 50,000 tons," and the chairman spoke of "continued good developments in the mine," With this better news the shareholders would have none of reconstruction, although the chairman seemed to favor one; on the contrary, they adopted the committee's report, and two of its mem Sir Henry Tyler and Mr. McMillanwere nominated to the board. It would, therefore, appear that the management will have to continue picking out the eyes of the mine in order to reduce the indebtedness to the bank, an action which bids fair to leave the Le Roiif, indeed, it has not already so become -a large low-grade proposition, which may or may not be rendered a payable one by the adoption of the oil concentration process. "Those who live the ongest see the most." It will be very interesting to see whether the Le Roi will turn the corner and achieve success without the supply of further funds by its shareholders.—Financial Times,

......

THE RIO TINTO.

Considerable development work has erable work on the property this sumbeen done this spring on the Rio Tinto claim on Pool creek, owned by Messrs. Darragh and McCullough. Two parallel leads cross the property, each being about 12 feet in width, and one of a very rich silver-gold property located which is traceable the full length of about five miles from town on the Trout is authority on matters relating to the the claim. Both leads have fine show- Lake to summit trail. After doing conings of quartz mixed with galena, and siderable work on this property he ngiving good returns in gold and copper tends to spend a great deal of time on values.-Camborne Miner, July 12.

A BIG PLATINUM ASSAY.

McRae Brothers report having received returns on samples of ore from the Hamilton claim sent to Baker & Co., of Newark, N. J., to be assayed for platinum.

The samples ran 60 ounces per to in platinum, 1.12 ounces in gold and 28 per cent copper.

A small specimen of this ore sent t Baker & Co. last January was reported by them to carry platinum in commer cial quantities, and they asked that larger samples should be sent to enable them to determine the best method of recovering the platinum contents of the

Their request was complied with, and the above assay is the result of the last test made.—Similkameen Star, July 12.

THE FIDELITY GROUP.

Charles Abercrombie is up from the American Hill, where he has been engaged doing work on the Fidelity group in that neighborhood. A tunnel is being driven, and is now in about 35 feet, exposing a considerable amount of clean ore, samples of which he brought up with him. The ore lies in stringers-from the main ledge-of which there are 12, ranging from two inches up to eight in thickness. Besides himself his two partners, Messrs Young and Stierle, are assisting in development, and the amount of ore they have encountered in their work has decided them to make up a shipment and send it to the smelter this summer. -Trout Lake Topic.

THE SIR WILFRID GROUP.

Splendid Showings of Quartz With Some Free Gold.

On the Sir Wilfrid group of four claims, about one and a half miles up Pool creek from Camborne, there are four leads crossing these claims, upon all of which considerable surface work has been done, showing up the leads on both sides of Pool creek. Two of these showings are ten and twelve foot ledges of quartz, average assays from which run over \$10 in gold. On what is known as the fissure lead, cuiting the formation at right angles, open cuts prove this ledge to be fully eight feet in width, and the ore is impregnated with specks of iron and galena carry ing good values in gold. The fourth showing is a five foot ledge of quartz upon which very little work has as yet been done, but what is done shows the ore to be in place, and some of the samp. les taken from this ledge show visible free gold.-Camborne Miner, July 12.

THE IDAHO.

Among the groups of the camp on which gold has only recently been discovered is the Idaho on Mohawk creek. There are five well defined leads cross ing the property all running parallel and cutting the formation almost at a right angle, and each of which stands hog back. A great many cuts have been prices. We have bargains in these made proving these leads to average stocks. from five feet on No. 1 to ten feet on No. 3. Six open cuts have been made SPECIAL ATTENION GIVEN TO across the No. 1 ledge, which shows the ore to be in place for about 1200 feet along the claim. On Nos. 2 and 3ledges running to ten feet in widthabout the same amount of work has been done, showing leads of good looking quartz with considerable iron and galena, assays from which have give returns as high as \$10 and \$14 in gold. Lead No. 4, the one upon which visible gold was found this spring, is shown to be fully five feet in width and many samples can be picked up on the dump showing the gold to be well distributed through the quartz.-Camborne Miner.

AROUND TROUT LAKE.

Fred Bailey left on Saturday last to ice work on the Rusty Axe at the head of Haskins creek. There are very few miners or prospectors in town at present, they all having gone out to work after the celebra-

Jacob Schmitt came up on Friday last from the Pedro, where he has charge of the development operations going on on that property.

The sudden departure from Rossland of John M. Smith, late manager of the Rossland branch of the Royal Bank of Canada, occasioned his friends keen regret, inasmuch as it, prevented them extending to Mr. Smith a send-off comnensurate with his popularity in the city and district. Steps are being taken, however, to forward to Mr. Smith tangible evidence of the esteem which he is held by Rossland friends.

IN A TRAP-For three days a valuable collie owned his qualities as a shepherd, was missing and an extensive search failed to give any clew as to his whereabouts. Finally the canine was found fast in a coyote trap, weak from hunger and strenuous efforts to escape, but otherwise not seriously hurt.

Harry McIntosh, proprietor of the Hoffman House in this city, has dishas been identified with Mr. Mc-Intosh in the Elko business for som time, and who will conduct the business there in future.

MISSES SOMETHING-

Referring to the fact that the Carnegie library and the Choral Club-build- Assayers, Mining & Mill Supplies ng at Joplin, Mo., where he has been in charge of a lead mine for the past two years, are under construction, A. F. Corbin, formerly a well known vocalist of Rossland, inquires what has become of the Rossland Choral Society which flourished under the direction of Messrs. Lowe, Whiteside and Hart McHarg Mr. Corbin proposes spending a few days renewing old friendships in the Golden City.

SLIGHTLY INJURED-The wife of James Fassen, a driver employed by a local transfer company, was slightly injured yesterday by fall-

ing for him the animal backed against a stump, sending Mrs. Fassen out of the buggy. The physician pronounced her injuries slight.

Mr. Eugene Croteau. Mr. J. S. Luce and wife, Northport, Dancing was maintined until a late hour, the guests seeming loath to leave the enchanting scene as long as the musicians were prepared to furnish music. Throughout the entire evening the hosts and hostesses devoted themselves indefatigably to promoting the comfort and pleasure of their guests,

a task in which they succeeded admirably. Showers of congratulations were poured upon Mr. and Mrs. Macdonald and Mr. and Mrs. Thompson for the charming surprise and delightful evening they had afforded all present. METAL MARKETS.

LONDON, July 18.-Lead £11 5s. NEW YORK, July 18.—Bar silver 52 3-4.
