OF VITAL INTEREST TO EVERY FORD OWNER:

We wish to point out to you a few very important things which should be borne in mind when having your Ford car overhauled. Regardless of where you have this work done, be certain that none but GENUINE FORD PARTS are used. 'Spurious parts are being handled by a great many repair shops, who buy them at a large reduction, and charge you the same price as if GENU-INE FORD PARTS were used. This practice is not only con-temptible, but positively dangerous, as these parts are made from inferior quality and have not the very necessary strength

or wearing qualities. We would also like to point out that, as FORD DEALERS. nothing but GENUINE FORD PARTS are used by us in making

Cod Oil-The market continues firm. A considerable advance is expected in the near future. Already sales have been made at \$105.00 per tun. There are very small supplies on the spot and there are very limited lots to come forward. We therefore look for steady advance. There has recently been heavy buying in all fish oils in both England and America, and a genuine campaign of buying for commerical requirements seems to be under way. This is one of the best signs of reviving trade that we have seen for many a day. Increasing firmness in prices of all fish oils at the primary markets is chronicled this week by the New York trade Journals.

Codliver Oil-There has been healthy revival of demand lately in he foreign markets. The druggists Jave become active and are laying in their stocks for winter requirements. All the past season they have been able to buy Norwegian oil at such ridi-culonsly low prices that there was no money in refined oil for the Newfoundland manufacturer, and but a beggarly margin for the Norwegian with his low freight rates. The market was demoralized in consequence all the summer by the excessive Norwegian supply manufactured last winter, but this ondition of affairs is about over and the druggists are looking for the good RAN Newfoundland codliver oil.

Whale Off-There have been some very heavy purchases of Whale oil reic. ported from London this week. The supply of Norwegian whale oil which has had such a depressing effect on the market during the past twelve months is now about gone into consumption with the demand not nearly satisfied. Newfoundland's outlook for an active resumption of this industry next year looks good.

Pork-Advices from Chicago this week indicate that the pork market is moving in a narrow range without much change in quotations. The extremely low price of corn is having an abnormal weakening influence in pork prices. This condition is likely to continue for some months. There is, however, a possible factor that may alter the situation, viz., in the prairie provinces corn is now cheaper than coal and farmers may use their surplus for fuel. This will reduce the crop. The local prices are: \$28.00 for Mess, \$28.50 Short Cut, \$34.50 Fat Back, \$35.50 Ham Butt, and \$25.00 for 46 Spare Ribs, wholeesale. The week's imports are 1,050 barrels.

There has been an active tocal demand this week which it is expected, will improve further and continue till the end of the year when continue till the end of the year when most of the outport orders will have been filled. The run on Beef, espec-lally Boneless, is good this fall owing to the comparative cheapness as com-pared with pork, Beef prices are lown to about pre-war rates.
