Chantry Farm

Can spare a few good young ewes;
also five nice roan Shorthorn bull
calves; still have a few Dorking and
black Leghorn cockerels for sale at
right prices. Might as well have a
breed that will lay when eggs are high
in price.
ED. de GEX, Kerwood.

DISTRICT AND GENERAL

A great fruit crop is expected in On-
tario this year.

Caradoc township has abolished the
statute labor system.

A Chamber of Commerce has been
organized at Parkhill.

There is a probability that the C. P. R.
will extend its line from London to
Sarnia.

Marconi says the wireless telephone
will be in general use within a year
or two.

The profit on the Watford hydro
system for 1919 was in the neighbor-
hood of \$800.

Abram Cornelius, an Indian who had
been living alone on the Muncey Re-
serve, was found dead in his house.

Neil Walker, an employee in the
flax mill at Alvinston, was caught in
the belting in the engine room, dying
later from his injuries.

Oil has been struck on the farm of
George Glenn in Adelaide township at
a depth of 247 feet. The well is said
to be good for five barrels a day of
high grade oil.

Ellen Ireland, widow of the late
John Ward of Metcalfe, died a few
days ago as the result of falling and
fracturing her hip. She and her hus-
band were among the early settlers of
Metcalfe.

Drinking wood alcohol was the
cause of death of Bert Piper of Lon-
don and Jack Piper of Exeter, who
died about the same time on Tuesday.
They drank the stuff when Jack vis-
ited Bert in London on Monday.

Growing 66 bushels and 30 pounds
to the acre, the Duke of Sutherland's
farm at Brooks, Alberta, has won the
\$500 prize offered by the Grain Grow-
ers' Guide for the best acre of Kit-
chener wheat grown in 1919. This
showing was five bushels ahead of the
nearest competitor.

The Strathroy Dispatch says:—The
provincial auditors have completed
their work of auditing the town books.
Some unimportant irregularities may
have been observed as to methods of
bookkeeping, and a few trifling errors
in figures discovered that escaped the
town auditors, and which might have
been detected later on, and for this
the town will have to put up about
\$500.

A beaver found by Samuel Leech on
his farm near Newbury over a year
ago has been identified as one that
escaped from Pinastore Park, St.
Thomas, seven years ago, and has
been returned. The animal proved
quite a profitable curiosity for Mr.
Leech while he had it in his posses-
sion. Exactly three thousand, two hun-
dred and seventy persons had visited
his farm and viewed the animal last
year, and in addition he was exhib-
ited at Botwell fair, for patriotic pur-
poses, and was the means of raising
nearly \$50.

JUST AMONG OURSELVES

After the deluge, what?

We have had the flu and the freshet;
let's now take precaution that the
fever doesn't get us. Clean up!

Council got busy, and after strenu-
ous effort had the dammed ditch open-
ed up. Water then went off in a jiffy.
Thanks, awfully!

Contrasted with other towns, Glen-
coe has everything to be thankful for
and little to complain about.

The trouble is we allow imaginary
difficulties to obscure our view of the
many opportunities and conveniences.
Look on the bright side!

Ordering a case of liquid goods is
quite a legitimate thing to do. It
may also be quite legitimate to nose
about and see who are doing the or-
dering—but it is not half as respect-
able.

The Friend at Our Elbow says he is
not sending for any of the stuff—Dane
Rumor to the contrary notwithstanding.
When he decides on snakes he
would rather the brand that St. Pat-
rick dealt with.

We have tapped our maple. Have
you?

THE CAROLINA GIRLS

The fourth and last concert of the
Lyceum series under the auspices of
the Daughters of the Empire. Don't
miss it. The Carolina Girls, three
charming entertainers.

You'll like these three gifted young
ladies for they have delighted Lyceum
and Chautauqua audiences for three
seasons. The Davis sisters—Veron-
ica and Grace—are capable of giving
an entire program by themselves but
have added their talents to those of
Miss Carol Peterson, making an un-
usually strong combination and giving
a program that is unique.

These talented young women read,
sing, play the piano, the flute, guitar,
ukulele and mandolin, presenting their
program in sketch form with snap and
go to every feature and every minute
while they are on the platform. They
are charmingly costumed, making sev-
eral changes to suit the various enter-
tainment features they present. Part
of their program consists of selections
they have themselves written.

Opera House, Glencoe, Saturday,
March 20. Reserved seats, 50c; chil-
dren, 35c. Plan now open at Lumley's
drug store.

All mothers can put away anxiety
regarding their suffering children
when they have Mother Graves' Worm
Exterminator to give relief. Its ef-
fects are sure and lasting.

MINER PERISHES IN STORM

Body of Duncan McRae, Former Glen-
coe Man, Found on Lone Trail in
British Columbia

The Vancouver Daily Sun publishes
the following despatch from Prince-
ton, B. C., under date of March 5:—

Wednesday afternoon the body of Dun-
can McRae was found near the trail
leading to the McRae Brothers' min-
ing camp on Kennedy Mountain, where
it had lain just a month to a day. Dil-
igent search had been made all over
the country. Wednesday Chas. Bon-
niver and Gus. (Belgie) Powells were
searching along the trail and found
the body. There was a snowstorm in
the hills the day McRae was lost and
he evidently became exhausted and
died from exposure. He was found
about 12 miles from Princeton and
less than a mile from the camp.

The late Mr. McRae was 35 years of
age, and was born at Glencoe, West
Middlesex, Ontario. He came to Brit-
ish Columbia some 25 years ago, and
was well known in the Kootenays and
Similkameen. His brothers, Hugh
and Dan, were interested with him in
the Kennedy Mountain properties. His
mother, who is 92 years of age, and
two sisters reside in the East.

The body was brought to Princeton.
There is keen regret over his untimely
end, especially amongst the old-timers
of the district who knew him so well.

The late Duncan McRae was the el-
dest son of the late Donald McRae,
who kept the American Hotel in Glen-
coe for many years, and will be re-
membered by many of the old settlers.
He and his brothers were associated
with their father in a general store
business here in the sixties and early
seventies. They also kept the post
office, and the store was a very busy
place in the early days of the village.

Mrs. Margaret McRae, the mother,
has been living in Windsor for some
years. Two sisters, Mrs. J. E. Laugh-
lin and Mrs. (Dr.) Harry Thatcher,
also live in Windsor.

FAREWELL GATHERING

Charles Nixon, who for the past few
years has lived with his wife and
daughter on the John L. McEachern
farm in Ekfrid, moved last Tuesday
to Alborough, where he has bought a
farm. On Friday evening prior to
their departure about thirty of their
friends and neighbors gathered at
their home to spend a social evening
with them. During the evening Mr.
and Mrs. Nixon were presented with a
library table and Martha with a man-
icure set. John B. McKellar acted as
chairman. Mrs. John Strachan read
the address and Ed. Tomlinson and
Simpson Goff made the presentations.

Short addresses were given by Dun-
can McAlpine, Walter Squire, James
Raeburn, Roy Siddall and John Str-
chan, all expressing regret at the loss
of such good neighbors.

CLERGYMAN UNDER GUARD

Ottawa, March 12.—Rev. Geo. Bous-
field, a prominent Anglican clergyman
of Eastview, near Ottawa, is the prin-
cipal of one of the strangest cases
that has ever confronted the Dominion
police for a solution. It is alleged
that an attempt was made to coerce
him at the point of a revolver to con-
sent to being an accomplice in a pro-
posed Bolshevik scheme to take the
life of an unknown high Canadian gov-
ernment official, but the plot was frus-
trated in the nick of time. Officers of
the Dominion police now guard Bous-
field's residence night and day, keep-
ing him under constant surveillance.

All efforts of the newspapers to ob-
tain a statement from Bousfield have
been foiled by the police, and Domini-
on Police Commissioner A. J. Caw-
dron, while admitting that the case
has decidedly serious aspects, posi-
tively refuses to give the inside facts
of the case.

School was closed Friday on ac-
count of Miss Ward attending the fu-
neral of her grandmother at London.

Mrs. Anderson, London, is spending
some time on the farm with her hus-
band, George Anderson.

Mrs. Muirhead of Glencoe attended
the sale of the estate of her late bro-
ther, Dan McElm. The farm, 65
acres of pasture land, was sold to Wm.
Werden of Brooke for \$3,200.

Mrs. Mary McLean and family and
old neighbors attended the funeral of
her brother, the late Archie McCahill
of Alvinston.

Earl Ferguson spent the week-end
here at the home of A. D. Ferguson
and was accompanied home by Mrs.
Ellie Ferguson, who spent the winter
here.

Miss Isabelle McAlpine returned to
take charge of her school at Corunna
after attending at the bedside of her
father, Hugh R. McAlpine, who was
seriously ill but is now much improv-
ed in health.

The high waters have gone down af-
ter doing considerable damage to
fences and roads, also hindering traf-
fic and some of the mail men not get-
ting through for several days.

Mr. and Mrs. McAlpine of Dutton
were guests of her sister, Mrs. John
F. McTavish, while attending the fu-
neral of their uncle, the late Archie
McCahill of Alvinston.

D. L. Ferguson of Sarnia spent the
week-end with his mother, Mrs. Nan-
cy Ferguson, who is much improved
in health after a serious sickness.

Jonah was a conundrum, and the
whale had to give him up.

It is about this time of the year
that the old hen sleeps on her perch
and dreams of what she will do to the
flower beds in the spring.

GLENCOE COUNCIL

A special meeting of the Glencoe
council was held in the council cham-
ber on Friday, March 12. Members
present—Reeve McPherson, Council-
lors Lumley, Davidson, Parrott and
McCracken. The minutes of the last
meeting were read and adopted.

The auditors, Dr. J. Y. McLachlan
and J. G. Lethbridge, then gave their
report of the audit of the books and
accounts of the different departments
of the village. Their report showed
that they had completed a thorough
audit of the books. A few interesting
parts worthy of notice are:

Amount due public school, \$224.81;
amount due high school, \$2,794.81.
Of this amount \$1,000 was paid the
treasurer of the high school in Feb-
ruary, 1920, leaving a balance now due
of \$1,794.81.

The village debt has been reduced
\$699.59 during 1919, making the net
debt of the beginning of 1920
\$9,879.77. This will likely be the low-
est that the village will have for many
years to come, as the hydro-electric
debt will be added to this during the
current year.

The audit of the electric light ac-
counts showed an increased expendi-
ture over the previous year of about
\$1,500.

The auditors prepared a statement
of the yearly receipts and expendi-
tures from the beginning of the plant
in 1908 up to 1920 when the \$11,000
debentures will have matured and
been paid. This statement shows a
total deficit of \$9,645.89.

A number of the ratepayers and
members of the Industrial Association
attended the meeting to hear the re-
port, and at the close of interesting
discussions on different items a
hearty vote of thanks was tendered
the auditors.

On motion of Messrs. Lumley and
Parrott, the auditors' report was ac-
cepted, and the clerk was instructed
to secure one hundred printed copies
of the same.

On motion of Messrs. Parrott and
Lumley, the clerk was instructed to
issue an order in favor of the electric
light commission for \$977.44, amount
required to pay note matured March
12.

On motion of Messrs. Lumley and
Davidson, the clerk was instructed to
advise the county engineer, Charles
Talbot, to order a car of from 6,000 to
7,000 gallons of road oil for Glencoe.

On motion of Messrs. Lumley and
McCracken, a resolution was passed
requiring the treasurer of each de-
partment to present to the council
each month a financial statement,
thereby keeping the council more in
touch with the requirements of each
department.

CHAS. GEORGE, Clerk.

INDUSTRIAL ASSOCIATION

The annual meeting of the Glencoe
Industrial Association will be held at
the town hall on Thursday evening of
this week at 8 o'clock. A full atten-
dance of the citizens is asked for, as
matters of special importance are to
be dealt with.

While the report will not show that
much has been accomplished during
the period of the war, there is a sub-
stantial balance in the treasurer's
hands, and now that we are in the
days of reconstruction there is a be-
lieved to be good opportunity to do
some active work.

NORTH EKFRID

The funeral of the late Mrs. Philip
Klemm was held on Saturday last at
two o'clock. The services were con-
ducted by Rev. H. D. McCulloch of the
Presbyterian church, of which Mrs.
Klemm was a member. Interment
was made in the Longwood cemetery
beside the body of Mr. Klemm, who
predeceased her a number of years.

She had been seriously ill for about
two weeks. She was in her 86th year.
She came from Germany to this coun-
try when a young woman, and died on
the farm where she had lived for over
fifty years. She was most hospitable,
having a warm hand-clasp and a pleas-
ant smile for everyone. She leaves
to mourn her loss one daughter and
three sons, Mrs. Wm. Webber of North
Ekfrid, George and Joseph of Ekfrid
and Henry of Metcalfe. To them we
extend our heartfelt sympathy in the
loss of a kind and loving mother. The
pallbearers were her grandsons, Ed-
ward and Grant Klemm, Herbert and
Wilfred Klemm, Clarence Klemm and
James McDonald.

Miss Pearl Pettit was visiting Miss
Ada Howe a few days this week.
Miss Howe had a birthday party Tues-
day, with a quilting in the afternoon
and games in the evening. A buffet
lunch was served.

Service was held in the Presbyter-
ian church Sunday. The church was
closed four Sundays during the flu
epidemic.

Mrs. George Laughton spent the
week-end with her parents, Mr. and
Mrs. John Ramey.

EKFRID STATION

Mr. and Mrs. John McCleung of
Brooke spent a few days last week
with Mr. and Mrs.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

How We Cash In on Good Seeds

I wonder how many of us have realized in many of our farm operations the past year because we sowed seeds that were weak in germination, poor in quality, or full of dirt and half-matured grains.

We have just now footed up our income for the first nine months of the year 1919, and we have to our credit \$637 more than we have ever made before in any twelve months on our farm, and we have been hammering away here for twenty-eight years past.

We did this, and both of our boys in the army. We made a New Year's resolution, and that was to plant only the best seeds obtainable or not plant at all. It cost us a few dollars more, maybe \$20, but it has paid, for we have had the best of everything for the family, and also for the swine, chickens, etc.

Planting poor seeds not only effects the crop, but is also felt in all other departments of the farm. A poor yielding crop of small grain, wheat, oats, barley, or rye means that the table may suffer for bread, the hens suffer for scratch feed, the sheep get thin and short-winded, the swine go shy because of lack of ground-feed crops. If we fail in a good crop of corn, the hogs go to market thin, the cream checks out in half, the table suffers for lack of butter, and the horses go to the plow next spring thin and rickety.

How was it on your farm last year? Was it because you sowed a bunch of cheap garden seeds that your onions were all scallions, your peas never tender in the cooking, the garden lettuce and radishes were tough? It can be thus.

In our garden we are growing sweet corn of the sweetest variety, and we have grown this same variety for thirty-five years in the family, and know our roasting ears will be top notch, and the surplus worth canning for the winter.

We grew 600 bushels of wheat this year on a bit less than 16 acres. We sowed the best seed obtainable, pampered it by a 200-pound application of commercial fertilizer, then top-dressed every acre of it with straw manure. After re-cleaning, we sold it for seed, netting nearly \$500 more than market price, and not a bushel of that wheat went over 30 miles from our home.

We grew 50 bushels per acre of a select white oats, re-cleaned it all, and sold it for a good sum above market price, enough to pay us well for our extra work and the growing of better grain.

We planted corn that has been grown in the family for over forty years, improved and certainly acclimated to our country, and when our neighbors' corn was in roasting ears from seed secured no one knows where, we were cutting and sheeking well-ripened corn.

Thus it goes on down the list. Our garden yielded us over three times the quantity of table stuff because we planted the past season of reliable, tested seeds, instead of relying on puff collections and advertising lists of cheap stuff.

The boys have returned. We have taken them in partners with us here on the farm. We have them down at the Agricultural College now, and that is where they will help us most in the next few years, but it will be a good helping, we are thinking, and so long as they are reaping good seed there, they shall have our support, God bless them.

The Dairy

Dairymen and creamerymen in many districts are troubled every spring by garlic or onion flavor in the milk. This is due to the cows feeding on garlic or wild onion, one of the first plants to start in the pasture in the spring. The trouble from garlic is not likely to last very long, as this weed is soon cropped off and the grass becomes plentiful enough for the cattle to feed on it in preference to onion.

Garlic flavor in milk can be removed by heating the milk can to one hundred and forty-five degrees Fahrenheit and forcing air through it at this temperature for thirty to sixty minutes. As this method requires a certain amount of equipment, it is much more satisfactory for the average dairyman to keep the odor out of milk by a few simple precautions in herd management.

There are two ways of protecting the milk from garlic flavor. First, prevent the cows from obtaining garlic, and second, manage the herd on garlic pasture, so that there will be the least possible chance of getting the flavor in the milk. Often the garlic is found only in one patch in the pasture, and this can be temporarily fenced off and pastured with other cows not producing milk. Where the garlic is scattered all over the field, it will be more difficult to keep the cows away from it, but by keeping them in some other field for a few hours before each milking, the odor will be reduced to a minimum. The odor in milk is strongest in cows which have just eaten garlic, and the odor is less in the milk of cows which

Poultry

Feeding of garlic and milking is increased. In case no garlic-free pasture is available, it would be advisable to drive the cattle to the barnyard three or four hours before milking and feed them on hay and silage. As the season for garlic trouble is short, this should not cause much inconvenience.

Select the breed best suited to your market or the purposes for which you wish to raise poultry. The farmer will usually wish a general-purpose fowl that is vigorous and a good layer. At the same time it will produce enough meat to help out with the family rations.

An egg farm that is shipping eggs to a market where white eggs are sold at a premium will wish to keep Leghorns. The Mediterranean breeds produce white eggs and here the chance of selecting the best-looking breed is all right. Some like white birds and others the buff. Some breeders will enjoy an unusually marked fowl like the Ancona, and take more care of a flock of birds of that kind.

In some sections brown eggs are most in demand and a good laying strain of any American breed will be satisfactory. If broilers are to be produced there is nothing better than the White Wyandottes or Barred Rocks. A black feathered breed is not as desirable for raising broilers because of the black pin feathers which injure the appearance of the bird on the market.

The Welfare of the Home

Taking the Indigo Out of Blue Monday.

Housewives will agree that it takes some management to turn "blue Monday" into a lighter shade of indigo, but many families and communities are solving the problem and it is interesting to see how they do it.

Care of Ewes

Near the time of lambing the ewes should have the kind of attention that will result in strong lambs, plenty of milk for the newly dropped lamb, and a thrifty condition of the ewes. I have seen ewes that were slightly droopy and tending towards lifelessness completely changed in just a few days by a little different care.

One essential thing is to give the ewes sufficient exercise. We never kept the ewes closely confined more than a day or so before the lambs were dropped. They always had the run of the large lot, or access to a pasture field if the weather was anything but rainy. If necessary force them to go outdoors. In pleasant weather they can be fed outdoors. I have taken ewes out and driven them about the lot in the morning for exercise and occasionally down into the woodlot. Sheep seem to like the cover of a woodlot in both winter and summer.

Water and salt are both essential to ewes. They ought to have salt before them nearly all the time. The best arrangement I have ever found was a sheltered box in one corner of the lot and another in the sheep barn; these need filling about every two or three weeks. Sheep can go without water longer than most other domestic animals, but it is neither beneficial or desirable for them to be cut off from their water supply for more than a few hours. Ewes without water accessible when they desire it, are likely to be troubled with constipation and this should be religiously avoided near lambing. They need and will drink fresh water twice a day, and if the water is colder than fresh well water and cannot conveniently be warmed it will be well to have the water accessible all during the day so they can take it in small amounts.

Constipation may be caused by feeding too much dry feed. Bran is excellent to feed if one has nothing but dry feed to give, oatmeal is good also. If corn is the only grain being fed it will be well to use bran and oats instead with the other roughage at least until constipation is overcome. Succulent feeds are excellent and relished by the ewes; roots, such as the mangles, are also good silage. This is a critical time in the ewe's life and proper care is essential.

A large flock of ewes is inclined to crowd through a narrow door or passage, instead of the other roughage, at least until constipation is overcome. Succulent feeds are excellent and relished by the ewes; roots, such as the mangles, are also good silage. This is a critical time in the ewe's life and proper care is essential.

Every housewife should own a wringer, even if she has no washing machine. The reversible ball bearing one with side springs is best. Some clothes wringers have an emergency arrangement on top whereby the tension may be released should a finger be caught between the rollers. Wringers should be oiled in the bearings and the rubber rollers wiped off after using. They should be covered to prevent dirt from gathering on them.

Mangles or ironing machines are operated by electricity or by engines, or by hand. The rollers of the mangles are heated by means of gas or gasoline, or may be made of hard, highly-polished wood, depending upon pressure, instead of heat, for smoothing the clothes. Seventy-five per cent of the ironing for a family can be done on a mangle and done in about one-fourth the time required to do it by hand.

In addition to the mangle, it is well to have several ironing-boards—a narrow one for skirts; a sleeve-board, a little oval affair held up in the air by two supports so that the article can hang free; a bosom-board, small and oblong, for shirt-bosoms; and either a small rolling-pin or a piece of broom-stick, padded and covered, to slip into tight, closed places.

Folding ironing-boards may be purchased or made at home. The possibility of garments being easily slipped off or on. Any handy man can put adjustable supports on the old ironing-board which you have always used propped up on chairs and tables. Then you can get the board at the proper height and save much back-ache. Fortunately much of the family laundry can be put in good enough shape for use by careful folding; this will do away with the need of ironing, and the plan does not mean shiftlessness—only common sense.

If padding for the ironing-board must be purchased, choose silence cloth, such as is used for dining tables. Two thicknesses of new cloth will make the board soft enough. Instead of tacking the covers on ironing-boards, cut them so that they are about four inches wider than the board, and sew tapes along the sides so that they can be tied on. Four or five tapes on each side will be sufficient; made thus, the covers can easily be changed. Unbleached muslin, sixty inches in width, is the best choice. If new material is purchased, this width will cover the length of the board without waste.

For an iron-stand, use an ordinary tin layer-capepan fastened to the ironing-board with stout nails; set the iron in this. It protects the board and prevents the iron from slipping to the floor. To insure against fire, place a sheet of asbestos under the pan. A large screw-eye inserted in one end of the ironing-board allows the board to be hung upon a nail, thereby keeping the ends from contact with the floor.

Next to mangles the self-heating irons are the greatest steamers, as the irons can be kept at the proper temperature without the continual walking back and forth between stove

and ironing-board. They are heated by gas, electricity or kerosene. Irons should be kept in a dry place. When about to use them, as soon as they are warm, rub lightly with paraffin or beeswax tied in thin cloth. Then rub the irons over some cleansing powder, or coarse salt, sprinkled on a newspaper. Clean the irons in the same manner when your work is finished; when cold, store in a covered box. All laundry equipment should be protected from dust. It saves time in cleaning when it is next needed.

SUN LIFE SHOWS BIG GAINS IN ALL LINES

49th Annual Report is issued, Showing Tremendous Gains in New Business Obtained.

Several new and interesting records in the insurance business, were made by the Sun Life Assurance Co. of Canada during 1919. The 49th annual report of the company has just been published and shows that the new business actually issued and paid for during the past year was \$86,548,850, being an increase of \$24,957,457, or 67.7 per cent., over 1918. The tremendous business of the Sun Life will be realized when it is stated that applications for new assurances retained during 1919 exceeded one hundred million dollars. The figure creates a distinct record in the insurance business of the Dominion, as no Canadian company has ever before approached this total.

The business in force amounted to \$416,358,462, showing an increase of \$75,548,806. The assets of the company were increased by \$8,091,089 and now amount to \$105,711,468, while the report shows a net surplus of \$8,037,440 over and above all liabilities and capital stock, which indicates the importance attached by the company to safety and protection. The company paid out to policyholders and their beneficiaries \$12,364,000, bringing the total amount paid out in this connection since organization to \$91,227,532. Another record was made in regard to income with a total of \$25,704,201, or an increase of \$4,053,101 over the previous year.

Owing to the remarkable development in the business of Canada's greatest life assurance corporation, the directors feel that the business in the Dominion is due to enormously expand during the present year.

Capacity of Cisterns.

Cistern problems do not often arise, but when they do it is well to be prepared. Here is the method.

Determine in feet the diameter of the cistern and also the height to the arch. Multiply the diameter by itself and by the height. Take four-fifths of the product. Divide by four, the number of cubic feet in a standard barrel. (A standard barrel contains 31.5 gallons and is a little more than half as big as the familiar barrel known as the hoghead.)

A cow should have about two ounces of salt each day.

SOW SIMMERS' SEEDS

Successful Since 1856
It is easy to make claims for seeds—it is another thing to be able to substantiate them. We are emphatically able to make our claims good because our record for "seeds that grow" has gone unbroken for 64 years. For seeds, bulbs, plants of all kinds, visit Simmers' goods. THEY GROW!
Write for our handsome new 1920 Catalogue today.

What Do You Do With Your Straw?

In planning how much you intend to put into machinery for the coming season, it might be well to set aside some money for the purchase of a straw spreader. This is just a suggestion, but I believe it is a wise one.

There are two ways to spread straw—with pitchforks or with spreaders—especially designed for the purpose. If your idea is to get it on the land any old way, hit or miss, in bunches and bare spots, use a fork. If you want a nice, even job, and one that will bring results, by all means use a spreader. I believe that the increased yield due to the application of straw would pay for a spreader in one growing season. Certainly a few years' use will pay you back in full.

"No More Boarders Here."

If you keep hens as a hobby, then what follows will not interest you; but if you keep them for what you can get out of them in the way of profit, most probably it will interest you.

I only had a small flock, 80 birds all told, and when a poultryman looked over them two months ago, and told me to cull out 20 of them, I didn't feel like listening to him. But he talked to me in such a way as to convince me that his advice was good, and I culled out the 20, selling them at \$1.50 each. Now for results: My 100-pound of mash lasted me five days longer—nineteen instead of fourteen—making a saving of 120 days' feed, which will equal a cash saving of \$60, and, despite this culling, I have been getting just as many eggs; in fact, owing to the rest of the birds having more room, the production has increased. Therefore I am thoroughly convinced that the experiment has been worth while.

Spohn's Distemper Compound

Early spring brings with it COUGHS, COLDS, DISTEMPERS, etc. Prepared. Give your horse at the first sign of a cough. Better still, give it as a preventive before he shows signs of sickness. "SPOHN" acts equally well as a preventive or cure. By reason of its germicidal qualities, it expels the disease germs, abates fever, restores appetite and condition. Sold by Your Druggist.
SPOHN MEDICAL COMPANY, Graham, Ind., U.S.A.

BRUCE'S Famous Root Seeds

Bruce's Giant Feeding Beet. In two colors, White and Rose, a cross between the table and also for feeding cattle, coppers and unequalled for feeding, easily harvested and keeps well. 5 lb. box, \$1.00; 10 lb. box, \$1.75; 25 lb. box, \$3.50; 50 lb. box, \$6.50; 100 lb. box, \$11.00, postpaid.

Bruce's Mammoth White Carrot. Half Long Variety, heavy cropper, splendid quality, easily harvested. Grand keeper. 5 lb. box, \$1.00; 10 lb. box, \$1.75; 25 lb. box, \$3.50; 50 lb. box, \$6.50; 100 lb. box, \$11.00, postpaid.

Bruce's Giant Yellow Mangold. An intermediate variety, heavy cropper, good keeper, of splendid feeding quality and easily harvested. 5 lb. box, \$1.00; 10 lb. box, \$1.75; 25 lb. box, \$3.50; 50 lb. box, \$6.50; 100 lb. box, \$11.00, postpaid.

Also Yellow Leveghans, Giant Yellow Globe, Golden Tumbler and Mammoth Long Red Mangels at same price.

Bruce's New Century Swede Turnip. A grand purple top variety, splendid for the table and also for feeding cattle, a grand keeper and shipper. 5 lb. box, \$1.00; 10 lb. box, \$1.75; 25 lb. box, \$3.50; 50 lb. box, \$6.50; 100 lb. box, \$11.00, postpaid.

Also Bruce's Selected, Bruce's Giant King, Half's Westbury, Elephant, Magnum Bonum, Kangaroo and Hartley's Swedes at \$1.00, 5 lb. box; \$1.75, 10 lb. box; \$3.50, 25 lb. box; \$6.50, 50 lb. box; \$11.00, 100 lb. box, postpaid.

Also Aberdeens, White Globs and Greyhound Turnips at \$1.00, 5 lb. box; \$1.75, 10 lb. box; \$3.50, 25 lb. box; \$6.50, 50 lb. box; \$11.00, 100 lb. box, postpaid.

HAMILTON Established 70 years ONTARIO

SUN LIFE ESTABLISHED NEW LANDMARKS in 1919

New milestones in the progress of the SUN LIFE ASSURANCE COMPANY OF CANADA were passed in 1919.

Applications received.....over \$100,000,000.00
Assets.....over \$100,000,000.00
Assurances in force.....over \$400,000,000.00
Gratifying progress was made in all other departments during the year.

SYNOPSIS OF RESULTS FOR 1919:

Assets as at 31st December, 1919.....\$105,711,468.27
Increase over 1918.....\$8,037,440.42
Cash Income from Premiums, Interest, Rents, etc., in 1919.....25,704,201.10
Increase over 1918.....4,053,101.41
Profits Paid or Allotted to Policyholders in 1919.....1,606,503.37
Total Surplus 31st December, 1919, over all liabilities and capital.....\$8,037,440.25
(According to the Company's Standard, viz., for assurances, the U.K. (S) Table, with 3 1/2 and 3 per cent interest, and for annuities, the B.O. Table with 3 1/2 per cent interest.)

Death Claims, Matured Endowments, Profits, etc., during 1919.....12,364,651.15
Payments to Policyholders since organization.....91,227,532.30
Assurances issued and paid for in cash during 1919.....\$6,548,849.44
Increase over 1918.....\$4,957,457.40
Life Assurances in force 31st December, 1919.....416,358,462.05
Increase over 1918.....75,548,805.93
Life Assurances applied for during 1919.....100,336,848.37
Increase over 1918.....42,529,981.70

THE COMPANY'S GROWTH

YEAR	INCOME	ASSETS	LIFE ASSURANCES IN FORCE
1872.....	\$ 48,210.93	\$ 98,461.95	\$1,064,350.00
1884.....	278,370.65	836,897.24	8,844,404.64
1896.....	1,373,596.60	4,610,410.43	31,528,560.74
1908.....	4,561,936.19	17,851,760.92	85,137,662.85
1910.....	15,092,275.24	56,187,656.38	218,390,435.00
1919.....	25,704,201.10	105,711,468.27	416,358,462.05

The SUN LIFE issues more ordinary assurances annually than any other Company of the British Empire.

On Teaching History to Children.

As a child I had a profound dislike for history, and considering that a history recitation in those days was hardly more than a struggle to recite "the lesson" as nearly verbatim as possible, I am inclined to think that my childish judgment was very good. Poor little youngsters that we were, we had to draw plans of battle grounds, to learn the numbers killed and wounded on the opposing side, and to recite lengthy lists of dates, adjusting its proper event to each. We had so little idea of the relative importance of the events that the burning of a tiny village by the Indians seemed to us quite as momentous as the surrender of Quebec. A child has little background of knowledge. Dates mean nothing to him; and proper names, if he knows nothing of their bearers, might just as well be Greek.

In teaching history to children, there is just one fact that we can generally depend upon, and that is their unfailing interest in people. The children's librarians say that they cannot begin to supply the demand for short, interesting biographies, stories of people and what they did, told in a simple way. "Columbus set sail from Spain to try to find China," will make a child listen. "An attempt was made by Spain to discover China," will make him wonder how soon he can get away!

If I were going to teach the history of Canada to boys and girls of nine or ten, I would try to do it by inducing them to read simple, picturesque, well-written stories of the men who have made our country what it is. Then I would let the children talk of what they had read and ask questions about it. Some of these questions I would answer; some I would ask them to try to answer for themselves. I would say nothing about exact dates, but I would make four or five general divisions of our history, such as discoveries and settlements, Indian wars, English conquest, etc., and put a copy into every book. There would not be many stories of our Canadian heroes that the children would not soon be able to put into their proper divisions. Then if more than one book had been read, I would go through the stories rapidly in their chronological order, bringing out any information that the children might have gathered and occasionally adding a word to connect the stories or to make some point clearer.

The Fear of Failure Makes Many a Man a Success.

I once knew a man who had a fairly good job, and did it well. He heard one day that the boss was considering him for a much better one, and a much more difficult one. He at once began telling his friends that he didn't want that kind of a job, because it wouldn't develop him along the lines he wanted to develop himself.

The truth was that, deep down in his marionettes, the man didn't want that job because he was afraid he couldn't handle it. And he camouflaged this fear by saying that he wasn't interested in it.

But the job was offered to him. And he took it, and made good. No one was more surprised than he was, though of course, after it was done, he pretended that he knew all along he could do it.

That man almost permitted his own fears to scare him out of a chance to get ahead. And how glad he was afterward that he hadn't! But here is the point:

Immediately he took the hard job, this man's secret fear that he couldn't make good was swallowed up in the horrible thought that his associates would look down on him if he didn't make good. That forced him to try his best, which is something that few of us do unless we know we have to. The solution of the problem is to have a goal that you are definitely committed to—a goal that other people expect to reach. Then the chances are you will reach it.

And don't forget that it is just as useful publicly to hang up a goal for yourself in farming as it is in any other line of business.

Old Bony Scrub.

Good-bye, old Brindle, bony scrub. The time demands a better breed. You eat enough, but there's the rub—You never pay for half your feed. So after all these years we part, But pray remember as you go, If this should break your bovine heart, You broke my purse long long ago. A Cow Tester.

"When the farmers adopt the forty-hour week," mused the city man who was born and raised on a farm, "I guess one of our problems will be to find a substitute for oats." The common cabbage worm is a native of the Old World and was first introduced into America about 1860 at Quebec. In twenty-five years it had spread until it reached all of this country east of the Rocky Mountains.

Arabia's Uncrowned King.

A stranger must be in some way extraordinary. Mr. Lowell Thomas writes, to attract attention on the streets of the Holy City, for Jerusalem is a meeting place of East and West, and types of men and costumes are many. My curiosity, Mr. Thomas says, was excited by a single Bedouin, who stood out in sharp relief from all his companions. He was wearing a kumfi and abba such as are worn in the Near East only by native rulers, and in his belt was fastened the short, curved gold sword of a prince of Mecca. His insignia marked him as a descendant of the Prophet.

"Who is he?" I asked the Turkish shopkeeper, who could speak a little tourist English. He only shrugged his shoulders.

Who could he be? I was certain of getting some information about him from Gen. Sir Ronald Storrs, governor of the Holy City: so I stroiled over in the direction of his palace, just outside the old wall near the quarters of King Solomon.

Who is the blue-eyed youth with the curved sword of a prince of Mecca?

The general quietly opened the door of an adjoining room. There, seated in a morris chair, was the Bedouin prince who had passed me on Christian Street earlier in the afternoon. He was deeply absorbed in a ponderous tome on archaeology.

In introducing us, Gen. Storrs said, "I want you to meet Col. Lawrence, the uncrowned king of Arabia."

Quietly, without any theatrical head-lines or fanfare of trumpets, Thomas Lawrence, the young Oxford graduate, had brought the disunited nomadic tribes of Arabia into a unified campaign against their Turkish oppressors—a difficult and splendid stroke of policy, which caliphs, statesmen, and eunuchs had been unable to accomplish in centuries of effort. He was the commander in chief of an army of more than two hundred thousand Bedouins mounted on racing camels and led Arabian horses. He was the terror of the Turks.

The outbreak of the great war found him excavating Hittite ruins in the valley of the Euphrates. Because the military authorities knew that he had lived among the Arabs, Kurds and Turks, and that he might be expected to have a fairly good knowledge of unfamiliar regions of the Near East, he was given a commission as second lieutenant in the map department, and at the time of the Arab revolt it was decided that he should be one of the men sent into the desert. The Arabian peninsula is larger than the whole region of the United States lying east of the Mississippi, and for thousands of years it has been inhabited by wandering tribes of Bedouins and Arab villagers. But although there is a population of over twenty million people in Arabia, the inhabitants have been only loosely held together by tribal alliances. That this young British lieutenant, who had never had a day of military drill in his life, succeeded in creating an army of two hundred thousand mounted Bedouins and that he swept the Turks from the Arabian peninsula and built these mosaic peoples into a homogeneous nation, is a story I should have hesitated to believe had I not actually been with him in the desert.

In less than seven months he attained such unexpected success that the British raised him in rank from a lieutenant to a colonel, although he did not know the difference between "squad right" and "present arms."

The Germans and Turks were not long in discovering that there was a mysterious power giving inspiration to the Arabs, and through their spies they learned that Lawrence was the guiding spirit of the whole Arabian revolution. They offered a reward of five hundred thousand dollars for him, dead or alive. But the Bedouins would not have betrayed their idolized leader for all the gold in the fabled mines of Solomon.

Where Voting is Compulsory.

In Czechoslovakia, with a population of 13,000,000, great strides have been made in the establishment of a stable government along very modern lines. Perhaps this is because this new country was able to make an earlier start than some of its neighbors and because women were given full political rights from that early start.

One of the unique features in the young republic is the obligation of the citizens, both men and women, to exercise their franchise. If they do not they are summoned into court to answer why. This obligation tends toward making both men and women feel themselves partners in the governmental enterprise and more responsible for its successes and failures.

The Master Workman.

We have preached the doctrine of the hardship of work until we almost believe in it ourselves, and yet work gives to life all that is to make life worth while. Work of itself has furnished to mankind more happiness than any other one thing. All work is not happiness, but life with no work would be unbearable. My idea of the ideal aristocrat, the man who can from within his own soul look down on others, is the master workman, no matter what his line of work may be. A job well done gives pleasure to the man who does it. There is happiness in the pride of being a master workman.—H.L.D.

LOSS OF STRENGTH THROUGH INDIGESTION

The Stomach Can Only Do Its Work When the Blood Is Rich and Red.

Indigestion means loss of strength to many people. Loss of strength, loss of time and loss of money follows indigestion and debility continues as long as the indigestion remains. Workers suffer from indigestion because their hours are long, and often they cannot give proper time to meals. Then the appetite becomes feeble, digestion becomes impoverished. So the general health suffers; languor, nervous troubles and often sleeplessness follows. It is well to remember that the whole system relies upon good blood and that good blood is impossible unless the digestion is good.

The stomach cannot do its work unless the blood is made rich and red, and so new blood alone can cure indigestion. It is for this reason that a remedy like Dr. Williams' Pink Pills which makes new, rich blood, cures indigestion and builds up the whole system. The great value of Dr. Williams' Pink Pills in cases of this kind is proven by the statement of Mr. R. E. Small, Wingham, Ont., who says:—

"The truthfulness of my statement can be proven by scores of my friends and acquaintances. I am a glove cutter by trade and for six long years, have at times been a great sufferer from indigestion. The great value of Dr. Williams' Pink Pills in cases of this kind is proven by the statement of Mr. R. E. Small, Wingham, Ont., who says:—

MONEY ORDERS.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

Saving Ships Single-Handed

Imagine standing in sea water at its present temperature for five hours and you would be dead. That was the ordeal of Ernest Brown, and that was how he saved the motor-jugger Glance from sinking, says an English writer.

The Glance got into a fog outside Plymouth Harbor and ran upon a rock. Water poured through the hole in torrents. Brown plugged it with two coats and stood on them. He stuck it out for five hours, when the boat was at last towed into safety. By that time the water was nearly up to his armpits.

There are craft in plenty sailing the seas today which owe their existence to the pluck or presence of mind of a single individual.

When the fishing-boat Marie was sixty miles out in the North Sea, the cabin was flooded by a big wave. The water getting into a hundredweight drum of calcium carbide, caused it to burst open. The released acetylene gas took fire and instantly the cabin was in a blaze.

Skipper Dye leaped down into the cabin, seized the red-hot drum, carried it up on deck and flung it into the sea. His hands and face were roasted raw, but he saved his ship.

Equally brilliant was the exploit of the chief engineer of the transport

Rapadan. In the midst of an Atlantic gale the dreaded cry of "Fire!" was heard. The stores were ablaze, and presently a drum of turpentine burst, enveloping the engine-room in flames. Hose could not be brought to bear, and to all appearance the ship was doomed.

Down into the hell of flames dashed the chief engineer, and after stopping the engines, turned on all the available steam-cocks. He came plunging out, blackened and scorched, and gave orders to close all hatches and openings.

The steam extinguished the fire, and the ship was saved.

These last two cases prove what one man can do in a moment of fearful emergency. Here is another type of pluck:

On her way from Yucatan to Liverpool, with a cargo of log-wood, almost the whole crew of the barque Aurora went down with the dreaded beriberi, or sleeping sickness. The one man who escaped the disease was the chief officer, and for the last eighteen hundred miles of the voyage he navigated the barque practically single-handed.

There were three or four of the crew just able to stand and help him shoreward, but he was at the wheel night and day, and in the end he brought the ship and crew alike safe into port.

You'll Enjoy the Flavor of INSTANT POSTUM

and this table drink is easy to make just right. One cup of the cup strength as desired, making it strong or mild to suit taste. Used instead of coffee, it's Better for You More Economical.

Why is a Boy Bad? Because He is Abnormal.

"You are a bad boy!" says his mother to little Johnny. But what she really means is that he is naughty and deserves to be punished.

The normal boy is bound to be naughty at times; it is a youthful effervescence. It is not the boy who is always good that does something worth while in after life or makes the most useful citizen.

The bad boy is a wholly different type. He is distinctly abnormal. Unfortunately, his very boldness in wrongdoing often renders him an object of admiration to his fellows, more particularly to boys younger than himself.

But what becomes of him in after life? What became of the notorious bad boy of your own neighborhood? You haven't heard of him since he grew up. He disappeared somehow. That is what happens to bad boys; they never amount to anything, and they disappear. Quite commonly doubtless they become habitual criminals.

The psychic development of the young human being should be most carefully watched. It is of utmost importance that the spiritual part of him shall be properly trained and cultivated. See what happens to the boy who is neglected in this respect, the outcast child, orphaned perhaps and thrown upon the streets. He becomes precociously world-wise. He is cunning and self-helpful far beyond his years; but his soul is permanently stunted.

Curiously enough, there is a popular notion that clergymen's sons are more likely than other boys to turn out bad. Any unexplained deviance in a neighborhood is usually laid at the door of the local parson's youngster, no matter how innocent he may be. The child is not merely the father of the man, but is more properly to be regarded as his remote ancestor. As his mind grows he passes through the same stages of development as those which marked the evolution of the savage into the civilized human being. Hence the thoughtless cruelty of the small boy, his destructive propensity and the unwillingness with which he adopts many of the habits and ways of civilization—those of cleanliness for example, to an epoch of the remote past. All of his tastes and ideas are primitive, and nothing pleases him better, if opportunity offers, than to occupy a cave and make a pretense of getting a living by foraging made therefrom with a few congenial companions—just as did his forebears 100,000 years or more ago.

Forests of the Dutch East Indies cover 247,000,000 acres and are all virtually unexplored.

If desired it is possible to make an old dump look like new. For instance, a plain brass lamp may be enameled in white or ivory by using the proper undercoating. Other preferred effects are as easily obtainable.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels.

Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

Should You Spray? More positive proof of the benefits derived from repeated sprayings in apple orchards could not be obtained than the following results obtained by a successful fruit grower. Three lots of Ben Davis trees were sprayed once, twice and six times, respectively, and the results were clearly demonstrated to a large crowd at picking time.

The trees sprayed six times yielded 28.3 barrels; those sprayed twice, 16.6 barrels; and those sprayed once, 10.3 barrels. At the current wholesale price this would amount to \$128.83, \$46.00 and \$27.17, respectively. The fruit sprayed once or twice was scabby and wormy, and the foliage of these trees had fallen; the apples sprayed six times were smooth and clean, and there were plenty of fruit buds showing. Which all goes to show that you can "get by" with half-hearted spraying, but when it comes to showing profits you cannot hope to stay in the business you do. The orchardist who cares for his fruit will win out every time.

Keep Minard's Liniment in the house.

Paille Maille!

Do you know why London's famous "lump" is named Hyde Park? Originally the piece of land referred to—nearly 400 acres—was the site of the ancient Manor of Hyde, belonging to the monastery of St. Peter, Westminister. In 1536 it was conveyed to King Henry VIII. In 1652 the Park—by that time 620 acres—described as "that impaled ground called Hyde Park," was sold by order of Parliament for £17,000. De Grammont, we are told, referred to Hyde Park as a barn field, in the time of Charles II. Although nowadays it is the rendezvous of fashionable folk, at one time it was let out in farms!

The well-known Rotten Row, it is interesting to know, is supposed to be derived from the French "Route du Roi"—meaning, "the King's Drive."

Pail Maille, by the way, got its name from the fact that it was there that King Charles and his courtiers played the game called "Paille-Maille." This game, sometimes called "Paille Maille," consisted of hitting a ball with a "maille"—mallet—through an iron hoop, which was hanging from an arm on a high pole.

WHEN BABY IS CROSS

Mothers, when your baby is cross—when he cries a great deal and no amount of attention or petting cheers him—something is the matter. It is not the nature of little ones to be cross and peevish—the well child is a happy child. Give him a dose of Baby's Own Tablets and he will soon be well again. The Tablets are a mild but thorough laxative which regulate the bowels and stomach; banish constipation and indigestion; break up colds and simple fevers and relieve the other minor ills of little ones. Concerning them Mrs. Oscar Redard, Ste. Sophie, Que., writes:—"Baby's Own Tablets are an excellent remedy for constipation. They relieved my little one when nothing else would and I can strongly recommend them to all mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Heat For Alaska.

The Pacific has its own "Gulf Stream," which is called the Japan Current, and it is formed in the same way.

The trade winds, blowing from the tropics, bank up the warmed ocean waters in the Yellow sea (corresponding to the Gulf of Mexico), and thence they pour out between Japan and Formosa, the stream thus formed passing south of the Aleutian chain, along the southern coast of Alaska, and down the west coast of North America.

Hence it comes about that the whole southern coast of Alaska has a temperate climate. It is warmed by the Japan Current.

COUGHS AND COLDS MEAN RESTLESS NIGHTS

Look at the vitality. Danger lurks in every hour a cough is allowed to run. Assist nature to bring your children quickly back to health and strength and avoid serious complications by the prompt use of Gray's Syrup—over 60 years in use. Always buy the Large Size.

GRAY'S SYRUP OF RED SPRUCE GUM

Manufactured by D. WATSON & CO., New York.

WHEN NEURALGIA ATTACKS NERVES

BITS OF HUMOR FROM HERE & THERE

Charity Begins at Home.

Charitable Lady (collecting for sale of work).—"Have you any particular use for your old clothes?" Citizen—"Yes; I'm wearing them."

Willie Answered.

A doctor who was superintendent of the Sunday school in a small village asked one of the boys this question: "Willie, will you tell me what we must do in order to get to heaven?" Said Willie: "We must die."

"Very true," replied the doctor, "but tell me what we must do before we die."

"We must get sick," said Willie, "and send for you."

Bar Spectacles in Company.

Chinamen regard it as impolite to wear spectacles in company.

Ask for Minard's and take no other.

GIRLS! DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty.

Oh, girls, such an abundance of thick, heavy, invigorated hair; a perfect mass of wavy, silky hair, gloriously fluffy, bright and so easy to manage.

Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy, golden gleams and tender lights. The youthful glints, tints and color are again in your hair.

"Danderine" is a tonic beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on bottle.

Cause of Early Old Age

The celebrated Dr. Michener, an authority on early old age, says that it is "caused by poisons generated in the intestine." When your stomach digests food properly it is absorbed without forming poisonous matter. Persons bring on early old age and premature death, 15 to 30 drops of "Selgel's Syrup" after meals makes your digestion sound.

SHILOH 30 DROPS COUGHS

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" stamped on tablets positively identifies the only genuine Aspirin, the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuritis, Joint Pains, and Pain generally.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monheim, Germany. While it is well known that Aspirin is a Bayer product, Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Wm. Anderson Zephyrs

Worn the World Over. Scarcest Goods on the Market Today.

Our Import Order Just Opened Up This Week

These Anderson's Zephyrs are made from a superior grade of Egyptian cotton, colors absolutely fast. When made up in a pretty "New Idea Pattern style" they are very attractive for porch or street dresses. Our best quality 75c yard.

Canadian and American Gingham

A large range of these scarce goods moderately priced—35c and 50c.

Make Your Silk Selections From Our Stocks

Colored Duchess Satins—30-in., heavy all silk—\$2.50 to \$3.50.

Pussy Willow Silks—Spring colors, 40-in.—\$2.75 to \$3.75.

Pailette Silk—Black and colors—\$1.50 to \$2.25.

Taffeta Silk—Black and colors—\$1.00 to \$2.75.

Silk Crepe-de-chene—Evening shades—\$1.00 to \$2.50.

Georgette Crepe—Swiss manufacture "crisp"—\$2.75 to \$3.25.

"Kayser" Gloves for Spring

In heavy Silk Lisle and Chamotte. No other goods fit as well or wear so long—\$1 to \$2.50.

Holeproof Hosiery Radium Hosiery

Two leading lines, in silk, half silk, lisle and mercerized. Prices—75c to \$2.

Our Spring Orders for Clothing

Now coming, and each day shows new goods. These orders were placed a year ago and our prices will show a considerable saving while present stock lasts. We advise an early selection. Make closest comparison as to quality, manufacture, style and prices and we are satisfied with results.

Lots of Boys' Clothing, Children's Suits, separate Trousers, Knickers and Bloomers.

Best Makes in Overalls and Work Shirts

Buying well ahead in large quantities allows us to sell today at today's wholesale or manufacturers' prices. Our sales increase each season owing to our extra satisfactory values.

"King Quality" Hats for Spring 1920

In the new spring blocks, new spring colors and large variety of styles. Prices for opening season \$4, \$4.50 and \$5. Repeat orders for these same lines will have to be advanced in prices. Certainly to your advantage to make early purchases.

When "price" sounds reasonable but "quality" not there, better let it alone. It's a pretty safe way to buy "quality" first, then followed by "moderate price."

You can always feel pretty well protected by buying at this store.

J. N. Currie & Co.

A Typical Cross-continent Scene in the Testing of Overland "4"

OVER SOUTHERN MOUNTAINS

'Tis a far cry from the sagebrush of Arizona and the mountain trails of California to the prairies of Western Canada and the town and country roads of all the other provinces between British Columbia and Prince Edward Island. Yet automobile tests of the severest kind ever attempted, over mountains and through streams and the roughest of American country, had much to do with a car that is now being made in Canada, by Canadians and for Canadians.

The car in question is the Overland 4, which had 250,000 miles of that kind of testing before the factory at Tor-

onto sold a single car. Since the Canadian factory reached a basis of quantity production, hundreds of the same car have been subjected to rigorous tests on the roughest Canadian roads—with the same result. The car has shown its strength, and has proved a sensation from the standpoint of riding comfort. The explanation given by the manufacturers is that its Triplex Springs—an entirely new invention—give it all the comfort of a long wheelbase car, while retaining the economical and other advantages of a car of short wheelbase.

The Overland 4 is now being sold in every province in Canada. Wm. McCallum is the dealer for Glencoe and vicinity.

STUDEBAKER Announcement To the Canadian People

THE existing prices of Studebaker Automobiles were determined, as they have always been, on the basis of exact equality of value between the American and Canadian dollar. Prices will not be increased to cover losses in exchange unless they become considerably more serious than they are at present, which we believe is unlikely. This corporation is a Canadian industry, employing Canadian labor, investing its surplus funds in Canadian Government securities, depositing its working capital in Canadian banks, and paying large taxes to the Canadian Government. It respects and values the good will and patronage of the Canadian people, and will not take advantage of a temporary emergency to increase the prices of its cars.

Highest cash prices paid for Skunk, Raccoon and Mink. Enquiries promptly answered.

ROSS LIMITED
MANUFACTURERS
Established 1888
LONDON - ONT.

Brown sugar is so expensive that it is likely to affect the supply of "pure" maple syrup.

Born
LOTAN—On Sunday, March 14, 1920, to Mr. and Mrs. James Lotan, sr., Appin, a daughter.
WALKER—On Tuesday, March 16, 1920, to Mr. and Mrs. Thomas Walker, Mosa, a daughter.

In Memoriam
In loving memory of our dear mother, Mrs. Jane Galbraith, who died in Ekfrid on March 16, 1918. One precious to our hearts has gone. A voice we loved is stilled. The place made vacant in our home can never more be filled. Our Father in His wisdom called. The boon His love had given. And though in earth the body lies. The soul is safe in Heaven.
—Her family.

TOWN AND VICINITY

Ekfrid council meets on Tuesday, March 30.

Mr. and Mrs. D. K. McRae, jr., have moved out to their farm in Ekfrid. F. G. Humphries has bought the Toon farm of 150 acres adjoining Glencoe.

Oysters will be served on Saturdays from 3 to 10 at the I. O. D. E. rooms opposite the post office.

James Riddle, a former resident of Ekfrid township, died at the home of his daughter, Mrs. Arthur Rockett, in London on Saturday, in his 90th year.

Mr. and Mrs. Burchell and family have moved into town from the farm in Mosa and are occupying their residence on Victoria street south.

Glencoe hockey team visited Thamesville on Wednesday night of last week and won in a friendly game with the team of that town by a score of 1 to 0.

The Glencoe Book Club are having their annual social evening on Monday, March 22nd, at the home of Mrs. Rose Stuart. A progressive high tea will be served.

James McGaw, a well-known resident of Dunwich township, passed away at his home, concession 1, on Thursday, after an illness of almost a year with cancer.

Miss Mary Leitch is leaving The Transcript office this week to take Miss Annie Barker's place at telephone central. Miss Barker is leaving for Hamilton in a week or so.

Mrs. Donald McRae of Windsor, aunt of D. H. McRae of Strathburn, is dead, aged 92 years. The body arrived at Glencoe yesterday noon and interment was made in Oakland cemetery. Mrs. McRae's husband formerly kept the American House here.

The postponed opera, "Isle of Jewels," will be given by the High School girls in the Town Hall, Glencoe, on Friday and Saturday evenings, March 26 and 27. See ad. in these columns.

Mrs. John McLean, south Main street, passed away at 2 o'clock yesterday morning after a lengthy illness. The funeral will take place on Friday at 2 o'clock from her late residence to the Simpson cemetery.

The last of a series of Chautauqua entertainments arranged for by the Daughters of the Empire will be given on Saturday evening by The Carolina Girls, three charming entertainers who are sure to please. Prices 50c and 35c; plan at Lumley's drug store.

At Neil & Galbraith's sale, near Appin, a cow turned out from the stable to be sold made a bolt through the crowd and knocked down several men. Duncan Graham, North Glencoe, was knocked down and his head stepped upon. He received several bad cuts above the eyes.

The death occurred at the residence of her son, Peter J. Morrison, J. P., Glencoe, on Thursday, March 11, of Mrs. Margaret Morrison, aged 73 years. Interment was made at Oakland cemetery on Saturday afternoon.

Rev. G. S. Lloyd, Presbyterian minister, conducting a service at the house.

SPECIAL NOTICES

Carolina Girls Saturday night. Calf for sale at J. A. McLachlan's. Reserve March 31st for Appin box social.

Raincoats from \$5 to \$25, at Lamont's. No. 21 O. A. C. barley for sale.—D. A. Coulthard.

Buy your sugar now in 100-lb. sacks at Mayher's. Cash only. Money to loan on farm property. Write to Box 34, Wardsville.

Chopping Tuesdays and Saturdays. W. R. Stephenson, Appin. For sale—four turkey hens. Apply to Duncan Graham, route 4, Glencoe.

Alex. McAlpine & Son, dealers in flour and feed, coal, salt, cement, etc. Good seed oats and barley for sale. Apply to James A. Murray, Route 2, Appin.

Good 1-inch team lines at \$7.50; horse collars at \$3.45 and \$5—at Lamont's.

Flour and feed for sale at store corner of Main and McKellar streets.—J. D. McKellar. 23rd.

House on Main street for rent. May have possession on April 1. Apply to Mrs. Jean Keith.

Finest and best selected stock of raincoats ever shown in Glencoe, at low prices.—D. Lamont.

For sale—pure bred Durham bull calf, 9 months old, registered. Apply to E. V. Thornicroft, Appin.

Received shipment of pure barley meal this week, choice chop. Call and see it.—Alex. McAlpine & Son.

The Transcript office sells blank counter check books. Handy for those not using large quantity.

Plan for Carolina Girls at Lumley's drug store. Don't fail to hear this unique entertainment Saturday night.

To let—a job of moving two small buildings a short distance. Apply George McCallum, Victoria street, south.

Bees wanted—free from disease—for April delivery. Write, stating type of hive and price, to M. L. Farrell, Glencoe.

The gentleman who borrowed our wire fence stretchers last fall is requested to return same at once to Wright's hardware.

Eight sets of team harness to clear out at once. You will find my prices the lowest.—D. Lamont.

For sale—two hundred bushels of good seed oats, Banner variety, some of 1918 and 1919 green. Price reasonable.—W. H. Reycraft.

For sale—hard buckwheat coal, \$5 per ton f.o.b. powerhouse. Apply to W. A. Currie, Sec. Treas. Glencoe Electric Light Commission.

We handle Staunton's ready trimmed wall papers. Our complete spring stock just arrived. Call in and see our samples.—E. McIntyre, Appin.

Lost—a large white collie dog with black markings. Suitable reward will be paid for information that will lead to his recovery. Send information to Transcript office.

The Women's Institute of S. S. No. 9, Mosa, will meet at the home of Mrs. J. C. Graham, North Glencoe, on Thursday, March 25. All members are requested to be present.

The Transcript office receives and forwards advertisements for the Toronto Globe and allows a big discount for cash. Send your advertising through us and save money.

Married man wanted to work on farm for eight months, beginning first of April. House provided on the farm. For further particulars apply to A. B. McDonald, Glencoe.

For sale—a Colonial range, with reservoir, elevated warming closet, oven thermometer, in first-class condition, burns coal or wood. Cheap for quick sale. Enquire at Transcript office.

Save the tire and save money. I can do it for you. Expert vulcanizing and re-treading. Will open shop in McAlpine's new garage shortly. For present information see Mr. McAlpine or Mr. Mulligan.—J. Rose.

For sale. Registered Shorthorns—five young bulls, red, white and roan, age "on six to twenty-two months. They will be sold cheap to make room at once. Also some young cows with calves at foot.—D. Trellain, Strathburn.

Mrs. W. A. Currie wishes to announce that she has a large stock of millinery suitable for spring and summer wear. This is the balance of the stock of spring and summer goods on hand, and you can have it at your own price.

We have Joe Baldwin back in our blacksmith shop and have added some new equipment, and are prepared to handle all work entrusted to us in an expeditious and satisfactory manner and at reasonable prices. Bring in your harness and plow work now.—Don H. Love, blacksmith.

Try a little advertising!

GUARD AGAINST THE 'FLU

Serious Outbreaks of Influenza all over Canada

GOOD HEALTH IS THE SUREST SAFEGUARD

"FRUIT-A-TIVES" Brings Vigor and Vitality and Thus Protects Against Disease

There can be no doubt that the situation regarding the spread of influenza throughout Canada is one of grave concern. It is quite true that the number of cases does not constitute an epidemic such as caused the suffering and sorrow during the terrible days of 1918. Yet there is no disguising the fact that everyone should be on their guard against the disease.

In Montreal alone, from January 20th to February 21st, three thousand, one hundred and twenty-two cases of influenza and 189 deaths from the disease were reported to the Health Department.

If the outbreak had come at the beginning of the winter instead of the end, we might reasonably feel that the very cold weather would check the spread of the disease. But coming as it has, at the end of the winter, there is grave fear that an epidemic may occur. For spring, with its slush and rain under foot, its dampness and chill, its constant changing from cold to warm and back again, is a prolific source of coughs and colds, pleurisy and pneumonia.

The best protection, in fact, the only safeguard against the 'Flu, is, GOOD HEALTH.

Those who are not as well and strong as they should be; those who are underweight; those who are "run-down" through overwork or sickness; should build up at once. What they need is a Blood-purifier, a body-builder, a strength-giver, like "Fruit-a-tives", the wonderful fruit medicine.

"Fruit-a-tives" regulates the kidneys and bowels, causing these organs to eliminate waste regularly and naturally as nature intended. "Fruit-a-tives" keeps the skin active, and insures an abundant supply of pure, rich blood. "Fruit-a-tives" tones up and strengthens the organs of digestion, sharpens the appetite, brings restful sleep and renews the vitality of the nervous system. "Fruit-a-tives" contains everything that an ideal tonic should have; to purify the blood, to build up strength and vigor, and to regulate the eliminating organs, so that the whole system would be in the best possible condition to resist disease.

Now is the time to build up your health and strength, not only as a precaution against the ravages of influenza, but also to protect you against "spring fever" and the inevitable reaction which comes with the appearance of warmer weather. Get a box of "Fruit-a-tives" today and let this fruit medicine keep you well.

"Fruit-a-tives" is sold by all dealers at 50c a box, 6 boxes for \$2.50, trial size 25c, or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

PERSONAL AND SOCIAL

—Mrs. Christena McLellan is at the home of Mrs. Keith.

—J. D. Brown was home from Detroit for the weekend.

—Miss Tena Campbell spent the weekend with friends in London.

—T. J. Grover, who has been spending the winter here, returned to Flaxcomb, Sask., yesterday.

—Mrs. D. K. McRae, jr., spent last week with her parents, Mr. and Mrs. Charles Stinson, St. Thomas.

—Mr. and Mrs. Samuel Thompson have returned home after visiting their daughter, Mrs. Ghent, Toronto.

—Archie B. McRae and Mrs. Dan Finlayson of Green Leaf, Mich., are visiting relatives and friends in Glencoe and vicinity.

—Mrs. John Strachan is a delegate to the Provincial W. M. S. convention to be held at Stratford on Monday, Tuesday and Wednesday of next week.

—Mrs. Suter is visiting her daughter, Mrs. Rayner, at Grimsby, and expects to be home the latter end of the week. Mr. Rayner is on a trip home.

—Glencoe was represented in the social circle at the opening of the Provincial Parliament last week by Miss Ruby Suttler and Miss Fern Graham.

—H. J. Jamieson was in Toronto last week attending the annual meeting and banquet of the agents of the Sovereign Life Assurance Co. to England to visit his mother.

—Miss Emerline Goff is in Ridgeway in attendance upon her aunt, Miss A. Goff, who had the misfortune to fall on the ice last Saturday evening, sustaining some severe injuries.

—Peter McCallum and daughter Margaret, who spent several months with relatives in Regina and Stony Beach, spent the weekend with Mrs. Wm. Tait, Glencoe, en route to their home in Dutton.

—Mrs. W. H. Watterworth, who has been spending the winter in Leamington, was called to London last week to attend her cousin, Mrs. Charles McMillan and Miss Myrtle McMillan, who are ill but are slightly improved at time of writing.

Strathburn
John Cyster, mail courier, will be through drawing mail the end of this month. Sam Hart of Glencoe has taken the contract.

Webster Bros. are getting ready to drill for oil again.

Some of the farmers around here have tapped their trees.

The Longwood road will soon be ready for autos as the snow is about gone.

MIDDLESEX ROAD PLANS

More than 110 miles of improved roads within the county of Middlesex will result from the Government's good roads plans. Twenty miles of these will be on routes now maintained by the various townships. County Engineer Talbot states that the Stratford and Sarnia road will cross north of the city at the townline between London and Biddulph townships. To the west it will pass over the townline of Williams and Lobo. This route is said to be but little used, and some surprise is expressed at its designation by the Government.

THE HOME TOWN

Some folks leave home for money. And some leave home for fame. Some seek skies always sunny. And some depart in shame. I care not what the reason. Men travel East or West. Or what the month or season—The Home Town is the best.

The Home Town is the glad town Where something real abides; 'Tis not the money-mad town That all its spirit hides.

Though strangers scoff and flout it And even jeer its name, It has a charm about it No other town can claim.

The Home Town skies seem bluer Than skies that stretch away. The Home Town friends seem truer And kinder through the day;

And whether glum or cheery, Light-hearted or depressed, Or struggled it or weary, I like the Home Town best.

Let him who will, go wander To distant towns to live; Of some things I am fonder Than all they have to give.

The gold of distant places Could not repay me quite For those familiar faces That keep the Home Town bright.

—By Edgar A. Guest.

Wedding invitations printed in the latest style and with neatness and despatch at The Transcript office.

Internally and Externally it is Good.

—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, cough, whooping cough, pain in the chest, colic and many hundred ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

NOTICE TO CREDITORS

In the Matter of the Estate of Donald McDonald, Late of the Township of Mosa, in the County of Middlesex, Farmer, Deceased.

Notice is hereby given, pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, Section 56," that all creditors and others having claims or demands against the estate of the said Donald McDonald, who died on or about the fifth day of January, A. D. 1920, are required, on or before the twenty-fourth day of March, A. D. 1920, to send by post, prepaid, or deliver to the undersigned, solicitors for Margaret Muirhead, administratrix of the estate of the said deceased, their Christian names and surnames, addresses and descriptions, the full particulars, in writing, of their claims, a statement of their accounts, and the nature of the security, if any, held by them.

And take notice that after such last mentioned date the said administratrix will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which she shall then have notice, and that the said administratrix will not be liable for the said assets or any part thereof to any person or persons of whose claim notice shall not have been received by her at the time of such distribution.

Dated at Glencoe this twenty-eighth day of February, A. D. 1920.

ELLIOTT & MOSS,
Solicitors for the said Administratrix,
Glencoe, Ont.

The Home Beautiful

Home comfort demands something more than a cosy fireside and close-drawn curtains. The whole interior must breathe a spirit of comfort and luxurious ease. It is an easy matter to obtain these requisites if your selection is made from our samples of WALL PAPERS.

Beautiful, original and exclusive—they are always recognized and selected by those who appreciate the best, and are moderately priced. See our selection of samples. Estimates given on paper-hanging and painting.

New Triplex Springs Iron Out the Wrinkles of the Rough Roads

THE wrinkles of rough roads seem smoothed out completely by the wonderful springs of Overland 4.

These springs hold the wheels to the road, while the passengers ride in even comfort. The astonishing qualities of these diagonally attached Triplex Springs have created an utterly new conception of light car riding ease.

Best of all, this heavy car kind of comfort is now obtainable with economy in fuel and tires and remarkably low upkeep cost.

Overland 4 is started and lighted by two-unit electric starting and lighting system. It has rain-vision windshield and unit power plant. It is equipped with all the latest car essentials and conveniences.

properly infused, is one of Nature's greatest blessings as a harmless stimulating beverage.

A CLOSE CALL

BY THEODORE RUETE

Part III.
In the Ross's bright, little kitchen, Esther was busy with some sewing. A man sat beside the table near the window, gazing absent-mindedly across the yard.

As the afternoon wore on the wind had changed with prairie-like suddenness. First it had lifted and driven away the blizzard, and then it had died away altogether. Under the glowing rays of the setting sun, the thick snow blanket sparkled and glistened in the clear, frosty air, as the temperature dropped lower and still lower. The cold was intense.

"I think I can get on now," the man remarked to Esther, "the storm seems about over." He rose as he spoke and went out into the yard to take a better look at the weather.

"Um-hum," thought Jim Trench, as he carefully scanned the sky. "Guess I'd better be moving." He walked past the front of the house in a position where he could see for miles around.

"Nobody about yet, nor likely to be, with evening approaching, couldn't be better," he muttered. "Hello, what's that?" as he caught sight of Jack's stalled wagon. A wagon presupposes the presence of a human being, and Jim Trench didn't want to be detained by the return of the husband, whose absence Esther had explained to him.

He himself had told her nothing about his own movements, merely explaining how he had stumbled upon their yard-gate in the blizzard which had overtaken him as he was making his way south. Knowing the sparsely-peopled and hilly nature of the country, with all its landmarks obliterated in a world of whirling whiteness, safety had demanded he should take the first opportunity of shelter that offered itself.

In Canada's wide, wild lands it is quite the usual thing for a deer to be in the newer prairie districts than to be visited unexpectedly by all and sundry, and Esther had shown the man hospitality, asking no questions.

Resting quietly by the window, while Esther busied herself with her household tasks, again and again had Jim Trench taken rapid review of the events of the last few days. Once more he pictured to himself that quarrel with Joe Belcher, in the empty stall at the end of Green's barn at Londa. Again he saw Jack's angry face, as he came at him with his hand on his hip.

In imagination he doled Belcher's blow once more and saw himself striking, as he had told himself over and over again, in self-defense. Belcher had received the blow full upon the temple and had gone down like a log, and lain so still—so horribly still. A dreadful fear had assailed him. Suppose? All had been perfectly quiet, nobody about. He had slipped out of the town and tramping south all night, had reached the town of Otley in the early morning hours. Here he had snatched a hasty breakfast the minute the Chink had opened his restaurant and then—away south again. Oh, how weary he was—the tramping through the snow was such tiring work. He was really thankful that the blizzard had come. It had given him a few hours much-needed rest, here in the quiet homestead where no questions were asked about this woman who could do him no harm—indeed she had better not try, he thought grimly. It had also rendered his pursuit more difficult, by covering up his tracks. "Those mountains" will be clever to trace me now, he thought, as he rose from his place by the window.

The sight of the wagon spurred him to make off at once and he hastily re-entered the house for his sheepskin and cap. Esther accompanied him to the door, and as she said good-bye and wished him a safe journey, Jim Trench said ironically: "There's a wagon—got stuck," pointing to where the load of coal was standing, only a quarter of a mile away. Esther's face went white. "It's ours," she stammered. "Where's Jack?—I don't see him? Wait!—he's hung at Jim. 'I'll get a coat.'"

Before Trench had time to utter an angry refusal, she was into the house and out again like a flash. "I'm going south; I must be off at once," Trench saw her, and he begged him to go with her to the wagon.

"What was this foolery?" he asked himself, as still he stood there wasting precious time, listening to her pleadings. What memories of better bygone days had she raised in his mind? After all, he thought, the timely shelter of her home had saved him from a fearful death—she had fed him—entertained him. Bah!—it was madness, but he would gratify her by going as far as the wagon, since nothing else would satisfy her.

Accordingly Trench, cursing himself for his folly, and Esther Ross, trembling and anxious, hurried off towards the stranded team.

As they drew closer, Jack's motionless form was plainly visible where it lay beside the stalled oxen, reminding

EASIER FOR HER TO DYE THAN TO BUY

"Diamond Dyes" Turn Faded, Shabby Apparel Into New.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods, — dresses, blouses, stockings, shirts, children's coats, feathers, draperies, everything.

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

Activity is God's medicine; the highest genius is willingness and ability to do hard work. Any other conception of genius makes it doubtful, if not a dangerous possession. — R. S. MacArthur.

Exercises for the Youngsters.

Many of the ills from which we grown-ups suffer might have been avoided by a sane system of exercises when we were children.

In this article I propose to give readers some hints on how to build up their little ones for the battle of life which lies ahead.

Even the baby, not yet past the kicking and cooling stage, may benefit by exercises properly applied.

The mother cat continually licks the fur of her kittens. But she is not washing them, as one might suppose; she is, in reality, treating each little body to a thorough, warm massage, which sets the blood coursing through the veins to stimulate the feebly-beating heart. Here, then, is a hint for the human mother.

The tiny baby is bathed sitting up in its tub, and the hot water draws the blood away from the heart and brain. When the baby is dried and powdered the mother should, as it lies upon her lap, smooth the flesh gently with her hands, stroking in the direction of the heart. In this way she will not only restore the blood stream to an even flow, but will also feed her infant's muscles.

Children, like animals, yawn and stretch naturally upon awakening from sleep. There is, therefore, no need to teach them deep breathing exercises, but it is a great mistake to encourage them to stop in bed once they are properly awake for the day. Let them get up and play about to get their circulation working against the coldness of the room into which you are going to take them downstairs. In this way you will save your kiddies from many a chill.

The development of the growing child's body is greatly helped by plenty of stretching. It is a good thing, therefore, to encourage children to grasp the bed-rail and pull themselves up and down by their arms.

A child's cot, too, may be used as a miniature gymnasium. The youngster, standing in one of the angles, places its hands upon the side rails and then pushes itself up on to the arms. From this position the legs are raised and lowered, the feet being brought up to the level of the hips each time they are raised. If the child's arms give way under its weight, no harm will be done, as it will only fall on to the soft mattress below.

The value of this exercise is that it develops the abdominal muscles and, incidentally, stimulates the internal organs to the regular performance of their proper functions.

It is useless to attempt to teach children the ordinary physical exercises, which fail to appeal to their imagination. They will only perform the movements mechanically, and so will derive no benefit therefrom. Every exercise should be practised as a game or a competition.

A parent may do much to build up the physique of a young child by placing the hand firmly against the forehead, and then, when the child grasps the wrist, tell it to try to pull the hand away. If the child, in doing this, stands firmly upon its feet, the muscles of the back and loins will be brought into full play.

Another good exercise for children to practise is that in which the youngster sits tailor-fashion upon the floor and rises up without uncrossing the feet. This exercise develops those muscles which keep the knee-joints in place—those joints which so often "go" later in life when a boy begins to play football. There is also an almost more important consideration catered for in this exercise—that of balance.

Many of the accidents which befall us occur because our bodies are badly balanced, and we are, therefore, unable to save ourselves from falling when called upon to alter our position suddenly.

The children of ancient Greece practised several hours daily to acquire perfect balance, which is the main reason why the Greeks were the most graceful people of the world. Let us teach our children the art from their babyhood.

There are very few people who can stand up on one leg and raise the other straight to the front without falling over, or at least, waving the arms about to preserve the balance; but if the weight of the body is shifted on to one leg before the other foot is lifted off the floor, the movement is easily accomplished.

Let your children learn to do this gradually. In time they will acquire the trick of automatically shifting the weight from one limb to the other before a step is taken, and so will be able to walk long distances easily.

Another exercise which gives strength to the lower limbs and perfect balance to the body is that in which a child spreads out the arms, rises on the toes of one foot, and stretches out the other leg behind; the body is then leant forward until almost at right angles to the upright leg, the free leg is raised to the level of the hips. Another advantage of this exercise is that it teaches a child perfect muscle control so that the whole body becomes instantly responsive to the will of the brain.

Children should not be allowed to turn head over heels. The trick in nowise exercises the body, but frequently hurts the base of the spine.

When the little one's heels come with a crash to the floor.

There is, however, a variation which is very useful. Let the child lie on its back with arms outstretched, the legs must be kept close together and quite straight, the feet are then raised up and carried right over the body until the toes touch the floor behind the head. The movement usually ends by the performer rolling over backwards and to the side, which is, in reality, turning head over heels backwards.

In this exercise the muscles of the back and behind the thighs are splendidly stretched, and, in addition, the abdominal muscles are considerably strengthened by the slow raising of the legs.

An Idea for Mothers' Clubs.

There has recently been published a set of books on child training, which I have yearned to possess, but the cost of which places it far beyond my reach. Last week while calling on a friend I found that she had several of these coveted books. She explained that she, too, had longed to possess them, but that the slowness of the family pocketbook forbade. She talked about them wherever she went, and her reward was that she found a woman who had bought a set and was renting it to mothers at the moderate rate of two dollars. Was not that a fine idea?

Immediately, this idea came to me. Why could not Mothers' Clubs, Women's Clubs, and similar organizations invest in a set of such books, rent them to the mothers of the community until paid for, and then lend them freely to those who cared to read them? In looking through these particular books, I am sure they would be a definite, tangible help to many anxious mothers. And there are, scores of others which would help hundreds of mothers whose family budget will not allow anything but absolute necessities.

I am passing this idea along for what it may be worth, for as long as such books, by their prohibitive cost, are placed beyond the reach of common every-day mothers such as I, we

must "figger out" some means by which our little ones, as well as those to whom expense is no item, may have the best that is.

Burns.

By using the proper treatment burns can be made to heal more quickly and the pain also lessened. A good remedy is to apply to the burn a thick paste of soda and water. If it hardens it may be moistened with water before removing from the flesh. The following is an excellent ointment for both burns and cuts: Lysol, half ounce; alcohol, half ounce; castor oil, eight ounces. Place folded gauze over the wound after applying ointment and bandage.

Forestall Colds, Chills and Influenza

Take BOVRIL

Use Bovril in your cooking. It flavours, enriches, nourishes more.

The Body-building Power of Bovril has been proved by independent scientific experiments to be from 10 to 25 times the amount of Bovril labels.

BABY'S OWN SOAP

In the interest of your skin, insist on Baby's Own Soap. Cleansing—Healing—Fragrant.

Fish are very long-lived, for example, salmon in healthy conditions will live a hundred years, eels sixty years, carp a hundred years, and pike are said to be more tenacious of life than either of these species.

Minard's Liniment Relieves Neuralgia.

Used for 70 Years. Thru its use Grandmother's youthful appearance has remained until you have become but a memory. The soft, refined, pearly white appearance it renders leaves the joy of Beauty with you for many years.

Gouraud's Oriental Cream

At Your Service

Wherever You Live.

The woman in town, or country, has the same advantage as her sister in the city in expert advice from the best-known firm of Cleaners and Dyers in Canada.

Parcels from the country sent by mail or express receive the same careful attention as work delivered personally.

Cleaning and Dyeing

Clothing or Household Fabrics

For years, the name of "Parker's" has signified perfection in the work of making old things look like new, whether personal garments or even the most fragile material, or household curtains, draperies, rugs, etc.

Little Business.

Much is heard of the dominion and power of big business, and deference is paid to those who have risen to a post of command in it. Their views are potent in council; their society is cultivated; they gain a hearing where slim pocketbooks are not pulsant. But it does not follow that because a man is rich he falls in breadth of view, in generosity of concept, in concern for his fellows or in readiness to give from his abundance. There is a great deal of the spirit abroad that accepts all a rich man can do and reviles him, holding that he does it only to avert the odium he deserves.

On the whole, little business is more to be feared than big. Men engaged in little business are those who live by spying out some petty advantage, who forever seek to gain ever so minutely over a rival and are too jealous and suspicious to make common cause. They hold that it profits to maintain an inveterate hostility toward all who are engaged in the same trade.

There is no room to-day for a smallness of attitude, whether in family life or neighborhood existence or in any corporate relations, including the international comity. The mere fact that men are operating over miles of distance or with thousands of people does not save them from small and contemptible ways and dealings.

The business of making a country greater is forever a larger matter than personalities. He who serves a cause must be willing to count himself last and least among those who follow, as well as to take a proud place among those who lead. Committees seem to be one of the necessary ills that flesh is heir to when human affairs are to be carried forward. For things do not act of themselves and the brainless brute creation cannot regulate the works of human society. Much as we may care for our individual way, assured as we are that our plan is the one wise course to take, we must be prepared—if we are useful—to defer and confer, to put our mind alongside the thoughtful opinion of another, to consider other men's views for what there may be in them.

A man is not fit for the regulation of large matters—he is untrained for anything but little business—if he cannot work in double or multiple harness. The valuable soloist is the one who is ready to fill a gap in the chorus. One does not find the people whose horizons are far and wide quibbling over meetings and the order of precedence, or taking offense because they are not placed in the seats of the mighty. They are modest and reticent and they bide their time and await their turn. It is the lesser folk who shove and scramble, in the fear that they will miss what they have not earned.

Where Kaiser Bill Once Farmed.

With the signing of the armistice one of the most fertile farms in Turkey passed from the hands of Kaiser William to Miss Mary Graffman of the Near East Relief, who has charge of 800 destitute waifs, the victims of Turkish barbarity. There are about 700 acres in the farm, and hundreds of blooded cattle roam the hills, while the rich valleys grow fine tobacco and fruit in great abundance. During the war a caretaker and a staff of peasants operated it, but when Germany was defeated the caretaker, who had power of attorney, turned over the estate to Miss Graffman, who has been a missionary in Sivas for ten years. She identified by deeds on file at Constantinople the identity of the former owner.

The home and industrial school which Miss Graffman has established is teaching the orphans of the Armenian massacres, among other things, better farming methods. Until the Near East Relief took charge, work on the farm was done by the crudest of methods. Wooden plows pulled by oxen such as were used in the days of Abraham and Lot were employed. Modern machinery and more efficient methods are making the land more productive.

Not to be Mollified.

The grocer observed that his best customer was a bit ruffled over something; so he strove to be obliging and pleasant.

"I think," he said blandly, "living is getting cheaper. For instance, a year ago these eggs would have cost you ten cents more."

"A year ago," replied the customer, "when those eggs were fresh, they would have been worth more."

Youngest Air Woman.

Miss Andree, daughter of Maurice Farman, is believed to be the world's youngest air woman, says a Paris despatch. Although only fourteen years old, she made her first flight eleven years ago with her father.

Since last summer she has been acting as pilot in a dual-control machine. Recently she, unaided, made a long-distance flight, being in the air for more than three hours.

Plants Along Walls.

Soils near walls are usually too dry in summer and too poor. Before planting take out the soil to a depth and width of three feet, adding manure, and leaf mould if it is to be had. After mixing, return the soil and allow it to settle. Climbers and other plants may then be grown there successfully. Water will be required daily during hot weather.

HIGH GRADE OIL AT LEAST COST

Your heat, light and power needs are best served with Imperial Royalite Coal Oil. Every drop is clean, powerful and absolutely uniform. Imperial Royalite gives you the highest fuel satisfaction and costs no more than ordinary coal oil.

Imperial Royalite Coal Oil meets every test of a perfect oil, allows you full power from tractor or stationary engine. Used in oil heaters and stoves, it burns clean—no smoke or soot—and it's best for oil lamps, too.

You can get Royalite everywhere when you want it. Our unlimited means of distribution assures that.

No coal oil is better than Imperial Royalite, so why pay higher prices?

GERMANY ON EVE OF CIVIL WAR: DOWNFALL OF EBERT REGIME

President and Cabinet Flee to Dresden When Monarchical Troops Seize Reins of Power—Marshal Foch Takes Prompt Action—Ex-Kaiser Closely Guarded.

Berlin, March 14.—Germany faces civil war. In a bloodless revolution the democratic Government of President Ebert has been overthrown in this city. It has been succeeded by an Administration formed by the Fatherland party, which represents the old Junker Imperialistic spirit, and is pledged to the restoration of the Monarchy.

The revolting troops entered the city early Saturday morning and occupied Wilhelmstrasse. President Ebert, with his wife and certain of his Ministers, left on an early train for Dresden. A proclamation was issued immediately that entire authority had been vested in General Provincial Director von Kapp as Imperial Chancellor and Premier of Prussia. It dissolved the National Assembly.

Mounted soldiers distributed the proclamation and patrolled the streets. There was little disorder. Rumors of the purpose of the troops to "take" the city arrived during the night. They were in possession at dawn.

The first evidence of trouble in Berlin came by the calling of a general strike by the Social Democratic party, the Majority Socialists, who were the dominant party in the National Assembly which supported the Ebert Government, of which President Ebert, Premier Bauer and Foreign Minister Mueller are members.

It was learned this afternoon that Ebert has established his Government at Stuttgart, the Capital of Württemberg. The provinces of Saxony, Bavaria and Württemberg are reported to be practically solidly behind the Ebert Ministry, and determined to fight any Monarchist uprising. Prussia will support the Junkers, who are thought to contemplate the restoration of the Hohenzollern dynasty by placing Prince Eitel Friedrich on the Throne. There is serious prospect of a civil war

and the smashing up of the German Confederation. News that Marshall Foch had directed an advance of Allied troops over the Rhine, and had summoned a conference of Allied military leaders, reached Berlin this afternoon and is regarded as ominous. The new Government, through von Kapp, issued a proclamation denying that its purpose was to restore Monarchy, and undertaking to carry out the peace terms.

The situation, however, is exceedingly ominous. Already strikers are parading the streets, but there have been no disturbances. The troops continue to patrol all thoroughfares and disperse crowds.

Chancellor von Kapp issued a proclamation to-day promising to order elections for the Reichstag as soon as quiet is restored, and adding that drastic emergency decrees would only be issued to an extent requisite for the maintenance of order and the protection of the economic life of the country against unscrupulous exploitation and corruption.

The Government, says the proclamation, will protect the vital services and the workers, but resolutely suppress any resistance. Elections will be held within the next sixty days. The Hague, March 14.—Neither the former Emperor nor the Crown Prince is implicated in the overthrow of the Government in Germany, so far as can be learned here.

The Associated Press was assured to-day by an entirely reliable authority that both Omeron Castle, where the former Emperor lives, and the Island of Wieringen, where the former Crown Prince makes his residence, are already so closely guarded that it will be absolutely unnecessary for the Dutch Government to take further measures to prevent intrigue or its escape.

SYRIA DECLARED A FREE STATE

Big Army in Readiness to Enforce Claims.

A despatch from London says:—Prince Faisal, son of the King of the Hedjaz, has been proclaimed King of Syria, according to advice received in Cairo from Beirut, says a despatch to the London Times from the Egyptian Capital.

Official advice states that the situation in Damascus is serious. Emir Faisal, son of the King of the Hedjaz, it is explained, has thought it advisable to summon the Syrian Congress, which intends to declare the complete independence of the country and proclaim him King.

The Emir, it is stated, succeeded temporarily in forestalling such action, securing the postponement of the meeting of the Congress, which had been called for March 6, but the excitement is said to be so great that he probably will be compelled to accede to the demands.

Much opposition has been evidenced in Syria over the proposed arrangement for the future Government of the country. It was reported from Paris in January that Emir (Prince) Faisal had reached an agreement with the French Government, under which he would recognize a French mandate for the whole of Syria, in return for which France would recognize the formation of an Arabian State, to include Damascus, Aleppo, Hama and Hamas, under the administration of the Prince. Later advice, however, indicates that the Syrians were insisting upon independence.

An assembly of twenty-nine Mesopotamian notables now sitting in Damascus probably will proclaim Mesopotamia a State and form a joint Government with Syria under the regency of Zeid, a brother of Prince Faisal of the Hedjaz, according to The Daily Mail's Cairo correspondent. Palestine, Lebanon and Northern Mesopotamia are included in the districts where the Arabs are voting freely, apparently with the purpose of forcing the Peace Conference to recognize Syria, under a threat of co-operation with the Turkish Nationalist Government.

CANADA TAKES PLACE IN LEAGUE AS GREATEST NEW WORLD NATION

A despatch from London says:—The United States, having disassociated herself from the League of Nations, Canada will now have an influence in the proceedings of that body out of all proportion to her population and much greater than was contemplated when she entered it.

According to a statement by a prominent member of the Secretariat of the League, Canada will practically take the place which the United States would otherwise have occupied as the greatest new-world nation. Her influence in continental affairs will be based on her impartiality of view as an extra-European country. The first evidence of recognition of her status has been the appointment of ex-Mayor Waugh of Winnipeg to the Saar Valley Commission. The news of Mr. Waugh's nomination has been well received here, and it is hoped future Canadian appointments will not be few in number, since it is realized, in the words of my informant, that "Canadians will be impartial and business-like where European matters are concerned."

Among the various important bodies, to some of which Canadians will be appointed, are the International High Court of Justice, the Economic Commission, the Commission on Russia, the Commission on Transit, the Commission on Armaments, and various social and health commissions. The Dominion is almost certain to have a representative on the Commission of Immigration.

Interior of the Legislative Chamber, Toronto, where the first Ontario Farmers' Parliament met on March 9, the first of its kind in Canada.

HEAVY ICEFIELDS IN GREAT LAKES

Little Open Water Reported by Weather Bureau.

A despatch from Detroit says:—The first ice report of the season for the Great Lakes, issued here by the United States Weather Bureau, says:

"Reports from regular and display stations of the United States Weather Bureau and Meteorological Service of Canada indicate that the fields of ice in Lake Superior are extensive, heavy and windrowed; over the western portion the fields extend out solid for 47 miles, while over the eastern portion the field has remained stationary since about February 15. St. Mary's River is solid its entire length and is covered with snow."

"In Green Bay the ice is heavy and solid. In Lake Michigan fields are moving slowly over the north-western portion, and some open water extends south to Chicago, while over the eastern side the fields extend beyond vision, with no open water of consequence visible."

"In Lake Huron the fields are extensive and heavy, and extend beyond vision. St. Clair River is open for about two miles below the mouth of Lake Huron and heavily packed below this point to Lake St. Clair. The ice in Lake St. Clair is heavy, and probably ranges from 22 to 26 inches in thickness. Detroit River is closed with heavy ice from about Twelfth Street to Lake Erie."

"In Lake Erie the fields are solid along the south shore, and no open water is visible. Some open water is reported off Port Stanley. The ice is reported as heavily windrowed."

"In Lake Ontario the ice in the harbors is heavy. Ice fields are reported over the eastern and central portions. In comparison with the same period last year, there is more ice in all the lakes."

"As compared with the twelfth year normal, there is an average thickness at Duluth, and above the average at Sault Ste. Marie and at Escanaba."

MORE OUTRAGES IN IRELAND

One Constable Killed, Many Wounded, in Various Districts.

A despatch from Dublin says:—A number of additional outrages are reported to have taken place in various parts of Ireland. Police Sgt. Nazer was shot dead and Constable Doyle was wounded at Rathkeale, 17 miles south-west of Limerick. In the Cork district, Inspector McDonagh was dangerously wounded in the head by a bullet from a revolver while exchanging shots with a crowd which attacked him and another officer. One civilian was badly wounded during the fighting.

In Limerick, Constable Murphy was ambushed and shot and dangerously wounded. At Kilbeggan, County West Meath, 100 armed men raided Durrus Castle, a private residence, for arms. The family was absent, and only two servants were in the castle. The raiders gained entrance to the building by smashing the big door with sledge hammers.

John Bull (to Jonathan): "Come and play. Otherwise the other kids over there can't." Jonathan: "I don't know whether I'll play or not. The stakes are too high."

ALLIED WARSHIPS IN TURK WATERS

Ready to Co-operate With Land Forces to Enforce Peace Terms.

A despatch from Constantinople says:—Numerous despatches from London and Paris announcing that the Supreme Council has decided to take drastic action at Constantinople to prevent the killing of Christians and enforce peace terms more radical than were contemplated before the trouble at Marash have been received with apparent indifference by the Turks. The only effect being the designation of a slightly changed Cabinet. Turkish officials are watching without any evidences of concern the movement in London to force them out of Europe, and the printing of a despatch reporting that President Wilson would insist that the Sultan must leave Constantinople caused scarcely a ripple.

The allied naval displays in the Bosphorus and the British and French naval parades in the streets of Constantinople are watched indifferently by the public. The Black Marmora and Aegean Seas are alive with allied warships ready to co-operate with land forces in the defence of the Straits and enforcement of a blockade, should such action be taken. The British have four battleships of the Iron Duke class, six destroyers of the Cardiff class, six destroyers of the Tomahawk class, and five super-dreadnoughts of the Revenge class within easy reach of the Straits, with several other warships convenient to the Golden Horn or the Bosphorus.

The Italians have two battleships, one cruiser and two destroyers in the vicinity. The French have two modern battleships, two destroyers, two cruisers, two sloops and one transport; the Greeks the battleship Kilkis (formerly the United States steamship Idaho) and two destroyers, and the Americans six destroyers, the cruiser Galveston and several small craft.

Admit Chinese Girls to Peking University

A despatch from Peking says:—A remarkable educational advance in the history of China occurred this week, when five girl students were admitted to Peking University. Hitherto girls were restricted to the Normal School, but after considerable discussion the University doors have been opened. A significant feature is that this concession marks the first acceptance of the principle of co-education.

Austrian Dukes Loyal to Karl

Geneva, March 14.—All Austrian Archdukes residing in Switzerland met at Olten on Friday and elected Emperor Charles Chief of the Hapsburg dynasty. It was decided that members of the family would renounce their titles and privileges if they wish to return to Austria.

A store is only as good as the customer it keeps.

Weekly Market Report

Breadstuffs.		Provisions—Wholesale	
Toronto, Mar. 16.—Manitoba wheat—No. 1 Northern, \$2.50; No. 2 Northern, \$2.77.		Smoked meats—Rolls, 30c to 31c; hams, medium, 36c to 38c; heavy, 38c to 34c; cooked hams, 50c to 53c; backs, plain, 49c to 50c; backs, boneless, 52c to 56c; breakfast bacon, 42c to 46c; cottage rolls, 33c to 34c.	
Manitoba oats—No. 2 C. W., 97½c; No. 3 C. W., 94c; extra No. 1 feed, 94½c; No. 1 feed, 93½c; No. 2 feed, 92½c, in store Fort William.		Barrelled meats—Pickled pork, 44½c; mess pork, 44½c.	
Manitoba barley—No. 3 C. W., \$1.67½; feed, \$1.56½, in store Fort William.		Green meats—Out of pickle, 1c less than smoked.	
American corn—No. 3 yellow, \$1.94; No. 4 yellow, \$1.91 track Toronto; prompt shipment.		Dry salted meats—Long clears, in tons, 32½c; in cases, 28c to 29c; clear bellies, 27c to 28½c; fat backs, 32c to 33c.	
Ontario oats—No. 3 white, \$1.00 to \$1.02, according to freights outside.		Lard—Tierces, 30c to 30½c; tubs, 30½c to 31c; pails, 30½c to 31c; prints, 31½c to 32c. Compound lard, tierces, 27½c to 28c; tubs, 28c to 28½c; pails, 28½c to 28c; prints, 30c to 30½c.	
Ontario wheat—No. 1 Winter, per car lot, \$2.02 to \$2.03; No. 2 do., \$1.98 to \$2.01; No. 3 do., \$1.92 to \$1.93, f.o.b. shipping points, according to freights.		Montreal Provisions	
Ontario wheat—No. 1 Spring, per car lot, \$2.02 to \$2.03; No. 2 do., \$1.98 to \$2.01; No. 3 do., \$1.95 to \$2.01, f.o.b. shipping points, according to freights.		Montreal, Mar. 16.—Oats—Canadian Western, No. 2, \$1.17½; do., No. 3, \$1.18½. Flour—New standard, \$12.25 to \$13.55. Manitoba flour—Government standard, \$13.25, Toronto.		Montreal, Mar. 16.—Butcher steers, common, \$9.50 to \$11.00; butcher heifers, medium, \$9.50 to \$11.00; common, \$7.50 to \$9.00; butcher cows, medium, \$7.00 to \$9.50; canners, \$5.50; culls, \$6.50; butcher bulls, common, \$8.00 to \$9.50; good veal, \$17.00 to \$18.50; medium, \$15.00 to \$17.00; grass, \$8.00 to \$9.00; ewes, \$11.00 to \$12.50; lambs, good, \$18.00; common, \$15.00 to \$17.00; off car weights, select, \$20.50 to \$21.00; lights, \$19.00 to \$21.00; sows, \$16.50 to \$17.00.	
Country Produce—Wholesale		In the constituency for two months of 21 years of age and over, and either male or female, are to be permitted to vote for Federal candidates.	
Eggs—New-laid, cases returnable, 54c to 55c.		Saving in Weight.	
Butter—Creamery solids, 56c to 58c; do., prints, 57c to 59c.		For trans-Atlantic mail service by airplane an Englishman has developed a plan for photographing letters on films about the size of postage stamps to save weight, recipients having them enlarged.	
Cheese—Large, 29½c to 30c; twins, 30c to 30½c.		The boom in music which marked the latter end of 1919, is finding an echo in the delight of individuals in music study. Instruments previously neglected are being taken up with enthusiasm. Lord Leopold Mountbatten has, for instance, taken to the flute. The Royal Family is not unmusical, and the Queen and the Queen Mary are clever pianists.	
Honey—White, per lb., 68-lb. tins, net 21c to 22c; 10-lb. tins, gross, 21½c to 22½c; 5-lb. tins, gross, 23c to 24c.		Sir Ian Hamilton, who has now retired from the Army, may be expected to devote a good deal of his leisure to writing, for there is no soldier who has such natural literary gifts. He has written, besides professional tracts, charming books on lighter subjects. He has more than the staff of officers' equipment as an artist, and his despatches from Gallipoli introduced a new kind of despatch writing, at least in the modern era.—Big Ben.	
Live Poultry—Buyers' prices delivered Toronto—Hens, over 5 lbs., 40c; hens, 4 and 5 lbs., 37c; hens, under 4 lbs., 35c; spring chickens, 30c; spring chickens, milk fed, 36c; roosters, 30c; ducks, 40c; turkeys, 50c; geese, 22c.		Join his regiment, the King's Royal Rifles, at once. He has a real liking for the Army, and desires to make it his permanent career.	
Dressed Poultry—Hens, over 5 lbs., 40c; hens, 4 and 5 lbs., 37c; hens, under 4 lbs., 35c; spring chickens, 30c; spring chickens, milk fed, 36c; roosters, 30c; ducks, 40c; turkeys, 50c; geese, 24c.		The boom in music which marked the latter end of 1919, is finding an echo in the delight of individuals in music study. Instruments previously neglected are being taken up with enthusiasm. Lord Leopold Mountbatten has, for instance, taken to the flute. The Royal Family is not unmusical, and the Queen and the Queen Mary are clever pianists.	

Britishers May Vote in Canada

A despatch from Ottawa says:—Provisions of the War Time Election Act disenfranchising thousands of naturalized Canadians are not included in the new Franchise Bill which Hon. Hugh Guthrie, Solicitor-General, introduced in the Commons on Thursday. All persons of British citizenship, whether by birth or naturalization, resident in Canada for one year

and in the constituency for two months of 21 years of age and over, and either male or female, are to be permitted to vote for Federal candidates.

For trans-Atlantic mail service by airplane an Englishman has developed a plan for photographing letters on films about the size of postage stamps to save weight, recipients having them enlarged.

A Letter From London

Queen Mary has one of the finest collections of flower pictures in the country. She is also fond of flowers used in decoration, as, for instance, the furniture of Princess Mary's own room at Windsor, which is hand-painted with flowers in the French manner. There are beautiful tall screens hand-painted with roses by Miss Van Heddeghem in Her Majesty's own rooms, and many pictures by the same artist. Miss Van Heddeghem was one of the Queen's "discoveries."

People with whom Prince Henry was brought into contact during his recent visits to Manchester and Birmingham noted a great resemblance in his boyish, frank manner to the Prince of Wales, though Prince Henry promises to be taller than his elder brother, and is cast in a more sturdy mould.

He is to remain at Cambridge for the full course of four years, though, were he given a free choice in the matter, he would prefer probably to

join his regiment, the King's Royal Rifles, at once. He has a real liking for the Army, and desires to make it his permanent career.

The boom in music which marked the latter end of 1919, is finding an echo in the delight of individuals in music study. Instruments previously neglected are being taken up with enthusiasm. Lord Leopold Mountbatten has, for instance, taken to the flute. The Royal Family is not unmusical, and the Queen and the Queen Mary are clever pianists.

Sir Ian Hamilton, who has now retired from the Army, may be expected to devote a good deal of his leisure to writing, for there is no soldier who has such natural literary gifts. He has written, besides professional tracts, charming books on lighter subjects. He has more than the staff of officers' equipment as an artist, and his despatches from Gallipoli introduced a new kind of despatch writing, at least in the modern era.—Big Ben.

U.F.O.—U.F.W.O.

An American writer of some note states these as the requisites for the triumph of any movement: a just cause, thorough organization, co-operation, and wise leaders who cannot be tempted by personal considerations to swerve from the straight course. Does this Farmers' Movement contain these essential features?

The first and last of these are immediate requirements. The second and third are matters of growth or development which require time to evolve.

Is theirs a just cause—just to themselves, and equally just to other classes in the community or factors of national life?

One of the chief lessons for us all to learn is that the workers in any or all of the different branches of industry are not and cannot be independent of each other. Legislation which favors any one class in undue proportion to its status as a national factor is unwise legislation, and as such, must and will lead to national disaster. There is, we believe, no criticism of the contention that agriculture is, in this country, the basic industry. Eighty per cent. of the national wealth is derived from this source, and if or when this industry deteriorates, the prosperity of the nation is seriously threatened. The "cause" for which we exist is to establish this industry on a sound economic basis. The whole trouble seems to lie in the fact that so few, either rural or urban people, see in the industry a national factor, except in a theoretical sense, and the main reason for this is that the workers on the farm regarded themselves as units and neither knew nor cared about the national status of farming, and, of course, the workers in other lines accepted us at our own valuation. That agriculture is not on a sound financial basis needs no proof, for people are not leaving the farms for less lucrative work, and they are leaving the farms until in Ontario today 30% of the people must grow food for themselves and the other 70%, and yet we wonder what is at the root of the high cost of living. Every sale bill you see on the roadside is contributing that much more to the increase of that menace which stares all of us in the face. Labor seeks to meet it by shorter hours and higher pay, and as the scale of wages rises, the price of food soars with it, for the farmer who is producing staple food, which is the primary business of farming, cannot compete with the other industries, which can and do meet the demands of the men for high wages, and the only possible result is decreased production and higher prices for food. It is a circle—or perhaps a maze—and there seems no way out. But a way out must be found and we must all work together to find it. Prices of food will never decrease until plenty is produced, and this plenty fairly disabused.

It is nothing short of a crime that food should be held until it decays rather than be sold at any price to the consumer. Let a few extra cars of hogs or cattle go into Toronto stock yards and down goes the price to the farmer. To the consumer also? Not on your life. Farming will never be on a sound economic basis until the farmer controls his business. He has got in the thinnest possible wedge of control, especially in the West, through cooperative organizations, a thinner one in Ontario through our company, but the fact remains that the prices are set upon these products without the producer having a voice in the matter. Labor, organized, sets a price on its work—so much per hour, for so many hours a day. The farmer does not seem to do that. His aim, crystallized in the badge he wears, is a seeking to accomplish the clasped hands of producer and consumer, each meeting the other half way. But the urban labor, from the janitor up to the highest paid clerk, from the laborer to the contractor, from the highest to the lowest in any branch, is thoroughly imbued with the idea that it is the farmer who is getting rich at his expense; he is taught that, purposely misled by those who are profiting by these things. Have we a just cause?—Margery Mills.

Ravens are best of talking birds. Ravens, crows and magpies are all better speakers than parrots. They are not so varietal and the sounds they utter are less varied, but their voices and articulation are far more human. A crow's talk in the next room may easily be mistaken for that of a person.

Parrots are the best imitators; that is to say, they mimic whistles and other noises, particularly laughing, to admiration. It has been remarked that their voices in speaking are like that of a crazy person. An occasional magpie, if properly trained, becomes a wonderful talker. But with magpies, as with crows and ravens, it is more chance whether they develop into good speakers or not. True giant parrots called macaws often talk well, but their voices are disagreeably hoarse and inhuman. Parrots, by the way, are more nearly related to owls than to any other birds.

If not cracked a frozen egg can be thawed and restored to usefulness by placing it in ice cold water.

The journey from London to Paris by air takes 2½ hours compared with 7 hours by land and sea.

THURSDAY, MARCH 18, 1920

NEWBURY

Mrs. George McCall and son John of Aldborough are visiting her father, Ed. Woods.

Mrs. Cherrington and son arrived on Monday from Alberta. They will spend some time at her father's, W. H. Jeffery's. Mr. Cherrington has sold out and will come on as soon as business permits.

Oil is being furnished to villages by the county, the villages paying one-third of the cost. Our council have decided we will not require it as new gravel is to be put on by the county on the portion to be oiled.

Miss Graydon has sold her three-acre field on York street to Duncan Stalker and the McDonald house to Ed. Leech. Mr. Leech will remove the house to Queen street and fit it up as a residence.

The Mitchell building, the old Masonic hall, will soon be a thing of the past. W. H. Parnall, who bought it from the I. O. O. F., is having it taken down.

Born—March 10th, to Mr. and Mrs. Wm. Woods, a son.

Wm. Connelly was in Windsor on Saturday.

School was closed again on Thursday owing to several new cases of flu among the children.

The first auto of the season was out on Sunday.

A meeting was held in Knox church Monday afternoon of the members of Wardville and Newbury churches, at which Rev. G. S. Lloyd, moderator, presided. A unanimous call was given to Rev. Mr. Farquarson of St. George.

WARDSVILLE

Wardsville, March 10.—The funeral services of the late Charles Downie, fourth concession, Aldborough, took place yesterday afternoon at the family residence, and were conducted by Rev. Dr. Husser, Methodist minister of this place. Mr. Downie was in the prime of life, being 47 years old. In October last he was taken ill with anæmia of a very malignant type and was confined to his bed. His death took place last Sunday. Interment was made in the Rodney cemetery.

The Methodist church in this village has subscribed \$1,541, and Cashmere \$242.50 towards the Methodist national campaign funds.

W. Minna recently bought a house in Windsor and has sold it for a substantial advance on the price given.

Will Minna spent a few days at his home here this week. He has sold his Windsor property and made a good profit on it.

Several of the Presbyterians from here attended a joint meeting in Newbury on Monday to select a minister. The choice was Rev. Mr. Farquarson.

J. Sloan has rented Mr. Linden's house here and moved Monday. Mr. Linden is moving to the farm in Ald-

borough.

Miss Verna Husser spent a few days at her home here. She is going to Detroit, where she has procured a position.

Rev. Mr. Bowen of London preached in the Anglican church Sunday afternoon and in the Methodist church in the evening, for the Bible Society. The officers appointed for the year were W. Elwood, president; P. O. Malley, secretary, and Miss G. Gardner, treasurer.

The Anglicans collected for the National Campaign \$275, which is 25% over their objective.

Mr. Gale of Hyde Park preached in the Presbyterian church Sunday.

Will Aitchison of London spent the weekend with Miss Aitchison here.

The river is breaking up and quite high. The ice jams are worth seeing. The Methodists have finished their canvass for the National Campaign.

This appointment reached its objective, which was \$1,550. The other funds of the church have increased as well, the educational being 90 per cent, and missionary 70 per cent, higher than last year.

CAIRO

Miss Ila Burr is visiting her sister, Mrs. John Baird, at Windsor.

The Coleman, who had an attack of flu while in Ingersoll last week, returned to his home on Saturday.

Mrs. D. Ferguson, who was visiting friends in Wallace town, arrived home during the week.

The Downie brothers are improving their premises by covering outbuildings with corrugated material.

Autos are out again.

Miss Olive, daughter of Mr. and Mrs. A. D. McGugan, who had an attack of scarlet fever, is improving nicely.

Service was held in the Presbyterian church on Sunday last, after a vacation of some four weeks.

MELBOURNE

After the wedding bells ceased to ring in Toronto the Melbourne band did its part to welcome to our village Orville Richards and his bride, nee Miss P. Baker, daughter of Rev. and Mrs. George Baker, now of Toronto.

Mr. Baker was pastor of the Methodist church here for three years. Mr. and Mrs. Richards will spend a few weeks with friends here and other places. They will then go to their home in the Canadian West, where Mr. Richards has been in business for some time, taking with them the best wishes of their many friends here.

Rev. Mr. Bowen of London will preach in this village on Sunday next in the interests of the Bible Society. There will be a union service in the Presbyterian church in the evening.

Rev. Mr. Stuart of London preached in the Presbyterian church here and at Riverside on Sunday last.

We are pleased to see that the public library, which has been closed for some time, is now open on Monday and Friday evenings.

James Mills, an old and respected resident of the Longwoods road east, died on Friday morning at the home

NEWBURY CASH STORE

W. H. PARNALL NEWBURY

of his son, Alfred Mills. Mr. Mills knew the hardships of pioneer life and was full of reminiscences of the past. He leaves two sons, Alfred and Edward, of the Longwoods road, and two daughters in the West, Miss Mills and Mrs. Young.

Mrs. Gilbert McLean has returned home after spending a few weeks with her sister in Blenheim.

Some of our citizens have seen a robin, some have seen a crow, but owing to the abundance of snow, cold wind and frosty days, we did not realize that spring was here, until it was learned that the goods have arrived for the spring millinery openings. But where, oh where, is the milliner. We hope to see her soon.

Arthur Gough, who has been ill for some time, is now improving slowly.

Miss McGugan of London spent Sunday at her home here.

STRATHBURN

Mrs. Churchill of London returned home last week after visiting her brother, Albert Gould.

It is reported the river is higher this spring than it has been in years.

Mrs. D. H. McRae visited her sister, Mrs. J. Webster, St. Thomas, last week.

Miss Alf Gould was home from London for a few days.

Mrs. St. Clair and little son, Lorne, are the guests of her parents, Mr. and Mrs. R. Siddall.

Wm. Parks has engaged for the summer with James Dymock.

Robert Dymock was thrown off a horse he was riding and got hurt quite badly on Thursday last.

Mr. and Mrs. C. Nixon are moving to their new home. We are glad to welcome them to our midst.

Old papers for sale at The Transcript office.

MIDDLEMISS

The death occurred at his home here on March 8th of Charles Mullins, after a prolonged illness. The deceased was 54 years of age and resided in the community all his life where he was held in the highest esteem. He is survived by his wife, two sons and one daughter, and also by two brothers and five sisters: Arch, and Henry Mullins and Mrs. Frank McNeill, Middlemiss; Mrs. Thos. Hardy, Melbourne; Mrs. John Welch, Dutton; Mrs. James Tiffin, Appin, and Mrs. Wm. Lethbridge, Fingal. The funeral was held to the Longwood cemetery, the service being conducted by Rev. R. Stewart of Dutton.

Middlemiss, March 13.—A pleasant social party was held at the home of Lorne Battin on Wednesday night by the young people of Middlemiss and community. A Young People's Society was organized on a union basis, to meet every two weeks. The following officers were elected: President, Lorne Battin; vice-president, Margaret Richards; secretary, Mr. Cousens; program committee—Misses E. McNabb, Mary McDonald, Jean Carroll and Margaret Griswold and Leonard Carroll; musical committee—Misses Graham, Mary McArthur and Annie Lucas and Mac and Hugh Carroll. The subject for the next meeting is a debate Resolved that women have an easier life than men. The affirmative to be taken by Eleanor McNabb and Jean Carroll and the negative by Mr. Cousens and Gordon Richards.

Don't Submit to Asthma.—If you suffer without hope of breaking the chains which bind you, do not put off another day the purchase of Dr. J. D. Kellogg's Asthma Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

APPIN

Appin, March 10.—Miss Aletta Cushman has returned home after an extended visit with relatives in Oil City.

Mr. Payne has resigned his position as teacher of the Appin school, to take effect at Easter.

My, we are glad the ban has been lifted, so we can see somebody again! A. Watson spent the week-end with his niece, Mrs. McCulloch.

Delco lights will be installed in the Royal Bank and the barber shop.

Alex. McDonald has been "under the weather" for the past week.

W. S. Strode and Mr. Cramp have moved into their new homes.

The Women's Institute will hold their next meeting in the town hall on Thursday afternoon, March 25th, at 2.30. Mrs. Fisher of Glen Oak will address the meeting. All ladies are cordially invited.

Appin, March 12.—Nath. Cushman has bought a house from Dan McIntyre and intends moving it to Argyle street.

Mr. Hornblower has taken possession of the Temperance House here. Mr. Gast has taken possession of the

farm he purchased from Neil Galbraith recently.

Local mail couriers report the back roads to be impassable on account of the deep snow thawing so rapidly.

The ban being off, all meetings are under way again.

Rev. Mr. Vance of Melbourne occupied the pulpit in the Methodist church last Sunday.

Neil Galbraith and family moved into the village this week.

Albert Hughes has purchased the property of his mother near the village.

Angus McMaster, our grain merchant, has been doing a rushing business lately.

Chas. Bardwell has accepted a position in Elmer McIntyre's store.

The most obstinate corns and warts fail to resist Holloway's Corn Cure. Try it.

CASHMERE

Mrs. Graham of Alvinston has returned home after spending a month or so taking care of her sister, Mrs. Brooks, who has been seriously ill.

Mrs. Alex. McIntyre is very ill with pleuro-pneumonia.

Clarence Tunks and his sister, Miss Jean, are visiting relatives in Wallaceburg.

Lloyd Saylor has returned to his home here after spending the winter months in Detroit.

Miss Jean Archer left on Monday for Thamesville where she has taken a position as milliner.

League will be held in the church on Wednesday night as usual. A missionary topic will be given.

Miss Cleda Dark is spending a few days with her sisters, Mrs. Dent and Mrs. Knowler, in Bothwell.

We are glad to hear that Leta Saylor is able to be about again after a serious attack of the flu.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring all worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

NORTH BOTHWELL

Willie Plaine has sold his fine driver, Lucy.

Making syrup is the order of the day in these parts.

Willie Plaine and James Moran spent Sunday in Alvinston visiting friends.

TIME TO PRUNE AND SPRAY YOUR ORCHARDS

The time will soon be here to spray and prune your orchard. Don't neglect it as it is one of the best paying departments on the farm, if you give it the right attention. Apples are becoming a luxury, and good No. 1 fruit commands very fancy prices. You cannot get good fruit without spraying. Come in and let us supply you with the best materials at the lowest prices.

Soluble Sulphur

We handle the Niagara Brand, the best on the market. 150-lb. drums 9c lb., 100-lb. drums 10c lb., 50-lb. drums 12c lb., 25-lb. drums 14c lb., small lots 16c lb.

These prices are NET CASH.
