SAINT-HYACINTHE EN 1898.

L'augmentation de la Population et l'importance toujours croissante de notre jeune cité rendent nécessaire la présente édition du GUIDE.

Quatre ans se sont déjà écoulés depuis sa dernière apparition. Quatre ans de Progrès, d'agrandissement et de prospérité. L'esprit d'entreprise de nos concitoyens ne s'est pas laissé abattre par les désastres causés lors des feux qui ont dévoré une des tanneries de MM. Duclos & Payan, celle de MM. Moseley, l'établissement de M. Léonidas Picard, et la Métairie St-Joseph, tout récemment. Les tanneries incendiées n'ont pas été rebâties. Mais l'établissement de MM. Duclos & Payan a été considérablement agrandi et ces Messieurs fabriquent plus de cuir qu'ils n'en offraient à la consommation avant leur perte. De plus Mr. F. W. Moseley, en société avec eux, dans une bâtisse spéciale continue la fabrication de MM. Moseley.

M. Léonidas Picard, par son industrielle énergie est en voie de se relever de ses malheurs.

La charité publique et privée aidera puissamment les Sœurs de l'Hôtel-Dieu à reconstruire la Métairie St-Joseph.

Les trains de l'Intercolonial traversent maintenant notre cité, et une nouvelle voie ferrée est en organisation pour traverser les paroisses au Sud de St-Hyacinthe se dirigeant vers les Etats-Unis.

Nous remercions sincèrement les annonceurs dans le Guide, qui en lui donnant un patronage très libéral, en ont assuré la publication. Nous prions le public de reconnaître ce service en les patronisant largement.

Une page spéciale à la fin du volume donnera l'état de la population.

F. A. & M. COTE,

Manufacturiers de Chaussures,

••••• EN GROS •••••

A St-Hyacinthe, P. Q.

(Successeurs de Louis Côté & Frère)

152 ET 154, RUE ST-ANTOINE,

Nous avons la prétention de croire que nos Chaussures rencontrent les exigences du public en général ; nous n'avons rien épargné, car tout ce que l'habileté et l'argent peuvent produire, a été employé pour atteindre ce but, et nos efforts ont été couronnés de succès comme vous pouvez en juger vous-mêmes, par la qualité des matériaux et la souplesse des cuirs que nous employons, et aussi par les prix auxquels nous vendons nos marchandises.

Toute notre marchandise est manufacturée dans les bâtisses dont vous voyez la reproduction ci-haut. Ces constructions sont des plus parfaites du genre, munies de toutes les améliorations modernes et on y emploie des centaines d'ouvriers.

Nos formes sont des plus nouvelles et sont la parfaite reproduction des dernières inventions de ce genre, aux Etats-Unis.

Nous prenons la liberté de vous recommander tout spécialement nos Chaussures CHROME KIP TANNED, elles sont extrêmement populaires et il vous suffit de les exhiber pour que l'on juge de leur valeur ; car le cuir en est fort, souple, durable, imperméable et à l'épreuve du chaud et du froid, ce qui la rend nécessaire aux bucherons, mineurs et pour la "Drive" des rivières.

La plus scrupuleuse attention est donnée aux commandes qui nous sont faites.

Monastère des Dominicains

L'Ordre des Frères-Prêcheurs ou Dominicains a été fondé en 1213 par St-Dominique, à Toulouse (France), et a été confirmé par le St-Siège en 1216.

Le Maître-Général de tout l'Ordre réside à Rome, via San Sebastiano. Le Maître-Général actuel est le Révérendissime Père André Fruhwith.

La maison des Dominicains de St-Hyacinthe, fondée en 1873 par les Rév. Pères Bourgeois, Mothon et Bernard, n'a été érigée en *priorat* régulier qu'en 1885. Le premier prieur a été le Très. Rév. Père Maricourt.

Les Pères Dominicains de St-Hyacinthe publient deux Revues mensuelles : *Le Rosaire* et le *Rosaire pour tous*.

Aujourd'hui le personnel de la maison est comme suit : T. R. P. Prieur ; T. R. P. J. Bte Béchet, Sous-Prieur et maître des Novices ; R. P. Ray. M. Rouleau, Professeur de Théologie Morale et de Droit canon ; R. P. Alph. Rondot, Professeur d'Histoire Ecclésiastique ; R. P. Martin Fougerey, Professeur de dogme ; R. P. J. Dom. Brosseau ; R. P. Ths. M. Gill, Sous-Maître des Nov. Etudiants ; R. P. Laurent Van Beelaere, Prof. de Philosophie, d'Ecriture Ste. et d'Hébreu ; R. P. Marcelin Fortuit, curé de la paroisse ; R. P. Athanase Beaudet, Prof. de Théologies ; R.P. Hyacinthe Couture, Sous-Maître des Novices simples ; R. P. Jean Bacon, Vicaire de la paroisse.

17 Novices Etudiants, 5 Novices simples. 10 frères convers.

LAPRAIRIE—An extensive municipal village and parish of the south shore of the River St Lawrence, between the Lachine rapids and Victoria bridge, district of Montreal, seigniory and county of the same name. Incorporated March 30, 1846. The parish

was erected on the 17th November, 1870. A market is open every day. An aqueduct is constructed. The first railway in British North America was constructed from here to St Johns in 1836. It was first worked with horses, afterwards by steam, but was discontinued, and the rails taken up a number of years ago. A steamboat maintains a regular communication between Montreal and Laprairie. A branch of the Grand Trunk railway, starting at Fort Covington, in the State of New York, to reach the Victoria bridge, now runs twice a day in close proximity to the village, with a good station and depot, and contributes materially to the future development of the locality, which is considered a very healthy and pleasant summer place. This railway is now in connection with the Rome and Watertown at Massena Springs. There is also a fire station, thoroughly supplied with new fire apparatus, such as a fire engine and hook and ladders. Fishing and hunting are also largely practised. A permanent wharf has been erected, and will be much improved during the present summer. A new channel is completed. The aqueduct is now giving a very good service to the village, and the work of putting up pipes is being done very rapidly in the different streets. The pressure of water in case of fires is also very powerful, as the water is drawn by steam and air pressure, which brings it at a distance of 1350 feet from the St Lawrence river. The premiums upon insurances have also been greatly reduced on account of the recent ameliorations to the fire system apparatus. The Great North-Western Telegraph company has an office here. Distant from Montreal, 9 miles, fare 15 cts.; from St Johns, 18 miles. Mail daily. Pop of village about 1800; of parish 2200.

MONTREAL—A city of the province of Quebec, the commercial metropolis of the Dominion of Canada, situated on the south side of the Island of Montreal, in the St Lawrence river (here above 2 miles wide), 180 miles south-west of Quebec, 620 miles from the sea, 420 miles north of New York. Lat. 45° 31' N., lon. 73° 34' W. It is at the head of ocean navigation, and at the commencement of lake and river navigation; and has railway communication with the chief cities and towns in the Dominion of Canada and the United States.

The Island of Montreal, on which the town is built, is situated at the confluence of the Ottawa with the St Lawrence. It is 32 miles long by about 10 miles broad at the widest part, generally level, with the exception of the mountain which rises north-west of the city. The soil is for the most part fertile and well cultivated, and is watered by numerous small streams, and the climate particularly favorable for the growth of nearly every kind of grain, fruit and vegetable.

Montreal occupies a low tract of land about 2 miles wide, between a considerable and very beautiful elevation called "Mount Royal" and the river. It is divided into 12 wards, and has over 150 miles of streets and lanes. The principal streets have large well built edifices, constructed chiefly of limestone quarried near the city. These buildings, combined with the effect of the lofty towers and spires, give the city a very imposing appearance when viewed from a distance. Notre Dame is the main street, running on the centre of the ridge on which the city is built, but St. James street is wider and more elegant. The chief business streets are St Paul, Notre Dame, St James, St Lawrence, McGill, Craig and St Catherine.

MONTMORENCY FALLS—A post village in Quebec county, 6 miles from Quebec. The Falls of Montmorency present one of the most majestic spectacles in the province. The Montmorency itself, so called after a French admiral of that name, is an inconsiderable stream. Its course lies through an almost continued forest over an irregular broken rocky bottom, until it arrives at the precipice, where its breadth is from 16 to 20 yards. A little declination of the bed before it reaches this point gives a great velocity to the stream, which, in being impelled over the brink of a perpendicular rock, falls in an extended sheet of water into a rocky chasm 240 feet below. An immense spray rises from the bottom in curling volumes, which, when the sun shines upon it, displays bright prismatic colors, producing an effect inconceivably beautiful. The falls are a great source of attraction to visitors to the ancient capital. It contains a Roman Catholic church, 4 saw mills and a cotton factory. Pop 900.

The city is well supplied with water, gas, and the electric light.

The principal public buildings are the City Hall, Court House, Post Office, Custom House, Seminary of St Sulpice, Convent of Notre Dame, General Hospital, Grey Nunnery, Montreal College, McGill University, Presbyterian College, Methodist College, St Mary's College, Young Men's Christian Association Building, Academy of Music, Queen's Hall, Theatre Royal, Victoria Skating Rink, Deaf and Dumb Asylums, Mechanics Hall, Sailors Institute, St James Club, &c., and 8 markets, including the Bonsecours, a magnificent pile with a lofty dome, fronting the river. There is also a Society of Natural History, a Mechanics Institute, Merchants Exchange, Board of Trade, Corn Exchange, &c., and 72 churches, viz.: Church of England 14; Church of Rome 21; Church of Scotland 1; Presbyterian 12; Methodist 9; Baptist 3; Congregational 3; American Presbyterian 2; Unitarian 1; German Protestant 1; French Evangelical 1; Missionary 2; Advent Christian 1, and 2 Synagogues. The Cathedral of Notre Dame is capable of containing from 10,000 to 12,000 persons. It is 255 feet long and 145 feet broad, with two towers 220 feet in height. In the north-east tower is a fine chime of bells, and in the north-west is a bell weighing 3000 tons. Christ Church Cathedral is the most perfect specimen of gothic architecture in America. It is built of Montreal limestone with Cæn stone dressings, obtained from Normandy. The new Methodist church, on St Catherine street, is a very handsome building, in the gothic style of architecture, It is the largest Methodist church on the continent, with a sitting capacity of over 2000. The Church of the Gesu, a very imposing edifice, is 230 feet long and 102 feet wide, with a transept 152 feet long, and will accommodate over 4500 persons. The walls and ceiling of the interior are beautifully frescoed. Another magnificent pile

is the Roman Catholic Bishop's Church,—St Peter's, now almost finished, which will cost, when completed, \$300,000. It is after a model of its namesake in Rome, and will be one of the finest ecclesiastical edifices on this continent. Trinity, St George's, St Andrew's, St Paul's, and the majority of the other churches are all exceedingly handsome edifices, and add much to the beauty of the city.

The largest banking houses in the Dominion have their head offices in Montreal, are mostly situated in Place d'Armes and St James street, and consist of very handsome and costly structures.

The harbor of Montreal, which is formed towards the St Lawrence, is secure, and the quays are unsurpassed by those of any city in America; built of limestone, and uniting with the locks and cut stone wharves of the Lachine Canal, they present for several miles, a display of continuous masonry which has few parallels. No unsightly warehouses disfigure the river side. A broad terrace, faced with grey limestone, the parapets of which are surmounted with a substantial iron railing divides the city from the river throughout its whole extent. Improvements in the harbor (which is controlled by Commissioners) are yearly being made to accommodate the large increase of shipping.

The duties have increased from \$1,013,440 in 1854 to \$9,265,405.73 in 1889; and the value of imports was respectively \$18,729,612 in 1854, and \$47,415,619 in 1889. The value of exports in the latter year was \$32,638,270.

Among the manufactories of Montreal are foundries of cast iron, distilleries, breweries, sugar refineries, soap and candle works, manufactories of hardware (including excellent cutlery), carriages and sleighs, corn brooms, wooden ware of every description, glass, paints and drugs, edge tools, locomotives, steam engines, boilers, India rubber goods, printing presses, agricultural implements, musical instruments, paper, ropes, sewing machines, types,

tobacco, woollen and cotton goods, boots and shoes, &c., &c. There are besides saw and flouring mills, rolling mills, lead works, brass foundries, and many other industrial establishments.

Montreal is the seat of the Grand Trunk and Canadian Pacific railways. The Canadian Pacific railway has its head offices and depot on Windsor street. The depot is a new one, and presents a very striking appearance. The head offices and chief works of the Grand Trunk are at Point St Charles, a suburb in the western part of the city. There have just completed a very handsome depot on the site of their old one on St James street west. The Victoria Bridge here spans the River St Lawrence. The first stone of this great masterpiece of Stephenson was laid July 20th, 1854, and the first train crossed over it Dec. 19th, 1859. It is 9,184 lineal feet in length—24 spans of 242 feet each and one (the centre, 60 feet above the river,) of 330 feet. The bridge cost nearly \$7,000,000.

In 1890 there were 70 churches (already enumerated) and 2 synagogues; 15 fire stations, 18 banks, 5 savings banks, about 50 assurance and insurance agencies, 4 medical schools, 4 general hospitals, an asylum for aged and infirm women, 3 orphan asylums, a lying-in-hospital, 2 Magdalene asylums, a dispensary, a ladies benevolent society, 2 houses of refuge, an infants home, a newsboys home, and a number of institutions under the charge of Sisters of Charity. There were published in the same year 9 daily, 4 tri-weekly, 17 weekly, 1 fortnightly, and 15 monthly newspapers and periodicals, besides other religious and scientific journals.

The educational means of the city comprise a University (McGill) with faculties of law, art, science, medicine, and veterinary science, open to persons of all religious denominations; a Roman Catholic Theological college, a Methodist college, a Congregational college of B. N. A., a Montreal Diocesan Theological college in connection with the Church of England, a Jesuit

college, a Presbyterian college, a High school, 2 Normal schools, several classical and scientific academies, and a number of private and public schools; also 2 affiliated medical colleges, one to Bishop's college, Lennoxville, the other to Victoria college, Cobourg, and a branch of Laval University of Quebec.

Montreal returns 3 members to the House of Commons and 3 to the Provincial Legislature. It is the seat of the See of the Anglican bishop of Montreal, and of the See of the Roman Catholic Archbishopric of Montreal. The climate in summer is hot, often reaching 90° in the shade; and the winters are severe, the temperature ranging very often from zero to 10° and even 30° below it. Pop. in 1844, 44,093; 1851, 37,715; 1861, 90,323; in 1871, 107,225; 1881, 140,000. The population in 1890 is estimated at 230,000.

The history of Montreal dates back to the 3rd of October, 1535, when Jacques Cartier first landed on its shores. An Indian village called Hochelaga existed here at this time. The way to it was through large fields of Indian corn. Its outline was circular; and it was encompassed by three separate rows of palisades, or rather picket fences, one within the other, well secured and put together. A single entrance was left in this rude fortification, but guarded with pikes and stakes, and every precaution taken against siege or attack. The cabins or lodges of the inhabitants, about 50 in number, were constructed in the form of a tunnel, each 50 feet in length by 15 in breadth. They were formed of wood covered with bark. Above the doors of these houses as well as along the outer rows of palisades ran a gallery ascended by ladders, where stones and other missiles were laid in order for the defence of the place. Each house contained several chambers, and the whole were so arranged as to enclose an open court yard, where the fire was made. Cartier named the place Mount

Royal. It first began to be settled by Europeans in 1542, and exactly one century after the spot destined for the city was consecrated with due solemnities, commended to the "Queen of the Angels," and called *Ville Marie*, a name which it retained for a long period. In 1760 it was taken by the English. At this time it was a well peopled town of an oblong form, surrounded by a wall flanked with eleven redoubts—a ditch about 8 feet deep and a proportionable width, but dry, and a fort and citadel, the batteries of which commanded the streets of the town from one end to the other. The town was at this time divided into upper and lower town, the upper town being the level of the present Court House. In the lower town the merchants and men of business generally resided, and here were situated the royal magazines, the armory and the nunnery hospital. In the upper town were the principal buildings, such as the palace of the Governor, the houses of the chief officers, the convents of the Recollets, the Jesuit's church and Seminary, the Free school, and the Parish church. The houses were solidly constructed in that semi-monastic style peculiar to Rouen, Caen and other towns in Normandy. Early in the present century vessels of more than 300 tons could not ascend to Montreal, and its foreign trade was carried on by small brigs and barges. In 1809 the first steam vessel, "The Accommodation," built by the Hon. John Molson, made a trip to Quebec; she had berths for about 20 passengers. Years of industry, intelligence, enterprise and labor have produced a mighty contrast—Ocean steamers of 4000 tons, the magnificent floating palaces of the Richelieu Company, and ships from 700 to 2000 tons, from all parts of the world, now lay along side the wharves of the harbor, which are not equalled on this continent, in point of extent, accommodation, approach and cleanliness. In 1832 the cholera raged in Montreal with great violence, carrying off 1,843 inhabitants in a

population of little more than 30,000. In April, 1849, a political mob burned the Parliamentary buildings (which were situated on the site of the St Ann's market), and the seat of government was in consequence removed to Quebec, subsequently Toronto, and finally to Ottawa. In July, 1852, a destructive fire laid waste a large part of the city, burning 1108 houses and destroying property valued at \$1,363,264. In 1860, the city was visited by the Prince of Wales; in 1862 by the Duke of Edinburgh; and in 1869 Prince Arthur made it his residence for several months. The Hotel Dieu was founded in 1644 by Madame de Bouillon, and six years afterwards the Convent of Notre Dame was founded by Mademoiselle Marguerite de Bourgeois. In 1663, the Company of Montreal was dissolved, they having already sold their rights to the religious order of St Sulpice at Paris, by whom was founded the Seminary belonging to that order, and still existing in the city. The oldest church in Montreal is the Bonsecours (Roman Catholic). It was erected in 1658; was burnt in 1764, but rebuilt in 1771. Montreal is surrounded by villages whose population numbers over 40,000.
