(Capt.) Rev W. C. Swayne, Chaplain of the 56th Reg Lisgar Rifles, and Master Allan Swayne are attending the centenary celebration of the in getting from the table to the amuse-Battle of Cryslers Farm on the battle field, near Morrisburg, Ont., Aug. 27

It is pleasant to hear that Mr Geo. K. Wight is recovering rapidly from a rather critical operation for appendicitis in the Kingston General Hospital. He will soon be able to leave for his home here, and may resume his work

Two recommendations are made by the unionists of England with regard to the Home Rule Bill. One is that its passage through the commons be other is that the king refuse to sanc-

Harold Rowsome, who attended the Brockville Business College last winter, and who was also successful on the Civil service examinations, left on Monday for Ottawa, where he is to take a government position at an initial salary of \$800 per year.

During the past three months 178 new post offices have been opened in Canada to keep pace with the flowing tide of settlements. The extension of the rural free delivery has resulted in the closing of over 258 rural offices, principally in Ontario and the mariime provinces.

The Fall Term of the Brockville Business College will open Sept. 2nd. For a spirit of good cheer, Students living on the line of the Brockville and Westport Railway get a very cheap travelling rate. If interested address the Brockville Business College, Brackville, Ont., for full par-

On Sunday next visiting ministers will preach at the services in the Methodist church and on the following Sunday the pastor will conduct the morning service and the Rev. W. W. Giles of Summit, N. J., will conduct the evening service.

Mrs J. A. Sherman, of Plum Hollow, who is a patient at St. Vincent de Paul Hospital, is improving nicely. She expresses herself as being very grateful for the many acts of kindness shown her and also for the many letters and cards of sympathy sent by friends from her old home and vicinity.

The death occurred at Napanee, on August 8, of Dr George Washington Edwards, a veteran medical practitioner of the district, who had reached his 89th year. Dr Edwards at one time practiced at Unionville, now Forthton, He became a member of the College of Physicians and Surgeons of Ontario in

Horses imbibed a frisky spirit at the Eloida camp ground on Sunday last and two of them mixed things up last and two of them mixed things up nesday evening last when about 6 a bit. One of them driven by a young o'clock fire destroyed all of his barns Athenian, declined to wait to be tied to a tree and made a wild dash for liberty while the driver was walking forward to tether it, badly wrecking the buggy. Another coming from the camp ground, became unmanageable by \$600 insurance but the contents when near the village and an attempt was made to check it by heading it against the elevated carriage track at the grain warehouse. This failed to work out as expected, for the horse cleared the 31 ft. hurdle in one bound, broke the whiffletree, and left the buggy and its occupants safe and sound on the other side. Beyond a fright, the occupants of the buggy escaped uninjured.

The interior of the postoffice may no onger be used as a bulletin Board, a circular letter to that effect having been received by the postmistress. This prohibition is timely, as it will get the people trained so that the new building may escape disfigurement. By-the way, Mr Webster has not yet announced when the new building is to be opened ?

SUCCESSFUL SECTION SOCIAL

We learn to do by doing. The copple of Hard Island Section have learned how to make their picnic a success. From early morning till evening on Thursday Mr Howarth's During this season boys have wantonly done considerable damage to property in the cemetery, and the caretaker gives notice that a prompt prosecution will follow any future feet long groaned under its load of good things. No land under the sun groups are good things to eat than furnishes more good things to eat than Leeds Co. in August, and everything was there. Without a doubt, everyone

thoroughly enjoyed the dinner. The managing committee had very thoughtfully built the platform, on which the program was given, not far from the table and a comparatively small number experienced any difficulty ment seats. There an interesting programme was given. About 20 numbers were rendered in a very creditable way by the children.

Mr Fred Hollingsworth ssisted with yiolin music, Mr. Walter Smith, B. S. A., gave a short address, Miss Maud Hollingsworth gave an address on the value of social intercourse, and Mrs Wm. Towriss added to the pleasure of the company by giving a humorous recitation, very

much to the point. A programme of sports followed, for which suitable prizes we e given. Our prevented next time by violence. The married men of the section are to be congratulated on their athletic ability. The old saying "You are only as old as you feel" was beautifully illustrated.

The only regretable part was that every lady who entered in the married woman's race did not receive a cake of soap. Some of the ladies sat down during the race and truly the roads were dusty.

Before the sports were over the call for supper rang through the woods and it was surprising how some of the appetites had recovered from the attack made upon them at dinner time.

We were pleased to see so many friends from outside the section and would say to one and all, "Come again" and we will try to even give you a better time.

Friends and neighbors met together And our lives will be the brighter For a day like that each year,

MODERN FARMING

Mr Arch Stevens, one of the progressive farmers of Philipsville district. was in Athens last week and favored the Reporter with a call. He is an ad mirer of the Ontario Government's new policy of sending agricultural knowledge to the tarmers through the medium of District Representatives, instead of inviting them to attend the O. A. C. at Guelph. As an example of what intelligent husbandry can accomplish, he points to the marvellous improvement wrought by O. A. C. representatives in the orchard of Mr Felix Bresee near Delta, which he thinks should be visited by all interest ed in fruit glowing. By the demonstrations given and by personal experience on his farm he is of opinion that on many farms underdrainage could be made to pay a handsome profit on the money that would require to be invest

Fire at Glen Elbe

Lennius L. Bates, a farmer living at Glen Elbe, about three miles from here, met with a considerable loss on Wedincluding his season's crop of hay, a quantity of grain, a number of agricultural implements, and harness. tunately his stock was in the fields. by \$600 insurance but the contents were not insured.

LESSON IX., Aug. 31, 1913.

Israel at Mount Sinai-Exod. 19, 1.25; Heb. 12, 18-24.

Commentary.1, Arrival at Sina! (vs 1, 2). 1. The third month-Israel left Egypt on the fourteenth of Nisan, had spent the remainder of that month and the month of Zif on the journey, and the month Sivan was at hand. The same day—Probably the first day of Sivan is meant, corresponding to the fifteenth of May. They had been from Egypt forty first days and in first days are of May, They had been from Egypt forty-five days and in five days more the law, would be given. Pentecost, which occurs fifty days after the Passover, commemorates the giving of the law and also celebrates the firstfruits of the ground. Sinai—Ras-Sufsafeh in the southern part of the Sinaitic peninsula is thought to be the mountain from is thought to be the mountain from which the law was given. The highest part of this mountain is 6,937 feet above the level of the sea. 2. Rephidim -A short distance in a northerly direc tion from Sinai. Camped before the mount—The Jain er Rahah offers sufficient space and convenience for a camp

of the size required by Israel.

II. God's promise to Israel (vs. 3-6).

3. Went up—Moses was evidently moved to seek communion with God. This may have been the very place where God previously spoke to him from the burning bush. The Lord called unto him-Moses was not disappointed, for Jehovah's voice was heard. House of Jacob The term Jacob is used repeatedly to denote Israel (See Gen. 49. 7; Num. 23. 7; 24. 5; Deut. 33.4), but the expression, "house of Jacob," is not used eleewhere in the Pentateuch. To the patriarch Jacob the promise of God had several times been given. 4. Ye have seen

The children of Israel were reminded

of the mighty works wrought by the Lord in their behalf. Bare you on eagles' wings—The figure is used to represent the tender care and the strengt? which God exercised toward Israel. Read Deut. 32, 11 for an explanation of the before us. Brought you unto my self-Out of Egypt to Sinai, where God was about to manifest Himself to His people, 5. Obey My voice indeed—Hearty and full obedience to all the command ments of God was one of the conditions upon which the promise which follows was to be realized. Keep my Covenant— This condition involves faith and in-tegrity on the part of Israel. A peculiar treasure-The word represents Israel as a peculiarly precious possession of Jehovah.—Whedon, God called Abra-ham that his descendants might be his own beloved and obedient people. Above all people—From among all peoples."

—R. V. All the earth is mine —God is the ruler and possessor of all things, yet of all the families of the earth He chose Abraham who believe the earth He

tion had been made by the people. Thunders and lightnings—Thunder storms visit that region, but this was more than an ordinary storm. The noise, the light. the cloud and all their accompaniments showed the phenmonon to be supernatural. 17. To meet with God-Moses stood between God and his people in de-claring to them God's will. Now he was to introduce them to him. God was ready on his part to meet them. The thought is stupendous that finite man can meet God and commune with him. Nether part—The lower part, the base, 18. In fire—The presence of God was often symbolized by fire, Quaked great--Trembled, 19. God answered him is voice-As Moses addressed Jehova the answer came in repeated thunder ings and sounds of a trumpet. 20, The Lord came down upon Sinai, not in any form yisible to the people, but manufest ed his presence by the thunderings thunderings ed his presence by the thunderings, lightnings, sound of a trumpet and quakings. He had a message for the people, 21. Charge the people. They had already been told not to approach the mountain, but they needed to have the warning emphasized by a word more directly from God. 22.25. Priests are here mentioned, although the Levilieal priest-level had not been appeared. hood had not been appointed. Sacrifices had long been offered and there were those who ministered at the altars. The patriarchs, or beads of families, perform ed that service, and it may be that the first-born males also acted in that co pacity. The emphatic warning is given that none, not even the priests, should break through the bounds set at the foot

Mount Sion (Heb. 12:18-24). The spostle calls attention to the excellence of cospel privileges by comparing the church of Jesus Christ with what vastbown under the old covenant. The scene at Sinai is vividly portrayed, but see at Small is Vividly portrayed, but its brightness pales when compared with the glory of the church of the living God, which is made up of those whose names are written in heaven, though still on earth, and of the saved who have passed out of life. Ancient Israel was a highly favored nation. The people had the opportunity of witnessing great manifestations of God's presence power. We, however, are permit presence and permitted to ome to Jesus, and may also receive all the benefits that flow from the coming

of the Comforter to us.

Questions.—Name—the important your time thinking yours between the lesson of last week your take wasted.

and that of to-day. Who was Jethro, and where was his home? Where is Mount Sinai? What promise did God make to the people through Moses? What two conditions are made? What preparations did Israel make to meet God? Describe the manifestations of God's presence at Sinai. What warning was repeated to the people? Who went up with Moses into the mountain? What description of this scene is given in Hebrews? What is meant by "Mount Sion"? Who belong to the church of the first-born? the first-born?

PRACTICAL SURVEY.

Topic-Events at Sinai. I. God's messages to the people.

II. God's requirements of the people I. God's messages to the people. The l. God's messages to the people. The heart of the desert was a piace of barrenness, absolute solitude and great sublimity. In that sanctuary, seeluded from all earthly attractions, Israel waited for the revelation of God. The sternness of the environment was itself a commentary on the sanctity of the law which was to be given. Israel had been made free from Egypt that they might rise into the fulness of what a nation ought to be. They were called out with a view to the ultimate benefit of the world. Patiently, strongly, surely. God was bringing Israel to their promised inheritance. They had been struggling and unbelieving at the Red Sea, at Marah, at Elim, at Rephidim, yet the stong "eagles" wings" still bore them onward. God's message to Israel at Sinai embraced the recital of his works, sinal embraced the recital of his works, the proposals of his fove, and the promises of his grace. The time had come for some response from them. They called to consider, not what carnal comforts they lacked, but what dangers they had escaped, and what divine possessions they were in the way to acquire. Through Egyptian servitude and idolatry, Israel had swerved far from God, from truth and genuine faith. Here God promised to bring Israel back to himself and to make them a kingdom of priests and a holy nation, thus placing upon them royalty, dignity and special consecration to his service. A threefold state of blessedness, the knowledge that God had chosen them, their priestly ministry and the unction from on high, was the portion promised

to Israel. II. God's requirements of the people God's promises were conditioned on ob-edience. In His covenant with Abraham, God bound Himself to be faithful to His word. At Sinai it was the people who were called upon to bind themselves to be faithful to God, yet even there God took the initiative in the covenant. The promised blessing to Israel was so attractive that they gave ready promise to obey, never doubting their readiness to fulfil such a promise. Their response revealed a temporary rising of those long enslaved minds to something like the dignity of their high calling as the sons of God. Theirs was a reply given without much understanding of law or of themselves. They had no rea consciousness of their sinfulness, Mixed with their enthusiasm there was much the ruler and possessor of all things, yet of all the families of the earth He chose Abraham, who believed Him and obeyed His voice, 6. A kingdom of priests—A kingdom whose citizens are all priests, living wholly in God's service, and ever enjoying the right of access to him.—Cam. Bib. An holy nation—God's promise was that Israel should be a separated people, set apart for His service, and cleansed and kept to Himself.

111. Israel's preparation (vs. 7-15.) As Moses delivered to the people the message which God had given him for them, they fixely promised to do all the Lord commanded. The Lord was about to grant to Israel a signal display of his presence, power and glory, and the order was given that proper preparation be made for the usual event. The people must be clean ir body and clothing, and must keep free from all defilement.

Three days were eiven in which there was given that proper preparations and for the usual event. The people must keep free from all defilement. Three days were given in which there preparations might be made. In this preparations might be made. In this presence, Lest the people should come too near the cacred mountain, barriers were placed to keep them tack.

IV. Jehovah revealed (vs. 16-25.) 16. On the third day—When full preparation had been made by the people. Thun, and the nation, by which it was intended in the proper than they should order their lives.

IV. Jehovah revealed (vs. 16-25.) 16. On the third day—When full preparation had been made by the people. Thun, and the nation, by which it was intended and the should order their lives.

IV. Jehovah revealed (vs. 16-25.) 16. On the third day—When full preparation had been made by the people. Thun, and the nation, by which it was intended and the nation, by which it was intended and the nation, by which it was intended and the savier of the desired that the plants put all their entency into growth this first session.

A mulch of two or three inches of some rather fine material, such as clean the constitution of the covenant were parations and precautions laid down to parations and precaution was fitting at the constitution of the covenant were parations and precaution was fitting at the constitution of the covenant were parations and precautions laid down to parations and precaution and precautions laid down to parations and precautions laid down to parations and precaution was fitting at the plants put all their entents which desired that the plants put all their entents which desired that the plants put all their entents was desired that the plants put all their entents which desired that the plants put all their entents was desired that the plants put all their entents was desired that the plants put all their entents was desired that the plants put all their entents w

TO FIGHT TAMMANY

sin, but to point out the way of justifi-

cation and life .

Sulzer, Guilty or Innocent, So intends.

Albany, N.Y., Aug. 25, - Governor Sulzer confided to friends to-day that whether he is found guilty or acquitted by the court of impeachment he will enter the Mayoralty campaign in New York City and make the fight of his life against Charles F. Murphy and Tammany candidates.

"I do not fear the trial at the hands of the court of impeachment," declared Governor Sulzer to one of his friends, for these charges. But no matter what the decision of the court. I intend to igorously enter the New York Mayor alty campaign personally and urge from every street corner the election of John Purroy Mitchell for Mayor. I shall re-Purroy Mitchell for Mayor.
view the life history of Charles F. phy as it has never been reviewed be-fore, and not only will the people listen to me, but the newspapers will print what I say. Why, Murphy is making hero and martyr of me, and the children of the future will be reading of me in their school books just as they do now

of Hastings and Johnson."
Governor Sulzer is chafing under the restraint imposed upon him by his coun sel, and is declaring to his friends that the hardest part of the situation is the refusal of the counsel to permit him to talk, while his enemies are getting all the publicity in attacks which he is not allowed to answer.

It's foolish to sit down and waste time thinking about all the time

MAKE THE STRAWBERRIES PAY.

The strawberry crop is an important one in this section of the country. This berry has a wide adaptation to soil and climate, and may be grown on any soil suited to the ordinary farm crops. Commercial plantings are generally located on a light or sandy soil, which is mellow and "quick." Soils of this nature are chosen on account of their carliness and ease of cultivation. For special purposes such a soil, even hough lacking in fertility, may be more desirable than a heavier soil of

greater richness.

Locate the patch on the higher lands so as to avoid injury from late spring frosts. Berries will ripen their crop several days earlier if given a southern exposure, where they have the full benefit of the sun. Likewise, if it be-comes advantageous to lengthen the

Berries draw heavily upon the soil moisture in maturing a crop of fruit. Humus is the great reservoir of soil moisture, holding water much as a sponge. By turning under barnyard manure or green crops we eventually add humus to the soil. The improve-ment of the fertility of the soil is close-By turning under barnyard ly allied to the problems of drainage and moisture. Humus is quite as im-portant in bettering the one as the

other.

The Purdue Experiment Station advises to plow the land moderately deep; if in grass plow in the fall and plant to some clean culture crop the first year. Sod land is likely to be infested with white grubs, which injure and some-times destroy strawberry plants by de-vouring their roots. The land, after vouring their roots. The land, after plowing and harrowing, should be rolled or dragged to settle and pulverize the.

There are two systems of planting in vogue-the hill system and the matted In the hill system the plants are set in hills and cultivated both ways, allowing no runners to develop. The growth all centres in the original mother plants, causing them to throw out numerous lateral crowns at their own base. This is an intensive system, and produces more fancy fruit, being well suited to the supplying of a home garden or a special local trade. Varieties which make few runners are to be preferred for this system, as they greatly reduce the labor of cutting runners. The matted your is the rule many comparation. matted row is the rule among commer-cial growers. The plants are set 15 to cial growers The plants are set 15 to 24 inches apart in rows three to four feet apart.

Work should be begun in the spring as soon as the ground is fit. Plants set but early before they begin growth will sustain less shock in transplanting and make a beter start. Shorten the roots in to four or five inches, and remove all leaves but one or two. Set the plants so that the roots are well covered and the crowns are level with the surface of the ground.

Frequent and shallow tillage the first teason is one of the secrets of successful bery growing. Cultivate often enough to keep a continuous dust mulch on the surface to conserve the moist-ure; this will vary with the soil and season, from twice a week to once every ten days. Decrease the cultivated area between the rows as the season advances, allowing the runners to set, making a matted row 14 to 20 inches wide. Then keep the runners cut. Of course hand-

God spoke so that they knew His voice. Relations of obedience, confidence and love on the part of Israel with God. As growth proceeds the straw can be raised in places where it is too heavy for the plants to push through, letting the much remain during the fruiting

were to be established. God designed not only to declare the condemnation of season. Commercially, the strawberry is pagated by means of runners and every plant is merely a cut-off or somewhat distantly separated portion of the orig-inal plant of that particular variety. A bed intended to grow plants for setting should expend all its energies in the production of young plants and must not be allowed to fruit. In setting out a new patch it is only these young plants which should be used. They are recognized by their smaller crowns, and bright, roots.

Strawberries are rarely profitable for more than one crop. If the patch is to be refruited, mow off the old vines after picking is over and burn them, and then plow out the old plants, leaving the run-ners to renew the patch. Subsequent treatment consists of clean cultivation

treatment consists of clean cultivation as for a new patch.

Manure or green crops should be turned under whenever possible. Very heavy and frequent manuring is not desired, as it is not a balanced fertilizer, being deficient in phosphoric acid. In conjunction then with 15 to 25 tons of bannyard manure per acre, acid phos-phate should be added at the rate of phate should be added at the rate of 200 to 600 pounds. A complete chemical fertilizer is of

value on a poor soil or where an applica-tion of manure was not given. The materials can be purchased separately and mixed at home in the following propertions: 134 pounds nitrate of soda and 250

pounds tankage.
572 pounds acid phosphate.
120 pounds muriate of potash.
If the patch is burned over after harvesting the crop every year, rotated every two or three years, and varieties

resistent to leaf spot planted, very little trouble from insects or disease should be experienced.

FARM NEWS AND VIEWS. is usually detrimental to the keeping ery.

quality of the butter, and should not by any means be churned into the but-

Disease germs thrive in the filth of dark, damp laces. Sanitary surroundings must, therefore, be clean, well lighted, and dry. Such surroundings tend not only to prevent the spread of disease, but also aid greatly in recovery from disease when once contracted.

Lime is used for many purposes on the farm. It is the cheapest of all disinfectants, and is very useful when applied as whitewash for the disinfection and sweetening of cellars, privies barns, stables, poultry houses and other build-ings. Unless it can be kept from the air lime wash should be made up fresh be-fore using. Air-slaked lime is of no value as a disinfectant.

The New York College of Agriculture reports that in a survey of the business of 573 farmers covering several townships the farmers who have been to college earn 36 per cent. more on an average than those whose schooling stopped at the high school, and three times as much as those who went no farther than the district school.

All clover is rich in protein or muscle-forming foods, and it is one of the best kinds of foods for growing pigs and for Extra granulated. St. Lawrence ...\$ 4 50

There is no definite rule that can be laid down with reference too-the time as which winged insect pests of the orchard deposit their eggs. Some are night fly ing insects and deposit their eggs as night; others are active only during the day, and deposit their eggs during that time. The coddling moth is one of the night flying insects, and begins to de about dusk, and continues most active throughout the early part of the night. The curculio, on the other hand, is most active during the night. The same holds true with reference to the general activity of income. of insects. As a rule the moths fly only at night, while some of the beetles ar most active at night and other's during the day.

Bees and fruit go well together. The bees gather honey from the blossoms and in return fertilize them. The hum of these industrious workers in the orchard foretells rich harvests. Under the trees is a good place for the hives.

CANADA'S CROPS

July Report Shows Conditions Were Favorable.

In a bulletin just issued the Census and Statistics Office reports that according to the returns made by cropreporting correspondents at the end of last month, the weather of July was upon the whole favorable to the growth of grain crops. The conditions in the Northwest provinces were reported as generally excellent. Representing a standard or full crop by 100, the average condition throughout Canada of full wheat is expressed as 77.75, of spring wheat as 87.62, of outs as 87.45, of bar ley as 87.58, of rye as 85.00, of mixed grains as 89.23, and of flax seed as 83.85. The per centages of the standard condition of spring wheat, barley, and rye represent the promise of yields per acre for string wheat of six, for barley of five, for eye of two and for flax seed of one per cent, above the average yield per acre of the last five years.

per acre of the last live years.
The condition of the oat crop promises a yield equal to the average.
All the field crops of Canada on July 31, excepting only fall wheat. (77.75), hay and clover (74.57) and alfalfa (76.35) are reported as having a coadition above 80, the range being from 82 beans and corn for husking to 89 for po-

tatoes and mixed grains. In the three Northwest Provinces spring wheat is reported as 84.60 in Manitoba, 89 in Saskatchewan and 88 ir Alberta, the other grain crops being cor-respondingly high, barley, especially in Saskate icwan and Alberta, being 90 per west provinces are also particularly

The condition of buckwheat in the Maritime Provinces and in Quebec is 90 and over: but in Ontario it is down to 3.43. Flaxseed is above 80 in the North west Provinces, and in Saskatchewan, where the great tulk of this crop is grown the percentage condition is 84.17. Sugar beet, grown for beet root sugar in Ontario and Alberia, is 89.44 for the for mer and 92.31 for the latter province

The preliminary estimate of per acre of fall wheat is 22.38 bushels which for the harvested area in Ontario Manitoba, Saskatchewan, Albert and British Columbia of 825,800 acres indicates a total yield of 18.482.000 bushels, as compared with 16.396,000 bushels from 781,000 acres in 1912. This yield is

The average yield per acre of hay and clover is estimated at 1.23 tons, indicata total yield of 9.396,500 tons fro 7.621.500 acres, as compared with 11.189, 000 tons from 7.633.600 acres or 1.47 ten out tons from 7,555,000 acres of 1.47 (cm) per acre in 1912. Alfalfa, with an average yield per acre of 1.38 ton, shows an estimated total production of 143,000 tons from 103,250 acres, as compared with 310,100 tons from 111,300 acres, or 2.79 tons per acre in 1912.—Archibald Blue, chief officer.

MONTREAL CAR ACCIDENTS.

Montreal despatch: Two street car accidents which will probably terminate fatally occcurred to night, the first at the corner of City Hall avenue and Demontigny street, when a morth-bound car struck a baby carriage wheeled by the father of the victim, Pearl Verge, and the second occur Pearl Verge, and the second occurred on Notre Dame street east, between Davidson street and Bennet avenue, in Maisonneuve, when a woman, as yet unidentified, alighted between the two streets while the car was in rotion. Pearl Verge sustained a bad wound on the head and a com Overchurning, that is, churning until pound fracture of the right leg, and the butter forms in large lumps, interested the moisture on account of the fractured skull. The doctors at the the butter forms in large lumps, increases the moisture on account of the fact that a considerable amount of buttermik is incorporated. This buttermik hold out small hope for their recov-

THRIVE ON "JUICE"

Electric Forcing Shows Great Results With Poultry

In Extensive Experiments in Great Britain.

London, Aug. 25.- A long success sion of ingenious experiments have-been privately made in the effect of electricity upon the growth both of plants and animals, and, according to The London Daily Mail to-day, it is now possible to say, with some approach of confidence, that startling results have been reached in one direction. Beyond all question, young poultry responded to electric stimulus applied in a particular way, with astounding rapidity. They surpass the best on record in the speed of growth at this time of the year, and they keep their health in crowded conditions.

In the south of England, on the biggest poultry farm in the world, an experiment of this nature has just been completed. Of eight hundred chickens in completed. Of eight hundred chickens in two equal groups, 400 were nurtured on the intensive system—that is, in flats, almost trays, one above the other, One group of 400 was treated by this electric system, and so charged were the cnickens with electricity that the shock could be distinctly felt if the finger was put to the beak of the chicken. The chickens in this group grew to remarkable size, that is as petits poussins, in five weeks, and of the 400 only six, and those weaklings in the beginning, died off.

ning, died off.

Of the other 400 nearly one-half cled, it being late in the year for healthy growth, and the survivors took three months to reach a marketable size. This experiment was followed by other experiments in which similar, though not so striking, results were obtained. Trials on a yet larger scale are being prepared, and there is at any rate reasonable hope that an instrument of real value in the intensive production of food has been found.

WORLD'S CROP

Comparative Wheat Figures for Years 1913 and 1912.

The following table contains the figarcs of the 1913 wheat crop of the 41 wheat-producing countries of the world, compared with the figures for 1912, as estimated for Dornbusch's floating cargoes list. Dornbusch has used the official figures as published by the International Agricultural Institute for Bulgaria, Denmark, Spain, Hungary, Italy, United Kingdom, Luxemburg, Russia in Europe, India and Japan. According to Dornbusch's estimate, this year's corn, will be about 100,000,000 year's crop will be about 100,000,000 bushels larger than last year's, and the official figures published so far seem to support this view:

PLOTS THAT FAIR

ANTARAMANTARAMANTARAMANTARAMANTA

is nothing left for me to say," returned

Clarence, gloomily.
"I have settled it, but for one more ord or so. I wish you to write to Miss Haven, stating that you are pleased over the contemplated union between her and myself."

"I cannot do so, for it would be false!" declared Clarence. "It would be an arrant falsehood to state that I am pleased, when, on the contrary, I am most bit-terly opposed to this maddest of all mad

The old gentlemen sprang to his feet, with the alertness of a boy of seventeen, linstead of a feeble man of two and sev-

command you to do as I sav!" he cried furiously, shaking his forefinger ominously at the pale young man who

faced him so sorrowfully.
"And-I refuse!" said Clarence, in a law, faltering voice. "I cannot disgrace my manhood, and my principles by writing an untruth," he maintained.

"Again I repeat that I command you to do so!" cried the banker, his fine old face fairly distorted and unrecognizable

through his intense rage.
"Nothing on earth, not even your command, could force me to countenance such a monstrous union!" flashed out Clarence, bitterly.

Clarence, bitterly.

That was the speech which was like a brimstone match to the gunpowder of the father's anger. The words were spoken almost in a whisper, but they seemed to echo like warning thunder through the room, and repeat themselves over and over again during the moment of utter silence which ensued.

Banker Neville stood motionless and

Banker Neville stood motionless and dumb, glaring into the handsome, white, determined face, with a baleful light in his gray eyes, which boded no good to the young man, who met his gaze un-flinehingly.

"Pergive me for refusing you-ask anything else, and I will gladly do it; but write to Miss Haven, using words at which my spirit, my heart and my conscience would revolt as I penned

them never!" all the years of his past life he had never seen his father give way to such a torrent of ungovernable rage as

was unprepared for the burst of passic, to which the old man gave

Forgive you!" he retorted; "never while the sun rises and sets-not to the last hour of my life! From this hour you are no son of mine. I regret that my blood runs in your veins, but I will forget it—ay, forget from this hour that I ever had a son to thus set my command at defiance. God. Leave my house, and never enter it again, not even if I lay dead within these walls, Go! and toke my curse with you! I disown your you shall never inherit one dollar that is mine!"

CHAPTER XXXIX.

It had all come about so quickly this It had all come about so quickly—this terrible rage of his father's—and his being driven from home, sent out homeless and penniless to face the world—that for the moment Clarence Neville

repeated, in a high, shrill, rasping voice, "You shall leave my home at once; it will be home to you no longer, I shall away empty-handed.

"Not one penny will I accept, father," he had said, interrupting him haught-ily. "I can and will do without it." Turning he had staggered, rather unsteadily toward the door, paused on the threshold with the knob his hand, and looked back, saying.

You have been very hard in your judgment of me, father, and harder still in your treatment of me. I have loved and reverenced you all my life, and it stranger a women young and fair - can come in between us and sever the ties of affection that should have re-mained unbroken between us while life

Trere was not one gleam of softened tenderness in the harsh, stony, set face turned toward him; he had noted that

with intense despair,
"Good by father!" he had said, huskily. "Will you not say good-by? I am passing out of your life forever, you

The old banker had turned on his heel and walked switty into an inner room, cosing the door after him with ;

stormy interview was at an end.

He never knew how he turned away,
groped his way down the broad stair-

nd reached the street. Whither he went he scarcely remembered: all that he knew was that he walked on and on until the atars died out of the sky, and the gray dawn of early morning broke through the dusky

ds in the eastern sky. Like one in a strange, bewildered dream he saw a blood-red ball of flame break through the gray mists, changing them to a glory of crimson and gold.

and he knew a new day had begun.

He took off his hat for a moment, that the cool morning air might fan his

The sat down on a fallen tree, and tried to gather his benumbed faculties one sitting on the opposite side of the together, wondering what he had done that Heaven showed him so little mercy.

The sat down on a fallen tree, and the young girl turned quickly to some one sitting on the opposite side of the room, exclaiming:

"Oh, papa, papa! I think he is com-

such scant pity.
Was it not enough to endure that he had lost Parbara, the idol of his heart, that this last grief, the losing of the father he had loved so well, was added "This is certainly some dream, to it:".

His face dropped into his hands, and ille, endeavoring to rouse himself, burning tears, that were no shame to "I suppose you are wondering where

"As you have settled the matter, there nothing left for me to say," returned lids, and trekled through his fingers, until at length his strong frame shook

with heart-wrung sobs.

What strange trick was fate playing him? But a few short months before he had been fortune's favorite; now he was fickle fortune's plaything—but-feted about by her as she would.

For a moment, when his heart was nearest to bursting, with the weight of his woe, he wished that he could die. Then, manfully, he shock off the hor-

rible feeling from him.

No, he could not die for the wishing. for his time had not yet come. He must struggle on manfully, and meet what-even fate was in store for him.

For a young man who had known every luxury to be thrust all at once upon his own resources, seemed, for the

time being, appalling.

He had counted his friends by the hundreds, gay, washing college fellows, whose aim had been to shine in society's world—young men who were proud of their family positions and of their in-

heritances. Would any of these old chums receive him or stand by him now that he was penniless and an outcest from his once palatial home? He thought not. There was not one among the many to whom he could go for sympathy, expecting a glod hand to be held out in welcome to

He wondered vaguely what Bab would say or think when she heard of his plight. Probably rejoice because she was freed from the bonds which bound her

freed from the bonds which bound her to a beggar, as it were.

Wave after wave or sorrow swept over him. Then, by a great effort, he aroused himself.

"I will show them all that, although while I still have my health and strength!" I am penniless, I am not cast

So ruminating he arose from the fallen log. standing in the path hesitating-ly, meditating whether he should go

He would not take one cent of the money his father had said he would place in the hands of his lawyers for him, though he starved with hunger by the wayside. As he stood there, fate de cided the present for him if not the fu-

caring, tittle heeding which direction he took, when suddenly he was aroused from his reverie by the sound of a pierc-

ing scream. Turning quickly in the direction from which caused all thought of self to blot quietaly from his mind: A young girl flying across an adjacent field, screaming with terror, while down the patch in full pursuit of her, tore an enraged bull, attracted by the fluttering crimson scari she wore.

Clarence Neville took in the situation at a glance and in less time than it takes to tell it, he had decided upon hiown course of action, which was to save her life by imperiling his own.

With a dozen flying leaps he had reached the young girls side, crying out:

"Courage: help is at hand: I can and

was completely bewildered.

He had but a confused idea of his moments with his father, and what had lously the crimson scarf from about her found to be a confused in the confused idea of his moments. When for your laboration out. "Run for your laboration out." "From this hour, henceforth and for-er, i disinherit you." his father had over the fields, brandishing the red silken scarf above his head.

For an instant the animal stood quite will be home to you no longer. I shall not do by you as you deserve send you away empty-handed. I shall leave a small sum for you in the hands of my lawyers. You can collect it, and—"

For an instant the animal stood quite still in a sudden halt, as though bewildered at the change of person who flaunted the red scarf which so enraged him by his brilliant, glowing color fluttwees. You can collect it, and—" him by his brilliant, glowing color flut-tering in thee sunshine, the next instant the infuriated beast had whirled about and was plunging in the direction the red, flying scarf had taken, seeming to lost sight utterly of the screaming girl he had been pursuing but a moment be-

> Terror had so overcome the young girl that she had barely time to carry out her rescuer's instructions ere she fell headlong in the thick, green grass the other side of the fence in a dead

raint : Clarence Neville had barely time to note that she was out of danger, ere he wheled suddenly about, making for the fence, relying upon his swiftness to

the fence, relying upon his switness to outrun the plunging. bellowing beast who was so hotly pursuing him. In his college days he had been one of the best athletes in his class—he had outrun all of his classmates.

He depended upon the tactics he had carned and practiced then to save his life now.

Swifter and swifter he dashed over the uneven ground; swifter and swifter the enraged beast tore after him. He tried to east tore after him.

He tried to east the red scarf from him. Horror of horrors! its fringe caught upon a button of his coat, from with his strength see led unable to detach it, running as he was at that terriffe rate.

rific rate. He realized, too, that each effort to

The fence was scarcely three feet from him now. He attempted to leap that distance, but in that awful instant he stumbled and fell headlong, and the

CHAPTER XL A fortnight clapsed since the events narrated in our last chapter. When Clarence Neville opened his eyes, he found himself in a strange room, luxuriously furnished, and was he mad or fevered brain. Looking about him in the early dawn, he saw that he was on the outskirts of the little village of Brookline.

dreaming?—his eyes gazed up into the face of a lovely young girl, whem he never remembered having seen before.

As he looked at her in puzzied wonder,

"Oh, papa, papa! I think he is coming to, at last."

This remark brought a short, stout,

No other keeps the skin and scalp so clean and clear, so sweet and healthy. Used with Cuticura Ointment, it soothes irritations which often prevent sleep and if neglected become chronic disfigurements. Millions of mothers use these pure, sweet and gentle emoliients for every purpose of the toilet, bath and nursery.

Cuttura Sean and Ointment are sold throughout the world. A liberal sample of each, with 32-page booklet on the care and treatment of the skin and scalp, sent post-free. Address Potter Drug & Chem. Corp., Dept. 21D, Boston, U. S. A.

you are, my boy," said the old gentleyou are, my boy," said the old gentleman, kindly, "and are having a hard time of it in getting your scattered thoughts together. Let me help you. Your last recollection was being chased, through the field by an enraged bull, you stumbled and fell headlong, lying there stunned, at the mercy of the furious animal rearing over you."

"Oh, yes, I—I remember," gasped Ciarence. "How did it happen that he did not kill me?"

"It seems a miracle," replied the gen-

"It seems a miracle," replied the gen tleman, "but in reality it came ab in a very ordinary way. I saw whole occurrence—the enraged ani whole occurrence—the enraged animal chasing the young girl, who is my daugh-ter and your noble rescue of her, draw-ing the attention of the ferocious beast ing the attention of the ferocious beast upon yourself. In less time that it takes to tell, I had dashed into the house for my rifle. I was just in time to make good use of my weapon, while running toward you, to wing him as he leaped upon you. It was a miracle that the shot took effect, but it did, and he fell with a roar of pain, barely escaping crushing you. We had you escaping crushing you. We had you conveyed here to my home, and here you have been ever since."

Clarence Neville gazed in astonishment

Clarence Neville gazed in astonishment into the kindly face.

"Yes, yes, I can recollect all now," he said. "The young girl was saved then?"

"Yes, thanks to you, and was unharmed," replied the father, with tremu-"She wishes to thank herself for saving her life, but I have advised her not to talk with you about it until you are able to sit up. too, shall aid my thanks—ay, my heart-felt gratitude for both. You have been ill," went on the old gentleman very ill," went on the old gentieman, "the doctor says it was a relapse of a fever from which you had not wholly

The young girl had retreated from the opposite side of the bed, but after few moments stole quietly out of the few moments stole quietly out of the com, down to the verandah, where she new her father would soon join her.

This proved to be the case.
"How is he, papa?" she cried, hurry-"How is he, papa?" she cried, hurry g to meet her father as he stood on he threshold of the

"Ah, if he but knew it, I have fallen "Ah, if he but knew it, I have fallen in love with my handsome hero al-ready," she breathed, whispering her secret into the heart of the beautiful rose that nestled on her breast. "I al-ways had an idea," she ruminated, "that I should meet my hero romantically, and such was the case. It came near being a tragedy, however, but for his interference. How nice that papa will take him for a secretary," and she threw herself down on one of the places.

"The first time I ever talk with him I shall know whether he is destined to like me or not. I seem to be gifted the property of the property of the property of the places." self down on one of the piazza seats.

like me or not. I seem with a premonition that way. I knew with a premonition that way. I knew would fall in love the last secretary would fall in love with me, and this he did, acting in such a perfectly ridiculous manner that was obliged to send him awoy. I think this young man will be sensible. old house was getting quite gloomy — how nice it will be to have some one of my own age to tak to, especially when evening comes," and Lilian Harvey nest-led herself in the broad depths of the great piazza chair, much after the fashion of a young kitten, day-dreaming, as

romar.tie young girls will. CHAPTER XLI. CHAPTER XI.I.

A week later Clarence Neville duly installed in Judge Harvey's office in Boston, as private secretary. He was an immate of his own country home at Brookline suburb, coming down on the train with him each morning, and returning with him each night.

It seemed almost a miracle to him that he did not run across a single per-son who knew him during the first fortover a strange old parchment

the moon is near the full.

Often he sits thus all night. And

then, at dawn, he shoulders his pick and shovel, with a haversack of cof-

fee, bread and bacon, and starts off on the long tramp to the base of Mount Princeton, southwest of Buena

Vista. But he goes there only when

As long as his food lasts Summers moves slowly up and down the Chalk

light, and pausing often to consult his

After the dinner hour Clarence found ime hanging heavily upon his hands, or he had nothing to do during the ong evening but think, and those houghts were always of Bab, whom he ad loved and lost, Bab, his bride of but ne short, blissful hour:

In that fortnight, fair Lillian Harvey he old judge's darling, the idol of his life, had taken it into her pretty head to fall desperately in love with her father's handsome young secretary. Mr. Neville spent most of his even-

ings in the judge's magnificent library, browsing among the gems of literature of centuries back which it contained, and here Miss Lillian usually found her way in search of some particular book which the merry rogue well knew was not to be found among those austere works of grave old authors.

Mr. Veville always laid aside his own

book to help her to search for what she

wanted, and the evening always passed without their being able to locate it.

If Clarence Neville had been heart whole and fancy free, Lillian Harvey's bright repartee and merry wit might have aroused in him some interest. As it was he quite forgot her very existence when she was out of his sight.

His one thought was:

His one thought was:
"Would he by any chance see Bab, ere the sun, which had just risen, would

He bought the dairy papers, and per ne bought the dany papers, and per-used the society column with feverish interest, for very often he found in it little paragraphs concerning Bab. They always called her the prettiest girl of the Hub—in fact, the belle of

Now that the chill month of November had rolled around, society had begun to awaken from its summer lethargy, there was no end of gay, social functions, and "Thank Heaven, he has regained consciousness at last; ay, my dear," he went on, "I agree with you. I am heartily glad that he is through babbling empty nothings and has returned to the light of reasoning once more."

"But who is he, papa?" whispered the lovely young girl, nestling her telltale, blusbing face and curly, golden head on her father's breast.

her father's breast.

"His name is Neville, my dear, and by what I can gather from his remarks. he must have recently come from New York. The doctor was right about a pre-

vious illness—he had just recovered from an attack of brain fever in one of the hospitals there."
"He must indeed be a New Yorker, then," returned the girl, thoughtfully. "How are we ever to reward him, papa, for the great against he was part as well as the first the great against he was part as well as the first the great against he was part as well as the great against he was a second as the second as the second against the s

for the great service he rendered m in saving my lff?" saving my lif?"

"I think that will be easier than we anticipated," returned her father; "for the young man is in search of a posi-

"Oh, papa, and you are in want of a secretary," cried the girl, breathlessly. 'Did you think of that?" "You anticipate whiat I was going to say, my dear Lillian," replied the gentleman, laughingly. "I offered the young gentleman the position, and he has accepted it, Indeed, I may say he was your grid of it. Likid not say he was your grid of it. Likid not say he was very glad of it. I did not ask him for a reference," he went on, more to him-self than to the girl; "his brave act of

ing, at the peril of his own, shows me that he is a manly young man, and one of sterling quality. Inceded no other reference. In conversing with him I soon learned that he had been a Yale student. That also argued his respectability."

"And will he live here with us, papa?"
inquired Miss Lidian Harvay conversions.

"And will he live here with us, papa?" inquired Miss Lillian Harvey, eagerly. The old judge took the lovely young face between the palms of his hands, and kissed it repeatedly.

"As my office and his work is in Boston, he may prefer residing there. He may live here if he cares to—life in the dull little village of Brookline may not be suitable to a young man from New York; generally it is the older men who like living in neighboring villages, going in every morning and coming out each night. We must leave that to him to decide."

tleman," replied Miss Lillian, "and she would like him to live here," she declared. "And how about the daughter?" asked the judge, pinching the rosy cheeks
"I don't mind his living," replied t

girl, trying to look serious, though her whole face beamed all over with smiles "There is just one drawback to the ar-

rangement," said the old judge, looking thoughtfully out over the distant corn-"And what is that?" queried the girl, eagerly, quick disappointment noticeable in her voice.

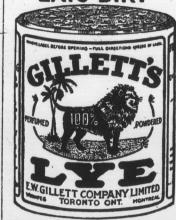

(To be Continued.) BRITAIN'S OIL FUEL PROBLEM.

(Philadelhia Record)

A hot debate has been raised by the proposal of the British Admiralty to substitute oil for coal as fuel in all ships of their fleet. Lord Beresford declares it would be a gamble, but his lordship is always against the Government when any innovation in the navy is suggested. The issue does not turn on the relative efficiency or economy of oil and coal as fuel; but the question is raised whether a kingdom with a world's supply of coal to draw upon in the Island which is its naval base should resort to another fuel which must be imported from lands beyond thousands of miles of sea. There are few oil fields in British Empire; indeed, if the unimportant Trinidad rield be excepted, there are none. Germany could get oil for her slips from Russia without running a blockade; but Great Britain would be dependent upon the lack of watchfulness of her naval enemies and the condescension of John D. (Philadelhia Record)

self than to the girl; "his brave act of Remember to brush your teeth always chivalry in saving your life, my darl after eating acid fruit.

GILLETT'S LYE EATS DIRT

CHILD SLAVERY.

(Montreal Herald.) (Montreal Herald.)

The early riser who happens to see the onrush of laborers, in the morning hours, is astonished to remark the great number of little ones who board the trams. Small boys, and even small girls, hurry along the street, their dinner hastily wrapped up and carried under their arm. They almost tumble, as they go, for want of sleep. They look ahead, with hazy eyes, as if they had an inkling of the dreary path they are so soon condemned to follow in the turmoil of the big city.

hazy eyes, as if they had an inkling of
the dreary path they are so soon condemned to follow in the turmoil of the
big city.

They are already bent forward, as if
under some unseen burden, and they
thread the way with that creeping step
which recalls the chained inmate of the
ergastula. They are devoid of flesh.
The pallor of their cheeks asserts the
murder of childhood, and their strained
lips hint at the coming of that dread
disease which slays its thousands and its
tens of thousands, and society goes on
without giving heed to this crying injustice done unto the men and women of
to-morrow—if illness and misery do not
mow them down. It pays no attention
to the ever increasing threat that arises
from these little outcasts from the world
of childhood.

The presence on the street of children
going to work at six o'clock in
morning, with a meagre lunch under ther
arms, is a slashing armament of all the
official hypocrisy that dwells in official
reports on that vile aspect of white slavery, the child laborer.

Occasionally you meet a man in real

Occasionally you meet a man in real iffe who has almost as much dignity as a butler in a play

When Will Moon's Rays Fall Just Right in Chalk Creek Canyon to Reveal Fabulous Spanish Treasure to Old Tom?

At evening, when the cliff shadows "HE LIGHTS A LAMP AND SITS FOR HOURS PORING OVER A VERY his cabin and the wild creatures of the hills come down to drink he lights STRANGE OLD PARCHMENT. " nis lamp and sits for hours poring

animals that mark the cavern and are not seen by daylight.

yon is a wonderful place. The chaik nuggets and the yellow stream runcliffs stand as mighty warders, and at their base thousands of mysterious caves and channels wind far back into bowels of the big mountain.

There were Spanish explorers and Creek Canyon, tapping rocks, digging away cebris, peering into caverns, sleeping by day and working by moonminers in these "Mexican Mountains" long before Americans penetrated the rich gulches—centuries before Cripple Creek and Leadvill. Evry-where traces of old mine workings when he has found the locality have been found. And Summers indicated by the chart, the moon's theory is that a band of them had rays, at a certain elevation, will fall taken the easiest and richest pickings of the mountains and then, because they could get back to Mexico apon the entrance of the secret cavity of the mountains and the pern'where the romantic "conquistad-fore they could get back to Mexico ores" stowed their gold. But Summers were attacked by Indians and cached has not yet discovered the precise their gold here for safety. Only one has not yet discovered the precise their gold here for safety. Only one spot, or the time of the night, month of them escaped, the story runs, bearmore year when the moonbeams make ing the secret, and Summers thinks an engineer from the itio Grande railmonth of them escaped, the story runs, bearmore when the moonbeams make ing the secret, and Summers thinks an engineer from the itio Grande railmonth. or year when the moonbeams make ing the proper angle to bring into relief he the rudely carved figures of men and left

The searcher is sure that some day te will find the cavern and its old Treasure or no treasure, the canning in streams from the rotten sides. And with them, perhaps, will be rare old coins and handfuls of precious stones.

> And then the quest of centuries will be ended.

> For Summers is not the only man who has spent his life in this search. Many and many a miner has turn-ed back from the lure of gold-bearing rock to the lure of the Spanish Treas-

A 'CROSS COUNTER TALK

Customer: "What constitutes good paint?"
Dealer: "Good paint depends on the materials used, the processes of manufacture, and the skill of the paint maker—no more,

"Shewin-Williams Paint, Prepared, is good paint—the best paint, in fact, that can be made. No care or detail is lacking in its manufacture. The materials employed are of the highest quality and are properly put together by experienced paint makers. The linsed oil—the vital part of paint—used in S.W.P. is made especially by The S-W. Co. in their own mill. The pigments are selected with greatest care and scrupulously tested. The tinting colors are products of the Company's own dry color works. And the mills used for grinding and mixing are designed and made in the machine shops of the Company. They embody the most advanced ideas in paint making. With such high quality meterials, such care and attention, S.W.P. must be and is good paint all the way through."

THE ALBUM

(Crawf C. Slack)
I have many little tokens of the by-

gones stored away,
Some hid in silent places, some 'round
my study lay.
They are but humble trinkets, strewn

They are but humble trinkets, strewn around me here and there,
Not wrought of gold nor silver, yet

to me they're jewels rare.

They speak to me in silence, in voices sweet of tone.

They are flash lights to the memory, of the joys and sorrows known; For here I speak in earnest when I say

that sighs and tears
Serve to make life all the sweeter,
whe we turn to by-gone years.

An old plush covered album, now finger stained and worn, With photos dim and faded, with edges

fringed and torn,
Is a gem of retrospection, for it always
serves to start

The love-light fire which smoulders around my hardened heart.

I litt the treasured volume and turn

the leaves with care
And view with pleasant memory the

I greet the kindly faces, which my infancy once knew, And, for the passing moment, I return

shadow pictures there.

And, for the passing moment, I return and live anew.

I return to youthful places and to faces
I knew then,
To pasture field and fallow, to moun-

To pasture field and fallow, to mountain stream and glen,

To the village school and playground,

to a mother's love divine,

And in fancy stroll at twilight with
that girl sweetheart of mine.

As I muse, I feel the pressure of her slender hand of tan, And again we love as children and

again the future plan.

Too, I catch the thrilling glances of a pair of love-lit eyes,

So bewitching and impressive, azure tinted as the skies.

To us the place most sacred is the place where we were born,
Where we lifted up our eyelids first to greet the early morn.

I believe life's happiest moments come to us when we are voung,

And I think the sweetest music are the songs our mothers sung.

There's no friendship like the friend-

ship which shared our youthful days,
No geeetings like child greetings, no
wavs like childish ways,
No welcome like the welcomes from

the friends you always knew,
No handshake like the handshakes
which the old time friends give you.

LARGE MODEL CLASS

Just why the Ontario Government has closed the Athens Model School and forced the students of these United Counties to go elsewhere for training is hard to understand. Up to the present, no explanation has been offered. At present nine graduates of the A. H. S. are attending the Kingston Model, and this is how the Whig describes conditions there:—

describes conditions the re:
The attendance at the Model school which opened in the old collegiate building on Tuesday morning is the largest in years. Up until the present time, forty four are on the roll and still more have applied for admission. When the school opened on Tuesday morning there were forty in attendance

and four more have entered since.

It is doubtful if the department of education at Toronto will allow one teacher to teach more than the present number enrolled and for that reason another class might have to be formed.

Big Decline in Cheese Export

The Department of Trade and Commerce has received from its agents in Great Britain reports issued by British importers sounding a note of alarm over the continued decrease in receipts of cheese from Canada. Shipments between May 1 and July 15, according to one report, showed a shortage of 5,930, or 26.8 per cent., compared with the 1912 period, and 32.1 per cent.

compared with the 1911 period,
The deficit is steadily increasing, an average of 540 tons a week having been reached. The fear is expressed that the decrease will be much greater if the United States duty on Canadian cheese is cut down by three cents per pound as proposed. It is pointed out that Montreal stocks of cheese on July 18 amounted to 30,000 boxes, as against 44,000 boxes on July 18, 1912, most of it waiting for the American market.

In 1904 Canadian Cheese formed 72.4 per cart. of British imports. It has dropped to 56.5 per cent.

Caring for Babies at the Fair

A rest room for mothers and a creche for babies will be conducted at the coming Central Canada Exhibition, Ottawa, September 5-14 by the Local Council of Women. The Women's Council recently decided to have a refreshment booth at the Exhibition and the two adjuncts mentioned, will be desirable innovations. In past years small children have been a problem both for country and city folk, wishing to enjoy the Fair to the fullest extent and frequently the baby has been the cause of the mother not visiting the Exhibition at all. The mothers' rest room and creche, to be

furnished by the Local Council of Women, will be under efficient management and will no doubt add to the pleasure of hundreds of women visitors. The refreshments will be sold on the European plan and the nominal charge for these and for the creche services will go into the funds of the Women's Council. Mrs W. Gullock and Mrs C. Addison are conveners of the committee-in-charge of the new enterprise.

BLIND HERO APPOINTED

Lorne W. Mulloy, B.A., of Winchester, has been appointed to lecture on English and Canadian history in the Roval Military College, Kingston. Mulloy is the blind hero of the South African war, who after losing his sight from a Boer bullet, took his arts course in Queen's University, graduating in 1908. Shortly afterward he was married to Miss Joan Munro, daughter of the, wealthy Canadian lumberman. Mr and Mrs Mulloy have for some time been living in Iroquois.

PETERSON - EARL

A very pretty wedding took place on Tuesday evening, August 19, at 6.30 o'clock at the bride's parents, Mr and Mrs N. G. Earl, Queen street, when their only daughter, Phoebe Belle, was united in marriage to Mr Jens C. Peterson, of Smith's Falls. The ceremony was performed by the Rev. T. C. Brown, pastor of Brockville Methodist church.

The bride entered the parlor on the arm of her father as Bell's wedding march was beautifully rendered by Miss Tena Ross. Standing under an arch with carnations, smilax and ferns, the bride looked charming in a dress of cream silk, with marquisette and bridal yeil caught up with orange blossoms, and carrying a beautiful bouquet of white carnations and smilax.

She was attended by Miss Myrtle Patterson, of Portland, who was tastefully dressed in pink silk and carried a bouquet of pink carnations. Little Moddie Palmer, in a pretty frock of pink silk and carrying a basket of pink roses, made a dainty little flower girl. The groom was attended by Mr Stanley L. Earl, brother of the bride.

After congratulations the guests sat down to a dainty repast, the table decorations being carried out in pink and white. Later in the evening Mr and Mrs Peterson left for Athens where they will go into camp on the Charleston lake for a couple of weeks.

The bride travelled in a blue whipcord suit with net blouse to match and a large white picture hat. The groom's gift to the bride was a gold bracelet set with diamonds, and to the bridesmaid a sunburst of pearls. The little flower girl received a signet ring

and the groomsman a pearl stick pin.

The many presents received by the bride and groom goes to show the high esteem in which they are held by their many friends. The bride received a number of costly and beautiful gifts, also a substantial cheque, from her father and mother and one from her

father and mother and one from her brother.

Upon their return they will reside at the home of the bride's parents, Queens street.—Smith's Falls News.

GROWING APPLES

In the following paragraph, which we take from the Rideau Record, reference is made to the orchard of Mr. Bresce, Delta, where Mr W. H. Smith and his assistants in the local branch of the Department of Agriculture have been doing some highly educative work.

It is often said that in this eastern part of Ontario we do not grow good apples but the reason is very seldom given. It is simply because we do not try: Even those who have gone to the trouble and expense of planting or chards do not take proper care of them and therefore do not get the results. On the Smith's Falls market yesterday there was a man from near Delta whose experience proved this. He had a big load of fine apples and in conversation with the Record he said that last spring the Government had taken half his orchard for purposes of demonstrating the value of spraying and attending to apple and other fruit bearing trees. The apples he had on the market were smooth and clean and were from the sprayed. In the part of his orchard that was not sprayed he said he had no apples that were worth picking. No stronger proof could be had of the necessity of spraying the trees and of the profit of doing it. This man will have a yaulable crop, which will bring him big returns, from the sprayed part of his orchard, while from the un-sprayed portion there will be absolutely nothing. Yesterday he had a load that brought him forty dollars alone. There is probably no more profitable kind of crop that could be grown than apples and farmers are missing a good source of revenue in failing to plant orchards and in neglecting them when they have planted them. If we do not grow apples in this part of Ontario it is only because we do not really try to do so.

extent and frequently the baby has been the cause of the mother not visiting the Exhibition at all. The work will be commenced in Gananoque mothers' rest room and crecke, to be by September 1st.

CO OPERATIVE EXPERIMENTS IN AGRICULTURE

Material for any one of the six experiments here mentioned will be sent free to any Ontario farmer applying for it, if he will conduct an experiment with great care and report the results after harvest next year. The seed will be sent out in the order in which applications are received as long as the supply lasts.

1—Testing three leading varieties of Winter Wheat, 3 plots.

2-Testing one leading variety of Winter Rye and one of Winter Wheat, Dowsley.

3-Testing Spring applications of five fertilizers with Winter Wheat, 6

4-Testing Autumn and Spring applications of Nitrate of Soda and Common Salt with Winter Wheat, 5 plots.

5—Testing Winter Emmer Winter Barley, 2 plots.

6—Testing Hairy Vetches and Winter Lye as Fodder Crops, 2 plots. The exact size of each plot is to be one rod wide by two rods long. The material for experiments Nos. 1, 2, 3 5 and 6 will be forwarded by mail, and for the other one by express. Each person wishing to conduct one of these experiments should apply as soon as possible, mentioning which test he desires, and the material, with instructions for testing and the blank form on which to report, will be furnished free of cost until the supply of experimental material is exhausted. A. Zavitz, Agricultural College, Guelph, Ont.

DEATH OF MRS. THOS. MOULTON

At the residence of her daughter, Mrs. J. Webster, Oak Leaf, on Saturday, August 23, Mrs Jane Moulton, relict of the late Thomas Moulton, departed this life aged 74 years.

Mrs Moulton had been ailing for about a year, but at the end death came suddenly. A faithful wife, a loving mother-triuy, a worthy woman

has game to her reward.
Since the death of her husband a couple of years ago, Mrs Moulton has resided with her daughter, where she passed in comfort the closing days of her long and active life. Besides her daughter, she is survived by two sons, Albert, in the Canadian West, and Ben, a guard at the Eastern Hospital, Brockville.

The funeral service was conducted at Trinity Church, Oak Leaf, or Monday by the Rector, W. G. Swayne.

Highland Cadets

The officer commanding the Highland Cadets of Montreal has granted that regiment permission to visit Ottawa for the Central Canada Exhibition during four days, September 10th to 13th, thus providing the fair with a military attraction of the highest order. There will be 100 Cadets, 4 pipers and a suitable number of buglers. This regiment organized 24 years ago, is recognized as one of the best drilled corps of young men in Canada and has since 1900, an official standing in the militia as The High-land Cadet Battalion, comprising four companies. Fifteen of their members served in South Africa. Naturally, the exhibitions of drill exercise and fancy marching by the kilted Canadian militia unit are attractive and edifying. Their efficiency displayed before representatives of royalty and at celebra-tions in some United States and Canadian cities has won approbation from most eminent sources. At the Ottawa Exhibition the Highland Cadets will be seen in: Physical Drill with Arms to Music; Fancy Marches to Music (lanterns in the evening)

od payouet Exercises; Troop-

DEATH OF MRS. A. BATES

With surprise and pain, the friends and relatives of Mrs Adaline Alguire Bates learned of her very sudden death, early on the morning of Friday, the 22nd inst. Up to this time she had appeared to be in her usual health. Athens and Plum Hollow. At the time of her death she was a guest at the home of Mr Geo. P. Wight.

On Thursday she had felt particular ly well, and spent the day at the Section Picnic held in Mr T. Howarth's grove near by. In the evening she expressed her pleasure over the enjoyable time she had, and retired in a most cheerful trame of mind.

Early next morning she spoke of feeling of suffocation, and breathed with difficulty. While preparations were being made for her relief and comfort, she tell into an apparently natural sleep. It was thought best not to disturb her, and not until almost an hour had passed was it discovered that her sleep was the sleep of death.

Dr Hamilton was summoned and pronounced death due to heart failure. Owing to the illness of Mrs Dowslev, the nearest relative, it was considered advisable by Mr Dowsley and friends to have the funeral services held at the home where she had died. On Saturday afternoon Rev Mr Westell conducted the service in the presence of sorrowing friends. Her remains were laid to rest beside her parents and daughters in the Alguire family plot at

Sheldon's. Mrs Bates was a lady of a most cheerful and most pleasing personality and of great kindness of heart. Her engaging manner and sweet smile made her respected and beloved by all. She will not soon be orgotten.

Her friends were mindful of her great love for the cultivation of flowers, and the casket was strewn with blossoms placed there by loving hands. Con spicuous among them was a large and most beautiful wreath of orchids and maiden hair ferns, from Mr and Mrs

BY-LAW DEFEATED

Elgin, August 24.—The by-law voted on in the township of South Crosby today to grant a bonus of \$15,000 to Gananoque and Arnprior Railway, was defeated by a majority of four. It also lacked about a dozen votes of having the necessary one-third of the qualified number of voters voting in favor of the by-law.

EXCURSIONS TO OTTAWA EX HIBITION

The round trip to the Ottawa Exhibition will cost only two-thirds of the lowest one-way first class fare and 25 cents. The zone of these low rates and had passed the summer visiting in extends beyond Quebec in the east and Toronto, Sudbury and the Sault in the west, stretching southward into New York and Vermont states.

On Monday, Wednesday and Friday, September 8th, 10th and 12th ex cursion tickets will be sold at all stations in Ontario and Quebec, east of Ottawa, Kemptyille Junction and Prescott, to and including Quebec city, Levis and Megantic; Ottawa to Prescott, inclusive; Swanton and stations, Richford to Newport, Vermont and Rouse's Point, Fort Covington, Bombay, Helena, and Massena Spring, New York.

On Tuesday, Thursday and Friday of the same week, the excursion tickets will be sold west of the territory described, in Cananda, to and in cluding Toronto and Sudbury and all

intermediate branches and stations. Those not taking advantage of excursion days will be able to purchase round trip tickets for Ottawa at the owest one-way first-Class fare. All tickets are good to up to September 15th.

VOTERS' LIST POSTING

Village of Athens, 1913

HUMAN WINDMILLS.

Man Swung Clubs for 107 Hours Without a Break.

The wonderful record of the world's champion ciubswinger, Tom Burrows, who some time ago accomplished the test of swinging Indian clubs weighing three pounds six ounces each for 107 hours without a break at the minimum rate of eighty revolutions a minute once more calls attention to his amazing

stamina. Burrows has turned forty years of age, and has been giving club-swinging exhibitions and setting up new records since he was fourteen. "The medical profession," he says, both in England and Australia, say that I helped my heart-during my exhibitions by working the clubs in unison with the heart-beats, and doctors tell me that my life has not been shortened by club-swinging." The champion, however, is an all-round athlete, and during an interview

with the writer some time ago he gave several interesting facts regarding his eareer. It was as a cricketer that first came into prominence in Australia, the land of his birth, and since then he has achieved much success in various parts of the world as a wrestler, boxer, sprinter, swimmer and evelist. His ser-vices have been much sought after as vices have been much song the boxing world, and among notable pugilists he prepared Frank Slavin and Tom Willians, the boxing champion of Australians, the boxing champion of

lians, the boxing champion of Australia, for many sensational contests.

Not less remarkable than his own record is that established by Col. H. E. Deane, of the Royal Army Medical Corps, who, in spite of his fifty-two years, finished a few days ago a twenty-four hour test at Aldershot, thus breakford an executed a Powings the ing an amateur record. Perhaps the most astonishing feature of Col. Deane's record is that he smoked cigars freely when swinging, and ate many hard-boiled eggs and Chelsea buns, drinking a little milk. He swing to the strains of and songs and at half-time began

While Burrows holds the club-swingin; championship of the world, it might be mentioned that the hammer-swinging record was established by Arthur Lan easter, who four years ago,, at the Crys tal Palace, swing a blacksmith's bam-mer weighing eight pounds for twelve hours continually. Lancaster is known as "the man with the iron hands," an setting up this remarkable record the hammer was swing in a complete circle each time, and not with the action of a pendulum. A striking illustration of a pendulum. A striking illustration of Lancaster's dexterity with the black smith's hammer is afforded by the fact that he can knock the stump of a cigar-ette, 1½ inches long, from the mouth of his assistant while the hammer-head is travelling in cir. circles at the rate of

Minard's Liniment Cures Colds, Etc. Tiny Dynamo.

A lilliputian electric dynamo, perfect in every detail, but weighing only a quarter of an ounce, was shown at work-before the Paris Academy of Science. Its constructor is a French mechanician named Trevet. This dynamo is three-fifths of an inch long, half an inch wide and three-fittis of an inch high. The coil is a quarter of an inch in diameter, and is wired with 51; feet of silk insulated copper wire 1,500 inches in thickness. A tension in his inches ness. A tension is indicated of 3-5 volts by a current of 0.2 ampher, but as to its power there is no instrument sensi-tive enough to record it. While at work toy machine made a sound like th humming of a bee. Tit-Bits.

EVXTRADITION REFORM NEEDED

EVXTRADITION REFORM NEEDED

(Guelph Mercury)

A young man was taken from New
York on Thursday to Italy, to stand trin
on a charge of having murdered his bride
of three months in Italy in the summer of
1910. It is alleged that after the deed
he threw her body in a lake.

This man has successfully fought extradition ever since: If the evidence
proves him guilty of the crime, justice has
been cheated of its due for three years.

There seems to be no reason why, in
such a case the laws of the land would
not hand over the iman wanted, to stand
his trial. It can rendily be understood
that each country is prepared to extend
profection to its chizens, but in the case
cited it would seem that extradition has
simply had the effect of allowing liberty
to a man who should have had to face
the courts long ago and give an account
of his knowledge of the dastardly deed.

BABY'S GREAT DANGER DURING HOT WEATHER

More little ones die during hot weather than at any other time of the year Diarrhoea, dysentry, cholera infantum and stomach disorders come without and stomach warning, and when a medicine is not at hand to give promptly the short de-lay too frequently means that the child has passed beyond aid. Baby's Own Tablets should always be kept in the home where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes sundenly the prompt use of the Tablets will cure the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine C., Brockville, Ont.

A LIGHT TRUST.

How much do you pay for electric current? asks Walter V. Woehlke in September Technical World magazine.

If you live in a city of two hundred thousand inhabitants or more, you probably pay at least ten cents a kilowatt-hour; if you live in a small town, our rate is likely to be considerably lower. Strange, isn't it, that rates should be higner the larger the market? That is the fact, though

Pasadena, yith thirty-five thousand inhabitants and nine thousand five hundred electricity consumers, pays four and five cents per kilowatt-hour for lighting current; and all around Pasadena a score of little towns gtt their current for eight cents. Yet according to the latest available reports Chicago, Brooklyn, St. Paul, Philadelphia, Spokane, Pittsburg, Portland, Providence, Washington, D.C., Richmond, Reading, San Antonio, and a mond, Reading, San Antonio, and a number of other large cities are pay-ing a base rate of ten cents and more per kilowati-hour.

per kilowati-hour.

Electric light rates in the majority of American cities are unquestionably exorbitant. They are based, not on the cost of the service, but on the long-eared patience of the consumers. This world-renowned, unfathomable. patience of the American public rather than the value of the plants is the basis of the capitalization skillfully in flated by the corporation promoters It is their most valuable, asset. If it were not for this asinine endurance of Jones and Smith and Brown, the tencent rate would long ago have sough a safe refuge in the archives of his-

torical societies. An economically installed, honestly financed, efficiently managed electric plant can, hundreds of them do, deliver current for lighting purposes, pay all legitimate expenses, set aside adequate amounts for depreciation and amortization, and leave a handsom surplus for dividends-at a maximum rate of seven cents for killowatt-hour!

At a confectioner's I held parley music and songs, and at half-time began an exhibition of club-swinging in rag-time, finishing with 180 revolutions a minuta, twice the minimum rata pre-scribed, having made altogether 150,000 announced her willingness to attend counter was quickly responsive and announced her willingness to attend to my wants in this language:

gottcha, Stevedore. You want to your dary girl a grand time by handing her a young trunk of yumyum tablets. Say, horning into this sweet-fang joint was the luckiest thing you ever did in your life. Our line of chocolate cheek-bulgers are the swellest that ever woke up a toothache or put a mustache effect under a lady's beak. Glom a coal-tar bullet just as a sample, mister, and sink it in your map. MY WORD!

WHERE EUGENICS FAILS. (Philadelphia Record)

WHERE EUGENICS FAILS.

(Philadelphia Record);

Massachusetts was convulsed a month ago by a engenic marriage, and the couple have quarreled over serious matters and said nasty things about each other and saparated. The bride says: "I felt that he had no real love for me after we went to our flat to live." But what has love to do with an engenic marriage? Eugenfes are something thoughly scientific, and love is one if the least scientific things imaginable. Clergymen and physicians are now quoted solemnly as saying that the collapse of this scientific alliance "emphasizes the truth that man is something more than a mere animal; that he is a being with a mind, a soul and a temperament." Especially the temperament. But did the experiment of an eugenic marriage have to be tried with resulbing disaster inside of 30 days in order to impress this upon Massachusetts ninds? The secretary of a maritable society observes; "We are not dealing with horses, dogs or cows, but with a problem that has to do with spiritual beings." To most people there is nothing new in that, but the faddists may very well give some attention to the thought.

SUMMER LAMPS.

Their Care and Dangers to Be Avoided by Users.

In camp and country lamps are being used by those not entirery familiar with their care; therefore a few words re-garding them may be timely.

Lamps with metal reservoirs are safer than those of china or glass, as the former can be picked up, if upset, and re-placed before the oil can escape.

Good quality of oil is essential, for a bad quality of oil not only clogs the wick and burner, but gives off an unpleasant and dirty vapor.

Never turn down a wick. It is meant to burn with the flame at full height, and when it is allowed to smoulder it either smokes or smells, and it also has source of danger in it.

Place your alcohol lamp in a shallow dish, as the alcohol is liable to run on the table or dressing table and ignite, or ruin varnished surfaces. Never pour fresh alcohol into the tank if there is ourning char on it, for the entire contents may burst into flames. Do not keep the alcohol bottle near the lighted

'ALEXANDRA" AT TETE JUEAT.

Miss Isabel A R MacLean whose pen made is "Alexandra," contributed a lengthy article to the Vancouver Province, July 12, 1913, on Tete Jaune, which point she visited with one hundred and more members of the Woman's Canadian Press Club. Of conditions, as she found them, Alexandra" writes:

"Leaving the luxuriously appointed Grand Trunk Pacific train which had brought us through enchantingly lovely scenes, the writer met the superin-tendent of construction, Mr. Fetters. The official who introduced him de-The official who introduced him described him as "the man who built the road." He led the way " " We went through a store-house piled to the roof with supplies for the camps — food and raiment and "small hardware." Labels on boxes and barrels proclaimed the best flows to be found on the marthe best flour to be found on the mar-ket, the best oatmeal, the best hams, biscuits, tea, coffee and all sorts ot canned fruits and vegetables. We called on the cook, who presided over a kitch-en that glistened and shone and challenged comparison, in point of cleanli-ness and order, with any of your town kitchens. The mess room, where the ravenous five hundred men gather three times a day, was just as spotless. The cook had just completed a spice cake, a mile or so in length, topped by icing. This trifle reposed in the ice-house pending its appearance before the five hundred. Besides the cake the ice-house condred. Besides the cake the ice-house con-tained beef in quantity, dozens of eggs, butter and other perishables. It was very warm at Tete Jaune and I left the ice-cream freezer projected from a neigh-boring door. On Sundays, if the cook feels well disposed to his flock he gives them ice-cream for dessert. To supply the camps with beef, carloads of cattle are taken in and killed at Mile 53, or care that your come by way of the river. P. Burns & deep and regular.

Company have the contract to supply "2. As regare are taken in and killed at Mile 53, or Company have the contract to supply beef. The commissariat department althis division was met. He was an Edin-

"Woodlands," Middleton, N. S.

Then Who Was Susie?

Mr. Lawrence Grossmith, who has "hit" in the part of Hubert in The Girl in the Taxi, told some amus ing stories the other day.

One of them was about a business man who attended his partner's wed ding. He had never met the bride be fore, but at the reception he was pre-sented to her, and gave her his very

best smile.
"I hardly feel like a stranger," he said pleasantly, "though I have never met you before. You see, my partner and I are on the most intimate terms apart from business, and he has occa sionally done me the honor to read ex tracts from his dear Susie's letters."

The bride glared at him so viciously

that he hastened to assume an expres-sion of apology.

"I hope you don't mind his having read your letters to me?" he asked anx

"My letters!" she repeated joily. "I fear there is some mistake. My name is Helen!"-Pearson's Weekly.

AWFUL TORONTO GIRLS.

AWFUL TORONTO GIRLS.

(Toronto Star)

In at least two or three instances in the past month, Toronto business menwho have girl employes have sent girls home to put more crothes on. In one of the cases we have heard of the girl did not come back. A representative of The Star met one of these employers on a train the other day and he said that he did not know what the mischief the fashions in girls' clothes would lead to next. He had several girls in his shop, and the other morning he felt compelled to send one of them home, as he expressed it. "to get her clothes." He said he had to do it, as he was afraid of what rivalry would cause the others to do next day.

SANOL'S USES FOR SAWDUST

BLOOD SALT

An excellent remedy for Dyspepsia, Sour stomach, Heartburn and constipa-tion. This is compounded to resemble in essence and effect the salty parts of the human blood.

Price 50c. Leading Druggists.

Winnipeg, Man. A BRAVE ESKIMO.

Gave Up Everything for His Christian Faith.

THE SANOL MFG. CO., LIMITED.

The whole life of the primitive Eskimo The whole life of the primitive Eskimo is governed by precedent. Although outwardly the freest and most irresponsible being in the world, he is in reality the slave of public opinion and the numberless customs and superstitions of his ancestors. The ways of his fathers are good enough for him, and the world of the old men and witch doctors, who treasure up ancient precedent like the Pharisees of old, is the standard he lives and dies by.

For an Eskimo to break one of these unwritten laws is to render himself a social outcast. Although treated with kindness, he is no longer reckoned as a member of the tribe. A brother-in-law of an Eskimo chief had early embraced Christianity, being converted on a trip to Nome by one of the first mis-sionaries. Being a very conseientious man, he soon recognized the incompat-ibility of retaining his faith and con-forming to the worship of his people. The spirit of the Scotch Covenanters was in his veins. He refused to go through the usual rites of his people, and prayed to the God of the white stranger at home. As a result he was forbidden his place in the village kosan (or meeting place) where every man ga (or meeting place), where every man has his recognized station, carefully graded according to merit. His son was not allowed to dance with the young men or witness any of the councils or witch doctoring reserved for the men; his daughters could not take part in the annual dance of the women, not was any member of the tribe bold en-ough to ask them in marriage. They al married Siberian strangers and left the old man's house desolate, but he stuck to his faith to the last. Always cheerful, always ready to help, living daily the faith that was in him, he was one of the few of his race who was brave enough to withstand the witch-doctor.

HEALTH RULES.

Japanese Government's Advice to the People.

When Japan was engaged in conflict with Russia it was noted that the Japanese foss from disease was the smallest ever known in any wor. Investigation showed that this was due principally to the sanitary conditions maintained and to the sensible, as well as scientific rules strictly enforced in the care of the soldiers. Now the Japanese government has issued a list of rules for health for use not alone by soldiers, but by the en tire population and in peace as well as war. The 10 rules in question follow:

"1. Spend as much time out of doors as possible. Bask much in the sun and take plenty of exercise. Take respiration is always

As regards meals eat meat Company have the contract to supply beef. The commissariat department allows three pounds of beef per day to every man. The chief medical officer contract to supply once a day and let be diet be lows three pounds of beef per day to every man. The chief medical officer contract to supply the contra named as much as possible. Masticate you rfood carefully. Take a hot bath every day

and a steam bath once or twice a week if the heart is strong enough "4. Early to bed and early to

to bear it

rise.

"5. Sleep in a very dark and quiet room, with windows open. Let the minimum of sleeping hours be six or six and one-half hours, in case woman eight and one-half hours is advisable.

"6. Take one day of absolute rest

each week in which you must refrain from even reading or writing. "7. Try to avoid any outbursts of passion and strong mental stimulations. Do not tax your bain at the occurrence of inevitable incidents or of coming events. Do not say unpleasant things nor listen, if possible to avoid it, to dis-

agreeable things.

8". Be married! Widows and widow ers should be married with thea the least possible delay.
"9. Be moderate in the consump

tion of even tea and coffee, not to say tobacco and alcoholic beverages. "10. Avoid places that are warm, esepcially steam heated badly ventilated rooms."

Minard's Liniment Cures Distemper Whistling Jugs.

It seems that the potters of ancient Peru manufactured se me ingenious musical instruments, "Whistling jugs" they are called when they are placed in a collection of antiquities ."Silvadoes" they named them in the old days. Specimens of them are obtained from century old ourial places in Peru

One of these consists of two vases, the bodies joined closely one to the other with a single narrow opening between. The neck of one of these vases is closed with the exception of a small opening, in which a clay pipe is inserted. The closed neck of this double vessel is mod

eled to represent a bird's head.

When a liquid is poured into the open necked wase the air is compressed into the other, and in escaping through the narrow ppening is forced into the whis-tle and the vibration produces sound. Many of these sounds represent the notes of birds; one in the collection of the British museum imitates the notes of the robin and some other members of the thrush tribe peculiar to Peru.

Former Waste Product Now Extensively Employed.

Not so very long ago about the only real use any one had for sawdust was for packing ice. That was when small local sawmills were more common, and the amount of this form of waste wood was, or at any rate appeared, compara Now, when the tendency tivery small is to consolidate these into large mins with a capacity of several nundred thousand teet of lumber per day, the daily waste in sawdust is seen to be enormous, and much experimenting is being done to discover new methods of

utilizing it. Perhaps the most promising venture in sawdust utilization in this country is treated with sulphuric acid, under suitthie conditions, resulting in the forma tion of sugar, which is then fermented alcohol. Several plants have ed to produce alcohol from been erected to produce alcohol from wood in this manner, and, though there are some difficulties still to be over-come, the ultimate success of the process on a commercial scale is assured

Sawdust has been successfully manufactured into briquets for feel for a considerable time in Europe by a very sim-ple process. The shavings and sawdust are first steam-dried, the water contained in the wood being thus evaporated and the resin almost liquified. The sawdust is then compressed under heat into briquets of the desired size, the contained resin acting as a binder. A firm in Vancouver is engaged in a similar line of manufacture, the sawdust being com-pressed into a cylindrical tube, where it it cut into short lengths by a revolving knife, emerging in the form of small, round briquets. These briquets are clean to handle, easy to kindle, and leave

ery little ash In England sugar is manufactured on a commercial scale by treating sawdust in closed retorts with weak sulphurous acid, under high pressure. In Austin, Texas, also a plant is being built to manufacture stock food from sawdust, by a somewhat similar process. The tar, pitch and turpentine are removed from the sawdust, leaving only sugar and fi-bre, to which is added forty per cent. of cottonseed meal. The mixture is sold for fattening cattle

Two and one-half parts of clean sawdust, mixed with two parts sand and one part cement, make a warm, long-wearing and sound-proof floor, to which carpets can be tacked with less injury than to a board floor, and which has the advantages over a cement floor in being more clastic. These qualities should win an extensive use for this form of floor ing, which has the additional advantage that it can be stained to harmonize with interior finishings by the addition of color to the mixture while in a semiliquid state.

The sawdust of certain kinds of wood used in considerable quantities menufacturers for metal polish, for packing, for meat curing, for making safety explosives, and composition novelties, and for fibre and pulp manufac-ture. Patent cleaning powders for use on carpets and rugs consist principally amos Aq panaisiom Aliußii isinpwes jo cheap mineral oil.—Department of the Interior, Forestry Branch.

THE UNBUSINESSLIKE FARMER

THE UNBUSINESSLIKE FARMER.

(Kingston Whig)

How many farmers are there who can take down the account book and tell just how much money thay have invested in land and stock, how much their income for the year should be in order to give a fair return on their investment and fair wages for the labor performed by themselves and how much they have actually made during the year? That is a hard question to answer offnand, but it is safe to say that there are more who can not than who can tell where they ought to stand and were they actually do stand. If they sould, many of them, it would seem, would take steps to make a better showing.

PATH OF THE SUN.

Its Relation to the Equinoxes and the Solstices.

The sun's path is called the ecliptic. It is a great circle of the celestial sphere, cutting the celestial equator at two points 180 degrees apart and makling with it an angle of 23½ degrees known as the obliquity of the ecliptic. The crossing points are called the equinoxes, because the days and nights are then equal, and the points midway be-tween the equinoxes are the solstices, because the sun then seems to stand

still for a few days.

The ecliptic is so called because eclipses occur only when the moon is crossing it or is near it, for the moon's orbit cuts the ecliptic in two points, called nodes or knots, and at other times is above or below it. If the moon, when in either node, is in line with the sun and the earth we have an eclipse, either total or anular. she is near her node we have a partial

eclipse.
The moon's nodes are not stationary, the moon's nodes are not stationary, but move backward on the moon's orbit, completing a revolution in about nineteen years, when the colleses of the period recur in the same order and at about the same intervals as before This period of eighteen years and eleven days is called the saros. It was known to the Chaldeans and the Greeks and them their data for computing

gave eclipses. An intelligent person can trace the sun's path in the heavens. If the sun rises exactly in the east and sets in the west it is the time of the equinoxes. If the sunrise and sunset points are farthest north and the sun at noonday is highest in the heavens it is the time of the summer solstice. If the sunrise and sunset points are farthest south and the sun is very low in the heavens at noonday it is the time of the winter solstice.—Harper's Wedkly.

BETTER THAN SPANKING

Spanking does not cure children of bedwetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions, Send no money, but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine dif-ficulties by day or night.

Forest Fires.

A forest fire is a calamity. Forest fires can be prevented. The chief cause of forest fires is

A burning match thoughtlessly thrown down does the mischlef.

A HINT TO THE FEMINISTS.

(New York Herald)

If the debacle or a civilization which follows upon the heels of undue luxury be dependent upon the age of refinement which generally proceeds the detastrophe, this country is safe. Luxury we may have, but the courtly manners which served to hide the rottenness of France in the days preceding the Revolution are unknown. Among prominent people a sort of conventional gaucherle now prevails, accompanied, by a familiarity of manner and lack of refinement more sugestive of the servants' hall than anything else. Dainthness of atthe in woman is replaced by a tousled effect, which occasionally degenerates into dir. The genter sex being generally considered responsible for the ione of society, is mighty be suggested to those interested in the feminist movement that here is an opportunity for reform quife as important as the artistic treatment of back-yard or the regulation of the garbage can (New York Herald)

Obeying the Law.

A small town in Mississippi passed a law that no wheelbarrows should be allowed on the sidewalks in the busi-ness portion of the city. Soon after the law was passed one Saturday, which is the buslest day of the week, while the streets were crowded, a negro came along the main street trundling a wheelbarrow filled with groceries. The city marshal stopped him, telling him he was under arrest for pushing his wheelbarrow on the street. The negro looked at the officer for a moment, and then, picking up his little girl, who was walking by his side, he placed her upon the top of the graceries, and turning to

TO PUBLISH CASE IN MEXICAN ISSUE

President WilsonWill Make Public the Facts

FORCE HUERTA

By Means of World-wide Sentiment.

Washington, Aug. 25 .- There were important developments to-day in the Mexican situation. President Wilson began work on a message which he will send to Congress on Monday. In this he will outline in detail the proposals submitted by this Government to Huerta, the reply of the Mexican President, and his own views on the Mexican situation.

The sending of this message to Congress will represent a new tack by the President in his general plan to bring about a peaceful solution of the Mexican troubles. It will be the beginning of an effort to bring to bear on Huerta the pressure of a world-wide public opinion.

What President Wilson has been unable to accomplish through diplomatic representations he hopes now to effect through the operation of international sentiment. Having had his mediation plan turned down flatly by the Mexican President, Mr. Wilson will now give all the facts to the world and wait for the effect of its judgment upon Huerta, If the result is favorable the efforts of John Lind, the President's special envoy, to bring about mediation will be reported.

Announcement of the President's de termination to enter upon this cam-paign of publicity was regarded here as the most important development in the Mexican situation that has come since Huerta put in the hands of Mr. Lind his refusal to accept the mediation proposals of the United States.

WOULD SEND TROOPS.

WOULD SEND TROOPS.

These developments at the WhiteHouse came almost simultaneously
with the introduction in the Senate by
Mr. Penrose, of Pennsylvania, of a
resolution authorizing the sending of
American troops into northern Mexico
te act as constabulary in the protection of American lives and property. Mr.
Penrose proposed the appropriation of
\$25,000,000 to enable the President to
carry out the purposes of the resolution.
The Penrose resolution immediately
called forth a storm of protest from
Republicans as well as Democrats, and
was tabled. Though disconcerting to
the administration, it served to bring

administration, it served to the administration, it served to bring out more emphatically than any other development that has yet occurred the united support, which President Wilson has for his pelicy of peace. Senator Penrose found himself standing practically alone and in the non-partisan debate that followed, emphatic answer was given to President Huerta's contention that President Wilson has the support of only part of Congress in

the support of only part of Congress in his present efforts in Mexico City. The last instalment of the Mexican reply to President Wilson's peace can reply to President Wisco's peace plan were translated from the eigher cablegrams to-day and the President was enabled for the first time to form a definite epinion as to just how the sit-

John Lind has cabled his belief that there remains some hone for the ultimate success of the mediation plan and the President let it be known to-day that he had not abandoned his pencefu undertaking.

WHAT PRESIDENT HOPES. It was evident, however, that the President bases his present hope not so much on the absence of finality in the Huerta rejection as on the pos-sibility that the Mexican President's attitude will become more favorable when public opinion has been arous-

The foreign powers have almost unanimously accorded the United States their moral support in the trying out of the policy for peace through media-

There has been a strong belief here in the last week that not only did the powers render Mr. Wilson their moral support, but had gone a step farther and were really to be credited with prevailing upon Huerta through unofficial Envoy Lind.

It is the President's intention now

It is the President's intention now to appeal more strongly and probably more directly to the sympathies of the powers for the American policy by the publication of his Message to Congress. In doing this he has two purposes in

en the representations of John Lind for the acceptance of the peace pro-posals, and in the event that this proves impossible, to put the United States equarely on record before the world as having made a most earnest effort to protect the nationals of every power in Mexico. This would be likely to forestall any early representation matience if order is not restored

in Mexico.

The President feels that after has taken the world into his confidence by the publication of his message to Congress he can rely upon a more cordial attitude on the part of the Mexican public itself toward the Am-erican plan. Further than this he believes that his message will unify American sentiment to a greater degree behind him and against intervention under

important that the country should be impressed with the undesirability of intervention in Mexico, except in the most extreme circumstances. This is needed, he thinks, as a preparation for the alternative policy he had almost decided to adopt should Lind's a Boer bullet, came from his home at mission meet final failure. This is a policy of playing hands off entirely for an indefinite period, awaiting evi-

dences that Mexico is in a state of peace and under the administration of a lawfully elected president.

The President is preparing to give his undivided attention to the prepara-tion of the message to Congress for the next few days, and expects to transmit it on Monday. He proposes that the message shall be a clear summary of the steps taken by the United States in the Mexican crisis, and of the results obtained. It can be said that the message will not in any way represent an effort to shoulder upon Congress any of the responsibility for handling the situa-tion which now rests with the executive side of the overnment.

WORLD POLICE

Discussed by International Peace Congress,

The Hague, Aug. 25 .- The twentieth Universal Peace Congress had a feast of academic idealism to-day. The chief item on the menu was Professor Van Vottenhoven's scheme for an international police force in the shape of a fleet under an international admiralty board to compel the observance of the law of nations. The congress, recalling the Pekin expedition, the blockade of the Cretan coast and other similar incidents, received the project with kindly interest, but politely shelved it by adopting a resolution to the effect that it was a matter for further study. Dr. Van Vottenhoven, who is pro-fessor of law at Leyden University,

seems to believe that the mere exist-ence of such a force would prevent war and enable nations to disarm, but few of the speakers in the long debate which followed agreed with him. Among the chief opponents of the proposal were J. D. Tryon, of Boston, and Dr. David Starr Jordan, of California. A series of resolutions on the Balkan

war was passed. These resolutions ex-pressed regret that the powers which had obtained economic advantages from Turkey could not agree to protect her subject peoples; condemned the brutality of the late war, and advised consultation of the populations concerned in regard to the future of Adrianapple and

Thrace.
A motion by Professor Jordan was adopted instructing the Berne Peace Bureau to investigate the probable con-sequences of an economic boycett and other measures as a means of enforcing decisions, and to draw up a code of regulations which would give effect to

regulations which would give effect to arbitral awards. In the afternoon the five hundred delegates visited the Palace of Peace erected by Andrew Carnegie.

ASKS RECEIVER

Bounty Expiration Hits Canada Iron Corporation.

Montreal despatch: Application was made the courts to-day by the Canada Iron Corporation for the appointment of a receiver, under whose direction the affairs of the corporation will be conducted pending a re construction of its finances. The application was granted and F. F. Whyte of New York, was named as the re-

ceiver. The decision to apply for a receiver was reached at a meeting of the Board of Directors this week, and it was stated on behalf of the directors that since the expiration of the bounties reduction in profits had seriously

hampered operations.

The directors have decided that the only course open to them is to reization of their finances.

a reorganization plan which is now being formulated. The corporation has outstanding \$4. 637,933 bonds and \$7,741,300 stock, of which \$2,909,000 is preferred.

TOURING M.P.'S REFUSE VACCINA. TION.

London, Aug. 25. The Sydney cor-respondent of the Daily Mail says that owing to the presence of smallpox in that city, several members of the British Parliamentary party have re-fused to call there. Many of them, notably Will Crooks, refused vaccination, in the absence of which the

would have to be detained indefinitely in New South Wales.

The Federal Ministers are greatly perturbed by the outbreak. It is authoritatively stated that Sydney traders are losing \$600,000 daily in consequence of the scare preventing visitors from coming there from country districts and other States. Sydner goods also are not wanted elsewhere.

WATCHMAN FATALLY SHOT.

St. Thomas despatch: Herber Pickell, watchman at the Aluminum Casting Co.'s Works, Detroit, who died from shot wounds received in the abdomen early this morning, is a former resident of Brantford, where his parents still live, and his wife was Gertrude Ostrander, of St. Thomas, before her marriage. Pickell was found by Louis Attenberg, a fellow-watchman, in a semi-conscious state, but claimed he was suffering from stoward, ashe when in really, he was storaged. stomach ache, when in reality he was fatally shot. His true condition was discovered by his wife after he was taken home. There were shots prior to the finding of Pickell, the shooting is believed to be There were shots fired work of burglars, although Pickell died without making any statement.

JOB FOR BLIND HERO.

The receivership is preliminary to or six months' imprisonment for being intogreated while on duty on Wednesday morning.

RICH IMMIGRANTS

U. S. Citizens at Winnipeg With Lots of Money.

Winnipeg, despatch—Two important special trains arrived in Western Canada is morning bringing 650 farmers from have no intention of going hamesteading out, on the other hand, they have left their native country with the idea o their native country with the idea of purchasing farms and settling down in the Canadian West. The first of these trains came in by way of North Portal and brought 275 persons from Illinois, lowa, Kansas and Wisconsin.

They arrived under the guidance of the C. P. R. Department of Natural Resources and are bound for Calgary. Some of them possessed from \$20,000 to \$40,000 and on the whole they averaged \$10,000 apiece.

The second special train came through Emerson and carried 375 homeseekers for the Lost Mountain Valley district. The members of the party halled from Wisconsin, lowa and Indina. They brought with them an average of from \$7,000 to \$8,000 each.

LIQUOR IN PITCH

Shrewd Smugglers Unearthed at S. Porcupine.

South Porcupine despatch: By the fortunate disclosure that barrels supposedly filled with cement and pitch contained within them 10 gallon kegs of whiskey, the provincial police of this district claim they have put a stop to a great deal of the liquor traffic. The find came about in a peculiar manner on Monday of this week, and the con stable's suspicion was only aroused when too much cement and tar were shipped into the town. As a result of the raid made, three cases will be heard before Magistrate Thomas Torrance on Saturday afternoon. A barber by the name of Gagnon is out on \$500 bail.

Joseph Hudan Losses, of the South Por-cupine Hotel, is out on \$150 bail, while E. Juneau is awaiting a bondsman to be allowed his freedom until the trial takes place.

On Monday Provincial Constables R. T. Smith and E. Jordon became suspicious of a barrel of tar, weighing nearly ious of a barrel of tar, weighing nearly 300 pounds, lying unclaimed at the station. They managed ot shift the heavy barrel, and heard a jolting noise inside. They immediately opened the barrel, and in digging out the hard tar located the 10-gallon keg of whiskey inside. A 500-pound barrel of cement which had been allowed to set solid, was next investigated, and another 10 gallons of liquor fell into the hands of the police. This was the start of an investigation which led to the arrest of the three men, on whose premises it is alleged other eviwhose premises it is alleged other evi-dences were found which led the officers to suspect that they were the ones car-

Evidently the keg had been packed while the ce-ment was wet, and it was encased in a manner which gave the police great difficulty in locating it.

rying on this novel method of importa

difficulty in locating it.

In the rear of the premises of one of he arrested men small empty kegs bearing more or less tar on the exterior were found, which led to the arrests.

TO FAVOR CANADA

German Tariff to Give Better Treatment.

Berlin, Aug. 25 .- Immediately the Reichstag reassembles a measure will be laid before the House affecting the commercial relations between Germany and England and her overseas domin-ions, in the shape of a bill to authorize the Federal Council of Germany to extend her most favored nation treatment to Great Britain, her colonies and other

The arrangement has already been in force with all the dominions excepting Canada, which in 1910 obtained concessions on twenty-five articles in the Ger man tariff in return for a suspension of the one-third surcharge levied by the Canadian Government on all German products entering the Dominion. Several previous attempts have been made to bring Canada in Mue, but with-

U.S. GETSRARE WORK

That Was Wanted for the Welsh National Library.

London, Aug. 25.—Thomas Thorpe, a bookseller, of St. Martin's lane, has sold to an American customer a superb copy of Thomas Pennant's "Tour in Wales." The order was telegraphed over, and the volumes are now, it is believed, on their

ay to New York.
Pennant's tour was undertaken in 1773, and the account of it was pub-ished in two quarto volumes in 1778-84. The present copy was taken to pieces and extended to eleven volumes quarto and folio by the addition of some 2.000 original drawings of portraits from ancient pictures, views of mansions, antiquities, coats of arms, stained glass, etc., as well as nearly seven bundred rare prints. The volumes were built up regardless of expense by Richard Muilman Trench Chiswell, of Debden Hall, Essex, who employed a large num-

Thorpe's price for the set was a moderate one, \$1.730, and disappointment is expressed it was not seemed for the Welsh National Library.

KILLED FLEEING QAURANTINE.

Englehart despatch: In a desperate attempt to escape the police Lee Hue, a Chinese, who broke quarantine at Swastika yesterday morning, was killed at noon on the day of his escape between Englehart and Heaslip by jumping from a fast-traveling train. No indication of the tragedy was given until this morning, when the body was discovered by the crew of the local train running between Englehart and Cobalt. Coroner Dr. H. R. Codd, of Haileybury, was notified, and immediately went to the scene.

FATALITY AT ROYAL HUNT.

Rome. Aug. 25.—Wile King Victor Emmanuel was hunting chamois near Guneo, in Piedmont, to-day, a rock fell, killing one huntsman and injuring another. The King, who is greatly distressed over the accident, has abandoned hunting for the remainder of the year.

The fact that the party had been warned of the danger made the affair all the more regrettable to his Ma-

SECOND SMALLPOX OUTBREAK. Toronto despatch: For the second time in a month the Provincial Health authorities are concerned with an outbreak of smallpox at Collin's Inlet, on Georgian Bay. The former case was easily disposed of, but rumors of a fresh outbreak have called the district inspector again to the scene, and remedial measures are being applied at once. Lumbering is the principal industry at Collin's Inlet, and practic ally the entire population is supported by the mills located litere.

P.-M.-G. SAMUEL SAILS. London, Aug. Z.—The Right Hon. Herbert Louise Samuel, the British Post-master-General, was a passenger on board the Canadian Pacific steamer Empress of Britain, which sailed from Liverpool to-day for Quebec. The Postmaster-General will make a two months' tour of Canada and also will visit New York and Washington.

Washington. LUSITANIA AGAIN IN SERVICE London. Aug. 25.—The Cunard liner Lusitania, which, for some time, had been undergoing repairs to her machinery, went on Wednesday for a trial run, and returned to the Mersey early vesterday morning. The results of the trial have been highly satisfactory, and everything in connection with the machinery worked without a hitch. The steamer resumes her sailings to New York on Saturday.

NATURALIZATION FOR HARRY THAW

Advised as Means to Prevent His Deportation.

THOMPSON HEARING

Week's Delay in Case of Fugitive's Assistant.

Sherbrooke, Que., despatch-The hearng in the case of the self-styled "Mitchell Thompson," arrested by the immigration authorities, charged with aiding a lunatic-Harry K. Thaw-in crossing the Canadian frontier, was postponed to-day until next Friday.

Habeas corpus proceedings in the case of Harry K. Thaw having been put off until Wednesday next, the interest in his case centered to-day in the arraignment of the man arrested here on Wednesday last as having aided and abetted Thaw to cross the Canadian frontier. Although describing himself as "Mitchell Thompson," this man has been identified as "Gentleman Roger" Thompson, a chauffeur of New York City, one of the five who aided Thaw in his escape from Matteawan.

When arrested in the Superior Court com here, Thompson maintained that he was a citizen of Toronto, and that he had met Thaw by chance. However, he retained as counsel one of the group of lawyers engaged to represent Thaw although Thaw had up to to-day declined to admit that he had ever seen Thompson, or that there was under arrest here anyone of the quintette who took part in his dash from the asylum

in Duchess county.

Sheriff Hornbeck, of Duchess county. lthough coming primarily to watch the Thaw case, has a warrant charging Thompson with conspiring with others to bring about Thaw's escape, and he hoped that the proceedings to-day would result in the prisoner being surrendered for return to the State of New York.

Seven witnesses, it was said, would be produced to show that Thompson ac-companied Thaw across the Canadian border. Among them was Octave Ned-cau, his wife, and two men employed on his farm near Coaticooke. Nedeau has said it was he who furnished the rig for Thaw's last dash before his arest, and that Thompson accompanied them.

Thaw's sister, Margaret Thaw Car-negie, and his brother-in-law, Geo. Lau-der Carnegie, left Sherbrooke last night, after conferring with his lawyers and ascertaining that everything was being done to protect his interests, the habeas corpus proceedings not being due until Wednesday. Thaw is endeavoring to relax to-day and to enjoy the first good night's rest he has had since his escape from Matteawan. He still refuses to discuss his flight, or to say whether Thompson was a member of the quintette that engineered his delivery.

Thaw has been advised by certain of his counsel, it was learned to-day, to buy property in Canada, and take steps to become naturalized as a British subject. This, it was said, would prevent his deportation.

THE THOMPSON HEARING.

Sherbrooke despatch- Thompson was arraigned before Police Judge Mulvena, shortly after 10 o'clock. F. Campbell, acting jointly for the Dominion Department of Immigration and the Duchess County authorities, asked that the case be put over, in the ground that docu-ments from Matteawan, showing that Thay had been confined there and is insane, and are therefore pertinent to Thompson's alleged offence, had not arrived here, Counsel for Thompson, Louis St. Laurent, associated with Thaw's group of defenders, at first objected to but finally agreed to the hearing

on Friday, Aug. 29th,
Thompson came into court more or
less disguised by a pair of smoked glasses. Pictures of "Gentleman Roger" had arrived during the night, however, and Sheriff Hornbeck, of Duchess County, holding one of these and gazing at the prisoner said: "Who could miss it? it certainly is

Thompson said not a word. REASON FOR POSTPONEMENT.

Thaw appeared this morning to have

spent a restless night. His hair, was dishevelled, his collar awry, and his eyes staring. His breakfast, laid out on bench for him, had not been touched. He said again to day that he hoped soon to be able to give an account of his escape. To-day he was jotting down notes on the incidents. He had been sup-plied with the New York and Montreal on which he is held is punishable only with a fine. He could pay this at once and decamp for parts unknown. The warrant from Duchess County charging him with conspirace is sufficient to the county of the sum of \$100. The fell members the sum of \$100. The fell members the sum of \$100. The fell members the sum of \$100. charging him with conspiracy is not regarded as sufficient basis for extradi-

County, and his allies, the immigration

N. Y. APPLIES TO VERMONT. Albany, N. Y., despatch—Acting Governor Glynn to-day requested Governor Fletcher, of Vermont, to have Harry K. Thaw apprehended to await requisition in case the Canadian authorities deport Thaw to that State.

A REINCARNATION

Strange Case is Astonishing Italian Scientists.

Rome, Aug. 25 .- The journal Filosoffa della Scienza publishes a lengthy article by Professor Calderone dealing with an extraordinary case of "reincarnation" in the family of a Sicillian doctor named

carmeto Samona.

Carmeto Samona and his wife lost their five-year-old daughter, Alessandrina. A short time afterwards, at a spiritualistic seance, the dead child was alleged to have told her mother that she would be re-born on Christmas Day in the foilowing year. At a second seance she amounced, "There will be two of us-my-self and another."

On Christmas Day, 14 months after the date of last seanse, Signora Simona gave birth to twins, both girls, one of whom bore on her face three-marks identical with marks on the face of the dead child, and after a year, commenced to manifest exactly the same moral and physical tendencies.

The two children are now two years old. Professor Calderone's statements are confirmed and sighted by a number of persons who were present at the spiritualistic seances.

KILLED HIS COUSIN

Family Feud at Lachute, Que., Ends in Tragedy.

Ottawa, Ont., despatch- John McGibon, jun., a tarmer residing at Dalesville, a village about six miles north of Lachute, Que., was shot and killed by his cousin, Leonard James McGibbon, in a family altercation—yesterdry atter-noon. The tragedy is the culmination of a leud which has existed for some years between the families of Peter and John Medibon, over the disposal of some property. A jary, empanelled by Coro-ner Wales, or St. Andrews, last night brought in a verdict of menslaughter, and a warrant has been issued for the arrest of Leonard McGibbon. High Constable Quelette, of St. Scholastique, is expected to arrive to-day to make the

Twelve years ago the farm of Peter MeGibbon was put up for sher arm of reger and was bought in by his brother John, since which time there has been a feeling of bitter hatred between the two fami lies. According to the story of the traghis two sons were trespassing on John's farm, when a dispute arose and they were ordered off. They later returned with a gun. John McGibbon, jun., and his sister went out, armed with a gun, to meet them, and both sides got into a wordy fight, which led to Peter striking Miss McGibbon to the ground. Young John threatened to shoot, and followed it up by firing and inflicting a slight flesh wound on Peter, whereupon the latter's son, Leonard, fired at close range, the full contents of the gun taking effect in John's side, just above the

OCEAN RATE WAR

Big German Lines Start Passenger Fight.

Hamburg, Aug. 25.-The passengers var between the Hamburg-American and the North German Lloyd Steam would be started about the beginning of 1914, has already opened. The early eginning of hostilities is directly due to the announcement of the North German line on August 19 that it would begin the announcement of the North German Line on August 19 that it would begin regular passenger and freight service between Bremen and Boston, the Boston service ljaving heretofore been in the hands of the Hamburg-American. Officials of the latter company declared to-day that they considered the North German Lloyd's action as a trespass on the Hamburg-American's territory, and they will retailate by establishing a steerage service to Baltimore, which heretofore has been left to the North German Lloyd Company pointed out that the Boston traffic had attained such proportions that a service to that port has long been under consideration and had been definately decided upon last January The Hamburg-American Company hints at further war measures.

I.C.B.U. OFFICERS

Convention at Kingston Con-*cludes Its Sessions.

Kingston, Ont., despatch - The 39th convention of the Irish Catholic Benevo paties on the mean paper plied with the New York and Montreal papers, and apparently read every word bearing on his case. The "inside" motaring on his case, The "inside" motarity hour this morning. It was decided to hold the next meeting in 1915 in the Committee en Constitutional

officers were elected:
President, Daniel Duffy, Potts
Pa, Tre-elected): Vice-Presidents, Duffy, Pottsville, garded as sufficient basis for extradition. To patch up this loophole more time was needed.

Thaw broke away from his lawyers last night long enough to frame a telegram to a friend in Pittsburg, saying that he (Thaw) had telegraphed through a third party to ex-Governor Stone of Pennsylvania, asking him to appeal to Secretary of State Bryan in his behalf. Thaw added that he was the

appeal to Secretary of State Bryan in his behalf. Thaw added that he was the "victim of some underhand influence from some State, exercised to prevent his journeying to his own home."

The Goyernor of the Sherbrooke jail laughed to-day when asked if special guards had been detailed to watch Thaw. He denied that this was true, but it is understood that precautionary measures have been taken at the request of District Attorney Conger, of Duchess

IEWCOMBE PIANO
s the Best PIANO
MADE IN CANADA

I have taken the exclusive sales agency for the
Domestic Vaccuum Cleaner
acknowledged in the United States as well as Canada to be the
superior of all vaccuum cleaners.

KNABE PIANO
The World's Best Piano,
Patronized by Royalty
Patronized by Royalty
Blundall Pianos
Is a High-Grade Piano
Distinctive Tone Quality, Exquisite DeSelfan and Finish.

Iso a few carriages to sell at greatly
reduced prices rather than
carry them over.

Model B

To the Ladies of Athens and vicinity:

I have taken the exclusive sales agency for the
Domestic Vaccuum Cleaner
acknowledged in the United States as well as Canada to be the
superior of all vaccuum cleaners.

The Domestic has ball-bearings throughout and runs so
easy that a child can operate it.

It has three powerful bellows with more suction power than
any other hand-cleaner made.

Its many points of superiority can best be appreciated
when seen, and you are invited to inspect it at our store, or, if
interested, we will demonstrate in your home.

The Domestic is operated like the ordinary carpet sweeper
and is made in three sizes. It can be supplied with brush attachment for taking up hairs, threads, lint and heavy surface
dirt; also with a hose and nozzle attachment for cleaning upholstered furniture, mattresses, draperies, etc.

No home should be without a Domestic Vaccuum Cleaner.
