THE MORNING COURIER, FOR THE Participants of the second process of the property of the property of the property of the property of the second process of the property o round off the plan of a great whole; and when this is done, how seldon do we find the favour-able moment in which power of thought unites with quiet of mind to produce a full, unbroken finds, after years of thought and laboar. that he has miataken himself in his whole subject, and then his work is altogether useless; or, perhaps, though successful in some parts, where the ma terials are so extensive, he fails in others; and in this tase his work wants completeness as a twhole, and the good suffers owing to its con-junction with the bad. The laboar and serifice of half a lifetime may thus produce nothing but discomfort and mortification. If, on the other hand, the poet takes hold of the present as it of fors itself, the cannot fail to breathe through his handiwork some of the freehness of reality, and watch some fugitive trait of nature; or should he be so unfortunate as to please neither him self nor his friends, why then he may throw the blotted paper into the fire to-day, and write upon parchuenet to-morrow. Now young men and maidens, this moral pray carry-if pride and ambition you keep not in bounds ; MUSIC. When threads can make A heart string quake ; Philosophy seif nor nu irreads, why then he may tarow the blotted paper into the fire to-day, and write upon parchusent to-morrow. "There, for instance, is August Hagen, in Konigsberg, a young poet of first-rate talent— have you rend his *Alfried and Liseand* There are passages in that po-m that could not pos-sibly be better; the situations on the Baltic, and grary thing connected with the locality show Mr. Brode Can scarce deny O lull me, lull me, charming air, sibly be better; the sector with that locality, show every thing connected with that locality, show the hand of a master. But these are only beau-tiful passages; as a whole no one can relish it. Mr. Brode good Englis case. Mr. Dont Grief who need fear. That hath an ear ? And what exertion has it not cost him? What power has he not put forth, upon it! Yna, he has almost exhausted himsoff upon that one work. He has now written a tragedy? Hore gothe smiled, and waited a moment for my re-ply. I observed that, according to my recollec-tion, he had read Hagen a similar is ture in the diaming association. Down let him lie, And slumbering Jie And change his soul for harmony. **Fast Affection** Gothe smiled, and waited a moment for my re-ply. I observed that, according to my recoilec-tion, he had read Hagen a similar lecture in the *Kanet und Alter hum*, and advised him to con-fine bingaeff to small pieces. "That I did, said Gothe : 'but do you, therefore, imagine that these young people will do as we ancients coun-sel them? Every one thinks be ought to know these matters best himself, and on the rock of his trousers. For my pleasing eye or face, Nor for any outward part. No, nor for my constant heart So thou and I shall sever. this concert many a fine genus has gone to wreck. But this is not the time for mere wrock. But this is not the time for mere stumbling and groping, otherwise we worthy fathers had pioneered in vain. Shall we be a the tobacco And love me still, but know not why, fathers had pioneered in vain. Shall we be al-ways seeking? Is the wisdom of experience to go for nothing? Must each successive adven. It and are the lighthouser and the beacons to show their lights in vain? The time is come when every strip should not only lead to the goal, but be a roat in itself. So hast thou the same reason still To dust upon me ever. Review. The Foreign Quarterly Review, No. 35. The present number of the Foreign Quarterly is quite in accordance with our general charac-ter of the publication. It is tringshome to us the best things from abroad, domesticating us in the abodes of foreign literature, and naturalizing that literature amongst ourselves. It exhibits the marvels of antiquity in the light of novelty. It discusses philosophically. We have rarely seen so varied and interesting a number of any periodical. The first article, on "Eckermann's Conver-sations with Gothe," is a welc-me addition to the information already given us by Falk and others. The reviewer thus describes the great autocration of modern literature — "The experience of nearly a century speaks from the voice of one man, and this a man who had first himself created, and then presided over, the groating literature for a nation. "One morning I found Gothe writing in Frau
