NO. 13

Burglars Still At Work

In Annapolis and Digby County.—Bear River Station Robbed on Saturday, While Agent Was at Dinner, and \$140 Cash Taken.—One of Gang Arrested.

A Digby despatch to the Halifax Chronicle, 9th inst. says:—Yesterday at noon while Lovitt Winchester, the Station Agent at the Bear River D. A. R. Station, had gone to dinner, the station was entered and the contents of the till amounting in cash and checks to about \$140.00 was taken. Chief Police Bowles of Digby was summoned as soon as the discovery was made and at once started for the scene of the robbery.

It is believed that a regular organized band of thieves are at work in this part of the country. The prisoner, arrested on Friday for breaking and entering several stores in Digby, and who gave his name as Arthur Walton, stated that he was only one of a gang who were engaged in robberies, and it is now believed that the statement was correct.

Chief Police Bowles was out all night with a party of searchers, but returned without finding any trace of the burglars. Walton claimed that he belonged in the United States, but it is not known where the other supposed burglars have come from.

There is much excitement prevailing in this vicinity, and everybody is anxious to do all they can to aid in catching the guilty parties, who are at present a menace to this part of the Province.

It is reported this afternoon that burglars had been seen in the Lansdowne woods back of Bear River Station. Chief Police was notified immediately by Agent Winchester, and at once started with a gang of men to try and capture them.

Digby, July 10.—The preliminary examination of Arthur Walton who was arrested here on Friday, took place here today. He was sent up for trial on four charges, for breaking and entering three stores in Digby, and pointing a revolver at H. W. Bowles, Chief of Police. He has decided to be tried under the Speedy Trials Act, and his trial will take place Thursday before Judge Pelton. The prisoner pleaded not guilty to the four charges, and says that he will act as his own counsel during the trial.

The Weather

Bridgetown, with the rest of the county and province, has experienced the heat wave which has made the summer of 1911 a record breaker. From the Eastern and Middle States come reports of the longest and most excessive heat wave ever recorded by the weather bureau, which has been in existence forty years. Heat prostrations and deaths are daily recorded in the papers, and day after day in Boston, New York and Chicago the thermometer has registered around the hundred mark and beyond. Factories and business houses have been compelled to close until the heat wave shall subside. In our province the cool sea breezes by which we are surrounded temper the nights and no real suffering has occurred.

Record figures, however, have been registered by the mercury, for this section of the province. Yesterday afternoon at half-past three the mercury registered ninety-six degrees, at half-past four it had mounted to ninety-seven. It was after seven o'clock before the welcome, refreshing breeze stole up the river. On Monday afternoon the official thermometer stood for several hours at ninety-five.

The weather, too, is extremely dry, merely a very light shower or two breaking the drought of the past month. The situation is really becoming serious. The hay crop is scorched, gardens are drying up and making no normal growth, and the water supply in various localities has suffered.

Instructions have been given to outside tap owners to keep their taps closed during the rain.

time, we trust, will come the welcome refreshing rain.

The above was put in type last evening. This morning about six o'clock an electrical storm broke over this section of the Valley, lasting for about three hours. A heavy down-pour of rain accompanied the thunder lightning and wind storm. At ten o'clock this morning the mercury stands at eighty-two.

AUTO CRASHES INTO TROLLEY CAR; THREE ARE KILLED

Bushes Keep Car Out of Sight Until Too Late—Mother and Daughter, Two of Those Who Lost Lives.

Warwick, R. I., July 5.—His view cut off by dense bushes growing on both sides of the crossing, Gustav Menzel, of Riverside, drove his automobile directly in front of an open trolley car moving at the rate of forty miles an hour, yesterday afternoon and three of the occupants of the automobile are dead and Menzel and the fifth occupant are badly injured.

The dead were:—Mrs. Eva Hartley, fifty years, of Providence; Miss Millie J. Hartley, eighteen, Mrs. Hartley's daughter; Miss Ella M. L. Bidwell, twenty-five, of Providence.

Chicago, July 5.—Mrs. Henry C. Gorde, thirty years old, a resident of Austin, died today of injuries received when an automobile, in which she and her husband and two children were riding, was struck by a railroad train. The two children were instantly killed.

C. P. R. FREIGHT MEN ON D. A. R.

Agents of the Big Railway Going Over the Dominion Atlantic—1,000,000,000 Barrel Crop of Apples.

William Kirkpatrick, of Toronto, general freight agent of the C. P. R., and W. B. Bamford, of St. John, divisional freight agent, are at the Halifax hotel, says the Herald. They have just returned from a trip over the lines of the D. A. R. The big road has not yet taken the Dominion Atlantic over, but its freight agents are looking over conditions.

One thing is sure—there will be a big crop of apples to haul this autumn, probably one million barrels. The orchards never looked so promising before for a huge crop, and the acreage is larger than ever.

Fatal Runaway Accident

David Durling Receives Fatal Injuries While Trying to Stop Mayor Harlow's Runaway Horse

An extremely sad fatality occurred through the running away of Mayor Harlow's horse Monday morning. Mr. David Durling, a farmer of West Paradise, attempting to stop the runaway received fatal injuries and died yesterday afternoon.

Mayor Harlow was driving down a steep hill near Mr. Durling's home, when the bits parted in the horse's mouth and the animal started into a run throwing out Mr. Harlow and overturning the wagon. Mr. Durling was mowing in a field close beside the road and sprang forward to seize the horse, but the frightened animal dashed right over him, wagon and all.

Mr. Harlow having landed on the side of the road practically unhurt, with the exception of minor bruises, hastened to Mr. Durling, finding him fainting and carried him to his home. By the time he had laid him on the couch and covered him with a blanket, he was dead.

Harlow would not have been summoned until medical aid had been done for the injured man.

Three local doctors were called in consultation and finding his injuries more serious than at first appeared, Dr. McKay, of Halifax, was summoned. An operation was decided upon as the only hope of saving life. The operation was performed and a crushed kidney removed but the patient never revived from the ether and thus passed away.

The shock of the calamity is keenly felt, and, as Mr. Durling was highly esteemed in his community, his death will be the more deeply lamented.

The funeral takes place from his late residence this afternoon.

Rev. Clayton M. Legge Ordained

Rev. Clayton M. Legge, rector of All Saints' Episcopal church, Whitman, was one of six curates of the Episcopal church advanced to the priesthood at the ordination service held at the Church of the Epiphany, Winchester, this morning. A large number of Brockton and Whitman friends witnessed the ceremony.

Rev. Mr. Legge, who was formerly an actor, was once a Brockton boy, living here until he was seventeen years old. His relatives are still living in this city. Three years ago he published a romantic novel, "Highland Mary," which ran through two editions.

A strange coincidence of Mr. Legge's recent career was that he was confirmed by Rev. Walter Bentley Begg, a former actor, son of Rev. Dr. Begg, of Edinburgh, Scotland, who was disowned by his father, when he decided on the footlights in preference to the pulpit, for which his father had destined him.

The service this morning was conducted by Rev. William Lawrence, bishop of the Boston diocese, and Rev. William Roland Smith of Washington, D. C., preached the sermon.

Rev. Mr. Legge will preach his final sermon at Whitman Sunday, his resignation having been tendered a week ago. He has been assigned to the New York diocese and will take up his work there at once.—Brockton paper.

NOTE.—Mr. Legge is a son of Mrs. Wm. Legge of this town, and many friends here will wish him success in his new vocation.

Bridgetown Boy Scouts

As indicated in our last issue last Saturday was devoted to "Dispatch" carrying practice. Two Scouts went to Paradise on the afternoon train from whence they were to return bearing an important message to be delivered to Postmaster Brown, Bridgetown, by five o'clock. The rest of the Scouts, after consultation with the Patrol Leaders, were posted here and there to command every possible means of approach, and with others to intercept and capture the message. Undoubtedly they kept a faithful watch, but, somehow, the dispatch runners got through with ten minutes to spare. As a matter of fact they had crossed to Clarence and then pushed their way to the home base under cover of the woods, here and there, almost all the way. They reported spotting the enemy's outposts and at one time thinking they must be seen, but they worked around, quite unwittingly them and so landed the dispatch. So much for the winners.

In the meantime the enemy had been displaying an infinite amount of patience and had a certain move made about five minutes sooner there would have been some lively fun on the border line and the runners probably made prisoners. Then the query would have been—Where is the letter? In some "prim" place, I guarantee, seeing the way he is "deck" ed out.

Considering the afternoon's work as a whole those in charge felt they had had reason to feel that progress is being made.

The boys met for the weekly indoor meeting at Headquarters on Monday evening. A lecture on elementary "First aid to the injured" was to have been given but, unfortunately, Dr. Armstrong was called to the country just before the hour of meeting. Semaphore signalling was practiced instead and the coming Camp discussed.

As noted in our last issue the Camp is to be held at Milberry's Lake, Young's Mountain from Aug. 1st to 9th. After the boys were dismissed the Citizen's Scout Council met the President (Mayor Harlow) in the chair. The boys, through the Scoutmaster, are asking for a little aid in the matter of preliminary equipment for the camp. The Council heartily endorsed the application and are taking the matter up. They will also endeavor to assist the boys in getting to and from the Camp.

The Scoutmaster hands in the following as Official Orders for the week Saturday, 11th inst.:

Boys to assemble at Headquarters in time to start at 9 a.m. sharp. Each boy to bring staff, and sufficient food for a boy's mid-day meal. Other equipment as directed last Monday evening.

Boys unable to start at nine, will meet at the County Hospital at 1.15 p.m. sharp, from whence Ass't. Scoutmaster Hiltz will guide them to the Scouts' rendezvous for the day. The Scoutmaster has a full programme in preparation.

Should the day be wet all to assemble at Headquarters at 1.30 for stove and semaphore drill, and further tenderfoot examination.

Monday 17th inst.—Meet at Headquarters punctually at 7.30 p.m. for lecture on elementary "First aid to the injured." What do the Scouts think of this?

The Scoutmaster of the Dartmouth Troop (Mr. C. E. Thorne) who, in some way, sees the Monitor, being impressed with the activities and enthusiasm of the Bridgetown boys as reported in our columns from time to time, writes to Mr. Underwood this week kindly offering a card system for learning the Morse Code of signalling with flag and camp. Needless to say the offer has been gratefully accepted. In concluding his letter Mr. Thorne writes:—"I wish you and your troop every success and have no doubt that you will soon have a troop that in efficiency will make the rest of us look sharp when competitors come round."

This is certainly something to aim for. It simply means today and every day bring true to the Scouts' motto, which is as everybody now knows:—"Be prepared."

E. UNDERWOOD,
Scout Master.

Sad Drowning Accident

Two Boys, Sons of Clifford and James Gilbert of Parrsboro Lost Their Lives While Bathing in Swimming Pool.—One Got Beyond His Depth, The Other Went to His Rescue.

Parrsboro, July 9.—A double drowning accident occurred near Partridge Island yesterday afternoon. Two boys, one the only son of Clifford Gilbert, and the other the eldest son of his brother, James C. Gilbert, were bathing in the swimming hole which has been the popular resort for Parrsboro boys for generations. One of the boys got beyond his depth and the other went to his assistance and was drawn in the deep water. A younger son of James Gilbert, who

was preparing to bathe, ran home for help, but before assistance arrived both boys were beyond aid. Doctor Dyas, who was on Partridge Island when the accident occurred, worked over the boys for a long time, but was unable to resuscitate them. Dr. Rand drove to the island to hold an inquest, but was unable to secure a coroner's jury. James Gilbert is at present in the United States. The boys were each about twelve years old.

Presentation to Rev. and Mrs. W. H. Langille

Windsor, July 4.—Rev. W. H. and Mrs. Langille leave on Wednesday morning for Gloucester Bay, where Mr. Langille will be the pastor of the Methodist church at that place. Recently members of the Curling and Quoit Clubs, of which Mr. Langille was president entertained him at the Y. rooms at a farewell banquet. Mr. J. A. Smith acted as toastmaster and various toasts were proposed and responded to.

The guests of the evening was asked to cut two large cakes in front of him. After these had been distributed, two handsome curling stones on which the cakes had rested, were presented on behalf of both clubs. Mr. Langille, in accepting the gift, spoke of the many happy hours he had spent with his brothers of the "stone" and "disc."

Miss Smith was thanked for the two handsome cakes and for the excellent menu furnished. Auld Lang Syne was sung in orthodox fashion, followed by the National anthem, after which the company dispersed the banqueters wishing Mr. Langille every success in his new field.

The Windsor Tribune says:—The members of the W.M.S. and Sewing Circle of the Methodist church met at the home of Mrs. R. C. Wright recently and spent a very pleasant afternoon. Mrs. Wright served delicious and dainty refreshments and then Mrs. Downing presented Mrs. Langille with a cut glass bowl on a mirror stand, and a gold piece. On Monday of last week the young ladies of the "Philathea" class called at Mrs. Langille's home and gave her a genuine surprise. They took them with many useful gifts, principally in linen.

Mrs. Langille has been very kind in extending hospitality to every member of the Sunday School class. The parsonage door was always open and many there are who will miss the kindly welcome of this host and hostess.

Heavy Electrical Storm at Yarmouth

House Destroyed, Another Damaged and Several Head of Cattle Killed.

Yarmouth, July 4.—An electrical storm of unusual severity prevailed throughout the town and county last night and this morning. The storm commenced at nearly nine o'clock, and lasting until about nine this morning. While no serious damage resulted in the town, the County districts were not fortunate enough to escape.

At Lower Argyle the house of Wm. McLaren was completely demolished, and the house of Charles Amero at Lower East Pubnico also received considerable damage. At East Kempsville at about four o'clock the lightning struck in the pasture of Samuel W. Hamilton, killing five of his cows, and three other cattle. In many parts of the County telephone poles and wires were destroyed, interrupting the service for most of the day. The rain was very heavy while it lasted, but is not sufficient to fill the needs of the farmers.

C. N. R. FINANCED ATLANTIC TO PACIFIC.

Montreal, July 6.—The presence of Sir William MacKenzie and Sir Donald Mann, together with Colonel Davidson in this city, at the same time, has given rise to much speculation, and some of the forecasts were verified today when it was officially announced that the Canadian Northern has secured financial backing for the construction of the entire road from the Pacific to the Atlantic. It was also announced that within thirty months the railroad would enter into Montreal by tunnel and erect a magnificent central station.

A Good Resolution

The following resolution was passed at the last meeting of the Lunenburg Town Council. It would be a good plan to adopt one something similar in other towns:

Upon the complaint of any ratepayer of the Town, lodged at the Town Office in writing, that any building in the town, for want of repair, or from faulty construction of the building or of any portion thereof, or by reason of the unsafe arrangement of stoves and pipes therein, is likely to take fire or to cause any adjoining or neighboring building to take fire, the firewards shall forth with be notified of such complaint, and they or any two or more of them shall without delay, proceed to and inspect the building complained of, and after inspection, shall make such order as they or any two or more of them deem proper for the prevention of fire in or near such building, requiring the owner of such building within a period to be specified in the order to make such alterations and repairs of and about the same, as they shall deem necessary for the safety of the public. Should the owner not make such alterations and repairs within such specified period, the fire warden shall make such alterations and repairs or may destroy the building if of small value, as may to them seem best, and the cost of such alterations and repairs or of such destruction shall be payable by and may be recovered from the owner of such building at the suit of the Town in any Court of competent Jurisdiction.

YOU TAKE NO RISK

Our Reputation and Money is Back of This Offer.

We pay for all the medicine used during the trial, if our remedy fails to completely relieve you of constipation. We take all the risk. You are not obligated to us in any way whatever, if you accept our offer. Could anything be more fair to you? Is there any reason why you should hesitate to put our claims to a practical test?

The most scientific, common-sense treatment is Rexall Orderlies, which are eaten like candy. They are very pronounced, gentle and pleasant in action, and particularly agreeable in every case. The best cause diarrhoea, no matter whatever. Rexall Orderlies are particularly good for children, aged and delicate persons.

We urge you to try Rexall Orderlies at our risk. Two sizes, 10c and 25c. Remember, you can get Rexall Remedies in this community only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren.

PLAYGROUNDS AND RECREATION.

(Editorial, The Independent.)
 The fifth annual meeting of the Playground Association of America was held in Washington, D.C. Though a comparatively young organization, the association has probably accomplished more in the last three or four years in its chosen field than many older civic organizations in a generation.

The name of the association is now changed to "The Playground and Recreation Association of America." This broadens its scope a great deal.

We talk about the race problem, socialism, international peace, reciprocity, woman suffrage and the new nationalism, but how important are these as long as our American cities permit the majority of their children to live in the streets and gutters for lack of parks, playgrounds, baseball fields, gymnasiums, swimming pools, and popular seaside, riverside and lakeside resorts. The time will certainly come when our homes will be built and furnished for children as well as for adults, and our cities will provide all wholesome outlets for child activities. In the meantime the Playground and Recreation Association of America deserves the support of all men and women.

IN CANADA.

Montreal, July 4—The heat wave continued here with scarcely any abatement. The thermometer in the McGill Observatory registered a maximum of 93.5 degrees just one point less than today's maximum, shortly after two o'clock yesterday afternoon. Down town higher temperatures were recorded. Two deaths which can be directly attributed to the heat have resulted, however, and there are comparatively few prostrations. Police regulations have been relaxed to meet the occasion and people are being allowed to sleep in the open air in the parks at night. Many are taking advantage of the opportunity and many others are sleeping out on balconies, roof-tops and door steps.

Making a Man of The Boy

"There's no use in talkin', that's a great boy," remarked the Colonel as he pulled up his chair to the fire.

"We've known that long enough," admitted his son-in-law, "but is there any present reason for this display of enthusiasm?"

"There just is," answered the old gentleman, biting off the end of his cigar. "As I was comin' over I saw little Bill run full tilt into a big fat man who was just turnin' the corner. A good many boys would have cut and run with a laugh, but little Bill ain't that kind of a youngster. Before you could say Jack Robinson, he whipped off his hat and said: 'Excuse me, sir, I was goin' so fast I could not stop.'"

"Was the man angry?" asked Mrs. Rollins with some concern.

"Mad!" scouted the Colonel, "of course he wasn't. 'That's all right, my boy,' he says, 'no harm done.' Then he paddled along with a smile on his face. But he would a been mad he certainly would, if little Bill had hollered 'get out of the way, you old stit,' as an up-to-date youngster with patent leather shoes on, did to me the other day. Makes all the difference in the world. Reminds me of Jimmy Sloan, a chap I used to go to school with away back before the war. He was just an ordinary, everyday boy, wasn't particularly bright, always stood near the foot of his class, but he could lick any boy of his size in the school, and no matter what happened he was always polite. He's been the head of a great railroad system for a long time, and I'm mighty sure that his politeness had more to do with putting him there than his fists, though, to be sure, the fists may have helped some.

"For, just as sure as the Lord made little apples, it pays to be polite. You can cash in courtesy at par any day in the week and anywhere under the sun. It's an asset that's always available, ain't subject to taxation nor affected by panics, and any man, whether he's a fool or a genius, rich or poor, can have it. Yet it's astonishing how few people know anything about it. Seems like it's gettin' to be one o' the lost arts, but the rarer it gets, like everything else, the more valuable it becomes, and there never was a time when politeness was more profitable than now. There never was a time when the courteous boy had so long a lead over his fellows. This is a hustlin' age, as everybody says, and it takes push and speed and grit and all the active qualities to get to the front, but the boy who oils his way with courtesy goes ahead faster and with less wear and tear on himself than the one who rushes on without any regard for the feelings of others.

It's the principle of politeness, the idea that every man's got some rights and feelings that everybody else must respect, that has made this country what it is today, and that is puttin' a new coat o' paint on some other countries, mentionin' no names. It looks like a long way from takin' off your hat to a lady to settin' up a democratic government, but it's all on the same grounds.

Courtesy like any other virtue, can be carried too far, and while I'd rather be the man who won't move for fear of steppin' on somebody's toes than the man who gets his feet in the trough, I don't see any use in bein' either. For the man who pays too much attention to the forms of politeness not only loses its substance, but he's mighty apt to lose his place in the procession. While he's genuflectin' the other fellow's gone by and passed out of sight. As between man and man I believe in showin' respect for the other fellow's rights and feelin's, but, by doggies, he's got to show an equal respect for mine. As between man and woman, that's another proposition, and as between boys and grown folks, it's still another. A man should be courteous to a woman under all cir-

cumstances, and a boy should pay a certain deference to age because it is age."

"And that brings me back to where I started. I advertised for an office boy not long ago and I got eleven applicants, and only three of them took off their hats when they entered my room. I picked one of the three. There's no man on earth who isn't influenced by courtesy. May be he doesn't realize it. And all through business life it counts, counts in dollars and cents. The boy who is polite in a manly way has at all times the best chance for advancement, other things being equal, and why so few of 'em take advantage of this asset that don't cost them a penny as a puzzle to me. I'm mighty thankful little Bill's got started right."

—C. S. Yost.

THE EMINENCE OF SMALLNESS.
 A leading British surgeon, Prof. Arthur Keith, of the Royal College of Surgeons, recently made some extraordinary statements regarding the relation between genius and size which have considerably stirred up the big men of England and rendered the little fellows jubilant.
 "The fact is," said the professor "the small man is invariably the intellectual superior of the tall man," and he went on to cite cases in support of his thesis—Caesar, Sir Isaac Newton, Napoleon, Lord Roberts, Lloyd George, etc. He also called attention to the results of the recent Russo-Japanese war, in which the little fellows came out on top.

The champions of bulkiness immediately accepted the gage of battle, and raked up all the big great men they could find to set off against the professor's array of undersized greatness. They did not go so far as to claim any special limitation of eminence to physical bigness, but insisted that just as much of it could be found among men on the giant side of the line as among the dwarfs.

The Medical Record comments on the controversy as follows: "That the little man often regards himself as a genius is a fact of common observation, and that he really is such more often than his two-yard brother is probably true." Individuals belonging to neither of these classes, and hence able to take an impersonal view of the question, are more likely to conclude that physical bulk has very little to do with greatness proper or correct in special lines of human endeavor such as pugilism, wrestling, iron founding, stevedoring, and dime museum work.—New York Globe.

MINARD'S LINIMENT CO., LTD.
 Gents,—I cured a valuable hunting dog of mange with MINARD'S LINIMENT after several veterinarians had treated him without doing him any permanent good.

Yours,
 WILFRID GAGNE,
 Prop. Grand Central Hotel, Drummondville, Aug. 3, '04.

THE APHIS
 Orchardists are warned to examine their fruit trees carefully for the above insect, commonly known as the plant louse, as it is doing a lot of damage in many of the orchards in certain districts.

As it feeds upon the leaves, fruit and tender shoots, of the new growth, by sucking the sap, it cannot be killed by ordinary poisons but must be destroyed by the direct application of some liquid to the body of the insect—kerosene oil is one of the best but to prevent injury to the tree and to lessen the cost, the oil is mixed with soap forming an emulsion and applied as an ordinary spray. The small, nubby apples common in many orchards a few seasons ago was the work of this pest. One prominent fruit grower informs us that his loss in a recent season was over one hundred barrels of apples from this source.—C. Perry Foote, in Western Chronicle.

AT LAST, A CURE FOR RHEUMATISM

"Fruit-a-lives Cured Me" Says Mrs. Baxter.

"I was a helpless cripple from Rheumatism for nearly a year. All down the right side, the pain was dreadful and I could not move for the agony. I was treated by two physicians without help. I saw 'Fruit-a-lives' advertised in 'The Telegram' and decided to try them. After I had taken one box, I was much better. When I had taken three boxes, I could use my arm and the pain was almost gone. After taking five boxes, I was entirely well again. The cure of my case by 'Fruit-a-lives' was indeed splendid because all the doctors failed to even relieve me. 'Fruit-a-lives' cured me."
 Mrs. LIZZIE BAXTER.

A HOME PLACE, TORONTO, Dec. 15, '09.

In hundreds of other cases, "Fruit-a-lives" has given exactly the same satisfactory results because "Fruit-a-lives" is the greatest blood purifying medicine in the world. "Fruit-a-lives" the famous fruit medicine regulates kidneys, liver, bowels and skin, and prevents the accumulation of uric acid, which is the prime cause of Rheumatism.

"Fruit-a-lives" will positively cure every case of Rheumatism, when taken according to directions. 50c. a box, 6 for \$2.50, or trial size, 25c. At all dealers or from Fruit-a-lives Limited, Ottawa.

GETTING AIGRETTES.

New York, June 30—Denial has been published of the statement that aigrettes from Venezuela are gathered from the ground at the breeding colonies (garzeros) of white herons.

In a sworn statement before a notary public, A. H. Meyer opposes the facts of the feather-collecting industry as the result of his own practical experience from 1896 to 1905, both years included.

"It is the custom in Venezuela to shoot the birds while the young are in the nest," he declared.

"A few feathers of the large white heron (American egret) known as the garza blanca, can be picked up of a morning about their breeding places, but these are of small value. They are worth locally not over three dollars an ounce, while the feathers taken from the bird are worth fifteen dollars an ounce.

"The natives of the country, who do virtually all the hunting for feathers, are not provident in their nature and their practices are of the most cruel and brutal nature.

"I have seen them frequently pull the plumes from wounded birds, leaving the crippled birds to perish, unable to respond to the cries of their young in the nests above which were calling for food.

"I have known these people to tie and prop up wounded egrets on the marsh where they would attract the attention of other birds flying by. These decoys they keep in this position until they perish.

"I could write you many pages of the horrors practised in gathering aigrette feathers in Venezuela by the natives for the millinery trade of Paris and New York."

KILLED BY AUTO.

Quebec, July 4—While an auto was coming into town at a rapid speed during the storm last night it ran over a man, at Charlesburg, and broke his neck and one of his legs in two places. There were five occupants in the machine at the time.

The first pound you use will win your lasting favor

PURITY FLOUR

Joker's Corner

SURPRISE FOR THE FATHER

Of a Protestant Episcopal bishop who recently died this pretty little story is told. The incident occurred when he was rector of a famous old church in an eastern city.

There came to him one evening the only daughter of the proprietor of one of the big dry goods houses of the city, to be married to a clerk in her father's establishment. Rector Davies made inquiries, ascertained that the wedding did not have the approval of the parents of the young woman, and declined to unite them in wedlock.

"It's just this way," said the young man. "Ethel's father had noticed that I have been greatly preoccupied lately, and this morning he asked me what was the matter with me, and I told him that I was desperately in love and could not be married."

"But you have a good salary," he said, "and you ought to be married if you are so much in love."

"Impossible!" I told him. "The young lady is the daughter of a millionaire."

"What of it?" said Ethel's father. "Probably he was not always a millionaire. I was born of poor parents."

"That may be true, sir," I replied, "but I am sure I cannot marry the young lady, because I am too poor."

"Nonsense!" he said. "You are an honest young man, and a fit match for any young lady. Why don't you elope with her?"

"Would you do that?" I inquired.

"I certainly would do it, if I were you," he said.

"Inasmuch as the young lady was the proprietor's daughter, I married her," said Rector Davies.

EFFECTIVE REMEDY.

A prominent physician was recently called to his telephone by a colored woman formerly in the service of his wife. In great agitation the woman told the physician that her youngest child was in a bad way.

"What seems to be the trouble?" asked the doctor.

"Doc, she swallowed a bottle of ink."

"I'll be over there in a short time to see her," said the doctor. "Have you done anything for her?"

"I gave her three pieces of blottin' paper, Doc," said the colored woman doubtfully.

POETRY IN COURT

John Burns, city prosecutor, was trying to show Judge Finehout why some young men ought to be fined for tearing pickets off the fence of Mrs. Joe Goeck. Mr. Burns said:

"I know Mike Chicklet tore off the picket, and the lady took offense."

"No lady is charged with taking a fence," replied Judge Finehout, "and, besides, this is no place for poetry."

COMPENSATION.

"What's this 'ere law of compensation, Bill?" said the first man.

"Well," said Bill, "it's like this. If yer blind, ye hear the better."

"O, I see," said the other. "For instance, if a feller's born with the leg shorter'n the other, then the other leg is longer."

NO TROUBLE AT ALL.

"Have any serious trouble with your new automobile?"

"Not a bit. So far I haven't hit a single man without being able to get away before he got my number."

AFRAID OF HEAT.

A little boy, in turning over the leaves of a scrap book came across the well-known picture of some chickens just out of their shells. After examining the picture carefully, with a grave, sagacious look at his baby sister, he slowly remarked:

"They came out 'cos they were afraid of being boiled."

BUNCOED A GOOD MAN.

He was a great bore, and was talking to a crowd about the election. He said:

"Bunco is a good man; he is capable, honest, fearless, and conscientious. He will make the very kind of M. P. we need. He once saved my life from drowning."

"Do you really want to see Bunco elected?" asked a solemn-faced old man.

"I do indeed. I'd do anything to see him elected," said the bore.

"Then never let anybody know he saved your life," said the solemn-faced man.

LOSS OF MAINE WAS CAUSED BY EXPLOSION FROM WITHIN; SPAIN HAD NO HAND IN CATASTROPHE.

General Bixby, Chief of Engineers of United States Army Makes Known His Findings as a Result of Recent Investigation.

Washington, D.C., July 6.—The loss of the battleship *Maine* in Havana harbor was caused by the explosion of one of her three magazines. No such effect as that produced upon the vessel could have been caused by an explosion from without.

Such is the opinion of General William H. Bixby, Chief of Engineers U. S. A., who has returned from a personal inspection of the work of raising the *Maine*.

General Bixby said that a portion of the deck over the magazines was blown upward and laid backward, and that there were numerous conditions of the bulk as it lies in Havana Harbor, which proved this. No explosion from the outside, said the General, could have caused the same result.

"What the primary cause of the explosion was," said the General, "will never be learned."

Such is the opinion of General William H. Bixby, Chief of Engineers U. S. A., who has returned from a personal inspection of the work of raising the *Maine*.

General Bixby said that a portion of the deck over the magazines was blown upward and laid backward, and that there were numerous conditions of the bulk as it lies in Havana Harbor, which proved this. No explosion from the outside, said the General, could have caused the same result.

"What the primary cause of the explosion was," said the General, "will never be learned."

MARITIME MEDICAL ASSOCIATION GOES OUT OF EXISTENCE.

Practically Only Nova Scotia Men Attend—It is Felt Canadian Organization Makes Maritime Body Unnecessary.

Halifax, N. S., July 6.—At a meeting of the Maritime Medical Association this morning, a resolution was unanimously adopted disbanded the association. This action grows out of the fact that practically no members save those from Nova Scotia attend the annual meetings. At the present meeting New Brunswick has but one representative and P. E. Island none. It is felt that the Canadian Medical Association leaves no reason for the existence of the maritime organization.

SCHEME WHICH FAILED.

To have themselves publicly called out of a crowded place of entertainment on the pretense that they are wanted by importunate patients is supposed to be one of the stock methods of advertising resorted to by doctors who wish to build up a practice.

A young physician tried the dodge with disappointing results not long back. He instructed his man servant to come to the stage door of the theatre and say that a patient of his was in urgent need of attention.

"Right you are, sir," said the servant, with a solemn wink. "You leave it to me. I'll manage it all right."

But apparently the man servant exceeded instructions on his zeal, for, when, at the end of the second act, the manager came before the curtain, what he said was—

"If Dr. B. is in the audience, I am requested to tell him that he is wanted at once, as the poor fellow he gave physic to this afternoon has been having fits ever since."

Sea Water and Health

(By Katharine Hale)

On a July morning in mid-Atlantic, when one is enveloped in primeval sounds and colors, and the whole world resolves itself into wind and sky and water, I listened to a story of the ocean related by one of the French medical scientists of to-day which was as strange as it is true and beautiful.

Dr. J. N. Arnully of Nice was one of a party of French doctors returning from an American conference—a middle-aged man of great intellectual power and literary charm. We sat in a faded, sunlight telling fairy stories—a Hungarian violinist, a famous little pianist from England, some Canadians, and the French doctors.

"Give them the Quinton theory, Arnully," said one of the men. "That is not a fairy tale."

And very simply he began:

"When I look out on this great world of ocean I am not so doubtful of the teaching of Hellenic mythology. It may be that our ancestors were Tritons and Mermaids, and like unto them we were born of the waves. Is not the lovely fable of Venus emerging from the surf in all the splendor of perfected humanity a symbol of the aim of evolution? Was not Proteus, the presiding deity of transformation, the son of Neptune, and did he not drive the innumerable herds of marine forms in the silent depths of the ocean? What if all this Greek symbolism were only a mystic veiling of a very ancient knowledge of the fundamental organic truth evolved by a certain modern theory of a friend of mine whom you may or may not know? More than once of late we have seen fables, myths and legends evolved into luminous facts through the silent victories of the laboratory."

"Fifteen years ago Rene Quinton, now assistant professor of physiology at the College de France, evolved what you call in America 'a new thing.' Like most of this sort of thing, it has a long past. Quinton had for years been haunted by the idea that all cellular life having originated or sprung from the bosom of the ocean, some trace of the primitive medium must be still extant in all the representations of planetary animal life even to this day. The idea was for long derided and treated as 'scientific romance'; now it is fully developed and acknowledged."

"For we know that the ocean is the vital medium of life and that all animal forms have retained a blood plasma the mineral composition of which is extremely akin to that of sea water itself, that the ancestral tendency remains and suffers little deviation. The law seems to be that animal life shall be carried on within a marine medium or not at all. Transgression may not be immediately fatal, but disease is invited and death the conclusion unless a return to the natural status be instituted in time."

"Now the idea of Quinton has been to induce into the depleted human system the redeeming energy of the life of the ocean by using certain saline injections, and after a fight of years he at last succeeded in 1907 in placing a public dispensary in Paris. It was organized to perform 200 injections every morning, but so great was its success that a second has been started with a much larger medical staff, superintendents, etc."

"The practical application of the plasma is extraordinary. For instance in France 70,000 babies die annually of gastro enteritis. The result of sea water upon the children—injections of ten grams being used—has been wonderful. The magic touch of elemental life to the life of the child seems to be like the touch of steel to flint; it quickens the old asexual life within the depleted organism, wakes the dormant energies, smothered under the countless strata of bygone evolutionary processes, and without effort or hesitation, the dying child comes to his own again. The saving force is also felt in cases of extreme nerve depression, paralysis, or fevers."

"Here," says Quinton, "is an elixir of life prepared by cosmic hands of vital fluids."

"But the making of this elixir is not easy, for it is difficult to arrive at the correct solutions of salt water. Sea water is complex; besides saline constituents, it contains 17 metals and metalloids, all of which are found in exactly the same proportions in the fluids of the human system. The whole secret of the wonderful effect of the sea water lies in the fact that all these precious metals reside in it in almost infinitesimal proportions, endowed with radioactive properties. The injections cure chiefly through their dynamic properties, and artificial sea water is unavailing. Marine plasma, or ocean water, must alone be used, sterilized, filtered, and rendered isotonic by mixing one-third sea water with two-thirds pure spring water, then filtered. This will not keep for more than two or three weeks."

"Each of us carries in his inner little world a small sea—one-third of his

body's weight—whose tiny ripples beat with measured rhythm against the shores of all organs. The girl 150 pounds harbors in her dainty anatomy 40 pounds of Atlantic surf, or marine sapphire. And the serum is a pabulum vitae—a cosmic food needed mostly at both ends of life, for its effects on infancy and old age are most apparent."

So here is the theory of an unassuming man of science—I give it to you for what it is worth—who has brought Father Ocean so close to our hearts that he is binding it anew to the human race by ties of ancestral love. For it all comes out of the great fact that we are much older than the days that we have seen and the breath we have drawn. It also comes of the yet unrecognized fact that our individual lives are the circumscribed synthesis of the elemental life throbbing throughout earth, air and water.

Rest to Overcome White Plague

Emminent Specialists Show Value of Exercise and the Danger of Fatigue in Fighting Tuberculosis.

That no consumptive can hope for a cure of his disease without following the most rigid routine with regard to rest is the conclusion of four interesting articles in the *Journal of the Outdoor Life* for June, by Professor Frederic S. Lee of Columbia University, New York, Drs. Lawson Brown and F. H. Heise of the Adirondack Cottage Sanatorium, Trudeau, N. Y., Dr. Joseph H. Pratt of Boston, and Will M. Ross of Stevens Point, Wis.

Professor Lee, writing on the subject "The Physiology of Exercise and Rest," shows by experiments on dissected frogs the way in which exercise tires the muscles and, in fact, all the organs of the body. He says:

"There is no known antidote to fatigue unless it be rest, with all that rest implies. Sleep allows the reparative process of rest to be performed most quickly and completely. A moderate degree of fatigue or even a considerable degree when not too often incurred, is not detrimental to a healthy body and is even to be advised. The healthy body is provided with great recuperative powers, and does not rapidly succumb to even excessive demands on its energy. But it should be allowed the proper condition for recuperation, and that condition is adequate rest. There is danger when the rest is not eliminated. The next day's work is begun. The effects may be then cumulative, the tissues may be in a continued state of depression and the end may be disastrous."

Dr. Brown and Heise in an article on "Properly Regulated Rest and Exercise in Pulmonary Tuberculosis," hold that the action of the poisonous germs of the disease on the body is very similar to that of over-exercise. The poisonous irritation caused by the germs gives the organs and tissues of the body a double load to carry. They emphasize the importance of rest in the treatment of tuberculosis, but also insist that properly regulated exercise is very necessary. They state their conclusions thus:

"Exercise when properly regulated and systematically graded is an important factor in the treatment of pulmonary tuberculosis. Through it the patient is in many cases returned to home and family with lessened chances of future relapse. At the same time part of his earning capacity is restored and he is, consequently, financially less dependent upon others, relieving him of much worry, expense and hardship."

Dr. Pratt, who was founder of the first Church Tuberculosis Class in the United States in the Emmanuel Church in Boston, claims that in the treatment of tuberculosis absolute rest, often in bed, must be extended over a period of months, before the consumptive should take any exercise. He says, "Prolonged rest in bed out of doors yields better results than any other method of treating pulmonary tuberculosis. Patients will have a better appetite and take more food without discomfort and gain weight and strength faster than patients with active disease who are allowed to exercise. Complications are much less frequent. When used in the incipient stage recovery is more rapid and surer."

Mr. Ross, who is himself a cured consumptive, and a writer of considerable prominence, holds that unless resting becomes a business to the tuberculosis patient he might as well give up his fight for health. "The period of infection with tuberculosis," he says, "is not a vacation. It is a twenty-four-hour-a-day job. True, it is a period of idleness. The day's work should consist of rest; rest should be the only business on hand. The light exercise, or hour of reading should be considered as the reward of a good day's work, like the evening of slippers ease to the tired business man at the end of the day. This recreation, however, should be considered only as an incidental result of the patient's work, not the main object."

Curing Hay

If you cut a flower off and put it in a glass of water it keeps its head up pretty well for a long time. If you do not put it into water at once it wilts. Why? In the first place the plant takes up water and keeps stiff and erect. In the second place it wilts because it can get no water and what is in the plant soon leaves through the stomach. That is, the water is pumped out by the dry air and with none to replace it, the plant wilts. Water is all that keeps tender plants or tender parts of trees from wilting or collapsing.

Force water through a loam and it has a tendency to straighten out. Cut off the water force and it collapses. This is exactly what happens when a plant fails to get enough water.

Severed grass soon becomes good hay if it is handled right. Try this for a lesson in hay making. Cut a handful of clover and put it in the hot sun to dry. Put another handful in the shade where it can't dry so fast. In three hours see which is the best hay. Take the handful of hay and twist it in your hands. In one case, the sun-dried hay will have brittle leaves and green juicy stems, while the shade cured hay will be more thoroughly cured and not so brittle. It is the best hay and will keep best. Why?

Well, the sun dries the leaves to a crisp the first thing so they can't pump the water out of the stems. The shade-cured hay had a chance to stay green long enough to quite thoroughly pump the water from the stems through the leaves before they wilted.

So if you want good hay don't lay it out thin in a hot sun. Better soon rake it into loose windrows so the bulk of it will be shaded and the wind can go through. Any hay will keep if it is cured so you can't wring any juice out of the stems when you twist a handful.

THE ELECTRIC BEAN CHEMICAL COMPANY, LTD.
Ottawa, Ont.

Electric Beans Are a Natural Remedy for Nerve, Stomach and Liver Disorders.

Once upon a time disease was thought to be due to direct influence of evil spirit and magic was invoked to cast it out.

Science has taught us wisdom. The evil spirits still exist we call them "Disease Germs," and they must also be cast out. Once lodged in the stomach or intestines biliousness with its aches and pains, or in fact seventy-five per cent of the ills that affect the human race, is the result.

Electric Beans are the approved remedy for driving out disease germs. Their action is quick and thorough, they clear the intestines, rouse the torpid liver to new life, stimulate mucous membranes to healthy action and cleanse and invigorate the whole digestive tract. Be prepared for emergencies by always keeping a box in the home.

See our booklet of remarkable, true testimonials. Test this remedy at your risk, if it is not satisfactory we will cheerfully refund the money paid for it.

Electric Beans can be had from the stores of S. M. Weare, W. A. Warren, Mrs. S. C. Turner, J. E. Lloyd & Son and C. L. Piggott or direct from us 50c. a box.

possible.

M. K. PIPER
PROPRIETOR AND PUBLISHER
WEDNESDAY, JULY 12, 1911.

These hot days and close evenings
have emphasized Bridgetown's lack of a
public park, where our citizens, espe-
cially these shut up through the day in
stores and factories, could gain a little
rest and relaxation.

The Monitor-Sentinel has made
reference to this subject before, suggest-
ing that a portion of the river bank
should be secured and laid out for a
park, and that at some future date an
effort be made to have the river dammed
at the bridge giving our people the
privilege of boating.

Another suggestion has been made
that a portion of the interval on the
east of Mr. S. S. Ruggles' property at
the head of the creek should be dammed
to form a pond and a park built around
it. The location of the latter place has
not so much to recommend it, in the
way of beauty or fresh air as it is too
hemmed in to be reached by the breezes
from the river and the proximity of the
larrigan factory would be another draw-
back.

The first scheme although more
ambitious and more expensive would in
the end be more satisfactory, and al-
though the present generation might
get little benefit from the outlay, future
generations would have reason to bless
the foresight of their ancestors.

This brings us back to the little park
planned by the men of Bridgetown a-
bout a quarter of a century ago on a lot
adjoining the school grounds. The lot
has since been made a part of the school
grounds, which are in themselves the
only substitute for a park which the
town possesses. Beautiful and appropri-
ate as they are for play and recreation,
they could be made much more useful
and beneficial to our citizens by the
placing of a few plain substantial seats
in the shade of the trees, to be made
use of on summer evenings and on the
one day of the week when the toilers
are released from factory, store and
office.

The erection of a Band stand for
Band concerts would be also much
appreciated and add to the attractiv-
ness.
While making the best of what we
have, however, let us not forget to plan
for the future and help in making our
town the loveliest in the valley.
Here is work for our Board of Trade,
well worthy of their best efforts.

No Circus This Year

There is little likelihood of any circus
visiting the Maritime Provinces this
summer. The Ringlings were looking
this way early in the year but later
abandoned the idea.
Howe's London Circus has been
through Ontario, but has now gone
West.
Nothing else is working in this di-
rection.—Truro Sun.

Wilbert Power was run over by a
special train at Hantsport on Sun-
day. Both legs were severed, and he
sustained other injuries. A special
from Kentville, with a number of
men, was sent to Hantsport to re-
pair a washout caused by the high
tide. Power fell between cars. He
was taken to the hospital at Windsor
His recovery is not expected.

"No matter what may be the object of

Paradise

David Durling was very seriously
injured on Monday while attempting
to stop a runaway horse belonging to
D. Harlow, of Bridgetown. Dr. St. St.
Clair, of Lawrencetown, Reid and
Miller, of Millston and McKay and
Halifax are in attendance.

Mr. T. B. Aiken, of Falmouth spent
Sunday last with Mr. and Mrs. E. K.
Leonard, returning home on Monday,
accompanied by his family.

Mr. Fred Freeman, who holds a re-
sponsible position in Philadelphia, is
spending his vacation with his par-
ents, Mr. and Mrs. David Freeman.
Mrs. Charles Covert, Jr., who has
been spending the winter in Lynn re-
turned home last week.

Mrs. Morton Chesley, of Arlington,
Mass. was the guest of Mrs. Charles
Covert, Sr. recently.

Mr. and Mrs. Howard Marshall, of
Massachusetts, spent last week with
their mother, Mrs. L. C. Marshall,
Miss Edna Marshall was also home
for a few days and spent Sunday at
PortLorne.

Miss Annie Longley, of Cambria,
spent Sunday at the home of her
brother, Mr. H. A. Longley.

The annual meeting of the W.M.A.S.
was held at the parsonage on Tues-
day afternoon. After the usual busi-
ness and programme, refreshments
were served and a social time enjoyed
by all.

Mr. Isa Wallace is a guest at the
parsonage.

Mr. and Mrs. W. E. Banks and
daughter, Frances are spending their
vacation at Esar River.

Mrs. J. C. Morse spent Sunday
with friends at Middleton.

The community was shocked on Sun-
day afternoon by the sudden death of
Mr. Christopher Jackson. Mr. Jack-
son had been in poor health for
some time, but it was not thought
that his end was so near. On Sun-
day afternoon, while talking to his
wife he passed away. His daughters
were expected home from the United
States, one, Miss Minnie, having
started for home on Sunday.

Stephen Ruggles accidentally dis-
charged a revolver, while cleaning it
and the bullet passed through his
hand.

Lawrencetown.

Mr. Robie Whitman, of Providence,
R. I. is visiting his brother and
wife, Mr. and Mrs. H. H. Whitman.

Mrs. Belle Healey, of Dakota, was
the guest of her niece, Mrs. Clyde
Bishop over Sunday.

Miss Mildred Longley, of Lynn, is
visiting her aunt, Mrs. Heber Eoland.
J. A. Balcom, of Margareville and
Miss Cora Balcom of St. John were
the guests of Mrs. Judson Balcom on
Sunday.

The Baptist Sewing Circle and tea
will be held in the vestry on Friday
at the usual hour.

Rev. R. D. Porter, of Halifax is
visiting friends here and assisted Pas-
tor Mellick in the services on Sunday.

Mr. and Mrs. H. W. Phinney and
children are having an outing at
Port Lorne.

Mrs. Jennie Ritchie, of Winnipeg,
accompanied by her daughter, Miss
Edna, arrived on Saturday to visit
her mother, Mrs. Murray Elliott and
sister, Mrs. Ernest Whitman, also
other relatives and friends.

L. H. Banks, son of Principal B. S.
and Mrs. Banks, returned home on
Saturday from Windsor and has ac-
cepted a position as foreman in the
Monitor Office at Bridgetown.

Miss Nellie Morse, of New York, is
spending a few weeks the guest of
her mother, Mrs. L. R. Morse, Sr.,
and sisters, Mrs. (Dr.) V. D. Shaf-
ner and Mrs. (Rev.) L. F. Wallace.

Mrs. R. E. Feltus is visiting friends
in Melvern Square.

Mrs. Annie Buckler is spending a
few weeks with relatives and friends
at Dalhousie.

Rev. Maynard Brown will occupy
the pulpit in the Baptist church on
Sunday, 10th at 11 a.m. A Mission-
ary meeting will be held in the
evening with Roll Call when each
member of the W.M.A.S. is requested
to respond with a verse of Scripture
or verse of a favorite hymn.

Rictax.

George Haverstock, who has been
teaching in British Columbia for the
past two years, arrived home on Sat-
urday and will visit his parents dur-
ing the holidays.

Miss Nowlin, of Wolfville, spent the
week end with her brother, Rev. I.
Nowlin.

Mr. F. M. Chipman attended a
meeting of Co-operative representa-
tives in Berwick last week as a dele-
gate from the Middleton Fruit Co.
Miss Crosby and her brother of Yar-
mouth spent the week end with Miss
Nina Neely having driven through in
their auto.

Mr. Walter Ruggles, who has been
attending Mount Allison College, vis-
ited his cousins, Charlie and Chever
Ruggles on his way to his home in
Bear River.

Tupperville.

Miss Mary Bent has returned from
Boston, accompanied by her sister,
Mrs. Wilson.

Mrs. Thomas Marshall and son, of
Middleton are spending a few days
with her father.

William Inglis is getting on finely
with his new barn.

Concrete Sidewalks Are an Asset

The Maritime Merchant says: "It is
a distinct sign of progress when a town
or city goes in for permanent pave-
ments, just as it is when a store goes in
for some equipment of a permanent and
lasting nature, so the citizens always
gratified to see this sort of enterprise
being engaged in. The people of
Moncton are just now to be congratu-
lated on having a great amount of
permanent sidewalk work done this
year, and we note by the Moncton
papers that work is proceeding on it
very satisfactorily. There is never any
doubt in the minds of the people about
the value and economy of permanent
pavements, once they get a taste of
them. This has been the experience in
Halifax, where the residential districts
are rapidly being improved by per-
manent sidewalks with the attractive
strip of sod between the walk and the curb.
The demand for these improvements is
just about as rapid as the city is able
to care for in the course of a season, and
the same will likely be the experience
of every place that goes in for them."

Hymeneal

JOHNSTON-CLARK

In New Westminster, B. C., on
June 30th, Miss Hattie Clark, of
Nova Scotia was united in marriage
with Henry C. Johnston, son of the
Rev. T. T. Johnston.

The marriage was performed quiet-
ly at the home of the Rev. C. W.
Brown.

The young couple are spending a
few days in Vancouver before vis-
iting Mr. Johnston's relatives in Sidi-
mon Arm, after which they will
spend a few weeks with the bride's
parents in Nova Scotia, Mr. and
Mrs. William W. Clark, of Granville,
before taking up their residence in
British Columbia.

SUDDEN DEATH AT CLEMENTS- PORT.

The sudden death of Miss Alice At-
wood occurred at Clements-port on
Friday morning, 30th ult. She had
been out picking berries the day be-
fore and had not complained of feel-
ing unwell, but in the morning when
the people in the house went to call
her, she was found dead in bed. The
deceased was a school teacher and
very highly respected. She formerly
belonged to Annapolis, where the in-
terment took place in Woodlawn
cemetery on Sunday, Rev. Shirley
Porter of the Methodist church of-
ficiating.—Diby Courier.

THE NEWS FROM HOME.

A Montreal subscriber remitting
yearly subscription writes:—"I may
say I look forward to Friday night
of each week when I learn through
your paper the news from home."

CORRESPONDENCE

ORCHARD PESTS

Editor of the Monitor-Sentinel:

Two orchard pests have made their
appearance in increased numbers this
year and since several of my neighbors
have brought specimens to me for
identification it may be well to describe
them for the benefit of your readers.

The green worm which now is about
an inch long and which confines his eat-
ing largely to the young apple making
deep holes in the side is the green fruit
worm or *Xylopa* Sp.

His depredations have been more
marked this year than ever before and he
is a difficult pest to control on account
of his doing very little surface work. In
my own observations the orchards that
were sprayed thoroughly with strongly
poisoned spray, especially the last spray-
ing after the apples had formed, showed
less infestation than when they were
not sprayed. In one orchard that has
not been sprayed at all the worm was
very plentiful. It would seem that the
best way of controlling this caterpillar
is to use a large amount of poison in the
last spray after the apples form.

Another insect that is growing more
plentiful every year in less well sprayed
orchards is the American tent cater-
pillar. These form their nests in June
and are easily distinguished by the web-
like tent. They can be controlled by
burning at night with torches or in the
ordinary course of spraying. These are
not the fall web worm which hatch out
later and form their webs.

R. J. MESSENGER.

REPLY TO PORT WADE CORRESPONDENT.

Dear Editor:

In your paper of July 5th I saw
your reporter at Port Wade writing
about people of that place being dis-
satisfied with the Coronation Celebra-
tion here at Annapolis. Now, Mr.
Editor, the person who wrote the
item sounds to me like one who has
not been in our civilized Valley very
long, when referring to having seen
the "greased pole" and no pig to
climb it, I would like to say to that
reporter, that he or she, whoever
they are, do not know that a
greased pole meant for pigs to
climb, but I would say as a
passing remark that the reporter had
better take a drive up to Annapolis
some of these warm days and the
Committee will teach that one what
is meant by a "greased pole."
Furthermore my friend complains of
having to pay the small sum of
twenty-five cents to get into the
government grounds. Now just let
me tell my friend that the grounds
are owned and controlled by a Com-
mission of three or four men in the
town of Annapolis, and that the
Committee in charge paid for the
use of the grounds for the day.
I also would like to ask if my
friend thinks we can bring two base-
ball teams here and pay their expenses
and not charge anything for ad-
mission to the grounds. Of course, if
my friend would like to pay the ex-
penses for us, why of course we will
allow all in free.
I wonder if my friend got up a tea-
meeting and if the people of Annapolis
went down to Port Wade if we would
get fed for nothing. I am afraid not.
We would be more likely to come
home without any "chink."
Perhaps my friend is sore because
he is not on the Commission that
have charge of the grounds, and in
closing my remarks, I would say it
would be better for my friend to
learn something about government
grounds before he or she makes any
more remarks.

Yours very truly,
ONE OF COMMITTEE

TENDERS

Tenders will be received
by the undersigned, up to
twelve o'clock, noon, July 15,
1911, for the Formula,
Plant, Stock on hand, Mer-
chandise, Accounts, Book
Debts, Franchises and good
will of the **EMPIRE LINI-
MENT COMPANY, LIMITED;**

BRIDGETOWN AND LAWRENCETOWN

P. R. Saunders

LOCAL AND SPECIAL

The farm of Mr. S. McColl, Upper Granville, has been sold to Mr. Archie Chute.

Haying is progressing but the crop is quite deficient, the season's drought causing a light yield.

In the case of John Tebo, under sentence to be hanged at Digby, on July 24th, the law will take its course.

Despatches say that Sir Frederick Borden is likely to succeed Lord Strathcona as High Commissioner for Canada at London.

The Halifax Section of the Canadian contingent to the Coronation has returned home delighted with the treatment accorded them.

The class in military drill for the school teachers of the province opened yesterday. Only twenty can be admitted, out of one hundred and thirty who have applied.

Rev. A. N. Marshall, lately returned from Adelaide, Australia, will take the services in the Baptist church on Sunday next, morning and evening. Pastor MacNeill will go to Dalhousie.

The marriage of Mr. William Creelman to Miss Lilla May Rumsey, daughter of Mrs. Emma Rumsey, takes place in the Baptist church, at Clarence this evening at eight o'clock.

The death occurred in Halifax on Sunday last of Mrs. Lavina Shaffner, wife of Samuel C. Shaffner, of Granville Ferry. The funeral took place at Granville Ferry on Tuesday afternoon.

A little child fell out of the window of a car on the Sydney express on Saturday, and miraculously escaped injury. The train was stopped and the child picked up unhurt by his father.

The marriage of Miss Winnie L. Outhit, daughter of Mr. and Mrs. C. W. Outhit, to Rev. A. R. Beverly, rector of Trinity church, Quebec, will take place Tuesday, August 1st in St. Paul's church, Halifax.

The strawberry season is about over and notwithstanding the dry season the crop has been up to the average. Three boxes for a quarter could be obtained a week ago. Yesterday they were ten cents a box.

The steamer Granville left Bridgetown on Thursday morning last with an excursion party for Digby, under the auspices of the Lawrencetown Brass Band. The day was a very enjoyable one for the excursionists.

The corner stone of the new Methodist church in Annapolis Royal will be laid with Masonic ceremony on Tuesday, July 18th by Augustus C. Wolf, Esq., of Lunenburg, Grand Master of A. F. and A. Masons of Nova Scotia.

The mill of Sylvester Bent at Young's Cove just rebuilt after being destroyed by fire once this season was badly scorched on Sunday afternoon, being damaged to the extent of about \$300. The cause of the fire is unknown.

Miss Annie Chute wishes to acknowledge the donation from Mr. J. C. Fitzrandolph of 250 feet of lumber towards a new fence for the cemetery. Mr. Fitzrandolph has also promised other material assistance in cemetery improvement.

Crescent Lodge, I. O. O. F. paid a fraternal visit to Mr. R. J. Messenger at Bellevue Farm last Friday evening on the occasion of his leaving the chair of Noble Grand. The hospitality of Mr. and Mrs. Messenger was much enjoyed.

A Yarmouth automobile containing Stipendiary and Mrs. Pelton and Mr. and Mrs. Wm. L. Rogers, was overturned while turning a corner last Sunday and the occupants were all landed in a deep ditch. Marvelously none were seriously injured. The car was badly damaged.

A national curiosity on the farm of Mr. F. B. Mills, Granville Ferry, is what he calls his "ice mine." It is a spot where ice can be found the year around, under a boulder of the North Mountain, a mile and a half from Granville Ferry. It should be a favorite spot for visitors in this weather.

Citizens would like to know what is the speed limit for automobiles in Bridgetown and whether there is any attempt made to enforce regulations governing the speed limit. The speed at which some automobile drivers pass the points of intersecting streets is certainly dangerous and may prove disastrous.

An old landmark of Bridgetown passed away on Sunday at the County Home in the person of Minard Clarke, aged eighty-four years. Mr. Clarke was born on the homestead property now owned and occupied by Mr. Charles Parker, and his father was an extensive landowner in the town of Bridgetown.

PERSONAL

Miss Campbell, of St. John, is the guest of Mrs. Cochrane.

Mrs. S. S. Reed, of Roxbury, Mass. is visiting friends in town.

Mrs. G. E. Nicolls leaves to-day for a visit of several weeks at Deep Brook.

Miss Una Cameron is visiting Rev. and Mrs. A. J. McDonald at Little Harbor.

Miss Louise Ruggles has returned from a visit with relatives in Halifax and Dartmouth.

Mr. and Mrs. S. C. Turner spent Sunday at Annapolis, guests of her father, W. H. Weldon.

Mrs. A. J. MacLean will be "at home" on Tuesday and Thursday afternoons, 18th and 19th.

Mr. and Mrs. Jackman, of Oxford, have been visiting at the home of Mr. and Mrs. A. J. McLean.

Mrs. George Sharpe, of Westfield, Mass., is the guest of Mrs. Wm. Fitzrandolph for a month.

Misses Harvey and Douglass, Royal Bank inspectors, have been in town during the past week.

Miss Bess Hoyt left on Monday for Fredericton, where she will attend the Summer School of Science.

Miss Edna Price is enjoying an outing at Port Lorne, the guest of her friend, Miss Helen Pearson.

Mr. Harry Abbott's family have rented Mr. Chute's house at Hampton and have gone there for the summer.

The Misses Edith and Grace Calder, of Round Hill, were guests of Mrs. W. R. Calder during examination week.

Mr. Kenneth Dodge, who has spent the past year in California, returned home last week, much benefitted in health.

Dr. and Mrs. Dechman and Miss Anna Dechman visited Halifax last week, the doctor attending the medical Association.

Rev. and Mrs. I. M. Baird left yesterday morning for Clementsvale, Annapolis Co., on two weeks' vacation—Digby Courier.

Bradford R. Hall, lately principal, Weymouth North school, has accepted the principalship of Canning school for the coming year.

Mr. and Mrs. Forrest Connell, junr. will be "at home" Thursday afternoon and evening, July 13th at the home of Mrs. Charles Lewis.

Miss Stella M. Brooks, daughter of Mr. L. Brooks, of Hampton, has returned home from Normal College, Truro, having secured her B. license.

Miss Angie James has returned from Halifax, where she has been staying with Mrs. Richard McCormick, who, we regret to state is very ill.

Mrs. Wesley Caldwell, wife of a former manager of the Bank of Nova Scotia here, and daughter, Miss Doris, have been in town for a few days.

Miss Margaret McLean, a trained nurse from New York, and Mrs. C. W. Rollings and little son, of Halifax, are visiting their mother, Mrs. W. R. Calder.

Miss Alice Huntington, who has been teaching in Texas, in charge of the musical department in a ladies' school has returned home for her vacation.

Mrs. W. H. Beckwith and three children arrived from Halifax on Monday to visit Mr. and Mrs. J. W. Beckwith at their summer home at Hampton.

Mrs. Fred L. Dargie and little daughter, Ruth, with Mrs. Stephen Porter, and son of Boston, are visiting their parents, Mr. and Mrs. Wm. Jefferson.

Mr. A. Seidler, of Hartford, Conn., arrived last week to join Mrs. Seidler, who has been here several weeks. They are guests at the home of Mr. and Mrs. E. G. Langley.

Mr. L. H. Banks, lately with the Hants' Journal, Windsor, and son of Principal B. S. Banks, of the Lawrencetown school, has joined the mechanical staff of the Monitor Sentinel as foreman.

Mr. Fred Kinney left on Monday to attend as leader, the Boys' Y.M.C.A. Camp at Big Cove, Pictou County. He was accompanied by Rex Giles, John MacNeill, Clarence Kinney and Sandy Cochran. Camp closes on the 25th inst.

Mr. J. J. Ritchie sailed last week for England, where he will join Mrs. Ritchie and the Misses Ritchie. Mr. and Mrs. Ritchie intend travelling for some time abroad as well as in England before their return to Halifax in the early autumn.

Miss Marshall, of South Farmington, spent a few days at Hillside cottage, Port Lorne, last week. Mrs. (Dr.) Morse and daughter, of Avon, Conn., Miss Sarah Elliott, Mrs. Eldon Marshall and family of Clarence spent a day last week at one of the Misses Marshall's cottages at Port Lorne.

Sudden Death at Paradise

The sudden death of Mr. Christopher Jackson, of Paradise, is recorded elsewhere by our reporter for that village. Mr. Jackson was a well-known and highly respected resident of the County, being quite extensively engaged in the lumber business and will be regretted by a large circle of friends and acquaintances. Burial takes place today at Dalhousie.

Finest Station on I. C. R. East of Montreal

The Sun is in a position to state that arrangements will soon be completed for the commencement of the big railway buildings in Truro, including the new station, freight sheds, etc. The station is to be built of stone with the tracks all covered after the manner of the Moncton depot, only on a much larger and more modern scale. The approaches to the station will also be made with an eye to greatly beautifying the Esplanade. A much larger expenditure will be made also than at first was contemplated. When completed the Truro station will be the finest one on the I. C. R. east of Montreal. It is expected that the work will be begun this summer, although the building operations will run well into the summer of 1912.—Truro Sun.

NOVA SCOTIA PROVINCIAL EXHIBITION.

In two months the Exhibition will be in full swing and it is now time for the people to arrange for their holiday and visit the Fair.

The Commission met this week and were satisfied with the outlook up to date.

They advised some changes and improvements in the buildings, also the painting of the Grand Stand.

It was decided to accept the offer of Goodale, the airship man, for early flights.

Judging from the manner in which the Horsemen have paid up their second payments of stake races the programme of races will be more interesting than ever.

Don't forget that the dates are AUGUST 30th to SEPTEMBER 7th, a time when the weather should be at its best.

CYCLONE CAUSED HAVOC IN ONTARIO

Thousands of Trees and Fences in Path of the Tornado Were Laid Low.

Brockville, Ont., July 7.—Reports are coming in of the havoc caused by a terrific cyclone which passed over a section of the country from west to east about ten miles north of here yesterday afternoon.

Wind was accompanied by unusually heavy torrent of rain, lasting from eight to ten minutes. Thousands of trees and fences in the path of the tornado were laid low, in many instances, huge oaks and elms being torn from their foundations and carried rods away. One hay rake was carried a distance of a quarter of a mile. Crops generally are ruined.

BORN

BEALS.—At Williamston, July 8th, to Mr. and Mrs. Louis Beals, a daughter.

70% WHITE LEAD 30% ZINC WHITE

When you buy Paint, get the real thing

It is extravagant and foolish to buy and pay for paint, and instead of paint, get a mixture containing cheap adulterants.

Pure paint—the real thing—spreads easier, covers more surface (and covers it better) and wears longer than adulterated paint. Pure paint is far more economical to use. Pure paint gives the handsomest finish.

Pure paint insures you against paint "troubles", the cracking, the peeling, scaling, etc. that comes from the use of impurities.

B-I "English" Paint is pure paint—made from 70% pure white lead (Brandram's B.B. Genuine) 30% pure zinc white, pure linseed oil, pure turpentine and dryer. It will give you the greatest satisfaction and save you money on your paint bill.

MILLION ACRE FARMS.

Strange Origin and Improvement of Australian Merinos.

C. E. W. Bean, of Sydney, has written in an Australian paper of the great sheep industry. His story is in part as follows:

A century ago, when Australia was a dumping ground for England's scum, a British fleet received from a Spanish fleet a present of merino sheep, at a time when to export merinos from Spain was a criminal offence. The little flock reached Australia, and from it are descended the hundred million merinos which have made Australia great and wealthy, despite her small population.

Vastly improved is the modern merino, for the original of 3-1-2 pounds to a fleece has been raised to 12 pounds, and there are rams in Australia which shear 40 pounds.

Nowadays the good rams near the coast is being driven over to agriculture, and the sheep are driven back further into the desert. A terrible desert it is at times, where not one green leaf can be seen, when the red dust with which it is covered gets blown away—and only the bare hard bones of the earth are left. Then sheep die by the million for want of the smallest scrap of nourishment, and are sometimes killed by the thousands because it is hopeless to expect to keep them alive.

Then comes the rain, and as if by a miracle the whole land is green again, the flocks increase out of all bounds, and the men who have been nearly ruined, make new fortunes in a few years. That is happening now. From 1831 to 1903 occurred the biggest drought known, and many station-holders lost their all. Since then there has been a steady succession of good seasons and the problem now is what to do with the enormous surplus of old ewes. Such are the vicissitudes of that strange land, the oldest part of the earth's exposed surface.

Some of the great sheep runs cover a million acres, or about 1,500 square miles. Each run is divided into paddocks, which cover all Australia. The average western paddock contains 100 square miles. If one fence is on the horizon behind, the other is over the horizon ahead. You could walk till you died in that paddock without seeing a fence. Leave it alone before you now found the fence and died along side of it before it led them anywhere.

There may be a hut in each paddock with a boundary rider—sometimes two, living together. Every day except Sunday, the boundary rider is expected to be out in his paddock. About one day in two he may spot something like a line of posts, which is probably a line of sheep in mirage on the horizon. Occasionally he cuts through a wing of them. He sees a man, or gets a mail, perhaps, once in three weeks. And yet the boundary men get to like the lonely life.

There is a "boss," the lord of many acres, a man of strong character and a liberal education, living a life not unlike that of an English country gentleman, in his rambling home, but carrying on his work with the ability and business of a man who has been trained in business.

The third body of men who live by the sheep industry are the shearers, who work through the country from north to south, making plenty of money, and living in a rough way on the fat of the land as they pass from one shed to the other. They are a class unlike any other.

The Policeman's Dangerous Life.

About one in every six London policemen is injured during the year. More than one thousand men were on the sick list from injuries received while on duty, and nearly seven hundred more who were injured off duty. Some of the cases were so serious as to disable the man for a week or more, and these amounted to no fewer than 677. Besides these, there were twice as many injured less severely, who were not placed on the sick list.

The following examples show the multiplicity of dangers to which the police are exposed: 2,206 men were assaulted or injured when making arrests; 102 bitten by dogs; 61 hurt by persons not arrested; 17 injured while dispersing disorderly crowds; 2 hurt, some very severely, when stopping runaway horses; 21 injured when assisting fallen or retreating horses; 25 kicked, trodden on, or knocked down by horses; 31 injured (14 very severely) by vehicles when regulating traffic; and 28 were injured when extinguishing fires.

And a further large number suffered injury by their horses falling or throwing them, by cyclists, while riding their own bicycles, at fire drills, by slipping and falling when examining premises, etc., so that the total of injuries while on duty for the year is brought up to 3,310.

An Honest Man.

A preacher near Floombury, Eng., grew fervent in exhorting to an honest living, and near the close of his sermon he said: "Let every person in the house who is paying his or her debts stand up." Instantly every man and woman in the house, save one, was standing. After they were peacefully seated, the domini asked: "Now let those stand up who are not paying their debts," and a long lean man of sixty or more years, clothed in a seely suit of the past decade, slowly assumed a perpendicular position in his pew. "How is it, my friend," enquired the minister in a stern tone, "that you are the only one in this intelligent congregation who does not meet his obligations?" The lanky individual weakly answered, "I run a newspaper, and the brethren here are my subscribers, and"—the minister broke in abruptly with, "We will close with the benediction."

Tobacco For British Smokers.

More tobacco is apparently being smoked, for in November 3,210,938 pounds were cleared for home consumption, the largest quantity for one month under normal conditions. Since April 31,330,318 pounds have been cleared, as against 37,306,011 pounds last year.—Tobacco Trade Review.

MINARD'S LINIMENT cures Burns,

Why don't some flours behave? Why don't they keep good? Because they contain too much of the branny particles, too much of the inferior portions of the wheat—may be little pieces of the oily germ. Which act on one another—that's why some flours "work" in the sack. FIVE ROSES is the purest extract of Manitoba spring wheat berries. Free from branny particles and such like. It will keep sound, and sweet longer than necessary. Keep it in a dry place, and when needed you find it even healthier, sounder, fresher, drier than the day you bought it. Buy lots of FIVE ROSES. It keeps.

Five Roses Flour
Not Bleached Not Blended

SALE OF THE ROSE MILLING COMPANY, LIMITED, MONTREAL

IF YOU ADVERTISE

You Need the 1911 Edition of the Canadian Newspaper Directory.

According to the 1911 Edition of the Canadian Newspaper Directory, just out Canada and Newfoundland can boast of 120 daily papers, 1,102 weekly or semi-weekly, 205 monthly or semi-monthly, and 23 published less frequently.

These figures can be relied on, as the Canadian Newspaper Directory is published by the oldest and largest Advertising Agency in the Dominion, A. McKim, Limited, of Montreal and Toronto. The 1911 Edition of the Directory is a very real need in Canada, and deserves a place on the desk of every business man, whether he is an advertiser or not.

In addition to listing and describing Canadian periodicals, the Directory supplies a comprehensive gazetteer giving the population, the chief industries, the railway, telegraph, banking facilities, and other interesting features of every newspaper city, town and village in Canada.

The book contains over 475 pages. It is splendidly bound and is certainly a credit alike to the publishers and to Canadian newspapers generally.

A. McKim, Limited, are particularly well qualified to edit and publish this, the standard book of reference on Canadian publications. They are the pioneers in the Advertising Agency field in the Dominion, the McKim Agency having been founded in Montreal in January, 1880, twenty-two years ago, by Mr. Anson McKim, who is still at the head of the business.

During all this time they have been the acknowledged leaders in this line in Canada, and the Agency business has been developed from a very small beginning—then performing only the functions of the middle-man—to a very large producing enterprise which runs into the millions.

Years ago McKim recognized that one of the requisites for successful advertising is a thorough knowledge of advertising mediums, and they began the publication of the Canadian Newspaper Directory, which is now recognized as the most complete and accurate work of the kind published.

The price, express or postage prepaid, is \$2.00.

Aviation Still An Unlearned Science

The Aero Club of France, has just been making an enquiry into the aviation accidents that have occurred during the past two years, 1909 and 1910.

There were 47 accidents in 1909, three of them fatal.

There were 101 in 1910, 28 of them fatal.

In 1909 no less than 14 accidents were caused by imperfections in the construction of the machine, 21 by mistakes on the part of the airman, four by atmospheric perturbation, and eight by causes not clearly defined.

In 1910 there were 29 accidents due to imperfect construction, 21 owing to mistakes by the airman, 25 from disturbances of the atmosphere, and 26 that cannot be accounted for.

The accidents due to imperfect construction were the result of very trifling organizations in the delicate machinery.

A very slight stoppage, and the aeroplane fell, with fatal consequences in a number of cases.

Those which are said to have been the fault of the operator were caused by attempting to rise too quickly; or by making too sudden a turn, or by landing too swiftly.

Accidents through "improper construction" and "mistakes of the airman," may be considered preventable, but the numerous accidents produced by atmospheric influences are beyond the powers of the experts to explain or control. When the machine is aloft it is practically beyond human control, unless there is no wind.

Aviation is thus an unlearned science.

Humanity knows a little more about it than it did a hundred years ago, when ballooning was attempted. But the knowledge so far acquired is very small. Dirigible ballooning is a practical advance.

But "flying" with power to meet and successfully combat "atmospheric influences," is something yet to be learned; and the attempt to learn it will claim many hundreds of human victims.

Right in your busiest season when you have the least time to spare you are most likely to take diarrhoea and lose several days' time, unless you have Chamberlain's Colic, Cholera and Diarrhoea Remedy at hand and take a dose on the first appearance of the disease. For sale by all dealers.

CONGRATULATIONS.

Sir Charles Tupper, Bart., was ninety years old yesterday. Sir Charles is about the only surviving father of Confederation and will ever occupy a place of commanding importance in the history of Canada. The present position of the C.P.R. is largely due to the statesmanship and foresighted policy of Sir Charles Tupper, Canadians everywhere wish him many happy returns of the day.—Exchange.

EARTHQUAKE PANIC IN SAN FRANCISCO.

San Francisco, July 1—Two earthquake shocks, the heaviest since the big shake of 1906, and separated by only a few seconds, jarred the central portion of California and Western Nevada today. The first sharp shock, experienced at 2.10 o'clock, was followed within a few seconds by one of similar intensity, each lasting about five seconds.

Only trivial damage was reported from any sections, but in San Francisco and other cities in the affected area panic seized upon crowds in stores and restaurants and there was a pell-mell exodus from the large buildings.

Paper Bag Cookery New

Presiding over the Kitchen of Brooks' Club, New York, is a magician whose magic is likely to revolutionize cooking.

He is M. Soyer, and briefly stated his discovery is that food which is encased in a paper bag, specially manufactured for the purpose, and put into an oven is cooked far more quickly than by the old method. Food cooked in this way loses neither weight nor nutriment. The envelope in which it is enclosed prevents evaporation, and all the essence are retained. Minor yet substantial benefits are a reduction in the number of cooking utensils.

Mr. Soyer prepared the following dishes in just over an hour: Loaf of lamb, forty-five minutes; chicken, twenty-six minutes; "army stew," thirty minutes; stewed kidneys, five minutes; bouillabaisse, sixty minutes; soured mackerel five minutes; roasted apples, fifteen minutes; veal and ham pie, thirty-three minutes; currant cakes; bone bouche (puff paste), ten minutes; chop, ten minutes.

ABSOLUTE SIMPLICITY.

What strikes one most in the new cookery is its absolute simplicity. Every cook, even the plainest of them, may become a cordon bleu. The loaf of lamb was put into the paper bag without even the complication of a dressing of flour. Three quarters of an hour later, to the minute, it emerged from the oven and the scorched but intact envelope was removed. The joint was of a delicate golden tint and was accompanied by the meat was tender and juicy.

PAPER MUST BE PURE.

Something should be said about the paper. It must, of course, be pure and devoid of obnoxious chemicals. When there is a wide demand for it, as there will be presently, the supply will meet it. The paper is not expensive—for a middle class family it need not cost more than thirty-six cents a week—and, when the saving in utensils and the labor in cleaning them is taken in account, the economy of the new process is evident. Enclosed in a paper bag, the food is exposed to heat, which opens the pores of the meat, and melts the snow. Nothing is lost, because there is no evaporation and careful experiments have proved that the weight of cooked food is exactly the same as the weight of the raw material.

And there is no smell. When paper bag cookery becomes the vogue no more will a bouquet of varied odors greet the guest who dines at a small house or flat where the kitchen is close to the dining room. The scent of the food like other essences is retained until it serves its proper purpose of titillating appetite.—London Chronicle.

Wolf Fish in Passamaquoddy Bay

(Saturday Evening Post.)

Summer visitors on the coast of Maine, especially in the neighborhood of Eastport, are advised to be cautious in wading at low tide among the rock-pools along the shore. If not on their guard they may be attacked and severely bitten by a wolf-fish.

This, according to Dr. Theodore Gil, is one of the most remarkable of finny creatures. Though rarely exceeding three feet in length, it seems to be much more ferocious than the average shark, promptly attacking anybody who approaches its lair, and trying to mangle with it.

Anatomically, its most striking feature is its long and powerful teeth, which must render it a dangerous antagonist in a fight with any other denizen of the ocean. Apparently, however, it does not feed on fishes, but prefers such delicacies as lobsters, crabs and whelks. In the stomach of one individual caught at Eastport, four quarts of sea-urchins were found, most of them whole and with the spines on—an uncomfortable article of diet, one might imagine.

The Eskimos in Alaska catch the wolf-fish by baiting their hooks with grass roots—a habit of the fish in these waters being to tear sods of grass, that wash into the sea from the shore of cliff ledges, into pieces, as if to eat them. It seems likely, however, that they really do not eat the vegetable stuff, but the crabs and mollusks lurking in it.

Large numbers of wolf-fishes are taken by fishermen on cod and haddock lines, but usually they are thrown away, notwithstanding the fact that they are exceedingly good to eat. Their appearance is the reverse of attractiveness and they have an offensive odor which renders them unmarketable.

UNPRECEDENTED IN THE ANNALS OF COAL MINES.

Break in Port Hood Mine Occurred at Bottom of the Pit, 1000 Feet Below Tide Level.

"The break in the Port Hood coal mine, with the water making through from the sea over 1,000 feet below the tide water, the very bottom of the pit is unprecedented in the annals of mining."

This was the statement made yesterday by Hiram Donkin, deputy commissioner of mines, to a representative of the Halifax Herald. Mr. Donkin added: "You might as well say that a lightning bolt should be expected to strike your house, and that if it did so it was because of your own negligence, as to say that this accident at Port Hood could not have been guarded against."

THE HOME

WOMAN'S LACK OF DIVERSION.

The question as to who works the harder, the wife of the man of small income, who does all the housework and takes care of two or three babies, or the man who struggles to earn that small income, came up the other day, and this was the Fair-minded Man's contribution, interesting enough, I thought, to pass along.

"I don't know who works the harder. I suppose that's different in different cases, but I often think to myself that the woman has the worst end of it in this way. When I go to work in the morning I am apt to meet two or three men I know on the train. In the office I come in contact with a dozen more. I usually lunch with someone I know and say 'How do' to a few more coming back on the train.

"Now I have the contract, however brief, with all these minds to take me out of myself, and interest and stimulate me."

"What does my wife have in the meantime? Outside of the grocery man and the ice man, and maybe one or two peddlers and perhaps a short chat with the woman next door, and the hour the children are home for lunch—nothing. And all the time she's doing work that keeps her hands busy but not her mind.

"Now doesn't it stand to reason that she is going to find the day longer and more tiresome than I do."

"When I come home at night there is nothing I like to do so well as to sit down in front of my own hearth fire and rest. I used to think it was queer that my wife felt differently, was always wanting to get out somewhere when she had such a nice home. And then one day somehow I got to thinking and saw it was this way, and I have been considerably better since about going out with her and trying to bring home as many outside interests as I could."

If more men would get the Fair-minded Man's point of view, I think we should have fewer discontented women, fewer absurd love affairs on the part of married women, less insidious jealousy and unreasoning suspicions on the part of wives, fewer children out of sympathy with and ashamed of their mothers, fewer wives mad at forty and fewer women in the insane asylums.

In a little country town not so many miles from here a staid middle-aged woman of unimpeachable character and habits went out into the garden one morning and calmly set fire to the barn.

The barn and house burned to the ground. The woman was examined and taken to the insane asylum, where she died a month later.

"Too much to occupy her hands and too little to occupy her mind for thirty years," was the concise explanation the doctor gave her.

That woman's sole diversion had been church on Sunday when the horses weren't too tired or it wasn't too stormy, and a prayer meeting or church social perhaps once a month.

That is an extreme case, of course but there are less virulent ones developing all about us.

Most of the insane jealousy on the part of women, most of the discontent and suspicion and unrest develop while fingers fly over tasks so mechanical and so familiar that the mind is set free to roam at will, and lacking pleasant occupation, it is given over all too often to foolish brooding.

Broader educations, more opportunities for entertainment and outside interest, more chance for social work, those wonderful world links, the telephone, the magazine and the newspaper are doing much to improve this condition of affairs, but there is something that will do more than all of these.

And that is simply more husbands like the Fair-minded Man—more men with his point of view and his will to help.

Here's hoping the next generation, or better still, the next decade, brings them.—Ruth Cameron.

A REFRIGERATOR WITHOUT ICE.

Now that the hot weather is at hand the old question of preserving the food arises before most householders. By those who have refrigerators and can obtain ice it is soon solved, but those who live in small towns, where ice is often not procurable, have often greater difficulty. To them let it come as a pleasant surprise to learn that ice, though desirable, is by no means a necessity. Our grandmothers got along very well without it. Campers of experience today are equally independent. The idea is simply to have a refrigerator based on the old-fashioned "coolers."

A cooler can be made out of any box that has for its sides slats instead of solid boards. A peach crate makes a very satisfactory one. The box once chosen, all that is needed in the way of construction is to add as many shelves inside as desired, and a door on hinges. Then cover the door, sides and back with burlap or some similar material.

On the top place a pan, preferably enamel, and from this pan hang wicks made of strips of flannel four or five inches in width. These wicks should have one end resting on the inside bottom of the pan, and the other hanging over the edge of the crate and touching the burlap. Then fill the pan with water.

The cooler should be placed in a cool place, where the wind can blow upon it. The wicks absorb the water and distribute it through the mesh and by capillary attraction. The wind causes the moisture to evaporate, and the evaporation raises the temperature inside the refrigerator. A writer in The Youth's Companion, in describing such a cooler, asserts that it will keep butter hard and firm on the warmest days in summer. If this be true, as it probably is, surely the idea is one well worth trying.

"MOTHER'S BAD DAY" LEAVES SCARS IN TINY BABY HEARTS.

Don't indulge in tantrums with your children. They are so honest and such sincere little beings naturally that they take everything, every attitude literally, and having not developed the reasoning power to go below the storm surface and figure out in and directed towards the children, have very lasting and hampering effects on the broad and ultimate development of the child character.

A mother of a nervously inclined little girl, indulged so frequently in tantrums and unreasonable outbursts of anger that the child developed the most terrible of diseases—St. Vitus dance. She was cured after many months of treatment and large outlays of money, but the period is a dark one in that home.—Cynthia Grey.

REMOVE IRON RUST.

Rice as a remover of iron rust is not to be excelled. Not only does it bleach the recent stain, but even that of long standing.

Boil a cupful of rice in two quarts of water for thirty minutes. Let it stand overnight and strain through a cheesecloth. Soak the iron rust spots in the rice water for four or five hours and then rinse in clear water. This will effectually remove rust stains, no matter how old.

A PRAYER FOR LIGHT

Be with me, Lord. My house is growing still, As, one by one, the guests go out the door; And some who helped me once to do Thy will Behold and bless Thee on the heavenly shore.

Uphold my strength! My task is not yet done, Nor let me at the labor cease to sing; But from the rising to the setting sun Each faithful hour, do service to my King.

HEADACHE

And FIG PILLS do not agree. The headache disappears after one or two doses of FIG PILLS. They tone up the stomach and cure Constipation. 25c. a box. At leading drug stores or mailed on receipt of price by The Fig Pill Co., St. Thomas, Ont.

JULY.

When the scarlet cardinal tells Her dream of the dragon-fly, And the lazy breeze makes a nest in the trees, And murmurs a lullaby, It is July.

When the tangled cobweb pulls The corn-fower's cup awry, And the lilies tall lean over the wall To bow to the butterfly, It is July.

When the heat like a mist veils fountains, And poppies flame in the rye, And the silver note in the streamlets throat Has softened almost to a sigh, It is July.

When the hours are so still that time Forgets them, and lets them lie 'Neath petals pink till the night stars wink At the sunset in the sky, It is July.

—Susan Hartley Swett.

Never leave home on a journey without a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is almost certain to be needed and cannot be obtained when on board the cars or steamships. For sale by all dealers.

They Keep the whole system in the pink of condition.

Their singular curative properties discovered by an Indian tribe—introduced to civilization nearly a century ago—compounded since 1857 in the Comstock Laboratories at Brockville, Ontario.

Dr. Morse's Indian Root Pills

have a remarkable record for consistently curing constipation, biliousness and indigestion, purifying the blood, banishing headaches and clearing the skin. 25c. a box everywhere.

Show me Thy light! Let not my wearied eyes Miss the fresh gladness of life's passing day, But keep the light of morn, the sweet surprise Of each new blessing that attends attends my way.

And for the crowning grace, O Lord, renew The gift Thy best of saints have had; With the great joy of Christ my heart endue, To share the whole world's tears and still be glad.

"BY GEORGE."

Recent English and Canadian papers tell of a movement which is on foot to secure a coronation gift to King George V. from all the Georges of the British Empire, and the suggestion is made that it should include the Georgianans as well, and as many Georges and Georgianans as would like to be identified with the movement from the United States. It is told as historical foot-note, that upon the accession of the House of Hanover, the loyal gentleman who supported the son of the Princess Sophia adopted as a token of loyalty and expertise "By George!" and it may be in style to revive it at the present time. Under the name of Georges, a certain George King, who was under conviction for a capital crime, sent this petition to the King for pardon:

"George King sends this humble petition That King George will pity poor George King's condition; If King George to George King will grant a long day, George King for King George forever will pray.

(Signed) "By George."

When the petition was returned it was with the words: "Granted, By George."

across its face. And "By George!" had no difficulty in coming into large favor at court and elsewhere throughout the kingdom.

BURIED TREASURE.

War-Time Secret Lurks In an Ontario Marsh.

Many and varied are the stories of lost treasures. It would seem almost that in all the earlier settled districts of Ontario there are treasures buried to find which would mean eternal opulence to the fortunate finder. Many of these stories are undoubtedly myths, but it is equally true that a goodly number are based upon more or less authentic facts so that a story of a lost treasure that in itself evidences a considerable degree of reasonableness, and is substantiated by material evidence and the word of people yet living, may not be uninteresting.

About midway between the towns of Oshawa and Whitby, on the north shore of Lake Ontario, is situated what appears at the present time to be nothing more than a bleak, barren marsh, with its uninviting bogs and dense overgrowth of rushes and vegetation peculiar to such places. It was not always thus, however, for many years ago this same area was a body of water of considerable depth, being in reality a bay of the lake. The story goes that during the war with the United States in 1813 the bay afforded shelter to a Canadian schooner while engaged in carrying specie from Kingston for the pay of the militia stationed at York. The vessel was sailing on the lake before a brisk sou'wester late in the afternoon of a September day in the year 1813, and when a few miles west of Oshawa harbor it sighted an American boat, one of the private type that were prevalent on the great lakes during the war and wrought havoc with Canadian vessels. The captain knew the coast fairly well, and he immediately thought of the bay as a means of escape, reckoning that the Americans would not be able to follow the comparative shallow entrance. With all haste he put into the bay, and his surmise proved to be correct, for while he was able to work up the bay till he was a considerable distance from the lake, the gunboat, by reason of its draught, was unable to enter. Not to be daunted, the Americans stood off as close to the shore as they dared and commenced to bombard the schooner. The captain, fearing lest they might land and attack him on shore, thought it best to unload his cargo and endeavor to conceal it in the woods back from the shore. The task was extremely arduous because of the absence of semblance of a dock, involving the necessity of carrying the gold in small boats as far inshore as possible, and shouldering it the remainder of the distance over the bog and uncertain footing of old stumps and sunken logs provided.

By dint of perseverance inspired by the momentary feat of assault at the hands of the enemy, the task was finally accomplished and the treasure temporarily secured in concealment. Darkness began to fall over the land, which added security to the men, since it afforded no opportunity for the Americans, when there was insufficient light to enable them to detect their fire, simply sailed away, to the great delight of the defenceless Canadians. Anxious to reach York and the protection of its fort, as soon as they felt assured that the enemy had abandoned the bay, they began the work of reloading preparatory to continuing their voyage. It is not hard to believe that the task was most difficult, considering that all was absolute darkness by now and the nature of the ground over which they had to carry the kegs of gold, nor is it at all improbable that, as the story goes, one of the kegs was dropped during the handling from the small boat up to the side of the schooner. Means were not at hand to recover it, and indeed had they possessed facilities it might have been impossible to locate it and extricate it from the mucky bottom of the little bay. So, having finished loading, they weighed anchor and were soon glad to be once more on the open lake and on a fair way to a place of safety.

Chiefly through one of the crew, who was on the spot and saw the keg drop into the water, a William McLean, has the story been handed down to the present time. He has been long since emptied of water by reason of the lowering of Lake Ontario and the deposit of sediment, but it is not known that the treasure has ever been recovered. Many have sought in vain and some have made the spot the scene of their financial peregrinations. Diving rods and various devices have been used in the endeavor, and the appearance presented by many of these treasure-hunters working in the light of a lantern at the dead of night is extremely ghost-like. A number of cannon balls have been picked up in the vicinity, both by those engaged in the quest and by farmers working in the fields nearby, but the man of the sandspite or the piping curlew is more apt to be encountered than the now submerged treasure of war times.

HEADING OFF

Prominent among the leaders of the recent farmers' lower tariff deputations were three former Ottawans who have risen to eminence and fortune in the west.

At the head of the manufacturers' higher tariff deputation, also, was Mr. W. H. Rowley, who, remaining in Ottawa, has built up a great manufacturing concern that supplies millions of people with certain necessities of civilization.

Ottawa men, whether they go on their travels or remain at home, seem to have the knack of rising to the top and taking a leading part in the life of the community or class of which they form a part.—Ottawa Journal.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Breakwater at Brooklyn, N. S." will be received at this office until 4.00 p.m., on Wednesday, July 26th, 1911, for the construction of a Breakwater at Brooklyn, Queens Co., N. S.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of C.E.W. Dodwell, Esq., District Engineer, Shelburne, N. S., and on application to the Postmasters at Brooklyn and Liverpool, N. S.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, and the residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

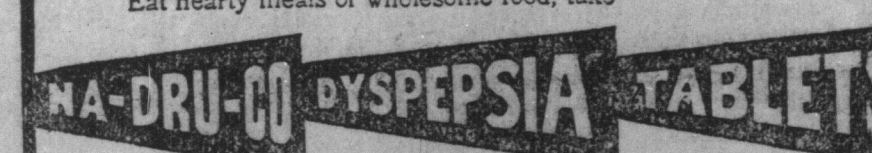

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, June 30th, 1911.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

"Eat and Be Merry!"

Stop starving yourself—stop suffering the pangs of indigestion—stop worrying about what you dare and dare not eat. Eat hearty meals of wholesome food, take

NA-DRU-CO DYSPESIA TABLETS

and you'll feel like a new person. Sour stomach—heartburn—occasional indigestion—chronic dyspepsia—all yield quickly to NA-DRU-CO Dyspepsia Tablets. The properly digested food restores your strength, your stomach regains its tone, and soon requires no further aid.

50c. a box. If your druggist has not stocked them yet send 50c. and we will mail them.
