MEMBERS OF SUSSEX CREW WERE BLOWN TO

MANY OF CREW BLOWN TO ATOMS WHEN TORPEDO HIT THE SUSSEX

Edward Huxley, One of Twenty-five Americans on Board Gives Vivid Description of What Occurred on Damaged Liner --Other Survivors' Stories.

LONDON, March 25, 3.09 p.m. Twenty-five Americans were on board the cross-channel steamship Sussex, which met with disaster from a mine or submarine yesterday afternoon. Two Americans are known to have been injured seriously by the explosion. They are Miss Elizabeth Baldwin, daughter of Prof. J. Mark Baldwin, a resident of Paris, and Wilder C. Penfield of Hudson, Wis., a Rhodes Scholar at Oxford University.

Whether any Americans were killed by the explosion or drowned has not been ascertained, but passengers say that a young American was standing at the point where the explosion occurred and could not be found af-

While the loss of life was considerable according to passengers, it is believed the greatest sufferers were members of the crew.

A British destroyer landed 70 passengers at Dover early this morning, and a majority of them came to London. The other survivors were taken by a French trawler to Boulogne. Hence it is impossible to obtain accurate information here whether any Ameri-The United Sta

The United States embassy issued a notice today asking that American survivors who have reached England report themselves.

The Sussex was towed to Boulogne.

Crew Blown to Atoms. Edward Huxley, who witnessed the catastrophe from beginning to end, states that several passengers and a number of members of the crew undoubtedly were blown to atoms by the explosion. Mr. Huzley told the Assocated Press a remarkable story of the manner in which the forward part of the Sussex was torn off at the captain's bridge. The remainder of the tain's bridge. The remainder of the vossel was so little damaged that even the electric lights continued to burn.

Mr. Huxley described the scene on the Sussex after the explosion as the most horrible he had ever witnessed. He could give no estimate, of the number of persons killed, further than to say that many were lost. He would vonture no opinion whether the disaster was caused by a mine or torpedo.

"We left Folkestone at 1.30 p.m." said Mr. Huxley. "The sea was

was Some fifteen or twenty persons were said Mr. Huxley. "The sea was smooth, the sun was shining and the smooth, the sun was shining and the steamer made good time.

"I was standing on deck, just aft of the captain's bridge, chatting with Mr. Drake. I had just looked at my watch and noticed that it was 3.05 p.m., when suddenly there was a muffled explosion. The whole forward part of the ship seemed to rise in the air and was torn away completely from the rest of the steamer. The

injured, were dug from the wreckage, and several badly mangled bodies were found. Undoubtedly other bodies were torn to pieces in the wreckage. I will not dwell on this scene. Suffice it to say that it was the most awful thing

ever witnessed. "There must have been passenger in the forward part of the ship which was blown away" Mr. Huxley continued, "and I believe a large number of the crew were below in this section, as few of them were seen. All those on the forward part of the ship undoubtedly perished.

Boats Were Lowered "As soon as possible boats lowered, passengers assisting. Five boats were put over. The first three had about 30 or 40 persons in each, there being about an equal number of men and women. The fourth boat Five turned over, and about 12 persons clambored on top. We threw over chairs, rafts and anything which would float in order to assist them, but only about four of them were rescued, so about four of them were rescued, so far as I know. The fifth boat had only four or five people aboard, and this boat appeared to be water-logged. These boats stayed near the ship and at the end of an hour the captain carried them back and the people were taken on board again. "It was 1.30 p.m. before we were able to get help. At that time a French trawler came alongside and took off all but three of the women and several of the men. At about the same time a British torpedo boat come alongside. Her commander came alongside. Her commander came on board and took charge of af-

HUNDRED MAY BE LOST

Upwards of That Number on Vessel Damaged in Channel Missing.

PARIS, March 25. 4.55 p.m. (Bulletin)—Samuel F. Bemis of Medford, Mass., a pasenger on the Sussex said today that he saw plainly and unmistakably, the wake of a torpedo coming toward the steamer.

LONDON. March 25.-Information obtained from passengers on the channel steamsmhip Sussex, damaged by an explosion yesterday afternoon, on the way from Folkestone to Dieppe, indicates there may have a considerable loss of life. One American is missing, and is supposed to have been lost. Another was injured seriously. Several Americans were rescued.

Opinion of passengers of the Sussex is divided as to whether the vessel was damaged by a mine or a torpedo. The explosion was terrific. It occurred just ahead of the captain's bridge, and tore the front part of the steamer to pieces, killing or injuring a number of passengers. Many were wounded severely by flying splinters.

Drake, European manager of the company, are among the Americans rescued from the Sussex. They report that there was a heavy loss of life, including probably several Americans. According to official information

THE WEEK'S EVENTS REVIEWED BY W. H. STEWART.

TEAVY fighting with the Russians in the lake district at the southwest of Dvinsk was reported in the German official communiques of Sunday and Monday, the Germans claiming that the Russians were repulsed with heavy losses in all their attempts to capture German positions.

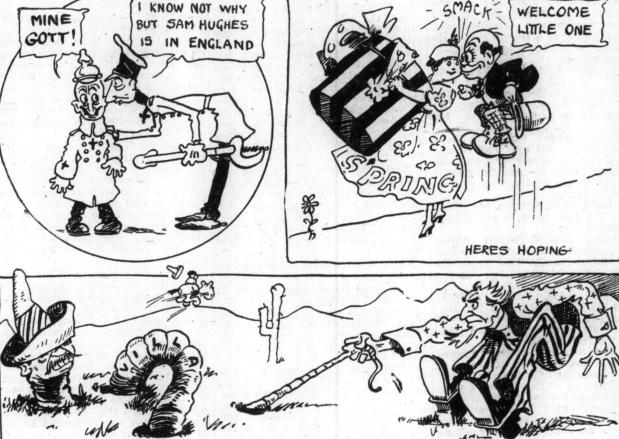

Russia, in Monday's official communique, reported that lively artillery and infantry engagements were being fought on the front to the southwest of Dvinsk. The Russians stormed and captured Velikoieselo east of Tveretch, and they occupied Zanapasz Village and a section of the German trenches near Ostrovliany after an engagement. German attempts to advance in another sector to the south were repulsed. The Russians, under General Ivanoff, captured a bridgehead near Mikhaltche in Galicia.

The Russians, on Tuesday, captured a line of advanced trenches from the Germans near Butzititisczkie and repulsed a German counter-attack on Velikoieselo, which the Russians had occupied the day before in the lake district fighting.

Petrograd reported on Tuesday that the fighting which had begun near Dvinsk was extending north to Riga and away to the south below the lake district. The Russians captured a wood and village in the Jacobstadt sector after sharp fighting at a point east of Augusthof and a wood between the forest district of Dukerneck and Delvinck Village. The Russians silenced the fire of German batteries in the Mischkele region and carried a line of German trenches. They also repulsed a German attack. Desperate fighting was reported as proceeding north of Postavy. The Russians employed asphyxiating and poisonous gas shells in the fighting on the southwestern shore of lake Naroc where they also forced three lines of wire entanglements and took three lines of German trenches. The Germans delivered fierce counter-attacks and used a great quantity of asphyxiating gas, but they were checked by a bombardment of shells emitting poisonous gases.

The Russians, Thursday, reported that they had pierced the German lines in the Jacobstadt district. By launching heavy counter-attacks, the Germans were able to retake part of the trenches which they had lost in the sector, Mintzinny-Lake Solky, The Gerpaas were repulsed when they launched a counter-attack near Lake maroc. The Russians again advanced in this region under cover of a violent bombardment. The Russians also, fighting the Austrians in the south, made an advance and consolidated their positions at a

Announcements

THE CANADIAN SERBIAN RELIEF Committee (with which is incorporated Montenegrin Relief), has received up to date \$3077.27, of which \$2525.30 has been sent to the British committee in London. Over 20 large cases of clothing has been despatched, and a large quantity of clothing is now ready for shipment. The donations have been so numerous that it is impossible to give a detailed list; the committee must, therefore, give a general word of thanks to express their appreciation of the generosity shown. There is still urgent need of more funds to help this worthy cause. Subscriptions may be sent to the treasurer of the Toronto local committee, Mr. R. D. Richardson, 103 St. Clair West, or to the treasurer of the National Committee, Mr. A. H. Campbell, 4 Wellington East.

We will have to start acquaintance afresh. I won't see you stuck, of course, but you must appear to stand on your own feet. There will be some hazing ahead of you, but I know you will be good for it."

At the Mining Camp.

When the westbound Transcontinental train stopped at the mining camp a few weeks later, a young Englishman alighted dressed in a very fashionable, loud-checked tweed suit. Arthur was partcularly found of that check. In fact, he liked it so well he had had a second suit made off the same pattern.

THE NEXT MEETING of the Club for made off the same pattern. HE NEXT MEETING of the Club for the study of Social Science will take place at the Margaret Eaton Hall on Monday, March 27, at 3 p.m. The members will be addressed by Mme. Beller, daughter of the French historian, M. Meule d'Aubigne, on "Social Service in France Through Peace and War," and will show illuminated views of war conditions in France today.

ON TUESDAY EVENING, 28th inst., Mrs. F. J. (Dr.) Snelgrove, is giving what promises to be a very delightful musicale at her home, 913 Bathurst street, the proceeds to go toward the fund being raised by the Lady Ross Chapter, I.O.D.E., for the Soldlers' Convalescent Hospital, Toronto.

RTHUR CARSON raised his | them, in spite of their prejudices. It was Nelson who later sug-gested, "Perhaps the stranger could eyes from his half-packed box and looked enquiringly give us a song. about his room. His narrowed gaze fell on a small black cabinet in a corner and measured it speculatively. 'Perhaps I'd better put it in," he mused, "tho I don't suppose I'll ever

He lifted the cabinet and fitted it snugly into the trunk, little dreaming of the occasion when he should next use its contents.

Carson was a typical younger son of a prosperous English family. His brother would inherit the broad Carson acres, but Arthur's father had dealt more intelligently with him than some English squires had with their younger sons.

Instead of sending him out with a smattering of general education, carson, sr., had insisted, when Arthur completed his college course, few years before, that he study

The young man would have preerred packing his box at once and starting out as his chum, Charlie Nelson, was doing, to seek adventure and fortune in Canada, whither many adventurous spirits of his age

were turning. But his father had insisted. "Get your doctor's degree first, then you will have a profession on which to depend, no matter what happens. Afterwards you can seek your adentures, if you still so desire."

Now, that he had won his M.D. degree, Arthur still desired. The letters from his old pall, Nelson, only added to his enthusiasm, even when they told of the experiences, broken bone, which was not badly that he, as a tenderfoot, had been fractured. He warned old Dan he obliged to undergo.

Nelson certainly had not made days and suggested he get someone an thing brilliant of his career. He to wait on him. The old man rewas not over-ambitious, it is true, fused absolutely, saying he could nor was he especially equipped for any particular business. Consequently, after spending a few years traveling and having a good time, he had been content to settle down for the time being at a humble position in charge of the freight sheds in a small mining camp near the

Rockies. When Arthur wrote telling Nelson of his intention to join him, Charlie had been delighted, but while urging his friend to come had sounded a

warning note. "If you want to earn respect as a tenderfoot." he wrote, 'do not come tied to anybody's apron-strings. I'll be at the station, of course, but you THE CANADIAN SERBIAN RELIEF We will have to start acquaintance

so well he had had a second suit

I might not be able to get anything like it out there, you know," he reasoned. And perhaps he was quite correct.

The half-dozen stragglers around telling you ridiculous yarns about the little mining station nudged each other as they sized up that suit and timber-wolves are at this time of what was in it. Farther up the year. They will stand you at the track, a young man dressed in blue derry overalls was superintending fire to frighten off the wolves. Then the unloading of a freight car. He gave one look, then a low whistle of ing to take positions farther on. consternation.

"Thought he'd have had some Should have warned him, others all go home and leave him but I thought he'd know better than that," he grunted, and taking no further notice went on with his

duties Arthur glanced curiously about the station. His eyes had caught the glance, furtively thrown him from his friend beside the freight car, but it was to the man nearest home he turned.

"I beg pardon, but can you direct me to the best hotel in the place," he asked politely. "Hotel?" snorted the one addres-

"Well, stranger, I reckon Ike's saloon is the best substitute we can offer here, but you can get a bed and some grub there." "Grub? Aw, thanks awfully. Guess I'll have a look at my baggage," and Arthur sauntered down toward his grips, which were piled

near the freight car. Nelson took a few steps toward him and the old pals exchanged a look of genuine affection as the former growled. "For Heaven's sake, Art, don't go looking for a porter to carry your bags. Buck in and trot them over to Ike's yourself. You heard of him?" asked one of the by the teeth of an animal. fresh Siberian troops and after strong carry your bags. SPORTING SECTION OF THE TORONTO SUNDAY WORLD

REAL ESTATE KING IS CHAMPION JESS ON SHREWD LOANS

Kansas Has Had an Insight on Willard's Sharpness in This Game.

ALWAYS HAD THE BUG

Knew He Could Beat Carl Morris-The Start at Boxing.

NEW YORK, March 25 .- Altho Jess Willard went into the fighting game purely for the money there was in it, he knows more about real estate values along the Missouri Valley than perhaps any man in the middle west. He is a mortgage and loan expert and has executed some of the shrewdest loans ever "pulled" in real estate circles in Kansas. He has always made money, but aspired

He has always made money, but aspired to earning great big money.
Ray O. Archer, a quiet, sharp-eyed young man, who has been described in Chicagoese as "the keeper of the kale," is Willard's auditor and has in the past five years kept tabs on over a third of a million of dollars for Jess.

"Jess and I have been pals for the past ten years," said Archer. "We were practically boys then. Jess was nimeteen years old and he is just twenty-nine now, even tho some papers have it that he is thirty-three. Indeed I wouldn't be surprised if they had him eighty. We lived in Topeka, Kan., and Jess' favorité method of making dough was to hike to Wyoming, bring back a bunch of wild hosses and break them for the Topeka market, cleaning up a nice profit, I can tell you. He sure was some broncho

"At the time he was weighing about 180 pounds. But he always had an idea, which I shared with him, that he could make good in the ring. He could run faster, jump farther and swim better than any of the other boys, and we all thought a lot of his athletic ability. Besides the horse-breaking game he and I would make the Indian reservation near Topeka and trade horses, corn, and in fact almost anything.

"So, you see, Jess could always make money, but he had big aspirations. We often figured out the boxing game. We knew he could learn to box, but somehow we didn't know how to get started. Finally we took a trip to Kansas City and went to Jim Porteous, a well-known, boxing man. But the best Jim told us was to go and join a gym.

"We delayed that somehow, and soon I went to Mayette, Kan., and organized the Exchange Bank. Jess went down to Oklahoma and went to trading horses and mules, which I read was Tex Rickard's game too. About that time Carl

okianoma and went to training notices and mules, which I read was Tex Rickard's game, too. About that time Carl Morris was getting a lot of publicity. "Morris had leaped into the limelight by beating Mike Schrek at Sapulpa. Jess went over to Sapulpa and saw the mill. The papers began printing stuff touting Morris to take the championship from Jack Johnson, and Jess wrote me that he was sure he could lick Morris, even the he didn't know how to box. even the he didn't know how to box.

"He started in boxing in gymnasiums right away and kept in touch with me always. I used to go and see him fight, and he looked so good to me that it was easy for him to induce me to resign from the bank. We hiked to the coast, and it was I who brought him and Tom Jones together in San Francisco, I guess that is about the whole story.

"We have been partners in many deals." guess that is about the whole story.

"We have been partners in many deals in the past, and I think I stand good enough, for Jess will back me up to \$100,000 any time I want it. I have handled nearly \$750,000 for the champ.

"Some day he and I are going into the mortgage and loan business. We are going to come to New York some time and get about \$500,000 on 4½ per cent. Then we will take it back and make 10 per cent. That's the way we do 10 per cent. That's the way we do things' along the Missouri Valley.

"Jess is a corking loan man and he knows more about mortgages than any man I know of, and as I have been in the banking game in Kansas I think I

know something about that end of the siness game. 'And I'd surely rather trust to Jess than any banker I know of.

"It is the real truth that Jess went into the boxing game because of the money in it. You can figure it out for yourself, for he didn't learn to box until he was matured. He fought Jack Johnson bethan any banker I know of. cause he knew that by winning it meant great big money. And believe me, he'll never fight another black man."

EXHIBITION GAMES FOR BIRMINGHAM'S LEAFS

City—Report April

The Leafs will report at Jersey City to Manager Joe Birmingham on Monday, The Leafs' first exhibition game will be with the Dodgers at Brooklyn on April 10. They will play the following teams at

Jersey City on the dates given below: April 12-Easton, Pa. April 14-Poughkeepsie, N.Y.

April 15-Poughkeepsie, N.Y. April 19-Springfield, N.J. (two games holiday). April 20-Hartford, N.J.

Third Stanley Cup Game at Montreal

April 21-New London.

April 22-Bridgeport, Conn.

April 23-Bridgeport, Conn.

MONTREAL, March 25 .- Playing under the eastern rules, the Canadiens and the eastern rules, the Canadiens and Portland Rosebuds will meet tonight in the third match of the series for the world's professional hockey championship and the Stanley Cup. Each club has a victory to its credit, and the result of tonight's match will have a strong bearing on the resting place of the trophy. On their previous showing the westerners have a better chance to win under the six-man rules.

There may be another shake-up in the Canadiens over that of Wednesday night,

Canadiens over that of Wednesday night, when they won from the western team at strange rules. Arbour, who was the star of the Wednesday game, will likely be started out on the left wing, with Lalonde at centre and Pitre on the right wing. Poulin, altho he played a brilliant game on Wednesday, is hardly fast enough to compete with the speed of the Portland players at the six-man game, and will likely be held in reserve for the game on Tuesday, which is under western rules.

Portland will start the same six players as on monday night. Canadiens over that of Wednesday night

"Did you know poker is an art?" "No!"
"Fact. Here's an art school advertising 'Learn to Draw Properly."

RUSH UP TO LAST

Joe's Pets Will Be Busy at Jersey Carpenters Busy — Willard and Moran Spend Quiet Day Waiting for Bout.

> NEW YORK, March 25 .- Late today a large force of carpenters were still engaged in preparing he interior of Madison Square Garden for the bout between Willard and Moran. The ring had been creeted and most of the boxes placed in position on the main floor. Long rows of theirs were being placed in sections bechairs were being placed in sections be-hind the boxes, and the promoters stated hind the boxes, and the promoters stated that everything would be in readiness for the speciators when the doors were opened at 6.30 p.m.
>
> All day the box offices were besieged by persons who desired to purchase tickets, but with the exception of a few twenty-five dollar coupons the house was completely sold out before noon.
>
> Both puglists spent the day in quiet fashion. Willard did not arise until late, and after eating a hearty breakfast, took a long walk in Central Park. During the afternoon he kept to his room, where a a long walk in Central Park. During the afternoon he kept to his room, where a light lunch was served several hours before his departure for the Garden ring. Moran followed much the same routine, He took a cross-country walk during the forenoon, and spent the remainder of, the day reading and lounging about his training quarters.

LIPTON'S SHAMROCK IS STILL CRATED UP

As Big a Mystery to American Yachtsmen as Ever-Well Guarded.

NEW YORK, March 25.—The statement by Sir Thomas Lipton that he copes to race his yacht Shamrock IV. for the America's Cup next year, recalls to mind the fact that the challenger is still carefully boxed and under guard on the Brooklyn waterfront. Not for a moment since Shamrock IV, was hauled into drydock, with canvas covering, and boxed up, late in August, 1914, has the Lipton yacht been without a guard and careunion Jacks' manager of the Union Pack's hockey team. It is expected that all of the members of the team will follow suit. Success attended the efforts of the recruiting committee today.

DOWN IN THE BRINY?

RUSSIA WILL HAVE STADIUM TO STAGE ATHLETIC MEETS

Swedish Athlete Tells of Plan to Build Bowl in Petrograd.

TRAINING THE OFFICERS

Teaching Them the Physical Drill-Sprinter Hard at Work.

NEW YORK, March 25.—According to James F. Anderson, a Swedish athlete, plans for the erection of a stadium for various athletic sports in Petrograd, Russia, to cost \$500.000, are contemplated. Anderson is in this country to study the American methods of training athletes for track and field competition.

Altho a Swede, Anderson has been in the employ of Czar Nicholas for the past year, acting as chief administrator of physical culture at the schools for officers now serving in the European war. Archizsof, the premier sprinter of the Russian Empire, is at present at one of the training camps. According to Anderson, the sprinter has a record of covering 100 metres in 10 4-5 seconds.

While in this country Anderson will visit various colleges and athletic clubs, his first stop being at Columbia University. His principal object in making the trip is to learn the various methods of the coaches in conditioning their men. In return Anderson will demonstrate how the javeline should be thrown. The construction of the latter instrument, according to Anderson, was incorrect. He suggested that the long stick be made heavier from the metal point to the centre and gradually taper down to the end. This would eliminate considerable vibration in the throwing of the spear.

HOT SPRINGS RESULTS

HOT SPRINGS, March 25 .- The races Marie Miller, 109 (Murphy), 7 to

to 4 and out. 2. Lobelia, 107 (Ambrose), 11 to 5, 1 to 2 and 1 to 6.
3. Dr. Tuck, 107 (L. Gentry), 5 to 1, 6 to 5 and 1 to 3.
Time .56 3-5. Verde, Jay Thummel also

SECOND RACE:

POOR PUBLIC GETS IT IN THE NECK AGAIN

Stung - Willard's Statement on Bout.

NEW YORK, March 25.-Thirteen thousand spectators will crowd Madison Square Garden tonight to see Frank Moran of Pittsburg try to wrest the world's heavyweight championship from Jess Willard of Kansas. Altho the bout is not announced as for the title, and no decision by the referee is possible under the boxing laws, Moran might win the championship either by a knockout, a foul by Willard, or Willard's failure to go the full length of the bout.

The fight is the most important fistic encounter which has taken place since Willard won the title from Jack Johnson at Hayana last April, and is the first Willard has fought since that historic

1. Mars Cassidy, 103 (Lobert), 6 to 1, 2 to 1 and 3 to 5.

The sound of carpenters' saws and hammers today filled the big arena where the bout is to be staged, as a new structure of boxes and seats was hurriedly erected. It was promised that all would be in readiness this afternoon. Every seat in the brillding has long been sold, and would-be spectators, many of them from distant cities, arriving late, are clamoring in vain for tickets.

Managers gave warning today that counterfeit tickets, supposed to be redeemable at the Garden for admission tickets, have been sold in Boston, Philadelphia and Connecticut cities. They said no such tickets had been issued by the management and that they would not be honored.

Their training completed and both men asserting they are fit and ready, the principals spent a guiet day in preparamen asserting they are fit and ready, the principals spent a quiet day in preparation for the bout. Willard planned to pass the time in company with his manager, Tom Jones, and his trainers. Talk of the fight was barred, as Willard said he had made all his preparations, both mental and physical. A walk thru Central Park in the morning and an automobile ride in the afternoon constitued his outdoor program. He is keyed up for the fight, but shows no signs of restlessness or of impatience to have it finished. After a light dimner early this evening, the champion intends to go down to the Garden about 8 o'clock. He expects to weigh in at about 250 pounds.

Moran planned a walk early today and a good sleep this afternoon. Everything possible was done by his friends to keep his mind off the fight, as he has been impatient about it for several days.

(Continued on Page 5, Column 6)

FRANK MORAN IS GLAD TRAINING IS OVER BY FRANK MORAN.

I'm glad that my training is over. I am impatient to do battle with the big champion. The whole thing is getting on my nerves, especially the attention and admiration of the people who come up to see me work. They all want to shake me by the hand and ask me how I feel. Most of them tell me that all their friends are praying for me to win, and then they give my right hand an-

other hard squeeze. It makes

my hand tired and cramped be-

fore I even start to box.

dent at the training grounds after a hard morning's workout will illustrate:
Manager Donovan had given the welcome order that the practice was over. A play of some kind was under discussion and the whole team gathered around him in a circle at the plate. In the grandstand were Capt. Hutson and Col. Ruppert, who had come to Macon to observe just what they had bought for their cash outlay of \$130,000. They watched with unconcealed interest the animated scene at the home plate. In the centre of the rounds shoulders of Donovan towered over the outer ring, made up mostly of pitchers. Wild Bill was looking down at something and the captain and the colonel craned their necks to better see and understand.

"He must be after those kids who broke in the club house and stole the old balls," the captain suggested. "But I can't tell just what is wrong, to save me."

"Say, Duke," the colonel called to Far-July 4: Frank Lyon, Elk City, Okla., 10 rounds, won.

HICKEY'S 97 YONGE STREET

IMPOSSIBLE TO PICTURE JESS WILLARD IN DANGER OF KNOCKOUT BY MORAN

No Matter How Hard Sorrel-Topped Fighter May Try to Slip Over the Winning Punch, He Will Be Baffled, as the Champion Has Perfected a Defence That is Practically Impenetrable.

NEW YORK, March 25.—Bob Edgren, sizing up the big fight, says: It is almost impossible to picture Jess Willard in serious danger of a knockout, no mathic than the serious danger of a knockout in serious danger of a knockout, no matter how well Frank Moran may right or how hard the sorrel-topped warrior may try to slip over the polthogue that brought Jim Coffey's championship hopes tumbling with him into the resin dust of the ring.

Willard has more than mere physical will be some that the serious discouraging in the world than to lead at a plain target and find your shots falling short. A blow that even grazes the mark may do some harm; but, as we say in golf. "Never up, never in." A jab that falls short does no damage, and only leaves the assailant open for a countering blow.

of the ring.

Willard has more than mere physical advantages in this fight. He has a good practicel working knowledge of the best way to use those advantages.

Willard has made an especial study of

way to use those advantages.

Willard has made an especial study of defence.

When Jess was in Los Angeles waiting trial after the death of Bull Young, he spent much time around the offices of Earl Rogers, his lawyer. Mr. Rogers afways took a keen interest in sport. He liked Willard for his good nature and his many fine qualities: When Willard was acquitted Mr. Rogers took him aside one day and spoke to him like this:

"Willard, there's no reason why you shouldn't be champion of the world. You're a better man that Johnson ever was. I've studied, you in court and I know there's no yellow streak in you. I know there's a yellow streak in Johnson, for I've seen him dog it in some of his early fights. That yellow streak will never show when he's against a man he knows he can whip, but if he saw you against him, and felt that he couldn't hurt you, he'd lose heart and you'd surely knock him out.

"There's only one thing you'll need to have to whip Johnson. You must have a defence that he can't get thru. Then, when he finds he can't whip you he'll know you will whip him in the end. If you haven't a good defence he might be able to beat you. But with a good defence you can wear him down. Spend a year studying out a perfect defence and then go after him. If you get him into a ring you'll be champion."

In telling me the story Mr. Rogers said that Willard started in at once. He worked for hours every day, studying defensive tactics, trying over and over again the various ways by blocking and avoiding blows, perfecting himself in counter-hitting. It was this long preparation in defence that made Willard invincible in Havana. From the beginning of the first round he stood squarely up to Johnson, yet blocked or knocked aside or avoided the black champion's dangerous swings and hooks and uppercuts.

It is almost impossible to jab Willard on the head when he's fighting. He pulls

have a defence that he can't get thru. Then, when he finds he can't whip you he'll know you will whip him in the end. If you haven't a good defence he might be able to beat you. But with a good defence he might be able to beat you. But with so good defence you can wear him down. Spend a year studying out a perfect defence and then go after him. If you get him into a ring you'll be champion."

In telling me the story Mr. Rogers said that Willard started in at once. He worked for hours every day, studying defensive tactics, trying over and over again the various ways by blocking and avoiding blows, perfecting himself in counter-hitting. It was this long preparation in defence that made Willard invincible in Havana. From the beginning of the first round he stood squarely up to Johnson, yet blocked or knocked aside or avoided the black champion's dangerous swings and hooks and uppercuts.

It is almost impossible to jab Willard on the head when he's fighting. He pulls away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short, away from a jab and makes it fall short.

The fill of Willard's recent training work in trade con lists in the lets his head roll with every punch that lands on his face.

In telling me the story Mr. Rogers said that Williard started in at once. He work in trade con lets in the lets his head roll with every punch that lands on his face.

The noticed that he lets his head roll with every punch that lands on his face.

The noticed that he lets his head roll with every punch that lands on his face.

The noticed that he lets his head roll with every punch that lands on his face.

The noticed that he lets his head

force. It seemed merely a mild massage to Willard.

Besides these defensive, tricks, Jess uses a little ducking occasionally. It may seem funny for a man 6 feet 6 inches tall to duck blows. It's so much easier for him to lean back and avoid them that way. But perhaps he learned how to duck while in the circur. He does it fairly well. However, I'll say right liver that he didn't duck under a single blow in the Havana fight, and, if he had Johnson might have been able to reach him with at least one of his well-known uppercuts, which might have saved changing the puglilistic map after the battle.

So Willard uses all of the tricks of defence seen in bouts between skilful small men. He hasn't been content to go along fighting on his physical prowess alone.

Chic Miller and Bud Humphries Take Long Walk to Bowling Tournament.

the assailant open for a countering blow.

Moran, in his Coffey fights, stood staunchly up to Coffey's blows, waiting his chance to plunge suddenly in with a fielding right for body or faw. But it will be discouraging work to try to work in at "delay right" on Willard, who will be holding Moran off with the longest left jab ever seen in a ring. While Moran is waiting, Willard will be bouncing lefts from his face, a thing that isn't good for anyone induling in watchful waiting.

Willard's left bothered the life out of Johnson. The first blow of the fight was a hard left jab, with a twist of the glove at the finish that made Johnson's eyes fill with water and interfered with his sight, as he was forced to plunge in within hitting range. Willard held Johnson off often with that left. It was his front row of trenches.

Willard uses the left well in countering right-hand body punches. One day Jim Savage plunged in to shoot a right into Willard sbody. Willard hooked his extended left against Jim's neck, whirling him around and throwing him headlong thru the ropes. Incidentally, the shock of the blow, added to the jerk caused by missing his own lead, nearly dislocated Jim's right shoulder.

It call of Willard's recent training work is the defense of themselves, which they will conclude their hike at the White House steps. Upon arrival they will be guests of honor of P. T. Moran, president of the Chamber of Commerce, during the three weeks of the tournaments for the plans on "Woodrow Wilson Night" for the president. These two boys have been conspicuous characters in bowling tournaments for the past three years. Like all international events, there are certain pin boys that put in their appearance each year, the majority of whom appear in time for the chamber of defense the country of the majority of whom appear in time for the chief.

ment and will have the honor of setting the pins on "Woodrow Wilson Night" for the president.

These two boys have been conspicuous characters in bowling tournaments for the past three years. Like all international events, there are certain pin boys that put in their appearance each year, the majority of whom appear in time for the opening "a la King Hobo."

"Chic" and "Bud" left Boston penniless. Their stock in trade consists of picture postcards of themselves, which they are selling en route to defray expenses. A program has been arranged along the entire route to entertain the two boys in all the principal cities by members of the Atlantic Coast Bowling Association and bowling alley owners.

They will be compelled to walk an average of 25 miles a day, including Sundays, and have selected as a route the New Haven tracks from Boston to New York. From New York they will follow the Pennsylvania Railroad into this city.

HUNDRED MILLIONS IN THE BOWLING GAME

Has Baseball Backed Off Map as Far as Investment is Concernea.

WASHINGTON, D.C., March 25 .- Will washingfor, B.C., March 25.—Will the baseball schedule interfere with the Atlantic Coast Bowling Association tournament here? Can baseball men blame bowling for the decrease in patronage in baseball during the 1915 season? These are the questions many bowling enthusiasts have asked John J. Donovan, secretary of the Atlantic Coast Bowling Association, when they hear the cry that the vast sum of \$34,000,000 is tied up in baseball.

the vast sum of \$34,000,000 is tied up in baseball.

This amount is a paltry sum compared with the money invested in bowling alleys in the United States. The money tied up in two hundred thousand bowling alleys alone represents more than all the money the magnates have tied up in contracts, ball parks, salaries and other expenses.

A good illustration of this is found when figuring the cost of two hundred thousand bowling alleys in the United States, each one representing an average cost of \$5000; that is, barring the pins, balls, and the cost for rent in theevent of managers not owning their own buildings.

This would make a total of \$100,000,000 tied up in bowling alleys alone, with \$5,000,000 for pins and balls and other playing equipment.

Take New York, for example. It has about three thousand seven hundred and fifty bowling alleys, which would make a total cost of \$18,750,000, not counting the pins, balls, furniture and fixtures, which will represent an investment of almost as much again. In New York alone there are more than three hundred thousand regular bowlers, which is quite some food for thought for the baseball magnates.

There is hardly a city of any consa-

some food for thought for the baseball magnates.

There is hardly a city of any consequence in the United States but what has at least \$3,000,000 to \$5,000,000 invested in bowling, and, judging from the healthy increase in the last two years, baseball men are justified in claiming that some of the decrease in patronage has been caused by bowling.

Three Toronto Teams in Action on Saturday-How They Stand.

TOLEDO. Ohio, March 25.—Canadian bowlers wiil make their first appearance in the present tournament of the American Bowling Congress tonight, when three of Toronto's crack clubs will essay to beat the high score, 2905, of the Commodore Barrys of Chicago. Strong clubs from Toledo, Akron, Columbus, Cleveland and Detroit will also be in action and some tall marks also be in action and some tall marks are expected by the fans.

The two-man leaders, Thoma and Marino of Chicago, with a score of 1279, had their bid challenged yesterday when Maurer and Glass of Jamestown ran 1220. Glass cost the pair the lead when he made two errors on top of a row of strikes in the first game. His subsequent good work was not fast enough to down the Chicago leaders.

In the individual event, F Shaw of Chicago and B. Huesman of Cincinnati are tied for first place with the score of 685. S. Thoma of Chicago holds the high score in all events with 1919. also be in action and some tall marks

Tells Why He Doesn't Use His Right Reason—Sounds Well.

NEW YORK, March 25.—"I have been asked why I don't use my right hand more in the ring," said Battling Levin-NEW YORK, March 25.—"I have been asked why I don't use my right hand more in the ring," said Battling Levinsky recently.

"I can answer them all at one full swoop. A man who tries to cross with his right every few minutes doesn't stay in the record books very long. Tossing your right at a man's chin is just like tossing dice. Sometimes you win, but most times you lose. The percentage is against you all the time. I've done pretty well with my lone left, haven't I? I've got nearly \$30,000 in the bank and own a lot of property in Bridgeport, drive my own car and have only an invalid ear to show the line of business I'm in. Let me tell you something. I've been fighting all the largest men in the ring, and fifty to seventy-five pounds handicap has been nothing so far.

"The men I have met are all dangerous hitters and what would be the sense of me crossing with my right to take the chance of having them beat me to it? I'm only twenty-three years old and haven't attained my full growth as yet. What I'm aiming at is to wait until I get as big as the rest of them. Then and only then will I go in there and trade right-handers. I don't want to be knocked out before my time.

"If I tried right hand punches I'd get it sooner or later. It can't be done during a successful career. Terry Mc-Govern traded rights and lost the toss. Ketchell tried to nail Papke with a right early in the Los Angeles fight and Papke beat him to it and brought him down for a world's title. I don't want to be knocked out before I've grown as large as Nature intended I should be. When I'm able to stand up and swap punches with men somewhat, near my size I'll gamble rights with them, and not before. I go along winning all the time, so why should I change my plans just because the fans would like to see me lying on my back listening to the mocking birds? Cross my right? Not until I'm a great big boy."

REAL LIVELY PUNCH

Has Hit Over Three Hundred Thirteen Years Out of Nineteen.

DETROIT, March 25.—Wahoo Sam Crawford of the Tigers is entitled to honorable mention in any extended resume that has to do with 300 hitting. In nineteen years of professional baseball playing Barber Sam has hit 300 on thirteen different occasions, and eleven of these marks were made in the National and American Leagues. Crawford's best major league mark was made with the Detroit Tigers in 1911, when he hit 327. As a member of the Tigers he has hit 322, 323, 311, 387, 325, 316 and 314.

MRS. JESS WILLARD IS

Husband Wires That He Will Win Sure - Home at Once.

CHICAGO. March 25.—Mrs. Jess Willard, wife of the heavyweight champion, is not at all worried concerning the outcome of the bout between her husband and Frank Moran in New York

husband and Frank Moran in New 1912.
City tonight.
"I received a telegram from Jess saying that he will win and will return to Chicago on the first train after the fight," Mrs. Willard said.

A special wire from the ringside to the Willard home here will bring to the champion's wife and their eight-year-old daughter a detailed report of the contest.

YANKEES NOT AFRAID

Donovan's Tribe of Clouters Expect to Hammer Wasnington Marvel.

NEW YORK, March 25.—The fact that Walter Johnson is sure to be the op-

Walter Johnson is sure to be the opposing twirler in the Yankees' first game of the 1916 season does not appear to be causing any great concern among the Donovan boys. Hark to one of the Yankee veterans:

"They sent Walter against us allew times last year, and I guess we did no worse than break even, in fact, I think we won more than we lost. Slim Caldwell can always give Johnson a great argument, and he will have Frank Baker to oppose in his next attempt to down us. You know old Baker always hit well against the Washington marvel, better than he hit against some other pitchers not so well known. The bigger they come the harder they fall. Bring on your Johnson."

WARNING.

"I cannot understand why my second husband is so fastidious," confessed a Washington lady to her bosom friend, "He scarcely eats anything. My first husband, who died, used to eat everything I cooked for him."

"Did you tell your present husband that?" that?

"Yes."
"That's the reason!"

NEW SERIES OF CANADIAN STORIES

(Continued From Page 2).

the silk-lined casket, where they looked more ghastly than ever. The coffin was prepared for shipment and taken to the depot ready for the next morning's train east. Nelson watched the proceedings, but took no part in them. He could not explain why, but his sense of relief was increasing.

That evening the men gathered around the fire, but conversation languished. Each man was so intent with his own thoughts he did not notice the door behind them "Got the letter written, Nelson?"

asked Babe, at length breaking the "Not much," answered Charlie; 'a letter like that will take two or

three days to write." "Is it very important?" asked a cheery voice behind them.

At the sound of Arthur Carson's well-known voice, each man was on his feet. Arthur smiled as he noticed the mingling of terror and reasef on the faces of the miners. Nelson's, alone, recorded relief only. After the first terrified surprise, there was a general rush to shake Carson's hand, and it was not until

that Nelson said. "Come, Carson, old man, the joke is on us, all right, but please explain it. You've carried it pretty far, you know. Put us out of suspense, will you, like a good fellow?"

after the excitement had subsided

"So I fooled you a bit, did I?"
Arthur laughed. "Well, I guess
maybe you deserved it all. You
see, boys, I happened to know all
about this ghost-hunting beforehand. Old Dan had told me. I Old furniture on which the varnish margined and lost its lightly or a table top that is scratched of discolored—should be scraped and done over. It can be made to look as sood as new. Scrape off all of the old varnish manufacturers sell varnish removers, which are excellent, provided the directions on the containers are followed explicity.

Wallable a knife and elbow grease will lovery well and are cheaper. Be careful not to scratch or dig into the wood when the varnish is all off rub the rood smooth with fine sandpaper not coarser than No. 00.

There are often ugly dents in the rood, especially on table tops. Where the fitres of the wood have simply een crushed down, not a plees ouged out or broken off, the wood asy be raised so that the place will of the old varnish out of the dent is and sold and sold me. If have been looking after him a bit —a matter of a broken leg, but he is all right again. So when you three the fitners again. Wet the place well. Lay two or three thicknesses of we blotting paper to the thicknesses of we blotting paper to the dent and set a hot flation on it. Put dry paper round to keep the iron from discoloring the wood. If the wood is all there it will usually swell back the the wood when the varnish is all off rub the sold swell to finish.

It will usually take three or four days before being rubbed to a finish with fine paper. Just smooth it off lightly and apply another coat. The last coat should be thinner it is finished over. The lost coat should be allowed to stand longer. It was studying medicine. Never it is finished over. The lost coat should be thinner in the rick on you."

The object of the wood with the variety of the wood is all there it will usually swell back the game on me, I determined to turn the rick to wood it. The wood is the wood it the wood is all there it will usually swe have been looking after him a bit

and should be allowed to stand longer. It is then rubbed to a finish with fine powdered pumice stone.

The last finish is put on with rottenstone. If a very high polish is desired use linseed oil with the pumico and rottenstone. If a dull or egg-shell finish is wanted use water in place of knew just why I brought them over here with me; perhaps mainly because the cabinet just fitted into my box, so I put it in. As for the blood stains, I shot a couple of birds that morning and saved the blood."

orange shellac can usually be had at any drug store, all cut and ready to use. If it is too thick—and it usually is—thin it out with grain alcohol. If you have to cut the gum shellac yourself be sure to use the grain alcohol.

A great many stains may be taken "But how did you have all that truck up there without us seeing?" "Oh, took them earlier in the day and hid them in old Dan's shack. I have been staying there ever since By-the-way, I called on two or three of you last, night, but I didn't get much of a welcome."

A great many stains may be taken out of mahogany furniture with the following preparation: Spirits of salt six parts and salt of lemons one part, mixed together. Drop a little on the stains and rub them until they disappear. "I should say not, powdering your face up that way! Now I know why we could not find the right hand. I have a notion to make you pay for that coffin you made us

> "Guess the fun was worth the price anyway. 'Tisn't every man that has the privilege of seeing his own coffin bought. Now, maybe we had better go over to the depot and rescue that skeleton. No use scaring the old governor back home."

interesting recruiting rallies of the year will take place. Sunday evening at the Royal Alexandra Theatre and for the purpose of making it a success Lieut.-Col. Burton's Bantams and Lieut.-Col. Cooper's celebrated Buffs have united. The speakers for the occasion will be the Hon. W. J. Hanna, K.C., Lieut.-Col. Cooper and Lieut.-Col. Burton.

In addition to these superb speakers, an excellent program has been arranged for, and those contributing include: James Miline, Lieut. N. Fraser Allan, Madame Le Mar, Mrs. Stanley K. Bennett, Ernest Caldwell, Capt. S. K. Bennett, Ernest Caldwell, Capt. S. K. Bennett, and others. The band of the 134th Batalion, C.E.F., will also be in evidence. As a monster crowd is expected it would be advisable to be on hand early. The doors will open at 7 p.m., and the meeting will commence at 8 o'clock. To keep the audience in proper spirit the 134th band will play from 7.30 to 8 o'clock.

MISS STRONG'S SHOWER. Miss Marie Strong gave a most suc-

cessful musicale and shower at her studio for the men of the Royal Leinsters, for which Capt. Eric Phillips had made an appeal for socks. Those taking part in the program were Dr. O'Hagan, who read some of his own poems; Miss Rita Brodie sang, also Miss Kingsford, Mrs. Monteith and Mr. Gerald Moore; Mrs. John Garvin recited some of her own compositions and Mr. William Phillips spoke on the Royal Leinsters. The grand plano was piled up with the contributions of piled up with the contributions of socks, wool, tobacco, cigarets, etc. At the close of the program coffee was served and an all too pleasant evening came to an end with a very satisfactory result to the 7th Battalion of the Royal Leinsters.

(Continued from Page 1).

a point to the southeast of Posloff, southeast of Lemberg, and they also occupied the Villages of Latchka and Melevka on the Dniester

It was reported from Petrograd on Friday that the Russians had captured all of the German lines and barricades on the Olipa sector, southwest of Dvinsk. They also repulsed desperate counter-attacks in the Jacobstadt sector where they had pierced the German-lines on the preceding day. In addition to this the Russians destroyed trenches of the enemy at many other points. They forced the crossing of the Dwina near Freidrichstadt and captured a machine gun. As a sort of reply to the German claims of Sunday last that the Russians made no gains anywhere, the general headquarters of the emperor announced that the Russians took prisoners nearly 1500 officers and men and captured, to the northwest of Postavi and around Lake Naroczin the three days' fighting, the following: 18 machine guns, 26 field mortars, 10 trench mortars, 2 mine throwers, 1 howitzer of 15 centimetre calibre; 4 searchlights, 637 rifles, case of bombs, 300 grenades and 12 carloads of shells. southwest of Dvinsk. They also repulsed desperate counter-attacks

The Germans Sunday made fresh attacks against the French positions at Douaumont and on the Vaux-Damloup lines to the north of Verdun Saturday night and were repulsed by the French. Much aerial activity prevailed on the part of British and French aeroplanes Sunday. Giving up their offensive, at least for a time, north of Verdun, the Germans made an attack Monday on the Malancourt-Avocourt sector on the western bank of the Meuse and west of Bethincourt where fighting was proceeding the previous week. The attack was repulsed everywhere except at a small part of the Avocourt
wood in which the Germans gained a footing by the use of flame projectors. The Germans Wednesday made a violent attack on the
same front and were firmly resisted everywhere, meeting with a general check excepting at a small hill of Haucourt, about five-eights
of a mile southwest of Malancourt, where they gained a footing.
Thursday and Friday the Germans made no important infantry at Thursday and Friday the Germans made no important infantry at-

General Jan Christian Smuts, commander-in-chief of the British Expeditionary Force in East Africa, defeated the Germans and drove them from their lines on the Ruwu River, driving them to retreat to the south. The Germans were compelled to withdraw as a result of a brilliant turning movement by South African mounted troops and they were severely punished by a frontal attack of the British.

The Germans made an aeroplane raid with four machines on Kent Sunday, killing nine and injuring 31 persons. Flight Commander Bone of the navy, pursued and brought down one of the German seaplanes after a fight of 15 minutes.

The enemy's strategic plan, says

The offensive was to have been de-

correct.

the enemy last summer in the east

Enemy's Three Objects

The chief fighting of last week has been going on in Russia botween the lake region southwest of Dvinsk to the Jacobstadt sector, where General Kuropatkin has brought up heavy reinforcements. Whether the Russians of all war, and it is particulary true now. merely intend to give the Germans a good knocking about, whether they struck first to anticipate an offensive which the Germans were preparing to counterbalance their loss of prestige at Verdun, or whether they have really started the opening stages of their great offensive which is to be conductgreat offensive which is to be conducted in unison with the allies in the west, can only be known by the developments of the future and perhaps, not until the official history of this war comes to be written. At least it is certain that the combined general staffs of all the allies are governed in their plans and decisions by more or less exact information which is witheld from the world, and they alone less exact information which is witheld from the world, and they alone know the exact reasons for striking any serious blows. The Russians, for instance, may only wish to give their new troops some experience in battle.

Not Yet Reached Climax

The fighting so far has not reached its climax. It may be certain that it has already set in motion large forces of Germans from other portions of the front, and that they are being burried forward to the danger point.
So the decision should be arrived at in the next few days whether the Rus-sians are to curl up the lines of Von Hindenburg or be content with a considerable success, and the knocking out of large numbers of Germans so as to put out of action for months the ten or twelve army corps which Von Hindenburg had concentrated for ul-

Two Successes

The two chief successes won by the Russians this week was the piercing of the German line near Jacobstadt, and the capture of all the German line and barriers in the Olipa. sector, to the southwest of Dvinsk. The Germans have hurried up reinforcements and launched counterattacks at these two vital points, but he Russians were still much too strong for them, and refused to be stayed in their advance, dispersing these hostile forces by fire and bayo-

The Russians have also collected great superiority of artillery, which has been effective in demolishing the German defences, and in helping their infantry to advance under its pro-The Germans in this trict, owing to their shortage of men, liave entrusted the defence of many positions to a great amount of war machinery and a comparatively small number of men as witnessed by the spoils captured around Lake Narocz and near Postavy in the three days' fighting which opened the offensive.

Verdun Most Important

In order to make clear the im-portance of the battle of Vordun it is well to review some of its features in the light of later events. The attack great German push, the charge with the bridle off, an assault to be pressed thru at all costs.

The French in an official resume of

The French in an official resume of the first phase of the battle said that the spot was well chosen for the launching of the great offensive, for the lines originally held to the north of this city, had in part of their rear a river, for the Meuse takes a bend to the east just north of where the main defensive position of the French lies, and if they nad elected to make their stand on the front line instead of retreating, their troops would have been in grave danger of being cut off. So the point of striking in the great Ger-man offensive in the west on which hung the future of the war was skill-

Did Foe Strike Too Soon?

It cannot be told until the history of this war is finally written whether the Germans struck too soon, or whether they had any other choice than striking as they did, and at the time they had any other choice than striking as they did, and at the time they did. or whether they were at liberty to gtrike later, even had they so willed. Hilaire Beloc says that the whois

Dangerous Condition Relieved Just in Time by "Fruit-a-tives."

632 Gerrard St. East. Toronto. For two years, I was a victim of Acute Indigestion and Gas in the Acute Indigestion and Gas in the Stomach. It afterwards attacked my Heart, and I had pains all over the body, so I could hardly move around. I tried all kinds of medicines, but none of them did me any good. At last, acting on the advice of a friend, I decided to try 'Fruit-a-tives.' I bought the first box last June, and now I am well, after using only three boxes. I recommend 'Fruit-a-tives' to anyone suffering from Indigestion, no mat-50c a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

losses on the enemy in-comparison to those sustained by themselves that this great offensive of the enemy should be a strategic defeat. In that alone the whole energy of the French command was determined. It was the object of the entente alliance to make that offensive as costly to the Germans as it could possibly be made. The test of the French success or failure would be not the ultimate position of the line, but the higher proportional exhaustion and dwindling of the enemy's military capacity.

Methods in Contrast Methods in Contrast

The methods of the French and the Germans are also in contrast. The French strategic plan consists in detaining the advance of the enemy by as small a force as can possibly sustain the full shock of the enemy and in mainitaining in reserve all the men that possibly can be spared, with the object of bringing such forces into play just at the right moment to achieve the maximum result. It requires great knowledge of the resisting powers of your troops, it requires careful mathematical calculation of the possibilities, it is an extremely risky business, but like all risky businesses, if successful, it earns rewards in proportion to the risks. The operations of such a strategic scheme was seen in its grandest scale in the vast encounter of the Marne. It is exactly suited to the French genius.

German Scheme Different The Germans' tactical and strategi-

authority, is already governed by the exhaustion of his useful reserve. Against this, the allied superiority in s wholly for the offensive and not for the defensive. It embodies the massing of large forces in a great batter-ing ram, reinforced by heavy guns in thousands, and shells by the million. numbers is getting more and more striking.

In such numerical situation, the enemy in the west was in need of a very immediate offensive.

Such offensive should have an immediate political object to produce an effect at home and in neutral countries. The German generals argue that when once this sort of offensive is launched once this sort of offensive is launched and fed by reserves no losses can stop it provided that the reserves are large enough. It includes the drugging of men with ether, and the raising of their passions to fever pitch, so that they will be more forward in delirious enthuslasm and brutal ferocity without stopping to consider their losses. The ultimate object of this offensive was much more, the breaking of an out stopping to consider their los

How French Won Out

Against such an offensive the French had to contend. This is how they did it. Instead of getting excited about the firing of two million shells in a few hours against their forward lines, which extended in a curve about Verdun, the French general staff kept cool and left to the covering troops the task of holding the lines during the day. As the attack of the enemy developed they were to retire on pre-1. To break the French front, and at the very best get right thru, separating the French armies, finding himself able to operate on either flank, of either part, and, in general, determining the campaign in his favor so far as the west was concerned.

2. But breaking the French line was something of your dealerships of the second threaking the second. pared positions in their rear during the night. They were all the time told to night. They were all the time told to inflict the maximum losses on the Germans, and to make them pay dearly for every inch of ground that was gained. As to the losing of guns, it was considered that a gun amply paid for itself, if worked up to the last minute against the oncoming enemy. Probably no more than two divisions, certainly not more than three, bore the whole shock of the German offen-sive for the first four days of the in-fantry fighting, during which the French retired to their present lines itself, or some point in the magic circle of Verdun. Thus, he might prevent one army and, perhaps, two, from appearing in the field against him. Even if he lost many men, he could hope to strike at the moral of the foe, at least on the civilian side. on the ridge of Louvemont. The Germans started the fighting by throwing units from 14 divisions against the French, and by Saturday of the first week, they had increased their strikon the civilian side.

3. Even if he falled in the foregoing two objects, he might be able to point to the capture of thousands of guns and thousands of prisoners which would still have a singular effect on opinion in neutral and allied countries.

The Evench object was post the ing forces to 25 divisions. Time of Greatest Danger

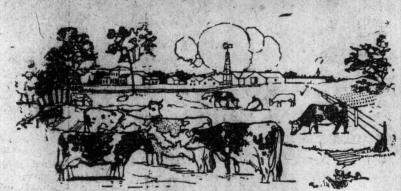

The time of the greatest danger to on the first Saturday after the offensive began, when the Germans seized the Douaumont position. Ultimate possession of this ridge might have

Let the Farms Give Health To Your Children

Back of the Farmers' Dairy there is a big idea and a big organization. Many of the best farmers in Ontario set out to provide a more adequate and hygienic supply of milk for the City of Toronto. They began by establishing thoroughly sanitary farms and a thoroughly hygienic delivery system. Then they built the finest and most up-to-date dairy in America - the "Wonder" Dairy.

Walmer Rd.

Bridgeman Street

This Rich Milk is Health-Giving

Freshly shipped from the finest of sanitary farms-from the best-conditioned and regularly inspected cows-milk from the Farmers' Dairy will give to your children the lusty bodies, rosy cheeks and happy faces that all children in the country acquire. The extrarichness of the milk is a safe basis for building up the health of your children.

> There are four ways in which you can obtain a trial bottle of this better, richer and purer milk-call yourself, write us, stop our driver, or easier still-

Phone Hillcrest 4400

thus made like an angry, raging flood. It was then with exact calculation that the French threw in their fresh troops, probably two divisions, one of which was Breton. These reserves by their counter-attacks reone of which was Breton. These re-serves by their counter-attacks re-gained the ridge and saved the situ-ation. The Germans fought desperate-ly until Tuesday, when the events on this line ceased to interest the writer of the German official communiques. Then the first offensive failed.

Next Stage in Battle

The next stage was a change in the direction of the German attack. The enemy brought up fresh troops along the highway from Metz and attacked the fort and Village of Vaux. This new movement was in itself a sign of defeat.

The first day he stole a march on the French, and some of his units got into Vaux village, but were promptly ex-pelled by a French counter-attack. Laer he made some progress here, but the main defences of the French held irm, and the Germans again confessed firm, and the Germans again confessed to failure by attacking the French on the western bank of the Meuse. The offensive here at first made headway, but it was again arrested at the main defensive position of the French. Next, the Germans tried again to capture the Douaumont ridge, but they were foiled Douaumont ridge, but they were foiled n a series of attacks. The next move of the enemy was to attack the Avocourt Malancourt front, but here the only ground that they gained was thru the employment of flame projectors. The French are now planning to emthese in retaliation. Measures are also being studied to protect the sol-

Losses of Germans

As to the losses of the Germans, it is safe to place them at 300,000. The French did not lose one-fifth of this number of men. The French also probably did not employ over 200,000 men in this batwhile the Germans probably eventually employed half to threequarters of a million men.
It is said by competent judges that

the German losses have been so great in this misadventure as to cripple their striking power in the west for months to come, if not for good.

Events in East Cure of Epileptic Fits Events have not followed fast on each other in the Armenian, Persian and Mesopotamian theatres of the war, for the simple reason that in these Mother Had Appealed to Three Doctors in Vain--Cured countries there are vast distances for armies to traverse. The poor economic condition of the inhabitants who live This letter from Mrs. Noxel is en- he would not undertake to cure epidorsed by Mr. H. J. Mahaffy, druggist, lepsy, as no doctor could cure it. That Port Colborne, Ont., as being true and night I went home very much discourarest. While it reports a most renarkable cure of epileptic fits by use of Dr. Chase's Nerve Food, it only goes to corroborate similar cures reported weeks that he slept well. I kept on by others. in constant misery owing to the preda-tory habits of the Turkish masters makes it impossible for them to give adequate support to an invading army in the shape of forage and provisions which have to be carried with the to corroborate similar cures reported by others.

Mrs. Henrietta M. Noxel, R.R. No. 1.

Humberstone, Ont., writes: "I cannot help writing to you, as I want you to know what a blessing Dr. Chase's Nerve Food and Kidney-Liver Pills have been to my boy. He was taken with very violent fits, would twitch all over, his eyes would turn towards his nose, his jaws set and his lips turn almost purple. He would clench his fists tightly, become unconscious and troops as they advance. It is probable that the Russians have adopted the denot system of supply which consists in sending small forces forward to clear the way after the main body of the enemy is defeated. After these advanced detachments come the commis-ariat officers and men who accumulate stores ahead of the army so as to have supplies waiting for it as it comes up This is a work which requires several months. That the Russians have found a solution of the transport problem in cral hours he would wake up sighing it had not been for Dr. Chase's Nerve and so weak he could not stand. I was afraid he would die and took him to the doctor, who pronounced his case epilepsy. As his medicine was not offective and the fits continued I took him to enother decrease the continued it took that I am acquainted with Mrs. this theatre of action has been proved by their bringing much seige artillery over mountain tracks for the capture of Erzerum. As heavy seize guns weigh from 50 to 100 tons, according to their calibre, it was a feat of consid-Henrietta M. Noxel, and believe that erable merit to drag them forward in the rapid manner that they were dragged up.

the statement she has made in regard On Road to Sivas state that he could not sit down or lie Dr. Chase's Nerve Food, 50 cents

Latest information which has been nt out from Petrograd shows that the

and that they will soon approach Erzignan, 60 miles from Erzerum, which is reported as having been eva-cuated by the Turks. The Russians did cuated by the Turks. The Russians did not begin this advance till they had rendered their flanks secure by the cap-ture of Bitlis, and the taking of ade-quate measures to capture Tre-bizond, so as to cut off any danger of flank attacks by the enemy. Therefore they expect to be engaged only in the comparatively sim-

ple matter of frontal fighting without running serious risks of the Napoleonic surprises of the battlefield. By taking the Turks with a standup fight in the open field, the Russians expect that they will cause the fatalistic Moslem soldier to stampede as soon as they should gain any initial successes in a battle. Little opposition of a serious nature is expected by the Russians for several weeks. They do not believe that the Turks can put up much of a resistance till Sivas is reached.

Force Separate Unit

to the czar, and has steadily and pas-sively resisted all attempts of the Turkish and German agents to seduce it from its allegiance to the Russian erown. This army has been strengthened by several Siberian army corps, and the whole makes a pretty large force for use against Turkey.

The Russians by Instituting their offensive from below Dvinsk to the Riga sector may aim at preventing the Germans from sending any assistance to the Turks.

In Persia the campaign is also pro-ceeding satisfactorily. The Russians are gradually occupying town after town. Ispahan, the ancient capital of Persia was entered the other day, and the inhabitants who had their resources exhausted by the exactions of the Germans and their mercenaries, turned out and gave the Russians an enthusiastic welcome. They know that there will be no further robbery of their longings.

KINGSTON HOTEL BURNS

Frontenac Hostelry Totally Destroyed About 8 o'Clock' on Saturday.

KINGSTON, Ont., March 25 .- Fire broke out at 8 o'clock this morning in the Hotel Frontenac, and fifty guests, thirty of whom were officers taking a special course of instruction here, had an exciting time. Percy M. Welsh of Montreal, brother of Archibald Welsh, manager of the hotel, was in the furnace room and noticed some paper and ruboush on fire. He ran to get water to put out the blaze but when he returned he could not get at the fire for the smoke. The fire broke out thru the flooring into the kitchen and dining-room and in a short time every room in the hotel was fillkitchen and dining-room and in a short time every room in the hotel was filled with smoke and the guests in the dining-room and in their bedrooms had to make a hasty exit. They came out of windows onto the fire escapes and down ladders placed by the firemen. The loss will be covered by insurance. The hotel is owned by the Frohtenac Hotel Company, composed of lotenac Hotel Company, composed of lo-cal men, and it is announced the da-mage is not such as to interfere with carrying on the business without in-

NAMED AFTER PREMIER

Located in B. C., and Will Be Known as Sir Robert and Borden.

OTTAWA. March 25.—The geo-graphic board has decided to name a glacier and mountain after the prime minister. The mountain is nine miles minister. The mountain is nine miles toutheast from Doreen Sta ion, in the coast district of British Columbia, and has been named Sir Robert. The glacier is at the foot of Sir Robere, and will be known as Borden. The name of Mount Cavell is officially gazetted to day. It is about 12 miles south of Jasper, B.C. The official notice reads; "A prominent isolated snowclad peak, 11,033 feet above sea level, distinctly visible from Jasper, named to perpetuate the memory of Miss Edith Cavell, the heroic English nurse who was cruthe heroic English nurse who was cruelly executed by the Germans."

THE ONLY GIRL" IS **BOOKED FOR ALEXANDRA**

Musical Piece by Victor Herbert is to Be Seen Week of April 10.

At the Alexandra Theatre, week of April 10, there will be disclosed for the first time in this city a musical cornedy entitled "The Only Girl," the newest work of Victor Herbert, who compose the music, and Henry Blossom, who wrote its story. One of the distinguished marks of this delightful musical play is said to be the refreshing originality of its score, together with the charming book supplied by Henry Blossom. Joe Weber, who is responsible for the production of "The Only Girl," has provided an excellent cast, which includes Wilda Bennett, Leuise Kelley, Olga Roller, Vivian Wessell, Leona Stephens, Thurston Hall, Ernest Torrence, Jed Prouty, John Findlay, Richard Bartlett and others.

FUNERAL OF COL. MOORE is held at hamilton-

Honorary Commander of Thirteenth is Buried With Military Honors.

MEN OF NOTE ATTEND

Sir John Gibson and Brig.-Gen. Logie Honorary Pallbearers.

By a Staff Reporter.

HAMILTON, March 25.—A most impressive military funeral was held here this afternoon, when the remains of the late Alexander Huggins Moore, hereaver, lieuteneut colonel, of the honorary lieutenant-coloncl of the 18th Royal Regiment, was rollowed to

honorary lieutenant-colonel of the 18th Royal Regiment, was inclowed to its last resting place in the Hamilton Cemetery by his late commands. Thousands watched the funeral and many prominent officers from the surrounding military districts, including Brig.-Gen. W. A. Logie, Col. S. C. Mewburn, A.A.G.; Lt.-Col. R. H. Labatt, and others, were present.

The 18th Royal Regiment, 800 strong, under the command of Lt.-Col. Robertson, and accompanied by representatives from the different overseas units here, marched to the residence of the diseased, 340 South Hess street, where they viewed the remains.

Following the service at the house by Chaplain Forneret of the 13th, the pallbearers, who were Lt.-Col. G. W. Fearman of the 120th, Lt.-Col. Percy Domville of the 164th, Lt.-Col. W. H. Bruce of the 173rd, Cols. Griffin and Leftler, conveyed the body to the hearse. The march to the cemetery was led by an escort of 300 men from the 12th Overseas Regiment, the 120th, and was under the command of Major Thompson. A feature of the funeral march was the marching of all regiments in reverse, the troops leading, the junior officers following and the ments in reverse, the troops leading, the junior officers following and the senior officers in the rear. The cortege marched in slow time and the tege marched in slow time and the band of the 13th played the "Dead

March."

The scene at the cemetery was simple, the one to be remembered. After the burial service by the chaplain three volleys were fired over the grave by the escort, the guard salutes following after each volley. The "Last Post" was sounded by the 13th bugles.

The honorary pallbearers were Brig.-The honorary pallbearers were Brig.-Gen. W. A. Logie, Sir John S. Gibson, Col. S. C. Mewburn, Col. Stoneman and L4.-Col. G. Knowles.

FOUR MORE AMERICANS

Liner Englishman, Sunk Off British Isles.

WASHINGTON, March 25 .- Consular reports to the state department today say the Dominion Line steamer Englishman, sunk near the British Isles, was torpedoed and that four Americans are missing. The English-

man was a horse ship. The missing Americans are Peter McDonald, a horse foreman of 58 Cherry street, Boston; George McDonald, a trimmer, of 37 Common street. Lawrence, Mass.; P. Buckley and M.

A. Burke, addresses unknown. The despatches to the state department were from American Consul Armstrong at Bristol, and said the Englishman was torpedoed at an unknown place and time and that 33 survivors had been brought into an unnamed British port. The American ci-tizens known to have been aboard the

ship were not among the survivors. The consul also reported that sixty more persons who were aboard the ship were believed by the British authorities to have been saved, altho was available. If sixty more persons were saved eighteen persons remain unaccounted for, according to de-

HAMILTON EMPLOYERS MAY SIGN AGREEMENT

Altho They State They Will Not Be Committed to Hard and Fast Rules.

CONCESSIONS TO HYDRO

Will Be Granted by the Canadian Northern Railway, Says Hon.

W. J. Hanna.

HAMILTON, Ont., March 25.—The four plumbing and gas-fitting firms which refused to sign the agreement with the employes still stood pat Saturday. They do not want to be tied down by rules in black and white and state that the nen are at present receiving the same reatment which they are asking for in the agreement.

The organizer is still here from To-

VICTIMS OF SUBMARINE

The organizer is still here from Toronto negotiating with the employers, and the men are confident that the firms will bring themselves to sign the agreement by the first of the week.

On his way home from Ottawa Friday night, T. J. Stewart, M.P., got into communication with Hon. W. J. Hanna, provincial secretary, with a view to having the C.N.R. hydro radials trouble settled. He was informed that the C.N.R. was He was informed that the C.N.R. was not in favor of having proceedings stayed for a year, but that it wished for an extension of its charter. Slight concessions to the hydro radials along the route would be granted by the C.N.R., so Mr. Hanna stated.

Officials of the Steel Company of Canada announced Saturday that a dividend of one and three-quarters per cent had

ada announced Saturday that a dividend of one and three-quarters per cent, had been declared for the quarter ending March 31, also that back dividends amounting to three and one-half per cent, would be payable on this date. This five and one-quarter per cent. is on preferred stock, and meets all claims against it to March 31.

GERMAN RAIDER SUNK

(Continued From Page 1.)

the whole engagement the enemy fired over the Norwegian colors, painted on the side of the ship. "This news is now published as it is made clear by the receipt of a Ger-

man wireless message that the enemy has learned that the Greif, a similar ship to the Moewe, had been destroyed before she succeeded in passing our ine of patrols."

The Greif attempted to run the British blockade the day the German cruiser Moewe returned. Evidently it was expected the patrol squadron would be engaged in hunting for the Moewe, but the cordon of auxiliaries left no loopholes. Seeing herself in a tight hole, the Greif turned eastward, proceeding toward home in a leisurely manner, so

as not to attract too much attention when she sailed by the Allentara. The two ships lay almost side by side while the captain of the British steamet enquired by megaphone for particu-known, are now prisoners of war to lars of the strange vessel, which, ac-the British. They are cut off from all cording to the official report, had the communication with the outer world Norwegian colors painted on her sides, but which flew no flag. The enquiries from the Alcantara were answered in perfect Norweglan, but the actions of

the raider aroused the suspicions of the British auxiliary. She was lowering a boat to send a searching party aboard when the Germans opened fire. The action is described as one of the hottest of the war, recalling duels between evenly matched boats in the days of ironclads. According to the British account the German raider was

today from German sources indicates that the raider Greif was blown up by her commander.

The German Government applied to the Swiss Red Cross to learn the fate of 150 officers and men on the Greif, designated as an auxiliary cruiser. It was said her commander blew her up during an engagement with three British cruisers in the North See on Feb. 20. It is believed the men on the Greif were centured.

the North Sea on Feb. 20. It is believed the men on the Greif were captured.

ween evenly matched boats in the days of ironclads. According to the British account the German raider was put out of action by a few broadsides and sank after twelve minutes. She was followed to the bottom a few minutes later by her victorious adversary, which evidently fell victim of a torpedo launched from the Greifs' tube a moment before the raider disappeared beneath the waves.

Other British warships soon appeared on the scene and rescued many members of the crews of the two fighters.

The naval authorities state that the Greif was as well equipped for raiding as was the Moewe.

Three German steamships are listed under the name of Greif. The largest, a vessel of 1165 tons gross, is 235 feet long, was built in 1912 and is owned in Bremen.

GENEVA, Switzerland, March 25.—(Via Paris, 4 p.m.)—Information received here today from German sources indicates that the raider Greif was blown up by her commander.

The German Government applied to the Swiss Red Cross to learn the fate of 150. a two ounce bottle with warm water, drop in one Bon-Opto tablet and allow to dissolve. With this liquid, bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are botherong you, even a little, take steps to save them now before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time. The Valmas Drug Co., of Toronto, will fill the above prescription by mail, if your chargiest cannot.

BILINGUALISTS' TERMS HAVE BEEN REFUSED

Hon. G. Howard Ferguson Turned Down Suggestion of Separate School Members.

DETERMINED ON POLICY

Pursue No Surrender Attitude, and Insist on Rule 17 Being Respected.

Hon. G. Howard Ferguson, who is still directing the Ottawa bilingual situation so far as the Ontario Government is concerned, has refused "terms" suggested by the French members of the old separate school board. Senator Belcourt, counsel for the bilingualists, wrote the minister saying that the French people would be willing to allow Dr. A. H. U. Colquboun, deputy minister of education, to preside over the schools, instead of the school commission, while the whole question as to the government's right to appoint the commission is being threshed out before the privy council.

council.

In answer to the proposals the Hon.

Mr. Ferguson indicates that the department intends to pursue its no-surrender policy and will insist on the bilingualists respecting regulation 17. There can be no compromise, he says, and it is useless for the French agitators to offer "terms." The bilingualists must understand once and for all that regulation 17 is a law, that law must be observed and no evasions will be countenanced.

FIGHT IN REICHSTAG

Discussion of Military and Economic Conditions Precipitates a Crisis.

BERLIN, March 25. via London-The socialists fought out a stormy bat-tle in the Reichstag today, the en-counter throwing the full light of pub

Deputy Haase, who altho adhering to the minority faction has remained president of the socialist caucus, de-livered a speech painting military and economic conditions in dark colors. His words provoked such a storm that President Kaempf was forced to close the sitting.

Form New Community.

AMSTERDAM, March 25, via London—According to The Vorwaerts, the socialist party, by a vote of 58 to 33 passed resolutions deeply regretting the incidents that occurred in the Reichstag; declaring Deputy Haase had violated discipline and loyalty and that

thereby he and his faction their rights of membership. had lost It was upon this, according to the newspaper, that the 18 members, in-cluding Deputies Haase and Lebebour as heads of the movement, formed the new "labor community."

Moving Pictures

Additional Motion Picture News on Pages 2 and 3 of Feature Section

Park Theatre

During her phenomenal stage career, Valeska Suratt has played a number of unusual roles, but in the Lakky photodramatic production of "The Immigrant." in which she will be seen at the Park for the first half of the week, she is seen in a characterization absolutely unlike anything she has heretofore attempted, and it is said that her performance before the camera has established her as a dramatic artist of the highest rank. She is supported by a cast of unusual excellence, headed by thet wo distinguished Lasky stars, Theodore Roberts and Thomas Meaghan.

mas Meaghan.
For the last half of the week Dustin Farnum will be seen in "The Call of the Cumberlands." This is a gripping story, with beautiful mountain scenery, spectacular faction fights, and a great love

Globe Theatre

Over \$25,000 was spent on a single scene in "The Juggernaut," the colossus of all railroad dramas which is the feature at the Globe for the first half of this week. The great railroad wreck, in which a speeding express crashes down thru a weak trestle, engine and cars full of people diving headlong into the water, makes a hair-raising effect on the screen never to be forgotten by the spectator.

On Thursday, Friday and Saturday "Graustark," the tremendously successful six-act feature drama, will be shown. Probably no greater galaxity of stars were ever presented in one photoplay than Francis X. Bushman, Beverley Bayne, Edna Mayo, Bryant Washburn and Ernest Maupain, all of whom have prominent parts in this thrilling love drama.

In addition to the features Pathe's drama.

In addition to the features, Pathe's latest war news and comedies are shown every day, and "Piano Bill" officiates at the concert grand.

Doric Theatre

At the Doric Theatre, the feature program for week of March 27 will be: Monday and Tuesday—William Fox's presentation of Frederick Perry and Jean Sothern in "Her Hidden Past," a six-act drama based on the great play and novel directed by W. S. Davis. Wednesday

and Thursday Metro presents Valli Vallt, the patented English actress, in "The Turmoil," a five-act version of Booth Tarkington's great novel. Friday and Saturday, Betty 'Nansen in the great New York stage success, "Should a Mother Tell?" by Rex Ingram, will be seen. Daily matinee 2 p.m. Box office opens for evening show at 6.30, commences at 7 p.m. Saturday and holidays evening show commences at 6.30.

Madison Theatre

Blanche Sweet, in the Lasky production, "The Blacklist," is the Madison's first attraction for the week. "The Blacklist" is the name given to the system by which certain big industrial concerns keep track of discharged employes, making it impossible for them to obtain work elsewhere. With Miss Sweet as the persecuted heroine, it is a story of the conflict between capital and labor, which grips the interest from the outset. The original detective drama, "My Lady Incog," with Hazel Dawn in the lead, will be the bill for the last half of the week. Produced under the direction of Daniel Frohman, this picture is a rare combination of laughs and thrills. a rare combination of laughs and thrills. It has all the interest of a mystery story, plus a delicate touch of romance and a dash of comedy.

U-Kum Theatre

The U-Kum Theatre, College and Dovercourt, has booked as its initial feature for this week "The Heights of Hazard," by Cyrus Townsend Brady, which will be portrayed on the screen Monday and Tuesday. The noted actor, Charles Richman, enacts the title role and those who have seen the picture say that it contains every thrill known to the screen drama.

On Wednesday and Thursday the great Lubin production of Clyde Fitch's

bill, featuring Gladys Hanson and George Soule Spencer. It is an impelling story of society high life and deals in stirring situations and great climaxes. For Friday and Saturday crowded houses will be assured, as the offering is Mary Pickford in "The Foundling," one of the most sweetly pathetic roles in which the Canadian star has ever

chapel was filled with noise and smoke
chapel was filled with noise and smoke in no hurry to take possession, we fin-ished our dinner with haste and with haste removed the dining tables. It the red fiannel jackets of convalescent has been intimated to us, further, that patients mingled happily and flaringly nothing but house-room was expected of us, that the pollu would bring in his own straw bed and prepare his own army rations; but the pollu's hosts had a sense of hospitality and determined a sense of hospitality and determined to rise to the occasion. A rumor went round that the cooks, in a fit of generosity, had presented him with the enhour, for our guests had to be stirture ingredients of the staffs evening tire ingredients of the staffs evening tire ingredients of the staffs evening to bettines—the red fiannel betook to its wards, while the meal and that we, in consequence, should have to go supperless to bed; and the the rumer (happily) turned out to be somewhat exaggerated it is cer-

tain that our guests found no cause to complain of their reception. On the contrary, so cheered were they by the welcome additions to their regulation diet and the small attentions showered upon them, that they volunteered to get up an impromptu concert as an ex-pression of their goodwill and gratipression of their goodwill and grati-tude—and they sang in our honor and to their own satisfaction for an hour Not Imaginary

gun—the stone floor rang to booted heels and the stone floor echoed to orders—so I turned out, dressed, and went down to the cloister entrance, where others, similarly roused, were waiting to bid good-bye to our guests of a night. Out they came running thru the doors of the lighted chapel and into the gloom of the cloisters—sharply cut against the light at first, then nearing us as indiginct figures. And as each hurrying, indistinct figure reached us its pace slackened for a moment and a hand was thrust out which sought for our hands in the shadow. "Merci—au revolr! Au revoir—merci." Not one of them forgot the little greeting. It was a queer experience standing there in the doorway whilst one Two genial sous-officiers gave us were exaggerated, and must be exagwarning of the coming invasion—but the warning was by no means long. They—the sous-officiers—had only out- of death, or men who had come from looking death in the face, could seek instantly for jest and amusement; I imagined that it was only in abnormal cases that they did so and the abnormatic-had attracted an undue share of the newspaper man's attention. Now, having seen more, I think differently; the attitude of mind that astonished me is general rather than abnormal; and it seems to me only natural that a man who has lived thru horrors should man who has lived thru horrors should be eager for the contrast of a jest, and turn readily to lightness and laughter. At any rate, natural or not, he does so turn; even the sick and maimed—so they are not in the grip of actual pain—will shake off the memory of their hardships and sufferings at the first suggestion of amusement, the first intimation of a "fete." Perhaps we should be more brutelised than we are by war

> and the smell of food and straw; and patients mingled happily and flaringly with the "horizon blue" of the French regulation uniform. (War, they tell us, has lost its picturesqueness nowadays; but the warrior's relaxations, so far as my experience goes, have managed to retain the quality.) And when the con-"blue horizon" ranged itself on trusses of straw against the walls and slept Pleased as Children

It was still black dark on a winter's morning when the hundred and eighty were roused from their straw and their slumbers and bidden clatter out and away; but it was not too early for the indefatigable cooks to be down and fortifying the departing warriors with coffee that was hot and strong. Again the blue-coated soldiers yowed their warm and hearty thanks; they were as Not Imaginary

Board of Control in Favor of Giving Forty Thousand Dollars to Battalions.

AT SPECIAL MEETING

Officers Made Pleas for Funds to Help in Equipment of Troops.

Grants to the value of \$40,000 were recommended by the board of control today to be paid to the overseas units, in sums of \$1000 or \$500 each. The decision was reached at a special meeting at which officers from all of the

units were present.
From the outset Controllers Cameron, O'Neill and Foster contended that no grants should be made for other that recruiting purposes. The mayor maintained that funds were needed by the different battalions for mainte-nance and general purposes, and he and Controller Thompson objected to any "string" being placed upon the grants. Representatives from one of the bat-teries pointed out that the officers had spent over \$1700 in the purchase of field kitchens and other articles not provided by the government, but ne-

cessary for manoeuvres and field work.

To Equip Troops.

"You want to help get the men and then leave the officers to provide them with equipments," said the mayor to

Controller Cameron "I will not vote for a dollar grant other than for recruiting," repeated

cther than for recruiting," repeated Controller Cameron, and Controller O'Neill echoed the sentiment.

Major Boehm made a strong plea on behalf of his battalion. The officers, he declared, had spent thousands of doliars in recruiting, and if any grant were made, part of this money would be employed in reimbursing, the officers, who he declared could not afford what they had paid out.

"Open the gates," said Controller Foster, "and let them all come in."

The mayor moved that all the battalions, both militia and overseas, be

talions, both militia and overseas, be given grants. On the vote to give the militia units \$1000 each the motion was lost, only Controller Thompson supporting the mayor.

Following the taking of this vote Controllers Cameron and O'Neill retired to a corner of the room for a private conference. Controller Foster also off his seat, breaking the quorum.
This angered the mayor, and picking ever knew a chairman of this board to be so insulted," he declared.
"Sit down," said Controller O'Neill.

"If you knew what Controller Cameron told me you would be willing to sit here. all night. He says he is going to vote for the whole list."

The change of sentiment on the past

of Controller Cameron took the may-or's breath away and he suggested laying the matter over for a few days, lat Controller Cameron didn't want inis, and urged that the whole list be ried, which was done, Controllers O'Neill and Foster opposing.

TALK! TALK! TALK! AT ALEXANDRA NEXT WEEK

Local Musical Comedy Production Will Employ Big Cast of One Hundred

Marguerite Walsh and Charles H. Downey, favorably known in amateur theatrical circles and well remembered for their excellent work in "The Golden Age" last season, will be featured at the Royal Alexandra Theatre, Monday, April 3, in the presentation "Talk! Talk!" the season's newest musical comedy. Both artists have been ical comedy. Both artists have been given straight comedy parts that will afford them every opportunity to dis-play their talent in provoking laughter. A cast of over 100 local artists of pronounced ability has been engaged for the production, the music of which was written by the well known local composer, J. Ernest Lawrence.

Roy McKellar, well-known member of "The Golden Age"; Mabel Gould; Lloyd Ames, Vernon Keachie; Wesley Ingram, Will G. Dutton, Clarke Donaldson, Veta Crooks, Walter Bayley, Days Duston, Dayston, Phys. Rose Burton, Beatrice Nixon, Rhoda O'Hearr, Angela Buckley, Alma Barnes, Gladys Perry, Fred Pearsall, Claude Buckley, Charles Evans and Ronald Keachie are other members of

The production of the piece is under the auspices of the 50,000 club and the proceeds will go to the Toronto and York Patriotic Fund.

ALARMISTS DENOUNCED

He Takes Exception to Attempts to Make U. S. Intervene in Mexico.

WASHINGTON, March 25.—President Wilson today prepared a statement denouncing those responsible for alarmist reports about the Mexican situation and declaring efforts were being made to bring about intervention in Mexico by the United States. It will be made public later.

Inexpensive to Run and Easy to Drive—the New 3400 r. p. m. Chalmers

The mist of gasoline that whirls through the tiny perforation in the carburetor jet of the 3400 r. p. m. Chalmers, rushes into action that has changed the whole aspect of automobile engineering.

The conditions surrounding the manner in which its dormant energy is awakened, brought to life, and compelled to perform, explain the strange ability of

this new car. The six cylinders of its engine are small—31/4 by 41/2 inches. The small area from which heat can be thrown away by radiation, reinforced by the incredibly short cooling process between the swift succession of its explosions, create maximum energy with minimum waste.

"Make her perform," said Hugh Chalmers to his engineers. "Get acceleration, long mileage on gas,

The result—18 miles for every gallon of gas, anything up to 60 miles an hour, and supremacy of pick-up. 3400 revolutions per minute means that every gram of energy is wrung from every drop of gasoline that is inhaled by the powerful suction of the motor pistons.

It means that when, at the point of highest pressure, a spark from the distributor ignites the oxygen of the air with the carbon of the gasoline, every mechanical condition is such that loss of energy is cut down to the lowest possible degree.

It means that the 3400 r. p. m. Chalmers gets twice the mileage on gas that many another high-speed engine will deliver.

The speed of its uncanny carburetion makes flight satin-smooth by bringing the explosions of gas so close together that you are unconscious of anything but an uninterrupted stream of might.

Unlike cars of superfluous might, the 3400 r. p. m. Chalmers has a pick-up so flexible that it's the first to make its get-away at the crossings, and the last to, take another car's exhaust.

It's a cheap car to run and an easy car to drive.

OF FALSE STATEMENTS NEW DEPUTY MINISTER TO BE DR. C. C. JAMES

Reported He Will Succeed G. F. EL PASO, Tex., March 25.-The movement that was started yesterday O'Halloran in Agriculture Department.

OTTAWA, March 25.—It is understood that C. C. James, commissioner of agriculture at Ottawa, will be appointed deputy minister of agriculture, in succession to G. F. O'Halloran, who will become the head of the new branch which will be attached to the portfolio of customs. It will be composed of various branches, such as archives and patents, which are now under the administration of the minister of agriculture. The claims of agriculture proper are sufficient to take up the full time of the minister. Mr. James was formerly deputy minister of agriculture in the Ontario Government.

What the Serbian army East of the Morava they considered went thru in its retreat to rards a re- the population as Bulgarian. At fuge for reorganization is too little known; but the tragedy of the helpless civilians is far worse. And even the husbands and fathers of these do not husbands and fathers of these do not Rulearian allies to little population as Bulgarian. At vards of young men wearing a new kind of armlet. The explanation is they undoubtedly did carry out their threats; altho, after some time, the Germans interfered and forced their Derby group system in France have know what has happened. They can on-ly wonder and imagine and fear. For by wonder and imagine and fear. For soldiers to die in battle, of disease or of starvation, is a minor tragedy; it is part of the business; it is their privilege as men and patriots. Also they have generally an equal chance of causing others to suffer. But the civilians, the old men, the women and the children, who suffer and die because nations are at war, theirs is the greatnations are at war, theirs is the great-er tragedy. All the world knows how the Belgian civilians suffered—there were witnesses; there were those who escaped. And yet what the Belgians suffered was almost insignificant compared with the sufferings of the Serb-

In Belgium there were Germans, many of whom were less savages than others; in Serbia there were besides, Austrians, Bulgarians and Albanians, each more savage than the other. Also the moral effect of American witso the moral e nesses, which early caused a change in German methods in Belgium, is lacking in Serbia. Here there is no check, no brake on the primitive lusts and cruelties of officers and soldiers, They are as free to wreak their will and women and children as anthropy has relieved the German occupation of the responsibility of was Dr. Peters in darkest Africa. The Serbian population had nowhere to feeding the Belgians, there is no flee—a few thousands escaped to Mo- means of feeding the Serbians in nastir and Salonica; but these were of the well-to-do classes. They are now this winter to hunger and disease in Corsica and France. A few thousand also escaped to Albania and emwith none to help. After the second Austrian invasion the conditions in barked at San Giovanni di Medua; the devastated regions were terrible; hunger, exposure and fatigue took a cruel toll of these. Families were divided—some never to be reunited there existed the Serbian state and cruel toll of these. Families were divided—some never to be reunited again, even in death. On the rocks along the Montenegrin roads were scratched messages to those who might come after. Not once, but often, these messages became less and less heavily scored; and looking for the next perhaps brought the seeker to a rough mound with perhaps an upright stone to mark the end of the journey—no wooden crosses because the little wood to be found was needed for fires; the living needed it more than the dead.

The retreat was terrible to the soldiers; it was literally hell to the civilians. Many turned back at Prishtina and preferred the risks of the invaders to certain death on the road. There was no food for the civilians; what little there was went to the troops. It must be said that the soldiers shared what they had, but there

troops. It must be said that the soldiers shared what they had, but there late and torture—is one of the mos was little for them even. The civilians who did persevere grew ever less in number; they were too weak to stand the cold in the mountains, nor were they clad for cold. On one stretch of road in the mountains some fifty corpses were counted in one day. One group was singularly pathetic. A woman with four children, the eldest nine, had struggled along for many many days; they were to be seen trudging along, the children wearing French light blue kepis secured from some military store. As the rearguard came over the mountains, thru snow and ice, they came upon three little corpses, one by one, each still wearing the kepis of the great all. The serious difference in value. Alfred Stead in London News. who did persevere grew ever less in number; they were too weak to stand corpses, one by one, each still wearing London News. the kepis of the great ally. The mother and other child were not found, probably being hidden under the snow or

ORCHESTRA OF WOMEN AT CARLS-RITE HOTEL

Aggregation of its Kind Ever Appeared in Canada.

Many have been the variety nusical treats and the number sented their talent and accomplishments before Canadian audiences. Never have Canadians enjoyed the novelty of an orchestra composed entirely of women until Miss Beatrice VanLoon and her Holland girls played and sang to capacity house at the Carls-Rite concert-dinner Saturday

Miss VanLoon has been touring the United States under the patron-age of the Chicago Conservatory of Music and has made a special trip to Toronto to appear for a limited period at the Carls-Rite. Besides appearing at the regular concert-din-ners every evening and the Business men's every evening and the Business
Men's Lunch every noon, arrangements are also in course of preparation to hold Afternoon Teas and
After Theatre Suppers throughout
the week, with Miss VanLoon's Orchestra in attendance.
In spite of the enormous cost of
this engagement, the Carls-Rite an-

this engagement, the Carls-Rite an-nounce there will be no advance in the usual rates for these events.

A Great National Public Utility

That concerns all merchants and all people

HE original Cash Register rang a bell, indicated and recorded the amount of the purchase. It benefited the merchant only.

In a third of a century this old model has developed into a Cash Register that directly benefits every man, woman, and child who spends money in a store.

This new Cash Register equally concerns every merchant and clerk, every banker and wholesaler in this land.

It furnishes every customer with a receipt or sales-

It prints on this the amount paid or charged. On this is also printed the date of the sale and who made it.

It forces a duplicate, printed record for the merchant.

It prevents disputes over charges and bills paid.

It saves shoppers' time.

It gives the merchant all his profits. It gives him more money for his family.

It promotes more and quicker sales.

It protects each clerk against making errors and against the mistakes of others.

It rewards the diligent clerk by telling his employer which one makes the largest number of sales and which one gets the greatest amount of business.

It assures the banker additional security for the money he loans the merchant.

It gives the wholesaler additional assurance that the merchant will have money to pay his bills.

It furnishes the banker and the wholesaler mechanical evidence that the merchant's statement of his business is correct.

It is a business necessity.

Merchants!

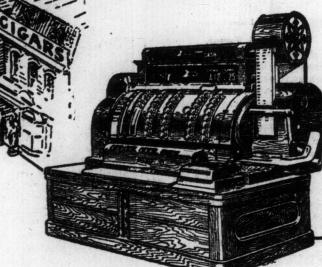

We have new 1916 models that give this perfect service.

Write us to-day or see our agent in your city and learn how you can secure one of these public service machines.

Liberal allowances will be made for old National Cash Registers that were good in their day, but do not so completely protect you or give the valuable service our 1916 models do.

BROAD, ACTIVE TRADE

Firm Tone to Market, With Advances in Some Issues.

The market was broad and active in mining stocks at the Standard Stock Exchange Saturday, and with one or two exceptions issues were pretty firm. The market taken as a whole was strong and transactions totalled 64,931, which makes the big-gest Saturday morning for some time. Silver was off 3-4 of a cent and this occasioned one or two small reactions in the Cobalt issues. On the hand some advances were no-

In the Porcupines, Apex sold at irregularly, peace talk and the 5 1-2. Dome Extension showed some activity, opening at 38, selling off 1-4, which impulses but firming up again on the close. Dome Lake was up a little at 28 1-2. Hollinger was stronger, opening at \$27.35, selling up to \$27.50, but leaving off to \$27.25. This is the highest Holly has seld since the war tax announce. ment was made. Jupiter was a little easier at 21 1-4 to 21 3-4. McIntyre Porcupine Viponl was somewhat heavy transe reactionary, opening steady at 68 but zine stocks. was quiet but steady at 93. easing off on the close to 66 1-2. West Dome Consolidated was active and

MONTREAL, March 25—The local market was decidedly irregular this morning. Steel of Canada was the most active stock, but it did not respond to the preferred dividend announcement as might have ben expected. Dominion Bridge was weak, selling off sharply on a turn over of a few hundred shares. Ames common and preferred were exceptions to the rule, being strong in face of an otherwise weak market. In the Cobalt section Timiskaming was active and easier, selling back to 56 1-2 on profit taking. The stock opened at 58, 1 point below the high of the previous day. Seneca, on the other hand, was higher, changing hands at 59. Peterson Lake was active and eased off slightly, opening at 27 1-2 and selling back to 57 1-4. McKinley sold up from 48 to 49, which is an advance of 6 points in the last couple of many made the new low rate of 71½. A Baby Food

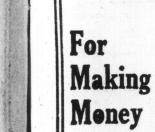

vance of 6 points in the last couple of days. Crown Reserve was also stronger, opening up at 48 and selling to 49. Chambers Ferland sold off -Baby Chicks from 24 to 23.

> GALICIAN GIRL HELD ON CHARGE OF MURDER

Domestic at Hamiota, Manitoba, Accused of Killing Her Mistress.

HAMIOTA, Man., March 25 .- Teenle Malone, a Galician girl, was yesterday formally committed to trial at the full assizes at Brandon, charged with the murder of her employer, Mrs. Mary Hamilton. The body of the murdered woman was found in the cellar and Dr. Hudson of Hamilton swore that death resulted from a succession of blows and after a severe struggle. A son of the deceased said his mother told him the morning of the murder that she would "let Teenle go."

Chiropractic Science

Chiropractic The Open Gate to Health

BRIEF explanation of chiropractic adjustment by Dr. Chattoe.
DO YOU know what the science of chiropractic is doing for the sick and affilted.

practic is doing for the sick and afficted?

DO YCU know that hundreds of years of superstition with drugs and germ theories have filled the people with skepticism and poisoned their bodies as well as their brains?

ALSO, is it not true that men have treated the effects of disease—even blaming Nature's great scavenger (the microbo and flies) for causing ill-health?

CHIROPRACTIC science teaches that the human body in health will assimilate nourishment and eliminate refuse, thru natural laws working thru tissues

nourishment and eliminate refuse, thru natural laws working thru tissues which have power to expand and contract.

THIS power is the life forte in the body, working as a current back and forth like unto the electric current of the telephone and telegraph, connecting every part of the body with the brain as dynamo. as dynamo. DISEASE in all cases has its start in the DISEASE in all cases has its start in the weakened tissues or organs which suffer from the lack of nerve currents—obstructed in transmission.

THE ONLY places this obstruction occurs are at the bony articulations of the spine, where the spinal nerves emerge from the spinal cord like branches of a tree.

tree.
HE competent chiropractor is one who has studied the human body and developed a highly sensitive touch to determine relative position of vertebra to analyze for subluxations (bones out of

termine relative position of vertebra to analyze for subluxations (bones out of place).

NO MACHINERY necessary.

THE PALMER graduate is a chiropractor who has fully prepared himself with thoro training to adjust the cause and leave nature to treat effects in the soft tissues.

THIS science is unlike all other great systems, such as osteopathy, allopathy, etc., and has saved thousands from painful major operations.

MY LATEST booklet is now ready for distribution and explains every question clearly.

THIS is a practical age and the world is making big progress with man conquering his greatest foe—disease and the poisoned mind (insanity).

ALCOHOL is not the only drug producing misery in the home—there is a greater mockery in strychnine, morphine and lung tonics which stiff symptoms and lure the victim on in hopeful ignorance.

THROW off the bondage of the superstitious past and seek health thru chiropractic—backed up by material science.

PROVEN by ten thousand practitioners and half million daily patients in States and Canada.

PRACTOR CHATTOE, D.C., residence, 316 Brunswick, north Bloor. Central office, 96 Shuter. Telephone appointment. College 1167. Sanitarium accommodations if required.

Chiropractors.

in Chiropractic I have found out that I can assist Nature by the judicious use of electricity in a number of conditions.
TO THOSE WHO WISH ELECTRICAL treatments while taking adjustments, I have installed the latest and best equipment possible.

DO NOT BE DISCOURAGED If you have

AFTER FIVE YEARS OF PRACTICE

not obtained the expected results with Chiropractic, Because the best of Chiropractors are not able to locate all irregularities of the spine with the usual hand palpation,
WHY NOT USE the best and surest way

WHY NOT USE the best and surect way when it does not cost any more than the other method?

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS. WEST LAND REGULATIONS.

The sole head of a family, or any male over 18 years oid, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lanus Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Lanus Agency (but not Sub-Agency), on certain conditions.

Duties—six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nime miles of his nomestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

except where residence is performed in the vicinity.
In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$5.00 per acre.

Duties—Six months' residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$300.

The area of cultivation is subject to reduction in case of rough, scrupby or stony land. Live stock may be substituted for cultivation under certain conditions.

Deputy of the Minister of the interior N.B.—Unauthorized publication of this advertisement will not be paid for.— 64388.

excellent prizes to the winners and runners-up of each event. In order to assure success for this tourney, three important committees were appointed with the following members its chair-men: President Kelk on lawn and club house; A. Hewitt on entertainment, re-freshments and transportation, and A. E. Stovel, secretary of tourney and press representative. Entries should be made to the latter, at 28 King street west, or phone Main 4155.

BY A VENTRILOQUIST

Irishman Placed Puppet's Head Above Trenches and Snipers Disclosed Positions.

PARIS, March 25 .- Known in his trigade as Dan Derry, chairman of the Suicide Club, Sergeant Dan Gillen, a well-known Irish ventriloquist, tricked the Germans with his ventriloquil doll, On entering the trenches he raised on entering the trenches he laised the puppet just above the parapet and began working the figure, Immediate-ly the enemy's snipers became particu-larly busy petting at the doll's head This enabled the British machine gun-ners to put in some effective execution. The puppet's head was badly shattered.
The sergeant christened his doll Larry O'Hooligan, and Larry was afterwards buried with military henors, a tombstone erected by Gillen's comrades bearing the inscription; "Here lies Larry O'Hooligan, He gave

of Canada.

party caucus.

It was a fairly good debate as far

would blend into one resolution.

OTTAWA, March 25 .- The Liberals have informally notified the govern-ment that they will not, as a party, op-pose the Doherty bill "in aid of provincial legislation prohibiting or re-stricting the sale or use of intoxicating liquors." They could scarcely take any other position. Altho the Laurier government paid little heed to the tradition there is, nevertheless, an historical tradition that associates Conservative party with national, and even imperial unity, and the Liberal party with provincial rights. It is something like the traditional, if shadowy, distinction between the two on a single stem. It was universally believed that they were to be discussed to the liberal and it was more than introduced to the liberal and it was more than introduced to the liberal and it was more than introduced to the liberal and it was more than introduced to the liberal and it was more than introduced to the liberal and it was more than introduced to the liberal and it was more than introduced to the liberal party with provincial rights. It is portation of intoxicating liquor. The provincial rights are party with provincial rights. It is portation of intoxicating liquor. The portation of intoxicating liquor.

The Doherty bill affirms the principle that every province must deal with the liquor evil as a purely provincial problem. It carries to a logical enough conclusion the doctrine of local option. The federal government will protect from outside interference the province that adopts prohibition. It will do nothing to impose prohibition upon

Heretofore the temperance people have been sent from the provincial Pi-late to the federal Herod. Provincial as it went, but was adjourned after seven members of the house had put themselves on record. The Hughes authorities assured them that effective prohibition was impossible because the importation of liquor could not be pre-vented by any provincial enactment At the Dominion capital they were told that the evil was essentially one to be dealt with by the local authorities.
Only last Monday, in introducing his measure, Hon. Mr. Doherty said:
We are satisfied that such legislation, within the limits of the

provinces, would operate effective-ly to secure a law, binding upon all persons residing within such provincial territorial limits. That being so, it was considered that a law of the nature of one prohibiting or restricting the use of intoxi-cating liquors, is one whose actual effectiveness as a matter of fact. depends in very large measure in-deed upon its having behind it the general or common consensus of public opinion in the community where it is sought to be applied. The provinces, having, in our judgment, the power to enact an effective law-effective within their respective territories-it seems to us that a law enacted by the pro-vincial authority would be very much more assured of having be-hind it the general public opinion of the community for which it was enacted, than it coud be hoped Dominion wide legislation by this

From 1868 to 1898 the prohibitionists sought Dominion legislation. The Can-ada Temperance Act was passed by the Dominion parliament. More than once the house of commons resolved in favor of federal prohibition. In 1898

there was a national plebiscite.
From 1898 till 1916, however, the temperance workers conducted provincial campaigns and made no effort to secure relief from Ottawa. They secured the passage of the Hugh John Macdonald Act by Manitoba in 1900. They printed the map of Quebec al-most lily white by their local option victories. They had made great head-way in Ontario-up to 1914 when, apparently, they suffered a severe reverse. Now, however, the abolition of the open bar is almost accomplished. The sale of liquor upon the premises where it is to be consumed will soon be illegal in every province except

The prohibitionists should, therefore, be jubilant and one at first blush would think that they should be en-tirely satisfied with the Doherty bill. But, apparently, they are not. John Barleycorn, they know, is an old coon who often runs up one tree only to run down another. The prohibitionists are begining to say that the Doherty bill is a gold brick. It takes no sides, they say, on the temperance question. If the province has no objection to the citizen importing liquor for his own consumption the federal government

To these critics Mr. Doherty would reply that there is no earthly reason why the Dominion Government should intervene. If the people of any province really want out and out prohibi-tion the Doherty bill helps them to get it. If they do not want out and out prohibition the Doherty bill will not impose it upon them. It frankly aims to throw all responsibility on the pro-vincial governments. It says, in effect,

to the temperance people: "Do not accept any more excuses from provincial premiers.

Their governments can now pass any laws you want and they can

give you absolute prohibition."

THE DISTILLERS' COMPANY, LTD., EDINBURGH.

Worn Out, Thin and Miserable Until She Took "Fruit-a-tives."

Palmerston, June 20th, 1914. "Stomach Trouble and Distressing behind the Doherty bill? Hon. Charles Headaches nearly drove me wild. Some Marcil announced in the house time ago I got a box of Fruit-aon Friday that they wanted a vote on the Stevens' resolution. It will be remembered that at the opening of parliament, Mr. Stevens, am feeling fine, and a physician, meet ing me on the street, asked the reason the Conservative member for Van-couver, moved a resolution calling for federal prohibition as a war measure. for my improved appearance. I said, 'I am taking "Fruit-a-tives." He said, 'If 'Fruit-a-tives' make you look so well, go ahead and take them. They At the same time, Mr. Hughes, the Liberal member for king's P.E.I., ofare doing more for you than I can.'
Mrs. H. S. Williams. fered a resolution calling for an amendment to the B. N. A. Act, which

parliament, that if the gvernment, of which my hon friend was a member, had continued in power, those vessels would have been under construction at the city of

under construction at the city of Montreal?

Mr. Pugsley: I beg my hon, friend's pardon, the right hon, leader of the opposition never made that statement.

Mr. Hazen: I beg my hon, friend's pardon, he did.

Mr. Pugsley: I say he did not Mr. Pugsley: I say he did not.
Mr. Hazen: I say he did.
Mr. Pugsley: I say again, he did

Mr. Hazen: I repeat again that

Mr. Pugsley: I say he did not, and I can say it with more emphasis and with a far greater appearance of truth than my hon.

The trouble with Mr. Pugsley is that neither the house nor the coun-try takes him seriously. Nevertheless he may be on the right track in movgovernment, no matter how honestl administered, spends more money than any business man or corporation would

spend for similar service.

If we had known in August, 1914. that the war would last two, or possib-ly three, years, and cost Canada in the neighborhood of a billion dollars, we would have reorganized our civil service and reduced our expenditures from twenty-five to fifty per cent. It we knew now that the war would surely last for another year or two we would begin to economize in earnes But of course from the start we have hoped from week to week and month to month that the end was in

complished their purpose in creating an atmosphere of suspicion about the transactions of the Shells Committee, The government is not to blame great deal for what has been done omitted in the past, but it will be held responsible for anything like extravagance in the future. Mr. Pugsley has struck what may turn out to be a good trail.

are by no means unanimous in think-ing that the government is taking the wisest course in denying an investi-gation. That any Conservative member wil openly bolt when the vote is taken Parliament will prorogue in two or three weeks. There seems to be nothing left to discuss or vote upon except shells and prohibition. The on the Laurier resolution is not anti-cipated, but some of them may ab-stain from voting. On the other hand it is rumored that two or three Liber-als will side step the vote. except shells and prohibition. The Liberals either have found nothing very damaging or they intend to save their ammunition for another session.

Visit to Achilleion, His Private Villa at Corfu, a Revelao tion.

By Henri Ferrer.

PARIS, March 25 .- Nothing, perhaps has thrown a greater light upon the melodramatic magness of the kaiser than the account that is given of the furnishing of his villa Archilleion, at Corfu, now in the possession of the allies. It is noteworthy that "Achilleion" means the abode of Achilles, to which ancient hero Wilhelm modestly compares himself,
"I visited Achilleion, the kaiser's villa," says a "Petit Parisien." "It is

tragic, and entirely grotesque when by a turn of the wheel, Mr. Hazen found himself a member of the Dominion Covernment. New Brunswick found herself saddled with a debt of \$6,000,000, represented by an unfinished road or the colossal statue of Achilles, of a chocolate zinc color, erected in the gardens, with an inscription proclaiming William II. as "the Emperor of the

"Special mention should, however be given to a detail of the kaiser's room. Behind a very high writing desk out of the closet. Yet they were disappointed because Mr. Hazen was not in the house. Mr. Rogers who was leading the house, knew little and cared less about the New Prunswick family ous arrangement, and its object was to quarrel. There were however, some enable the kaiser to imagine that he humorous features in the debate as wrote on horseback. Everything about when Mr. Pugsley referred to the road as running up and down the St. John Valley. Mr. Pius Michaud, the Acadian

Everywoman's Spring Clothes -- A Collection of LURED BY FASHIONS Opinions From Eminent Fashion Experts

HERE is much talk this season of "period" styles. There are many vague references to Spanish influence. There is a perfect medley of modes in the stores. And adding to the confusion is the fact that this season's fashions bear a striking resemblance to those in vogue last winter. Skirts are still wide; hats still high; coats still belted. Meanwhile, what IS the Spring style? Is there Or is there no standard to guide us? To arrive at some definite conclusion, to find a guiding star amid the mazes of the mode, The Sunday

PRINCIPAL FEATURES OF THE NEW SEASON'S STYLES

HE figure remains unchanged in its lines. The corset, like last season's, has a slight inward curve at the waist, leaving hips and bust comparatively free.

For the street, dress is decidedly simple. In tailored suits easy fitting semi-sport effects are

Fancy capes, collars and shawls are in favor for more elaborate costumes . Black, grey, navy blue, brown and green dis-

pute honors as the color of the season. Materials most in vogue: Serge, gabardine,

twills, tricots, taffetas and alpaca for suits with suede-finished materials in pastel shades as facings. For gowns, silk, taffeta broche, satinstriped with voile, and organdie.

Panniers and crinolines, as well as the "style moderne" slender silhouette, are all in order for Spring gowns.

Hats range from toque to Watteau bonnet, and from "stovepipe" to sailor; but all have high crowns. Straw, with plenty of flowers and ribbons, is coming in with a rush.

The latest coiffures show curls and coils modi-

Jewelry is not elaborate this year. Shoes have been toned down to something like uniform simplicity. Their colors may match the suit-but not if it is champagne tint, or light blue,

By NORAH MEADE. THAT there is no radical change ple, very prim, and then comes the bodice of brilliant silk, tight, trim, in lines this season is proved

writer sought out the acknowledged fashion authorities.

by the fact there is no new corset. Like last season's, it conforms of organdie. to the lines of the figure, having a slight curve at the waist, and leaving the hips and bust comparatively free. The silhouette is, consequently, practically the same, fan-shaped, wide over the sides and flat back and front. At times it approximates to the old, "tonneau" or barrel effect, round and a little narrower at the feet.

But this is true only of evening For the street, dress is still simple. Comfortable country clothes, easy-fitting, semi-sport effects are faring peplum, the only relic of the and the sleeve?

Mostly there are pockets, a

stitchings; and, finally, there are new naterials, new colors, new combina-

ERE, once more, the experts were frankly contradictory. One declared emphatically that black was the color of the season, and quot-ed its preponderance at the Paris openings. Another was equally de-cided in favor of gray. A third sug-gested brown; a fourth, green. But the two most eminent authorities in town agreed in giving the palm to

lavy blue, which the others had ad-nitted only as a "reserve."

On the question of materials a may voted for serge. It is undoubt-the season's stuff. Gabardine is in vogue. There are twills, triots, taffetas. Alpaca has returned. serge leads them all by a good h. Suede finished materials are sed for facings, and they come in eautiful pastel shades—green,s doverays, tans. For coating there are any soft cashmeres, and for genuhe sport clothes there is the popular

So much for the comparatively simple matter of suits. Gowns proved to be a more difficult question.

. . . I ERE the authorities frankly "played favorites," with the exception of one eminent expert who admitted that there were three

Louis Quinze panniers and pointed odices. Louis Seize tonneau crinosilhouette, are all in order for spring, The pannier is perhaps the favorite mewhat modernized and modified adapted for the debutante rather than her mother. It is now no longer as of old a superstructure of silk imposed on a petticoat. Instead it is made of the material of the gown, and when there is an underskirt it is of net or

To prove that she is in earnest this season in this matter of bulk the spring girl employs featherboning and wiring to keep her pannier in place.

No longer does she depend on starched materials which might crinoline, too, she has devices—hoops or a cloth made of horsehair to keep her skirt outstanding and stiff. For the spring maid of 1916 is frankly feminine, and she is willing to be uncomfortable, if that is necessary to make her fashionable. Need it be

agant? Rich laces, metal embroideries, ribbons of all sorts and shades, flowers, fur, ostrich—all in carefully ordered confusion, make up the gowns for the girl of today. Silk is her choice of material, a hard, varnished taffeta which glints with the reflected lights of a prism. Then there is a taffeta broche, a satin striped with voile, failles and brocaded fabrics. Tulle contrives her daintier effects-butterfly bows, wing-like capes. Georgette crepes supply her clinging draperies. And for afternoon wear she has still

added that she is also frankly extrav-

more resources. Here the pannier develops into pocket, a capacious, nun-like pocket Which no man ever wore unless he were a monk. The bodice is still the me, a tight basque effect in con-rast to the flaring hip. Organdie is here a favorite, starched, stiff standing ut in circles that resemble the hoops

One of the prettiest gowns, perhaps. of the season uses this material for its

effect. The skirt is white, very sim- i the brim, the crown is always towering. sloping from the shoulder into a short elbow sleeve, from which flares a frill

But many of the gowns this season are severely tailored, giving at first glance the effect of a suit. Practically

F you want to tell a new waist this season look at the neck and the sleeve," was the dictum of one well-known authority.

What will you see? That is other matter. At the throat may be fashionable. And the rule in cut, to which of course there are many exceptions, calls for a short coat, a fitted waist, at times belted, at others merely pinched, narrow shoulders, and a

And the sleeve? It may be long or The skirt is circular, somewhat longer and wider. Now and again there are plaits on the hips or a yoke appears, giving a flattened effect in front. Mostly there are positive to the sieeve? It may be long or short. It may end in a cuff or again in a flounce. It may be long or in a flounce. It may be long or short. It may end in a cuff or again in a flounce. It may be long or short. It may be long or short. It may end in a cuff or again in a flounce. It may be long or short. It may end in a cuff or again in a flounce. It may be long or short. It may end in a cuff or again in a flounce. It may be long or short. It may end in a cuff or again in a flounce. It may be long or short. It may end in a cuff or again in a flounce. It may be long or short. It may end in a cuff or again in a flounce. It may bulge at the upper middle arm or it may ripple smoothly down to the wrist.

masculine privilege which women have openly stolen this season. Collars are convertible, sleeves plain or bell-shaped, and there is no trimming except for occasional buttons.

But this is chiefly for tailored suits. There are many elaborate costumes which employ all the devices known to designers for smart effects. There are fancy collars, capes and shawls; there are fancy sleeves rarely seen on suits; there are braidings, facings, stitchings; and, finally, there are new

There was a general consensus of opinion that straw would be favored this year. There are Milans, Tuscans, to her many thousand admirant Leghorns. There is to be an enormous vogue of flowers and ribbons of all varieties. The newest come in stripes of one color and two materials—satin streaked with moire, taffeta with faille, and are worn either in bows bunching on the brim or at times in streamers and chin straps. And according to the style of your hat so will be the style of your hair.

The latest coiffures show curls, tiny

ringlets in groups at the back, filling in the space left free by the up-sweep of the Watteau. For the Directoire toque, the hair is naturally worn differently, coiled high on the crown. And there are many varieties of simple curves. Jewelry is not elaborate this year The matron, the one person privileged to indulge in it, has less need of its assistance than usual. Sequins, jet, long trains of gold and silver laces,

the necessity for shimmering ornaments. style, have been toned down to a uniform simplicity. To be sure, there,

TO SPRING OPENINGS The Devotee Is Lost in a Fairyland of Straw and

Flowers.

MODELS IN MANY COLORS

Soft and Pastelly Are Prevalent With no Rules as to Size.

Y/HAT woman could withstand the temptations of early spring millinery? Like the sight of new green grass after months of wind and snow, is the first glimpse of a formal "spring opening," with flowers everywhere-real and artificial-little birds in painted cages singing from their loft perches, courteous "mademoiselles," smartly gowned in black, attending upon scores of enthusiastic patrons; and above all, the tall, gaily decorated pedestals displaying the very newest modes as created by the famous designers of Paris. It is by no means an occasion to be overlookedto her many thousand admirers,

Fashion is Indulgent. Because of attending worries, which are the natural outcome of such troublesome times, fashion has been particularly indulgent with her patrons, humoring them, petting them and coaxing them into hiding their trials neath a galaxy of exquisite highcrowned chapeanx.

In fact so many and so varied are the styles that prevail, each individual model is said to be an ardent partisan of its own design. Seldom does the early spring open with equal favor for large and small brims, high and low crowns, much and little or namentation.

But the early 1916 models seem to glory in opposites and inconsistency. And shoes, once the storm centre of There are Watteau models worn with an ultra-modern tilt, there are dash-ingly modish sports hats worn in a remarkable conservative manner, and there are demure little poke bonnets designed for maidens "who are not

> teresting turn. Formerly they were fashioned entirely or in part of silk, or felt, or linen; now quite chic little models are being developed in natural colored leghorn and trimmed with suede bands and bone buckles. Straw is sometimes used for the purpose of "sunshade" brims which have a tendency to dip directly in the centre front—when candy stripe

Sports hats have taken a most in-

THE flavor of celery combines so well with chicken, turkey and duck, that it makes one of the best posible vegetables to serve with poultry or game. Celery also makes one of the control of the celery also makes one of the celery. Place bunches of parboiled celery in this and cook slowly until the centre front—when candy stripe silk is stretched tight over the crown.

Up-to-date Sports Model.

One very clever and up-to-date little sports model was made with the popular bring droop and a tall. Straight the base of the crown and held in lace with wool stitches in gray-intended to show—and they do most ef-

Very sweet are the little flowercrowned hats for wear with the silk and lace afternoon frock. Almost any pastel tint is permitted in the color scheme, altho dull violet is very much in the lead at the present, with long, slim streamers of black velvet ribbon, looped up at the back. Speaking of loops, they lend height galore to straw-brimmed models in colored hemps or milan. Very stiff

silk ribbon is cascaded about a low crown and held firmly erect by means of invisible wire supports. Among the prettiest styles fo rthe younger set are the simple little medium-brimmed hats resembling the tricorn, which are trim-med with flat tailored bows or stiff

FLOWER-LIKE FROCKS FOR DANCE ENTHUSIASTS

Superb Little Models for Youthful Devotee Fashioned of Lace and Tulle.

LILY MODEL IS DAINTY

Displaying the Season's Prettiest Features-Is Made of Green Gauze and Tulle.

By H. M. BALL.

IKE a little China lady is Miss 18-Year-Old in her new spring party frock. Opportunity smiles leniently upon youth; and, sometimes, it seems she almost coaxes her cousin. Dame Fashion, to pamper the youngest devotee. This season, at all events, some good fairy godmother has waved her wand, and while mother nature's children are being clad in fresh green frocks, with trimmings of crocus yellow and violet blue, good little girls who play and study and dance are being fitted into the prettiest of frocks in the same subdued pastel shades, which make them look, for all the world, like their dear grandmammas

As a Poet's Dream. Some fashion critic has gone so far as to say that the faded pastel materials used in youthful party frocks this spring are as lovely as a poet's dream. They are certainly sufficiently lovely to send one into raptures and will without a doubt astonish as well as please the most exacting devotee. What vision could be more pleasing to those who dwell in the realm of La Mode than that of a sweet young face smiling above a perfectly designed frock that as nearly resembles a flower

as one could imagine,

A Popular Idea.

Quite a popular idea, given expression by many of the leading French sion by many of the leading French houses, is that of naming a model after some little flower which has been carefully studied, with a thought for a pretty creation tucked somewhere in the back of the designer's head. The color formation and even the texture of the fragile little blossom are all taken into constitute the state of the color formation and even the texture of the fragile little blossom are all taken into con-sideration before the length of gossasideration before the length of gossa-merlike cloth is taken in hand by the draper. For many of the most suc-cessful frocks are practically made "on the model," who stands while long widths of chiffon and silk, net and exquisite lace are cut, tucked, gathered, puffed, folded, pleated and pulled about her form into the sem-blance of a lovely rose, a pansy or maybe "la fleur-de-lis," the emblem of France.

Soft Shaded Greens.
One beautiful little frock of the "My" type intended for a very young dance enthusiast was a symphony in soft shaded greens and white. The very full skirt, which displayed a this unusual foundation were poised the other three sections—first, a white chiffon "mask," intended to just soften the tone of the pink; next simply gathered skirt of green ic gauze, very shere, and last a very puffy panniered skirt of white tunc. The effect was exquisite, worked out as it was in absolutely harmonizing ones of pale pink, pale green and

pure white. The bodice, cut close and snugly fitated the season's most noticable trend —that of the small waist! The bouf-fancy of the hip line, of course fur-ther accentuated this line as did the tulle and lace sleeves made very short and puffy. The corsage was cut square and made of the green gauze veiled in tulle. The silver-lace camisole was a most important addition—

OF LEATHER POPULAR

Will be Considered Quite the Thing for Spring Wear and Styles Are Varied.

O UTING suits of leather are quite the thing for con-One suit has a skirt of dark red leather, with a jerkin coat of black leather. The neck of the coat is finished with a flat corded band which does away with the collar. The coat is semi-fitting and is held close in at the waistline by a large cord, running thru the seam where the slightly flaring skirt of the coat is stitched. The sleeves are plain coat sleeves, with corder cuffs that match the finish at the neck. The hat worn with this leather suit is alpine in shape, made of dark red leather, trimmed with a black leather crush band and buckle.

Another outing suit has a skirt of wide black and white striped flannel and a white leather box coat. The skirt has a band of white leather at the top of the hem, trimmed with black leather buttons. The white leather coat is also trimmed leather buttons, and has black leather pipings in the seams and hems. It is lined with white silk brocaded with yellow flowers, and with it an orange. crene blouse is worn. The cap that

GARDENING AND POULTRY RAISING FOR AMATEURS

WHAT ARE YOU GOING TO PLANT IN YOUR GARDEN THIS SUMMER?

There Are So Many Different Flowers, Such a Variety to Choose From, and So Many Ways of Arranging Them That the Question is Sometimes a Puzzle.

By Eben E. Rexford.

TAKE it for granted that you intend to have a flower garden this summer. What are you going to put into it? There are so many desirable annuals that one finds it quite a difficult matter to decide among them, unless she is so familiar with flowers that she knows just what kinds to select to bring out effectively the scheme she has in mind. One woman will have a preference for beds that will give a brilliant show of

one woman will have a preference for beds that will give a brilliant show of color.

Another will prefer kinds that are adapted to cutting. And a third will not be very particular as to what she grows in her garden, if she secures from it a generous quantity of blossoms, and the plants that produce them are easy to grow and require the minimum of care.

Few plants will give more generous returns in the way of bloom than the petunia, and few annuals can give a more brilliant color display. And few plants are sturdier and require less care.

Petunia Makes it Gay.

Give the petunia a good soil, let it get a good start at the beginning of the season, and by the last of June it will begin to bloom, and from that time on to frost it will make the garden gay with its crimson and purple and white blossoms. If there should be a little falling off in the quantity and quality of its flowers in September, cut away nearly all the old branches and allow the plant to renew itself.

After cutting back it will soon throw up new shoots, and on these will be borne flowers quite as large and fine as those which characterized the production of the earlier part of the season, and there will be plenty of them until the coming of cold weather.

I would not plant any other annual in the beds in which I grow petunias. In

of cold weather.

I would not plant any other annual in the beds in which I grow petunias. In order to secure the most satisfactory result from them they should be grown by themselves and in a mass. If planted single the effect is not solid enough to give satisfaction. Do not attempt to make use of the double varieties. They are never staisfactory for bedding purposes.

Phlox Are Useful. Phlox Are Useful.

Phlox Are Useful.

Phlox drummondi is one of the most useful and beautiful of all our annuals for bedding purposes. Those who have grown it scattered about here and there, a plant in a place, have no idea of its ornamental possibilities. It must be massed in order to secure best results.

And "best results" are dependent largely on the careful selection of colors. There are almost endless colors and shades catalogued by the seedman, and while all of them are beautiful, in themlargely on the careful selection of colors. There are almost endless colors and shades catalogued by the seedman, and while all of them are beautiful, in themselves, some of them do not harmonize.

Planted in the same bed the effect is very unsatisfactory. But a bed filled with rose-colored, white and pale yellow varieties will be exquisite in its delicacy, and no combination of colors can be invaried that will prove more harmonmagined that will prove more harmon-

inagined that will provide the follows.

A very pleasing effect is secured by filling the centre of a circular bed with yellow kinds, surrounded with a row of pink kinds, edging it with white sorts. The dark scarlet or crimson varieties are charming when used with white ones, or the soft, pale yellows, but allow a few plants of lilac, mauve or magenta kinds to get into the bed and you have a color discord that will prove disastrous in the extreme, if you have a keen eye for harmony among colors.

a color discord that will prove disastrous in the extreme, if you have a keen eye for harmony among colors.

Will Light Up Garden.

Calliopsis is another flower excellently adapted for use where a strong show of rich color is desired. Its intense yellows and browns will light up the corner of the garden in which you plant it like a burst of sunshine. It will be found very effective when grown by itself, but if contrast is desired—and contrast is something that can be used with excellent effect in planting the garden—avery pleasing effect will result from using a few plants of salvia in the centre of the bed.

The flery scarlet of its blossoms will

of the bed.

The fiery scarlet of its blossoms will heighten the general effect to such an extent that the combination will fairly dazzle the eye with its brilliance. Or, if you prefer, edge the bed with pale color will harmonize perfectly

with the strong, rich color of the cal-liopsis, while the contrast will be de-lightful. So would a white variety it you cared to make use of it as a border Perhaps some reader of this article Perhaps some reader of this article would prefer to use bedding plants, purchased from the florist, because by doing this she can save herself the trouble of preparaing a seed bed, sowing seed and getting seedlings well started.

If so, why not make use of the pink single-flowered geranium and pale lavender ageratum? Fill the centre of the bed with the geranium and border it with other plant. The pink of the one will harmonize charmingly with the soft lavender of the other, and by the combination you will get something with setting the ordinary in effective. quite out of the ordinary in effective-

You may not think the single geranum after having seen varieties used almost universally in put his gardens, but I am quite confident that one season's trial of it will convince you that it is in every way superior to the double sorts.

The latter are so double as a general of dark lea are commo seed early

HAVE A GARDEN

EGIN now to think of that little garden in the back yard, everybody who has a back yard. Such a modest enterprise has much to do to restore the harmony of life. If you don't get a radish, a tomato, a bean or a mess of peas, you will get something greater-pure air, sunshine, exercise, and companionship with nature, which are a richer crop than all the truck in the garden. It is a great thing to watch things grow. They make a man grow, too; add health and strength to every part of his body; give him a clean conscience; make him love his wife and enjoy her victuals. Tending a little garden makes a good citizen out of a man; gives him better thoughts; makes him kindlier to his neighbors, and gives a gentler accent to his voice. And then if he should raise anything in the garden, how happy he is to gather it and take it into the kitchen and lay it on the table, saying to his wife: "These are some of our own raising; aren't they fine?" That's life-grander than going to church in an automobile.

Poultry Houses

Without Yards

without windows, but the doorway at the front should be wide and the door

curtain dropped in front of the roost at night will keep the birds warm enough in the coldest weather. With this plan of house no yard is

needed, as with the netting covered door the fowls are in the fresh air all

by the introduction of a deep layer of bedding, on which the grain should be buried so that the hens will have to scratch for a living. By feeding dry

feeds only the work of looking after

the fowls is reduced to a minimum, as

there is no need to bother with the cieaning of frozen-up feed troughs. Dropping boards may be done without if a deep layer of sand (about 6 inches)

is placed on the ground and renewed every six months.

The no-yard plan of poultry keep-

The no-yard plan of poultry keep-ing is not the best suited to the rais-ing of breeding stock, but for the sake of getting a lot of eggs on a small piece of land nothing can beat

them for just one year very satisfac tory results may be obtained by this system, especially as green feed may raised in the ground-space saved by keeping the hens housed during the The non-fancier who simply wishe to obtain a supply of eggs that he can be sure are new laid should be satisfied with a system that does away with the troubles of setting hens or tending incubators, the crowing of

roosters, and chasing of chickens that will fly if fenced in in the usual way. March Work in the Garden

As soon as the snow goes and frost out of the ground, the lawn should be raked, removing the winter dress-

ing. If there are any bare spots, scarify them by raking deeply with a steel rake and sow good clean grass Buy the best seed obtainable,

free from weeds. Roll the whole lawn

All pruning of trees should be finished without delay. Roses may be pruned as soon as the freezing weather is over. The monthly roses should

will make strong shoots that will be

covered with blooms. The China, Bengal, and Noisette roses should be

treated in this manner, while on the

stem should be cut back so as to leave

Fruit growers claim that currants pay as high as \$300 per acre and that the average price is around \$3 per bushel and that 100 bushels to an acre is an of silk crumpled up and tied to the end of silk crumpled the and then to the end of the flower stalk.

Single geranium show the beauty of flower, and never take on that disagreeable look which characterizes the trusses of the double kinds after the first flowers in it begin to fade. Spinach may be sown in the garden in March in rows 12 to 18 inches apart. Thin the plants to stand 6 inches apart in the rows. The best varieties are Long Season, Victoria and Triumph.

Good fertilizer formulas for cauliflower, celery, rhubarb, cabbage and other garden crops:
300 lbs. nitrate of soda.
300 lbs. Peruvian guano.
800 lbs. 16 per cent. acid phosphate.
Mix thoroly and apply 1000 lbs. to the

in the above formula.

For fruit and shade trees, shrubs

For fruit and shade trees, shrubs, vines, etc.:

100 lbs. nitrate of soda.

200 lbs. Peruvian guano.

700 lbs. 16 per cent. acir phosphate.
Apply 500 lbs. per acre.
For strawberries and small fruits:

200 lbs. nitrate of soda.

100 lbs. Peruvian guano.

900 lbs. 16 per cent. acid phosphate.
Apply 400 lbs. per acre.
For clover, alfalfa and legumes:

150 lbs. nitrate of soda.

200 lbs. Peruvian guano.

800 lbs. Peruvian guano.

800 lbs. 16 per cent. acid phosphate.
Apply 400 to 600 lbs. per acre.
Mix these materials thoroly on a level floor, using a spade or shovel. Spread the materials out in layers and turn over several times with the shovel. If passed thru an ash sieve of a quarter inch mesh all lumps will be pulverized and a thoro mixture secured.

mixture secured.

Start seeds of parsley in the house as soon as possible, in boxes six inches deep. Sow the seeds in drills or rows. Keep the soil just moist and when the edlings have made four or five leaves. seedlings have made four or five leaves, thin out the plants or set them out four inches apart in other boxes. Early in May transplant to the open ground during a rainy period or if the hose is available keep them well watered.

Outdoor sowings may be made in April,
May and July for a winter crop. Sow
very thinly in drills in finely pulverized
soil. Make drills a foot apart and as
soon as the plants are two inches high
thin out to four inches apart. thin out to four inches apart.

Give parsley a good rich, deeply cultivated soil. Summer beds can be made to serve as borders around the garden or under trees. The south side of a building or fence is the best place for winter beds. Where the weather is cold in winter protection will be required or the beds should be made in a cold frame.

Since the European war started potash Since the European war started potash has been scarce and expensive. Where stable manure or decayed vegetable matter can be had and used as a fertilizer, with an occasional application of slaked or hydrated lime, to correct acidity of the soil, there need be no apprehension as to results. Work in the manure when spading or ploughing this spring, and next autumn give a good dressing of lime.

Pyrethrums might be called spring chrysanthemums. They are gems for cut flowers. Start the seeds now in pots or boxes. They are hardy and will come up again next year. Give a good deep rich soil and an abundance of water in hot, dry weather and stake up the frail plants. When once established the plants can be increased by divisions. Seeds may be had of both single and double flowering varieties ranging in color from pinks to deep reds.

For best results with Pansies it is For best results with Pansies it is necessary to start with a good strain. The finest pansies are, as a rule, shy seeders which accounts for the difference in the price of the various mixtures. Seeds sown in April will produce blooming plants by the last of June and will give an abundance of flowers thruout the remainder of the season.

to make it smooth. Apply a good fer-tilizer lightly, ground prepared stable or sheep manure or other fertilizer. It is a mistake to plant Pansies in the It is a mistake to plant Pansies in the shade of a tree or building. An open space where the wind has free sweep over the bed is far better and Pansies so planted are free from the long straggling branches which produce few and inferior flowers. During dry weather the bed should be watered daily and in extreme cases twice a day. be pruned back very severely, leaving

The white leafed Centaureas are good for bedding and vases, hanging baskets and pots and also for margins. They are particularly fine as an edging to a bed of dark leafed plants of any kind. They are commonly called Dusty Miller. Sow seed early indoors and transplant in May.

THE BLACK LANGSHAN By W, H. CARD

fowl was fully developed with breed characteristics that differentiate it today from all other Asiatic breeds. Its origin is lost in the mysteries of the land of Confucius, a testimonial and deep in front of the thighs, with the land of Confucius, a testimonial of former greatness in poultry culture unusrpassed in modern times. The Chinese are notoriously careless in the breeding of domestic fowls in gentary, but the Langeston is regarded as eral, but the Langshan is regarded as gestion of storklike proportions. a sacred bird, which may account for the apparent great care in keeping the

breed pure during the centuries.

The name is taken from the district in China called Langshan, where these birds were first found by white travelers. England received the first importation in 1872, and in the early eighties they made their appearance in the United States, where they immediately became popular with fan-ciers. In England there was at first much opposition and unjust criticism, according to Weir, many believing the fowl but a mongrel Black Cochin or a Black Shanghai. However, no breeder of Langshans today has any doubts of its purity of blood, which is easily proved by difference in color of skin as well as by difference in quality of

The Langshan is a close-feathered fowl, weighing much less than Cochin Standard weight. The skin is white and the shanks are black, with pink or white bottoms of the feet. The Black Cochin has abundant fluffy plumage, yellow skin and yellow bot-

toms of feet.
An adult male Black Langshan stands twenty-nine inches from ground to top of skull; its body length from stern to front breast line is fourteen and a half inches; in other words, its height is twice its length. These figures are in harmony with its standard weight of nine and a half pounds. suggestive of close plumage, long of Langshans in the bronze caste, genshanks and thighs.

The hock joint has no apparent

bend between thigh and shank, giving beak and toes.

The city dweller with only a backthe leg from body to ground a At Their Best on Free Range. yard for space may keep fowls straight appearance — a peculiarity successfully if he adopts the fresh found in no other breed. The tail, air type of chicken house. A house of long flowing and sometimes having the shed roof pattern with 6 feet by sickle feathers sixteen inches in 8 feet floor space and roof 6 feet 6 length, is elevated to seventy degrees, Standard weights are exactly the same inches high in front and 4 feet high at which brings it even with the top of as for Plymouth Rocks except in pulthe back, will house ten to twelve the head. With its great height, tall lets, where half a pound is allowed in birds comfortably. The house may be elevation, short back and body and without windows, but the doorway at long, straight thighs and shanks, it is apparent that the Langshan belongs

THE domestic fowl of prehistoric ages may have been the Lang-shan. When discovered this

The plumage of the Black Langshan is in a class by itself. If no other trait bespeaks ancient origin and long pedigree, the iridescent, black and bottlegreen plumage is proof sufficient. Short plumage by purple patches and barring bird shows by brassiness. The Black Langshan has no purple barring or patches, and for pure bottle-green sheen on black plumage it surpass all other black breeds.

Brilliancy of black plumage must no he confounded with the greenish sheen Strange as it may seem, there are different shades of black plumage, con-trolled largely by color of skin. The black plumage of a fowl with white skin is purer and more free from foreign color than the black plumage of a fowl with yellow skin. Green is sympathetic color of black; yellow is not, hence foreign; all black plumage has the green sheen; the yellow skin which feeds the feather taints the green sheen with its own individuality, whereas the white skin has no effect

on the green lustre. Years ago certain faddists undertool to improve the work of the ancient Chinese by an infusion of Black Cochin or Black Shanghai blood, which accounts for some strains of Langshans showing a yellow tinge at the corners of the beak or between the toes. This infusion is first noticed by the student erally on the saddle hangers; closer inspection discloses the yellow tinge on

The Langshan, as an Asiatic, is believed to be one of the largest varieties of flowls: as a matter of fact, the Standard weights are exactly the same

3 Grand Varieties-Good as Gold

ranging in age from about 16 be questioned, however, whether these children are not either lacking in something essentially human, to begit feel a desire to break away from the with, or deprived of something of accustomed routine of the home, and value thru a treatment that establishes early contentment and resignation.

Did You Ever Run Away Yourself?

The Wanderlust Seizes Every Normal Child at Least Once in His Young Life—Whether

He Yields or Not Depends on Parental Ingenuity in Diverting His Adventure Yearn-

The combination of restlessness and wonder that takes in some children the form of venturesomeness shows itself early in life. A child of three, or even head shaking and some wistful less, may make life a burden to his looks. But altho many came up to the parents by persistently disappearing thru the open gate or by escaping from his custodian in the park or on a against his reflections upon our attachcrowded street. There is, of course nothing conscious in the young child's performance. A bit of color or a moving object catches his attention and he is off to investigate, forgetting mother or nurse or the errand upon which

A child passed a queer little house along a railroad track when taken on a visit to the suburbs for a few days. The next morning he set out in search of the little house and found it. He had a satisfactory conversation with the signal man, and the following day repeated his call. It was only when he was missed later in the week that his parents discovered that the child had been making these excursions to the strange house and the strange man. It takes very little in the way of novelty to arouse a child's interest and to make him follow up the interest

As the child grows older he becomes more conscious of his wonder about the world beyond the horizon. His ima-gination carries him to the foot of the rainbow or over the hills and far away. And just to the extent that ordinary conditions do not permit his body to follow his mind the suppressed desires seek a vicarious satisfaction. This is why tales of travel and adventure have such a wonderful hold upon children of all ages, including seventy years or more. Where there is oppor tunity to range over a considerable territory, as for children living in the to enrich the children's experience up

try to the city, to provide special oc-casions for going abroad into the un-But the child is a pioneer, an explor-er, and safety is to him a minor con-

The girls are quite as much tempted to experiment with the unknown as are the boys. But they resist their temptations more easily, on the whole They are not so courageous physically, and they have not usually initiative to the same degree. Moreover, the conventions impose upon girls certain restrictions that make it more difficult for them to find the opportunity to Their need, however, is as great as the

There are positive gains to the child in meeting with new experiences, in seeing new faces and new landscapes, in dispensing with all the comforts of home and in finding new ways of doing the old familiar things. It is therefore worth while to provide for the children all the hikes and trips and rides and excursions into the beyond they can possibly absorb with zest. In view, moreover, of the many pathological forms that suppressed can take, it would seem worth while country, the curiosity is satisfied when to the limit of the family's or the com-

New Place Cards.

Place cards are a necessity of the arge dinner party and there is a tendency to select some that will serve for souvenirs as well as for place cards. These may be as elaborate as the hostess wishes, often taking the form of hand-painted trifles, such as little bandboxes containing bouquets of bead, china or silk flowers. Hand-painted plate rings are new and may be had in pretty designs or painted to order. These rings are just the size of service plates and the width of the borders. They are painted in floral patterns with spaces left for the guests' names. Some of the rings are made of satin, in colors to the table decorations; afterwards they may be used for mats in

raming pictures.

Nearly all the new cards stand ease upon the service plates and their designs follow out some special point in the dinner. For instance, for a fish dinner there are odd fish, dainty shells, seaweed or marine scenes painted on the cards. For other occasions there are fruits, butterflies, flowers, birds, vegetables or people of familiar street occupations of the various countries, all in natural pose

and coloring.

Dancing girls may perch upon the rims of the water glasses; cut out figures from "Alice in Wonderland," painted like the original pictures, also belong to the easel group of cards. For the cubist dinner party there are small black silhouettes which are new and charming. When used with a black and white plaid table cloth, black and white striped china and vivid glassware, they are really unique.

LINOR MURRAY will answer questions pertaining to child welfare in this column every week. If the questions are not of general interest, letters will be personally answered where a stamped, self-addressed envelope is inclosed. Address all questions to her, care The Sunday World.

CONCERNING OUR CHILDREN

BY ELINOR MURRAY.

Family Unity.

NITY in a family is sometimes cumstance and interest. In such a family the big sister doesn't bother with the youngest's chums, except to find fault with them; and the youngest gets even by being a disobliging young torment Father doesn't discuss the news of

the day with the family. He either talks over their heads and discourages any comment or he buries himself be-hind his paper. He forgets that family discussion and intercourse prepare the way for worldly intercourse; and he can prepare the boys to take an active and intellectual interest in civic business and political affairs by his method of bringing these subject into the home.

Parents do well to discourage un-

friendly criticism on the part of one child towards any other member of known. With the prudence of years, parents think naturally of safety first. But the child is a pioneer, an explor
members, open and frank discussion between the persons involved is the best way to clear the atmosphere.

Harmony Depends on Love.
While the children are young they are merely passive members of the family—happy, loving and obedient. As they grow older, however, they take their part as makers of the family unity; for upon their love and interest lepends this desirable harmony.

One can see the advantage a child brought up in such a home has over one differently reared. To bring up a child with the idea that he is to receive all and give little or nothing: that he may look on his father simply as a source of supply, and on his mother as an agent in giving him home necessaries, on his brothers and sisters as beings who must be put up with, or teased, quarreled with and borrowed of—is to bring up a child that will so consider his universal brothers of the outside world. He will fight with other nembers of the big world family, even while he is dependent upon them.

Personal Sympathy. Personal sympathy after all is the ase of every human influence. children grown up and out in the world seldom recall the work done for them during their childhood. The abor and sacrifices may be remempered but they are taken quite as a natter of course, as things all parents indergo for all children.

But the good times together, the confidences, the adventures, the family emembarances that linger until old

There are few grown-ups who do

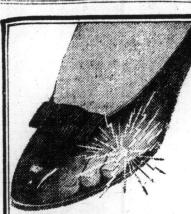

not try to live up to the faith that their mothers have in them. The benefits which come to a boy from intimate companionship with his father are very great and lasting in their effects. The boy's heart and reveal them to a busy individual who, from a sense of duty, puts down his paper long enough to ask the boy how he is getting on at school. A flood of understanding, icy cold, flows between these two. The boy easily goes away from home compan-ionship for his real friends and plea-

Very different is the boy whose father holds a big place in his son's life.
They are chums: they go fishing, they take long tramps, they have the dandiest, chummiest talks in which few subjects are not reverently touched.

How shall we deal with the boys and girls growing up around us? Would it not be well to carefully consider the strongest factor in child-training, personal sympathy and understanding?

TO CLEAN CALF BOOKBINDINGS.

Wash the bindings lightly with a soft sponge dipped in a mixture of a half ounce of the best glue dissolved in one pint of warm water, one teaspoonful of glycerine and a little flour paste. When dry rub well with a chamois skin.

THE SMILING FACE CLUB DIRECTED BY C. A. MacPhie

I PROMISE TO DO MY VERY BEST TO MAKE THIS SAD WORLD BRIGHTER.

Sear Smilers: I think you must lacking, because of a mistaken be forgetting about the prize for for it gave a wobble then, almost fell

> I was glad to get all your letters, as if it meant to ask me a question. stories and poems last week, some of which I shall publish on this page today, and some later on.

others want to be Growlers, instead of

I must tell you what happened, one day, quite a while ago: I was sitting in my room, and I wish you could have seen the awful day it was. Yes, my dears, I wish you could have seen it. Rain! rain! rain! nothing but rain; dashing in long crashes and slashes and splashes against the window: just cranky humor it was in.

"I don't care, old rain," said I, "keep en crashing and slashing and splashing, if you like it so very much, but you cannot touch ME; I am dry and comfortable, at any rate, and just then the rain started up harder than ever, with SUCH a crash and slash and splash that really I began to fear for the poor little window panes. "Oh, dear," thought 1, "I am glad I am not out in this crashing and slashing and splashing—and at that moment—I heard a tiny, little, weeny 'mew.'"
What is that?" thought I, "surely no cat has been foolish enought to venture out in this weather," but I stood up and looked out as well as I could, ture out in this weather," but I stood up and looked out as well as I could, thru the watery glass, Just to make sure, and what was this I saw?—Crawling along a water spout, at least I think it was a water spout, came a little wet—well, I thought it was a little milk somewhere.

Next day it was feeling much better, and next day after that, it was feeling so well that it impred on the table for kitten, but, to tell the truth, it really looked more like a rat, and I said:

balance, and still kept on.

"How, in the world, did you happen to get up there little Pussy?" thought I. "What was your Mother about, to let you go wandering so high?" Just then it almost toppled over, and I held out, no, up it came again, and in about

but, no. up it came again, and in about five minutes was below my window.

Just then a thought struck me: I wondered if it would be possible to reach it; I raised the window, letting in a crash, slash and splash and blowing everything everywhere, and I

but, no; it was fully four feet below

Suddenly a second thought struck me, and I raced over to my bed a pulled off one of the sheets; this managed to get out the window, and it JUST REACHED the place where the

little creature stood.

"Puss! puss!" I called, and then I was POSITIVELY sure it was gone, idea that companionship is the one who gets most Smilers by the but saved itself by catching the sheet with its claws, while it looked up at me with such a queer expression in ONE eye (the other was closed), just It held on to the sheet for a moment or two, blowing any where the wind sent it, and banging against the side of the building, till, if something had not happened, I believe I might have

heen out of the window myself. "Come on Puss; here puss, puss, puss," said a voice beside me; but I did not turn to see, for at that moment THE KITTEN BEGAN TO CRAWL UP THE SHEET. "Come on little pussy come on; that's the boy;" said the

now?" said the same voice," don't forget you are in a hotel, and animals are not allowed here," and then I thought it was high time to see wh was talking; so I looked up and, yes, it was, could I believe my eyes? one of my best old friends whom I had not seen for many a long day.

We could not stop, at that moment, however, for rejoicing, because the

and, sure enough it WAS a kitten, and not a rat at all.

On it came, crawling along the water spout, shivering and crying, with terrified eyes, looking away down below at the hard gravel and stones. Two or three times I was sure it was going to fall but, no, it regained its balance, and still kept on.

hotel a whole month.

My friend came every day to see how it was geting on, and finally took it away. I was very sorry to see my little kitten go, and it seemed sorry too, hanging to my shoulder and looking in my face as much as to say: "I am YOUR cat; don't, please don't, give me away." so I said to it: "Now listen: splashed on the window.

LETTERS, STORIES AND POEMS FROM OUR SMALL READERS

Dear C. A. Macphie: I have often | "And you are the man of the house." will join now. I will try to smile as much as I can, altho I am sad sometimes. Wishing you and all the smilers many happy returns of the day. Here are some riddles: Q.-When you burn your finger what three authors do you mention. A .-

Dickens, Howeth, Burns. (Dickens, how t burns.) Dear C. A. Macphie, if you get any nore S. F. C. buttons, please send me Tell me in next week's Sunday World if you expect to get any.

Grace Bowman. 38 Brock street, Hamilton, Ont. Dear Grace: We are not using buttons now, just the little pledge, and I am sure you will smile just as well since you have signed it. Sincerely

Dear Smilers: I am a member of the Smiling Face Club, and am sending you a little poem which I would like to have it printed on the Smiling Face Club page in The Toronto Sunday

C. A. M.

The peom runs thus:

If I Were a Man.

myself would like to be A brave one going oversea, would give my life for thee, And fight for my native country. would hear the cannon roar, and see the great ships washed ashor would be a soldier brave, And would dig the kaiser's grave, For he can plead for life no more Until he ends this dreadful war. By H. Shaw

Dear Smilers: I have now been in four club for nearly a year, and I feel must do something for it. I have still got the button, and wear it. We get The Sunday World every week, and I like looking at it. I am sending you a little poem I found in one of my books. The Boy Who Helps His Mother.

I saw a little lad, Whose face was just the kind of face To make a person glad. saw him busily at work, While blithe as blackbird's song, His merry, mellow, whistle rang The pleasant street along.

Just then a playmate came along, And leaned across the gate, A plan that promised lots of fun And frolic to relate.
"The boys are waiting for us now So hurry up," he cried.
My little whistler shook his head,
And "Can't come," he replied.

"Can't come? Why not, I'd like to What hinders?" asked the other. "Why, don't you see?" came the reply, "I'm busy helping mother.
She's lots to do, and so I like To help her all I can; So I've no time for play just now," Said this dear little man

'I like to hear you talk like that," I told the little lad:
"Help mother all you can, and make Her kind heart light and glad." It does me good to think of him. And know that there are others, Who, like this manly little boy.
Take hold and help their mothers.
From Florence Newdick.

Dear Editor: I have much pleasur. smiling Club page, and would you The Man of the House.

First Verse.
Off to the war when 'twas first begun Daddy stooped down to say:
"You are the man of the house, my so While I am far away: Tittle pet names we'll use no mor 'Boysie,' and 'Mops,' and 'Mouse,' four name is the same as mine

'Theodore':

voice, and in about five minutes (it seemed more like ten), the little creature reached my hand, and I drew it in. Such a poor, miserable, wet, half-drowned, sad, sick-looking, little reature you never saw in all your life. "What are you going to do with it

looked more like a rat, and I said:
"Yes, Mr. Rat, you are getting a fine washing for once in your life," and then I heard it again: "mew, mew," and, sure enough it WAS a kitten, and next day after that, it was feeling so well that it jumped on the table for a piece of paper, I had thrown, and broke one of the nicest pictures and, just think, they let me keep it in the hotel a whole month.

My friend came over the same of the nicest pictures and piece of the nicest pictures and piece of the nicest pictures and provided the same over the same of the nicest pictures and provided the nicest pictures and pictures are nicestally pictures.

me away," so I said to it: "Now listen: some day I shall not be in this hotel and, when that day comes, the very first thing I shall do will be to send for you," and the funny thing was, it seemed to understand; but I noticed as they went down the stairs, that my little cat had one eye fixed on me over my friend's shoulder, and such queer expression-just as it looked on the day I held the sheet down to it, and the rain crashed and slashed and

I am the man of the house, yes, I Therefore the whole day thru, Hard as a small boy may, I try Things like a man to do. Never when vexed into tears to burs Never to grumble—nay! Always to think of mother first, That was my daddy's way.

When I had fastened her right hand glove, (Took me some time) last night, Smiling, I said to her, "There, my love Think you will find that right?" Sudden she whispered, "Oh, boy, you

grow
More like him everyday!"
That's being man of the house, know, While daddy's far away.

From Helen Garvie.

Dear Helen: Thank you for your nice little verse. We are not sending out buttons at present, but see our little pledge and sign it. Sincerely yours, C. A. M.

Dear C. A. Macphie: I would like i very much if you would let me join the S. C. F., and get a button. Because I find it very hard to smile some-Yours truly, Charlie Halliday,

17 Norfolk St., Toront Dear Charlie: I am sure everyone finds it pretty hard to smile sometimes Even I do myself, the you would hardly think so: now, would you? We are not sending out buttons at present, but find our little pledge and sign it, then I am sure you will smile as often as you possibly can. Sincerely yours, C. A. M.

Dear Smilers: I read The Sunday World every week, and I like it very much. I would like to belong to the S. F. C. I am ten years old. Please end me a Smiling Face Button. I wil end with a little adventure my cousin

We went to a park three miles away from where I lived. When we got there we stayed quite a while. Then when we were about to go home I found out that I had lost my purse with the money we were going to ride

WHO NEEDS TO SMILE JUST

until the vomiting has ceased entirely for a number of hours and water is HAVE heard mothers say that it is HAVE heard mothers say that it is retained, should food be given. Give of no use to give them a diet list, two or three tablespoonfuls of hot, no use for them to prepare a meal clear broth, free of fat, to begin with according to one, because their chil- Later add other foods very gradually. dren will not eat the food. They will Thin gruel made from barley, rice or pick at it and perhaps eat all of one pick at it and perhaps eat all of one a well-cooked cereal and thus work thing—the rest is wasted. More than back to the regular diet. Milk is apt to sour on the stomach, and should be diluted at least one half with gruel that the mothers are worried.

A good deal of this trouble may be caused by bad training. I believe in from giving milk for two or three days. teaching children to eat what is put before them, without question. A child does not often dislike food; unless he hears some comment concerning his ot night, dark rings under the eyes are likes and dislikes. Of course, if you find that a certain kind of food is positively distasteful to the child without of their education to teach her children interference on your part, by all means to eat proper foods in a proper way. find a substitute. But don't talk about If good habits are formed in this reon to alter many things in the diet few rules which may be followed with

Very often loss of appetite is due who watches the scales too closely, and thinks her child is not growing as rapidly as it should, makes the mistake of giving more or stronger food than should be given. All food taken in excess of what a child can digest besomes a burden, and a disordered condition in the stomach is the result. A long period of over-feeding is usually followed by loss of appetite.

If a child seems well in all respects and the only alarming symptom is loss of appetite, it can usually be remeed by giving food at regular hours, the interval between meals being 5. The child longer than before, and the food given its food weil.

Cause of Indigestion. Indigestion is the result of bad methods of feeding Rapid eating; too much of one kind of food; insufficient mastication; eating between meals and over indulgence in sweets are the main causes for loss of ap-

petite and indigestion.

Bad habits of eating are very easily to correct. It requires constant watchfulness at every meal to see that the food is taken properly and chewed thoroly. The tendency, you know, of course, is to bolt a big spoonful as rapidly as possible, hurrying it away with a drink of milk

I find it best to keep the dessert out of sight until the main course is eaten, and to allow no milk or water on the table at all until all the food is eaten. You can make a game of "how many chews to a bite." It nelps mastication.

Many people give their children improper food "because they want it," and they think it wrong to deny children anything they want, irresof the children or upon the happi- | She is perfectly well in every respect, will kindly send a stamped, self-addre ness of the remainder of the house-hold. Children will learn to eat proper food if it is given them in the proper way; and correctly trained children will never think of desiring everything they see on a table, ever if it is at a party or picnic. As for the parents who "couldn't bear to eat anything they couldn't share with their children," I would advise such devoted people to confine their diet to food worthy such noble sen-

In the general run of things such equality in child and adult food is not possible. I think the simpler plan is to create in your children so great a faith that your opinion that this or that article of food is un-suitable will be quite sufficient to settle the matter. Stomach Attacks.

Children who have "stomach attacks" at intervals of a month or two have some error in their diet to account for. These are not unavoidable incidents in a child's life, and should not be con-

sidered lightly. A picnic, party or some such celebration is often the excuse for generously gratifying the infant taste for candy or rich food. And the result is a war within the confines of the little stomach and a temperature of high degree. For a day or two the child is

Electric Vacuum Cleaner Clements Manufacturing Co., Limited, 78 Duchess Street. Toronto. I accept your offer to deliver to me, without charge or obli-

Cleaner for five days' use. Name Address

gation, a Cadillac Vacuum

There is only one way for you to realize how much work a Cadillac will save you-and how much dirt and dust the ordinary broom misses. That is to have the machine in your home—use it on your floors, carpets, walls. draperies, furniture, mattresses, etc. And that is exactly what we are going to do for every woman who telephones our office (Main 6148) or sends in the coupon above. You will find it saves you hours of labor - cleaning becomes a pleasure - and the thoroughness of the operation is a delight to a woman who desires scrupulous cleanliness.

you have recognized the vacuum cleaner as indispensable to your home, keep it. Pay only

At the end of five days we will send for the Cadillac. If

\$2.50 Down

Balance in Small Monthly Payments

You will never miss the small payments thirty days apart -on the contrary, the saving in time and labor right along will greatly overshadow the moderate cost, for the Cadillac is the least expensive of all electric vacuum cleaners, and carries with it a written guarantee.

But remember, this offer holds good anywhere in Ontario for immediate acceptance.

TELEPHONE MAIN 6148

and a Cadillac Electric or Hand-Power Vacuum Cleaner will be delivered at your home whenever convenient to you.

Cadillac Vacuum Cleaners are made in Canada by Canadian workmen at our own factory. They are the only strictly Canadian-made vacuum cleaners on this market.

Model "E" shown is fitted with a universal motor, so that whether your home is wired for Hydro or Toronto Electric Light power, the Cadillac operates perfectly. Don't miss this opportunity by delaying. Send us the coupon, or telephone

ANSWERS TO HEALTH QUESTIONS

P. F., Toronto.—A.—I will be glad to rive you the desired information if you

ed envelope with your query repeated. Mrs. A. S. R.

There are babies who never get fat; still the general assumption is that the perfectly healthy baby gains steadily in weight, and exhibits this gain by an attractive plumpness. There is the possibility that your milk is not sufficient for your baby. The quantity

oe possibility that your milk is not sufficient for your baby. The quantity may be there, but its quality may be decreasing. I would give baby several feedings of modified milk every day. Start right away by substituting a bottle at her noon meal. She should take almost eight ounces of food at each of her six meals every day. In starting the milk diet, however, it is not likely she will take that amount, nor would it be wise to allow her to do so. For her first bottle meal, prepare six ounces of food; three of milk and three of boiled water, half a teaspoonful of sugar, and a pinch of bicarbonate of soda. Continue this formula at the noon meal for two or the continue and the round will kind-

J. L. S.: Q.—I am troubled with a tingling sensation in the finger tips of my right hand. What remedy will you advise?

advise?

A.—It is expedient that you avoid all excitement, obtain lots of sleep and rest, do not over-exert yourself, and keep the bowels active, especially at night. Avoid all hot dishes, salt, pepper and other condiments, seasonings, highly cooked foods, nuts, peas and beans. Take 15 drops of a saturated solution of iodide of potash in water after meals, increasing one drop at a time until you are taking 50 drops; then go down again to 15, and up several times. Drink three quarts of distilled water daily, lots of fresh country milk and cream, and take a Bulgaria tablet with your meals.

A Daily Reader.—Q.—Can hypochon-driasis be cured? What is it? A.—Hypochrondriasis is a disturbance of the functions of the nervous system similar to that in melancholia, in which the patient believes himself suffering from bodily disease. It is characterized by alternate spells of moodiness and ex-citability. Yes, it is curable.

M.D.L., Toronto, Ont.—Q.—Kindly advise for goltre? 2. What do you advise for bed-wetting? A .- There are various ways of treating the many different kinds of goitresone is to try Beeche's anti-thyroid ser-

DEAR ANNIE LAURIE:

I have been going with a young man for about four

young man for about four years. He is 21 and I am 19, and I

love him very dearly. About a month ago we had a quarrel, and did not see each other for a long

time. I went away and stayed to try to forget him, but I could not. While I was gone he went with some of my best girl friends, and

when I came back he asked to be friends with me again, and we have

been going together ever since.

Do you think he loves me? And

do you think I ought to be a friend

NXIOUS: There is no reason why

to him again?

DEAR ANNIE LAURIE:

I am a girl, 23 years of age, and have quite a few young men friends who call on me occasionally and take me to different places of amusement. They all treat me with the greatest respect, and seem to enjoy my company very much, as I am considered quite a jolly girl and take well in company. But not one has made any effort to "keep steady company" or become engaged to me, but when we get home after an evening at a show or dance, they always ask me to kiss them or "spoon" with them, which I absolutely refuse to do. They then tell me I take life too seriously, or that I am an icicle, and the like.

Blue Eves.

Annie Laurie.

D LUE EYES: It is my notion that there are a good many young men looking for a wife who young men who say you take life too seriously. Don't be upset by what they say. Keep serenely on, for you are right, and time will prove it to you in thousand different ways.

DEAR ANNIE LAURIE: Is it correct for a girl to ride

Annie Laurie. | quart mold.

DEAR ANNIE LAURIE: I am a girl of 20, and engaged to a young man of 27. We love each other very dearly, but he is wearing another young girl's signet ring. When I ask him if he will be a return it he gard he is reciped. please return it he says he is going to have his initial put on and hers taken off. He says it won't be hers any longer then. Do you think he is treating me fair? I have given up all my other gentleman friends for him, and I don't think he should have a ring belonging to another

girl.
Please, Miss Laurie, tell me what you think I ought to do? Heart-Broken Dorothy.

[EART-BROKEN DOROTHY: If the man really loves you he will not wear another girl's ring except to tease you. Perhaps if you smiled about it, and in this way spoiled the take, he would cease to be interested

DEAR ANNIE LAURIE: I am a girl, 18 years old, and am in love with a young man five years my senior. He has already told me that he loves me, and has asked me to be his wife. I have a very good home and a good mother, but my father is very cranky. He does not allow any boys to come to see me, and does not treat men well. Please advise me what to do.

D ARBARA: I cannot advise about men looking for a wife who would be glad indeed to know that truthfully say that it never pays there was an honest, modest, sensible to marry in order to run away from the way and the sensible to marry in order to run away from the sensible to the sensib girl like you in the world. In their what we consider unpleasantness in hearts men like best the girl who does our home. If you love this man and not "spoon," the they have a way, most of them, of putting every woman who crosses their path to the test, and then labeling her and settling it all in their the state of the own minds once and for all. You have you get a little older your father will been unlucky in meeting so many undoubtedly be willing for you to have company in your home.

CURRENT COMMENT ON WOMEN'S WORK

most part among women who are not most part among women who are not in touch with the lines along which women generally are applying themselves in the matter of patriotic service. For example, the other day a letter appeared in one of the daily papers from a woman, who stated that she had registered at the Patriotic League Headquarters but that no employment had been found for her tho this would be the result of her appli-cation. Of course the explanation is that the woman had conceived she had been given to understand that that the woman had conceived a wrong impression. No one had told her that work would be forthcoming the moment she registered. She had simply taken it for granted that since women were registering and men en-listing that openings would be avail-able at once and that a lightning-like exchange of name and employ ent would be effected by the simple appearance on the scene of the woman ready to take the man's place.

This is quite a mistake. Registrathe ordinary employment bureau. The life perhaps, she will slip into a cog jority of cases marks the happenings of normal times. The thing the Emdone nothing outside the home along any particular line of professional or indsutrial work, what they think themselves best adapted for in case it may come here as it has done months tivities of the ago in England, France and other gratulation. lands that women will have to largely fill the gaps made by the enlistment of thousands of men. It is felt that such a time is already with us or will

In registering women are asked sim-ply to give such information as would street west. Here the members are enable an employer to judge if she would either at once or with some layer to view the art exhibits little training, become useful to his apecial line of work, and if the prospect is sufficient to warrant him giv-ing her a try out and so release one ity with tools may be gained. Meanity with tools may be gained. Meantime all women are asked to do is to give the desired information regarding themselves and then wait patiently for developments.

Altho a good deal of publicity has been given to the work of the Wom-en's Emergency Corps, much obscurity

Had it not been that politics came into the question, the working out of the dual tongue would have been much easier for Cornels that politics came into the question, the working out of the dual tongue would have been much easier for Canada than for the Motherland. As it is, a foolish feud seems to exist in many quarters as to its objects. This lack arises for the destroys the facilities right at our door and sews seeds which tend more and more every day to make us a people with but one tongue, and with the piling up of limitations even on that for to deprive us of acquaintance with French is to close the door to an appreciation of many words in our own grand tongue.

With the holding of their annual neeting a few days ago the Women's Canadian Club has started on a new cycle of its existence, and with pleasant recollections of a year well and profitably spent. Some time ago this column pointed out that as an educational factor the Women's Canadian Club stands in first rank for the benefits it gives its members thru the series of excellent lectures it provides for its monthly meetings. The very best possible in this direction has been provided and doubtless this course will be continued by the new executive. Then, too, there is something to be said from the finantion by the Women's Emergency cial side and the assistance that has been given during the past twelve months to different patriotic objects. In addition to \$100 given to Serbian particular line, and who is sure of where she will find a market for her Secours National, the club raised ervices and can place herself easily \$300 to furnish and equip a sittingis not asked to inscribe her name. She room at Exhibition Camp for the can look after herself, and just now artillery men. There is a theory more than at any other period in her that the president of an association has merely to sit in a chair and lisof the world's machinery with far ten to opinions expressed by the more ease than that which in the maout in practise, and in reality it is the president who makes for the vitality ergency Corps has set itself to do is to carry on a campaign of preparedness. "Like a Rat in a Trap'

While Max Lamar was musing in lem of June's guilt or innocence. June herself was confronted by a problem quite as disheartening and far more

Eagan's presence in the Travis house, and June realized all it might mean to her. The man, hidden in the attie storeroom, held her fate, her liberty, in the hollow of his grimy hand. had seen the Red Circle on her hand. He was crafty enough to know

how fearful a hold over the girl this secret gave him. June could bear the suspense no longer. Impulsively she got to her feet and crossed the room toward the hall

"Where are you going, dearie" asked Mary in sudden anxiety.

"I'm going to see him," replied June. should happen to come up to the attic

"No! No!" wailed the nurse. "No! No!" wailed the nurse.

"There is danger—horrible danger.
But I'm not going to skulk before it. for her."

"If she does," whispered Sam, almost solemnly, "so much the worse for her." I'm going to see him and find out the

June had taken off her hat, and a he spoke she was stripping the gloves from her hands. The left glove came down. It ain't a time for meelodrayma off first. Then, as the right glove was half removed, its wearer noted the pelsing Red Circle on her hand. Inpulsing Red Circle on her hand. In-atinctively she drew the glove over it. Meantime Mary had flung herself between June and the door, exclaiming

Oh, my dear, my dear! You mustn't. He he might kill you!"

Kill me?" echoed June, bitterly. "I almost wish he would. It would be the easiest solution of the whole wretched puzzle. But he won't. Any more than wise man would light a fire with mil-ion-dollar bills. Dead, I'd be no use to him; alive, I'm a fortune to him. And

"But, my precious——"
"The Red Circle is throbbing on my hand this minute," interrupted June, grimly. "See it! And yet I have he craving for mischef or crime. It must be a new manifestation of Jim Borden's the trait that made him "See it! And yet I have no wolf nature—the trait that made him want to face his enemies instead of slinking away from them. Let me go."

She shook off the old woman's ap-She shook off the old woman's ap-

"If you're going there," declared the battle, "then I'm going, too. I'll keep him from harming my baby if anyone

June scare heard her. Already the girl was hurrying toward the stairs words of anger.

that led to the attic. Mary scurried along at her heels.

Together they reached the doorway leading to the attic stairs. June flung open the door, and the two climbed the narrow and dusty stairway, first carefully closing the door behind them to prevent sound of the coming interview from reaching the ears of anyone below stairs.

"I stay right here, my lady," he announced loudly. "And you'll see I'm well took care of. If you don't—or if you try to double-cross me, everybody is goin' to know all about Circle Jun's daughter. Get that?"

"You—you horrible old grinning the prevent sound of the coming interview from reaching the ears of anyone below stairs.

"You—you horrible old grinning Chessy Cat!" shrilled Mary. "I've seen twenty pictures of Judas Iscariqt; and below stairs.

Then he saw a sheet of notepaper sticking half way out of the torn ensuing her right arm.

A second and a third blow stairs half way out of the torn ensuing her right arm.

The money in one hand, stared stupidly at the envelope. He read aloud the typewritten address:

With all her might she smot blow from the crop caught the money in one hand, stared stupidly at the envelope. He read aloud the typewritten address:

"FOR THE EMPLOYES OF THE FARWELL CORPORATION."

"What the blue blazes—!" he sputtered.

Then he saw a sheet of notepaper sticking half way out of the torn ensuing her right arm.

A second and a third blow sticking half way out of the torn ensuing her right arm.

into the gloomy attic room with its dimly seen piles of trunks and packing boxes and outworn furniture. Mary paused, staring timorously around the dismal and cluttered room. There was no sign there of the man they sought. June drew a

sigh of relief that merged presentinto as sharply nervous intake of relief that merged presently breath, as something moved in the shadows of the attic's far corner. From an impromptu couch of stoned quilts and moth-eaten pil-

head cautiously came into view. Sam in his comfortable hiding place, had had peeped out to see who the intruders might be.
At the sight of June and Mary he rinned pleasantly, got up, stretched foot of the attic stairs was hear open. Mrs. Travis' voice called:

well, well!" he rumbled, in mock

"Ugh!" shuddered Mary in sharp gayly.

"Same to you old dame, and many answered Sam, "and while we're on the subject of victuals-" I didn't say one word about vict- I'm sorry. "No?" snapped Mary.

grunted Sam. "Well, I'm
That snack you smuggled enough to fill up a s'ciety girl or a canary, but it wasn't hardly more'n an appetizer for me. Rustle the rest of the meal up here as quick as you can. I'm gettin hungry again. And when I'm hungry I want to eat. That's what I get hungry for. And. while you're about it, just catch me a pant flask of the Stuff That Killed Father at the same time. That's the

French for booze. Get me?"
"'Scuse me, miss," he broke off,
turning to June. "I was so busy
givin' orders to my dopy old housekeeper here that I didn't hardly no-tice you. Sit down, won't you? I'm sorry the place is so dusty and cockroachy. It's all old Mary's fault. If ft wasn't that she's been in our fam'ly for more'n eighty years, I'd sure have to fire her. She's an old doodlewit. She don't feed me enough,

You miserable-" sputtered Mary,

*Yes, by leaving here."

r. And—
"That's up to you." philosophically the present mass meeting. answered Sam. "That's vour share of the game, Miss Travis. I can't well watched the gathering of the men in the yard. He knew well enough and he scowled, as

at did all I could for you when you what was up. And he scowled, as came out of prison, penniless and an fragments of the spokesman's speech outcast," went on June, ignoring his came to his ears.

your feet again. I didn't ask any re-ward; not even your gratitude. But now that I'm in such dire peril, won't you please help me by going away and saving me from the danger of your presence here? Every minute you stay in this house is a menace to me.

oh, please go!"
"Go?" he said argumentatively, and still smiling at her. "Go where? To jail? That's where they'll stick ma if I leave here before this row blows over. And even this dusty old hole and Mary's half-portion food are a whole lot better'n the pen." "But you could creep out at night—"
"And be nabbed at daybreak. No,

thanks, I'll-"
"But I'll give you enough money

that. But not till it's safe to sneak out. I'm laying low, just now. And you're goin' to help me do it." "But don't you see what it means to me?" pleaded June. "You can't stay

"Oh!" cried June in horror.
"Listen here!" went on Eagan, note of rough authority in his voice. "Let's you and me come to a showyou're goin' to keep me on Easy street. Not because you want to. because you've got to. Because if you of int'restin' things about Circle Jim Borden's crook daughter.

"Cut out the snappy stuff!" ordered Sam. "Treat me easy and you'll find me easy to treat. That's always been my way. But come any rough business with me, and you'll always find me on hand with a bucketful of trouble. Remember that. So don't call names, any more. Huh!" he rumbled in contempt. "You're a swell one to be talkin' to me as if I wasn't as good

"You beast!" flamed June. "You

She shook off the old woman's appealing grasp and pushed Mary gently to one side, leaving the way open to the door. June tore herself free from his grasp, nt nurse, giving up the unequal just as Mary sprang forward to rescue e, "then I'm going, too. I'll keep her darling from the man. Both women broke into flerce speech. But Eagan's deep voice easily dominated and drowned their

June a step ahead, they emerged every single one of them looked just exactly like you! And if you lay your filthy paw on my baby again or speak one other word to her, I'll claw both your slimy eyes out!"

With a thunderclap oath of rage, Sam strode toward the dauntless little old woman. His foot struck against an old-fashioned hat rack which was minus one leg and was propped against the wall.

Down, with a resounding crash, fell the heavy rack, dislodging in its tumble packing box and a bracketful of crockery. The attic re-echoed deafeningly with

the din of the universal downfall.

June and Mary clutched at each other At the same moment the door at the foot of the attic stairs was heard to

"Who is up there? Is it you, Yama?"
June's light laugh broke in on the cordiality, "it seems like this is my query. Seizing Mary by the hand, the reception day. Welcome to Castle girl ran to the head of the stairs and Began, ladies. I'd 'a' spruced up a bit began to descend them, dragging the L'd known I was goin' to have terrified nurse along with her. gh!" shuddered Mary in sharp gayly. "We were rummaging up here for some lace I thought I left in

a trunk. But it isn't there. And, just as we were starting down I hit against an old hatrack of grandpapa's and knocked it over. Did it scare you?

While she talked she reached the bottom of the stairway. Releasing to. That snack you smuggled Mary's hand, she threw one arm about the here to me awhile ago may be Mrs. Travis' shoulders and whisked her away to look at some pictures of a new car she said she had set her heart

. Next morning, June put on a riding habit, ordered her saddle horse brought to the door in half an hour, and then shut herself in her own der Taking from a drawer the big pack-

et of banknotes she had stolen from 'arwell's safe, she counted them carefully. Then she sat down at her type-writer and pounded out a half dozen ines. Addressing a large envelope, she put the typed sheet into it and stuffed the sheaf of banknotes in there, too. Sealing the envelope, she thrust it into the inside pocket of her riding coat, and ran downstairs. June turned her horse's head toward

the section of the city where stood the Farwell corporation's factory. It was Farwell corporation's factory. It was not a savory neighborhood, at best. in fury, but June cut her short.

"Sam." said the girl, facing the grinning fugitive: "I've come here to have you help me."

Help you?" repeated Eagan, puz
And this morning it was even less peaceful than usual. For the bulk of the Farwell employes were gathered in have snatched the money, too, but that chanced to be just out of his reach.

Silas Farwell's failure to keep his ord about sharing with his men the "Oh, I see. Nothin' doing, sweetie. profits of the concern was the theme their spokesman's harangue. The "Please!" implored June again "Co-operative Profits" plan had been received with noisy joy by the eminterrupt. "Please go! Please don't ployes. Gordon's warning to them had endanger me by staying here. At any moment my mother may find you're hidden in our house. Yama or one of the other servants may tell her. And—"

""" tell and been their first hint that Farwell might not keep his word. Since then, days had passed; and there was no sign of the promised dividends. Wherefore, the earlier discontent had merged into the present mass meeting.

flippancy. "I gave you help. I gave you money. I found work for you.

His right hand slipped into the pocket of his coat, and his fingers closed about the cold butt of a pistol that rested there.

The men drew near. At sight of

their employer, they halted, glanced at one another, and then stepped up to him; taking off their hats as they "Mr. Farwell." began the spokes man, nervously, clearing his voice a he spoke, "Mr. Farwell, we are a dele-gation from the hands, chosen—chosen

to ask you if you mean to make good on your promise to share profits wit! use. We-"
"No," said Farwell, coolly, "I don't explained that, in the notice I had the janitor tack up on the work-room

the spokesman, losing hold of his tem-per, "What do you mean to do?", "Just this," answered Farwell. Before the others could guess his man, flush on the point of the jaw

"Then, you rotten crook,"

and sent him sprawling. The stricken man scrambled to his feet. His two companions at his side he sprang like an angry dog at Far-well's throat. But the three men stopped their rush, almost in midair; as the factory owner flashed out the istol from his coat pocket and leveled it at the foremost of them.

There was an instant pause; as the assailants blinked irresolutely at the black pistol muzzle and at the coldi "Go back to your work," said Farwell, breaking the momentary silence; his voice as cold as steel and as dead-

ou will go feet foremost."

Beneath the menace of the leveled reapon and the dominating gaze of their employer, the trio looked sheep-ishly at each other; then, one by one, turned and shuffled away toward

the yard.
Farwell dropped the pistol back into his pocket and continued upon his way to his own office. The three delegates returned to their fellows. The rest of the men crowded eagerly around them for news of the interview.

"It's no use," reported the spokes-an. "I asked him, and he—" Something white flew thru the air, striking him across the eyes and then falling to the ground at his feet. The spokesman looked around him in be wilderment. So did the other men. They had a fleeting glimpse of a girl on horseback, riding away from the board fence that divided the yard from did he press that she dared not risk

the street.
"She threw it at you," said one of he men. "I saw her. What is it."
The spokesman had stooped and was picking up the white thing that had picking up the white thing that had see the outstretched bay head at her struck him. It was a large envelope, knee. The bay crept farther and farvery thick. The others pressing close around him in jostling curiosity, he tore open the end of the envelope.

Out fell a package of big denomina-

velope. He drew it forth and, in a

voice shaking with wonder, read the few typed lines it contained: "Accept and distribute the inclose as part payment of your accumulated co-operative profits in the Farwell corporation-An agent."

A cheer from hundreds of hoarse throats broke in on his reading. "Come on!" yelled the spokesman enthusiastically, as he flourished the lay half-stunned, handful of big bills, "come on, boys! On raced Let's go to the boss and thank him. Glancing back, she saw the prostrate He's a white man, after all. And I'm man move a little, as the trying to

Farwell, in his ground-floor office, overlooking the yard, glanced out of the open window just in time to see crowd start toward the building. His hand went to his pistol butt. He thought he understood that unani

movement. Presently, his look of dogged defiance changed to one of bewilderment. This mob of avengers was behaving most strangely! The men were danccaps and shaking hands with one another. Surely no angry mob would

act thus. Just then, the front rank of them caught sight of Farwell standing in the open window. A roar went up. "Three cheers for Silas Farwell!"

shouted the spokesman. thundrous zest. "Three cheers for our white boss! velled another workman.

And again the throng cheered, rapurously. The men came to a halt just in front of the window; shoving forward the spokesman, who still held the

bundle of money in one hand and the "Mr. Farwell," he began, "we want to thank you. It was a funny way of sending us our cash, but it was mighty welcome. And I want to apologize to you for-" "What are you blithering about?"

queried Farwell, in dire perplexity.
"And what's that money you're shaking at me? What is—"
"The money?" echoed the spokesman, as a murmur of surprise ran thru the crowd. "Why, the co-opera-

He got no further. Farwell reached

"Who gave you this?" roared Farwell when he could get his voice. "A girl," answered the puzzled spokesman. "On horseback. Threw it over the fence to me. She rode past, two minutes ago. And—" But past, two minutes ago. Farwell, note in hand, had bolted out into the street. He was just in time to see a girl, mounted on a slenderly built saddle horse, turn a corner several blocks away, and vanish from his view.

He had recognized the shape of the packet of bills the spokesman had flourished. They were the same bills that the "Circle Lady" had stolen from his safe the preceding day. He had no great hope of being able to persuade or bully the men into giv-

ward him. He understood the object of their visit.

His right hand slipped into the pocket of his coat, and his fingers are pocket of his purpose.

She realized that her horse was none. But he saw something almost as good for his purpose.

Alongside the opposite curb lounged

> seized the officer by the arm.
> "Did you see a woman ride past here few moments ago?" he demanded. "Why, yes," returned the patrolman, wordering at his interlocutor's excitement. "I did. I didn't take much notice

usly, "How could he possibly—?"
"I must go and look for him," insistinch, to work his own hand back to ed Lamar. "That is, if you'll let me. He probably remembered your goodness to him in other days, and sneaked in here to try to persuade you to help m. Let me go in, please. He mustn't get away from us again."

June, too confused to make any protest, led the way into the house. She was sick with terror. In the library doorway they met Mrs. Travis. She

came forward, cordially, to greet La-mar. The crime specialist cut short her salutations by saying, brusquely: "Mrs. Travis, I have reason to think criminal is hiding in this house. Smiling Sam' Eagan, the crook I told ou about, down at Surfton. May I search for him?

"Why, certainly," assented the startled old lady. "But—oh, I do hope you are mistaken, Mr. Lamar! I can't be-Max had already started up the stairs. June, dreading to go with him, yet dreading far more to remain in

suspense, followed. Mary, who had been crossing the lower hall as Lamar entered, hurried after her.

The search of the next floor was merely perfunctory. Max would have gone straight to the attic, had not June, with an affectation of caution,

"He's not down here!" declared the crime specialist at last, in growing impatience. "I'm going to try the attic. How do I get to it?"

He was standing close to the door way, as he spoke, the doorway leading to the attic stairs. And his strong voice carried every word to the fugi-

tive above. At the sound, Eagan started to his feet, knife in hand. This attic was no o. If he could get downstairs, a leave the way free for him to escape to the street. Yes, and that same knife-thrust might silence Lamar for-ever. If so, he had no fear of the household's women blabbing as to who had done the murder. They would not

Knife in fist, Eagan tip-toed down the stairs. With his free hand he open-ed the door a little way, and peeped into the upper hall. Lamar had just moved from that

very door, and was standing with his back to him, only a few feet away, attic stairs. were nearsighted. He went over to saw the broad, hideous face, the tight-

pecting Lamar. awoke from her daze of horrified inaction. With a scream she seized Lamar, and by main force hurled him to one side and half way around. The knife-thrust missed its mark by the fraction of an inch. Lamar, whirl-

grappled him.

Back and forth across the hall the two men swayed and lurched in their fierce wrestle. The shoulder of one of the two close-locked bodies struck against the attic door, slamming it hallway became a bedlam of noise and

Sam managed to wrench his knife hand free. He lunged murderously at Lamar's throat. Max was too late to guard the blow. But he shifted his for a little walk. I—"
"Going for a little hundred-yard little body to one side. The blade flashdash, you mean," corrected the per-plexed Lamar. "Let me in there. I've hilt, in the wood of the door.

Sam, with his left hand, sought to "Why, Mr. Lamar!" exclaimed a coice from the foot of the steps.

Max turned, to see June, in riding ress, crop in hand, mounting the vernical mand, mounting the vernical mand, sought to fight off his enemy, while with his right of fight off his enemy, while with his right of fight off his enemy, while with his right of the steps.

In a state of the foot of the steps.

In a state of the steps will be a state of the steps will be a state of the steps with the steps will be a state of the state of

Max merely defended himself as

best he could. His right hand was trying to get at the pistol in the hip pocket. But Sam saw the move and fought to prevent it, Nevertheless, still struggling to seep his foothold against his heavier antagonist, Lamar managed, inch by

the pistol. At last he was able to draw it. But, as he did so, Sam seized the crime specialist's right wrist with both his own huge hands, and exerting all his twisted Max's hand outward and up-

ward. No human power could withstard the pressure, so suddenly and skill-fully exerted. The pistol leaped from Lamar's opened flingers and fell to the

Mrs. Travis, at first sound of the battle, had come running up the stairs from the library in terror. At the second floor landing she saw the two combatants reeling to and fro in death grapple, while Mary and June looked on in fascinated horror. Without an instant's delay, Mrs. Travis darted into the nearest room,

snatched up a telephone and sum-moned police headquarters. It took her some moments to get the connection, because police headquarters "Central" was just then listening to a patrolman's thrilling account of the way Attorney Charles Gordon had come to the chief of police, a little while before, and given himself up negged him to search the lower rooms

to justice—laughing as he did so.

But presently Mrs. Travis was switched from headquarters to the precinct station phone. And in less than a minute two policemen were on their way to the Travis house. Meantime, the fight in the hall had reached a new and more vital stage -a skirmish for possession of the fallen pistol. Neither man dared loose his grip on the other. Yet each ma-

neouvred desperately to get hold of the weapon that lay at their feet. It was Sam Eagan who at last seized the pistol. Despite his enemy's efforts he gradually worked its muzzle toward Lamar's writhing body.

The muzzle at last touched Max's side. Sam's finger tightened on the trigger. In the same moment the pistol spun out of his hand, exploding

burying itself in the woodwork of the June had seen the newest peril of the man she loved, and with her riding crop had struck his would-be murderer heavily across the knuckles

Sam whirled about to face her. As he did so Lamar snatched up a heavy vase from a pedestal and brought it down with all his remaining force-

upon Eagan's head. "Smiling Sam dropped to the floor like a stricken bull, lying there, stunned and helpless amid the wreck-age of the smashed vase and of the hallway furnishings.

man's thick wrists. Then, weak and

dizzy and panting, Lamar rose again to his feet, swaying as he tried to stand upright. "He must have broken in here last night," he gasped. "Miss Travis, I ove you my life. I—" ing, caught sight of his foe. As Eagan's arm went back to stab again. Max. "Your hand is cut!" eried Jure. "Sea

it's bleeding! Let me bind it up for The tramp of feet sounded on the stairs below them. The two policemen. escorted by the chattering and shud-dering Yama, ascended to the upper picked up the unconscious Eagan and lugged him away between them. Max, still reeling with exhaustion

turned abruptly to June. "Miss Travis," he said. "I must ask you one or two questions. I would cut off my right arm sooner than ask them. But I must. Everything de-But I must. Everything depends on your answers."

June forced a smile to her ashen lips. She knew the moment had come. The moment of reckoning, which she

You can have a Wealth of Lustrous Luxuriant Hair Like Mine

BY THE USE OF

NEWBRO'S HERPICIDE Destroys Dandruft - Stops Falling Hair

Bright, Scintillating, Luxuriant hair is within the reach of every girl and woman. It is all a matter of care and cultivation. No longer is it necessary for your hair to be dull, brittle, lusterless. A few applications of NEWBRO'S HERPICIDE will effect the most astonishing change. The hair will radiate health and beauty—its growth will be stimulated—it will show life, snap and lustre before unknown. Every particle of dandruff will disappear and the hair will cease to come out. The scalp will be clean and healthy and the itching instantly stop. Herpicide has a most exquisite odor and is a delight to use.

TAKE NO SUBSTITUTE

THERE IS NOTHING JUST AS GOOD

If your dealer does not have NEWBRO'S HERPICIDE, the Original Dandruff-Germ Remedy in stock, send direct to our laboratory for the genuine. A full 50c size bottle will be forwarded to you by mail, postage paid together with an interesting booklet telling all about the care of the hair.

ELMAN WILL CLOSE MASSEY HALL SEASON

Remarkable Russian Violifiist Will Play Another of His Spectacular Programs.

The musical season will be brought to a close at Massey Hall on April 10 with a second spectacular appearance of Mischa Elman, the phenomenal young Russian violinist, whose recent triumph with the New York Symphony Orchestra was the biggest which has been scored by any visiting artist for ome seasons. This time Mr. Elman is o be heard in a complete program of his own choosing and it will embody every brilliant phase of his transcendent talent. As his appearance with Mr. Damrosch's Orchestra drew a legion of music lovers, many of whom were not able to obtain seats on the night of the concert, those who intend to take in the forthcoming event are advised by Manager Withrow to send in mail orders at once. The advance sale opens at Massey Hall on April 4 and undoubtedly will be the occasion of a

Mr. El. an has been busier in New York and on the road this season than any of his rivals. Recently he had a respite of two days in New York after some strenuous traveling and he com-mented upon it humorously. "What is the matter?" he inquired of his managers. "How does it happen that I am not playing today?" The youthful genwear of so much travel, nor remain unruffled over the mishaps and hard-ships of it. Delayed trains, cold waiting rooms, blizzards and other annoyances that are commonly supposed to bring out the "artistic tempera-ment," all are taken with the best of spirit by the young violinist.

During Mr. Elman's five tours of

America he has played at 600 concerts and recitals, all of them to virtually capacity audiences. He is now on his sixth tour and the indications are that this will be his banner season. No violinist who has yet appeared before the American public has been so favorably received and the magic of the artist's playing has been the wonder of the age.

Wherever figures are quoted—concerning the Russian violin genius, the brain is apt to become dizzy trying to count up the totals as to the number of concerts in one season, the mammoth audiences, the box-office receipts the encores the list of compoceipts, the encores, the list of compositions played and the demand for his records. At Elman's age (he is just 24), the most sensational planist of this age was living in poverty and un-known. The immortal Mozart of the seventeenth century was a "wunderkind," but he died in poverty, and was buried in an unknown grave. Elman. the young magician of the magic strings, lives like a prince in the best hotels, counts his wealth in seven figures, is royally feted everywhere, and everything connected with him hints that he is the reincarnation of a Midas whose every touch produced gold. Even in one season (1914-1915) when Elman took a much-needed vacation, financiers will stagger when they are told that this holiday cost Elman \$250,000.

Vocal and piano pupils of Eileen Furguson, violiniste, pupil of Jan Hambourg, gave a delightful musicale in the pretty reception room of the conservatory on March 11. Isabel Jenkinson, a very young girl, in her pretty rendering of a couple of songs,

The song and piano recital to be a mammoth production in musical and photographic drama, which he has been working upon for over six years. It is a story of the world's attitude towards woman in her relationship to the laws of the different petitors of the laws of the laws of the different petitors of the laws of the program are among ladies giving the program are among world. The poetic imagination of "The Birth of a Nation," and the masconcert should be liberally patronized.

GETTING THE WATER SUPPLY TO CITIZENS OF TORONTO

Task of Looking After System Is Only One of Many Which Are Efficiently Attended to by the Toronto Works Department.

Reeping pace with the growth of a big city is a man's job. It's more than that—it's a job that calls for the advice and a half and a and co-operation of several men. Not only must the needs of the day be proonly must the needs of the day be provided for but there must be sufficient foresight for the needs will be in the future. To make a trip of inspection or read the reports of others and formulate a plan would be an easy task westinghouse-Parsons steam turbines of others and formulate a plan would be an easy task westinghouse-Parsons steam turbines of others and formulate a plan would be an easy task westinghouse-Parsons steam turbines of others and formulate a plan would be an easy task of the main pumping stading and the necessary buildings and equipment, also four 250 horsepower water tube boilers with the compared to so arranging things that the needs are seen and provided for a little in advance of the requirements. the second means progress.

If the late Lord Strathcona had waited until the west was populated, until the farmers were all settled and the continuously maintained. the farmers were all settled and the industries all located before com ing the C.P.R. there never would have been those things, and the Canadian prairies might still be the land of the Indian and the Buffalo. It is the power to see ahead and make conditions such that business follows that counts and can be increased in these specially that is what a real live works depart-

ment does in Toronto. If Commissioner Harris had nothing more to do than wait for deputations, hear their requests, investigate the need and then go ahead with the incars, tracks and sewers, he wouldn't

now are rightly judged and work undertaken with that object in view. But, to analyze this immense organization spoken of sometimes so irreverantly as "the works," and find out how big it is, is more than one would care to do just for recreation. For instance, the roadway section alone is so great that the city has to be divided into districts in order that one may grasp the immensity of it. Then, if one wishes to consider the sewer department there is more than enough to keep up interest during a summer's

When you have mentioned these two branches, you have only just com-menced for there is the waterworks lem over which a directorate might sit, the marine section, railways and bridges, the mammoth viaduct, which is to span the Don Valley, the civic railway, and then the big works over at the island, all the culverts—O, everything like that, whenever you see a gang of men mending the asphalt. that's part of the works department, so you see it really is a fine piece of business to keep it all running and going smoothly, and all the time figur-

City Water Supply

But this isn't getting down to something you can look at, something definite like for instance. Let's see. Where will we start? Well, for a beginner we might take the waterworks department. Now, here is a branch of the work that gives some idea of what it means to look after a big husky town like Toronto. In 1915 the amount of water pumped at the main pumping station was 17,556,910,000 imperial gallons. That's a daily average of 48,-100,000 gallons. You didn't know Toronto used water like that, did you? Oh, but look. On top of all that work 6,-610,000,000 gallons were re-pumped at the high level station—that's so the people in the northern portion could wet once in a while.

In 1905 a contract was let for the construction of a tunnel under the Toronto Bay. The following spring work commenced and the water was admitted Dec. 30, 1908. The contract price for this tunnel was \$269,000. It is about a mile long, and is eight feet by eight feet in cross sections. In 1909 a slow sand filtration plant, consisting of 12 filter beds and a clear water reservoir, occupying about 13½ acres was built. This plant was designed to handle 32,-000,000 imperial gallons a day. It cost

In 1913 a contract was awarded which called for an expenditure of \$540,000. It was for the construction of an 84-inch-that's seven feet-steel conduit. Imagine that, so big that Canada's tallest soldier could stand at could play hide and seek. This great undertaking meant the laying of 3555 inch and 566 feet of 72-inch steel pipe were bolted together under the water

There were 187,000 cubic yards of material excavated on this job. The conduit runs from the clear water re-serveir to the south tunnel shaft. A plant valued at \$200,000 was used by the contractor, and the pipe was put into commission Feb. 18, of last year. A year previous to this, possibly in anticipation of what was coming, a new 15,000,000 imperial gallon steam turbine driven pump was installed at the main pumping station. Mr. C. E. Brooks: the main pumping station. It cost

To extend the pure water pipe from we're getting out of deep water now.
It was in 1909 that the High Pressure Fire System was started. This cost

four storage McDougall pumps. The designing is such that a pressure up to 300 pounds per square inch most transfer in the coal conveyors, etc. A new brick chimney was erected which measures 150 feet high by 7 feet in diameter The first is conducive to staleness, to 300 pounds per square inch may be second means progress.

> For Fighting Fire When a fire breaks out in the downtown section an alarm sounds at the main pumping station and in a few constructed mains to whatever extent is thought necessary by the fire chief.
>
> The headquarters of the waterworks maintenance and distribution section is located at St. Andrew's Market. Here, also, a fire alarm signal is placed and there are also several motor trucks stationed at this point for emergency purposes. At the main station there is a duplicate set of fire pumps cap-able of delivering ten million gallons

> at the maximum pressure previously Immediately on the sound of alarm a truck is dispatched from the St. Andrew's Market to the scene of the fire. An inspection is made of the hydrants in the vicinity and pressure readings are taken. When the alarm is from the high pressure district the high pressure pumps are immediately started. Then, if a telephone call comes from the firemen for a specific pressure, the same is theirs for the asking. gether with the boilers. The pumps are driven by steam turbines. Two 20,000,000 similar type pumps are driven by 1500 horsepower motors. Two new chimneys had to be erected. They are 160 feet high by 90

There is a new plant under way called a filtration plant of the mechanical filter type. It will have a daily capacity of 60,000,000 Imperial gallons. It will occupy about two acres and will cost \$1,250,000. To provide for a proper water service for the eastern section a pumping station was built on Broadview avenue. It cost about

In looking over the records, it is in teresting to note that the year 1914 exceeded any other, in the history of the department in the length of water feet or 6.06 miles. The size varied from 42 inch to 20 inch. Thirty-eight valves were installed on these mains and ranged in size from 36 to 20 inches. There are serving Toronto today 108,921 feet, or 20.63 miles of six-inch cast iron water pipes with 390 valves, 25 check valves and 281 hydrants. On December 31, 1914, there was a grand total of slightly over 555 miles of water mains all told; 5393 valves; 173 check

valves and 6283 fire hydrants. Much Buried Metal

If that doesn't convey some idea of the immensity of the situation or the colossal task that has been negotiated, read this: Large cast iron water pipe is made in 12-foot lengths. It is from one to one-and-a-quarter inches thick A piece of 42-inch weighs 7000 pounds, or three tons and a half. Twenty-100 to 300 pounds per square inch.

Keeping up with the growth of Toronto, it was found necesary in 1915 to commence the installation of two 24,000,000 gallon centrifugal pumps to gether with the growth of the control in the contro

GRIM DREAD TERRORS OF THREE WEEKS' LEAVE

Trenches Finds the Time Dragging Heavily on His

tist and a medical board).

Stamps, for instance. They come so expensive. You see, every time I write a letter I remember it has to be stamped. To do this I must buy a stamp. To buy a stamp I must take part in the stampede that decorates that section of every postoffice which we may call the Lickers' Lounge. I am too neurasthenic for this; so I send wires. You would not believe me if I were to tell you on my word of honor as a soldier that I have spent £15 on wires already this leave. (And as a matter of fact I wouldn't tell you a lie like that on my word of honor).

honor).

Then there's the sympathetic consideration you get while on leave. When you've seen a bit, and, against all probability, come out of it in one piece, you want when you come home to have a bit of a yap about your experiences. There's something extraordinarily satisfactory in talking about bully beef over champagne and oysters, or about 17-inch shells—I once felt one burst a mile away—when oyster shells are the only immediate menace.

Some ass has gone and given me three weeks' leave.

I never realized quite how terrible leave was until then. Out there, sitting in comfort in the trenches, one cannot properly visualise it; and the five days one gets every five months or so pass so quickly that you seem to find yourself back in Boulogne before you've got off the boat at Folkestone.

But now I have three weeks. There's no dodging that. All the problems and worries of home life must be faced after ages of immunity (not to mention a dentist and a medical board).

Stamps, for instance. They come so expensive. You see, every time I write a letter I remember it has to be stamped. To do this I must buy a stamp I of the correct that it has tampede that decorates that section of every postoffice which we may call the Lickers' Lounge. I am too neurasthenic for this; so I send wires. You would not believe me if I were to tell you on my word of honor as a soldier that I have spent £15 on wires already this leave. (And as a matter of fact I wouldn't tell you a lie like that on my word of honor as a soldier that I have spent £15 on wires already this leave. (And as a matter of fact I wouldn't tell you a lie like that on my word of honor as a soldier that I have spent £15 on wires already this leave. (And as a matter of fact I wouldn't tell you a lie like that on my word of honor here's the sympathetic consideration you get while on leave. When you've seen a bit, and, against all probability, come out of it in one plece, you want when you come home to have a bit of a yap about your experiences. There's something extraordinarily satisfactory in talking about bully beef over champagne and oysters, or about 17-inch shells—I once felt one burst a mile away —when oyster shells are the only immediate menace.

factory in talking about bully beef over champagne and oysters, or about 17-inch shells—I once felt one burst a mile away—when oyster shells are the only immediate menace.

So when I got here I sat up and wait—so when I got here I sat up and wait—inspects all fire hydrants and valves and attends to all the complaints which naturally come with such an immense system. Last year these numbered 12,457. During the same time the hydrant inspections totalled 76,377 valves, 4749. There were 1358 hydrants repaired on the streets, 393 leaks in mains and 2628 service leaks attended to. At Soho and Phoebe streets is located a general machine and blacksmith shop where repairing is done.

and the other half 20-inch the total weight of cast iron over which Toronto lives and has its being would be 1,181,317.500 pounds or 590,658 tons.

Would Germany scrap it and make it into so many billion bullets, if here? She might—but, difficult as the task would be, it would be more difficult to win the opportunity.

The maintenance and distribution section of the waterworks department will be dealt with at a later date.

this spring).

It will be seen, therefore, that this leave they talk so much about is like radium—tho precious and hard to come by, it is apt to be perplexing and emberrassing in everything but the smallest dose. I have just been down to the war office to ask for a week's curtailment. I left two doctors and a nurse attending to the official to whom my application was made; but I may get it when he comes round. One can but hope.—Alec. Johnston in London Opinion.

SPRAY MEN WITH PETROL THEN SET THEM ON FIRE

Hard to Secure, But After Getting It Soldier From the South African Says Germany Should Be Condemned to Perpetual Serfdom for Fiendish Acts Committed on Battlefront.

> fast railway train with a walking Three Miles in Flanders, it is impossible to realize how much work it has stick is no more powerless than the infantryman who has to charge in the face of the machine guns is the conclusion of an officer in one of the South African regiments on the western front. In one of his letters home, the guns. Bang, boom, boom-all day. which is printed in a recent issue of The Natal Mercury, he describes in vivid fashion what he calls "a charge

> "You never saw such a mess in your life as there is where I am now," he writes. "I am not allowed to say where, but it is one of the farhous spots, once a smiling village, peaceful, with pretty women, fair lawns, gardens, grand industries, quaint buildings, a beautiful church and lovely wayside shrines. Now it is past the 'dirty work' that was going on description; just a mass of ruins. The streets are covered with debris, the fields ploughed with shell holes; the rivers are even so choked with weeds, etc., that they refuse to flow. The only thing that compares with it that I know is Edgar Allan Poe's fan-tasy, 'Shadow.' Desolation reigns su-

"I saw eight 'Jack Johnsons' burst today, and they just tear away bricks and mortar like paper; it is simply marvellous. You first hear a noise like an aeroplane, and something passes over your head leisurely on its way; then a bang like nothing else in the world and after that dust, bricks, trees, and, if any, limbs and bits go shooting up a hundred feet in a cloud of thick black smoke, which lingers like a fiend contemplating his work. The ghoulishness of it all occurs to one when churchyards the graves get blown

don't know, but the mess here will take fifty years to clean up. I wish you were here to see it all. It is so wonderful and yet so fiendish that any man who it would join up at once to stop for-ever the Germans from forcing a rule of this nature upon the world. They must be smashed even as these towns are, and then should be made slaves to work in perpetual serfdom to repair their hellish damage.

"What would strike you is the awehardly imagine how cool and calculating the whole business is. When you home."

That a man rushing out to stop a read in your papers, 'British Advance meant. In the last battle we were and a very big one, too, you could see troops moving in thousands for days beforehand. Everywhere men, men. men-and then the guns began. You did not seem to be able to move for all night; no cessation of the noise at all-just one big, long roll all the time. "Everywhere, as far as the eye could reach along the German trenches, was smoke, and when we did see the tren-ches afterward they were Just craters. with bits of men in them, dead and mutilated. Then, after days of this undiluted hell, came the infantry attack. It seemed grisly and strange, the clammy sort of silence, as the big guns gave up and only the Maxims and

the rifles went off. You can imagine bavonet and revolver and rifle "We lose heavily. But what a price for the Germans? They lose double what we do. The artillery, when they get it, get it bad, but the infantry-man has not the same chances in the open. for they blaze at him all the time, and he has to charge thru hell. Fancy a man rushing out to stop a fast railthat is just what the infantryman does

when he goes on the parapet in face of the machine guns. "If you had seen what I have seen you would not believe that men could face it, but they do. These Scotties are the boys. The Germans tied some them together at Neuve Chapelle and bombed them to death. You have no idea of the dirty tricks of the Germans. They spray men with petrol then send over incendiary bombs which set fire to them. But don't worry; we shall deal with them all right. I am not a bit downhearted; 'au contraire,' I am very happy, my only regret being that I cannot see you."

REAL FORESIGHT.

"Now, Harry," said the mother, "take these jugs and go to the grocer's and get a quart of the best molasses." "But why give the boy two jugs?" asked the neighbor. "Well, if he has a jug in each hand he can't be dipping his fingers in the

Wouldn't Take \$100 for **Appliance**

Cranworth, Ont.

Dear Mr. Brooks,-I am pleased to write you and let you know what attention inside, or that the Bantams your Appliance has done for me. I think I am all right now, as I have not seen the first sign of it since last Fall. I can now run, jump and lift feet, nearly two-thirds of a mile, of 84- all I like, and I would not take \$100 for it if I could not get another. I do on piles and covering all with concrete not wear it except when at hard work. Your Appliance is just as good 16 feet below zero lake level. The pipe was laid in 124-foot lengths, and these as ever. You can use this letter as you like for the benefit of others.

GEO. KENNEDY.

Now Cured

Dear Sir,-I am very glad to hear from you, and happy to be able to it was a complete success, and now To extend the pure water pipe from the new filtration plant to this \$4 and \$75-isch conduit, a further contract was let in 1914. It called for another 72-inch pipe line, and cost \$109,000 more. But to be always the some time ago, by your Appliance. I now need no truss after twenty-two years of torture.

> Yours truly. G. E. LEMAY.

Ruptured 22 Years; Cured Me Completely Perth Centre, N.B., April 26, 1914.

Mr. C. E. Brooks:

Dear Sir,-I received your letter regarding the Appliance you sent me. I don't know that I ever had a rupture. It has cured me completely, and I thank you very much for it, Very truly yours,

REV. H. A. SISSON.

The above is C. E. Brooks, inventor of the Appliance, who cured himself and who is now giving others the benefit of his experience. If ruptured, write him today, at Marshall, Mich.

TEN REASONS WHY

YOU SHOULD SEND FOR BROOKS' RUPTURE APPLIANCE

blisters or causes irritation.

- It is absolutely the only Appliance of the kind on the market today, and in it are embodied the principles that inventors have sought after for years. 2. The Appliance for retaining the rupture cannot be thrown out of position. 3. Being an air cushion of soft rubber it clings closely to the body, yet never
- 4. Unlike the ordinary so-called pads, used in other trusses, it is not cum-
- It is small, soft and pliable, and positively cannot be detected through the
- The coft, pliable bands helding the Appliance do not give one the unpleasant sensation of wearing a harness
- There is nothing about it to get foul, and when it becomes soiled it cabe washed without injurying it in the least. There are no metal springs in the Appliance to torture one by cutting
- All of the material of which the Appliances are made is of the very berthat money can buy, making it a durable and safe Appliance to wear.
- My reputation for honesty and fair dealing is so thoroughly established by an experience of over thirty years of dealing with the public, and m prices are so reasonable, my terms so fair, that there certainly should be no hesitancy in sending free coupon today.

And here is a letter from a mother who is thankful because a Brooks Appliance cured her boy so he could go out and serve his country. 2 Orchard Road, Richmond, Surrey,

April 11th, 1915.

Mr. C. E. Brooks, Dear Sir:

A line to thank you for what your Appliance has done for my son. After wearing it from December to the following September I can say he is quite cured and is now serving his country in France at his own trade, a shoeing smith. You can make what use you like of these, my thanks. I am yours,

mr. E.H hett (Mrs. E. Whittle)

Rupture Thoroughly Child Cured in Three Healed Ingersoll, Ont., Feb. 6, 1914.

Perhaps you will be interested in hearing what your Appliance has Mr. C. E. Brooks, Marshall, Mich., done for me. I know without doubt that my rupture has thorough- let you know your Appliance has ly healed after a term of sixteen years' suffering. and I attribute my estored and healed condition to the we are very well pleased with it, wearing of your Appliance, which We had it on him for about three held the bowel firmly and painlessly months, and since he has had it off during the healing process. HAVING been promised a funny story by my policeman friend, I was early on hand next day. I knew his story would be funny because many of those he told were rich in mirth altho they were not intended to be. I figured that the more of his stories I heard the more I would have to amuse the neighbors when I went back home if I failed to get on the police force. Part of the daily life in the old home town is the retailing of stories or increase their pay just before they retire. So if they give them five hundred a year raise and they resigned the next month they would immediately draw for the next month two hundred and fifty dollars extra from the pension fund the men are subscribing their seven per cent. to.

Make it a Present

closed fist while talking and then another would repeat the performance. I began to think that the man from Waterford was about to get his. The third man, however, seemed to be keeping his temper and would occasionally indulge in a hearty laugh. He seemed to be endeavoring to get the other two away and the verse: "Blessed is the Peacemaker," flitted across my mental vision as being paracularly applicable to him. Finally they left and I went over to my friend and left and I went over to my friend and

enquired who the big men were.
"Faith, they're some of yer future comrades if ye are lucky or unlucky enough to jine the invisible blues, all

"He thinks he will accept it, too," said my friend. "He was the one who didn't seem excited. If he hadn't been going to quit he would be just as excited as the others. As he had nothing to lose he looked on the argument as one big joke, and as the joke was on the other fellows, he was able to do all the laughing.

The Pension Fund

"Ye see, it is this way. We have in connection with the force what they call the pension fund, or the superannuation fund, as some nowadays call t. I could never see the difference. sion fund and if run wrong a superperhaps I had better start from the

"In the early seventles we had, I am sorry to say, religious riots. Perhaps I should say riot and leave off the s. But when there is any trouble, no matter what side it is on, the po-licemen always get the worst of it. If a policeman goes into a house to ar-rest a drunken man who is trying to arder his wife it's ten chances to one that they will both pile onto him. She will probably go before the magistrate the next day and either say that she deserved the trimming her husband was giving her or that it was the po-

eman that done it all.
"Well, as I said before, there was religious riot caused by one side hav-ing a procession and the other making up their minds they would not have it. Between the two stood the policeman and, like the one referred to, he got the worst of it. Everybody loves the

"Now, after the procession was all over and the bruises and cuts were healed on the police, and the people got back to a normal state of mind, the man who was head of the Catholic llocese of Toronto at the time, said that he thought that it was nothing but right that the policemen, who were nearly all Protestants then, should be rewarded for protecting the procession. If the city would not do it, he would. So he took up a subscription among his charge for the police and presented the chief with a watch, while the private members of watch, while the private members the force were given a money reward. The police met, and, after due consideration, decided to use this money, along with some other money called the criminal justice fund they received from the county, all amounting to a little over twenty dollars per man, as a basis for the pension fund. Now, that was the basis for the fund which, I am told, will this year bring in receipts amounting to sixty thousand dollars. The commissioners at that ime were Judge Duggan, Alexander McNabb and Mayor Metcalfe, and the chief the late Major Draper, who handled Toronto's first street car

"At first the men had to pay into the fund three per cent. of their salary and when they were off sick a third the halt, perhaps a muttering under the At first the men had to pay into and when they were off sick a third of their salary went into it. Then when breath, several explosive snorts, his pay was raised the amount he paid into the fund was raised to five cent. This was done on the same prinwhich means, as the preacher will generally say at an old man's funeral, they were living on borrowed time. In addition they were, in the estimation of younger men, living on borrowed jobs. They thought that these old men, holding good jobs, should be retired, but the pension fund would not be the pension fund at once permit so many being retired at once. So again the city was asked to give the police another raise in pay and,

force. Part of the daily life in the old home town is the retailing of stories or listening to them in the general store and post office while the mail is being distributed. That is one of the pleasures that the dwellers in a city like this knows nothing about. The gossip that one hears and the stories that are told in the general store and post office of the average country town would fill a government blue book with many contribute ten thousand dollars and the stories of the government to give permission to the city to give four hundred thousand dollars to the fund. Objections raised by two members of the legislature's committee resulted in the proposal being thrown out but it was realized that if the proposal was put up to the vote of the people it would be thrown out, so the city was given permission to contribute ten thousand dollars and the city to give four hundred thousand dollars to the fund. Objections raised by two members of the legislature's committee resulted in the proposal being thrown out but it was realized that if the proposal was put up to the vote of the government to give permission to the city to give four hundred thousand dollars to the fund. Objections raised by two members of the legislature's committee resulted in the proposal being thrown out but it was realized that if the proposal was put up to the vote of the government to give permission to the city to give four hundred thousand dollars to the fund. Objections raised by two members of the legislature's committee resulted in the proposal being thrown out but it was realized that if the proposal was put up to the vote of the government but it was realized that if the proposal was put up to the vote of the government but it was realized that if the proposal was put up to the vote of the government but and the city to give four hundred thousand dollars to the fund. Objections raised by two members of the legislature's commit to contribute ten thousand dollars a year for forty years, which, I believe, is being done.

"Yes," said he. "There is a way,
"Good heavens, man!" he ejaculatd. "The fund that is known far and refuse to raise the pay of the men wide, from Halifax to Vancouver; that has been the model for firemen's school marms' and any other fund tied, or tried to settle, the fire chief worthy of a name; the great police benefit fund that the police take such pride in; that is stronger than the police take such pride in; that is stronger than the police take such pride in; that is stronger than the problem to the model of the mayor have the model of the men who are soon to retire. The mayor has the way he set to faise the pay of the men who are soon to retire. The mayor has the way he set to faise the pay of the men who are soon to retire. The mayor has the way he set to faise the pay of the men who are soon to retire. The mayor has been the mayor has been the mayor has been the mayor has been the way he set. pride in; that is stronger than the rock where the monkeys have no tails is about to be torpedoed! The whole half-million dollars is in danger and the only warning we have had is a little periscope that appeared in the papers telling us that a number of officers, not satisfied with getting half pay when leaving, have decided that

ORATORY AND ORATORS HEARD IN LEGISLATURE

Not Always the Pleasantest Affair in the World to Watch the Honorable Member Cranking His Rhetorical Machinery Into Action When Taking Part in Debate.

BY CRITICUS. YEAR or so ago at a press gal.

lery dinner the most outstanding orator of public life in Onto his lips and his ambition was desknown to speak for five hours. It was spires confidence in his candor. unfair, however, for even the five hour speech was uniformly interesting and entertaining. Alas, of few platform men in Ontario can it be said that the interest lasts longer than the first half hour. Is there oratory in Ontario? Are we breeding public speakers? It is well recognized that there are municipal bodies in the province where speech flows from the mouths of erudite aldermen, as freely and careless-ly as beer from the spigot of a taps-ter. But no man would seek oratory here. Rather he would turn to the of Mowat, Hardy, George Brown, and all their illustrious train, still, invisible, rule the debate. Surely, some of the ancient eloquence must cling ing was vigorous and sustained about the legislature. And yet-.

Cranking Machinery

hated in Bible times? If Solomon were lar or identical styles. Others are so

Most public speakers nowadays flying start and again a temporary tieup. An audience must display as much patience with its orator as a car-owner cent. This was done on the same principle as taxing a race-track, it being assumed that as the winner paid the tax he would not object. Now, as time tax he would not object. Now, as time sympathy, impatience, or boredom, and sympathy. supped away, a lot of the officers sometimes they are amusing, sometimes they are amusing, sometimes they are anotalways the times pathetic. It is not always the pleasantest affair to watch an honorable member cranking his rhetorical machinery into action. As a rule, however, once this stage is passed attention languishes. Who manifests tention languishes. Who manifests any interest in the monotonous beat of an engine when it is under way? The monotonous grind of legislative speakers is hardly more diverting.

To properly illustrate the growth or decline of the classical art, attention this pro-vince will give con-sid-er
thru-out this pro-vince of On-tario. Exceedingly important one. It deals not only with the administration and this pro-vince will give con-sid-er
this pro-vince is an exceedingly important one. It deals not only with the administration and records of the 50 battalions of infan-

original in delivery that even the drowsy doorkeeper feels his interest quickened at the first burst of decla-

mation. There is only one, Sam Carter tario was harshly yet humorously lampooned by a witty scribe. He was pictured with a "talkometer" attached holme. Hon. "Tom" McGarry looms like a star set apart. Wm. Proudfoot cribed as summed up in a desire to break his own unapproachable long- most clumsily, but yet may be conbreak his own unapproachable long-winded record. The joke was not far-fetched for the subject had been known to speak for five hours. It is local carvell, water stolling, all most clumsily, but yet may be con-vincing enough. The attorney-gen-eral is nimble, elusive, and yet inupon row, however, speak their lines like "actor folk." When they open their mouths the same well-seasoned sentiments gain utterance year after

Speaking Celebrity

Until the session of 1916 Albert Grigg of Algoma was the speaking ce ebrity of the legislature, Rumor always had it that he learned his art in a backwoods pulpit. If so, one may safely assume that he could preach and stronger than most egislative chamber where the shades of his clerical contemporaries. He had the hirsute adornment of Sir Wilfrid Laurier in his younger days and the zeal of an Irish evangelist. His speak usually too lengthy to be highly effective. He has retired to the dim seclusion of the civil service and the party whip is looking about for an oratorical substitute on the floor of the house.

To particularize speakers and styles one naturally begins with the head of the government. Premier Hearst was of white buttons, with connecting wires never known to be much of a platform of the various offices in the building.

By merely pressing a button he can ince woke up one morning to learn of the new and responsible honor they had bestowed upon him. Since that day the prime minister has made fam-Ontario what is known in the United States congress as the articulatory style. The syllables of a sentence run like an endless chain. Thus, to the temperance delegation recently:

Interesting Sidelights on How the Organization Responsi-

be this summer?"

The answers to these important

questions are securely locked up in the minds of the staff officers at "headquarters" in the administration building. This building, the "hub" of the camp, and also of the Toronto Divisional area, is where Brigadier-General W. A Logie and his staff direct the affairs of the district. There is a striking contrast at the military headquarters in the administration building in the personnel of the staff, the arrangement of the offices, and scale upon which the departments

are run, compared with the organiza-tion of divisional headquarters there in the fall of 1914. This has entailed a marked change from the almost civilian basis at the outset to one of which the sentinels on guard are an outward sign. "Headquarters" is appropriately and loads of clothing and other equipment in plain English the true description arrived from Ottawa in a single ship-

of the commandant's offices. Every-where it is the head of the army and the G. O. C. is "the works." Generals like other chief executives may "appear" to have the easiest time of They have the choice of the pleasantest and most convenient rooms

Just Think Right

All they have to do is to "think right." When they right." When they plan accurately their decision reflects credit upon their decision reflects credit upon them, and the troops forming the force under their command. If the general officer commanding makes a mistake he is held personally responsible, and the divisional area suffers in public esteem.

Toronto district, officially known as Toronto district, officially known as No. Two Divisional Area, about 12,000 square miles in extent (larger than Belgium), has been very fortunate in having a commanding officer under whose direction the battalions of infantry, and other units, have been encoulted and trained from raw civilian

the Toronto overseas camp for expert examination.

The invention is a remarkable one. It has been the subject of correspondence between the British admiralty board of inventions at Victory House, London, England, and the militia department at Ottawa.

Its adoption by the Canadian Department of Militia now appears to be assured. It is a scientific instrument for finding the range for aviators with such

loads of clothing and other equipment arrived from Outawa in a single shipment.

Another office on the second floor, adjacent to that of the commandant is cocupied by Lieut. T. Widgery, the provost-marshal of the division, and by Lieut. A. Wylie, orderly officer to

Progress of Aviation

Aviation is becoming an exact science with marvelous rapidity. Its popularity and vogue promises in a few years, at the present rate of progress, to outstrip surface motoring. By the time Toronto's projected two million dollar aeroplane plant is in operation, it is expected, at the great rate aviation is now increasing in popularity, that the aeroplane will become as general as motor cars were a few years back.

Aviation clubs, it is declared, will become as numerous as cyclist clubs when the cycling was a popular craze. All but the most steady going and extremely conservative will have their 'plane, either for sport or business, or both.

Aviation may prove a serious factor in

E'S a German spy, caught with an infernal machine," was the guess of astonished spectators as saw a prisoner in an artillery transbeing conveyed under military guard Dufferin street. The prisoner was Dufferin street. The prisoner was the pr

fully public, but was submitted to the writer. The instrument was also shown, and it speaks for itself so plainly that but little explanation was necessary as to its method of operation.

Examined by Officers When examined at the Exhibition Park camp by the military, the officers present included Lt.-Col. Wardell, Major Richardson of the 48th Battery, and Capt.

ent included Lt.-Col. Wardell, Major Richardson of the 48th Battery, and Capt. Johnston.

The inventor was gratified by the commendations the instrument elicited, as its purpose and advantages could be seen by artillery experts at a glance.

A satisfactory test of the principle employed was made with a model from an aeroplane. Arrangements are now being made by Lt.-Col. Hamilton Merritt for the invention to be given actual tests with bombs from 'planes speeding at specified altitudes. The instrument placed before the Exhibition camp was constructed in Canada, and all the parts except the graduations. These had to be made with the four hundred thousand dollar machine at Philadelphia.

Range finders are scarce and costly. The artillery at Exhibition camp was handicapped last winter because of the shortage. This is one reason why the Canadian artillery take range finding training in England. The Toronto invention is less than two feet in height and weighs but thirty-four pounds.

MANY AUSTRIAN WOMEN

First to Enlist Preserved Sex Secret Until She Became Corporal.

FIGHTS IN THE RANKS

One Serving in Husband's Regiment Promoted for Courage Under Fire.

LARGE number of women are A copenly serving in Austria as soldiers. The first woman of which there is any record was Stanislava Ordinska, who, disguised as a man, contrived to enlist in the Polish League of Austria. She succeeded in keeping her secret until she was pro-moted to a corporalship, but she was not deprived of rank and weapons by

Miss Cunard Retains the Lead But By a Very Narrow Margin Picture News in the General Section

Additional Moving

Only Twenty-four Votes Separate the Leading Contestants on Last Week's Voting—Both of the Leaders Pass the Thousand Mark in Latest Score.

The Sunday World's Motion Picture Popularity Contest is taking in the whole Dominion of Canada for its field. This week, coupons have been received from Vancouver, B.C., in the west, and from Truro, Nova Scotia, in the east. And such intermediate points as Edmonton, Calgary, Montreal, Sault Ste. Marie and Cochrane, Ont., are represented in this week's count.

The huge proportions which it is assuming are not confined to Canada, either, for coupons have been received also from such distant places as San Francisco and Nashville, Tennessee. That the Contest is going to. stimulate the interest in motion pictures in Canada to a degree hitherto unknown, goes without saying.

The result of this week's count up to Wednesday night at 11 o'clock leaves Miss Cunard holding the lead by only a very narrow margin of 24 votes. Miss Pickford's friends rallied to her support since the last score was published, with the result that 357 coupons have been recorded in her favor, while her rival, Miss Cunard, received 298. Francis X. Bushman receives an encouraging increase this week and holds the male leadership

Twelve new candidates are added to this week's list.

TWO PICKFORDITES.

Dear Mr. Editor: We are sending in three votes for Miss Pickford. It is a perfect mystery to us why Mary Pick-ford is not hundreds ahead of Miss Cunard. Anyone that has seen Mary act in the movies could not nelp loving her. We don't see how anybody after seeing her smile would not vote for her. We think with the advocate of a "Hot-Headed Girl," that it is the serial, not Miss Cunard that the people are interested in.

Mary Pickford must be worthy of

her praise or she would not get so high a salary; for there are such a large number of other actors and act-If all Miss Pickford's admirers would send in their votes, there would not be a chance for anyone else. They

must think she will win without sending in votes.

We are doing our best to raise her total. Here's to her picture on the front page!—"Two Pickfordites."

MARY'S ALLEGIANCE.

Motion Picture Editor: While w like to see Canada always on the top, and therefore feel inclined to vote for Mary Pickford, we must not on the other hand forget that she is a naturalized citizen of the United States, and must be therefore treated

MARY THE GREATEST.

Mt. Hamilton. Motion Picture Editor: Until this Sunday, I didn't know about the contest. My vote goes with best wishes to Mary Pickford, the greatest movie actresses, not because she is a Canadian, but because she is so lovable and human. For days after I have seen her act, she is in my mind almost continually. She does not require beautiful clothing to gain the love and admiration of the people. My friends and I are completely in love her. - Yours truly, Phyllis Sovereign.

PREFERS MISS CUNARD.

Editor Motion Picture Contest: We are greatly pleased to see Grace Cunard leading in the contest. Mary Pickford may be Canadian born, but she has lived in the States since she was a baby, and does not take any particular interest in this city. She may be very pretty, but good looks are only skin deep. I prefer Miss Cunard's style of acting to any other. I will do my utmost to help her win the contest.

—Yours truly, B. V.

A CUNARD CRITICISM.

101 Willcocks street, Toronto. Motion Picture Editor: Enclosed please find coupon in favor of Miss Mary Pickford. I have been an incontest, and have been at a loss to understand why the far-famed Miss-Pickford has not received a mora hearty support. Miss Cunard does not act with the same individuality and freedom from affectedness which haracterizes all Miss Pickford's plays.

FLORENCE ROCKWELL His Majesty's Theatre next week

BUSHMAN AND BAYNE GUESTS AT BIG MOVING PICTURE BALL

April Fifth Is the Date of the Most Spectacular Event to Date in Local Film History -Favorite Metro Stare Will Visit Theatres in Per-

April 5 is going to be a red letter day in local moving picture history for that is the date, announced today for the first time, of the big Bushman-Bayne tall, which is to be tendered to "tho king and queen of filmdom" by the Motion Picture Exhibitors' Protective Association of Ontario. The event will be the most spectacular affair of the kind which has ever been held in Toronto. Both of the famous Metro stars are to spend the day in this city as the guests of the Exhibitors' Association. Before the ball begins in the evening, they will make the rounds of all the theatres in the city which are showing Metro pictures, beginning with the Hippodrome. At each theatre Mr. Pushnian and Miss Bayne will appear on the stage and be introduced to the audience, so that every one present audience, so that every one present will be treated to an actual real life glimpse of their film favorites.

When the round of the theatres is when the round of the theatres is completed, the Bushman-Bayne entourage will proceed to the Arena, which is to be brilliantly decorated and lighted for the occasion. From 9 to 10.30, there will be held a surprise entertainment and reception during the course of which those in attendance will be given the opportunity of ance will be given the opportunity of sliaking hands with the stars and meeting them personally. Mr. Bushman and Miss Bayne will also enact before the camera, a scene from one of the Metro Wonderplays, in all probability "Man And His Soul," a forth-coming Hippodrome attraction.

coming Hippodrome attraction, so that the vast audience will be able to see how an actual scene is photographed for the screen. This, in itself, will prove one of the biggest attractions ever staged in Toronto, as never before have the people been able to see moving pictures in the making.
At 10.30 p. m. the grand march, by Miss Beverley Bayne and Mayor Church, will begin, and dancing will be indulged in until 1 a. m., or later.

and face, preparatory to assuming the character, I seemed to undergo a com-plete metamorphosis, and all the savageness in my nature, that ordinarily would crop up in minute doses, rolled into one tremendous wave of passion and I became a veritable cave man. I never experienced anything so nat-ural before as the feel of a club, the principal weapon of a cave man's defence. In a scene where I tore Miss Walace from the arms of a rival, I had difficulty in keeping myself under control, especially where the savage is seen to threaten his enemy with a huge stone, and when I carried the woman I selected as my wife, and had won in battle, to the cave I called home, I never had such a feeling of exultation in my life,"

CUNARD AND FORD AT WORK ON NEW SERIAL

"Peg o' The Ring" Is the Next Big Story in Which They Will Be Seen.

Grace Cunard and Francis Ford are plugging away at the new Universal serial, "Peg o' the Ring," and are en-joying their work, as is usual with an entirely new reputation for themelves in the world films. The public absolutely demand their presence in serial photoplays, and even the they say they will not undertake another one, the demand comes and they laugh and give in, and then make the work more or less of an enjoyment. They have a wonderfully expert knowledge of the wants of the public, and give them just what they require. Grace new frocks in the current serial.

atinee Daily REAL BURLESQUE

WEEK OF MARCH 27

BURLESQUE

Do you remember the old game you used to play when you were kids, "Follow the Leader"?—well, at The Star. The Cabaret Girls Burlesquers will fall in line with the rest of the bunch, and they'll ling velocity shows of the circuit, and that means that the going will be to wake up and come out of their siumbers, for these are the babes who'll good shepe, you'll flash some of the real stunners of the burlesque world.

It's really front page stuff to know the dead of the Star.

It's really front page stuff to hand you a tip like this, that the Cabaret Glrs will just about hit you as the topline girls of buriesque. Everybody has a boost for this show, so it must be some pumpkins. Mike Kelley and Frank Damsel will slip over the fun pellets, and when it comes to the skirts, kid, why, that's just where they shine. Mina Schall is some stately miss with a well-rounded figure and glistening lamps, while Frances Farr is a small package, but the real goods, all wool and a yard wide. She sure can serve the joy wares. The Marvellous Livingstons, Theima Seville and Dot Barnett will carry off some of the fun honons, and Babe Martin will look cute all right. Joe Standish, Frish Howard and Toolin Trio and Essie Ferrie, with her French models, are names familiar te an burlesque fonowers, so you'll get a real steam-heated show all the week.

Next Week-"FOLLIES OF PLEASURE"-Next Week

DEFORE the rollicking farce "Twin Beds," came to Toronto for its first visit last fall, there was foreboding on the part of the some foreboding on the part of the censorship committee as to whether the aforementioned part of every man it was going to be altogether a proper farce for local consumption.

A closer intimacy with the play, however, developed the fact that "Twin Beds" was "naughty" in name only, and just why the title should convey that idea is not altogether clear. When it is seen at the Royal clear. When it is seen at the Royal Alexandra Theatre the coming week, it will be found as it was on the occasion of its former visit, that this most amusing little play never at any time transcends the limits of descency, altho frequently it is apparently on the point of doing so.

comfort that does more to make life worth living it has yet to be discovered. And if people rebel at the mere mention of one bed what is to be said when they come in pairs?

The story of "Twin Beds" involves a young man, Harry Hawkins, and his exquisite little wife, Blanche. She believes in twin beds and he is converted.

It is a peculiar fact that many peo- to them. But Blanche, as is the way

for example, no lady or gentleman

and every woman's anatomy was re ferred to as "Little Mary." In our own country, quite curiously enough, the word "bed" immediately takes on some sinister significance in some minds. And yet if there is any one thing that adds more to man's comfort that does more to make life

lieves in twin beds, and he is opposed ple get into the habit of being squeamish about nothing at all. In England, twin beds are established in the Haw-

lady finds herself in a mix-up with a sentimental opera singer and his wife, who live in the same apartment house, and who also rejoice in the possession of sleeping apparatus of the twin family. How other tenants of the same apartment house are drawn into the com-plications need not be described in detail here, but a lot of highly exhilir-ating situations are developed before the final explanation frees Blanche

IRENE CASTLE'S MENAGERIE "RASTUS," DANCER'S PET MONKEY HELPS WRITE LETTERS TO VERNON

All the Girls in the "Watch Your Step," Show at the Grand, Have Contracted the Animal Fad-Incoming Troupe Looks Like Circus.

Grand Trunk Railroad Station this afternoon at 4.30 when the Charles Dillingham, "Watch Your Step" special train unloads, you must not think that Barnum and Bailey have come to town. To be sure, there will be appointed to the company animals to stock a small circumstant. enough animals to stock a small circus, but they are not for exhibition purposes; they are merely pets and traveling companions. Mrs. Vernon Castle is the ring leader in this fad for carrying domesticated live stock

In fact, when a young man on the road wishes to show some mark of respect or affection for a "Watch Your respect or affection for a "Watch Your Step" girl, he does not, if he is wise, send her jewelry, or candy, or flowers—he sends her a monkey, if he can get one and can afford it, or he sends an Angora cat or Persian cat, or a cockatoo, or a bull dog. No tiaras, or diamond rings for the girls surrounding Mrs. Castle—not if you wish to win their regard. The manager of the company, J. Clyde Rigby, in getting out his itinerary for the movement of the company from New York had out his itinerary for the movement of the company from New York, had to tell the railroad men that the company carried the following live stock: 9 monkeys, 3 German sheep (police) dogs, 2 Belgian Griffons, 11 bull dogs (full English and Boston and one French), 1 Russian wolfhound, 7 parrots, 3 Angora and 2 Persian cats, 4 alligators, 5 cockatoos, 1 black bear cub, 7 guinea pigs, 27 canaries, a large assortment of rabbits, and any number of white mice and rats. ber of white mice and rats.

Mrs. Castle caused the epidemic of pets when she brought Rastus to the pets when she brought Rastus to the organization. Rastus is a French Guinea monkey, and has been much photographed and written of. He is the absolute monarch of Mrs. Castle's heart and is accorded every privilege that a baby would have. Every night in her dressing room, Mrs. Castle sits him a pencil with a broken point, or down and writes a letter to her hus of the will not make a mark. down and writes a letter to her husband, Vernon Castle, who is now a
lieutenant in the British Aviation
Corps "somewhere in action." The plied with writing material.

Alexandra 'Twin Beds"

At the Alexandra Theatre this week, Selwyn and Company will present the three act farce, "Twin Beds," written by Salisbury Field and Margaret Mayo, author of "Baby Mine" and "Polly of the Circus." While the title "Twin Beds," might convey the idea that the play belongs in the risque class, the management hasten to deny that this is the case. The story deals with life in New York flat life and the characters for the most part are young married couples story deals with life in New York flat life and the characters for the most part are young married couples all living in the same big house. One of the newlyweds is Harry Hawkins, a youthful business man and his charming wife. He is a believer in peace and quiet in his home, while Mrs. H. is of the butterfly type, with the consequence that their apartment is the mecca of all sorts of people, much to the disgust of her husband. Another one of the couples is an excitable Italian tenor with an American wife, who has rescued her son of Italy from a cabaret and turned him into a \$2000 a night tenor at the Metropolitan Opera House. She is exceedingly jealous of her "wop" and becomes perturbed at his innocent attentions to the lovely Mrs. Hawkins. Both she and Mr. Hawkins decide it is better for their peace of mind for their respective spouses to be treated to a change of scene. Unfortunately, however, thru a circular letter sent by their landlord describing the beauties of a new apartment house he has just opened, they both again find themselves under the same roof. The complications then follow thick and fast, but of course, the tangled threads are finally unraveled. In the cast but of course, the tangled threads are finally unraveled. In the cast of "Twin Beds" will be Lois Bolton, John Welch, Clare Weldon, Auguste Aram-ini, Susanne Morgan, Helen Eddy and Fred Ozab.

Grand "Watch Your Step"

Mrs. Vernon Castle, Frank Tinney Bernard Granville, Elizabeth Brice, Charles King, Harry Kelly, Harry El-lis, Edna Bates, Gertrude Rutland, Bunny Wendell, along with numerous other stage notables come to the Grand Opera House Monday to per-form here for the first time Charles form here for the first time Charles Dillingham's highly successful musical comedy, "Watch Your Step." Six months of crowded houses is "Watch Your Step." Your Step's" record in New York. Newspapers and theatregoers emphatically went on record as believing the piece to be the most novel, most modern and most largely enjoyable musical entertainment that had been staged in years. Now it has begun a tour of the largest cities of the east

erican woman of the stage, known for a generation as "The Queen of Comic opera," which she forsook to star in comedy-drama, will headline a splendid bill at Shea's this week. Miss Russell will sing old and new songs, and will wear dazzling gowns such as have made her wardrobe the standard of stage magnificence. Miss eGorgia Earle and associate players will present in "Getting Acquainted," a homesent in "Getting Acquainted," a homely, honest, convincing little sketch that carries one back to the days of "The Old Homestead." Brent Hayes, "the master of the banjo, is an artist whose careful manipulation of his instrument adds a soul to the technique he has already mastered. Walter De Leon and Mary Davies offer a distinctly clever novelty in "Burlesque Movies." Paul Gordon and Ame Rica are indisputably entitled to call themselves "sensations of cycling." Duffy and Lorenz, former vaudeville stars who have been featur-

"The Six Water Lillies," called the most beautiful and spectacular diving act in vaudeville will be the big headliner at Loew's Yonge St. Theatre the coming week. It is the best staged and the prettiest aquatic feature ever produced. The setting is elaborate, showing the interior of a marble palace with the huge tank masked in to look like a marble basin. There are six very pretty girls in the act, each of a different type, and everyone an expert diver. Diving contests will be held Tuesday and Friday evenings. Another exceptional feature on this program will be Norris' Baboons, an

PLANT & TIMMONS

STARTING WEEK The Iron Claw AFL.

THE PRICE OF GASOLINE

This is still the leading topic of interest in the automobile trade. In the discussion that goes on this much may be taken for granted, that the automobile is too great and too important to be even temporarily injured by the increase in fuel price. Hundreds of the most brilliant minds in the United States are at work in the solution of the problem of cheaper fuel and it may be confidently expected that in a few months a new fuel or a new method of carburating existing fuels will be arrived at. In the meantime, a strong organization is being perfected to fight the interests which are responsible for the rise in price. Cutthroat methods have never succeeded in business and never will and the effort of the oil trust to rob the public is bound to react upon them eventually. The excuse that there is a scarcity of crude petroleum can't be given a moment's consideration. There are millions of gallons of crude oil in storage in the States which are being withheld from the market to furnish the oil trust with some excuse for its piracy.

Those who contemplate the purchase of motor cars need not worry unduly about the fuel situation. If gasoline does not come down in price we will soon have something equally efficient to take its place. As we said before the automobile and the motor truck have become absolutely essential factors to modern life; and the men who are behind the industry; and the people who use the cars will soon find some way out of the present difficulty.

GUARDING THE PLANT OF WILLYS-OVERLAND

Three Horsemen Mount Guard at Taken From Dealer's Stock and Night, Keeping in Touch With Other Watchmen.

Among the curiosities of the automobile industry are the three horses used in patrolling the grounds of the ments in reliability, power and econ-Willys Overland automobile plant at omy, but none perhaps so remarkable night. These are the only horses ever as the recent feat of 100 Studebaker seen about the great plant.

The 16,000 employes of the Willys Overland Co. who travel to and from the automobile factory every day utilizez about every known means of transportation that the city affords. Trolley cars, automobiles, bicycles, motorcycles and jitney buses all carry their quota of passengers to the plant, but even in this maze of power-driv-en vehicles the horse is seldom if ever

and the army of day workers have de-parted for home the three horses make their appearance, entering the grounds along a footpath at the rear of the factory. They are the mounts of the Overland night watchmen, who keep in touch with forty-five other men stationed around the freight yards and tioned around the freight yards and factory buildings. Thruout the night they police the great Overland property, and it is said to be next to impose sible to get thru their sentry lines without being challenged.

This system of protection is impera-tive owing to the huge quantities of material that come into the plant at all hours of the night. The dockage facilities for taking care of inbound

MAKING RECORD RUNS

Driven Thousand Miles in Forty-eight Hours.

The history of the automobile industry contains many chapters of achievecars in as many different cities, each car taken from dealers' stock and driven a minimum of 1000 miles within 48 hours after the starting signal was given. Everyone is interested in performance. Everyone wants to know before buying a car what it can do, both under normal and abnormal con-

ditions.

In these Studebaker runs the cars were not prepared for the ordeal. They were all new automobiles, in just the condition they arrive from the factory. The rules of the reliability runs provided that each car had to cover at least 1000 miles within 48 hours or 12 hours a day for four consecutive days.

The actual distance made by these 100 cars was 102,063 miles, or the equivalent in distance of more than four times around the earth. The average running time was 36 hours and 27

The Ford Motor Company has called attention to the report of the Secretary of State of North Caroline who issued on Wednesday, March 8, 29 issued on Wednesday, March 8, 29 automobile licenses, of which 23 were for Ford cars. The company states that the registrations in this state shows four times as many Ford cars as all other cars combined.

It is currently reported that one prominent manufacturer in Detroit will be unable to turn out cars after the expiration of two weeks, owing to inability to secure rims. The rim situation is likely to work in favor of the freight car congestion which will not be so serious should the makers be unable to secure rims.

ECONOMY OF TRUCK TRANSPORTATION

Motor Affords Cheaper Form of Service Than Horses in Both Short and Long Hauls.

HE belief that motor-trucks are only efficient on long hauls is all wrong, and the statement is made by a prominent truck man that the motor vhicle can be made to work cheaper than horses on one-mile hauls, which means that in a short time there will be no horses used in commercial

wil. be no horses used in commercial work.

"The length of the haul has nothing to do with it," said the truck man; "time is the all-important essential of modern business. Idle truck loading and unloading time is responsible in almost all cases for truck inefficiency, and for the fact that in some instances the cost per unit delivered by the truck is greater than the horses.

"Hundreds of thousands of dollars are being wasted annually all over the country because motor-truck owners."

country because motor-truck owners have not installed modern time-saving devices in connection with their motor equipment. This condition does not only apply to certain businesses, but unfortunately is general, many instances being found in virtually every. class of work in which trucks are used.
"As more goods are delivered, piece
by piece or package by package, than
are hauled intact from the point of
loading to the destination, the load-

ing time is of the most importance in the great majority of cases. "In nino cases out of ten dissatis-fied users of motor-trucks can trace the reasons for their dissatisfaction to the methods of loading, whereas those loudest in praise of the motortruck as compared to the horse will be found among those who banished horse-pace methods of loading when they banished the horse.

"It is impossible to operate motor-

trucks successfully on horse-pace methods. One of the most flagrant of horse-pace abuses to which motor-trucks are subjected is to load them in the same manner as the horse wagons which they replaced were

one or two hours per day did materially diminsh the work done by a horse during the day, and in some cases was necessary in order to give the beasts a rest, the same percentage of idle time in the operation of a motor-vehicle plays an important part in the latter's cost of operation per unit of work done, because of the truck's greater cost of maintenance and its unrealized ground-covering

"Cases of improper operation, how ever, are becoming merous, because of the greater dis-semination of motor-truck operating knowledge and linking up with this the realization of the fact that time is money, and that a motor-truck only

PREACH PREPAREDNESS AT PAIGE-DETROIT CO

President of Company Addresses Employes, Driving Home Startling Facts.

A powerful stimulant to the policy of preparedness has been given by the entrance of the Paige-Detroit Motor Car Company with an intelligent and determined purpost to instil a spirit of loyal citizenship into the workers of this huge organization. The Paige Company is one of

number of Detroit manufacturing concerns to set the nation an example in advocating and working for some reasonable plan of adequate national defense. This activity in preparedness is only another striking proof of the bigmindedness and broadness of outlook of the executives in the automobile in-

H. M. Jewett, president of the Paige Company, set forth the policy of preparedness at the last monthly departmental meeting, when more than seventy heads of the different manufacturing departments of the Paige plant were gathered to promote factory cooperation and efficiency.

In an informal but rousing talk Mr. Jewett drove home some startling facts that showed the helplessness of

the country in the event of hostilities by any foreign power. He pointed out that now more than ever before this country was a prize so rich and valuable that it was a positive tempta-tion. All the foreign countries at strife have been pouring in their millions of dollars in orders for war materials until there is in the United States to-day more billions of dollars in gold than have ever been accumulated by any other two countries in the world's

MAKERS OF MOTOR

Belligerents Taking So Much of Output That Supply Will Not Equal Demand.

AR ORDERS have caused such a shortage of steel as to seriously embarrass the automobile industry of the United States, and unless some nedy is found, may result in disaster

With the demand for steel came higher prices, and many automobile makers are giving most serious consideration to condition. The automobile industry is only recovering from the depression of 1914, and, figuring on increased output, many manufacturers reduced the price

The makers of automobile parts refuse to quote prices, except "at the market" price of steel on the day deliveries are

POINTERS ON CARE OF THE INNER TUBE

Easy to Secure Better Results If Users Exercise a Little

Care.

FTIRE users better understood the construction of inner tubes and conditions which contribute to their wearing out it would be easy indeed to secure more and better service. Spare tubes should not be carried in cardboard boxes as furnished from the declarate should not be carried in the declaration that declarations the declaration that declaration the declaration that the declaration that declaration the declaration that declaration the declaration that declaration the declaration that declaration the declaration that the decla nished from the dealers' shelves—there is danger of the tubes being chafed. Tube bags can be secured for this

our pose.

If the car is equipped with smaller tires on the front wheels than on the rear wheels an extra tube should be secured for each size.

The cross-sections of inner tubes

are made a little smaller than the normal air space inside of the cases. It is not advisable to use a 4½-inch tube in a 4-inch case. This usually wrinkles and creases the rubber with in a 4½-inch case for any length of time. When this is done the rubber is required to stretch too much and the effect of heat and action due to the effect of heat and action due to displacement of air in the tire quickly uses up the nerve and life of the tube. If put into usage for which it is not designed, the tube will not, as a usual thing, render efficient service. If it was practical to use one size in another size of case tire manufacturers would effect a big saving in equipment, and furnish only a few sizes of tubes.

equipment, and furnish only a few sizes of tubes.
Lubrication is most important to conservation of the tube, but it is a matter that is given least attention. Practically all tire manufacturers treat the inside of cases with a white solution to prevent tubes from sticking to the adhesive "friction" of the fabric. A good lubricant, however, should be used.

fabric. A good lubricant, however, should be used.

Some motorists neglect dusting soap-stone inside of the case when changing a tube; others use the soap-stone so sparingly that it does but little, if any, good, or they may use so much that it does more harm than good. If a quantity of it be dumped into the case it will collect at one point, and during the hot weather will heat up to such an extent as to burn heat up to such an extent as to burn the rubber of the tube, making it very the rubber of the tube, making it very thin, brittle and lifeless. This can be recognized by the honeycombed appearance. Scapstone is the lubricant most used for tires, and it is quite satisfactory but not lasting. Therefore a fresh supply should be put into the tires at least two or three times at least two or three times. during the season. Powdered mica has proven a more durable lubricant than soapstone and quite as effective as graphite, as well as more pleasant

to handle.

The lubricant should be dusted on the fabric all around the case, and on the inner tube.

of cars for 1916.

price of steel on the day deliveries are demanded.

Some of the more far-sighted manufacturers have bought steel in the billet and have supplies stored at the mills, subject to their order. Others have quantities on hand at their factories.

Tungsten steel, which enters largely into the manufacture of automobiles, is almost impossible to obtain. One year ago a unit sold for about \$50, while today it is quoted at \$200.

The machine toolmaker is suffering as badly as the automobile maker. Reamers which formerly sold for \$12 now cost \$98, and drills are quoted with no discount, which means an increase of about 50 per cent. in cost.

Auminum for crank cases and gear boxes is selling for 300 per cent. advance, while artificial leather is scarce and hard to get, even at advanced prices.

Even a slight increase in price in material means a great deal to the automobile industry, as the production for 1916 will exceed 1,200,000 cars.

Difficulty was experienced by dealers during the latter part of 1915 in making deliveries of cars, owing to the scarcity of materials.

Automobile manufacturers have placed contracts for but six months in advance of their needs in the past, and when renewals were asked for they were told of the shortage and the increased price.

During the past six months it has been increasingly difficult to obtain scheduled deliveries of materials, while new business has been exceedingly uncertain.

With the general trend toward lower retail prices for 1916 cars, this has naturally had a disquieting effect on the trade, affecting everyone, from the machine toolmaker and parts maker to the producer of the finished car.

Even at the present time it is by no means certain that it will be possible to clear the big production planned for 1916 on schedule time, but we are safe in saying that there would have been a practical deadlock by spring had not the more far-sighted man.

In fact, some of the more prominent manufacturers of cars have frankly stated that if it comes to a question of cutting quality or rai

This car is the result of a definite purpose to supply a definite need with definite finality. It is built for the man whose purse cannot afford a big, expensive car-For the man whose pride cannot afford an unsightly, little, uncomfortable car-

And it is a very definite success. Beauty is not necessarily a matter of size.

Neither does size altogether control comfort.

But skill, experience and facilities are required to build a small, beautiful, comfortable, economical car.

In a word, it required Overland organization. And here is the small, light car—

complete to the last detail. Its performance is on a par with its

beauty, comfort and completeness. And its price—\$850—is far below any former price for any completely equipped automobile-regardless of appearance or comfort considerations.

A glance at the car impresses you immediately with its beauty and finish.

-top class

-bottom price

As you look it over and read its specifications, you realize its absolute completeness.

But you must ride in it to appreciate its comfort.

You must drive it to get the thrill its performance will give you.

You can own one of these cars.

But act promptly—for no car was ever in such demand.

In spite of record productions and advancing prices, there is a shortage of cars.

The demand naturally centers on top class at bottom price—this small light car.

And no other car at anywhere near its price can compare with this one for beauty, performance, comfort, completeness and economy.

REPAIR ABANDONED CARS IN BELGIAN WAR ZONE

All Are Being Brought Into F rench Seaport Town and Put Into Condition for Use O nce More—Many Were Left in Devastated Area Earli er in War.

Distillate, a grade of fuel for motors

much in results as with gasoline.

DETROIT, March 25.—All of the Belgian cars which were abandoned in various parts of the war zone are being February with this company was 137 repaired. Over 2000 cars are undergoing repairs at a motor car repair station, located at a certain French seawas turned over by France to the Belgians for this purpose. Here the cars are grouped according to make. They are being carefully gone over and, one by one, are again being placed in serlower than kerosene, is used in Call-fornia not only on commercial cars but in pleasure cars also, and carburetors have been designed to use the low-grade fuel which hardly reaches above vice. During the fighting in Belgium thousands of these cars, when they broke down under rough work and tremendous strain, were abandoned by the roadside or left in farmyards and grade fuel which hardly reaches above a 42 test. While the automobile owner garages. With the reorganization period, however, these cars were collected and brought to France to be turned cents for distillate and secure quite as over to the repair staff. The chassis under the bodies, which were splintered by shells, scorched by the sun, and rotted by the rain, were found to be in under the bodies, which were splintered by shells, scorched by the sun, and totted by the rain, were found to be in good condition, oftentimes requiring very little work to place them once more in service. Among the cars brought in were many of American manufacture, including both pleasure cars and motor trucks. As is the case with the native cars, the American cars are being overhauled and put in good order. This work has brought cars are being overhauled and put in good order. This work has brought many orders to America for spare tarts. The repair of American trucks was the least difficult of the work, inasmuch as many spare parts had been ordered in Europe and delivered with the trucks, and the American manufacturers are reported in Europe to have given prompt service in shipping other spares to enable the Belgians to again put the trucks in service. With the Belgian cars this was different, as there are no Belgian automobile factories now in operation.

The sales forces of the Ford Motor Company at the 51 branches of the company at the 51 branches of the company thruout the United States will be doubled, instructions having just been issued to that effect. The officials of the company state that the sten is taken to meet the convergence.

Barry T. Dunn, vice-president of the Pisk Tire and Rubber Company and president of the Fisk Tire and Rubber Company and president of the Fisk Tire and Rubber Company, left San Francisco early last week for Southern California, his stay in San Francisco early last week for Southern California, his stay in San Francisco early last of construction and L. E. Jolles has been made general foreman of all the prosperous condition of the tire and automobile trade in the northern part of the state. Mr. Dunn told friends in California that the year 1916 would prove wonderfully prosperous in every section of the United States.

D. V. Rippingille, service manager of the Chevrolet Motor Company at the 51 branches of the Hudson Motor Car Company, has been appointed sales manager of the Chevrolet Motor Company that the view of the states.

STORAGE BATTERY COMES . TO MOTORISTS' RESCUE

Demonstrator Who Gets Car Stuck in Mud Makes Novel Use of it.

While demonstrating a new car, a salesman for the Charleston (S.C.), Motor Sales Company got into a pretty mess. He might have been there yet if the Willard storage battery on the car hadn't come to his assistance.

Country roads aren't always boule-vards, as this man soon discovered. The car performed beautifully until it was driven into mud and water so deep that the motor stalled. Water came in thru the carburetor air intake and starting again was impossible per cent. greater than during the first year of the company five years ago, and the February increase was 1644-per cent. over February of five years ago. The Paige Company has facilities now to turn out 175 cars per day. and starting again was impossible.

Luckily for himself and his prospect, the demonstrator wasn't afraid to try something. He ran the motor from the Willard starting battery, slipped into low gear and pulled the car entirely out of the mud hole with the electric mative power. motive power. Afterwards he said that while he wouldn't recommend car owners using their batteries in this way, at the same time he was mighty glad he had a battery as good as he

with the sales force of the Hudson Motor Company in Detroit and for the last year part owner of the Northwest Motor Company of Seattle, distributor of Hudson and Packard cars, has been appointed sales manager of the Premier Motor Corporation of Indianapolis. Mr. Stubbs is a nephew of the late George W. Bennett of the Willys-Overland Company.

R. N. Brown has been promoted by the Packard Motor Car Company to the position of assistant mechanical

H. C. Lardie, of Traverse City Mich., has invented an apparatus for which many claims are made. With which many claims are made. With this device kerosene as well as gasoline can be burned with the same carburetor. Before entering the carburetor the kerosene is passed thru a preheating pipe and is thoroly heated. After leaving the carburetor it is conducted thru another pipe enclosed in the exhaust, and the heat from the latter is enough to convert the oil into power gas. into power gas.

Motor truck manufacturers of D roit and Michigan are active bidders for the order of 54 motor trucks wanted by the government for immediate delivery for use in the Mexican imbroglio.

A Proven Mechanism

The New and Greater

THE new Chandler bodies, the most beautiful of the season's offerings, are attractive indeed. The New York and

Chicago Show crowds admired and purchased in great numbers, the new Chandler touring car and the new four-passenger roadster. At all the shows the country over, the New and Greater Chandler has been the centre of greatest attention.

But the vital reason why so many thousands of motor car buyers are choosing the Chandler is the established and known excellence of the Chandler chassis—the Chandler mechanism.

In every essential way it is the same chassis on which for three years all Chandler bodies have been mounted, THERE IS NOT A SINGLE HINT OF EXPERIMENTATION.

"The Marvelous Motor," built in the Chandler factory ever since this Leader of Light Sixes was first put on the market, has won its laurels and still holds them.

It has always been powerful—powerful enough to do with ease anything that you could ask any automobile to do.

It has always been speedy—speedy enough to go faster than 999 out of every thousand car owners would ever want or dare to drive.

It has always been flexible—slowing down to a snail's pace on high, and jumping away instantly at the touch of the

It has always been economical in operation—owners averaging 16 miles per gallon of gasoline, 700 miles per gallon of oil, and 7000 miles per set of tires.

For three years it has had, and today has in even greater degree than ever before, all of those qualities you rightly demand in a high-grade motor car.

It is a known quality.

And, more than ever in the past, automobile buyers this year recognize the security of dealing in known quantities.

Chandler production has been increased to 20,000 cars for 1916, but Chandler dealers say that even this great output will not take care of the demand for the New and Greater Six,

Good judgment will indicate the advisability of finding out for yourself all these things which thousands of Chandler owners know to be true of the Chandler, and then placing your order at once.

The New Chandler Catalogue illustrates the New Big Touring Car, the Four-Passenger Roadster, other body types and all mechanical features fully.

Interesting Chandler Features.

In the face of higher cost of materials, nothing has been cut out of the Chandler. Highest quality equipment continues to be a fea-In the face of higher cost of materials, nothing has been cut out of the Chandler. Highest quality equipment continues to be a feature. Bosch High Tension Magneto, the most expensive and satisfactory ignition. Gray & Davis Separate Unit Electric Starting and Lighting System. Chandler aluminum crank case. Chandler full-floating silent spiral bevel-gear rear axle. Three silent enclosed chains driving motor shafts. Stewart-Warner magnetic speedometer. Stewart vacuum gasoline feed. Non-skid tires in rear. Deep cushioned upholstery covered with long-grained semi-glazed leather. Seven-passenger touring car and four-passenger roadster, each \$1825; Chandler convertible Sedan body, \$2600; three-passenger cabriolet, \$2300. If you do not know your dealer write us today.

New Series Saxon Cars

Two unit electric starting and lighting Timken axles—Timken bearings throughout the chassis Silent helical bevel gears Linoleum covered running boards and floor boards Roomier rear seat Improved body finish Garnish strip around top of body
—and 17 other detail improvements

These are the added features that place the New Series Saxon "Six" even farther ahead as the biggest touring car value ever produced. The New Series Saxon "Six" embodies the four big

new ideas of motor car design: high speed motor, of wonderful power and flexibility; light weight, due to modern design and finest materials; yacht line body, the latest automobile fashion; increased comfort for all five passengers.

The two unit electric starting and lighting system is reliable, efficient and wonderfully quiet. The Timken axles with full Timken bearing equipment, front and rear, are of the same specifications as those used in highest priced cars, No automobile at any price has better axles than the New Series Saxons. Helical bevel gears are noiseless and fric-The body improvements all help to make the "Six" even

more satisfying to the critical buyer. The garnish strip around the top of body and the linoleum covered running boards are dressy and trim. The improved finish assures long lasting lustre. The widened rear seat makes the "Six" roomier and more comfortable than any car in its

Other features of the New Series Saxon "Six" include: sixcylinder-high speed motor, 30-35 h. p.: sliding gear transmis-; demountable rims; vanadium steel cantilever springs; wheelbase; 32 x 3½" tires, non-skid in rear; one-man Why not take your demonstration today?

New Features of Saxon "Six" Saxon New Features of Roadster

Three speed transmission Timken axles New body—handsomer, roomier Improved high speed motor Signal lamps at side Ventilating windshield Improved cantilever springs of vanadium Adjustable pedals

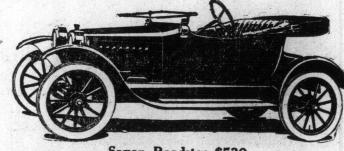

-and 15 further refinements These and a number of other detail refinements feature the New Series Saxon Roadster. They make it unquestionably

the most inviting two-passenger car on the market.

Three speed transmission provides increased flexibility. Saxon is the only car in the world, selling for under \$600, which has three speed transmission. The extra set of side lamps, the ventilating windshield and the adjustable pedals you will readily appreciate.

The Saxon high speed motor has from the first been one of the marvels of automobile design. Improved and refined it gives the Roadster amazing power and speed.

The New Series Saxon Roadster is the economy champion of motordom. It makes 35 miles on a gallon of gasoline 150 miles on a pint of oil-3500 to 5000 miles on a \$9.00 tire

S.T., and Major J. R. Forbes, C.A.P.C Col. Marlow, the director of the medical services for the Toronto Divimedical services for the Toronto Divisional Area, has charge of the maintaining in health of many thousands of soldiers. Major C. A. Warren is deputy medical director of administration, and Major J. A. McCullough, deputy director in charge of sanitation.

Major Geo. C. Milsom is assistant rector of supplies and transportation. he feeding of thousands of soldiers and the arranging for their carriage by hoat and rail to camp, and also to the point where they embark for Europe, are supervised by him.

Directs Engineering

Lieut.-Col. A. Clyde Caldwell is di-Lieut.-Col. A. Clyde Caldwell is director of the engineering department, and superintends the equiping, heating and lighting of soldiers' barracks, and also he has the task of the equipment and maintenance of the big summer camp at Niagara-on-the-Lake.

Major J. R. Forbes of the Canadian Army Pay Corps, is divisional paymaster. His department has probably paid out milions of dollars in "soldiers' wages."

Major S. de W. Dunn is divisional signalling officer. He trains members of overseas units in the work of field signalling, telegraphing, heliographing, and also in the sending of "wireless" messages. He directed the "signalling" between Niagara Camp and Toronto while the "big trek" was in progress

Chief Recruiter

Maj. Geo. H. Williams, senior camp chaplain, has the distinction of being also the chief recruiting officer of the banner military divisional area of the Dominion of Canada, and where there has been such an amazing rallying to the colors of citizens under, over, and of eligible military age.

Considerably over one hundred thou-

sand men have offered themselves for overseas active service, against the foes of the British Empire, in the To-ronto district since the war began. About forty thousand have been turned down by military examiners as not ikely to make efficient soldiers, because they were not of the required height or chest measurement, or because they failed to pass the medical tests. Thousands of young men in Toronto, other-wise sound in body and mind, and of soldierly appearance, could not pass the eyesight tests, tho they were anxious go on active service. Even as reaxed, the test is too severe for many of good general eyesight, but lacking n the particular range sight used in he medical tests. The rejection of so many thousands patriotically minded men who have volunteered has made many thousands patriotically minded men who have volunteered has made many thousands patriotically minded men who have volunteered has made morning church parades being held at church in various parts of Toronto instead of holding the big camp drumhead church services in the government building. When the soldiers are in summer camp the drum had a series over, the driver intended his team and was ready to resume the morning church parades being held at church in various parts of Toronto instead of holding the big camp drumhead of the acute stage.

"I've paid my bill, and it's none of your business," gruffly answered the nany thousands patriotically minded ed the acute stage.

The major has, however, been so ng could be stimulated.

Accessories Improved to Meet New Requirements

Interesting Sidelights on How Af- Multiple Cylinder Engines and the Universal Demand for Motor Flexibility Result in Carburetor and Magneto Refinements.

> Taken broadly, the accessory field shows that here has been a marked amount of progress in detail design during the past year. Each individual accessory has a trend toward simplification and efficiency and toward the important matter of the simple state of the simpl Each individual accessory mas a trend toward simplification and efficiency and also toward the important matter of having the accessory blend with the car. The tendency in automobile design is to maintain a clean exterior, and, hence, it is found that accessories are being designed to carry out harmoniously this idea of simple appearance. In accessories which do not fit the car, but are of use in taking care of it, there have been improvements which tend to make the devices in question quicker in action and simpler of manipulation in the hands of the car owner. With these lines of improvement, have come reductions in the first efforts of the magneto manufacturer to meet the demand of the twelve-cylinder motor. A certain type, which has been in use now for a few months, ushered the magneto in to the new field. The new magnetos do not depart radically from previous magneto design in meeting the necessity for twelve-cylinder ignition, but there have been one important change which inaugurates a new epoch in magneto manufacture. This is the use of the offset poles in which the fields are so arranged that instead of generating two sparks for the revolution of the armature sheet for automobile accessory beand with the ignition and carburetion field.

The dum-head service will be on a larger scale than ever before in the Province of Ontario, with brass and bug-beck, where he explained how recruiting could be stimulated. Maj. Williams has had more oppor-with far work putting of Partition. Maj. Williams has had more opportunity for work outside of Exhibition it is expected, will be the central figure whichever way he chooses," returned Park Camp than his predecessors, ow- in conducting the services,

erating two sparks for the revolution of the armature shaft, four sparks are produced. The result of this is that the Some of the trends in accessory design have been direct reflections of the tendencies in the design of the complete vehicle. For instance, the higher speed motors have called for more efficient ignition apparatus to meet the demand of more sparks per unit of time and hotter sparks at lower speed to correspond with the ability of the up-to-date car to travel at the lowest possible speed on high gear. These two developments lead specifically to the fact that ignition apparatus on the whole this year is capable.

In abnormal speeds to produce the ignition for twelve-cylinder motors. In a magneto producing but two sparks to a revolution it would be necessary to shaft speed. It can be readily perceived that, with an engine rotating at 3000 r.p.m. it would be necessary in the case of a twelve to have the magneto rotating at 3000 r.p.m. This is impractical. With the offset pole and four sparks per revolution, the 1½ to 1 ration solves the problem.

Battery ignition design has been quite well developed during the year and the shows do not bring forth any surprises. Perhaps the one new fea-ture is the combined lighting and ignition unit in which the generator cas-ing houses the entire ignition unit, inis a built-in portion of the power

HALL MOTORS, LIMITED, TAKE CHANDLER SIX

Fact That This Recognized Up-todate Salesroom Takes Agency Favorably Commented on.

The Chandler Six is coming back in the local field stronger than ever. The agency has just been taken over by Hall Motors Limited. Mr. Hall's progress in the motor world has called forth the warmest comment from both his friends and business rivals, and the fact that he is to handle this popular car promises well for its reception in Toronto during the season just opening. Thru his success achieved by his methods of publicity he is readily singled out as a leader, and the fact that he has chosen the agency of the Chandler "Six" and the Case Chandler "Six" and the Case with many agencies to choose from is a pretty fair indication of how he thinks these cars stand in the esteem of the community.

RAPID GROWTH.

A very small boy was taken to a dental establishment to have some of his first teeth pulled. For a second or two, during which time four teeth disappeared, everything was fairly serene, and then came howls of objections.
"I didn't want them teeth to come

"That's all right," consolingly responded the dentist. They will soon

IN THE LEGISLATURE

Hear Public Speaker "Cranking Up."

(Continued From Page 1.) omical as to mental effort: takes

Hearst may be described as a convincing speaker. R. R. Gamey is the Senator Hamilton Lewis of the legislative assembly. Like the American "Ham" he is some-what foppish in sartorial effects; shining footwear, faultless linen and a flower at the lapel. His speech, too, is polished, pleasant and easy and his gestures beat rhythmically. He can-

much longer than usual to deliver and

does not require so much speech. Mr.

rhetoric. Convincing I one

If it is real convincing tone quality you seek, it is in figures like those of Hon. W. J. Hanna and the late Sir James Whitney that it will be found. These men were physically built for ments were ready for delivery they came forth with a tremendous dis-play of earnestness. There are members in their places today who will never forget the dominant note in the thunder of the lamented premier. It is to be noted that the provincial secretary takes a few minutes to warm His preliminaries are discon nected and disjointed but the preliminaries are brief. Then comes the casm or humor, but impressive or sub-

stantial in general current.

Next to the expounder of the annua budget, Allan Studholme, member from Hamilton, is the most informative speaker in the chamber. Bales of statistics are piled in his brain cranarray. Altho a labor man and a union worker, Mr. Studholme does not stop at the six o'clock bell. He talks with out ceasing. The contents of his mental warehouse have never been fully disclosed, altho he has frequently stood on his feet for hours.

One style of oratory conspicutions lacking in the legislature is what may lacking in the legislature. Not be known as the deprecatory. Not only is it rare; it is practically unknown. Good Ontario members do not under estimate their own importance. We have indeed one worthy soul who in five years has never been nearer the cabinet than eight or ten chair widths, and yet who delights to inform the house that he speaks "the mind of the government." Of course, in the Liberal benches it would be hopeless to look for modesty. This tender virtue becomes not a fighting opposi-

It would not do to conclude a brief survey of provincial resources in oratory without referring to, perhaps, the most distinguished exponent in the chamber. Newton W. Rowell may be something of a party disappointment as a leader, but as a speaker he has few peers. In purity of diction and eloquence of expression, he excels but in driving power he is a little weak. His delivery is refined and polished, so much so that effectiveness suffers. A fencer at work provides an interesting study but the crude swashing blow rapidly piled on, counts most in debating scrimmage as in the sterner field of combat. T. W. McGarry has not the Rowell polish, but he has a large and reliable vocabulary, an easy rapid delivery and an overwhelming aggressiveness. goes at an argument as a bull terrier goes at a rag doll. There is not much left of it when he gets thru, and the operation is highly interesting to watch. His star is in the ascendent;

NOTHING IN IT.

GOOD-ROADS PROGRESS IN CANADA DURING THE PAST DECADE

"The Improvement of Public Highways Has Thruout Canada Made Very Substantial Progress, Not Only in Actual Construction, But in the Attitude of the Average Citizen Toward the Question.

This, the mountainous character of

British Columbia has prevented uni-form municipal organizations such as

is possible in the prairie provinces. The French code and French characteristics of Quebec have made a striking

Deputy Minister of Highways.

HE IMPROVEMENT of public highways has, thruout Canada, made very substantial progress; not merely in actual construction, but in the attitude of the average citizen toward the question. Some work of a very notable character has been produced, considerable expenditure has been involved, and better organization has been created; but perhaps most encouraging of all, public interest in the question has been aroused to a remarkable degree such as augurs much for the immediate future.

much for the immediate future.

The development of roads in Canada, in essential principles, has followed the history of all other countries in this regard; and the student of the question cannot but be struck by the similarity which has existed in all countries of the world. Canada has had: In the West

(1) A period of toll roads prior to (2) A period of railroad construction when the common road was neglected, but which has resulted in the construc-tion of 32,000 miles of steam railway

with a capitalization of \$2,000,000,000, including three transcontinental trunk (E) A period of bicycle influence and agitation commencing about 1890, when educational measures and some better road organization were inaugu-

rated, and
(4) Commencement about 1915, a
period of motor vehicle influence,
which has finally awakened the cities
to the cause of good roads as a measure of national development and pros-perity—the cost to be borne not by half or quarter of the community, those residing on the farms, but by everyone receiving the benefits and carrying the responsibilities of citizen-

This is the story which might be told of the United States, England or France, with variety of detail according to local conditions. Just as there has been difference of detail between the States of Massachusetts, of Maine and of Dakota—so have local circumstances influenced the progress and re-sults of organization in the Canadian

Roads in nearly all countries fall and business centres at right angles to the railway lines, amounted to the railway lines, amounted to \$1,000,000, local organizations using There are: The main roads between towns

and cities;
(2) Leading farm roads, radiating from market centres and shipping points, and,

out from the provincial trunk road systems.

The Province of Saskatchewan has created a provincial board of highway

mmissioners, the duties of which are (1) To lay out, plan and determine upon a system of public highways for the province which may from time to time be altered or modified as the

board may determine.
(2) To determine upon the most feasible and economical methods for constructing, improving and maintaining public highways.

(3) To furnish the officers of the

municipalities with information re-specting the construction, improvement and maintenance of public highways.

(4) To appoint such engineers, inspectors and officers as are necessary for the proper carrying out of the duties of the board and the provision of this act.

The provincial appropriations of Saskatchewan for 1915 amounted to \$2,000,000 but, owing to conditions created by the war, this was reduced to \$661,000. As with the Province of Alberta, provincial expenditure is de-(3) Local feeders, each carrying only the traffic which originates on itself. The natural features of any country voted as largely as possible to trunk roads while the local municipalities imhave been very largely, a controlling factor as to which of these classes of roads has received first or chief attention, and for which organization has been created.

The latural leadures of any country for all the local municipalities improve the branch lines; but receive 50 per cent, of the cost of their improvement as ald from the province, when these improvements have been carried out in accordance with the regulations these improvements have been carried out in accordance with the regulations It is to be observed that no two

of the board.

The Province of Manitoba has been provinces have the same organization for municipal, provincial or other road organizations. The same is true of the various American States and of all countries in the world. This great variety or organization is due to the variety of local circumstances which have a formal organization of the bound of Manitoba has been active in road construction, both thru the provincial government and the local circumstances which about \$700,000; while under the Good about \$700,000; while under the Good Roads Act of the province, the sum of \$374,790 was spent, of which the province contributed \$141,700. have influenced the general trend of public feeling, action and administra-tion on which road organization is

ated the office of provincial highway commissioner and has adopted a Good Roads Act, whereby a provincial subsidy is granted to municipalities to the extent of one-third for good earth roads and one-half the cost for gravel or more permanent roads.

The Province of Ontario has recent

difference as compared with Ontario, while Prince Edward Island and Novu ty entered upon a program of advanced road construction. A department of public highways has been created. It has been announced that the collection Scotia have special characteristics in their road situation. During the past decade the Province of British Columbia has made very remarkable progress in road con-struction, which has been carried on of motor vehicle license fees will made a branch of the highway departstruction, which has been carried on very largely by the provincial department of public works. Provincial estimates for roads and bridges in 1901 amounted to \$344,000; in 1915 the estimates amounted to \$2 159,000. A special program was provided in 1910 with an estimated outlay of about \$20,000,000,000,000 the greater part of which has been spent in the construction of main and market roads to the extent of 40 per cent. Under this policy of the province to subsidize the construction of main and market roads to the extent of 40 per cent. Under this policy of the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the extent of 40 per cent. Under this policy of the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of main and market roads to the province to subsidize the construction of the province to subsidize the construction of the province to subsidize the construction of the province to su ment and a revenue of \$500,000 is anticipated for 1916. It is the policy of

In the Province of Albeita, both provincial and municipal organizations have made substantial progress. The Provincial Government has a bronch especially in charge of this work under the provincial engineer of highways. Municipal expenditure in 1912 was \$681.000; in 1914. \$500.190 and in 1915 about \$900.000. Provincial expenditure in 1915, principally on trunk roads, those paralleling the railway lines or leading out from shipping and business centres at right angles annual grant is given to townships, from \$200 to \$400, on condition that they comply with certain conditions. About 400 municipalities, out of 1130 second, provincial grants are made

their funds chiefly on roads branching out from the provincial trunk road to townships as aid in gravelling or macadamizing roads; not to exceed created a provincial board of highway \$1000 a year for macadam, nor \$500

of the expenditure.

Third, under an act of 1912, the Proono (supplemented in 1915 by an additional \$5,000,000) for more substantial ditional \$5,000,000) for more substantial construction under two methods:

 Main roads built by the province.
 Roads built by the municipality. ernment will provide the necessary capital, charging the municipality 2 per cent. for a term of 41 years, the government meeting the balance of interest and sinking fund. About \$8,-000,000 has been thus appropriated to

In the Maritime Provinces

ties and all roads are maintained directly by the provincial department of public works.

From the foregoing it will be seen that legislation respecting highways has made very marked progress during the past decade. All provinces of Canada has now provincial highway or-ganization which is a step of a most progressive kind. Expenditures have shown very marked increase, notably in British Columbia, Ontario and Que-bec. The growth of public interest in the highway problem is very marked and a clearer understanding is being reached as to the needs of highway construction generally.

While much has been done, much

more remains to be accomplished and the field is a very broad one. In the Dominion of Canada there are about 250,000 miles of graded roads. Road-building is a slow process, and in most countries it has taken half a century at least to provide adequate surface construction. The immediate objective in Canada should be to substantially improve about 16 per cent. of the total, or 40,000 miles, which would carry the more concentrated mar ket or farm traffic; while about 2 per cent. additional, or 5000 miles should be treated on a trunk road basis. The total cost might be approximately estimated at \$250,000,000, of which about \$50,000,000 has been spent.

Two Tommies went into a cafe and feeling somewhat hungry asked the waiter what he had to give them to eat, the waiter told to give them to eat, the watter told them anything they liked to oblige a Tommy; so looking very serious, No. 1 Tommy said; "Have you pigs feet?" The watter said "I have, sir." Then Tommy No. 2 asked him: "Have you calves liver?" "Yes, sir, I have," replied the obliging watter. "Then, my dear man," said the first Tommy, "Td advise you to see a doctor at once for advise you to see a doctor at once, for you must be in a h— of a state."—

UP IN SMOKE.

"Can you blow rings?" "Sure: didn't I blow gold-filled one on Madge Brown?" HAVE TREMENDOUS TASK

On a system of trunk roads nearly \$4,000,000 has been spent by the province. In the case of roads built by the municipality a feature of the Quebec aid to municipal construction is that, for substantial improvement the government will approve that the sovernment will approve that the sovernment will approve the sovernment will approve the sovernment will approve the sovernment will approve the sovernment the government will approve the sovernment the sovernment will approve the sovernment that sovernment will approve the sovernment that sovernment the sovernment will approve the sovernment that sovernment the sovernment that sovernment the sovernment will approve the sovernment that so the sovernment the sovernment that so the source th

N officer of an English regiment, who has been thru the whole of the campaign in Mesopotamia without a mishap, was unlucky enough to be wounded early in the battle of Ctesiphon," says The London Post. He writes to his mother an account of the same also crammed We stop-

and we really had a good target. We were knocking them about like anything, and they were giving us a pretty thin time too. I was just about half way thru a rush when I got it in the foot. It rolled me over like a shot rabbit. I felt just like being hit as hard as uncomfortable time, as they mig have been able to get us away. possible with an iron bar on the ankle. Two men of my company stopped when they saw me fall and put on the first field dressing, and then, of course, they had to go on. We had already a good number of casualties in the company, and I could see men dotted about on all sides lying on the ground. It was very disagreeable, as bullets were whistling over and throwing up the dust on all sides, and, of course, I could not move, I just hoped for the best. best.

About three-quarters of an hour

after that our assistant surgeon came along with a stretcher and saw the dressing was all right. He then took me back about 100 yards on a stretcher to a place where about a dozen men lying, all wounded—of ours. amongst others, with one thru the calf and one higher up. The bullets were not quite so bad now, but still pretty thick.

We sat there smoking and congrat-ulating ourselves on not being worse off when a battery of ours rolled up and got into action about 100 yards in front of us. That absolutely tore it, for as soon as they opened they drew all the fire from the Turkish guns. For about ten minutes it was hell-shrap-Dec. 1st.—At last we are nearing nel and chunks of shell falling on all sides. B—— and I managed to crawl finally up under cover of one of the gun limbers, where we were more or less safe. The guns moved on after about an hour. It was now about 2 p. m. The battle was still going strong, but we were nearly out of rifle range now and fairly cheery again.

At about three some stretcher-begreau decided the strength of the river. Luckily enough, another ship with prisoners had just caught us up. and she had two machine guns on board. Soon after dark the Arabs began sniping, and it went on till 8 a. m., they firing from nel and chunks of shell falling on all sides. B— and I managed to crawl now and fairly cheery again.

the stage-plays picturized.

The story is there and the big scenes are there, but more often than otherwise the detail carries no action-and

when we had agreed on this, "you must give a thrill as a proper climax. You must, to work up sufficient dramatic suspense to keep a photoplay audience waiting and eager, cram your scenes with action. There can be only one climax then—a thrill. For how else can you provide a smashing, satisfying ending for successive action?

"On the stage it is possible to entertain while reaching a climax, perhaps by employing comedy. Or else you can occupy your audience's minds with minor themes. But in the films the audience will follow the thread of only one story. Once your suspense is begun, you must run it down a straight line to a climax."

Helen Holmes was to the railroad born. She opened her eyes first in her father's private car. He was a rail-

career, being virtually with the one or run a locomotive; she has learned tele-Heigh Holmeses, they're going to be railroaders too."

HELEN HOLMES WRITES HER OWN REAL THRILLS

"If a photoplay actress wants to achieve real thrills, she must write them into the scenario herself," says Helen Holmes, the Mutual serial star. And the reason is odd: Nearly all scenario-writers and authors for the films are men; and men usually won't provide for a girl things to do that they wouldn't do themselves. So if I want real thrilly action, I ask permis-sion to write it in myself."

Without question, the motion picture nust give thrills. Scenario-writing has pened up a new branch of plot-buildng. Some of the best-sellers among lovels film pallidly. In nearly all cases he motion-picture adapter has been forced to depart from the original plot to keep the action moving in the pho-to-play. This is true, too, of most of

"And, therefore," said Helen Holmes,

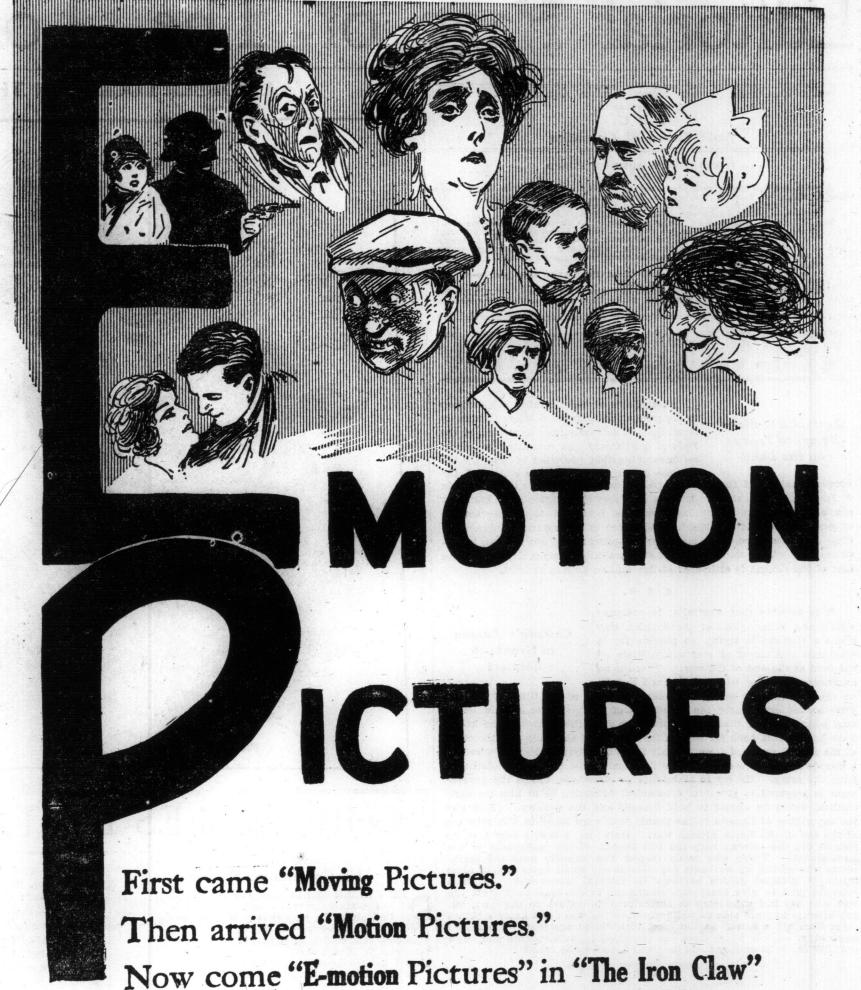

"So," she said, "I do many so-called thrills commonplacedly. I know a railroad from A to Z: I have been a railroad girl all my life. Frequently the things that excite the public are to me, the doer, as thrill-less as his daily 'leap for life' is to the circus thrill-maker."

"The Iron Claw" will hold your interest from the second the title flashes on the screen until the last picture fades out. It sets a pace that thrills and gratifies. It makes theatre-goers realize that new standards of excellence are being created before their eyes. It represents the supreme achievement of PATHE,

If there is one writer in the world who is master of the hearts and emotions of readers, his name is Arthur Stringer. He is the man whose virile pen created "The Iron Claw" stories. These stories will appear weekly in this newspaper simultaneously with the release of the pictures in the theatres. The pictures are the most thrilling that have ever been thrown on the screen. The thrills of the "Elaine" pictures have been outdone by George Brackett Seitz, the photoplay author,

"THE RONGLAW"

Arthur Stringer

Author of "The Wire Tappers," "The Hand of Peril," "Open Water," "The Shadow,"

Story Will Be Published by The Sunday World Beginning Sunday, April 2nd

Everybody knows that Mr. Arthur Stringer is a Canadian, living in Chatham, Ontario, and in reading this story you will enjoy perusing the efforts of a Canadian author who was the successful one out of twenty competitors to be chosen to write this serial. Do not forget to place your order with the newspaper dealer for the first instalment which will appear in The Toronto Sunday World, Sunday the 2nd of April.

Australia to Place Returned Troops on the Land

Australia is already making preparations to encourage the returned soldiers to take up farming. A sub-committee appointed by the Federal Parliament has submitted a report recommending that provision of land for the purpose be left to the various states of the

of loans to the states, making advances thru agricultural banks or similar government institutions, security being in the improvements effected by the soldier-settlers. Advances to the returned soldiers or their degendents would be made for the purchase of stock, seed, implements, etc. The establishment of state training farms is advised. The cost of the scheme is estimated at five million dollars at least.

It is possible that Australia, in company with many other parts of the Empire, may make a mistake in trying to provide for a wholesale settlement of returned soldiers on the land at the end of the war. There is no

Canada's Lesson in Grants to

assurance that they will feel inclined to take up the arduous and somewhat lonesome duties of the tiller of the soil after having experienced the excitement of war. There is little doubt that when they find their occupation gone after the armies of the kaiser have been driven back far beyond the borders of Germany and the curse of the Hun is removed from the fair fields of Belgium, the man who was a city dweller before enlistment will return to the city on his discharge from the army. To try to make him go elsewhere, unless the government is prepared to give him a technical education to fit him for agriculture, would be unjust to both himself and the country. This was the experience of Canada in the grants that were made to war veterans at the end of the South African war. Only in a few, a very few, instances did the veteran reap the full benefit of the generosity of the government. Those who really reaped the benefits were the speculators who picked up warrants for ridiculously small sums and in some instances gleaned golden harvests in mineral discoveries. splendid plan to give every encouragement to the man back from the war who has had experience in agriculture to return to the land, but any attempt to place men on unimproved farms who don't know a notato plant from a hoe handle should meet with discouragement. There are many other ways in which these can be helped to independence and when the time comes to employ them they will doubtless be found.

Trench Warfare Not Onerous to Healthy

Trench warfare, even in the rigors of winter, is not so onerous as it would seem from a distance, according to a captain writing from the front, providing the battalion is in good health, warmly dad, with good boots and properly fed. Under these

conditions men can endure the life without physical harm or depression of soul, if they do but exercise the ordinary precautions for safety from the ubiquitous sniper. Let them but grow careless of their immediste comfort, however, permitting their boots to become leaky or their underclothing to deteriorate and the battalion soon wilts away as a fighting force. It is the medical officer on whom the health of the battalion depends and the work of this official with the army bears the same relation to it that the work of a medical officer of health in a large centre of population does to that population. He stands guard to see that they do nothing and leave nothing undone which will be a detriment to the health of the body which they form a part.

Conclusion of a peace with Germany at the present time would, in the opinion expressed by Dr. Arthur Shadwell in an article in The Nineteenth Century, plunge the world into an economic war, behind which the shadow of real war would ever lurk. He

Behind Possible

Shadow of War

points out that while many people of Great Britain and allied countries profess to welcome the prospect of an economic war, they do not know what they are talking about. They think Britain would be able to destroy and keep down German industry and trade, but overlook the fact that while it would undoubtedly hurt Germany it would re-act on Great Britain and her allies as well. In a great measure any such an economic struggle would fail altogether, because when customers are offered what they want at the price they want by the shopman who cares no more whence the things come than whither they go, patriotism is forgotten in the desire of the eye. Women in particular cannot resist it and they do most of the shopping.

Would Drive Both Sides Into New Fields

Insofar as the economic war succeeded, Dr. Shadwell points out its chief effect would be to drive both sides into new fields, which would naturally be more difficult than the old ones. The advantage would not always be with Britain and her allies unless they

The Germans have been successful in industry and commerce because they have worked very hard at it. Those who talk glibly of economic war have no notion what it would entail. It would mean harder work, longer hours, smaller profits, lower wages and less amusement all round. He questions whether the relations of employer and employed would stand the strain of these demands. In fact he thinks Britain will be fortunate to escape an industrial war at home at the close of the present European conflict. The changes demanded for successfully waging the proposed economic war would make it virtually inevitable. Remember the war taxation would be in force and we could not relax our military and naval preparations. To do so would be to encourage Germany in hers, in the hope of catching us napping again.

. . .

Wise commanders who must never nurse delusions as to amateur soldiers and never praise any man in uniform unless he be thoroly tested, have been paying warm tributes to the Territorial gunners, according to the report of the special correspondent of

Territorial Gunners Make Good at the Front

The London Times at headquarters. One expert went so far as to say that they were even as good as the regulars in all essential respects. a matter of fact, it is not only the gunners who have made good. The entire Territorial end of the army of Great Britain has faced the emergency created by the precipitation of Europe into a gigantic conflict. with only the aggressor prepared, and they have acquitted themselves in a manner worthy of the most seasoned soldiery. When the history of Britain's part in the world war comes to be written the record of the Territorials will decorate some of its brightest pages.

A ROBBER CUCKOO IN THE NEST

CHRONICLES BY THE KHAN

His Colonization Scheme ER KAISER had bum colonies, He, since he was a lad, Conceived the plan that he'd take these, That other people had.

Admirors this bold project fanned, It was no idle dream; They'd have a great big grossen (grand) Colonization scheme.

ND all the fine young German folk Would make a mighty trek: They'd take his lands and put the yoke Upon their neighbor's neck. By Deuchland this great plan was lauded, With joy her eyes did gleam; And e'en the noble Turk applauded That colonization scheme!

OW listen to my tale_since when That scheme was operated, More than a million German men Have certainly emigrated. Where have they gone? Each day I hear Ten thousand widows scream: "Explain to us this drear—this queer Colonization scheme!'

HERE'VE they gone to? Tell us where!" I will not-dare not, say that they're Located down in Hell only know they've disappeared Like fragments of a dream; fear me that the Allies queered

DERHAPS to neither Heaven nor Hell. These folk did emigrate: I know a place that few know well, The Intermediate State! Now I can understand the blessful Kaiser's hopeful dream: The world applauds his quite successful

That colonization scheme

Colonization scheme!

The Adventures of Koonrot

DON'T know for sure whether that's the right way to spell it, but he pronounced it Koonrot. He was a fine big Prussian lad who had been carefully suckled on the insidious fluid of a new Evangel. The initial and at the same time the biggest mistake of his forbears-and to be plain about it, their only mistake-was the embracing of Christianity. Had they remained Pagan they could have controlled Christianity—a house divided against itself and, dominated the world. True, the legend, "Gott mit uns," was emblazoned on the flag, but he and his folk regarded it chiefly as a fetich, which had served its purpose even as another and a far greater people consider that the time-honored legend, "In God We Trust," is out of date. Love thy neighbor as thyself was a precept inapplicable to supermen. France was their nearest neighbor and Belgium was another—the thing was absurd. He learned all thru his boyhood and youth with ever-growing satisfaction that France would have to be humiliated, Paris occupied a second time in order to make a finished job of it and assure him and his fellows a place in the sun-comfortable seats under fig trees that they had not planted. All this looked good to Koonrot. He longed to march into Paris even as his father before him had marched into it behind the Old Emperor and the Crown Prince Frederick and Bismarck and Molke and Roon. But these magnificent brigands had not completed the job, and glory be! the task was for his generation.

So it was when the war broke out a year ago last August he went gaily with his regiment; he couldn't get to Paris too soon. After two weeks marching and counter-marching, he got into a great battle. He was weary and dust-covered when the noise of the great guns died down at sunset. The evening breeze

lifted the great smoke clouds and rolled them away, and lo! and behold! right in front of him were the shining roofs, the towers and steeples of a majestic literature, a most admirable little Whether he could accept the full city. He flung his picklehauben high in the air and text book, a rival and worthy sucshouted with all the force of his lungs:

"Paris! Paris! Paris!" "Oh shet yer head you big slob," said his sergeant. This, perhaps, is not exactly word for word what he Robertson of Brighton, published in Hamlet" he shows impatience with said. I am attempting only a free translation. "Shet 1865. There can be no doubt that yer head. That ain't Paris-that's Louvain!"

Koonret was disappointed, but not cast down. Paris could not be far away. Tomorrow probably, or introduction to the edition of 1877 a week at the farthest. He could stand on his he affords a glimpse of what was to head for a week. Then came another big scrap—a occur within three years in his own shocking affair—and when the smoke rolled away case. there, before him, rose a noble city, a triumph of the count given in this book of the "exarchitects' and the builders' art. Once more his now- traordinary" alteration in Robertbattered picklehauben soared into the air and Koonrot son's opinions which took place at Cheltenham. But there was very

"Paris! Paris!" "You make me tired," sighed his sergeant, "that's changes, it was the product of numa mere village. That's not Paris, you simp, that's berless small, and in themselves un-Leige."

He was bitterly disappointed—he was resentful, the books he read, the reflex action rebellious, but he had no time to growl about it, for of his sermons on his own mind, and he was bundled off to the eastern front, and after a the set which the current of his fearful campaign they took a great city. When the thoughts took under the general insmoke clouds rose and disclosed its magnificence he fluences I have described in the text. shrieked with joy, for here it was at last!

"Paris! Paris! Paris!" When he found it was Warsaw he was simply dis- are forced to win faith out of gusted worse—he was disillusioned. He didn't be- doubt." There is a certain mystery lieve there was any such a place as Paris. It was always in the development of indea mythical city like the cities in the folk lore stories pendent views out of an environment of his native forest. He was roused from his dejec- which clamours for convention and tion by glorious news. He was to be transferred to insists on orthodoxy. But no man whip the Canadians and take Toronto. Toronto was his soul any more then of the growth of a real city; it was no more than a real city was no more than a real city was no more than a real city was no a real city; it was no myth like Paris. He had, or of his body. Dr. John Hunter, the had had, cousins there in a plano factory, who for years past had sent him elegant maps and blue prints \$2500 for the body of Byrne or Hibbert Journal and author of "Mad of that charming town and its environs. He had heard O'Brien, the Irish giant, whose skelmuch of the Canadians, and when he got to the western front he was full of them, so to speak. So much to be seen in the museum of the so that he was eager to know what they looked like College of Surgeons. There are and he was so very injudicious as to stick his big foolish, fair face above the parapet, and a young gentleman who was raised on the upper end of Bathurst tively wicked and outside the course street shot him thru the head!

And Koonrot was a WAS! When he struggled to his feet he found himself of nothing but denunciation. standing before a vast city, the like of which he had never seen, or read or heard of before. It was surrounded by a great wall and its smoky roofs were piled in great heaps as far as the eye could reach. Great chimneys vomited smoke and flame and a tremendous din prevailed within, and as near as he could make out from what he heard they were trying to settle the fire brigade question. Overhead in the gloomy sky _oated innumerable aeroplanes and Zeppelins—at least that's what he thought they were until, to his utter dismay and terror, he realized that they were ing with ten plays in each. His little outside. They were flying reptiles—they were baleful dragons! One of them came flying from a vast remembered as it led to the purchase The changes are subtle, slow and distance, bearing something in its claws that Koonrot of the early home of Wordsworth spiritually alchemic. recognized as his beloved Kaiser. Gott mit uns! The reptile dropped him from a giddy height and der Kaiser went slop thru an asbestos roof with a sound that a cub reporter would describe as a "sickening and a storehouse for his relics. "It during the period of heaven rest.

At this moment the gates of the city swung open us to find nothing so fair as the day that call once more to the work of smile upon the face of duty; to so redeeming the world, stir the sould be smile upon the face of duty; to so and a party come out who looked like the devil. He had horns on him, a barbed tail and a cloven hoof. Koonrot cleared his throat.

"Sir, is this Toronto?" The party with the horns swelled visibly and plicity of life, in quiet duty done in this is Browning's faith. vibrated with wrath. He stooped forward and rubbed the palms of his hands in the dust. Then he grabbed a chunk of coal about the size of a stable world still prefers the weakness bucket and proceeded to do a winding up act that rather than the strength of life. And would have made Wild Bill Donovan green with envy. yet in these days of war we must An imp darted thru the gate and shrilled at Koon-

She C TOPFORD BROOKE IS PROBARLY known to most of us by his primer of English the love to reward the love." mystery of the incarnation or not as cessor to Dr. Collier's history of the it applies to each and all of us, he same subject, the Brooke's little was strong in the spiritual faith of book is perhaps the greater marvel a life beyond the things visible and of condensation. His first great adventure, however, was the life of temporal. In his comments on those who cannot understand the type of mind which dwells on the permanent, the enduring. spiritual rather than the fleeting and transitory. To this type the soul is more than the body, the mystic more than the material life. To the other type "all dreaming is repulsive, all drifting a disgrace, all doubt a folly, all imagination and its works, not business, but entertainment for the moment, and they have no time to consider the world to come should it occur to their mind." Hamlet is adjudged insane, and the most eager to prove it. says Brooke. "are the specialists in insanity who, believing themselves to be an unanswerable authority on what is madness and what is not, are the very blindest and most foolish of guides in this matter men, some of whom at least, if they had their way, would end by shutting up in asylums all the poets, artists, and prophets, all the men and women who do not care for money, who are pored by science, and who think that the real fools are those who care for the things of this world."

N INTERESTING POINT IN Stopford Brooke's life is the fact that his daughter Olive married in 1889, Lawrence Pearsall Hibbert Journal, and author of "Mad Shepherds," "All Men Are Ghosts," and other works. The last mentioned volume is dedicated "to Stopford Brooke, to whom I owe more than could be told were many pages employed in the recital." Mr. Jacks entered the ministry as assistant to his future father-in-law in Bedford Chapel in 1887, and it is not too much to say that his influence as editor of the Hibbert Journal has been one of the potent factors in contemporary thought. It is a true apostolic succession whatever the theologians and ecclesias-Brighton, Stopford Brooke, L. P. Art and elation to Modern Life," his Jacks.
