GAMBLERS GIVE POLICE AN EXCITING STRUGGLE.

Chicago Officers Determined to Prevent All Race Track Betting on Lake Michigan. -- Chased Sportsmen Ten Miles

laughed.

CHICAGO, Aug. 3.—Gamblers intent | it would have been impossible for any on playing the races and policemen determined to prevent all race track betting on Lake Michigan, today furnished an exciting struggle between law and sport. Policemen and gamblers raced round the lake, first into Michigan waters, then close to the was well in the mouth of the river the shores of Illinois and then into the jurisdiction of Indiana.

The net result of the day was the and no possible chance of a safe landcapture of fourteen weary marine ing on shore, the case of the gamblers gamblers, who floated ashore at South for a time looked desperate. The Eagle Chicago in a launch. All of the others circled around in the harbor, tooting after a hot chase by the police in a fire tug, escaped to Indiana harbor, Ind., and made their way ashore outside of the jurisdiction of the Chicago

Chief of Police Collins announced for the bridge to open. The bridge two days ago that he would no longer tender was compelled to swing the permit the operation of the floating bridge, and the Eagle, planting its bow poolroom, City of Traverse. He as- squarely in the stern of the mud scow, serted that he would arrest all men crowded it closely as it passed through who attempted to board the steamer, saying that they were about to com- open water. As the bridge opened, the mit an illegal act which brought them within police jurisdiction.

FREDERICTON, N. B., Aug. 3.-The man from the City of Traverse or the eport of examiners at university ma-Eagle to set foot on shore and escape riculation and high school leaving examinations, held July 4th, 6th, 1905, vas given out today as follows: ed into the river at South Chicago Dr. J. R. Inch, Chief Supt. of Educaloaded with 200 men who were anxious

tion: We beg leave to submit our report of the matriculation and leaving examinations for July, 1905.

One hundred and two candidates took the matriculation examination. Of these ten passed in the first division. thirty-six in the second, twenty-three in the third, and twenty-three in the the whistle for the bridge to turn and third conditionally, while ten failed. Four candidates took the leaving examination. Of these three the second division and one failed. The number of candidates taking the examination is the largest we have ever had, as well as number of those passing bridge, and the Eagle, planting its bow in the first division. We attach a list of the names of those who passed arranged in divisions, in order of merit.

Respectfully submitted, W. T. RAYMOND, SYDNEY, W. HUNTON, A. MELVILLE SCOTT, JOHN BRITTAIN.

SOUTHERN STATES ALMOST AT WAR.

Serious Trouble Grows Out of the Quarantine.

Armed Men and Ships From Mississippi Invade Louisiana to Enforce Quarantine-Yellow Fever Increasing.

ana and Mississippi over the invasion of Governor Vardaman's quarantine mosquito fleet and the armed guards East 23rd street at 9 o'clock Saturday stationed at Pearl river, was not improved by the statement given out by Governor Vardaman today in Jackson after his return from the coast, where he went to investigate the situation. Governor Blanchard has ordered Capt. Bostick, of the Naval Brigade, to impress the fleet of patrol boats of the oyster commission into service and arm them and patrol the waters now in possession of the Mississippi boats. One of these boats has already been despatched to the Rigolets, the neck of water connecting Lake Pontchartrain with Lake Borgne, and early tomorrow a launch armed with Colts rapid fire guns from the naval brigade armory and manned by officers and crew from the brigade will leave for

Both Captain Bostick and General the first reports of the invasion and potentiaries to Portsmouth.

court of the United States. It was found today that a man named Blunt, claiming to be in charge of the Mississippi patrol in those waters had stationed himself on the bridge, armed with two shotguns and forbade the bridge keeper from opening the draw to allow boats to pass out from Lake Ponchastrain into Lake Borgne. Many other complaints also have been received. There are eighteen boats now at Ship Island which were captured by the

lett, St. John grammar school; Greta I. Another complication has developed of timber, but the Mississippi boats absolutely refused to allow a tug to go to the mouth of the Pearl river to get the barge and rafts. The Brayhead had to leave without cargo and the agents and the owners will lay the matter before the British government.

SARDINE BUSINESS.

EASTPORT, Aug. 3.—There is a peculiar state of affairs in the sardine cannig business of this city, which looks rather amusing to many, but is much to be regretted. It is a well known fact that several hundreds of our Canadian cousins are every season employed in the sarding canning plants of Eastport, even if there is some kind of a United States law in regard to foreign contract labor, but several well known Eastport factory workmen, with a number of years' experience in the different branches of the work, were obliged to leave this week for sar-dine factory work offered on Canadian shores. It would seem that a resident of this city, who has property and is obliged to pay taxes, would have no difficulty in securing a position when it is considered that so many from over the oorder city some in and get to work in quick time and make money which is carried back to dominion soil Main Building of the Carritte Patter- later, but such is the fact.

GRAFTED ON SKIN, BUT GIRL IS DYING

The Spanish Prisoner Swindlers Now In Jail.

Story of the Capture of the Clever Gang From Whom Letters Were Received by Some St. John People.

fortune which was hidden by an officer manufacturer. who was then in prison. The place where this fortune was concealed would day the South express rumbled into

There were no St. John people taken in by this swindle, but those who received the letters, as well as many prison. The story of their capture has Morcatelli. en published and is as follows: The perpetrators of the famous 'Spanish prisoner' swindle are now actually in a Spanish prison.

Of the world wide operations of these eminent knaves and the wonderfully systematic way in which their 'trade' was conducted some idea was given in the brief announcements of their capture. But the story of how Louis Gonzales, Rafael Gabria and their confederates finally were lured into the clutches of the authorities has not yet been told.

The "Spanish prisoner" process never varied. It always began when the intended victim received a letter supposedly written by an officer languishing in a Spanish dungeon. Prior to his imprisonment the recip-

ient of the letter was informed, this officer had deposited a large sum of money in a secret place, the situation of which he was prepared to reveal on condition that the person addressed would oblige him with a comparative-

But although it had been known for years that the system which found victime in practically every civilized country on earth had its centre in Madrid, until recently all the efforts of the police here to locate the headquar ters of the phenomenally successful swindlers proved unavailing.

For some months previous to the final arrest of the gang, however, an unusual number of swindles committed against provincials or foreign subjects by the "Spanish prisoner" league had been reported to the municipal authorities of Madrid. Such denouncements came from various parts of the United States, different European countries, and even from South America The greater part of them, however, manated from Germany, which seemed to have become the chief operating

major of cavalry sentenced for a rob-

The "major" had written to Mathenberg and offered to reveal to him through an agency office of Madrid the hiding place of a treasure of 500,-000 pesetas, provided the German sent him 5,000 francs, which he needed urgently, through the same agency. This letter the consul general

promptly handed over to the governor of Madrid, who called in the expert police inspectors. Visedo and Puga and Detective Morcatelli, with whose aid he arranged a strategem for arresting the intending swindlers. Following out this plan, the German consul general wrote Herr Mathenberg the following letter :

Sir - The major, regarding whom you asked, does not exist, and the agency office to which you refer is an association of swindlers, against whom you ought to guard. The police auth-orities of Madrid have decided to arrest these criminals, and you must aid them in doing so; otherwise you will be considered an accomplice. therefore, must write to the agency mentioned, announcing that you accept its proposals and that you will come to "Why, yes, a few. When the last cy- Madrid on the South express of the clone came along I was out in the field 22nd instant to pay the 5,000 francs de-

tree and one of the other mewls was cordingly, I advise you to absent yourself from your residence during some That was a queer thing. And so you hours of the day on which you will be supposed to leave for Madrid. Finally, you will be kind enough to give me a personal description of yourself, exactly as you have given it to the pretended agency.

Soon afterward a reply was received from Mathenberg thanking the consul general and advising him that he had written to the agency in the manner requested. The German manufacture also gave a detailed description of his personality and promised to preserve absolute secrecy regarding the matter, as well as to absent himself from Strasburg on the date set for his supposed departure.

This letter the consul general handed over to the police authorities. It was

KIDNEY DISE

A short time ago parties in St. John | then arranged between Detectives eceived letters from Spain containing Visedo, Morcatelli and Puga that the information with regard to an alleged latter, who speaks excellent German, should impersonate the Strasburg

Accordingly, when on the appointe made known to the person receiv- the station at Madrid there emerged ing the letter upon certain conditions. an unmistakably Teutonic personage, One of these conditions was the pay- gray mustache, spectacled, and atment of a sum of money for the extired in a travelling cap and a baggy penses of a beautiful female who had suit whose every crease bespoke its origin in the fatherland. Senor Puga also had equipped himself with two portly and battered valises. It should others, will be interested in knowing fully disguised as railway porters, were waiting the police officers, Visedo and

> What was expected soon happened. When the supposed German manufacturer alighted from the sleeping car and pulled out a blue handkerchief a tall, black bearded and well-dressed individual approached him and inquired in German if he were Herr Max Mathenberg. The disgusted detective replied in the affirmative, and inquired in his turn whether the other was the representative of the commercial agency which had written to

The stranger nodded and begged leave to accompany Puga out of the station. So the two men left the place together, being followed at a short distance, however, by the supposed porters, who carried the valises of the traveler. In front of the station a splendid automobile was waiting in charge of a handsomely uniformed chauffeur, and in this vehicle the stranger invited the supposed Herr Mathenberg to take a seat, explaining that he would take him to the Hotel des Ambassadeurs, where the little transaction between them could be ar-

Puga's reply, however, was a clever one. "I beg your pardon," he said, "but I don't think that prudent. I am a little deaf, as you will have already remarked, so that you will have to speak loudly to me, consequently someone in the hotel might overhear us. I think, therefore, it would be better if demned and imprisoned. I went with you to your house, or to the offices of the agency. We shall then be much safer."

The stranger hesitated a little, but then responded: "You are right, we will go to the office of the agency." "Is it far?" asked the improvised Herr Mathenberg, in order that Inspector Visedo and Police Officer Morcatelli might note the address of the

Mathenberg, who wished to know if in we shall soon be there." Once more the prisons of Corunna there was a he begged the inspector to be seated in the automobile. The latter complied, but not without paying attention to the order given to the chauffeur, which, however, only consisted

of "To the agency, sharp!" The vehicle containing the two men went off at a rapid rate, while Visedo and Morcatelli followed in a coach, but without any hope of keeping up with the automobile, which, in fact, soon passed out of their sight, traversing the principal streets of Madrid and finally reaching the Calle de Cuchilleros, where it stopped before a house

"This is the agency," said the stranger to the supposed German, as he stepped out of the vehicle, closely ollowed by the other, and the two me went upstairs to the first floor of the house mentioned. On a door there was fixed a brass plate with the following inscription: "Gonzalez & Co. Agency, Representatives of Commercial and Inlustrial Houses."

The stranger and the inspector entered and passed through an antechamber, where a servant saluted them respectfully, and then traversed two cooms splendidly furnished with sofas,

desks, safes and other fixtures. Here were three girls occupied in copying, with the aid of typewriters, various letters, while four men were ousy with great account books. When the traveller and the stranger entered, all arose and saluted the latter with a respectful, "Good morning, Senor Di-

The "senor director" with a serious mien told them to sit down again, and then added softly in Spanish, "This is the German fish I have hooked!" Immediately afterward he introduced the supposed German into an elegan apartment, the door of which he has-tened to close. "This is my private office," he said to the inspector. "Pray be seated, sir. Here we can converse

together without any fear." So the officer begged the "senor director" to give him a detailed account of all the circumstances connected with the robbery committed by the commandant imprisoned at Corunna, who vas willing to put him in possession of 500,000 pesetas in exchange for 5,000 francs. The swindler related the old story, and added that he was instructed to reveal the place where the money lay concealed as soon as he had received the 5,000 francs, which the com-mandant needed for the education of his daughter.

"All right," said the supposed Ger man. "The business suits me, and I shall let you have the 5,000 francs. Before doing so, however, I must go to Sainz's banking house in order to cash ome checks which I have about me. "I myself can accept these checks," said the swindler hastily, to which Inspector Puga replied: "No, I prefer to present the checks personally, as they mount to much more than the 5,000 francs and I want to receive all the money in gold. Nevertheless, I should feel obliged if you would acco me to the bank, for I am not known there, and, besides, I do not know my way about Madrid."

Gonzalez consented and the two mer sallied forth again into the street, but just as they turned the corner the supWINNIPEG HAS CATHEDRAL BUILT OUT OF JUNK.

Parallel to Enoch Arden Story in Rea Life in Western Town.

Just off Winnipeg's main thoroughfare on King street there stands a ramshackle building which might be taken for a tramps' refuge. Instead, it is dignified by the name of a cathedral and it was built by an archbishop unaided, after his own designs and with his own hands.

This archbishop, Serafim by name, shepherd of 30,000 souls in western Canada, it is said, was at one time a priest of the Russian church. For some reason he was excommunicated. Then he joined the Greek Orthodox independent church, of which he ultimately became archbishop

It was while he was in Jerusalem that he was sent for by certain of his faith in Canada, and he came, expecting to find and lead a united church. He has had his own troubles since with some of his priests, but if strenuousness counts for anything, the archbishop should go far. Last winter he blessed the water of

the Red river with much pomp and circumstance, and incidentally was nearly drowned in so doing. Archbishop Serafim's chef d'oeuvre, however, is his cathedral. Out of old

tin and iron and flotsam of wood he built it, only to have it torn down by mischievous boys. Nothing daunted, he started again, paying for necessaries with his own money, painfully, with toil-worn fingers, working away a knowledge of several languages was at his fearful and wonderful construction, indeed ,a "labor of love." The building will accommodate about

200 auditors. It is oblong in shape, and, viewed from a distance, suggests an exhibition midway. The material of which it is fastened together is largely made up of scrap iron; the sides and ends are of timber and the ed up only heaven and the arch. bishop know where, is given a place over the front door.

When it rains the worshippers shift about uneasily as the drops trickle down their necks; when it is zero weather they almost freeze, but nevertheless they turn out in great force. It will be noticed that there is some attempt at ornamentation on the exterior of the church. This consists of broken machinery, cogs, garden tools, etc. The interior is no less remarkable for quaintness, tallow candles and chromos and castaway picture frames

being the chief furnishings .- New York

OLD TOMBSTONES OF FORT GARRY

WINNIPEG, Man., Aug. 1.-Among the flotsam and jetsam that has come to light through the railway improvements in progress on Fort Garry Park, Main street south, are three stones that have evidently lain there for over 30 years. The fact that they were made to be erected over the graves of people prominent in Western Canada about the time that the country came under the government of the dominion parliament, lends an interest to the find. One of the stones was cut at St. Paul, but the other two are Scotch granite and were probably imported from Eastern Canada or the old Country in the days when the transportation of goods to Fort Garry was done by flat boats.

The stones were evidently delivered at the Hudson's Bay Company's old warehouse on the bank of the Assinboine, and lay on the prairie ever since, and they were for the graves of Mrs. (Rev.) John McDougall, Donald Macdonald and Mrs. Lawrence Clark.

finished presenting his argument, and as he mopped his brow and sat down the judge stared at him admiringly with wide eyes and open mouth. Then he turned to the other lawyer, who had risen to his feet.

"Defendant needn't plead. Plaintiff wins," he shouted.

"But, your honor," protested the lawyer, "let me at least present my case."

The judge looked weary. "Well, go ahead," he grunted.

So the lawyer for the defendant went ahead. When he had finished the judge looked at him, too, with wide eyes and open mouth.

"Don't it beat the Dutch," he excitaimed. "Defendant wins," — New York Post.

cried to the officer, "Arrest this man and bind him. I am Inspector Puga."
With alacrity the constable obeyed the order, and he and the inspector, his false moustache and his spectacles hurried to the nearest police statio with the unlucky "senor director," who seemed to be struck dumb with sur prise and did not offer the least resist

Puga's next move was to find In-Morcatelli; and with them and 12 constables he proceeded immediately the members of the criminal associa tion were still at work, that is, Rafael Gabria, Pablo Graniete and his sister Enriqueta, Augustin Zamornno, Pedro Herrero and his wife Maria, and Maria Roja.

They were arrested before they could make any attempt at escape. Maria Roja threw a bundle of documents through a window, but this was picked up at once by a constable keeping watch outside the house

The strangest and most interesting of all the prisoners is unquestionably Rafael Gabria. He belongs to wealthy and distinguished family of Barcelona, and received an excellent education, having taken a degree in the university of Madrid. At 25, however, he robbed his parents of a large sum of money and left them in orde to go to Paris with a young and beautiful girl who was related to him. Eventually he abandoned her, ans began to travel, visiting all the principal capitals of the world and wasting what remained of the stolen money so that at last he found himself re

duced to thievery and swindling, for which he was at various times con-Finally he returned to Madrid, but as his father had ,in the meantime died and disinherited him, joined the "Spanish prisoner" league, and having intrusted with the foreign correspond-

ence of the society. According to the books which had been seized in their offices, it appears that from the 1st of January, 1904, un-til the end of last April the Cuchilcountry of the skilful defrauders,

"They have come!" she whispered.
"Yes," was the cheery answer, for Jenks face to face with danger was a very different man from Jenks wrestling with the insidious attacks of Cupid. "Up the ladder! Be lively! They will not be here for half an hour if they kick up such a row at the first difficulty. Still, we will take no risks. Cast down those spare lines when you reach the top and haul away when I say 'Ready!' You will find everything to hand up there."

He held the bottom of the ladder to steady it for the girl's climb. Soon her voice fell, like a message from a star: "All right! Please join me soon!"

The coiled up ropes dropped along the face of the rock. Clothes, pick, hatchet, hammer, crowbars and other useful odds and ends were swung away into the darkness, for the moon as yet did not illumine the crag. The sailor darted into Belle Vue castle and kicked their leafy beds about the floor. Then he slung all the rifles, now five in number, over his shoulders and mounted the rope ladder, which, with the spare cords, he drew up and coiled with careful method.

CHAPTER XI.

HE sailor knew so accurately the position of his reliable sentinels that he could follow each phase of the imaginary conflict on the other side of the island. The first outbreak of desultory firing died away amidst a chorus of protest from every feathered inhabitant of the isle, so Jenks assumed that the Dyaks had gathered again on the beach after riddling the scarecrows with bullets or slashing them with their heavy razor edged swords.

A hasty council was probably held, and, notwithstanding their fear of the silent company in the hollow, an advance was ultimately made along the beach. Within a few yards they encountered the invisible cord of the third spring gun. There was a report and another fierce outbreak of musketry. This was enough. Not a man would move a step nearer that abode of the dead. The next commotion arose on the ridge near the North cape. "At this rate of progress," said Jenks to the girl, "they will not reach our house until daylight."

"I almost wish they were here," was the quiet reply. "I find this waiting and listening to be trying to the nerves."

They were lying on a number of ragged garments hastily spread on the ledge and peering intently into the moonlit area of Prospect park. The great rock itself was shrouded in somber shadows. Even if the stood up none could see them from the ground, so dense was the darkness enveloping them.

He turned slightly and took her hand. It was cool and moist. It no more trembled than his own.

"The Dyaks are far more second the

"The Dyaks are far more scared than you," he murmured, with a laugh. "Cruel and courageous as they are, they dare not face a spook."

"Then what a pity it is we cannot conjure up a ghost for their benefit, All the spirits I have ever read about were ridiculous. Why cannot one be useful occasionally?"

The question set him thinking. Unknown to the girl the materials for a dramatic apparition were hidden amid the bushes near the well. He cudgeled his brains to remember the stage effects of juvenile days, but these needed limelight, blue flares, mirrors, phosphorus.

The absurdity of hoping to devise any such accessories while perched on a ledge in a remote island, a larger reef of the thousands in the China sea, tickled him.

"What is it?" asked Iris.

He repeated his list of missing stage properties. They had nothing to do but to wait, and people in the very crux and maelstrem of existence usually discuss trivial things.

"I don't know anything about phosphorus," said the girl, "but you can obtain queer results from sulphur, and there is an old box of Norwegian matches resting at this moment on the shelf in my room. Don't you remember? They were in your pocket, and you were going to throw them away. Why, what are you doing?"

For Jenks had cast the rope ladder loose and was evidently about to descend.

"Have no fear," he said. "I will not be away five minutes."

"If you are going down I must come
with you are going down I must come

with you. I will not be left here alone."

"Please do not stop me," he whispered earnestly. "You must not come. I will take no risk whatever. If you

pered earnestly. "You must not come. I will take no risk whatever. If you remain here you can warn me instantly. With both of us on the ground we will incur real danger. I want you to keep a sharp lookout toward Turtle beach in case the Dyaks come that way. Those who are crossing the island will not reach us for a long time." She yielded, though unwillingly. She was tremulous with anxiety on his account.

He vanished without another word. She next saw him in the moonlight near the well. He was rustling among the shrubs, and he returned to the rock with something white in his arms, which he seemingly deposited at the mouth of the cave. He went back to the well and carried another similar burden. Then he ran toward the house. The doorway was not visible from the ledge, and she passed a few horrible moments until a low him be-

neath caught ner ear. She could tell by the creak of the rope ladder that he was ascending. At last he reached her side, and she murmured, with a gasp-

"Don't go away again. I cannot

He thought it best to soothe her agitation by arousing interest. Still hauling in the ladder with one hand, he held out the other, on which luminous wisps were writhing like glowworms' ghosts.

"You are responsible," he said. "You gave me an excellent idea, and I was ebliged to carry it out."

"What have you done?"

"Arranged a fearsome bogy in the

"Arranged a fearsome bogy in the cave."

"But how?"

"It was not exactly a pleasant oper-

ation, but the only laws of necessity are those which must be broken."

She understood that he did not wish her to question him further. Perhaps curiosity, now that he was safe, might have vanquished her terror and led to another demand for enlightenment, but at that instant the sound of an angry voice and the crunching of coral away

to the left drove all else from her mind. "They are coming by way of the beach, after all," whispered Jenks.

He was mistaken in a sense. Another outburst of intermittent firing among the trees on the north side of the ridge showed that some at least of the Dyaks were advancing by their former route. The appearance of the Dyak chief on the flat belt of shingle, with his right arm slung across his breast, accompanied by not more than half a dozen followers, showed that a few hardy spirits had dared to pass the valley of death, with all its nameless terrors.

They advanced cautiously enough, as though dreading a surprise. The chief carried a bright parang in his left

They advanced cautiously.

hand; the others were armed with guns, their swords being thrust through belts. Creeping forward on tiptoe, though their distant companions were making a tremendous row, they looked a murderous gang as they peered across the open space, now brilliantly illuminated by the moon.

Jenks had a sudden intuition that the right thing to do now was to shoot the whole party. He dismissed the thought at once. All his preparations were governed by the hope that the pirates might abandon their quest after hours of fruitless search. It would be most unwise, he told himself, to precipitate hostilities. Far better avoid a conflict altogether, if that were possible, than risk the immediate discovery of his inaccessible retreat.

In other words, he made a grave mistake, which shows how a man may err when overagonized by the danger of the woman he loves. The bold course was the right one. By killing the Dyak leader he would have deprived the enemy of the dominating influence in this campaign of revenge. When the main body, already much perturbed by the unseen and intangible agencies which opened fire at them in the wood, arrived in Prospect park to find only the dead bodies of their chief and his small force, their censternation could be turned into mad panic by a vigorous bombardment from the rock.

bardment from the rock.

Probably in less than an hour after their landing the whole tribe would have rushed pellmell to the boats, cursing the folly which led them to this devil haunted island. But it serves no good purpose to say what might have been. As it was, the Dyaks, silent now and moving with the utmost caution, passed the well and were about to appreach the cave when one of them saw

the house.

Instantly they changed their tactics. Retreating hastily to the shade of the opposite cliff, they seemed to await the coming of re-enforcements. The sailor fancied that a messenger was dispatched by way of the north sands to hurry up the laggards, because the distant firing slackened, and five minutes later a fierce outbreak of yells among the trees to the right heralded a combined rush on the Belle Vue castle.

The noise made by the savages was so great, the screams of bewildered

birds circling overhead so incessant,

that Jenks was compelled to speak

quite loudly when he said to Iris:

They must tunne we sleep soundry not to be disturbed by the volleys they have fired already."

She would have answered, but he placed a restraining hand on her shoulder, for the Dyaka, quickly discovering that the hut was empty, ran toward the cave and thus came in full view.

As well as Jenks could judge the foremost trio of the yelping horde were

impaled on the bayonets of the cheval de frise, learning too late its formidable nature. The wounded men shrieked in agony, but their cries were drowned in a torrent of amazed shouts from their companious. there was a stampede toward the well. the cliff, the beaches, anywhere to get away from that awesome cavern where ghosts dwelt and men fell maimed at the very threshold. The sailor, leaning as far over the edge of the rock as the girl's expostulations would permit, heard a couple of men groaning beneath, while a third limped away with frantic and painful haste. "What is it?" whispered Iris, eager

herself to witness the tumult. "What has happened?"

"They have been routed by a box of matches and a few dried bones," he

answered. There was no time for further speech. He was absorbed in estimating the probable number of the Dyaks. Thus far he had seen about fifty. Moreover, he did not wish to acquaint Iris with the actual details of the artifice that had been so potent. Her allusion to the box of water sodden matches had given him the notion of utilizing as an active ally the bleached remains of the poor fellow who had long ago fallen a victim to this identical mob of cutthroats or their associates. He had gathered the principal bones from their resting place near the well, rubbed them with the ends of the matches after damping the sulphur again and arranged them with ghastly effect on the pile of rubbish at the farther end of the cave, creeping under the cheval de frise for the purpose.

Though not so vivid as he wished, the pale glimmering headless skeleton in the intense darkness of the interior was appalling enough in all conscience. Fortunately the fumes of the sulphur fed on the bony substance. They endured a sufficient time to scare every Dyak who caught a glimpse of the monstrous object crouching in luminous horror within the dismal cavern.

Not even the stirring exhortations of the chief, whose voice was raised in furious speech, could induce his adherents to again approach that affrighting spot. At last the daring scoundrel himself, still wielding his naked sword, strode right up to the very doorway. Stricken with sudden stupor, he gazed at the fitful gleams within. He prodded the cheval de frise with the parang. Here was something definite and solid. Then he dragged one of the wounded men out into the moonlight.

Again Jenks experienced an itching desire to send a bullet through the Dyak's head. Again he resisted the impulse. And so passed that which is vouchsafed by fate to few men—a second opportunity.

Another vehement harangue by the chief goaded some venturesome spirits into carrying their wounded comrade out of sight, presumably to the hut. Inspired by their leader's fearless example, they even removed the third injured Dyak from the vicinity of the cave, but the celerity of their retreat caused the wretch to bawl in agony.

The next undertaking was no scoper

The next undertaking was no sooner appreciated by the sailor than he hurriedly caused Iris to shelter herself beneath the tarpaulin, while he cowered glose to the floor of the ledge, looking only through the screen of tall grasses. They kindled a fire near the well. Soon its ruddy glare lit up the dark rock with fantastic flickerings and drew scintillations from the weapons and ornaments of the hideously picturesque horde gathered in its vicinity.

They spoke a language of hard vowels and nasal resonance and ate what he judged to be dry fish, millets and strips of tough preserved meat, which they cooked on small iron skewers stuck among the glowing embers. His heart sank as he counted sixty-one, all told, assembled within forty yards of the ledge. Probably several others were guarding the boats or prowling about the island. Indeed, events proved that more than eighty men had come ashore in three large sampans, roomy and fleet craft, well fitted for piratical excursions up river estuaries or along a coast.

piratical excursions up river estuaries or along a coast.

They were mostly barelegged rascals, wearing Malay hats, loose jackets reaching to the knee and sandals. One man differed essentially from the others. He was habited in the conventional attire of an Indian Mohammedan, and his skin was brown, while the swarthy Dyaks were yellow beneath the dirt. Jenks thought from the manner in which his turban was tied that he must be a Punjabi Mussulman—very likely an escaped convict from the Andamans.

The most careful scrutiny did not reveal any arms of precision. They all carried muzzle loaders, either antiquated fintlocks or guns sufficiently modern to be fitted with nipples for percussion caps.

Each Dyak, of course, sported a parang and dagger-like creese; a few bore spears, and about a dozen shouldered a long straight piece of bamboo. The nature of this implement the sailor could not determine at the moment. In the neighborhood of the fire an animated discussion took place. Though it was easy to see that the chief was all paramount, his fellow tribesmen ex-

ercised a democratic right of free speech and outspoken opinion.

Flashing eyes and expressive hands were turned toward the cave and hut. Once when the debate grew warm the chief snatched up a burning branch and held it over the blackened embers of the fire extinguished by Jenks. He seemed to draw some definite conclusion from an examination of the char-

ceeded with less emphasis. Whatever it was that he said evidently carried conviction.

Iris, nestling close to the sailor, whispered:
"Do you know what he has found

out?"
"I can only guess that he can tell by
the sppearance of the burned wood
how long it is since it was extinguished. Clearly they agree with him."

"Then they know we are still here?"
"Either here or gone within a few tours. In any case they will make a thorough search of the island at day-break."

"Will it be dawn soon?"
"Yes. Are you tired?"
"A little cramped—that is all."
"Don't think I am foolish. Can you manage to sleep?"

"Sleep! With those men so near!"
"Yes. We do not know how long they will remain. We must keep up our strength. Sleep, next to food and frink, is a prime necessity."

"If it will please you I will try," she said, with such sweet readiness to obey his slightest wish that the wonder is he did not kiss her then and there. By previous instruction she knew exactly what to do. She crept quietly back until well ensconced in the niche widened and hollowed for her accommodation. There so secluded was she from the outer world of horror and peril that the coarse voices eneath only reached her in a murmur. Pulling one end of the tarpaulin over her, she stretched her weary limbs on a litter of twigs and leaves, commended herself and the man she loved to God's keeping and, wonderful though it may seem, was soon slumbering peacefully.

The statement may sound passing strange to civilized ears, accustomed only to the routine of daily life and not inured to danger and wild surroundings. But the soldier who has snatched a hasty doze in the trenches, the sailor who has heard a fierce gale buffeting the walls of his frail ark, can appreciate the reason why Iris, weary and surfeited with excitement, would have slept were she certain that the next sunrise would mark her last hour on earth.

Jenks, too, composed himself for a brief rest. He felt assured that there was not the remotest chance of their lofty perch being found out before daybreak, and the first faint streaks of dawn would awaken him.

When the morning breeze swept over the ocean and the stars were beginning to pale before the pink glory flung broadcast through the sky by the yet invisible sun, the sailor was aroused by the quiet fluttering of a bird about to settle on the rock, but startled by the sight of him.

His faculties were at once on the

His faculties were at once on the alert, though he little realized the danger betokened by the bird's rapid dart into the void. Turning first to peer at Iris, he satisfied himself that she was still asleep. Her lips were slightly parted in a smile. She might be dreaming of summer and England. He noiselessly wormed his way to the verge of the rock and looked down through the grass roots.

The Dyaks were already stirring. Some were replenishing the fire, others were drawing water, cooking, eating, smoking long thin stemmed pipes with absurdly small bowls or oiling their limbs and weapons with impartial energy. The chief yet lay stretched on the sand, but when the first beams of the sun gilded the waters a man stooped over the prostrate form and said something that caused the sleeper to rise stiffly, supporting himself on his uninjured arm. They at once went off together toward Europa point.

"They have found the boat," thought
Jenks. "Well, they are welcome to all
the information it affords."

The chief gave some order, at which

The chief gave some order, at which they all hung back sheepishly. Cursing them in choice Malay, the chief selzed a thick faggot and strode in the direction of the cave. Goaded into activity by his truculent demeanor, some followed him, and Jenks, unable to see, but listening anxiously, knew that they were tearing the cheval de frise from its supports. Nevertheless none of the working party entered the excavation. They feared the parched bones that shone by night.

As he had not been able to complete

the communicating shaft it was not

The monstrous object crouching in luminous larror.

now of vital importance should the Dyaks penetrate to the interior. Yet he thanked the good luck that had showered such a heap of rubbish over the spot containing his chief stores and covering the vein of gold. Wild as these fellows were, they well knew the value of the precious metal, and if by chance they lighted upon such a well defined lode they might not quit the island for weeks.

At last on a command from the chief the Dyaks scattered in various directions. Some turned toward Europa point, but the majority went to the east along Turtle beach or by way of the lagoon. Prospect park was desert. ed. They were scouring both sections of the island in full force.

The quiet watcher on the learn to be a section.

The quiet watcher on the ledge took no needless risks. Though it was impossible to believe any stratagem had been planned for his special benefit, an accident might betray him. With the utmost circumspection he rose on all fours and, with comprehensive glance, examined trees, plateau and both strips of beach for signs of a lurking foe. He need have no fear. Of all places in the island the Dyaks least imagined that their quarry had lain all night within earshot of their encampment.

Jenks slid back down the ledge and gently wakened Iris. She sat up instantly and gazed at him with wondering eyes.

Fearful lest she should forget her surroundings, he placed a warning finger on his lips.

"Oh," she said in a whisper, "are

they still here?"

He told her what had happened and suggested that they should have something to eat while the coast was clear beneath. She needed no second bidding, for the long vigil of the previous night had made her very hungry, and the two breakfasted right royally on biscuit, cold fowl, ham and good water. In this, the inner section of their refuge, they could be seen only by a bird or by a man standing on the distant rocky shelf that formed the southern extremity of the opposite cliff, and the sailor kept a close lookout in that direction.

Iris was about to throw the remains of the feast into an empty oil tin provided for refuse when Jenks restrained her.

"No," he said smilingly. "Scraps should be the first course next time. We must not waste an atom of food." "How thoughtless of me!" she exclaimed. "Please tell me you think

they will go away today."

But the sailor flung himself flat on the ledge and grasped a rifle.

"Be still, on your life!" he said.
"Squeeze into your corner. There is a

Dyak on the opposite cliff."

True enough, a man had climbed to that unhappily placed rocky table and was shouting something to a confrere high on the cliff over their heads. As yet he had not seen them nor even noticed the place where they were concealed. The sailor imagined from the Dyak's gestures that he was communicating the uselessness of further search on the western part of the island.

When the conversation ceased he hoped the loud voiced savage would descend. But no! The scout looked into the valley, at the well, the house, the cave. Still he did not see the ledge. At that unlucky moment three birds, driven from the trees on the crest by the passage of the Dyaks, flew down the face of the cliff and began a circling quest for some safe perch on which to alight.

Jenks swore with an emphasis not the less earnest because it was mute and took steady aim at the Dyak's left breast. The birds fluttered about in ever smaller circles. Then one of them dropped easily on to the lip of the rock. Instantly his bright eyes encountered those of the man, and he darted off with a scream that brought his mates after him.

mates after him.

The Dyak evidently noted the behavior of the birds—his only lore was the reading of such signs—and gazed intently at the ledge. Jenks he could not distinguish behind the screen of grass. He might perhaps see some portion of the tarpaulin covering the stores, but at the distance it must resemble a weather beaten segment of the cliff. Yet something puzzled him. After a steady scrutiny he turned and yelled to others on the beach.

The crucial moment had arrived. Jenks pressed the trigger, and the Dyak hurtled through the air, falling headlong out of sight.

The sound of this, the first shot of real warfare, awoke Rainbow island into tremendous activity. The winged life of the place filled the air with raucous cries, while shouting Dyaks scurried in all directions. Several came into the valley. Those nearest the fallen man picked him up and carried him to the well. He was quite dead, and, although amid his other injuries they soon found the bullet wound, they evidently did not know whence the shot came, for those to whom he shouted had no inkling of his motive, and the slight haze from the rifle was instantly swept away by the breeze.

swept away by the preeze.

Iris could hear the turmoil beneath, and she tremulously asked:

"Are they going to attack us?"
"Not yet," was the reassuring answer. "I killed the fellow who saw us before he could tell the others."

It was a bold risk, and he had taken it, though now the Dyaks knew for certain their prey had not escaped there was no prospect of their speedy departure. Nevertheless the position was not utterly hopeless. None of the enemy could tell how or by whom their companion had been shot. Many among the excited horde jabbering beneath actually looked at the cliff over and over again, yet failed to note the potentialities of the ledge, with its few tufts of grass growing where seeds had apparently been blown by the wind or dropped by passing birds.

Jenks understood, of course, that the

Jenks understood, of course, that the real danger would arise when they visited the scene of their comrade's disaster. Even then the wavering balance of chance might cast the issue in his favor. He could only wait, with ready rifle, with the light of battle lowering in his eyes. Of one thing at least he was certain—before they conquered him he would levy a terrible

He glanced back at Iris. Her face was paie beneath its mask of sun brown.

The chief was listening intently to the story of the Dyak who saw the dead man totter and fall. He gave some quick order. Followed by a score

or more of his men, he walked rapidly to the foot of the cliff where they found the lifeless body.

Jenks stole one more hasty glance at Iris. The chief and the greater number of his followers were out of sight behind the rocks. Some of them must now be climbing to that fatal ledge. Was this the end?

Iris bent forward sufficiently in her sheltering niche to permit her to gaze with wistful tenderness upon Jenks. She knew he would dare all for her sake. She could only pray and hope. Suddenly a clamor of discordant yells fell upon her ears. Jenks rose to his knees. The Dyaks had discovered their refuge and were about to open fire. He offered them a target lest perchance

Iris were not thoroughly screened.

"Keep close," he said. "They have found us. Lead will be flying around soon."

She flinched back into the crevice; the sailor fell prone. Four bullets spat into the ledge, of which three pierced the tarpaulin and one flattened itself against the rock.

Then Jenks took up the tale. So curlously constituted was this man that,

The Duak hurtled through the air. although he ruthlessly shot the savage who first spied out their retreat, he was swayed only by the dictates of stern necessity. There was a feeble chance that further bloodshed might be averted. That chance had passed. Very well. The enemy must start the dreadful game about to be played. They had thrown the gage, and he answered them. Four times did Jenks' rifle carry death, unseen, almost unfelt, across the valley.

Ere the fourth Dyak collapsed limply where he stood others were there, firing at the little puff of smoke above the grass. They got in a few shots, most of which sprayed at various angles off the face of the cliff. But they waited for no more. When the lever of the Lee-Metford was shoved home for the fifth time the opposing crest was bare of all opponents save two. and they lay motionless.

two, and ther lay motionless.

The fate of the fanking detachment was either unperceived or unheeded by the Dyaks left in the vicinity of the house and well. Astounded by the firing that burst forth in midair, Jenks had cleared the dangerous rock before they realized that here, above their heads, were the white man and the mail whom they sought.

With stupid zeal they blazed away furiously, only succeeding in showering fragments of splintered stone into the eagle's nest. And the sailor smiled. He quietly picked up an old coat, rolled it into a ball and pushed it into sight amidst the grass. Then he squirmed round on his stomach and took up a position ten feet away. Of course those who still carried loaded guns discharged them at the bundle of rags, where upon Jenks thrust his rifle beyond the edge of the rock and leaned over.

Three Dyaks fell before the remainder made up their minds to run. Once convizced, however, that running was good for their health, they moved with much celerity. The remaining cartridges in the magazine slackened the pace of two of their number. Jenks dropped the empty weapon and seized another. He stood up now and sent a quick reminder after the rearmost pirate. The others had disappeared toward the locality where their leader and his diminished troop were gathered, not daring te again come within range of the whis-tling dumdums. The sailor, holding his rifle as though pheasant shooting, bent forward and sought a belated opponent, but in vain. There was no sound save the wailing of birds, the soft sough of the sea and the yelling of the three wounded men in the house, who knew not what terrors threatened and

vainly bawled for succor.

Again Jenks could look at Iris. Her face was bleeding. The sight maddened him.

"My God!" he groaned. "Are you

"My God!" he groaned. "Are you wounded?"
She smiled bravely at him.
"It is nothing," she said—"a mere

splash from the rock which cut my forehead."

He dared not go to her. He could only hope that it was no worse, so he turned to examine the valley once more for vestige of a living foc.

HOUGH his eyes, like live coals, glowered with sullen fire at the strip of sand and the rocks in front, his troubled brain paid perfunctory heed to his task. The stern sense of duty, the ingrained force

CHAPTER XII.

of long years of military discipline and soldierly thought, compelled him to keep watch and ward over his fortress, but he could not help asking himself what would happen if Iris were seriously wounded.

There was one enemy more potent than these skulking Dyaks a foe more irresistible in his might, more pittless in his strength, whose assaults would tax to the utmost their powers of resistance. In another hear the sun would be high in the heavens, pouring his ardent rays upon them and drying the blood in their veins.

Hitherto the active life of the island, the shade of trees, hut or cave, the power of unrestricted movement and the possession of water in any desired quantity robbed the tropical heat of the day of its chief terrors. Now all was changed. Instead of working amid grateful foliage they were bound to the brown rock, which soon would glow with radiated energy and give off scorching gusts like unto the opening of a furnace door.

ing of a furnace door.

This he had foreseen all along. The tarpaulin would yield them some degree of uneasy protection, and they both were in perfect physical condition. But—if Iris were wounded! If the extra strain brought fever in its wake! That way he saw nothing but blank despair, to be ended for her by delirium and merciful death, for him by a Berserk rush among the Dyaka and one last mad fight against overwhelming numbers.

Then the girl's voice reached him self reliant, almost cheerful:

"You will be glad to hear that the cut has stopped bleeding. It is only a scratch."

a scratch."
So a kindly Providence had spared them yet a little while. The cloud passed from his mind, the gathering mist from his eyes. In that instant he thought he detected a slight rustling among the trees where the cliff shelved up from the house. Standing as he was on the edge of the rock, this was a point he could not guard against.

point he could not guard against.

When her welcome assurance recalled his scattered senses he stepped back to speak to her, and in the same instant a couple of bullets crashed against the rock overhead. Iris had unwittingly saved him from a serious perhaps fatal, wound.

unwittingly saved him from a serious perhaps fatal, wound.

He sprang to the extreme right of the ledge and boldly looked into the trees beneath. Two Dyaks were there belated wanderers cut off from the main body. They dived headlong into the undergrowth for safety, but one of them was too late. Jenks' rifle reached him, and its reverberating concussion, tossed back and forth by the echoing rocks, drowned his parting scream.

In the plenitude of restored vigor the sailor waited for no counter demonstration. He turned and crouchingly, approached the southern end of his parapet. Through his screen of grass he could discern the long black hair and yellow face of a man who lay on the sand and twisted his head around the base of the farther cliff. The distance, oft measured, was ninety yards, the target practically a six inch bullseys. Jenks took careful aim, fired, and

a whift of sand flew up.

Perhaps he had used too fine a sight and plowed a furrow beneath the Dyak's ear. He only heard a faint yell, but the enterprising head vanished, and there were no more volunteers for that particular service.

He was still peering at the place when a cry of unmitigated anguish came from Iris: "Oh, come quick! Our water! The

reashs have burst!"

It was not until Jenks had torn the tarpaulin from off their stores and he was wildly striving with both hands to scoop up some precious drops collected in the small hollows of the ledge that he realized the full magnitude of the

disaster which had befallen them. During the first rapid exchange of fire before the enemy vacated the clift several bullets had pierced the tarpaulin. By a stroke of exceeding bad fortune two of them had struck each of the water barrels and started the staves. The contents quietly ebbed away beneath the broad sheet and. flowing inward by reason of the sharp slope of the ledge, percolated through the fault. Iris and he, notwithstanding their frenzied efforts, were not able to save more than a pint of gritty discolored fluid. The rest, infinitely more valuable to them than all the diamonds of De Beers, was now oozing through the natural channel cut by centuries of storm, dripping upon the headless skeleton in the cave, soaking down to the

yery heart of their buried treasure.

Jenks was so paralyzed by this catastrophe that Iris became alarmed.

As yet she did not grasp its awful significance. That he, her hero, so brave, so confident in the face of many dangers, should betray such sense of irredeemable loss frightened her much more than the incident itself.

Her lips whitened. Her words be-

"Tell me," she whispered. "I can

came incoherent.

bear anything but silence. Tell me, I implore you. Is it so bad?"

The sight of her distress sobered him. He ground his teeth together as a man does who submits to a painful operation and resolves not to flinch be-

neath the knife.

"It is very bad," he said; "not quite the end, but near it."

"The end," she bravely answered, "is death! We are living and uninjured.

You must fight on. If the Lord wills it we shall not die."

He looked in her blue eyes and saw there the light of heaven. Her glance did not droop before his. In such moments heart speaks to heart without

concealment.

"We still have a little water," she cried. "Fortunately we are not thirsty. You have not forgotten our supply of champagne and brandy?"

He could only fall in with her upreflective mood and leave the dreadful with the its own cell time. In their fittle nock the power of the sun had not yet made itself felt. By ordinary computation it was about 9 o'clock. Long before noon they would be grilling. Throughout the next few hours they must suffer the torture of Dives with one meager pint of water to share between them. Of course the wine and spirit must be shunned like a pestilence. To touch either under such conditions would be courting heat, apoplexy and death. And next day!

He tightened his jaws before he anserted

swered:

"We will console ourselves with a betfle of champagne for dinner. Meanwhile I hear our friends shouting to
those left on this side of the island. I
must take an active interest in the
conversation."

ation."

ST. JOHN, N. B., AUGUST 5, 1905

THE ST. JOHN BY-ELECTION.

It is understood that a vacancy will be made this week in the provincial representation of St. John city, by the appointment of Mr. George Robertson to the position of registrar of probate According to our best information the government proposes to issue the election writs at once. It is said that the attorney general has already invited Mr. A. O. Skinner to be the candidate of the Tweedie government.

We may expect that Dr. Pugsley will once more disguise himself as a nominee as a liberal candidate. Some the St. John liberals that it is their duty to keep the Tweedie administration in power, or to sanction its conduct. The Central Railway deals alone condemn the administration in the judgment and conscience of all serious electors of both parties. Liberals no less than conservatives are disgusted with these imprudent and corrupt contracts and concessions. St. Their duty to their party is all the in the transactions and have not profited by them. It is their duty to protect their party so far as they can from responsibility for the Tweedie- It deducts over \$5,000,000 for deprecia-Pugsley administration and its works. If they fall in behind the Tweedie selves in offenses from which they are

Neither Mr. Tweedle nor Dr. Pugs ley was connected with the liberal party while the conservatives were in power at Ottawa. So long as the liberals were in opposition at Ottawa and needed their personal and official support, the party did not get it. The local leaders are trying to use the liberal party now because they think that it can help them out, but when again the party has most need of their help, We should then suppose that in this perior ore in 1904 were one-fifth greater by-election the liberals of St. John than those of all other companies and would claim the right to support or individuals, though it may be worth oppose the government according as noting that in 1902 they were one-half they approve or disapprove its course. greater than the aggregate of all several years. There seems to be no poration produced 38 per cent, of the party interest calling for liberal en- total ore output of the United States, ministers who are misgoverning the cent. in 1902. In order to prevent the unopposed ment, Attorney General Pugsley will rescue. He and the premier know well formed go to show that the independent that on the merits of their administra-

accept a nomination. Mr. Tweedie has larger organization.

date whom he got into the field last year took the first opportunity after the polls closed to say that he had in all his canvass refused to declare himself a supporter of the local govern ment. Mr. Skinner not only took this position, but he boasted of it afterwards. The candidate knew very well that he would kill any chances he had of election by admitting a connection with the provincial government machine. But whether the connection is admitted or not, it will exist in the case of any candidate who enters the field with the approval of the attorney general and his colleagues. Under vhatever names the candidates may appear in the coming election there will be one issue and one line of diviion. The single question is whether the electors of St. John desire to en dorse and strengthen the Tweedie ad-

THE NEW DAY IN THE YUKON.

Mr. W. B. McInnes, the new chief ommissioner of the Yukon, has begun his career by making a rather remarkable address, in which he declares that the reign of graft in that country is over. The incoming governor does not spare his predecessors, and is especialy severe on the regime under which the attempt was made to manipulate the electoral lists in the interest of the corrupt liberal machine. This remarkable inaugural must have been full of interest to Mr. Congdon, now chief legal adviser to the commissioner. Mr. Congdon was commissioner when some of the frauds were perpetrated Mr. Congdon was also the candidate in whose behalf the election lists were concealed and handled in such a way that the election would have been stolen if the people had not risen in their might and passion and secured their rights by open threats of physical action. Mr. Congdon did not get elected and now he is back in office as legal adviser of the governor. If Mr. McInnes is serious in his professions he will do well to revise any advice that he receives from official sources. And yet he will perhaps remember that his father was removed by Sir Wilfrid Laurier from the position of lieutenant governor of British Columbia, because he was supposed to have taken too much upon himself.

HE KNOWS IT ALL NOW.

A political gentleman from England s now in Montreal. He says that he is will find that the people of Canada

he had been there. "You could do that ment. The anti-Chamberlain could say without coming, all that he when he goes home.

NOT QUITE A MONOPOLY.

The United States Steel Corporation, which is the largest industrial organization in the world, with its \$508,000,000 of common stock, \$360,000,000 of preferred, and \$572,000,000 of bonds, dequarter of the year of \$30,305,000. This would pay a fair dividend on the whole capitalization, which is heavily saturated. But the administration is pur- his back to the wall, so that no one suing a conservative policy and evi- can be behind him. dently preparing for stringent times. tion and reserve, in the place of \$3,000,-000 during the corresponding quarter band-wagon they will implicate them- last year. The sum of \$1,000,000 is set aside for special improvements, and \$7,500,000 for new property construction. dends paid, there is only \$3,000,000 left for sommon stock. No dividend has, we believe, been paid on the common stock of this corporation since 1903. Not only is this corporation the larg-

est in the United States, but within the range of its business its operations are about as large as those of all the now. The other oil monopolists, who other United States concerns taken have shared his profits, have not all together. Its shipments of Lake Su- incurred the animosity of the frenzied government at Ottawa is safe for others. In 1904 the United States Corent of a group of provincial which was a falling off from the 45 per by the St. John electors ings made in the United States, the U. The relative deto be due to the competition of the independent Lackawanna Steel Company, election of an opponent of the govern- which has established large new plants On the whole, the developments of the upon the liberals to come to his short period since the corporation was

A thoughtful writer in one of the few magazines that have not yet run to pictures and to frenzied finance articles recently discussed the mob spirit in literature. He showed how thither by wild and unreasoning clamor after new books of no intrinsic the excitement of the next chase, There is much truth in the good na-

any one will admit who remembers what feeble books have had phenomenal sales and still more astonishing though fleeting fame during the last five or six years. But there is a fashion also in a class of literature which does not profess to be fiction. Just now it is the custom to trace all the sorrows and offenses of earth to the monopolist. Against him in the person of one individual are poured out treatises, critical, biographical, political, economical, cynical, humorous, vindictive, "heaving 'arf a brick" at the aristocrat, the modern magazine mob flings it at a man whom it calls a monopolist. Millionaire Hearst, who for financial consideration is doing his best demn the central route or any other to corrupt and destroy what is left of the national taste, is just now making way. The St. John people condemned this compaign his other chief business. the contract with the Grand Trunk Pa-It is the trade of a large and somewhich Mr. McInnes declares shall not what monotonous colony of writers the country was to pay for the rained with the ming on your breast, and you turn on for the weekly and monthly periodi- St. John people were right. cals. These contributors seem to say the same things over and over again. They agree in striking the personal note, and in striking the same person. One finds in what 000 for one bank, and \$2,000,000 for the they say little suggestion of other. The larger institution proposes a remedy for the troubles they Business will be done day and night.

with the solemn iteration of a stage

army.

For it appears that most of the lurid this theme have not originality enough sample of a large class of sharp business people. In every community there are traders and financiers, who, acfree trader and opposed to Mr. cording to their gifts and opportuni- ing Monday morning. Chamberlain, and has come to Can- ties, are conducting their affairs very ada to find out whether the people here much as Mr. Rockefeller carries on the are really in favor of the scheme of oil business. If the average man in the Intercolonial has lost an able and imperial preference. We are willing the grain exchange can corner wheat to make a small bet that the inquirer he does it. When the small trader can gather in the last few crates of strawberries and hold them for an advance are precisely of his own opinion. In he is likely to use his opportunity. fact he cabled to his favorite journal Mr. Rockefeller exercises his gifts in in London on the day of his arrival a larger field. It may be necessary for that the Canadian manufacturers society to take action to protect itself would not support the Chamberlain from men in his position, and if any programme.

One is able to show how this may be done the message would be valuable. liberal leader and call upon that party he once asked his son why he went to accept and support the government down into a coal mine. The youth replied that he did so that he might say Standard Oil Company. Then she began again and is repeating the story without going down," was the com- as the history of John D. Rockefeller. The first article in the last series is largely devoted to Mr. Rockefeller's father, in whose early life it seems there were incidents which have been hitherto concealed, or at least left unrevealed. The second article devotes page or two to the wrinkles on Mr. Rockefeller's face. It also deals extensively with the loss of his eyebrows, and moralizes at great length, with curious trusiveness and want of delicacy, on any physical peculiarities and afflicclared net earnings during the June tions which the lady has been able to seph of Boston, who have been the discover. The reader is informed that when Mr. Rockefeller sits in church he is always glancing uneasily about, and that he prefers a place with

This writing exhibts the mob spirit. It has no point. It does not help the Main street. country to escape from the evils of the monopoly. It does not suppress Mr. Rockefeller and certainly does not interfere with the monopolies created by others of his kind. It is a sort of fashionable man-hunt, which will go on until the people are tired of it, When these appropriations are made, when it will be succeeded by some and bond interest and preferred divi- other chase. But it does not arrive at anything practical, and so far as it separates the victim from other men of his class, and marks him out for special and select vituperation, it is unfair. If Mr. Rockefeller were to die today there would be the same monopolies that now exist. If he had never been born the people would probably have paid as much for oil as they do finance writers by making large gifts to educational, charitable and religious uses. But they are equally responsible for the standard oil methods, and according to Mr. Lawson one of these associates is the inventor and the chief operator of the mechanism. If the purpose of the Rockefeller articles were to bring about a reformation one could suggest a more practical line of study and discourse. If the writers are trying to supply a mob market they probably know their business.

GET THE FACTS.

Mr. Fielding makes the cautious statement that the route of the transcontinental railway through the province is a matter for the engineers to decide. The engineers would doubtless feel oppressed with this responsibility if they took the statement seriously. But they know that they will not have the last word to say. It is not their business to determine questions of all the facts within their line of inquiry. This has not yet been done. The report of surveys made by the commissioners is admittedly preliminary. As yet there are no exact data to show whether the central route with equal grades would be longer or shorter than the valley route. There concerns have been fully able to hold are large variations in the central tion they could not get a candidate to their own in good times against the route, propositions of which the one favored by the chief of the survey

THE MOB SPIRIT IN CRITICISM. runs some twelve miles east of Chipman. It is hardly worth while to discuss the question of routes at this stage further than is necessary to bring about a thorough examination of the alternative courses. The rapid and general survey already made shows some fourteen miles difference between a gregarious reading public was al- the length of the valley and central lowing itself to be led hither and routes, with the easier grades on the thither by wild and unreasoning of a survey which will fix the exact location with suitable grades no one value, only to forget each volume in knows. If it should be found that a satisfactory central route is twelve or fifteen miles longer than the engineers now suppose the error would not be tured protest of this complainant, as without precedent in railway construction in eastern Canada.

ST. JOHN SCHOLARS. Two St. John boys have recently been appointed to important college professorships. Professor DeBury of the Royal Military College has had valuable active experience as an officer in the imperial army, and has already held positions of considerable responsibility. Professor Clawson of yourself for an effort, you do it; you the State University of Ohio has been didactive, and pessimistic. Instead of for a short time on the staff of the provincial university, but is only at the beginning of his career as a teacher

SALT WATER SWIMMING.

The utmost luxury for the swimmer

would be always to have freedom of

choice as to where he would swimwhether in pond or lake or ocean Then he would be able each day to adapt his swim to his mood. For swimming may be variously operative on a man; desiring one remedy, he may find himself refused it by the perversity of the element-served with the wrong prescription. He would like a swim as relaxing as a Turkish bath, and he is in for a boxing match. For instance, it is a hot, oppressive day; you have been doing concentrated mental labor for some hours, and you wish to turn, not to vigorous exercise, but to a soothing employment, a languid, indolent use of the muscles which will leave you in a mood for sleep. But your available swimming tank is the Atlantic Ocean, in a latitude where the temperature of the water never rises above fifty-eight degrees; and the day is windy and overcast; you put on your bathing suit and stand on the beach looking reluctantly at the breaking waves. The wind chills you a little, and although nothing is more distasteful than to nerve take a breath and run into the icy water-and oh, the torture of that entrance! The cold waves drag at your ankles, and then at your knees, and then, while you are reeling, they grip your waist and wrestle with you for a fall-which you grant them with a shuddering relief. You go under, lips compressed, eyes shut, and shoot up again to the air, crying to yourself, "Thank heaven, that's over!" you kick out and strike out and writhe round in the waves in a furious effort one side and draw up your knees and lunge out and gasp; and then a wave cuffs you in the head and gives you a stinging earful, and you leap up in angry, sputtering remonstrance. do not grow appreciably warmer, violent as is your endeavor, rough as is your buffeting; you are bounded up and down, and pitched into the smother of breaking waves, and slapped and dowsed and insolently abused, until you work yourself into a passion and plough through the turbulent sea with venomous puffs that might be trans lated: "You will, will you! You will, will you! Take that now-take that -take that!" Thus you are provoked to an insane contention and excite ment, when a few moments before your whole inclination had been to ward a meditative floating upon a warm and tranquil pond. But for al your furious bravado, for all your mighty exercise, your teeth are already chattering with cold, your vigor is stiffening in your veins; and you are glad to turn and be helped ashore by the waves that you had presumed to defy.-Artur Stanwood Pier, in the August Atlantic.

ADMIRAL DRAKE ON THE HIGH SEAS.

(Harper's Magazine.)

At three in the afternoon of March 1, John Drake, the commander's brother, shouted out from the mast-top where he clung, "Ship ho!" and the blood of every Englishman aboard jumped to the words. At six in the evening, just ing; but when you are very sleepy all off Cape Francisco, they were so close joys and sorrows seem but faint things to the Glory of the South Seas they MILLTOWN, N. B., Aug. 3.—The could see that she was compelled to sail noient tire she volunteered to help. lowly, owing to the weight of her cargo. So unaware of danger was the captain that he thought Drake some messenger sent by the viceroy, and instead of getting arms in readiness and pressing sails, he furled his canvas. came to anchor, and waited. Drake's announcement was a roaring cannon ade that blew the mast poles off the the past few weeks, but is improving Spanish ship, orippling her like a bird with wings broken. For the rest, the scene was what has been enacted wherever pirates have played their game-a furious fusilade from the cannon mouths belching from decks and portholes, the unscathed ship riding down on the staggering victim like a beast of prey, the clapping of the grappling hooks that bound the captive to the sides of her victor, the rush over the decks, the flash of the naked sword, the decks swimming in blood, and the quick surrender. The booty from this treasureship was roughly estimated at twenty-six tons of pure silver, thirteen chests of gold plate, eighty pounds of pure gold, and precious jewels-emeralds and pearls-to the value in modern money of \$720,000. The Golden Hind was so heavily freighted with treasure it was actually necessary to lighten ballast by throwing spices and silks

MR. FOSTER'S REAPPEARANCE.

Mr. Foster has been back again for

session after an absence during a

parliament. It was expected that he

would shoulder the bulk of the finan-

cial criticism, and he lived up to that

expectation and must have greatly re-

lieved Mr. Borden on that side. True,

ter's fault, and the financial clauses

of the autonomy bills were as import-

ant as any budget could be. In de-

structive criticism on financial mat-

ters Mr. Foster is without a peer in

the house. He can tear out the pad-

ding from an unsound argument and

leave it hanging in all its flimsiness

as no one else can. Again and again

spectators as they saw the preten-

tious commonplaces of some govern-

ment supporter torn into shreds by

Mr. Foster's relentless logic, have said:

8th, 1905:

The men were employed by Henry Crawford, plumber and contractor, who is placing a new sewer along Rodney street into the salmon pond. To do this a trench 6 feet 6 inches in depth and about 2 feet wide is being dug. The line follows alongside the old sewer pipe which is to be discarded. The latter is 4.6 feet in depth and is about 2 feet wide. The earth as it was dug out of the new trench was thrown back on the old sewer line. Where Dooley and Haley were work-

ing, about midway between Watson street and the pond, the trench had been dug to its required depth and they were smoothing off the bottom, when suddenly the earth bank on their left dropped through the old sewer and then slid out, crushing them up against the opposite wall and almost complete-ly burying them. Mr. Dooley was so nearly covered that only his head appeared above the earth, while Haley was covered to his shoulders. workmen on either side of the slide escaped only by an active spring, and when they beheld their comrades pinned to the earth wall, one facing it and the other with his back to it, they called for help and quickly set to work themselves to extricate the men

The work was slow and attended with danger, as more of the bank threatened to give way. Around and pressing into Dooley were large pieces of rock, and though he was extricateed after fifteen or twenty minutes' work it was at once seen that his in-

juries were fatal. Dr. Day and Dr. Ellis, who had arrived on the scene, had the man taken was Miss Mary Normanday. Mr. Dooley to his home. His chest was crushed has two brothers living, one in Newin, and internal injury had been done foundland a It was decided to take him to the hosport, Mass.

Death came suddenly yesterday af- pital, but he died as the ambulance In the meantime the men worked other household in west end. Richard Dooley, 32 Winslow street, aged 48, is dead, and Frank E. Haley, 243 St. of Mr. Haley, and in a comparatively short time had him above ground. His injuries were not nearly so serious as of a caving in of the trench they were those of Mr. Dooley. He was taken

> a question of time when Mr. Haley will be around again. Both men were exceedingly industrious, hard working laborers, and the accident falls severely on their families. Mr. Haley has a family of thirteen children, none of any advanced

> The Dooley home was a grief-stricken one last night. The father and provider lies in the parlor, while in the m behind, the smothered sobs testify to the bereavement of the family. Mr Dooley leaves a wife and five children, the eldest of whom is at work in Hampstead, engaged in getting out granite blocks for John Kane. The sad news was telephoned to him and he will arrive in the city foday.

Dr. Kenney, coroner, has decided to hold an inquest, and Sergt. Ross was busy last night looking up the necessary witnesses.

The cause of the accideent is attrib-

trench. There were boards placed along the top, and the trench was thus shored up at the top, but the bottom was left unprotected Consequently when the earth fell through the old sewer it forced out the lower side of the new trench and pinned the men against the bank. As the old sewer is very rotten, the same accident might occur at any point of the trench, and it will all need to be braced up at top

The Dooley family had only been year, in this country, having come from Newfoundland about a twelvemouth ago. Mrs. Dooley also belongs to Newfoundland. Her maiden name has two brothers living, one in Newfoundland and the other in Cambridge

OWNER OF "STUFF"

THIS OX HAS MORE THAN AVERAGE INTELLIGENCE

A report from Machias says: High Sheriff Tarbox seized an ox this week belonging to Fred Stanley of Whitneyville and marched bim to Machias pound. The action was taken in response to a complaint made by Amos Kennedy for damage to his garden truck. George Stanley, the father of the owner of the ox, who is well known as a man who prevaricateth not, asserts that the ox is not breachy, but it in his possession a shore time before made good his escape. City Marshal and Deputy Sheriff J. Lincoln Parker that he possesses something beyond instinct, for he has the ability to select a place in the barbed wire fence with the greatest space between the posts, and then will go to the halfway point, place his forward hoofs on the middle wire and press it downward until he has space enough to enter his forward parts, then he will place his hind hoofs in the same position and walk out without receiving a scratch. This seems to be incredible, and if almost any other man made the statement it might be doubted, but in view of the fact that the fence across the pasture is fully six feet in height, and that the ox gets out whenever he chooses to, it looks as if this ox is an animal of unusual intelligence and ability.

GONE BACK HOME. (From Wednesday's Daily Sun.)

THE ELOPERS HAVE

A happy young couple's dreams of future bliss were rudely disturbed yeserday afternoon, when the pair arrived in St. John, by the appearance of I. C. R. Policeman John Collins, who was armed with authority to tear asunder two loving hearts.

Pearl Johnson is a pretty girl from Amherst Head. She is only 17 years of age, but this did not prevent her from making up her mind that she wanted to marry Douglas Harkins of the same place. However, Miss John son's parents' opinions were not in accord with the young woman's wishes. The father strongly objected, and this being the case, Pearl decided that it was her duty to elope. She did so. Yesterday afternoon, accompanied by

Harkins, who is 22 years old, she drove from Amherst Head to Aulac, and there boarded the train for St. John. The couple intended going through to Boston, where they were to be married but fate in the form of a telegram in-

The message was received by Officer Collins. It came from I. C. R. Policeman Jones at Amherst and read past session, what of Mr. Borden and prised the main injury, and it is only about as follows: "Detain young girl 17 years old with young man about 5 feet ing that Mr. Borden has had the most 10 inches, 22 years of age, wearing dark clothes and black felt hat with low crown. Man of dark complexion, smooth face. The girl wears dark blue skirt and light waist. Is about 5 feet 5 inches with black eyes and dark hair. Couple on No. 75 train."

Acting on this message Officer Collins had no difficulty in identifying the couple when they arrived in St. John on the 5.15 train last evening. He took the young woman into custody and from her found out some of the particulars of where she was going. Harkins, who was not detained, deided he would rather go to Boston than go back to Amherst, and after buying a ticket for Boston he left on

Officer Jones of Amherst will escore the young lady back to her home. (From Friday's Daily Sun.)

Miss Pearl Jackson and Douglas Harkins, the young couple who eloped from Amherst Head and came to St. John on Wednesday evening, are now back at their homes. Miss Jackson's While this criticism is possibly just in uncle came for her yesterday morning, and Mr. Harkins last night decided that he had better go home too. Harkins on Wednesday evening tried to go to Boston, but was stopped at Vanceboro and sent back here. He applied to the United States officials in this city for permission to enter the States, but as this was refused, he went home by the late train. He of principle; and then there was the has stated that he will not give up the young lady, and while their marriage has been postponed for the present, it will take place as soon as pos-

THE CONSERVATIVES.

Work of Opposition Leaders During Recent Session of Parliament.

Mr. Borden Ended the Six Months Stronger Than He Has Ever Been—Time For John Haggart to Retire—Some Impressions of the Leader's Lieutenants.

OTTAWA, Aug. 1.—How have those ants equal rights with Roman Cathon the opposition side fared during the olics. many liberals in howling down all op- with trunk lines preferably conducted those behind him? It goes without saythrough the autonomy bills, it was not difficult session of his experience. , In a gracious task to tell Ontario and the first place, it must be remembered western liberals particularly plain that Mr. Borden was not a member of truths that they were not anxious to the house when the session opened, and hear, but it was done, and the day will this colored a good deal of the early come when Dr. Sproule's words will part of the session. The situation in Nova Scotia has often been explained, seem so obviously fair that liberals will curse the hour when they were but at the same time, a leader who has no seat and who places his resignation ever dragooned into departing from the in the hands of the party at the epenold principles therein enunciated. ing of the house, will naturally not take hold with the same firmness of

MR. HAGGART'S USEFULNESS

grip that might be expected were he o come back strongly supported by his own province. Mr. Borden's test came If the pension to ex-ministers will acilitate the early retirement of Mr. that the government would mould the educational system of the new pro-Haggart it will not have been wholly vinces, and would create separate nproductive of good, both for the schools. Some think that Mr. Borden country and the conservative party. Mr. Haggart has been living on the reputation of Sir John Macdonald's cabinet, and he is still living back in better still, the position of the briefer amendment toward the close of the dethe good old times of the "eighties." date, simply relegating the matter to Mr. Foster has got over that difficulty the provinces. That is to say, that his which he had when he first went into action was correct but it was too late. opposition of telling about the glorious past. He has realized that the peo the abstract, still the position was so ple do not care what the conservative unique that many things might have party did in the time of Sir John, bu happened to turn affairs in favor of the that what they want to know is what man who said nothing. Undoubtedly it is going to do for Canada in the time the house was astounded by Sir Wilfrid "Sir Robert," and Mr. Foster has Laurier's speech-it was not the old turned his face that way, but Mr. Hagstory then it is now-and it might gart is the typical Bourbon. He forreadily appear that the liberal party gets nothing, and he learns nothing. He has been a drag upon Mr. Borden ever since he took hold. When Mr. Borden declared for the governm ownership of the eastern division of through the whole session the oft-dethe National Transcontinental railway, it was Mr. Haggart's position of Ontario and Western liberals. For which made people incredulous that weeks it seemed as if any one of these the conservative party really believed would suffice to stay the premier's hand in government ownership, or would and render any action on Mr. Borden's really carry it out if they got into part unnecessary. The party whip con- power. Who else than Mr. Haggart quered, and those who galled most un- on the conservative side stood in the der the liberal party yoke themselves way of a thorough ripping up on the were loudest in calling attention to part of the opposition of the Cornwall the defections in the conservative Canal scandal, in which the auditor-party, and pointing to their own solid general stated that he single-handed

be better conservative campaign material than this to show up the old question:
"party of purity," and who stood in "Shall the road? Did the liberals ever let such a glorious chance slip while they were in opposition? Again, this session, it was Mr. Haggart (though this is only a party affair), who tore open again the "nest of traitors" sore, and caused Sir Mackenzie Bowell to pour down maledictions upon the heads of front benchers in the commons just when a solid front to the enemy was what was required. Mr. Haggart undoubtedly knows a good deal about railways, but if he were fit to be minister of railways again he should have torn Mr. Emmerson limb from limb, and made him a spectacle for the whole country. As it was, Sir Wilfred Laurier was always able to lay this flattering unction to the government's soul that even Mr. Haggart had been anable to make the Intercolonial pay. Mr. Haggart is not neglected by an ungrateful country, because he is older because, knowing what is the matter with the Intercolonial, he does not en- house. unciate a policy, or shape a criticism that would shame the government into doing justice to this great undertaking, and into making it pay under non-partizan commission. Mr. Hag gart is apt to remind one of the story of two gossips sitting outside the village post-office when a neighbor went "Cy Blister," said one, "ain't the man he was fifteen years ago." "No he ain't," responded the other, and

MR. MONK'S DIFFICULT POSITION F. D. Monk is still the same fine gentlemanly citizen, still the same pol-ished speaker that he has ever been. He has an attractive personality, and by birth and education he ought to

then, after a pause, "and he never

stand with one hand on Ontario and his power, to pay back old debts. Some the other on Quebec, uniting these two great provinces, showing the good qualmaritime province members, irritated ities of each and interpreting each to by the fact that he had been able to other in a way that no other man in get back to the house, renewed the attacks in the closing days of the sesparliament can, and yet Mr. Monk has sion. Mr. Foster ignored them, but not done it. He has not been one of the forces which made for union, but unless history fails they had best prerather the reverse. If Mr. Monk does not appear in some new and unexpected role, if the measure of his attainment and his testing time came in the past session-and at present it looks like it ed as during the past session, and -then it would appear that the future historian would write down that Mr. vantage. It may be said by one not Monk, with all his advantages and all a member of the order, that Orangehis solid and magnetic qualities that make him in many ways an ideal member of parliament-that with all these proud of their grand master than at things in his favor he just missed bethis present moment. In the past Dr. Sproule has often tried to cover too ing a statesman and a Canadian leader. Had Mr. Monk, for example, followed much ground, has talked too often and the course of Chapleau, in the controupon too many subjects, but during versy over the hanging of Louis Riel, what a position he would occupy today, and how the French liberals would face of much intemperate speaking be stung with remorse and regret that and in the face of much shouting of they had allowed a conservative to place himself on the platform of equal rights, from which Sir Wilfrid Laurier principle of religious equality and libappealed so effectively to his own counerty, Dr. Sproule kept his head and his trymen against coercion in 1896? Mr. Chapleau had to seem to be indifferent

the new provinces; and by adopting Mr. Borden's non-interference attitude he could have held all his Quebec support and endeared himself to all other parts of Canada. By not doing it he not only struck Mr. Borden when he was weakest, but he spoiled any chance of cohesion in the Quebec conservative party and destroyed his own leadership. Mr. Monk had a great oppor tunity, but he used it in a small way and he and his following suffered and will suffer accordingly.

THE MAN OF "THE WORLD."

jeered at by the government side this

W. F. Maclean has added another ession to his record, and he has lived and worked in it much as in previous sessions. He has provided a good many bright ideas for the government to seize and make their own; he has used sound arguments, which were

session, and which will be applauded by the same men next session when advanced by Mr. Fielding or Sir William Mulock. He has had the satisfaction of seeing his views justified by time, and yet he has not been much the gainer. Take for instance his three-pronged effort of last session; two cents per mile railway fares, express ompanies put under the railway commission, and independent telephone Considering the arrogance of admitted freely to all railway stations, by government. Nothing nas been done in the first; the second members of the government state has much to commend it; and it will come up next ession; the third, judging by the activity of the telephone committee, eems in a fair way of accomptishment William Maclean has assisted much useful legislation, and he has opposed bad legislation in a clever way, but at the same time he has not the position or weight in the house to which his talents entitle him. He has all the necessary machinery except the balance wheel in his composition, with the result that sometimes he flies off at a tangent just when he appeare most surely in his orbit. The effectiveness of the good work he does is neutralized by the untenable position he

> wise would be totally out of their MR. BARKER OF HAMILTON.

> occasionally takes, and which give oc-

casion for small bore government mem-

bers to make light of a man who other

Mr. Barker has held the position as easily the foremost authority on railway financing in the house and at times he has made the government side, particularly the minister of railways, appear at a great disadvantage Railways were not so much in evidence as last year, but they will always be an important subject for discussion in Canada, and Mr. Barker may be expected to offer effective criticism in the years to come.

MR. STOCKTON OF ST. JOHN.

There are a good many members on both sides who give promise of developing as the sessions pass, but there are men who have steadily worked up to positions of prominence in the house, men upon whom falls the burden of the sessional work, but the one man not of promise, but full grown, the man who the defections in the conservative party, and pointing to their own solid ranks. Mr. Borden undoubtedly was in argument, the sudden shifting of the government's ground showed that, and that some of his followers did not a more had and that some of his followers did not a more had and that some of his followers did not a more had and that some of his followers did not a more had and that some of his followers did not a more had a more had and that some of his followers did not a more had a more had and that some of his followers did not a more had a more had and that some of his followers did not a more had a more had and that some of his followers did not a more had a more had and that some of his followers did not a more had a more had a more had a more had and that some of his followers did not a more had a more has come forward not by slow years tores and vitalizes instantly—it's a and that some of his followers did not he been backed up. Where could there not lost their vitality, one of the men seg, Queens Co. who answer in the affirmative Byron's

"Shall not the selfsame soil

Bring forth the selfsame men?" It was regretted on all hands that Mr. Stockton's health was so precarious last session that he was unable to take part in the by-elections in North Oxford and London, so that Ontario people might see what this New Brunswicker is like. Mr. Stockton is no longer a young man, but his health has been steadily improving during the past two years, and it is hoped he will be able to take a more active part in coming sessions than during the one just passed. He has everything that makes for leadership, magnetism, a good presence, dignity, he is a logical reasoner who disregards the use of documents and carries his references in his head, and above all, he is a fear less and hard hitter, who is not afraid of the opinion of any minister of jus tice, past or present, and for whom Mr. Fitzpatrick's awful frown has no terthan he was in Sir John's day, but ror. His election has been a great strengthening to the opposition in the

E. F. CLARKE MUCH MISSED.

The house will never be quite the same without the presence of E. F. Clarke. He did not know as much about law as his most frequent antagonist, Mr. Fitzpatrick, but he knew more about human nature. There were a good many, perhaps, who surpassed him in the knowledge of some special subject, but there were none who could view all matters as they arose from a fairer or more practical standpoint. A comparatively poor man himself, he know what the workingman felt; endowed with talents himself he could appreciate the position of the men of talent who have pressed forward in the race. What he believed he believed thoroughly, and without any misgivings as to the justice of his own position, but, at the same time, his tion and forced the occupants to open mind was not angular and jagged. It was of the type of the oak rather than the scratching hawthorn. He believed in his own principles, and he tried to win men over to them, but he conceived that it was possible for an opponent to be wrong and yet honest. Mr. Clarke was a dangerous opponent, and the cellar window and had ransacked the government undoubtedly found him such. He was so eminently fair, his statements were so well within his liking, as nothing could be placed the mark, he had such a sunny tem- as missing. per and winning manner, and he so strongly appealed to the house of commons, not as liberals and conservatives, but as members of one big Canadian committee ,that he was a very difficult man to oppose. Mr. Clarke ical science. It kills the germs of inwas not in the house during the fight ternal disorders. If taken in concenon the great bill of the session, a bill trated form, and that means "Solution that he undoubtedly would have of Ozone (the coupon kind)" it enfought to the end, and while such a sures a speedy cure for asthma, broncampaign would undoubtedly have chitis, Bright's disease, kidney trouble, added to his reputation, it could not malaria and rheumatism. This stringhave made his memory dearer to the ent remedy needs with it a tonic laxait is today.—J. L., in Toronto News,

MONCTON PARSONAGE.

Occupants Smelled Tobacco Smoke and Found Man in Cellar, but Thief Escaped.

MONCTON, Aug. 3.-The occupants of the First Baptist parsonage had a disagreeable surprise early this morning. Since the removal of Rev. Mr. Hutchinson to St. John the parsonage, which is alongside the church, has been occupied by a family named Read as caretakers. They sleep on the ground floor, and during the smelled tobacco smoke. On making an investigation the smoke was found to be coming from the cellar, and on going further that part of the house was found to be occupied by a strange man, who made a hostile demonstraphoned for, but on their arrival the burglar, who was apparently a tramp, was nowhere to be found. On further examination of the premises it was found that the stranger had entered by

E. A. Hoben of Upper Gagetown

E. A. Hoben of Upper Gagetown the sitting again adjourned until tomorrow morning. The crown, it is timony to produce. Tonar in his evidence said that on the night of the assault he was sitting near the railway track in Regent street when three persons came along whom he recognized as being McSorley and the two Mc-Catherines. This was about 9 o'clock. After a few words with them, the three proceeded up Maryland Hill. He next saw three men standing near the after this that he heard a scuffle in after, Tonar saw a man coming down thought he was hatless as he passed him. He did not see the three young men again. Adams' evidence was to the effect that he was on Maryland down the hill he saw three persons run

away, but he was not able to recognize any one of them. Some time ago F. B Carvell M P. acting on behalf of County Coun. H. bate court to have the latter appointed picnic. The picnic will be held on Aug. tate of the late Vesta Forrister, form 15th at The Cedars, going by rail to erly Miss Temple of this city. Judge Barry granted a citation. On its return today E. H. McAlpine of St. John appeared on behalf of the heirs of the late William Forrister and opposed the application chiefly on the ground that the heirs of the deceased husband were the persons mostly interested. His honor stated he would give his decision in the matter at a latter date. The petition in which the application for

sets out among other things that the estate of the late Mrs. Forrister as yet raspberrry crop promises fair. Prof. C. G. D. Roberts with his two sons and accompanied by the veteran guide, Adam Moore, left this evening on a two weeks' hunting and fishing trip along the headwaters of the Tobique and Nepisiquit.

The trustees of Victoria Hospital have decided to equip a diet kitchen in connection with the institution. Ald. H. B. Ames, M. P., of Montreal, who arrived in the city last evening, took a short trip out on the I. C. R. this morning returning at noon. This

afternoon he was shown about the city by York's popular representative. ST. ANDREWS, Aug. 1.-Warry Law, C. P. R. station master here, last night sprained his left wrist and fractured the principal bone of the fore arm by falling down stairs. He is to-

day attending to his customary duty Sir Thomas Shaughnessy is at his residence, Fort Tipperrary, where he intends to remain until the week end. Sir William Vanhorne has returned

to attend church, and on arriving home could not find her mother. Searching she found her in the back part of the house. Mrs. McDonald leaves one son, Alfred, and one daughter, Georgia, who Hetherington, V.C.T.; Arthur Bishop, have been very attentive to her and Sec.; Annie Henderson, A. Sec.; Mrs. never allowed her alone for any length Branscombe, Chap.; Charles Morrison, of time. Much sympathy is extended Mar.; Mamie Day, D. M.; Harry Day, to the bereaved ones. Mrs. McDonald was 65 years of age.

SACKVILLE, N. B., Aug. 2.-The regular monthly meeting of the Town Council took place last evening, with Mayor Wood in the chair. An application for position of town marshal from Burpee Estabrooks was referred to the police committee. Ald. Dixon, as chairman of the street committee, reported on the road work since May at an expenditure of \$1,027.24. The motion was carried that the firemen who turned out at the fire in the Fawcett and Copp block be recompensed by the town at the rate of 25 cents an hour. It was decided to hold an investigation into the origin of the fire. Mayor Wood referred to the difficulty that had arisen charged with assaulting re Stephen O'Blenis v. Town Marshal, Two witnesses, James Tonar and appointed till such time as a marshal Harry Adams, were examined when is in office. The report of the finance committee was read by Mayor Wood, who stated that the committee met understood, has yet considerable tes- last Friday and with the mayor examined carefully the appropriations for \$1,390 is explained as follows: The first year; maintenance of fire alarm requires \$150, also new expenditure; the poor assessment for 1904-5 amounts to \$500; the remaining \$270 is made up of legal expenses and the discount For school purposes the increase this year over last is \$500, making a total of \$1,390. The sum of \$7.845 was ordered to be assessed for town purposes and \$4,600 for school pur-

A number of Sackville people are summering in cottages at Cape Tor-mentine, among them being Mr. and Mrs. Richard Trueman and Mr. and Mrs. F. S. James.

Mr. and Mrs. Hewins of Haverhill, Mass., and Mrs. Ritchie Spence of Newburyport, Mass., are the guests for the warm weather of Mr. and Mrs. Wm. Farguharson. Cape Tormentine. Miss May Wells, who is at the hospital, Jamaica Plains, Mass., arrived home yesterday for her vacation.

WHITE'S COVE, Queens Co., Aug. -Miss Iva Springer, who has been in poor health for the past year, is now lying seriously ill at Harry Orchard's. Dr. J. A. Casswell of Gagetown has

been attending her. John F. Wright of the schooner J. L. Colwell spent Sunday at his home. His vessel has been loading lumber in Fredericton for New York. Capt. Fred Colwell, of the schoone

Persis A. Colwell, is reported as lying ill with fever at a Maine hospital. The strawberry season is now ended. The crop was a good one, and berries sold well. The blueberry and indistributed amounts to about \$9,000. of there kinds are now going to market

and are bringing a good figure. The many friends of Rev. Charles Comben, who had the pastorate of the Methodist Churches on the Grand Lake circuit some eighteen years ago, were pleased to again have a visit from him after so long an absence. On Tuesday, Aug. 8th, Rev. H. H.

Gillies of the Church of England, will hold his annual picnic on the shore of C. H. Mott, Waterborough; and on the 10th of August will run his annual excursion from Cole's Island to Frederic ton. This excursion has always been most popular and as a result the pro ceeds, which go for church purposes are large.

The Baptists will hold a picnic at Fanjoy's Point on Wednesday, Augus 2nd. The proceeds will go towards the repairs now being put on Mill Cove Baptist Church. There were no services in any of the

churches yesterday. An accident occurred at the whar here. On Saturday last just as the May Queen was coming to wharf, an to Montreal and will probably arrive old gentleman, Abijah Coakley of here on Thursday accompanied by Douglas Harbor, was walking down the wharf to go on board the boat,

Latourelle St., Quebec, Que., writes:

Dear Mrs. Pinkham:—

"I suffered for eight months with what the doctors called prolapsus, which caused great weakness all over my system, with faint dizzy spells. I kept growing weaker and weaker. I tried several medicines which they claimed would cure my trouble, but nothing was of the least benefit until I tried Lydia E. Pinkham's Vegetable Compound, and this helped me so rapidly that I could hardly believe my good fertune. I would gladly have paid \$30.00 for that first bottle, for it started me on the read to health, and five bottles cured ma.

"I am most grateful for my splendid, robust health, and shall certainly recommend the Vegetable Compound in glewing terms to all my friends and acquaintances, for it is deserving of all the praise I can give it."

Mountains of proof establish the fact stop the doctor's bill. I can do this for Mrs. Hewson and daughter, Mrs. you, and will, if you will assist me. All you need to do is to write for a free box of the remedy, which has been placed in my hands to be given away. Perhaps this one box will cure you. It has done so for others. If so, I shall be happy, and you will be cured for 2c. (the cost of a postage Mountains of proof establish the fact that no medicine in the world equals Lydia E. EGG MEMBRANE A HEALER. Valuable When Used in Cases of Burning or Ulceration.

At a recent session of the Therapeu tical association of Paris Dr. Amat lectured on the use of the membrane of eggs in the treatment of wounds. He has observed for some time the good results of placing these membranes upon the surface of wounds and reports two new cases, that of a as poor as Job's turkey. But I've got young girl suffering from a burn op her foot, and a man, 40 years old, with a large ulcer on his leg. Both wounds were in process of healing and were settle down and enjoy life."

covered with healthy granulations.

The surgeon overspread them with six or eight pieces of the membrane of eggs, which was covered with tin foll girl walks on.

Tom—Which girl? dages. After four days the bandages and tin foil were removed and it was shown that the membrane of the egg had partly grown into the good skin. That the egg membrane had contributed much to the healing process was demonstrated in the further course of

It seems, however, that the membrane does not always adhere. The process of cicatrization is not only hastened, but the wound heals exceptionally well and leaves but few perceptible traces.

ONE TOO MANY.

WILL BORROW HALF A MILLION

Provincial Government Getting Loan From Quebec Gorporation.

Expect to Save Money by the Plan-Bonds Will be Issued Later-

Govt. Meeting at Capital.

A regular meeting of the provincial government was held last evening in Fredericton and was adjourned until today. Nothing but routine business was transacted. No appointment of registrar of probate was made, nor was the report of Engineers Wetmore and Brown on the Central railway pre sented. It is expected that this report will be handed in and considered to

day.

It is announced that the governmen is now negotiating a loan of half a million dollars from the Credit Foncier, Franco Canadien. This amount will be eceived into the provincial treasury within a very short time. Part of it vill be used in retiring debentures now falling due, while the remainder will be applied to the construction of permaient highway bridges. It is stated officially that this loan has nothing whatever to do with the Central railway, as was mentioned in an evening paper. The loan is being negotiated at a

ow rate of interest, the exact rate not being given out until the business is completed, and the government expect to effect a considerable saving in interest by this proceeding. Later on, when the money market is in a more favorable condition, there will be an issue of bonds for half a million or more to cover this indebtedness.

SAW POLAR BEAR 1,000 MILES AT SEA.

Big Liner Caronia Ran Into Electrical Sterm-Passengers Took Snap-

NEW YORK, Aug. 2.—Captain Warr of the steamer Caronia, in port from Liverpool today, reports that on Sunday, when 1,000 miles out at sea, the all the helpfulness and encouragement caronia passed through the greatest of a mutual co-operative society, with ed. An iceberg had just been passed that large numbers of as the ship headed into the storm. So over are working along the same lines close was the berg that a polar bear and in the same order. was plainly seen on its edge and passengers made snapshots of him with cameras.

The light died out, clouds of inky blackness rose, the temperature, already cold from the presence of the berg, fell 53 degrees, and the wind rose from 20 miles to 60 miles an hour. Many passengers remained where they could witness the storm, whose lightning flashes made almost continuous light and temporarily almost blinded the onlookers. The storm broke apstone in a cemetery in the western parently directly above the Caronia.

Y. M. C.A. BOYS HAD A GOOD TIME.

WHITE'S COVE, Aug. 2.-The Y. M. C. A. boys who are camping at Robertsons' Point gave an entertainment to cheap, and told the mason to engrave a large audience on Friday evening ment were good, particularly their acrobatic performances. An admission fee of 10 cents was charged. Their Sunday service had a good attendance.

On Saturday the party went to Fredricton and returned by steamer Springfield. A good time was enjoyed The camp closes on Wednesday evening next, and the boys will leave by Thursday's boat. The party have fully enjoyed their sojourn at Robertson's Point, and the people of this section have fully enjoyed the stay of the boys, from the fact that they have done everything in their power to make entertainment for all who could attend the camp. All join in hoping the boys may return again next season.

A PAPER HUSBAND.

(Philadelphia Telegraph.) The late Mary A. Livermore liked to tell a story of a young lady friend of hers in Melrose, for she believed that in this story lay a lesson for hus

bands Mrs. Livermore's friend was passing a month alone, her mate having been summoned to Europe on a business matter.

"And are you very lonely without your husband now?" the elder said to the younger woman one morning. "A little lonely," was the qualified

"But surely," said Mrs. Livermore, you miss your husband very much The other laughed rather bitterly. "Oh, no," she said. At breakfast ust stand his newspaper in front of

his plate, and half the time I forget he isn't there."

BROTHERHOOD OF ST. ANDREW.

The fourteenth dominion convention of the Brotherhood of St. Andrew will be held in the city of Ottawa from Oct. 5th to 8th next, both inclusive.

The Brotherhood of St. Andrew is an institution composed of men of the Church of England banded together for the one and only object of promoting the spread of Christ's kingdom among men, especially young men There is little doubt probably in the mind of any thinking man that there is a real necessity in these rushing days to introduce a little more practical religion into the affairs of everyday life; and laymen in the church have found that they can, on brotherhood line, do a work which the clergy unassisted can hardly hope to accomplish. Although the church in the past has not been without her devoted and active laymen, still their efforts have lost much through being individual, and the discouragements of unassisted work have too often forced them entirely to desist. In the brotherhood, however, these same men have found electrical storm he has ever witness- the added stimulus of the knowledge

> Great preparations are being made locally for the convention while the dominion council at headquarters in Toronto is actively engaged in preparing a programme which it is expected will contain the names of a number of the leading bishops, and clergy, and prominent laymen of the church. Delegates are expected from the majority of the 200 active chapters scattered throughout the dominion, while large numbers of visitors will attend from many of

> the parishes not having chapters. Ottawans are noted for hospitality, while the capital has a wide fame as an ideal convention city. These facts with the additional inducement of reduced rates on all railways will insure a largely attended and successful gathwhen brown October comes ering

> > SET HIM AG'IN.

The following was a favorite story of my grandmother's. She said that when she was young her home was on a large plantationit was slavery times then-three miles from the old town of Cahaba, Alabama, and that a short distance from there down on what was called Black Creek, there lived a worthy old couple generally know as Aunt Pattle and Uncle

One day the old woman was sent for to sit up with an ill child. On her return next morning she could find no trace of her husband, and when she blew the old horn in vain-a summons to which he always promptly responded-she immediately decided that ie had been drowned in the creek, and

so gave the alarm. Being Sunday, the men were all at nome, so she soon had quite a crowd around her, all excited over the news and eager to assist in the quest. Hastening down to the creek, accompanied by Aunt Pattie, who insisted on going,

they went to work. The search went on for some time, the old woman standing with arms a-kimbo, watching proceedings great interest.

At last they found the poor old man and, drawing him out of the water, the men were horrified to see the body covered with eels. Aunt Patty, with an exclamation of

astonishment, strode forward, and, waving the men off, went vigorously to work to dislodge the slimy little fish. carefully depositing each one in a rusty Finally, when the last one was removed, and the men again advanced to her assistance, she arose and cried

FROM P. E. ISLAND.

Barn and Horse Burned in Incendiary Fire.

Sir Louis Davies Mixed up in a Lawsuit-Preparations For Earl Grey's Visit.

CHARLOTTETOWN, P. E. I., Aug. -Earl Grey is to arrive here on Thursday and will remain here until Saturday.

Prof. J. N. Robertson of Ottawa, is now here and has visited the consolidated school at Hazelbrook. No prettier sight was presented during home comers' week than the parade of school children to Victoria Park. And nothing in that parade was more unique than the children from the consolidated school, situated some six miles from Charlottetown, being driven in their covered vans along the streets. These vans were provided by Sir William Mc-Donald and Prof. Robertson, Great interest was taken in the vans, alive with happy faces and it is hoped that this experiment of consolidation may prove

highly successful. St. Anne's Sunday was celebrated by the Lennox Island Indians on the 30th ult. Lieut. Gov. McKinnon and his aid-de-camp and a guard of honor were

Charles W. McLeod of Honolulu, left resterday on return to his work after pleasant visit to his former home in

A barn belonging to James Vatchers, Kent street, was burned on Sun-day night. A horse was so badly burned before being taken out that i had to be killed. The fire is thought to have been an incendiary's work. Hector McKenzie, son of Finley Mc Kenzie, is visiting his home at Flat River. Mr. McKenzie has been for several years in Tonopah, Nevada. He was one of the discoverers and part

owner of the Bullfrog mine and is worth an independent fortune. Rev. J. F. Jenkins, late of Lot 49, and now of the First Baptist church at Ocean Park, California, has been appointed chairman of the board of control of the Baptist denomination in Frank McGuigan of St. Mary's road

was seriously injured by a blow on the forehead Saturday while working on Connolly's wharf. L. N. Fowler of Bedeque has gone to Atlantic City, N. J., to attend the Su-

preme Court of Foresters. Joseph Blanchard and Isadore Peters of Rustico are under arrest, charged with breaking into Wedlock's store at Stanley. A cash register costing eighty dollars was carried away and destroy-

The following have been elected officers of the P. E. I. Dental Association: President, J. H. Ayers; vice-president, C. B. Green; secretary-treasurer, J. S. Bagnall. Drs. Bagnall and Smallwood were appointed representatives to the Dominion Dental Council.

Charles McEachern, son of Finlay McEachern of Belfast, will arrive home shortly from Honolulu. He has had a severe attack of appendicitis. W. H. Tupper and wife have return-

ed to Chatham after a visit to friends in Georgetown. A valuable horse belonging to R. J McDonald was found dead in the pasture a few days ago. This is the third horse Mr. McDonald has lost in eight

The Sons of England held their decoration service here on Sunday. The parade was a creditable one. Nearly twenty graves were decorated.

A. W. Reddin, druggist, has been convicted of a second offense against the prohibition law. Dr. Chas Davies and his sister, Cath-

rine, wife of Walter Deblois, only children of the late George Davies of Charlottetown, have brought action against Hon. Daniel Davies and Sir Louis H. Davies, as executors of Geo. Davies, to recover the share of the es tate of Mrs. Amelia Davies, who died in 1863, which fell to her grandchildren the said Dr. Chas. Davies and his sister. George Davies had been appointed guardian of his children during their minority, but never paid over their share from the grandmother's estate, so it is alleged. Evidence has

been taken and the vice chancellor has received judgment. The beach along the north shore of P. E. Island is being well patronized by American tourists. These stretches of beach excel in many respects the most desirable of the United States. Surf bathing is being greatly sought

after and here found in its reality. Dr. E. Cameron of Loraine, Ohio, and his daughter, Mrs. E. R. Chapman of St. John, N.B., have been the guests of Mrs. John A. McDonald of Summerside. The doctor has been absent from his native island for thirty

years.

ELMSDALE, P. E. I., July 31.-Thos. Henderson, one of the most respected citizens in this community, is dead. Deceased was 68 years of age, and although ailing for some time it was not thought that his case was serious until cancer of the stomach set in, after which he gradually grew worse until death ended his sufferings on the 25th inst. A widow, one son and four daughters are left to mourn besides a host of friends and relatives. A concourse of about sixty carriages conveyed the body to its last resting place

in the Presbyterian cemetery at Elms-Miss Clara Ellsworth has arrived home after spending the winter and spring in Lowell, Mass., visiting her sister, Mrs. F. A. Boyle.

The store of Wedlock Bros., Stanley Bridge, was burglarized a few nights ago and the cash register carried off. The register, which cost \$80, was found next day, being broken open and left in a useless condition minus small amount of cash which it con-

THE ROMANGE OF URIAH BELYEA

Former St. John Letter Carrier Marries a Woman Whose Life He Saved at Niagara.

The first scenes of a romance in which a former St. John letter carrier and a fair resident of Buffalo were the participants, were enacted recently. The romance culminated in a wedding, when Uriah Belyea, formerly of West End, led to the altar the woman whose life he saved and who subsequently rewarded him with her heart and hand. A letter received a few days ago by a friend in this city conveyed the in-

telligence. A few years ago Mr. Belyea, who was a letter carrier in the Carleton district, was superannuated, and being a widower, started on a visit to his children, some of whom are in various parts of Canada and some in the Un-

ited States. A few weeks ago in the course of his travels he visited Niagara Falls, and while enjoying the scenery, his attention was attracted by a lady who swooned and fell off the seat where she was sitting to the rocks below. Mr. Belyea rushed to her rescue, raised her from her dangerous predicament and after bearing her to a place of safety, he, with the assistance of two ladies, restored her to consciousness The lady was very grateful to Mr.

Belyea, and insisted that he had sav-ed her life. They dined together that day and the lady then took Mr. Belyea in her automobile to Buffalo. The friendship ripened into love and they were married. They go to Washington on a honeymoon trip and expect to visit St.

John some time next month. The lady's name is not given, but it is understood that she is a widow with a considerable fortune.

THE NEW PROVINCIAL ROAD ACT.

To the Editor of the Sun: Sir-The people of this section have been patiently waiting the results from the operation of the act which was to do so much towards giving us

good roads. So far the only action taken has been the prompt collection of the money. In other years our roads have been repaired early in the season, but this year up to the present

When we compare the present condition with the persuasive forecasts made by servile advocates of the new Road Act we must conclude that if the said act ever was intended to improve our highways someone must be grossly ne-

gligent in its operation. Good roads are a most important factor in the progress of the business of the country, especially of agricul-ture, and now when the farmers are forced to contribute in dollars and cents, without any option or without July 31.—On July 28th, Vivian Glenn, having a say in the management of the ten year old daughter of Mr. and the roads, it is only a reasonable busi- Mrs. Albert C. ON THE INCREASE

And Authorities Look For More Fatalities:

Already Three Hundred and Seventy-Eight Victims Have Succumbed to the Dread Disease.

NEW ORLEANS, La., Aug. 2 .- Today's reports of the fever situation showed an increase in the number of deaths, but the health authorities confessed to no alarm over the situation, and said that more fatalities were to be looked for because during the last three or four days there had been a sufficient increase in the number of cases to warrant the expectation of heavier mortality.

High temperatures succeeded by heavy rain and cooler weather produced climatic conditions favorable to fatali-Most of the deaths were of Italians, and nearly all of them were either in the Emergency Hospital or in the quarter adjacent thereto.

There was no dissent among the au thorities from the view expressed by Health Officer Kohnke, that conditions were hopeful. With only a few isolated cases above Canal street, it is believed that once the infection begins to destamping out the disease. While the fever spell is a serious state of affairs. it is not believed that there is justification for the terror which seems to

The city board of health's report of yesterday's 42 new cases and six leaths shows that the Italian patients numbered 35, while the six dead were all Italians. In Hospital street, in the heart of the originally infected area, there were 12 cases, all in one block. In one Hospital street house five cases were found, and in another four. Most of the new cases were found near the

DEATHS FROM FEVER THE WORKINGS OF THE NEW HIGHWAY ACT.

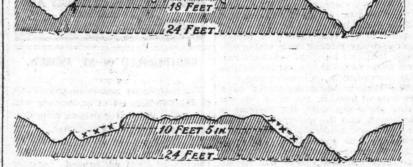

An Example of How Good Roads Are Not Made, and How the People's Money is Being Wasted All Over the Province.

To the Editor of the Sun: Sir -When the new road act designed by the provincial government was first enacted there was a very general wish that it would prove to be a step towards road improvement, although the principle of taking away the spending of the money from the municipalities that raised it was not, and is not, considered good policy or good politics. If the arrangement was designed to give the government more patronage and power it will in this direction prove a boomerang. If it was designed to give the public better roads some

that this season's work was carried out with some attention to the principles of road making.

I enclose herewith a sketch of road bed in the parish of Burton as it was before the provincial government's road superintendent began his repairs upon it and as it was after he had completed the so called repairs, Cross section of road bed in parish of

Burton. The upper illustration shows the con dition of the road before the repair were made, the lower one shows the condition after the repairs were com steps should have been taken to see pleted.

This road bed, as can be seen by the sidents not only has the money ex sketch, was in fair form and of the pended in this way, been wasted, but proper width before the repairs were it is a positive damage to the people started. With a little scraping off the who have to use the roads. Here and shoulders and the application of some there may be seen dug on the side of gravel it could have been put in good the turnpike and left, without any condition. A gravel pit was open with- drainage whatever, to fill with water in 100 yards of the spot which this and soften the roadbed. Scarcely anydrawing represents. GOOD FOR VANCOUVER.

Milling Centre to Supply Orient.

WINNIPEG, Aug. 2.-It is reported here that upwards of one million bushels of winter wheat from Southern Al berta will be shipped westward to be ground in British Columbia mills, initiating the policy of making Vancouver a great milling centre from which the flour supply for the Orient may be shipped. The C. P. R. officials practically confirm the announcement.

VISIT OF REV. DR. JOSEPH McLEOD TO LONDON.

Letters received in this city from Dr. McLeod tell of that gentleman's doings during the past month. On Sunday, July 16th, Dr. McLeod

preached in the Cambden road church in London, and on the following Tuesday he addressed a congress in Exeter Hall on the Temperance Situation in Canada.

At this congress was organized the Baptist World's Alliance, of which great organization Rev. Dr. McLeod was elected vice-president for Canada. After his stay in London Dr. McLeod visited Paris, and is at present touring Scotland. He sails for home on August the 10th.-Gleaner.

DEATH OF J. E. PRICE.

General Superintendent of I. C. R. Passed Away Yesterday After Painful Illness Due to Overwork.

MONCTON, N. B., Aug. 2.-Though the event had been expected for some time, this community was deeply affected by the news of the death of J. E. Price, general superintendent of the Intercolonial railway, which occurred at 2.30 this afternoon, after two months' illness with diabetes. Price was a thorough railway man and during the snow blockade last vinter, though in anything but robust health, remained at his post of duty day and night. His death was probably hastened by over-work and exposure at that time. Deceased leaves four brothers and five sisters. The brothers are: Claude W., I. C. R. dispatcher at Mencton; Dr. O. B. of Moncton; Morton of Sydney, and E. B., locomotive engineer at Campbellton Sisters:-Mrs. Lawrence, Petitcodiac; Mrs. Bray, Campbellton; Mrs. Seeley, Moncton; Mrs. Daley, Sussex, and Mrs. Hanson, Bathurst. The funeral will take place Saturday afternoon.

Mr. Price was a son of W. W. Price, C. R. station master at Petitcodiac, and was born October 18th, 1854. He entered the service in July, 1867 as telegraph operator and assistant agent at Petitcodiac. In March, 1872, he was appointed telegraph operator at Moncton, and in August, 1873, train dispatcher at Moncton. In April, 1876, on the opening of the northern division he was appointed assistant superintendent of the Monston and Campcellton district, and in March, 1879, on the reorganization of the staff, became assistant train dispatcher at Camppellton. His record since that time is as follows: October, 1881, district superintendent at Campellton; September, 1892, district superintendent, Haliax and St. John district; October 17, 1898, general superintendent at Moncton; November 9, 1901, superintendent Moneton and St. Flavie district; August 15, 1902, to date, general superintendent at Moncton.

The Penalty of Green Apples.

It's the limit. Pain, distress and violent sickness. No need to suffer when Nerviline cures so quickly. Please ant and only a few drops required. For summer complaint, cramps and kindred ills nothing equals Polsen's Nerviline. Try a 25ct. bottle.
