TWELFTH ANNUAL REPORT

TO THE

MONTREAL

CORN EXCHANGE ASSOCIATION

TO BE PRESENTED BY THE COMMITTEE OF MANAGEMENT AT THE
ANNUAL GENERAL MEETING OF THE ASSOCIATION, TO BE
HELD ON WEDNESDAY, 13TH JANUARY, 1875.

MONTREAL:

PENNY, WILSON & CO., PRINTERS AND PUBLISHERS.

1875.

OFFICE BEARERS FOR THE YEAR 1874.

Elected at the Annual General Meeting, held on 14th January, 1874.

COMMITTEE OF MANAGEMENT.

<i>Chairman,</i>	- - - - -	R. ESDAILE.
T. W. RAPHAEL,		JOHN OGILVIE,
GILBERT SCOTT,		M. LAING,
	JAMES MCDUGALL.	

TWELFTH ANNUAL REPORT.

The Committee of Management of the Montreal Corn Exchange Association have pleasure in submitting to the Members assembled in this their Twelfth Annual Meeting, a brief statement of proceedings during the year 1874 ; and in doing so they have to remark, that there have, perhaps, been fewer matters brought up for special consideration in that period, than in any preceding twelve months of the Association's history. As has been customary, at the outset they call attention to the

TREASURER'S STATEMENT.

According to the Treasurer's statement of income and expenditure, the balance in favor of the Association is \$1,783.70. The number of members added to the roll during the year 1874 was 32 ; but this was counterbalanced by resignations, and the removal of names for non-payment of subscriptions, the total deductions being 35, or a net decrease of 3.

There is no material diminution of revenue, although the balance is \$173.28 less than in the preceding year,—the Treasurer intimating that the difference is partly the result of one or two payments which could not be rendered so as to be included in a former statement.

The Treasurer also states, that during the past year some difficulty has been experienced in collecting subscriptions in advance. The Committee think it expedient, therefore, to call attention to the following extract from the By-Law relating to Maintenance :—

"Fees shall be payable always in advance, and shall be renewable on the 1st of January in each year, and the same shall be charged on entrance to parties joining on any intermediate date, and be renewable on the 1st of January, as if they had been members for the whole year."

EXISTING RELATIONS WITH THE MONTREAL BOARD OF TRADE.

In accordance with what was believed to be a generally entertained opinion, the Committee of Management have conferred with the Council of the Montreal Board of Trade, on the subject of the basis of existing executory relations between the two Corporations. The result has been a mutual arrangement, according to which the *whole* executory expenses of both shall be paid in equal proportions by each. The change will date as having commenced on 1st November, 1874, and will, of course, considerably reduce hereafter the annual expenses of the Association.

RENEWAL OF LEASE,—TELEGRAPHING, &C.

The first lease of the premises occupied by the Association, for a term of eight years, expired on 30th April, 1874,—and the Committee of Management had no alternative but to renew the arrangement for a period of three years, the conditions being precisely the same as those under the preceding contract. A proposal had been suggested for enlargement of the Board Room, so as to afford better accommodation for meetings. The Committee having carefully considered the question, decided that it was inexpedient to make the alteration.

J. H. Joseph, Esq., has submitted plans of a new building, which he purposes erecting on the corner of St. Sacrament and St. Nicholas Streets, the interior arrangement of which contemplates suitable accommodation for the Corn Exchange, as well as for the Board of Trade. The plans came so recently into the hands of your Committee, that they can only recommend the proposal to the attention of their successors in office, to consider it carefully in the interest of the Association.

Your Committee deem it a matter of deep regret, that they have been unable to take any steps towards the procuring of a site upon which to erect premises for the use of the Association, and for

other commercial purposes. They are now satisfied, that if a suitable location can be obtained, the question of expense ought to be a secondary condition ; for the Committee feel assured that any choice of situation that might be made, reasonably central as regards Banks, Post Office, Custom House, and Canal Basin, would certainly become a commercial point of attraction.

THE DRAFT RECIPROCITY TREATY.

Negotiations for the establishment of Reciprocal Trade Relations between the United States and Canada having been entered into at the instance of the Dominion Government, the result was the submission of a draft treaty, which was laid, by the President of the United States, before the Senate.

The clauses of the proposed treaty have been the subject of discussion by commercial men in both countries, and the provisions which relate to the free admission of certain manufactured articles have been sharply criticised, and equally denounced, in some cases, by parties specially interested in particular branches of industry both in Canada and in the United States.

It is alleged that the discussions which have taken place respecting its provisions have been mis-timed and premature, and that criticism should have been deferred until it had been ascertained what alterations would be proposed by the Senate of the United States. There seems, at all events, to be very little, if any difference of sentiment among the commercial classes of either country, on the question of a free interchange of natural products ; indeed, the opinion has been expressed that rather than have no reciprocity at all, it would be advantageous for the people of both countries to concur in the treaty as it stands,—a view which is heartily concurred in by your Committee of Management. It is believed that this will be the opinion of the members. The consideration of the question of renewing reciprocal trade relations between the United States and Canada will, it is understood, come up at the approaching Annual Meeting of the Dominion Board of Trade ; and it is recommended that the Representatives of this Association be instructed to endeavor to secure assent to the proposed Treaty.

DOMINION BOARD OF TRADE.

This Association was represented at the meetings of the Dominion Board of Trade, held at Ottawa in February last, by Messrs. Alex. Mitchell, M. McCulloch, W. W. Ogilvie, Hospice Labelle, and Robert Spratt.

A semi-annual meeting was also held at St. John, N.B., in July last. Full reports of proceedings at these meetings were printed, and a copy of each sent to every Member of the Corn Exchange. The next Annual Meeting is announced to commence on Tuesday, 19th instant, at Ottawa,—and it has been customary to appoint Representatives of this Association at the Annual Meeting.

THE CENTAL SYSTEM.

An effort was made, at the instance of this Association, during last session of the Dominion Parliament, by the bringing in of a Bill in the House of Commons, to postpone the coming into operation of so much of the Weights and Measures Act, as related to the introduction of the Cental System. The movement proved ineffectual, for the Bill was defeated in the Committee of Banking and Commerce. It was recently announced in the *Official Gazette*, that an Order in Council has been issued, directing that the law shall take effect on and after the 1st of July in the present year.

GENERAL INSPECTION LAW.

Only a few of the amendments proposed by the Association to the Flour sections of the General Inspection Law were adopted by Parliament, while some minor changes, which were not asked for (at any rate by this Association) were made. The number of members in Boards of Examiners was increased by the amended Act, from three to five, and at the request of the Council of the Board of Trade, your Committee of Management nominated the Examiners for Flour and Meal, and for Grain.

Applications for the office of Inspector of Grain having been advertised for, Mr. Thomas Bickerstaff received a certificate of qualification, and was subsequently appointed by the Governor General.

Application for the extension of the provisions of the Act to Labrador and Newfoundland, so far as the inspection of Fish is concerned, was complied with by the Dominion Government.

CANAL IMPROVEMENTS.

A circular letter was received in the early part of the year from the Chief Engineer of the Public Works Department at Ottawa, intimating that the question of Canal enlargement was under consideration, and requesting replies to the following questions :—

1st. What is the cost of transporting grain per bushel direct from Ports on the Upper Lakes to Montreal, by Sailing Vessels of from 300 to 500 tons burden, and by Propellers of a like carrying capacity; also the cost per bushel in each case, and difference in time, if the grain is transhipped at Kingston, and delivered at Montreal by barges?

2nd. What would be the probable cost of the transportation of grain per bushel from Ports on the Upper Lakes to Montreal direct by Sailing Vessels of 1,000 tons burden, and by Propellers of a like capacity; also the cost per bushel in each case, and difference in time likely to be occupied, if the grain be transhipped at Kingston and delivered at Montreal by barges?

3rd. The Welland Canal being now in progress of enlargement to a bottom width of 100 feet, and a depth of 13 feet, or at least sectional area 1,638 feet, locks 270 feet long between the gates, and 45 feet wide, with a depth of 12 feet water on the sills, would the interests of commerce, in your opinion, warrant an expenditure of *Ten Millions of Dollars*, or more, in making the Canals between Prescott and Montreal of like dimensions?

The document was referred to a Special Committee consisting of representatives from this Association and the Board of Trade, who reported unanimously as follows :—

A Special Committee, appointed by the Council of the Board of Trade and the Committee of Management of the Corn Exchange Association, to consider Mr. Page's circular of the 12th March, and reply thereto, having met and discussed the questions contained in it, are of opinion:—

That figures, as to rates of freight, in consequence of great fluctuations therein, are too fallacious to give any true light on the question.

That it is certain that the larger the vessel, whether propeller, schooner or barge, the cheaper will be the freight.

That whatever dimensions be given to the Welland Canal should also be given to the St. Lawrence Canals.

That uniformity of *depth* throughout, from Montreal to the Upper Lakes, is vital importance.

That the enlargement of the St. Lawrence Canal Locks to 270 x 45 x 12, was estimated by the Canal Commissioners of 1870-71, upon full enquiry from Engineers and others, at four and a half millions of dollars; which, allowing for extra cost, labor, etc., would now, it is hoped, not be swelled beyond five and a half to six millions of dollars.

That even if such enlargement should cost ten millions of dollars, it would be far better to incur this cost, than to let part of the great St. Lawrence route remain of less depth than 12 feet,—uniform depth of water being, in the opinion of the Committee, a consideration of greater importance than any other.

BOSTON "COMMERCIAL CLUB."

A large number of members of the Boston Commercial Club having visited this city in December, 1873, and attentions having been paid to them during their brief stay, by members of the Association and of the Board of Trade, a letter was afterwards received, communicating a resolution as follows:—"That the hearty thanks of this Club be tendered to the office-bearers and members of the Montreal Corn Exchange Association, for the courtesies and hospitalities extended to our members on the occasion of their recent visit to Montreal." A suitable acknowledgement was made in reply to the Secretary of the Club.

WEATHER, CROPS, &C.

The weather during the summer of the past year, both in Europe and America, was exceptional. The "heated terms" usual in July and August, were not generally experienced, and the Autumn months were dry. While this condition was favorable, for the most part, to the maturing of crops, it was unseasonable so far as other interests were concerned,—for the absence of rain led to decreased water supply in rivers and streams, and mills which depended upon them for a supply of motive power, had to stop working in many quarters,—in others, only accomplishing a decreased service.

All cereal and root crops in 1874, are understood to have been nearly equal in quantity and quality to the average of former years.

Of the Wheat crop in the United States, the Report of the Agricultural Department at Washington, says,—that in 1874, the yield was both larger in quantity and better in quality than in 1873,—nearly, if not quite equalling, the splendid crop of the

Census year, which aggregated 287,745,626 bushels. As regards the Corn crop, the same authority remarks, that the absence of injurious frosts up to the first of November, was very favorable and served to mitigate the severity of the anticipated reduction in yield and value. As the crop of 1873 was not an average one, the 1874 product is not more than four-fifths of the yield of a good Corn year. The apparent reduction is about 120 millions of bushels; the aggregate of local estimates exceeding, but slightly, 800 millions of bushels.

In Great Britain the land sown in Wheat in 1874, was 3,632,063 acres, showing an increase of 4.1 per cent. (or 141,683 acres) over 1873,—the decrease in Barley being 2.1 per cent. (or 47,930 acres),—and the decrease in Oats 3.0 per cent. (or 79,860 acres).

The Produce trade of 1874, as indicated by the Receipts and Shipments of Flour, Grain, &c. in the tables on p. 11, shows a considerable diminution on the year. Until the month of June the weekly statements indicated a material increase; but a falling off commenced, and the point of decrease was reached in July, continuing steadily until the close of the season.

Prices of Flour and Grain have been lower in 1874 than during a few preceding years,—the lowest and highest prices for Spring Extra Flour, and for U. C. Spring Wheat, being shown for fifteen years in the following table:

Lowest and Highest prices of Flour and Wheat in Montreal during 15 years.

YEARS.	SPRING EXTRA FLOUR, (formerly No. 1 Super) from Canada Wheat, per 196 lbs.		U. C. SPRING WHEAT, per bush of 60 lbs.		YEARS.	No. 1 SUPER. FLOUR, from Canada Wheat, per 196 lbs.		U. C. SPRING WHEAT, per bush of 60 lbs.
