No. 44.

Saint Andrews, New Brunswick, October 31, 1877.

Vol. 44.

Important Decision.

BEFORE THE S. J. COURT OF MAINE. JUDGE WALTON PRESIDING.

FRIDAY.—J. Winslow Jones vs. the New England and Nova Scotia Steamship Company.

An action to recover damages for the loss of sixteen cases of canned salmon valued at \$160, and ninety-three barrels of flour valued at \$790.50. In all \$950.50, both lots destroyed in the fire of August 9th, 1873.

The plaintiff says that he bought one hundred barrels of flour in car which arrived at Portland on the 4th of August; that he obtained leave on the 5th of John Porteous, who was the advertised freight agent of the defendant company, as well as the agent of the Grand Trunk, to ship the flour by the Falmouth that day; that the Falmouth for some reason failed to take it, and that he then obtained leave of the defendant's agents to deposit the flour in the freight house for transportation by the Falmouth on Tuesday the 12th; and that being the first day of sailing thereafter, the delivery was for immediate transportation.

Defence was that as to the salmon they were specially exempt by their bill of lading from loss by fire. And that as to the flour it never was received by them, but if under the proof the jury should find it was so received, then their liability was as warehousemen for negligence only, and not that of common carriers as insurers.

The judge instructed the jury, in substance, that as to the salmon, the exception in the bill of lading was valid, and the burden was upon the defendants to satisfy the jury that the loss by fire did not happen through their own negligence or want of care; and that as to the flour, the jury would find as matter of fact whether the defendants received it either as warehousemen or for immediate transportation; if as warehousemen, then they were responsible only for negligence or want of care; but if for immediate transportation, then they were liable as common carriers and as insurers.

Verdict for defendants. The case will be carried upon exceptions.

Reciprocity.

The public mind has been much exercised over the announcement of Mr. Laurier that the Government of Mr. Mackenzie were about to re-open negotiations for a treaty of reciprocity with the United States. It now appears from information derived from American sources that the question of reciprocity with Canada is expected to come up before Congress at the regular session which commences on the 4th December next. The form in which the question will come up is not indicated, but it is known that in August last a circular was addressed by the Washington authorities to the various Consuls in the Dominion with the object of eliciting information on the trade relations between the two countries. It is now announced that several of these consular agents, including the efficient officers at Kingston and Toronto, have sent in their replies which very fully expose the disadvantages under which Canadian manufacturers labor in competing with their neighbors, and the mutually advantageous trade carried on between the two countries in live stock, barley and other farm produce, and the kinds of manufactured articles which Canada takes from the United States. The fact that Canadians buy American goods so largely is attributed by the Consul at Toronto to their excellent quality, and the superior and attractive styles in which these goods are made; and the cheap prices at which they are sold, enabling the Americans to compete with Canadian manufactures notwithstanding the duty of 17½ per cent, is attributed not to the slaughtering of goods, as some have believed, but to the fact that these goods are manufactured in larger quantities and under advantages due to the larger training of operatives in older establishments. In support of this theory the Consul asserts that the United States are doing a lucrative business with Canada.

Congressman Charles Foster of Ohio, says that he and Mr. Hale of Maine have been chiefly instrumental in getting up the conferences that have been held on the subject of the President's policy. He says they have two objects—first, to let the President and Cabinet know how extensive the disaffection in the Republican ranks is, and, second, to obtain, if possible, some plan of action for the purpose of meeting any resolution that the Democrats might introduce interfering the President's course, which might lead to an open division in the Republican ranks. He desired to prevent any division that would be misunderstood throughout the country.

BOLD ROBBERY.

—In Woonsocket, Rhode Island, about 2 o'clock Monday morning, two robbers entered the tenement of J. W. Smith, in the rear of his shoe store. He was absent. His wife was taken from bed and placed in a small closet, where she was found insensible when Smith returned, at 9 o'clock same morning. She recovered consciousness about noon, and explained that she was awakened by a noise, immediately seized by two men, who threatened to kill her if she made a noise, and carried to a closet, where she became insensible. The robbers secured nearly \$1000 from a box under the bed, and some goods from the store.

The St. Andrews Standard.

Saint Andrews, October 31, 1877.

REMOVAL.

The STANDARD office has been removed to the building immediately opposite the late office, in the building recently occupied by Mr. Bradley. Entrance through the store for the present. The printing and publication are on the second flat.

RETURN OF GOOD TIMES is a pleasant theme to dilate upon, but the "good time coming" which has been so frequently written about, still appears to exist in the dark vista of the future, as there does not appear any near approach to a revival of business. True, the United States journals every few weeks have cheering articles upon the return of active business and buoyant prices; they herald a revival of business generally in the Western States, and perhaps it will like the Colorado beetle work its way to the Eastward and thence into the Provinces. It certainly does appear that the sun of prosperity is fast dispelling the mists of stagnation in the United States, and whatever afflicts that great country, is felt sooner or later in the Dominion. The bulk of trade which is being done West, if reports are correct must be very large, and it is probable that the volume of trade is increasing. Let us hope that it may soon reach New Brunswick.

EXPLANATORY.—Having had to remove the STANDARD office, presses, type, stands, &c., will explain appearance of a half sheet this week. It is no easy matter to obtain suitable premises, and it takes time to arrange cases, &c., even then it requires time to become acquainted with great variety of type in constant use in a small printing office. We are so thoroughly annoyed, that it is our sincere hope that the next change will be a final adieu to printing. The constant strain on the mind and energies, the anxieties, wear and tare of the body, the unrequited labor—the large number of accounts due us, are sufficient to weigh down and wear out any constitution. However, it is the writer's wish to die in harness rather than rust out in idleness. We will continue to work on, and only retire when unable to wield a pen or hold a stick.

POSTAL MATTERS.—Complaints have been made of letters mailed in Ontario and Quebec, for St. Andrews, being carried on to St. John and remained in that city for their destination, causing twenty-four hours delay. We know from personal experience, the great annoyance of this unnecessary delay, and trust that the Post Office Department will remedy it without delay. What is the use of postal cars if letters are not transferred to the proper cars.

NEW TEACHER.—We congratulate the Trustees on having secured the services of Miss A. HANSON for No. 1 Advanced Female Department. Miss Hanson is a thorough disciplinarian, a good scholar, and has the faculty of imparting instruction, while gaining the affections of her pupils.

DEFEATED.—Mr. Laurier, the New Minister of the Interior, has been defeated by Mr. Bourbeau, the Opposition candidate, in Arthabaska, by a majority of twenty-nine.

LOCAL MATTER.

THE FREDERICTON EXHIBITION BUILDING was burnt to the ground, on Monday night last, the work of incendiaries. Two suspicious characters have been lodged in jail. No further particulars.

One of those contemptible men who practice abortion in Ontario, named David Smith, was tried and convicted at Coburg, on the charge of murder for killing a Miss Wade.

Complaints have been made of falling out in proper names to persons passing along the streets. The only remedy we can suggest to our correspondent, is make complaint before the Parish Commissioner.

From late accounts we learn that excavations for tunnel to connect France and England have been commenced on the French side. The nature of the ground has been ascertained, on the English side the chalk formation extends but a short distance.

The work of grading in the Schools is being conducted, and will be finished to-morrow. We are pleased to learn that the pupils have made such progress, that several of them will be transferred to the advanced departments, while the Grammar School will receive a liberal addition to its pupils from No. One Department.

The Weights and Measures Inspector is visiting the towns and cities of this Province. In Ottawa last week the Inspector there scaled 111 weights, 123 measures, and 21 scales, for being unstamped. Spring balances are declared illegal by the law passed last Session.

We are pleased to learn that the work of building up the burnt district in St. John is being carried on with vigor. Already upwards of eight hundred houses are being erected, some of them finished and occupied. The Churches and School buildings are commenced. Several of the building are of brick.

Through freight from Montreal is now brought to St. Andrews, without change of cars since the alteration of the gauge on the N. B. & C. Railway. A Grand Trunk car load of flour for Street & Foster was received last week. There is no doubt as to the benefits which will follow the change of gauge.

The International Scrap Book and Illustrated Magazine is the title of a monthly paper for which E. R. McLean is canvassing the Town. In addition to the publication, as an inducement, the agent furnishes two well executed Oil Chromos 22x30. He will call upon persons and show the paper and copies of the pictures. The chromos are worth double the price asked for the paper.

OBITUARY.

The remains of the late Mr. JOHN AYMAR were brought from Eastport on Monday and interred in the Cemetery at St. Andrews, where he resided for so many years, and had always been closely associated in all his business interests, in which he ever took a prominent part; the result of some of his past labors being of an essential and lasting benefit to the place, viz., supplying the town with water, and lastly the lifting of the Steamboat wharf. In his social intercourse he was honored and respected by all who knew him for his sterling integrity, his many excellencies of character, and true generosity of heart, as well as beloved for his gentle, courteous and cordial sympathies with all.

THE DOUBLE POSTAL CARD.—A new style of postal card is now used in Germany. It consists of two cards of the ordinary size attached together, each having a postal stamp. These double cards are furnished by the Post Office, and sent for the purpose of facilitating the return of answers.

THE POPE.—Of late several newspapers contain telegrams with reference to the Pope's health, his probable successor, and what has been done in Council by the Cardinals. While professing to care little what he does or says, these same journals must be aware that all such reports are incorrect, and emanate from the brain of designing men who have a pet political purpose to serve. One of them recently asserted that the Pope had been dead for some time, and that an eminent Cardinal was administering the affairs of the Roman Catholic Church. The Pope happened to see a copy of the paper, and it is said laughed at the paragraph—and then ordered his Secretary to subscribe and pay for the journal for five years. The following is the latest news with reference to Pius Nono:

The health of Pope Pius Ninth is in a very precarious position, and before long his successor will doubtless have to be appointed. Even in his present prostrated and enfeebled state he likes to see visitors, and have an occasional chat with them, but we are told he has ceased to take an interest in the affairs of the church, and invariably dismisses any one who comes to talk to him upon business. At present, therefore, there is no active Supreme Pontifical head, the affairs of the Papacy being conducted as the telegrams inform us by the heads of the various state departments, and by the presidents of the various congregations. Among the names spoken of as the probable successor of His Holiness, is that of Cardinal Manning. It has also been rumored that the head of the church might be removed to London.

President Hayes's Opinion.

Washington special says that the President in conversation referred to the difficulties encountered during his administration, and pointed out how it would have been impossible for him to take any action which would satisfy the entire Republican party. He found himself confronted with three questions of great importance; one relating to the civil service appointments, one to the currency, and one, the most important in his opinion was the Southern question. It was necessary for him to take immediate action; while others could consider and criticize. Concerning each of these questions, there was a large difference of opinion within the party, and he had no resort but to act as seemed to him to be his duty, and leave the wisdom of his actions to future demonstration.

He regarded the Southern question as of immensely greater importance than the other two, because it affected daily the peace and happiness of hundreds of people both white and black.

In regard to the financial question, he thought the action of natural laws would settle the question, if there were no President and no Congress.

The special session of Congress, now deliberating at Washington, is likely to be extended until December. The President's message is summarized.

It asks that the necessary appropriations be made for the support of the army for the current year at its present maximum numerical strength of 25,000 men. He also asks that appropriations be made for the support of the Navy and Interior Department.

"I take this opportunity also to invite your attention to the propriety of adopting at your present session the necessary legislation to enable the people of the United States to participate in the advantages of the International Exhibition of Agriculture, Industry and the Fine Arts which is to be held at Paris in 1878, and in which this Government has been invited by the Government of France to take part. The Department of State has received many letters from various parts of the country, expressing a desire to participate in the Exhibition, and numerous applications of a similar nature have also been made at the United States Legation at Paris.

THE CORONA WINTER.—A astronomer Royal Smyth, of the Royal Observatory, Scotland, says that the coming winter is going to be exceedingly cold. From the observations of earth thermometers over a period of thirty-nine years, he finds that between 1837 and 1876 three great heat waves from without struck Great Britain; namely, the first in 1846-5, the second in 1858-6, and the third in 1868-9. The next one will probably come in 1879-5 within limits of half a year each way. The periods of minimum temperature, or greatest cold, are not in the middle time between the crests of these three heat waves, but are comparatively close up to them, on each side, at a distance of about a year and a half. Hence the next cold wave is due at the end of the present year, and very high weather may be looked for.

ALLEGED POISON IN SUGARS.—Some attention was attracted last year by numerous letters published by Mr. L. Rossiter, of Chicago, Ill., in the Chicago Tribune, with regard to alleged poisonous effects of sugars. Mr. Rossiter suggested that a large proportion of the sugars in the market might contain poisonous impurities arising from the use of chemicals used upon persons of weak or damaged digestion. In the American Journal of Pharmacy, we find accounts of analyses made by Messrs. J. S. Johnson and S. E. Parkill, of fourteen samples of sugars and syrups furnished by Mr. Rossiter. Neither lead nor arsenic was found; nor did the ash, by ordinary systematic qualitative analysis, reveal other constituents than sodium, potassium, calcium, magnesium, aluminum, and iron compounds, and sulphates, chlorides, carbonates, and silicates. No zinc or tin was found. "It thus appears that the sugars of commerce do not contain the injurious ingredients suggested by Mr. Rossiter.

The Liberator and the Church.

The pastoral of the bishops read in all the Roman Catholic churches on Sunday week, contains the disquisition of the clerical press. In future, the issue between the two political parties in the Province of Quebec will have to be fought on a terrestrial battle-field and with purely mundane weapons. The voice of authority has spoken and there is to be no more anathematizing of political opponents through the columns of the clerical journals; no more interference of the clergy in elections. The self-constituted guardians of the doctrines of the Roman Catholic Church in electing officers controversies find themselves standing alone; and their long continued efforts to reach their adversaries out of the pale of social order have failed, let us hope for ever. It is well that the bishops have seen fit to interpret and make clear the former utterances of the councils on this subject, because a most unwarrantable and disingenuous use was being made of these by as unscrupulous a set of men as ever undertook to push the fortunes of a political party—and their own—irrespective of the means employed to attain the object of their ambition or of the ulterior consequences that might reasonably be expected to follow from their acts. Now that the ground has been cleared of this burning bush, that this "great scandal"—to use a phraseology so much affected by the parties in question—has been made to cease, the real points at issue in Canadian politics will be decided, and men elected as representatives of the people, on their own merits and for considerations of earthly interest.—Star.

HARPER'S MAGAZINE for November is the concluding Number of the Fifty-fifth Volume. The Publishers announce for the coming year new serial novels, by Miss THACKERAY, Miss MERRET, and THOMAS HARDY.

Edward Everett Hall's story, "Back to Back," begun in the current Number, is to be concluded in the December issue. Among the attractions of the December Number will be a new poem, entitled "Keramos" by Longfellow which will occupy fourteen pages of the Magazine.

T. Robinson Warren contributes an exhilarating illustrated article on "Yachting in Blue Waters."

By no means the least interesting article in the Number is Olive Logan's fascinating narrative of Houdin's remarkable career as a prestidigitateur. His most wonderful tricks are explained and illustrated.

The poetry of the Number is contributed by Ellis Gray, Kate Hillard, Helen S. Conant, Fannie R. Robinson, and Philip Bourke Marston.

The Editorial Departments, with their social gossip, scientific and literary intelligence, his sprightly summary, and humorous anecdotes, are as varied and comprehensive as usual, including a very amusing "Drawn."

We notice complimentary allusions in some of our provincial exchanges to the engineering abilities of our friend Walter M. Buck, Esq.—He it appears is entitled to the credit of locating the railway line, out from Hillsboro; his professional services we are happy to observe are appreciated, as they deserve. Mr. Buck is a member of the Association of Civil Engineers, of London.

ISD.

At Winnipeg, Manitoba, on the 21st inst. at the residence of her daughter Mrs. Wool, suddenly of heart disease, Jane Augusta, widow of the late Doctor Murray, and daughter of the late Honorable Harris Hatch, aged 65 years.

TO THE PUBLIC.

In justice to myself, family, relatives and friends, and to the public generally, it is due that I should expose the wicked attempt made by John Best to ruin my character. Best made a complaint against me for burning a School building at Beaver Harbor; I was lodged in the common jail as an incendiary for eight days, and a Bill was drawn up and laid before the Grand Jury of the present County Court, which was justly ignored by that honorable body, as there was not a shadow of evidence to convict me of such a gross outrage. I was therefore restored to the liberty which as an innocent man I was entitled to. I now solemnly declare that not even in thought did I ever intend to injure my neighbors by so horrible a deed as I have been unjustly accused of by John Best and his unprincipled associates. I have to be borne a good character, and I intend to keep it. I have several respectable friends who will bear testimony to the truth of the foregoing statements, and I trust the papers which published the scandalous statement of my being guilty of arson, will do me the favor to contradict the false report.

MANHOOD:

HOW LOST, HOW RESTORED!!

We have recently published a new edition of Dr. CUTLER'S CELEBRATED ESSAY of the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, impediments to Marriage, etc. resulting from excesses.

Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author in this admirable Essay clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured, without the dangerous use of internal medicine, or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This Lecture should be in the hands of every youth and man in the land.

J. JOHNSON,
Commissioner of Customs

"NOT PREPARED."—The "Dyavol," in the November Harper, has this from the very down Eastern most section of our precious country:

It is customary with the students in our college to say "Not prepared," when called upon to recite a difficult and not well memorized passage. On a hot summer afternoon, in the year—, the class was sleepily stumbling through the introduction to Butler's *Analogy*. The reverend doctor was quite as familiar with the subject matter as with the numbers of chapters and sections, and had a way of his own in calling for a recitation, which sounded quite as much like a call to judgment as a call to recite. The lesson was going badly, and the doctor, nestling in his chair, called out, "Mr. T—, you may pass on to the 'Future Life.'"

Mr. T—was too much of a wag to let the opportunity slip, and promptly responded, "Not prepared."

The reader can easily imagine the effect on the risibles of the class.

An old darkey fishing on a wharf at Galveston was heard talking to the fish he saw swimming around his line in this fashion: "Gim me a bite, honey. De children am a crying down to my house, and I tell you I's-fish or nuffin' in dat establishment!"

"My dear boy," said a mother to her son, as he handed round his plate for more turkey. "This is the fourth time you've been helped. 'I know, mother,' replied the boy, but that turkey picked at me once, and I want to get square with him."

Mr. Babcock of Burrville Vermont, 61 years of age took his first ride on a railroad last week; yet he has lived within four miles of a station for years. Some people are in no hurry to achieve notoriety.

New Brunswick, ss,

To the Sheriff of the County of Charlotte, or any Constable in the said County, Greeting:

WHEREAS Jane Frankland, Administratrix of the Estate and Effects of Simeon J. Frankland, late of the Parish of Grand Manan, in the said County of Charlotte, deceased, hath by her petition bearing date the second day of June, instant, represented that the personal estate of the deceased which has come to her hands is insufficient for the payment of the debts due and owing by the said Estate, and hath prayed that Licence may be granted to her to sell a part of the Real Estate of the said deceased, sufficient for the payment of the debts due by the said Estate.

You are therefore requested to cite the heirs law of the said Simeon J. Frankland, and all heirs interested, to appear before me at a Court of Probates, to be held at my office in Saint Andrews, a SATURDAY the 30th day of JUNE instant at eleven o'clock in the forenoon, for the consideration of the said petition, and the granting (if deemed necessary) of such Licence.

Give under my hand and the Seal of the said Court, the 2nd day of June, A. D. 1877.

Blanks of Every Description Printed at this Office.

WHAT PAYS? 1877.

IT PAYS every Manufacturer, Merchant, Mechanic, Inventor, Farmer, or Professional man, to keep informed on all the improvements and discoveries of the age.

IT PAYS THE HEAD OF EVERY FAMILY to introduce into his household a newspaper that is instructive, one that fosters a taste for investigation, and promotes thought and encourages discussion among the members.

The Scientific American

which has been published weekly for the last thirty years, does this, to an extent beyond that of any other publication; in fact it is the only weekly paper published in the United States devoted to MANUFACTURES, MECHANICS, INVENTIONS, and NEW DISCOVERIES in the Arts and Sciences.

Every number is profusely illustrated and its contents embrace the latest and most interesting information pertaining to the Industrial, Mechanical, and Scientific Progress of the world. Descriptions, with beautiful Engravings of New Inventions, New Implements, New Processes, and Improved Industries of all kinds; Useful Notes, Receipts, Suggestions and Advice by Practical Writers Workmen and Employers, in all the various arts forming a complete history of New Inventions and Discoveries containing a weekly record, not only of the progress of the Industrial Arts in our own country, but also of all New Discoveries and Inventions and every branch of Engineering, Mechanics, and Science abroad.

THE SCIENTIFIC AMERICAN has been the foremost of all industrial publications for the past thirty years. It is the oldest, largest, cheapest and the best weekly illustrated paper devoted to Engineering, Mechanics, Chemistry, New Inventions, Science and Industrial Progress, published in the world.

The practical Receipts are well worth ten times the subscription price, and for the shop and house will save many times the cost of subscription.

MERCHANTS, FARMERS, MECHANICS, ENGINEERS, INVENTORS, MANUFACTURERS, CHEMISTS, LOVERS OF SCIENCE, and PEOPLE OF ALL PROFESSIONS, will find THE SCIENTIFIC AMERICAN useful to them. It should have a place in Family, Library, Study, Office and Consulting Room; in every Reading Room, College and School. A new volume commences January 1st, 1877.

A year's number contains 832 pages and Several Hundred Engravings. Thousands of volumes are preserved for binding and reference. Terms, \$3.20 a year by mail, including postage. Discount to Clubs. Special circulars, giving Club rates, sent free. Single copies mailed on receipt of 10 cents. May be had of all News Dealers.

Patents. In connection with the SCIENTIFIC AMERICAN, Messrs. Munn & Co. are Solicitors of American and Foreign Patents, and have the largest establishment in the world. More than fifty thousand applications have been made for patents through their agency.

Patents are obtained on the best terms. Models of New Inventions and Sketches examined, and advice free. A special notice is made in the Scientific American of all Inventions Patented through their agency, with the name and residence of the Patentee. Patents are often sold in part or whole, to persons attracted to the invention by such notice. A pamphlet containing full directions for obtaining Patents sent free. THE SCIENTIFIC AMERICAN Reference Book, a volume bound in cloth and gilt, containing the Patent Law, Census of the U. S., and 742 Engravings of mechanical movements. Price 25 Cents.

Address for the Paper, or concerning Patents, MUNN & CO., 37 Park Row, New York, or British Office, Cur. F. and 7th Sts., Washington D. C.

VINEGAR BITTERS

VEGETABLE FREE FROM

PURELY CALIFORNIA

VINEGAR BITTERS

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BITTERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative, as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilious Diseases.

If men will enjoy good health, let them use VINEGAR BITTERS as a medicine, and avoid the use of alcoholic stimulants in every form.

R. H. McDONALD & Co.,

Druggists and General Agents, San Francisco, California,

and cor. Washington and Charlton Sts., New York.

Sold by all Druggists and Dealers.

No person can take these Bitters

according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.

Grateful Thousands speak of VINEGAR BITTERS as the most wonderful Invigorant that ever sustained the sinking system.

Bilious, Remittent, and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no emetic for the purpose equal to Dr. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark-colored vomited matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertisement.

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipels, Swelled Neck, Gout, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc., etc. In these, as in all other constitutional Diseases, WALKER'S VINEGAR BITTERS have shown their great curative powers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys, and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases.—Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetter, Salt Rheum, Blisters, Spots, Pimples, Pustules, Boils, Carbuncles, Ringworms, Scald Head, Sore Eyes, Erysipelas, Itch, Scour, Discolorations of the Skin, Hiccers and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no antihelmintics, will free the system from worms like these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of womanhood or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Jaundice.—In all cases of jaundice, rest assured that your liver is not doing its work. The only sensible treatment is to promote the secretion of the bile and favor its removal. For this purpose use VINEGAR BITTERS.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
