Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

- Coloured covers/
Couverture de couleur
- Covers damaged/
Couverture endommagée
- Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
- Cover title missing/
Le titre de couverture manque
- Coloured maps/
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- Bound with other material/
Relié avec d'autres documents
- Tight binding may cause shadows or distortion
along interior margin/
La reliure serrée peut causer de l'ombre ou de la
distortion le long de la marge intérieure
- Blank leaves added during restoration may
appear within the text. Whenever possible, these
have been omitted from filming/
Il se peut que certaines pages blanches ajoutées
lors d'une restauration apparaissent dans le texte,
mais, lorsque cela était possible, ces pages n'ont
pas été filmées.
- Additional comments:/
Commentaires supplémentaires:

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks
to the generosity of:

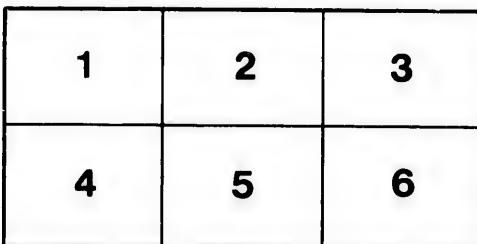

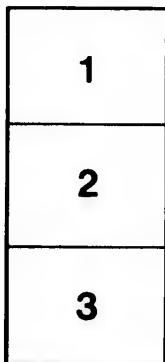

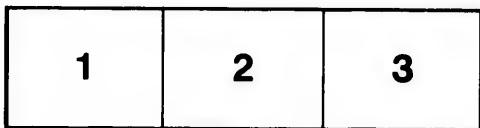

National Library of Canada

The images appearing here are the best quality
possible considering the condition and legibility
of the original copy and in keeping with the
filming contract specifications.

Original copies in printed paper covers are filmed
beginning with the front cover and ending on
the last page with a printed or illustrated impres-
sion, or the back cover when appropriate. All
other original copies are filmed beginning on the
first page with a printed or illustrated impres-
sion, and ending on the last page with a printed
or illustrated impression.

The last recorded frame on each microfiche
shall contain the symbol → (meaning "CON-
TINUED"), or the symbol ▽ (meaning "END"),
whichever applies.

Maps, plates, charts, etc., may be filmed at
different reduction ratios. Those too large to be
entirely included in one exposure are filmed
beginning in the upper left hand corner, left to
right and top to bottom, as many frames as
required. The following diagrams illustrate the
method:

L'exemplaire filmé fut reproduit grâce à la
générosité de:

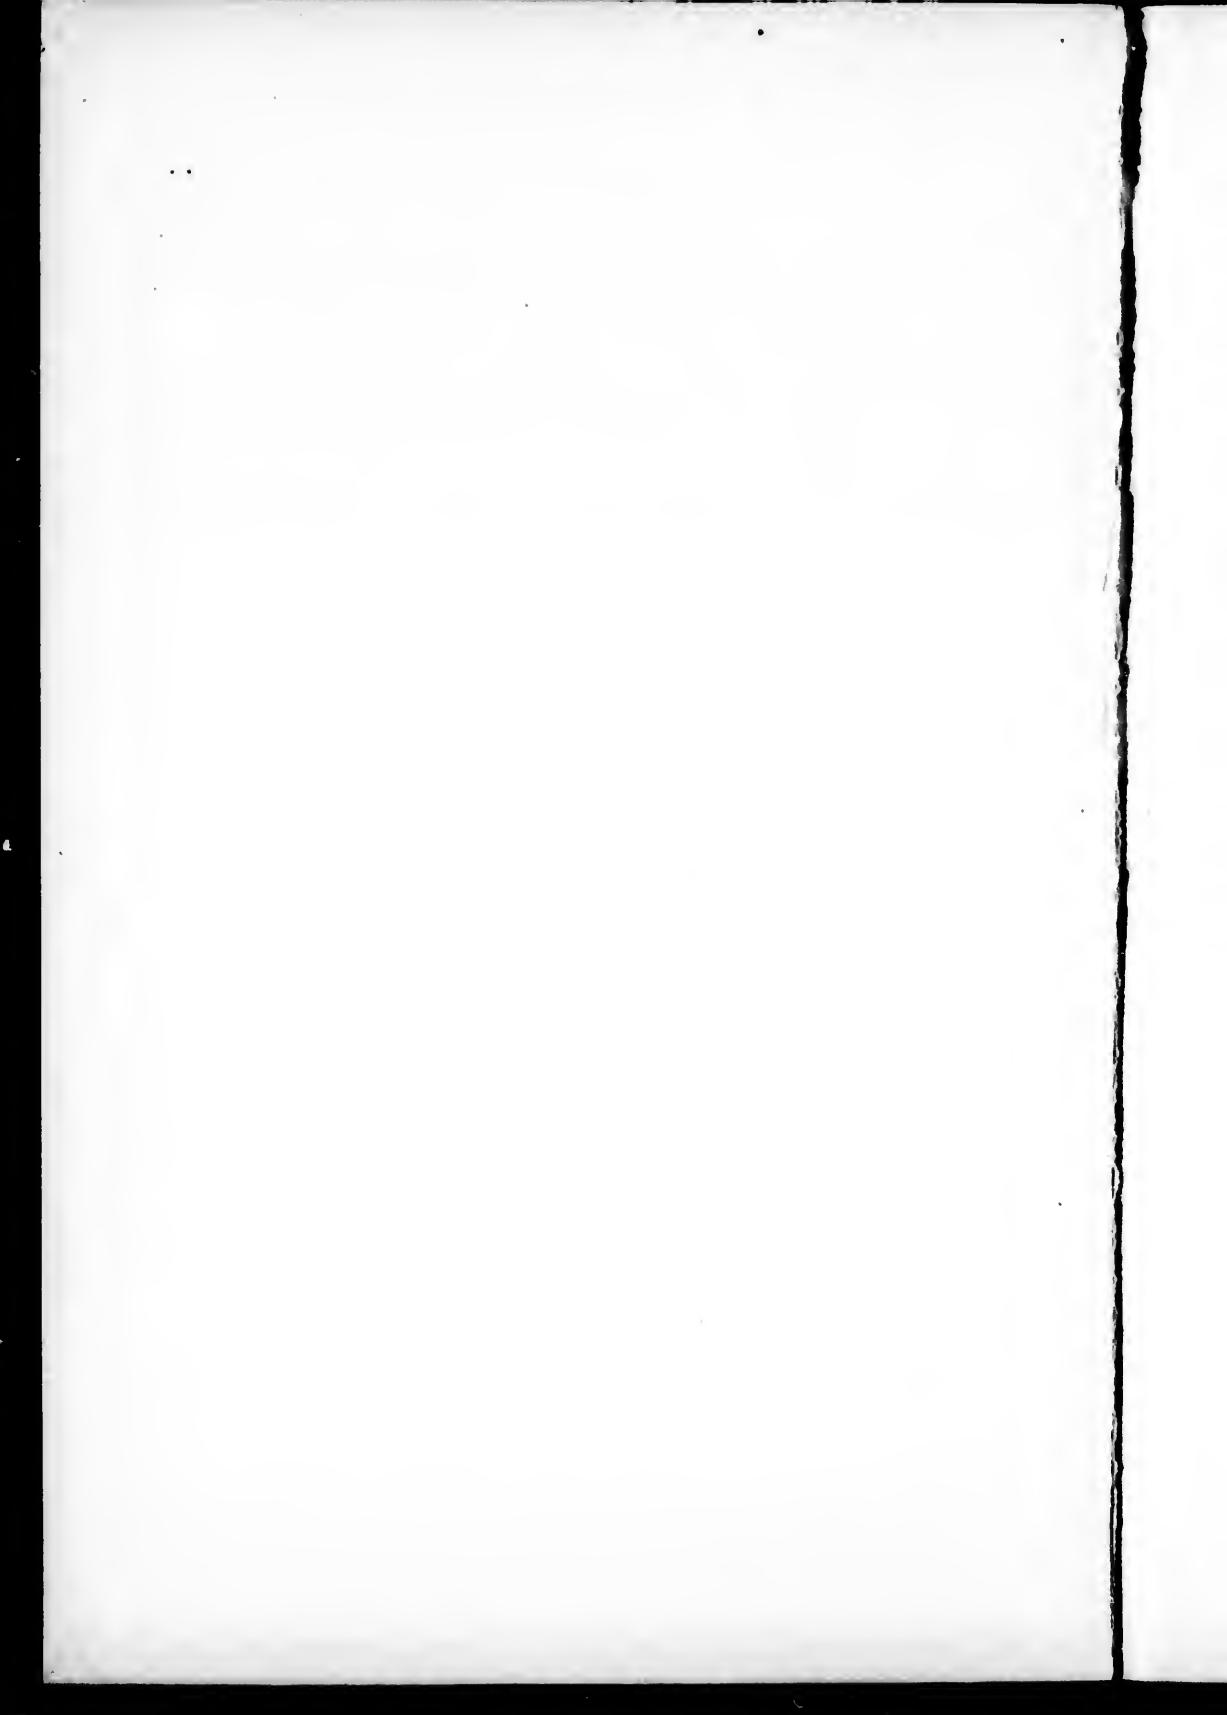

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le
plus grand soin, compte tenu de la condition et
de la netteté de l'exemplaire filmé, et en
conformité avec les conditions du contrat de
filmage.

Les exemplaires originaux dont la couverture en
papier est imprimée sont filmés en commençant
par le premier plat et en terminant soit par la
dernière page qui comporte une empreinte
d'impression ou d'illustration, soit par le second
plat, selon le cas. Tous les autres exemplaires
originaux sont filmés en commençant par la
première page qui comporte une empreinte
d'impression ou d'illustration et en terminant par
la dernière page qui comporte une telle
empreinte.

Un des symboles suivants apparaîtra sur la
dernière image de chaque microfiche, selon le
cas: le symbole → signifie "A SUIVRE", le
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être
filmés à des taux de réduction différents.
Lorsque le document est trop grand pour être
reproduit en un seul cliché, il est filmé à partir
de l'angle supérieur gauche, de gauche à droite,
et de haut en bas, en prenant le nombre
d'images nécessaire. Les diagrammes suivants
illustrent la méthode.

TABLE

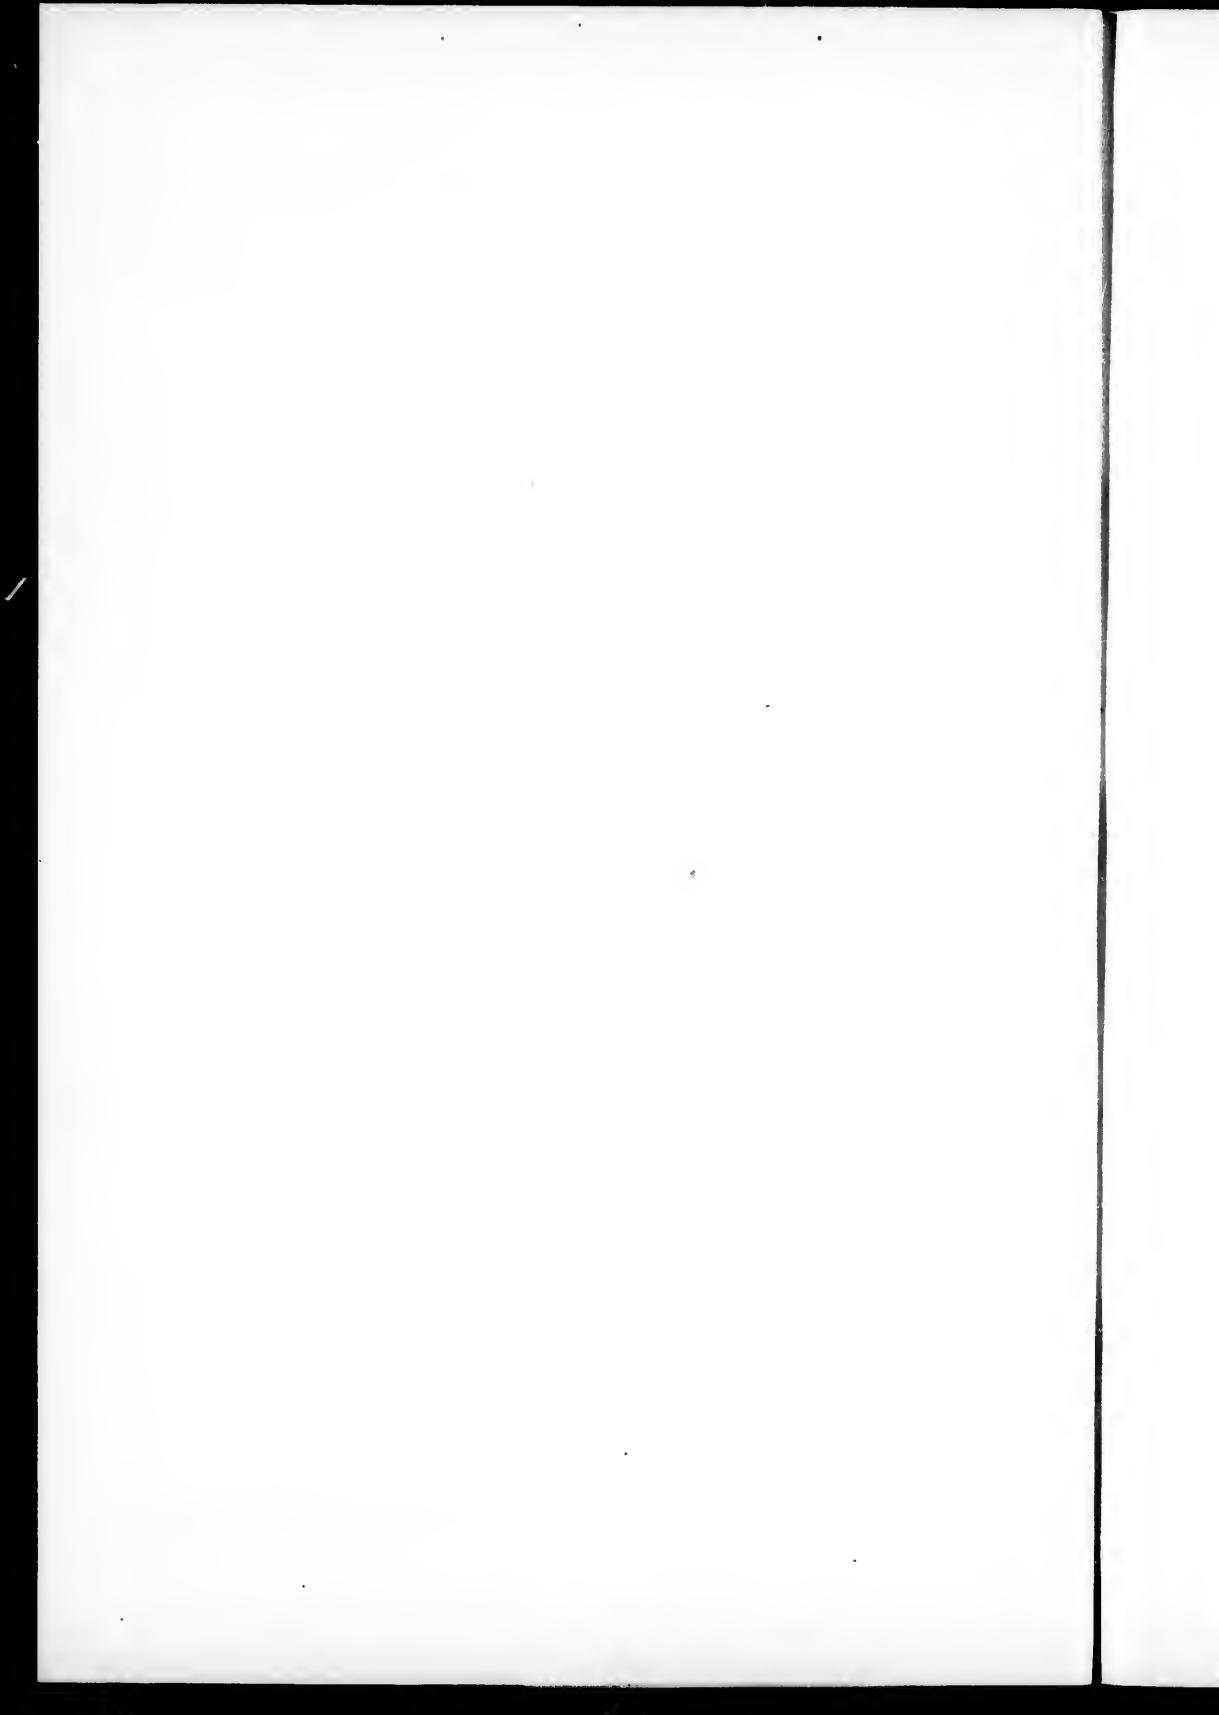

—FOR—

FINDING THE HOUR ANGLE

WITHOUT LOGARITHMS.

Entered according to Act of the Parliament of Canada in the year 1898, by P. J. LEECH,
at the Department of Agriculture.

Copyright applied for in the United States.

PREFACE.

This Table was prepared for the use of Surveyors in Canada, to enable them to find the Hour Angle from a morning or afternoon altitude of the sun without the use of Logarithms, with sufficient accuracy to determine the Azimuth of Polaris at any time without waiting for an elongation (a Table for which is in preparation).

This Table, however, gives the Hour Angle so close that it is available for Navigators, the error varying from 0 to 4 seconds, the greatest error occurring where the Declination is 0, the Latitude 58° and the Altitude 28° 45'.

It can be used in the Northern or Southern Hemisphere between the Latitudes 40° and 60°.

EXPLANATION OF THE TABLE.

The column headed Alt. contains the altitudes of the sun's centre corrected for Parallax and Refraction.

The column headed H. A. contains the Hour Angle corresponding to the Altitude which is on the same line, and to the Latitude and Declination which is above it.

The column headed D. gives the variation of the Hour Angle for one minute of Altitude.

The Table is computed to the nearest second for every Degree of Declination from 0 to 24 N., for every degree of Latitude from 40 to 59 N., and for every 30 minutes of Altitude within limits of four degrees.

Bessel's Refractions from Altitude 24° to 44° will be found on page

METHOD OF USING THE TABLE.

(1.) On the day of observation the observer shall note the Declination of the sun, and consulting the Table, shall time his observation, so that it shall fall within the limits of the Altitudes for that degree of Declination and those of the one following.

Having taken his Altitude and corrected it for Refraction, Parallax and Semidiameter, he shall take from the Table the Hour Angle due to the next lower Altitude, next lower Latitude and next lower Declination. Multiply the minutes and seconds of the corrected observed Altitude by the number under D, and apply it to the Hour Angle with the sign minus.

Multiply the difference between the Hour Angles due to the two successive degrees of Latitude between which lies the Latitude of the place, by the minutes and seconds in the latter and apply to the Hour Angle with the sign minus. Call the result A.

Proceed in the same manner, but using the next higher Declination, and call the result B.

Subtract A from B, multiply the difference by the minutes and seconds of the Declination, add the product to A. The result will be the Hour Angle.

N.B.—The result of each of those multiplications is seconds of time.

The following examples will illustrate the method:

EXAMPLE 1.

Corrected Altitude.....	°	'	"	°	'
41 48 20 or 41 48.33					
Latitude of place	46	27	10 "	46	27.17
Dec'n corrected for Lon.....	19	23	38 "	19	23.63
Tabular Hour Angle, Dec. 19°.....				h. m. sec.	
sec.	3	17	9		
18.33 × 6 = 109.97	=	—	1 50		
27.17 × 1.83 = 49.72	=	—	49.7	h. m. sec.	
				3 14	29.3 = A
Tabular Hour Angle, Dec. 20.....				3 21 22	
sec.					
18.33 × 6 = 109.97	=	—	1 50		
27.17 × 1.62 = 44.01	=	—	44	3 18 48 = B	
				4 18.7	
B-A = 4.31 which multiplied by 23.63 gives 101.9.	=	—	1 41.9		
Adding to A gives Hour Angle				3 16 11.2	

EXAMPLE 2.

Corrected Altitude	°	'	"	°	'
39 14 50 or 39 14.83					
Latitude of place.....	57	12	40 "	57	12.67
Dec'n corrected for Lon	22	9	20 "	22	9.33
Tabular Hour Angle, Dec. 22				h. m. sec.	
sec.	3	25	32		
14.83 × 7.9 = 117.2	=	—	1 57.2		
12.67 × 3 = 38	=	—	38.0	h. m. sec.	
				3 22	56.8 = A
Tabular Hour Angle, Dec. 23				3 32 3	
sec.					
14.83 × 7.8 = 115.7	=	—	1 55.7		
12.67 × 2.65 = 33.6	=	—	33.6	3 29 33.7 = B	
				6 36.9 = B-A	
6.62 × 9.33 = 61.8	=	—	1 1.8		
Adding to A gives Hour Angle	=	—	3 23 58.6		

(2.) If the minutes of the Observed Altitude when corrected lie between 15 and 30, or between 45 and 60, and the minutes of the Latitude and Declination are each greater than 30, or if any two of those three quantities fulfil these conditions, take out the Hour Angle due to the next higher Declination, Latitude and Altitude. Proceed as in (1) but using the sign plus where minus is mentioned, and subtracting from instead of adding the final result to A.

The following example will illustrate the method:

EXAMPLE.

Corrected Altitude	25	47	20
Latitude	56	34	40
Dec'n corrected for Lon.	5	36	10
Hour Angle, Dec. 6, Lat. 57, Alt. 26... sec.	3	18	36
$12.7 \times 8.8 = 111.8$ =	+ 1	51.8	
$25.20 \times 5.4 = 113.8$ =	+ 1	53.8	
	3	22	21.6 = A

Hour Angle, Dec. 5, Lat. 57, Alt. 26... sec.	3	10	44
$12.7 \times 9 = 114.3$ =	+ 1	54.3	
$25.3 \times 4.9 = 124.0$ =	+ 2	4.0	
	3	14	42.3 = B
	7	39.3	= A-B
	$7.6 \times 23.8 = 180.9$ =	3	0.9
	A	=	3 22 21.6
Hour Angle....	3	19	20.7
