THE PROVINCIAL EXHIBITION BUILDING, LONDON, C.W.

DESCRIPTION OF THE BUILDING.

The above Engraving, from Drawings furnished by WILLIAM ROBINSON, Esq., the Architect, represents the new and spacious EXHIBITION BUILDING, now completed for the Provincial Show of 1861, and the following description will put the reader in possession of some of the leading features which characterise the noble structure:—

The ground plan of the building is a regular octagon, its dimensions from opposite angles, being 186 feet. The space afforded by the ground area is upwards of 24,000 feet, while the galleries give an additional space of 4,000 feet more. The external wall is built of white brick, on a foundation of rubble masonry, and concrete, and is twenty-one feet in height. The entrance to the building is through eight doorways, one at each angle, each eight feet wide and fourteen feet high. In the brick wall on each side of the octagons, and between doorways, are five spacious windows, making

on the ground floor forty windows. The roof of this portion of the structure is covered with felt, gravel, &c. The arrangement of the doors will afford a ready ingress and egress to the building, besides securing a thorough draft for the purposes of ventilation. The second tier of the building containing the gallery, rises to the height of thirty-two feet above the ground line, and 114 feet in diameter from opposite angles, giving a wall accommodation of more than 800 lined feet, lighted with 48 windows, every alternate one being hung on a pivot to admit of ventilation. The ascent and descent to the upper portion of the building is provided for by two stairways, one being intended for the entrance and the other for the exit of the public, and leading in opposite directions, so as to divide the crowd. The third tier of the building is a continuation of the inside gallery wall, and runs to the height of forty feet above the ground line. This tier supports the cupola, and is covered with a shingle roof. The interior view is clear, and not intercepted by any timbers to the height of eighty-seven feet. The full height of the building to the top of the flag-staff is 114 feet; the

dimensions of the cupola, twenty feet diameter by thirty-one in height; area of the ground floor and gallery, 28,000 feet, being about the same area as the Hamilton Exhibition Building, and 4,000 feet less than the Toronto Building. The sheeting of the roof is painted a blue color, the timbers a drab. Provision is made for a band of music in a suitable situation. The building is designed and constructed with a view to the purposes for which it is erected, and also with a due regard to economy. The Architect, a citizen of London, has been happy in designing and completing a building well adapted for the purposes of the Exhibition, and that, too, at a cost under \$3,000. The building is of the most permanent character, the best stone, brick and lumber, being used in its construction, while the workmanship is of a superior order. Mr. Alexander Campbell was the contractor, and by his exertions has succeeded in having it finished several weeks before the contract time. On the whole, it may be said that the London Exhibition Building is a credit to the Architect, the Contractor, and the Local Committee who have used so much energy in pushing it to its early completion.

LET THE MACHINES SPEAK FOR THEMSELVES. TESTIMONIAL.

Hamilton, C.W., March 12, 1861. We, the undersigned, having visited the Sewing Machine Manufactory of Messrs. R. M. WANZER & Co., located in this City, and examined the Machines made by them, take great pleasure in recommending it to the people of Canada as an enterprise worthy of patronage, and also to the encouragement of Canadian Manufactures.

It gives me great pleasure to say to those that wish Sewing Machines for manufacturing purposes, that I think that those manufactured by R. M. WANZER & Co., Hamilton, are equal to any that I ever saw manufactured in the States. I have been using Singer's machine, manufactured by I. M. SINGER & Co., New York, for a series of years. Some six months since I purchased one of WANZER & Co.'s machines, the work of which pleased me so much in the manufacture of Boots and Shoes, I disposed of those I had, made by I. M. SINGER & Co., and am now running to my entire satisfaction.

Being permanently located in this place, at an expense of many thousands of dollars, we are resolved to establish a reputation and a name throughout Canada which will be a guarantee of the sales.

GOOD FOR MAN & BEAST

"They can't Keep House without it."

DISCOVERED AT LAST

EUREKA! EUREKA! Greatest Cure in the World for Pain!

Salmon's English White Oils, EQUALLY GOOD FOR MAN AND BEAST.

THIS ARTICLE CURES BEYOND A PRE-ADVENTURE, and in many cases almost instantaneously, Headache, Earache, Rheumatism, Neuralgia, Paralysis, Asthma, Piles, Gout, Glaucoma, affections, Fever and Ague, (what the paragon is on) Tetter, Polio, Scellings and Cutaneous Diseases of all kinds, Cramps, Deafness and all Bronchial affections; also, Spavin, Kingstone, Splenitis and Stata, or Bruises in Horses and Cattle.

The proprietor feels warranted in saying that the English White Oils will more effectually, permanently and rapidly, relieve aches and PAINS than any other remedy extant, and this not in cases of functional derangement only, but in organic diseases by restoring that equilibrium, and the circulating fluids, which is the indispensable condition of sound health.

Sold by all respectable druggists and dealers in various medicines throughout the country.—Price 75 cents per bottle.
