Miramichi Advance.

CHATHAM, N. B., NOVEMBER 19, 1903.

Caution Very Necessary.

An Ottawa despatch of last Monday says: "Exhibition Commissioner, Mr. Wm. Hutchison; F. W. Hodson, Dominion live stock commissioner; J. A. Rudlock, Dominion dairy commissioner, and Mr. W. G. Barron, returned this morning from St. Louis, where they have been in connection with the Canadian exhibit to be sent there next year. They had a long consultation with the St. Louis Fair authorities in connection with the customs arrangements. Mr. Hutchison said today that the St. Louis Fair directors had already done a good deal, but after discussing the situation with them, Mr. Hutchison and himself had decided to put Canada's case in black and white."

Mr. Hodson appears to take the right view of the matter. Understandings that may be had by Canadian exhibitors with exhibition managers in the United States when questions of customs duties or claims may arise, should not only be in writing, but there should be all possible guarantees of their being carried out. The chief object of the exhibition managers is to secure as many and as valuable exhibits as possible, in order to make their shows attractive to the crowd, on whose attendance they rely to make their undertakings pay. The managers will directly make almost any promise that may seem reasonable, while persons supposed to be of the management, but who are irresponsible will give any kind of assurance that prospective exhibitors will be satisfied with. When the Canadian exhibitor, after getting his property into the United States, finds that he is required to deal with the customs people of that country, he too often finds that verbal understandings with the exhibition managers are worthless and he must pay the customs demands before he can even place his property on exhibition. That has been the experience of even one of the Canadian provincial governments in the United States, the Treasury Board of which received and retained some hundreds of dollars as duties on museum exhibits which went to a Boston exhibition, on the understanding that they would be free of duty, and were brought back to the province immediately after the show was over. All the facts were presented to the Treasury Board by memorial of the provincial government, but federal agents sharp dealing outweighed all ideas of equity and international courtesy, and the money paid was not returned.

New Records of Jesus' Words Discovered.

A London despatch of last Saturday says that many hitherto unknown sayings of Jesus Christ have been discovered in Egypt by archaeologists, who have dug up papyrus buried since the second century, 100 miles south of Cairo. Dr. Bernard P. Grenfell, at the general meeting of the Egypt Exploration fund here, yesterday, gave the following details: "The most important discovery of the past few years is the discovery of a new and valuable information on the history of the world and marked the recovery of hitherto lost classical literature of Egypt."

Immense Resources of Canada.

THEY SHOULD MAKE A CORRESPONDING EXERTION AT THE HOME. It is now concluded that the Canadian intends to take the St. Louis World's Fair of 1904 will surpass everything which has been hitherto undertaken in the Dominion. There is not the slightest doubt that our country will be the first of natural resources, forestry, fisheries and pulp industries, when the matter of awards and prizes is discussed by the judges of the exhibition.

Provincial Claims.

The Halifax Award is expected to come up for decision by the Supreme Court of Canada at the same time as other questions relating to the fisheries which are to be submitted in the special case. In addition to the larger claims arising in connection with the fisheries three smaller cases have been standing, and we learn that they are to be disposed of very shortly. Indeed one amount, being the balance of the Eastern Extension money, has been paid within the last few days; another amount of \$8000, being one half the cost of wharves on the St. John river and tributaries, constructed by the Provincial Government—the claim for which has been standing for several years—was provided for at the recent session of parliament.

Riparian Ownership in Canada.

A case possessing very great interest for salmon fishermen who pursue their sport in the Dominion of Canada is now engaging the attention of the Superior Court of the city of Quebec. The action has been taken by the Attorney-General of the Province at the instance of the Fish and Game Department of the Government, and seeks to have it declared that the salmon fishing of the Miramichi with red and blue, which is valued at several thousand dollars, is vested in the Government, notwithstanding that the land on either side of the fishing pools was conceded many years ago. In the endeavor to enforce its claims to the proprietorship of the fishing rights, the Government some time ago leased these rights to a Canadian for \$2,500 a year. The rights of the lessee and his friends to enter on the land for the purpose of fishing is denied by the riparian owners, and the present lawsuit is the interpretation of a judgment of the Privy Council in fishery matters so far as riparian rights are concerned, and to avoid conflict on the river. Incidentally, the navigability of the river is called in question, and the judgment in the case may affect the rights of the many American salmon fishermen who have paid out large sums of money for riparian rights in Canada. It is said that the Government has paid for the fishing rights in the Miramichi by the Boston party, who conditionally upon the title being good, purchased the riparian rights of Mr. Fraser, and many others are said to have paid quite as much and even more for the riparian rights to the fishing in certain portions of the Restigouche and other Canadian rivers. If the Government views this case it will doubtless assert its rights in other rivers similarly circumstanced, and there is no doubt whatever as to the judgment in the Superior Court going it will be finally appealed to the highest court in the empire.

Edison's Latest.

Mr. Edison is not a man given to making startling promises which do not result in performance, so that his claim of having at last solved the problem of generating electricity at a trifling cost for American use may be accepted as the announcement of an accomplished fact. And such a fact is little less than a miracle, for it means the production, at will, of an almost limitless and widely adaptable power. The electrical generator which Mr. Edison has perfected after years of toil derives its power from a so-called field of marvellous potency. It will make it possible for the day laborer, as well as the millionaire, to have his home with electricity and to have some sort of a motor vehicle. For a few cents a day light and power may be produced in sufficient quantities to supply the needs of any family, and the generator is so simple that any person of ordinary intelligence can act as engineer. In the inventor's own words, "You can run your house for electric bells or telephones from room to room, or for anything electricity will do, and the batteries in your automobile will operate them. You can do this in your own house, and you can do it with your own plant that it is not worth mentioning. * * * It has always been my ambition to bring the uses of electricity within the reach of moderate means." Mr. Edison was the public that there is yet much work to be done before the harvest he has sown can be reaped. But the invention is perfected and the problem of cheap electrical generation is definitely solved.

The Gorms of Ontario.

Not only attack the passages of the head and throat but finally reach the lungs and cause consumption. Nothing destroys catsarrh so quickly as frequent heating. Catarrh disease which relieves the cough, stops the discharge, kills all germs from the throat. "I consider Catarrh disease as equal as a cure for catarrh and lung trouble." writes J. E. W. of the Ontario. "I cured me after many good doctors failed to even relieve my trouble." Catarrh disease can fall to cure—It guaranteed. Two months treatment \$1.00; trial six 25c.

from room to room, or for anything electricity will do, and the batteries in your automobile will operate them. You can do this in your own house, and you can do it with your own plant that it is not worth mentioning. * * * It has always been my ambition to bring the uses of electricity within the reach of moderate means." Mr. Edison was the public that there is yet much work to be done before the harvest he has sown can be reaped. But the invention is perfected and the problem of cheap electrical generation is definitely solved.

Notice of Seed Control Act.

A copy of bulletin No. 15, entitled "Bill No. 200, Reprinted as Amended: An Act Respecting the Inspection and Sale of Seeds of Cereals, Legumes and Grasses" has been received. This pamphlet is issued for general distribution for the purpose of serving as a notice to the interested public, and also to provide means for the public to be kept in the possession of the Bill in its relation to the operations of seed producers, seed merchants and seed consumers. The Bill as amended by the Committee of the Whole during the recent session of parliament, provides that seeds of cereals, grasses, clovers or forage plants which contain the seeds of certain noxious weeds named in the Bill, will be prohibited from sale, and that the seeds for uniform methods of grading, according to fixed standards of purity and vitality, the Timothy, Alkali, and Vicia Clover seeds offered for sale in Canada.

Condiments or Correctives for Swine.

DEPARTMENT OF AGRICULTURE, Ottawa, Ontario. Commissioner's Branch. It has been recently ascertained that a highly effective corrective of some kind to maintain the digestive system in a normal condition of health, and the latter the greater the necessity, says Live Stock Commissioner, F. W. Hodson. When the digestive organs become clogged with fat their ability to digest and assimilate is weakened. When this further proceeds to the point where the animal is unable to digest its food, it does not get up the pasture from pure loss of exercise, nor does he die because of insane madness. He rots to "obtain something for which his system craves. It is this condition that causes the pig to grow fat and lean at the trough and sides of the pen; and hogs have been known to tear apart brick walls in order to get at the mortar. The cure of this insidious ailment, on account of the variations they disclosed from accepted tests. A valuable find was made in Pappi, written in Latin, giving the text of the Epistle to the Hebrews and an epistle of Livy's six lost books. This with other papyrus covering the period 180 B. C. to three hundred years ago, and which contained much valuable information on the history of the world and marked the recovery of hitherto lost classical literature of Egypt.

Edison's Latest.

NEWS AND NOTES.

Edward Nickerson, of this town, picked up, Monday evening, a stick of dynamite and took it home to throw it out. While holding the dynamite in his hands, it slipped from his grasp and fell on the stove, which was red hot. An explosion resulted, which led to the unfortunate man's left hand at the wrist.—Liverpool (N. S.) Advance.

Some extraordinary developments are expected in connection with the application of John Farmer, of Moncton, to prohibit the sale of his deceased wife's real estate for \$2500. Two daughters dispute the right to administration of John Farmer on the ground that his name is John Buckingham, and that he had a wife living in Halifax when he was married to their mother. John Farmer was Mr. Farmer's fourth husband. The case will come up again in January.

A terrible accident occurred at Newford on the New Kircalla branch of the C. P. R. on Friday afternoon, 13th. A motor train with a caboose in front crashed into a number of cars on a track which had been left open. There were 1600 horses on board, returning to their boarding cars after the day's work. The caboose was teleported by a fall over and five of the occupants killed. One man was instantly killed. Another lost both legs and died before reaching Brandon Hotel. A third is in a very low condition. The killed and seriously injured are: George Edgar, an Englishman, sustained a broken knee and internal injuries; he will probably recover. Several others sustained less serious injuries.

John Thompson, a well-to-do farmer, living in New Jersey, near the Delaware River, was working on a fence along the road when he was struck by a horse coming along searching for some last article in the road. Injury revealed that the stranger had dropped a \$500 diamond ring a few hours before. He said he would give \$100 to the finder of the ring. The stranger found the ring in a hole in the fence. The farmer happened out and found it to be the lost diamond. He negotiated for the possession of the stone and finally secured it for \$250. The ring was a 10-carat stone, but failed to locate the well-dressed stranger. Later he learned from a jeweller that rings such as it had were worth 20 cents each, if well cleaned.

An extraordinary essay on Breath is quoted as having been written by a school-boy in the town of New Orleans. The boy is a native of Louisiana and is a student in physiology. "Breath is made of air. We breathe with our lungs, our liver and our kidneys. If it wasn't for our breath we should die when we sleep. Our breath keeps the life going through the nose when we are asleep. Boys that stay in a room all day should not breathe. They should walk out every day. Boys in a room make carbonic acid. Carbonic acid is more poisonous than bad dogs. A heap of soldiers was in a black hole in India, and carbonic acid got in that black hole and killed nearly every man before morning. Girls kill the breath with corsets that squeeze the diaphragm. Girls can't run or roller like boys because their diaphragm is squeezed too much. If I was a girl, I'd rather be a boy, I can run and roller, and have a good, big diaphragm."—London T. D. B.

DON'T BE DECEIVED. Get the genuine MIRA-MIRI Vegetable Worm Syrup. Mothers know the value of this old and well tried remedy.

An Accident Under Peculiar Circumstances. Lord Kitchener, who is now commander-in-chief of the forces in India, met with a serious mishap a few nights ago near Simla. As he was passing through a tunnel his horse became frightened on footing a scullie and collided with the side. One of Lord Kitchener's legs was broken in two places. The broken bones have been set and after having passed a good night, the general is in a cheerful mood.

It appears that Lord Kitchener had informed the members of his staff that he was going out for a ride, but he had changed his plans. Hence, he was alone when the accident occurred.

This incident seems to confirm the idea entertained of Lord Kitchener's methods of making quick excursions alone for the purpose of obtaining personal information of a reliable and convincing character.

MISS E. F. LYON (ASSOCIATE OF THE LONDON (ENIG) COLLEGE) ORGANIST, MARY'S CHURCH, CHATHAM, N.B. Concert Pianist and teacher of Piano, Organ, and Voice.

CLASSES IN THE ABOVE SUBJECTS TO BE HELD AT THE FALL TERM. Apply to Mrs. E. F. Lyon.

Maxim & Gay Co.

(Incorporated under the Laws of the State of New York.) Established Three Years Capital \$50,000. Before the Public Every Day. NEW YORK, NEW ORLEANS, CHICAGO, SARATOGA, WASHINGTON. REFERENCED: Any Bank or Banker in New York, New Orleans, Chicago, Saratoga, or Washington.

\$50 WON \$201.75

EVERY WEEK A WINNER IN OCTOBER. AVERAGE PROFIT EARNED WEEKLY ON \$50 IN OCTOBER, \$80.44. TOTAL PROFITS EARNED ON \$50 IN OCTOBER, \$201.75.

Your money works while You Sleep.

Our famous corps of track clerks are up at break of day, "clocking" the horses in their morning try-outs and while you sleep they spot the winners that bring you steady income. Our method puts you on a level with the most successful pluggers of the American turf. We operate for you for 25 percent of weekly earnings. We win only when you win. Results obtained really "beyond dream."

How \$50 netted \$201.75 in less than a month.

Here is a complete statement, showing the result of a \$100 placed on each horse given in our "Discretionary Series" during October. (Note: A capital to begin with of \$50 is required by us, as a matter of conservation, to make a \$100 play on each horse that is considered by us a good betting proposition.)

Table with columns: Day, First Week, Second Week, Third Week, and Net Daily Result. Rows list various horses and their performance over three weeks.

The above showing is no improvement over that of September, and is not remarkable, since we have excelled it time and again during the past three years of our uninterrupted operations. Good as it is, however, we are confident we will make it "look sick" by comparison with the showing we are going to make at the meeting of 100 days which begins at New Orleans this month.

We Pick the Winners.

The system we employ to locate winners is identical with that used by "Pittsburgh Phil," John A. Drake, John Giles, W. Langdon, and other famous names in the turf every year. It is a system that has proved itself successful in our early morning trials, and in that way learn when they are ready to win. The money that is played on the game by persons like us, such as the large mass of informed players, are bound to be, gone into the pockets of the big operators, of which the Maxim & Gay Co., representing a large clientele, stands at the head. The work of the Maxim & Gay Co. is to place the general public upon a level with the winning pluggers, and our success in this accomplishment has made us famous as two operators.

We do business only on the great racetracks of the U. S. We number among our clients some of the best known sportsmen, financiers and noblemen in the United States. We are not content with being a "good" high-class form of speculation. The present high standing in which racing has been brought, and the absolute good faith in which turf affairs are conducted by the Jockey Club in the East, and the Western Jockey Club in the West, has inspired millions of capitalists and business men to invest their money in the game in a way that has never before been known. It is in this one way that we have succeeded in the betting game over rival in magnitude those of the stock, cotton and grain exchange.

The speculation makes the rapid growth of turf speculation in popular favor, is the reality with which all transactions are wound up. The speculation makes the investment in the racetrack in the afternoon through us and receives a notification by mail, in a letter guaranteed to be a postmark earlier than the race is run, of just what horses are to be backed for his account. By the next mail he is informed of the results of the race, and he is made quickly just where he stands. At the same time, each week he receives a complete statement of his account with a money order for his profit, less 25 per cent, which we deduct as our fee.

This gives a wholesome tone to legitimate turf speculation which cannot be found in the mass of the less involved transactions of the big exchanges, and this is why we have more comfortably and longer than do men whose investments are on their inside, day and night, for weeks and sometimes months at a stretch.

Our Clients Won a Million Dollars.

As it is well known that our clients have collectively won as much as a million dollars at a single race meeting. It is sometimes said: "Why do not Maxim & Gay simply sit down and bank their money instead of running a considerable clerical force and spending large sums in advertising in newspapers throughout the country?" The answer is simple enough if one stops to consider the situation. Maxim & Gay, by dint of ability, energy, organization, capital and perseverance, have secured an enormous clientele, which means the command of thousands of dollars. It is this enormous number of investors, our profits are larger than if we played our own money only, or on a basis of 25 per cent of winnings, which we charge for information and commission, one man out of every four of our customers is practically "bet" for us. The proof that this plan works for the benefit of the public as well as that they are three weeks out of four and our books show that as customers who stake to us for two months ever failed to get well ahead of the game, while not a few of those who now own winning stables of horses have made their money through us. We have been successful in the game in a way that has never before been known. It is in this one way that we have succeeded in the betting game over rival in magnitude those of the stock, cotton and grain exchange.

A Few Hundreds of Recent Endorsements of the Press.

CINCINNATI COMMERCIAL TRIBUNE, March 1, 1903. Maxim & Gay, who have been so successful in selecting winners at the New Orleans races, are in a class by themselves and have no relation in their system of operation to the "get-rich-quick" schemes that have recently gone to pieces disastrously to those who have been deceived by them. Maxim & Gay do not guarantee their clients profits nor against losses, but merely play the money of their subscribers and deduct a fixed percentage from winnings for placing the commission. This point is made clear in all our announcements. What they guarantee is to do to the best of their ability to handle all money forwarded them and place on the races just as if it were their own. They have in their employ as "clockers" the most expert judges of track work in the country and there is not a horse at the New Orleans meeting that they have not a record of. The information collected in this way is used for the benefit of their subscribers, and its reliable character is attested by the numerous winners they have picked up in the past two weeks.

Maxim & Gay are the pioneers in this line of investment or speculation; they have been established three years; they conduct their business on straightforward business lines; they have been thoroughly investigated and are entirely different from those pursued by the "get-rich-quick" schemes, not only to those who have been deceived by them, but to the transactions of Maxim & Gay are legal in every respect and they do exactly what they advertise to do, that is, play the money of their subscribers on the horses they judge will win, and they usually win. Prompt and proper accounting is made of the result, but they guarantee no fixed profit, though those who have confidentially patronized them have not been losers.

ST. PAUL DISPATCH, February 28, 1903. An investigation of the methods of the Maxim & Gay Co. shows that they are not a mere business speculation, but a forward business line. They have been established nearly three years. They do not guarantee clients profits or against losses, but merely play the money of their subscribers and deduct a fixed percentage from winnings for placing the commission. This point is made clear in all our announcements. What they guarantee is to do to the best of their ability to handle all money forwarded them and place on the races just as if it were their own. They have in their employ as "clockers" the most expert judges of track work in the country and there is not a horse at the New Orleans meeting that they have not a record of. The information collected in this way is used for the benefit of their subscribers, and its reliable character is attested by the numerous winners they have picked up in the past two weeks.

Join Our Winning Army.

The greatest race meeting in the history of the South begins at New Orleans within a fortnight. In magnitude it will surpass all other turf gatherings of the past. The Orient Jockey Club knows this to be a banner year and has prepared for it. So have we. If you are more astute at the New Orleans racetrack than ever gathered there before, we have more expert "clockers" and handicappers than ever employed by any other meeting. They cannot beat the game too big for us to handle. We move with the times. If you want to get ahead our discretionary series, at New Orleans, in which we play daily those who expect to win big money. All betting propositions, with the privilege of not playing any horses as all days when we consider conditions unpropitious, fill out the following blank and forward to us at New Orleans as soon as you can. Play will be begun on the first day of the meeting, if your money reaches us in time; otherwise, we will begin play the first day it reaches us after the meeting has begun. Money should be sent by bank draft, express money order, or currency in registered letter. Unregistered checks are not accepted.

TO MAXIM & GAY CO. (Incorp.), 928 Canal St., New Orleans, La. In accordance with the terms of your ad in the CHATHAM (N. B.) MIRAMICHI ADVANCE, I enclose... Dollars on each selection of your Discretionary Series of the New Orleans races. You agree to send me every day, in a letter postmarked before the races are run, the names of the horses which will be played for my account that afternoon and to send me statement and check weekly for profits, less 25 per cent, of winnings. Post odds are guaranteed as published in the New Orleans Morning newspapers. My account is subject to withdrawal in full on demand.

Name Street Town or City State.

THE FOLLOWING SUMS ARE THE MINIMUM ACCEPTED FOR PLAY: For a \$50 play on each horse... For a \$100 play on each horse... For a \$200 play on each horse...

Remit direct to the Maxim & Gay Company, 928 Canal Street, New Orleans. All accounts received by the Maxim & Gay Company will be played at the track by the Maxim & Gay Co., and the Maxim & Gay Co. will make all accountings direct to its clients. The Maxim & Gay Co. assumes all responsibility for a proper execution of its clients' order. Our friends are cautioned against sending money through the mails without registering.

REMOVAL. WANTED.

Dr. John S. Benson has removed his office to the residence lately occupied by Mrs. Alexander Robinson on St. John Street, where he may be found at Chatham, July 1, 1903.

NOTICE TO MARINERS.

Miscou Island, Gulf of St. Lawrence. The reports to machinery at Miscou Island, P. E.
