The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche sheet contains the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

NOTES AND COMMENTS

Under this heading, as occasion arises, the Bulletins issued by this Department will contain, as an appendix, such comment as may seem necessary or advisable upon matters relating to the work of the Department in connection with the administration of the Adulteration Act, the Fertilizers Act, the Feeding Stuffs Act or the Proprietary Medicines Act.

It frequently happens that correspondents ask information regarding the above Acts, of such a nature that the matter in question possesses general interest, and comment upon it would prove acceptable and useful to others than the immediate questioner. In such cases the reply may find a place in these columns. For convenience of reference these notes will be numbered in series.

Chief Analyst.

LABORATORY

INLAND REVENUE DEPARTMENT
OTTAWA, CANADA

BULLETIN No. 340.

GROUND COFFEE.

J. U. VINCENT, Esq.,
 Deputy Minister of Inland Revenue.

OTTAWA, May 4, 1916.

SIR,—I beg to hand you a report dealing with four hundred and seven (407) samples purchased as Coffee in December, January and February last.

The results of this inspection may be summarized thus:—

Found genuine.	341 samples.
Passed, as containing less than 10 per cent, foreign matter.	12 “
Passed as labelled mixtures.	16 “
Doubtful, for reasons given below.	3 “
Adulterated under the Act.	35 “
Total.	407 “

Five of the samples judged as genuine contain minute amounts of chicory or other foreign matter, but the amount is too small to be regarded as other than accidental.

Twelve of the samples containing small amounts, generally much below 10 per cent. of foreign matters, are passed without being adjudged as adulterated. It may be that in some of these cases the foreign matter is present accidentally. In a strict interpretation of the results of analysis, these samples are undoubtedly adulterated; and it must not be understood that my action prejudices any future decisions in similar cases.

Three samples are classed as doubtful. See No. 55434, the fact that the article was a compound, was not stated until the purchase had been made.

No. 55447 contains both chicory, and roasted grain. The presence of chicory is declared on the label, but no mention of the presence of roasted grain is made.

The same is true of No. 52326.

The percentage of genuine samples in this collection is 83.5, indicating a slight falling off since 1910, when a report upon two hundred and ninety-seven (297) samples showed 88 per cent. to be genuine.

I beg to recommend publication of this report as Bulletin No. 340.

I have the honour to be, sir,
 Your obedient servant,

A. MCGILL,
 Chief Analyst.
