

Will be published every SATURDAY by ANDREW LIPSETT,

at the OFFICE ON QUEEN STREET, Opposite City Hall, F. ton, N. B.

Subscription, - \$1.50, in advance.

Should the subscription remain unpaid for 3 months from the time the first issue is sent to the subscriber, the price...

The Agriculturist.

A WEEKLY JOURNAL DEVOTED TO AGRICULTURE, LITERATURE, AND NEWS.

AGRICULTURE THE TRUE BASIS OF A NATION'S WEALTH. ANDREW ARCHER, Editor. VOL. 1. FREDERICTON, N. B., NOVEMBER 9, 1878. NO. 31.

BOOK AND JOB PRINTING of all description EXECUTED ON MODERATE TERMS. RATES OF ADVERTISING. Ordinary advertisements, 10c per line, first insertion, \$1.00. Each subsequent insertion, 5c.

Agriculture.

SUGGESTIONS REGARDING PLOUGHING.

A correspondent of the New York Country Gentleman writes on the subject of Autumn Ploughing, and "the best time to do it." We extract that portion of it which seems most applicable to our locality...

HOW TO UTILIZE THE STRAW.

In mixed husbandry, a farmer grows a variety of produce, and keeps all or nearly all the domestic animals. Nothing could be easier than feeding to suit the taste of his different animals...

DETERIORATION OF POTATOES.

A writer to an Agricultural Journal makes a curious observation relating to what he deems one of the causes of the deterioration of varieties of potatoes. He says: "Many years ago I saw changes going on in the hills for which I could not account..."

THE CURE OF SCAB.

A correspondent of the North British Agriculturist lately asked what was the easiest and most effective cure for scab which had got among his small flock of Leicester ewes. He had tried an ordinary dressing of "McDonnell and soft soap" but being doubtful of its efficacy applied for advice...

THE BREEDING OF CATTLE, HORSES, SHEEP, &c., IN THE UNITED STATES.

Under the above heading, the New Orleans Picayune lately wrote: "There is a quiet kind of an improvement going on in the Southern States but few people seem to fully realize it. In numerous localities can be found here and there, a man who is beginning to improve his breed of cattle, sheep, and hogs..."

PROFITS OF POULTRY.

If possible, the buildings intended for poultry should be placed in the orchards, and should all be enclosed by a fence, or not, as the circumstances demand. Fowls and pigs are the very best cultivators and enrichers possible to find for fruit trees...

AFGHAN AGRICULTURE AND INDUSTRY.

Afghanistan is, at present, a very interesting country to English people everywhere. We have lately seen some particulars regarding the features of the country, the character of the people and its history. The following information regarding "Afghan" Agriculture and Industry, being the summary of the Russian military department's notes on these subjects...

THE PRINCE OF WALES AS A LAND-OWNER.

An old tenant of His Royal Highness writes to the Agricultural World: "It may be said broadly that long leases are the prevailing custom of the estates. Every consideration is shown to the position and circumstances of the tenants in the renewal of their lease..."

SORE TEATS IN COWS.

When the teats of a cow are sore in any way, (having blisters or cracks in them) it is well to wash the teats clean before milking, and have a vessel of water in reach, and often wet the teats while milking. This softens the skin. After milking apply butter and salt mixed in about equal proportions in bulk. The salt cleanses the sores, and the butter keeps the skin soft. In a few days all are well. Never wet the teats with milk while milking.

THE HOUSING OF CATTLE.

An American paper recently described "the case of a brute who deliberately sawed off the horns of some Irish cattle received, the animals being of full age. The perpetrator was justly and heavily fined by the judge before whom the complaint was made."

IMMENSE QUANTITIES OF APPLES.

Immense quantities of apples are being taken to Europe by the steamers. The surplus crop is very large, and some eastern farmers are feeding their cows with them, rather than ship them to market at ruling prices, which are \$1 to \$1.25 per barrel. Export shipments are not always profitable, depending largely on the condition of the fruit on arrival; but when in good condition a fair profit is realized. During the past three weeks the value of the shipments exceeded \$20,000. Some vessels have taken as many as three thousand barrels.

POTATOES REQUIRE A GOOD DEAL OF POTASH.

Potatoes require a good deal of potash, and farmers cannot make a mistake in applying to the land on which they are grown either ashes or commercial fertilizers that contain a large percentage of potash. The clouds drop mist, but when a drought comes the clouds seem to have mist drops.

FOREIGN LIVE STOCK OF MEAT IMPORTATION INTO ENGLAND.

Exceedingly large quantities of cattle and sheep, and quantities of pork, beef, and carcasses of mutton are weekly imported from America into England. The business is on the increase, and offers great opportunities to the breeders of first class stock. From the continent of Europe and America, both supplies are sent, and the demand never seems to fall below them. The North British Agriculturist says of the last weekly arrivals of both live stock and fresh meat at Liverpool from America were exceedingly large, and as regards the former the number has never been surpassed.

RAISING HORSES ON THE FARM.

The following observations on the "raising horses on the farm," though not written for our latitude, contains hints and suggestions which are worth consideration of farmers in New Brunswick: "The farmer need not breed horses on a large scale, but every farmer, who has a few acres, should breed them on a small scale. The farm team should be good, serviceable, well bred mares from the Clay, Hambletonian, Champion or Mambrino families. Every farmer in Schuyler knows that a farm team, when the farmer can keep but one or at most two, is better and more serviceable for all the different kinds of work that is required upon a farm, from this class of mares, than from any other. Even in these times of financial depression, well selected horses of this class are as good an investment as the farmer can make, and they will do all his work, and do it well, whether at the plow, the drag, the machine, the reaper, or upon the road, where in this age of steam the farmer as well as other men are obliged to be much more of the time than in past years. The principal heavy work for a team is, as we work land, mainly required in the early spring. It is this which tries the team most, and the want of the use of the team for this work that deters many from raising colts, who otherwise would do so. To such, and indeed to farmers generally, small breeders generally, who wish to use their mares in business or upon the farm, I would strongly recommend the raising of fall colts. There is much to be said in favor of it. It does not interfere with a fair and reasonable use of mares in the spring work. The colts should be dropped so as to give a month at grass, and if a little late, it will be found the best for the dam and foal.

WINTERING THE CALVEY.

Of all the crops of the garden the most uncertain, the most expensive, and the most difficult to keep in a sound condition through winter and to the middle of the month of April at least, as it ought to be, to compensate the producer.

NEWS ITEMS.

The col-fishing on the Gaspe coast is reported to have been much improved of late.

The London Globe says that the enormous arrivals of American cheese are causing the prices of English makers from the market.

A late dispatch from Dublin says Dr. Gilroy, Bishop of Elphin, has been appointed Apostolic Delegate from Holy See to Canada and the United States.

Alabama has Anti-Equatorial Society, based on the belief that horses were never made to carry burdens on their backs, and that it is extremely cruel and inhuman.

The manufacture of squares timber in the Ottawa Valley this year is not expected to exceed 4,000,000 feet. There will be a large increase in the manufacture of logs.

The whole area of Great Britain and Ireland under cultivation is estimated to be covered by buildings, roads, water, gardens, wood and waste land, 47,327,000 acres.

Carlo Gatti, who came to London a penniless boy, and died lately a wealthy man, having made a fortune of \$1,000,000 in cream, hailed from Ticino, the same canton which produced Delmonico and many more culinary celebrities.

The Grand Trunk Railway authorities are preparing a most magnificent car for the Marquis of Lorne. It will receive him at Halifax. It is pronounced to be far ahead of anything of the kind ever attempted on this continent.

The Illinois Supreme Court, has decided that a city cannot by ordinance compel a citizen to remove snow from a sidewalk in front of his premises, or to erect a protection of the street, the interest that he has therein being only an interest in the use of the sidewalk.

The total number of licensed saloons or drinking-places in the United States for the year ending June 30, 1878, was 104,608, or calculating from a population of 45,000,000, one for every 430 persons.

The number of wholesale liquor dealers, is 4,904; brewers, 2,738; retailers, 1,130; distillers, 4,192.

Hydrophobia.—A prize of £100 sterling is offered for the best essay on the nature, prevention and treatment of the above disease. The essay to be delivered on or before the 1st of January, 1880, and to be presented to the application to the Private Secretary of the Lieut. Governor, at Nova Scotia at Government House.

The Liverpool Courier's London correspondent writes on the 17th inst. that the affairs in Russia in high official quarters. I believe we may hear before long of formal preparations against any surprise on the part of his "peace-loving" Majesty in St. Petersburg.

"The Russian Akhbar," or gift, to the Amercian of the best quality of the nature, prevention and treatment of the above disease. The essay to be delivered on or before the 1st of January, 1880, and to be presented to the application to the Private Secretary of the Lieut. Governor, at Nova Scotia at Government House.

The Greek Arch-bishop of Smyrna was almost mortally wounded the other day by a man desiring to be married. The latter, on being informed by the priest that among the formalities to be observed in the presence of parents was indispensable, stabbing him three times and fled. At last accounts the Archbishop was in a precarious condition, and the assassin had been captured.

Becher is advertised as follows by the managers of a Maryland fair:—This wonderful man—Becher—operator, writer, and deliverer of the address at the fair. The managers have engaged him at an enormous salary, but we are assured that it is money well invested as thousands will be drawn to hear the remarkable man.

METEOROLOGICAL.—Mr. Frederick Allison forecasts that the beginning of the coming winter will be cold. The average temperature in December being below their average temperature of 37° and 25° respectively. For precipitation these months are not expected to vary much from the means of about 7 inches in the former and 3 inches in the latter; the snow fall being considerable in December.—Herald.

To rapidly extinguish a fire in a chimney: Lay about 11 grammes of the sulphur of carbon on the hearth, the sulphur being first turned into one or two, broad, hollow plates. That the combustion will be complete, and deliver the address at the fair. The managers have engaged him at an enormous salary, but we are assured that it is money well invested as thousands will be drawn to hear the remarkable man.

The Rouge camp is splitting into two sections, the hard-boiled and the soft-boiled. The former are represented by the National and the latter by Senator Fabre's paper, L'Evening. These two journals have been skirmishing for some time, and now, on the 15th inst., they are now at it hammer and tongs. The National invites M. Fabre and those of all shades to speak to leave the party, and he answers boldly that he has all but gone already.

Hayfin is pathetic on what the Princess Louise has to encounter.—"Omitting from the account the hard-boiled and the soft-boiled. The former are represented by the National and the latter by Senator Fabre's paper, L'Evening. These two journals have been skirmishing for some time, and now, on the 15th inst., they are now at it hammer and tongs. The National invites M. Fabre and those of all shades to speak to leave the party, and he answers boldly that he has all but gone already.

The political fever has subsided in Canada for a while. Sir John has a triumphant majority and Mr. Mackenzie has a defeat and a hopeful minority; but the country is neither in a state of excitement nor is it expected that the mere return of Sir John to power with a "national policy" would bring speedy property and peace to the country. Their expectations—while others are anxiously waiting for the first move in the way of change.—Combs Spectator.

The Under Secretary of State for War, Mr. G. A. Salomonson, said that the times were very unpropitious because at any moment an emergency might arise which would strain the resources of the country to the utmost, and if they were not ready for it the blame would fall upon them in the history that was to come. If such an emergency did arise it would be the duty of every Englishman to sink party squabbles and selfish feelings in the interests of the nation.

MUSIC HALLS seem to be even more profitable concerns than public houses. The London Pavilion Music Hall has revealed the fact that the net profits of M. Loubé in 1878 were £109,781, in 1879, £122,887; in 1877, £141,181. The Pavilion was required for the new season between Piccadilly and Oxford street, and M. Loubé, who claimed £147,000 for the freedom of good-will, had been awarded £107,000. Such are the rewards of musical enterprises.

Lyman Pater, who for seven months has been pushing a wheelbarrow across the continent, has arrived in San Francisco. He declares he was weary of the way, and a method who professionally watched him throughout the journey, seeing him one every day or often, says that he was not a fraud. Pater walked round, if not a few feet, a distance of about 5,000 miles in 215 days, and showed much pluck and endurance. The wheelbarrow was covered with advertisements for which pay was received, and photographs were sold in great numbers. He tells entertaining stories of being stung and possessed by men who had let against him, of being chased by bears and of narrow escapes from Indians and Indians in nobody to contradict him. His evidence of honest walking consists of a large book of certificates on the way, including all the station agents and section men on the Pacific Railroad.

Communications.

For the "Agriculturist."

Sir,—The following startling account of clairvoyance I take from the "Herald" of the 22nd inst. If you will give space in your columns, it will, I am quite sure, interest some of your readers. When the time comes that these manifestations or rather communications from the unseen world are more credited than they are now, society will have received an additional protection from criminals of every degree.

The Herald's account upon these things, having much required equally startling evidence from clairvoyants.

Fton, November 6, 1878.

REVELATIONS OF A CLAIRVOYANT.

Many of our readers would doubtless remember the statements through the public press that on the 3rd day of September, Mary Stannard a young woman residing in Madison Township, New Haven County, Conn., was found dead in a well, the water level of which was about six feet above the level of the sea.

The New York Herald of October 10th, contains a lengthy statement of what a Clairvoyant saw in France, through which a clue to the mystery of the case is given.

Mr. James J. Hayes was retained as Counsel by Mr. C. S. Stannard the grand juror of Madison, to assist in working up the case; and although an unbeliever in spiritism, he was retained to assist in the investigation of the case.

Mr. James J. Hayes was retained as Counsel by Mr. C. S. Stannard the grand juror of Madison, to assist in working up the case; and although an unbeliever in spiritism, he was retained to assist in the investigation of the case.

The Agriculturist.

FREDRICKTON, N. B., NOVEMBER 9, 1878.

PROJECTED RAILWAYS.

The Aroostook is an historical, if not a classical name. There was high being a bloody war between Uncle Sam and John Bull some forty years ago, in the good times when Sir Geo. Harvey was Governor of New Brunswick, in the Aroostook, over the famous "disputed territory." There was no blood shed by the Regulars and the gallant Volunteer Militia on either side, but they punished an enormous quantity of pork and bacon, hence the bloodless meeting of the British and American forces in the Aroostook, and was known as "the war of pork."

But the Yankees got the better of the British on the Aroostook, as the Ashburton Treaty gave them "a monstrous cattle" (to use Hooters' phrase), of the disputed territory, the latter half in every sense, by a long odds.

How patriotically did the late Hon. G. L. Halloway, once lament that Providence should have so disposed of it, that the best lumber was to be found on that part of the Aroostook territory ceded to the Americans. The Althea best lumber has been cut down by this time, and the Aroostook wild lands are still unsettled.

There is a movement now towards opening up these lands for settlement. The Maine and Press men made excursions to the Aroostook, and are now in praise of the splendid country. The Directors of the Eastern, Boston and Maine, and the Maine Central Railroads have in the company of competent engineers, taken a survey of the country. The latest report that the directors have come to the decision that a branch line shall be built which will find the means to build—if the state will help them so much the better.

The Aroostook Times of Thursday last, bears of different projects for a railroad from some point on the E. & N. Railway to this town (Houlton). The latest report is that a line will be built from Hancock by way of Haynesville, distant 28 miles.

Very early in the morning of the 22nd inst., the Maine and Press men made excursions to the Aroostook, and are now in praise of the splendid country. The Directors of the Eastern, Boston and Maine, and the Maine Central Railroads have in the company of competent engineers, taken a survey of the country. The latest report that the directors have come to the decision that a branch line shall be built which will find the means to build—if the state will help them so much the better.

NOMINATION DAY.

At noon, to-day, Sheriff Temple opened the court for the nomination of candidates to serve the electors of York, in the room of Messrs. A. G. Blair, F. P. Thompson, resigned.

After the Sheriff had gone through with the formal proceedings, Mr. Etakrook who was an independent candidate of York at the general elections but who retired from politics day, took the platform to refute some slanderous charges made against him of having been bought.

U. S. ELECTION.—This week has been one of great political excitement in the United States. Congressional elections have been held in three-fourths of the States of the Union, gubernatorial election in some of them and municipal elections in the City of York.

The next Congress which will assemble in Washington on the 6th March, 1879, the President will find a Democratic majority, both in the Senate and the House of Representatives, possibly arranged against him.

We regret to learn that Col. Robinson, who for a number of years was landlord of the Barker House, died last Sunday, at his residence Rocky Hill, Massachusetts.

The petition of John Bell, Blacksmith, and Joseph Christopher, Fisherman, both of the city of St. John, against the return of Messrs. Burges & Weldon, which was filed this week in Fredericton by their agent, Mr. George W. Burdige, is a formidable document, and charges the members elect of being guilty by themselves, or by their agents of all the vices and modes of bribery and corruption condemned by the law.

The marriage of Prince Bismarck's only daughter with Count Rantzau took place on Wednesday last, at Berlin. Marie Bismarck, who is the Prince's eldest child, was born at the old family mansion of Schonhausen, August 21st, 1848. She is an estimable and possessed of many virtues and considerable accomplishments.

LIVER IS KING.—The liver is the imperial organ of the whole human system, as it controls the life, health and happiness of man. When it is disturbed in its proper action, all kinds of ailments are the natural result.

Deaths.—In this city on the 6th inst. of Hippolyte William Robert, son of Joseph and Susan Murray, aged 7 years and 7 months.
