The copy filmed here has been reproduced thanks to the generosity of:

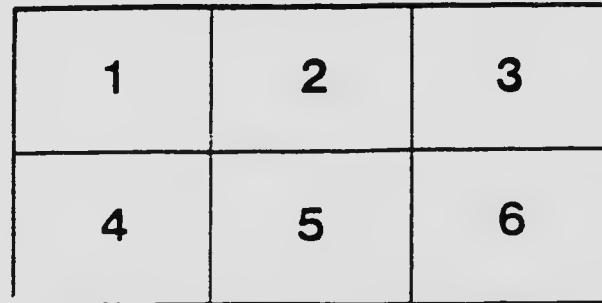

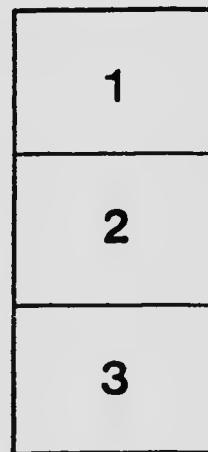

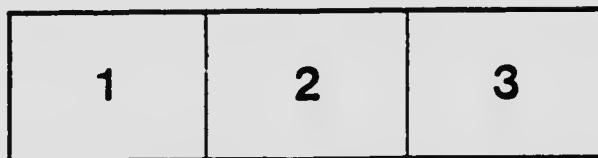

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contains the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

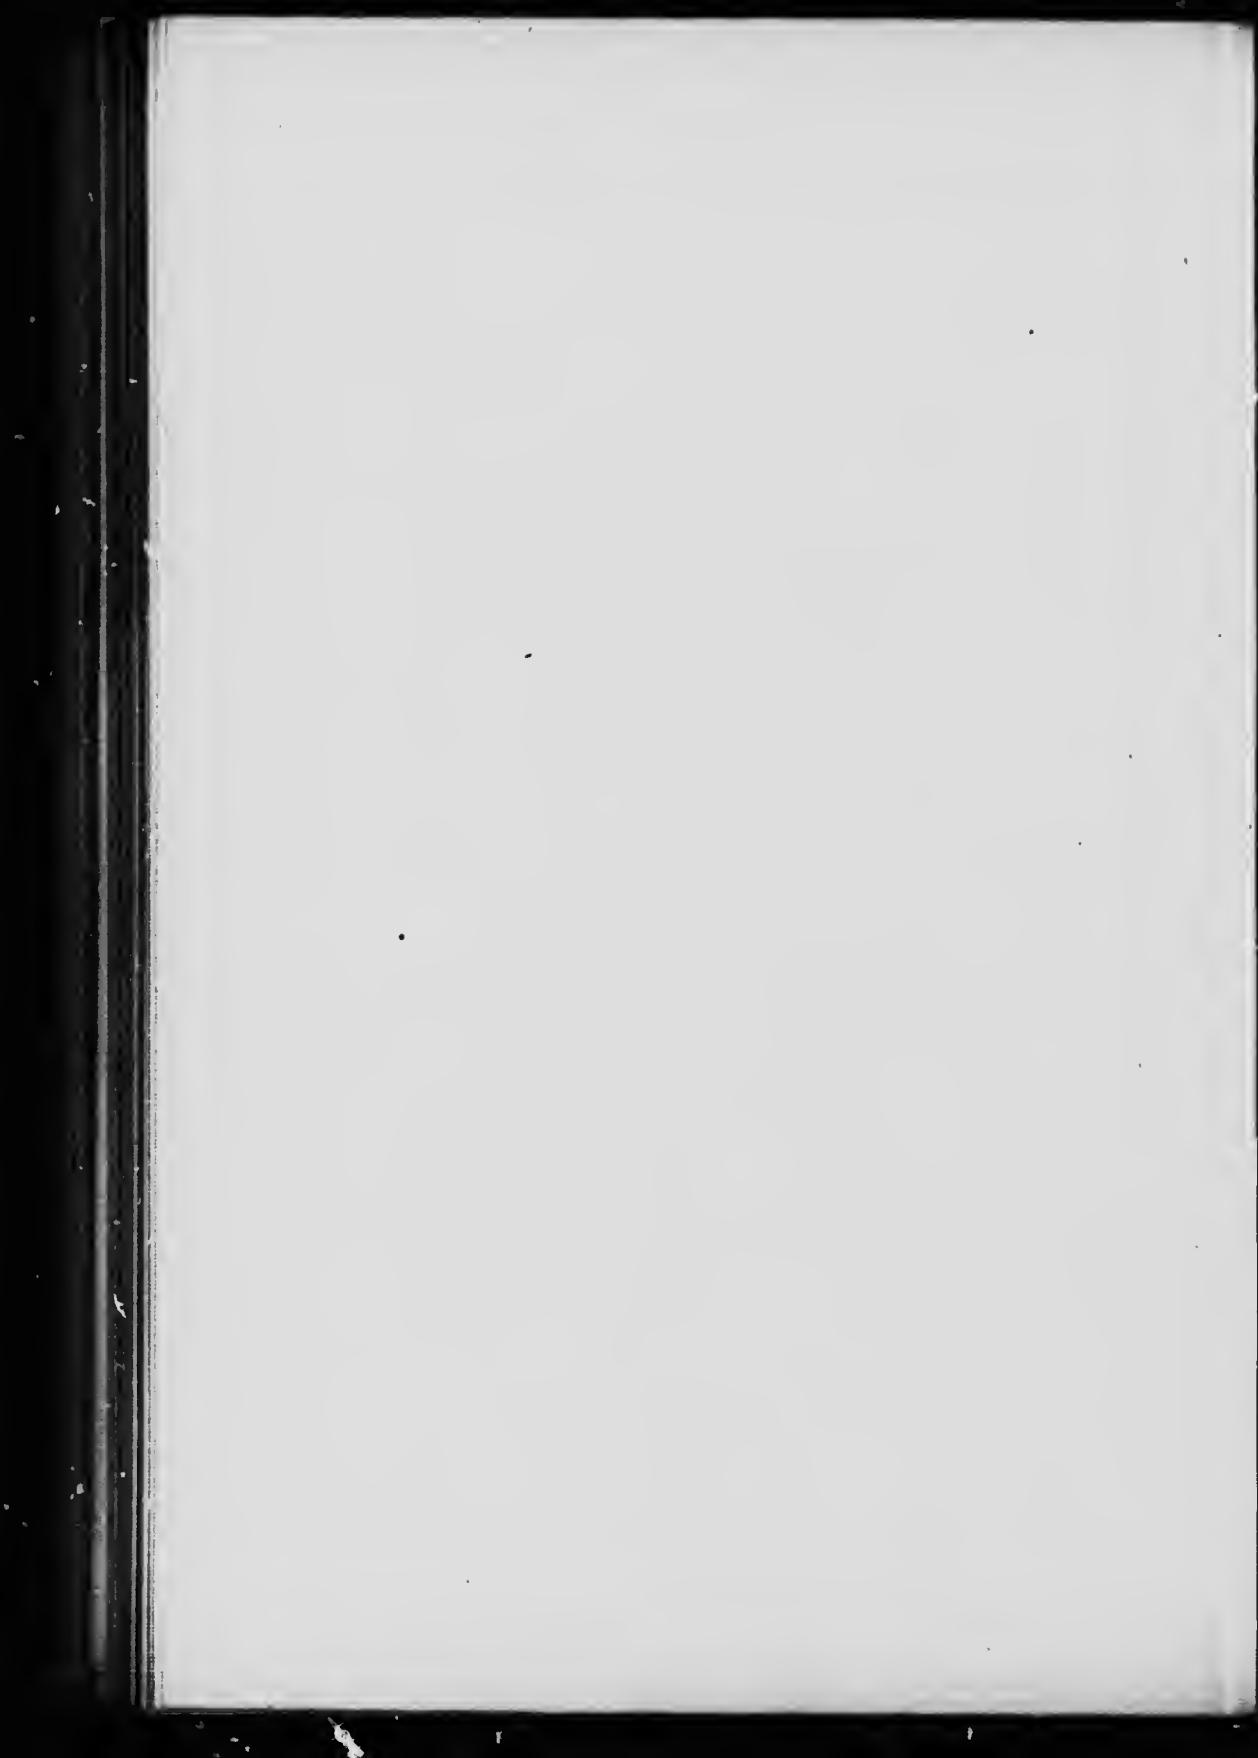

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

OTTAWA, July 9, 1906.

**W. J. GERALD, Esq.,**  
Deputy Minister of Inland Revenue.

SIR,— I beg to transmit herewith a tabulated statement of the results of examining 54 samples of honey, which were collected during the months of March and April last. The methods of examination followed were the same as described in Bulletin No. 90, the remarks in which as regards standards and limits are again applicable. There were 54 samples collected in all, and the following summary gives the number obtained in each inspection district, and the opinions arrived at concerning their character.—

Inspection District.	Genuine.	Adulteration Declared.	Adulterated.	Total.
Nova Scotia.....	4	0	0	4
Prince Edward Island .....	2	0	0	2
New Brunswick.....	4	0	0	4
Quebec.....	3	1	1	5
St. Hyacinthe.....	3	0	1	4
Montreal.....	6	0	0	6
Ottawa.....	5	0	0	5

London.....	4	0	1	5
Manitoba.....	1	0	3	4
Calgary.....	1	0	1	2
British Columbia.....	3	0	1	4
	44	1	9	54

It will be seen that 44 out of 54 samples were found to be genuine, a proportion amounting to 81·5, and which is nearly the same as found in the collection of 1903.

I have the honour to be, sir,

Your obedient servant,

THOMAS MACFARLANE,  
*Chief Analyst.*
