A Terrible Crime.

TORONTO, July 23.—On Monday night a daring and dastardly attempt upon the lives of the soldiery at pre sent in barricks up at the new fort was made, but, happily, the scheme was discovered in time to avert the intended murderous effort. The matter ha been kept very quiet for prudential reasons, but the following facts have transpired: Shortly after midn one of the sentinels on duty at the Garrison noticed a smell of smoke and the crackling of flames. He immedi ately gave the alarm. The garrison turned out and a little search showed the wing of the building devoted to the artillery was in flames. The utmost efforts of the men were barely sufficient to avert a dreadful catastr phe, but after half an hours hard work the flames was subdued. The damage done was not as great as might have been expected, owing chiefly to the prompt measures taken to subdue the flames. The fire was undoubtedly the work of an incendiary. when it is taken into consideration that in a room next to that in which And finally says that though an old the fire was discovered was piled a large store of ammunition, and even dynamite. Had the fire reached that blown to atoms. The guards have been doubled about the building and

ply both freights and markets would improve, both if supplies are poured in this season as last on markets in which office. The front of one end of the cither of them flowed to the Pole.

The theory, nevertheless, continued to be believed until very recently, but it is now exploded by scientific observations proving that the warm Japanese current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London, into quarantine current does not pass through Behring ports or at London current does not pass through Behring ports or at London current does not pass through Behring ports or at London current does not pass through Behring ports or at London current does not pass through Behring ports or at London current does not pass through Behring ports or at London current does not pass through Behring ports or at London current does not pass through Behring current does not pass through Behring current does not pass through Behring current does the difficulty' is to find buyers, it is building is his public office and in the

> There are at present five square rigged vessels in port and a number of smaller crafts. Of the larger vessels two are loading with lumber for H. O'Leary, one for A. Johnson, one for J. & G. Coates and one for B. H. Foley. The lumber is all water cut and is being brought down the river in raits. The smaller craft are engaged in carrying lumber to domestic ports for Wm. McNairn.—Cor. Times.

During an Arctic exploration Lieut. Ray investigated the depth to which the ground was frozen. He says:—"I dug an earth shaft thirty-eight feet in depth for the purpose of testing the temperature and found, on calculation, that it was frozen to a depth of 300 ft. A bucketful of the stuff taken out of the shaft, when thawed out, separated into earth and water, about four inches of the latter standing on top. This proved that if the ground there were warmed sufficiently to be re-solved into its original parts it would be found to be quite incapable of supporting anything on its surface. It is really frozen slush."

of the many who have acquired more membered by many was killed in the than a competency as the result of Park Mill at Newcastle in 1855.) Soon

To give you an idea of what was done in through the roof, having caught in some through the roof, having caught in some the regulations ceased the regulation of the regulat than a competency as the result of the industry. There are in New Brunswick many locations where the soil is rich, and where avenues to home comforts and competency await those who are willing to labor perseveringly, fearing not that honest soil which laughs at impossibilities and cries "it shall be done." There are thousands of noble, honest farme in New Brunswick and in the sister provinces, whose well cultivated acree and fine farm buildings or losses sufficient power for the safe and soil to the affairs of the Board, and though the roof, having caught in some mysterious manner in the upper story of the mil at Douglastown was built it passed into the possession of Gilmour, Rankin & Co., was afterwards owned by be a treating to the affairs of the Board, and mysterious manner in the upper story of the main house, in which there had been no stove or fire used for many weeks. The safe and stream of those firms, His Excellency took much interest in minutely inspecting the various departments of those farms, His Excellency took much mysterious manner in the upper story of the main house, in which there had been no stove or fire used for many weeks. The alarm was at once given and the thouse and steam fire engine despatch. With five boats (2 men to each boat) with five boats (3 men to each boat) with five boats (4 men to five hearing caught in some the state is about an average one to store or fire used for many weeks. The alarm was at once given and the Excellency who has been for the Board, and though the roof, having caught in the kind in vitation of the main house, in which there had been on stove or fire used for many weeks. The alarm was at once work for which she was designed. Hav- and hope by the 15 August, to be decently placed at the tank at Robinson's, and ed acres and fine farm buildings give ing obtained this machinery, he proceeding obtained this machinery, he proceeding of the prosperity which has ed to construct a mill on the upper side help us out of our misfortunes.

Shippegan, 26th July, 1884.

there as elsewhere hard and conthere as elsewhere hard and continuous toil is the only avenue to success.

We are glad to notice by the old country papers that New Brunswick is becoming better known to the people across the water, partly through the clear-headed and intelligent representations of Mr. Estagent repres Jack, who is attending the Forestry Exhibition at Edinburgh in the interests of this Province. To the People of Northumberland, Lumbermen, Farmers, Liverymen, Everybody in want of First Class

I beg leave to announce that I intend to still carry on my business in the town of Newicastle at my old stand, where I intend to keep everything in connection with the HARNESS AND COLLAR business, feeling sure that my past record will bear my out n asking you to still continue your liberal patronage, and by paying strict and prompt personal attention to all orders left, I hope to keep in future as in the past the confidence you have placed in me.

As the great demand for my CELEBRATED COLLARS

makes it impossible for me to keep any great quantity on hand, I shall always be ready and willing to take the measure of your horses, and make collars to suit them, when a GOOD FIT will always be guaranteed or no pay. It is impossible for horses to be gailed in these Collars, as the greatest pains Is taken to make them work with ease and comfort to the animal, the proof of which is in the fact of having made and sold two thousand of them in Mirami shi and surrounding districts, and never having any of them returned tor hurting the shoulders of any horse that wore them. Everyone is made by myself, and are warranted no imported trash, but genuine hand made, wool faced, long straw Collars. ALWAYS IN STOCK: WHIPS, WHIP THONGS, CURRY COMBS, BRUSHES, Mane Combs, Horse Cards, Interfering Boots, Harness Oil, Neat's Foot Oil, Harness Soap, Axle Oil and Grease, Sweat Pads, Saddle Pads, Silver Polish, Whip Sockets, Harness Snaps, Cart Harness and Back Chains, Horse Blankets and Sircingles.

Will get anything not in stock for any person when required.

reached lat. 83 degrees, 20 minutes, the place of roots, except ensilage, 26 seconds. Lieut. Lockwood and and we are not quite ready to believe Leigh Brainard, of the Greely expedition, went over the same route and that even that can. At all events ensiling costs the most and if we reached a point a few miles nearer the ensilage costs the most, and if we reached a point a few miles nearer the pole. This is a gain of four miles in right years at a cost of seventeen lives. At this rate of scientific progress the flag-planting exhibition at the North Pole will take place about the year 2684, at a cost of about sixteen hundred lives.

HAY RAKES, SCYTHES, would still, we think make roots preferable. Why can we not interest and augurate a reform in this matter and proposed to the most, and if we allow it all the advantages over roots that its warmest admirer would claim, the difference in the cost would still, we think make roots preferable. Why can we not interest and proposed to the most, and if we allow it all the advantages over roots that its warmest admirer would claim, the difference in the cost would still, we think make roots preferable.

teen hundred lives. Farm and Household.

The Best Time to Cut Hay.

The best writers for the Agricul- gelsa re good enough. Boiled in a tural press have for many years large copper, whole or cut in slices, urged farmers to cut their hay a lithorses, cows and hogs eat them tle earlier than has been the prevail- heartily and thrive on them. ing practice, and, so far as we can judge, the farmers generally are ready to admit that the hay crop is not cut quite as early as it should be to give the best quality of fodder for cattle. The difficulty seems to be that farmers do not get ready to bethat farmers do not get ready to be that farmers as early as they ought.

BARE PLACES IN MEADOWS.—
Meadows which it is not desirable to plough will often show patches where the grass is thin or perhaps entirely lacking. If such places are top-dressed with fine, well rotted manure and harrowed, grass seed may be ing practice, and, so far as we can 7.46 a.m 29 81 56 7

Hereditary Scrofula.

Are you aware that in the blood the taint of sorrofula has a prominent place? This is true of every one. It is liable at any time, on the slightest provocation, to develop itself in some insidious disease. Consumption and many other diseases are outgrowths of this impurity of the blood. Shaker Blood Syrup has a wonderful power over all scrofulous troubles, as the remarkable testimonials we have received unmistakably prove.

Handfuls of water upon each teat as hot as the hand will bear. After chase your lemons when they are cheap, and lay in a sufficient stock to last six months. Then procure a box proportionate in size to the number you wish to store, and pack them in layers in dry sand. The fruit must not be allowed to touch each other. Put three inches of sand between each layer.

It is liable at any time, on the scientific American, constitute the hand until there is no danger of the water dripping into the pail; then milk at once." By this means a hard milker can be milked in half the usual time.

We refer by permission to Mrs. P. Elliott, Hanover, Maine, who was cured by Shaker Blood Syrup of 11 Scrofula Sores, the severity of which confined her to the house for two years. Six months previous to taking Shaker Blood Syrup, she could not get about her room without crutches. Her friend says I did not think it possible for her to live many months she was reduced to a mere skeleton. Her cure is hardly less than a miracle. There is no doubt that in Shaker Blood Syrup, we have the most remarkable medicine that has ever been produced, and a positive cure for Syphills and sps. The service of the street.

THE DAIRY.—On farms where the dairy is an important part of the husbandry, provision is made by sowing soiling crops, to supplement the diminished pasturage in midsummer. Those who keep only the friend says I did not think it possible for family cow," or at least two or three cows, find the flow of milk to decrease, and often without any green crop provided for keeping it up. The territory of those who keep but a single cow is often restricted to a small pasture and a vegetable garden. The garden should be made to a small pasture and a vegetable garden. The garden should be made the mistake of piling minure for apple trees a out of the res now make the mistake of piling minure for apple trees a out of the remainder. This is about as sensible as it would be to place food for a man around his feet rather than putting it into his mouth. The feeding roots of trees, which are their mouths, are at least as far from the trunks.
