1873.

EXPLANATION OF CALENDAR PAGES.

The Publisher of this Almanac, with a view to increase its circulation and usefulness, has adapted its calculations for the whole country. The Moon's changes are given for five different places, viz.: Quebec, Montreal, Perth, Toronto, and London. The rising and setting of the Sun are given for Montreal and Toronto. The rising and setting of the Moon are given with sufficient exactness for all practical purposes. The weather prognostications are again calculated according to the table of the celebrated Dr. Herschel; and for extraordinary accuracy Hart's Almanac retains its wonderful popularity.

JANUARY.—You cannot plough this month, but you may consider what we have to say about subsoil ploughing. The subsoil plough should be used in spring, following in the furrow of the breaking plough; loosening the soil six or eight inches deeper. The breaking plough should turn the soil up six inches deep, making the entire loose ground twelve or fourteen inches deep. A crop of corn is best to grow on the sod, and the effect of subsoiling will be seen in the crop by the time it is two feet high. The heat of the sun and the exposure of the soil to the air, together with the presence of the corn-roots, prepare the subsoil for turning up to the surface. The next spring, plough the field so as to place one-half of the subsoil on the surface. At the next ploughing all this loosened subsoil can be turned to the surface.

FEBRUARY.—As soft or bituminous coal is becoming more extensively used, especially in our large towns or cities; we think it worth while to say that the soot of this coal is exceedingly valuable as a fertilizer. None of it should be lost. It accumulates rapidly in chimneys, and must be often removed. Among other things it contains carbonate of lime and magnesia; sulphate and acetate of lime; phosphate of lime; acetate of ammonia, and charcoal powder. It is enough to mention these in proof of the fertilizing qualities of soot. In Europe it has been used for many years as a top-dressing to all crops, and has a specially beneficial effect in grass, wheat and oats. The turnip fly, and the caterpillar, which eats the cabbages, have a great dislike to it. It is best applied before rain sets in, but in dry weather should be used with caution as to quantity, not more than four bushels an acre, in repeated applications.

MARCH.—Respecting frequent ploughing for wheat, a practical farmer says: If any one will break his ground deeply and thoroughly two or three times during the spring and summer, the extra amount of wheat per acre will pay for ploughing, and leave a handsome profit besides. I have tested this practice several times with most satisfactory results. A field of sixteen acres I broke in spring, and ploughed the half again on the twentieth of June. On the first of September, following, I ploughed again the entire field, and sowed in wheat. The half that had only received a single ploughing yielded 13 bushels and 18 pounds; the half that had received three breakings yielded per acre 23 bushels and 40 pounds. At one dollar a bushel this would pay for the extra ploughing, and leave a net extra profit of six dollars per acre besides.

Collier's British History, Outlines of General History, Collier's English Literature.

30	Fri.	55	59	5 0	55	14 51	11 23	29	35	with light breezes.	

APRIL.—That it is possible to cut timothy too close seems quite clear, especially in a dry, hot climate. This is particularly the case when the cutting is done with a mower, which is now very general. The bulb having been shaded in its growth by the tall grass is suddenly laid bare to the rays of the hot sun in July and August, which dries every particle of moisture in it, consequently, when rain comes the bulb has lost its germinating power. It was noticed that, when a small portion of a meadow was cut down with a cradle for seed, that the growth of grass during the fall was far greater, and also that the timothy is a great deal heavier on that part than alongside where it was mown close with the machine. This being the case, the value of machinery is, by so much depreciated, and the cradle is to be preferred.

31	Sat.	20	34	27	27	21 57	Morn.	steady warm weather.		

MAY.—Thistles are a nuisance, everybody admits it. The law condemns them, and the man who allows them to grow without taking proper means to destroy them is much to be blamed. We have passed field after field of oats, peas and wheat shamefully bestudded with thistles going to seed. Thistle-down wafting in all directions is not a pleasant sight, and the wonder is how the farmer can bear this pest of his toil. Surely all should agree to put down the wretched weed, known as the Canada thistle. And there must be concurrence in effort. It will not suffice that one man shall go to work at this evil. His neighbor must do the same. The seeds are exceedingly prolific. We have seen 150 plants to one square foot, and therefore the greater the reason for united effort to destroy the destroyer of our best productions.

Red Top, Timothy and Clover Seed,

JUNE.—It is not the most pleasant of subjects, but we cannot forbear saying a few words on the value of night soils. We have the authority of Leibig for stating that in the fortress of Rastadt and in the soldier's barracks of Baden, the privies are so constructed that the seats open, through wide funnels, into casks fixed upon carts. By this means the whole of the excrement, both fluid and solid, is collected without any loss. When the casks are full, they are replaced by empty ones. The farmers around these garrison towns know the value of this matter for fertilizing effects, for they are willing to pay a certain sum for every full cask, which not only pays the original outlay, but also the annual cost of repairs, &c., and leaves a handsome profit besides. There is also a cleanly side to this subject, upon which we need not expatiate.

JULY.—Buckwheat ploughed in and under the surface of soil has by long experience been proved a certain means of fertility. It is in many places better than clover, for it will grow where clover will not, that is on poor sandy soils. It has been recommended to plough and harrow the land fine and mellow, then saturate the buckwheat with stale chamber lye, or greasy pickle from the mackerel barrel, then dry with hickory ashes, a peck or half a bushel to every bushel of buckwheat. After the buckwheat is a few inches high, sow a bushel of gypsum to the acre toward evening. This will cause greater growth. In case the soil is very dry at seeding time, it is best not to sow the prepared seed in the morning, but toward evening; let it lie all night, then harrow it and roll it early in the morning while the soil is wet with dew.

AUGUST.—Calves have been subject of late to a form of disease about which there has been a difference of opinion. It is undoubtedly influenza, and is caused by exposure to damp and cold during an enfeebled state of the system. With care, fatality may be prevented. Warm gruel or bran, middlings or oatmeal, are of service, but a warm stable is necessary. Worms seem to be one of the last results of the disease, and are found in the air passages and in the lungs. A similar disease was found among lambs, but was cured by a little warm gruel, with a few drops of peppermint water fed to them with a spoon. The disease was prevalent among young stock in England, but readily yielded to the generous treatment we have suggested. Prevention is better than cure: Let the young stock have kind and careful treatment.

SEPTEMBER.—We are glad to know that our farmers are alive to the value of a good orchard. In respect to the proper time for planting there are differences of opinion. If the soil is light and moderately dry, and the locality not too far north, trees may be safely planted in the fall, provided they are of the most hardy kind, such as apples, pears and plums. Taking all things into consideration we prefer early spring to Autumn. But the trees should always be dug up in the autumn and transported to the place where they are to be planted, and then carefully heeled in. It may be well enough to cover the entire stems with earth, if received very late in the season. In heeling in the roots, the roots should be covered quite deep, so that at least a foot or more of the stems will be covered. If there is any danger from frost, shade the trees with evergreens.

With full Directions how to use them,

OCTOBER.—A practical farmer, on the subject of sowing grass-seeds, says he has always raised better crops, that is, got a better stand by sowing his grass-seed early in March, upon land in winter wheat or rye, rolling it and plastering it well. He has tried sowing timothy in the fall in land that had borne a crop of winter grains, harvested early, ploughed and harrowed, and the timothy brushed in. In this way an excellent crop of timothy grass has been obtained, paying for any loss that might be sustained from not sowing again with grain, either in the fall or spring. Much, however, depends on the character of the season. If the land is to be kept for meadow, he would never sow timothy with clover. If anything is sown with clover he would prefer orchard grass, because it is fit about the same time.

NOVEMBER.—Of breeding stock for the dairy, Mr. Nimmo, who flourishes near Napanec, says, he had thorough-bred Ayrshires, and short-horns, but he believed the best breed for the dairy was obtained by crossing common Canadian cows with thorough-bred Durhams. He deprecates pure-bred for the Dairy, and recommends crosses of thorough-breds of good milking families, or the best milkers of common Canadian cows. Mr. Nimmo has had much experience in raising stock. A cross between a good native cow and a pure-bred Durham, and then crossed with an Ayrshire produced excellent milkers. He had seven cows which yielded 7,800 pounds of milk during 1870. Cows must have plenty of good food and an abundance of good water. One cow well fed and cared for, is better than three poorly treated.

On the Farm, or in General Literature, send cash orders to.

DECEMBER.—It will do no harm and may do good to repeat our oft-given advice to farmers old or young, but especially the young in respect to the careful reading of good books treating on the many topics of Agriculture and Horticulture. Money spent on useful works is not wasted. Besides the pleasure of study, there are many profitable results arising from careful study. In the works of the best authors you have the collated results of knowledge tested by experience. Book learning is not to be despised in these days, and it is a pleasing fact that the literature of farming is greatly on the increase. There are also many valuable periodicals published in the interest of agriculture, and in every farm-house there should be found one or more of these.

Splendid Lot of Writing Desks and Work Boxes.

The Royal Family.

THE QUEEN.

VICTORIA, of the United Kingdom of Great Britain and Ireland, &c., Queen, Defender of the Faith. Her Majesty was born at Kensington Palace, May 24, 1819; succeeded to the throne June 20, 1837, on the death of her uncle, King William IV.; was crowned June 28, 1838; and married February 10, 1840, to his late Royal Highness Prince Albert. Her Majesty is the only child of his late Royal Highness Edward Duke of Kent, son of King George III. The Children of Her Majesty are:—

Her Royal Highness VICTORIA-Adelaide-Mary-Louisa, PRINCESS ROYAL OF ENGLAND AND PRUSSIA, born November 21, 1840; and married to his Royal Highness Frederick William of Prussia, January 25, 1858, and has issue five sons and three daughters.

His Royal Highness ALBERT-EDWARD, PRINCE OF WALES, born November 9, 1841; married, March 10, 1863, Alexandra of Denmark (Princess of Wales), born December 1, 1844, and has issue three sons and three daughters.

Her Royal Highness Alice-Maud-Mary, born April 25, 1843, married to H. R. H. Prince Frederick Louis of Hesse, July 1, 1862, and has issue three daughters and two sons.

His Royal Highness Alfred-Ernest-Albert, Duke of Edinburgh, born August 6, 1844.

Her Royal Highness Helena-Augusta-Victoria, born May 25, 1846, married July 5, 1866, Prince Frederick Christian of Schleswig-Holstein, and has issue two sons and one daughter.

Her Royal Highness Louisa-Caroline-Alberta, born March 18, 1848, married March 23, 1871, to the Marquis of Lorne.

His Royal Highness Arthur-William-Patrick-Albert, K. G., born May 1, 1850.

His Royal Highness Leopold-George-Duncan-Albert, born April 7, 1853.
Her Royal Highness Beatrice-Mary-Victoria-Feodore, born April 14, 1857.

PERTH.

Thomas Cairns, Postmaster.

Office Hours.—From 9 a.m. to 8 p.m. daily, Sundays excepted.

GRAFTING WAX.—This is an article that every farmer should keep on hand, ready for use whenever needed, for it is valuable for various other purposes besides that of grafting. Wounds made in pruning large trees will heal over much sooner if coated with this wax, and if a piece of bark is accidentally stripped from a tree, the place should be covered over with it, and the wood will remain sound and healthy underneath. There are several recipes for preparing this wax, and I found the following better than any other one tried: Melt in a basin one pound of tallow, two pounds of beeswax and four pounds of rosin; stir well together and keep in a cool place in the dish in which it was melted. If beeswax is a very costly item, one-third less quantity can be used. This wax is most excellent for sealing the corks of bottles whose contents are desired to be air-tight, and for covering cloths to tie over preserved jars. It can be melted over when required for use, and it will spread with a knife upon bandages, &c.; is the best sealing wax that can be used for many purposes.

Sir Isaac Newton's nephew was a clergyman. When he had performed the marriage ceremony for a couple he always refused the fee, saying, "Go your ways, poor wretches, I have done you mischief enough already."

Prayer Books and Church Services, in every variety of Binding

RATES OF POSTAGE.

Postage on all matter transmissible by Post—within Canada—to Prince Edward Island, Newfoundland, Great Britain, France and the United States.

Description of matter.	Between any place in Canada and to Prince Edward Island and Newfoundland.	To Great Britain by Canadian Steamer.	To Great Britain by Steamer sailing from New York.	To France by Canadian Steamer.

MONEY ORDERS.

Every money order office in Canada issues money orders on every other money order office in Canada as well as on every money order office in the United Kingdom. Every money order office in the United Kingdom also issues money orders on every money order office in Canada.

MONEY ORDERS IN ONTARIO AND QUEBEC.

All the money order Post Offices in Ontario, Quebec and New Brunswick are authorized to draw money orders on each other for any sum up to \$100, and for as many orders of \$100 each, as the applicant may require, upon the following terms, viz., in Ontario and Quebec,

On Orders up to \$10.....	5 cents.
“ over \$10 and up to \$20...10 “	
“ over \$20 “ \$40...20 “	
“ over \$40 “ \$60...30 “	
“ over \$60 “ \$80...40 “	
“ over \$80 “ \$100...50 “	

MONEY ORDERS ON THE UNITED KINGDOM.

The money order offices throughout the Dominion also draw upon all the money order offices in England, Ireland and Scotland, and the Channel Islands, for any sum up to £10 sterling, and grant as many orders for £10 sterling each as may be needed to make up the amount to be remitted. The terms are as under:

On Orders up to £2	25 cents.
“ over £2 and up to £5... 50 “	
“ over £5 “ £7... 75 “	
“ over £7 “ £10... 1.00.

MONEY ORDERS ON THE LOWER PROVINCES.

The money order offices in Canada draw also upon all money order offices in Prince Edward Island and Newfoundland. Orders, like those of the United Kingdom, are made payable in sterling money, and for sums up to £10 sterling. The terms are:

For orders upon the Lower Provinces the same rates of commission as upon money orders drawn by Ontario or Quebec upon offices within those Provinces.

For money orders on the other Provinces the terms are:

For orders up to £5, 25 cents.

“ over £5 and up to £10, 50 cents.

No half cents can be introduced into orders.

No money order exceeding \$100 in amount can be granted in any office in Canada; but Postmasters are at liberty to grant two or more orders for \$100, or for any lesser sum.—They cannot, however, grant two or more orders for sums of or under \$30 on the same day to the same applicant in favor of the same payee.

SAVINGS BANK DEPARTMENT.

The Postmaster General will receive at any of the Post Office Savings Banks, deposits paid to the postmasters by persons wishing to place their money in the Government Savings Banks.

2. The direct security of the Dominion is given by the Statute for all deposits made.

3. Any person may have a deposit account. Any deposits will be received daily, during the ordinary hours of post office business, of any number of dollars, from \$1 up to \$300, the total amount which can be received from a depositor in any one year, except in cases to be specially authorized by the Postmaster General.

4. The postmasters of the offices named will act as agents for the receipt of the money deposited for transmission to the Postmaster-General, and for the payment by the Postmaster-General of money withdrawn by depositors. They will also furnish all information with respect to the mode of depositing or withdrawing money.

5. Each depositor will be supplied with a pass-book, and the sums paid in, or withdrawn, will be entered therein by the postmaster receiving or paying the same. In addition, a direct receipt for each amount paid in, will be sent to the depositor, from the Postmaster-General, and the Postmaster-General will issue a cheque, payable at any Post Office Savings Bank desired, for any sum withdrawn.

6. Every depositor's account will thus be kept with the Postmaster-General, and a depositor may pay into his or her account with the Post Office Savings Bank, at any of the Savings Bank Post Offices which at the time may best suit his convenience, and may exercise the same choice in drawing out money, subject only to the obligation of producing the pass-book, in proof of identity—whenever paying in or drawing out money.

7. Interest at the rate of 4 per cent. per annum will be allowed on deposits lying in the ordinary deposit accounts, but when a depositor has \$100 deposited, he or she may request the Postmaster-General to transfer the sum to a special account, and will then receive certificate of such special \$100 deposit, bearing interest at 5 per cent. per annum.

**Note Papers, Slates, School Books, at the lowest
Wholesale prices, by JOHN HART, Importer.**

THE STAMP ACTS.

These Acts impose a duty on every promissory note, draft, or bill of exchange, not exceeding \$25, 1 cent; not exceeding \$50, 2 cents; less than \$100, 3 cents; *not less than* \$100, if executed singly, 3 cents per \$100 or fraction thereof; if executed in duplicate, 2 cents per \$100, or fraction thereof on each part; if executed in more than two parts, 1 cent per \$100, or fraction thereof on each part.

Any interest payable with the note at maturity must be counted as part thereof. The duty is to be paid by *bill stamp*, on which the date is to be written. Bank notes, checks, and money orders are exempt. These Acts impose heavy penalties for violation.

COUNTY OF LANARK.

Judge.—John Glass Malloch, Perth, P. O.

Sheriff.—James Thompson, Lanark, Perth P. O.

E. G. Malloch, County Crown Attorney and Clerk of the Peace, Perth; Edward Elliot, Master and Deputy Registrar in the Court of Chancery, Perth.

Charles Rice, Deputy Clerk of the Crown and Pleas, Registrar of Surrogate Court, and Clerk of the County Court, Perth.

J. H. Gould, Warden; Thomas Brooke, County Clerk; W. W. Berford, Treasurer; James Bell, Perth, Registrar, S. R.; John Menzies, Almonte Registrar, N. R.; D. Kellock, Collector, Inland Revenue, County of Lanark; Archibald Campbell, Official Assignee, Perth, P. O.

DIVISION COURT.

This Court is for the summary disposal of cases by a Judge; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contracts amounting to \$100; injuries or torts to personal chattels amounting to \$40. Courts are held once in two months in each division, or oftener, at the discretion of the Judge.

CLERKS MAY ENTER JUDGMENT.

"*Special Summons*" shall be returnable on the 11th day after the day of service thereof upon the defendant in case the defendants or one of the defendants reside in the county in which the action is brought, and unless the notice required by the second section of the Act of 1869 has been given by a sole defendant, or by one or more of several defendants, and leave to dispute the plaintiff's claim has not been given by the Judge, the clerk, after receiving a return of the "*special summons*," with the proper affidavit of service, may, on the 12th day after the service of the summons, enter judgment against the defendant or defendants so served as aforesaid, for the claim, or so much thereof as has not been disputed, if the plaintiff is content with judgment for such part.

If the plaintiff is not content to take judgment for the part not disputed he must proceed to trial, as in ordinary cases, and the part of such claim not disputed shall be considered as admitted and confessed by the defendant or defendants.

(See General Rules and Orders, for the practice of the Division Courts in Ontario, &c.,—to be had at Hart's Bookstore, Perth, at \$1 per copy.)
