

The Glencoe Transcript.

Volume 45.--No. 40.

GLENCOE, ONTARIO, CANADA, THURSDAY, OCTOBER 12, 1916.

Whole No. 2334.

Drainage Work.

Tenders will be received by the undersigned up to Tuesday, October 17, for the repair of the McKellar Drain, the Devin-McTaggart Drain and the Campbell Drain, all in the Township of Esch. Plans and specifications may be seen at my residence, lot 22, con. 4, Esch-Dan. A. McCallum, Commissioner.

Notice.

A meeting of the ratepayers of the Township of Metcalfe will be held in the Town Hall, Napier, on Monday, Oct. 16, at 8 p. m., for the purpose of determining the best way of raising funds for the British Red Cross Society. HARRY THOMPSON, Clerk.

For Sale.

12 choice steers (stockers) 1 and 2 years old, 6 good heifers 2 years old, a number of registered Short-horn cows and heifers in calf or calves at foot, and one pair of heavy gelandings rising three years old.—D. Treastin, Trengena Stock Farm.

Farm For Sale.

Improved farm of 100 acres, north half lot 10, con. 4, Mos. Good bush, mostly hardwood. Good buildings and orchard. Apply to John McDonald, Route 2, Newbury.

Cream Wanted.

Will receive cream daily throughout the week, Saturday afternoons excepted during the warm weather. Cream wagon will be on its routes again this summer. Cash for eggs.—Alex. McNeil.

CHANTRY FARM SPECIAL OFFERING

Four roan bull calves. Also a number of registered Lincoln ram lambs. All correspondence promptly answered. ED. DE GEX, Kerwood, Ont.

A WINNING FIGHT

Telling of the progress made in combating the terrible 20th century plague—Consumption.

Notwithstanding the enormous increase in population in Canada in the past few years, it is more than gratifying to be able to record that the fight which the National Sanitarium Association are putting up against the "white plague"—consumption—is proving a winning one.

Prior to 1896 deaths from Consumption were on the increase every year. In 1910, despite the greater number of citizens, the figures in Ontario alone showed a decrease of 1118 over those of ten years ago. Isn't this splendid testimony to the noble work going on?

Maybe you haven't a father, mother, sister or dear friend of your own afflicted, but wouldn't it feel good to help some poor soul in the throes of the dread disease to get back into the wage-earning class—to return cured to wife and loved ones?

Our proud boast is that no needy Consumptive has ever been refused admittance to our Free Institutions at Weston and Muskoka because of poverty. But the good work cannot expand without your kindly sympathy and material help.

The need is urgent. If you are blessed with that greatest of all blessings, good health, think of your needy suffering brother and sister.

Send along your mite, however humble, to Mr. W. J. GAGG, Chairman of the Executive Committee; or to Mr. R. DUNN, Sec. Treas., 347 King West, Toronto.

Every penny you send goes to help.

CUT GLASS as Wedding Favors

There is nothing more appreciated by the bride. We are showing a splendid assortment of useful pieces at very modest prices. You will enjoy a visit to our store to look over our large stock of new designs and cuttings.

We give below a list of a few specially selected pieces suitable for gift making:

Berry Bowls \$4.50	Bon Bon Dishes \$2.00
Spoon Trays 2.75	Water Set (7 pieces) 9.75
Cream and Sugar 4.45	Comports 2.75
Vases 4.75	Jelly Dishes 3.95

HAND PAINTED CHINA SPECIALS

Butter Tubs, 75c; Bon Bons, 50c; Cream and Sugar, 85c to \$2.50; Nut Bowls, \$1.25 to 3.25; Celery Sets, 7 pieces, \$3.00 to 3.75; Olive Sets, \$2.50; Fern Dishes, \$1.75 to 2.50; Spoon Trays, 50c to \$1.25; Condiment Sets, \$1.00 to 1.75; Tea Pot Tiles, 50c; Salt and Peppers, per pair, 25c to 75c; Salt Dips, 15c to 25c each; Dresser Sets, \$2.50 to 3.50; Bread and Butter Plates, 1 dozen, \$1.50; Mustard Dishes, 50c; Spoon Racks, \$1.00; Chocolate Set, \$5.00; Olive Dishes, 50c to \$1.00; Jelly Plates, 75c to \$1.25; Whipped Cream Sets, 75c to \$1.50.

When in need of Glasses remember we are Optical Specialists.

Pathetic End of a Romance Lasting Over Thirty Years.

Many years ago a young man, studying in Boston lived for a time in a private boarding house of the Back Bay. As most of the guests were wealthy widows, I named it the House of Vells. Among those coming in from the outside to take their meals was Miss Adams, a descendant of the historical Adams family and a woman of about sixty years.

She was engaged to be married and had been engaged for more than thirty years. Her lover called, took her to dinners and the theater, sent her flowers and sweets as in the days of their youth. Those who knew her told me this story:

While still young she had been left an income sufficiently large to maintain herself in comfort, but not enough for the upkeep of a home such as she thought befitting her station in life. So she lived in lodgings, while her fiancé cared for his widowed mother, who lived to be very old.

At the time to which I refer her lover held a responsible position, and the only obstacle in the way of their marriage was the aged mother.

They were devoted lovers at sixty and had been devoted lovers for thirty years. Being the longest engagement of which I had ever heard or read, I was interested to know the ending of a story so unusual in life.

Some years after, meeting a former guest of the House of Vells, I asked about Miss Abigail Adams. The mother had outlived the son!

A sad and lonely old woman was still living in lodgings, looking back to the pride and selfishness of her youth, which had cost her a home and all that home might mean.

FATHER'S PERIL.

What Would You Have Done Had You Been in His Place?

Just three or four time yellowed pages in an old colonial diary. How the manuscript came into my possession is immaterial. But here are two paragraphs: "February ye tenth, 1628. This day a most terrible thing happened to Father. It hath been a long, cold winter, and ye members of our little colony have suffered grievously, supplies being scant. Our leader being well nigh bare, my goodly father started forth in search of game. Of late it hath grown exceeding difficult to obtain powder and lead. Father had but one charge left for his trusty blunderbuss; but, being a famous shot, he had no doubt that this would prove sufficient to bring down some wild creature that the household might be supplied with meat.

"He had wandered some way from ye settlement when he sighted a wild turkey perched on a tree. Drawing near, he took aim. At this moment a skulking savage leaped from behind a tree near by. An arrow hurtled past dear father's head, barely missing him. Quickly he turned his blunderbuss upon ye savage and prepared to fire.

"But ye thought came in that his wife and children were in dire straits for food. Having but the one shot, what should he do? To slay ye savage would mean that ye turkey would escape. To shoot ye turkey would place father at ye mercy of ye cruel redskin. Momentarily he hesitated; but, suddenly determining upon a bold course, he took steady aim, fired and slew ye—"

Here the manuscript breaks off. I'm sorry that I ever ran across the confounded thing.—Walter G. Doty in Cincinnati Enquirer.

Oddities of Taxation.
In England there have been many amusing taxes and more amusing evasions. At one time the horse was singled out as a peculiar victim, and the farmer evaded the obligation by riding his cow to market or by harnessing his wife to the cart alongside of a big dog to drag the produce to town. The tax on chimneys resulted in the destruction of many fine old fireplaces, and the tax on windows had the effect of making the houses look as if they had been boarded up and deserted. It also impaired the eyesight of hundreds of Englishmen.

A Cobbler's Daze.
In most countries thirteen is always spoken of as "the baker's dozen," but in Italy it is called "a cobbler's dozen." There is a tradition in that land that formerly there was a law compelling cobblers to put twelve nails around the edge of a boot heel and that when nails were cheap a thirteenth nail was driven in the center for luck.—London Mail.

Something Wrong.
"Is this a studied insult, or what is it?"
"How now, girlie?"
"This fellow writes on his card, 'Sweets to the sweet,' and sends me a package of lemon drops."

The Back Yonder Club.
What has become of the family that used to eat Sunday dinner that was cooked on Saturday?
When did you ever see a sawbuck? Not to go back too far, do you know what a sawbuck is?

Distrikt and General.

Watford stores now close at 6 o'clock p. m. except on Saturdays.

Frost damaged the crops in the Leamington district to the extent of \$100,000.

John A. Finlayson, Dutton, has been awarded the degree of B. A. from Queen's University, Kingston.

West Middlesex Teachers' Institute will meet at Strathroy on Thursday and Friday, October 19 and 20.

Richard Steinhoff, a farm laborer aged 58, was stuck and instantly killed by a C. P. R. express at Kent Bridge.

A stranger representing himself as a collector for a farm machinery company got away with \$100 at Ridgeway.

Alex. L. Campbell, one of the pioneers of South Brooke, died at his home on the first conclusion last week.

While James Brandon and A. J. Clarke of London were fishing in the Thames their boat capsized and Brandon was drowned.

The public school at New Glasgow, Aldborough township, has been closed on account of recent deaths from infantile paralysis in the district.

John J. McGill of Aldborough and Miss Florence Irene, daughter of Mrs. Jane Stalker of Dunwich, were married on Wednesday in Duff church, Lalgrie.

Harry Joyce of Wabash has filled his granary with a carload of oats from Manitoba. The 2,000 bushels cost him 50 cents per bushel, including freight.

About twenty electric motors, ranging from a quarter to seventy-five horsepower, have been installed at Strathroy since the inauguration of hydro there.

Lieut. Lawrence G. Role of West Lorne, who enlisted with the first battalion, has been awarded the military cross for conspicuous bravery and gallant conduct at the front.

An oil well is reported to have been struck on J. P. McVicar's farm, south of Strathroy, which is pumping two barrels an hour. Remember it is only "reported," and keep your money in your pocket.

Spontaneous combustion is blamed for the numerous barn fires in Western Ontario. During the months of August and September 121 well filled barns were destroyed, with a total loss of over \$600,000.

Two dogs while coon hunting in Malahide are reported to have crawled two miles through a fourteen-inch drain, but got stuck in one of twelve-inch diameter and were finally released, apparently unharmed, by a farmer who heard a noise under his feet.

In the two weeks prior to September 16th, 932 drunks were arrested in Toronto and 394 appeared in police court. In the two weeks following that date, 69 drunks were arrested and taken into court, and yet some persons told us that prohibition would lead to an increase in drunkenness.

Last week it was announced that Ontario health authorities are alarmed over the spread of infantile paralysis, and it may be necessary to close schools and kindergartens. During the present month there have been forty-nine cases and five deaths in Ontario.

In the whole month of August there were forty-four cases and five deaths while the July record was twenty cases and three deaths. The epidemic seems to be more or less general, and covers all parts of the province. There was one case of a man fifty years of age in Prescott county.

Death of Mrs. Richard Everitt.

Newbury, Oct. 9.—The death occurred on Wednesday, October 4th, of Hannah Sharpe Everitt, wife of Richard Everitt, aged seventy-three, from cancer.

Mrs. Everitt came with her husband to this country from England about fifty years ago. After living in Newbury for a number of years they purchased a farm on the Hagerty road between Wardville and Newbury, where they moved with their family and have resided there continuously ever since. By her kind heart, genial manner and hospitality, Mrs. Everitt won for herself many friends, by whom she will be sadly missed.

Besides a sorrowing husband, three daughters—Mrs. J. H. Robinson of Newbury, Misses Maud and May at home—are left to mourn the loss of a devoted wife and mother.

Being a staunch and consistent member of the Church of England, the funeral services were conducted by the Rev. Mr. Hale, rector of the parish, at the home Saturday afternoon at one o'clock, after which the remains were taken to Oakland cemetery for interment. The floral offerings were very beautiful. The pallbearers were M. Fowler, J. A. Armstrong, Jason Bell, Wm. Thompson, C. Fennell and Frank Robinson.

The sympathy of the entire community is extended to the bereaved ones.

Metcalfe Council.

A meeting of the Metcalfe township council was held at Napier on Monday, October 2nd.

Petition of J. A. McIntyre, asking for grant on township line between Metcalfe and Ekfrid, opposite lot 19, con. 14, was granted. Ekfrid to put on same amount of gravel.

A number of accounts were passed for payment. Council adjourned to meet on Monday, November 6th, at 10 a. m.

Ill fitting boots and shoes cause corns. Holloway's Corn Cure is the article to use. Get a bottle at once and cure your corns.

A Battlefield Incident.

Finlayson, referred to in the following letter, is Pte. Harry A. Finlayson of the Princess Pats, one of Glencoe's boys who enlisted and went from the West early in the war. Harry evidently has not only been in close touch with the enemy but in the midst of it all is able to give a little help to the wounded:—

Liverpool, 9th August, 1916. To the Adjutant P. C. L. I.

Dear Sir,—On the 3rd June, when I was hit, I was helped by one of your men, who dressed my wounds. His name was Finlayson, and he was in your No. 16 Platoon. I have been unable to find out over here if he came through alright, so I am enclosing a very small cheque which I would greatly appreciate your giving to him—or possibly getting him something in the way of smokes. With my warmest thanks.

Yours sincerely,
W. R. CRIGHTON,
Capt. 60th Battalion.
Address Bank of Montreal.

Strathburn

Mr. and Mrs. Wm. Crandell of Cass City, Mich., spent the holiday with their daughter, Mrs. Nathaniel Currie.

Mrs. D. H. McRae, who underwent an operation in a London hospital, is improving as well as can be expected.

Mr. and Mrs. Robert Dymock spent the week in Detroit.

John Hick and his gang of men have started out again this season packing apples.

Geo. Hurley, Raspberry Hill, spent Thanksgiving in London.

Word has been received from Mrs. Wm. Gould, who is under treatment in a Toronto hospital, that she is doing as well as can be expected.

Much sympathy is felt for Mr. and Mrs. Wm. Dobson, who lost their house and its contents by fire last Thursday evening.

Appin

Mr. Miers preached in Thameville on Sunday evening.

Duncan Campbell has recently repaired his house.

Sidewalks are being laid on Wellington street.

Mr. and Mrs. D. A. Patterson spent Thanksgiving with Mrs. Clark in Essex.

Thomas King and son Garnet visited relatives in Detroit on Monday.

The Misses Gillies of London and Miss Isabel Patterson of Iona Station spent the holidays with Miss Sara Patterson.

Miss Johanna Munroe has returned home after spending a week with Mrs. D. A. Patterson.

The girl mist was idle for a few days owing to the breaking of a large belt.

Miss Marjorie I. Covey, who is attending business college in London, spent Thanksgiving at her home here.

KNAPDALE.

Mr. and Mrs. Buel of Bothwell spent Sunday with friends here.

Apple picking is keeping the farmers busy these days.

Mr. and Mrs. Alex. Summers of Oakdale visited friends here recently.

Clayton Armstrong of Windsor was here for Thanksgiving.

Clayton Sheppard of Wardville spent Sunday here.

Mrs. R. B. Smith is, we are pleased to say, recovering from her illness.

Money Not Lost to Community.

But even if some bars show a decline of business of \$200 a day and others a drop of \$100 or \$50 a day, do not let us fall into the error of regarding this as a dead loss. If the bartenders have not taken in this money the presumption is that the customers have it still. It is not lost. It is around somewhere and is being paid out in some way, and is probably just as busy and useful as if it had been merrily rung up on the cash register behind the bar.

Even if the bar customers do not spend money freely for the tame drinks that now replace the wilder fluids that were sold before, it may not be an unmixed evil. People will drink them if they want them, but if they do not want them they will not drink them—and that is the great difference between a temperance drink and the other kind. If ginger ale does not even make a man feel good he is not going to stand around and consume it in large quantities merely to increase the bar receipts.—Toronto Star.

The annual field day celebration of the G. H. S. will be held on Thursday, Oct. 12th (today).

An oil promoter who recently pulled off a big steal across the border is said to be now fishing for suckers in the Sarnia district. Keep your money in your pocket.

Sir Wilfrid Laurier is reported to have made the promise that in the event of a Liberal government being returned in the next federal election the duty would be taken off machinery for farming, mining, lumbering and fishing.

F. J. Eaton of Ekfrid found a suitcase on the Longwoods Road on Wednesday and placed an ad. in the Transcript. An hour or two later a man in Chatham phoned an ad. to the Transcript that he had lost a suitcase of his car while passing through Ekfrid. Result—loser and finder are quickly brought into touch and the lost is restored to its owner. Moral—advertise in the Transcript.

Industrial Classes.

The following letter is published in order to get an expression of the people of Glencoe and vicinity in the matter to which it refers. Write your views to the Transcript or the secretary of the High School Board:—

Toronto, Sept. 14, 1916. Dear Sir,—It would appear from the importance of Glencoe as an industrial centre that you must have a number of young people entering industrial life who would profit by the organization of industrial day or evening classes under the provisions of the "Act Respecting Education for Industrial Purposes."

Such industrial classes are intended to give the boys who are leaving the public schools and who intend to enter industrial pursuits as well as additional education as possible and that along practical lines, to give workmen in shops and factories an opportunity to improve their general education and to help them to be more skillful and efficient in their work, and to train girls and young women in the industries of the home.

As you are probably aware, the Department of Education makes liberal grants to assist in the organization and maintenance of such classes. For day schools an annual grant of \$100.00 for each of the five forms is given. For both day schools and night schools in villages five-sixths the salaries of the teachers is paid by the Department; the equipment is paid for in instalments, 40 per cent. the year it is purchased and 20 per cent. each succeeding year till it is paid for; and a liberal grant for accommodations, depending on the grade of those furnished, is also given by the Department.

In almost all of the places in which industrial classes have been started, the instruction and training given have been very much appreciated and the classes have been well attended.

A copy of the "Recommendations and Regulations for Technical and Industrial Schools" is mailed you herewith under separate cover.

High School Boards are the only bodies authorized to take the initiative in forming these classes. I should be much pleased to meet your Board to discuss with members the advisability of starting such classes and to assist in organization if it is decided to establish a school.

Yours truly,
F. W. Merchant.

The Chairman,
The High School Board,
Glencoe, Ontario.

About the House

Useful Hints and General Information for the Busy Housewife

Canning and Preserving Meat.

Canned meats are a great convenience and luxury, not only as an extra dish for the family, but when company arrives unexpectedly, or work hands are needed at a time when the housekeeper has an unusually hard day's work to accomplish and finds the larder rather low. Especially is this true in the country where a trip to town for the purpose of obtaining meat is sometimes impossible.

At butchering time one often tires of seeing so much fresh meat about, that if there is not some forethought some of the canning, etc., may be neglected, but every scrap of meat available should be carefully prepared and saved, for it proves very appetizing and saves butcher's bills.

Spare Ribs, either fried or roasted and canned in tin cans or tin molasses pails, are excellent, and when carefully prepared will keep as fresh and sweet as when first cooked, until midsummer and fall. The work of roasting them is easily and quickly done. With a sharp ax cut the ribs in the center, or saw them with the meat saw, if one is handy, then cut in pieces of a convenient size to place in cans; put the ribs thus prepared in a roasting pan, season with pepper and salt as for the table, add a little water and roast till tender and there is no water left in the fryings; then pack the pieces closely together as possible in the cans, add fryings to cover well, and seal. If there is not enough fryings to cover the meat a little, nice lard may be used. This is not wasted as it keeps sweet and good and all can be used when the meat is opened. We think it excellent for frying potatoes and bread.

Sausage may be canned in the same way, frying or roasting till just done and free from water, or it may be packed in jars and covered with fryings, covering it to a depth of two inches. Prefer to put it in small jars, and use lard for the last covering. When putting the fryings over the meat do not fill quite enough to cover, put on a light weight to hold meat closely and the next day melt the lard and cover.

Fresh pork is very nice preserved in this way. The lard must be deep enough to render the meat airtight, and it will keep for months. When the meat is wanted remove lard, take out enough for one or two meals, and replace the lard, spreading it firmly. Keep the meat tied up tightly with several thicknesses of paper in a cool, dry place. These meats are greatly relished by the working men who require something substantial.

Fried beef may be kept a long time. Grind very fine, season with salt and pepper, make into patties like sausage or stuff in cases and fry or roast and can, or put in a jar like sausage. It sometimes happens the weather becomes too warm to keep the beef fresh, and the fried beef patties are a pleasing change from corned beef.

Potted liver may be kept some time during cold weather and is nice for sandwich filling. Pour boiling water over the liver and let it stand till cool to draw out the blood, drain, add hot water, salt, pepper and herbs to flavor, and boil until tender; add to the liver, and two tablespoons of butter, and an onion (if the flavor is liked) to each pound of liver, chopping the onion and frying it in butter and grind all together in a fine paste. Boil the broth in which it was cooked down to about a teacup, add it to the meat, and add the juice of one lemon for each pound of liver used. Pack firmly in small jars and cover well with melted lard. Slice cold when needed.

Souse is a dish much relished and may be made of waste bits of meat such as the lean from the jaws, the legs, feet, ears, or heart and tongue. Simmer the meat in weak salt water till very tender, drain from the liquor, remove all bones, peel the tongues, pack in glass cans, cover with boiling vinegar that has been weakened and spiced or flavored to taste, seal airtight. This is nice to use during the spring.

When not relished prepared in other ways, the bits of meat from the heads can be made up into mince meat and canned while hot for use when needed as it will keep nicely until midsummer.

Home-Made Relishes.

Catsups and similar relishes may be prepared at home at a much lower price than you pay for them in the stores. They are easy to make, and are wholesome. Catsup should be cooked in an enamelware kettle or a porcelain-lined receptacle, because the copper vessels are not reliable. The effect of slowly boiling vinegar in a copper kettle is likely to be injurious, if not actually poisonous.

Jars and glasses containing canned fruits, such as jellies, jams, preserves and conserves, should be quite spotless on the outside. Inspect these jars regularly so as to be sure that none of the contents are fermented or soured. These processes cause a running over and leakage which makes the shelves very sticky and unpleasant. It also attracts ants and other insects.

When you find that your preserves are beginning to show signs of fermentation, it can be stopped sometimes by putting the affected jars in a kettle and boiling them over again. They

may not be so perfect as to color and taste afterward, but they will not be really spoiled. There is no harm in really trying this, anyway.

To Light a Fire Quickly.

While we do not approve of the dangerous and all too common practice of lighting fires with kerosene, in any manner, those who are in the habit of doing so, may make the operation much safer by pouring a half-pint of the kerosene into a quart can, just before retiring for the night, and standing three or four corn-cobs on end in it. The next morning they will have absorbed much of the oil, and may be placed in the stove, underneath other fuel.

Close the stove and touch a lighted match to the saturated cobs, and a good blaze will be started up at once, without the danger attending the usual way—that of pouring oil all over the wood, or lighting the small wood, then pouring the kerosene on the blaze; either of which is extremely dangerous.

Household Hints.

Scald new brooms in hot suds to toughen the fibre.

A little vinegar will soften the roughest of hands.

To remove iodine stains on clothing sponge freely with ammonia.

White enamel paint will cover a multitude of sins at small expense.

Add a minced sweet pepper to the potato salad. It gives a good flavor.

Celery roots, boiled, cooled and cut into dice, make a very acceptable salad.

The only way to keep food hot after it is dished up is to have metal dish covers.

Olive oil is exceedingly nourishing and healthful, and children should be coaxed to like it.

If washing powders are used in the washing of linen, it will go to pieces in no time.

Salt meat is not so nourishing as fresh meat and should not form a large part of the diet.

If your thread insists in knotting, unthread your needle and thread it from the other side.

A teaspoonful of baking powder to every four eggs will make an omelet of wondrous lightness.

When making cornmeal mush do not thicken it too much or it will be harsh and hard to eat.

Save all materials left over from meals; they will make side dishes to help out with the lunch.

Save the scraps of fat meat and bones; they will be handy to quicken a slow fire in the morning.

Never waste the drippings or meat essence in the frying-pan—it will make a savory brown or creamed gravy.

A teaspoonful of powdered borax added to the water in which clothes are rinsed will be found to whiten them considerably.

There is poor economy in buying cheap blankets; an all-wool blanket not only outwears the cheaper one, but is much warmer.

When cream doesn't "whip," stand it where it will get very cold, then beat it to the consistency of an egg, and beat two tablespoons of butter, and an onion (if the flavor is liked) to each pound of liver, chopping the onion and frying it in butter and grind all together in a fine paste. Boil the broth in which it was cooked down to about a teacup, add it to the meat, and add the juice of one lemon for each pound of liver used. Pack firmly in small jars and cover well with melted lard. Slice cold when needed.

Vegetables that contain little starch such as onions, carrots, turnips, tomatoes and cabbages, can be eaten by stout people without fear of gaining flesh.

In mixing any pudding made with batter, you may add too much liquid if you are in a hurry. If your batter is too thin thicken it with white bread-crumbs.

A good way to serve the left-over chicken is to make a biscuit crust, the same as for old-fashioned short-cake. Spread the chicken between and pour gravy on the whole.

The steel rod from an old umbrella or parasol will make an excellent plant supporter next summer, and if painted green will look well. The ribs, too, may be brought into use for a similar service.

To make flaky piecrust fry out three pounds of pure lard and two pounds of cold suet; strain and mix together. This makes very nice, rich piecrust and is very much healthier and cheaper than clear lard.

When you turn out a very light boiled pudding it is apt to break. Don't send it to the table like this, but coat it with meringue made from the white of an egg beaten stiff with an ounce of caster sugar. Put it into the oven long enough to brown the meringue lightly, then decorate with glaze cherries or angelica strips.

Rust stains, no matter how bad, can be easily removed by putting vinegar and salt on the stain and placing it in the warm sunshine. Repeat this until the stain is removed. The vinegar and salt (together) are very active and will remove the stain more quickly than lemon and salt.

Take a spoon and place on the material to be marked with a lead pencil mark half way around the spoon.

COME ON OR COME OUT!

THIS is the allied soldiers' cry, spoken or not, to the Germans in their vast system of dug-outs. How it is answered may be partly judged by the fact that since the allied offensive started in July nearly 60,000 German prisoners have been taken.—Drawn by Louis Raemaekers in London Daily Mail.

Then lower the spool a little to form the scallop and mark half way around again. Continue in this way until you finish marking your material. Any size scallop can be made by using larger or smaller spools.

No matter how careful you may be when cooking, it isn't always easy to prevent things going wrong. But housekeepers sometimes set a spoiled dish aside as "wasted," or eat it in its unpalatable form, when the trouble might be remedied if they knew what to do. Suppose your boiled custard curdles, for instance, try putting it in a very cold basin, and beating it briskly. Another plan is to add a teaspoonful of cornflour, mixed to a paste with water. Cook this for a few minutes, then strain the thickened custard into a glass dish.

FACTS ABOUT THE WEATHER.

By Chas. M. Bice, Denver, Colorado.

The winds are the chief factors in weather, but they change so unexpectedly that prognosticating the weather is very difficult.

Weather signs are numerous and many of them still remain a mystery, but enough have been deciphered to render forecasting tolerably certain for at least 48 hours.

We have rain when there is cause for it; and the wind blows this way and that, for well ascertained reasons. Air pressure determines the winds and winds are the potentials of storms. Barometric pressure of the air simply means that this instrument records its relative density, or weight, it having been proven by experiment that when air is heated it expands, or becomes lighter, for the same volume, and it becomes heavier as it cools.

Air is always flowing from regions of high pressure to those of lower, hence the winds.

A weather map for the country shows the high and low pressures by heavy black lines, and all the places having the same air pressure are shown by these heavy lines running through them and the figures close to the lines indicate the extent of the pressure.

These heavy lines are called Isobars meaning equal weight or pressure. In the U.S. and, I suppose, similarly in Canada, each morning at 8 o'clock, Washington time, at every weather station in the country, the barometer is read and the result sent to Washington by telegraph, where the readings are placed on a skeleton map of the country, each at the location of the city from which it is telegraphed, and lines are then drawn through the places having the same pressure. From these it is easy to see where the high and low pressure centres are located. Such a map generally shows several such areas. Observing these maps day by day will show changes in location of the high and low pressures. It moves eastward across the country at several hundred miles a day, and often many of them are on their way at the same time. Experience has shown that the "lows" generally cross the Northern part of the U.S. and almost invariably pass down the St. Lawrence River valley. The "highs" occupy the spaces between the lows and also proceed eastward with an inclination to the south-east, but their progress is not so regular as that of the "lows."

The "lows" are generally more or less of a circular area, surrounded by high pressures, and the air tends to move from the high to the low areas from all sides. The rotation of the earth on its axis changes the direction of these winds slightly. The low is a sort of air whirlpool, embracing sometimes an area 1,000 or more miles in diameter, and moving slowly eastward, called a cyclone; but in meteorology, a cyclone is not a destructive wind, as popularly conceived. Such are called tornadoes.

A warm wind from the south to cooler places north causes warmer weather in the latter, and vice versa a cool wind from the north in winter often carries freezing weather to the Gulf States.

On the weather map places of equal temperature are connected by dotted lines called Isotherms. They are usually bent northward in front of a storm, and southward in its rear.

The humidity in a wind is also an important factor, for it varies with the temperature. Air from the south moving north warms the country but is itself losing heat, and as it cools and the air contracts it holds more moisture relative to bulk until finally at some distance above the earth, saturation may be reached and the moisture condensed into the form of clouds, and if continued, rain is sure to fall.

Several cyclones pass eastward each week as a rule; cyclones and anticyclones follow so closely that we are in the one or the other almost constantly. Most of the winds are cyclonic, and to them chiefly the middle, or what is known in this country as the Mississippi valley, owes its rainfall.

An anti-cyclone means the area in which the cooler air of the upper regions is settling to the surface of the earth and flows away in all directions. Hence the weather in a region of high pressure is usually cool, clear and dry, with a west or north-west wind. This is why the air is fresh and bracing following a rain storm. It is what is called anti-cyclone weather.

Hurricanes are storms that originate at sea and are of the same character as the land tornadoes, but usually far more destructive. Those that affect Canada and the U.S. have their origin near the West Indies, and generally move westward to the coast, and then northward and pass out across the Atlantic with decreasing severity. We will consider thunder storms in our next.

But the Question Returns. As the stage coach careened toward the edge of the cliff the timid tourist gazed anxiously down at the howling stream 300 feet below.

"Do people fall over this precipice very often?" she asked.

The driver chuckled to his broncos. "No, ma'am," he returned placidly; "never but once."

THE FASHIONS

The Long Flowing Veil.

The new veil is a long, flowing one draped over the top of a small high-crowned hat with a narrow turned-down brim, like the one pictured here. It is caught together in front and fastened to the top of the crown with a large, round pin, and from there it hangs softly down the back.

There are ever so many charming veils of this type nowadays. They are made of chiffon, silk net or lace, some of them finished with borders and others without. And they come in a variety of colors to suit every complexion and every taste. Some of the prettiest ones are in lovely shades of purple, soft rose-color, lavender, taupe, green and blue, as well as black and white. They are sometimes worn on small close-fitting turbans and again on larger sailor shapes.

Hats and veils like these are worn with frocks of serge, satin or silk. The

illustration is shown here. It shows the straighter effect and long lines which Parisian houses have made a point of featuring this season. Long straps starting from the shoulders, under the large collar, and working their way down on either side of the front, relieve the severity of this simple design. Little slash pockets are placed on both the straps below the belt line.

In some of the one-piece dresses, a long, narrow girdle of the material is wound loosely around the figure several times and tied at the back or front in a loose knot. The ends are often finished with silk tassels. The belt is generally arranged at the low waist-line, giving a suggestion of the Mogen Age effect, which, it is predicted, will become popular again.

The materials most favored for these practical frocks are satin, broadcloth, fine serge, tricotine, fancy twills, gabardine and poplin. The Parisienne favors wool jersey very highly for these one-piece frocks, also the checked velours de laine which are considered so very smart. These materials are excellent for shopping, motoring and such occasions when one must be simply though smartly dressed. Some of the colors are dark brown, terra cotta, orange and green. The combinations in checked velours are dark green with beige, gray with navy blue, and beige with Burgundy, not to speak of the black and white checks, which never seem to lose their popularity.

Skirts Are Longer and Straighter

There is a decided tendency to longer and straighter-hanging skirts in most of the autumn models. Paquin has made many dresses noticeably longer, both for street and evening wear, and many of the other Parisian couturiers have lengthened the skirts for the coming season, though not to an exaggerated degree.

The skirts have not lost any of their fullness in their downward tendency. They simply follow the lines of the figure more closely and do not flare as much. The hoop skirts and crinoline effects are practically dead and some soft draperies are seen in their stead, especially in evening and afternoon dresses of satins, crepes and soft silks.

These patterns may be obtained from your local McCall Dealer or from the McCall Company, 70 Bond Street, Toronto, Ontario.

GERMAN PRISONERS.

How the French Secure Them From Running Away.

An American who fought with the French gives in the Atlantic Monthly a lively description of a successful attack on the enemy's trenches and the capture of many German prisoners:

Our line was wearing thin. Halfway to the third trench we were reinforced. The ground in our rear was covered with our men. All at once came a change. The German artillery in front ceased firing, and the next second we saw the reason why. In the trench ahead the German troops were pouring out in black masses and advancing toward us at a trot. Was it a counter-attack? Then, as suddenly our own artillery ceased firing and the mystery became plain. The Germans were approaching in columns of four, officers to the front, hands held in the air; and as they came closer we could distinguish the steady cry, "Kameraden! Kameraden!"

They were surrendering. Out flew our knives, and in less time than it takes to tell it we had mingled among the prisoners, slicing off their trouser buttons, cutting off their suspenders and hacking through belts. We cut the laces off all their shoes, and thus slopping along, their hands helplessly in their breeches pockets to keep their trousers from falling round their ankles, shuffling their feet to keep their boots on the huge column of prisoners was sent to the rear with a few soldiers to direct rather than to guard them.

As the Germans had left the trenches, their artillery had paused, thinking it a counter-attack. Now, as file after file was escorted to the rear and it became apparent that the men had surrendered, the German artillery opened up again furiously. Six shells landed at the same instant in almost the same place, and within a few minutes Section 3 of our company had almost disappeared.

A Stinger Himself.

Merely Curious—What was it the woman had, a sewing bee? Male Possessive—Must have been a "bee" all right; I guess there was stinging enough.

From the Ocean Shore

BITS OF NEWS FROM THE MARITIME PROVINCES.

Items of Interest From Places Lapped By Waves of the Atlantic.

A Halifax bank lost \$1,100 by a slick operator from Montreal.

A new hook and ladder truck was lately purchased for Fredericton fire department.

Commissioner Russell of St. John feels that the city should have a chart of harbor and facilities.

Mr. F. A. Robertson of St. John has been appointed acting superintendent of the sleeping and dining-car service of the I.C.R.

The steamer Lady Sybil, which has been on the route between North Sydney and Port Aux Basques, has been sold to New York parties.

The schooner Lena F. Oxner, with a cargo of molasses, and bound from Barbados to Quebec, put into Halifax recently in a leaking condition.

Pte. Stanley Lutes, Steeves Mountain, N.B., who is now reported wounded in the hospital at Rouen, has been wounded four times already this year.

A motor ambulance to be delivered in six weeks has been ordered by the Commissioner of Public Safety at St. John, N.B. The cost will be about \$3,350.

Two boys of Welsford, N.B., Roy Woods and Chas. Thompson, were going hunting when Woods' gun accidentally discharged and killed young Thompson.

The steamship Mikado, Capt. Sinclair Cann, owned by the St. Mary's Bay Steamship Co., of Digby, N.S., is ashore on a ledge on the eastern side of Petite Passage.

The body of Thomas L. Spellman, of Halifax, N.S., who has been missing since early in September, was found last week in the water at the Halifax Ocean Terminals.

A new overhead bridge has been put in by the railway authorities about a mile north of Newmarket station, N.B. The bridge is about forty feet long, with concrete abutments.

Signaller H. R. Stewart, who recently was honored by the Czar with the Russian Medal, Order of St. George, for conspicuous bravery, was one of the first six P.E.I. boys to enlist in 1914.

At a meeting of the Patriotic Fund in the Board of Trade rooms at St. John, N.B., it was declared that St. John was not keeping faith with the fund, and that about \$29,000 more than was put in had been drawn out.

Miss Illa D. Marsten of Fredericton, N.B., has been accepted as a nurse in the Johns Hopkins Hospital. She obtained the highest marks ever obtained by any young Canadian entering that hospital.

EXILES TO BE FREED.

Scheme of Amnesty to Political Offenders in Russia.

It is reported in Petrograd advises that a well-considered scheme of amnesty to political offenders, at present under sentence of exile to northern and Asiatic Russia, will be shortly promulgated under the orders of Emperor Nicholas.

Acting under the extensive powers granted to the Minister of the Interior, that official has already seen his way to liberate 120 political exiles sent since 1905 by Administrative order to distant parts of the empire. As distinct from these there are other political exiles and prisoners who have been tried and condemned by the courts; such can be liberated only by the express order of the sovereign. But it is said that the Minister of Justice, under whose jurisdiction these cases come, is with genuine sympathy preparing a scheme of pardon as large and free as reasonable bounds allow, for the consideration of his Majesty.

HORSES SHAM SICKNESS.

French Army Veterinarians Are Convinced.

Shamming by war horses to avoid the battle front, discredited at first, seems now well established, says a Paris dispatch.

French army veterinarians have found from close observation that certain horses fall most unaccountably ill when in bombarded regions. They lie down and seem too weak and nervous to move, or go lame. When they are sent back to the veterinary camp in the rear, in a day or two they are all right again.

This has happened in so many cases that it has become a matter beyond dispute that the animals sham sickness to get away from a spot where they have to do strange work under strange conditions and where constantly horrible things make terrifying noises.

Favors Anticipated.

The minister's daughter was entertaining several of her father's small parishioners.

"Will you have more cake, Polly?" she said.

"No, thank you, miss, I'm full," said truthful Polly.

"Then I think you may put some in your pockets."

"They're full, too, miss," said Polly.

Satin Dress Braided with Soutache

one pictured here was worn with a dress of black satin with a long snug bodice fitted at the waist with soft pleats. The skirt had a full tunic pleated at the waist and made with the popular loop pockets, which were faced with purple satin to match the purple-braided design which trimmed the dress. This is one of the favored designs for autumn and it certainly is a most becoming one. The sleeve was cleverly cut to form a point be-

low the elbow, where a silk tassel was placed.

A Popular Fall Model.

There is another type of dress for fall which is rapidly gaining more and more advocates every day. This is the one-piece frock of which an il-

YOUNG FOLKS

Tommy's Luck.

It is very well, sometimes, to be the youngest of the family; but Tommy had found that even being young has its troubles, and to-day they seemed very great. His brothers had talked for a week about the coming circus. They had saved their money until they had enough for a side show or two and for peanuts. "It's too bad we can't afford tickets to the big tent," they said, "but we'll see the parade and hear the music, anyway."

Tommy supposed he was going. At least, he supposed so until it was time to start. Then he ran in to get his hat. "Why, Tommy," cried John, "you can't go! You couldn't walk to town."

Tommy stopped short. True, he had never walked so far as that. His father had taken the horses away the day before, and would not be back until night. "Couldn't you carry me part of the way?" he began.

"What! Carry a big boy like you?" "That's it!" said Tommy. "I'm either too big or too little for everything."

He knew it was no use to beg; he had learned that long ago.

He saw them tramp away out of sight over the hill and, by trying hard, kept back his tears; then he dug tunnels and played soldiers. Suddenly, as he happened to look toward the windmill, he saw Bossy, the cow, push down the gate and wander inside the well lot.

He ran as hard as he could, but it was too late; for as Bossy stepped toward the edge of the well, the bank gave way, and down she went ten feet into three feet of water.

Tommy looked at her as she floundered and shivered in the water. "Well," he scolded, "if you had only waited! I was coming as fast as I could." Then he set the windmill to pumping, so the water could not get any higher in the well, and started after help.

Every house that he came to was closed—everyone had gone to the circus. So he went on toward the town. His legs grew tired and his back ached, but he kept on. At last he heard the sound of the circus callopie. His heart leaped and he started toward the music; but then he remembered his errand; he must get help to Bossy. And just as he turned down Main Street, he met his father driving home.

In a little while he had told his story and had started to climb into the buggy, glad of a chance to ride home. But his father stopped him. "Hold on, sonny," he said, as he ran his hand into his pocket. "I guess Bossy is worth a ticket to the circus and some peanuts and red lemonade besides." So he handed Tommy three bright quarters. "I'll drive in for you after I get Bossy out."

Three hours later Tommy, swinging on a tent rope as he waited for his father, saw his brothers. "Hey, ho!" he shouted.

They came over to where he was waiting and listened to his story, first about Bossy and then about what he had seen inside the big tent.

"When," said John, as he helped himself to Tommy's peanuts. "It's great to be the youngest of the family. It seems as if Tommy was born lucky."

"I know he was born faithful," said a quiet voice. The boys whirled about and saw their father waiting at the side of the road. "Jump in," he said. "Thanks to Tommy's luck, as you call it, you'll all get a ride home."

—Youth's Companion.

USES POISON GAS.

Method Employed by Bombardier Beetle to Defend Himself.

A little British beetle has been employing poison gas to defend itself for untold ages. One of the strongholds of the bombardier beetle (Brachinus crepitans) is along the shores of the Thames in the Gravesend district. The bombardier beetle is very liable to be attacked by some of the fierce ground beetles, or Carabidae, as they are properly called. These ground beetles are extremely active, hunting about all over the place and at once giving chase when they see the timid Brachinus appear from beneath a stone. Offhand one would think that there could only be one ending to the chase, but, as soon as the pursuer draws close, a very remarkable thing happens.

First of all the bombardier beetle ejects a peculiar liquid which, when it comes into contact with the atmosphere "bursts into a sort of a pale blue-green flame, followed by a kind of smoke." Instantly the pursuing beetle seems to be overwhelmed and quite stupefied by the suddenness of the attack. The smoke appears to have a blinding and suffocating tendency, and the effect lasts for a minute or so. During this time the bombardier beetle makes good its escape.

An Italian proverb says: "On Friday or Tuesday neither marry nor set out on a journey."

Only an average of one person in every 350,000 is killed by lightning in the British Isles every year. Knives were formerly part of a bride's accoutrement, and were worn sheathed at the girdle.

Our Kitchen is Your Kitchen—it cost two million dollars and was built to furnish you with crisp, golden loaves of **Shredded Wheat**, the purest, cleanest, most nutritious cereal food in the world. It is ready-cooked and ready-to-serve, delicious for breakfast with milk or cream, or for any meal in combination with sliced peaches.

Made in Canada

WHEN THE SUB. GOES INTO ACTION

DESCRIPTION OF A TRIP ON BRITISH "TIN FISH."

Crew of the Submarine Know Nothing of What Is Going on Overhead.

A graphic description of the "life" in a British submarine about to attack a German ship is given in the following account.

Look carefully and see how the grim shadow, almost flush with the sea, blends with the grey waters and the grey sky. Her narrow deck is washed from end to end, her bow hidden in a pillow of boiling sea, her counter lathered in the foaming eddies of her wake. Behind the canvas "ridgers" of her tiny bridge her commander and helmsman ply their trade, the only members of her crew visible, the others are at their stations in her well-lighted interior. Suddenly there is a sharp word of command, more men appear on her wet deck, all her movable gear—the wheel, the ventilation cowls, the compass, and other objects—are detached and taken inside her hull. The rails are turned down in one moment flush with the deck. Then everyone disappears; the hatch is screwed tight, the main ballast tanks are filled, the periscope is pushed up to its full height, and thus she prepares to dive to the wet shadowy realms of the cod and the conger eel.

Silence After Noise. The roar of her oil engines has suddenly ceased. The silence seems strange after their thunderous note, and to take their place comes the gentle hum of the electric motors which drive her below the waves. The commander is in the conning tower, his eyes glued to the vibrating lens of the periscope. The stolid coxswain has the wheel controlling the horizontal rudders that work the boat in her trips below. The second coxswain has the wheel that steers her to port and starboard. The leading torpedo-man at the switchboard controls all the electrical devices that man has chained to his will to work this strange ship. The torpedo-men are at the fully-charged tubes. The engine staff have seen that the water and oil are shut off and are now at the Kingston valves and "blows" (blow-off valves) on the main ballast tanks. Everyone stands by his station, blind to the world without, waiting for the commands of the one man who can see.

Order to Dive. "Dive fifteen feet!" comes the command.

order, quick and concise. The next moment the bow has casted down ever so little and the boat like a shadow has slid below, guided by the steady hand of the first coxswain.

In the far distance a ship, grey from truck to waterline, is speeding along the horizon tossing a trailing haze of smoke from her belching funnels.

Torpedo Stations Ready.

"Torpedo stations, make ready!" comes from above. The firing reservoirs of the tube are instantly charged with compressed air, the caps covering the outside ends of the tubes are raised by "No. 2" of each tube, and water floods each chamber until a warning spurt from a tiny vent inside the boat tells the torpedo-man that all is clear for firing.

The silence which now reigns is alone broken by the hum of the motors. Everything depends on the judgment of one man; the others see nothing, know nothing, and have blindly to obey his will. . . . The cruiser is now standing up a dark silhouette on the skyline. Not one of her people have seen the "plume" of the submarine's periscope heading straight and true to cut them off.

Single Word, "Fire!"

Already a string of concise orders is coming down from the commander; finally, "Starboard tube—stand by." The tube is ready, "No. 2" (the chief torpedo man has jumped round to bang down the firing ball in case the electric circuit fails).

The commander's finger crooks round one of the pistol triggers before him—very carefully he is aiming with his whole ship (for the tubes are fixed in the hull). Then comes the single word, "Fire!"

There is a heavy thud, a momentary alteration in the boat's trim (at once corrected by the alert coxswain), and at the same instant over 200 pounds of explosive in the war nose of the torpedo goes hurtling away at forty miles to the hour.

"Good Shot."

The enemy notes the wake of the "tin fish"; there is a burst of flame from his secondary battery, and as the shells start on their screaming courses there is a fresh series of commands inside the submarine, and like a shadow her periscope has vanished, and she is plunging down to sixty feet below the surface, and turns and twists away, steered by clock and compass.

All the while her crew are listening. Water is a good conductor of sound and will bring to their ears a message if the torpedo has gone "home." Suddenly they hear it—just a heavy thud—and on the instant they slip towards the world of fresh air once more. As the periscope projects the commander starts and ejaculates, "Good shot—right in her engine-room."

NEURALGIA PAINS YIELD QUICKLY

Hundreds Find Sloan's Liniment Soothes Their Aches.

The shooting, tearing pains of neuralgia and sciatica are quickly relieved by the soothing external application of Sloan's Liniment.

Quiets the nerves, relieves the numbness feeling, and by its tonic effect on the nerve and muscular tissue, gives immediate relief.

Sloan's Liniment is cleaner and easier to use than musky plasters and ointments and does not clog the pores.

Just put it on—it penetrates. Kills pain. You will find relief in ten minutes. You will find relief in ten minutes.

For strains, sprains, bruises, black and blue spots, Sloan's Liniment quickly reduces the pain.

It's really a friend of the whole family. Your druggist sells it in 25c, 50c, and \$1.00 bottles.

A NEW SERVICE. Now Possible to Send a Day Letter by Telegraph.

Mr. J. McMillan, who has initiated many notable improvements since he became General Manager of the C.P.R. Telegraphs eighteen months ago, has just decided to inaugurate an important service entirely new to Canada over the hundred and ten thousand miles of wire under his immediate control, namely, the day letter which may now be sent between points in Canada on the Canadian Pacific system at a rate very much reduced as compared with the usual commercial rush telegram. Mr. McMillan is convinced that many of those who send telegrams would be quite satisfied if these arrived on the same day, whereas a proportion of the cost of the rush telegram is due to the cost of speedy delivery.

The day letter of fifty words will be rated at one and a half times the cost of a regular rush message of ten words and can still bring an answer the same day, which is as quick as many people desire. There are sixteen hundred C.P.R. telegraph offices throughout Canada, at each of which the new service will be in force, so that this will be a Dominion-wide service stretching from St. John's, Nova Scotia, to Victoria, B.C. Messages will be taken in either French or English, code words not being permissible.

Mr. John McMillan owes his success to a genial and tactful disposition which made him one of the most popular C.P.R. officials in the West, where his work centred until he was called to the head-office in Montreal last year. Although less than fifty years of age, he joined the C.P.R. at its inception, working on construction in 1883. After acting for a number of years as operator at Donald, B.C., he became Inspector of Telegraphs at Winnipeg in 1902, Assistant Superintendent in 1906, Superintendent at Calgary in 1907, General Superintendent at Winnipeg in 1913, and finally Manager of the whole telegraph system in March, 1915.

THIS STORE DOES NOT ENCOURAGE EXTRAVAGANCE

Economy in buying merchandise means good judgment in selections. Getting the best quality possible at most reasonable prices.

Our Winter Stock now at its best, with quality kept right up to top notch
Prices so low and reasonable we ask closest comparison with anything offered from any source.

Our early buying of ample stocks places us in a position to offer goods in every department at from 10 per cent. to 20 per cent. below present values. Later buying will find many lines clean out of the market and lines available much higher in price. We can with sincerity advise you to buy full winter's supply now.

If our advice to buy now to save money is not correct, two months from purchase of any article we sell you return to us and get 10 per cent. more than you paid us. This is an exceptional war year. We are in a position to know better what future prices and difficulty of procuring goods is going to be. This is why we keep advising our customers to anticipate future wants and buy now.

Do you want to buy some Table Damask

at 25 per cent. below present value? See what we are offering this week at 30c, 35c, 41c and 51c.

Our September sales were very heavy. Our October turnover points to a very great increase.
Having the goods and prices right and serving you well, we hope to not only hold all old customers but to win many new.

J. N. CURRIE & CO.
With the Stock and Service Our Customers Appreciate

Some special lines you should buy this week
Your winter supply of Underwear

Watson's Celebrated Underwear at last year's price while present stock lasts.
Watson's Fine Wood Combination Underwear. Vests and Drawers for Women, Misses and Children, every price less than present value.

Your Family Stock of Shoes
Because money can't buy better we stick to "Empress" make for women's fine shoes, "Slater" and "McCready" shoes for men. "Cote's" make for heavy solid wear. We are in a splendid position to save our customers money if they buy now.

Your Clothing an Important Matter
We bought heavily in Blue Serge Suits immediately following declaration of war. We have large stocks of the same serge, exactly same dye as we have handled for years.
Exceptional values in best Victorian's Serge Suits at \$17.50, \$20, \$22.50 and \$25. Add \$3 to these prices and you cannot match our qualities elsewhere.
Boys' and Youths' Suits. Ample choice.

Serge, Gabardine and Broadcloth Dress Goods
at a saving on today's values.

Black and Colored Duchesse Silk Underpriced

The Transcript

The Transcript has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programmes, cards, envelopes, office and wedding stationery, etc.
Address all communications and make remittances payable to A. E. SUTHERLAND.

THURSDAY, OCTOBER 12, 1916

Premier Hearst has cabled his endorsement of the British Red Cross Appeal on October 19th as follows: "My visit to England and France has aroused deeper appreciation than ever of the splendid work of the Red Cross. It deserves every support and I trust the people of Ontario will respond with their usual generosity to the British Red Cross Appeal for October 19th."

It is stated that there is an increasing tendency to cigarette smoking among the youth of Glencoe, and the question arises, Where are the boys getting the dope? A provincial act prohibits the sale to minors, and it is a duty incumbent on county constables to take youthful cigarette smokers before the magistrate and have them questioned as to how and where they obtained the cigarettes. Unfortunately Glencoe is at present without a constable able to be on duty.

Speaking of the injurious effects of cigarette smoking, a physician of large experience stated the other day that he had treated more physical wrecks the result of cigarette smoking than those from the results of alcoholism, and while there was some hope for the alcohol victim it was absolutely impossible to restore the victim of the cigarette habit.

May Go to Front as Unit.

Information received from officers of the corps in England makes it appear that the 135th Middlesex County Battalion, commanded by Lieut. Col. Bart Robson, is to go to the front as a unit in a new division of Canadians to be formed at an early date. Officers and members of the Middlesex Battalion are enthused by the prospects and feel that the unit is signally honored. Practically all Canadian regiments which have gone overseas for months have been broken up into drafts of reinforcements for battalions already on the firing line, and the loss of identity has been a particularly disappointing result to those who worked to build up a reputation.

Don't miss the basketball game between Melbourne and Glencoe at the G. H. S. field day.

Appin School Fair.

At the Appin School Fair held a few days ago there were a large number of entries in each class, and the quality was exceptionally good. The people of Appin donated extra money for the sports and extended the prize list to the tenth place in each class. Following is the list of prize winners. Names are in order in which awards were made; the figures denote number of school section:—

Potatoes—Cassie Mae Willey 4, Ross McTaggart 13, Henry Chisholm 6, Wallis Reilly 5, Jean Tanner 13, Golden Bantam Corn—Dugal Murray 1, Janie Johnson 6, Howard McIntyre 13, Margaret Campbell 3, Garnet King 13.

Golden Glow Corn—Mae Huston 13, Isabel Lotan 6, John Allen 8, David Willey 4, Mae McRae 8.

Wisconsin No. 7 Corn—Kenneth Webster 6, Murray Webster 6, Alex McRae 8.

Mangels—Ross Allen 8, Jessie Allen 8, Vera Black 4, Weston Bennet 6, Mabel Smith 5.

Mangel Seed—Vera Black 4, Peter Johnson 13.

Oats—Wm. Beckett 5, Minnie Mullin 1, Harriet E. Smith 5, George Gates 5.

Sheaf of Oats—Harriet E. Smith 5, Robert A. McKellar 5, Wm. Trestrain 8, Willie Gates 5, Harold Gates 5.

Sweet Peas—Cassie Mae Willey 4, Bouquet from Home Garden—Ian McArthur 13, Wm. Trestrain 8, Earl Edwards 13, Mabel Lotan 6, Viola Payne 13.

Pen of Bred to Lay Barred Rocks—Anna Bell McRae 8, Viola Payne 13, Kenneth McLean 3, Geo. Coulthard 8, Marion Campbell 3, Willie Gardiner 5, Melvin Murray 4.

Cockerel—Harvey Parker 5, Willie Webster 6, Kenneth McLean 3, Jean Allen 13, Bert Perry 13.

Pullet—Harvey Parker 5, Kenneth McLean 3, Willie Webster 6, Bert Perry 13, Stewart McDonald 13.

Pair of Barred Rocks—Stanley Hyndman 8, Donald McCallum 4, Margaret Murray 1, Margaret Campbell 3, Margaret Lovell 5.

Colt, Heavy Draft—George Huston 5, Norman Adams 4.

Colt, Light Breed—Leonard Lockwood 13, Jean Bain 13.

Calf, Beef—Norman Adams 4, Ronald McFie 13.

Calf, Dairy—Gertrude Lotan 13, Hughie Rankin 13.

Pennmanship, pupils over ten—Bessie Covey 13, Margaret Lovell 5, Jeanette Holman 5, Florence Hurley 5, Marion McKellar 5.

Pennmanship, pupils under ten—Nellie Griswold 1, Don McCallum 4, Marion Campbell 5, Dorothy McIntyre 6, Stanley Hyndman 8.

Essay—Marion Campbell 3, Marion McKellar 5, Margaret Lovell 5, Kenneth McLean 3, Clarence Urquhart 8.

Map of School Section—Inez Henry 5, Angus Fletcher 6, Flora Gough 5, Lae Bontia Boyd 5, Sadie E. Johnson 3, Map of Township—Melvin Murray 4, Lawrence Eaton 4, George Huston 5, Gertrude Lovell 5, Harriet E. Smith 5.

Half Pound Fudge—Georgina Smith 5, Thelma Watterworth 13, Wenita Hurley 5, Donald Mitchell McCallum 4, Irene Parker 5, Metcalfe.

One quart Peaches—Ella Switzer 4.

Verna Black 4, Julia Isles 4, Olive Mae Black 13, Thelma Watterworth 13, Half Dozen Tea Biscuits—Flora Gough 5, Metcalfe, Mabel Smith 5, Jean Bain 13, Mary Sinclair 13, Anna Bell McRae 8.

Pumpkin Pie—Verna Black 4, Mary Johnson 3, Viola Squire 5, Evelyn Pool 8, Flora McRae 8.

Knitted Wristlet—Jean Lockwood 13.

Plain Apron—Anna Bell McRae 8, Marion Campbell 3, Mary E. Johnson 3, Idelpha Johnson 13, Anna Johnson 3, Birdhouse—Alex. McRae 8, J. D. Johnson 3, George D. Thurston 5, Alex. Stuart 5.

Collection of Weeds—Marion Campbell 3, Archie McDougall 3, George Huston 5, Ronald McFie 13, Margaret Griswold 1.

Collection of Weed Seeds—George Huston 5, Vera Black 4, Leonard Lockwood 3, Lorena McIntyre 6, Lorna Gates 5.

Collection of Insects—Robert A. McKellar 5, Kenneth McLean 3, Vera Black 4, Margaret Lovell 5, Gertrude Lotan 1.

Collection of Work of Insects and Plant Diseases—Ronald McFie 13.

Collection of Leaves—Archie McDougall 3, Vera Black 4, Anna Bell McRae 8, Ella Switzer 4, Newton McFie 13.

Collection of Art—S. S. No. 5, S. S. No. 3, S. S. No. 1, S. S. No. 2.

Collection of Apples—S. S. No. 13, S. S. No. 8.

Collection of vegetables—S. S. No. 5, S. S. No. 8.

Collection of Flowers—S. S. No. 5, S. S. No. 8.

School Parade—S. S. No. 3, S. S. No. 5, S. S. No. 6.

Three-minute Address—Harold Gates 5, Chas. Auld 3, Meryl Stephens 1, Marion Campbell 3, Margaret Griswold 1.

Singing Contest—S. S. No. 3, S. S. No. 3, S. S. No. 5, S. S. No. 13.

Weed Naming Contest—S. S. No. 5, S. S. No. 1, S. S. No. 3.

Prize Winners in Care of Plots.

Oats—Minnie Mullins 1, Dennis Griswold 1, Archie McDougall 13, John Murray 13, George E. Gates 5, Philip McRae 8, Murray Webster 6.

Potatoes—Fred King 13, Willie Campbell 3, Annie Maude Johnson 3, Gordon Thornicroft 13, Mary Johnson 3, Ross McTaggart 13, Clifford Perry 13.

Field Corn—Mae Huston 13, Idelpha Johnson 13, Mabel Lotan 6, Garton Chisholm 6, John Allen 8, Ray Chisholm 6, David Willey 4.

Sweet Corn—Garnet King 13, Margaret Campbell 3, William Trestrain 8, Archie Johnson 4, Russell Mullins 1, Jean Johnson 6, Howard McIntyre 13.

Mangels—Harvey Parker 5, Vera Black 4, Jessie Allen 8, Norman Adams 4, Ross Allen 8, Peter Johnson 13, Harold Gates 5.

Walkers School Fair.

Following is the prize list of the school fair held at Walkers on October 14th. Names appear in order of awards; figures indicate No. of school section:—

Potatoes—Edna S. Munroe 23, Gordon Fields 4, Lillian Campbell 17, William McKellar 17, Duncan McNaughton 4.

Golden Bantam Corn—Gordon Mc-

Callum 17, Ella Quick 3, Minnie McNeil 4, John Hugh Walker 4.
Golden Glow Corn—Archie Walker 4, John A. Steele 17, Harold Nevins 3, Mangles—Grant Smith 17, Albert Moon 17, John A. Munroe 17, Donald McNeil 23.

Oats—James Munroe 17.
Sheaf of Oats—Gordon Fields 4, James Munroe 17.

Asters—Edna Munroe 23, Ella Quick 3.

Bouquet from Home Garden—Mae Moore 17, Annie Ferguson 23, Leone Winters 3, Bessie Munroe 23, Jean Patterson 4.

Pen of Bred to Lay Barred Rocks—Marion Campbell 17, Leone Winters 3, Wm. E. Munroe 23, John Walker 4.

Bred to Lay Barred Rock Cockerel—Marion Campbell 17, John Walker 4, Leone Winters 3, James Munroe 17, Wm. E. Munroe 23.

Bred to Lay Barred Rock Pullet—John Walker 4, Marion Campbell 17, James Munroe 17, Leone Winters 3, Wm. E. Munroe 23.

Pair of Bred to Lay Barred Rocks—Philip Patterson 4, Wm. McKellar 17, Jas. Munroe 17, Duncan McNaughton 4, Georgina Munroe 23.

Heavy Draft Colt—T. W. Little 17, Philip Patterson 4.

Light Breed Colt—Philip Patterson 4.

Beef Calf—Duncan McNaughton 4.

Pennmanship, pupils over ten—Marion Campbell 17, Minnie McNeil 4, Beatrice McAlpine 17, Gladys Campbell 23, Wm. Munroe 23.

Pennmanship, pupils under ten—William McKellar 17, James Munroe 17, Bessie Munroe 23, Edith Nevins 3.

Essay on Agricultural Subject—Ella McKellar 17, M. J. Munroe, Elsie Leitch 17.

Map of School Section—John Little 17, Elsie Leitch 17, Annie Ferguson 23.

Map of Township—Alex. McKellar 17, Alex. Munroe 17, Marion Campbell 17, Annie Ferguson 23.

Half pound Fudge—Edith Nevins 3, Elsie Leitch 17, Beatrice McAlpine 17, Vera McCallum 4, Vera Nevins 3.

Leaf Bread—Annie Ferguson 23, Beatrice McAlpine 17, Gladys Campbell 23, Ida Graham 4.

Cookies—Mildred Graham 4, Anna Lightfoot 3, Jean McNaughton 4, Laura Campbell 23, Bessie-Munroe 24, Plain Apron—Edith Nevins 3, Laura

Campbell 23, Annie Ferguson 23, Jean McNaughton 4, Vera Nevins 3.
Fancy Apron—Gladys Campbell 23, Georgina Munroe 23, Edna Munroe 23, Marion Campbell 17, Beatrice McAlpine 17.

Milk Stool—John Walker 4, Gordon Fields 4, Gordon McCallum 4, Wm. E. Munroe 23, Duncan McNaughton 4.

Collection of Weeds—Elsie M. Leitch 17, Georgina Munroe 23, John A. Little 17, Gordon Fields 4, Wm. E. Munroe 23.

Collection of Weed Seeds—Wm. E. Munroe 23, Gordon Fields 4, T. W. Little 17, Elsie M. Leitch 17, Mae Moore 17.

Collection of Insects—Elsie M. Leitch 17, Mary McAlpine 17, James Munroe 17.

Collection of Leaves—Ida Graham 4, Laura Campbell 23, Annabel Graham 4, Elsie Walker 4.

Collection of Art—S. S. No. 17, S. S. No. 23.

Collection of Apples—S. S. No. 23, S. S. No. 4.

Collection of Vegetables—S. S. No. 17, S. S. No. 23.

School Parade—S. S. No. 3, S. S. No. 17.

Three-minute Address—Fred Monk 23, Frank Smith 17.

Weed Naming—S. S. No. 23, S. S. No. 17.

Prize Winners in Care of Plots.

Oats—Malcolm James Munroe 17, Alexander Munroe 17, Jimmie Graham 4, Charlie Lightfoot 3, Louis A. Carroll 3.

Potatoes—Lillian Campbell 17, Donald McNeil 23, Lloyd Little 17, Wm. McKellar 17, Annabel Graham 4, Alex. McKellar 17, Duncan McNaughton 4.

Field Corn—John A. Little 17, Harold Nevins 3, Mabel Smith 5, Elsie Leitch 17, Beatrice McAlpine 17, Winslow Beer 3, Archie Walker 4.

Sweet Corn—Gordon McCallum 4, Minnie McNeil 4, Ella Quick 3, Marguerite Winter 3, Neil A. Leitch 17, John H. Walker 4.

Mangels—Albert D. Moore 17, John A. Munroe 23, Grant Smith 17, T. W. Little 17, Elva Bessie Munroe 23, Ida Graham 4, Mary Munroe 4.

Vital statistics for Metcalfe township for quarter ending Sept. 30:—

Marriages, 2; births, 9; deaths, 4.

THE CENTAUR COMPANY, NEW YORK CITY.

Dressing Station, Firing Line—Official Film, "Battle of the Somme."

An urgent call for help again goes forth from the Motherland's mighty life-saving agency—the British Red Cross. The Empire is called upon to give greatly, give lovingly, give quickly, that the sick, wounded and suffering on all the battle fronts may not languish and perish in their hours of deepest need.

Here is a great work in which all can share. The Joint War Committee of the British Red Cross Society and Order of St. John is the only institution which carries voluntary aid to the sick and wounded of the British forces on land and sea in every region of the war. Thousands of lives of our bravest and best are saved through this splendid work. YOUR gift may save a life. Isn't it worth doing? It is GIVE!

Make "Our Day" Your Red Cross Gift Day Give on October 19th

Ontario's princely gift in 1915 of \$1,514,000 rang, a clarion mercy call, throughout the Empire. The British Red Cross were grateful beyond measure, and their appeal through Lord Lansdowne, President, now comes to us as to friends who sympathize and help. The need is greater to-day than a year ago—it is ever growing. Will Ontario do less than she did last year? No! GIVE—give a day's pay; give all you can. GIVE!

Premier Hearst Has Seen the Work

"My visit to England and France has aroused deeper appreciation than ever of the splendid work of the Red Cross. It deserves every support, and I trust the people of Ontario will respond with their usual generosity to the British Red Cross Appeal for October 19th."

HON. W. H. HEARST, Prime Minister of Ontario.

He gives twice who gives quickly. Your help is needed NOW!

The Motherland's only direct appeal to us for help in this great war is her great Red Cross mercy work. Ontario's response must and will be quick and generous. Give through the Treasurer of your Local Committee—or, send your subscription to the Clerk of your municipality—or, make it payable to Hon. T. W. McGarry, Treasurer British Red Cross Fund for Ontario, Parliament Buildings, Toronto.

Don't Let Your Stricken Defenders Call in Vain, but

Give and heal!

The Red Cross looks after the transportation of sick and wounded—it equips thousands of hospitals, rest and convalescent homes, it supplies countless requisites for hospital work, clothing and other comforts. Over 2,000 Red Cross Motor Ambulances are at work on the various fronts, while "rest stations," hospital trains, steamers and launches, food for prisoners, books, special work for the blind, etc., etc., are a few, only, of Red Cross activities.

The Sick and Wounded Call For Your Help Give on October 19th

Mr. N. W. Rowell, K.C., Brings a Red Cross Message

"I bring a message of cheer to those who have relatives at the front and who fear they may be wounded. I believe everything human skill can do, that human care and sympathy can provide, is being done and provided each day and each night throughout the year by the Army Medical Corps and the Red Cross. It is a perfect marvel of efficiency."

MR. N. W. ROWELL, K.C., Leader of the Opposition.

Wounded in the Trenches—Official Film, "Battle of the Somme."

EASY SHOES

for all sorts of feet. Our Shoes insure comfort and the greatest satisfaction of service. They are made by people who have made shoe making a science. That's why's they fit so well and wear so long.

We keep all shapes and styles and our prices are the lowest in town.

McAlpine Bros.

Anniversary services will be held in St. John's Church, Presbyterian church, Sunday next at 2:30 and 7:30 o'clock and will be conducted by Rev. Mr. Stewart of Dutton.

It is estimated that five thousand people attended the Melbourne Fair last week, the largest attendance on record. The exhibits exceeded those of other years in both quality and quantity.

Dr. W. H. Wilson of Randall, Iowa, was in town last week renewing his subscription for The Transcript and left five dollars with the editor to assist in purchasing comforts for the boys overseas.

The latest shortage attributed to war conditions is one affecting electric incandescent lamps of all sorts, and, according to dealers, the people may regard themselves as most fortunate to get a supply at all.

Keep the home fires burning and the boys at the front supplied with comforts. Don't lag, keep sending, every week, every day, if necessary. We cannot do too much for the boys who are risking their lives for our benefit.

Wm. Dobson, who purchased the farm of D. A. McKee in Albion, near near Walker's bridge, had his residence and nearly all contents destroyed by fire last week. An insurance of \$250 was on the building and contents.

A union service will be held in the Presbyterian church next Sunday evening, when Mr. Bowen, Bible Society representative, will give an address. The evening services in the Anglican and Methodist churches will be withdrawn.

Members of fraternal societies who get carried along by their brethren for months and then just "drop out" will be into rest on Monday evening, that they can be used and made to pay up. It is a good doctrine, too. It is a mighty unfraternal thing to cheat brethren who have shown so much consideration as to keep members in good standing.

The annual thank-offering meeting of the Ross Mission Band will be held in the lecture room of the Presbyterian church, Monday evening, Oct. 16, at eight o'clock. Mrs. (Rev.) Stewart of Lalgie will be present and give an address on Trinidad. Special music is being prepared. Everyone is invited to attend. Silver collection will be taken.

A birthday party given by Mr. and Mrs. W. R. Sutherland at their home on Thanksgiving Day was in honor of his mother, Mrs. Wm. Sutherland, who on the 26th of this month will have completed her ninetyeth year and is as bright and hearty as many who have not passed the allotted span.

Mrs. Sutherland was born in 1829, what is now the city of London, Ontario, near the village of London, Canada West, and is probably the oldest living person born there. Her father was Wm. Robb, who had the grist mill in London. Scenes and incidents of her childhood days in the village "The Forks" are still fresh in her memory and she delights to tell about them.

PERSONAL AND SOCIAL

—Miss J. Baird spent the holidays at Pakhill.

—Alex. Craig was home from Detroit for the week-end.

—Miss Fothergill spent the holidays at her home in Birtwell.

—Misses Vida, Myrtle and Ada Reynolds spent the holiday at their home here.

—Miss Lillian Westland of London is visiting her cousin, Miss Fennel Sutherland.

—Misses Annie and Marion McKellar spent the week-end in Windsor and Detroit.

—Mr. and Mrs. Roy Roberts spent Thanksgiving Day with his parents in London.

—Misses Edith and Edna Precious visited their parents here over the holiday.

—Mrs. J. N. Sexsmith visited her son Ernest at Goderich on Thanksgiving day.

—Misses Elizabeth and Elsie Leitch spent the holidays at Lawrence and Middleton.

—Levi Smith was home for the week-end and returned to Quebec on Monday evening.

—Miss Evelyn McLachlan was home from her school at Thamesford for the week-end.

—Miss Cook, principal of the public school, spent the week-end at her home near Fergus.

—Mrs. Walter Williams and children of Kitchener are visiting her sister, Mrs. J. A. McLachlan.

—Miss Grace McLachlan has returned to London Normal School after visiting at her home here.

—J. N. Sexsmith and Dr. and Mrs. Mumford visited at W. N. Sexsmith's, Chatham, on Thanksgiving day.

—Mrs. Charles Cummings of Dresden was here for the week-end to see her mother, Mrs. Kuns, who is ill.

—Dr. R. N. Brown of Chatham and Beth Gardner of Queen's University spent Thanksgiving at Dan Gillies'.

—Miss Wills Hall, who is now teaching in Frankland school, Toronto, spent the holiday with her parents here.

—A. B. and Alex. McLellan had a visit for the week-end and Thanksgiving from their father, Arch. McLellan, and his daughter and babe of Strathroy.

—Mrs. Lou Hyttenrauch and little son have returned to Windsor after visiting her mother, Mrs. Craig. Miss Lena Craig accompanied them for a short visit.

—Mr. and Mrs. Geo. Hurley, Chas. and Wm. Hurley, Miss Mary Hurley, Mr. and Mrs. Robert McKellar and Mrs. George of Glencoe attended the funeral of the late Richard Steinhoff of Thamesville.

—R. Sutherland, manager of the Nelson, B. C. Daily News, came to Glencoe while on a business trip and spent over Thanksgiving Day with his mother, Mrs. Wm. Sutherland, and other relatives.

—Miss Christie McKenzie, who has been teaching at Manlybarrie, Alberta, is seriously ill at Medicine Hat of pleuro-pneumonia following an operation on her throat. She was slightly better at last accounts.

"I FEEL LIKE A NEW BEING"

"FRUIT-A-TIVES" Brought The Joy Of Health After Two Years' Suffering

MADAM LAPLANTE

35 St. Rose St., Montreal, April 4th.

"For over two years I was sick and miserable. I suffered from constant headaches, and had Pulpitation of the Heart so badly that I feared I would die. There seemed to be a lump in my stomach and the Constipation was dreadful. I suffered from Pain in the Back and Kidney Disease.

I was treated by a physician for a year and a half and he did me no good at all. I tried "Fruit-a-tives" as a last resort. After using three boxes, I was greatly improved and twelve boxes made me well. Now I can work all day and there are no Headaches, no Pulpitation, no Heart Trouble, no Constipation, no Pain or Kidney Trouble and I feel like a new being—and it was "Fruit-a-tives" that gave me back my health."

MADAM ARTHUR LAPLANTE.

50c. a box, 6 for \$2.50, trial size, 25c.

At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Having decided to carry on the business of undertaker in my own name, I wish to announce that in future I will promptly attend to any work entrusted to me, day or night, phone 93. —William Whelan.

—Mrs. A. R. McKenzie left recently for Keewatin.

The Serpent's Venom.

A physician while talking with a group of friends remarked: "It is common to hear people speak about poisonous serpents. Serpents are never poisonous; they are venomous. A poison cannot be taken internally without bad effects; a venom can. Venoms to be effective have to be injected directly into the circulation, and this is the manner in which the snake kills. Their venom taken internally is innocuous."

An Appreciation.

An old sea captain was turning over the leaves of a friend's album when, coming to the photograph of a young lady of whose acquaintance the family was rather proud, he was asked what he thought of her. "Awful," was the old sea rover's reply. "If I were going to make a rare stroke of business I'd buy that girl for what she was worth and sell her for what she thinks she is worth!"—London Mirror.

Learning It.

The Old Married One—You will learn, my dear, that men are most contrary creatures. The Young Married One—Oh, I know that already. The Old Married One—Indeed? The Young Married One—Yes; I cook things my husband likes and yet he doesn't like the things I cook.

A SWISS MYSTERY

It Looked For a Time as if It Were Beyond Penetration.

BUT IT WAS ALMOST SOLVED.

An American Visitor in the Republic, Who Wanted to Know About Its President, Finally Came Near Getting the Information He Craved.

Switzerland is a republic that runs with the exactness of a Swiss watch, its machinery as hermetically concealed. I had heard that the Swiss republic set the pattern of government for the world, and I was anxious to know something of its methods and personnel.

I was sorry that I was so ignorant. I didn't even know the name of the Swiss president and for a week was ashamed to confess it. I was hoping I might see it in one of the French papers I puzzled over every evening, but at the end of the week I timidly and apologetically inquired of our friendly landlord as to the name of the Swiss president.

But then came a shock. Our landlord grew confused, blushed and confessed that he didn't know it either. He had known it, he said, of course, but it

THROUGH THE DARK SHADOWS

Or The Sunlight of Love

CHAPTER VIII.—(Cont'd.)

Behind him glittered the long French windows of the morning-room, one of which stood open, revealing the luxury of the room beyond; the table with its silver and delicate china service, and the purple hangings of the walls.

Presently he stopped in his stroll and turned his stern eyes towards the landscape stretching beneath him. Through the confusion of the dark woods there lay a long line of turf, cut here and there by formidable hedges, and divided by a streak of glittering silver, which was in reality a dangerous stream—indeed, higher up it became a torrent—forming the final obstacle of the Barmister steeple-curse. All the Leroy had been fond of horses. The Barmister stables had sent many a satin-coated colt to carry off the gold cup; and this race-course had been carefully kept and preserved by the family for many generations.

While he stood gazing on it a light footstep sounded behind him, and a slender hand was laid on his shoulder. He turned slowly, and with a kind of

kingly courtesy kissed the long white fingers.

"You are early as usual, Constance," he said approvingly.

Lady Constance Tremaine smiled as she turned with him and walked along the mosaic pavement of the terrace. She was little more than a girl, with a slim, graceful figure, and clad in a simple white morning gown, which served to enhance her youthful beauty. Her face was a pure oval, with clear-cut features and an exquisitely curved, sensitive mouth, while her grey-blue eyes gazed beneath their thick lashes with a calm serenity that bred faith and confidence in those who looked into them. Crowned with a wealth of pale golden hair, together with her delicate complexion, she looked as if she had stepped from one of the old Florentine pictures of the saints.

As the two so typical of youth and age stood side by side in the clear morning light, the resemblance between them was marked. Indeed, they were related, for the Tremaines were a distant branch of the Leroy family, and the same proud blood ran in their veins. Lady Constance had been brought up in the Barmister household, and Adrien had grown to regard her in the light of a loved and trusted sister; but, as yet, nothing more.

"Won't you come in to breakfast?" she said, as they reached the end of the terrace. "Aunt Penelope is not coming down; her nerves are bad this morning."

Miss Penelope Leroy, Lord Barmister's only sister, was not strictly speaking Constance's aunt, merely a distant cousin; but as a child Constance had been accustomed to call her her aunt, and the habit had grown up with her.

Lord Barmister smiled grimly.

"I advised her to let the cucumber alone last night," was his only comment as he turned towards the breakfast-room.

Constance smiled too, for she knew that when Miss Penelope complained of her nerves, it was in reality nothing but a case of indigestion.

"How bright the course looks this morning!" she said, with a charitable wish to change the subject, for Lord Barmister was apt at times to wax caustic over his sister's small weaknesses.

"Yes," he said grimly; "like all things dangerous, it is pleasant to the eye. I hate that strip of green—it is the grave of many a Leroy's best hope. The turf has always been a fatal snare to our race. But, come," he broke off, "let us go in. Thank goodness, Adrien arrives to-day."

"To-day?" repeated Lady Constance, a delicate flush rising to her face.

"I thought he was not going to arrive until the morning of the race."

"The race is to-morrow, but he comes to-day," answered Lord Barmister. "I had a note from him last night saying he would be here by lunch time, and was bringing a few friends down with him."

"And Mr. Vermont, too?" inquired Lady Constance almost timidly.

The old man's face darkened and his thin lips set in a hard line.

"Yes," he said fiercely, "I suppose so. Adrien is as much in love with him as a young fellow with his first sweetheart. I know that he's a scoundrel and a rogue—but here, what would you? Times have changed since my day; we have replaced horses by motors, to spoil our roads and ruin our lands, and gentleman friends by base-born, scheming adventurers."

"Oh, but, uncle," Lady Constance timidly remonstrated, "surely Mr. Vermont is a gentleman?"

"Yes, by Act of Parliament!" snapped the old man, in whose aristocratic eyes a lawyer was but little removed from the criminal whose case he defended.

"Certainly it is strange that Adrien should be so attached to him," the girl said musingly; she, herself, had little liking for the gentleman in question, though her sense of justice had made her speak a good word for him.

"But he is a clever steward, at least," "A rogue's only virtue," said Lord Barmister dryly.

"Amusing, too," she suggested.

"We've no longer need of a court jester," returned her companion, with sarcasm. "But never mind, Adrien will find out his mistake for himself one day. Certainly, I am not going to attempt to strip the mask off his friend's face. Give him rope enough, and he will hang himself. Meanwhile, give me some more coffee, and leave the fellow's name alone; I hate even the thought of him."

Lady Constance refilled his cup and brought it to the end of the table, for she loved to wait on the old man. As she did so, his sharp eyes caught the glitter of a piece of needlework across the back of her chair, and with a curt gesture towards it, he said:

"What is that?"

She blushed, almost deeply, then took it up, and opened it out for him to see. It was a silk riding jacket, in the scarlet and white racing colors of the Leroy, and their coat of arms, worked in silver, upon the breast.

"For the Grand National," said Lady Constance, as she refolded the jacket.

"You worked it yourself?" questioned the old man abruptly.

"Yes," she replied, blushing again. Then, as he was silent for some minutes, she said almost timidly: "You do not mind, uncle, do you?"

He started. "Mind! Good heavens, child, why should I? You know the wish of my heart only too well. What better favor could he wear than yours? As far as I am concerned, you were plighted in your cradles. Leroy and Tremaine are no unequal match. No—no—my dear, make his jacket, and win his heart—if you can!"

Some few hours later, panting and throbbing, the Daimler motor drew up in the castle courtyard—Adrien and his friends had arrived for the great steeplechase.

Attracted by the sound of the bark-bell, who apparently disliked the unaccustomed monster—Lord Barmister himself invariably using horses—Lady Constance stepped from her room on to the balcony which looked down upon the courtyard beneath.

The gentlemen's hats flew off in greeting, and, as Adrien looked up, an unusual thrill ran through him, as he noted the simple beauty of the girl above him.

"We thought we'd left the sun behind us," Constance, but evidently she is still overheard," he said smiling.

She looked down with mock reproach, playfully shaking at him a flower which she held in her hand.

"I thought compliments were out of date, Adrien. Have you enjoyed your drive?"

"Not half so much as the welcome," was the courteous reply, as he caught the rose which she had let fall.

She laughed, and blushed a little, then turned to the other members of the party, who had now alighted from the car.

"Ah, Lord Standon, I did not know you were coming." Then, as that young man's face lengthened, she added quickly: "Unexpected pleasures are always welcome. I am glad to see you, Mr. Paxhorn."

After a word of greeting to Mortimer Shelton, she drew back into her room; while the men, laughing and chatting, passed into the great hall, where they found Lord Barmister awaiting them. His stern face softened into a welcome as, with outstretched hand, he came forward to greet his guests.

"Ah, Shelton!" he said, "so you keep my boy company, and you, Paxhorn and Standon, Gentlemen, you are welcome—through there's no need to remind you of that, I know. Adrien, turning to his son, 'you have a fine day, did you drive or ride?'"

"We motored down, sir," answered the young man, in his soft, melodious voice.

His father frowned slightly. He heartily detested all modern innovations, and would never hold that motors—or indeed, any increased facilities for travelling—were improvements.

"They breed discontent, sir," he would declaim vigorously. "In my young days people were content to stay in the place in which they had been born, and do their duty. Now, forsooth, they must see this country and that, and visit a dozen places in the year, where their grandparents visited none. Anything for an excuse to fritter away their hard-earned savings!"

"You'll find the roads here better suited for horses than for oil-cans," he said grimly. "We are primitive, as you know."

Shelton laughed; he knew his host's ideas on this subject, and was apt to respect them.

"So much the better, sir," he said in a cheerful tone; "I am a bit tired of the smell of petrol myself. Give me Nature without a corset."

"You'll certainly get that here," Lord Barmister replied, favoring his young guest with an approving glance. Shortly afterwards, they made their way to the morning-room. Here, luncheon had been laid, and Lord Barmister, Miss Penelope, with Lady Constance, were awaiting them. The little party sat down to table, each one secretly only too ready for the meal; for the ride through the fresh, country air had been a fairly long one.

"I was really hungry, Constance," Adrien said, with his low, careless laugh. "There must be magic in the air of Barminster."

"Yet still you come here so seldom," returned his cousin gently.

"Business and the cares of State," quoted Adrien, with a smile. "But I might retaliate. Why do we not see you up in town? Society misses one of its brightest stars."

Lady Constance toyed idly with the grapes on her plate; then she looked up.

"Society has many brighter lights than I, Adrien," she said quietly.

"But now, tell me about the race—your aunt is terribly anxious over it; are you not, dear?"

"Yes, my love," returned Miss Penelope, who, reality, hardly knew one horse from another.

"Oh, Adrien always wins," put in Lord Standon. "That's a foregone conclusion. Have you seen the 'King' lately, Lady Constance?"

"Oh, yes," she replied. "He is exercised in the paddock every morning, and is in fine form."

Adrien smiled.

"Poor 'King Cole'; he'll be worth his weight in gold if he wins to-morrow! What about the other horses, Stan; are they down?"

"Yes," replied Lord Standon; "my man saw some of them at the station; but no sign of the Yorkshire chestnut."

"So much the better," said Adrien; "perhaps his owner has thought discretion the better part of valour and withdrawn him."

(To be continued.)

Commercial Fertilizers in Orchards.

Regarding the effects of commercial fertilizers in orchards, as these are generally most noticeable year after application, people are sometimes misled. I think money may be lost by them, if not judiciously used. Nitrate added in the fall would be money wasted, while phosphates thus applied would not, as these would not leak out as the nitrate would. Where clover and other legumes can be grown and cultivated in, nitrates are a useless expense. They are a detriment where wood growth is sufficient without them. Roughly speaking, if the foliage is pale colored and insufficient, the indication is that nitrate

When The Children Rush In From School.

and about for "something to eat", cut off generous slices of bread and spread with

CROWN BRAND CORN SYRUP

"Twill be the children's daily treat. So good for them, too—wonderfully nourishing, to build up their little bodies and help to keep them well and strong, as wholesome food should."

The most delicious of table syrups for Griddle Cakes, Waffles and Hot Bunlets. Excellent for Cake and especially for Candy-making.

In 2 1/2, 10 and 20 pound tins—and 3 pound "Perfect Seal" Glass Jars. At all grocers. Our new recipe book, "Desserts and Candies" shows the new and right way to make a lot of good things. Write for a copy to our Montreal Office. It's free.

Makers of "Lily White" Corn Syrup—Borden's Corn Starch— and "Silver Glass" Laundry Starch.

ates will do good. This, of course, is true if the soil moisture has been conserved by constant cultivation. No fertilizer is worth anything if the moisture to dissolve it is lacking.

If the fruit is off color and small, it may indicate lack of sunshine and overcrowding. If not, potash may be what is needed. If the cores are large and hollow, and the pips imperfect, phosphates are lacking. It must be remembered that the lack of one ingredient may hinder the tree's development, even if all others are in excess. It must be borne in mind, too, that fertilizers are transient in their effect, being soluble and quickly absorbed. The proper time to employ them is in the spring when growth is starting. This is when the trees want food. If applied later they may do much good, if the moisture is plentiful up to the time the buds open into bloom.

Fertilizer should be disked or cultivated in. Never use a plow in an orchard if you can help it, for it will tear and mutilate the roots. Rather use a disc, which will cut them off.

clean. By the judicious use of fertilizer larger and better apples and a better crop can be obtained, if the orchard really wants them; not otherwise.—W. J. L. Hamilton in Farm and Dairy.

Electrics for Dairies.

Eight dairy companies in London besides being a splendid advertisement because of its dignified and neat appearance, the electric is superior to the horse in that it is capable of more speed, an important factor in this service, and at the same time holds its own against the horse, as well as the gasoline truck, because of its economy of operation, and the absence of disagreeable odors. In the dairy service, which necessitates early deliveries and many stops within a short space of time, the electric is the chosen vehicle, as it is capable of sufficient speed and is more quickly and easily started and stopped than any other type of conveyance.

FREE PRIZES TO GIRLS

Beautiful Doll and Doll Carriage.

This lovely Canadian Doll is 16 inches tall and looks just like the picture. She has jointed arms and legs and natural looking head, hands and feet. She has a pretty dress with lace and ribbon trimmings.

The Doll Carriage has a steel frame and wheels and is covered with leatherette. It is 24 inches high, just the right size for the big doll we are giving. Any girl will be proud to own this lovely Doll and Doll Carriage.

Just send us your name and address and we will send you 30 of our lovely 12x18 inch colored illustration pictures to sell to your friends and neighbors at only 10 cents each. They are so pretty that nearly every house wants four or five of them. When you are sold you send us our money (Three Dollars) and we send you the Doll by mail, with charges all prepaid, and we send you the Doll Carriage too, just as soon as you show your doll to your friends and get three of them to sell our pictures and earn prizes.

Write to us to-day and you can get your Doll and Doll Carriage quickly.

HOMER WARREN CO., Dept. 151, TORONTO

The Farm

Turning Scrap into Money.

"How do I make my creameries pay with all the competition there is around them? I'll tell you in about four words: 'I use my by-products.' I'm not going to tell you what I make from them, but I will say that it's a pretty healthy amount."

This was the statement made by the owner of several prosperous Illinois creameries in answer to a question as to how he succeeded in making the profits he did each year despite the fact that his plants were located in districts where competition was decidedly keen.

"I hear a good many creamerymen complain that they're doing business on a margin which makes that business little else than a gambling proposition and yet they are annually selling buttermilk for hog feed, which they could, with very little effort, readily dispose of at a far greater profit over the counter of a soda fountain. Buttermilk, like every other drink, is something to which the people must be educated, but get them once started and you will be surprised at the demand there is for it."

"There have been a lot of creamerymen who have admitted that the buttermilk proposition may be all right for a large city, but that their plants are located in small towns, where everybody is accustomed to going to the creamery and getting all the buttermilk they wish for nothing."

"Let me tell you right here, that there is nothing to that. Last year four-fifths of all the buttermilk I placed on the market was sold in the little towns in which my plants are located or in the small towns near them. It's an actual fact that in several towns, where we sold our buttermilk there were creameries located where the people could get all they wanted for practically nothing, and yet they brought our product at the soda fountains daily and would set up a clamour whenever we failed to get it to them on time."

"How did we do it? Well, I don't suppose that there is much chance of our buttermilk customers seeing your paper, so I'll tell you. The cartoons make the sales."

"We put out our product in neat, single-delivery containers, something which the druggist or the soda-fountain proprietor was not ashamed to take out of his ice box and open before his customers. Bulk buttermilk may be all right, but I don't believe that it will sell like the placed in individual containers. You know, the customer likes to feel that he is getting something which has been made for him alone. Then, too, there are a lot of people who like to take buttermilk home but who won't do it if they have to carry a tin down to the drug store and back. No, I believe that you will find the use of a container will pay."—Creamery Journal.

Balancing the Ration.

Balancing the ration for a dairy cow may seem to be a task requiring thorough scientific knowledge of the composition of foodstuffs and of the requirements of the animal organism. So it does, if done strictly according to science, and the nearer the feeder approaches to the true scientific standard the better and more satisfactory will be his result. But without this detailed scientific knowledge it is possible to approach a great deal nearer to scientific standards than is done in ordinary hit and miss system of feeding in which the cow's ration is governed by the relative sizes of the hay and the straw mow, the grain bin not being taken into consideration. A few helpful suggestions and simple rules are contained in a bulletin issued by the U. S. Department of Agriculture. They are compelled for the help of the inexperienced, and are as follows:

By balanced ration is meant the combination of such a proportion of nutrients and in such quantities as the cow requires to maintain her bodily functions and as she can utilize in the production of milk. These nutrients are classified as protein, carbohydrates and fats. Protein is one of the principal constituents of milk; fats and carbohydrates perform much the same functions, that is, produce energy and heat, and in the balancing of a ration are usually classed together. If the cow is given a ration containing an excess of either element, the excess is liable to be wasted; hence the economical importance of balanced ration.

Corn silage, corn stover, timothy hay, millet hay, prairie hay, hays from the common grasses, straws of the various cereals, and cottonseed hulls may all be classed as low in protein content, while legume hays, such as alfalfa, the clovers, cowpeas, soy beans and out and pen, are classed as roughage high in protein. Grain and concentrated feeds are the chief sources of protein, and the mixture should be made to fit the class in which the roughage belongs.

Under most circumstances the cow should be fed all the roughage that she will eat up clean.

Lively Dodging.

"Do you take plenty of active exercise?"

"Well, the street where I live is a favorite one for auto speeders."

Grapes

We have purchased well in advance and reserved an enormous stock of great values specially for this sale, so buy your needs for months to come as this is an opportunity to buy White Sheetings, White and Grey Cottons and Linens at less than mill prices.

Mill ends Flannelette at 11c, in a variety of patterns.

Remarkable Values in Sweater Coats at last year's prices. Children's Sweater Coats very specially priced.

E. MAYHEW & CO.

The Transcript.

THURSDAY, OCTOBER 12, 1916.

Cairo.

Mrs. H. A. Summers and daughter Evelyn are London visitors.

Mr. and Mrs. Gus Wehlann of Rodney are visiting friends in this city.

Mr. and Mrs. A. Delabar of Buffalo are the guests of Mr. and Mrs. A. Wehlann.

Miss Myrtle Annett of London is making a brief visit at her former home here.

M. D. Smith of London arrived on Friday to enjoy a few days at his former home.

Miss Margaret Carter, a former teacher in S. S. No. 10, is renewing acquaintances here.

The Ladies Aid met at the home of Mrs. T. E. Fenby on Thursday and decided to hold a bazaar on the 9th inst.

Anniversary services were held in the Presbyterian church on Sunday, conducted by Rev. Dr. Boyd of Thamesville, moderator. The day being an ideal one, large crowds assembled at each service who listened attentively to two practical discourses during the day. The musical part of praise was conducted by the choir, assisted by members of the Fancher church.

A solo by B. W. Fancher at the evening service was a pleasing feature of the occasion. The Armstrong church, which their service and attended in large numbers, manifesting an agreeable and Christian feeling.

Awful asthma attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

MIDDLEMISS.

Douglas McArthur is building a new stable.

J. A. McDonald loaded a car of wheat this week.

John McFarlane loaded a car of hogs Saturday at \$10.75 cwt.

Mrs. Daniel McGugan of London called on friends here a few days ago.

Wm. Carroll, who was thrown from a rake by his runaway team and badly hurt, is able to be out again.

The school garden fair will be held on the school grounds, S. S. No. 11, Middlemiss, on Saturday, Oct. 14th.

Arch. McNabb, who has been west for a month or two, arrived home on Friday last, having been telegraphed for to see his mother, who is very low.

We understand that the parties interested in the tile drain at the east end have come to an agreement and the drain, which was filled with sand, will be opened.

Mr. and Mrs. John Fletcher have returned from the West. They say they are glad to see old Middlemiss again and have no desire to live in the West, although things are fairly good out there.

Our streets, now under way of improvement, will be equal to the best of any of our neighbor towns, when completed. Next, let us fix up our fences, paint our buildings and lastly but not least cut down the weeds.

If your children are troubled with worms, give them Mother Graves' Worm Exterminator; safe, sure and effective. Try it, and mark the improvement in your child.

Kilmartin.

Miss Elizabeth McAlpine was home from her school over the holidays.

Mac Munroe and bride of Walker-ville are spending a few days at Neil Munroe's.

Margaret Little who is attending Normal School at London, was home for the holidays.

D. F. McLachlan, wife and twin daughters of Windsor visited at Alex. McLachlan's for a few days.

Mrs. Smith of Chatham, who spent some time visiting her son, Rev. Dr. Smith, returned home last week.

Mr. and Mrs. Crosby of Highgate have returned from a honeymoon trip and are visiting at Duncan McAlpine's.

Grant Smith met with a painful accident last week when he was run over by a buggy several of his teeth being knocked out.

Mr. Woods of Kilmartin was severely hurt a few days ago while at work in Graham's gravel pit, being nearly buried by a cave-in.

Sacrament of the Lord's Supper will be dispensed in Burns' church, Moss, on Sunday morning next. Preparatory services will be conducted by Rev. McKay of Alvinston on Friday at 11 o'clock.

How to Cleanse the System.—Farnelle's Vegetable Pills are the result of scientific study of the effects of extracts of certain roots and herbs upon the digestive organs. Their use has demonstrated in many instances that they regulate the action of the liver and the kidneys, purify the blood and carry off morbid accumulation from the system. They are easy to take, and their action is mild and beneficial.

Wardsville

Miss Mary Martyn spent the holiday in London.

Mrs. Skill of Los Angeles is visiting friends here.

J. Ward of Windsor spent the holiday at his home.

W. Aitchison of London spent the holiday at his home.

Mrs. Walker of Florence is visiting her sister, Mrs. Yates.

Fred Luke of London spent the week-end with Leonard Purdy.

Miss Hazel Miller of Chatham spent the week-end at her home here.

Fred Smith of Kingsville spent the week-end with his parents here.

Mrs. T. Henderson of Detroit spent the week-end with Mrs. C. Minna.

Miss Vera Palmer of Detroit spent a few days last week at her home here.

Mrs. McKay of London spent the holiday with her daughter, Mrs. O. J. Glenn.

Mrs. Reid and daughters Marion and Dorothy of Bothwell are visiting at her home here.

Mrs. Collins and daughter Pat of Windsor and Mrs. Hobbs of Birr spent the holiday with Mrs. J. A. Mulligan.

Mr. and Mrs. F. Jackson, Mr. and Mrs. A. Jackson and Miss Gertrude of St. Thomas spent the holiday with Mrs. M. Jackson here.

Misses H. Quigley of Essex, L. Sheppard of Windsor, N. Jackson of Portchester and B. Watterworth of Port Lambton spent the holiday at their homes here.

No better protection against worms can be got than Miller's Worm Powders. They consume worms and render the stomach and intestines unattractive to them. They heal the surfaces that have become inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and their operation is altogether health-giving.

Newbury

Mrs. D. McRae visited Detroit friends last week.

Miss McEachern of Alvinston is visiting Miss Anabel Hillman.

Wm. J. Armstrong and daughter Dorothy spent the week-end in Windsor.

Mrs. W. H. Grant returned home to Windsor on Sunday. Her mother, Mrs. Fenby, accompanied her.

Anniversary services were held in Knox church on Sunday. Rev. Kenneth McDonald of Galt preached fine sermons. The choir gave special music, being assisted by Mrs. J. W. Webster of Melville, Sask.

Among the Thanksgiving visitors in town were J. H. Bayne and family and Graydon Batner of Detroit, Carson Mann and R. J. Haghighi of Windsor, Ed. Grant and family of London, R. Mermer of Windsor, Cameron Bayne of Windsor, Miss Owens of Oakville, Mr. and Mrs. Churchill of London, A. J. Walker and family of London and Mrs. John Mitchell of Walkerville.

WE ALL HAVE MISSIONS IN THE WORLD.—There is a work to do for every man on earth, there is a function to perform for everything on earth animate and inanimate. Everything has a mission, and the mission of Dr. Thomas' Electric Oil is to heal burns and wounds of every description and cure coughs, colds, croup and all affections of the respiratory organs.

BETHEL-METCALFE.

Miss Anna McGill is visiting friends in Detroit.

Miss Susie Boyd, Elderton, spent the holidays under the parental roof.

Mr. and Mrs. Wm. R. Henry, Gleace, visited friends here on Sunday.

Mrs. Freeman, Grand Rapids, Michigan, is visiting her daughter, Mrs. Chas. Boyd.

Miss Margaret Moran of London is visiting her aunt, Mrs. Annie Towers, at this place.

The Misses Punched and Wright of London spent Sunday with Mr. and Mrs. John Boyd.

A number from this place attended anniversary services at Springfield, Sunday, there being no service at Bethel.

Mrs. Annie Henry has returned home after spending some time in the Canadian West visiting her son John Whitman, Sutherland, Saskatchewan, and Mr. and Mrs. Stanley Towers, at Pease, Alberta.

Miss Jean Galbraith won the Red Cross quilt for which the ladies of the Bethel Red Cross Club have been selling tickets. The proceeds of the quilt were \$20.00 and the money will be spent in filling Christmas stockings for the boys in the hospitals and trenches in France.

The next meeting of the Bethel Red Cross Club will be with Mrs. James Johnston on Oct. 19 and will be the annual meeting of ladies. A report of the year's work will be read and there will be an election of new officers. All those interested in the work are requested to be present, also those who are not interested are invited to be present and find out what the others have been doing during the past year.

Idle Talk.

"Goab ding!"

"What happened?"

"I talked two hours trying to persuade that girl to give me a kiss."

"Well?"

"Just as she agreed her father came in and began to talk politics."—Louisville Courier-Journal.

Hard to Whip.

"When you're whipped," said Mr. Dolan, "you ought to say you've had enough."

"If I have enough strength left to say I've had enough," replied Mr. Rafferty, "then I'm not whipped yet."—Washington Star.

His Share.

Kris—What did you get out of your aunt's estate? Kross—After settling things up the lawyer blew me to a good dinner and loaned me \$5.—Brooklyn Life.

If you invite people's opinion you're no right to sneer at them because they don't say what you wanted.—David Graham Phillips.

BE FAIR WITH THE DOG.

Give It a Square Deal and It Will Repay You For Your Care.

Only muzzle a dog if it is absolutely necessary. The wearing of a muzzle tends to make dogs cross and snappish. It does not prove that a dog has rabies or is mad because it froths at the mouth. It may have a sore throat or a fit.

Clipping the ears is a cruel and barbarous practice, wholly unnecessary, depriving the animal of its natural comfort and beauty and injuring its hearing.

If you must tie up the dog have the end of the chain secured to a ring on a long wire so that it can have the run of at least twenty or thirty feet.

Don't blame the dog for showing no ambition if it is overfed on meats and sweets. Its health and spirits will be of the best if it is given simple but substantial food and allowed the freedom of outdoor life.

Train the dog with firmness and fairness. The animal is eager to learn what is wanted of it and when once it understands will follow instructions with almost human intelligence.—Our Dumb Animals.

"A Right and Lawful Road"

An example of the old rough and ready methods of arriving at a measurement is the Elizabethan way of getting the "feet." Falentin Leigh, who wrote on surveying, records that after service on Sunday sixteen men were stopped at the church door, just as they happened to come out, and drawn up in line, left foot to left foot. The length thus obtained was taken as "a right and lawful road to measure and survey the land with," and a sixteenth part of it as "a right and lawful foot." Although big and little men were thus roughly averaged against each other, the results naturally varied to some extent. Hence it is, as Shaw Sparrow notes in treating of this "road" as the architectural "bay" which gives us the "bay window," that a bay is sometimes found to be rather less than sixteen feet of twelve inches.—London Chronicle.

Prodigality of Life in Ancient Egypt.

The reckless prodigality with which in ancient Egypt the upper classes squandered away the labor and lives of the people is perfectly startling. In this respect, as the monuments yet remaining abundantly prove, they stand alone and without a rival. We may form some idea of the almost incredible waste when we hear that 2,000 men were occupied for three years in carrying a single stone from Elephantine to Sals, that the canal of the Red sea alone cost the lives of 120,000 Egyptians and that to build one of the pyramids required the labor of 300,000 men for twenty years.—Westminster Gazette.

Origin of the Mastiff.

Mastiff is a term applied to a very large and powerful species of the canine family, and there is considerable conflict of opinion regarding the origin of the word. Some claim that it is derived from the Italian mastino or the French mastin, both of which signify large limbed. This word, they say, was gradually corrupted into masti, a Lincolnshire expression meaning very large, muscular or big, until it gradually assumed its present form. Others again say its true origin is the old German masten, to fatten, because the mastiff is a large dog and so seems better fed than any other.—London Field.

Epictetus.

The "Discourses of Epictetus" were written not by the philosopher himself, but by his faithful pupil Arrian, afterward the historian of Alexander the Great. Arrian tells us that he took down the sayings of his master at the time they were delivered, and thus we may rely upon the substantial correctness of the discourses. Epictetus wrote nothing, and but for the thoughtfulness of his affectionate disciple we would have known nothing of his wonderful teachings—teachings which have inspired many of the greatest men who have lived during the past 2,000 years.

Satisfied With Little.

The Australian bushmen wish only a shelter from the rain, and if they can find a cave or overhanging rock that will shelter them they will build no house. If there is no such natural shelter they select a place where many trees or bushes grow together and weave the branches together and cover them with grass. This forms a roof to keep off the rain.—Pittsburgh Press.

Idle Talk.

"Goab ding!"

"What happened?"

"I talked two hours trying to persuade that girl to give me a kiss."

"Well?"

"Just as she agreed her father came in and began to talk politics."—Louisville Courier-Journal.

Hard to Whip.

GAME IN THE ANTARCTIC.

Seal Steak is Good, and So Are the Breasts and Eggs of Penguins.

In the antarctic there is not the immense variety of game which is to be found in north polar regions; but, on the other hand, it is very abundant and can be turned into food with the smallest exertion. The Weddell seal, which sometimes weighs as much as half a ton, allows itself to be killed and cut up with placid calm. Its natural enemies are in the water, and for long generations it has been accustomed to bask in the sun undisturbed.

Seal steak is an acquired taste, but when acquired explorers prefer it to tinned provisions. It is a common assumption that seal flesh tastes of oil. That is a mistake; the flesh itself contains no fat, but it is extremely rich in blood, and in taste suggests the Scottish delicacy known as black pudding.

Penguins, too, make a very desirable addition to the antarctic larder. Epicures eat only the breast, which is rather like hare, but of a more delicate flavor. The eggs, which are very abundant in the spring, suggest ducks' eggs, but are about four times as big. They are excellent eating if you happen to pick a new laid one, but this is naturally something of a lottery, and a penguin egg can be very bad indeed.—London Chronicle.

OVER THE EQUATOR.

The Coldest Air Blows High Up Above This Torrid Region.

Winds blow not merely along the surface of the earth, but upward and downward throughout the atmosphere. They whirl about in all directions. So it is impossible to construct a weather chart that will really show the directions of the winds, for such a chart would have to be in three dimensions.

Professor Alexander MacAdie of Harvard in an article in the Geographical Review describes some of the recent experiments in the upper air performed by sounding balloons. The atmosphere has, roughly, two layers, the lower called the troposphere and the upper the stratosphere. The strongest winds are found just below the stratosphere, and it would seem that pressure changes originate in this region. The stratosphere is highest over the equator and lowest over the poles, but its height varies with the season. "At the equator," says Professor MacAdie, "as we rise in the air the temperature continues to fall to a much greater height than in temperate latitudes. Indeed, the lowest temperature is found above the equator."

Origin of Satin.

The discovery of the principle of the manufacture of satin was a pure accident. The discovery was made by a silk weaver named Octavio Mai. During a dull period of business one day he was pacing before his loom, not knowing how to give a new impulse to his trade. As he passed the machine each time he pulled short threads from the warp and, following an old habit, put them into his mouth and rolled them about, soon after spitting them upon the floor. Later he discovered a little ball of silk upon the floor of his shop and was astonished at the brilliancy of the threads. He repeated the experiment and eventually employed various mucilaginous preparations and succeeded in making satin.

Deaf as an Adder.

The expression "deaf as an adder" is from the Psalms of David, where it appears in the following form: "Their poison is like the poison of serpents. They are like the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming ever so wisely." East Indian travelers tell us that there is a widely prevailing superstition in the east to the effect that both the viper and the asp stop their ears when the charmer is uttering his incantations or playing his music by turning one ear to the ground and twisting the point of the tail into the other.

Lots Easier.

Bobby rushed out to meet his father the other night as he was returning from work and said breathlessly: "Oh, papa, I won't have to study nearly so hard at school any more." Now, Bobby had been doing far from well, and his father was pleased to hear of the new interest, hoping for better things.

"How's that, my son?" said he.

"Oh, I got put back a class."

Her Next Move.

"Let me see," mused the young wife as she picked up the cookbook, "I have mixed the latter for the angel cake. Now what do I do next?"

"Telephone for the doctor," answered the heartless husband, who happened along in time to overhear her.

Varied Views of Marriage.

Marriage is a lottery to the bachelor, an urgent necessity in the opinion of the widower, a delightful temptation to the widow, a habit with a good many.—Louisville Courier-Journal.

Cause For Thanks.

Wife—The dressmaker says she won't make me another gown until you pay her bill. Hub (with relief)—That is very good of her. I must write her a note of thanks.

Falls of Igazu.

More than twice as wide as Niagara and fully fifty feet higher, the falls of Igazu, in South America, is one of the great wonders of that continent.

Our affections are our life. We live by these. They supply our warmth.—Channing.
