The copy filmed here has been reproduced thanks  
to the generosity of:

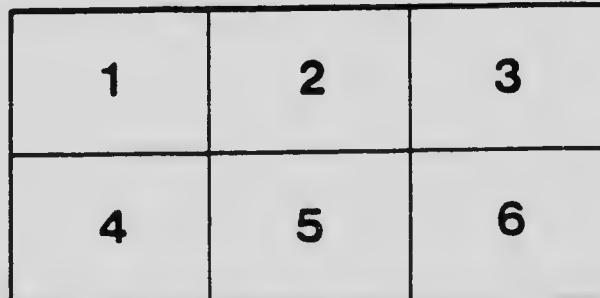

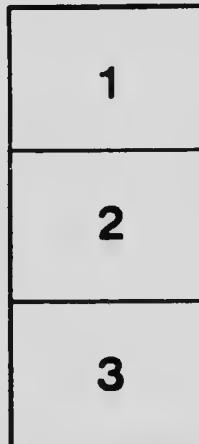

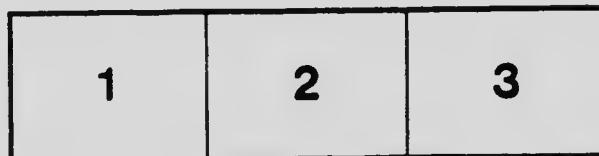

National Library of Canada

The images appearing here are the best quality  
possible considering the condition and legibility  
of the original copy and in keeping with the  
filming contract specifications.

Original copies in printed paper covers are filmed  
beginning with the front cover and ending on  
the last page with a printed or illustrated impres-  
sion, or the back cover when appropriate. All  
other original copies are filmed beginning on the  
first page with a printed or illustrated impres-  
sion, and ending on the last page with a printed  
or illustrated impression.

The last recorded frame on each microfiche  
shall contain the symbol → (meaning "CON-  
TINUED"), or the symbol ▽ (meaning "END"),  
whichever applies.

Maps, plates, charts, etc., may be filmed at  
different reduction ratios. Those too large to be  
entirely included in one exposure are filmed  
beginning in the upper left hand corner, left to  
right and top to bottom, as many frames as  
required. The following diagrams illustrate the  
method:

L'exemplaire filmé fut reproduit grâce à la  
générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le  
plus grand soin, compte tenu de la condition et  
de la netteté de l'exemplaire filmé, et en  
conformité avec les conditions du contrat de  
filmage.

Les exemplaires originaux dont la couverture en  
papier est imprimée sont filmés en commençant  
par le premier plat et en terminant soit par la  
dernière page qui comporte une empreinte  
d'impression ou d'illustration, soit par le second  
plat, selon le cas. Tous les autres exemplaires  
originaux sont filmés en commençant par la  
première page qui comporte une empreinte  
d'impression ou d'illustration et en terminant par  
la dernière page qui comporte une telle  
empreinte.

Un des symboles suivants apparaîtra sur la  
dernière image de chaque microfiche, selon le  
cas: le symbole → signifie "A SUIVRE", le  
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être  
filmés à des taux de réduction différents.  
Lorsque le document est trop grand pour être  
reproduit en un seul cliché, il est filmé à partir  
de l'angle supérieur gauche, de gauche à droite,  
et de haut en bas, en prenant le nombre  
d'images nécessaire. Les diagrammes suivants  
illustrent la méthode.

GROUND ALLSPICE

OTTAWA, May 20, 1918.

J. U. VINCENT, Esq., K.C., B.A., L.Ph.,  
Deputy Minister of Inland Revenue.

SIR,—I beg to hand you a report upon 188 samples purchased for Allspice, by our inspectors throughout Canada, between August and November of last year. Instructions were issued to purchase Allspice only, but through mistakes on their part, certain inspectors have obtained other spices, so that the report actually comprises the following:—

|                             |       |       |              |
|-----------------------------|-------|-------|--------------|
| Ground Allspice.....        | ..... | ..... | 164 samples. |
| Cayenne Pepper.....         | ..... | ..... | 10 "         |
| Paprika .....               | ..... | ..... | 5 "          |
| Mixed Spices (ground) ..... | ..... | ..... | 3 "          |
| " (whole).....              | ..... | ..... | 6 "          |
|                             |       |       | —            |
|                             |       |       | 188 "        |

Allspice, Pimento or Jamaica Pepper, has never been systematically examined in these laboratories. A few samples (16) were reported among other spices, in February, 1904 (Bulletin No. 95).

Attention has recently been called to the matter by advices of the importation into Canada of Allspice described as "Spent" in the sense that the characteristic volatile oil, to which Allspice owes its value, had been more or less fully removed by extraction. A sample of this material, representing Customs Entry No. E, 14764C = Toronto, showed on analysis:—

|                               |       |       |                |
|-------------------------------|-------|-------|----------------|
| Volatile Oil.....             | ..... | ..... | 1.72 per cent. |
| Fixed Oil.....                | ..... | ..... | 6.46 "         |
| Total Alcohol Extraction..... | ..... | ..... | 11.30 "        |

The following description of Allspice is quoted from Parry, Foods, and Drugs, p. 227, and Leach, Food Inspection, p. 421:—

"Allspice, Pimento or Jamaica Pepper is the dried, fully grown unripe fruit of "Pimenta officinalis", a small evergreen tree native to the West Indies and cultivated, especially in Jamaica. It was recognized as official in the British and other pharmacopoeias, but was omitted from the former in the edition of 1914.

The fruits are dark reddish brown, hard and globular, measuring 3 to 8 millimeters in diameter. They have a wrinkled woody pericarp on the surface of which are numerous oil cells containing essential oil, which gives the spice its characteristic flavour.

The aroma of allspice is less pungent than that of other spices, but is like cassia and cloves. The oil resembles clove oil. In chemical composition allspice resembles cloves, also in containing a large amount of tannin, but differs in containing much starch.

#### STANDARD.

We have no standard for Canada.

U. S. standard requires:

Not less than 8 per cent quercitannic acid.

Not more than 6 per cent ash.

Not more than 0.5 ash insol. in hydrochloric acid.

Not more than 25 per cent crude fibre.

#### CHEMICAL ANALYSIS.

There are very few authoritative full analyses available. Following are limits given by Parry (A) and by Leach, for 22 genuine ground samples (B) and 4 whole (C).

|                    | A                               | B              | C              |

#### RESULTS ON THE COLLECTION NOW REPORTED.

##### Ash.

All the samples meet the U.S. standard except No. 78944, 11.25%.

##### Ether Extract=

##### Non-volatile—

Parry gives 4.0 - 6.2  
Leach quotes 3.77 - 6.92 for ground.  
4.35 - 7.72 for whole.

A large number of samples have higher non-volatile extractive than 6.2.

*Volatile extractive—*

Parry says 3.0 to 6.5 per cent but quotes 1.64 to 3.67 for samples known to be pure (*loc. cit.*, p. 224).

Leach says 3.0 to 4.5 but quotes 1.34 to 3.5 for 22 genuine ground samples and up to 5.21 for whole.

The following samples have more than 4.5 volatile extractive.

Number 78944 contains shells. The others meet the U.S. requirements for tannic acid (8 per cent) (78939 = 7.7 per cent).

The method used here was precisely as given in U.S.A. Bulletin 107 (Revised) p. 163. Extraction with ether that had been washed with water and dried over sodium; evaporation of the ether at room temperature, drying 18 hours over sulphuric acid and weighing for total and heating to constant weight at 110° C. for non-volatile.

There is certainly some loss of volatile matter, shown by discoloration of the acid of the desiccator. However, a constant weight is reached in the time given and experiment showed no further loss of weight in a week. Somewhat numerous check

determinations show fair agreement for total extractive. The range of variation is 0.5 per cent and less. But there is the same or even greater variation in the figures for volatile extractive. This is so large relatively to the small amount present as to compromise the determination utterly for any precise use. (It may be surmised that the omission of extractive from the U.S. standard may be due to its extreme variability.) The use of commercial ether gives values 0.7 to 2.25 higher for total and non-volatile, apparently not affecting the volatile.

### *Quercitannic acid.*

Parry states 8 to 13 per cent.

U.S. standard: Not less than 8 per cent.

The determination was made at this laboratory only.

Method used is given in U.S.A. Bulletin 107, p. 104. (Löwenthal.)  
18 samples gave slightly less than 8 per cent.

The work above reported was mainly done by Mr. V. Kitto, assisted by Mr. L. E. Johnson of this staff; and it should furnish your Advisory Board with data upon which to draw up specifications for definition of this spice.

Three samples are found to be adulterated under Section 3 (a) and (b) namely:

No. 71287, Paprika, containing maize starch.

No. 78944, Allspice, containing foreign shells.

No. 79924, Allspice, containing foreign shells.

In the last named sample, the amount of foreign matter is small, and may possibly have been introduced accidentally.

I beg to recommend publication of this report as Bulletin No. 403.

I have the honour to be, Sir,  
Your obedient servant,

A. MCGILL,

#### NOTES AND COMMENTS.

Under this heading, as occasion arises, the Bulletins issued by this Department will contain, as an appendix, such comment as may seem necessary or advisable upon matters relating to the work of the Department in connection with the administration of the Adulteration Act, the Fertilizers Act, the Feeding Stuffs Act or the Proprietary Medicines Act.

It frequently happens that correspondents ask information regarding the above Acts, of such nature that the matter in question possesses general interest, and comment upon it would prove acceptable and useful to others than the immediate questioner. In such cases the reply may find a place in these columns. For convenience of reference these notes will be numbered in series.
