AGENTS WANTED

Civil engineers know that the semi-rigid built road, the
BEST ROAD was used in 1912, and that it has been suc-
cessfully used in DIFFICULT POSITIONS, both TRENCH
and IN BELGIUM and GERMANY. THE PRINCIPLE upon
which this road was built has been thoroughly demon-
strated by FIFTY TWO YEARS PRACTICE.
THE AMERICAN MECHANICAL APPLICATION of this
principle in road building (The Nash Road) has been
very different. It has been COMPLETELY, NOT PARTIALLY,
DIFFERENT, IN MANY MORE WAYS, and is VERY MUCH
CHEAPER.

Agents wanted throughout Canada for this road. Address
The Nash Road, Borough of Brooklyn, N. Y. City, U.S.A.

Stackpole
Patent Improved

Street Sweeping Machine

Is the Standard of Perfection

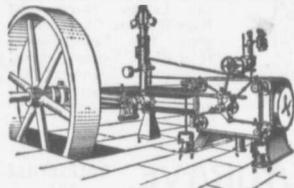

Because no sweeper so effectually does the work for which it is designed as "The Studebaker." It Sweeps Clean. No sweeper is constructed with the same degree of care and mechanical precision. It Wears Well. "The Studebaker" has the smallest number of working parts, and has less gearing than any other sweeper made. It is free from all unnecessary complications. With reasonable care it does not get out of order. Send for complete descriptive catalogue.
