REDUCED RATES OF PREMIUM.—HALF
CREDIT RATES OF PREMIUM.

THE great and decided success, which has attracted the Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary European Rates. The result of such Reduction is to canable parties to avail themselves of the important benefits to Life Assurance at smack lower Rates of Premium than those of any other disarrence Company + asserting themselves in Canada.

The Directors have also resolved to extend to British, North America the advantages afforded by the RALF GREDIT RATES of PREMIUM which have been so highly approved, and are secondly advantages advantages accorded to Paler Rates of the Control of the Co which have been so highly approved, and are so escally adopted by Policy Holders in the United Langlane. The most illustration of the Price offices to the Assured in the limits to which they may proceed by sea or land, to other parts of North Attarien without affecting their Interest in their respective Policies.

Humbolds and the Peace Congress.

The London Times, in publishing the subjoined letter of Humbolds to the Peace Congress of Frank-

fort, remarks:—

Another voice has been added to those of the Frashfort peacemakers, and it is the voice of a realities of the plattorio, between the homeometric than the overhoon among ourselves, between approbation of a principle and dislike of a demunstration, by depatching an epistle of adherence and sympathy to be read at the projected meeting. Unfortunately the letter arrived too late to be put in evidence, but that the moral might not se lost, it was furwarded to us for publication, and found, in due course, a place in our columns of Saturday. The idealization of a subject in G rman hands is apt to transcend the ordinary compreh ns on a Englishment, nor is the of a subject in G rman hands is any to transcent and ordinary compreh us on of Englishment, nor is the difficulty in any degues lessened when the result is communicated through the imperient medium of a translation. If, therefore, the practical suggestions contained in the Baron's lett. r appear of less importance than might be expected, some allowance

The general peace which our Continent has
now so long enjoyed, and the praise-worthy efforts
of many Governments to avert the oft-threatening
dangers of a general European war, prove that the
ideas which so promitently occupy your minds are
in accord mee with the sentiments called forth and
diffused by the increased culture of humanity. It
is a useful ent ryprise to inspire such sentiments in
the commonwealth by public coferences, and at
the same time to point out some way through which
wise and sincere governmente-may, by fostering the
progressive and legitimate development and perfectibility of free institutions, weaken the long accumulated elevents of asimosity.

How much mildress of manure and an improved
order in the organization of States have confined
within narrower limits the wild outbursts of physical violence may be seen by comparing the first
middle agas with modern times. The whole history
of the past shows that, under the protection of a
superior power, a long-nonvinheal yearning after a
noble sim, in the life of nations, will at length find
its consummation. Has not a diagreeful legisletion, consisting at—ps, encouraging, the infamous
system of Stavery and the traffic in himman beings
at least-on our continent and in the independentStater of former Spanish America, yielded to the
united efforts of the better part of mankind?

We must not, then, reliquish the hope that a
path will open by which all hostile divisions and
contracting jealounies will gradually disappear.

But few of the County Councils have yet had an opportunity to take the question up. Prince Edward County Council assed the matter over sub silentio, and Niagara declined to take any action upon it. Could the sense of the people be taken on the subject, I think there would be found a decided majority of

The Toronto Industrial Exhibition opened las night. It is neither more nor less than the Annual Exhibition of the Mechanics' Institute under a new name. On the whole I do not think it sur passes the Exhibition of last year. After a fuller examination I may particularize some articles that appear worthy of notice. In the meantime, there is one important invention that I canno pass over: It is a machine for the application of steam to agricu'ture, not by ploughing, but by digging. In all the attempts to make use of steam in agriculture, the power has been used in ploughing; but the machine which I am now describing iregret so much the more that my personal person

By reference to the leiegraphic report of the proceedings of Congress yesterday, which will be found in another column, it will be seen that the House of Representatives passed a bill authorising the Secretary of the Treasury to permit venesis from the British North American Provinces to load and unload in ports of the United States, provided similar privileges be extended to vessels of the United States. This is the first step towards a perfect reciprocity in trade between the two countries, and no doubt it will be followed up by others which will make the interests of Canada and other British American Provinces, and those of the United States, identical. It is also the first step towards the annexation of these Provinces to this country—an event which is certain of taking place, and which will be followed up to probability, before we shall be prepared for it. We do not, for obvious reaspops, wish to see this subject agitated immediately. That we will have to encounter it eventually, however, any person with half an eye

A SNAKE STORY.—A paper published at Charlestown, in Virginia, tells a story of a negro man in Diawidda county, who came to his death, a short time since, in a singuler manner: He was sent to a field on an errand, and, not returning as soon as expected, search was made, and he was found lying on the ground nearly dead, his eyes strained from their sockets, and exhibiting the appearance of strangulation. On a pproching nearer, it was discovered that a large snake had erawled down his throat. They attempted to drew out the snake by the tail, which extended a few inches out of the negro's mouth, but the tail was drawn in, and the negro died at the instant. It is supposed that he lay down on the ground and fell as'eep, and, the snake finding an entrance in the open mouth of the negro, craused down his throat, thereby causing its same and the negro's death.

TESTIMONIALS.

"It is, undoubtedly, the most complete Diesionary of the English language that has ever been putisished, and acas will. Etlares before any other Dictionary of that language will be required. It is, in every respect, far superior the folio editions of Johnson's Dietionary. The listroductory matter—on the origin and progress of language—English and the topics—onstans an immense mass of useful information, which must have cost the studies a very great degree of labor and research. The prominciation of Scripturs], Chasical, and Geographical mannes, forms a most valiable appendix to the Dictionary, and cannot be too highly appreciated, "—Thomas Dick, (Author of the Christian Philosopher, &c.)

Broughty Ferry, near Dundes, Sept. 12, 1340.

"In regard to pressureistens, we feet perfectly satisfied hall this revision places that subject on a true ground hau any other work of the kind. The system of prosouncing conforms to a pure and manly taste, adapted to the character of the language, and is far removed from all affectation and more fashion. "A It is now, as we faily believe, in this revision, brought down to the true circumstances of the community in all respects. And we hope it will find its way rapidly, not only to the schools and the study, but to the parior, the counting room, and to the every lay purposes of life, "—Hom. Miss. B. Calhous, Dec. 15-7.

WILLIAM MEMASTER.

CAMMET-MAKER AND DPHOLSTERER, 150, NOTER DAKE PTAKET.

Begs to announce to the public of Montreal, that he has been appointed AGENT for Canada East, for the sale of that invaluable Renovator of Varnished as Polished articles, named McCOMBRE'S COMPOUND RESTORATIVE, lately discovered by Mr. McComBRE, of New York, and of which he is the sofe Proprietor and Patentee.

The immense demand for the inestimable Composition throughout the United States, has made it difficult for the Proprietor to keep up the supply; and the Agent feels confident that a few trials of it in this quarter of the Continent will afford such satisfactory results, that the sale will be proportionably large.

THE above HOUSE, being situated near the PARADE GROUND DALHOUSIE SQUARE, THEATRE ROYAL, and within a few doors of the FORMER HOTEL, so favorably known by the above name—will be ready for Visiters early in May, under the Management of the Subscriber, who assures them that, in point of comfort, it shall be second to none on this Continent.

MANUFACTUREROF ORGANS & PIANO-FORTES, Corner of St. Joseph and St. Henry Streets,
MONTREAL,
WOULD respectfully call public attention to the large and complete assortment of Rosewood and Mahogany PIANO-FORTES, which he is now offoring for sale at his WARE-ROOMS; they consist of the Harmonic, Grand Square and Cottage Style, six, six and-a-half, and seven Octaves, with Metallic Frames.
These Instruments being of his own manufacture, he has no hesitation in saying, that, in briliancy and volume of tone, durability of workmanship, and excellence of finish, they are inferior to none imported into this Province.
From greatly increased facilities for manufacturing, he bega leave to state, that the above Instruments will be Solid at a great reduction from former prices; and that all orders for Pianos. Church, Parlour Reed Organs, Eolophons, and Harmonicons, of any size and capacity, will be executed with promptness, and warranted to give entire satisfaction. He has just finished a few beautiful and fine-toned Medocons, in Rosewood and Mahogany cases, from four, four and-a-half, to five Octaves—to the inspection of which he would invite the Musical Connoisseurs of Montreal.

MINERAL WATERS POINT DU JOUR, PARISH OF DASSOMPTION

POINT DU. JOUR, PARISH OF LASSOMPTION.

THESE truly valuable WATERS are distinguished for the large quaptity of Bromine and lodine they contain, and are acknowledged superior to all other Medicinal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the greatest degree in the most oppressive heat of Summer, and that without altering or affecting injuriously the health of the person using them; apon the contrary, they are found to improve and strengthen. The large number of cures effected by the use of the above Waters, enable us to recommend them to the public as an excellent remedy in a very great number of cases. The names of a few only of the persons of celebrity, who have given their written recommendation of the Waters, are here given. These, however, show the happy results arising from their application:—
