The yield will be largely governed by

the preparation of the soil. A thorough

ploughing in the fall is undoubtedly the best preparation, for a deep soil will hold moisture, and thus be in a better condition to withstand drouth. Potatoes are also a deep-feeding crop, and for this reason require a deep, mellow soil, in which their roots can ramify in all directions. In order to obtain the best results, plenty of barnyard manure should be applied, as few crops will give such good returns for manure as the potato. If it is applied in the fall, plow under then; if not put out until later, it can be either plowed under lightly or thoroughly mixed with the surface soil by means of a cultivator. Do not plant your land until you get it in just the right condition, for there cost and yet make quite as much profit is nothing that pays so well as thorough tillage. Where sod land is to be planted age eight to ten dollars for a lamb in with potatoes, it is immaterial whether it be plowed in the fall or not. Among recent visitors to Montreal was Alderman Clarke of London, Eugland, a member of the London county council which is composed of 120 members and is one of the most important and powerful organizations in England, having full charge of all the municipal government of London, and having to govern a population greater than that of the Dominion of Canada.

Mr. Clarke is famous in England as the has never been excelled. These banks were established in 1858 and are philanthropic institutions of great scope. During the first hour and a half the bank was opened, 700 depositors were handled, which speaks volumes for the system employed. The London Times, realizing the great good of such institutions, did everything in its power to help them along, and gave them the cerdit of alleviating to a great degree the sufferings of the great cotton famine of 1860. As all the labor of bookkeeping, tellers, ect., is voluntary, these banks are opened only once a week for business at 8 p. m. The ability to handle the savings of the poor, demonstrated by these banks, was the reason for the establishment of the government P. O. savings banks. The petition concludes by asking the Governor in council (1) to disallow the Act of Manitoba, 57, entitled "An Act to Amend the Public School Act"; (2) to give such directions and make such provisions for the relief of the Roman Catholics of Manitoba as the Governor in Council may see fit with regard to the School Act of 1890; (3) to communicate with the Lieutenant-Governor of the North West territories in order that, in amending the ordinance, redress should be given to meet the grievances of which the Catholics of the North West com-

They demanded that witnesses it will be able to traverse a large part of before the public accounts committee the city and will be a blessed visitor to should be examined under oath when the parched and dust bothered during the necessary, and Sir John Thompson has introduced and had passed a measure having that end in view.

THE rumor is again in circulation that the general Dominion election will be brought on in September of this year. The reason alleged for the government's hurry in going to the country is that there is danger of great financial stringency ahead, and they want to get the election over before it comes.

LORD ROSEBERY, the British premier, evidently has stormy times ahead. On Thursday his budget bill passed by a very sulky and may bolt at any moment.

Dr. Atkinson announces himself a candidate for the vacant legislative seat in Carleton, and is riding the martyr hobby. He was squarely beaten in the last election, and will meet a similar fate when the new election is called on.

THE MAN TO KNOW. Young man, the books will bid you read, The seers from Kant to Plato,

But get acquainted with yourself; You are no small potato And though you swing a blacksmith's sledg Or dig within the trenches, Hold up your head with those that sit Upon the highest benches.

Oh, read the sages of the world, And let their wisdom win you; But get acquainted with yourself, And find what you've got in you.

In modest arrogance of soul, Make your own valuation, Then slowly make the sluggard world Accept your estimation. Go, get acquainted with yourself,

Before your leaf is yellow; You'll find the man beneath your hat, Is something of a fellow. Then stir him up and prod him up, Before his force has fainted; Go, get acquainted with yourself,

Then make the world acquainted. Then trust the man beneath your hat, And when you come to know him, You'll find a fellow fit to grace

A novel or a poem. Go, get acquainted with yourself You'll find that very few are, For tasks for which you were designed, A better man than you are. Young man, the books will bid you read, The seers from Kant to Plato:

But get acquainted with yourself, Your are no small potato. -Sam, Walter Foss in Boston Globe

THE AMERICAN

SS DOLLAR SS Typewriter.

THIS is a well-made, practical machine, writing capitals, small letters, figures, and punctuation marks (71 in all) on full width paper, just like a \$100 instrument. It is the first of its kind ever offered at a popular price, for which the above claim can be truthfully made. It is not a toy, but a Typewriter built for and capable of REAL WORK. While not as rapid as the large machines sometimes become in expert hands, it is still at least as rapid as the pen, and has the advantage of such simplicity, that it can be understood and mastered almost at a glance. We cordially commend it to helpful parents and teachers everywhere.
